> 32. On two occasions in November 2016, Richard Carroll met with Trident COO Mike Luchino *to express interest in and pursue the potential purchase of Trident's Seafood processing assets* in Newport including both the meal plant and the surimi processing plant. These discussions continued into December 2016 **[*28]** and were of such a serious nature that Mr. Carroll disclosed that he had experience with an advanced technology that would dramatically increase the profitability of the meal plant by enabling it to produce food grade or nutraceutical protein rather than being limited to fishmeal products used in aquaculture.

> 33. In January 2017, Mr. Carroll told Mr. Luchino that he was *interested in discussing a price for the trident assets in Newport and negotiating a final deal as soon as possible*. Mr. Luchino promised to contact Trident's [President] and CEO, Joe Bundrant to determine whether Trident was seriously interested in selling these assets. In an email dated January 9, 2017, Mr. Luchino advised Mr. Carroll that he had talked with Mr. Bundrant, who is defendant Frank Dulcich's brother-in-law, that Trident was not interested in selling its assets and "things are at status quo for now."

FAC (emphasis added).

Utterly lacking within this description is any allegation that the partnership had the financial commitments necessary to even make a firm offer (to say nothing of actually completing the purchase). Despite Mr. Backus' apparent background in securing financing, he appears to have done nothing **[*29]** in advance of Mr. Carroll's "discussions" with Trident. The FAC is silent as to any discussions regarding a line of credit for operating expenses of the new company. There are no allegations detailing contracts, let alone discussions, between the proposed company and the fishermen it would need to secure product from. There are no allegations regarding the ownership percentages or control of Innovation Marine, the yet-to-be-formed company. Instead, the FAC reveals Mr. Carrol informed Mr. Luchino he knew of "advanced technology" that would help make the company profitable, and "express[ed] interest in [] pursu[ing] the potential purchase of Trident's Seafood processing assets[.]" FAC ¶ 32. "In January 2017, Mr. Carroll told Mr. Luchino that he *was interested in discussing a price for the Trident assets* in Newport *and negotiating a final deal as soon as possible*." FAC ¶ 33. These were not serious discussions. Mr. Carrol had yet to even discuss a price with Trident, let alone make a "proposal" to Trident.[9] These steps pale in comparison to the steps the management group in *Bubar* took to purchase the subsidiary. "This is pie in the sky, not 'substantial demonstrable steps to enter an industry.'" **[*30]** *In re Dual-Deck Video Cassette Recorder Antitrust Litigation, 11 F.3d 1460, 1466 (9th Cir. 1993)*.

Defendants argue that because Innovation Marine did not file Articles of Organization with the Oregon Secretary of State until after Trident sold its assets to Pacific Seafood, it could not suffer any antitrust injury. Innovation Marine filed Articles of Organization on April 21, 2017.[10] Snider Decl., Ex. 1; ECF No. 27. By law, April 21, 2017 is the date Innovation Marine's "corporate existence beg[an]." *Or. Rev. St. § 60.051(1)*. Trident sold the fishmeal plant to Pacific Seafood on April 10, 2017. FAC ¶ 3. Innovation Marine makes no argument, and points to no case, demonstrating a corporation can suffer an injury that occurs before the corporation exists. Instead, Innovation Marine argues that fact it did not incorporate until after the sale is a "trivial" point because, "[h]ad negotiations progressed, Mr. Carroll could easily have formed Innovation Marine at that time." ECF No. 33 at 18 n.4. But this admission simply demonstrates Mr. Carroll's discussions with Trident never progressed to a serious level. After all, Mr. Carroll formed Innovation Marine "for the purpose of acquiring and operating Trident's seafood processing assets in Newport, Oregon including [the very assets Mr. Carroll **[*31]** spoke to Trident about during November 2016 through January 2017]." FAC ¶ 13. That the discussions never advanced to the point where Mr. Carroll formed the company whose only purpose was to purchase Trident's assets demonstrates neither Innovation Marine nor the preexisting partnership took substantial steps to complete the sale.[11] In fact, it appears the most

---

[9] Even a "proposal" from Mr. Carroll would fall well short of the affirmative steps necessary to provide antitrust standing to a potential competitor. *See* *Bubar, 752 F.3d at 453* (discussing multimillion dollar proposals management group made, followed by counter proposals from A & B, stood "in contrast" to other situations involving "firm offers.").

[10] Plaintiffs do not object to the Court taking judicial notice of public documents related to Innovation Marine held by the Corporation Division of the Oregon Secretary of State. *Fed. R. Evid. § 201(d)*; *Lee v. County of Los Angeles, 250 F.3d 668, 689 (9th Cir. 2001)*.

[11] Innovation Marine argues that even if the fact that it did not exist at the time of the sale bars its claim, amending the complaint and naming the prospective partnership would cure this problem. Ordinarily, shareholders lack standing to bring a claim for an injury suffered by the corporation. *Bubar, 752 F.2d at 450-51*. The same holds true for prospective shareholders of a prospective corporation. *Id. at 451*. Because the rule could potentially be relaxed if "a person had all the resources to enter a market and intended to form a solely-owned corporation rather than an individual enterprise," for the purpose of this opinion I assume plaintiffs could amend the complaint naming the partnership. *Id.* Although I assume the partnership could potentially proceed as

"substantial step" taken by Innovation Marine towards acquiring Trident's Newport assets was the filing of this antitrust action seeking divestiture of those assets to Innovation Marine.

Innovation Marine argues, "Indeed, the only *Bubar* factor that plaintiffs do not meet is the consummation of contracts which, of course, Pacific Seafood and its co-conspirators colluded to prevent." ECF No. 33 at 23. Innovation Marine is correct that the consummation of contracts is one factor courts look to when evaluating whether a potential competitor was prepared to enter a market. *Bubar, 752 F.2d at 451-52*. As demonstrated above, however, Innovation Marine failed to allege that it either: (1) took any real "substantial steps" to enter the market; or (2) possessed the financial ability to purchase the equipment or facilities necessary to enter the market. **[*32]** Additionally, the court in *Bubar* rejected Innovation Marine's argument that the lack of a consummated contract with the alleged conspirator should not factor against it:

> All agree that the only way the management group could have become a competitor was to acquire Rogers or its assets. The first obstacle to establishing preparedness is that the management group did not have a binding contract to acquire the assets necessary to compete. The management group asserts that this should not be a factor because the contract that was necessary was to be made with one of the alleged antitrust conspirators. Yet, on the other hand, when our inquiry at this stage of the proceeding is one of standing, and one element is to determine how close the management group was to becoming a competitor, the lack of a contract to obtain the assets necessary to compete is surely a relevant factor, as the district court properly determined.

Id. at 452.

While I assume at this stage that Mr. Carroll and Mr. Backus had the background and experience to operate the prospective seafood processing company, they did not take the requisite affirmative actions to engage in the prospective business, did not allege the financial ability **[*33]** to engage in the business, and failed to consummate any contracts necessary of any prospective competitor.[12] Therefore, Innovation Marine lacks antitrust standing.

CONCLUSION

Defendants' motions to dismiss for lack of standing, ECF No. 21, 24-25, are GRANTED. No amount of repleading will turn Front Street into a participant in the relevant market. And no amendment will backdate Innovation Marine's filings with the Secretary of State. As explained above, amending to add the preexisting partnership as a plaintiff will not somehow turn the initial talks Mr. Carrol had with Trident into the "substantial steps" necessary for antitrust standing. Because Innovation Marine and Front Street lack standing, and because leave to amend would be futile, this action is DISMISSED, with prejudice.

IT IS SO ORDERED.

DATED this 23rd day of March, 2018.

/s/ Michael McShane

---

plaintiffs, I do not overlook the perhaps insurmountable hurdles the partnership would face going forward. *See* *Solinger v. A & M Records, 718 F.2d 298, 299 (9th Cir. 1983)* (per curiam) (Denying antitrust standing in failure to deal case brought by prospective shareholder in prospective company because, "The conveniences and immunities that arise from doing business through corporate entities carry with them the costs of having these corporate entities seek their remedies in court for injuries to their business or property interests. A shareholder of a corporation injured by antitrust violations has no standing to sue in his or her own name, and *a fortiori*, a prospective shareholder ordinarily would have no standing."). Because neither the partnership nor Innovation Marine took substantial steps to enter the market, neither party has standing.

[12] At oral argument, Innovation Marine stated that if granted leave to file an amended complaint, it would include allegations regarding steps taken to secure financing. But Innovation Marine included no such allegations in the proposed FAC, filed in response to defendants' arguments that it lacked standing as a prospective participant. The time to include such allegations was in the FAC. Second, even assuming Innovation Marine secured financing, the allegations reveal it never engaged in serious discussions to purchase the assets.

HN1[] **Motions to Dismiss, Failure to State Claim**

When an appeal arises from the grant of a motion to dismiss, the factual allegations set forth below are taken from the second amended complaint are accepted as true.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN2[] **Complaints, Requirements for Complaint**

The appellate court exercises plenary review of the district court's dismissal of the second amended complaint and may affirm the judgment below on any basis that is supported by the record. The appellate court accepts as true the factual allegations in the complaint, and draws all reasonable inferences in the plaintiff's favor.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Procedural Matters

HN3[] **Sherman Act, Claims**

Competition is at the heart of the antitrust laws; it is only anticompetitive conduct, or a competition-reducing aspect or effect of the defendant's behavior, that antitrust laws seek to curtail. It is inimical to the antitrust laws to award damages for losses stemming from continued competition. This comports with the principle underlying antitrust laws: to protect competition, not competitors. If the challenged conduct has an effect on prices, quantity or quality of goods or services, the court will find a violation of antitrust laws only when that effect harms the market, and thereby harms the consumer.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN4[] **Scope, Monopolization Offenses**

To prevail on a claim under *Sherman Act*, *15 U.S.C.S. § 2*, for attempted monopolization, a plaintiff must prove: (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. Moreover, to survive a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, the claim must be plausible on its face, allowing the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Liability hinges on whether valid business reasons, as part of the ordinary competitive process, can explain the defendant's actions that resulted in a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN5[] **Scope, Monopolization Offenses**

Allegations of purportedly anticompetitive conduct are meritless if those acts would cause no deleterious effect on competition. To determine whether conduct is anticompetitive, courts must look to the monopolist's conduct taken as a whole rather than considering each aspect in isolation.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN6[] **Scope, Monopolization Offenses**

It is well established that lower prices, as long as they are not predatory, benefit consumers, regardless of how those prices are set. Cutting prices in order to increase business often is the very essence of competition. Thus, lost business alone cannot be deemed a consequence of anticompetitive acts by the defendant.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN7[] **Scope, Monopolization Offenses**

To allege predatory pricing, a plaintiff must first demonstrate that prices are set below costs, and that the competitor had a dangerous probability of recouping those lost profits after it had driven other competitors out of the market.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN8[] **Scope, Monopolization Offenses**

Running a business with greater economic efficiency is to be encouraged, because that often translates to enhanced competition among market players, better products, and lower prices for consumers. Even unlawful conduct is of no concern to the antitrust laws unless it produces an anticompetitive effect.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN9[] Scope, Monopolization Offenses

In a traditional Sherman Act, 15 U.S.C.S. § 2 claim, a plaintiff would have to point to specific, egregious conduct that evinced a predatory motivation and a specific intent to monopolize. Some courts have inferred specific intent from anticompetitive or exclusionary conduct, for instance, when business conduct is not related to any apparent efficiency.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN10[] Scope, Monopolization Offenses

The United States Court of Appeals for the Third Circuit has held in Broadcom Corp. v. Qualcomm Inc. that because the dangerous probability standard is a complex and fact-intensive inquiry, courts typically should not resolve this question at the pleading stage unless it is clear on the face of the complaint that the dangerous probability standard cannot be met as a matter of law. The court may consider factors such as significant market share coupled with anticompetitive practices, barriers to entry, the strength of competition, the probable development of the industry, and the elasticity of consumer demand to determine whether dangerous probability was alleged in the pleadings. Entry barriers include regulatory requirements, high capital costs, or technological obstacles that prevent new competition from entering a market. No single factor is dispositive.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN11[] Scope, Monopolization Offenses

Because the elements of attempted monopolization are often interdependent, proof of one element may provide permissible inferences of other elements.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN12[] Standing, Requirements

Antitrust standing, which is a threshold requirement in any antitrust case. Rooted in prudential principles, antitrust standing is distinct from U.S. Const. article III standing, which is rooted in the Constitution. While harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact, courts must also consider whether the plaintiff is a proper party to bring a private antitrust action. Because antitrust standing is prudential, a court is not bound to address it first, because it does not affect the subject matter jurisdiction of the court, as Article III standing does. Of the requirements for antitrust standing, antitrust injury is a necessary but insufficient condition.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] **Standing, Requirements**

The test for antitrust standing is: (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses the concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN14[] **Scope, Monopolization Offenses**

In Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., the United States Supreme Court has rejected the notion that antitrust injury could be alleged by a private plaintiff averring that it would have fared better without the defendant's alleged conduct. Rather, the plaintiff must prove the existence of an antitrust injury, which is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury must reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN15[] **Scope, Monopolization Offenses**

The United States Supreme Court has held that even if the acquisition was unlawful because it provided the manufacturer with monopoly power, the plaintiffs failed to prove that there were anticompetitive effects of that acquisition in order to establish an antitrust injury.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN16[] **Scope, Monopolization Offenses**

At its most fundamental level, the antitrust injury requirement precludes any recovery for losses resulting from competition, even though such competition was actually caused by conduct violating the antitrust laws.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN17[] **Scope, Monopolization Offenses**

Conduct that merely harms competitors, while not harming the competitive process itself, is not anticompetitive.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN18[] **Scope, Monopolization Offenses**

A plaintiff who wants less competition or higher prices, that would injure consumers, does not suffer antitrust injury.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN19[] **Scope, Monopolization Offenses**

The United States Supreme Court has squarely rejected illegal conduct as a basis for antitrust injury. A competitor's illegal presence in a market is not a per se antitrust violation, and any resulting injury is alone insufficient for a private plaintiff to state an antitrust injury.

Constitutional Law > ... > Case or Controversy > Standing > Third Party Standing

HN20[] **Standing, Third Party Standing**

To have associational standing, the organization must meet three requirements: (1) the organization's members must have standing to sue on their own; (2) the interests the organization seeks to protect are germane to its purpose; and (3) neither the claim asserted nor the relief requested requires individual participation by its members.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN21[] **Standing, Requirements**

U.S. Const. art. III standing is a constitutional requirement, separate from antitrust standing, and Article III standing could be satisfied if a plaintiff presents a case or controversy.

Opinion by: RENDELL

Opinion

[*336] RENDELL, *Circuit Judge*:

Philadelphia taxicab drivers, aggrieved by the influx of taxis hailed at the touch of an app on one's phone, brought this antitrust action to protest the entry of Appellee Uber Technologies, Inc. ("Uber") into the Philadelphia taxicab market. The Philadelphia Taxi Association ("PTA"), along with 80 individual taxicab companies (collectively, "Appellants"), appeal the District Court's dismissal of their Second Amended Complaint ("SAC") alleging one count of attempted monopolization under *Section 2* of the Sherman Act, *15 U.S.C. § 2*, and seeking injunctive relief and treble damages under *Section 4* of the Clayton Act, *15 U.S.C. § 15*.

Appellants urge us to reverse the District Court's Order, contending **[**2]** that Uber violated the antitrust laws because its entry into the Philadelphia taxicab market was illegal, predatory, and led to a sharp drop in the value of taxicab medallions as well as a loss of profits. They contend that this is evidence that Uber's operation in Philadelphia was anticompetitive and caused them to suffer an antitrust injury. However, the conduct they allege falls short of the conduct that would constitute an attempted monopoly in contravention of the antitrust laws. Thus, we will affirm the District Court's dismissal of the SAC for failure to state a claim for attempted monopolization and failure to state an antitrust injury.

I. Background & Procedural History[1]

From March of 2005 to October of 2014, taxicabs operating in Philadelphia were required to have a medallion and a certificate of public convenience, issued by the Philadelphia Parking Authority ("PPA"). Medallions are property, and are often pledged as collateral to borrow funds to finance the purchase of the cab or to "upgrade and improve the operations of taxicabs." *53 Pa. C.S.A. § 5712(a)*. Once medallion-holders comply with the obligatory standards for taxicabs, they may obtain a certificate of public convenience. Those standards, **[**3]** which provide for safety and uniformity among taxicabs, require vehicles to be insured and in proper condition, and mandate that drivers are paid the prevailing minimum wage, are proficient in English, and have the appropriate drivers' licenses.

As alleged in the SAC, when the medallion system was mandated in Philadelphia in 2005, a medallion was worth only $65,000. In October of 2014, there were approximately 500 taxicab companies in Philadelphia. Together, 7,000 drivers held 1610 medallions, each valued at an average of $545,000.

Appellants are 80 of those 500 companies, which collectively hold 240 of the 1610 medallions, as well as PTA, which was incorporated to advance the legal interests of its members—the 80 individual medallion taxicab companies.

Uber began operating in Philadelphia in October of 2014 without securing medallions or certificates of public convenience for its vehicles. While a potential rider can avail himself of a medallion taxicab by calling a dispatcher or hailing an available cab, to use Uber, he can download the Uber application onto his mobile phone and request that the vehicle come to his location, wherever he is. Passengers enter **[*337]** payment information, which **[**4]** is retained by Uber and automatically processed at the end of each ride. Uber does not own or assume legal responsibility for the vehicles or their operation, nor does it hire the drivers as its employees.[2] Uber did not pay fines to the PPA or comply with its regulations when it first entered the Philadelphia taxi market, as is otherwise required

---

[1] ***HN1***[] As this appeal arises from the grant of a motion to dismiss, the factual allegations set forth below are taken from the SAC and are accepted as true. *See Bridge v. Phoenix Bond & Indem. Co., 553 U.S. 639, 642 n.1, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008)*.

[2] We are aware that the issue of whether drivers can be classified as employees or independent contractors is the subject of ongoing litigation. *See, e.g., Razak v. Uber Techs., Inc., No. 16-cv-573, 2017 U.S. Dist. LEXIS 148087, 2017 WL 4052417 (E.D. Pa. Sept. 13, 2017)*.

for medallion taxicabs. Appellants maintain that this rendered Uber's operation illegal, and enabled the company to cut operating costs considerably.

In October of 2016, the Pennsylvania state legislature passed a law approving Uber's operation in Philadelphia, under the authority of the PPA. The law, which went into effect in November of 2016, allows the PPA to regulate both medallion taxicab companies and Transportation Network Companies ("TNCs")—a classification that includes Uber and other vehicle-for-hire companies that operate through digital apps—in Philadelphia. TNCs must now obtain licenses to operate and comply with certain requirements, including insurance obligations and safety standards for drivers and vehicles. The law also exempts TNCs from disclosing the number of drivers or vehicles operating **[**5]** in the city, and allows TNCs to set their own fares, unlike medallion taxicab companies, which comply with established rates, minimum wages, and have a limited number of vehicles and medallions operating at once in Philadelphia.

Before this law passed, in Uber's first two years in Philadelphia, nearly 1200 medallion taxicab drivers left their respective companies and began to drive for Uber. In those two years, there were 1700 Uber drivers and vehicles operating in Philadelphia, serving over 700,000 riders, for more than one million trips. Simultaneously, medallion taxi rides reduced by about 30 percent, and thus Appellants experienced a 30 percent decrease in earnings. The value of each medallion dropped significantly, to approximately $80,000 in November of 2016. Fifteen percent of medallions have been confiscated by the lenders due to default by drivers.

The PTA and 75 individual taxicab companies filed a Complaint, alleging three counts: attempted monopolization under *Section 2* of the Sherman Act, tortious interference with contract under Pennsylvania law, and unfair competition under Pennsylvania law. Uber moved to dismiss the Complaint.

Appellants, the PTA and now 80 individual taxicab companies, **[**6]** then filed an Amended Complaint, alleging the same three counts. Uber moved to dismiss the Amended Complaint. The District Court granted the dismissal, without prejudice. The District Court noted that Plaintiffs alleged merely harm to their business after Uber entered the Philadelphia taxicab market, and that Plaintiffs pointed to Uber's supposed illegal participation in the taxicab market as evidence of attempted monopolization. However, the District Court concluded that these harms are "not the type of injuries that antitrust laws were intended to prevent, and thus do not establish antitrust standing." *Phila. Taxi Ass'n, Inc. v. Uber Techs., Inc., 218 F. Supp. 3d 389, 392 (E.D. Pa. 2016)*. The Court also dismissed the state law claims, for failure to plead the proper elements of an unfair competition or a tortious interference claim.

Appellants then filed the SAC, alleging one count of attempted monopolization under **[*338]** *Section 2* of the Sherman Act and seeking treble damages under *Section 4* of the Clayton Act. Uber responded with a Motion to Dismiss, which the District Court granted, with prejudice. *Phila. Taxi Ass'n, Inc. v. Uber Techs., Inc., 2017 U.S. Dist. LEXIS 219688, 2017 WL 5515953 (E.D. Pa. Mar. 20, 2017)*. The District Court held that Appellants, in spite of multiple opportunities for amendment, had pled no antitrust injury sufficient for antitrust standing, and were unlikely to cure the lack **[**7]** of standing with any amendments to the SAC. The Court also held that the PTA could not satisfy the requirements for associational standing because the association's members lacked standing to sue on their own.

II. Standard of Review

The District Court had jurisdiction over the *Sherman Act* claim pursuant to *28 U.S.C. §§ 1331*, *1337(a)*, and *15 U.S.C. § 4*. We have jurisdiction under *28 U.S.C. § 1291*. ***HN2***[] We exercise plenary review of the District Court's dismissal of the SAC, *In re Lipitor Antitrust Litig., 868 F.3d 231, 249 (3d Cir. 2017)*, and may affirm the judgment below on any basis that is supported by the record. *Murray v. Bledsoe, 650 F.3d 246, 247 (3d Cir. 2011)*. We accept as true the factual allegations in the complaint, and draw all reasonable inferences in the plaintiff's favor. *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 91 (3d Cir. 2010)*.

III. Discussion

HN3[] Competition is at the heart of the antitrust laws; it is only anticompetitive conduct, or "a competition-*reducing* aspect or effect of the defendant's behavior," that antitrust laws seek to curtail. *Atl. Richfield Co. v. USA*

Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990). "[I]t is inimical to the antitrust laws to award damages for losses stemming from continued competition." *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 109-10, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (alternations and internal quotation marks omitted). This comports with the principle underlying antitrust laws: to protect *competition*, not *competitors. See* *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*.

If the challenged conduct has an effect on "prices, quantity or quality of goods or services," **[**8]** *Mathews v. Lancaster Gen. Hosp., 87 F.3d 624, 641 (3d Cir. 1996)*, we will find a violation of antitrust laws only when that effect harms the market, and thereby harms the consumer.

Anticompetitive conduct is the hallmark of an antitrust claim. An allegation of anticompetitive conduct is necessary both to: (1) state a claim for attempted monopolization; and (2) aver that a private plaintiff has suffered an antitrust injury. Appellants' SAC, however, is deficient in averring conduct that is, in fact, anticompetitive.

While our caselaw is unresolved regarding which to address first—an antitrust violation or an antitrust injury[3]—we need not resolve that here, because Appellants' claim fails on both counts. We begin by discussing how Appellants' allegations in the SAC fall short of demonstrating anticompetitive conduct, and thus fail to state **[*339]** a claim for attempted monopolization,[4] and then discuss how in the alternative, Appellants fail to allege antitrust injury to have antitrust standing. For both reasons, we affirm the judgment of the District Court dismissing the SAC with prejudice.

A. Attempted Monopolization

HN4[] To prevail on a claim under Sherman Act *Section 2* for attempted monopolization, a plaintiff must prove: "(1) that the defendant **[**9]** has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Mylan Pharms. Inc. v. Warner Chilcott Pub. Ltd. Co., 838 F.3d 421, 433 (3d Cir. 2016)* (quoting *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 317 (3d Cir. 2007))*. Moreover, to survive a motion to dismiss under *Rule 12(b)(6)*, the claim must be "plausible on its face," allowing us to "draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. Liability hinges on whether valid business reasons, as part of the ordinary competitive process, can explain the defendant's actions that resulted in a dangerous probability of achieving monopoly power. *See* *Avaya Inc., RP v. Telecom Labs, Inc., 838 F.3d 354, 393 (3d Cir. 2016)*.

In the SAC, Appellants allege that Uber: (1) flooded the market with non-medallion taxicabs, entered the market illegally without purchasing medallions, operated at a lower cost by failing to comply with statutory requirements and regulations, and lured away drivers from Individual Plaintiffs, which allegedly impaired the competitive market for medallion taxicabs; (2) knew of PPA's regulatory jurisdiction over vehicles for hire, purposefully ignored or avoided the regulations and rulings of the Court of Common Pleas, and thereby excluded rivals from competing in the taxicab market; and (3) is dangerously close **[**10]** to achieving monopoly power with its market share and by operating in an unfair playing field with the "financial ability" to be the only market player and to destroy competitors' business. SAC ¶ 83. Appellants also complain that the new legislation authorizing the TNCs' operation would facilitate the creation of an illegal monopoly.

We find that the SAC fails to plausibly allege any of the three elements of an attempted monopolization claim.

---

[3] *Compare, e.g.,* *Mathews v. Lancaster Gen. Hosp., 87 F.3d 624, 639-41 (3d Cir. 1996)* (first holding that plaintiff had failed to state a claim for attempted monopolization, and then concluding that plaintiff had also failed to allege an antitrust injury), *with, e.g.,* *Angelico v. Lehigh Valley Hosp., Inc., 184 F.3d 268, 274 (3d Cir. 1999)* (assuming the allegation of defendant's anticompetitive motive and then concluding that the plaintiff had adequately alleged an antitrust injury).

[4] Because the District Court found that Appellants had not alleged an antitrust injury to have standing, the Court did not reach the underlying attempted monopolization claim. Appellants nevertheless raised the issue on appeal, and because we may affirm the dismissal of the SAC on any basis that is supported by the record, *Murray, 650 F.3d at 247*, we will address this issue.

1. Anticompetitive Conduct

HN5[] Allegations of purportedly anticompetitive conduct are meritless if those acts would cause no deleterious effect on competition. This is where the SAC falters: Appellants set forth a litany of ways in which Uber's entry into the market has harmed Appellants' business and their investment in medallions; yet none of the allegations demonstrate a harmful effect on competition.

To determine whether conduct is anticompetitive, "courts must look to the monopolist's conduct taken as a whole rather than considering each aspect in isolation." *LePage's Inc. v. 3M, 324 F.3d 141, 162 (3d Cir. 2003)* (en banc).

[*340] Here, Appellants claim that Uber inundated the Philadelphia taxicab market illegally with their non-medallion vehicles. They contend that Uber's entry into the **[**11]** market was predatory because it failed to comply with statutory and regulatory requirements, failed to purchase medallions, failed to pay drivers a minimum wage, and failed to obtain the proper insurance, among other actions. All of these actions, Appellants assert, enabled Uber to operate at a significantly lower cost than the medallion companies, and thereby acquire a stronghold in the Philadelphia taxicab market.

Appellants also maintain that Uber "flooded" the Philadelphia taxicab market by improperly luring drivers away from medallion companies, including Individual Plaintiffs. Appellants cite Uber's practice of sending representatives to 30th Street Station and the Philadelphia International Airport, where medallion taxicab drivers often congregate, to disseminate information about its services and to recruit potential drivers. They argue that Uber promised new drivers financial inducements, such as reimbursements for the cost of gasoline, as an incentive to leave their medallion companies and instead drive for Uber.

Considering the averments regarding Uber's conduct in their totality, Uber's elimination of medallion taxicab competition did not constitute anticompetitive conduct **[**12]** violative of the antitrust laws.

First, inundating the Philadelphia taxicab market with Uber vehicles, even if it served to eliminate competitors, was not *anticompetitive*. Rather, this bolstered competition by offering customers lower prices, more available taxicabs, and a high-tech alternative to the customary method of hailing taxicabs and paying for rides. *HN6*[] It is well established that lower prices, as long as they are not predatory,[5] benefit consumers—"regardless of how those prices are set." *Atl. Richfield, 495 U.S. at 340*. "Cutting prices in order to increase business often is the very essence of competition." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 592, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. Thus, lost business alone cannot be deemed a consequence of "anticompetitive" acts by the defendant. *See* *Atl. Richfield, 495 U.S. at 337*.

Second, Uber's ability to operate at a lower cost is not anticompetitive. *HN8*[] Running a business with greater economic efficiency is to be encouraged, because that often translates to enhanced competition among market players, better products, and lower prices for consumers. Even if Uber were able to cut costs by allegedly violating PPA regulations, Appellants cannot use the antitrust laws to hold Uber liable for these violations absent proof of anticompetitive conduct. Even unlawful conduct is "of no **[**13]** concern to the antitrust laws" unless it produces an anticompetitive effect. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 487, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*.

Finally, hiring rivals may be anticompetitive, but only in certain cases. For example, if rival employees were hired in an attempt to exclude competitors from the market for some basis other than efficiency or merit, such as to acquire monopoly power or to merely deny the employees to the rival, this could violate the antitrust **[*341]** laws if injurious to the rival and to competition at large. *W. Penn, 627 F.3d at 109* (citing cases).

---

[5] *HN7*[] To allege predatory pricing, a plaintiff must first demonstrate that prices are set below costs, and that the competitor had a dangerous probability of recouping those lost profits after it had driven other competitors out of the market. *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. Appellants have not alleged predatory pricing in this case.

However, Appellants acknowledge that the nearly 1200 medallion taxicab drivers that Uber recruited did not remain idle, but rather they drove for Uber. In sum, what Appellants allege does not give rise to an inference of anticompetitive or exclusionary conduct and suggests, if anything, that Uber's ability to attract these drivers was due to its cost efficiency and competitive advantage.

Thus, the SAC is devoid of allegations of truly anticompetitive conduct.

2. Specific Intent to Monopolize

Appellants allege specific intent to monopolize from Uber's knowledge that the PPA maintained regulatory authority over vehicles-for-hire, and its choice to avoid regulation by being a TNC that neither owned vehicles nor employed **[**14]** drivers. They also point to Uber's alleged willful disregard of the rulings of the Court of Common Pleas. Appellants' claim, in essence, is that Uber's knowledge that their operation was illegal reveals a specific intent to monopolize.

HN9[] "[I]n a traditional *§ 2* claim, a plaintiff would have to point to specific, egregious conduct that evinced a predatory motivation and a specific intent to monopolize." *Avaya, 838 F.3d at 406* (citing *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*.

Some courts have inferred specific intent from anticompetitive or exclusionary conduct, *Advo, Inc. v. Philadelphia Newspapers, Inc., 51 F.3d 1191, 1199 (3d Cir. 1995)*, for instance, when business conduct is "not related to any apparent efficiency." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 608 n.39, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)* (quoting R. Bork, *The Antitrust Paradox* 157 (1978)) (alterations omitted); *see also* 4 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 805d, (4th ed. 2017) (discussing how some courts "would find for the plaintiff only if the defendant's acts were not motivated by 'reasonable' or 'legitimate' business purposes").

While Uber's alleged conduct might have formed the basis of a regulatory violation, its knowledge of existing regulations alone cannot reasonably be said to demonstrate specific intent to monopolize. Further, Uber's choice to distinguish itself from other vehicles-for-hire, eschewing medallions in **[**15]** favor of independent drivers who operate their own cars at will, can instead be reasonably viewed as "predominantly motivated by legitimate business aims." *Times Picayune Publ'g Co. v. United States, 345 U.S. 594, 627, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*. Appellants have not averred any other motive. The allegations suggest that these business choices allowed Uber to operate more efficiently, and to offer a service that consumers find attractive, thus enabling it to acquire a share of the Philadelphia taxicab market.

Thus, Uber's alleged competitive strategy of creating a vehicle-for-hire business model, presumably to acquire customers, does not reflect specific intent to monopolize. Accordingly, Appellants have failed to allege specific intent on Uber's part.

3. Dangerous Probability of Achieving Monopoly Power

HN10[] We held in *Broadcom Corp. v. Qualcomm Inc*. that because the dangerous probability standard is a complex and "fact-intensive" inquiry, courts "typically should not resolve this question at the pleading stage 'unless it is clear on the face of the complaint that the "dangerous probability" standard cannot be met as a **[*342]** matter of law.'" *501 F.3d at 318-19* (quoting *Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 877 (3d Cir.1995))*.

We may consider factors such as "significant market share coupled with anticompetitive practices, barriers to entry, the strength of **[**16]** competition, the probable development of the industry, and the elasticity of consumer demand" to determine whether dangerous probability was alleged in the pleadings. *Id.* Entry barriers include "regulatory requirements, high capital costs, or technological obstacles[] that prevent new competition from entering a market." *Id. at 307* (citations omitted). "No single factor is dispositive." *Id. at 318*. Appellants argue that Uber has a dangerous probability of achieving monopoly power because it has pushed numerous competitors out of the market. As discussed, however, the SAC fails to allege anticompetitive practices by Uber. Nor does the SAC mention Uber's market share; it merely suggests that Uber and medallion taxicabs had similar numbers of vehicles operating in Philadelphia as of October 2016. This allegation falls short of indicating Uber's market share in the context of *all* the competitors in the Philadelphia taxicab market, such as other TNCs.

Similarly, the SAC makes no allegation of current barriers to entry or weak competition from other market participants. Appellants make the bold allegation that Uber holds the *power* to raise barriers to entry in the market, without any factual support. In fact, **[**17]** the SAC alleges that Uber was readily able to enter the Philadelphia market. "[E]asy entry—particularly historical evidence of entry—is even more significant in the attempt case than in monopolization cases generally." Areeda & Hovenkamp, ¶ 807a.[6] Surely other competitors, such as Lyft, are able to enter without difficulty, as well.

Nor does the SAC describe any potentially harmful industry developments. It only vaguely claims that Uber may be able to drive out competition and raise entry barriers. Appellants assert in the SAC that once Uber becomes the dominant competitor, it *would be able to* charge higher prices, and consumers who do not own smartphones would be deprived of the ability to hail taxis on the street. Absent any allegations of a dangerous probability of achieving monopoly power, this argument fails. And, as counsel for Uber stated at oral argument, if Uber raised its prices, this would encourage other rivals to enter the market and charge lower prices, battling Uber through price competition.

HN11[] Because the elements of attempted monopolization are often interdependent, proof of one element may provide "permissible inferences" of other elements. *Broadcom, 501 F.3d at 318* (quoting *Barr Labs., Inc. v. Abbott Labs., 978 F.2d 98, 112 (3d Cir.1992))*. Even so, none **[**18]** of the other elements of attempted monopolization allow us to infer a dangerous probability that Uber will achieve monopoly power. Acknowledging *Broadcom*'s reticence to resolve the dangerous probability question at the pleadings stage, we nevertheless find that the SAC does not allege any of the relevant factors to prove that Uber had a dangerous probability of achieving monopoly power.

[*343] In sum, Appellants have failed to set forth a plausible claim of attempted monopolization under *Section 2* of the Sherman Act, as a matter of law.

III. Antitrust Standing

Alternatively, Appellants' antitrust claim fails for lack of ***HN12***[] antitrust standing, which is a threshold requirement in any antitrust case. Rooted in prudential principles, antitrust standing is distinct from Article III standing, which is rooted in the Constitution. *Ethypharm S.A. Fr. v. Abbott Labs., 707 F.3d 223, 232 (3d Cir. 2013)*.[7] While "[h]arm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact," courts must also consider "whether the plaintiff is a proper party to bring a private antitrust action." *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535 n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*; *see also* Areeda & Hovenkamp, ¶ 335.

Of the requirements for antitrust standing,[8] antitrust injury is "a necessary but insufficient condition," and is the **[**19]** only requirement in dispute here. *Barton & Pittinos, Inc. v. SmithKline Beecham Corp., 118 F.3d 178, 182 (3d Cir. 1997)*.

---

[6] Areeda and Hovenkamp explain that in an attempt case, when "the defendant is not yet a monopolist," market prices are more competitive. ¶ 807g. On the other hand, "[i]n a monopolization case the defendant is already a dominant firm and the market already presumably exhibits monopoly prices that have not been effectively disciplined by new entry." *Id.* Thus, easy entry into the market is indicative that the market lacks barriers to entry that may otherwise protect a dominant firm's monopoly power. *Id.*

[7] Because antitrust standing is prudential, we are not bound to address it first, because it "does not affect the subject matter jurisdiction of the court, as Article III standing does." *Ethypharm, 707 F.3d at 232*.

[8] ***HN13***[] The test for antitrust standing is: "(1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses the concerns that liberal application of standing principles might produce speculative claims; (4) the existence

HN14[] In *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc.*, the Supreme Court rejected the notion that antitrust injury could be alleged by a private plaintiff averring that it would have fared better without the defendant's alleged conduct. *429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701*. Rather, the plaintiff must prove the existence of an antitrust injury, which is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Id. at 489*; *see also* *Alberta Gas Chems. Ltd. v. E.I. du Pont de Nemours and Co., 826 F.2d 1235, 1240 (3d Cir. 1987)* (explaining that to establish antitrust injury, "plaintiffs must prove more than harm causally linked to an illegal presence in the market"). The injury must "reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *W. Penn, 627 F.3d at 101* (quoting *Brunswick, 429 U.S. at 489*).

Compensating plaintiffs injured by the effects of truly anticompetitive conduct serves the purpose of antitrust laws, namely, to foster competition. Thus, the antitrust injury requirement ensures that damages are only awarded for losses that "correspond[] to the rationale for finding a violation of the antitrust laws in the first place." *Atl. Richfield, 495 U.S. at 342*; Areeda & Hovenkamp, ¶ 337a. That is, there must be a causal link between the alleged **[**20]** injury and an antitrust violation's anticompetitive effects.

Appellants decry Uber's entry into Philadelphia as a campaign to inflict **[*344]** economic harm and to cause Appellants to lose their market share. They argue that all vehicles-for-hire legally operating in Philadelphia, and the riding public, have been harmed by Uber's allegedly illegal presence in Philadelphia between October of 2014 and October of 2016, when TNCs were officially permitted to operate. Appellants allege that they experienced financial harm and a reduced market share through fewer drivers, medallion cabs sitting idle, a decline in ridership, and loss of medallion value. The effect of the decrease in earnings, Appellants argue, is that taxicab companies are nearing default on their medallions and are close to being driven out of business.

Appellants allege their own injury, namely, financial hardship. Tellingly, they fail to aver an antitrust injury, such as a negative impact on consumers or to competition in general, let alone any link between this impact and the harms Appellants have suffered.[9] Perhaps this is because Appellants cannot do so. According to Appellants' own pleadings, Uber's entry into the Philadelphia **[**21]** market, regardless of its legality, *increased* the number of vehicles-for-hire available to consumers and product differentiation in the market, thereby *increasing* competition.

The facts of *Brunswick* illustrate this point. There, a bowling equipment manufacturer acquired several failing bowling alleys that had defaulted on their equipment payments. *429 U.S. at 479-80*. Three active bowling alleys brought an antitrust claim against the manufacturer, arguing that if the alleys had been allowed to fail, former patrons would have frequented plaintiffs' alleys, increasing plaintiffs' profits and market share. *Id. at 481*.

HN15[] The Supreme Court held that even if the acquisition was unlawful because it provided the manufacturer with monopoly power, the plaintiffs failed to prove that there were anticompetitive effects of that acquisition in order to establish an antitrust injury. *Id. at 487-88*. Plaintiffs sought to recover lost profits from bolstered competition—the manufacturer's keeping the defaulting alleys in business. *Id.* The presence of *more* bowling alleys resulted in *more* competition, and thus the Supreme Court held that plaintiffs had not sustained an antitrust injury. *Id. at 489*.[10]

Similarly here, Appellants urge the **[**22]** application of antitrust laws for the express *opposite* purpose of antitrust laws: to compensate for their loss of profits due to increased competition from Uber. However, harm to Appellants'

---

of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages." *Ethypharm, 707 F.3d at 232-33* (quoting *In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1165-66 (3d Cir. 1993))*.

[9] Appellants allege the potential detriment to consumers in the event that medallion taxicabs are driven out of the market, entirely. *See, e.g.*, SAC ¶ 62. Yet they fail to aver any facts suggesting that this is an imminent, realistic possibility.

[10] *See also* Areeda & Hovenkamp, ¶ 337 *HN16*[] ("At its most fundamental level, the antitrust injury requirement precludes any recovery for losses resulting from competition, even though [in *Brunswick*] such competition was actually caused by conduct violating the antitrust laws.").

business does not equal harm to competition. ***HN17***[] "Conduct that merely harms competitors, . . . while not harming the competitive process itself, is not anticompetitive." *Broadcom, 501 F.3d at 308*. Were we to award Appellants antitrust damages to compensate for their financial injuries, we would condemn vigorous competition, rather than encourage it. *See Travelers Ins. Co. v. Blue Cross of W. Pa., 481 F.2d 80, 84 (3d Cir. 1973)*.

Without demonstrating a harmful effect on price, such as predatory or monopoly pricing, Appellants instead argue that **[*345]** Uber's ability to operate at a lower cost caused Appellants economic harm and caused Appellants to lose their market share. But Appellants never argue that the lower cost—evidence of *increased* competition—failed to result in lower prices for consumers. ***HN18***[] "A plaintiff who wants . . . less competition or higher prices, that would injure consumers, does not suffer antitrust injury." *U.S. Gypsum Co. v. Ind. Gas Co., 350 F.3d 623, 627 (7th Cir. 2003)*.

Nor do Appellants aver a negative effect on the availability of taxicab services. Appellants themselves admit that Uber's 1700 vehicles took over 700,000 riders on more than one million **[**23]** trips in its first two years in Philadelphia, while the number of medallion cabs allegedly decreased by at least 15 percent, or roughly 240 vehicles, from its peak of 1610. Thus, the SAC alleges an increase in the availability of vehicles-for-hire for Philadelphia passengers.

Appellants also insist that Uber's alleged illegal presence in Philadelphia caused an antitrust violation.[11] They attempt to circumvent the antitrust injury requirement by focusing on how Uber's purportedly illegal operation enabled it to cut costs and increase its market share. But again, ***HN19***[] the Supreme Court has squarely rejected illegal conduct as a basis for antitrust injury. A competitor's illegal presence in a market is not a *per se* antitrust violation, and any resulting injury is alone insufficient for a private plaintiff to state an antitrust injury. *Atl. Richfield, 495 U.S. at 334* (quoting *Brunswick, 429 U.S. at 489*).

Finally, Appellants do not cite any case in support of the contention that Uber's violation of state regulations, even if that gave Uber a competitive advantage, renders its operation in violation of antitrust laws. Even if we were to find Uber's operation in Philadelphia unlawful in its first two years, we would do so under PPA regulations, and not **[**24]** under antitrust laws. Ultimately, Uber's presence in the market, as alleged, created *more* competition for medallion taxicabs, not *less*, and thus Uber's so-called "predation"—operating without medallions or certificates of public convenience—does not give rise to an antitrust injury.

In sum, we affirm the dismissal of the SAC for the additional reason that it fails to assert an antitrust injury.

IV. Associational Standing

HN20[] To have associational standing, the PTA must meet three requirements: "(1) the organization's members must have standing to sue on their own; (2) the interests the organization seeks to protect are germane to its purpose; and (3) neither the claim asserted nor the relief requested requires individual participation by its members." *Blunt v. Lower Merion Sch. Dist., 767 F.3d 247, 279 (3d Cir. 2014)* (quoting *Pa. Prison Soc. v. Cortes, 508 F.3d 156, 163 n.10 (3d Cir. 2007))*.

The District Court concluded that the PTA failed the first requirement of associational standing that the Supreme Court articulated in *Hunt v. Washington State Apple Advertising Commission, 432 U.S. 333, 343, 97 S. Ct. 2434, 53 L. Ed. 2d 383 (1977)*, because the Individual Plaintiffs lack standing to sue on their own in light of their failure to aver an antitrust injury.

However, as we discussed in Section III, *supra*, ***HN21***[] Article III standing is a constitutional requirement, separate from antitrust standing, and Article III standing could be satisfied if a plaintiff **[**25]** presents a "case or controversy." *United Food & Commercial **[*346]** Workers Union Local 751 v. Brown Grp., Inc., 517 U.S. 544, 554-55, 116 S. Ct. 1529, 134 L. Ed. 2d 758 (1996)*.

---

[11] "The antitrust injury in this case is the anticompetitive effect made possible by the violation of the laws and regulations in place at the time." SAC ¶ 75.

Here, the Individual Plaintiffs do have Article III standing by virtue of their alleged competitive injury in the taxicab market, such that the PTA satisfies the first requirement, and could plausibly meet the other two requirements, for associational standing. However, even if the PTA has *associational* standing, they do not have *antitrust* standing in order to maintain an antitrust cause of action.

V. Conclusion

Appellants may have been better off, financially, if Uber had not entered the Philadelphia taxicab market. However, Appellants have no right to exclude competitors from the taxicab market, even if those new entrants failed to obtain medallions or certificates of public convenience. *See Ill. Transp. Trade Ass'n v. City of Chicago, 839 F.3d 594, 597 (7th Cir. 2016) (Posner, J.), cert. denied sub nom. Ill. Transp. Trade Ass'n v. City of Chicago, Ill., 137 S. Ct. 1829, 197 L. Ed. 2d 761 (2017)*.

If medallion taxicabs could prevent TNCs from entering the Philadelphia market, and if incumbents could prevent new entrants or new technologies from competing because they fear loss of profits, then "economic progress might grind to a halt." *Id. at 596-97*. "Instead of taxis we might have horse and buggies; instead of the telephone, the telegraph; instead of computers, slide rules." *Id. at 597*.

Absent any allegations of anticompetitive conduct, Appellants **[**26]** fail to allege any of the elements for a claim for attempted monopolization under *Section 2* of the Sherman Act and fail to allege antitrust standing.

For the foregoing reasons, the judgment of the District Court is AFFIRMED.

Opinion

ORDER

THIS MATTER is before the Court upon the filing of several post-trial motions by Plaintiffs and Defendants and one pending pre-trial motion filed by Plaintiffs. Before trial, Plaintiffs sought default judgment against all Defendants as sanction for abusive litigation practices. (Doc. No. 187). After trial, Plaintiffs filed a Motion for Award of Prejudgment Interest (Doc. No. 320), a Motion for Award of Attorneys' Fees and Costs (Doc. No. 325), and a Memorandum of Law on the *Unfair and Deceptive Trade Practice Act* (Doc. No. 329).[1] Defendants WDS, Inc. ("WDS") and Brian Ewert ("Ewert") move under *Rule 50(b)* and *Rule 59 of the Federal Rules of Civil Procedure* for judgment as a matter of law in its favor or in the alternative a new trial. (Doc. No. 322). Defendant Jennifer Maier ("Maier") also filed a motion seeking judgment as a matter of law in her favor under *Rule 50(b)* or in the alternative, a new trial or amendment to the judgment under *Rule 59*. (Doc. No. 323). All motions and matters are now ripe for resolution. The Court addresses each motion but not necessarily in the order filed.

I. BACKGROUND

In the interests of judicial economy, the **[*3]** Court provides a general overview of the case here but summarizes the specific background relevant to the issues raised by the parties' motions in the analysis. Plaintiff Cargill, Inc. ("Cargill") and its wholly owned subsidiary, Cargill Meat Solutions, Corp. ("CMS"), had contractual relations with Defendant WDS. Under these contractual arrangements, Cargill, CMS, and other entities controlled by Cargill ("Cargill Affiliates") purchased products and related services from WDS, as a supplier that provides warehousing and distribution services. WDS was founded and managed by Defendant Maier, as majority owner (51%) and President, and Defendant Ewert, minority owner (49%) and at times, Vice President of Sales. As alleged, this litigation stems from WDS charging prices in the purchase orders generated throughout the course of the parties' relationship that exceeded the margins provided for in the Select Supplier Agreements ("SSAs") executed by Cargill and WDS in 2009, 2012, and 2015 and the actions taken by WDS, Ewert, and Maier to misrepresent and conceal the margins. After a seven day trial, the jury found all Defendants liable for conversion, fraud, and conspiracy to defraud Plaintiffs **[*4]** or engage in commercial bribery that damaged Plaintiffs. The jury found Defendant Ewert liable under the *Racketeer Influenced and Corrupt Organizations Act ("RICO") § 1962(a)* and *(c)* and both Defendants Ewert and Maier liable under *RICO § 1962(d)*. The jury found Defendant WDS liable for breach of contract. The jury also found all Defendants misrepresented to Plaintiffs the margins charged on the products WDS supplied to Plaintiffs; falsified business records, including invoices and alleged agreements, in order to further their misrepresentation to Plaintiffs; and engaged in commercial bribery. Defendant Ewert also was found by the jury to have engaged in other misrepresentations causing Plaintiffs to continue the business relationship with WDS. The jury concluded the conduct it found was in or affecting commerce and the proximate cause of Plaintiffs' injury as required by the Unfair and Deceptive Trade Practices Act. On each of the aforementioned claims, the jury concluded Plaintiffs were entitled to recover $35,177,269.

II. ANALYSIS

A. Defendants' Motions under *Rule 50(b)* and *Rule 59*

Defendants WDS and Ewert renew their motion under *Rule 50 of the Federal Rules of Civil Procedure* and move for judgment as a matter of law on several claims and in the alternative move for a **[*5]** new trial under *Rule 59(a)*. Defendant Maier also moves under *Rule 50* for judgment as a matter of law and alternatively moves for a new trial under *Rule 59*. Accordingly, the Court considers each of these matters under *Rule 50(b)* and *Rule 59(a)*, where applicable.

---

[1] Defendant Jennifer Maier filed a voluntary petition under Chapter 7 of the United States Bankruptcy Code, but the automatic stay has been terminated and modified to allow this case to "proceed in all respects to completion." (See Doc. No. 346-1). Therefore, the Court can proceed on all motions and matters against all Defendants. (See Doc. Nos. 346, 348).

1. Legal Standard

a. *Federal Rule of Civil Procedure 50(b)*

A motion under *Rule 50(b)* "assesses whether the claim should succeed or fail because the evidence developed at trial was insufficient as a matter of law to sustain the claim." *Belk, Inc. v. Meyer Corp., 679 F.3d 146, 155 (4th Cir. 2012)*. The moving party must have moved under *Rule 50(a)* for relief on similar grounds to move after trial under *Rule 50(b)*. See *Fed. R. Civ. P. 50*; *Exxon Shipping Co. v. Baker, 554 U.S. 471, 485 n.5, 128 S. Ct. 2605, 171 L. Ed. 2d 570 (2008)*. Failure to move under *Rule 50(a)* and appraise the court of the alleged insufficiency of the suit results in waiver of that unraised insufficiency. See *Varghese v. Honeywell Int'l, Inc., 424 F.3d 411, 423 (4th Cir. 2005)*; *Price v. City of Charlotte, N.C., 93 F.3d 1241, 1248-49 (4th Cir. 1996)*; *Bridgetree, Inc. v. Red F. Marketing LLC, No. 3:10-cv-00228-FDW-DSC, 2013 U.S. Dist. LEXIS 15372, 2013 WL 443698, at *17 (W.D.N.C. Feb. 5, 2013)*.

When considering a *Rule 50* motion, the court cannot reweigh the evidence or consider the credibility of the witness and must view "all the evidence in the light most favorable to the prevailing party and draw all reasonable inferences in [the prevailing party's] favor." *Konkel v. Bob Evans Farms, Inc., 165 F.3d 275, 279 (4th Cir. 1999)*. A jury's verdict will withstand a motion under *Rule 50* unless the court "determines that the only conclusion a reasonable trier of fact could draw from the evidence is in favor of the moving party." *Tools USA and Equip. Co. v. Champ Frame Straightening Equip., Inc., 87 F.3d 654, 656-57 (4th Cir. 1996)* (quoting *Winant v. Bostic, 5 F.3d 767, 774 (4th Cir. 1993)*); see also *Konkel, 165 F.3d at 279*. When **[*6]** ruling on a motion under *Rule 50(b)*, the court may allow judgment on the verdict, order a new trial, or direct entry of judgment as a matter of law. *Fed. R. Civ. P. 50(b)*.

b. *Federal Rule of Civil Procedure 59(a)*

"The grant or denial of a motion for new trial is entrusted to the sound discretion of the district court and will be reversed on appeal only upon a showing of abuse of discretion." *Cline v. Wal-Mart Stores, 144 F.3d 294, 305 (4th Cir. 1998)* (citing *Gasperini v. Center for Humanities, Inc., 518 U.S. 415, 435, 116 S. Ct. 2211, 135 L. Ed. 2d 659 (1996)*). A court may grant a new trial on some or all of the issues "for any reason for which a new trial has heretofore been granted in an action at law in federal court[.]" *Fed. R. Civ. P. 59(a)(1)(A)*. Acceptable reasons include: "(1) the verdict is against the clear weight of the evidence, or (2) is based upon evidence which is false, or (3) will result in a miscarriage of justice, even though there may be substantial evidence which would prevent the direction of a verdict." *Cline, 144 F.3d at 301* (quoting *Atlas Food Sys. & Servs., Inc. v. Crain Nat'l Vendors, Inc., 99 F.3d 587, 594 (4th Cir. 1996)*). When making this determination, the court may weigh the evidence and consider the credibility of witnesses. *Wilhelm v. Blue Bell, Inc., 773 F.2d 1429, 1433 (4th Cir. 1985)* (citing *Wyatt v. Interstate & Ocean Transport Co., 623 F.2d 888, 891-92 (4th Cir. 1980)*).

2. Select Supplier Agreements

a. Enforceability

Defendants WDS and Ewert maintain that the SSAs are not enforceable contracts. (Doc. No. 322-1 at 8). They contend the SSAs are contracts for the sale of goods between merchants, and the SSAs do not contain a quantity term as required under **[*7]** the Uniform Commercial Code. (Doc. No. 322-1 at 8). Although the *Uniform Commercial Code section 2-201(1)*, as adopted by New York, provides that a writing for "a contract for the sale of goods for the price of $500 or more is not enforceable by way of action or defense" unless a quantity term is included, *N.Y. U.C.C. § 2-201(1)* (McKinney), the SSAs are not contracts for the sale of goods. Goods are "all things . . . which are movable at the time of identification to the contract for sale . . ." *N.Y. U.C.C. § 2-105(1)* (McKinney). Meanwhile, "[a] 'sale' consists in the passing of title from the seller to the buyer for a price[.]" *N.Y. U.C.C. § 2-106(1)* (McKinney). In the SSAs, Cargill designates WDS as a "Select Supplier" and Cargill and WDS make mutual promises and covenants to govern their relationship. The SSAs contemplate a relationship between Cargill, Cargill Affiliates, and WDS involving the sale of goods to be facilitated by the issuance of purchase orders, but the SSAs contain no promise to pass title for anything. Accordingly, the Uniform Commercial Code does not govern the enforceability of the contract, and the lack of a quantity term does not render the SSAs unenforceable.

Citing the Alabama Supreme Court decision in *Mobil Oil Corp. v. Schlumberger, 598 So. 2d. 1341 (Ala. 1992)*, Defendants WDS and Ewert also argue that the **[*8]** SSAs standing alone are not enforceable. (Doc. No. 322-1 at 8). However, Mobil[2] does not hold that master agreements are never enforceable contracts. The Supreme Court of Alabama in Mobile stated:

> A master service agreement is not binding alone. A master service agreement provides the framework for subsequent contracts that result from oral or written work orders. . . . "Such a contract 'merely sets out the rules of the game in the event the parties decide to play ball.'"

Id. at 1345 (internal citations omitted). Thus, the Court in Mobil considers master agreements unenforceable until subsequent contracts are made. Although breaching a master agreement only providing the framework for subsequent contracts and the rules for those subsequent contracts may not be possible until a subsequent contract is entered, the Court need not consider that here, because it is undisputed that subsequent contracts were entered. See generally *Crown Battery Mfg. Co. v. Club Car, Inc., No. 3:12CV2158, 2014 U.S. Dist. LEXIS 18907, 2014 WL 587142, at *5 (N.D. Ohio Feb. 14, 2014)* (finding enforceable a master supply agreement that "establish[ed] the terms for future purchase orders of batteries"). As supported by the SSAs' and Purchase Orders' language and evidence of Plaintiffs and WDS's expectations **[*9]** and course of performance, the SSAs set forth the "framework for subsequent contracts" and the rules, through promises and covenants, which would govern those subsequent contracts. The Purchase Orders are the subsequent contracts for the actual sale of goods. Therefore, the Court cannot conclude that the SSAs are not enforceable contracts as a matter of law.

b. Superseding Contract

Defendants WDS, Ewert, and Maier submit that they are entitled to judgment as a matter of law on all claims by CMS because the Purchase Orders are unambiguous and supersede any pre-existing agreements, including the SSAs. (Doc. No. 322-1 at 4-6; Doc. No. 323-1 at 18-21). "[W]here the parties have clearly expressed or manifested their intention that a subsequent agreement supersede or substitute for an old agreement, the subsequent agreement extinguishes the old one and the remedy for any breach thereof is to sue on the superseding agreement." *Northville Indus. Corp. v. Fort Neck Oil Terminals Corp., 100 A.D.2d 865, 474 N.Y.S.2d 122, 125 (N.Y. App. Div. 1984)* (citations omitted). If intent "is determinable by [the] written agreements, the question is one of law[.]" *Mallad Constr. Corp. v. County Fed. Sav. & Loan Assn., 32 N.Y.2d 285, 298 N.E.2d 96, 100, 344 N.Y.S.2d 925 (N.Y. 1973)* (citations omitted). However, if the intent "must be determined by disputed evidence or inferences outside the written words of the instrument[,]" it is **[*10]** a "question of fact[.]" Id. (citations omitted). In this case, the Purchase Orders are not clear and unequivocal. There is no express statement that the Purchase Orders supersede the SSAs. Rather, the Purchase Orders contain language that its terms and conditions shall exclusively govern and any terms WDS includes in their standard sale acknowledgment or other form which alter or are inconsistent with CMS's terms and conditions are of no legal force or effect. The terms and conditions referenced then indicate that they supersede prior agreements between WDS and CMS with respect to the subject matter of the Order. From the contract language and the referenced terms and conditions, the Court cannot conclude as a matter of law that the parties expressed and intended the Purchase Orders to supersede the SSAs. As a result, the Court properly submitted the matter to the jury to determine the parties' intent based on the disputed evidence and to construe the ambiguous provisions. In addition to the language in the SSAs and the Purchase Orders, testimony

---

[2] This case does not involve the application of Alabama law. Therefore, this Court is not bound by any holding in *Mobil.*

concerning the parties' dealings leading up the execution of the contracts, the purpose and object of the contracts and their provisions, **[*11]** and their course of performance during the parties' contractual relationship, including Ewert's direction to charge prices in accordance with the SSA after confrontation by Plaintiffs and Maier's falsification of the invoices to make the margins match the SSA, provided substantial evidence for the jury's conclusion that the Purchase Orders did not supersede the SSAs.[3]

c. Construction

i. Affiliate Participation

Defendants WDS, Ewert, and Maier claim that CMS's purchases are not governed by the SSAs because CMS did not opt into the SSAs. (Doc. No. 322-1 at 9; Doc. No. 323-1 at 13-15). In other words, Plaintiffs failed to put forth evidence that CMS met the condition precedents for affiliate participation in the SSAs. The SSAs provided that entities controlled by Cargill, Cargill Affiliates, who met WDS's customer credit requirements, could participate in and receive the benefits of the SSA by among other things issuing a purchase order in accordance with the SSA. The contract language does not provide how such terms are applied. Therefore, this ambiguity warranted resolution by the jury. As presented at trial, CMS issued Purchase Orders to WDS, and WDS accepted **[*12]** and fulfilled them. Evidence of the parties' purpose for entering the SSAs, including the notice to suppliers regarding select supplier agreements that accompanied the SSAs, and evidence of other acts, like representing that WDS was not charging more than ten percent and correcting margins in CMS purchases to conform to the SSAs' margins upon confrontation, also support the jury's finding in favor of CMS. Substantial evidence buttresses a conclusion that CMS was a party to the SSAs in accordance with the SSAs provisions.

ii. Referencing the SSAs

Defendant Maier asserts Plaintiffs are barred from recovery because Plaintiffs did not reference the SSAs in the Purchase Orders. (Doc. No. 323-1 at 18). However, this argument is waived; Maier did not move for judgment as a matter of law under *Rule 50(a)* on this or related grounds. It also plainly fails. The plain language cited by Maier does not create a duty, material or otherwise, requiring Plaintiffs to reference the SSAs in the Purchase Orders. (See Doc. No. 323-1 at 18). The clause following the language cited by Maier, which is omitted from her brief, expressly states that the SSAs will govern even if the SSAs are not referenced in the Purchase **[*13]** Orders. (See Doc. No. 347 at 13-14).

iii. Losses for Cargill's Negligent Act or Omission

Maier also construes the SSAs to bar recovery in this action because the losses arose out of Plaintiffs' negligence. (Doc. No. 347 at 21-22). In addition to being a waived argument, this interpretation ignores the plain language of the provision, the defined terms, and the context of the provision. Section 12 of the SSAs provide that except as limited in Section 13, WDS agrees to indemnify and hold harmless Cargill from all "Losses" as defined therein. Section 13 reflects that WDS will not be liable for Losses arising out of Cargill's negligent act or omission. From the language

---

[3] See, e.g., *Cromwell Towers Redevelopment Co. v. City of Yonkers, 41 N.Y.2d 1, 359 N.E.2d 333, 337, 390 N.Y.S.2d 822 (N.Y. 1976)* ("In construing the contract . . ., due consideration must be given to the purpose of the parties in making the contract[.]"); *Roberts v. Consolidated Rail Corp., 893 F.2d 21, 24 (2d Cir. 1989)* ("[C]ourts look to the acts and circumstances surrounding execution of the ambiguous term to ascertain the parties' intent."); *Sea Lion Oil Trading & Transp., Inc. v. Statoil Mktg. & Trading (US) Inc., 728 F. Supp. 2d 531, 535 (S.D.N.Y. 2010)* ("[W]hen considering a sale of goods contract under the U.C.C., the determination of a contract's meaning is not made in a vacuum. Rather, it is done *in conjunction with* evidence about course of dealing, usage of trade, and the parties' course of performance so long as that extrinsic evidence does not contradict the contract's language.").

of these provisions and considering the contract as whole, the Court cannot conclude as a matter of law that the parties intended to contractually prohibit the liability of third parties, like Maier, for her torts against Plaintiffs. Even if unambiguously expressed, a contractual provision prohibiting liability for intentional torts, as advanced by Maier, would be unenforceable as contrary to public policy. *Kalisch-Jarcho, Inc. v. City of New York, 58 N.Y.2d 377, 448 N.E.2d 413, 416-17, 461 N.Y.S.2d 746 (N.Y. 1983)*.

iv. All Products

Defendant Maier also argues the SSAs do not cover the sale of all products by WDS. (Doc. No. 323-1 at 16-18). As Maier did not move under **[*14]** *Rule 50(a)* for judgment in her favor on these grounds, this contention is waived. Nevertheless, the language in the SSAs and the trial record support the jury's determination in favor of Plaintiffs. The SSAs, relevant to the claims, from 2012 and 2015 provide that the Supplier will apply a fixed margin to determine pricing on all products in accordance with a schedule that set margins for specific named suppliers, all other identified trilateral spend, and all other identified non-trilateral spend. As the language is ambiguous, the Court properly delegated to the jury the responsibility of construction. Plaintiffs put forth testimony and evidence from those involved in the negotiation and oversight over the SSAs, testimony and evidence of the purpose of the SSAs, and the parties' actions while operating under the contract supporting a construction in favor of Plaintiffs. Hence, from this evidence and the explicit contractual language of all products, a reasonable jury could find in favor of Plaintiffs.

d. Conclusion

For all the foregoing reasons, the Court concludes Defendants are not entitled to judgment as a matter of law in their favor and finds no grounds justifying a new trial.

3. Economic [*15] Loss Rule

Defendants WDS, Ewert, and Maier[4] aver the Court erred by submitting Plaintiffs' tort claims to the jury when all these claims are premised on WDS's alleged overcharging for products covered by the SSAs. (Doc. No. 322-1 at 10; Doc. No. 323-1 at 3-4). "Ordinarily, a breach of contract does not give rise to a tort action by the promisee against the promisor." *N.C. State Ports Authority v. Lloyd A. Fry Roofing, Co., 294 N.C. 73, 240 S.E.2d 345, 350 (N.C. 1978)* (citations omitted). However, there are situations when a promisor will be liable for a tort, such as when "[t]he injury so caused was a wilful injury to or a conversion of the property of the promisee, which was the subject of the contract, by the promisor." *Ports Authority, 240 S.E.2d at 350-51*; see also *Beaufort Builders, Inc. v. White Plains Church Ministries, Inc., 246 N.C. App. 27, 783 S.E.2d 35, 40 (N.C. Ct. App. 2016)*. Hence, North Carolina appellate courts have limited the application of this bar, commonly known as the economic loss rule, to the barring of negligence claims. *Bradley Woodcraft, Inc. v. Bodden, 795 S.E.2d 253, 258 (N.C. Ct. App. 2016)*. Appellate courts have held that claims of fraud are not barred by this rule. *Bradley Woodcraft, 795 S.E.2d at 259* (citing *Jones v. Harrelson & Smith Contr'rs, LLC, 194 N.C. App. 203, 670 S.E.2d 242, 250 (N.C. Ct. App. 2008))*. Thus, following the "the final authority on state law" for the tort claims brought in this diversity suit, *Fidelity Union Trust Co. v. Field, 311 U.S. 169, 177-78, 61 S. Ct. 176, 85 L. Ed. 109 (1940)*, the Court concludes and reaffirms its determination that Plaintiffs' tort claims are not barred by the economic loss rule. All of Plaintiffs' tort claims fall into the category recognized as actionable **[*16]** torts in Ports Authority despite a related existing contract. Plaintiffs presented circumstantial and direct evidence of Defendants' conduct, through testimony and exhibits, showing or tending to

[4] Defendant Maier for the first time argues that New York's economic loss doctrine applies. (Doc. No. 323-1 at 3). This argument has been waived by failing to preserve it in her *Fed. R. Civ. P. 50(a)* motion. Maier did not raise it in her *Rule 50(a)* motion or by joining in WDS and Ewert's *Rule 50(a)* motion. Liberally considering the record, the Court has assumed for purposes of this Order that Maier joined in WDS and Ewert's *Rule 50(a)* motion.

show intentional false representations and payments of goods and services to pivotal Cargill employees and others in exchange for favorable treatment, including concealment of fraud and breach. On this evidence and other evidence presented at trial, the Court did not err in submitting instructions to the jury on torts.[5]

4. Fraud

Defendants WDS and Ewert argue that there was insufficient evidence to support a fraud claim against them.[6] (Doc. No. 322-1 at 11). They appear to argue that Plaintiffs' knowledge of the margins provided for in the SSAs and the costs provided for in its contracts with trilateral product suppliers preclude reasonable reliance. (Doc. No. 322-1 at 11). Meanwhile, Defendant Maier[7] argues that the only evidence supporting her fraud claim is her admitted misrepresentation of invoices sent to Plaintiffs in March 2016, which she contends was not relied on by Plaintiffs. (Doc. No. 323-1 at 7).

Defendants' narrow view of a claim for fraud and the evidence presented supporting a claim **[*17]** for fraud is not supported by the law or by the evidence. "Fraud has no all-embracing definition . . . [b]ecause of the multifarious means by which human ingenuity is able to devise means to gain advantages by false suggestions and concealment of the truth[.]" *Vail v. Vail, 233 N.C. 109, 63 S.E.2d 202, 205 (N.C. 1951)*. However, the elements of fraud are generally recognized as "(1) [f]alse representation or concealment of a [past or existing] material fact, (2) reasonably calculated to deceive, (3) made with intent to deceive, (4) which does in fact deceive, (5) resulting in damage to the injured party." *Hardin v. KCS Int'l, Inc., 199 N.C. App. 687, 682 S.E.2d 726, 733 (N.C. Ct. App. 2009)* (citations omitted). Thus, "fraud may be based on an 'affirmative misrepresentation of a material fact, or a failure to disclose a material fact relating to a transaction which the parties had a duty to disclose.'" Id. (quoting *Harton v. Harton, 81 N.C. App. 295, 344 S.E.2d 117, 119 (N.C. Ct. App. 1986))*. A duty to disclose arises when "a party has taken affirmative steps to conceal material facts from the other[.]" Id. (quoting *Sidden v. Mailman, 137 N.C. App. 669, 529 S.E.2d 266, 270-71 (N.C. Ct. App. 2000))*.

Here, Plaintiffs presented evidence showing the origination of the price figures used in the purchase orders, including testimony that Ewert and Maier gave to Kerry Uptergrove, the product manager for WDS, the prices, which were then provided to employees of Plaintiffs. The resulting purchase **[*18]** orders charged margins on goods exceeding the margins set in the SSAs. Neither WDS, Ewert, nor Maier informed either Plaintiff of the actual margins charged to Plaintiffs and, at times, misrepresented the margin. Kevin Walker, Plaintiff's expert, testified that the sum of net overcharges during the terms of the 2012 and 2015 SSA equal $35,177,269. Ewert directed others to fabricate documents with false information that he or others then provided to employee of Plaintiffs as legitimate. Ewert instructed WDS employees to withhold or misrepresent information about pricing, capabilities of WDS's software, and WDS's relationship to other vendors. Neither WDS, Ewert, nor Maier disclosed their financial interests in other vendors that supplied goods to WDS that were then sold to CMS. Ewert decided to keep all savings from its

---

[5] Defendants WDS and Ewert argue that the damages awarded by the jury were excessive because Plaintiffs were not required to prove, and did not produce evidence of, any damages other than the overcharges. (Doc. No. 322-1 at 14). However, as explained above, the economic loss rule does not bar Plaintiffs' tort claims, and Defendants have cited no case law to support their proposition.

[6] Defendants WDS and Ewert did not preserve this arguments, except to the extent they argue there was a lack of reasonable reliance. Therefore, WDS and Ewert's broad objection is waived.

[7] The jury found Plaintiffs' claims for fraud were not barred by the statute of limitation. (Doc. No. 314). Consistent with the North Carolina patterned instructions, the jury was asked "Did the Plaintiffs file this action within three years after discovery of the facts constituting the fraud?" and was instructed as to discovery and reasonable diligence to discover. (Doc. No. 314). Defendant Maier mistakenly overlooks that the cause of action accrues and the statute of limitations begins running upon discovery by Plaintiffs—not the occurrence of the facts constituting the fraud, *N.C. Gen. Stat. § 1-52(9)*; *Vail v. Vail, 233 N.C. 109, 63 S.E.2d 202, 207 (N.C. 1951)*. (Doc. No. 351 at 4). Therefore, despite Defendant Maier's attempt, whether Maier committed a continuing wrong is moot. (Docs. No. 323-1 at 7; Doc. No. 347 at 9). The jury concluded Plaintiffs' claim of fraud resulting in damages of $35,177,269 was timely.

suppliers lowering prices instead of passing the savings on to CMS. Maier's responsibilities and role, as president of WDS, included overseeing day-to-day management of WDS and participating in the negotiations and executions of contracts. In this capacity and as majority shareholder, she executed the 2008 agreement, which allocated 70.6% of WDS profits to Ewert's wholly **[*19]** owned corporation, ODDS, LLC ("ODDS") for Ewert's cultivation of business relationships and marketing services. The supervisor of sales, head of human resources, purchasing manager, chief operations officer, and corporate accountant, which included Brian Ewert, all reported to Maier. In addition to the 2016 invoices that Maier admits she falsified, Maier misrepresented an agreement in 2011, rebates owed to SSA, other information provided to Plaintiffs employees that omit certain vendors, and Ewert's departure from WDS.

Further, evidence tending to show Ewert and Maier took affirmative steps to conceal material facts was put forth. WDS and ODDS, with the authorization of WDS's corporate accountants, paid for trips and gifts for members of Cargill's strategic sourcing division, who were responsible for executing and overseeing the SSAs with WDS, and for a procurement manager. These expenditures included yacht trips costing over $100,000. WDS, with the consent of Maier and Ewert, also paid for the health insurance under WDS's employee plan for the mother-in-law of Chuong Shawn Nguyen, a member of Cargill's strategic sourcing division. WDS, Maier, and Ewert arranged payment of these bribes **[*20]** through WDS's payment of commissions to ODDS under the 2008 agreement. Additionally, at Ewert's direction, WDS's corporate accountants transferred money from WDS to ODDs to Ewert's personal Money Market Account. Ewert, then, withdrew thousands of dollars of cash. Subsequently, Ewert mailed packages with the FedEx costs, at times invoiced to Maier's American Express, or Ewert traveled to the place of residence of the members of Cargill's strategic sourcing division. The emails and text messages between Ewert and members of Cargill's strategic sourcing division, the procurement manager, and other influential employees of Cargill's customers show a *quid pro quo* relationship. Further, the timing of the trips, gifts, or cash withdraws often coincide with the consideration of rebates or contracts, to which WDS, Ewert, and Maier had interests in seeing executed in their favor. WDS, Ewert, and Maier did not inform CMS or Cargill of these trips, gifts, or cash payments. The SSAs required WDS to adhere to a Supplier Code of Conduct, which included an obligation to compete fairly for Cargill's business, without any illegal or improper inducements or advantages. Additionally, Cargill had adopted **[*21]** an anti-bribery policy for its employees and employees of all subsidiaries and affiliates. Maier and Ewert also threatened its non-trilateral suppliers' employees like Brian Kincannon to honor their confidentiality obligations or face legal action in order to keep actual invoices out of the Plaintiffs' hands. Without the actual invoices, Plaintiffs could not determine the actual margins being charged in the purchase orders. Ewert also suppressed WDS's own employees like Kerry Uptergrove from raising any concerns by telling them to focus on their job.

Testimony and evidence on Plaintiffs' inability to reasonably discern the actual costs for products sold by WDS without their cooperation was also shown. Plaintiffs' agreements with suppliers within the trilateral category set pricing formulas, not discrete prices. These formulas resulted in daily price variation preventing Plaintiffs from reasonably knowing the costs charged to WDS and thus inhibiting Plaintiffs from calculating WDS's margins on those products. Plaintiffs were not privy to WDS's contracts with non-trilateral suppliers or their invoices. Defendants employed confidentiality requirements with its suppliers. Even after the **[*22]** initiating of the audit of WDS, Defendants tactically continued to make misrepresentations to stop, delay, and hinder the audit. After receiving Maier's fabricated invoices in 2016, Plaintiffs continued to purchase products from WDS.[8]

From such evidence, a reasonable jury could conclude that WDS, Ewert, and Maier[9] committed fraud through either or both a false representation or a concealment of a material fact that resulted in injury to Plaintiffs of $35,177,269. Therefore, Defendants are not entitled to judgment as a matter of law in their favor on the fraud claim.[10]

---

[8] During trial, Plaintiffs' expert testified that the net overcharges occurring from February 1, 2012 through April 30, 2016 equaled $35,177,269. Plaintiffs sought this amount in damages for all claims.

[9] Defendant Maier, in a footnote, additionally moves for a reduction of damages from $35,177,259 to $191,076 under *Fed. R. Civ. P. 59(e)*, asserting again that the only conduct within the applicable statute of limitations that can form the basis of a claim against her occurred in 2016. (Doc. No. 323-1 at 24 n. 12). A *Rule 59(e)* motion seeking to "to relitigate old matters, or to raise arguments or present evidence that could have been raised prior to the entry of judgment" is not proper. *Exxon Shipping Co., 554 U.S. at 485 n.5*; see also *Pac. Ins. Co., 148 F.3d at 403*. A court may only grant a motion under *Rule 59(e)* to alter or amend

5. Conversion

Defendants WDS and Ewert contend Plaintiffs' did not present evidence that Plaintiffs retained ownership in the funds sent to WDS, entitling them to judgment on the conversion claim. (Doc. No. 322-1 at 15-16). "Conversion is 'an unauthorized assumption and exercise of the right of ownership over goods or personal chattels belonging to another, to the alteration of their condition or the exclusion of an owner's rights.'" *Wall v. Colvard, Inc., 268 N.C. 43, 149 S.E.2d 559, 564 (N.C. 1966)* (citations omitted). "[T]he fact the parties had a contract does not prevent plaintiffs' claim for conversion." *Se. Shelter Corp. v. BTU, Inc., 154 N.C. App. 321, 572 S.E.2d 200, 207 (N.C. Ct. App. 2002)*. "A party who comes into possession of . . . converted funds [pursuant **[*23]** to a contract or otherwise] 'will not be permitted . . . to use [the] funds when he is fully aware of their nature, or there are circumstances to awaken suspicion and put him on inquiry.'" *Variety Wholesalers, Inc. v. Salem Logistics Traffic Services, LLC, 723 S.E.2d 744, 365 N.C. 520 (N.C. 2012)* (quoting *Lavecchia v. N.C. Joint Stock Land Bank of Durham, 215 N.C. 73, 1 S.E.2d 119, 120 (N.C. 1939))*. As addressed in Variety Wholesalers, whether the plaintiff retains ownership over funds, as required for a conversion claim, may require establishing ownership of the funds after the plaintiff voluntarily transferred the funds to another. *Id. at 747*. In that case, whether the plaintiff retained ownership turned on the construction of ambiguous contract language. Id. Here, as well, Plaintiffs' "ownership" and "retained ownership" turned on the jury's construction of the SSAs and the Purchase Orders. The evidence previously discussed supporting the interpretation of the SSAs and the Purchase Orders and the claim for fraud, along with evidence of Plaintiffs' payments through an automatic clearing house ("ACH") to WDS; Ewert and Maier's ownership of WDS; Ewert and Maier's admitted control and their admitted withdrawal from WDS's accounts, to which Plaintiffs made their payments; and subsequent distributions from WDS to Ewert and Maier provide substantial evidence supporting the jury's verdict for conversion **[*24]** against each Defendant: Plaintiffs "retained ownership" over the $35,177,269 assumed by Defendants in excess of the costs and margins established in the SSAs.

Relying on Variety Wholesalers, Defendant Maier advances that the conversion claim fails because Plaintiffs did not present evidence showing the specific source or specific destination of the converted funds. (Doc. No. 323-1 at 6 (citing *Variety Wholesalers, 723 S.E.2d at 751*)). As Maier declined to raise this issue in a *Rule 50(a)* motion, this argument is waived. Maier also did not propose instructions or object to the final jury instructions on these grounds. Further, on this record, it cannot prevail: substantial evidence, as summarized in the previous paragraph, supports Plaintiffs' conversion claim against each Defendant, including Maier.

Accordingly, the Court denies all Defendants request for judgment as a matter of law and finds no basis for a new trial.

6. Unfair and Deceptive Trade Practices

Defendants contend the Court erred by instructing the jury on North Carolina's Unfair and Deceptive Trade Practices Act, because North Carolina law cannot apply to Plaintiffs' claim. (Doc. No. 322-1 at 15; see Doc. No. 323-1 at 7 n.2). Federal courts must apply the conflict of law **[*25]** rules of the state in which they sit when sitting in diversity jurisdiction. *Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496, 61 S. Ct. 1020, 85 L. Ed. 1477 (4th Cir. 1941)*. North Carolina courts follow the traditional conflict of laws rule for matters affecting substantial rights of

---

a judgment if it finds "that there has been an intervening change of controlling law, that new evidence has become available, or that there is a need to correct a clear error or prevent manifest injustice." *Robinson v. Wix Filtration Corp. LLC, 599 F.3d 403, 411 (4th Cir. 2010)*. Here, Defendant Maier is rearguing old matters and has not explained any reason justifying granting a *Rule 59(e)* motion. As found by the jury, the statute of limitations also does not limit Plaintiffs' damages against Maier. Maier's motion pursuant to *Rule 59(e)* is denied.

[10] Defendant Maier makes the same arguments for the claim of unfair and deceptive trade practices. (Doc. No. 323-1 at 7). She also argues there is no evidence she participated in a conspiracy. (Doc. No. 323-1 at 8). These arguments fail for the same reasons they fail for fraud.

the parties—lex loci, the law of the situs of the claim. *Boudreau v. Baughman, 322 N.C. 331, 368 S.E.2d 849, 853-54 (N.C. 1988)*. For actions sounding in tort, including unfair or deceptive trade practices claims, "the state where the injury occurred is considered the situs of the claim." *Boudreau, 368 S.E.2d at 854*; *United Va. Bank v. Air-Lift Assocs., 79 N.C. App. 315, 339 S.E.2d 90, 94 (N.C. Ct. App. 1986)*. North Carolina courts have rejected a bright line rule that the injured party, such as the Plaintiffs in this case, suffers its injury at its principal place of business. *Harco Nat'l Ins. Co. v. Grant Thornton, 206 N.C. App. 687, 698 S.E.2d 719, 725-26 (N.C. Ct. App. 2010)*. Instead, courts analyze and determine where an injured party in fact sustained its alleged injury to determine the applicable law. *Id. at 726*. Defendants WDS and Ewert argue that no evidence was presented that Plaintiffs suffered any harm in North Carolina. However, Plaintiffs presented evidence that payment through ACH of the Purchase Orders containing overcharges was paid to WDS at a North Carolina address.[11] The parties also stipulated and read into evidence that WDS is a corporation existing under the laws of the State of North Carolina. Therefore, the Court properly found that Plaintiffs' injury occurred when Plaintiffs **[*26]** paid WDS in North Carolina. As the last act giving rise to Plaintiffs' claim for unfair and deceptive trade practices occurred in North Carolina, the Court did not err by instructing the jury on North Carolina's Unfair and Deceptive Trade Practice Act.

7. Conspiracy

Defendant Maier for the first time argues that the conspiracy claim and the RICO conspiracy claim are barred by the intra-corporate conspiracy doctrine.[12] (Doc. No. 323-1 at 8). This argument has been waived by failing to preserve the argument, and Defendant Maier cites no authority that would allow her to make this argument for the first time at this stage in the proceedings. Further, as argued by Plaintiffs, Maier's argument is also moot. (Doc. No. 347 at 12). The doctrine, established in the field of ***antitrust law*** in *Nelson Radio & Supply Co. v. Motorola, Inc., 200 F.2d 911 (5th Cir.1952)*, held that "a corporation cannot conspire with its agents because the acts of the agents are acts of the corporation itself." *Bank Realty Inc. v. Practical Mgmt. Tech. Inc., No. 90-2128, 1991 U.S. App. LEXIS 11793, 1991 WL 97490, at *4 (4th Cir. June 11, 1991)* (unpublished table decision). Here, the jury found for Maier on all claims that named WDS as an enterprise. Also, the jury instructions required for conspiracy a finding that WDS, Maier, and Ewert agreed with each other and others known and known. Similarly, for a finding of *RICO 1962(d)* **[*27]** conspiracy, the jury instructions required a finding that two or more people agreed. Thus, even if the intra-corporate doctrine applies as claimed by Defendant Maier, it is moot.

8. Racketeer Influenced and Corrupt Organizations Act

Defendants WDS and Ewert maintain that the Court erred by allowing evidence and argument on Plaintiffs' RICO claims. (Doc. No. 322-1 at 12). Citing no binding precedent, Defendants WDS and Ewert contend this case "involves nothing more than two merchants disputing the pricing terms of their written agreements for the sale of goods[,]" rendering "Plaintiffs' RICO claim[s] . . . inappropriate and its inclusion . . . inconsistent with the statutory design of RICO." (Doc. No. 322-1 at 13). Defendants' contention, however, does not accurately reflect the trial record. Plaintiffs presented evidence of the overcharges in the Purchase Orders; allocation of a majority of WDS's

---

[11] Defendants WDS and Ewert also admitted that certain payments of the Purchase Orders were made to a bank account located in North Carolina. (Doc. No. 182 at ¶ 238).

[12] Although the Fourth Circuit has recognized the applicability of the intra-corporate conspiracy doctrine in the antirust context, *Greenville Publishing Co., Inc. v. Daily Reflector, Inc., 496 F.2d 391, 399 (4th Cir.1974)*, and *section 1985* civil rights context, *Buschi v. Kirven, 775 F.2d 1240, 1252-53 (4th Cir.1985)*, these claims are not before the Court in this case. The one case cited by Maier that addresses and applies the intra-corporate conspiracy doctrine in the context of RICO is not binding on this Court, *Walters v. McMahen, 795 F. Supp. 2d 350, 358-59 (D. Md. 2011)*, and on appeal to the Fourth Circuit, the court expressly stated "[b]ecause we conclude that the plaintiffs have failed to plead adequately a cause of action under *18 U.S.C. § 1962(d)*, we need not address the separate issue whether the intracorporate immunity doctrine bars their cause of action[,]" *Walters v. McMahen, 684 F.3d 435, 445 n.11 (4th Cir. 2012)*. The Fourth Circuit case, *Detrick v. Panalpina, Inc., 108 F.3d 529, 544 (4th Cir. 1997)*, cited by Maier also involves counterclaims for conspiracy under Virginia law, not North Carolina law.

profits, resulting from the overcharges, to ODDS, Ewert, and Maier; withdraws of tens of thousands of dollars in cash from ODDS prior to Ewert travelling across state lines to interact with influential members of Cargill's strategic sourcing division or mailing a package across state lines; **[*28]** hundred-thousand dollar plus yacht trips and other trips for influential members of Cargill's strategic sourcing division, often in close proximity to the execution of contracts involving Defendants; other expensive entertainment and benefits for such individuals and others; extensive communication between Ewert and these individuals in other states to further profit from overcharges or conceal the overcharges; and fabrication of contracts and invoices sent across state lines. Courts in similar circumstances have recognized the availability of RICO claims under subsection *18 U.S.C. § 1962*. See, e.g., *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 500, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)*; *In re U.S. Foodservice Inc. Pricing Litig., 729 F.3d 108, 122-23 (2d Cir. 2013)*; *Cosmos Forms Ltd. v. Guardian Life Ins. Co. of Am., 113 F.3d 308, 309-10 (2d Cir. 1997)*. As Defendants WDS and Ewert's alleged error is without merit, the Court denies their request for judgment as a matter of law and a new trial.

Defendant Maier moves for judgment as a matter of law by asserting that the RICO conspiracy claim under *section 1962(d)* cannot stand alone. (Doc. No. 323-1 at 9-10). Once again, this argument has been waived by failing to preserve it on the record by moving under *Rule 50(a)*. Further, Plaintiffs' prevailed on RICO claims under *sections 1962(a)* and *1962(c)* against Ewert. Therefore, unlike the cases relied on by Maier,[13] Plaintiffs' RICO conspiracy claim under *section 1962(d)* against Defendant Maier does not stand alone. See **[*29]** *Beck v. Prupis, 529 U.S. 494, 506-07, 120 S. Ct. 1608, 146 L. Ed. 2d 561 (2000)*. ("Under our interpretation, a plaintiff could, through a *§ 1964(c)* suit for a violation of *§ 1962(d)*, sue co-conspirators who might not themselves have violated one of the substantive provisions of *§ 1962*.").

Defendant Maier also claims that the RICO predicate acts are not the but-for and proximate cause of Plaintiffs' damages of $35,177,269, as awarded by the jury. (Doc. No. 323-1 at 10-11). Although this argument has been waived by failing to preserve the issue, the Court disagrees with Defendant Maier's interpretation of the Walter's opinion and attempt to analogize those facts with the facts of this case. Unlike Walter, the Court is not considering the sufficiency of the complaint, and concerns about causation were not raised and are not present in this case. *Walters, 684 F.3d at 444* (citing *Holmes, 503 U.S. 258, 269-70, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992))*; see also *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 459-61, 126 S. Ct. 1991, 164 L. Ed. 2d 720 (2006)* (considering Holmes factors). Further, the jury, as instructed, found proximate cause for an award of $35,177,269. Based on the evidence previously discussed, the Court cannot conclude that no reasonable jury could conclude in Plaintiffs' favor on their claim for RICO conspiracy against Maier and that such violation proximately damaged Plaintiffs in the amount of $35,177,269.

9. Cargill Meat Solutions

Maier asserts claims by CMS **[*30]** for conversion and fraud against Maier fail for insufficient evidence of payment by CMS or misrepresentation to CMS or any of its employees. (Doc. No. 323-1 at 6, 11; Doc. No. 351 at 7-8). However, this argument has been waived. Maier did not move for judgment as a matter of law against CMS for lack of evidence as to the elements of a claim for conversion or fraud. Further, for the reasons previously stated, the Court finds sufficient evidence to support Cargill and CMS's claim for conversion and fraud.

10. Maier's Counterclaims

---

[13] *Walters, 684 F.3d at 440* (holding failure to plead plausible violation of either predicate act fatal to *section 1962(c)* claim, which rendered plaintiffs' claims under *section 1962(d)* for conspiracy to violate *section 1962(c)* insufficient); *Tal v. Hogan, 453 F.3d 1244, 1249-50, 1252, 1270 (10th Cir. 2006)* ("Because Appellants have failed to allege a sufficient claim under *subsections (b)* or *(c)*, their *subsection (d)* conspiracy claim fails as a matter of law."); *Lightning Lube v. Witco Corp., 4 F.3d 1153, 1191 (3d Cir. 1983)* (same).

Maier contends she is entitled to judgment as a matter of law on all her counterclaims, which seek declaratory judgments, for the reasons she is entitled to judgment as a matter of law on Plaintiffs' claims. (Doc. No. 181; Doc. No. 323-1 at 23). For the reasons stated in this Order denying Maier's motion as to Plaintiff's claims and allowing judgment on the verdict, the Court declines to declare the rights of the litigants as sought by Maier. *28 U.S.C. § 2201(a)*; *Wilton v. Seven Falls Co., 515 U.S. 277, 286-88, 115 S. Ct. 2137, 132 L. Ed. 2d 214 (1995)*.

11. Jury Instructions

Defendants WDS, Ewert, and Maier[14] submit that the instructions to the jury and verdict form that reference Cargill and CMS collectively as Plaintiffs prejudiced Defendants, entitling Defendants to **[*31]** a new trial. (Doc. No. 322-1 at 3; Doc. No. 323-1 at 23). Defendants argue the instructions impermissibly treated Cargill and CMS as one entity. (Doc. No. 322-1 at 3).

"District courts are necessarily vested with a great deal of discretion in constructing the specific form and content of jury instructions." *Hardin v. Ski Venture, Inc., 50 F.3d 1291, 1293 (4th Cir. 1995)* (citing *Price v. Glosson Motor Lines, Inc., 509 F.2d 1033, 1036 (4th Cir. 1975))*. Specific jury instructions "may not be judged in artificial isolation, but must be viewed in the context of the overall charge[,]" *Noel v. Artson, 641 F.3d 580, 586 (4th Cir. 2011)* (quoting *Henderson v. Kibbe, 431 U.S. 145, 153 n. 10, 97 S. Ct. 1730, 52 L. Ed. 2d 203 (1977))*, for "the charge in its totality was what the jury heard[,]" *id. at 586*. "Instructions will be considered adequate if construed as a whole, and in light of the whole record, they adequately informed the jury of the controlling legal principles without misleading or confusing the jury to the prejudice of the [objecting] party." *Gentry v. E. W. Partners Club Mgmt. Co. Inc., 816 F.3d 228, 233 (4th Cir. 2016)* (quoting *Bunn v. Oldendorff Carriers GmbH & Co. KG, 723 F.3d 454, 468 (4th Cir. 2013))*.

Here, the jury instructions, as read to the jury, set out early in the trial that Plaintiffs were two separate entities, Cargill and CMS. Form thence forth, the jury instructions referenced them collectively as Plaintiffs and the verdict form, consistent with the jury instructions, referenced them collectively as Plaintiffs. The jury was then instructed on all six claims of Plaintiffs' burden to prove each **[*32]** elements as to Plaintiffs. As argued by Plaintiffs, the reference to Plaintiffs collectively was appropriate on the trial record because Plaintiffs' claims arose from the same set of facts and Plaintiffs' expert testified that Plaintiffs' collectively sustained damages from contractual overcharges of $35,177,629. On this trial record,[15] collective references to Plaintiffs was appropriate and necessary to avoid jury confusion and to avoid the possibility of an excessive or duplicative award of damages. See generally *Inter Med. Supplies Ltd. v. EBI Med. Sys., Inc., 975 F. Supp. 681, 691 (D.N.J. 1997)*, aff'd & remanded, *181 F.3d 446 (3d Cir. 1999)* (rejecting defendants' post-trial argument of error for the verdict's failure to separate damages for

---

[14] Defendant Maier also alleges that asking the jury "Do you find any of the following Defendants liable to Plaintiffs under the Unfair or Deceptive Trade Practices Act?" was an error because the jury does not determine whether the act was unfair or deceptive. (Doc. No. 323-1 at 24). As reflected in the record, the jury instructions did not ask the jury whether the acts were unfair or deceptive. These terms were not defined. Rather, the jury was asked to address the factual questions of in or affecting commerce and causation, which are necessary elements for an Unfair and Deceptive Trade Practices Act claim, and answer in the affirmative to the question if they so found. Further, Maier never objected to the phrasing of the question. In fact, Defendants agreed in the proposed instructions submitted to the Court to the listing of Plaintiffs' first claim or count as a violation of the Unfair and Deceptive Trade Practices Act and proposed verdict questions that used the terminology "unfair or deceptive act."

[15] Cargill moved to amend its complaint to add CMS after Defendants Ewert and WDS sought to amend their answer to allege that Cargill was not the real party in interest and did not have standing to sue for any transactions involving Cargill Meat Solutions. (See Doc. No. 37-1; 39-1; 49). Cargill argued joinder proper under *Fed. R. Civ. P. 20*, which permits the joinder of a party if "they assert any right to relief jointly, severally, . . . and any question of law or fact common to all plaintiffs will arise in the action." The Court agreed and granted the motion to amend and join CMS. (Doc. No. 55). As Plaintiffs seek relief jointly and severally, as permitted under *Rule 20*, the Court did not err as to the instructions and verdict form. See generally, *Fenton v. Freedman, 748 F.2d 1358, 1359-1361 (9th Cir. 1984)* (affirming judgment in favor of co-plaintiffs Shaindy Fenton and Shaindy Fenton, Inc. where acts of co-plaintiffs were "so intertwined . . . that the claims could have been filed jointly" and the court joined Shaindy Fenton, Inc. after defendants sought to dismiss the case because "Shaindy Fenton was not the real party in interest since the evidence showed all transactions sued upon were entered into between Shaindy Fenton, Inc. and [defendants]").

each wholly owned, vertically aligned subsidiary plaintiff). The jury instructions provided a correct statement of the law applicable to the claims and "left the attorneys ample room to argue their case." *Noel, 641 F.3d at 587*. The Court does "not bear the burden of highlighting helpful arguments nor of marginalizing harmful ones." Id. The jury instructions properly let counsel argue factually whether Plaintiffs had or had not met their burden and proven the elements required for an answer in their favor on the verdict form. See id. Therefore, the Court concludes it did not **[*33]** err and denies Defendants' request for a new trial.

12. Excessive Damages

Defendants WDS and Ewert argue they are entitled to a new trial because the jury's award of damages was excessive. (Doc. No. 322-1 at 13). See *Cline, 144 F.3d at 305*; *N.C. R. Civ. P. 59(a)(6)*. Defendants WDS and Ewert argue the damages are excessive for reasons previously raised and overruled by the Court, including the collective reference to Plaintiffs, the allowance of tort claims, the lack of reliance by Plaintiffs on misrepresentations by Defendants, and the lack of reasonable reliance on misrepresentations as to trilateral products. (Doc. No. 322-1 at 14-15). The Court incorporates its previous analysis and rulings on these matters, and accordingly, denies Defendants WDS and Ewert's request for a new trial on the grounds of excessive damages for the North Carolina or federal claims.

13. Evidentiary Rulings

Errors in admitting or excluding evidence are not grounds for a new trial "[u]nless justice requires[.]" *Fed. R. Civ. P. 61*. "A party may claim error in a ruling to admit . . . only if the error affects a substantial right of the party and . . . [the] party, on the record: timely objects or moves to strike; and states the specific **[*34]** grounds, unless it was apparent from the context." *Fed. R. Evid. 103(a)(1)*. An error is harmless and does not require a new trial if the court can "say 'with fair assurance, after pondering all that happened without stripping the erroneous action from the whole, that the judgment was not substantially swayed by the errors.'" *Taylor v. Va. Union Univ., 193 F.3d 219, 235 (4th Cir. 1999)* (citations omitted). By focusing on "whether the error itself had substantial influence[,]" this analysis allows the court to distinguish between harmless errors and those impacting a substantial right. Id.

a. Parol Evidence

Defendants WDS and Ewert argue parol evidence was inadmissible as to the terms of the Purchase Orders because the Purchase Orders were clear and unambiguous. (Doc. No. 322-1 at 6). As previously addressed by the Court in subsection I.A.2.b., the Court properly concluded that the contract terms at issue in this case, including those in the Purchase Orders, were ambiguous. The Terms and Conditions language in the Purchase Orders did not have "a definite and precise meaning." *Riverside S. Planning Corp. v. CRP/Extell Riverside, L.P., 13 N.Y.3d 398, 920 N.E.2d 359, 363, 892 N.Y.S.2d 303 (N.Y. 2009)* (citation omitted) (defining the lack of ambiguity). Therefore, the admission of parol or extrinsic evidence was not an error. *Innophos, Inc. v. Rhodia, S.A., 882 N.E.2d 389, 392, 852 N.Y.S.2d 820, 10 N.Y.3d 25 (N.Y. 2008)*.

b. Depositions of Charles Milacki and Chuong Shawn Nguyen

Defendants **[*35]** WDS and Ewert contend the admission of deposition testimony of Chuong Shawn Nguyen ("Nguyen") and Charlie Milacki ("Milacki") asserting the *Fifth Amendment* against self-incrimination improper pursuant to *Federal Rules of Evidence 401*, *402*, and *403*. (Doc. No. 322-1 at 16).[16] First, Defendants reason the

[16] Maier also stated, without elaboration or citation, that "the admission of certain testimony as to Maier was also improper and prejudicial, such as the non-parties that invoked the *Fifth Amendment* . . . ." (Doc. No. 323-1 at 24). From this mere listing of this

admission and allowance of a negative inference against Nguyen and Milacki[17] an error given their status as non-parties. However, Defendants cite no binding authority for this proposition. See generally Fed. R. Evid. 402. The Fifth Amendment of the Constitution states "no person . . . shall be compelled in any criminal case to be a witness against himself." U.S. Const. amend. V. This prohibition allows a person to assert his or her Fifth Amendment privilege and refuse to answer "official questions put to him in any other proceeding, civil or criminal, formal or informal, where the answers might incriminate him in future criminal proceedings[,]" Lefkowitz v. Turley, 414 U.S. 70, 77, 94 S. Ct. 316, 38 L. Ed. 2d 274 (1973), but it does not preclude in a civil case the admissibility of the assertion of the Fifth Amendment privilege or an adverse inference, see Baxter v. Palmigiano, 425 U.S. 308, 318, 96 S. Ct. 1551, 47 L. Ed. 2d 810 (1976). The Supreme Court and the Fourth Circuit have not expressly addressed the matter as to non-parties, but other circuits have found admission of testimony and the allowance of negative inferences against non-parties proper in civil actions, see, e.g., LiButti v. United States, 107 F.3d 110, 124 (2d Cir. 1997); FDIC v. Fidelity & Deposit Co. of Md., 45 F.3d 969, 977 (5th Cir. 1995) (finding **[*36]** "no constitutional bar to the admission of [a nonparty's invocation of the Fifth Amendment privilege]").

Second, Defendants argue the testimony is not relevant because they do not testify to any fact and the negative inference is against them, not Defendants. To the contrary, "silence in the face of accusation is a relevant fact[.]" Baxter, 425 U.S. at 319. Invoking the Fifth Amendment privilege when questioned about accepting bribes from Defendants and their actions in furtherance of Defendants' overcharging of Plaintiffs is relevant: "it has [a] tendency to make a fact [of consequence] more or less probable than it would be without the evidence[.]" Fed. R. Evid. 401. Further, other testimony and evidence reflecting Nguyen's and Milacki's relationship and dealings with Defendants was presented, so the "jury could determine that a witness who colluded with [Defendants] took the Fifth Amendment to avoid disclosing that collusion." See FDIC, 45 F.3d at 977.

Third, Defendants represent that the danger of unfair prejudice was great, and the Court erred in its application of the fourth factor in Libutti. The Court disagrees. When considering a non-party's invocation of the Fifth Amendment privilege under Fed. R. Evid. 403, many federal courts have adopted and applied the analysis of the Second Circuit in Libutti. See, e.g. **[*37]**, Coquina Invs. v. TD Bank, NA, 760 F.3d 1300, 1310-11 (11th Cir. 2014). Libutti recognizes that the "overarching concern is . . . whether the adverse inference is trustworthy under all of the circumstances and will advance the search for the truth[,]" 107 F.3d at 124, and identifies the following factors for consideration: (1) the nature of the relevant relationships, (2) the degree of control of the party over the non-party, (3) the compatibility of the interests of the party and the non-party in the outcome of the litigation, and (4) the role of the nonparty in the litigation, id. at 123-24. In this case, consideration of the factors do not raise concerns about the trustworthiness of the assertion of the Fifth Amendment privilege. Nguyen and Milacki maintained close business and social relationship with Defendants, as evidenced by their personal and business communication and their receipt of items of economic value from Defendants. Although not employees of Defendants, evidence supports that they acted for the interests of Defendants instead of their employers and came to expect remuneration for their services. Thus, Nguyen, Milacki, and Defendants interests are aligned in this litigation. Nguyen, Milacki, and Defendants benefit from Nguyen and Milacki asserting the Fifth Amendment privilege as it prevents **[*38]** the uncovering of additional facts and evidence in this case and any criminal proceeding. Nguyen and Milacki were also key figures in perpetrating and concealing the fraudulent overcharges, which are the basis for and cause of damages for all claims in this case. They held positions of great responsibility and authority that could be and, as suggested by the evidence, were misused to further the conspiracy. Therefore, the circumstances before the Court do not show unfair prejudice. Allowing admission and an instruction on an inference will advance the search for the truth, and the relevance of the assertion of the Fifth Amendment privilege in these circumstances is undeniable and exceeds any unfair prejudice.

---

alleged error, Maier has not shown an acceptable reason for the grant of a new trial. Cline, 144 F.3d at 301. Further, the Court concludes herein the errors alleged by Defendant WDS and Ewert are not errors. Therefore, the Court denies Maier's request for a new trial.

[17] As pointed out by Plaintiffs, the instruction allowing a negative inference was limited to the witnesses themselves, Nguyen and Milacki. (Doc. No. 340 at 24).

c. Deposition of Mike Dyer

Defendants WDS, Ewert, and Maier argue the admission of testimony from Mike Dyer "regarding his opinions on certain communications recovered by Plaintiffs during their investigation" was improperly admitted under *Federal Rule of Evidence 701*. (Doc. No. 322-1 at 19; see also Doc. No. 323-1 at 24). Upon consideration of the testimony, the Court finds regardless of the grounds for admissibility at trial, Dyer's testimony was not in the form of an opinion and was admissible under *Rule 602*, as argued by Plaintiffs **[*39]** (Doc. No. 340 at 25-26). See *Fed. R. Evid. 701*. *Rule 602 of the Federal Rules of Evidence* permits testimony by a lay witness on "a matter only if evidence is introduced sufficient to support a finding that the witness has personal knowledge of the matter."

> *Rule 602* . . . does not require that the witness' knowledge be positive or rise to the level of absolute certainty. Evidence is inadmissible under this rule only if in the proper exercise of the trial court's discretion it finds that the witness could not have actually perceived or observed that which he testifies to.

Myrtle Beach Air Force Base Fed. Credit Union v. Cumis Ins. Soc'y, Inc., 681 F.2d 930, 932 (4th Cir. 1982). Here, testimony and evidence established Dyer's personal knowledge of the existence and timing of communications and documentary evidence obtained and reviewed during the course of the investigation he led on behalf of Plaintiffs. As he personally observed these documents and observed the sequence or timing of the time stamped documentary evidence and communications between Defendants and Plaintiffs' employees, Dyer could testify under *Rule 602* as to the timing and sequence of the time stamped documentary evidence and communications. His observation of the close proximity of such evidence and communication and the repeated close proximity of such evidence and communication is therefore admissible. **[*40]** Although the terminology and framing of the questions by counsel could have been refined, Dyer's testimony did not go beyond the observations permissible under *Rule 602*.

d. Exhibit 444

Maier's complaint that the admission of Exhibit 444 was improper because it "was not complete, contained unexplained symbols, and could not be authenticated" is unavailing. (Doc. No. 323-1 at 24). Exhibit 444 was part of an email string between Maier and Ewert. Maier's statements in the email, including her reference to going to jail, suggest her complicity in wrongdoing, including the fabrication and falsification of a contract. Although other emails in the string were produced, this email was not produced by any Defendant but was recovered forensically from Ewert's devices by Plaintiffs. As explained by Plaintiffs' counsel, the exhibit contained symbols where corruption in the data prevented recovery in the first two lines of email. At trial, Maier did not object to the authenticity of the document but argued that the document was incomplete and therefore any probative value outweighed the prejudicial effect under *Rule 403*. See *Fed. R. Evid. 103(a)* (requiring timely objection); see, e.g., *Bituminous Constr., Inc. v. Rucker Enter., Inc., 816 F.2d 965, 969 (4th Cir. 1987)* (denying review of objection not made upon introduction **[*41]** of evidence at trial). The Court concludes it was not an error under *Rule 403* to admit Exhibit 444. Maier suffered no undue prejudice as she was the drafter of the email, she did not produce the email herself, and the omissions do not hinder comprehension. Further, the email is undeniably probative to this case.

e. Testimony of Kevin Walker

Maier also objects to the testimony of Plaintiff's expert, Kevin Walker, on matters outside the scope of his qualified expertise and his personal knowledge. (Doc. No. 323-1 at 24). To the extent there was such testimony, it was in response to Defendants' questioning about matters beyond his qualifications and personal knowledge. See, e.g., *United States v. Armedo-Sarmiento, 545 F.2d 785, 795 (2d Cir. 1976)* ("When a defendant has been made fully aware of the response which a question is bound to elicit, he should object when the question is asked, rather than delay with the hope of inviting error and laying the foundation for a mistrial."). Further, Maier did not timely object to Walker's testimony but moved to strike part of the record after Walker left the witness stand. See *Fed. R. Evid.*

103(a); United States v. Vogt, 910 F.2d 1184, 1192 (4th Cir. 1990) (denying review where counsel for defendant failed to object to admission but codefendant timely objected); United States v. Martinez, 962 F.2d 1161, 1164-1166 (5th Cir. 1992) (finding failure to make timely objection **[*42]** precluded any appellate challenge when motion to strike was not contemporaneous with admission of testimony). Therefore, the Court stands by its ruling on the record.

f. Conclusion

As addressed in the previous paragraphs, the Court concludes that no error occurred. Nevertheless, even if the testimony and evidence discussed herein was inadmissible, any error was harmless. On the trial record before the Court, "the judgment was not substantially swayed by the errors.'" Id. Accordingly, the Court denies Defendants' request for a new trial.

B. Unfair or Deceptive Act or Practice[18]

Plaintiffs seek a determination that the acts found by the jury constituted an unfair or deceptive trade practice as a matter of law. (Doc. No. 329).[19] An unfair and deceptive trade practice claim under N.C. Gen. Stat. § 75-1.1(a) ("UDTPA") has three elements: (1) an unfair or deceptive act or practice, (2) in or affecting commerce, and (3) proximately causing actual injury to plaintiff. Furr v. Fonville Morisey Realty, Inc., 130 N.C. App. 541, 503 S.E.2d 401, 408 (N.C. Ct. App. 1998). The second and third elements and whether the alleged conduct occurred are fact questions for the jury. See, e.g., Gray v. N.C. Ins. Underwriting Ass'n, 352 N.C. 61, 529 S.E.2d 676, 681 (N.C. 2000); Kewaunee Sci. Corp. v. Pegram, 130 N.C. App. 576, 503 S.E.2d 417, 420 (N.C. Ct. App. 1998); Belk, Inc. v. Meyer Corp., 679 F.3d 146, 164 (4th Cir. 2012). Based on the jury's findings, the court then determines whether an act or practice is unfair or deceptive in the conduct of trade or commerce. **[*43]** See, e.g., Dalton v. Camp, 353 N.C. 647, 548 S.E.2d 704, 711 (N.C. 2001).

A practice is deceptive if it has "the tendency or capacity to mislead" and unfair "when it offends established public policy as well as when the practice is immoral, unethical, oppressive, unscrupulous, or substantially injurious to consumers." Marshall v. Miller, 302 N.C. 539, 276 S.E.2d 397, 403 (N.C. 1981) (citations omitted); see also Dalton, 548 S.E.2d at 711. The determination that a trade practice is unfair or deceptive "depends upon the facts of [the]

---

[18] In Defendant Maier's response to Plaintiffs' request for prejudgment interest, request for attorneys' fees and memorandum of law on the UDTPA, Maier contends all of these requests should be denied for the reasons stated by Defendants Ewert and WDS and because: "(1) the requests are not governed by North Carolina law; (2) Maier did not make an unwarranted refusal to settle; (3) Maier was the prevailing party on the three of the four RICO claims asserted against her; (4) all of the attorneys' fees incurred by Plaintiffs were not in connection with claims against Maier; (5) 'Losses' as defined by the WDS-Cargill Agreements, including attorneys' fees, are not recoverable; and (6) any recovery by Plaintiffs would be less than what is sought because an award of damages against Maier, if any, must be reduced." (Doc. No. 354 at 1-2). Arguments one, five, and six have already been rejected by the Court in this Order and in its previous oral rulings. Therefore, the Court only addresses arguments two, three, and four.

[19] Defendants WDS and Ewert object to the "[t]rebling of the jury's award of $35,177,269.00 under N.C. Gen. Stat. § 75-16" because "(1) North Carolina's Unfair and Deceptive Trade Practices Act, N.C. Gen. Stat. § 75-1.1 et seq. ('UDPTA') does not apply because neither Plaintiff presented evidence that it suffered any harm in North Carolina; (2) the UDPTA claim is barred by the economic loss doctrine and Plaintiffs only sought contract-based damages; (3) neither Plaintiff presented sufficient evidence to support the fraud-based claims; (4) the jury should not have been permitted to consider the RICO claim; (5) the damages assessed by the jury are erroneous, against the weight of the evidence, and a product of jury confusion; (6) the commercial bribery finding does not support the jury's award; and (7) the finding of falsification of records does not support the jury's award." (Doc. No. 342). Arguments one through five were raised by Defendants WDS and Ewert in their Fed. R. Civ. P. 50(b) and 59 motion, which have previously been addressed and rejected in this Order. Defendants' sixth and seventh argument do not address the matter before the Court, whether the conduct found by the jury is unfair or deceptive. Defendants have not preserved this argument. Therefore, it is denied.

case and the impact the practice has in the marketplace." Marshall, 276 S.E.2d at 403. As a result, the intent of the actor is not relevant, and the "unfairness and deception are gauged by consider[ing] . . . the effect of the practice on the marketplace" and the "consuming public." Id.

Therefore, the Court, considering the facts and the impact on the marketplace, must determine whether the jury's findings are unfair or deceptive under the UDTPA. As the jury found all Defendants liable for fraud and separately found misrepresentations of margins charged, falsified business records to further misrepresentations, and commercial bribery, in addition to other findings, the jury's findings clearly establish an unfair and deceptive trade practice. Under North Carolina Supreme Court precedent, the finding of liability for fraud alone is **[*44]** sufficient for the Court's finding. Sara Lee Corp. v. Carter, 351 N.C. 27, 519 S.E.2d 308, 311 (N.C. 1999); Bhatti v. Buckland, 328 N.C. 240, 400 S.E.2d 440, 442 (N.C. 1991); Hardy v. Toler, 288 N.C. 303, 218 S.E.2d 342, 346 (N.C. 1975); see also Gilbane Bldg. Co. v. Fed. Reserve Bank of Richmond, Charlotte Branch, 80 F.3d 895, 903 (4th Cir. 1996). The "acts of commercial bribery[,]" as found by the North Carolina Court of Appeals, are also sufficient alone for the Court's finding. Kewaunee Sci. Corp., 503 S.E.2d at 420.[20] The jury's additional findings of conduct and of liability provide further support for the Court's determination in favor of Plaintiffs. The conduct of misrepresentation and falsification of business records to further their misrepresentations is unethical and unscrupulous and demonstrates that Defendants' conduct, as implicitly found by the jury's finding of liability for fraud, had a "the tendency or capacity to mislead[.]" Marshall, 276 S.E.2d at 403 (citation omitted). Therefore, in this case, the Court finds the practice to both unfair and deceptive.

Not only do Plaintiffs, as direct consumers of Defendants' services and goods, suffer the consequences of this conduct but indirectly the consuming public, who buy products from Plaintiffs, may also be impacted. Section 75-1.1 was enacted for this purpose: to protect consumers, including businesses, by allowing a cause of action to deter conduct that may ultimately harm consumers. See Dalton, 548 S.E.2d at 710 (citations omitted); Marshall, 276 S.E.2d at 400. Additionally, conduct resulting in injury of this **[*45]** magnitude—over $35 million—may detrimentally alter the behavior of contracting parties that reasonably rely on the representations of other contracting parties if not checked by private actions brought under N.C. Gen. Stat. § 75-1.1. See Johnson v. Owens, 263 N.C. 754, 140 S.E.2d 311, 314 (N.C. 1965) ("[T]here must be a reliance on the integrity of man or else trade and commerce could not prosper." (citations omitted)). As stated by the North Carolina Court of Appeals, "[t]he purpose of G.S. 75-1.1 is to provide a civil means to maintain ethical standards of dealings between persons engaged in business and the consuming public within this State[,] and [it] applies to dealings between buyers and sellers at all levels of commerce." United Va. Bank, 339 S.E.2d at 93 (citations omitted). Thus, the Court allows the judgment on the verdict finding Defendants liable to Plaintiffs under the UDTPA. The Court has found as a matter of law from the findings of the jury that Defendants committed an unfair and deceptive trade practice, and the jury answered in the affirmative that Defendants' conduct was in or affecting commerce[21] and was a proximate cause of Plaintiffs' injury.

---

[20] Defendants WDS and Ewert appear to argue that Plaintiffs' failure "to present evidence of the value of the alleged commercial bribes" and "represent[ation] that they would not seek such damages" distinguishes this case from Kewaunee. However, in reaching their conclusion, the court in Kewaunee relied on "[t]he jury f[inding] that the defendant paid Pegram in exchange for Pegram's cooperation or assistance in arranging sales and for refusing to entertain quotes or bids from other potential corrugated cardboard suppliers." 503 S.E.2d at 420. Given this finding, the court noted that commercial bribery is a crime under N.C. Gen. Stat. § 14-353. Id. The court then held "a violation of G.S. 14-353 should also be considered a violation of G.S. 75-1.1 as an unfair and deceptive trade practice." Id. Section 14-353 does not require a showing of damage or injury nor allows such a recovery. Instead, section 14-353 requires a showing consistent with the jury's finding in Kewaunee and the instructions given to the jury in this case. Thus, the Court finds no merit in Defendants WDS and Ewert's argument. The jury's finding of commercial bribery "satisf[ies] the first element" for a claim of unfair and deceptive trade practices. Kewaunee, 503 S.E.2d at 420.

[21] Some case law suggests this determination is a question for the Court. Compare Sara Lee Corp., 519 S.E.2d at 311 (deciding whether acts were "in or affecting commerce"), with United Lab., Inc. v. Kuykendall, 437 S.E.2d 374, 376 (N.C. 1993) (jury determined whether conduct was in or affecting commerce), and Kewaunee Sci. Corp., 503 S.E.2d at 420 (jury determined whether conduct was in or affecting commerce). Therefore, to the extent necessary, the Court clarifies that the conduct found by the jury was in or affecting commerce as defined under N.C. Gen. Stat. § 75-1.1. "'Commerce' includes all business activities, however denominated," N.C. Gen. Stat. § 75-1.1(b), which has been recognized by the North Carolina Supreme Court to apply

As a result, Plaintiffs are entitled to a "judgment . . . in favor of plaintiff[s] and against defendant[s] for treble the amount fixed by **[*46]** the verdict." *N.C. Gen. Stat. § 75-16*; see *Marshall, 276 S.E.2d at 402* (holding that trebling is automatic); *Atl. Purchasers, Inc. v. Aircraft Sales, Inc., 705 F.2d 712, 715 (4th Cir. 1983)* (same). Accordingly, Plaintiffs are entitled to treble the jury verdict of $35,177,269 under *N.C. Gen. Stat. § 75-16*.

C. Plaintiffs' Motion for Prejudgment Interest

Plaintiffs seek prejudgment interest on the principal amount from the date of the filing of this action, December 16, 2016, to the date of entry of judgment, January 23, 2018, in accordance with *section 24-1 of the North Carolina General Statutes*. (Doc. Nos. 320, 321). As North Carolina's legal rate of interest is eight percent, *N.C. Gen. Stat. § 24-1*, Plaintiffs seek an amendment to the judgment to provide for prejudgment interest of $3,107,164.80. (Doc. Nos. 320, 321). Defendants do not appear to dispute that Plaintiffs are entitled to prejudgment interest under North Carolina law.

The Fourth Circuit has recognized that other circuits have held that courts must apply the law of the forum to questions involving prejudgment interest in diversity cases. *United States v. Dollar Rent A Car Sys., Inc., 712 F.2d 938, 940 (4th Cir. 1983)* (citing *Klaxon, 313 U.S. at 497*; *Clissold v. St. Louis-San Francisco Ry., 600 F.2d 35, 38-39 (6th Cir. 1979)*; *Am. Ins. Co. v. First Nat'l Bank in St. Louis, 409 F.2d 1387, 1392 (8th Cir. 1969))*. Accordingly, this Court has concluded that it is bound to follow the law of the forum as it pertains to prejudgment interest in diversity cases. See *Legacy Data Access, LLC v. MediQuant, Inc., No. 3:15-cv-00584-FDW-DSC, 2017 U.S. Dist. LEXIS 198817, 2017 WL 6001637, at *19 (W.D.N.C. Dec. 4, 2017)*. The North Carolina legislature has enacted a statute **[*47]** governing prejudgment interest that provides "[i]n an action other than contract, any portion of a money judgment designated by the fact finder as compensatory damages bears interest from the date the action is commenced until the judgment is satisfied." *N.C. Gen. Stat. § 24-5(b)*. The statute creates no exceptions or conditions and has been held "to be mandatory and not discretionary on the part of the trial court." *Hamby v. Williams, 196 N.C. App. 733, 676 S.E.2d 478, 481 (N.C. Ct. App. 2009)*; see also *Castles Auto & Truck Serv., Inc. v. Exxon Corp., 16 F. App'x 163, 168 (4th Cir. 2001)* (construing *N.C. Gen. Stat. § 24-5(b)* as a mandatory provision). Therefore, the Court concludes that it is bound to award prejudgment interest on Plaintiffs' compensatory damages for its non-contract North Carolina claims for the period from December 16, 2016 to January 23, 2018, at the state of North Carolina's legal interest rate of 8%, *N.C. Gen. Stat. § 24-1*. The Court awards $3,107,164.80 of prejudgment interest for these claims.

D. Plaintiffs' Motion for Attorneys' Fees and Cost

Plaintiffs seek an award of attorneys' fees and costs under (i) the indemnity provisions of the SSAs; (ii) RICO, *18 U.S.C. § 1964(c)*; and (ii) UDTPA, *N.C. Gen. Stat. § 66-154(d)*. (Doc. Nos. 325, 325-1, 338). The Court address each herein.

1. Select Supplier Agreements

"Under New York law, a contract that provides for an award of reasonable attorneys' fees to the prevailing party in an action to enforce **[*48]** the contract is enforceable if the contractual language is sufficiently clear." *NetJets Aviation, Inc. v. LHC Commc'ns, LLC, 537 F.3d 168, 175 (2d Cir. 2008)* (citations omitted). As argued by Defendants WDS and Ewert, the contract language relied on by Plaintiffs is not sufficiently clear for an award of attorneys' fees under New York law. (Doc. No. 341 at 1-3). The provision in the SSAs provides:

---

to buyers and sellers in a commercial context. See *Bhatti, 400 S.E.2d at 444* (citation omitted); see also *Sara Lee Corp., 519 S.E.2d at 311-12*. The findings by the jury, which the Court has concluded constitute an unfair and deceptive practice, all occurred in the context of the selling by Defendants to Plaintiffs in a commercial context. Accordingly, the Court affirms the jury's finding.

> . . . Supplier agrees to *indemnify and hold harmless* Cargill from any and all liabilities, losses, damages, fines, penalties, cost and expenses (including reasonable attorney fees) . . . to the extent arising from . . . any breach by Supplier (and/or Supplier Affiliate) of any of its obligations under this agreement. . . [or] any negligent act or omission, or willful misconduct of Supplier . . . .

(Doc. No. 325-1 at 3-4) (emphasis added). An agreement to indemnify "permits a party held legally liable to shift the entire loss to another" and "usually arises from an express agreement by which one party agrees to hold the other harmless for claims brought against it by a third party." *Gen. Conference of Seventh-Day Adventists (Risk Mgmt. Servs.) v. AON Reinsurance Agency, Inc., 860 F. Supp. 983, 986 (S.D.N.Y. July 25, 1994)*, amended by, *860 F. Supp. 983 (S.D.N.Y. Sept. 30, 1994)* (citations omitted); see also *Atl. Richfield Co. v. Interstate Oil Transp. Co., 784 F.2d 106, 115 (2d Cir. 1986)* ("[I]ndemnity agreements are generally designed only to protect against liability for damage to third parties."). This clause, with its language **[*49]** "to indemnify and hold harmless," addresses claims brought against Cargill by a third party. However, the contract language is not sufficiently clear for an award of attorneys' fees in this action by Cargill against the Supplier for breach of contract and other torts. *Autocrafting Fleet Sols. v. Alliance Fleet Co., 148 A.D.3d 1564, 1565-66, 51 N.Y.S.3d 285 (N.Y. App. Div. 2017)* (affirming that language in indemnity provision did not contemplate intraparty claim for breach of contract). Therefore, the Court denies Plaintiffs' request for an award of costs and attorneys' fees against WDS pursuant to the SSAs.

2. Unfair and Deceptive Trade Practices Act

"[T]o encourage individuals to bring valid actions to enforce the [UDTPA] by making such actions economically feasible[,]" *United Lab., Inc. v. Kuykendall, 403 S.E.2d 104, 111 (N.C. Ct. App. 1991)* (citations omitted), aff'd, *335 N.C. 183, 437 S.E.2d 374 (N.C. 1993)*, the UDTPA provides that courts may award reasonable attorneys' fees to the prevailing party if the court finds that "[t]he party charged with the violation has willfully engaged in the act or practice, and there was an unwarranted refusal by such party to fully resolve the matter which constitutes the basis of such suit." *N.C. Gen. Stat. § 75-16.1(1)*. "An act is 'willful' within the meaning of *N.C. Gen. Stat. § 75-16.1(1)* if it is 'done voluntarily and intentionally with the view to doing injury to another.'" *Faucette v. 6303 Carmel Road, LLC, 242 N.C. App. 267, 775 S.E.2d 316, 326 (N.C. App. Ct. 2015)* (quoting *Standing v. Midgett, 850 F. Supp. 396, 404 (E.D.N.C. 1993))*. "The award or denial of attorney's **[*50]** fees under *section 75-16.1* is within the [sound] discretion of the trial judge." *Barbee v. Atl. Marine Sales & Serv., Inc., 115 N.C. App. 641, 446 S.E.2d 117, 121-22 (N.C. App. Ct. 1994)* (citing *Borders v. Newton, 68 N.C. App. 768, 315 S.E.2d 731, 732 (N.C. App. Ct. 1984))*.

Plaintiffs, as the prevailing parties receiving damages on their UDTPA claim, argue Defendants' acts were willful, as the jury found intentional acts and found Defendants liable for fraud, which requires a showing of intent to deceive. (Doc. No. 325-1 at 5). Plaintiffs argue Defendants conduct during the course of this litigation through continued concealment and misrepresentation demonstrate Defendants unwarranted refusal to resolve the matter. (Doc. No. 325-1 at 5). Defendants do not dispute that Plaintiffs are the prevailing party or that the acts found were willful, but they do argue that Defendants' refusal to resolve the matter was not unwarranted.[22] Defendants WDS and Ewert argue that they did not have the resources to meet the settlement demanded by Plaintiffs. (Doc. No. 341 at 3-4). Maier similarly argues she offered what she was able to pay. (Doc. No. 354 at 4). Defendants also argue they sought early mediation. (Doc. No. 341 at 3; Doc. No. 354 at 3-4). Plaintiffs in response argue that, as evidenced by the declaration of counsel Edward F. Hennessey, Defendants never made any realistic attempts to settle **[*51]** or fully resolve this matter. (Doc. No. 360 at 1; see also Doc. No. 345 at 3). Hennessey's declaration provides that at the mediation held on December 29, 2017, Defendants Ewert and WDS made no offer to settle, and Defendant Maier offered to settle for a total of $950,000 to be paid over ten years with a confession of judgment as security. (Doc. No. 327-5, ¶ 16). No subsequent offers were known by Hennessey. (Doc. No. 327-5, ¶ 16). Defendants have not filed affidavits to contradict Plaintiffs' declarations.

---

[22] Defendants reassert their argument that Chapter 75 does not apply because Plaintiffs did not present evidence that it suffered harm in North Carolina. The Court has already rejected this argument.

Here, the jury's findings of misrepresentation, falsification, commercial bribery, and of liability for fraud evidences willfulness. These acts, which the Court has found to be an unfair and deceptive practice as a matter of law, were voluntarily committed knowing it would injure Plaintiffs. Therefore, based on the jury's findings and the trial record, the Court finds Defendants' violation of the UDTPA resulted from a willful act or practice. Based on the Court's review of the record, the Court also concludes that there was "an unwarranted refusal by [Defendants] to fully resolve the matter which constitutes the basis of [the] suit." *N.C. Gen. Stat. § 75-16.1(1)*. The Court finds WDS and Ewert's conduct in this **[*52]** litigation has been objectively deficient and dilatory for no justified reason. (See, e.g., Doc. Nos. 106, 123). As recited by Plaintiffs and supported by the record and trial record, Maier's discovery conduct is equally blemished. (Doc. No. 360 at 5-7). Maier did not timely produce many relevant documents and never produced several relevant documents, subsequently recovered by Plaintiffs at great expense. (See Doc. No. 360 at 6-7). She also represented the authenticity of fabricated documents. (See Doc. No. 360 at 6). Further, evidence presented at trial involving all parties suggested intentional depletion of WDS's assets. The Court therefore finds WDS and Ewert did not make any offer to resolve this matter, and Maier's offer of settlement was unreasonable, especially in light of the jury's verdict of over $35 million and evidence of her receipt of $4 million in distributions from WDS in excess of her salary. The Court cannot find that in the circumstances of this case, the willingness to mediate and the inability to pay excuse Defendants from attempting to "resolve the matter which constitutes the basis of [this] suit" in whatever manner reasonably within their means, whether monetary **[*53]** or not, and justify Defendants' conduct impeding resolution of this matter. *United Lab., Inc., 403 S.E.2d at 111* (finding that in light of the jury's award, defendant's offer of $20,000 to settle the matter was an unwarranted refusal to settle); *Barbee, 446 S.E.2d at 122* (affirming award of attorneys' fees where "record [was] rife with evidence of defendant's intractability"); see generally *Edwards v. West, 128 N.C. App. 570, 495 S.E.2d 920, 925 (N.C. Ct. App. 1998)* (affirming award of attorneys' fees). Upon these findings of a willful practice and an unwarranted refusal to resolve the matter, the Court awards reasonable attorneys' fees under *N.C. Gen. Stat. § 75-16.1* against WDS, Ewert, and Maier.

3. Racketeer Influenced and Corrupt Organizations Act

Section 1964(c) of Title 18 provides that "[a]ny person injured in his business or property by reason of a violation of *section 1962* of this chapter may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee . . . ." Congress, by using the language "shall," clearly established that an award of costs, including a reasonable attorneys' fee, is mandatory. Defendant Ewert does not contest. Yet, without citing any law or precedent, Defendant Maier argues an award under *section 1964(c)* is improper because she prevailed on **[*54]** three of the four RICO claims asserted against her. (Doc. No. 354 at 5). However, the plain language of *section 1964(c)* does not support her argument. The only requirement for this mandatory award is injury by the defendant by reason of a violation of *section 1962*. Here, the jury found Maier liable for injury to Plaintiffs under *section 1962(d)*. Thus, Plaintiffs "shall recover . . . the costs of suits, including a reasonable attorney's fee" against Ewert and Maier.

4. Reasonable Attorneys' Fees

Guided by the twelve "Johnson" factors set forth in *Barber v. Kimbrell's, Inc., 577 F.2d 216, 226 n. 28 (4th Cir. 1978)*, courts determine what constitutes a reasonable number of hours and reasonable rate for attorneys' fees. *Brodziak v. Runyon, 145 F.3d 194, 196 (4th Cir. 1998)* (citations omitted); see also *United Lab., Inc., 403 S.E.3d at 111* (making findings "as to the time and labor expended, the skill required, the customary fee for like work, and the experience or ability of the attorney" (citation omitted)). Here, Plaintiffs seek attorneys' fees totaling $2,712,266.35. (Doc. No. 325-1 at 2). Defendants only object to the attorneys' fees to the extent they seek paralegal and support staff time. (Doc. No. 341 at 5; Doc. No. 354 at 2).

After review of the declarations of attorneys Jacob D. Bylund and Edward F. Hennessey and the accompanying billing records, the Court makes the following **[*55]** findings and awards Plaintiffs their requested attorneys' fees after deducting fees for paralegals and support staff. This case was a complex case, raising unique legal questions and requiring extensive filings sometimes on short deadlines. As a result, this case required attorneys of skill and experience to expend a significant amount of time to pursue the claims. Skills commensurate with the skills of Plaintiffs' counsel were necessary. Counsel's fee rates were agreed to, billed, and paid by Cargill and CMS. Fee rates for out-of-state counsel were the ordinary and customary rate charged to their longstanding client. The hourly fees charged were within the range typically charged for complex business litigation in North Carolina. *Legacy Data Access, 2017 U.S. Dist. LEXIS 198817, 2017 WL 6001637, at *20* (citing *In re Newbridge Bancorp S'holder Litig., No. 15 CVS 9251, 2016 NCBC LEXIS 91, 2016 WL 6885882, at *14 (N.C. Super. Ct. Nov. 22, 2016))*; (see also Doc. No. 327-5, ¶¶ 7, 14). The claims in this case against all Defendants arise from the same nucleus of operative facts and are inextricably interwoven with each other.[23] *Whiteside Estates, Inc. v. Highlands Cove, LLC, 553 S.E.2d 431, 467, 146 N.C. App. 449, 467 (N.C. Ct. App. 2001)*. The amount in controversy and results obtained through the jury award and this order further support the requested attorneys' fees.

However, the Court cannot conclude on the record that the paralegals and support staff provided professional legal services that required **[*56]** a legal training or background or that the fees for the services are commensurate with fees charged for such services in North Carolina. See *Irwin Indus. Tool Co. v. Worthington Cylinders Wis., LLC, 747 F.Supp.2d 568, 591, 592-93 (W.D.N.C. 2010)* (declining to award fees for project assistant and only awarding paralegal fees at an hourly rate of $75); see also *United States Trouser, S.A. de C.V. v. Int'l Legwear Group, Inc., No. 1:11-cv-00244-MR-DLH, 2013 U.S. Dist. LEXIS 53822, at *2 (W.D.N.C. April 16, 2013)* ("Hours claimed by a legal secretary or legal assistant are considered overhead for the firm and are therefore not recoverable." (citations omitted)); *Rainbow Sch., Inc. v. Rainbow Early Educ. Holding LLC, No. 5:14-CV-482-BO, 2016 U.S. Dist. LEXIS 172519, at *11-12 (E.D.N.C. Dec. 12, 2016)* (awarding fees for paralegals at rate of $100). This burden is on Plaintiffs. See *Robinson v. Equifax Info. Svcs., LLC, 560 F.3d 235, 244 (4th Cir. 2009)*. Therefore, on this record, the Court only awards attorneys' fees totaling $2,493,796.48.

5. Costs

Plaintiffs also seek $698,878.30 of other costs and $40,723.23 in taxable costs under *18 U.S.C. § 1964(c)*. (Doc. No. 338 at 2). Defendants argue Plaintiffs' costs should be limited to taxable costs under *28 U.S.C. §§ 1920*, *1821* and, as a result, exclude charges for Westlaw research, meals, e-discovery costs, and expert witness fees. (Doc. No. 341 at 4-6; Doc. No. 354 at 2). Defendants do not dispute the amount of taxable costs, which are provided for under *28 U.S.C. §§ 1920*, *1821*, and *Local Rule 54.1*. (See Doc. No. 338-1) Although **[*57]** some courts have limited costs to taxable costs, other circuits and district courts have held that non-statutory costs are allowed under RICO, which provides recovery of "the cost of the suit[.]" *18 U.S.C. § 1964(c)*; see, e.g., *Uniroyal Goodrich Tire Co. v. Mutual Trading Corp., 63 F.3d 516, 526-27 (7th Cir. 1995)* (affirming award of costs and attorneys' fees that included costs of legal research, copying documents, and expert witnesses cost); Fed. Proc., Lawyers Ed., 5B Fed. Proc. § 10:283 ("A prevailing civil RICO plaintiff may recover costs beyond the statutory costs provided for by *Fed. R. Civ. P. 54(d)* and *28 U.S.C.A. § 1920*, since the costs available to a prevailing party under *18 U.S.C.A. § 1964(c)* are equivalent to those allowable in a civil rights case."). Thus, in the absence of binding precedent, the Court reads the plain language of *18 U.S.C. § 1964(c)* to require the award of costs to a prevailing party under RICO beyond taxable costs, provided the costs are necessary costs of the suit. See generally *Cherry v. Champion Int'l Corp., 186 F.3d 442, 449 (4th Cir. 1999)* (finding that the concept of necessity requires something more than convenience and disallowing duplicative costs). The Court finds the other costs requested were reasonable and necessary expenses that have been or will be billed to the clients. Therefore, the Court hereby awards Plaintiffs' taxable costs of $40,723.23 and other costs of $698,878.30.

E. Plaintiffs' [*58] Motion for Terminating Sanctions

---

[23] Defendant Maier's objection to the attorneys' fees and request for apportionment is overruled. (See Doc. No. 354). The record and jury's findings reflect the inextricably intertwined nature of all the claims among all Defendants, whom the jury found to be co-conspirators. (See Doc. No. 360 at 3-5).

On December 18, 2017, Plaintiffs moved for terminating sanctions against all Defendants and an award of damages pursuant to *Rules 26* and *37 of the Federal Rules of Civil Procedure* and the Court's inherent powers (the "Second Motion for Sanctions"). (Doc. No. 187).[24] Since then, this case has proceeded to trial, and the jury rendered a verdict on January 22, 2018. (Doc. No. 314). Judgment was entered on January 23, 2018. (Doc. No. 315, 316). As this matter is now before the Court after the jury's award of all compensatory damages sought by Plaintiffs and the Court's allowance of judgment on the jury verdict in this Order, the Court denies the Second Motion for Sanctions as moot.[25]

F. Correction of Judgment to Preclude Double Recovery

The Court must *sua sponte* correct the judgment to reflect that Plaintiffs are only entitled to one recovery for the injury underlying all their claims[26] pursuant to *Rule 60(a) of the Federal Rules of Civil Procedure*. See *Gordon v. Pete's Auto Serv. of Denbigh, 637 F.3d 454, 460 (4th Cir. 2011)*; *Smith v. Gulf Oil Corp., 239 N.C. 360, 79 S.E.2d 880, 885 (N.C. 1954)*. Here, the jury awarded the same amount for each claim. See generally *Vanwyk Textile Sys., B.V. v. Zimmer Mach. Am., Inc., 994 F. Supp. 350, 358-59 (W.D.N.C. 1997)* (reducing judgment to highest amount awarded by jury in verdict). The Court also has determined that Plaintiffs are entitled to treble damages, pre-judgment interest, attorneys' fees, taxable costs, and other costs where afforded by specific **[*59]** claims. Therefore, the Court amends the judgment to clarify that Plaintiffs are only entitled to recover once the highest amount of trebled damages, pre-judgment interest, attorneys' fees, taxable costs, and other costs.

III. CONCLUSION

IT IS THEREFORE ORDERED that for the reasons explained above:

1. Defendants WDS and Ewert's "Renewed Motion for Judgment as a Matter of Law and Alternative Motion for New Trial" (Doc. No. 322) is DENIED.

2. Defendant Maier's "Motion for Judgment as a Matter of Law or Alternatively for New Trial or to Alter or Amend Judgment" (Doc. No. 323) is DENIED.

3. As to Plaintiffs' "Memorandum of Law on UDTPA" (Doc. No. 329), the Court concludes that the practices found by the jury were unfair and deceptive as a matter of law. The Court allows judgment on the jury's verdict on the claim for Unfair and Deceptive Trade Practices of $35,177,269 and trebles the damages awarded by the jury pursuant to *N.C. Gen. Stat. § 75-16*.

4. Plaintiffs' "Motion for Award of Prejudgment Interest" (Doc. No. 320) is GRANTED. The Court awards prejudgment interest of $3,107,164.80 for each of Plaintiffs' claims of violation of the UDTPA, conversion, fraud, and civil conspiracy to defraud or engage in commercial **[*60]** bribery.

5. Plaintiffs' "Motion for Award of Attorneys' Fees and Costs" (Doc. No. 325) is GRANTED IN PART and DENIED IN PART. The Court awards Plaintiffs' attorneys' fees of $2,493,796.48, taxable costs of $40,723.23, and other costs of $698,878.30 pursuant to *18 U.S.C. § 1964(c)*. The Court awards Plaintiffs' attorneys fees under *N.C. Gen. Stat. § 75-16.1(1)* of $2,493,796.48 and costs pursuant to Rule 54.1 of the Federal Rules of Civil Procedure of $40,723.23.

---

[24] Plaintiffs sought in the alternative an order to show cause why sanction should not be imposed on Defendants. However, Plaintiffs, and all Defendants, agreed after trial that a hearing on this pending motion was not necessary. Further, as the relief requested is moot, the request for a show cause hearing addressing the requested relief is also moot.

[25] If their request for relief is no longer moot, Plaintiffs may re-new their motion for relief.

[26] As agreed by all the parties, the Court informed the jury that the Court will use the jury's verdict to determine the judgment and will not allow a double recovery.

6. Plaintiffs' "Motion for Terminating Sanctions, or in the Alternative, for an Order to Show Cause" (Doc. No. 187) is DENIED as MOOT.

7. In accordance with the foregoing order, the Court AMENDS the judgment as follows to reflect Plaintiffs' one recovery of the following:

a. Plaintiffs are entitled to recover $105,531,807.00 in trebled/threefold damages from WDS, Ewert, and Maier joint and several.

b. Plaintiffs are entitled to recover $3,107,164.80 in pre-judgment interest from WDS, Ewert, and Maier joint and several.

c. Plaintiffs are entitled to recover $2,493,796.48 in attorneys' fees from WDS, Ewert, and Maier joint and several.

d. Plaintiffs are entitled to recover $40,723.23 in taxable costs from WDS, Ewert, and Maier joint and several.

e. Plaintiffs are entitled to recover $698,878.30 in other costs from Ewert and Maier **[*61]** joint and several.

8. This results in a total judgment against WDS, Ewert, and Maier of $111,173,491.51 with an additional judgment against Ewert and Maier for other costs of $698,878.30.

IT IS SO ORDERED.

Signed: March 28, 2018

Opinion

OPINION AND ORDER

J. PAUL OETKEN, District Judge:

This case is a securities class action against the drug manufacturer Mylan N.V. and several of its officers. The Complaint alleges that Mylan knowingly misclassified the EpiPen for purposes of Medicaid rebates; that Mylan entered into anticompetitive agreements to inflate drug prices; and that after committing these illegal acts, Mylan made materially misleading statements about its conduct to investors, in violation of U.S. and Israeli securities laws.

Mylan now moves to dismiss the complaint. For the reasons that follow, the motion is granted in part and denied in part.

I. Background

The following facts are taken from the Amended Class Action Complaint (the "Complaint") and are assumed true for purposes of this motion. (*See* Dkt. No. 39 ("Compl.").)

Mylan develops, licenses, manufactures, markets, and distributes brand-name and generic pharmaceuticals worldwide. **[*3]** (Compl. ¶ 2.) This action arises out of Mylan's conduct regarding a few drugs in particular: the branded drug EpiPen Auto-Injector ("EpiPen") and the generic drugs albuterol sulfate, benazepril, clomipramine, divalproex, doxycycline hyclate delayed release ("Doxy DR"), and propranolol. (*Id.*)

Mylan is a public company, trading on both the NASDAQ Global Select Market ("NASDAQ") and the Tel Aviv Stock Exchange ("TASE"). (Compl. ¶ 25.) Lead Plaintiffs Menorah Mivtachim Insurance Ltd., Menorah Mivtachim Pensions and Gemel Ltd., Phoenix Insurance Company Ltd., Meitav DS Provident Funds and Pension Ltd., and Dan Kleinerman ("Plaintiffs") bring this action on behalf of themselves and a class of individuals who purchased the common stock of Mylan N.V. or Mylan, Inc. between February 21, 2012, and January 29, 2017, on the NASDAQ or the TASE. (Compl. ¶ 1.) Plaintiffs bring suit against Mylan N.V. and Mylan, Inc. (Mylan N.V.'s predecessor and now its subsidiary), and Mylan executives Heather Bresch, Mylan's Chief Executive Officer ("CEO") since January 2012; Paul B. Campbell, Mylan's Chief Accounting Officer since May 2015; Robert J. Coury, Mylan's CEO from September 2002 through January 2012; **[*4]** Kenneth S. Parks, Mylan's Chief Financial Officer ("CFO") since June 2016; and John D. Sheehan, Mylan's CFO from April 2010 until April 2016 (collectively, "Mylan"). (Compl. ¶¶ 26-32.)

A. Mylan's Allegedly Unlawful Conduct

The conduct giving rise to this action falls into two categories of alleged wrongdoing: (1) Medicaid misclassification and (2) antitrust violations.

First, the Complaint alleges that Mylan unlawfully misclassified the EpiPen as a generic drug for purposes of the Medicaid Drug Rebate Program ("MDRP"). (Compl. ¶ 5.) The MDRP requires pharmaceutical companies to give the Centers for Medicare & Medicaid Services ("CMS"), the agency that administers Medicaid, a rebate on their drugs. (*See* Compl. ¶ 41.) Rebate rates are set by law, and they vary based on whether the drug in question is a single source drug ("S drug"), an innovator multiple source drug ("I drug"), or a noninnovator multiple source drug ("N drug"). (Compl. ¶ 44.) Guidance from CMS indicates that "[i]n general, those products that are approved under a New Drug Application (NDA) need to be reported to CMS as either single source (S) or innovator multiple source (I) and those products approved under an Abbreviated **[*5]** New Drug Application (ANDA) need to be reported to CMS as non-innovator multiple source (N)."[1] (Compl. ¶ 48.) The rebates for S and I drugs are higher than the rebates for N drugs, so Mylan's decision to classify the EpiPen as an N drug allegedly saved the company over $700 million. (Compl. ¶ 53.)

The Complaint alleges that CMS expressly informed Mylan that it had misclassified the EpiPen as an N drug. On March 16, 2009, the Department of Health and Human Services Inspector General ("HHS IG") provided CMS with a list of eight misclassified drugs, including the EpiPen. (Compl. ¶ 65.) Sometime after this disclosure, and on "multiple occasions," CMS informed Mylan that the EpiPen was incorrectly classified. (*Id.*) The Complaint further alleges that Mylan received a subpoena from the Department of Justice ("DOJ") in November 2014 regarding an investigation into whether the EpiPen was properly classified. (Compl. ¶ 72.) On October 7, 2016, Mylan announced that it had agreed to a $465 million settlement with the DOJ and other government agencies (Compl. ¶ 85) in which Mylan agreed to reclassify the EpiPen but did not admit to any wrongdoing (Dkt. No. 54-1).[2]

Second, the Complaint alleges that **[*6]** Mylan entered into a number of anticompetitive agreements to inflate the prices of various drugs. Plaintiffs allege two violations specific to the EpiPen: (1) that Mylan's settlement of a patent infringement suit against Teva Pharmaceuticals ("Teva") included an unlawful "pay for delay" clause that obligated Teva to delay introduction of a generic EpiPen competitor (Compl. ¶¶ 93-100), and (2) that Mylan entered into exclusive dealing agreements with schools that prevented the schools from purchasing EpiPen competitor-products (Compl. ¶¶ 101-02). Plaintiffs further allege that in the generic drug market, Mylan entered into agreements with its competitors (1) to allocate the market for Doxy DR (Compl. ¶¶ 112-26), and (2) to fix the prices of albuterol sulfate, benazepril, clomipramine, divalproex, and propranolol (Compl. ¶¶ 127-60).

The Complaint cites a number of DOJ, congressional, and state investigations into potential anticompetitive conduct by pharmaceutical companies, including Mylan, in the generic drug market. (Compl. ¶¶ 188-200.)[3] However, throughout the class period, Mylan was never—and, as of today, never has been—found liable for the misconduct alleged by Plaintiffs. (Dkt. **[*7]** No. 12-13.)

B. Mylan's Statements to Investors

While intentional misclassification and anticompetitive conduct are both unlawful in their own right, illegal conduct does not in of itself constitute a securities-law violation. Instead, Plaintiffs allege that Mylan misled investors about its misclassification of the EpiPen and its anticompetitive agreements. (Compl. ¶¶ 76, 92, 185-86.) Plaintiffs have

---

[1] NDAs cover "new drug[s]" and ANDAs cover "generic drug product[s]." FDA, "Types of Applications," https://www.fda.gov/Drugs/DevelopmentApprovalProcess/HowDrugsareDevelopedandApproved/ApprovalApplications/default.htm. The parties dispute whether the EpiPen was misclassified.

[2] On consent of both parties, the Court takes judicial notice of Mylan's August 31, 2017, press release finalizing the terms of the settlement. (*See* Dkt. Nos. 53-55.)

[3] Additionally, on consent of the parties, the Court takes judicial notice of (1) the fact that a press release was issued by the Attorney General of Connecticut, on behalf of 46 state attorneys general, announcing their intention to file an amended complaint against Mylan and other drug companies in an antitrust suit, and (2) the fact that the proposed amended complaint in that suit was filed. (Dkt. Nos. 61-1 & 61-2; *see also* Dkt. Nos. 61 & 63.)

identified a long list of allegedly misleading statements spanning the five-year class period. (*See* Compl. ¶¶ 201-297.) These statements can be divided into the following categories.[4]

1. Statements of Income. Mylan stated its financial and operating results in Annual Reports on Form 10-K, in Quarterly Reports on Form 10-Q, and in Current Reports on Form 8-K.

2. Statements Explaining Income. Mylan's Current Reports (Form 8-K) and a quarterly earnings call described the causes and sources of Mylan's financial performance.

3. Statements Explaining the Market. Mylan's Annual Reports (Form 10-K) contained descriptions of the U.S. pharmaceutical market—for example, characterizing the market as "very competitive" and "highly sensitive to price." (Compl. ¶¶ 225, 244, 262, 283.)

4. Statements of **[*8]** Rebate Rates. Mylan's Annual Reports (Form 10-K) also stated the Medicaid rebate rates for "products marketed under ANDAs" and "Medicaid-reimbursed non-innovator products." (*E.g.*, Compl. ¶¶ 203, 260.) None of the Annual Reports stated Mylan's classification of the EpiPen or the rebate rate that Mylan had paid to CMS.

5. Statements of Rebate Complexity and Regulatory Risk. Mylan included statements in both its Annual Reports (Form 10-K) and Quarterly Reports (Form 10-Q) characterizing the Medicaid rebate program as "complex" and warning that its rebate calculations were "subject to . . . review and challenge by the applicable governmental agencies" and that "a governmental authority may take a position contrary to a positon we have taken." (Compl. ¶¶ 205, 210, 215, 227, 246, 264, 269, 287.)

6. Code of Conduct and Business Ethics. Throughout the class period, Mylan's Code of Conduct and Business Ethics stated that "Mylan is committed to complying with applicable antitrust and fair competition laws." (Compl. ¶ 296.)

C. Procedural History

Plaintiffs are all purchasers of Mylan's common stock. Plaintiff Stef Van Duppen filed an action against Mylan N.V., Mylan Inc., Heather Bresch, and John **[*9]** Sheehan on October 11, 2016. (Dkt. No. 1.) Separately, Plaintiff Landon W. Perdue filed an action against Mylan N.V., Mylan Inc., Heather Bresch, Paul B. Campbell, Robert J. Coury, Kenneth S. Parks, and John D. Sheehan on October 13, 2016. *See Perdue v. Mylan N.V.*, No. 16 Civ. 8000, Dkt. No. 1. By Order dated January 9, 2017, the Court consolidated the two cases for pre-trial purposes, appointed Lead Plaintiffs, and approved Lead Counsel. (Dkt. No. 26.)

Lead Plaintiffs subsequently filed the Amended Class Action Complaint (Dkt. No. 39) asserting claims under: (1) *Section 10(b)* of the *Securities Exchange Act of 1934 ("Exchange Act")*, *15 U.S.C. § 78j(b)*, and *Rule 10b-5*, *17 C.F.R. § 240.10b-5*, against all Defendants; (2) *Section 20(a)* of the Exchange Act, *15 U.S.C. § 78t(a)*, against the individual Defendants; and (3) Section 1 of the Israeli Securities Law of 1968, against all Defendants.

Defendants have jointly moved to dismiss all claims for failure to state a claim upon which relief can be granted and to dismiss claims under the Israeli Securities Law for lack of subject matter jurisdiction, for lack of personal jurisdiction, and on *forum non conveniens* grounds. (Dkt. No. 45.)

II. U.S. Securities Law Claims

A. Legal Standard

---

[4] For a complete list of each allegedly misleading statement, see Appendix A to this Opinion and Order.

Plaintiffs' primary cause of action asserts a securities fraud **[*10]** claim under *Rule 10b-5(b)* for "mak[ing] any untrue statement of a material fact or . . . omit[ting] to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading . . . in connection with the purchase or sale of any security." *17 C.F.R. § 240.10b-5*. "To state a claim under these provisions, a plaintiff must show '(1) a material misrepresentation or omission by the defendant; (2) scienter; (3) a connection between the misrepresentation or omission and the purchase or sale of a security; (4) reliance upon the misrepresentation or omission; (5) economic loss; and (6) loss causation.'" *Menaldi v. Och-Ziff Capital Mgmt. Grp. LLC, 164 F. Supp. 3d 568, 576 (S.D.N.Y. 2016)* (quoting *Stoneridge Inv. Partners, LLC v. Scientific—Atlanta, 552 U.S. 148, 157, 128 S. Ct. 761, 169 L. Ed. 2d 627 (2008))*.

Claims for securities fraud are subject to the heightened pleading standards of *Federal Rule of Civil Procedure 9(b)* and the Private Securities Litigation Reform Act ("PSLRA"). *See Fed. R. Civ. P. 9(b)*; *15 U.S.C. § 78u-4*. A claim for securities fraud must "specify each statement alleged to have been misleading, the reason or reasons why the statement is misleading, and, if an allegation regarding the statement or omission is made on information and belief, the complaint shall state with particularity all facts on which that belief is formed." *15 U.S.C. § 78u-4(b)(1)*; *see also Fed. R. Civ. P. 9(b)* ("In alleging fraud **[*11]** or mistake, a party must state with particularity the circumstances constituting fraud or mistake."); *Rombach v. Chang, 355 F.3d 164, 170 (2d Cir. 2004)*. The PSLRA further requires that "the complaint shall, with respect to each act or omission alleged to violate [the Exchange Act], state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind." *15 U.S.C. § 78u-4(b)(2)*.

Plaintiffs' second claim arises under *§ 20(a)* of the Exchange Act. *Section 20(a)* imposes liability on "every person who, directly or indirectly, controls any person liable" for securities fraud. *15 U.S.C. § 78t(a)*. "As a general rule, there can be no control person liability without a 'primary violation' of the Exchange Act." *Menaldi, 164 F. Supp. 3d at 576* (quoting *Wilson v. Merrill Lynch & Co., 671 F.3d 120, 139 (2d Cir. 2011))*. The parties agree that Plaintiff's *§ 10(b)* and *§ 20(a)* claims rise and fall together.

To survive a motion to dismiss for failure to state a claim under *Federal Rule of Civil Procedure 12(b)(6)*, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Wilson v. Merrill Lynch & Co., 671 F.3d 120, 128 (2d Cir. 2011)* (quoting *Iqbal, 556 U.S. at 678*) (internal quotation marks omitted). When considering a motion **[*12]** to dismiss, courts "must accept as true all of the factual allegations contained in the complaint," *Twombly, 550 U.S. at 572* (quoting *Swierkiewicz v. Sorema N. A., 534 U.S. 506, 508 n.1, 122 S. Ct. 992, 152 L. Ed. 2d 1 (2002))*, and must draw "all inferences in the light most favorable to the non-moving party[]," *In re NYSE Specialists Sec. Litig., 503 F.3d 89, 95 (2d Cir. 2007)* (Sotomayor, J.).

On a 12(b)(6) motion, a court may "look[] only to the complaint; documents that are attached as exhibits to, incorporated by reference, or integral to the complaint; and matters of which judicial notice may be taken." *Rhee-Karn v. Burnett, No. 13 Civ. 6132, 2014 U.S. Dist. LEXIS 128199, 2014 WL 4494126, at *3 (S.D.N.Y. Sept. 12, 2014)* (citing *Samuels v. Air Transp. Local 504, 992 F.2d 12, 15 (2d Cir. 1993))*.

B. Material Misrepresentations

The failure to disclose a material fact does not necessarily make its omission untrue or misleading. "*[Section] 10(b)* and *Rule 10b-5(b)* do not create an affirmative duty to disclose any and all material information." *Matrixx Initiatives, Inc. v. Siracusano, 563 U.S. 27, 44, 131 S. Ct. 1309, 179 L. Ed. 2d 398 (2011)*. Instead, "omissions are actionable under *§ 10(b)* only when a corporation has a duty to disclose." *Menaldi, 164 F. Supp. 3d at 579*.

A company has a duty to disclose material information "when (1) a statute or regulation requires disclosure or (2) disclosure is necessary to avoid rendering existing statements misleading by failing to disclose material facts." *Id.* In most circumstances, a company does not have to speak. But "'once a company speaks on an issue or topic, there is a duty to tell the whole truth,' '[e]ven when there is no existing independent duty to disclose **[*13]** information' on the issue or topic." *In re Vivendi, S.A. Sec. Litig., 838 F.3d 223, 258 (2d Cir. 2016)* (alteration in original) (quoting *Meyer v. Jinkosolar Holdings Co., Ltd., 761 F.3d 245, 250 (2d Cir. 2014))*. "[E]ven an entirely truthful statement may provide a basis for liability if material omissions related to the content of the statement make it—or other statements made—materially misleading." *In re Bristol Myers Squibb Co. Sec. Litig., 586 F. Supp. 2d 148, 160 (S.D.N.Y. 2008)*. This is, in short, a rule against telling "half-truths." *In re Vivendi, 838 F.3d at 240*.

One expression of this principle is the rule that corporations are under no general duty "to disclose corporate mismanagement or uncharged criminal conduct." *In re Sanofi Sec. Litig., 155 F. Supp. 3d 386, 403 (S.D.N.Y. 2016)*. "[T]he federal securities laws do not require a company to accuse itself of wrongdoing." *In re Citigroup, Inc. Sec. Litig., 330 F. Supp. 2d 367, 377 (S.D.N.Y. 2004)*, *aff'd sub nom. Albert Fadem Tr. v. Citigroup, Inc., 165 F. App'x 928 (2d Cir. 2006)*. Consequently, to impose securities law liability on a corporation for failure to disclose underlying unlawful conduct, a plaintiff must plead with particularity the affirmative statements that were made misleading by the defendant's failure to disclose the alleged wrongdoing. *See Menaldi, 164 F. Supp. 3d at 578-80*. Additionally—and perhaps obviously—such statements cannot be misleading if the misconduct did not happen; consequently, a plaintiff must adequately plead that the misconduct did, in fact, occur.[5] *Id.*

The Complaint identifies a long list of statements that were allegedly made materially misleading by Mylan's failure to disclose **[*14]** its underlying wrongdoing. These statements fall into six categories: statements of Mylan's income ("Statements of Income"); statements explaining the sources of Mylan's income ("Statements Explaining Income"); statements describing the market in which Mylan sold its products ("Statement Explaining the Market"); statements of the Medicaid rebate rates ("Statements of Rebate Rates"); statements indicating the complexity and regulatory risk associated with calculating Medicaid rebate rates ("Statements of Rebate Complexity and Regulatory Risk"); and Mylan's Code of Conduct and Business Ethics. The Complaint alleges that each category of statement is a half-truth that, once made, gave rise to a duty to make additional disclosures about Mylan's EpiPen classification and anticompetitive agreements.

1. Statements of Income and Statements Explaining Income

In its various periodic financial disclosures, Mylan made (a) statements of income on its Forms 10-K and 10-Q and (b) statements explaining income on its Forms 8-K.[6] The Complaint alleges that these statements

> were misleading because they failed to disclose: (1) that Mylan's net income and revenue were inflated because Mylan knowingly had misclassified **[*15]** the EpiPen for the purposes of the MDRP, and accordingly overcharged Medicaid for its EpiPen purchases; and (2) that this knowing misclassification created an acute risk that the Company would be required to pay steep regulatory fines as a penalty for its illegal conduct, which would ultimately be deducted as a charge against the firm's reported net income.

(*E.g.*, Compl. ¶ 202.) For statements beginning with Mylan's August 1, 2013 Form 8-K, the Complaint additionally alleges that the statements "were misleading because they failed to disclose . . . (3) [that] Mylan's income and revenue were inflated as a result of Mylan's anticompetitive activity, including allocation of the market for, and price fixing of, generic drugs." (*E.g.*, Compl. ¶ 234.)

The quantitative statements of earnings contained in Mylan's Forms 10-K and 10-Q are not actionable. Plaintiffs do not allege that Mylan's annual and quarterly earnings reports were themselves false, and "[a]ccurate statements

---

[5] Because the question of underlying illegality overlaps with—and in many ways is overtaken by—the separate requirement of scienter, the Court considers these questions together.

[6] Mylan also offered an explanation of income in its August 2015 quarterly earnings call. (Compl. ¶ 274.)

about past performance are self evidently not actionable under the securities laws." *Nadoff v. Duane Reade, Inc., 107 F. App'x 250, 252 (2d Cir. 2004)*. Instead, Plaintiffs argue that providing income and revenue information, without a disclosure that those figures were inflated due to **[*16]** illegal conduct, was misleading. But the mere statement of historical financial information does not give rise to a duty to disclose illegal conduct that may have contributed to that performance. *See* *In re Marsh & Mclennan Companies, Inc. Sec. Litig., 501 F. Supp. 2d 452, 470 (S.D.N.Y. 2006)* ("[T]he isolated statement of actual revenues allegedly generated by improper activities does not create *Section 10(b)* liability.").

Mylan's Forms 8-K, however, go one step further. These Current Reports explained the sources and causes of Mylan's financial success. For example, Mylan's August 2013 Form 8-K stated, "The most significant contributor to Specialty segment revenues continues to be the EPIPEN® Auto-Injector, sales of which increased as a result of favorable pricing and volume." (Compl. ¶ 232.) In the next paragraph, Mylan went on to state that "[a]djusted gross margins were positively impacted in the current quarter as a result of the increase in sales of the EPIPEN® Auto-Injector and margins on new products, which was offset [by] the impact of unfavorable pricing on existing products in all regions within our Generics segment." (*Id.*)

Unlike Mylan's statements *of* income on Forms 10-K and 10-Q, Mylan's statements *explaining* income "put the sources of [Mylan's] revenue at issue." **[*17]** *In re Van der Moolen Holding N.V. Sec. Litig., 405 F. Supp. 2d 388, 401 (S.D.N.Y. 2005)*. "[W]here a company puts at issue the cause of its financial success, it may mislead investors if the company fails to disclose that a material source of its success is the use of improper or illegal business practices." *In re FBR Inc. Sec. Litig., 544 F. Supp. 2d 346, 357 (S.D.N.Y. 2008)*.

Mylan's Forms 8-K squarely put its sources of income at issue. For example, attributing EpiPen's strength to "favorable pricing and volume" (Compl. ¶ 232) may have been misleading in the absence of an additional statement disclosing that the EpiPen's strength was *also* due to anticompetitive agreements and knowingly miscalculated Medicaid rebates. Similarly, stating that the generics segment faced "unfavorable pricing" (*id.*) may have been misleading in the absence of a disclosure that low prices were mitigated by price-fixing agreements. Mylan's repeated use of causal language such as "as a result of," "primarily the result of," "driven by," and "due to" exacerbates this problem. (*E.g.*, Compl. ¶¶ 207, 251.)

However, Mylan's statements explaining income created no duty to disclose that its "knowing misclassification created an acute risk that [Mylan] would be required to pay steep regulatory fines as a penalty." (*E.g.*, Compl. ¶ 202.) Mylan's statements disclosing **[*18]** some sources of past income created a duty to tell the whole truth about past sources of income. But Mylan's statements explaining past income do not obligate Mylan to disclose *future risk*. Mylan must tell the whole truth about only the topics it raises.

In sum, the Court concludes that Mylan's statements explaining income were misleading because Mylan failed to disclose that "Mylan's net income and revenue were inflated because Mylan knowingly had misclassified the EpiPen" (*e.g.*, Compl ¶ 201) and that "Mylan's income and revenue were inflated as a result of Mylan's anticompetitive activity" (*e.g.*, Compl. ¶ 232). Mylan is not, however, liable for statements of income made in its Forms 10-K and 10-Q; nor is it liable for failing to disclose an "acute risk" of fines in its Forms 8-K.

2. Statements Explaining the Market

In four of Mylan's five Annual Reports issued during the class period, the company described the market in which it sold the EpiPen and generic drugs. These descriptions emphasized the competitive nature of the U.S. pharmaceutical market and the means by which Mylan competed with other drug companies. In each of these Form 10-Ks, Mylan stated (with a few minor variations **[*19]** irrelevant to the instant motion):

> Our ***primary competitors*** include other generic companies (both major multinational generic drug companies and various local generic drug companies) and branded drug companies that continue to sell or license branded pharmaceutical products after patent expirations and other statutory expirations. In the branded

> space, ***key competitors*** are generally other branded products that ***compete based on their clinical characteristics and benefits***.
>
> ***Competitive factors*** in the major markets in which we participate can be summarized as follows:
>
> United States. ***The U.S. pharmaceutical industry is very competitive***. Our competitors vary depending upon therapeutic areas and product categories. ***Primary competitors include the major manufacturers of brand name and generic pharmaceuticals***.
>
> ***The primary means of competition are innovation and development, timely FDA approval, manufacturing capabilities, product quality, marketing, portfolio offering size, customer service, reputation and price***. The environment of the U.S. pharmaceutical marketplace is ***highly sensitive to price. To compete effectively, we rely on cost-effective manufacturing processes to meet the rapidly changing* [*20] *needs of our customers around a reliable, high quality supply of generic pharmaceutical products***. With regard to our Specialty Segment business, ***significant sales and marketing effort is required*** to be directed to each targeted customer segment in order ***to compete effectively***.
>
> ***Our competitors include other generic manufacturers, as well as brand companies that license their products*** to generic manufacturers prior to patent expiration or as relevant patents expire. . . .

(Compl. ¶¶ 225 (emphasis added); *see also* 244, 262, 283.) The Complaint alleges that these statements

> were misleading because they failed to disclose: (1) that among the primary means by which Mylan competed was through use of anticompetitive agreements [regarding the EpiPen] . . . ; (2) that Mylan had engaged in collusive anticompetitive activity with other drug companies, including (a) allocating the markets for certain generic drugs . . . and (b) colluding with other drug companies to fix the prices of certain generic drugs; (3) that as a result of this anticompetitive activity, the markets for certain generic drugs sold by Mylan were not competitive; and (4) that while absent anti-competitive conduct, "the U.S. pharmaceutical **[*21]** marketplace [was] highly sensitive to price," the price-fixing cartel of which Mylan was a participant controlled the prices of certain generic drugs for which demand was relatively inelastic, allowing the price-fixing cartel to increase prices for those drugs exponentially without generating a proportionate drop in demand.

(Compl. ¶¶ 226, 245, 263, 284.)

Plaintiffs are correct. "[E]ven though no duty to make a statement on a particular matter has arisen, once corporate officers undertake to make statements, they are obligated to speak truthfully and to make such additional disclosures as are necessary to avoid rendering the statements made misleading." *In re Par Pharm., Inc. Sec. Litig., 733 F. Supp. 668, 675 (S.D.N.Y. 1990)*.

Mylan's Annual Reports are replete with statements that characterize the markets for Mylan's EpiPen and generic drugs as "very competitive" and "highly sensitive to price." These statements detail the "primary means of competition" that Mylan employs to survive in those markets and identifies Mylan's "primary competitors" as both brand-name and generic drug manufacturers. If, as Plaintiffs allege, Mylan was engaged in a variety of anticompetitive practices—often in collusion with Mylan's competitors—then these statements are misleading **[*22]** in the absence of a disclosure of that anticompetitive conduct. *See In re Sotheby's Holdings, Inc., No. 00 Civ. 1041, 2000 U.S. Dist. LEXIS 12504, 2000 WL 1234601, at *4 (S.D.N.Y. Aug. 31, 2000)* (holding that statements that identified "'intense' competition" with a "primary . . . competitor" and described the importance of price to consumers were misleading because a "price-fixing agreement between [the company and its competitor] had eliminated price competition"); *see also Menkes v. Stolt-Nielsen S.A., No. 03 Civ. 409, 2005 U.S. Dist. LEXIS 28208, 2005 WL 3050970, at *7 (D. Conn. Nov. 10, 2005)*.

3. Statements of Rebate Rates

In each of Mylan's Annual Reports during the class period, it described the rebate rates that pharmaceutical companies are required to remit to Medicaid. In Mylan's 2012, 2013, and 2014 Form 10-Ks, it stated that "[t]he required rebate is currently 13% . . . for sales of Medicaid-reimbursed products marketed under ANDAs" and that "[s]ales of Medicaid-reimbursed products marketed under NDAs require manufacturers to rebate . . . 23%." (Compl. ¶¶ 203, 223, 242.) In its 2015 and 2016 Form 10-Ks, Mylan substituted the phrase "Medicaid-reimbursed non-innovator products" for "products marketed under ANDAs" and "Medicaid-reimbursed innovator or single-source products" for "products marketed under NDAs." (Compl. ¶¶ 260, 285.) The Complaint alleges that these statements "were misleading because they failed to disclose **[*23]** that Mylan marketed EpiPen under an NDA but rebated Medicaid only 13% of the average manufacturer's price for sales of Medicaid-reimbursed products." (Compl. ¶¶ 204, 224, 243, 261, 286.)

In its first three Annual Reports, Mylan stated a simple rule: *If ANDA, then 13%*. This statement is true, but was made misleading by Mylan's failure to disclose that this formula was untrue in the case of the EpiPen, which was marketed under an NDA but rebated at 13%. Mylan's last two Annual Reports are less blatantly misleading, stating instead: *If N drug, then 13%*. Mylan did, in fact, classify EpiPen as an N drug and rebate at 13%. However, read in the context of Mylan's previous three Annual Reports, a reasonable investor would likely infer that if ANDA-marketed drugs are rebated at 13%, and N drugs are marketed at 13%, then N drugs are those drugs that are marketed under ANDAs. In other words: If ANDA equals 13%, and N drug equals 13%, then ANDA-marketed drugs and N drugs are equivalents. That was not true in the case of the EpiPen, which was marketed under an NDA but rebated at the N drug rate. Consequently, each of Mylan's Form 10-K Annual Reports contained statements that, absent a clear statement **[*24]** of the EpiPen rebate rate, could have misled a reasonable investor as to the rate at which Mylan was rebating the EpiPen.

4. Statements of Rebate Complexity and Regulatory Risk

In eight different Annual and Quarterly Reports on Forms 10-K and 10-Q, Mylan made statements describing the complexity of calculating Medicaid rebate rates and the risk that Mylan's calculations could be incorrect. The following statement from Mylan's February 2012 10-K is representative:

> OUR REPORTING AND PAYMENT OBLIGATIONS UNDER THE MEDICARE AND/OR MEDICAID REBATE PROGRAM AND OTHER GOVERNMENTAL PURCHASING AND REBATE PROGRAMS ***ARE COMPLEX AND MAY INVOLVE SUBJECTIVE DECISIONS THAT COULD CHANGE*** AS A RESULT OF NEW BUSINESS CIRCUMSTANCES, NEW REGULATORY GUIDANCE, OR ADVICE OF LEGAL COUNSEL. ***ANY DETERMINATION OF FAILURE TO COMPLY WITH THOSE OBLIGATIONS COULD SUBJECT US TO PENALTIES AND SANCTIONS*** WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS, AND THE MARKET VALUE OF OUR COMMON STOCK COULD DECLINE.
> . . .
>
> The regulations regarding reporting and payment obligations with respect to Medicare and/or Medicaid reimbursement and rebates and other governmental programs **[*25]** are complex. Because our processes for these calculations and the judgments involved in making these calculations involve, and will continue to involve, subjective decisions and complex methodologies, ***these calculations are subject to the risk of errors***. In addition, ***they are subject to review and challenge by the applicable governmental agencies*** . . . .
>
> Should there be ambiguity with regard to how to properly calculate and report payments — and even in the absence of any such ambiguity — ***a governmental authority may take a position contrary to a position we have taken*** . . . .

(Compl. ¶ 205 (emphasis added and brackets omitted); *see also* Compl. ¶¶ 210, 215, 227, 246, 264, 269, 287.) Beginning with its February 2014 Form 10-K, Mylan added that "ANY FAILURE TO COMPLY WITH THOSE

OBLIGATIONS COULD SUBJECT US TO ***INVESTIGATION***, PENALTIES, AND SANCTIONS." (Compl. ¶¶ 246, 264, 269, 287 (emphasis added).)

The Complaint alleges that these statements were misleading because (1) "the classification of the EpiPen was not complex and did not involve subjective decisions" and "Mylan's classification of the EpiPen was not subject to 'differing interpretations,'" (2) a government authority, namely the **[*26]** HHS IG and CMS, had already taken a position contrary to Mylan's and, starting with Mylan's March 2015 Form 10-K, the DOJ had already subjected Mylan to an investigation, and (3) "Mylan had in fact already failed to comply" with its obligations under the rebate program and that the disclosed "'risk of error already had materialized." (Compl. ¶¶ 206, 211, 216, 228, 247, 265, 270, 288.)

Plaintiffs' first set of allegations fail. Mylan's statements about the complexity, ambiguity, and subjectivity of the rebate calculation are statements of opinion. "A plaintiff who asserts that a statement of opinion or belief . . . is an '*untrue statement* of a material fact' . . . must do more than allege that the underlying fact is false . . . . Rather, such a plaintiff must plead facts that, if true, would be sufficient to show that the speaker did not 'actually hold[] the stated belief' . . . ." *In re Lehman Bros. Sec. & ERISA Litig., 131 F. Supp. 3d 241, 252 (S.D.N.Y. 2015)* (brackets in original) (quoting *Omnicare, Inc. v. Laborers Dist. Council Constr. Indus. Pension Fund, 135 S. Ct. 1318, 1326, 191 L. Ed. 2d 253 (2015))*. While Plaintiffs allege that Mylan knowingly misclassified the EpiPen, they do not adequately and separately allege that Mylan knowingly misclassified the EpiPen *and believed the classification scheme to be simple, unambiguous, or objective*.[7]

As to Plaintiffs' second set **[*27]** of allegations, there is some disagreement among courts in this circuit over whether cautionary statements can give rise to liability when they disclose the future risk of a present fact. *See In re FBR Inc. Sec. Litig., 544 F. Supp. 2d 346, 360-63 (S.D.N.Y. 2008)* (describing the disagreement). Mylan argues that the "risk disclosures about dangers of regulatory noncompliance [are] not actionable" (Dkt. No. 46 at 8 n.7), while Plaintiffs respond that "statements that a company faces risk of a contingency that in fact has already occurred are misleading" (Dkt. No. 49 at 7 n.4.)

"In all cases, however, the court must keep in mind" that the test is whether a "reasonable investor could have been misled about the nature of the risk when he invested." *Halperin v. eBanker USA.com, Inc., 295 F.3d 352, 359 (2d Cir. 2002)* (emphasis omitted). The question, therefore, is not whether a statement of risk is *per se* actionable, but rather whether Mylan's statement of risk could have misled a reasonable investor. *See Menaldi, 164 F. Supp. 3d at 581* ("[A] duty to disclose can arise when a defendant states an opinion that, absent disclosure, misleads investors about material facts underlying that belief.") In many cases, general or boilerplate disclosures of future regulatory risk would not cause a reasonable investor to believe that the company faced **[*28]** no current regulatory risks. *See In re FBR, 544 F. Supp. 2d at 362*. However, the more specific the caution, the more likely it is to mislead a reasonable investor. For example, a caution that "input prices may rise next quarter" would not cause a reasonable investor to conclude that the prices of all inputs had remained flat or declined in the previous quarter. *See In re Noah Educ. Holdings, Ltd. Sec. Litig., No. 08 Civ. 9203, 2010 U.S. Dist. LEXIS 34459, 2010 WL 1372709, at *7 (S.D.N.Y. Mar. 31, 2010)*. But a caution that "the price of our primary input may rise above $5 next quarter" could certainly cause a reasonable investor to conclude that the price was, at present, $4.99 or less.

The Court concludes that Mylan's statements regarding the risk that "a governmental authority may take a . . . contrary" position and the risk that it "could [be] subject[ed] . . . to investigation" both fall on the potentially misleading side of the line. A reasonable investor could have concluded from Mylan's statement that although the government "may" disagree with Mylan, and "could" open an investigation, such unfavorable events had not yet occurred. In this context, "to warn that the untoward may occur when the event is contingent is prudent; to caution that it is only possible for the unfavorable events to happen when they have already occurred is deceit." **[*29]** *In re Van der Moolen Holding N.V. Sec. Litig., 405 F. Supp. 2d 388, 400 (S.D.N.Y. 2005)* (quoting *Voit v. Wonderware Corp., 977 F. Supp. 363, 371 (E.D. Pa. 1997))*; *cf. Rombach v. Chang, 355 F.3d 164, 173 (2d Cir. 2004)*

[7] Indeed, Plaintiffs appear to abandon this claim in their opposition brief. (*See* Dkt. No. 49 at 7 (listing four categories of misleading statements relating to EpiPen, none of which included statements regarding complexity).)

("Cautionary words about future risk cannot insulate from liability the failure to disclose that the risk has transpired.").

Regarding Plaintiffs' third set of allegations, an investor could not reasonably interpret Mylan's caution that rebate calculations are "subjective," "complex," and "subject to the risk of errors" as a statement that its current calculations were—as an objective matter—correct and compliant. Unlike Mylan's warning about the risk of specific adverse regulatory actions, its general caution about the chance of rebate inaccuracy *specifically disclaimed* the interpretation that such inaccuracy was not yet existing.

Instead, the only reasonable inference an investor could have drawn is much narrower: That, at the time of the disclosure, Mylan did not *affirmatively know* that the EpiPen was misclassified. While warning that the rebate calculation *could be wrong* does not imply that the rebate calculation is correct, such a warning does imply that the rebate calculation *could also be correct*. If Mylan knew for certain that the EpiPen was misclassified, then warning about the "risk of errors" could have mislead a reasonable investor as to Mylan's then-existing **[*30]** knowledge. Thus, Plaintiffs' third set of allegations survive only to the extent that Mylan misrepresented its knowledge about the EpiPen's misclassification.

5. Code of Conduct and Business Ethics

Finally, the Complaint alleges that Mylan's Code of Conduct and Business Ethics, which stated that "Mylan is committed to complying with applicable antitrust and fair competition laws," was materially misleading for failure to disclose Mylan's anticompetitive activities. (Compl. ¶¶ 296-97.)

This claim fails. "It is well-established that general statements about reputation, integrity, and compliance with ethical norms are inactionable 'puffery,' meaning that they are 'too general to cause a reasonable investor to rely upon them.'" *City of Pontiac Policemen's & Firemen's Ret. Sys. v. UBS AG, 752 F.3d 173, 183 (2d Cir. 2014)* (quoting *ECA, Local 134 IBEW Joint Pension Tr. of Chicago v. JP Morgan Chase Co., 553 F.3d 187, 206 (2d Cir. 2009))*; *see also* *Singh v. Cigna Corp., 277 F. Supp. 3d 291, 2017 WL 4318057, at *11 (D. Conn., 2017)* ("Although the Code of Ethics was made publicly available on the website and therefore was open for an investor to peruse, there is no reasonable investor who would rely on such 'puffery' . . . .").

C. Scienter and Underlying Misconduct

For each misleading statement, Plaintiffs must allege that Defendants acted with the necessary scienter. "The requisite state of mind in a *Rule 10b-5* action is 'an intent to deceive, manipulate or defraud.'" *Ganino v. Citizens Utilities Co., 228 F.3d 154, 168 (2d Cir. 2000)* (quoting **[*31]** *Ernst & Ernst v. Hochfelder, 425 U.S. 185, 193 n.12, 96 S. Ct. 1375, 47 L. Ed. 2d 668 (1976))*. "In addition to intent, recklessness is a sufficiently culpable mental state for securities fraud in this circuit. Recklessness is defined as 'at the least, . . . an extreme departure from the standards of ordinary care . . . to the extent that the danger was either known to the defendant or so obvious that the defendant must have been aware of it.'" *ECA, 553 F.3d at 198* (internal citation omitted) (quoting *Novak v. Kasaks, 216 F.3d 300, 308 (2d Cir. 2000))*.

The requisite scienter "can be established 'either (a) by alleging facts to show that defendants had both motive and opportunity to commit fraud, or (b) by alleging facts that constitute strong circumstantial evidence of conscious misbehavior or recklessness.'" *Ganino, 228 F.3d at 168-69* (internal citation omitted) (quoting *Shields v. Citytrust Bancorp, Inc., 25 F.3d 1124, 1128 (2d Cir. 1994))*.

To establish scienter under the motive prong, the Complaint must allege that the officers in question "benefitted in some concrete and personal way from the purported fraud." *Novak, 216 F.3d at 307-08*. "Motives that are common to most corporate officers, such as the desire for the corporation to appear profitable and the desire to keep stock prices high to increase officer compensation, do not constitute 'motive' for purposes of this inquiry. Rather, the 'motive' showing is generally met when corporate insiders allegedly make **[*32]** a misrepresentation in order to sell their own shares at a profit." *ECA, 553 F.3d at 198* (internal citations omitted). Plaintiffs do not make any allegations of motive with respect to any individual Defendant.

Alternatively, Plaintiffs can plead scienter under the circumstantial evidence prong, although "[w]here motive is not apparent . . . the strength of the circumstantial allegations must be correspondingly greater." *Kalnit v. Eichler, 264 F.3d 131, 142 (2d Cir. 2001)* (quoting *Beck v. Mfrs. Hanover Trust Co., 820 F.2d 46, 50 (2d Cir. 1987))* (internal quotation marks omitted). "At least four circumstances may give rise to a strong inference of the requisite scienter: where the complaint sufficiently alleges that the defendants (1) 'benefitted in a concrete and personal way from the purported fraud'; (2) 'engaged in deliberately illegal behavior'; (3) 'knew facts or had access to information suggesting that their public statements were not accurate'; or (4) 'failed to check information they had a duty to monitor.'" *ECA, 553 F.3d at 199* (quoting *Novak, 216 F.3d at 311*).

To adequately plead scienter, the Complaint must "state with particularity facts giving rise to a strong inference that the defendant[s] acted with the required state of mind." *15 U.S.C. § 78u-4(b)(2)*. "To qualify as 'strong' . . . an inference of scienter must be more than merely plausible or reasonable—it must be **[*33]** cogent and at least as compelling as any opposing inference of nonfraudulent intent." *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 314, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)*. "[T]he court's job is not to scrutinize each allegation in isolation but to assess all the allegations holistically." *Id. at 326*.

Plaintiffs have identified four categories of actionable statements which could have misled the reasonable investor about: (1) the rate at which Mylan rebated the EpiPen, (2) whether a government agency had expressed disagreement with or opened an investigation into Mylan's rebate calculation, (3) whether Mylan had knowingly misclassified the EpiPen, and (4) whether Mylan had entered into anticompetitive agreements with respect to the EpiPen and generic drugs. *See supra* Part II.B. For ease of reference, the Court will call these categories of statements Rebate Statements, Regulatory Risk Statements, Misclassification Statements, EpiPen Antitrust Statements, and Generic Drugs Antitrust Statements.

For some of these categories, whether Mylan acted with the requisite state of mind in making misleading statements hinges, at least in part, on whether underlying unlawful conduct occurred. Thus, where appropriate, the Court conducts its analysis of illegality and scienter together.

1. Rebate [*34] Statements and Regulatory Risk Statements

Mylan's Rebate Statements and Regulatory Risk Statements are potentially material even in the absence of illegal conduct. Mylan's statements in these two categories were misleading because they gave the investor the false impression that (1) the EpiPen was being rebated at 23% and (2) Mylan's rebate calculation had not yet been contradicted by CMS and was not yet subject to a DOJ investigation. Even if Mylan's rebate rate was legally correct, Mylan nevertheless faced a risk of liability. A reasonable investor certainly could have found information about that liability "important in deciding how to act," *ECA, 553 F.3d at 197* (brackets omitted), and disclosure of the EpiPen's real rebate rate and the existence of significant governmental scrutiny could have "significantly altered the 'total mix' of information made available" to a reasonable investor, *Basic Inc. v. Levinson, 485 U.S. 224, 232, 108 S. Ct. 978, 99 L. Ed. 2d 194 (1988)* (quoting *TSC Indus., Inc. v. Northway, Inc., 426 U.S. 438, 449, 96 S. Ct. 2126, 48 L. Ed. 2d 757 (1976))* (internal quotation marks omitted). Thus, Mylan's Rebate Statements and Regulatory Risk Statements need not be illegal to be materially misleading.

Construing all inferences in Plaintiffs' favor, the Court has no trouble concluding that Plaintiffs have adequately pleaded scienter with respect to Mylan's Rebate **[*35]** Statements and Regulatory Risk Statements. It requires no stretch of the imagination to infer that, due to their positions at the company and the importance of EpiPen to Mylan's operations, Defendants "knew facts or had access to information suggesting that their public statements" about the EpiPen rebate rate and the existence of adverse regulatory activity "were not accurate." *Novak, 216 F.3d at 311*. With respect to the rebate rate, the individual Defendants almost certainly had access to the information that Mylan was rebating EpiPen at 13%. (Compl. ¶ 330.) Similarly, with respect to regulatory scrutiny, the Complaint alleges that "CMS repeatedly informed Mylan that Mylan was misclassifying the EpiPen" and that Defendants were notified of the DOJ investigation by a subpoena in November 2014. (Compl. ¶ 331.)

Consequently, Plaintiffs have plausibly alleged with particularity that Defendants were at least reckless with respect to their Rebate Statements and Regulatory Risk Statements because "the danger was either known to the defendant[s] or so obvious that the defendant[s] must have been aware of it." *Rolf v. Blyth, Eastman Dillon & Co., 570 F.2d 38, 47 (2d Cir. 1978)*, *amended sub nom.* *Rolf v. Blyth Eastman Dillon & Co., 570 F.2d 38, 1978 WL 4098 (2d Cir., 1978)* (quoting *Sanders v. John Nuveen & Co., 554 F.2d 790, 793 (7th Cir. 1977))*.

2. Misclassification Statements

Mylan's Misclassification Statements are materially misleading **[*36]** only if the EpiPen was, in fact, misclassified—and knowingly done so. Plaintiffs allege that Mylan's Misclassification Statements were misleading because the company failed to disclose that "Mylan knowingly had misclassified the EpiPen." (*E.g.*, Compl. ¶ 202.) Mylan never affirmatively represented that the EpiPen was classified correctly; indeed, it warned investors that the EpiPen rebate rate was subject to error. Because Mylan warned investors that its rebate rate could be incorrect, Mylan's statements could mislead a reasonable investor only as to Mylan's *knowledge about* EpiPen's alleged misclassification—not the fact of misclassification alone.

Consequently, to state a claim for violation of the securities laws for Mylan's Misclassification Statements, Plaintiffs must adequately plead that (1) the EpiPen was, in fact, misclassified, (2) that Mylan knew EpiPen was misclassified, and (3) that Mylan acted with the requisite scienter in misleading investors about Mylan's knowledge of the misclassification. These three requirements are all the harder to demonstrate because Plaintiffs must plead not only Mylan's knowledge of the *fact* of Mylan's classification as an N drug, but also—more **[*37]** significantly—knowledge of the *legal conclusion* that such a classification was incorrect.

At this stage of the litigation, Plaintiffs have succeeded in clearing these high hurdles. Plaintiffs offer the following pieces of circumstantial evidence to create "a strong inference" of scienter: (1) the individual Defendants' high-level positions at Mylan, (2) the importance of the EpiPen to Mylan's business, (3) the individual Defendants' signed certifications ("SOX certifications") of Mylan's Forms 10-K and 10-Q, (4) notification by CMS that the EpiPen was misclassified, and (5) receipt of the DOJ subpoena. (Compl. ¶¶ 325-31.)

The most important of these pieces of evidence is the allegation that CMS "repeatedly informed Mylan that Mylan was misclassifying the EpiPen for purposes of the MDRP." (Compl. ¶ 331.) The Complaint alleges that the HHS IG identified the EpiPen as a misclassified drug in March 2009, and that sometime thereafter, CMS "on multiple occasions, provided guidance to . . . Mylan on the proper classification of drugs and . . . expressly told Mylan that [the EpiPen] is incorrectly classified." (Comp. ¶ 65 (alterations in original) (quoting Letter from Andrew Slavitt, CMS Acting **[*38]** Administrator, to Ron Wyden, U.S. Senator (Oct. 5, 2016)).) Unlike other government *investigations*, which generally do not demonstrate scienter, the CMS communication reflected a final determination that Mylan had incorrectly classified EpiPen. *Cf.* *Lipow v. Net1 UEPS Techs., Inc., 131 F. Supp. 3d 144, 167 (S.D.N.Y. 2015)* ("[T]he government investigations cannot bolster allegations of scienter that do not exist, and, as currently plead[ed], the government investigations are just that, investigations.").

Plaintiffs' other pieces of circumstantial evidence bolster the inference of scienter. The individual Defendants' position at the company, the importance of EpiPen to Mylan's bottom line, and Defendants' SOX certifications all give rise to the strong inference that the individual Defendants knew that EpiPen's was classified as an N drug, knew that it was being rebated at 13%, and knew that Mylan had been informed by CMS that the EpiPen's classification was incorrect. *Cf.* *Plumbers & Steamfitters Local 773 Pension Fund v. Canadian Imperial Bank of Commerce, 694 F. Supp. 2d 287, 300 (S.D.N.Y. 2010)* (declining to infer scienter from Defendants' management roles when "Plaintiff [had] not 'specifically identified any reports or statements' or any dates or time frame in which Defendants were put on notice of contradictory information" (quoting *Teamsters Local 445 Freight Div. Pension Fund v. Dynex Capital Inc., 531 F.3d 190, 196 (2d Cir. 2008)))*. Furthermore, although "the **[*39]** existence of an investigation alone is not sufficient to give rise to a requisite cogent and compelling inference of scienter," Mylan's receipt of a DOJ subpoena in 2014 "may be considered by the Court as part of its analysis." *In re Gentiva Secs. Litig., 932 F. Supp. 2d 352, 380 (E.D.N.Y. 2013)*.

Mylan argues that the EpiPen could not have been knowingly misclassified both because the classification rules are complex and because Mylan relied on "longstanding advice from CMS" indicating that the EpiPen was classified correctly. (Dkt. No. 46 at 6-8.) Mylan may yet be proven correct. But at this stage of the litigation, Plaintiffs have plausibly pleaded that underlying misconduct occurred and that "the inference of scienter is as compelling as the opposing inference of the non-fraudulent intent of the Individual Defendants." *Patel v. L-3 Commc'ns Holdings Inc., 2016 U.S. Dist. LEXIS 42978, 2016 WL 1629325, at *12 (S.D.N.Y. Apr. 21, 2016)*. Whether the EpiPen was misclassified, and whether the individual Defendants had knowledge of such misclassification, is appropriately the subject of discovery.

3. EpiPen Antitrust Statements

The Complaint alleges that Mylan entered into two anticompetitive agreements with respect to the EpiPen. But Plaintiffs have failed to plausibly allege that either kind of agreement violated the antitrust laws.

First, Plaintiffs allege that a 2012 **[*40]** settlement agreement with the generic drug manufacturer Teva likely contained a "pay-for-delay" provision "that required Mylan to give Teva a monetary payment in consideration for Teva's agreement to delay introducing its generic epinephrine autoinjector." (Compl. ¶ 97.)

However, these types of "reverse payment" settlement agreements are not presumptively unlawful, but are instead subject to the fact-intensive rule-of-reason antitrust analysis. *See* *F.T.C. v. Actavis, Inc., 570 U.S. 136, 159, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. To determine whether a reverse payment violates the antitrust laws, a court must consider "its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification." *Id.* The Complaint makes no allegations of these sorts. Instead, it offers only the conclusory allegations that (1) a "'pay-for-delay' agreement . . . violates antitrust laws where, as here, the monetary payment is offered as consideration primarily to achieve the anticompetitive effect of delaying the entry of a competitive drug into the market" and (2) that Mylan was "able to increase the price of the EpiPen by more than 400% between 2009 **[*41]** and 2016." (Compl. ¶¶ 97, 100.) Even drawing all inferences in favor of Plaintiffs, the Court cannot construe these bare statements as plausibly alleging that the alleged pay-for-delay scheme[8] is unlawfully anticompetitive under the multifactor *Actavis* test.

Second, Plaintiffs allege that Mylan "thwarted competition against the EpiPen by requiring schools . . . to sign exclusive dealing agreements with Mylan" that prevented the schools from purchasing products that competed with EpiPen within the next year. (Compl. ¶ 101.) Plaintiffs allege that these arrangements violated *Section 2* of the *Sherman Act*.[9]

Section 2 of the Sherman Act makes it unlawful to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2*. To allege a violation of *Section 2*, a plaintiff "must show harm to competition in the relevant market." *Solent Freight Servs., Ltd. Inc. v. Alberty, 914 F. Supp. 2d 312, 323 (E.D.N.Y. 2012)*; *see also* *E & L Consulting,*

[8] Because the terms of the settlement agreement are confidential, the Complaint alleges that it "likely contained" a pay-for-delay provision. (Compl. ¶ 97.)

[9] The Complaint also alleges that the exclusive dealing arrangements violate *Section 3* of the *Clayton Act*, but Plaintiffs have waived this claim by failing to respond to Defendants' contrary arguments in their motion-to-dismiss briefing. (*See* Dkt. No. 46 at 9; Dkt. No. 49 at 10 n.8.) Regardless, the Court concludes that the Complaint does not adequately allege a violation of *Section 3* because it fails to allege that "the competition foreclosed by the contract[s] . . . constitute[s] a substantial share of the relevant market." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 328, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*.

Ltd. v. Doman Indus. Ltd., 472 F.3d 23, 31 (2d Cir. 2006) ("A viable claim under Section 2 . . . must . . . show a harm to competition."). "[I]t usually does not further harm competition for a monopolist in one market to leverage its advantage into a monopoly in a downstream market," and exclusive-dealing agreements "may . . . have pro-competitive **[*42]** purposes and effects, such as assuring steady supply, affording protection against price fluctuations, reducing selling expenses, and promoting stable, long-term business relationships." Geneva Pharms. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 508 & n.4 (2d Cir. 2004). Therefore, as a general rule, exclusive-dealing agreements are "presumptively legal." Elecs. Commc'ns Corp. v. Toshiba Am. Consumer Prods., Inc., 129 F.3d 240, 245 (2d Cir. 1997).

Plaintiffs have failed to allege that Mylan's exclusive-dealing agreements had "an actual adverse effect on competition as a whole in the relevant market," George Haug Co. v. Rolls Royce Motor Cars Inc., 148 F.3d 136, 139 (2d Cir. 1998), or that the arrangements' "anticompetitive effects outweigh [their] procompetitive effects," E & L Consulting, Ltd., 472 F.3d at 29 (quoting Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)). The Complaint's allegation that Mylan's school contracts "foreclosed a substantial portion of the market for school purchases of epinephrine autoinjectors" (Compl. ¶ 102) is conclusory and fails to support a plausible inference of illegality.

Alternatively, Plaintiffs argue that Mylan's failure to disclose the pay-for-delay and exclusive-dealing agreements is misleading, even if those agreements are entirely legal, because "Mylan's failure to list [such] agreements as among the means by which it competed misled investors into believing that Mylan did not employ such agreements, when in fact it did." (Dkt. No. 49 at 9.)

Plaintiffs' argument goes too far. The **[*43]** Complaint alleges that Mylan's Statements Explaining Income were misleading because "Mylan's income and revenue were *inflated* as a result of Mylan's anticompetitive activity" (*e.g.*, Compl. ¶ 234 (emphasis added)), and that Mylan's Statements Explaining the Market were misleading because they failed to disclose "that among the primary means by which Mylan competed was through use of *anticompetitive agreements*" and "that Mylan had engaged in *collusive anticompetitive activity* with other drug companies" in the generics market (*e.g.*, Compl. ¶ 226 (emphasis added)). In short, the Complaint alleges that Mylan's statements were misleading because they failed to disclose that *illegal means* had inflated Mylan's margins and altered the market. Nothing in the Complaint explains why Mylan's statements would be materially misleading if the agreements were, as a legal matter, not unlawfully anticompetitive.[10] Plaintiff's newfound theory of liability, raised for the first time in their opposition to Defendants' motion to dismiss, comes too late.

Finally, even if the Complaint adequately pleaded underlying unlawful conduct, it has not alleged with particularity that Defendants acted with the requisite **[*44]** scienter. Plaintiffs' sparse allegations of illegality cannot give rise to a strong inference that Mylan was reckless in its failure to disclose the existence of either the pay-for-delay or exclusive-dealing agreements. *See* Novak, 216 F.3d at 308 (defining recklessness as "an extreme departure from the standards of ordinary care . . . to the extent that the danger was either known to the defendant or so obvious that the defendant must have been aware of it" (alteration in original) (quoting Rolf v. Blyth, Eastman Dillon & Co., Inc., 570 F.2d 38, 47 (2d Cir. 1978))).

4. Generic Drugs Antitrust Statements

a. Underlying Misconduct

The Complaint alleges that Mylan engaged in two different kinds of anticompetitive activities in the market for generic drugs. Plaintiffs plausibly allege that both types of unlawful conduct occurred.[11]

---

[10] Even if such allegations could be teased out of the Complaint, the Court is constrained from doing so because a claim for securities fraud must allege with particularity "the reason or reasons why [each] statement is misleading." 15 U.S.C. § 78u-4(b)(1).

First, Plaintiffs allege that Mylan executives entered into an unlawful agreement with executives at Heritage Pharmaceuticals, Inc. to allocate the market for Doxy DR. (Compl. ¶¶ 112-26.) Relying on information contained in a joint complaint filed by the attorneys general many different states (Compl. ¶ 113), Plaintiffs allege that Jason Malek, Vice President of Commercial Operations at Heritage, and Jeffrey Glazer, Heritage's President and CEO, initiated discussions **[*45]** with Mylan about a market allocation scheme in May 2013 (Compl. ¶¶ 115-16). Communicating via LinkedIn and telephone, "Heritage and Mylan executives agreed to allocate the market for Doxy DR," which included a commitment by Mylan "to 'walk away' from at least one large national wholesaler and one large pharmacy chain to allow Heritage to obtain the business." (Compl. ¶ 115-18.) When a dispute over the arrangement arose in November 2013, Heritage executives "contacted Mylan directly to address the situation." (Compl. ¶ 119.) The Complaint cites two internal Heritage communications and one email to Mylan which confirm Mylan's participation in Heritage's market allocation scheme. (Compl. ¶¶ 119, 122, 126.)

These allegations are sufficient to plausibly plead the existence of a market allocation arrangement between Mylan and Heritage. The Complaint alleges how the agreement was made, when the agreement was made, and the rough contours of the agreement—certainly "enough factual matter (taken as true) to suggest that an agreement was made." *Twombly, 550 U.S. at 556*. To be sure, Plaintiffs' allegations leave the reader wanting to know more. But "[a]sking for plausible grounds to infer an agreement does not impose **[*46]** a probability requirement at the pleading stage; it simply calls for enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Id.* The Complaint exceeds this standard.

Second, Plaintiffs allege that Mylan agreed with other drug companies to fix the prices of five generic drugs: albuterol sulfate, benazepril, clomipramine, divalproex, and propranolol. (Compl. ¶¶ 127-60.) The Complaint offers no direct evidence of conspiracy. Instead, it identifies parallel price movements for each of the drugs, all characterized by a sharp spike over the course of several months (*see* Compl. ¶¶ 131, 137, 143, 149, 155), and additional factors that tend to indicate conscious agreement to raise prices (*see* Compl. ¶¶ 161-84).

"[C]onscious parallelism . . . is not in itself unlawful." *Twombly, 550 U.S. at 553-54* (quoting *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993))* (internal quotation marks omitted). "Accordingly, to prove an antitrust conspiracy, 'a plaintiff must show the existence of additional circumstances, often referred to as 'plus' factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy.'" *United States v. Apple, Inc., 791 F.3d 290, 315 (2d Cir. 2015)* (quoting *Apex Oil Co. v. DiMauro, 822 F.2d 246, 253 (2d Cir. 1987))*. "Circumstances that may raise an inference of conspiracy **[*47]** include 'a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications.'" *Id.* (quoting *Mayor & City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 136 (2d Cir. 2013))*. Plaintiffs must allege "parallel behavior that would probably not result from chance, coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties." *Twombly, 550 U.S. at 556 n.4* (quoting 6 P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶ 1425, at 167-185 (2d ed. 2003)).

Viewed in the light most favorable to Plaintiffs, the facts alleged in the Complaint meet this burden. The Complaint alleges specific features of the generic drug market that gave Mylan a motive to conspire to fix prices, including:

> (1) a high degree of industry concentration; (2) high barriers to entry; (3) demand inelasticity; (4) the lack of available substitutes; (5) a high degree of interchangeability between the goods of cartel participants; (6) ease of, and opportunities for intercompetitor contacts and communication; (7) sufficient numbers to drive competition; (8) absence of departures from the market; (9) absence of non-conspiring competitors; **[*48]** (10) size of price increases; and (11) reimbursement of generic drugs.

---

[11] The parties dispute whether, in securities fraud actions premised on a failure to disclose underlying criminal conduct, the underlying conduct is subject to heightened pleading standards or plausibility pleading analysis. The Court need not decide this issue because it concludes that Plaintiffs have satisfied either standard.

(Compl. ¶ 162.) *See also* *In re Propranolol Antitrust Litig., 249 F. Supp. 3d 712, 719 (S.D.N.Y. 2017)* ("Defendants are correct that the bare allegation that defendants operate in an oligopolistic market is insufficient to establish a common motive to conspire. Instead, a plaintiff must allege facts, specific to the market at issue, suggesting that the defendants had an incentive to manipulate prices." (internal citation omitted)). Furthermore, the Complaint alleges that because generic drugs are easily substitutable, they compete primarily on price. (Comp. ¶ 161.) Consequently, "[i]n a market free of collusion, if one generic drug marketer raises its prices significantly above those of its competitors, that marketer will lose market share." (*Id.*) The importance of price in the generics market, coupled with the lack of an external triggering event (e.g., a supply shortage or spike in demand), supports the inference that Mylan's sudden price increases "would have been against its self-interest in the absence of price collusion." (*Id.*)

b. Scienter

With respect to Mylan's Generic Drugs Antitrust Statements, the crux of Plaintiffs' scienter allegations rely on the allegations of a "confidential **[*49]** witness" ("CW"). (Compl. ¶¶ 110-11; 332-33.) CW worked at Mylan from 2010 until October 2015 as Director of Costing and later as Director of Production Planning. (Compl. ¶ 110.) At times, CW worked directly with Defendant Sheehan and attended company-wide meetings involving Mylan's CEO and CFO. (Compl. ¶¶ 110-11.) CW allegedly reports that "pricing decisions at Mylan occurred frequently and involved all of Mylan's top executives" and that "the CEO and CFO . . . reviewed any price adjustments and had the last word on pricing decisions for Mylan's drugs." (Compl. ¶ 111.) When it came to price, "[e]verything went up through the top." (*Id.*)

With respect to price-fixing, these allegations are sufficient to support a "strong inference" that the individual Defendants either consciously participated in price-fixing, or were at least reckless in ignoring information indicating that price-fixing was occurring. Based on CW's personal observations at meetings with Mylan's CEO and CFO, he alleges that individuals serving in those positions certainly had access to, and actively participated in, pricing decisions. Although CW does not directly allege that the individual Defendants agreed to fix prices, **[*50]** the Complaint persuasively alleges that in the absence of a collusive agreement, Mylan's dramatic price increases would have been against corporate self-interest. (Comp. ¶ 161.) Consequently, the inference that Defendants knew about such price-fixing agreements is "at least as compelling as any opposing inference" that they approved economically irrational price hikes. *Tellabs, Inc., 551 U.S. at 314*.

With respect to Mylan's Doxy DR market-allocation agreement, however, Plaintiffs do not adequately plead scienter. CW alleges only that the individual Defendants participated in pricing decisions. CW does not allege that the individual Defendants participated in decisions about which markets or customers to target for the sale of *any* generic drug, much less Doxy DR in particular. And the Complaint's allegations about the underlying market-allocation agreement identify only amorphous Mylan "employees" and "executives."[12] Finally, although the Complaint notes subsequent government investigations into Mylan's conduct in the generics market, "government investigations cannot bolster allegations of scienter that do not exist." *Lipow, 131 F. Supp. 3d at 167*.

D. Loss Causation

"Loss causation . . . is the causal link between the alleged misconduct **[*51]** and the economic harm ultimately suffered by the plaintiff." *Emergent Capital Inv. Mgmt., LLC v. Stonepath Grp., Inc., 343 F.3d 189, 197 (2d Cir. 2003)*. "[T]o establish loss causation, 'a plaintiff must allege . . . that the *subject* of the fraudulent statement or omission was the cause of the actual loss suffered,' *i.e.*, that the misstatement or omission concealed something

---

[12] For the same reasons, the Complaint also fails to sufficiently plead corporate scienter. *See* *Wyche v. Advanced Drainage Sys., Inc., No. 15 Civ. 5955, 2017 U.S. Dist. LEXIS 34656, 2017 WL 971805, at *15 n.9 (S.D.N.Y. Mar. 10, 2017)*, *aff'd*, *710 Fed. Appx. 471, 2017 WL 4570663 (2d Cir., 2017)* (concluding that allegations of the actions of "unnamed employees" did not give rise to corporate scienter because, "though there is no specific seniority formula for scienter, these employees are clearly not identified with the requisite particularity that would permit the Court to infer that their seniority is sufficient").

from the market that, when disclosed, negatively affected the value of the security." *Lentell v. Merrill Lynch & Co., 396 F.3d 161, 173 (2d Cir. 2005)* (second alteration in original) (internal citations omitted) (quoting *Suez Equity Investors, L.P. v. Toronto—Dominion Bank, 250 F.3d 87, 95 (2d Cir. 2001))*. At the motion to dismiss stage, the Court must determine whether the complaint has sufficiently pleaded that "that the loss [was] foreseeable *and* that the loss [was] caused by the materialization of the concealed risk." *Id.*

Plaintiffs plausibly allege that Mylan's misstatements about rebate rates, regulatory risk, misclassification, and generic drug price-fixing all "concealed the circumstances that bear upon the loss suffered such that plaintiffs would have been spared all or an ascertainable portion of that loss absent the fraud." *Lentell, 396 F.3d at 175*. Plaintiffs allege, for example, that disclosures of EpiPen's rebate rate and CMS's adverse regulatory determination caused Mylan's share price to fall 4.65% in September 2016 **[*52]** and another 3.13% in October 2016. (Compl. ¶¶ 308-10.) Similarly, disclosure of the suspected price-fixing scheme caused Mylan's stock to drop 6.9% and then another 1.64% in November 2016. (Compl. ¶¶ 315-18.)

These allegations are sufficient, at this stage, "to provide [the] defendant[s] with some indication of the loss and the causal connection that the plaintiff has in mind." *Fin. Guar. Ins. Co. v. Putnam Advisory Co., LLC, 783 F.3d 395, 404 (2d Cir. 2015)*. Having concluded that Plaintiffs have sufficiently pleaded loss causation, the Court defers questions about the robustness of Plaintiffs' selection of corrective disclosures to a later stage of litigation, after the aid of discovery.

III. Israeli Securities Law Claim

In addition to U.S. securities-law claims brought on behalf of individuals who purchased Mylan stock on the NASDAQ, Plaintiffs also assert a third cause of action under Israeli securities laws on behalf of individuals who purchased Mylan stock on the Tel Aviv Stock Exchange. The Court declines to exercise supplemental jurisdiction over this Israeli law claim.

For claims not falling within a court's original jurisdiction,[13] the federal supplemental jurisdiction statute provides that "the district courts shall have supplemental jurisdiction over all other **[*53]** claims that are so related to claims in the action within such original jurisdiction that they form part of the same case or controversy." *28 U.S.C. § 1367(a)*. *Section 1367(c)*, however, gives district courts discretion to refuse to exercise supplemental jurisdiction if:

> (1) the claim raises a novel or complex issue of State law,
>
> (2) the claim substantially predominates over the claim or claims over which the district court has original jurisdiction,
>
> (3) the district court has dismissed all claims over which it has original jurisdiction, or
>
> (4) in exceptional circumstances, there are other compelling reasons for declining jurisdiction.

28 U.S.C. § 1367; *see also* *Kolari v. New York-Presbyterian Hosp., 455 F.3d 118, 122 (2d Cir. 2006)* ("*Subsection (c)* of *§ 1367* confirms the discretionary nature of supplemental jurisdiction . . . ." (quoting *City of Chicago v. Int'l Coll. of Surgeons, 522 U.S. 156, 173, 118 S. Ct. 523, 139 L. Ed. 2d 525 (1997))* (internal quotation marks omitted)).

---

[13] The Court notes that it is possible that Plaintiffs' Israeli law claim could fall within the Court's original diversity jurisdiction. It appears that at least one defendant, Mylan Inc., is a citizen of New York because its principal place of business is located in this state. (Compl. ¶ 27.) But because the Complaint does not allege the citizenship of the plaintiffs or the individual Defendants, the Court cannot determine whether complete or minimal diversity exists. *See* *28 U.S.C. § 1332(a)*, *(d)*. Because "jurisdiction must be shown affirmatively, and that showing is not made by drawing from the pleadings inferences favorable to the party asserting it," *Shipping Fin. Servs. Corp. v. Drakos, 140 F.3d 129, 131 (2d Cir. 1998)*, the Court presumes that the only possible basis for jurisdiction over the Israeli claim is supplemental jurisdiction, as alleged in the Complaint. (*See* Compl. ¶ 22.) Furthermore, the Court notes that although it does not reach Defendants' motion to dismiss under the doctrine of *forum non conveniens*, several of the factors compelling the Court to decline supplemental jurisdiction would also weigh in favor of a dismissal on those alternative grounds.

Both the first and fourth factors compel the Court to decline to exercise supplemental jurisdiction. First, Plaintiffs' Israeli law claim raises a complex issue of foreign law.[14] Specifically, Plaintiffs' claim calls on this Court to decide whether Israeli courts would apply U.S. securities law or Israeli securities law to a "dual listed" company such as Mylan. Plaintiffs cite three district-level decisions by Israeli courts applying **[*54]** U.S. law, but these decisions are not precedential. *See* CC (TA) 28811/16 *Damati v. Mankind Corp.* ¶ 80 (2016) (Isr.) (Dkt. No. 60-2) ("According to the Israeli legal system, decisions of a district court do not constitute accepted legal theory and do not obligate other instances that rule on the same issue . . . ."). And the Israeli Supreme Court has recently and explicitly stated that this choice-of-law issue is an open question:

> The question of what the applicable law is in a claim such . . . which relates to a "dual" company that is listed on both the stock exchange in Israel and on a stock exchange in the United States, is indeed a question that has not yet been finally answered in the settled law in Israel. It is not a simple question, and the discussion of it must take into account a variety of considerations.

CA 28811/16 *Damti v. MannKind Corp.* ¶ 45 (2016) (Isr.) (Dkt. No. 57-1). The Court agrees with the *Damati* district court, which candidly opined that "it is not possible to determine, solely on the basis of the language of the law, what law applies to the question of liability for the reporting of dual-listed companies" because "the language of the law can bear" opposing interpretations. **[*55]** CC (TA) 28811/16 *Damati v. Mankind Corp.* ¶ 28 (2016) (Isr.). Consequently, the Court believes it better to decline to exercise supplemental jurisdiction, and to leave this novel question of Israeli law to the Israeli Supreme Court to answer in the first instance.

Furthermore, the Court concludes that this case presents the kind of "exceptional circumstances" offering "compelling reasons for declining jurisdiction" under *§ 1367(c)(4)*. Two separate class actions are currently pending in Israeli courts, both brought by purchasers of Mylan's stock on the TASE and both raising claims similar to those in Plaintiffs' Complaint.[15] (*See* Dkt. No. 52, at 1-3.) Israeli courts are better equipped than this Court to offer Israeli plaintiffs an appropriate forum to litigate their claims under Israeli law. As the Supreme Court has observed:

> Like the United States, foreign countries regulate their domestic securities exchanges and securities transactions occurring within their territorial jurisdiction. And the regulation of other countries often differs from ours as to what constitutes fraud, what disclosures must be made, what damages are recoverable, what discovery is available in litigation, what individual actions **[*56]** may be joined in a single suit, what attorney's fees are recoverable, and many other matters.

Morrison v. Nat'l Australia Bank Ltd., 561 U.S. 247, 269, 130 S. Ct. 2869, 177 L. Ed. 2d 535 (2010). (*See also* Dkt. No 52, at 6 (describing Israel's streamlined system for distributing damage awards to shareholders).) In the interests of international comity, this Court hesitates to impinge on Israeli courts' ability to adjudicate the claims of their own citizens under their own securities laws—even if Israel has chosen, as a matter of *Israeli law*, to apply U.S. securities law. "[R]espect for foreign law would be completely subverted if foreign claims were allowed to be piggybacked into virtually every American securities fraud case, imposing American procedures, requirements, and interpretations . . . ." *In re Toyota Motor Corp. Secs. Litig., No. 10 Civ. 922, 2011 U.S. Dist. LEXIS 75732, 2011 WL 2675395, at *7 (C.D. Cal. July 7, 2011)*.

On the other side of the ledger, the United States has only a minimal interest, if any, in providing a forum to litigate the claims of foreign stockholders under foreign securities laws. *See* *Dar El-Bina Eng'g & Contracting Co. v. Republic of Iraq, 79 F. Supp. 2d 374, 388 (S.D.N.Y. 2000)*; *see also* *Morrison, 561 U.S. at 270* ("While there is no reason to believe that the United States has become the Barbary Coast for those perpetrating frauds on foreign

---

[14] "While many of the cases refer to supplemental jurisdiction over 'state claims,' *Section 1367* applies to 'all other claims' and therefore the same analysis would also apply to foreign law claims." *Roman y Gordillo, S.C. v. The Bank of New York Mellon Corp., No. 12 Civ. 212, 2015 U.S. Dist. LEXIS 135664, 2015 WL 5786460, at *21 n.29 (S.D.N.Y. Sept. 29, 2015)*.

[15] By letter dated March 18, 2018, Plaintiffs' counsel in the Israeli class actions represented to the Court that they "intend to stay" those actions. (Dkt. No. 68 at 2.) However, even if the Israeli courts grant such a stay, the remaining *§ 1367(c)* considerations still counsel in favor of declining to exercise supplemental jurisdiction over Plaintiffs' Israeli law claims.

securities markets, some fear that it has become the Shangri—La of class-action litigation for lawyers representing those allegedly cheated in foreign securities **[*57]** markets."). And, finally, declining jurisdiction over the Israeli Plaintiffs avoids the risk of exposing Defendants to inconsistent or double liability.

To be sure, "declining jurisdiction outside the ambit of *1367(c)(1)-(3)* appears as the exception rather than the rule." *Itar-Tass Russian News Agency v. Russian Kurier, Inc., 140 F.3d 442, 448 (2d Cir. 1998)*. But in this instance, "to further the 'values of economy, convenience, fairness, and comity,'" the Court concludes that "any exercise of supplemental jurisdiction should be declined." *Roman Y Gordillo, S.C., 2014 U.S. Dist. LEXIS 96789, 2014 WL 3507300, at *12* (quoting *Itar-Tass Russian News Agency, 140 F.3d at 448*).

Accordingly, Count Three of the Complaint is dismissed.

IV. Conclusion

For the foregoing reasons, Defendants' motion to dismiss the Amended Class Action Complaint is GRANTED in part and DENIED in part. Defendants shall file an answer to the surviving claims by two weeks from the date of this order.

The Clerk of Court is directed to close the motion at Docket Number 45.

SO ORDERED.

Dated: March 28, 2018

New York, New York

Judges: CLAUDIA WILKEN, United States District Judge.

Opinion by: CLAUDIA WILKEN

Opinion

ORDER GRANTING IN PART AND DENYING IN PART CROSS-MOTIONS FOR SUMMARY JUDGMENT

(Dkt. Nos. 657, 704, 797, 800)

In this multidistrict litigation, student-athlete Plaintiffs allege that Defendants National Collegiate Athletic Association (NCAA) and eleven of its member conferences fixed prices for the payments and benefits that the students may receive in return for their elite athletic services. Now pending are cross-motions for summary judgment.[1] For the reasons set forth below, the cross-motions for summary judgment are granted in part and denied in part.[2]

BACKGROUND

Plaintiffs are current and former student-athletes in the sports of men's Division I Football Bowl Subdivision (FBS) football and men's and women's Division I basketball. Defendants are the NCAA and eleven conferences that participated, during the relevant period, in FBS football and in men's and women's Division I basketball. Plaintiffs allege that Defendants violated federal ***antitrust law*** by conspiring to impose an artificial ceiling on the scholarships **[*20]** and benefits that student-athletes may receive as payment for their athletic services.

I. O'Bannon v. NCAA

In 2009, a group of college Division I student-athletes brought an antitrust class action against the NCAA to challenge the association's rules preventing men's football and basketball players from being paid, either by their school or by any outside source, for the sale of licenses to use the student-athletes' names, images, and/or likenesses (NIL) in videogames, live game telecasts, and other footage. *O'Bannon v. NCAA, 7 F. Supp. 3d 955,*

---

[1] The Court will rule by separate order on the pending motions to seal and to exclude proposed expert testimony.

[2] In the exercise of discretion, the Court denies Defendants' Motion for Supplemental Briefing and Plaintiffs' Motion to File Supplemental Evidence for the Summary Judgment Record. See *Civil Local Rule 7-3(d)*. The Court does not, at this time, rule on whether Plaintiffs' proposed supplemental evidence will be admissible at trial.

962-63 (N.D. Cal. 2014). The rules challenged by the O'Bannon plaintiffs, which furthered the agreement of the NCAA and its members to fix the value of student-athletes' NIL at zero, included the then-applicable maximum limit on financial aid. Under that limit, student-athletes were prohibited from receiving "financial aid based on athletics ability" that exceeded the value of a full grant-in-aid. O'Bannon, 7 F. Supp. 3d at 971. The rules defined "grant-in-aid" as "financial aid that consists of tuition and fees, room and board, and required course-related books." Id. Other expenses related to school attendance, such as supplies and transportation, were not included in the grant-in-aid limit, although they were calculated in a school-specific **[*21]** figure called "cost of attendance." Id.

The Court held a bench trial and ruled that the challenged NCAA rules violated Section 1 of the Sherman Act, 15 U.S.C. § 1. Id. at 963. The Court found that the evidence presented at trial established that FBS football and Division I men's basketball schools compete to recruit the best high school football and men's basketball players in a relevant market for a college education combined with athletics. 7 F. Supp. 3d at 965-68, 986-88. In exchange for educational and athletic opportunities, the FBS and Division I schools compete "to sell unique bundles of goods and services to elite football and basketball recruits." Id. at 965, 986. The Court found that this market, alternatively, could be understood as a monopsony, in which the NCAA member schools, acting collectively, are the only buyers of the athletic services and NIL licensing rights of elite student-athletes. Id. at 973, 993.

The Court found that the plaintiffs met their burden to show that the NCAA had fixed the price of the student-athletes' NIL rights, which had significant anticompetitive effects in the relevant market. Id. at 971-73, 988-93. On the question of procompetitive justifications of the restraints, the Court found that the NCAA's challenged restrictions on student-athlete compensation **[*22]** played "a limited role in driving consumer demand for FBS football and Division I basketball-related products." Id. at 1001. The Court also found that the challenged rules "might facilitate the integration of academics and athletics . . . by preventing student-athletes from being cut off from the broader campus community." Id. at 1003.

The O'Bannon plaintiffs proposed three alternatives that they asserted were less restrictive than the NCAA rules that they challenged: (1) raising the grant-in-aid limit to allow schools to award stipends, derived from specified sources of licensing revenue, to student-athletes; (2) allowing schools to deposit a share of licensing revenue into a trust fund for student-athletes which could be paid after the student-athletes graduate or leave school for other reasons; and (3) permitting student-athletes to receive limited compensation for third-party endorsements approved by their schools. 7 F. Supp. 3d at 982. Each of these proposed less restrictive alternatives related specifically to the use of revenue derived from NIL licensing and endorsements.

This Court found that the first two of these proposed alternatives "would limit the anticompetitive effects of the NCAA's current restraint without **[*23]** impeding the NCAA's efforts to achieve its stated purposes." Id.; see also id. at 983-84. The Court rejected the plaintiffs' third proposed alternative. Id. at 984. Accordingly, this Court enjoined the NCAA from enforcing any rules that would prohibit its member schools and conferences from offering their FBS football and men's Division I basketball recruits a limited share of the revenues generated from the use of their NIL in addition to a full grant-in-aid, but permitted the NCAA to implement rules capping the amount of compensation that could be paid to student-athletes while they are enrolled in school at the cost of attendance. Id. at 1007-08. The Court also prohibited the NCAA from enforcing rules to prevent member schools and conferences from offering to deposit a limited share of NIL licensing revenue in trust for their FBS football and Division I basketball recruits, payable when they leave school or their eligibility expires. Id. at 1008.

The Ninth Circuit largely affirmed this Court's decision, including the finding that allowing NCAA member schools to award grants-in-aid up to the student-athletes' full cost of attendance would be a substantially less restrictive alternative to the existing compensation rules. O'Bannon v. NCAA, 802 F.3d 1049, 1079 (9th Cir. 2015). It held **[*24]** that "the grant-in-aid cap has no relation whatsoever to the procompetitive purposes of the NCAA: by the NCAA's own standards, student-athletes remain amateurs as long as any money paid to them goes to cover legitimate educational expenses." Id. at 1075. However, it vacated the judgment and injunction insofar as they required the NCAA to allow its member schools to pay student-athletes limited deferred compensation in a trust account. Id. at 1079. The circuit court found that allowing "students to receive NIL cash payments untethered to their education expenses" would not promote the NCAA's procompetitive purposes as effectively as a rule forbidding cash compensation, even if the payment was limited and took the form of a trust fund. Id. at 1076.

II. This Litigation

Plaintiffs initiated these actions in 2014 and 2015, attacking the NCAA's cap on their grant-in-aid itself, rather than merely the association's restrictions on sharing NIL revenue. The United States Judicial Panel on Multidistrict Litigation transferred actions filed in other districts to this Court pursuant to 28 U.S.C. § 1407 for coordinated or consolidated pretrial proceedings. All but one of the actions were consolidated. The operative pleading in the consolidated **[*25]** action is Plaintiffs' consolidated amended complaint, filed July 11, 2014. The consolidated amended complaint has been amended by orders incorporating additional allegations about named Plaintiffs in subsequently-filed cases (Docket Nos. 86, 184, 197). One case, Jenkins v. NCAA, No. 14-cv-02758, has not been consolidated, but all pending motions were briefed together in the consolidated action and in Jenkins.[3]

On December 4, 2015, the Court certified three injunctive relief classes in the consolidated action, under Federal Rule of Civil Procedure 23(b)(2): a Division I FBS Men's Football Class, a Division I Men's Basketball Class, and a Division I Women's Basketball Class, each consisting of student-athletes who received or will receive a written offer for a full grant-in-aid as defined by NCAA Bylaw 15.02.5 during the pendency of this action. In the Jenkins action, the Court certified the men's football and basketball classes; the women's basketball class was not sought in that case. As part of the class certification proceedings, all Plaintiffs committed to seek to stay either the consolidated case or the Jenkins case prior to trial of the other in order to avoid duplicative trials **[*26]** on behalf of identical classes and a race to determine which judgment would be binding under principles of res judicata.

Defendants and the consolidated Plaintiffs reached a settlement of all claims for damages, and the Court granted final approval of that settlement and entered a partial judgment under Federal Rule of Civil Procedure 54(b) on December 6, 2017. The Jenkins Plaintiffs have not sought damages. Therefore, only claims for injunctive relief remain pending.

LEGAL STANDARD

Summary judgment is properly granted when no genuine and disputed issues of material fact remain, and when, viewing the evidence most favorably to the non-moving party, the movant is clearly entitled to prevail as a matter of law. Fed. R. Civ. P. 56; Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986); Eisenberg v. Ins. Co. of N. Am., 815 F.2d 1285, 1288-89 (9th Cir. 1987).

The moving party bears the burden of showing that there is no material factual dispute. Therefore, the court must regard as true the opposing party's evidence, if supported by affidavits or other evidentiary material. Celotex, 477 U.S. at 324; Eisenberg, 815 F.2d at 1289. The court must draw all reasonable inferences in favor of the party against whom summary judgment is sought. Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986); Intel Corp. v. Hartford Accident & Indem. Co., 952 F.2d 1551, 1558 (9th Cir. 1991).

Material facts which would preclude entry of summary judgment are those which, under applicable substantive law, may affect the outcome of the case. The substantive law will identify **[*27]** which facts are material. Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986).

---

[3] The Jenkins Plaintiffs raise one separate issue in a footnote to Plaintiffs' opposition to Defendants' cross-motion for summary judgment. They request that if the Court grants Defendants' summary judgment motion in the consolidated action, the Court not apply the ruling to the Jenkins action, but instead remand it back to the District of New Jersey, where the decisions of the Ninth Circuit and this Court in O'Bannon would not control under the doctrine of stare decisis. At the hearing on the motion, the Jenkins Plaintiffs clarified that they do not seek remand if the Court grants summary judgment only in part. See Jan. 16, 2018 Tr. at 50. Because the Court grants summary judgment in part and denies it in part, the Jenkins Plaintiffs' request for remand prior to summary judgment is moot.

Where the moving party does not bear the burden of proof on an issue at trial, the moving party may discharge its burden of production by either of two methods:

> The moving party may produce evidence negating an essential element of the nonmoving party's case, or, after suitable discovery, the moving party may show that the nonmoving party does not have enough evidence of an essential element of its claim or defense to carry its ultimate burden of persuasion at trial.

Nissan Fire & Marine Ins. Co., Ltd., v. Fritz Cos., Inc., 210 F.3d 1099, 1106 (9th Cir. 2000).

If the moving party discharges its burden by showing an absence of evidence to support an essential element of a claim or defense, it is not required to produce evidence showing the absence of a material fact on such issues, or to support its motion with evidence negating the non-moving party's claim. Id.; see also *Lujan v. Nat'l Wildlife Fed'n, 497 U.S. 871, 885, 110 S. Ct. 3177, 111 L. Ed. 2d 695 (1990)*; *Bhan v. NME Hosps., Inc., 929 F.2d 1404, 1409 (9th Cir. 1991)*. If the moving party shows an absence of evidence to support the non-moving party's case, the burden then shifts to the non-moving party to produce "specific evidence, through affidavits or admissible discovery material, to show that the dispute exists." *Bhan, 929 F.2d at 1409*.

If the moving party discharges its burden by negating an essential element of the non-moving party's claim or defense, it must **[*28]** produce affirmative evidence of such negation. *Nissan, 210 F.3d at 1105*. If the moving party produces such evidence, the burden then shifts to the non-moving party to produce specific evidence to show that a dispute of material fact exists. Id.

If the moving party does not meet its initial burden of production by either method, the non-moving party is under no obligation to offer any evidence in support of its opposition. Id. This is true even though the non-moving party bears the ultimate burden of persuasion at trial. *Id. at 1107*.

DISCUSSION

I. Res Judicata and Collateral Estoppel

Defendants argue that all of Plaintiffs' claims are foreclosed under the doctrines of res judicata, or claim preclusion, and collateral estoppel, or issue preclusion, by the decisions of the Ninth Circuit and this Court in *O'Bannon. 802 F.3d 1049*; *7 F. Supp. 3d 955*. The purpose of these doctrines is to "relieve parties of the cost and vexation of multiple lawsuits, conserve judicial resources, and, by preventing inconsistent decisions, encourage reliance on adjudication." *Allen v. McCurry, 449 U.S. 90, 94, 101 S. Ct. 411, 66 L. Ed. 2d 308 (1980)*. The burden of proving the elements of either res judicata or collateral estoppel is on the party asserting it. *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1050-51 (9th Cir. 2008)* (collateral estoppel); *Karim-Panahi v. Los Angeles Police Dep't, 839 F.2d 621, 627 n.4 (9th Cir. 1988)* (res judicata).

Res judicata prohibits the re-litigation of any claims that **[*29]** were raised or could have been raised in a prior action. *Tahoe-Sierra Pres. Council v. Tahoe Reg'l Planning Agency, 322 F.3d 1064, 1077-78 (9th Cir. 2003)*. Three elements must be present in order for res judicata to apply: (1) an identity of claims; (2) a final judgment on the merits; and (3) the same parties or their privies. *Id. at 1077*.

Collateral estoppel "prevents a party from relitigating an issue decided in a previous action if four requirements are met: '(1) there was a full and fair opportunity to litigate the issue in the previous action; (2) the issue was actually litigated in that action; (3) the issue was lost as a result of a final judgment in that action; and (4) the person against whom collateral estoppel is asserted in the present action was a party or in privity with a party in the previous action.'" *Kendall, 518 F.3d at 1050* (quoting *United States Internal Revenue Serv. v. Palmer, 207 F.3d 566, 568 (9th Cir. 2000))*.

The application of either res judicata or collateral estoppel here would require that any Plaintiff not present in O'Bannon have been in privity with the parties in that case. Two primary categories of Plaintiffs here were not part of the O'Bannon class: male student-athletes who were recruited after O'Bannon and female student-athletes.[4]

Defendants contend that privity nonetheless exists here because, in O'Bannon, the interests of nonparty student-athletes **[*30]** were represented adequately by the plaintiffs there with the same interests and the Court took special care to protect the interests of future student-athletes. In "certain limited circumstances, a nonparty may be bound by a judgment because she was adequately represented by someone with the same interests who was a party to the suit. Representative suits with preclusive effect on nonparties include properly conducted class actions." *Taylor v. Sturgell, 553 U.S. 880, 894, 128 S. Ct. 2161, 171 L. Ed. 2d 155 (2008)* (internal alteration, citation and quotation marks omitted). The Supreme Courtheld,

> A party's representation of a nonparty is "adequate" for preclusion purposes only if, at a minimum: (1) The interests of the nonparty and her representative are aligned, and (2) either the party understood herself to be acting in a representative capacity or the original court took care to protect the interests of the nonparty. In addition, adequate representation sometimes requires (3) notice of the original suit to the persons alleged to have been represented.

Taylor, 553 U.S. at 900 (citations omitted). The Supreme Court further explained that, in the federal class action context, the limitations on nonparty representation "are implemented by the procedural safeguards contained in *Federal Rule of Civil Procedure 23*." *Id. at 900-01*. In other **[*31]** words, the definition of the O'Bannon class under *Rule 23* limits the persons who are subject to the preclusive effect of the judgment. Under Taylor, then,the effect of res judicata does not extend to individuals who were not part of the O'Bannon class. Furthermore, Defendants cannot satisfy the Taylor factors for individuals who were not classmembers in that case. The Court and the parties in O'Bannon focused their analysis on the claims of class members, the named plaintiffs represented only class members, and only classmembers were on notice that they were represented.

None of the current Plaintiffs' claims are precluded for an additional reason, regardless of whether those Plaintiffs were O'Bannon class members. The general rule is that "'the continuation of conduct under attack in a prior antitrust suit'" gives rise to a new action. *Harkins Amusement Enters., Inc. v. HarryNace Co., 890 F.2d 181, 183 (9th Cir. 1989)* (quoting 2 P. Areeda & D. Turner, Antitrust Laws § 323c (1978)) ("Failure to gain relief for one period of time does not mean that the plaintiffs will necessarily fail for a different period of time."); see also *Frank v. United Airlines, Inc., 216 F.3d 845, 851 (9th Cir. 2000)* ("A claim arising after the date of an earlier judgment is not barred, even if it arises out of a continuing course of conduct that provided the basis for **[*32]** the earlier claim."). Only where no distinct conduct is alleged can res judicata be applied to bar claims arising from a different time period. See *In re Dual-Deck Video Cassette Recorder Antitrust Litig., 11 F.3d 1460, 1464 (9th Cir. 1993)* (applying res judicata where nothing new was "alleged--no new conspiracy, no new kinds of monopolization, no new acts").

The Court must consider the "conduct of parties since the first judgment" and other factual matters in the new cause of action. *Harkins, 890 F.2d at 183* (quoting *California v. Chevron Corp., 872 F.2d 1410, 1415 (9th Cir. 1989))*. It is not enough that "both suits involved essentially the same course of wrongful conduct" or that injunctive relief was sought in the first action, especially "in view of the public interest in vigilant enforcement of the antitrust laws through the instrumentality of the private treble-damage action." *Lawlor v. Nat'l Screen Serv. Corp., 349 U.S. 322, 327, 329, 75 S. Ct. 865, 99 L. Ed. 1122 (1955)* (internal quotation marks omitted).

The NCAA Bylaws were changed after, and in part because of, O'Bannon, and now permit student-athletes to receive financial aid, based on athletics ability, up to their cost of attendance, or more than that in the case of a Pell grant. See Pls. Ex. 15 at 182 (Bylaws 15.1, 15.1.1). In this case, Plaintiffs do not challenge the bar on distributing NIL licensing revenue to student-athletes or the former grant-in-aid limitation. Rather, the challenged **[*33]**

---

[4] The parties have not briefed whether there are any class members in this case who were not class members in O'Bannon because their NIL have not been, and will not be, included in game footage or in videogames after the conclusion of the athlete's participation in intercollegiate athletics. See *O'Bannon, 7 F. Supp. 3d at 965* (quoting class definition).

restraints are the current, interconnected set of NCAA rules that generally limit financial aid to the cost of attendance yet also fix the prices of numerous and varied exceptions--additional benefits that have a financial value above the cost of attendance. See Pls. Opp. to Defs. MSJ, App'x A (Challenged Rules and Operative Language).

Some of these rules regulate payment for additional benefits that do appear to be tethered to education, such as the rule limiting the availability of academic tutoring. See Defs. Ex. 1 at 102 (Bylaw 13.2.1.1(k), prohibiting tutoring to assist in initial eligibility, transfer eligibility, or waiver requests). The rules also restrict schools' ability to reimburse student-athletes for computers, science equipment, musical instruments and other items not currently included in the cost of attendance calculation but nonetheless related to the pursuit of various academic studies. See NCAA (Kevin C. Lennon) Depo. at 212:11-19. Plaintiffs also challenge various additional restrictions on benefits related to educational expenses, such as providing guaranteed post-eligibility scholarships. Id. at 195:5-199:17. Currently, schools may provide guaranteed post-eligibility **[*34]** scholarships for undergraduate or graduate study and tutoring costs only at their own institution, but not at other institutions. Id.

Defendants also allow, but fix the amount of, benefits that a school may provide that are incidental to athletic participation, such as travel expenses and prizes. See id. at 58:20-59:16 ("There are items that schools can provide outside of educational expenses, which, again, are tethered to cost of attendance, that I would kind of capture as incidental to participation."). Some of the additional benefits limited by the rules at issue in this case were provided to student-athletes at the time of the O'Bannon trial, but neither this Court nor the Court of Appeals addressed them in that case and their scope has expanded since that time. For example, student-athletes could previously receive meals incidental to participation in athletics, see O'Bannon Ex. 2340-233 (then-applicable Bylaws), but may now receive unlimited meals and snacks, see Pls. Ex. 15 at 183 (Bylaw 15.2.2.1.6 regarding meals incidental to participation); Mishkin Reply Decl. Ex. 1 at 207 (Bylaw 16.5.2(d), (e) regarding meals and snacks). Witnesses in O'Bannon testified that the Student Assistance **[*35]** Fund (SAF)[5] could then be used to purchase a "special insurance policy" or "catastrophic injury insurance," O'Bannon Tr. 2147:14-23, 2152:7-17, but student-athletes now may borrow against future earnings to purchase loss-of-value insurance, Pls. Ex. 15 at 58 (Bylaw 12.1.2.4.4). Student-athletes now may receive athletic performance bonuses from international organizations related to Olympic participation. See Pls. Ex. 15 at 57 (Bylaw 12.1.2.1.5.2, adopted January 17, 2015 and effective August 1, 2015). There has been an increase in permissible reimbursement for family travel expenses, which permits schools to pay limited expenses of a student-athlete's spouse and children to attend games, although still not those of parents or siblings. Eugene DuBuis Smith Depo. at 51:24-57:18; see also NCAA (Lennon) Depo. at 71:7-73:2, 186:1-16 (discussing Bylaw 16.6.1.1); Mishkin Reply Decl. Ex. 1 at 303 (Bylaw 18.7.5).

Because Plaintiffs raise new antitrust challenges to conduct, in a different time period, relating to rules that are not the same as those challenged in O'Bannon, res judicata and collateral estoppel do not preclude the claims even of those Plaintiffs who were O'Bannon class members. **[*36]**

II. *Section 1* of the Sherman Act

The Court next turns to the remaining issues in the parties' cross-motions. Plaintiffs move for summary judgment of their claims under *Section 1* of the Sherman Act. *15 U.S.C. § 1*. In order to establish a *Section 1* claim, Plaintiffs must demonstrate: "(1) that there was a contract, combination, or conspiracy; (2) that the agreement unreasonably restrained trade under either a per se rule of illegality or a rule of reason analysis; and (3) that the restraint affected interstate commerce." *Tanaka v. Univ. of S. California, 252 F.3d 1059, 1062 (9th Cir. 2001)* (internal quotation marks omitted). The existence of a contract, combination or conspiracy that affects interstate commerce is undisputed in this case. NCAA regulations are subject to antitrust scrutiny under the Sherman Act and must be tested using a rule-of-reason analysis. *O'Bannon, 802 F.3d at 1079*. Under that analysis, Plaintiffs bear the initial burden of showing that the challenged restraints produce significant anticompetitive effects within a relevant market. If Plaintiffs meet this burden, Defendants must come forward with evidence of the restraints' procompetitive effects.

---

[5] The SAF is a fund that the NCAA provides to member schools to distribute to student-athletes for a variety of uses, some of which are in addition to full cost-of-attendance financial aid. See NCAA (Lennon) Depo. at 152:19-153:19; Pls. Ex. 24 at NCAAGIA03316052 (reporting on SAF uses).

Plaintiffs must then show that any legitimate objectives can be achieved in a substantially less restrictive manner. *Tanaka, 252 F.3d at 1063*.

Plaintiffs contend that the undisputed **[*37]** evidence supports their claim that the challenged restraints cause anticompetitive effects in the relevant market, and that Defendants cannot meet their burden to prove that the restraints have procompetitive benefits. They request that the Court grant summary judgment on this basis, obviating the need to reach the question of whether there are any less restrictive alternatives to any legitimate objectives. Plaintiffs do not seek summary judgment on the existence of less restrictive alternatives.

Defendants cross-move for summary judgment on the basis that the decisions of this Court and the Ninth Circuit in O'Bannon bar all of Plaintiffs' claims, under the doctrine of stare decisis. "If a court must decide an issue governed by a prior opinion that constitutes binding authority, the later court is bound to reach the same result, even if it considers the rule unwise or incorrect. Binding authority must be followed unless and until overruled by a body competent to do so." *Hart v. Massanari, 266 F.3d 1155, 1170 (9th Cir. 2001)*. Stare decisis applies when "there are neither new factual circumstances nor a new legal landscape." *Ore. Natural Desert Ass'n v. U.S. Forest Serv., 550 F.3d 778, 786 (9th Cir. 2008)*. A court is required to reach the same legal consequence from the same "detailed set of facts." *In re Osborne, 76 F.3d 306, 309 (9th Cir. 1996)*. "Insofar as there **[*38]** may be factual differences between the current case and the earlier one, the court must determine whether those differences are material to the application of the rule or allow the precedent to be distinguished on a principled basis." *Hart, 266 F.3d at 1172*; see also *Miranda v. Selig, 860 F.3d 1237, 1242 (9th Cir. 2017)* (stare decisis required where circumstances of new case are not "separate and distinct in a meaningful way for the purposes of the Sherman Act"). The doctrine encompasses issues actually decided in a prior case even if those issues were not, in a technical sense, necessary, but only if they were germane to the eventual resolution of the case and expressly resolved after reasoned consideration. *Alcoa, Inc. v. Bonneville Power Admin., 698 F.3d 774, 804 n.4 (9th Cir. 2012)*; *Barapind v. Enomoto, 400 F.3d 744, 751 (9th Cir. 2005)* (en banc).

In the area of ***antitrust law***, however, another interest competes with the doctrine of stare decisis. That is an interest "in recognizing and adapting to changed circumstances and the lessons of accumulated experience." *State Oil Co. v. Khan, 522 U.S. 3, 20, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Rule-of-reason analysis "evolves with new circumstances and new wisdom." *Id. at 21* (quoting *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 731-32, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988))*. "The rule of reason requires an evaluation of each challenged restraint in light of the special circumstances involved. That the analysis will differ from case to case is the essence of the rule." *Oltz v. St. Peter's Cmty. Hosp., 861 F.2d 1440, 1449 (9th Cir. 1988)* (citation omitted).

A. Anticompetitive Effects **[*39]** in the Relevant Market

1. Market Definition

In a rule-of-reason analysis, the Court must first define the relevant market within which the challenged restraint may produce significant anticompetitive effects. Both sides here request that the Court adopt the market definition applied in O'Bannon, which was not challenged in the appeal of that case. *802 F.3d at 1070*. Plaintiffs argue that the evidence supports the same education or labor market for student-athletes in FBS football and Division I basketball. Defendants contend that stare decisis controls the outcome of this case, including the market definition.[6] Defendants also agreed at the January 21, 2018 hearing that the market definition, as well as other rulings in O'Bannon, would apply equally to the women's basketball Plaintiffs in this action. Tr. at 7-8.

In the absence of any material factual dispute, the Court will grant both parties' summary judgment motions on the issue of market definition and adopt the market definition from *O'Bannon*, the market for a college education combined with athletics or alternatively the market for the student-athletes' athletic services.

---

[6] Defendants' expert Dr. Kenneth G. Elzinga posits that the market should be viewed more broadly as a multi-sided one for the educational services of colleges and universities, but Defendants, having taken the position that O'Bannon is controlling, do not rely on this theory.

2. The Challenged Restraints and Significant Anticompetitive Effects **[*40]**

The next element of the rule-of-reason analysis is whether the challenged restraints produce significant anticompetitive effects within the relevant market. Plaintiffs have produced undisputed evidence that greater compensation and benefits would be offered in the recruitment of student-athletes absent the challenged rules, meeting their burden for summary adjudication on this question. Defendants' position is that O'Bannon is binding on this point under the doctrine of stare decisis. See *802 F.3d at 1070-72*; *7 F. Supp. 3d at 971-73, 988-93*. They have not meaningfully disputed Plaintiffs' showing that the challenged restraints produce significant anticompetitive effects within the relevant market. Because Plaintiffs have met their burden and Defendants have not created a factual dispute, the Court will grant the parties' cross-motions for summary adjudication of this element and find that the challenged restraints produce significant anticompetitive effects in the relevant market.

B. Procompetitive Benefits of the Restraints

The next factor is whether Defendants have come forward with evidence of procompetitive effects of the challenged restraints. Defendants claim that O'Bannon established as a matter of law that the NCAA's rules serve **[*41]** the procompetitive purposes of "integrating academics with athletics, and 'preserving the popularity of the NCAA's product by promoting its current understanding of amateurism.'" *802 F.3d at 1073* (quoting *7 F. Supp. 3d at 1005*). They further argue that the record in this case contains ample evidence of these procompetitive justifications as well as of other possible procompetitive justifications not found in O'Bannon. Plaintiffs respond that O'Bannon does not require the Court to uphold Defendants' procompetitive justifications in this case because Plaintiffs have developed a record of factual circumstances that have changed after the close of the record in O'Bannon.

Plaintiffs first point to the change caused by O'Bannon: student-athletes now may receive scholarships above the former grant-in-aid limit, up to the cost of attendance. This change, however, does not distinguish the present case from O'Bannon because it was the very issue adjudicated in that case. The change that was made was required and approved by the Court. *802 F.3d at 1075-76*.

Next, Plaintiffs identify the NCAA rule changes discussed above, which have generally increased but continue to fix various benefits related to athletic participation that a member school may provide for **[*42]** its student-athletes or permit them to receive from outside sources. See Section I above. They also identify new concessions by Defendants that benefits and gifts that are related to athletic participation but are above the cost of attendance are connected neither to education nor to their understanding of amateurism. See, e.g., Big 12 (Robert A. Bowlsby, II) Depo. at 162:10-14 (not sure how valuable gifts could be tethered to education); Michael Slive Depo. at 218:4-10 (gift card "not really" connected to educational experience); NCAA (Lennon) Depo. at 119:20-122:22, 287:6-19 (gifts not related to amateurism). Plaintiffs contend that because Defendants permit student-athletes to be paid money that does not go "to cover legitimate educational expenses," they are not amateurs. *O'Bannon, 802 F.3d at 1075*. Plaintiffs also identify a number of expenses that they contend are tethered to education but are still disallowed. See Pls. MSJ, App'x B (citing NCAA (Lennon) Depo. at 195:5-215:14); see also Section I above.

While the restraints challenged in this case overlap with those in O'Bannon, the specific rules at issue are not the same. Challenges to the NCAA's rules must be assessed on a case-by-case basis under the **[*43]** rule of reason, and O'Bannon's holding that there were procompetitive justifications for the rules challenged in that case would not necessarily require the Court to find that different rules, challenged in this case, also have the same procompetitive effects. *802 F.3d at 1063* (citing *NCAA v. Bd. of Regents of the Univ. of Okla., 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984))* ("we are not bound by Board of Regents to conclude that every NCAA rule that somehow relates to amateurism is automatically valid"). The Court rejects Defendants' contention that merely because all of the then-existing NCAA Bylaws were part of the record in O'Bannon, the Court necessarily adjudicated in Defendants' favor all possible challenges to any of those rules. The reasoning of O'Bannon will be very relevant in assessing whether the rules in this case have procompetitive effects. However, like the NIL rules in O'Bannon, the validity of the specific rules challenged in this case "must be proved, not presumed." *Id. at 1064*.

Plaintiffs further contend that Defendants have failed to provide material evidence that their current rules create procompetitive effects. Therefore, Plaintiffs argue, the Court should enter summary judgment against Defendants without balancing the competitive effects of the restraints or reaching the question **[*44]** of less restrictive alternatives. However, Defendants have presented sufficient evidence in support of the two procompetitive effects found in O'Bannon to create a factual issue for trial. This includes a survey of consumer preferences, which led Defendants' expert Dr. Bruce Isaacson to conclude that fans are drawn to college football and basketball in part due to their perception of amateurism. See Isaacson Depo. at 48:4-17; Isaacson Rep. ¶¶ 151 & Table 7, 155. Plaintiffs identify various defects in Defendants' survey evidence, including the fact that it reflects consumers' stated preferences rather than how consumers would actually behave if the NCAA's restrictions on student-athlete compensation were modified or lifted. However, the weight of Dr. Isaacson's testimony is a question for trial rather than summary judgment.

Defendants also present evidence that paying student-athletes would detract from the integration of academics and athletics in the campus community. For example, Professor James T. Heckman testified that paying student-athletes would likely lead them to dedicate even more effort and possibly more time to their sports, potentially diverting them "away from actually **[*45]** being students and towards just being athletes." Heckman Depo. at 315:5-316:18.

Accordingly, the Court will deny the parties' cross-motions for summary adjudication of the question of whether the challenged NCAA rules serve Defendants' asserted procompetitive purposes of integrating academics with athletics and preserving the popularity of the NCAA's product by promoting its current understanding of amateurism. See *802 F.3d at 1073* (quoting *7 F. Supp. 3d at 1005*).

Plaintiffs also move for summary judgment that Defendants have abandoned seven additional procompetitive justifications that they identified in response to an interrogatory. See Defs. Ex. 8 (NCAA Amended Responses to Pls. Second Set of Interrogatories) at 9-14. Plaintiffs contend that Defendants developed no record to support any of them.

Defendants first respond to this argument by contending that Plaintiffs' summary judgment motion inadequately demonstrates an absence of evidence on these procompetitive justifications, and should be denied due to Plaintiffs' failure to meet their burden as the moving party. However, "the Celotex 'showing' can be made by 'pointing out through argument'" the "'absence of evidence to support plaintiff's claim.'" *Devereaux v. Abbey, 263 F.3d 1070, 1076 (9th Cir. 2001)* (quoting *Fairbank v. Wunderman Cato Johnson, 212 F.3d 528, 532 (9th Cir. 2000))*. Although **[*46]** not lengthy, Plaintiffs' argument that Defendants have not developed evidence to support additional procompetitive justifications, identified in their interrogatory responses, is sufficient to shift the burden to Defendants to produce "specific evidence, through affidavits or admissible discovery material, to show that the dispute exists." *Bhan, 929 F.2d at 1409*. For six of their asserted procompetitive justifications, Defendants have not attempted to meet this burden at all, only quoting their interrogatory response identifying those justifications in a footnote but producing no evidence to support them.[7] See Defs. Opp. to Pls. MSJ at 50 n.27. Accordingly, the Court will grant summary judgment on these six procompetitive justifications.

Defendants do attempt to meet their burden on one procompetitive justification, specifically, their contention that:

> The challenged rules serve the procompetitive goals of expanding output in the college education market and improving the quality of the collegiate experience for student-athletes, other students, and alumni by maintaining the unique heritage and traditions of college athletics and preserving amateurism as a foundational principle, thereby **[*47]** distinguishing amateur college athletics from professional sports, allowing the former to exist as a distinct form of athletic rivalry and as an essential component of a comprehensive college education.

---

[7] Except to the extent that they are included in the interrogatory response, Defendants do not request that the Court reconsider the procompetitive justifications of increased output and competitive balance rejected in O'Bannon. See *7 F. Supp. 3d at 978-79, 981-82*. The O'Bannon defendants did not substantively defend the rejected procompetitive justifications on appeal, *802 F.3d at 1072*, and Defendants here do not proffer any evidence to support them.

Defs.Ex. 8 (NCAA Amended Responses to Pls. Second Set of Interrogatories) at 11. This proffered justification does not coincide with the justification relating to expanding output that the Court rejected in O'Bannon. In that case, the defendants argued that the NCAA's rules enable it to increase the number of opportunities available for participation in FBS football and Division I basketball, increasing the number of games that can be played. *7 F. Supp. 3d at 981*. Rather, this purportedly new justification seems largely to overlap with Defendants' two remaining O'Bannon justifications of integrating academics with athletics ("improving the quality of the collegiate experience for student-athletes") and preserving the popularity of college sports ("distinguishing amateur college athletics from professional sports"). Defs. Ex. 8 (NCAA Amended Responses to Pls. Second Set of Interrogatories) at 11.

In advancing this purportedly new and separate procompetitive justification, Defendants rely solely on the testimony **[*48]** of two expert witnesses, their expert Dr. Elzinga and Plaintiffs' expert Dr. Edward P. Lazear. Dr. Elzinga's report focuses on issues relating to the relevant market. Elzinga Rep. at 4-10. In that context, he explains his theory that, because the relevant market is properly viewed as a multi-sided market for higher education, colleges must price participation in activities, including athletics, to provide an "optimal balance" for different constituents. Id. at 35; see also id. at 9, 27-29, 32-33. Defendants contend that this view is supported by Dr. Lazear's testimony that the demand in the relevant college education market is derived from "some higher-level market, which might include alums, it might include viewers, it might include other students," who are direct participants in the market. Lazear Depo. at 217:19-218:24. Assuming the admissibility of these experts' testimony, taking it as true and drawing all reasonable inferences in favor of Defendants, however, it does not constitute evidence of a new or different procompetitive justification. Dr. Elzinga did not purport to opine on the impact of the challenged restraints on output or examine data that might support any such opinion. Elzinga Depo. at 29:14-30:18. Defendants' attempt **[*49]** to characterize Dr. Elzinga's opinions as supporting a procompetitive justification he did not directly consider is insufficient to raise a genuine issue of material fact, and the Court will grant summary judgment on this proposed procompetitive justification as well.

C. Less Restrictive Alternatives

The final step in the rule-of-reason analysis is whether Plaintiffs can "make a strong evidentiary showing" that any legitimate objectives can be achieved in a substantially less restrictive manner. *O'Bannon, 802 F.3d at 1074*. Plaintiffs do not move for summary judgment on this issue, but seek to prove at trial their contention that the NCAA's rules are "patently and inexplicably stricter than is necessary to accomplish" the NCAA's procompetitive objectives. *O'Bannon, 802 F.3d at 1075*. Defendants, on the other hand, move for summary judgment that all less restrictive alternatives proposed in this case are foreclosed by O'Bannon. The Court finds that because Plaintiffs challenge different rules and propose different alternatives from those considered in O'Bannon, the Court is not precluded from considering this factor.

To be viable, an alternative "must be 'virtually as effective' in serving the procompetitive purposes of the NCAA's current **[*50]** rules, and 'without significantly increased cost.'" *Id. at 1074* (quoting *Cnty. Of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1159 (9th Cir. 2001))*. In addition, any less restrictive alternatives "should either be based on actual experience in analogous situations elsewhere or else be fairly obvious." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1913b (3d ed. 2006). In considering Plaintiffs' showing, the Court will afford the NCAA "ample latitude" to superintend college athletics. *O'Bannon, 802 F.3d at 1074* (quoting *Bd. of Regents, 468 U.S. at 120*). The Court will not "use ***antitrust law*** to make marginal adjustments to broadly reasonable market restraints." *Id. at 1075*.

As discussed, Plaintiffs in this case do not challenge restrictions on distribution of licensing revenue derived from NILs, as was the case in O'Bannon. Rather, they challenge NCAA rules relating to the benefits that schools may offer student-athletes to compete for their recruitment. The less restrictive alternatives that they propose in this case are different from those reviewed in O'Bannon. As the Ninth Circuit explained, to "say that the NCAA's amateurism rules are procompetitive, as Board of Regents did, is not to say that they are automatically lawful; a restraint that serves a procompetitive purpose can still be invalid under the Rule of Reason if a **[*51]** substantially less restrictive rule would further the same objectives equally well." *O'Bannon, 802 F.3d at 1063-64* (citing *Bd. of Regents, 468 U.S. at 101 n.23*); see also *id. at 1063* ("we are not bound by Board of Regents to conclude that every NCAA rule that somehow relates to amateurism is automatically valid").

The first less restrictive alternative that Plaintiffs propose is allowing the Division I conferences, rather than the NCAA, to set the rules regulating education and athletic participation expenses that the member institutions may provide. Plaintiffs argue that this alternative would be substantially less restrictive because it would allow conferences to compete to implement rules that attract student-athletes while still maintaining the popularity of college sports and balancing the integration of academics and athletics. They contend that none of the conferences has market power and, thus, their rule-making would not be subject to an antitrust challenge.[8]

Plaintiffs contend that their proposed conference-autonomy system is based on actual experience in a closely analogous context. It could "operate like the college athletic system during the first half of the 20th Century, when each conference had its own compensation rules." Roger Noll Rep. at 30. To support their **[*52]** argument that such autonomy is viable as a less restrictive alternative to NCAA regulations, Plaintiffs have identified new NCAA Bylaws, adopted on August 7, 2014 (after the O'Bannon trial), that grant the Power Five Conferences autonomy to adopt or amend rules on a variety of topics. See Defs. Ex. 1 at 27-28 (Bylaw 5.3.2.1). The Bylaws now grant autonomy to the Power Five Conferences to legislate, for example, regarding "a student-athlete's individual limit on athletically related financial aid, terms and conditions of awarding institutional financial aid, and the eligibility of former student-athletes to receive undergraduate financial aid"; pre-enrollment expenses and support; student-athletes securing loans to purchase loss-of-value and disability insurance; and awards, benefits and expenses for student-athletes and their family and friends. Id.; see also Daniel A. Rascher Rep. at 12-13 & n.21, 172-182 (discussing proposed less restrictive alternatives). The existence of these exceptions for the Power Five Conferences constitutes evidence sufficient to raise a factual question that allowing relevant areas of autonomy for all Division I conferences would be a less restrictive alternative to current NCAA rules. **[*53]**

Defendants argue that this proposal was considered and rejected in O'Bannon. The record in O'Bannon, however, does not support their contention. One of the plaintiffs' expert witnesses, Dr. Noll, testified briefly in O'Bannon about the alternative of allowing the individual conferences to set the rules. O'Bannon Tr. at 445:11-451:5. In closing argument, there was discussion of whether an injunction should allow conference-level decision-making on the topics of the challenged NCAA restraints. Id. at 3382:19-3383:2. Ultimately, however, the plaintiffs proposed to the Court only the three less restrictive alternatives, listed above, that were addressed in the Court's August 8, 2014 Findings of Fact and Conclusions of Law. See O'Bannon Plaintiffs' Opening Post-Trial Brief at 25 (No. 09-cv-03329-CW, Dkt. No. 275); O'Bannon Plaintiffs' Post-Trial Reply Brief at 14-15 (No. 09-cv-03329-CW, Dkt. No. 281). The O'Bannon plaintiffs proposed language for an injunction, asking the Court to enjoin the member institutions and conferences along with the NCAA. O'Bannon Plaintiffs' Proposed Order Granting Injunctive Relief (No. 09-cv-03329-CW, Dkt. No. 193-1); O'Bannon Plaintiffs' Alternative Proposed **[*54]** Form of Injunction (No. 09-cv-03329-CW, Dkt. No. 252). The permanent injunction entered by the Court enjoined the NCAA's member schools and conferences as well as the NCAA itself. O'Bannon Permanent Injunction (No. 09-cv-03329-CW, Dkt. No. 292). In O'Bannon, this Court did not rule on the less restrictive alternative of conference autonomy. No rule of law established in that case, or any other, precludes the Court from considering conference autonomy as a less restrictive alternative in this case. "A hypothetical that is unnecessary in any sense to the resolution of the case, and is determined only tentatively . . . does not make precedential law." *Alcoa, 698 F.3d at 804 n.4*; see also *Osborne, 76 F.3d at 309* ("the doctrine of stare decisis concerns the holdings of previous cases, not the rationales"). A hypothetical that is not determined at all, such as the question of conference autonomy in O'Bannon, is not binding under the doctrine of stare decisis.

Plaintiffs propose a second less restrictive alternative, requesting that the Court enjoin all national rules that prohibit or limit any payments or non-cash benefits that are tethered to educational expenses, or any payments or benefits that are incidental to athletic participation. **[*55]** See Rascher Rep. at 173-177. Their position is that because Defendants already permit some payments and benefits in these two categories above the cost of attendance, it would be virtually as effective in serving the NCAA's procompetitive purposes to require the NCAA to allow all

[8] Defendants argue that Plaintiffs' proposed less restrictive alternative of conference autonomy is inconsistent with Plaintiffs' challenge to conference-specific rules. See Pls. MSJ, App'x A (listing challenged rules). However, Plaintiffs challenge only the portions of the conference rules that require compliance with challenged NCAA rules. See Pls. Reply, App'x A (listing challenged language of each rule).

benefits in either category. Plaintiffs contend that this alternative could be applied with or without conference autonomy because abolishing the NCAA restraints would be a less restrictive alternative to the current system regardless of whether conference rules were permitted as a replacement.

In support of this contention, Plaintiffs first identify evidence that Defendants already allow schools to offer some benefits above the cost of attendance that are related to athletic participation but not tethered to education. See, e.g., Noll Rep. at 17-18 (discussing categories of benefits); NCAA (Lennon) Depo. at 58:20-59:16 (same). For example, schools can pay the expenses for an athlete's spouse and children to attend a playoff game, because such expenses are incidental to athletic participation, but not the expenses of parents, grandparents, or siblings. NCAA (Lennon) Depo. at 186:1-16; see also id. at 86:17-87:13 (schools may reimburse students' national **[*56]** championship, Olympic trials and national team tryout costs).

Plaintiffs contend that Defendants have conceded that the payment of currently-allowed benefits above the cost of attendance but tethered to education or incidental to athletic participation does not undermine their procompetitive purposes. The NCAA's *Rule 30(b)(6)* witness Kevin C. Lennon testified extensively on this topic. Id. at 63:21-64:1 (expenses incidental to athletic participation can be paid for athletes without offending collegiate model); 71:23-73:2 (NCAA membership's decision to pay expenses incidental to athletic participation does not violate principle of amateurism); 85:5-23 (per diem during trips does not violate principle of amateurism); 93:4-10 ("If the--the benefit provided is permitted within the legislation as either related to educational expenses or--or incidental to participation, then it would be not considered pay, and it would be permitted to be received."); 186:1-16 (schools' payment of costs for athlete's spouse and children to attend playoff game does not implicate principle of amateurism); 287:6-19 (NCAA membership is comfortable with "two buckets" of expenses, those tethered to education and those incidental **[*57]** to athletics participation). Plaintiffs also cite the conclusion of their survey expert Hal Poret that there would be no negative impact on consumer demand for college football and basketball if various forms of additional benefits were provided to student-athletes. Poret Rep. at 19-21.

Defendants respond that Plaintiffs' suggestion cannot be squared with O'Bannon's holding that limiting payments to Plaintiffs' legitimate costs to attend school is consistent with ***antitrust law***. See *802 F.3d at 1075* ("student-athletes remain amateurs as long as any money paid to them goes to cover legitimate educational expenses."). In O'Bannon, the Ninth Circuit concluded, "The Rule of Reason requires that the NCAA permit its schools to provide up to the cost of attendance to their student-athletes. It does not require more." *802 F.3d at 1079*. Defendants' position is that this means that stare decisis limits the less restrictive alternatives that the Court may consider in this case to the relief that was provided in O'Bannon. They argue that Plaintiffs' proposed less restrictive alternatives are no more than new arguments in support of the same challenge already adjudicated in O'Bannon. Relying on a district court case, they argue that stare decisis **[*58]** "would be largely meaningless if a lower court could change an appellate court's interpretation of the law based only on a new argument." *Rambus Inc. v. Hynix Semiconductor Inc., 569 F. Supp. 2d 946, 972 (N.D. Cal. 2008)*.

In Rambus, however, the district court held that the doctrine of stare decisis bound it to follow the Federal Circuit's previous construction of the same term at issue, "integrated circuit device." *Id. at 963, 972* (citing *Rambus Inc. v. Infineon Techs. AG, 318 F.3d 1081, 1089-95 (Fed. Cir. 2003)*. The question for the court to decide was the same; only the arguments in support of the issue had changed. Here, in contrast, the Court is presented with the new and unresolved issue of whether Plaintiffs have identified different less restrictive alternatives to all of the NCAA's rules that prohibit schools from competing to recruit student-athletes with offers of cash or various benefits tethered to educational expenses or incidental to athletic participation, including rules that have changed after O'Bannon.

As the Ninth Circuit explained in O'Bannon, "NCAA regulations are subject to antitrust scrutiny and must be tested in the crucible of the Rule of Reason." *Id. at 1079*. A ruling on less restrictive alternatives to certain NCAA rules in one case does not bar consideration of different less restrictive alternatives to a different, if overlapping, set **[*59]** of rules challenged in a different case. The Supreme Court suggested in Board of Regents that the NCAA's purpose of marketing "a particular band of football--college football" could be a procompetitive justification for rules designed to preserve the "character and quality" of this product, including compensation limitations. *468 U.S. at 101-02*. This did not mean, however, that the rules challenged in O'Bannon were exempt from antitrust scrutiny, because "a restraint that serves a procompetitive purpose can still be invalid under the Rule of Reason if a substantially less restrictive rule would further the same objectives equally well." *O'Bannon, 802 F.3d at 1063-64*; see also *Nat'l Basketball Ass'n v. SDC Basketball Club, Inc., 815 F.2d 562, 564, 567-68 (9th Cir. 1987)* (prior decisions on similar franchise relocation rule in football context did not bar fact-specific rule-of-reason analysis in subsequent challenge in basketball context). Likewise, here, the NCAA's revised rules and Plaintiffs' proposed less restrictive alternatives to those rules are "separate and distinct in a meaningful way for the purposes of the Sherman Act" from those presented in O'Bannon. *Miranda, 860 F.3d at 1242*.

To be clear, if Defendants prevail in demonstrating the same procompetitive justifications that the Court found in O'Bannon, the NCAA will still be able to prohibit its **[*60]** member schools from paying their student-athletes cash sums unrelated to educational expenses or athletic participation. *O'Bannon, 802 F.3d at 1078-79*. Under such circumstances, the Court will not consider any proposed less restrictive alternative by which Plaintiffs seek payment untethered to one of these two categories.

Plaintiffs have proffered evidence supporting two possible less restrictive alternatives not previously presented for decision or ruled upon, raising a genuine issue of material fact as to whether they can meet their evidentiary burden to show that such alternatives would be virtually as effective as the challenged restraints in advancing Defendants' procompetitive objectives. They do not seek summary judgment in their favor on this factor. Defendants have failed to show that these proposed less restrictive alternatives are foreclosed by O'Bannon. Accordingly, the Court will deny summary judgment on the question of less restrictive alternatives.

CONCLUSION

For the reasons set forth above, Plaintiffs' motion for summary judgment (Docket No. 657 in Case No. 14-md-02541 and Docket No. 301 in Case No. 14-cv-02758) is GRANTED IN PART AND DENIED IN PART. Defendants' cross-motion for summary judgment (Docket No. 704 in Case No. 14-md-02541 and **[*61]** Docket No. 327 in Case No. 14-cv-02758) is GRANTED IN PART AND DENIED IN PART.

1. The Court holds that neither res judicata nor collateral estoppel bars Plaintiffs' claims, and denies Defendants' summary judgment motion on this point.

2. The Court grants both parties' summary judgment motions to find that Plaintiffs have met their initial burden of showing that Defendants' challenged restraints are agreements that produce significant anticompetitive effects, affecting interstate commerce, within the same relevant market as that in O'Bannon.

3. The Court denies Defendants' summary judgment motion, under the doctrine of stare decisis, to hold that the same two procompetitive benefits of Defendants' restraints found in O'Bannon apply in this case as a matter of law. The Court denies Plaintiffs' motion for summary adjudication that the procompetitive justifications found in O'Bannon do not apply, but grants Plaintiffs' motion for summary judgment regarding Defendants' other proffered procompetitive justifications.

4. The Court denies Defendants' motion for summary judgment that O'Bannon precludes consideration of the two less restrictive alternatives that Plaintiffs propose in this case.

The **[*62]** Court DENIES Defendants' Motion for Supplemental Briefing (Docket No. 797) and Plaintiffs' Motion to File Supplemental Evidence for the Summary Judgment Record (Docket No. 800). The Court does not rule on whether Plaintiffs' proposed supplemental evidence will be admissible at trial.

A final pretrial conference will be held at 2:30 p.m. on Tuesday, November 13, 2018 and a bench trial of no longer than ten days will commence at 8:30 a.m. on Monday, December 3, 2018. The parties shall comply with the Court's standing order for pretrial preparation. Direct expert testimony shall be presented in writing, with cross-examination and re-direct to take place in Court. The parties shall limit percipient witness testimony to that which is essential, attempt to reach stipulations regarding potentially cumulative evidence and focus their cases only on the issues remaining for trial.

IT IS SO ORDERED.

Opinion

MEMORANDUM AND ORDER

YANDLE, District Judge:

Plaintiffs Kevin Dvorak and Kathleen **[*3]** Dvorak[1] are proceeding on an eight Count Complaint asserting an alleged conspiracy to fix St. Clair County, Illinois real estate tax sales so that property owners were required to pay artificially high interest penalties to redeem their properties. The defendants include St. Clair County, St. Clair County Treasurer Charles Suarez, and a number of individual and associated business purchasers who are alleged to have participated in the conspiracy (collectively, "Purchaser Defendants").

Before the Court are Defendants' Motions for Summary Judgment (Docs. 265, 266, 267, 268, 269, 270 and 272). Plaintiffs have filed responses to most, though not all, of these motions (Docs. 278, 279, 280, 281, 282, 283).[2] For the following reasons, Defendants' motions (Docs. 265, 266, 267, 268, 269, 270 and 272) are **GRANTED**.

BACKGROUND

This case arises from certain St. Clair County real estate tax sales of properties for which the prior year's property taxes are delinquent. The general structure and requirements for the tax sales are set forth in *Article 21 of the Illinois Property Tax Code (35 ILCS 200/21 et seq.*). Under the statute, the County Collector (an *ex officio* role of the County Treasurer) conducts the sales. Purchasers **[*4]** do not receive clear title to the property at issue, but rather a Certificate of Purchase and the right to collect the amount of unpaid taxes from the owner plus a "penalty" ranging from 0 to 18% interest. The winning bidder for a given property is the one who is willing to accept the lowest penalty rate if the owner exercises their right of redemption. Each successful bidder pays the County the amount of the delinquency. The maximum penalty percentage that may be bid is 18%. If no bids are received on a given property, it reverts to the County at the maximum penalty rate.

For example, a property with a $2000 overall delinquency is offered at the tax sale. One bidder offers 18% — meaning that he will pay $2000 to the County and charge the property owner an additional 18%, if they want to redeem the property. Another bidder offers 13%. If this is the winning bid, the property owner would pay less to redeem the property. If no lower bids are received, the second bidder receives the Certificate of Purchase.

If a property owner fails to redeem a property within the statutory redemption period, the successful bidder may file a petition for a tax deed. Once a tax deed is issued, it conveys **[*5]** merchantable title, free and clear from most previous interests in the property.

---

[1] The named plaintiffs originally included John R. Bloyer, Jr. and Adrianne L. Bloyer. They have voluntarily dismissed their individual claims. (Doc. 120).

[2] Many of the motions refer to and purport to join each other. For purposes of simplicity and clarity, the Court will address the generally-applicable grounds for summary judgment as a group, as well as those well-pled grounds which pertain to specific defendants and Counts.

If the property is redeemed, the purchaser of the tax lien receives the certificate amount (what it paid to the County) plus the penalty percentage. The penalty rate increases every six months by the amount of the penalty rate that was originally bid. Using the above example, the property owner would owe the winning bidder $2,260 if redeemed within six months, $2,520 if redeemed between six months and a year, $2,780 if redeemed between a year and 18 months, etc. The holder of a tax lien may also pay subsequent unpaid real estate taxes on a property and claim an automatic 12% penalty on the subsequent taxes. An owner or other eligible party wishing to redeem the property pays the total amount owed to the County, which in turn sends that amount to the tax purchaser.

Because the cost of redemption is usually significantly less than the market value of the property, there is a strong incentive for anyone holding a sizeable ownership or security interest in the property to redeem it following a tax sale. For that reason, if a property owner is unable to pay the cost of redemption, it is common for a mortgage **[*6]** holder or other lienholder to redeem on behalf of the property owner in order to preserve their interest. The amount paid on the owner's behalf is then added to the owner's outstanding obligation.

Plaintiffs claim that the St. Clair County tax sale process was tainted in 2007 and 2008. Specifically, they allege that Defendant Suarez, in exchange for political contributions for himself and the St. Clair County Democrat Party, arranged for the auctioneer to recognize the Purchaser Defendants as winning bidders (presumably in cases of identical bids) and to distribute the winning bids between the Purchaser Defendants. (Doc. 2 at ¶¶74, 79). They also allege that Suarez arranged for representatives tied to Purchaser Defendants to have advantageous seating positions and caused the auctioneer to ignore subsequent (or "trailing") lower bids, thereby artificially inflating the penalty rates. Finally, Plaintiff's allege that the Purchaser Defendants agreed amongst themselves to keep their bids at or near the 18% statutory maximum penalty rate. (*Id.* at ¶74).

Plaintiffs owned two properties that were sold at the 2007 St. Clair County real estate tax sale conducted in November 2008. (*Id.* at ¶¶6-11). **[*7]** The first property is located at 518 E. Washington St., O'Fallon, Illinois ("Washington Property"); the second property is located at 619 W. Schuetz St., Lebanon, Illinois ("Schuetz Property"). Both properties were purchased by Defendant White Oak Securities at 18% penalty rates and were subsequently redeemed on November 8, 2011 by mortgage holder First Federal Savings Bank (Docs. 268-4 and 268-5). Because the redemption took place nearly three years after the sale, $1,725.03 in penalty interest was assessed on a $1,597.25 tax bill for the Washington Property. (Doc. 268-4). Redemption of the Schuetz Property cost $2,018.22 in penalty interest on a $1,868.72 2007 tax bill. (Doc. 268-5). Both properties were sold at tax sales several years before and several years after the 2007 tax year sales at lower penalty rates. (Docs. 278-2 and 278-3).

Plaintiffs assert eight causes of actions, including claims against all defendants for Civil Conspiracy (Count I), violations of the *Sherman Anti-Trust Act, 15 U.S.C. §§ 1* and *2* (Counts III and IV) and violations of the *Illinois Antitrust Act, 740 ILCS 10/1, et seq.* (Counts V-VII). They also assert claims for money had and received against all defendants except Suarez (Count II) and **[*8]** breach of fiduciary duty against Suarez alone (Count VIII). In each Count, Plaintiffs allege damages "based on the difference [between] the amount redeemed and the amount that would have been needed to redeem the property at a reasonable and appropriate penalty rate[,]" plus attorneys' fees, expenses and trebling of damages where allowed by statute. (Doc. 2).

LEGAL STANDARD

Summary judgment is appropriate only if the moving party can demonstrate "that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265(1986)*; *see also* *Ruffin-Thompkins v. Experian Information Solutions, Inc., 422 F.3d 603, 607 (7th Cir. 2005)*. The moving party bears the initial burden of demonstrating the lack of any genuine issue of material fact. *Celotex, 477 U.S. at 323*. Once a properly supported motion for summary judgment is made, the adverse party "must set forth specific facts showing there is a genuine issue for trial." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 250, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*.

A genuine issue of material fact exists when "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Estate of Simpson v. Gorbett, 863 F.3d 740, 745 (7th Cir. 2017)* (quoting *Anderson, 477 U.S. at 248*). When deciding a summary judgment motion, the Court views the facts in the light most favorable to, and draws all reasonable inferences in favor of, the nonmoving party. *Apex Digital, Inc. v. Sears, Roebuck & Co., 735 F.3d 962, 965 (7th Cir. 2013)* (citation omitted).

DISCUSSION

[*9] Defendant Kenneth Rochman

As an initial matter, Defendant Kenneth Rochman filed for summary judgment of the claim asserted against him individually. (Doc. 267). He maintains that he is entitled to judgment as a matter of law because there are no allegations or evidence connecting him to the alleged scheme.

Plaintiffs did not respond to Rochman's motion. Under this Court's local rules, "[f]ailure to timely file a response to a motion may, in the Court's discretion, be considered an admission of the merits of the motion." *SDIL-LR 7.1(c)*. The Court finds it appropriate to invoke *Rule 7.1(c)* in this situation. Accordingly, Defendant Kenneth Rochman's Motion for Summary Judgment is granted.

Statute of Limitations

Defendants argue that the applicable statutes of limitations bar Plaintiffs' claims. (Doc. 271 at 12-16). The statutes of limitations for claims grounded in state law are governed by the law of that state. *Indep. Tr. Corp. v. Stewart Info. Servs. Corp., 665 F.3d 930, 935 (7th Cir. 2012)*. Like the statute of limitations itself, state rules that are an "integral part of the statute of limitations" such as tolling and equitable estoppel, are also applied by federal courts to state law claims. *Hollander v. Brown, 457 F.3d 688, 694 (7th Cir. 2006)* (citing *Walker v. Armco Steel Corp., 446 U.S. 740, 751-53, 100 S. Ct. 1978, 64 L. Ed. 2d 659 (1980))*.

Civil conspiracy (Count I) is not a separate and distinct tort in Illinois. *See* *Weber v. Cueto, 253 Ill. App. 3d 509, 624 N.E.2d 442, 449, 191 Ill. Dec. 593 (1993)*. Rather, **[*10]** "[a] cause of action for civil conspiracy exists only if one of the parties to the agreement commits some act in furtherance of the agreement, which is itself a tort." *Adcock v. Brakegate, Ltd., 164 Ill. 2d 54, 645 N.E.2d 888, 894, 206 Ill. Dec. 636 (1994)*. *See also* *Borsellino v. Goldman Sachs Grp., Inc., 477 F.3d 502, 509 (7th Cir. 2007)* (a claim for civil conspiracy requires "at least one tortious act by one of the co-conspirators in furtherance of the agreement."). As a result, a civil conspiracy claim is subject to the same statute of limitations as the underlying tort on which the claim is based. *Mauvais-Jarvis v. Wong, 987 N.E.2d 864, 894, 987 N.E.2d 864, 370 Ill. Dec. 98 (2013)*.

Claims for money had and received (Count II) and breach of fiduciary duty (Count VIII) must be commenced within 5 years after the cause of action accrued. *735 ILCS 5/13-205*.

A 4 year statute of limitations applies to violations of the Sherman Act (as enforced by private parties under the Clayton Act) (Counts III and IV). *15 U.S.C. § 15b*. Relatedly, a federal antitrust cause of action "accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business." *In re Copper Antitrust Litig., 436 F.3d 782, 789 (7th Cir. 2006)* (quoting *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* (*Zenith II*).

A private action for violation of the Illinois Antitrust Act (Counts V-VII) must be commenced within 4 years after the cause of action accrued. *740 ILCS 10/7(2)*. In the context of an antitrust conspiracy, accrual is generally triggered by the last overt act in furtherance **[*11]** of the alleged conspiracy. *People ex rel. Hartigan v. Moore, 143 Ill. App. 3d 410, 493 N.E.2d 85, 86, 97 Ill. Dec. 603 (1986)*.

Here, the tax sale in question took place on November 10, 2008. (Doc. 230-4 at 78). Plaintiffs have not alleged any overt acts in furtherance of the alleged conspiracy after the sale. Nor do Plaintiffs claim that their injury arose from any act committed after November 10, 2008. Plaintiffs filed this lawsuit on October 17, 2014 — five years and eleven months later. (Doc. 2). Facially, Plaintiffs' claims in Counts I and III-VIII appear to have been filed out of time. The only claim that is not barred on its face is Count II for money had and received, because penalty was not paid until November 8, 2011.

Plaintiffs contend that their claims are timely by application of the "discovery rule." Under the discovery rule, the statute of limitations' accrual date "is not determined when the injury occurs but when it is discovered or should have been discovered." *Barry Aviation Inc. v. Land O'Lakes Mun. Airport Comm'n, 377 F.3d 682, 688 (7th Cir. 2004)*. When the discovery rule applies, a statute of limitation begins to run "once a plaintiff has knowledge which would lead a reasonable person to investigate the possibility that her legal rights had been infringed." *CSC Holdings, Inc. v. Redisi, 309 F.3d 988, 992-93 (7th Cir. 2002)*; citing *LaSalle v. Medco Research, Inc., 54 F.3d 443, 446 (7th Cir. 1995)*. *See also* *Khan v. Deutsche Bank AG, 2012 IL 112219, 978 N.E.2d 1020, 1029, 365 Ill. Dec. 517 (2012)* ("When a party knows or reasonably should know both that an injury has **[*12]** occurred and that it was wrongfully caused, the statute begins to run and the party is under an obligation to inquire further to determine whether an actionable wrong was committed"). The discovery rule has been applied to antitrust claims, as well as breach of fiduciary duty claims. *See* *In re Copper Antitrust Litig., 436 F.3d at 789 (7th Cir. 2006)*, and *Fuller Family Holdings, LLC v. N. Tr. Co., 371 Ill. App. 3d 605, 863 N.E.2d 743, 756, 309 Ill. Dec. 111 (2007)*.

The relevant question then is when Plaintiffs knew or should have known that they had sustained an alleged wrongfully-caused injury.[3] At one point during her deposition, Kathleen Dvorak testified that "[t]he high interest rate" led her to believe that the sales were illegally conducted or rigged, and the 18 percent rate "on its face struck [her] as being wrong based on [her] prior experience of redeeming at a much lower interest rate[.]" (Doc. 272-1 at 41:19-42:21, 43:2-44:7, 76:10-13). She also testified that she knew the properties had been sold at the 18% rate for the 2007 tax year shortly after the tax sale had occurred. (*Id.* at 90:14-91:1). However, she testified elsewhere that she did not recall seeing the 18% penalty rates until she received "take-notice" letters issued in June 2011, although she admitted knowing that they send out notices shortly after the auctions. (*Id.* at 69:20-70:12, **[*13]** 88:1-23). She also testified that it was the interest rate on the redemption certificates (issued upon redemption in 2011) that caused her to believe the auctions may have been rigged. (*Id.* at 75:12-24). At another point, she claimed that she did not remember the rates the Properties had fetched at previous auctions when she saw the 18% rates, and that she looked those up sometime later and was "shocked" at that point. (*Id.* at 124:13-125:4). Finally, she testified that she did not actually appreciate that she might have been wrongly injured until October 2014, when a letter from Ken Brosh was left at the Washington Property. (*Id.* at 48:1-22).

A plaintiff may defeat summary judgment with her own deposition testimony where there is a genuine issue of fact as to plaintiff's subjective experience. *Xodus v. The Wackenhut Corp., 626 F. Supp. 2d 861, 863 (N.D. Ill. 2009)* (citing *Paz v. Wauconda Healthcare & Rehabilitation Centre, LLC, 464 F.3d 659, 664-65 (7th Cir. 2006))*. But if "sham" contradictions are created to defeat summary judgment, the Court may disregard the contradictory testimony; for instance, when a party submits either an errata sheet changing the substance of their testimony or submits an affidavit on summary judgment that contradicts their prior testimony or sworn statements. See *Bank of Illinois v. Allied Signal Safety Restraint Systems, 75 F.3d 1162 (7th Cir. 1996)*.

Here, Dvorak's deposition testimony regarding when she **[*14]** had information sufficient to put her on notice of wrongful injury is obviously contradictory. That said, there is no indication that the contradictions are a "sham" — manufactured for the purpose of creating an issue of fact where none would otherwise exist.

---

[3] Kevin Dvorak testified in his deposition that his wife handles the financial matters in the household, that he was not significantly involved with the current matter and had no personal knowledge of any of the allegations in the Complaint other than the fact that he owned the properties, and that they were sold for delinquent taxes and eventually redeemed. (Docs. 271-5 at 3 and 278-6 at 4-5). As such, it is Kathleen Dvorak's testimony that is pertinent to the statute of limitations issue.

The Court cannot decide the credibility of testimony or weigh the evidence in making findings as a matter of law. Thus, when Plaintiffs knew or should have known that they allegedly had been victimized by the 2007 auction is a material issue of fact for the jury's determination. Summary judgment on statutes of limitations grounds is therefore inappropriate.

Federal Antitrust Claims

Relying on the Supreme Court's Decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, Defendants first argue that Plaintiffs' antitrust claims fail as a matter of law because Plaintiffs were "indirect purchasers" instead of "direct purchasers" with regard to the redemption of the Washington and Schuetz Properties. (Doc. 268 at 5). In *Illinois Brick*, the Court held that treble-damage antitrust claims were not available for those who were not paying the allegedly inflated price directly to the wrongdoer. Citing *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, the Court expressed its "unwillingness to complicate treble-damages actions with attempts **[*15]** to trace the effects of the overcharge on the purchaser's prices, sales, costs, and profits, and of showing that these variables would have behaved differently without the overcharge[.]" *431 U.S. at 725-26* (internal quotations omitted).

Here, Defendants' argument fails as to the federal antitrust claims because Plaintiffs are not indirect purchasers with regard to the redemption of the Washington and Schuetz Properties. The tax sale statute specifically provides that "[a]ny redemption shall be presumed to have been made by or on behalf of the owners and persons interested in the property and shall inure to the benefit of the persons having the legal or equitable title to the property redeemed, subject to the right of the person making the redemption to be reimbursed by the persons benefited." *35 ILCS 200/21-345(a)*. While the payments to redeem the Washington and Schuetz Properties were made by First Federal Savings Bank, Defendants have advanced no argument to rebut this presumption.

Even if Plaintiffs were deemed indirect purchasers, the rationale behind an exception to the indirect purchaser doctrine applies under the facts in this case. In *Illinois Brick*, the Supreme Court left open potential exceptions to the indirect **[*16]** purchaser bar; one of which is triggered if the indirect purchaser received the goods from the direct purchaser pursuant to a pre-existing cost-plus contract. *In re Bulk Petroleum Corp., 796 F.3d 667, 677 (7th Cir. 2015)*. In that situation, the complexity and confusion associated with tracing the knock-on effects of the inflated price don't exist. Rather, "[t]he effect of the overcharge is essentially determined in advance, without reference to the interaction of supply and demand that complicates the determination in the general case." *Illinois Brick, 431 U.S. at 736*.

The amount that First Federal Savings Bank passed along to the Dvoraks was limited to the amount it paid to redeem the properties. This is equivalent to the exceptional situation described in *Illinois Brick*. The effect of the overcharge is determined in advance and there is no elasticity in the process. There are no or other factors that could have affected the amount First Federal Savings Bank assessed Plaintiffs. The alleged overcharge was transmitted directly to the Dvoraks, thereby eliminating any distinction between a direct or indirect purchaser. Therefore, summary judgment is not warranted on these grounds.

Defendants also challenge the sufficiency of evidence of an antitrust conspiracy as required under **[*17]** *Section 1* of the Sherman Act. "To prevail under *§ 1* under any theory, plaintiffs generally must prove three things: (1) that defendants had a contract, combination, or conspiracy ("an agreement"); (2) that as a result, trade in the relevant market was unreasonably restrained; and (3) that they were injured." *Omnicare, Inc. v. UnitedHealth Grp., Inc., 629 F.3d 697, 705 (7th Cir. 2011)* (citing *Denny's Marina, Inc. v. Renfro Prods., Inc., 8 F.3d 1217, 1220 (7th Cir. 1993)*.

A plaintiff relying on circumstantial evidence of conspiracy "must show that the inference of conspiracy is reasonable in light of the competing inference[] of independent action." *Serfecz v. Jewel Food Stores, 67 F.3d 591, 599 (7th Cir. 1995)* (quoting *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986))*. The Seventh Circuit has distilled this determination into a 3-step analysis:

> 1) review the evidence of conspiracy submitted by the plaintiff; 2) examine whether the defendants have offered evidence that tends to show that the conduct which forms the basis of the plaintiff's complaint is as compatible with the legitimate business activities of the defendant as it is with illegal conspiracy; and
> 3) if the evidence of conspiracy is ambiguous, determine whether the plaintiff can point to any evidence that tends to exclude the possibility that the defendants were pursuing their legitimate independent interests.

Id. (citing *Market Force, Inc. v. Wauwatosa Realty Co., 906 F.2d 1167 at 1171-72, (7th Cir. 1990))*.

Plaintiffs point to the higher overall weighted average bidding in St. Clair **[*18]** County for the 2006 and 2007 tax year auctions compared with other years and other counties as evidence of the alleged conspiracy. They also cite the testimony of competing tax buyer Ken Brosh, that representatives associated with Purchaser Defendants were given advantageous seating positions, that otherwise "tied" bids would be awarded to Purchaser Defendants, and that lower bids by non-Purchaser Defendants would not be accepted. (Deposition of Ken Brosh, Doc. 278-8 at 19:4-20:23; 35:1-4; 66:16-19; 108:18-21 and 172:3-17).

To rebut Plaintiffs' reliance on circumstantial evidence of conspiracy, Defendants quite effectively offer alternate explanations for the higher weighted average bidding, including higher supply due to the early stages of the 2008 financial crisis and lower bidder turnout due to more competing tax auctions taking place the same week than in other years. However, their challenges to Brosh's testimony — that he admitted he was also attempting to get the highest penalty rates he could, that the alleged favoritism also occurred in years other than the auctions at issue, and that the alleged refusal of the auctioneer to recognize lower trailing bids for those not seated **[*19]** in the front row — relate to the question of credibility. (Doc. 270 at 6, 15 n. 3). The credibility of this evidence isn't the issue at this point; the issue is the existence of facts which, if believed by the trier of fact, could show collusive conduct.

If believed, Brosh's testimony tends to exclude the possibility that the alleged wrongful anticompetitive effect on the market as a whole was the result of independent action. As such, sufficient circumstantial evidence of a conspiracy exists to survive summary judgment on that point.

Next, Defendants argue that Plaintiffs cannot succeed on their antitrust monopoly claims (Count IV and VII) because they have not presented any evidence of monopoly power or exclusionary conduct. (Doc. 268 at 8). *Section 2* of the Sherman Act, *15 U.S.C. § 2*, makes it unlawful for a person or company to monopolize and exclude competition. To prove monopolization, a plaintiff must show: "(1) the possession of monopoly power in the relevant market and (2) the willful...maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. The Supreme Court has defined monopoly power as "the power **[*20]** to control prices or exclude competition." *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. Possessing monopoly power does not by itself constitute impermissible monopolization. *Grinnell, 384 U.S. at 570-71*. Rather, *§ 2* of the Sherman Act makes it unlawful to maintain monopoly power through exclusionary conduct. *Verizon Comm., Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*.

Monopoly power may be shown either "through direct evidence of anticompetitive effects," or "by proving relevant product and geographic markets and by showing that the defendant's share exceeds whatever threshold is important for the practice in that case." *Toys 'R Us, Inc. v. F.T.C., 221 F.3d 928, 937 (7th Cir. 2000)*. With respect to the latter method of proof, "[t]he existence of such power ordinarily may be inferred from the predominant share of the market." *Grinnell, 384 U.S. at 571*. There is no bright-line test for what level of market share equates to sufficient market power to constitute a monopoly. *Id. at 571* (87% of the market is a monopoly); *American Tobacco Co. v. United States, 328 U.S. 781, 797, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)* (over two-thirds of the overall market is a monopoly).

The record in this case raises a genuine issue of material fact as to market share and monopoly power. As this Court has previously noted, the relevant market is real estate tax liens in St. Clair County. *Bloyer v. St. Clair Cty. Illinois, 179 F. Supp. 3d 843, 849 (S.D. Ill. 2016)*. Plaintiffs offer evidence showing that Defendants won 87.81% of the tax auction bids for the tax years allegedly influenced by the anticompetitive **[*21]** actions. (Doc. 279 at 5, citing

Doc. 268-2 at 2). This percentage is within the range of what courts have found sufficient market share to constitute monopolistic market power.[4]

Additionally, Ken Brosh's previously discussed testimony creates a triable issue of fact as to whether there was exclusionary conduct because it could reasonably support a finding of an attempt to exclude outside bidders. Therefore, Defendants are not entitled to summary judgment on the issue of monopoly power.

Defendants St. Clair County and Suarez assert that they are exempt from liability for Plaintiff's federal antitrust claims under the state action doctrine and the *Illinois Local Government Antitrust Act* ("LGGA"). The state action doctrine exempts actions taken by states through their legislatures from federal ***antitrust law*** on principles of federalism and state sovereignty. *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 370, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*, (citing *Parker v. Brown, 317 U.S. 341, 350-51, 63 S. Ct. 307, 87 L. Ed. 315 (1943))*. On the other hand, municipalities and other political subdivisions are not *per se* exempt because they are not themselves sovereign entities to which those principles apply. In order for the exemption to apply to these entities, the anticompetitive activities in question must be authorized by the state "pursuant to state policy **[*22]** to displace competition with regulation or monopoly public service" and a party claiming exemption must demonstrate "clear articulation of a state policy to authorize anticompetitive conduct[.]" *Town of Hallie v. Eau Claire, 471 U.S. 34, 38-40, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)* (citations omitted). This "clear articulation" need not be absolutely explicit, as long as suppression of competition is the "foreseeable result" of what the statute authorizes. *Id. at 42*.

Here, Suarez and St. Clair County fail to articulate how suppression of competition is a foreseeable result of the Illinois statutory scheme for auctioning of unpaid real estate tax certificates. As such, they have not demonstrated that the state action doctrine applies.

Under the LGAA, "[n]o damages, interest on damages, costs, or attorney's fees may be recovered under *section 4*, *4A*, or *4C* of the Clayton Act (*15 U.S.C. §§ 15*, *15a*, or *15c*) from any local government, or official or employee thereof acting in an official capacity." *15 U.S.C. § 35*. "Local Government" is defined to include counties. *15 U.S.C. § 34(A)*. Plaintiffs do not address St Clair County's claimed exemption under the LGAA. They argue only that Suarez is not entitled to the exemption because his alleged actions in connection with anticompetitive activities were not undertaken in his official capacity.

Plaintiffs **[*23]** have not identified any evidence that Suarez was involved in the alleged bid rigging. In fact, they offer no evidence regarding any actions undertaken by Suarez himself. They merely cite Defendant John Vassen's deposition testimony that he had known Suarez for 35 years, considered them "friends," and that his relationship with Suarez was "the same as his relationship to the convicted Madison County Treasurer, Fred Bathon." (Doc. 283 at 8, citing Doc. 278-10 at 46-47, 60, 63). However, Vassen also clarified that by "relationship," he meant the general association between County Treasurer and buyer of tax liens. (Doc. 278-10 at 46). Although Vassen also testified that he made campaign contributions to county treasurers, including Suarez (*Id.* at 46-47), the inferences Plaintiffs would have this Court draw from this testimony are far from reasonable.

Plaintiffs also refer to Stipulations made by Defendants Barrett Rochman, Scott McLean and John Vassen in an unrelated criminal case regarding tax lien auctions in neighboring Madison County as support for their claims against Suarez. While the Stipulations detail the same or similar conduct alleged in this case, they are wholly irrelevant to Plaintiffs' **[*24]** claims against Suarez. Without evidence of some conduct other than the acceptance of campaign contributions, there is no indication that Suarez was acting outside the scope of his official duties. For these reasons, the LGAA's damage exemption applies to the federal antitrust claims asserted against St. Clair County and Suarez. With regard to the remaining Defendants, Plaintiffs must clear another hurdle.

---

[4] Defendants point to the fact that other buyers did win tax certificates at the 2007 and 2008 tax year auctions, including 50 that Brosh won in the 2007 tax year auction, and assert that "if the named Defendants had monopoly power, this could not and would not have occurred." (Doc. 268 at 9). However, the exclusion need not be total in order to qualify as improper monopolistic conduct—courts routinely entertain monopoly claims where the market share is less than 100 percent, as discussed above.

Antitrust claims require that the plaintiff prove the defendant violated ***antitrust law*** and that the violation caused them some injury. *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 818 (7th Cir. 2012)* (citations omitted). "To establish an antitrust injury, a plaintiff must show not only that the injury is of the type intended to be protected by the antitrust laws, but that the violation was 'the cause-in-fact of the injury: that but for the violation, the injury would not have occurred.'" *O.K. Sand & Gravel, Inc. v. Martin Marietta Techs., Inc., 36 F.3d 565, 573 (7th Cir. 1994)* (citing *Greater Rockford Energy & Technology, 998 F.2d at 394-96*). Evidence of overall market harm is not sufficient to establish antitrust injury; "individual injury (also known as antitrust impact) is an element of the cause of action[.]" *Reed v. Advocate Health Care, 268 F.R.D. 573, 581 (N.D. Ill. 2009)* (quoting *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 311 (3d Cir. 2008)*, as amended (Jan. 16, 2009)).

Plaintiffs request as damages "the difference of the amount redeemed and the amount that would have been needed to redeem the property at **[*25]** a reasonable and appropriate penalty rate." (Doc. 2). Thus, they must produce competent evidence that the 18% penalty rate they paid on the Washington and Schuetz poperties was more than the "reasonable and appropriate penalty rate" for those properties in the 2007 tax year, and by how much. Plaintiffs have disclosed two expert witnesses in this case, but neither has offers an opinion as to what the reasonable penalty rates should have been for the Washington and Schuetz Properties for the 2007 tax year sale absent the alleged bid rigging scheme.

Victoria Harper, former Fulton County, Illinois Treasurer, analyzed overall bidding in historical tax sale data and opined that there were "unusually high interest rates" overall in the 2006 and 2007 St. Clair tax auctions. (Harper Expert Report, Doc. 218-1 at 1). She offered no opinion, however, as to whether the penalty rates paid on the Washington and Schuetz Properties for the 2007 tax year were higher than they might be otherwise. In fact, Plaintiffs confirm that Ms. Harper is not "offering opinions as to complex macro-economic issues or as to Plaintiff's damages[.]" (Doc. 234).

Plaintiffs also disclosed Dr. Carl Peters as an expert. Dr. **[*26]** Peters conducted statistical analyses (including calculating weighted average bidding) regarding the overall results of the 2006 and 2007 tax year auctions and how they compare with other years and other counties. (Peters Expert Report, Doc. 255-1). However, during his deposition, he conceded that his methodology does not provide a basis to determine what rate would have applied to any particular property owner's delinquent taxes absent the alleged wrongful acts. (Deposition of Carl Peters, Doc. 255-2 at 117:8-118:1).

Plaintiffs point only to the overall weighted average bids for the St. Clair County market in 2006 and 2007 compared with other years and other counties as evidence that the alleged anticompetitive conduct had an antitrust impact. But this information is not probative of whether Plaintiffs themselves paid more than they would have if the auctions were not allegedly manipulated. In the absence of even a scintilla of evidence regarding what the penalty rates on the Washington and Schuetz Properties should have been in 2007, Plaintiffs cannot prove antitrust injury or make a submissible case on damages. The jury would improperly be left to rely on mere speculation and guesswork. **[*27]**

Illinois Antitrust Act Claims

Defendants challenge Plaintiffs' state antitrust claims as well. Under Illinois law, federal courts' interpretation of federal ***antitrust law*** guides state courts' construction of substantially similar Illinois ***antitrust law***. *State of Ill., ex rel. Burris v. Panhandle Eastern Pipe Line Co., 935 F.2d 1469, 1480 (7th Cir.1991)*. As such, the Court's above analysis of the federal statutes and case law applies to the equivalent state law claims.

Defendants also seek to invoke the indirect purchaser doctrine on the state antitrust claims. But the state law antitrust claims are not affected by whether Plaintiffs are deemed direct or indirect purchasers. The Supreme Court has specifically held that *Illinois Brick* does not preempt state law with regard to indirect purchasers; that is, it does not prevent indirect purchasers from recovering damages under state antitrust laws where the state laws otherwise allow it. *See, California v. ARC Am. Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*.

The applicable Illinois statute provides that "[n]o provision of this Act shall deny any person who is an indirect purchaser the right to sue for damages." *740 ILCS 10/7(2)*. Defendants correctly point out that the statute prohibits indirect purchasers from maintaining a class action for antitrust violations. But because class certification has been denied in this **[*28]** case, that provision is no barrier to the Dvoraks maintaining their own claims. Summary judgment is not proper on these grounds.

As was the case with respect to the federal antitrust claims, Defendants Suarez and St. Clair County argue that the provisions of the Illinois Antitrust Act do not apply to them, and therefore, the state law antitrust claims should be dismissed. (Doc. 272 at 5-6). They refer to *Section 5* of the statute, which provides, "the activities of a unit of local government or school district and the activities of the employees, agents and officers of a unit of local government or school district" are not subject to the statute. *740 ILCS 10/5(15)*. The Illinois Constitution's definition of "units of local government" includes counties. *Ill. Const. 1970, art. VII, § 1*.

Plaintiffs do not challenge St. Clair County's assertion that it escapes state antitrust liability under *Section 5(15)*, but once again, they contend Suarez does not qualify because his alleged conduct in participating in anticompetitive activities were outside the scope of his official authority. *Lathrop v. Juneau & Assocs., Inc. P.C., 220 F.R.D. 330, 338 (S.D. Ill. 2004)*. As previously noted, Plaintiffs have produced no actual evidence indicating that Suarez engaged in any anticompetitive or collusive activities. Therefore, **[*29]** the *Section 5(15)* exemption applies.

State Common Law Claims

Breach of Fiduciary Duty

Suarez, the only defendant against whom the breach of fiduciary duty claim is asserted, argues that he is entitled to public official immunity. Under that doctrine, "a public officer is immune from individual liability for the performance of discretionary duties in good faith." *Kinzer on Behalf of City of Chicago v. City of Chicago, 128 Ill. 2d 437, 539 N.E.2d 1216, 1220, 132 Ill. Dec. 410 (1989)*. While an official performing discretionary duties is entitled to immunity, one performing ministerial duties is not. The distinction between discretionary and ministerial acts is murky at the best, and must be made on a case-by-case basis. However, Illinois law generally...

> ...deems discretionary acts as those that are unique to a particular public office, and involve the making of a decision about whether or how to perform a particular act following the exercise of personal deliberation and judgment. In contrast, ministerial acts are those which a person performs on a given state of facts in a prescribed manner, in obedience to the mandate of legal authority, and without reference to the official's discretion as to the propriety of the act. That is, ministerial acts are those acts that are absolute, certain and imperative, involving merely **[*30]** the execution of a set task so that nothing remains for judgment or discretion.

Wrobel v. City of Chicago, 318 Ill. App. 3d 390, 742 N.E.2d 401, 406-07, 252 Ill. Dec. 151 (2000).

Here, Suarez's conduct as developed in the record is discretionary in nature. The broad requirements for conducting tax auction sales are spelled out in the Illinois Property Tax Code and implicate arguably ministerial acts. That said, significant aspects of how the auctions are to be conducted are left to the judgment of the organizing official and his or her office. Therefore, Suarez is entitle to public official immunity on Plaintiffs' breach of fiduciary duty claim.

Civil Conspiracy

Civil conspiracy claims require proof of a combination of two or more persons for the purpose of accomplishing by some concerted action either an unlawful purpose or a lawful purpose by unlawful means. *Adcock, 645 N.E.2d at*

894. Conspiracy claims operate to extend liability beyond the active wrongdoer to those who have planned, assisted or encouraged the wrongdoer's acts. *Id.* To prove civil conspiracy, Plaintiffs must prove not only that a defendant committed an overt act in furtherance of the conspiracy, but also that the act was tortious or unlawful. *Id.* In other words, there "must be an independent cause of action underlying a plaintiff's conspiracy **[*31]** claim." *Siegel v. Shell Oil Co., 656 F. Supp. 2d 825, 836 (N.D. Ill. 2009)*, aff'd, *612 F.3d 932 (7th Cir. 2010)* (citing *Thomas and Indeck N. Am. Power Fund, L.P. v. Norweb PLC, 316 Ill. App. 3d 416, 735 N.E.2d 649, 249 Ill. Dec. 45 (2000))*.[5]

Here, Plaintiffs' civil conspiracy claim must rest on their state antitrust and/or breach of fiduciary duty claims. Because those claims are subject to summary dismissal, the conspiracy claim fails as well.

Money Had and Received

Money had and received is a state law claim arising in equity. In order to prove such a claim under Illinois law, a plaintiff must establish that (1) he was compelled to pay money to the defendant, (2) the defendant had no legal right to demand the money, and (3) payment was necessary in order to avoid an injury to his business, person or property. *Butitta v. First Mortg. Corp., 218 Ill. App. 3d 12, 578 N.E.2d 116, 118-19, 160 Ill. Dec. 937 (1991)*.

The basis of Plaintiffs' claim is the money they paid to redeem the Washington and Schuetz Properties over and above what they allege they should have paid. Defendant White Oak Securities won the tax certificates for the properties at the 2007 tax year auction. (Doc. 2 at ¶¶7, 10). First Federal Savings Bank paid the redemption amounts to St. Clair County. As Plaintiffs acknowledge, the certificate amount and the additional penalty paid by a redeeming party "is in turn paid by the County to the tax purchaser, and the property is released back to its redeeming owner." (Doc. **[*32]** 2 at ¶62). That being the case, St. Clair County did not retain any of the penalty at issue or realize any benefit from it. It played no role with respect to the penalty payments except as an intermediary before disbursing the money to White Oak Securities.

This specific scenario was addressed by the Fifth District Illinois Appellate Court in *Bueker v. Madison Cty., 2016 IL App (5th) 150282, 406 Ill. Dec. 633, 61 N.E.3d 237, 256 (2016)*, in which that court held that a state law claim for money had and received based on allegedly rigged property tax penalty rate auction would not lie against the county to which the redemption payment was tendered, as the county passes the payment along to the bidder and does not retain any benefit from the alleged wrongful charge. Plaintiffs acknowledge *Bueker*, but urge this Court to disregard it in favor of *Drury v. McLean Cty., 89 Ill. 2d 417, 433 N.E.2d 666, 60 Ill. Dec. 624 (1982)*.

In *Drury*, individuals who had been convicted and paid fines to the circuit clerk under a statute later found unconstitutional sought to recover the fines and costs from McLean County under the money had and received theory. Plaintiffs mischaracterize the holding in *Drury* as "allowing plaintiffs...to recover for money had and received against funds actually received by the county." (Doc. 283 at 11). That is incorrect. The Illinois Supreme **[*33]** Court actually found that the action would not lie against the County, because 1) the circuit clerk was not a county official and 2) the money had never been received by the county, but was instead distributed by circuit clerk to the town of Normal and the State of Illinois. *Drury at 670*. Here, St. Clair County's position is analogous to that of the circuit clerk in *Drury*, having taken in the money and then disbursed it to another entity. Plaintiffs' reliance on *Drury* is therefore misplaced.

There is no evidence that any of the defendants besides White Oak Securities received and retained the allegedly inflated penalty payments from the Washington and Schuetz Properties or any benefit from such payments. Thus, Plaintiffs' claim for money had and received fails on liability as to Defendants other than White Oak. But that doesn't end the analysis.

---

[5] Plaintiff cites to an Illinois Court of Appeals case, *Vance v. Chandler, 231 Ill. App. 3d 747, 597 N.E.2d 233, 236, 173 Ill. Dec. 525 (1992)*, holding that "independent, actionable tortious conduct is not needed" to support a civil conspiracy claim. (Doc. 283 at 11). *Vance*, however, was decided before *Adcock* and the subsequent appellate cases interpreting it.

Plaintiffs' inability to show that their penalty rates were higher than what they reasonably should have been is fatal to their money had and received claim against White Oak Securities as well. One of the elements of the claim is a showing that the defendant had no legal right to demand the money. Had White Oak won the bidding on Plaintiffs' properties **[*34]** at "reasonable and appropriate rates," there would be no question that it would have had the legal right to demand payment under the statutory scheme. In the absence of any evidence that the actual rates were higher than the reasonable and appropriate rates, however, a jury would have no basis on which to conclude that White Oak was not legally entitled to collect the full amount it received.

CONCLUSION

For the foregoing reasons, Defendants' motions for summary judgment (Docs. 265, 266, 267, 268, 269, 270 and 272) are **GRANTED** and the case is **DISMISSED with prejudice**. All other pending motions are **DENIED as MOOT**. The Clerk of Court is **DIRECTED** to enter judgment in favor of Defendants and against Plaintiffs and to close the case

IT IS SO ORDERED.

Opinion

[*1080] ORDER GRANTING IN PART AND DENYING IN PART DEFENDANT'S MOTION TO DISMISS CONSOLIDATED AMENDED COMPLAINT

I. INTRODUCTION

This putative nation-wide class action suit arises out of Defendant HP Inc.'s ("HP") allegedly unlawful implementation of a firmware update that incapacitated thousands of HP printers and all-in-one devices (collectively "HP printers") and prevented the use of certain third-party ink cartridges in those printers. Plaintiffs Richard San Miguel, DeLores Lawty, Richard Faust, Christopher Ware and James Andrew ("Plaintiffs")[1] allege that HP used the firmware in an attempt to gain an advantage over its competitors and to extract higher profits from the ink cartridge aftermarket.

HP moves to dismiss the Consolidated Amended Complaint ("Complaint")[2] pursuant to *Federal Rules of Civil Procedure 9(b)* and *12(b)(6)*, asserting, among other things, that HP has no legal obligation to make its printers compatible with any and all third-party ink cartridges. Based upon all pleadings filed to date and the comments of counsel at the hearing, HP's motion to dismiss is granted in part and denied **[**3]** in part.

II. BACKGROUND[3]

Plaintiffs each purchased an HP printer and bought third-party ink cartridges when the original HP ink cartridges that came with their printers ran out of ink. Plaintiff Richard San Miguel ("Miguel") purchased an HP printer in December 2015. Miguel refilled his printer with ink cartridges manufactured by an HP competitor. These ink cartridges functioned up until September 12, 2016. On September 13, 2016, Miguel's HP printer unexpectedly failed and the screen displayed a message directing him to remove "damaged" ink cartridges and replace them with new cartridges. **[*1081]** Miguel alleges that HP caused this failure by disabling his printer. Miguel clicked on the link that was displayed on his screen, which led him to an HP website selling HP ink cartridges. The screen on his printer also indicated that his replacement color ink cartridges were empty, but they weren't. Miguel alleges that "[h]is printer's inoperability caused him to expend time and money." Complaint at ¶17. He further alleges that when he bought his HP printer, he relied on the ability to use third-party ink cartridges. If he had known that HP would prevent him from using third-party ink cartridges, he would **[**4]** not have bought an HP printer or he would have paid significantly less for it.

Plaintiff DeLores Lawty ("Lawty") purchased an HP printer in February 2015 and used the HP ink cartridges that came with the printer until approximately June 2016. Lawty replaced them with non-HP ink cartridges purchased online and printed documents using those cartridges. On September 15, 2016, Lawty's printer wouldn't work and the screen on her printer said there was an error with her ink cartridges. Lawty checked her cartridges and they were still full of ink. Lawty replaced the non-HP cartridges with a new set of non-HP cartridges, but the printer still would not work. Lawty tried to troubleshoot the problem with HP, but she was unable to get her printer to work. Lawty alleges that HP caused her printer to fail by disabling it. She ultimately bought a replacement printer from HP. Lawty never allowed HP to push through its firmware update. If Lawty had known that HP could or would disable her printer remotely, she would not have bought an HP printer or she would have paid significantly less for it.

Plaintiff Richard Faust ("Faust") purchased an HP printer in 2014. When the ink cartridges that came with **[**5]** the printer ran out of ink, he purchased and installed ink cartridges made by an HP competitor. He used the non-HP cartridges to print hundreds of pages of documents. On or about September 16, 2016, Faust's printer wouldn't work. The error message on the printer screen said that the ink cartridges were missing or damaged. Faust alleges that HP caused his printer to fail by disabling it. When investigating his printer problem, Faust learned of an optional

---

[1] The parties have stipulated to dismiss the claims of Plaintiff Robert Doty. See Dkt. 89.

[2] After the briefing on the motion to dismiss was completed, the parties stipulated to the filing of the Consolidated Amended Complaint and agreed that HP's motion to dismiss would apply to the Consolidated Amended Complaint without the need for further response or briefing.

[3] The Background is a summary of the allegations in the Complaint.

firmware update that HP had released to fix the problem. Faust downloaded the update, but still couldn't print documents. Faust contacted HP's technical support, but the problem was not resolved. Faust purchased a Canon printer to replace his HP printer. If Faust had known HP would disable his printer if he installed non-HP ink cartridges, he would not have bought an HP printer or would have paid significantly less for it.

Christopher Ware ("Ware") experienced similar problems with his HP printer. The error message on Ware's HP printer screen said: "There is a problem with the printer or ink system. Turn printer off, then on. If problem persists, contact HP." Complaint at ¶39. Ware tried twice to download the "patch" offered by HP to **[**6]** regain operability with certain non-HP printer cartridges, but was unable to do so. Id. at ¶41. Ware installed HP printer cartridges and was again able to use his HP printer.

When James Andrews ("Andrews") was shopping for a printer, he "learned that the HP Officejet 4500 printer used 901 and 61 ink cartridges; HP represented on the product box that the printer used these models." Id. at ¶44. Andrew alleges that "[t]he 901 and 61 labels are generic part numbers for cartridges that are compatible, because of their size and functionality, with his printer." Id. Andrew alleges that HP never disclosed to **[*1082]** him that he would not be able to print documents using third-party ink cartridges. Id. Andrews planned to use third-party ink cartridges because he knew that HP ink cartridges were much more expensive. Andrews purchased and used "901 and 61 ink cartridges from third-party sellers." Id. at ¶47. However, in November 2016 his printer began rejecting the third-party ink cartridges and refills. When Andrews inserted a new third-party ink cartridge, the printer showed an error code and would not print. Andrews "later learned that HP, th[r]ough his computer, had forced a firmware modification **[**7]** that [] froze his printer and prevented him from using third-party ink cartridges." Id. at ¶49. Andrews never permitted HP to modify his printer's firmware. Andrews "had to buy new HP-branded ink cartridges at a considerably higher price than he paid for the non-HP cartridges" to get his printer to work again. Id. at ¶51. Andrews alleges that he relied to his detriment on "HP's material representations and omissions that he would be able to buy third-party ink cartridges and use them in his printer." Id. at ¶52. Andrews would not have bought the HP printer if he had known that "HP's representations were false or that HP would forcibly control and modify his printer." Id. at ¶53.

Plaintiffs collectively allege that HP's firmware update changed the communication protocol between HP printers and microchips located in both HP-branded ink cartridges and third-party cartridges so that certain varieties of third-party inkjet cartridge microchips, including those manufactured and distributed by Apex Microelectronics and Static Control Components, could no longer communicate with the HP printer. Id. at ¶¶80-82. The firmware blocked ink cartridges containing these chips from functioning in an **[**8]** HP printer. Id. Plaintiffs allege that this type of conduct, which HP refers to as "dynamic security," "has disrupted the marketplace in the inkjet cartridge and refill market, by systematically disabling technology lawfully reengineered by third-party makers who sell their products in the same market as HP." Id. at ¶¶82-83. Plaintiffs allege that the firmware updates have rendered third-party products obsolete with the click of a button, harmed competition, and caused consumers to pay more for HP products. Id. at ¶83.

Plaintiffs allege that HP's conduct in disabling printers prompted a flurry of complaints and criticisms from consumers, advocacy groups, and others. Id. at ¶88. In response, on September 28, 2016, Jon Flaxman, the Chief Operating Officer of HP, issued a public statement, which said: "We should have done a better job of communicating about the authentication procedure to customers, and we apologize. . . . Again, to our loyal customers who were affected, we apologize." Id. at ¶89. On October 12, 2016, HP notified customers "regarding an optional firmware update that customers could download." Id. at ¶91. Plaintiffs allege, however, that HP's notice of this remedial update **[**9]** did not fully and clearly disclose which printers and ink cartridges its firmware update impaired. Id. at ¶92. Plaintiffs also allege that HP has failed to adequately make Plaintiffs and class members aware that an update purporting to reverse the printer disablement is available. Id. at ¶93. "Unlike the printer-disabling firmware update that HP installed remotely, its remedial update is not automatic. It is available only as an optional download." Id. at ¶94. Plaintiffs allege that ordinary consumers "had no way of learning about HP's remedial update because HP buried its notice of this update on its website, with very limited notice to consumers." Id. at ¶97. Moreover, Plaintiffs allege that the remedial **[*1083]** update is inadequate to restore printer functionality. Id. at ¶99.

HP's warranty for the printers identified in the complaint ("Class Printers")[4] provides: "The use of a non-HP or refilled cartridge does not affect either the HP Limited Warranty to the end-user customer or any HP support contract with the end-user customer for the printer." Id. at ¶102. Plaintiffs allege that this language "reinforced consumers' ordinary custom, expectation and practice of printing documents with Class **[**10]** Printers using compatible non-HP ink cartridges." Id.

Based upon the foregoing allegations, Plaintiffs seek to represent the following Class and Subclasses (unless otherwise specified, the "Class"): all persons in California who own a Class Printer (the "Injunctive Relief Class"); all persons in the United States who purchased a Class Printer and experienced a print failure while using a non-HP aftermarket cartridge during the period between March 1, 2015 and December 31, 2017 (the "Disablement Class"); all persons in Texas who purchased or owned one or more Class Printers (the "Texas Subclass"); all persons in Washington who purchased or owned one or more Class Printers (the "Washington Subclass"); and all persons in New Jersey who purchased or owned one or more Class Printers (the "New Jersey Subclass"). Id. at ¶105. Plaintiffs assert claims for (1) unfair and unlawful business practices in violation of the *Unfair Competition Law ("UCL"), Cal. Bus. & Prof. Code §17200, et seq.*, on behalf of the Injunctive Relief Class; (2) fraudulent business practices in violation of the UCL on behalf of the Class; (3) violation of the *False Advertising Law ("FAL"), Cal. Bus. & Prof. Code §17500, et seq.*, on behalf of the Class; (4) violation of the **[**11]** *Consumer Legal Remedies Act ("CLRA"), Cal. Civ. Code §1750, et seq.*, on behalf of the Class; (5) violations of the *Texas Deceptive Trade Practices — Consumer Protection Act, Tex. Bus. & Com. Code Ann. §17.01, et seq.*, on behalf of the Texas Subclass; (6) violations of the *Washington Consumer Protection Act, Wash. Rev. Code Ann. §19.86.010 et seq.*, on behalf of the Washington Subclass; (7) violations of the *New Jersey Consumer Fraud Act, New Jersey Statutes Ann. 56:8-1, et seq.*, on behalf of the New Jersey Subclass; (8) violation of the *Computer Fraud and Abuse Act ("CFAA"), 18 U.S.C. §1030, et seq.*, on behalf of the Disablement Class; (9) violation of the *California Computer Crime Law, Cal. Penal Code §502*, on behalf of the California Subclass; (10) trespass to chattels; and (11) tortious interference with contractual relations and/or prospective economic advantage on behalf of the Class.

III. STANDARDS

A motion to dismiss under *Rule 12(b)(6)* tests the legal sufficiency of claims alleged in the complaint. *Fed.R.Civ.P. 12(b)(6)*; *Parks School of Business, Inc. v. Symington, 51 F.3d 1480, 1484 (9th Cir. 1995)*. The complaint "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. When deciding whether to grant a motion to dismiss, the court must construe the alleged facts in the light most favorable to the plaintiff. See *Retail Prop. Trust v. United Bhd. of Carpenters & Joiners of Am., 768 F.3d 938, 945 (9th Cir. 2014)* (providing the court must "draw all reasonable inferences in favor of the nonmoving **[*1084]** party" for a *Rule 12(b)(6)* motion). However, "courts **[**12]** are not bound to accept as true a legal conclusion couched as a factual allegation." *Iqbal, 556 U.S. at 678*. Dismissal "is proper only where there is no cognizable legal theory or an absence of sufficient facts alleged to support a cognizable legal theory." *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*.

Consumer-protection claims that sound in fraud are subject to the heightened pleading requirements of *Fed.R.Civ.P. 9(b)*. *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1102 (9th Cir. 2003)*; see also *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)*; In re Apple and AT&T iPad Unlimited Data Plan Litigation, *802 F.Supp.2d, 1070, 1075 (N.D. Cal. 2011)* (*Rule 9(b)* applies to claims under the UCL and FAL). *Rule 9(b)* requires that "a party must state with particularity the circumstances constituting fraud. . . ." *Fed.R.Civ.P. 9(b)*. The circumstances constituting the fraud must be "specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985)*. Therefore, a

---

[4] See Complaint at ¶63 for complete list of Class Printers.

party alleging fraud must set forth "the who, what, when, where, and how" of the misconduct. *Vess, 317 F.3d at 1106* (quoting *Cooper v. Pickett, 137 F.3d 616, 627 (9th Cir. 1997))*.

IV. DISCUSSION

HP moves to dismiss all of Plaintiffs' claims, asserting that HP is not under any legal duty to make its printers compatible with third-party ink cartridges. HP reasons that all of Plaintiffs' claims start from the underlying and deficient premise that HP had some duty to **[**13]** make its printers compatible with third-party ink cartridges, even those using cloned and infringing security chips affected by the authentication procedure in HP's firmware. HP asserts that it was under no such legal obligation, did not make any such representations and did nothing unlawful.

A. Computer Intrusion Claims

HP contends that all claims premised on computer intrusion should be dismissed with prejudice because Plaintiffs do not allege and cannot allege that HP accessed any computer without authorization. In response, Plaintiffs contend that "[t]o the extent HP had any authorized access to Plaintiffs' printers, HP exceeded that access . . . when it froze them." Plaintiffs' Opposition at 21:22-24.

1. Violation of the CFAA (Claim 8)

The CFAA is a federal criminal statute that also authorizes civil actions for any person who suffers damage or loss by reason of a violation of the statute. *18 U.S.C. §1030(g)*. "The CFAA prohibits a number of different computer crimes, the majority of which involve accessing computers without authorization or in excess of authorization, and then taking specified forbidden actions, ranging from obtaining information to damaging a computer or computer data." *LVRC Holdings LLC v. Brekka, 581 F.3d 1127, 1135 (9th Cir. 2009)* **[**14]** (citing *18 U.S.C. 1030(a)(1)-(7) (2004)*).

Plaintiffs allege that HP violated *§1030(a)(5)(A) through (C)*, which create liability for whoever:

> (5)(A) knowingly causes the transmission of a program, information, code, or command, and as a result of such conduct, intentionally causes damage without authorization, to a protected computer;
>
> (B) intentionally accesses a protected computer without authorization, and as a **[*1085]** result of such conduct, recklessly causes damage; or
>
> (C) intentionally accesses a protected computer without authorization, and as a result of such conduct, causes damage and loss.

18 U.S.C. §1030(a)(5)(A)-(C). The term "without authorization" has been interpreted to mean "when the person has not received permission to use the computer for any purpose (such as when a hacker accesses someone's computer without any permission)" or when the [computer owner] has rescinded permission to access the computer and the defendant uses the computer anyway." *Brekka, 581 F.3d at 1135*; see *Facebook, Inc. v. Power Ventures, Inc., 844 F.3d 1058, 1066 (9th Cir. 2016)* (same).

Subsections (B) and *(C)* are inapplicable in light of Plaintiffs' admission in the Complaint that HP had "authorized access" to Plaintiffs' printers. See Complaint at ¶¶208 (HP "exceeded its authorized access"); see also id. at ¶62 (HP can communicate with HP printers after it sells them by updating their firmware), and 82-83 (describing **[**15]** HP firmware updates). Nevertheless, Plaintiffs contend that they may proceed with their claim based upon allegations that HP "exceeded" its authorized access. Plaintiffs' Opposition at 21:22-25. Plaintiffs allege that HP neither sought nor obtained Plaintiffs' consent to access their printers to install the firmware update; HP did not notify Plaintiffs that it planned to "push" this update; Plaintiffs reasonably expected that HP was not entitled to disable their working printers; HP purposely concealed that it had accessed the printers to install disabling firmware; HP displayed false error messages; the firmware update was executed not for cyber-security reasons, but to suppress competition and limit consumer choice in the aftermarket for ink; and the firmware update intercepted and altered the communication protocol between the printers and their ink cartridges to cause these products to fail. Id. at 21:10 20.

Subsections (B) and *(C)* cannot reasonably be expanded in the manner proposed by Plaintiffs to encompass HP's alleged conduct that "exceeded authorized access." Plaintiffs' proposed expansion would be not only contrary to the plain language of *subsections (B)* and *(C)*, but also inconsistent with other provisions **[**16]** of the CFAA that expressly provide for liability when a defendant "accesses a computer without authorization *or* exceeds authorized access." *18 U.S.C. §1030(a)(2)*; see also *(a)(1)*, *(4)*, *7(B)*.[5] Furthermore, Plaintiffs' proposed expansion is inconsistent with the Congressional intent behind the CFAA. "Congress enacted the CFAA in 1984 primarily to address the growing problem of computer hacking, recognizing that '[i]n intentionally trespassing into someone else's computer files, the offender obtains at the very least information as to how to break into that computer system.'" *U.S. v. Nosal, 676 F.3d 854, 858 (9th Cir. 2012)* (en banc). The CFAA should be interpreted in a manner that "maintains the CFAA's focus on hacking rather than turning it into a sweeping Internet-policing mandate." Id. Because Plaintiffs have not alleged facts to show HP accessed their printer "without authorization," the CFAA claim is dismissed to the extent it is based on *subsections (B)* and *(C)*.

To the extent Plaintiffs' CFAA claim is based upon *subsection (A)*, the claim is cognizable because *subsection (A)* **[*1086]** does not require accessing a computer "without authorization." Instead, *subsection (A)* provides liability for "knowingly caus[ing] the transmission of a program, information, code or command, and as a result of such conduct, intentionally **[**17]** caus[ing] damage without authorization, to a protected computer." *18 U.S.C. §1030(a)(5)(A)*. Plaintiffs allege that HP knowingly transmitted the firmware update and intentionally caused damage. Plaintiffs further allege that they did not consent to installation of disabling firmware. At the pleading stage, these allegations are sufficient. See *In re Apple & AT & TM Antitrust Litigation, 596 F.Supp.2d 1288 (N.D. Cal. 2008)* (plaintiffs alleged they authorized software update, not that they authorized damages to their iPhones).

2. *California Penal Code §502* (Claim 9)

The *California Penal Code §502* imposes liability on a person who commits certain "acts" that constitute a public offense. *Penal Code §502(c)*. Plaintiffs allege that HP violated *§502(c)(1) through (c)(5)*, *(c)(7)* and *(c)(8)*, which impose liability on any person who:

> (1) Knowingly accesses and without permission alters, damages, deletes, destroys, or otherwise uses any data, computer, computer system, or computer network in order to either (A) devise or execute any scheme or artifice to defraud, deceive, or extort, or (B) wrongfully control or obtain money, property, or data.
>
> (2) Knowingly accesses and without permission takes, copies, or makes use of any data from a computer, computer system, or computer network, or takes or copies any supporting documentation, whether existing or residing internal or external to a computer, **[**18]** computer system, or computer network.
> (3) Knowingly and without permission uses or causes to be used computer services.
> (4) Knowingly accesses and without permission adds, alters, damages, deletes, or destroys any data, computer software, or computer programs which reside or exist internal or external to a computer, computer system, or computer network.
> (5) Knowingly and without permission disrupts or causes the disruption of computer services or denies or causes the denial of computer services to an authorized user of a computer, computer system, or computer network.
> * * *

---

[5] The phrase "exceeds authorized access" is statutorily defined to mean "to access a computer with authorization and to use such access to obtain or alter information in the computer that the accesser is not entitled so to obtain or alter." *18 U.S.C. §1030(e)(6)*.

> (7) Knowingly and without permission accesses or causes to be accessed any computer, computer system, or computer network.
>
> (8) Knowingly introduces any computer contaminant into any computer, computer system, or computer network.

Cal. Penal Code 502(c)(1)-(5), *(7)-(8)*.

HP contends that the *§502* claim must be dismissed in its entirety because HP had authorized access to Plaintiffs' printers and because Plaintiffs plead only threadbare legal conclusions unsupported by facts. Plaintiffs counter that *§502* does not require unauthorized access, only knowing access.

The Ninth Circuit has held that *§502* is "different" from the CFAA. *United States v. Christensen, 801 F.3d 970, 994 (2015)* (emphasis in original). "In contrast to the **[**19]** CFAA, the California statute does not require *unauthorized* access. It merely requires *knowing* access." Id. Despite this seemingly clear holding, HP relies upon language in the Ninth Circuit's Facebook decision, supra, that appears to create a contradiction: "because [defendant] had implied authorization to access Facebook's **[*1087]** computers, it did not . . . violate the statute." Seizing upon this statement, HP argues that it had authorization to access Plaintiffs' computers and therefore Plaintiffs' *Section 502* claim is similarly not cognizable, without consideration of the specific offenses that HP allegedly committed. A review of the underlying facts in Facebook is required to provide context for the Ninth Circuit's statement.

In Facebook, the defendant Power Ventures ("Power") caused a message to be transmitted to its user's friends within the Facebook system. In analyzing the CFAA claim predicated on *§1030(a)(2)(C)*[6] the Ninth Circuit determined that Power's users arguably gave Power permission to use Facebook's computers to disseminate messages, and that Power reasonably could have thought that consent from Facebook users was permission for Power to access Facebook's computers. The Ninth Circuit held in pertinent **[**20]** part that "[b]ecause Power had at least arguable permission to access Facebook's computers, [Power] did not initially access Facebook's computers 'without authorization' within the meaning of the CFAA." *Facebook, 844 F.3d at 1067*. After Power's initial access to Facebook's computers, Facebook issued a written cease and desist letter to Power. The Ninth Circuit held that after receiving the case and desist letter, Power's access of Facebook's computers was "without authorization" in violation of the CFAA. Turning to the *§502(c)(2)* claim, the Ninth Circuit acknowledged that *§502* was different from the CFAA insofar as *§502* did not require unauthorized access. *Facebook, 844 F.3d at 1069* (quoting *Christensen, supra*). The Ninth Circuit held that Power did not violate *§502* when it initially accessed Facebook's computers, reasoning as follows:

> But despite the differences in wording, the analysis of both statutes is similar in the present case. Because Power had implied authorization to access Facebook's computers, it did not, at first, violate the statute. But when Facebook sent the cease and desist letter, Power, as it conceded, knew that it no longer had permission to access Facebook's computers at all. Power, therefore, knowingly accessed and without permission took, copied, and made use of Facebook's **[**21]** data. Accordingly, we affirm in part the district court's holding that Power violated *section 502*.

Id. Placed in context, it is implicit in the Ninth Circuit's determination above that Power's "implied authorization" meant Power had "permission" to take, copy and make use of Facebook's data, and that therefore, Power "did not, at first, violate the statute." Id. The Ninth Circuit's determination cannot reasonably be construed, as HP suggests, to preclude any and all liability under *§502* whenever there is authorization to access. This is so because the Ninth Circuit clearly stated that *§502* "does not require *unauthorized* access. It merely requires *knowing* access." Id. (emphasis in original). Rather, whether there is liability under *§502* requires an analysis of the specific "acts" that are alleged to constitute an offense and whether there was "permission" to engage in those acts.

As for the substance of the various alleged *§502* violations, Plaintiffs' allegations are sufficient to state a plausible claim for violation of *subsection (c)(1)* based, at a minimum, upon the allegedly false error message stating that

---

[6] This subsection creates liability for whoever "intentionally accesses a computer without authorization or exceeds authorized access, and thereby obtains . . . information from any protected computer." *18 U.S.C. §1030(a)(2)(C)*.

existing ink cartridges in the printers were "damaged **[*1088]** or missing" and should be replaced. Plaintiffs also state a viable **[**22]** claim for violations of *subsections (c)(4)* and *(c)(5)* based upon the alleged alteration and disruption caused by the firmware update to a "computer network," which is statutorily defined to include, among other things, "printers connected by telecommunication facilities." Penal Code *§502(b)(2)*. HP contends that *§502* is meant to impose liability for hacking, not firmware, and urges the Court to interpret the statute narrowly. See *Leocal v. Ashcroft, 543 U.S. 1, 11 n.8, 125 S. Ct. 377, 160 L. Ed. 2d 271 (2004)* (discussing rule of lenity to resolve ambiguity in criminal statute in petitioner's favor); see also *People v. Davis, 29 Cal.3d 814, 828, 176 Cal. Rptr. 521, 633 P.2d 186 (1981)* (setting forth principles of statutory interpretation). Although HP's contention has considerable merit, the language of *subsections (c)(1)*, *(c)(4)* and *(c)(5)* does not necessarily foreclose Plaintiffs' theories of liability, at least at the pleading stage.

Plaintiffs do not allege sufficient facts to state a claim for violations of *subsections (c)(2)-(3)* and *(8)*. The alleged violation of *subsection (c)(7)* also fails because Plaintiffs acknowledge that HP had permission to access their printers. The *§502* claim is accordingly dismissed to the extent it is based upon *subsections (c)(2)*, *(c)(3)*, *(c)(7)* and *(c)(8)*.

3. Trespass to Chattels (Claim 10)

"The essence of the cause of action for trespass is an 'unauthorized entry' onto the land of another." *Miller v. Nat'l Broad. Co., 187 Cal.App.3d 1463, 1480, 232 Cal. Rptr. 668 (1986)* (citations omitted). The California Supreme Court has held that **[**23]** the principles underlying the tort apply to allegations of digital trespass. *Intel Corp. v. Hamidi, 30 Cal.4th 1342, 1 Cal. Rptr. 3d 32, 71 P.3d 296 (2003)*. "[T]o prevail on a claim for trespass based on accessing a computer system, the plaintiff must establish: (1) defendant intentionally and without authorization interfered with plaintiff's possessory interest in the computer system; and (2) defendant's unauthorized use proximately resulted in damage to plaintiff." eBay, *Inc. v. Bidder's Edge, Inc., 100 F.Supp.2d 1058, 1069-70 (N.D. Cal. 2000)*.

Plaintiffs' trespass allegations mirror those relating to its CFAA claim. Plaintiffs allege that HP exceeded its authorized access to Plaintiffs' printers when it activated a firmware update that disabled their printers. Complaint at ¶208. The firmware allegedly disabled Plaintiffs' printers and rendered their non-HP ink cartridges unusable. Id. at ¶226. Plaintiffs further allege that HP's conduct caused damage by preventing the class printers from operating, impairing the condition of the printers, reducing the value of the printers, and depriving Plaintiffs of the use of the printers and of their non-HP ink cartridges for a substantial period of time. Id. at ¶227. These allegations are sufficient to state a claim for digital trespass incident to a software download. See *In re Apple & AT & MT Antitrust Litigation, 596 F.Supp.2d at 1307* (consent limited **[**24]** to installation of software update did not foreclose trespass claim); see also eBay, *100 F.Supp.2d at 1070* (trespass claim cognizable because even if defendant's web crawlers were authorized to use eBay's system, the web crawlers exceeded the scope of any such consent when they began acting like robots by making repeated queries).

B. California Consumer Protection Claims

HP contends that each of Plaintiffs' California consumer protection claims fails to state a plausible claim and should be dismissed.

[*1089] 1. Claims 1-4: FAL, CLRA and UCL "fraudulent" prong Claims

Plaintiffs allege that HP made misrepresentations and omissions about the compatibility of third-party ink cartridges with their printers in violation of the FAL, the CLRA, and the "fraudulent" prong of the UCL. HP contends the claims should be dismissed as to San Miguel, Lawty, Faust and Ware because they do not allege that they were affirmatively misled. HP also contends that the claims should be dismissed as to Andrews for failure to plead fraud with particularity.

a. Allegedly Fraudulent Misrepresentations On Printer Box

Plaintiffs San Miguel, Lawty, Faust and Ware do not identify any HP representation that they saw or relied upon when purchasing their **[**25]** printers. Their Claims 1 through 4 are accordingly dismissed to the extent they are predicated upon alleged misrepresentations on HP's printer box.

Plaintiff Andrews alleges that "HP represented on the product box that the printer used [901 and 61 ink cartridges]" and that the "901 and 61 labels are generic part numbers for cartridges that are compatible . . . with his printer." Complaint at ¶44. Andrews' allegations are insufficient to comply with *Rule 9(b), Fed.R.Civ.P.* Andrews does not identify any statement on the box that would lead a reasonable consumer to believe the numbers on the product box are generic part numbers. Moreover, Andrews acknowledges that the printer box states "HP Original Ink." Plaintiffs' Opposition at 19:16-20. Andrews nevertheless contends that a reasonable consumer would be misled because "HP Original Ink" appears in much smaller type than the model numbers and a reasonable consumer would interpret "HP Original Ink" as promoting HP ink over generic ink. Id. at 19:17-20. It defies common sense to claim that the statement "HP Original Ink" misrepresents compatibility with non-HP ink simply because the statement appears in smaller type. Although it is theoretically possible that **[**26]** a consumer might construe the statement as Andrews contends, "[a] representation does not become 'false and deceptive' merely because it will be unreasonably misunderstood by an insignificant and unrepresentative segment of the class of persons to whom the representation is addressed." *Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1162 (9th Cir. 2012)* (quoting *Lavie v. Procter & Gamble Co., 105 Cal. App. 4th 496, 129 Cal.Rptr.2d 486, 494 (2003)*; *Werbel ex rel. v. Pepsico, Inc., No. 09-4456 SBA, 2010 U.S. Dist. LEXIS 76289, 2010 WL 2673860, at *3 (N.D. Cal. July 2, 2010)*. Andrews' Claims 1through 4 are dismissed to the extent they are predicated upon alleged misrepresentations on the printer box.

b. Allegedly Fraudulent Misrepresentations inside HP Printer Box

Plaintiffs next contend that "HP's deception continued with statements inside the box. The printer card urged people to 'Say it best with HP ink.' [citation omitted] and the warranty booklet provided that a printer would remain under warranty even if fitted with 'a non-HP or refilled cartridge.'" Plaintiffs' Opposition at 19:20-23. Plaintiffs contend that "it defies logic that HP would make these statements and advertise its own ink, unless the consumer was free to use competing ink." Id. at 19:23-24. Plaintiffs acknowledge, however, that they were not "exposed" to the card and warranty until after they bought **[**27]** their printers. They do not allege that they read or relied upon these statements when making either their printer purchases or ink cartridge purchases. Therefore the statements inside HP's printer box do not provide **[*1090]** a basis for Plaintiffs' fraudulent misrepresentation claims.

c. Allegedly Fraudulent Misrepresentations in "Error Messages"

Plaintiffs also allege (in their UCL claim) that the "error messages" displayed on their printers were false and misleading. Specifically, Plaintiffs allege that the "error messages" misrepresented that the printer failure resulted from missing or damaged ink or from an undefined printer problem. HP contends the "error messages" cannot support a UCL fraud claim because they did not cause an independent economic injury. Plaintiffs' Complaint, however, includes allegations that they were induced to spend money on new replacement cartridges or a new printer. See Complaint at ¶¶21, 42, 51. At the pleading stage, Plaintiffs' allegations of economic injury are sufficient.

d. Allegedly Fraudulent Omissions

Plaintiffs assert violations of the UCL, FAL and CLRA based upon an alleged failure to disclose theory. Plaintiffs allege that HP concealed its intent to **[**28]** preclude the use of compatible third-party ink cartridges and to disable Class Printers containing them. HP contends that the failure to disclose theory is not legally viable because in the absence of an affirmative misrepresentation, only omissions regarding a physical injury or safety concerns are actionable. Plaintiffs argue that HP's position is based on a misreading of California law. Plaintiffs' Opposition at 17:8. Relying on *Rutledge v. Hewlett-Packard Co., 238 Cal.App.4th 1164, 190 Cal. Rptr. 3d 411 (2015)*, Plaintiffs contend that they are not required to allege that HP's concealment related to product safety for it to be material and actionable under California law. Plaintiffs' Opposition at 18:3-4.

A plaintiff may base a UCL claim on an alleged omission, "[but] to be actionable the omission must be contrary to a representation actually made by the defendant, or an omission of a fact that the defendant was obliged to disclose." *Sud v. Costco Wholesale Corp., 229 F.Supp.3d 1075, 1085 (N.D. Cal. 2017)* (quoting *Daugherty v. Am. Honda Motor Co., 144 Cal.App.4th 824, 835, 51 Cal. Rptr. 3d 118 (2006))*; see also *Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1141 (9th Cir. 2012)* (fraudulent omission concerning latent defect not actionable unless the omission is contrary to a representation actually made or an omission of fact the defendant was obliged to disclose); *McCoy v. Nestle USA, Inc., 173 F.Supp.3d 954, 965 (N.D. Cal. 2016)* ("[T]o be actionable the omission must be contrary to a representation actually made by the defendant, or an omission of **[**29]** a fact the defendant was obliged to disclose.")

As stated previously, Plaintiffs allege that the "error messages" misrepresented that the printer failure resulted from missing or damaged ink or from an undefined printer problem. The alleged omission, that HP intentionally used a firmware update to disable printers that were using non-HP ink cartridges, is arguably contrary to the explanations for the printer failure stated in the "error messages." At the pleadings stage, Plaintiffs' allegations are sufficient to state fraud by omission under the FAL, CLRA and the UCL.

2. "Unfair" Business Practices Under the UCL (Claim 1)

The UCL does not define the term "unfair" and the California Supreme Court has not established a definitive test to determine whether a business practice is unfair in the context of consumer cases such as this one. *Wahl v. Yahoo! Inc., No. 17-2745 BLF, 2017 U.S. Dist. LEXIS 150403, 2017 WL 4098884, at *2 (N.D. Cal. Sept. 15, 2017)*. Nevertheless, **[*1091]** three separate tests have emerged from the California Courts of Appeal that provide guidance on the issue. The first test requires that the public policy underlying the claim "must be tethered to specific constitutional, statutory or regulatory provisions." **[**30]** *Drum v. San Fernando Valley Bar Assn., 182 Cal. App. 4th 247, 257, 106 Cal. Rptr. 3d 46 (2010)*. Under the second test, referred to as the "balancing test," courts analyze whether the alleged business practice is "immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers" and "weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim." *Wahl supra, 2017 U.S. Dist. LEXIS 150403, [WL] at *2* (quoting *Drum, supra, at 257*); see also *South Bay Chevrolet v. Gen. Motors Acceptance Corp., 85 Cal. Rptr. 2d 301, 72 Cal.App.4th 861 (1999)*. The third test, which draws on the definition of "unfair" in *section 5* of the *Federal Trade Commission Act* (*15 U.S.C. §45, subd. (n)*), requires that "(1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided" ("*section 5* test"). *Drum, supra, at 257*. The Ninth Circuit, however, has expressly rejected the *section 5* test for consumer actions in the absence of a clear holding from the California Supreme Court. *Lozano v. AT&T Wireless Servs., Inc., 504 F.3d 718, 736 (9th Cir. 2007)*.

a. Tethering Test

HP contends that the UCL claim for "unfair" business practices does not satisfy the "tethering test" set forth in *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. In Cel-Tech, the California Supreme Court held that in actions by a competitor alleging anticompetitive practices the word "unfair" means "conduct **[**31]** that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Id. at 187* & n.12.

Plaintiffs allege that HP engaged in unfair methods of competition and unfair trade practices that violate the UCL in at least the following respects:

(a) With the intent and effect of stifling open and vigorous competition in the market for printer cartridges, HP devised and executed a material change to printers it had sold.

(b) HP intentionally caused HP printers to stop functioning upon detection of cartridges manufactured by HP's competitors.

(c) HP conditioned the operations of HP printers on their owners' purchases of HP products in another product market.

(d) HP tied HP printers' functionality to their owners' purchases of HP cartridges even though HP's Warranty expressly contemplates that printer owners may, will, and do replace depleted printer cartridges with cartridges not made or sold by HP.

(e) HP rendered printers it had sold inoperable without prior notice to their owners.

(f) HP printers remain inoperable as a result **[**32]** of HP's conduct unless their owners purchase and install cartridges made and sold by HP.

(g) By forcing Plaintiffs and Class members to purchase HP-branded ink cartridges to regain a working printer, **[*1092]** HP has obtained an unfair advantage in the marketplace and hindered competition for third-party ink cartridges.

(h) By rendering the use of third-party ink cartridges in Class Printers obsolete, HP, through its firmware update, has unfairly usurped the business of third-party ink sellers and required Plaintiff and Class members to pay around three to six times more for replacement ink cartridges than they otherwise would have paid.

(i) To induce purchases of HP cartridges, HP provided misleading written messages on the screens of all of the failed Class Printers directing their owners to replace non-HP cartridges that, in fact, still contained ink and, but for HP's conduct would function in an ordinary manner.

(j) HP's conduct was designed to increase and maintain its share of the printer cartridge market due to conditions separate from competitive factors like pricing and quality of goods.

Complaint at ¶118.

The laundry list of alleged misconduct is insufficient to satisfy the *Cel-Tech* test. **[**33]** Plaintiffs do not identify which constitutional, regulatory or statutory provision to which the allegations are tethered. Instead, Plaintiffs allege generally that HP's "unfair methods of competition and unfair acts and practices are contrary to California law and policy" and that HP's conduct "contravenes the legislatively declared policy against unfair methods of business competition." Complaint at ¶117. These allegations are too vague. See also *Palmer v. Apple Inc., No. 15-5808 RMW, 2016 U.S. Dist. LEXIS 51823, 2016 WL 1535087, at *7 (N.D. Cal. Apr. 15, 2016)* (allegation that defendant offended the "public policy in support of truth in advertising" insufficient to support UCL claim); *Campos v. Bank of Am., Inc., No. 11-431 SBA, 2012 U.S. Dist. LEXIS 96258, 2012 WL 2862603, at *9 (N.D. Cal. July 11, 2012)* (public policy in favor of home ownership insufficient to support UCL claim).

Plaintiffs argue that they have stated a UCL claim under the "unfair" prong because they have adequately pled "the central facts that characterize BP's anticompetitive behavior." Plaintiffs' Opposition at 11:9-10. Plaintiffs' position is not supported by any legal authority and inconsistent with the well-established *Cel-Tech* requirement to tether UCL claims under **[**34]** the "unfair" prong to specific constitutional, statutory or regulatory provisions. Plaintiffs next contend that they need not allege that BP's conduct violates the Cartwright Act. Although there is some merit to Plaintiffs' argument[7] Plaintiffs' allegations are nevertheless insufficient because they largely consist of legal

---

[7] See e.g. *Creative Mobile Technologies, LLC v. Flywheel Software, Inc., No. 16-2560 SI, 2016 U.S. Dist. LEXIS 138549, 2016 WL 5815311, at *5 (N.D. Cal. Oct. 5, 2016)* (UCL claim not barred just because it does not currently meet the standards for a claim under the *Cartwright Act*); *Imperial Irrigation District v. California Independent System Operator Corp., No. 15-1576 AJB, 2016 U.S. Dist. LEXIS 101258, 2016 WL 4087302, at *12 (S. D. Cal. Aug. 1, 2016)* (allegations of monopolistic conduct that

conclusions. See *Eclectic Props. East, LLC v. Marcus & Millichap Co., 751 F.3d 990, 996 (9th Cir. 2014)* (allegations that are no more than legal conclusions are not entitled to an assumption of truth). For example, Plaintiffs allege a "market for printer cartridges," without alleging any facts regarding this market. Plaintiffs also do not allege facts to show how HP caused anticompetitive impact on that **[*1093]** market. Generalized allegations of harm do not satisfy Cel-Tech's requirement that the effect of a defendant's conduct amounts to a violation of antitrust laws "or otherwise significantly threatens or harms competition." See *Levitt v. Yelp! Inc., 765 F.3d 1123, 1136-7 (9th Cir. 2014)*.

The cases relied upon by Plaintiffs are distinguishable. Plaintiffs cite to *Atlantic Refining Co. v. F.T.C., 381 U.S. 357, 85 S. Ct. 1498, 14 L. Ed. 2d 443 (1965)* and *F.T.C. v. Texaco, Inc., 393 U.S. 223, 89 S. Ct. 429, 21 L. Ed. 2d 394 (1968)*, but these are FTC cases, not UCL cases. **[**35]** Plaintiffs also cite to *State Farm Mut. Auto. Ins. Co. v. Dempster, 174 Cal.App.2d 418, 344 P.2d 821 (Ct. App. 1959)*, which is a contract and trade secrets case, not a UCL case. Plaintiffs' last citation is to *Northwest Power Prod., Inc. v. Omark Indus., Inc., 576 F.2d 83, 88 (5th Cir. 1978)*, a *Sherman Act* case, and is also not on point. In sum, Plaintiffs' allegations are insufficient to satisfy the "tethering" test.

b. "Balancing" Test

HP contends that Plaintiffs' Complaint fails to state facts explaining how and why the "balancing test" is satisfied. In response, Plaintiffs contend that HP's firmware update was unscrupulous and harmful for the same reasons the firmware update was allegedly unfair. Among other things, Plaintiffs allege that HP, without notice to Plaintiffs, rendered their printers inoperable by executing a remote firmware update and displayed messages on printer screens stating: "There is a problem with the printer or ink system. Turn printer off, then on. If problem persists, contact HP."

When construed in a light most favorable to Plaintiffs, these allegations raise a reasonable inference that HP knowingly and purposefully rendered the printers inoperable and sent error messages that intentionally misled Plaintiffs into believing their printers or ink systems were malfunctioning for reasons unknown to HP, when HP knew and intended for **[**36]** its firmware update to render their printers inoperable. Plaintiffs allege that there were reasonably available alternatives to HP's allegedly unfair conduct and provide examples of alternatives in their Opposition brief: instead of disabling printers, HP could have created incentives for customers to use HP cartridges, disclosed any risks from using competing cartridges, or demanded that any manufacturers of counterfeit ink cartridges stop selling such products. Plaintiffs' Opposition at 7:8-12. These alternatives, however, are not set forth in the Complaint and will not be considered. See *Broam v. Bogan, 320 F.3d 1023, 1026 n.2 (9th Cir. 2003)*. In the absence of factual allegations regarding HP's alternatives, Plaintiffs' UCL claim does not satisfy the "balancing" test.

3. "Unlawful" Business Practices Under the UCL

For purposes of the UCL, "unlawful" practices are those forbidden by law. *Saunders v. Super. Ct., 27 Cal.App.4th 832, 838, 33 Cal. Rptr. 2d 438 (1994)*. Plaintiffs allege that BP's conduct violates the FAL, the CLRA, the CFAA and the California Computer Crime Law. Plaintiffs' UCL unlawful claim is viable because the complaint states at least one theory of liability under each of these statutes.

C. Plaintiff San Miguel's Texas Consumer Protection Claim (Claim 5)

---

threatens competition sufficient to state unfair UCL claim, even though plaintiff failed to allege antitrust violation). But see *Manwin Licensing Int'l S.A.R.L. v. ICM Registry, LLC, No. 11-9514 PSG, 2013 U.S. Dist. LEXIS 201816, 2013 WL 12123772, at *8 (C.D. Cal. Feb. 26, 2013)* ("Where a party's UCL allegations [under the 'unfair' prong] are based [solely] on alleged antitrust violations, the failure to allege an antitrust violation results in the failure to allege unfair competition.").

Plaintiff San Miguel alleges that HP violated **[**37]** the *Texas Deceptive Trade Practices-Consumer Protection Act (Tex. Bus. & Com. Code Ann. §17.01, et seq.)*. The Court's analysis of the California state law claims applies equally to the Texas consumer protection claim and will not be **[*1094]** restated herein. Moreover, San Miguel has failed to give HP notice of this claim prior to filing suit as required by *§17.505(a)*. Accordingly, Claim 5 is dismissed with leave to amend.

D. Plaintiff Lawty's Washington Consumer Protection Act Claim (Claim 6)

Plaintiff Lawty asserts a claim under the *Washington Consumer Protection Act (Wash. Rev. Code Ann. §19.86.010, et seq.)*. The Court's analysis of the UCL claim applies to Lawty's Washington consumer protection claim. Claim 6 is dismissed with leave to amend.

E. Plaintiff Ware's New Jersey Consumer Fraud Act Claim (Claim 7)

Plaintiff Ware asserts a claim under the *New Jersey Consumer Fraud Act (N.J. Stat. Ann. §56:8-1, et seq.)*. The Court's analysis of the UCL, FAL and CLRA claims applies to Ware's New Jersey consumer fraud claim. Claim 7 is dismissed with leave to amend.

F. Tortious Interference (Claim 11)

Plaintiffs' last claim is entitled "Tortious Interference with Contractual Relations and/or Prospective Economic Advantage." Complaint at p. 33. HP seeks dismissal of both torts without leave to amend for several reasons, including **[**38]** because neither tort applies to the consumer transaction context.

To state a tortious interference with contract claim, a plaintiff must show: "(1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of the contract; (3) defendant's intentional acts designed to induce breach or disruption of the contract; (4) actual breach or disruption; and (5) resulting damage." *Name.Space, Inc. v. Internet Corp. for Assigned Names and Numbers, 795 F.3d 1124, 1133 (9th Cir. 2015)* (quoting *Family Home & Fin. Ctr., Inc. v. Fed. Home Loan Mortg. Corp., 525 F.3d 822, 825 (9th Cir.2008))*.

Here, Plaintiffs allege that their "sales transactions with third-party suppliers of compatible printer ink cartridges" involved various contractual conditions of sale, such as express and implied warranties, and included an implied warranty that the third-party cartridges Plaintiffs purchased were merchantable and fit for their ordinary use of printing documents. Complaint at ¶230. This generalized allegation is insufficient to allege a valid contract between plaintiff and a third party. *R. Power Biofuels, LLC v. Chemex LLC, No. 16-716 LHK, 2016 U.S. Dist. LEXIS 156727, 2016 WL 6663002, at *16 (N.D. Cal. Nov. 11, 2016)* (allegation that plaintiff "was involved in business and economic relationships with major consumers of biodiesel" insufficient). Although the actual name of the party with whom a plaintiff has a contractual **[**39]** relationship need not be pled, "the plaintiff must allege a relationship with 'a specific, albeit unnamed' third party." Id. (citing *Ramona Manor Convalescent Hosp. v. Care Enterps., 177 Cal.App.3d 1120, 225 Cal. Rptr. 120 (1986))*; c.f. *Moore v. Apple, Inc., 73 F.Supp.3d 1191, 1202 (N.D. Cal. 2014)* (plaintiff identified a valid existing contract with Verizon Wireless and the contractual duty to enable sending and receiving text messages). Nor have Plaintiffs alleged facts to establish the remaining elements of a claim for tortious interference with contractual relations.

Plaintiffs also fail to state a claim for intentional interference with prospective economic advantage. "A tortious interference with prospective economic advantage claim has the same elements (focusing instead on the existence and knowledge of a prospective economic relationship), but **[*1095]** also requires that the defendant's conduct be 'wrongful by some legal measure other than the fact of interference itself.'" *Name.Space, 795 F.3d at 1133* (quoting *Kor. Supply Co. v. Lockheed Martin Corp., 29 Cal.4th 1134, 131 Cal.Rptr.2d 29, 63 P.3d 937, 950 (2003)* (internal quotation marks omitted)). Plaintiffs have not sufficiently alleged the existence and HP's knowledge of any actual prospective business relationship and accordingly, the claim is subject to dismissal.

V. CONCLUSION

For the reasons set forth above, Defendant HP's motion to dismiss is GRANTED IN PART. The following claims are DISMISSED WITH LEAVE TO AMEND: **[**40]** Claim 1 to the extent it is based upon "unfair" business practices; Claims 2 through 4 to the extent the claims are based upon allegedly false or misleading statements on HP's printer box, printer card and warranty booklet; Claims 5 through 7; Claim 8 for violation of the CFAA under *subsections (B)* and *(C)*[8]; Claim 9 to the extent it is based upon *§502 (c)(2)-(3)*; and Claim 11. Claim 9 is DISMISSED WITH PREJUDICE to the extent it is based upon *§502(c)(7)* and *(8)*. HP's motion to dismiss is DENIED in all other respects. Plaintiffs may file and serve an amended complaint consistent with this Order no later than April 13, 2018.

Given the passage of time and the anticipated filing of a second amended complaint, the Court invites the parties to stipulate to an extension of the deadlines set forth in the Case Management Order (Dkt. 79) and the briefing schedule and hearing date for Plaintiffs' motion or class certification, if needed.

IT IS SO ORDERED.

Dated: March 29, 2018

/s/ Edward J. Davila

EDWARD J. DAVILA

United States District Judge

End of Document

[8] Although it is questionable whether Plaintiffs can credibly and within the confines of *Rule 11, Fed.R.Civ.P.*, allege that HP acted "without authorization," Plaintiffs' request for leave to amend is granted.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Standards of Review, De Novo Review**

The court of appeals reviews de novo the district court's dismissal of a complaint for failure to state a claim. In conducting this review, it accepts the factual allegations of the complaint as true and construes them in the light most favorable to the plaintiff.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > Scope

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN2[] Per Se Rule & Rule of Reason, Per Se Violations

Section 1 of the Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. 15 U.S.C.S. § 1. Section 1 outlaws only unreasonable restraints. Certain restraints, such as horizontal agreements among competitors to fix prices or divide markets, are "per se" unlawful. Others are evaluated under the "rule of reason." But irrespective of whether a plaintiff pursues a per se claim or a rule of reason claim under § 1, the first requirement is to allege a contract, combination in the form of trust or otherwise, or conspiracy.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Types of Evidence > Circumstantial Evidence

HN3[] Sherman Act, Claims

To state a § 1 of the Sherman Act, 15 U.S.C.S. § 1, claim, a formulaic recitation of the elements will not do. The complaint must allege such facts as will nudge the claim across the line from conceivable to plausible. In this regard, parallel conduct, such as competitors adopting similar policies around the same time in response to similar market conditions, may constitute circumstantial evidence of anticompetitive behavior. But mere allegations of parallel conduct, even consciously parallel conduct, are insufficient. Plaintiffs must plead something more, some further factual enhancement, a further circumstance pointing toward a meeting of the minds of the alleged conspirators. That is, plaintiffs must plead evidentiary facts, such as who, did what, to whom (or with whom), where, and when or circumstantial evidence in the form of plus factors that coupled with parallel conduct take a complaint from merely possible to plausible.

Antitrust & Trade Law > Sherman Act > Claims

HN4[] Sherman Act, Claims

Mere participation in trade-organization meetings does not suggest an illegal agreement.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN5[] State Regulation, Claims

Where a complaint alleges the same conduct as both a violation of the Sherman Act and a violation of California's Cartwright Act, Cal. Bus. & Prof. Code § 16700 et seq., and California's Unfair Competition Law (UCL), Cal. Bus. & Prof. Code Cal. Bus. & Prof. Code § 17200 et seq., the determination that the alleged conduct is not an unreasonable restraint of trade under the Sherman Act necessarily implies that the conduct is not unlawful under the Cartwright Act or the "unlawful" prong of the UCL.

Torts > ... > Contracts > Intentional Interference > Elements

HN6[] **Intentional Interference, Elements**

Under California common law, a defendant is ordinarily not subject to liability for intentional interference with contract if the interference consists merely of extending an offer that induces an individual to terminate an at-will relationship. To state a claim for intentional interference with an at-will contract, a plaintiff must plead an independently wrongful act beyond the act of interference itself, i.e., an act "proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN7[] **Standards of Review, Abuse of Discretion**

The court of appeals review for abuse of discretion the district court's denial of leave to amend. Although leave to amend a deficient complaint shall be freely given when justice so requires, leave may be denied if amendment of the complaint would be futile. Where the plaintiff has previously been granted leave to amend and has subsequently failed to add the requisite particularity to its claims, the district court's discretion to deny leave to amend is particularly broad.

Opinion

[*529] MEMORANDUM[*]

Plaintiff Lenhoff Enterprises is a boutique talent agency. Defendants United Talent **[**2]** Agency ("UTA") and International Creative Management Partners ("ICM") are larger talent agencies and, together with two other agencies, comprise what Lenhoff terms the "Big Four" or "Uber" Agencies. Lenhoff sued UTA and ICM, asserting claims for (1) violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*; (2) violation of *California's Unfair Competition Law ("UCL"), Cal. Bus. & Prof. Code § 17200 et seq.*, and *Cartwright Act, Cal. Bus. & Prof. Code § 16700 et seq.*; (3)

[**] The Honorable Sharon L. Gleason, United States District Judge for the District of Alaska, sitting by designation.

[*] This disposition is not appropriate for publication and is not precedent except as provided by *Ninth Circuit Rule 36-3*.

intentional interference with contract under California common law; and (4) intentional interference with prospective economic advantage under California common law. The district court dismissed Lenhoff's third amended complaint with prejudice and denied Lenhoff's motion for reconsideration. We affirm.

1. We have jurisdiction pursuant to *28 U.S.C. § 1291*. ***HN1***[] "We review *de novo* the district court's dismissal of a complaint for failure to state a claim." *AE ex rel. Hernandez v. County of Tulare, 666 F.3d 631, 636 (9th Cir. 2012)*. "In conducting this review, we accept the factual allegations of the complaint as true and construe them in the light most favorable to the plaintiff." *Id.*

2. ***HN2***[] "*Section 1* of the Sherman Act prohibits '[e]very contract, combination in the form of trust or otherwise, or conspiracy, **[*530]** in restraint of trade or commerce among the several States.'" *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1196-97 (9th Cir. 2012)* (quoting *15 U.S.C. § 1*). The Supreme Court "has repeatedly observed **[**3]** that *Section 1* 'outlaw[s] only unreasonable restraints.'" *Id.* (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*). Certain restraints—such as horizontal agreements among competitors to fix prices or divide markets—are "per se" unlawful. *Id. at 1197 n.6*. Others are evaluated under the "rule of reason." *Id. at 1197*. But irrespective of "[w]hether a plaintiff pursues a per se claim or a rule of reason claim under *§ 1*, the first requirement is to allege a contract, combination in the form of trust or otherwise, or conspiracy." *William O. Gilley Enters., Inc. v. Atl. Richfield Co., 588 F.3d 659, 663 (9th Cir. 2009)* (quotation marks omitted). The district court found that Lenhoff failed to plead this first requirement of a *§ 1* claim, and we agree.

HN3[] To state a *§ 1* claim, "a formulaic recitation of the elements . . . will not do." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. The complaint must allege such facts as will nudge the claim "across the line from conceivable to plausible." *Id. at 570*. In this regard, "parallel conduct, such as competitors adopting similar policies around the same time in response to similar market conditions, may constitute circumstantial evidence of anticompetitive behavior." *In re Musical Instruments & Equip. Antitrust Litig., 798 F.3d 1186, 1193 (9th Cir. 2015)*. "But mere allegations of parallel conduct—even consciously parallel conduct—are insufficient . . . ." *Id.* "Plaintiffs must plead something more, some further factual enhancement, a further circumstance pointing toward **[**4]** a meeting of the minds of the alleged conspirators." *Id.* (quotation marks omitted). That is, "plaintiffs must plead evidentiary facts," such as "who, did what, to whom (or with whom), where, and when," *id. at 1194 n.6* (quotation marks omitted), or "circumstantial evidence in the form of plus factors" that "coupled with parallel conduct . . . take a complaint from merely possible to plausible," *id. at 1194 n.7*; *see also Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1048 (9th Cir. 2008)*.

At best, Lenhoff's third amended complaint pleads parallel conduct without alleging the "something more" required to state a claim. With respect to Lenhoff's argument that the Uber Agencies conspired to fix a "3-3-10 packaging fee," the third amended complaint makes only passing reference to the Uber Agencies charging such a fee. This is a bare, conclusory allegation of parallel conduct and so does not adequately state a *§ 1* claim. *See Kendall, 518 F.3d at 1047-48*.

The third amended complaint goes into greater detail with regard to the Association of Talent Agents ("ATA"), a trade association that represents member agencies in negotiations with talent unions and guilds, and "Rule 16(g)." Lenhoff alleges the Uber Agencies acted through representatives at the ATA to allow Rule 16(g) to expire so as to gain access to outside funding and thereby increase **[**5]** their market dominance. Specifically, Lenhoff contends the "who" of its alleged conspiracy is the ATA's Strategic Planning Committee; the "what" is a conspiracy to eliminate Rule 16(g); the "when" is from the Strategic Planning Committee's formation in 1999 onward; and the "where" is the ATA's offices. But these facts amount to nothing more than an allegation that defendants participated in a lawful trade organization, and ***HN4***[] "mere participation in trade-organization meetings . . . does not suggest an illegal agreement." *In re Musical Instruments, 798 F.3d at 1196*.

[*531] The third amended complaint's other allegations concentrate on the Uber Agencies co-packaging scripted television series "almost exclusively" with each other and "coercing" television networks and studios to deal only with them. At the same time, however, the complaint acknowledges a market-based reason for why larger agencies might co-package predominantly amongst themselves: larger agencies "are uniquely and advantageously situated to participate in packaging [scripted television series] because of their large, exclusive, and in-demand talent rosters." Although the complaint attaches exhibits purporting to show the number of times the Uber Agencies co-packaged with each other **[**6]** as opposed to with smaller agencies, these exhibits are not particularly helpful to Lenhoff as they in fact show that the Uber Agencies co-packaged with smaller agencies on several occasions in the relevant timeframe. More fundamentally, the complaint nowhere pleads the evidentiary facts that would nudge its claim across the line from conceivable to plausible. *See* *Twombly, 550 U.S. at 570*. Thus, Lenhoff has not stated a *§ 1* claim.

3. ***HN5***[] Where a complaint alleges the same conduct as both a violation of the Sherman Act and a violation of California's Cartwright Act and UCL, the determination that the alleged conduct is not an unreasonable restraint of trade under the Sherman Act necessarily implies that the conduct is not unlawful under the Cartwright Act or the "unlawful" prong of the UCL. *See* *name.space, Inc. v. Internet Corp. for Assigned Names & Numbers, 795 F.3d 1124, 1131 & n.5 (9th Cir. 2015)*; *William O. Gilley Enters., 588 F.3d at 669*; *County of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*; *Nova Designs, Inc. v. Scuba Retailers Ass'n, 202 F.3d 1088, 1092 (9th Cir. 2000)*. Lenhoff's claim under the Cartwright Act and the "unlawful" prong of the UCL is therefore deficient for the same reasons given above.

Lenhoff's claims under the "unfair" prong of the UCL fail because it has not adequately alleged—for the same reasons its other claims lack merit—that the Uber Agencies' conduct "threatens an incipient violation of an ***antitrust law***, or violates the **[**7]** policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 544 (Cal. 1999)*; *City of San Jose v. Office of the Comm'r of Baseball, 776 F.3d 686, 691-92 (9th Cir. 2015)*.

4. With respect to Lenhoff's claims ***HN6***[] under California common law, a defendant is ordinarily not subject to liability for intentional interference with contract if the interference consists merely of extending an offer that induces an individual to terminate an at-will relationship. *Reeves v. Hanlon, 33 Cal. 4th 1140, 17 Cal. Rptr. 3d 289, 95 P.3d 513, 519-20 (Cal. 2004)*. To state a claim for intentional interference with an at-will contract, a plaintiff must plead "an independently wrongful act" beyond the act of interference itself—i.e., an act "proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard." *Id. at 520*.

Although Lenhoff alleges that defendants "poached" two of its clients by promising them more favorable terms, it fails to allege that its contracts with those clients were anything other than at will. Lenhoff's argument that "Rider D"—attached as an exhibit to its complaint—somehow limited these clients' ability to terminate their contracts is meritless. Rider D plainly has nothing to do with contracts **[*532]** for an unspecified duration (as Lenhoff admits **[**8]** these contracts were). Rather, Rider D provides a limited ability to terminate a contract that would otherwise have lasted for a specified duration.

Because Lenhoff did not plausibly allege that its relationship with its clients was other than at will, it was required to plead an independently wrongful act—which it did not do. *See id.* Lenhoff therefore did not state a claim for intentional interference with contract, and its separate claim for intentional interference with prospective economic advantage fails for the same reason. *See id.* (applying the same "independently wrongful act" standard to intentional interference with an at-will contract as to intentional interference with prospective economic advantage). Accordingly, dismissal of Lenhoff's third amended complaint was proper.

5. ***HN7***[] "We review for abuse of discretion the district court's denial of leave to amend." *AE ex rel. Hernandez, 666 F.3d at 636*. "Although leave to amend a deficient complaint shall be freely given when justice so requires, leave may be denied if amendment of the complaint would be futile." *Gordon v. City of Oakland, 627 F.3d 1092, 1094 (9th Cir. 2010)* (citation omitted). "[W]here the plaintiff has previously been granted leave to amend and has subsequently failed to add the requisite particularity to its **[**9]** claims, the district court's discretion to deny leave to amend is particularly broad." *Zucco Partners, LLC v. Digimarc Corp., 552 F.3d 981, 1007 (9th Cir. 2009)* (quotation marks and alteration omitted). Here, the district court permitted Lenhoff to file three amended complaints, and with each amendment, Lenhoff failed to plead its claims with the requisite particularity. Lenhoff provides no reason to

suppose further amendment would be anything but futile: the declarations attached to its opposition to defendants' motions to dismiss do not address the deficiencies identified above and are merely cumulative of allegations already pled in the third amended complaint. Thus, the district court did not abuse its discretion in denying leave to amend. *See* *William O. Gilley Enters., 588 F.3d at 669 n.8* ("[A]ssuming that Gilley could, in the abstract, amend his complaint to state a claim . . . , his repeated failure to do just that suggests that it would be futile to offer him another chance to do so.").

6. Lenhoff filed its notice of appeal while its motion for reconsideration was still pending before the district court and never filed a new or amended notice of appeal after the district court denied its motion. The district court's denial of Lenhoff's motion for reconsideration is therefore not properly before **[**10]** us. *See* *Harris v. Mangum, 863 F.3d 1133, 1137-38 n.1 (9th Cir. 2017)*.

Opinion

[*1139] OPINION AND ORDER

Michael H. Simon, District Judge.

Plaintiff Unigestion Holding, S.A., dba "Digicel Haiti," provides mobile telecommunication services in Haiti for profit. Defendants (collectively, "UPM") formerly provided mobile telecommunication services to Haiti for profit. Digicel Haiti alleges that UPM provided these services by using certain practices and technologies to fraudulently access Digicel Haiti's telecommunications network. Digicel Haiti asserts claims against UPM alleging common law fraud, violations of the *Racketeer Influenced and Corrupt Organizations Act* ("RICO") under *18 U.S.C. §§ 1962(b)-(d)*, common law conversion, and common law unjust enrichment. Digicel Haiti filed a complaint against UPM on

February 2, 2015. Since that time, Digicel Haiti has amended its complaint several times, UPM **[**2]** has answered and asserted counterclaims, and each party has moved to dismiss the other's claims. On October 18, 2016, Digicel Haiti filed its second amended complaint ("the Complaint" or "SAC"). On September 11, 2017, UPM filed an amended answer to the SAC, asserting seven affirmative defenses and seven counterclaims. UPM's first and seventh counterclaims include allegations that Digicel Haiti is in violation of the *Communications Act of 1934* **[*1140]** and *§ 2 of the Sherman Act*, respectively. Digicel Haiti now moves to strike UPM's first, second, fifth, sixth and seventh affirmative defenses and dismiss UPM's first and seventh counterclaims. For the following reasons, Digicel Haiti's motion to strike and motion to dismiss are each granted in part and denied in part.

STANDARDS

A. Motion to Strike

An answer must "affirmatively state any avoidance or affirmative defense." *Fed. R. Civ. P. 8(c)(1)*. Such defenses must be stated "in short and plain terms." *Fed. R. Civ. P. 8(b)(1)(A)*. A court may strike an affirmative defense under *Federal Rule of Procedure 12(f)* if it presents an "insufficient defense or any redundant, immaterial, impertinent, or scandalous matter." *Fed. R. Civ. P. 12(f)*. The purpose of a *Rule 12(f)* motion is to avoid spending time and money litigating spurious issues. *Whittlestone, Inc. v. Handi-Craft Co., 618 F.3d 970, 973 (9th Cir. 2010)*; *see also* *Fantasy, Inc. v. Fogerty, 984 F.2d 1524, 1527 (9th Cir. 1993)*, *rev'd on other* **[**3]** *grounds*, *510 U.S. 517, 114 S. Ct. 1023, 127 L. Ed. 2d 455 (1994)*. The disposition of a motion to strike is within the discretion of the district court. *See* *Fed. Sav. & Loan Ins. Corp. v. Gemini Mgmt., 921 F.2d 241, 244 (9th Cir. 1990)*. "Motions to strike are disfavored and infrequently granted." *Legal Aid Servs. of Oregon v. Legal Servs. Corp., 561 F. Supp. 2d 1187, 1189 (D. Or. 2008)*; *see also* *Capella Photonics, Inc. v. Cisco Sys., Inc., 77 F. Supp. 3d 850, 858 (N.D. Cal. 2014)* ("Motions to strike are regarded with disfavor because of the limited importance of pleadings in federal practice and because they are often used solely to delay proceedings." (quotation marks and alterations omitted)).

An affirmative defense may be struck if it is insufficient. "'The key to determining the sufficiency of pleading an affirmative defense is whether it gives plaintiff fair notice of the defense.'" *Simmons v. Navajo Cty., 609 F.3d 1011, 1023 (9th Cir. 2010)* (quoting *Wyshak v. City Nat'l Bank, 607 F.2d 824, 827 (9th Cir. 1979))*. "[T]he 'fair notice' required by the pleadings standards only requires describing the defense in 'general terms.'" *Kohler v. Flava Enters., Inc., 779 F.3d 1016, 1019 (9th Cir. 2015)* (quoting 5 Charles Alan Wright & Arthur R. Miller, *Federal Practice and Procedure* § 1274 (3d ed. 1998)).

Rule 12(f) also provides that pleadings that are "immaterial" or "impertinent" may be struck by a court. An "immaterial" matter is "that which has no essential or important relationship to the claim for relief or the defenses being pleaded." *Fantasy, Inc., 984 F.2d at 1527* (quoting C. Wright, A. Miller, et al., 5C Fed. Prac. & Proc. Civ. § 1382 (3d ed. 2013)). "Impertinent" matters are those "that do not pertain, and are not necessary, **[**4]** to the issues in question." *Id.* Such pleadings are legally insufficient because they clearly lack merit "under any set of facts the defendant might allege." *Polk v. Legal Recovery Law Offices, 291 F.R.D. 485, 489 (S.D. Cal. 2013)* (citation and quotation marks omitted).

B. Motion to Dismiss

A motion to dismiss for failure to state a claim may be granted only when there is no cognizable legal theory to support the claim or when the complaint lacks sufficient factual allegations to state a facially plausible claim for relief. *Shroyer v. New Cingular Wireless Servs., 622 F.3d 1035, 1041 (9th Cir. 2010)*. In evaluating the sufficiency of a complaint's factual allegations, the court must accept as true all well-pleaded material facts alleged in the complaint and construe them in the light most favorable to the non-moving party. *Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1140* ***[*1141]*** *(9th Cir. 2012)*; *Daniels-Hall v. Nat'l Educ. Ass'n, 629 F.3d 992, 998 (9th Cir. 2010)*. To be entitled to a presumption of truth, allegations in a complaint "may not simply recite the elements of a cause of action, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively." *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*. All reasonable inferences from the factual allegations must be drawn in favor of the plaintiff. *Newcal Indus. v. Ikon Office Solution, 513 F.3d 1038, 1043 n.2 (9th Cir. 2008)*. The court need not, however, credit the plaintiff's legal conclusions that are couched as factual allegations. *Ashcroft v. Iqbal, 556 U.S. 662, 678-79, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

A complaint must contain sufficient **[**5]** factual allegations to "plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation." *Starr, 652 F.3d at 1216*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678* (citing *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

BACKGROUND

For purposes of Digicel Haiti's motion to dismiss counterclaims, the Court accepts as true the following facts alleged in UPM's counterclaims. Certain allegations from Plaintiff's amended complaint also are included as background. In deciding Digicel Haiti's motion to dismiss, the Court gives no presumption of truth to Digicel Haiti's allegations in the amended complaint, except where UPM's argument or counterclaims endorse or rely on Digicel Haiti's allegations.

A. Digicel Haiti's Operations

Digicel Haiti is a wholly owned subsidiary of Digicel Holdings, Ltd., which also owns Digicel USA, Inc. ("Digicel USA") and Digicel Jamaica, Ltd. ("Digicel Jamaica"). Digicel Haiti is the leading provider of telecommunications services in Haiti, where it solely operates and has an estimated 75% market **[**6]** share of local telephone services. Digicel USA operates a set of international telephone switching systems—equipment with the capacity to transmit a call from the United States to an overseas telecommunications network—located in Miami, Florida and New York City, New York.

Digicel Haiti tracks and charges its local customers in Haiti through the use of pre-paid Subscriber Identity Module ("SIM") cards. A SIM card acts as a small circuit board: when the card is placed inside a cellular telephone, the card identifies the device as associated with an individual customer's unique telephone number and account. SIM cards allow customers to access Digicel Haiti's cellular network and, in turn, allow Digicel to charge for communications made from cellular devices containing specific SIM cards. Digicel Haiti's customers can use SIM cards for voice, data, and messaging services on the Digicel Haiti network. Customers can add credits, in the form of minutes, to SIM cards by using, among other methods, vouchers and online "top-ups."

When a user of a Digicel Haiti SIM card makes a local call within Haiti, that user incurs charges of approximately $0.09 per minute of wireless service. If a Digicel **[**7]** Haiti customer travels to the United States and uses his or her Digicel Haiti SIM card to make calls back to Haiti, the user of that SIM card incurs charges of at least $1.99 for each minute of wireless service used. Digicel also offers a Roam-Like-You're-Home ("RLYH") plan. For **[*1142]** an access fee of approximately $20 to $25, the RLYH plan allows registered Digicel Haiti customers to call back to Haiti while traveling in the United States at rates similar to the local rate during the authorized and pre-paid period.

When someone in the United States originates a call to one of Digicel Haiti's subscribers in Haiti, the "third-party carrier"—a United States telecommunications carrier, which does not have the internal capacity to transport a call to Haiti, also sometimes referred to as a "wholesaler"—picks up that phone call from the United States-based originating caller and transports it to one of the Digicel USA switching gateways. From that switching gateway, Digicel USA further transports the call to Haiti, where Digicel Haiti "terminates" the call on its network. The terminating end of a call is the party being called by the party originating the call. On Digicel Haiti's behalf, Digicel **[**8]** Jamaica bills the third-party carrier a rate of $0.23 per minute for all international calls that terminate on Digicel Haiti's network. That fee includes the cost of terminating the call on Digicel Haiti's network and the cost of switching services performed by Digicel USA. Digicel Haiti then pays Digicel USA a fee for its services through intercompany transfer. Digicel Haiti does not authorize international or domestic telephone traffic to enter its telecommunications network in Haiti by any other route or under any other form of agreement.

B. UPM's Operations

UPM is an Oregon corporation that facilitated international calls from the United States to people in Haiti on behalf of third-party carriers, at rates lower than what Digicel Haiti charged. UPM asserts that it essentially resold Digicel Haiti's local and RLYH services within the United States at a discount from approximately April 2014 to November 2014. Due to Digicel Haiti's effective efforts to prevent UPM from reselling Digicel Haiti's services, as described below, UPM no longer facilitates calls to Haiti. UPM business operations involved paying full retail price to acquire large quantities of Digicel Haiti SIM cards from **[**9]** authorized dealers, and then using those cards to facilitate calls to Haiti through two technically distinct platforms: the resale of the RLYH plan and the resale of Digicel Haiti's local wireless services.

The first and most common way that UPM facilitated calls to Haiti was to enroll its Digicel Haiti SIM cards in the RLYH plan for the full retail price. UPM would then assemble the RLYH-enrolled SIM cards into a SIM server. The SIM server was connected to the internet and capable of accessing the wireless networks of AT&T and T-Mobile, the third-party carriers that have roaming arrangements with Digicel Haiti in the United States. Ordinarily, when a third-party carrier's customers called Haiti, the third-party carrier, and ultimately the customer, would have to pay the standard amount—a minimum of $0.23 per minute—for Digicel Haiti to connect the international call to its local network. UPM offered a cheaper way to connect the calls to third-party carriers on the open wholesale "spot" market in the United States. A third-party carrier that elected to use UPM's services would switch a call bound for a Digicel Haiti customer to UPM instead of through Digicel USA's gateway. The third-party **[**10]** carrier's switch would convert the call into an Internet-based protocol packet that carries the call (including the destination number in Haiti) over the internet to one of UPM's SIM servers located in Oregon. UPM's SIM server would then initiate the call to Haiti on the third-party carrier's wireless network. Simultaneously, UPM's SIM server would convert the call into the appropriate format for wireless transmission and essentially program the call to appear to **[*1143]** come from a telephone number associated with one of the RLYH-enrolled Digicel Haiti SIM cards. After the call was made to look like a call on the RLYH plan, it would follow the typical route for calls switched directly to Digicel Haiti: the third-party carrier would route the newly-reformatted call to one of Digicel USA's switches in New York or Miami, Digicel USA would carry the call to Haiti, and Digicel Haiti would terminate the call on its network, charging the associated SIM card at the discounted RLYH rate.

A second, although less common, way in which UPM facilitated international calls to Haiti was by transporting the calls to Digicel Haiti's local Haitian network through Voice-over-Internet-Protocol ("VoIP"). Again, **[**11]** the customer of a third-party carrier would call Haiti, and the third-party carrier's switch would select UPM to handle the call. The call would be sent to a UPM SIM server in Oregon in the same manner described above. Instead of initiating a wireless call to Haiti and converting the call for wireless transmission, however, UPM would leave the call as an Internet-based protocol packet (VoIP format). UPM would use the internet to transmit the call to a receiver in Haiti, known as a Global System for Mobile communications ("GSM") Gateway. The GSM Gateway would format the call for wireless transmission and initiate a wireless call on Digicel Haiti's network in Haiti using the account information associated with a SIM card located in Oregon. Digicel Haiti would then terminate (or complete) the call on its network as a local call, charging the associated SIM card at the local rate.

Digicel Haiti undertook an investigation into the international "resale" of its services. During the investigation, Digicel Haiti discovered that the calling and usage patterns of particular SIM cards were inconsistent with use by individual customers. Digicel Haiti "de-authorized" these SIM cards so that calls **[**12]** associated with these cards could no longer be completed. Because Digicel Haiti de-authorized many of the SIM cards that UPM used to conduct its business, UPM is no longer able to facilitate international calls to Haiti through either RLYH plans or VoIP.

DISCUSSION

A. Motion to Strike

1. Failure to State a Claim and Standing

Digicel Haiti moves to strike UPM's first affirmative defense, failure to state a claim, and second affirmative defense, lack of standing, on the basis that such defenses merely resurrect disputes that this Court has already decided. After full briefing by the parties, this Court previously ruled that Digicel Haiti has standing to bring the claims alleged in the Second Amended Complaint, and that Digicel Haiti has sufficiently stated those claims. Those rulings, however, were in response to UPM's motion to dismiss, which required this Court to accept all allegations in Digicel Haiti's pleading as true. As the case proceeds, however, it may become clear that those factual allegations were imprecise or incorrect. Thus, the fact that the same arguments did not prevail on an earlier motion under a different standard is not a sufficient basis to justify striking them.

A **[**13]** defense that does no more than point out a defect in a plaintiff's prima facie case, however, is a "negative defense" that can be set up by a denial, not an affirmative defense. *Zivkovic v. Southern Calif. Edison Co., 302 F.3d 1080, 1088 (9th Cir. 2002)*. "Failure to state a claim" is a negative defense that merely argues that plaintiff has not met its burden in establishing one or more elements of a claim, whatever that burden may be at a given **[*1144]** stage of litigation. Similarly, because plaintiffs must establish standing "in the same way as any other matter on which the plaintiff bears the burden of proof, *i.e.*, with the manner and degree of evidence required at successive stages of the litigation," *Lujan v. Dep't of Wildlife, 504 U.S. 555 at 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*, UPM's argument that Digicel Haiti lacks standing is also a negative defense. Because UPM's first and second affirmative defenses are in fact negative defenses, rather than affirmative defenses, it is proper to strike them.

2. Unclean Hands, Restraint on Trade, and Illegality

Digicel Haiti argues that UPM's fifth, sixth and seventh affirmative defenses should be stricken because UPM characterizes as affirmative defenses what should be brought as statutory antitrust counterclaims. In support of its argument, Digicel Haiti cites *Frost v. Shipowners & Merchants Towboat* ***[**14]*** *Co.*, in which a district court struck an antitrust defendant's affirmative defense of "unclean hands" that was predicated on the plaintiff's own anticompetitive activity, *1974 U.S. Dist. LEXIS 8570, 1974 WL 888, at *4 (N.D. Cal. May 10, 1974)*.

Frost, however, does not stand for the proposition that a party bringing an antitrust claim cannot raise an affirmative defense of unclean hands or illegality based on the same facts that form the basis of the antitrust claim. Rather, it stands for the proposition that a defendant *accused of an antitrust violation* cannot raise as an affirmative defense the plaintiff's own anticompetitive activity—whether that activity is characterized as a defense of "unclean hands" or "illegality." *See also* *Berner v. Lazzaro, 730 F.2d 1319, 1322 (9th Cir. 1984)*, *aff'd sub nom.* *Bateman Eichler, Hill Richards, Inc. v. Berner, 472 U.S. 299, 105 S. Ct. 2622, 86 L. Ed. 2d 215 (1985)* ("[I]n private antitrust actions, it is the law of this circuit that the doctrine of *in pari delicto* does not apply where the facts show that the plaintiff is less than co-equally responsible for his injury.") Instead, the defendant must bring a separate antitrust claim against the plaintiff. In such a case, each party has an antitrust claim against the other, but neither will have a defense.

This is not the case here. Digicel Haiti accuses UPM of fraud, not an antitrust violation. Fraud is traditionally subject **[**15]** to the affirmative defenses raised by UPM, and Digicel Haiti cites no case law indicating otherwise.

B. Motion to Dismiss Antitrust Claim

UPM alleges that Digicel Haiti has a monopoly in the market for local telephone services in Haiti and it is unlawfully extending that monopoly into the market for transporting calls from the United States to Haiti through anticompetitive conduct, in violation of *§ 2 of the Sherman Act*, *15 U.S.C. § 2*. UPM alleges five different forms of anticompetitive conduct, most of which consist of Digicel Haiti's exclusion of entities like UPM from terminating calls on Digicel Haiti's local network. Digicel Haiti moves to dismiss UPM's antitrust claim on the basis that it is not subject to the extraterritorial application of the Sherman Act, Digicel Haiti is not a common entity with Digicel USA and is thus not an international carrier, UPM has no standing to bring an antitrust claim, and UPM has otherwise failed to allege the elements of a *§ 2* monopoly claim.

1. Extraterritorial application of the Sherman Act

The *Foreign Trade Antitrust Improvements Act* ("FTAIA") generally bars application of the Sherman Act to conduct involving trade or commerce with foreign nations, unless

> (1) such **[**16]** conduct has a direct, substantial, and reasonably foreseeable effect—
>
> **[*1145]** (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or
> (B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and
>
> (2) such effect gives rise to a claim under the provisions of *sections 1 to 7* of this title, other than this section.

15 U.S.C. § 6a. *See also* *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 813 n.8 (9th Cir. 1988)* (noting that enactment of *15 U.S.C. § 6a* preempted the previous extraterritoriality test of *Timberlane Lumber Co. v. Bank of America, N.T. & S.A., 549 F.2d 597 (9th Cir. 1976)*, but that the statute "did not change the ability of the courts to exercise principles of international comity."). UPM must thus demonstrate a "direct, substantial, and reasonably foreseeable effect" on domestic United States commerce, and that "such effect gives rise" to a *Sherman Act § 2* claim.

The scope of the market that UPM alleges Digicel Haiti is improperly monopolizing, or attempting to monopolize, is not precisely alleged. UPM's allegations are, however, sufficient at this stage to support a conclusion that extraterritorial application of the Sherman Act is appropriate in this case. That market can be approximately described as the market for transporting **[**17]** calls from the United States to Haiti. This market necessarily implicates domestic United States commerce and consumers—whether defined as individuals placing calls to Haiti or third-party carriers seeking call transportation services to Haiti. UPM has alleged that the geographic market affected by Digicel's alleged anticompetitive activities is the entire United States. The RLYH program specifically provides discounted roaming rates for Digicel Haiti customers in the United States placing calls to Haiti, and is thus targeted at United States-based consumers. Digicel's alleged improper monopolization of the United States-Haiti international telecommunications routes has a direct, substantial, and reasonably foreseeable effect on United States consumers.

This Court may still apply the principles of international comity expressed in the *Timerblane* decision. *Id.* Whether Digicel's actions are consistent with or compelled by Haitian law or public policy involves a disputed question of fact, however, and is best resolved at a later stage of litigation. For purposes of the present motion, the FTAIA does not bar the application of the Sherman Act to the entities and commercial activities described **[**18]** in UPM's amended complaint, which is sufficient for this Court to consider Digicel's motion on the merits.

2. Digicel Haiti and Digicel USA are a common entity under the antitrust laws

UPM argues that Digicel Haiti and Digicel USA should be considered a single entity for purposes of antitrust laws because they are wholly-owned subsidiaries of Digicel Holdings, Ltd. As a common enterprise, UPM argues, they have acted jointly to monopolize the market for the transportation of calls from the United States to Haiti. Digicel Haiti objects that it is a wholly distinct company from Digicel USA, and its operations are limited to the provision of local telephone service in Haiti.

In *Copperweld Corp. v. Independence Tube Corp.*, the Supreme Court held that a parent corporation and its wholly-owned subsidiary cannot be held liable for conspiracy with each other under *§ 1 of the Sherman Act*. *467 U.S. 752, 759, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. The Tenth Circuit has extended the reasoning in *Copperweld* to hold that, when two entities "must be treated as a single enterprise for purposes of *§ 1*, [they] must also be treated **[*1146]** as a single enterprise for purposes of *§ 2*." *Lenox MacLaren Surgical Corp v. Medtronic, Inc., 847 F.3d 1221, 1235 (10th Cir. 2017)*. The *Lenox* court specifically rejected the notion that individual, specific defendants must independently **[**19]** satisfy each element of a *§ 2* claim. "Rather," the court held, "in a single-enterprise situation, it is the affiliated corporations' collective conduct—i.e., the conduct of the *enterprise* they jointly compose—that matters; it is the *enterprise* which must be shown to satisfy the elements of a monopolization or attempted monopolization claim." *Id. at 1236*. Although the Ninth Circuit has not expressly adopted this extension of *Copperweld*, in practice it has analyzed sister and parent companies as "part of an integrated entity" whose behavior was jointly subject to a *§ 2* inquiry. *See* *Vollrath Co. v. Sammi Corp., 9 F.3d 1455, 1461 (1993)*. The Court is satisfied that the Ninth Circuit would join the Tenth Circuit in holding that "the related entities' coordinated conduct must be treated as the unitary conduct of the single enterprise which together they form, and it is that aggregated conduct which must be scrutinized under *§ 2*." *Lenox, 847 F.3d at 1236*.

Digicel attempts to distinguish *Copperweld* and *Lenox* on the basis that Digicel Haiti and Digicel USA are sister-subsidiaries, while the corporate relationships in *Copperweld* and *Lenox* were parent-subsidiaries. Because there is no allegation of involvement by a common corporate parent, Digicel argues, the sister-subsidiaries should not **[**20]** be considered a single enterprise for the purposes of antitrust laws. The Ninth Circuit, however, has described *Copperweld* as holding that "companies under common ownership and control cannot initiate *Sherman Act* conspiracy violations among themselves," indicating that *Copperweld*'s reasoning is not limited to parent-subsidiary corporate relationships. *Vollrath Co., 9 F.3d at 1463*.

Applied here, UPM has sufficiently alleged that Digicel USA and Digicel Haiti have engaged in coordinated conduct constituting a single enterprise. UPM alleges that Digicel USA and Digicel Haiti are commonly owned and "operate in tandem" to suppress competition on the United States to Haiti route. Digicel Haiti itself alleges that Digicel Haiti and Digicel USA work closely together in the common enterprise of connecting calls from the United States to Digicel Haiti's network in Haiti. Digicel Haiti bills United States-based third-party carriers a flat rate of $0.23 per minute for every international call that terminates on Digicel Haiti's network. That rate includes the cost of transmitting the call from the United States to Haiti through Digicel USA's gateway. Digicel USA does not bill the third-party carrier for this service. Rather, **[**21]** Digicel Haiti pays Digicel USA a fee for its service through an intercompany transfer. Thus, Digicel Haiti and Digicel USA are not only commonly owned, but engaged in a common enterprise.[1]

3. Standing

To state a claim for monopolization or attempted monopolization, a plaintiff must be "a participant in the same market as the alleged malefactors." *Bhan v. NME Hospitals, Inc., 772 F.2d 1467, 1470 (9th Cir. 1985)*.[2] When analyzing whether two enterprises "participate in the **[*1147]** same market, the focus is upon the reasonable interchangeability of use or the cross-elasticity of demand between the services provided by" the enterprises. *Id. at 1470-71*. In certain cases, courts determine whether two enterprises compete in the same market by identifying "the point of competition" between the two enterprises. *See* *Glen Holly Entertainment, Inc. v. Tektronix, Inc., 343 F.3d 1000, 1005 (9th Cir. 2003)* *opinion amended on denial of reh'g*, *352 F.3d 367 (9th Cir. 2003)* (identifying a market

---

[1] Going forward, this opinion uses the term "Digicel" to refer to the common enterprise, and "Digicel USA" and "Digicel Haiti" when necessary or appropriate to refer to the distinct corporate bodies.

[2] The question of antitrust standing, and the requirement that an antitrust plaintiff participate in the same market as the defendant, is an outgrowth of the requirement that the plaintiff experienced antitrust injury. The remaining elements of antitrust injury are discussed later in this opinion.

for a product that included manufacturers and rental services where the "point of competition" was the consumer's decision to rent or purchase the product).

Digicel Haiti argues that UPM, by merely reselling telecommunications services offered by Digicel USA and Digicel Haiti, does not participate in the same market as Digicel Haiti, which is in the local telephone services market in Haiti, or Digicel USA, which **[**22]** is in the "switching market." UPM alleges that it, like Digicel, is an international carrier competing with other carriers for the right to transport calls from the United States to other countries, including Haiti. As discussed above, Digicel operates as a single enterprise. As a single enterprise Digicel USA and Digicel Haiti's functions combine to offer a single product that includes the transportation of calls from the United States to Haiti and the termination of those calls on Digicel Haiti's network. UPM has not clearly alleged, however, that it offers a product that is interchangeable with a product offered by Digicel.

As a preliminary matter, UPM does not compete with Digicel to the extent that it resells Digicel's RLYH program, in which it is only a reseller and provides no service that is an interchangeable alternate to that of Digicel. The RLYH resale "market" looks like the "market" of a person who purchases a season pass to a ski resort, and then rents that season pass out to customers for daily use at a rate below the daily rate charged by a ski resort. No matter what technological innovations the reseller innovated to facilitate his resale model, the person who rents **[**23]** out the season pass cannot be said to be competing in the same market as the ski resort, even though both sell daily ski passes. In reselling the RLYH plan, UPM essentially functions as a distributor, and cancelled distributors do not have antitrust standing. *Glen., 343 F.3d at 1010* (discussing the rule that canceled distributors do not have antitrust standing, but finding that the plaintiff at issue was not a distributor).

The other service that UPM offers—using the internet to get calls to Haiti—does appear to be interchangeable with Digicel USA's international switching service as an alternate means to conduct "international transport services." As an FCC opinion illustrates, international transport services are one "input" among others necessary to complete an international call:

> In order to complete a U.S. international call, a U.S. carrier must obtain as inputs various call termination services from foreign carriers in the destination country of the U.S. call, including *international transport services*, inter-city services within the destination country, and *terminating access services within the local exchange of the called party*.

Eastlink international (USA) Inc.; Petition to Modify Regulatory Classification ***[**24]*** *from Dominant to Non-Dominant on the U.S.-Bermuda Route, Memorandum Opinion and Order, 28 F.C.C.R. 8364* (Int'l Bur. 2012) at ¶2 (emphasis added, footnotes omitted). Thus, the completion of an international call requires, at least, both transportation "inputs" and termination "inputs." UPM **[*1148]** argues that it "competed directly, head-to-head, for wholesale carriers' business" when it used the internet to get calls to Haiti. UPM defines this market as "the market for getting calls to Haiti for termination there." UPM thus argues that it competed with Digicel in providing only *international transport services* to third-party carriers.

UPM has not clearly alleged, however, that Digicel actually offers that service to third-party carriers, or that a market for "international transport services" from the U.S. to Haiti as a standalone service actually exists. Digicel's complaint alleges, and UPM seems to accept, that Digicel charges U.S. wholesalers who need to get a call to Haiti a flat rate of $0.23 per minute for calls that terminate on its network, and that flat rate includes the cost of the international transport service that was performed by Digicel USA and the cost of termination on Digicel Haiti's local network. Thus, Digicel offers to third-party carriers all of the inputs necessary **[**25]** to complete an international call as a single, bundled product for which it charges a flat fee. UPM, on the other hand, only competes with Digicel to the extent that it offers an international transport service, which is only one input required to complete an international call. It is not clear from UPM's allegations that there is a market for this single input. More importantly for standing purposes, UPM's standalone transportation service is not interchangeable with Digicel's transportation-termination service, because its transportation service would only partially meet a third-party carrier's needs.

4. Elements of an Antitrust Claim

Digicel also argues that UPM has not sufficiently pleaded an antitrust claim. In order to state an antitrust claim under *§ 2* of the Sherman Act, a plaintiff must show: "(a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury." *Somers v. Apple, Inc, 729 F.3d 953, 963 (9th Cir. 2013)*. To state a plausible claim for an attempted monopoly, a plaintiff must show: "(1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct to accomplish the monopolization; (3) dangerous probability **[**26]** of success; and (4) causal antitrust injury." *CollegenNET, Inc. v. Common Application, Inc., 104 F. Supp. 3d 1137, 1145 (D. Or. 2015)*.

a. Monopoly Power in the Relevant Market

Digicel argues that UPM's Sherman Act claim fails because UPM has not alleged that Digicel has monopoly power the relevant market. A plaintiff must generally allege monopoly power in both the relevant product market and the relevant geographic market in which the trade was unreasonably restrained or monopolized. *See E.I. du Pont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 441 (4th Cir. 2011)*. Monopoly power, for the purpose of *Section 2* of the Sherman Act, is "the power to control prices or exclude competition." *Forsyth v. Humana, Inc., 114 F.3d 1467, 1475 ((9th Cir. 1997)*, *aff'd sub nom. Humana Inc. v. Forsyth, 525 U.S. 299, 119 S. Ct. 710, 142 L. Ed. 2d 753, (1999)*, *and overruled on other grounds by Lacey v. Maricopa Cnty., 693 F.3d 896 (9th Cir. 2012)*. A common way to establish monopoly power is by "(1) defin[ing] the relevant market, (2) show[ing] that the defendant owns a dominant share of that market, and (3) show[ing] that there are significant barriers to entry and show that existing competitors lack the capacity to increase their output in the short run." *Id. at 1476*.

i. Relevant Market

UPM alleges that the relevant geographic market is the entire United States. **[*1149]** UPM does not, however, allege the precise scope of the relevant product market. "[W]ithout a definition of [the relevant product] market there is no way to measure [the defendant's] ability to lessen or destroy competition." **[**27]** *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)* (quoting *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965))*.

It is not clear from UPM's allegations whether the relevant product market that UPM alleges Digicel to have monopolized is limited to the international transportation service or includes both the transportation service and the local termination service. UPM appears to assert a leveraging theory of monopolization, by which Digicel is using its monopoly in the first market, local telephone services in Haiti, to illegally extend its monopoly into a second market, the transportation of calls from the United States to Haiti. Such a theory of monopolization suggests that the second market—the market being unlawfully monopolized—is the market for only transportation, and not termination. In its response brief, UPM reinforced the conclusion that its alleged product market is limited to transportation services when it wrote that Digicel has monopolized "the market for getting calls to Haiti for termination there." This phrasing indicates that the market is for the service of "getting calls to Haiti" and not for the service of "termination there." In its complaint, however, UPM defines the primary relevant product market as the market for transporting all calls from the United States **[**28]** to all telephones in Haiti and the secondary product market as the market for transporting all calls from the United States to all Digicel subscribers in Haiti. By defining the market as including the transportation of calls from the United States "to telephones" or "to all Digicel subscribers," UPM indicates that the product market includes termination services. Thus, the first substantive flaw in UPM's antitrust claim is its failure clearly to define the scope of the relevant product market.

To the extent that UPM alleges that the relevant product market is only the transportation service, UPM has not sufficiently alleged that there is a market for that service. If a hotdog stand includes free condiments and garnishes for any customer who purchased a hotdog, and an entrepreneur set up a condiment and garnish stand across the street, the entrepreneur could not claim to be competing with the hotdog stand in the condiment and garnish market. UPM appears to be attempting something similar here. Digicel includes the cost of transportation, which for purposes of antitrust analysis it performs in-house, in the flat fee that it charges wholesalers that terminate calls on its network in Haiti. **[**29]** UPM does not allege that Digicel offers the switching services performed by Digicel USA on a standalone basis—for example, to transport a third-party carrier's to Haiti for termination on a non-Digicel local Haitian network. Moreover, UPM does not allege that there are customers interested in transportation services alone, or what the cost of such a service is or should be. UPM alleges neither what Digicel nor UPM itself charges to customers just for the transportation service.[3] Based on UPM's counterclaims, **[*1150]** and the portions of Digicel's complaint that UPM endorses, the appropriate customers for pure transportation services might be enterprises like Digicel itself, which can pay for the transportation service provided by UPM or a similar service provider, and then pass that cost along to the third-party carrier paying to terminate on Digicel's local network.[4]

ii. Monopoly Power

Even if UPM had sufficiently defined the relevant product market, UPM has not sufficiently alleged that Digicel has monopoly power in that market. To state a claim for a Sherman Act *§ 2* violation, UPM must allege monopoly power *in the relevant product market*. UPM alleges **[**30]** that "Digicel has acted to illegally extend its local service monopoly to the" market for transporting calls from the United States to Haiti. UPM thus pleads a *§ 2* claim under a "monopoly leveraging" theory, by which a company that has a monopoly in one product market—which may be legitimately obtained—uses its monopoly power in the first market to secure an unlawful monopoly in a second, distinct market. In order to state a claim under a leveraging theory, a plaintiff must sufficiently allege that the defendant either has obtained monopoly power in the second market or, in the case of an attempted monopoly claim, has a "dangerous probability of success" in monopolizing a second market. *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 415 n. 4, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*.

UPM alleges that "Digicel Haiti has a market share of more than 75% in the provision of local telephone service in Haiti," which is sufficient to allege monopoly power in that market. *See* *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 187 (3d Cir. 2005)* (holding that a market share between seventy-five percent and eighty percent of sales is "more than adequate to establish a prima facie case of power"). UPM has thus sufficiently alleged that Digicel has monopoly power in the local telephone service market in Haiti, the legitimacy of which UPM does not challenge. UPM **[**31]** makes no allegations, however, about Digicel's market power in the United States-to-Haiti call transportation market. Digicel's market share in local network services does not necessarily translate into an equivalent market share in international transportation services. A mere unfair advantage combined with the use of upstream monopoly power is not sufficient to state a claim for a monopoly or attempted monopoly of the second market **[*1151]** under a leveraging theory. *Trinko, 540 U.S. at 415 n. 4* (clarifying that a leveraging theory presumes anticompetitive conduct and, at least, a dangerous probability of monopolization of the second market).

---

[3] To the extent that UPM alleges that Digicel charges $0.23 per minute just for the transportation function—it is not clear from UPM's complaint what services UPM alleges the $0.23 to include—that allegation appears to be based on Digicel's allegations in its own complaint. Digicel alleges, however, that the $0.23 per minute fee is a flat fee charged to wholesalers that is considered to *include* the cost of the transportation function that Digicel provides, in addition to the fee for terminating a call on Digicel's network. Neither Digicel nor UPM allege what amount Digicel Haiti pays to Digicel USA for performing the transportation function.

[4] Seen this way, the market for pure international transportation services may resemble a two-sided market. A two-sided platform is one that acts as an intermediary that "caters to two or more distinct 'sides' of users that derive value from interacting with one another; but the firm's service will not attract one side unless there are participating users on the other." Erik Hovenkamp, *Antitrust Policy for Two-Sided Markets* (February 9, 2018), available at SSRN: https://ssrn.com/abstract=3121481. A firm that offers only the international transportation function of international telecommunications requires the participation of two sets of customers: wholesalers with a need to get their calls to a different country, and local service providers who charge the wholesalers to terminate that call in the local country. A new area of ***antitrust law*** appears to be emerging for two-sided markets. This new area, however, does not appear to be applicable here because Digicel is *not* a two-sided platform. It performs its transportation function in-house, for purposes of ***antitrust law***. Because it offers both transportation and termination, it needs only one set of customers—the wholesalers. That UPM appears to offer a two-sided platform, while Digicel offers a single-sided platform reinforces the inference that UPM and Digicel do not compete in the same market.

Because UPM makes no allegations about Digicel's monopoly power in the market for transporting calls from the United States to Haiti, it has not sufficiently alleged monopoly power in the relevant market.

b. Maintenance of Monopoly Power Through Anticompetitive Conduct

In addition to showing monopoly power in the relevant market, plaintiffs must demonstrate "the willful acquisition or maintenance of [monopoly] power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident" *Trinko, 540 U.S. at 407*. To be considered anticompetitive, the act **[**32]** must "harm the competitive *process* and thereby harm consumers. In contrast, harm to one or more *competitors* will not suffice." *United States v. Microsoft Corp., 253 F.3d 34, 58, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (emphasis in original). UPM alleges five ways in which Digicel Haiti has engaged in anticompetitive conduct to protect and extend its local service monopoly and monopoly of the transporting of calls from the United States to Haiti. First, Digicel requires that all international calls destined for a Digicel Haiti subscriber in Haiti be switched though the Digicel USA gateway. Second, Digicel charges $0.23 per minute for calls terminated on its network Haiti, regardless of whether they switched through Digicel USA. Third, Digicel prevents internet-based telephone services from terminating on its wireless network. Fourth, Digicel prevents the resale of Digicel Haiti's RLYH service. Fifth, Digicel failed to report its status as the dominant local carrier in Haiti to the FCC.

UPM's first allegation of anticompetitive behavior, that Digicel requires that all international calls terminated on its local network be switched through its own gateway might constitute an improper tying arrangement. UPM essentially alleges that Digicel will not sell its termination services **[**33]** unless a wholesaler also purchases its transportation services. As explained above, however, UPM has not sufficiently alleged that there is independent consumer demand for international call transportation services as a standalone product. "[N]o tying arrangement can exist unless there is sufficient demand for the purchase of [the tied product] separate from [the tying product] to identify a distinct product market in which it is efficient to offer [the tied product] separately from [the tying product.]" *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 21-22, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984) accord Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 462, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. In this case, the tied product is the switching through Digicel USA's gateway, and the tying product is Digicel's local Haiti network service. Because UPM has not alleged that there is a distinct product market for international call transportation services such that transportation services can be efficiently offered separately from call termination services, Digicel's requirement that calls terminating on its network be switched through its own gateway is not anticompetitive.

UPM's second allegation of anticompetitive conduct falls short for similar reasons. Because Digicel charges $0.23 per minute to all U.S. wholesale carriers, regardless of whether they use the Digicel **[**34]** USA switches to transport the call to Haiti or a transport service like UPM's, UPM argues, no wholesale carrier will elect to use a different transport service because the carrier would then be charged twice **[*1152]** for the transport function—once in Digicel's bundled price and once by the independent transport service. Thus, Digicel argues, those who use Digicel's transport service receive it "for free" while those who use alternative transport services are charged. Like UPM's first allegation of anticompetitive conduct, this billing scheme could be seen as unlawful tying or bundling. "Bundling is the practice of offering, for a single price, two or more goods or services that could be sold separately." *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 894 (9th Cir. 2008)*. Predatory bundling occurs when, "after allocating the discount given by the defendant on the entire bundle of products to the competitive product or products, the defendant sold the competitive product or products below its average variable cost of producing them." *Id at 910*. Thus, as with a theory of anticompetitive tying, a plaintiff must sufficiently allege that a defendant is offering two distinct goods for a single price in order to state an antitrust claim under a theory of anticompetitive **[**35]** bundling. UPM has not sufficiently alleged that there is a market for standalone international call transportation services for Digicel's billing scheme to be considered improper bundling. Moreover, UPM has made no allegation that Digicel sold the transportation service—the competitive product—below the cost of performing or delivering that service.

UPM's third and fourth allegations of anticompetitive conduct can be considered together. A firm's refusal to deal with a competitor is not anticompetitive unless it involves "[t]he unilateral termination of a voluntary *(and thus presumably profitable)* course of dealing suggest[ing] a willingness to forsake short-term profits to achieve an anticompetitive end." *Trinko, 540 U.S. at 409* (emphasis in original). In *Aspen Skiing Co. v. Aspen Highlands Skiing Corp.*, the Supreme Court held that a defendant ski resort's refusal to sell daily ski pass tickets, even at the market retail rate, to a competitor ski resort was exclusionary where the defendant had previously engaged in a similar course of dealing with the competitor. *472 U.S. 585, 610-11, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. Because the defendant ski resort would presumably make a profit by selling tickets at the market rate to its competitor ski resort, the only **[**36]** rational reason for its refusal to deal was to drive its competitor out of business. *Id. at 609*. In *Trinko*, the Supreme Court declared that *Aspen Skiing* was "at or near the outer boundary of *§ 2* liability" when the conduct at issue is the refusal to cooperate with a rival. *540 U.S. at 409*. "[T]here is no duty to deal under the terms and conditions preferred by [a competitor's] rivals, . . . there is only a duty not to refrain from dealing where the only conceivable rationale or purpose is to sacrifice short-term benefits in order to obtain higher profits in the long run from the exclusion of competition," *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1184 (9th Cir. 2016)* (citations omitted).

Digicel's course of dealing with UPM is not presumably profitable, either with regard to the resale of the RLYH service or with regard to UPM's internet-based telephone service terminating on its network, and Digicel had no prior voluntary dealing with UPM or any other internet-based telephone service. Digicel might expect, for example, that an average individual who purchases a RLYH SIM card will make ten calls per week to Haiti, and sells it at a price that reflects that anticipated use. When in the hands of an organization with a business model like UPM's, however, the RLYH card may be **[**37]** used to make hundreds or even thousands of calls to Haiti per week. Such a resale scheme **[*1153]** does not resemble the market-value dealing denied to the plaintiff in *Aspen Skiing*, which was attempting to buy a single-use product—a daily ski pass—at the price fixed by the defendant to reflect the value of that single-use product. Rather, the scheme is more akin to the would-be competitor who buys an unlimited season pass for a ski resort, and then rents that pass out to customers for daily use at less than the cost of a day pass. If the ski resort refused to honor the rented out season passes, such action would be a rational attempt to protect itself from lost profits and hardly anticompetitive.

By refusing to honor its RLYH program with UPM, and thus preventing UPM's resale of the RLYH benefits, Digicel is acting competitively by forsaking an unprofitable deal. Whether the RLYH contract explicitly forbids this form of resale is disputed, and Digicel's refusal to honor UPM's resold RLYH calls may well be in violation of its contract if there were no restrictions on resale. Not all breaches of contract are anticompetitive, however, and when a breach is efficient, meaning that a party chooses **[**38]** to breach to avoid economic loss, it is particularly unlikely that the breach is anticompetitive. For similar reasons, Digicel's refusal to permit UPM or any other internet-based telephone service terminate on its network by reselling access to Digicel's network at the local rate for what is in fact an international call is a competitive business decision. By refusing to deal with UPM, or any other internet-based telephone service, Digicel is not forsaking near-term profits, but rather protecting itself from an unprofitable deal. UPM implicitly concedes as much in its response brief when it argues that, because Digicel was ultimately able to identify the SIM card being used by UPM, "there is no reason that it could not have charged higher per-minute rates for calls made using those services." Perhaps Digicel could have, but it was under no obligation to do so.[5]

Digicel raises no argument that UPM's fifth allegation of anticompetitive conduct—that Digicel Haiti concealed its status as a dominant carrier on the U.S.-Haiti route from the FCC in violation of *§ 214* of the Communications Act of

---

[5] UPM's allegations resemble a claim brought under the essential facilities doctrine. *See MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1132-33 (7th Cir. 1983)* (finding antitrust liability where the following elements exist: "(1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility"). During oral argument, however, counsel for UPM expressly stated that UPM is not pleading its case under the essential facilities doctrine. ECF 150 at 31. The Court thus does not analyze UPM's claims of anticompetitive activity under the essential facilities doctrine.

1934—is not anticompetitive. Rather, Digicel argues that all of UPM's claims against Digicel under **[**39]** the Communications Act do not apply to Digicel Haiti because Digicel Haiti is not an international common carrier. For reasons explained below, UPM has sufficiently alleged that Digicel Haiti is an international common carrier, and thus subject to the requirements of the Communications Act. Because Digicel raises no argument that this allegedly exclusionary conduct is not anticompetitive, and because UPM's *§ 2* claim fails on other grounds explained above, the Court declines to address whether Digicel's failure to register as an international common carrier is anticompetitive.

c. Antitrust Injury

There are four elements of antitrust injury: "(1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct **[*1154]** unlawful, and (4) that is of the type the antitrust laws were intended to prevent." *Somers, 729 F.3d at 963 (9th Cir. 2013)*. "[A] plaintiff must demonstrate injury to competition in the market as a whole, not merely injury to itself as a competitor." *CollegenNET, Inc. v. Common Application, Inc., 104 F. Supp. 3d at 1147*. As explained above, UPM has not alleged anticompetitive conduct. Thus, any injury that UPM alleges that is has suffered does not "flow from that which makes the conduct unlawful." Moreover, because UPM has not sufficiently defined **[**40]** the relevant market—and has specifically failed to identify other participants and consumers in that market—it has alleged injury only to itself, and not competition in that market.

C. Motion to Dismiss Title 47 Claims

UPM's first counterclaim alleges several violations of the Communications Act of 1934 (the "Act"), codified at *47 U.S.C. §§ 151, et seq.* Digicel Haiti argues that the plain text of the Act does not apply to Digicel Haiti because Digicel Haiti does not operate as an international common carrier in the United States. UPM argues that, regardless of any corporate formalities distinguishing Digicel USA from Digicel Haiti, Digicel Haiti offers international telecommunications services and should thus be treated as an international common carrier for the purposes of the Act.

a. Statutory and Regulatory Framework for Telecommunications

The Court begins its analysis of this issue by examining the relevant statutory and regulatory framework. Under the Act, an entity is a "common carrier" or a "telecommunications carrier" when it engages in interstate or foreign communications by offering to transmit information for a fee between points designated by its customers. *See* *47 U.S.C. §§ 153(11)*, *(50)*, *(51)*, *(53)* (defining, respectively, "common **[**41]** carrier," "telecommunications," "telecommunications carrier," and "telecommunications service"); *see also* *AT&T Corp. v. City of Portland, 216 F.3d 871, 877 (9th Cir. 2000)* ("A provider of telecommunications services is a 'telecommunications carrier,' which the Act treats as a common carrier to the extent that it provides telecommunications to the public, 'regardless of the facilities used.'").

To qualify as a common carrier, a provider of telecommunication services must offer its services to all customers on an equal basis. *Verizon Cal., Inc. v. F.C.C., 555 F.3d 270, 275, 384 U.S. App. D.C. 342 (D.C. Cir. 2009)* (finding that certain entities were common carriers because, among other things, the entities certified that they would "serve[] all similarly situated customers equally"); *see also* *Telesaurus VPC, LLC v. Power, 623 F.3d 998, 1004 (9th Cir. 2010)* (stating that to be a "common carrier" under the FCA, a service provider must be engaged in the provision of services that are "for profit" and "available to the public or other specified users"); *National Asso. of Regulatory Utility Comm'rs v. Federal Communications Com., 525 F.2d 630, 641, 173 U.S. App. D.C. 413 (D.C. Cir. 1976)* (discussing the essential requirement that a common carrier hold itself out to the clientele it is suited to serve).

Under the Act, a "foreign communication" is a "communication or transmission from or to any place in the United States to or from a foreign country." *47 U.S.C. § 153(21)*. FCC regulations refer to a common carrier involved in providing foreign communications **[**42]** as an "international common carrier." *See* *47 C.F.R. § 63.18*. A "foreign carrier" is "any entity that is authorized within a foreign country to engage in the provision of international telecommunications services offered to the public in that country." *47 C.F.R. § 63.09*. The Act does not apply to telecommunications providers that operate only as foreign carriers. *Cable & Wireless P.L.C. v.* **[*1155]** *FCC, 166 F.3d 1224, 1229, 334 U.S. App. D.C. 261 (D.C. Cir. 1999)* ("The Communications Act authorizes the Commission to regulate 'foreign telecommunications.' The Commission claims no authority to directly regulate foreign carriers." (citation omitted)).

Subject to exemptions not relevant here, any entity that operates as a common carrier within the United States, including international common carriers, is required to obtain formal authorization. *47 U.S.C. § 214*; *47 C.F.R. §§ 63.09-63.23*. Such authorizations are known as "*Section 214*" authorizations. Operating as an international common carrier without a *Section 214* authorization violates the Act. *See, e.g.,* *In re PTT Phone Cards, Inc., 29 F.C.C.R. 11531 at ¶7 (2014)*. An international common carrier, operating pursuant to a *Section 214* authorization, may not charge "unjust or unreasonable" rates for the provision of foreign communications. *47 U.S.C. § 201(b)*. Nor may common carriers of any kind

> make any unjust or unreasonable discrimination in charges, practices, classifications, regulations, facilities, **[**43]** or services for or in connection with like communication service, directly or indirectly, by any means or device, or to make or give any undue or unreasonable preference or advantage to any particular person, class of persons, or locality, or to subject any particular person, class of persons, or locality to any undue or unreasonable prejudice or disadvantage.

47 U.S.C. § 202(a). The Act applies to "all interstate and foreign communication . . . which originates and/or is received within the United States, and to all persons engaged within the United States in such communication." *47 U.S.C. § 152(a)*.

Any person damaged by a common carrier's acts or omissions that violate the terms of the Act may recover damages in federal court. *47 U.S.C. §§ 206-207*. Under *§ 206*, if "any common carrier shall do, or cause or permit to be done, any act, matter, or thing" prohibited by the Act, or "shall omit to do any act, matter, or thing" required by the Act, then "such common carrier shall be liable to the person or persons injured thereby for the full amount of damages sustained in consequence of any such violation," including attorney's fees. *47 U.S.C. § 206*. Under *§ 207*, claims for damages against carriers for violating the Act may be brought in any federal district court with **[**44]** jurisdiction. *47 U.S.C. § 207*.

b. Application

Ruling on the same issue in an earlier motion to dismiss in this case, this Court held that Digicel's own allegations indicated that Digicel Haiti owned and operated the switches in New York and Miami, and was thus properly considered an international carrier. Plaintiff has since amended its complaint to distinguish between the Digicel USA entity, which Digicel Haiti agrees is an international carrier and which has a *Section 214* authorization, and Digicel Haiti itself, which Digicel Haiti maintains operates only in Haiti. Digicel argues that, because Digicel USA and not Digicel Haiti performs the transmission of calls from the United States to Haiti, it is not required to hold a *Section 214* license and is therefore not an international common carrier. Digicel Haiti's own allegations nevertheless indicate that it provides international "telecommunications for a fee . . . to the public." The definition of telecommunications service in the Act does not limit that definition to include only those entities that *perform the transmission* of calls, as Digicel argues. Rather, the Act defines telecommunications services as "the *offering* of telecommunications . . . *regardless of the facilities* **[**45]** *used*." *47 U.S.C. § 153(53)* (emphasis added).

[*1156] Digicel Haiti's own allegations continue to show that Digicel Haiti offers the service of transmitting calls from the United States to Haiti. Digicel Haiti charges third-party carriers in the United States $0.23 per minute for calls from the United States that terminate on Digicel Haiti's network in Haiti. Digicel Haiti alleges that "[t]here is no separate charge to third-party carriers for the use of the Digicel Group's telecommunications capacity between the United States and Haiti, the minimum 23 cents per minute charge for terminating calls on the Digicel Haiti network is considered to cover that transport function as well." Thus, Digicel Haiti offers what can be described as a package of services that includes the transmission of the call data from the United States to Haiti and the termination of the call on Digicel Haiti's network. That Digicel Haiti appears to sub-contract the transmission function to its sister corporation, which it then pays through intercompany transfer, does not change the fact that Digicel Haiti offers the transmission for a fee. Indeed, to the extent that Digicel USA offers a service at all, as alleged in Digicel Haiti's complaint, **[**46]** it offers that service to Digicel Haiti. The inclusion of the phrase "regardless of the facilities used" in the definition of telecommunications service emphasizes that a telecommunications carrier is defined as such by the transmission service it offers, and not how or by whom the transmission is performed. Moreover, Digicel Haiti's RLYH program is specifically designed for customers in the United States to place calls to Haiti at a discounted rate. Regardless of how the transmission function is performed, in offering the RLYH program, Digicel Haiti offers the transmission of a call from the United States to Haiti for a fee and, as such, is an international telecommunications carrier. Digicel Haiti is therefore subject to the Communications Act.

CONCLUSION

Digicel Haiti's Motion to Strike Affirmative Defenses (ECF 132) is GRANTED IN PART and DENIED IN PART. UPM's first and second affirmative defenses are stricken and the motion is denied in all other respects. Digicel Haiti's Motion to Dismiss Counterclaims (ECF 133) is GRANTED IN PART and DENIED IN PART. UPM's seventh counterclaim is dismissed and the motion is denied in all other respects. The Court grants UPM leave to file a second **[**47]** amended answer within 21 days of the entry of this Opinion and Order.

IT IS SO ORDERED.

DATED this 30th day of March, 2018.

Plans, blue cross, Marks, licenses, blue shield, service area, provider, license agreement, trademark, brand, licensees, Sherman Act, horizontal, products, health insurance, allocations, competitors, rule of reason, best efforts, antitrust, territorial, single entity, price fixing, entities, benefits, uncoupling, prices, insurers, compete, output

Judges: **[**1]** R. DAVID PROCTOR, UNITED STATES DISTRICT JUDGE.

Opinion by: R. DAVID PROCTOR

Opinion

[*1246] **MEMORANDUMOPINION SECTION 1 STANDARD OF REVIEW AND SINGLE ENTITY DEFENSE**

I. Introduction

As the Supreme Court has observed, "the 'central evil addressed by Sherman Act *§ 1*' is the 'elimin[ation of] competition that would otherwise exist.'" *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 195, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (quoting Areeda & Hovenkamp ¶ 1462b, at 193-194).

Currently before the court are (1) the parties' respective motions for partial summary judgment on the standard of review applicable to Plaintiffs' claims under *Section 1 of the Sherman Act, 15 U.S.C. § 1* (Docs. # 1348, 1350, 1353), and (2) Subscriber Plaintiffs' motion for partial summary judgment on Defendants' "single entity" defense.

(Doc. # 1434).[1] The motions **[*1247]** have been fully briefed. (Docs. # 1431, 1432, 1435, 1551, 1552, and 1554). And, the parties have conducted discovery that the court found necessary before deciding the appropriate standard of review for the Sherman Act claims. *See* *In re Blue Cross Blue Shield Antitrust Litig., 26 F. Supp. 3d 1172, 1186-87 (N.D. Ala. 2014)*. *See also* *Nat'l Bancard Corp. v. VISA U.S.A., Inc., 779 F.2d 592, 596 (11th Cir. 1986)*.

II. Relevant Undisputed Facts

The facts set out in this opinion are gleaned from the parties' submissions of facts claimed to be undisputed, their respective responses to those submissions, and the court's own examination of the evidentiary record. All reasonable doubts about the facts have been resolved in favor of the **[**2]** nonmoving party. *See* *Info. Sys. & Networks Corp. v. City of Atlanta, 281 F.3d 1220, 1224 (11th Cir. 2002)*. These are the "facts" for summary judgment purposes only. They may not be the actual facts that could be established through live testimony at trial. *See* *Cox v. Admr. U.S. Steel & Carnegie Pension Fund, 17 F.3d 1386, 1400 (11th Cir. 1994)*. Some familiarity with the Blue Cross and Blue Shield organizations is presumed.

A. The History of Blue Cross and Blue Shield Organization

Nearly one hundred years ago, Justice Holmes reminded us that a "page of history is worth volumes of logic." *N.Y. Trust Co. v. Eisner, 256 U.S. 345, 349, 41 S. Ct. 506, 65 L. Ed. 963, T.D. 3267 (1921)*. In order to properly assess Plaintiffs' claims and Defendants' arguments, the court begins with a discussion of the history of the Blue Cross and Blue Shield organization and the trademarks (the "Blue Marks").[2]

During the Great Depression, the majority of the population was medically underserved because most people simply could not afford hospital and medical care. (Docs. # 1349 at 11; 1431 at 14; 1435 at 10, n. 4).[3] In response, local hospitals and medical societies developed prepaid plans to serve Americans' healthcare needs in local areas. (Docs. # 1349 at 11; 1431 at 14; 1435 at 10). On occasion, a subscriber prepaid at one hospital but desired services from a different hospital at the time of illness. To remedy this problem, multi-hospital plans became the norm. **[**3]** (Docs. # 1349 at 11; 1431 at 15; 1435 at 11).

By 1939, the American Hospital Association ("AHA") issued "Standards for Non-Profit Hospital Service Plans." (Doc. # 1350-13). Under these standards, approval by the AHA's Commission on Hospital Service gave a Plan "permission to identify the plan by using the seal of the American Hospital Association superimposed upon a blue cross." (Docs. # 1350-13 at 5-6; Doc. # 1353-19 at 6). The approval program for Blue Cross Plans was controlled by the Blue Cross Commission. **[*1248]** (Doc. # 1353-5 at 11-12). The AHA standards discouraged the establishment of new Plans where the community was already being "adequately served by existing Blue Cross Plans." (Doc. # 1353-5 at 14). The Blue Cross Commission promoted one Plan per service area to reduce administrative costs through economies of scale, as well as to reduce health care costs by obtaining participation of hospitals on more favorable terms to the Plans. (Doc. # 1431-29 at 13-15).

---

[1] Defendants address their single entity defense within their "omnibus" Brief in Support of Defendants' Motion for Summary Judgment on Plaintiffs' *Section 1*, Per Se, and Quick Look Claims. (Doc. # 1353-1 at 28-32).

[2] As will be explained more fully below, the Blue Cross and Blue Shield trademarks play a central role in the business strategy employed by the Defendants in this case. For example, defending the strength of the Blue Marks is ostensibly the justification for many of the alleged restraints challenged by Plaintiffs.

[3] Due to (1) the volume of exhibits filed in support of the parties' respective motions for partial summary judgment, and (2) the parties' inability to cite to CM/ECF page numbers because of the volume of sealed exhibits in this case, in some instances, the court has relied on the parties' respective responses to an opponent's asserted undisputed facts in compiling the relevant undisputed facts referenced in this opinion. That is, where appropriate, if a party has not disputed an asserted undisputed fact, the court has relied on that failure to dispute the asserted undisputed fact as establishing that fact as undisputed for purposes of the instant motions.

The American Medical Association ("AMA") also approved the concept of prepayment plans, and promulgated approval standards for such plans. (Docs. # 1349 at 12; 1431 at 15; 1435 at 13). The AMA set up the Associated Medical Care **[**4]** Plans ("AMCP") "to administer the approval program" for Blue Shield Plans. (Doc. # 1353-7 at 84-85). Medical care plans that met the AMA/AMCP's standards likewise could use a blue shield emblazoned with a caduceus. (Docs. # 1353-20 at 16; 1431 at 15; 1435 at 13).

The taxation of excess profits and the freezing of wage rates during World War II stimulated employer participation in paying the cost of hospitalization and other medical protection for employees. This change enabled employers to give a small wage increase to their employees at very little net cost to themselves by paying part or all of the cost of group health insurance. (Doc. # 1353-4 at 76). After the war, the Taft-Hartley Act established health benefits as a condition of employment (Doc. # 1353-7 at 93), and the National Labor Relations Board ruled that health insurance was "a mandatory subject of collective bargaining." *Cross, W.W., & Co., 77 N.L.R.B. 1162 (1948)*.

In 1947, in an effort to better compete with commercial insurance companies for employer-sponsored plans, Plans started experimenting with syndicates. (Doc. # 1353-7 at 94). Under these arrangements, a Plan in a state where a company's home office was located negotiated benefits at a certain price. (***[**5]*** *Id.*). Plans in other regions or states where the company had operations were given the details of the arrangement, and those Plans could choose to participate in the arrangement. (*Id.*). The "Home" Plan guaranteed full delivery to the company and accepted all or part of the underwriting risk, depending on the cooperating Plans' agreed participation. (*Id.*). "Within five years, some 250 syndicates were providing coverage to about 1.2 million people." (Doc. # 1353-7 at 94). By working together, Plans were able to service national accounts, including the Federal Employees Health Benefit Program. (Doc. # 1353-1 at 16; 1431 at 18; 1435 at 17).

In 1972, the AHA transferred ownership of the Blue Cross Marks to the Blue Cross Association. (Doc. # 1349-1 at 32). On a separate track, the AMA-sponsored AMCP changed its name to the Blue Shield Medical Care Plans, then it became the National Association of Blue Shield Plans, and then later the Blue Shield Association. (Doc. # 1349-1 at 32-33).

At some point in the 1970s, the Blue Cross and Blue Shield Associations concluded that the Blue System needed cohesive national unity, which they believed could be achieved by working together. (Doc. # 1353-55 **[**6]** at 2). The staffs of the two associations began to consolidate in 1977 or 1978 (Doc. # 1349-1 at 33), but the associations did not legally merge until 1981 or 1982. (*Id.*). The associations merged in order to reduce duplication, increase efficiency, reduce administrative costs, enjoy economies of scale, and achieve greater coherence in the Blue Cross and Blue Shield system. (Doc. # 1353-10 at 80). At that time, the Blue Cross and Blue Shield names and Marks were brought under the control of one **[*1249]** organization, the Blue Cross and Blue Shield Association ("the Association"), which was governed by its Member Plans. (Doc. # 1352-43 at 3).

By the early 1980s, the Blue System was suffering from declining reserves, increasing financial instability, decreasing customer satisfaction, and declining business volume. (Doc. # 1349-7 at 9-24). According to the 1982 Long-Term Business Strategy, the Blue Plans viewed "collective strength" as their "only real defense" against business declines. (Doc. # 1349-7 at 23-24).

B. History of the Blue Cross and Blue Shield Marks

In 1934, the St. Paul hospital Plan began using a blue cross symbol. (Docs. # 1349 at 11; 1431 at 15; 1435 at 11). The first use of the **[**7]** Blue Shield Service Mark was by the Western New York Plan, located in Buffalo, New York, in 1939. (Doc. # 1350-35 at 2). Other Plans began using these same symbols as well. (*Id.*; Docs. # 1349 at 11; 1431 at 15; 1435 at 12).

Both the St. Paul and Buffalo Plans acquiesced in, and even encouraged, other Plans to use the Cross and Shield Marks during this time period. (Docs. # 1349 at 11; 1431 at 15; 1435 at 12). The St. Paul Plan allowed Plans in every bordering state (North Dakota, South Dakota, Wisconsin, and Iowa) to use the Blue Cross Marks. (Doc. #

1353-4 at 29-30). The Buffalo Plan allowed Plans in Syracuse and Rochester (locations close to Buffalo) as well as other Plans in New York to use the Blue Shield Mark. (Doc. # 1353-5 at 38).[4]

Between 1939 and 1947, the Shield Mark was used by various organizations for intrastate non-profit prepaid medical plans. (*Id.*). In 1946, the Commission of Associated Medical Care Plans was formed by certain medical plans. (Doc. # 1350-35 at 2). The Blue Shield Medical Care Plans is the successor to AMCP. (Doc. # 1432 at 15). On December 13, 1947, the Blue Shield Medical Care Plans (the "National Organization") formally adopted the Shield Mark as the **[**8]** official service mark for the Organization. (Docs. # 1350-35 at 2; 1353-48). Thereafter, in 1950, Blue Shield Medical Care Plans applied for federal registration of the Blue Shield Marks. (Docs. # 1353-46; Doc. # 1353-48). The Blue Shield Medical Plans had permission from the first user, the Buffalo Plan, to apply for registration. (Docs. # 1353-101; 1436-11 at 135-40). After the application for federal registration, on December 1, 1952, the users of the Shield Mark entered into an Agreement (the "1952 Agreement") relating to the Collective Service Mark "Blue Shield." (*Id.*; Doc. # 1352-227 at 24). Although the Plans "recogni[zed] that the words 'Blue Shield' and the identifying symbol *are* the property of the National Organization," the 1952 Agreement is silent as to the assignment of any rights in the Shield Mark to the National Organization. (Doc. # 1353-48 at 3) (emphasis added). It is also silent as to the creation and/or existence of any exclusive service areas. (*Id.*). Under the 1952 Agreement, the Blue Shield Plans were granted "permission" to use the Blue Shield Marks in interstate and foreign commerce. (*Id.*).

Previously, in 1947 and 1948, the AHA applied for and received federal **[**9]** registrations for the Blue Cross Marks, stating that it had adopted and was using the Marks. (Docs. # 1350-40, 1530-41, and 1530-42). However, at that time, the AHA did not have an assignment from the first user, the St. Paul Plan, and did not receive a formal assignment of the rights to the Blue Cross Mark until 1954. (Doc. # 1436-11 **[*1250]** at 56-57). After registering the Blue Cross Mark, the AHA had existing Plans sign License Agreements. (Doc. # 1353-11 at 7-8).[5] The License Agreements for four Plans -- Connecticut, Minnesota, Wisconsin, and Rockford, Illinois -- were subject to exceptions. (Docs. # 1353-11 at 8; 1353-101). Those Plans retained the right to their state registrations of the Blue Cross name and Mark. (*Id.*).

Hospital Service Corporation of Alabama, the predecessor to Blue Cross Blue Shield of Alabama, first used the Blue Cross Mark in 1939. (Doc. # 1431-91 at 98). It first used the Blue Shield Mark in 1947. (*Id.*).

C. The Structure of Blue Cross and Blue Shield Organization

At present, the Blue Plans are 36 independent companies and each company sells health insurance. (Docs. # 1351 at 10; 1432 at 17). The Blue Cross and Blue Shield Association itself does not underwrite any **[**10]** insurance policies. (Docs. # 1351 at 11; 1432 at 17; 1556 at 9). The governance structure of the Association is set out in its bylaws, which were approved by a vote of the Member Plans. (Docs. # 1351 at 11; 1432 at 17; 1556 at 9; 1532-6). The Plans are governing members of the Association. (Docs. # 1352-39 at 46-47; 1352-6 at 12-14). The Plans may amend or repeal the bylaws and adopt new bylaws. (*Id.*). Each Member Plan has also agreed to be bound by the Association Rules. (Docs. # 1350 at 12; 1432 at 11).

The Association's bylaws recognize that each of its Member Plans is autonomous in its operations. (Docs. # 1351 at 10; 1432 at 17; 1556 at 9; 1532-6). The Plans are financially independent entities. (Docs. # 1556 at 9; 1352-6 at 7). The Blue Cross and Blue Shield License Agreements provide, "Nothing herein contained shall be construed to constitute the parties hereto as partners or joint venturers . . . ." (Doc. # 1350-4 at 6).

---

[4] The February 20, 1987 Draft of the White Paper on the Blue Cross and Blue Shield Assembly of Plans recognized that unlicensed and unauthorized use of trademarks can result in abandonment. (Doc. # 1352-227 at 55-56).

[5] There was not a Plan in every state at this time. (Docs. # 1429-11 at 4-5; 1429-14). For example, there were no Plans in Alaska, Nevada, and Vermont. (*Id.*).

The Association is led by a Chief Executive Officer and President who, together with an executive team, are responsible for the day-to-day operations of the Association. (Docs. # 1352-39 at 46-47; 1352-6). The Association's Board of Directors is comprised of **[**11]** the CEO of each of the Member Plans plus the CEO of the Association. (Docs. # 1432 at 18; 1352-6). By majority vote, the Association Board of Directors elects the President of the Association on an annual basis. (*Id.*). The Association Board may also remove the President of the Association by majority vote. (*Id.*). The Blue Plan CEOs have fiduciary responsibilities to both their individual Plan and the Association. (Docs. # 1352-41 at 29-30; 1436-75 at 29).

The Membership Standards of the Association are adopted and amended by an affirmative vote of three-fourths of Plans and an affirmative vote of three-fourths of the total then current weighted vote of all Plans (a "double-three-quarters" vote). (Docs. # 1432 at 11, 19; 1352-127 at 11). The Member Plans may also amend the Association bylaws (*id.*), and the Association's Rules can be eliminated, by a double-three-quarters vote of the Plans. (Doc. # 1432 at 22).

In 1972, the AHA transferred ownership of the Blue Cross Marks to the Blue Cross Association. (Docs. # 1353-57 at 2; 1432 at 15-16). Blue Cross Plans then signed a license agreement with the Blue Cross Association. (Doc. # 1353-11 at 8). Those 1972 license agreements provided:

> The **[**12]** rights hereby granted are exclusive to Plan within the geographical area served by the Plan on the effective date **[*1251]** of this License Agreement, except that BCA itself reserves the right to use the Licensed Marks and Licensed Name in said area, and except to the extent that said area may overlap the area or areas served by one or more other licensed Blue Cross Plans on the effective date of this License Agreement, as to which overlapping areas the rights hereby granted are non-exclusive as to such other Plan or Plans only.

(Doc. # 1353-100 at 2).

In 1982, the Blue Shield Association (the successor to Blue Shield Medical Care Plans) and the Blue Cross Association merged into the Blue Cross and Blue Shield Association. (Doc. # 1432 at 16). As a result of the merger, the Association now owns the Blue Cross and Blue Shield names and Marks (the "Blue Marks"), and it in turn grants licenses to the Member Plans to use the Blue Marks. (Doc. # 1352-41 at 7).

Today, each Plan has signed a License Agreement with the Association. (Docs. # 1352-49 through 1352-128). Each of these License Agreements identifies an exclusive "service area" where a Member Plan may use the Blue Marks. (Docs. # 1352-49 through **[**13]** 1352-128; 1432 at 11, 19-20). The Association has a "Map Book" which memorializes the Plans' defined service areas. (Docs. # 1432 at 20; 1352-164 at 52-53, 241-46, 270). Under the License Agreements, subject to certain exceptions related to National Accounts and Government Programs, the Plans agreed that a "Plan may not use the Licensed Marks and Name outside the Service Area ... ." (Docs. # 1432 at 11, 20; 1352-127; 1352-49 through 1352-128).

Under the License Agreements, the Association may impose monetary fines on a Plan that uses the Blue Marks outside its service area. (Docs. # 1351 at 19; 1432 at 21). After thirty days' written notice and an opportunity to be heard, on a double-three-quarters vote, a Plan's License Agreement may be terminated for continued use of the Marks outside the Plan's service area. (*Id.*). The License Agreements themselves can be modified or terminated by a "double-three-quarters" vote of the Plans. (Docs. # 1352-49 through 1352-128).

Also under the License Agreements, the Association's rules, or both, a Plan generally may not develop a provider network or contract with a healthcare provider outside its service area for services to be provided under the Blue **[**14]** Marks. (Docs. # 1350 at 12; 1432 at 11). However, a Plan may contract with a healthcare provider in a county contiguous to the Plan's service area under certain defined conditions and for limited purposes. (*Id.*). A Plan may also contract with certain types of providers nationwide, such as laboratories, durable medical equipment providers, and specialty pharmacies, but medical professionals, hospitals, and outpatient facilities are not among these types. (*Id.*).

D. History of Service Areas

There have been efforts to enforce exclusivity of the Plans' service areas, but some competition between Plans has been a fact of life from the earliest days of the Blues' organization. (Doc. # 1353-4 at 50).

Since in the 1940s, the service areas of each Plan have been recorded, initially in three-ring binders called service manuals. (Doc. # 1352-164 at 52-53, 241-46, 270). The three-ring service manuals have been replaced by Map Books. (*Id.*). The 1976 version of the Map Book, for example, notes that the area served by the Blue Shield Plan in Alabama was the entire state of Alabama. (Doc. # 1433-7 at 2). These Map Books are not public record. They are considered by the Association to be "highly sensitive," **[**15]** are not distributed to the Plans, and are distributed only to a **[*1252]** limited number of employees. (Doc. # 1553-3 at 2).

The majority of the Plans' service areas are exclusive, *i.e.*, they do not overlap with another Plan's service area. (Doc. # 1432 at 11). In some cases, however, Blue Plans have overlapping service areas. For example, the following overlaps exist:

- Anthem Blue Cross offers Commercial Health Insurance Coverage across California, in the same geographic region as Blue Shield of California. (Docs. # 1436-79 at 8; 1436-81 at 11).
- Regence BlueShield of Idaho and Blue Cross of Idaho both offer Blue branded Commercial Health Insurance Coverage in Idaho. (Docs. # 1436-79 at 8; 1436-81 at 11)
- WellPoint, Inc. (Empire Blue Cross) offers Commercial Health Insurance Coverage in eight counties in upstate New York, where Blue Shield of Western New York (whose parent company is HealthNow) also offers coverage. Lifetime HealthCare, Inc. was also an overlapping Plan in New York. (Docs. # 1436-79 at 8; 1436-81 at 11).[6]

- In Pennsylvania, Highmark BCBS, Capital Blue Cross, Blue Cross of NE Pennsylvania, and Independence Blue Cross are overlapping Plans. (Docs. # 1436-80 at 7; 1436-81 at 11). **[**16]** [7]
- Three Cambia Plans (Regence BlueShield (in Washington), Regence BlueCross BlueShield of Oregon, and Regence BlueShield of Idaho) offer Blue branded Commercial Health Insurance Coverage in all but seven counties of Washington (Ferry, Stevens, Pend Oreille, Spokane, Lincoln, Adams, and Douglas) and Premera offers Commercial Health Insurance (under Blue Cross and/or Blue Shield licenses) in overlapping Washington counties. (Docs. # 1436-79 at 8; 1436-81 at 11).

There have been other instances of overlapping service areas for the Blue Cross Mark (at least for some periods of time) in Illinois, Kentucky, Maryland, New York, North Carolina, Ohio, and Virginia. (Docs. # 1350-27 & 1350-28). There have been other instances of overlapping service areas for the Blue Shield Mark (again, at least for some periods of time) in Illinois, Ohio, and Wisconsin. (Docs. # 1350-27 & 1350-28). Currently, in California, Idaho, and Pennsylvania, different Plans have the right to use different Marks, one the Cross and the other the Shield. In Washington, Plans have licenses to use different Marks, except in one county where two Plans have licenses to use the Shield Mark. In New York, there are fourteen counties **[**17]** with multiple licensees, but in half of those counties, the rights are to different Marks. In Georgia and Ohio, one Plan has a statewide license to use the Blue Marks, and another has a license in a small number of counties. (Doc. # 1432 at 12-13).

In September 1985, Community Mutual Insurance Company ("CMIC") began marketing and selling health insurance under the Blue Cross and Blue Shield Marks in Ohio. (Doc. # 1429-9 at 21). The Association filed a Complaint against CMIC seeking **[*1253]** to enjoin CMIC's marketing and sales outside of its exclusive service area ("ESA"). (*Id.*). Although a temporary restraining order was issued, after an evidentiary hearing, the Association's request for a preliminary injunction against CMIC was denied. (*Id.*). The Ohio Attorney General

---

[6] In a letter dated January 16, 2001, Thomas Hartnett, President and CEO of Blue Cross and Blue Shield of Western New York, acknowledged that there had been overlapping service areas for sixty (60) years. (Doc. # 1436-77 at 4). In fact, he expressed the opinion that the Blue brands "are strengthened in overlapping service areas where two Plans are able to compete freely" and they "have done so for many years." (*Id.*).

[7] Whereas Highmark has apparently espoused the idea of a single Blue Plan in Pennsylvania, Capital BlueCross's President and CEO has indicated he has seen an "increase in Blue business overall" in its own overlapping service area. (Doc. # 1436-63 at 2).

intervened in the lawsuit and asserted a counterclaim alleging that the Association's system of allocating ESAs violated antitrust laws. (*Id.*). The Association agreed to dismiss its claims against CMIC if the counterclaim against it was dismissed. (*Id.*). As a condition of that settlement, the Association agreed, for a period of time, not to pursue litigation seeking to enforce the ESAs against any of the Ohio Plans. (Doc. # 1429-9 **[**18]** at 22).

In the 1980s, the Attorney General of Maryland also sued the Association, alleging that its use of ESAs violated federal and state antitrust laws. (Doc. # 1350-21 at 2). The Association agreed to a settlement that allowed two Plans to compete using the Blue Marks throughout the State of Maryland until "completion of the Assembly of Blue Cross and Blue Shield Plans" or January 1, 1991, whichever was later. (Doc. # 1350-21 at 6).

Prior to January 1988, West Virginia had two Blue Plans which were licensed in mutually exclusive service areas in West Virginia. (Doc. # 1551 at 12). These Plans violated the terms of their License Agreements by competing in each other's service areas. (*Id.*) Neither Plan objected to the competition. (Doc. # 1431-4 at 2). Nevertheless, the Association considered various options to address the situation, including a merger between the Plans. (Doc. # 1431-4 at 2).

CEOs of the various Blues have had occasion to address ESAs. For example, a summary of conversations with four Blue CEOs in 1986 recognized that "[t]he major advantage of an exclusive franchise area was seen in the lessening of competition as well as the opportunity to discuss plans and proposals **[**19]** with companies in the same industry knowing that those ideas would not be used against you." (Doc. # 1436-12). And in interviews conducted by the Association in which questions about ESAs were asked, Plan CEOs stated that ESAs create "[l]arger market share because other Blues stay out and do not fragment the market" (Doc. # 1350-22 at 3), and allow for aggressive bargaining. (Doc. # 1350-23 at 3). "In turn, national accounts enjoy local discounts." (*Id.*). One CEO reported that "Plans benefit from the exclusive service areas because it eliminates competition from other Blue Plans" and that without service areas, "there would be open warfare." (Doc. # 1350-24 at 2).

The discovery to this point in the case, while broad, has focused particularly on Alabama. As of 2016, nine Plans, other than Blue Cross and Blue Shield of Alabama ("BCBSA"), had at least 10,000 members who resided in Alabama: Anthem (150,912); HCSC (97,497); Highmark (45,234); BlueCross BlueShield of Tennessee (37,111); Blue Cross Blue Shield of Michigan (29,579); USAble Mutual Insurance Company (Arkansas) (22,705); BCBSM (Minnesota) (16,834); Horizon Healthcare Services (New Jersey) (11,357); and Blue Cross and Blue Shield **[**20]** of North Carolina (10,192). In total, these Plans had in excess of 400,000 members residing in Alabama. (Docs. # 1350 at 17-18; 1432 at 17).

E. History of Blue Rules

Over the past three decades, the Blue Plans and the Association have adopted several strategies and Association rules that are relevant to the Sherman Act claims at issue in this MDL. The court discusses certain of these strategies below.

i. 1982 Long-Term Business Strategy

At the Association's 1982 annual meeting, a "Long-Term Business Strategy" **[*1254]** was presented to the Plans. (Docs. # 1350-15 at 3; 1352-164 at 80-84). In his presentation at the meeting, the Chairman of the Joint Executive Committee, who was appointed to work on an integrated business strategy, reported that "he would try to persuade members that they could not sustain the status quo and that fundamental change is the only realistic option." (Doc. # 1350-15 at 3). The Plans adopted several recommendations contained in the Long-Term Business Strategy, including requiring consolidation and allowing only one Plan per state. (Docs. # 1350-15 at 3; 1352-164 at 80-84). Proposition 1.1 of the Strategy was approved in November 1984 and provided that "[a]ll Plans to be **[**21]** joint Blue Cross and Blue Shield Plans, except when needs dictate otherwise, by the end of 1985." (Docs. # 1350-15 at 3; 1350-18 at 3; 1352-164 at 80-84). Proposition 1.2 of the Strategy, which was also adopted, stated that there should be "[o]nly one Plan per State, except when the Association Board of Directors agrees that business needs dictate otherwise, by the end of 1985." (*Id.*).

ii. 1985 Assembly of Plans

The Assembly of Plans sought to examine and redefine the relationship among the various Plans as well as between the Plans and the Association. (Doc. # 1349-10 at 11-12). In 1990, the Assembly of Plans made recommendations to the Blue Plans regarding Service Marks and ESAs. (Doc. # 1349-8 at 3). Those recommendations included the proposal that the Blue Cross License Agreements and the Blue Shield License Agreements be revised to be essentially identical. (*Id.*). The proposal would involve supplementation of the Blue Cross License Agreement. (Doc. # 1349-8 at 31). But the Blue Shield Agreement was to be essentially replaced with the Blue Cross Agreement, rather than supplemented, as the earlier Shield version "was prepared at a stage when licensing was in its infancy." (Docs. # **[**22]** 1349-8 at 31-32; 1353-48).

The revised 1991 Blue Cross License Agreements resulting from the Assembly of Plans contain the following provision regarding service areas:

> The rights hereby granted are exclusive to Plan within the geographical area(s) served by the Plan on June 30, 1972, and/or as to which the Plan has been so granted a subsequent license, which is hereby defined as the "Service Area," except that BCBSA reserves the right to use the Licensed Marks and Licensed Name in said Service Area, and except to the extent that said Service Area may overlap the area or areas served by one or more other licensed Blue Cross Plans as of said date or subsequent license, as to which overlapping areas the rights hereby granted are nonexclusive as to such other Plan or Plans only.

(Docs. # 1349-8 at 7, 1349-11 at 5). The new Blue Shield License Agreement resulting from the Assembly of Plans contains a virtually identical provision. (Doc. # 1349-8 at 54).

After the advent of the LTBS and AOP, the number of Blue Plans decreased from 114 in 1980, to 77 in 1990, and stands at 36 today. (Doc. # 1350-19 at 3).

iii. The Development of the BlueCard Program

In 1992, the BlueCard program was developed to, **[**23]** at least in part, address inefficiencies in the cooperative methods employed by the Blue Plans, including the lack of a uniform process, dissatisfaction of providers with their receivables, and customer confusion. (Docs. # 1348-6 at 20-21; 1353-53 at 156-68). Under BlueCard, Plans were required to make their local provider discounts available to all Blue Members, even if they lived in another Plan's service area. (Doc. # 1352-44 at 56).

In 1995, Member Plans adopted a license standard requiring all Plans to participate **[*1255]** in BlueCard. (Doc. # 1352-44 at 56). Following the adoption of BlueCard, Blue enrollment ceased declining and started increasing. (Doc. # 1353-68 at 12). BlueCard allowed the Blue Plans to provide subscribers a single point of contact like insureds enjoyed with the national insurers. (Doc. # 1353-61 at 2). BlueCard was another avenue that allowed the Plans to offer nationwide coverage. (Doc. # 1431-66 at 226-27).

Through the BlueCard program, the Plans have agreed that when a contracted provider treats a patient covered by a Home Plan, *i.e.*, a Plan outside the service area in which the provider is located, the Home Plan will reimburse the provider at a rate which equals **[**24]** (at a minimum) the levels received for providers under the provider's contract with its Host Plan, *i.e.*, the local Plan. (Docs. 1350 at 13; 1432 at 11). That is, "[i]n all cases, the [Host Plan] must pass the full amount of the discount/differential received from the provider to the [Home Plan]." (Doc. # 1433-1 at 3). Under BlueCard Rules, an access fee may be charged in connection with processing BlueCard claims, but that fee can be, and is frequently, negotiated or waived. (Docs. # 1433-1 at 8; 1433-12 at 5).

BlueCard is not a "product" which is sold on its own. (Doc. # 1556 at 12). A customer cannot buy access to the BlueCard network without buying a health product. (*Id.*). Further, participation in the BlueCard program is a requirement of the License Agreement between the Association and each individual Plan. (Doc. # 1432 at 12). However, under the Association Rules, a Plan could create a provider network that is not made available to BlueCard-eligible Members or Subscribers. (*Id.*).

There is specific evidence in the *Rule 56* record about BlueCard's effect in Alabama. In the 1980s, prior to the adoption of the BlueCard program, BCBS-AL contracted with twenty-nine providers in counties contiguous **[**25]** to Alabama. (Doc. # 1350-33 at 3-5). At some point, BCBS-AL stopped directly contracting with those providers. (*Id.*). The cessation of direct contracting provided savings for customers for the snapshot in time which was examined. (*Id.*).

iv. 1993 License Agreement Standard 11

In 1993, License Agreement Standard 11 was adopted by a double-three-quarters vote. (Docs. # 1351 at 20; 1352-183 at 46; 1432 at 22). Standard 11 is titled "Transactions Which May Impair the Value of the Marks and Name." (Doc. # 1352-183 at 44). That Standard provides that "[n]either a Plan nor any Larger Controlled Affiliate shall cause or permit an entity other than a Plan or a Licensed Controlled Affiliate thereof to obtain control of the Plan or Larger Controlled Affiliate or to acquire a substantial portion of its assets related to licensable services." (*Id.*). Standard 11 also sets forth certain requirements a Blue Plan must meet to transfer its license to a non-Blue entity. (Docs. # 1351 at 20; 1352-183 at 46; 1432 at 22). When Standard 11 applies, Blue rules provide that a Plan's license may be terminated if the requirements of the Standard are not met. (*Id.*).

v. 1994 Local Best Efforts

In 1994, the Association **[**26]** and the Plans adopted the Local Best Efforts Rule. (Docs. # 1349-15 at 20-21; 1349-16 at 7). Under the Local Best Efforts Rule, at least eighty percent of a Plan's annual health[8] revenue from within its designated **[*1256]** service area must be derived from services offered under the Blue Marks. (*Id.*).

vi. 1996 Acquisition Rules

In 1996, the Association and the Plans adopted acquisition rules to restrict the circumstances under which an adverse party could acquire a Plan. (Docs. # 1349-17 at 17; 1349-18 at 4). These rules prevent a Plan from transferring its license to a non-Blue entity without meeting certain standards. (Doc. # 1349-16 at 16-18).

vii. 1999 Uncoupling Regulations

In 1999, the Association and the Plans adopted Uncoupling Regulations. (Doc. # 1352-1 at 91). Under these Regulations, a Plan may choose to use a name in connection with the Blue Marks; however, if it does so, it may not thereafter "uncouple" that name from the Blue Marks. (*Id.*). For example, a Plan may call itself Acme Blue Cross and Blue Shield, but it may not later use the trade name Acme Health Insurance — it must keep the "Blue" in the trade name. (*Id.*).

viii. 2005 National Best Efforts

In 2005, a National Best Efforts **[**27]** rule was adopted. (Doc. # 1349-21 at 5). This rule requires a Plan to derive at least sixty-six and two-thirds percent of its national health insurance revenue under its Blue brands. (Doc. # 1349-16 at 7). Thus, under the National Best Efforts rule, any health revenue a Blue Plan may generate from

---

[8] The Local Best Efforts Rule applies only to health revenue "attributable to health care plans and related services and hospital services . . . offered within the designated Service Area." (Doc. # 1350-10 at 4).

services offered under any non-Blue brand is limited in relation to its Blue brand health revenue. (Doc. # 1432 at 20-21). Nonetheless, many Plans have had significant unbranded business. (Docs. # 1349-23 at 5; 1349-25 at 5-6).

ix. National Accounts

Under the License Agreements, the Association's rules, or both, a Plan may not bid on a National Account headquartered outside its service area using the Blue Marks unless the Plan in whose service area the National Account is headquartered agrees to "cede" the right to bid. (Docs. # 1350 at 11; 1432 at 11). In the limited instances of overlapping service areas, more than one Plan may bid for the business of a National Account. (*Id.*). Plans, including Blue Cross and Blue Shield of Alabama, have requested cedes from each other. (Docs. # 1350 at 11; 1432 at 12). Some of these requests have been granted and some have been denied. (*Id.*). On occasion, **[**28]** a Blue Plan will pay another Plan to cede the right to bid for a national account. (Docs. # 1431-1 at 28; 1551 at 12). Blue Cross and Blue Shield of Alabama has done so multiple times. (*Id.*).

Through collaboration, Plans compete with national insurers for national accounts. (Doc. # 1353-60 at 2). In 2011, the Blue share of the national account market was estimated at forty-six percent. (*Id.*). The top three national insurers -- Aetna, Cigna and United -- which offer healthcare financing plans and/or health insurance and related services in all fifty states (Docs. # 1350 at 18; 1432 at 17), had a combined share of forty-one percent.[9] (Doc. # 1353-60 at 2). Plans also compete with regional insurers. (Doc. # 1353-102 at 54).

F. Present Day Blue Plans

In 2015, fifteen of the Blue Plans were within the top twenty-five insurers in the United States as measured by total membership. (Docs. # 1350 at 18; 1432 at 17). Anthem was the second largest insurer in the country by membership and held Blue Cross and/or Blue Shield licenses in fourteen different states. (*Id.*). HCSC was the fourth or fifth largest insurer in the country **[*1257]** by membership and held Blue Cross and Blue Shield licenses in five states. **[**29]** (*Id.*). Other Blue Plans are among the top ten insurers by membership. (*Id.*). Blue Cross and Blue Shield of Alabama is the largest insurer in Alabama, and the sixteenth largest insurer in the nation by membership. (*Id.*).

One of BCBS-AL's corporate representatives, Tony Carter, testified that he defined BCBS-AL's competitors as follows: "in the broadest of sense, a competitor is anybody that sells a similar product." (Doc. # 1352-211 at 14, 44). When speaking about Anthem's proposed merger with Cigna, and in relation to the prospect of competing for national accounts outside of its fourteen-Blue service area, a representative of Anthem testified as follows:

> [O]ur current market is confined to the 14 states. We have the Blue Cross/Blue Shield license, and we have any number of customers and consultants that express an interest in working with us, and we're prohibited from doing that. To be able to go from — I know we're a national plan. We're a national plan that operates in 14 states. To be an [sic] national plan that operates in 50 states and have unfettered access, without asking permission to have a conversation with a prospect, would be — I don't know — exhilarating, I would say.

(Doc. **[**30]** # 945-1 at 3).

Nationwide, 96 percent of hospitals and 92 percent of physicians are in-network with the Blue Plans. (Docs. # 1353-82 at 6; 1435 at 27). Some subscribers have chosen to contract with the Blues and have favorable comments about the experience (Docs. # 1353-85 at 76-77; 1353-73 at 83), while others have complaints (Docs. # 1431-77 at 182-83; 1431-83 at 97, 258-59). Still others have expressed an interest in additional options and/or more competition for their health insurance needs. (Docs. # 1436-69 at 177-79; 1436-56 at 99).

---

9 Unlike the Blue Plans, who are dedicated to their local markets, the national insurers have demonstrated a willingness to pull out of markets and leave populations uninsured. (Doc. # 1353-102 at 56).

Over the years, certain Plan executives have expressed a concern that the ESAs violate antitrust laws. (Docs. # 1352-214 at 3; 1352-218 at 2; 1352-219 at 3; 1431-12 at 2; 1431-25 at 3; 1436-6 at 2). They have also expressed similar concerns about the Best Efforts Rules. (Docs. # 1352-219 at 3, 1436-8 at 2; 1336-5 at 24; 1436-87 at 3; 1436-87 at 3).

III. Summary Judgment Standard

The *Rule 56* summary judgment standard applies to an antitrust suit, just as it applies to any other suit. *Gulf States Reorganization Grp., Inc. v. Nucor Corp., 822 F. Supp. 2d 1201, 1208-09 (N.D. Ala. 2011)* (discussing the Supreme Court's disavowal of cases disfavoring summary judgment in antitrust suits), *aff'd*, *721 F.3d 1281 (11th Cir. 2013)*. Summary judgment is appropriate when the pleadings, depositions, affidavits, **[**31]** and exhibits show that there is no genuine issue of material fact, and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*, *(c)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. An issue of fact is "material" if it is a legal element of the claim under applicable substantive law which might affect the outcome of the case. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*; *Allen v. Tyson Foods, Inc., 121 F.3d 642, 646 (11th Cir.1997)*. An issue of fact is "genuine" if the record taken as a whole could lead a rational trier of fact to find for the non-moving party. *Allen, 121 F.3d at 646*. When evaluating a summary judgment motion, a court must view all the evidence and all factual inferences drawn therefrom in the light most favorable to the non-moving party and determine whether the evidence could reasonably sustain a jury verdict for the non-movant. *Celotex, 477 U.S. at 322-23*; *Allen, 121 F.3d at 646*.

[*1258] The appropriate standard for evaluating the conduct challenged under the Sherman Act --rule of reason or *per se* -- is a question of law for the court to decide. *Food Lion, LLC v. Dean Foods Co., (In re Milk Antitrust Litig.), 739 F.3d 262, 271 (6th Cir. 2014)* ("The district court's decision to use the rule of reason is a question of law ..., which we review de novo."). This legal issue, though, "is predicated on a factual inquiry into the restraint's competitive effect," *Nat'l Bancard Corp., 779 F.2d at 596*, which had previously led this court to defer its ruling on the standard of review at the motion-to-dismiss stage. *Blue Cross Blue Shield, 26 F. Supp. 3d at 1186-87*. While the **[**32]** selection of a mode of analysis (*per se* or rule of reason) is a question of law, sometimes "underpinning that purely legal decision are numerous factual questions." *In re Wholesale Grocery Prods. Antitrust Litig., 752 F.3d 728, 733-34 (8th Cir. 2014)*.

IV. Analysis

The court begins its analysis with a discussion of relevant antitrust principles and cases and then proceeds to apply those principles to the *Rule 56* facts presented by the parties. The court emphasizes that it analyzes the Blues' agreement as a whole to determine the appropriate standard of review. In other words, the court declines to examine the Blues' ESAs, best efforts rules, or brand restrictions in isolation where the *Rule 56* evidence reveals that the Blues, through the Association, enacted new and unique aggregate competitive restrictions on top of the ESAs during the 1990s and 2000s. *Cf. Sealy, 388 U.S. at 357* (emphasizing that the horizontal territorial allocations were "part of 'an aggregation of trade restraints'"). The court expresses no view about whether the ESAs alone qualify as a *per se* Sherman Act violation. The court separately analyzes the BlueCard program and the trademark uncoupling rules.

A. Antitrust Principles

Section 1 of the Sherman Act declares illegal "[e]very contract, combination in the form of trust or otherwise, or conspiracy, **[**33]** in restraint of trades or commerce among the several States . . . ." *15 U.S.C. § 1*. *See also Procaps, S.A. v. Patheon, Inc., 845 F.3d 1072, 1079-80 (11th Cir. 2016)* (describing the interchangeability of use for the terms contract, combination, and conspiracy). The antitrust laws are designed to protect competition, not competitors. *See, e.g., Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* (discussing Section 7 of the Clayton Act, 15 U.S.C. § 18); Aquatherm Indus., Inc. v. Fla. Power & Light Co., 145 F.3d 1258, 1262 (11th Cir. 1998) (discussing Section 1 of the Sherman Act). "[T]o establish a Section 1 violation, the plaintiff must first show that there was concerted action between two or more persons -- a 'conscious commitment to a common scheme designed to achieve an unlawful objective'-- in restraint of trade." Procaps, 845 F.3d at 1080 (quoting Monsanto Co. v. Spray—Rite Serv. Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)).

Of course, it is well-settled that Section 1 only prohibits concerted action that "unreasonably restrain[s] trade." *See, e.g.,* id. at 1081 (citing Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 98, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)); Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007) (quoting State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)). "The rule of reason is the [presumptive] standard for testing whether a practice restrains trade in violation of § 1." Leegin, 551 U.S. at 885; *see also* Texaco, Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 **[*1259]** (2006). A rule of reason analysis requires the court to weigh all of the circumstances surrounding the practice to determine whether it unreasonably restrains competition. Leegin, 551 U.S. at 885. Among other factors, the court can consider the relevant business, the history, nature, and effect of the challenged restraint, and the market power of the business **[**34]** or businesses imposing the restraint. Id. at 885-86.

Some types of concerted action, however, are deemed unlawful *per se* and are not analyzed under the wide-ranging rule of reason. Id. at 886. "The *per se* rule, treating categories of restraints as necessarily illegal, eliminates the need to study the reasonableness of an individual restraint in light of the real market forces at work . . . ." *Id.* (citing Bus. Elec. Corp. v. Sharp Elec. Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)). The Supreme Court has deemed certain types of activity to be *per se* violations of Section 1 of the Sherman Act because "experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it." State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997) (quoting Arizona v. Maricopa Cty. Med. Soc'y, 457 U.S. 332, 344, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)). "Restraints that are *per se* unlawful include horizontal agreements among competitors to fix prices . . . or to divide markets . . . ." Leegin, 551 U.S. at 886 (internal citations omitted). In particular, horizontal market allocations between competitors lower output and raise prices because "[a] firm that is free from effective competition will reduce its output below the competitive level (whether directly or . . . indirectly by raising price)." Gen. Leaseways, Inc. v. Nat'l Truck Leasing Ass'n, 744 F.2d 588, 594 (7th Cir. 1984). As the *Leegin* opinion indicates, the Supreme Court has affirmed the force of the *per se* rule, even in opinions where it has overturned **[**35]** particular applications of that doctrine. Id. at 886-87 (describing *per se* rules for horizontal agreements in an opinion that overruled the *per se* antitrust standard for vertical resale price maintenance agreements). *See also* State Oil, 522 U.S. at 10 (describing the basis for *per se* rules in an opinion that overruled the *per se* unlawfulness of vertical maximum price fixing); Quality Auto Painting Ctr. of Roselle, Inc. v. State Farm Indemnity Co., 870 F.3d 1262, 1271 (11th Cir. 2017) ("Certain classes of conduct . . . are deemed 'per se' violations, which are 'conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.'") (citation omitted).

The *per se* rule applies to certain forms of business relationships and concerted activity in all industries. Indeed, the Supreme Court has expressly rejected the argument that the *per se* standard should not apply to cases involving the health care industry due to the judiciary's lack of antitrust experience with that industry. Maricopa Cty., 457 U.S. at 349-51. As the Maricopa County opinion explains, otherwise *per se* anticompetitive conduct need not be reexamined under the rule of reason merely because it appears in a new industry. Id. at 350-51. This is true because a rule of reason inquiry into that type of anticompetitive conduct, **[**36]** even in the health care industry, is highly likely to be fruitless. *Id.*

Defendants claim that, to receive the benefit of the *per se* rule, Plaintiffs must show an agreement with no plausible procompetitive benefits, an anticompetitive character confirmed by judicial experience, and a purely horizontal character. (Doc. # 1349 at 34-35). But while there are undoubtedly **[*1260]** agreements that have been found to be *per se* violations that meet all those elements, that assertion does not square with Eleventh Circuit precedent. As our court of appeals has explained, an antitrust plaintiff's ability to proceed on a *per se* theory depends on "whether there was an agreement" to commit conduct that the Supreme Court has held to be unreasonable [*per se*] "because the unreasonableness of the restraint is presumed." *Levine v. Cent. Fla. Med. Affiliates, Inc., 72 F.3d 1538, 1545-46 (11th Cir. 1996)* (citing *Maricopa Cty., 457 U.S. at 344-45*, and *United States v. Trenton Potteries Co., 273 U.S. 392, 397-98, 47 S. Ct. 377, 71 L. Ed. 700 (1927))*.

B. *United States v. Sealy, Inc.* and *United States v. Topco Associates, Inc*.

All of the parties agree that *United States v. Sealy, Inc., 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967)* ("*Sealy*"), and *United States v. Topco Associates, Inc., 405 U.S. 596, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)* ("*Topco*"), are central authorities to consider in determining the appropriate standard of review for the alleged anticompetitive conduct by the Blue Plans and the Association. Plaintiffs contend that *Sealy* and *Topco* are full-force, binding Supreme Court precedents **[**37]** that establish the *per se* illegality of the scheme at the heart of their cases. (Doc. # 1350 at 26, 28) (contending that "this case is on all fours with *Sealy*" and that "the Blues' agreements are even more anticompetitive than the ones found to [be] unlawful *per se* in *Sealy* and *Topco*"); (Doc. # 1351 at 7) (citing *Sealy* and *Topco* for the argument that the trademark licensing conducted by the Association "is unlawful *per se* because it is another way for the competitors to divide and allocate territories, and thereby to agree not to compete"). Defendants, of course, disagree. They assert that *Sealy* and *Topco* present examples of market allocation that cannot be compared to the trademark licenses issued by the Association. (Doc. # 1349 at 47-49). Moreover, Defendants insist that *Sealy* and *Topco* "should be limited to their precise facts" because they are "inconsistent with modern antitrust jurisprudence." (*Id.* at 47 n. 7). Thus, a threshold issue in determining the proper standard of review here revolves around the proper application of *Sealy* and *Topco*.

In *Sealy*, the licensor, Sealy, agreed to allot exclusive territories to its licensees, a group of mattress manufacturers. *388 U.S. at 352*. The licensees agreed to not **[**38]** sell Sealy-branded products outside of their allotted geographic areas. *Id.* Nevertheless, the licensees could sell private label (*i.e.*, non-Sealy) products in any geographic market they chose. *Id.* Sealy's licensees owned "substantially all of its stock," and each director on Sealy's board of trustees had to "be a stockholder or a stockholder-licensee's nominee." *Id.* That board of trustees managed and controlled Sealy's affairs. *Id. at 352-53*. Through the board of trustees and the executive committee, the Sealy licensees controlled "the grant, assignment, reassignment, and termination of exclusive territorial licenses." *Id. at 353*.

As an initial matter, the Supreme Court concluded that Sealy, Inc. was "an instrumentality of the licensees for purposes of the horizontal territorial allocation." *Id. at 354*. It emphasized that the substance of the territorial restraint was horizontal because the actors who controlled the licenses were employees of the manufacturers and the license arrangements were designed to promote the interests of the manufacturers. *Id. at 352-54*. It rejected Sealy's argument that its board members and stockholders acted in a distinct role when making decisions **[*1261]** on behalf of Sealy. *Id. at 353*.

The Supreme Court also observed **[**39]** that Sealy instituted an "aggregation of trade restraints" that included price fixing and territorial allocation. *Id. at 354-55*. Sealy's stockholders implemented price fixing protocols by using Sealy's mechanisms. *Id. at 355-56*. The Supreme Court determined that the stockholders' use of price fixing was evidence that Sealy functioned as an instrumentality, not a separate entity. *Id. at 356*. And, it explained that the territorial allocations enabled the manufacturers' price fixing by providing any Sealy manufacturer "an enclave in which it could and did zealously and effectively maintain resale prices, free from the danger of outside incursions." *Id.* Therefore, the Supreme Court held that the horizontal territorial restraints presented in *Sealy* were unlawful *per se*, "without the necessity for an inquiry in each particular case as to their business or economic justification, their impact in the marketplace, or their reasonableness." *Id. at 357-58*.

In *Topco*, a group of small and medium-sized supermarket chains associated together to sell private-label goods under Topco's brand names. *405 U.S. at 598*. The grocery chains formed Topco "to obtain high quality merchandise under private labels in order to compete more effectively with larger national and **[**40]** regional chains." *Id. at 599*. None of the supermarkets associated with Topco held a majority share of its geographic market:

the supermarkets held between 1.5% to 16% market share within their respective geographic areas, and the average market share for Topco members was approximately 6%. *Id. at 600*. The Supreme Court noted that the combined sales of Topco's members were "exceeded by only three national grocery chains." *Id.* The supermarkets owned all of Topco's stock and equally distributed the association's voting rights. *Id. at 598*. Topco's directors were employees of the member supermarkets and usually executive officers in those companies. *Id.* The board of directors selected Topco's officers, and Topco's principal executive officers were required to be directors on the board. *Id. at 598-99*. As such, Topco's members possessed "complete and unfettered control over the operations of the association." *Id. at 599*.

Topco's bylaws allowed for three types of territorial marketing licenses, which included both exclusive and non-exclusive licenses. *Id. at 601-02*. But, as the Court concluded, even nonexclusive territorial licenses "prove[d] to be de facto exclusive." *Id. at 602*. Exclusive territories often were distributed to supermarkets that did not yet operate **[**41]** in those areas. *Id.* A supermarket chain seeking to join Topco had to receive approval from Topco's board of directors and 75% of Topco's members. *Id.* And, if the Topco member closest to the applicant or one who operated within 100 miles of the applicant voted against the applicant, the applicant then needed to receive 85% approval from the membership. *Id.* Topco's high membership thresholds provided a de facto veto for Topco members "in the territorial areas in which they [were] concerned." *Id.*

The Supreme Court held that the territorial restraints instituted by Topco were horizontal restraints, and, thus, *per se* violations of the Sherman Act. *Id. at 608*. It concluded that Topco's territorial allocations were entirely analogous to those in *Sealy* because (1) the licensees owned almost all of the licensor's stock, elected its board of directors, and controlled its business, and (2) the licensor agreed to not allow other competitors to **[*1262]** sell branded products in a designated territory in exchange for the licensee's promise to not expand its sales beyond that area. *Id.* The Supreme Court declined to address whether it would have found Topco's conduct to be anticompetitive under the rule of reason because **[**42]** the rigid *per se* standard does not allow antitrust defendants to justify naked restraints of trade with good intentions or alleged procompetitive benefits. *Id. at 609-10*. Specifically, the Supreme Court rejected the district court's finding that Topco's restrictions on intrabrand competition were justified by the benefits provided to interbrand competition. *Id. at 610-11*.

The holdings in both *Sealy* and *Topco* have remained viable. In 1990, the Supreme Court relied on *Topco* to summarily reverse a judgment by the Eleventh Circuit regarding a horizontal market allocation by bar exam review companies. *See* *Palmer v. BRG of Ga., Inc., 498 U.S. 46, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)* (*per curiam*). In *Palmer*, two bar review companies sold bar review courses in Georgia for approximately four years. *Id. at 47*. One of those companies agreed to exclusively license its brand name to the other and not compete with the licensee in Georgia in exchange for (1) a portion of the student fees paid, and (2) an agreement by the licensee to not compete with the licensor outside of Georgia. *Id.* Thereafter, the licensee substantially increased the price of its course from $150 to over $400. *Id.*

The Supreme Court reiterated its holding in *Topco* that "agreements between competitors to allocate territories to minimize competition **[**43]** are illegal." *Id. at 49* ("[H]orizontal territorial limitations . . . are naked restraints of trade with no purpose except stifling competition."). It concluded that the bar companies had entered into an unlawful market allocation since they (1) previously competed in Georgia, (2) agreed to allocate the Georgia market to the licensee, and (3) agreed that the licensor would compete in the remainder of the United States and the licensee would not do so. *Id. at 49*. "Such agreements are anticompetitive regardless of whether the parties split a market within which both do business or whether they merely reserve one market for one and another for the other."[10] *Id. at 49-50*. They are unlawful on their face. *Id.*

Since *Palmer*, the Supreme Court has cited *Topco* as authority to support the *per se* standard applied against certain horizontal restraints. *See* *Leegin, 551 U.S. at 909* (citing *Topco* to support the proposition that "sometimes

---

[10] Notably, one of the alleged conspirators in *Palmer*, BRG of Georgia, had never sold bar review courses outside of Georgia and had no apparent intent to do so. 12 Philip R. Areeda & Herbert Hovenkamp, ***Antitrust Law*** § 2030b at 220 n. 7 (3d ed. 2012).

[the Supreme] Court has imposed a rule of *per se* unlawfulness—a rule that instructs courts to find the practice unlawful all (or nearly all) the time"). The Supreme Court also has cited *Palmer* as authority for the application of the *per se* rule to horizontal market allocations. *F.T.C. v. Actavis, Inc., 570 U.S. 136, 133 S.Ct. 2223, 2230, 186 L. Ed. 2d 343 (2013)*; *Kirtsaeng v. John Wiley & Sons, Inc., 568 U.S. 519, 552-53, 133 S. Ct. 1351, 185 L. Ed. 2d 392 (2013)* (explaining that ***antitrust*** **[**44]** ***law*** "ordinarily forbid[s] market divisions"); *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 133-34, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*. Additionally, in 2010, the Supreme Court discussed the horizontal agreements at issue in *Sealy* and *Topco* without in any way indicating that either case had been overruled or abrogated by later developments in ***antitrust law***. *See* *Am. Needle, Inc. v.* ***[*1263]*** *Nat'l Football League, 560 U.S. 183, 200-01, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*.

With these antitrust principles and Supreme Court decisions in mind, the court turns to an analysis of the issues in this case.

C. There are Genuine Issues of Fact as to Whether Defendants Are a Single Entity

To state a claim under *Section 1*, a plaintiff must plead two elements: (1) that the defendant was involved in an agreement; and (2) that the agreement unreasonably restrained interstate or foreign trade. *Am. Needle, 560 U.S. at 186*. "The question whether an arrangement is a contract, combination, or conspiracy is different from and antecedent to the question whether it unreasonably restrains trade." *Id.* "The meaning of the term 'contract, combination . . . or conspiracy' is informed by the 'basic distinction' in the Sherman Act 'between concerted and independent action' that distinguishes *§ 1* of the Sherman Act from *§ 2*." *Id. at 190* (quoting *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))* (internal quotation marks omitted). Under *Copperweld*, in certain circumstances, distinct legal entities are incapable **[**45]** of concerted action for the purposes of *Section 1* and must be viewed as a single entity. *467 U.S. at 771*.

"*Section 1* is only concerned with concerted conduct among separate economic actors rather than their independent or merely parallel action;" therefore, it generally does not apply to the actions of single entities. *Abraham & Veneklasen Joint Venture v. Am. Quarter Horse Ass'n, 776 F.3d 321, 327 (5th Cir. 2015)*; *see also* *Am. Needle, 560 U.S. at 195*. However, the Supreme Court has "repeatedly found instances in which members of a legally single entity violated *§ 1* when the entity was controlled by a group of competitors and served, in essence, as a vehicle for ongoing concerted activity." *Am. Needle, 560 U.S. at 195*. The "key" consideration is whether the agreement "joins together 'separate decisionmakers,' *i.e.*, 'separate economic actors pursuing separate economic interests.'" *Abraham & Veneklasen Joint Venture, 776 F.3d at 327-28* (quoting *Am. Needle, 560 U.S. at 195*). "If so, then the agreement may 'deprive[ ] the marketplace of independent centers of decisionmaking[.]'" *Id. at 328* (quoting *Am. Needle, 560 U.S. at 195*).

It is undisputed that when Defendants merged the Blue Cross and Blue Shield Associations, they formed a single entity to license the Blue Marks. But this undisputed fact is not dispositive because "competitors are not allowed to make an otherwise horizontal agreement vertical by merely setting up a licensing corporation to 'impose' market-dividing agreements on **[**46]** its licensee-stockholders. 'We seek the central substance of the situation, not its periphery; and in this pursuit, we are moved by the identity of the persons who act, rather than the label of their hats.'" *Abadir & Co. v. First Miss. Corp., 651 F.2d 422, 426 (5th Cir. 1981)* (quoting *Sealy, 388 U.S. at 353*); *see also* *N.C. State Bd. Of Dental Examiners v. F.T.C., 717 F.3d 359, 372 (4th Cir. 2013)*, *aff'd*, *135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015)* ("[T]he Board's status as a single entity is not dispositive because '[c]ompetitors "cannot simply get around" antitrust liability by acting "through a third-party intermediary or joint venture."'") (internal quotation marks omitted) (quoting *Am. Needle, 560 U.S. at 202*) (in turn quoting *Major League Baseball Properties, Inc. v. Salvino, Inc., 542 F.3d 290, 336* ***[*1264]*** *(2d Cir. 2008)* (Sotomayor, J., concurring in judgment))).

Defendants argue that Plaintiffs' *Section 1* claims fail as a matter of law because Defendants operate as a single entity with respect to the governance of the Blue Marks. (Doc. # 1349 at 28). Defendants argue that, although the Plans are separate entities for operational purposes, the court must employ a functional approach to the inquiry. As to trademark enforcement, Defendants argue, they are a single entity because the Association now owns the Blue Marks and is responsible for licensing and protecting those Marks.

Plaintiffs argue that the facts show as a matter of law that Defendants are not a single entity. (Doc. # 1435 at 35-36). They argue that the Supreme **[**47]** Court in *American Needle reversed* the Seventh Circuit's decision, which had found that "single entity" status could be applied on a function-by-function basis.[11] (*Id.* at 36). Moreover, they contend that the facts here are "conspicuously *incompatible* with the notion that the BCBSA and its members are incapable of conspiring." (*Id.*) (emphasis in original).

In *American Needle*, the National Football League formed a corporate joint venture, National Football League Properties ("NFLP"), to manage its intellectual property. The NFLP initially granted nonexclusive licenses to several vendors to sell apparel with team insignias. Later, it granted an exclusive license to Reebok, thus excluding the plaintiff. *Am. Needle, 560 U.S. at 187*. The excluded plaintiff sued alleging antitrust violations. *Id.* The Court held that the licensing activities of the NFLP with regard to the team marks constituted concerted action within the meaning of *Section 1* of the Sherman Act. The Court concluded that "[a]lthough NFL teams have common interests such as promoting the NFL brand, they are still separate, profit-maximizing entities, and their interests in licensing team trademarks are not necessarily aligned." *Id. at 198*. The Court **[**48]** found that the NFL and its teams were legally capable of conspiring, because they did "not possess either the unitary decisionmaking quality or the single aggregation of economic power characteristic of independent action," but rather "compete[d] with one another...to attract fans, for gate receipts and for contracts with managerial and playing personnel." *Id. at 196-97*. The fact that the teams were operating independently through a single corporation did not protect their agreement from *Section 1* scrutiny: "Competitors 'cannot simply get around' antitrust liability by acting 'through a third-party intermediary or joint venture.'" *Id. at 202* (quoting *Salvino, 542 F.3d at 336*).

But *American Needle* does not win the day for Plaintiffs on summary judgment either. Here, the Marks at issue are more analogous to licensing of the league's joint NFL mark, rather than the individual teams' marks which were at issue in the case. *American Needle* left open the question of how the case would have been decided if decisions by the NFLP regarding the jointly owned NFL trademarks had been at issue. *560 U.S. at 201*.

The *Rule 56* evidence here shows that certain Plans initially developed "individual" trademark rights. Then, the Plans purposefully integrated those "individual" assets **[*1265]** **[**49]** into the separate Cross and Shield predecessors. (Doc. # 1349 at 31). Later, those entities applied for and received nationwide, federal trademark registrations and "licensed" the Marks back to the Plans employing ESAs based on the areas where the Plans previously used the Marks.[12]

Only in 1982, with the merger of the Blue Cross and Blue Shield Associations, did the Marks even arguably come under the control of a single entity. (Doc. # 1349-1 at 33). Around that time, Defendants formed a single entity and

---

[11] In *Abraham & Veneklasen Joint Venture*, the Fifth Circuit acknowledged that a functional approach is appropriate under *American Needle. Abraham & Veneklasen Joint Venture, 776 F.3d at 328*. But, the "key" inquiry underlying even a functional analysis remains the same: are independent centers of decisionmaking being removed from the market? *Id.* (citing *Am. Needle, 560 U.S. at 195*).

[12] Perhaps it may be more precise to say that this activity is what happened on the Blue Cross side. The parties have not drawn the court's attention to *Rule 56* evidence that indicates what occurred with Blue Shield License Agreements prior to the 1991 License Agreements which were developed after the Assembly of Plans. (Docs. # 1349-8 at 31-32; 1353-48). And, on the Blue Cross side, four Plans (Connecticut, Minnesota, Wisconsin, and Rockford, Illinois) retained the right to their state law trademark rights in their Blue Cross License Agreements. (Docs. # 1353-11 at 8; 1353-101).

Moreover, it is not entirely clear on the present record that the Blue Cross and Blue Shield bodies who applied for the respective federal trademarks had the authority to do so at the time the applications were submitted. Both entities represented that they made those applications with permission from the original users, and there is documentary evidence supporting the idea that permission from other concurrent users was given. But the parties have not drawn the court's attention to documents establishing actual assignments of the individual rights to those entities.

deliberately consolidated undisputedly separate Marks into that entity. However, as the court reasoned in *American Needle*:

> [It] is not dispositive that the teams have organized and own a legally separate entity that centralizes the management of their intellectual property. An ongoing *§ 1* violation cannot evade *§ 1* scrutiny simply by giving the ongoing violation a name and label. "Perhaps every agreement and combination in restraint of trade could be so labeled."

Am. Needle, 560 U.S. at 197 (quoting *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 598, 71 S. Ct. 971, 95 L. Ed. 1199 (1951))*.

Plaintiffs have also presented sufficient evidence to create a genuine issue of material fact as to the validity and/or enforceability of the Marks, and it is the licensing of these Marks that constitutes the "function" for **[**50]** which Defendants claim single entity status. There is also evidence that, among the Plans, even with respect to this particular "function," there are deep disagreements about whether service areas based on the Marks should be exclusive. Defendants' own documents show that certain Blue Plan CEOs believed that they could have protected the Marks without the ESAs. (Doc. # 1352-227 at 69). And, not all common law marks were exclusive. The License Agreements themselves recognize that a "Service Area may overlap areas served by one or more other licensed Blue [] Plans . . . as to which overlapping areas the rights hereby granted are nonexclusive as to such other Plan or Plans only." (Docs. # 1349-8 at 7; 1349-11 at 5).

There is also evidence in the record that, apart from the Blue Plans' ESAs (which are ostensibly based on the Marks), the Blues would be competitors under the Blue brand in the health insurance market. That is, it is genuinely disputed whether even related to this applicable function -- enforcing trademarks -- Defendants are acting as a single entity. A trier of fact could determine that Defendants remain "'separately controlled, potential competitors with economic interests **[**51]** that [are] distinct from [the Association's] financial well-being.'" *Robertson v. Sea Pines Real Estate Companies, Inc., 679 F.3d 278, 286 (4th Cir. 2012)* (quoting *Am. Needle, 560 U.S. at 201*). "[Courts] have repeatedly **[*1266]** found instances in which members of a legally single entity violated *§ 1* when the entity was controlled by a group of competitors and served, in essence, as a vehicle for ongoing concerted activity." *Am. Needle, 560 U.S. at 191* (citing, *inter alia, Sealy* and *Topco*).

Under these facts, the court cannot say, as a matter of law, whether Defendants' conduct can be shielded by the single entity defense. Because there remain genuine issues of material fact as to whether Defendants operate as a single entity as to the enforcement of the Blue Marks, the parties' respective motions for summary judgment on the single entity defense are due to be denied.

D. The Blues' Geographic Market Allocations

Plaintiffs' first *Section 1* theory is that the Defendant Blue Plans committed a *per se* violation of the Sherman Act when they agreed to allocate geographic markets for the sale of commercial health insurance and/or commercial healthcare financing services.[13] (Docs. # 1082 at ¶ 815; 1083 at ¶¶ 340, 469). Provider Plaintiffs also claim that the Blue Plans allocated geographic markets for the purpose of contracting with health care service **[**52]** providers. (*See* Doc. # 1083 at ¶¶ 323, 469). Both Provider and Subscriber Plaintiffs argue that the geographic market allocations constitute *per se* anticompetitive conduct under *Sealy* and *Topco*. (*See* Docs. # 1350 at 22-29; 1351 at 24-32).

---

[13] Provider Plaintiffs describe one facet of the alleged anticompetitive conspiracy as an agreement concerning healthcare financing services because the agreement allegedly concerns fully insured plans and Administrative Service Only ("ASO") plans. (Doc. # 1083 at ¶ 340). In contrast, Subscriber Plaintiffs indicate that ASO plans are not available substitutes for all Subscribers because they are not viable options unless the Subscriber (or his/her group plan) can afford to self-insure. (Doc. # 1082 at ¶ 553).

Defendants, in turn, advance five arguments in support of their position that the geographic market distributions should be analyzed under the rule of reason. First, they insist that the Association's rules, including the ESAs, have plausible procompetitive benefits because they have facilitated the creation of new and unique products. (Doc. # 1349 at 35-41). Second, Defendants claim that the ESAs are procompetitive because they "incentivize Plans to focus on local needs of their members and providers." (*Id.* at 41-42). Third, they argue that courts lack experience with the types of service areas at issue in this case because the service areas "arose organically" from the predecessors to the current Plans use of common law trademarks. (*Id.* at 45-47). Fourth, Defendants contend *Topco* and *Sealy* are distinguishable from the service areas at issue here because (1) the Blue Plans productively cooperate, (2) the Plans owned common law trademark rights in their service areas before **[**53]** the challenged agreement was formed, (3) the Plans have never entered into a naked price fixing agreement like the one in *Sealy*, (4) the commercial health insurance industry is more complex than the industries at issue in *Sealy* or *Topco*, and (5) the defendants in *Sealy* and *Topco* "actively modified territories throughout the conspiracy." (*Id.* at 47-49). Finally, Defendants assert that the challenged restraints are not purely horizontal because some restraints are historically the product of vertical arrangements between insurance plans and the AHA or AMA. (*See id.* at 52-53).

Plaintiffs insist that the Blue Plans' ESAs qualify as *per se* anticompetitive conduct under *Topco* and *Sealy*. While, to be sure, several similarities exist between the market allocations here and those presented in *Topco* and *Sealy*, the court need not decide whether the Blue Plans' service **[*1267]** area allocations alone constitute a *per se* violation of *Section 1*. This is the case because, like *Sealy*, Plaintiffs have presented evidence of an aggregation of competitive restraints -- namely, the adoption of ESAs *and*, among other things, best efforts rules -- which, considered together, constitute a *per se* violation of the Sherman Act. The court explains the **[**54]** reasoning behind this conclusion below.

1. The Association is a Licensee-Controlled Entity, Not a Vertical Licensor

The Blues contend that the Association is a vertical licensor and therefore the court is presented with vertical restraints, not horizontal ones. But that argument is off the mark. The Association's own bylaws demonstrate that the Association is funded and controlled by the Blue Plans, who receive licenses to use the Blue Marks. The licensees are deemed regular members of the Association and pay monthly dues to the Association that are set by a three-quarters licensee vote. (Doc. # 1352-6 at 7, 9). The Association's Board of Directors consists of the CEOs of all licensee Plans and the president of the Association. (*Id.* at 12-13). *Cf. Sealy, 388 U.S. at 352* (explaining that Sealy's directors had to either be a stockholder or a stockholder's nominee). A director can only be removed by a three-quarters vote of the other licensees and a three-quarters weighted vote of the licensees based on dues paid. (Doc. # 1352-6 at 13). Amendments to the Association's bylaws require approval by a three-quarters vote of the licensees and a three-quarters weighted vote of the licensees. (*Id.* at 26). Indeed, the Association describes **[**55]** itself as an organization controlled by the Blue Plans; the Association's training materials for directors state that "Member Plans have the authority to establish or change the constitutional framework or matters that affect fundamental aspects of the Blue System." (Doc. # 1352-48 at 3). *Cf. Sealy, 388 U.S. at 353* (explaining that Sealy's licensees were directly in control of its operations "without even the semblance of insulation"). For these reasons, the court finds the Association is comparable to the licensee-controlled entities in *Sealy* and *Topco*. Thus, the ESAs established by the Association must be examined as horizontal allocations, not vertical ones.

In addition, the undisputed record evidence also reveals that the Blue Plans control the terms of each Blue's License Agreement. The Blue Plans must act collectively "to alter the License Agreement's basic brand principles," but the Board of Directors -- comprised of Blue Plan executives -- possess the authority to amend or add regulations to use of the trademarks. (Doc. # 1352-48 at 5). Indeed, the Blue Plans vote on and approve amendments to the licensing agreements. (Doc. # 1352-164 at 138-39).

At oral argument, Defendants insisted that the Supreme **[**56]** Court's *American Needle* opinion limited the application of *Topco* and *Sealy* to licensor entities that are formalistic shells or sham entities. (Doc. # 1613 at 83-84). The court disagrees.In *American Needle*, the Supreme Court explained that the licensees in *Sealy* and *Topco* had conducted concerted action through agreements made with the licensor firm because the licensees acted based upon interests separate from those of the licensor firm. *560 U.S. at 200*. The Court further explained that such conduct implicates *Section 1* of the Sherman Act because "intrafirm agreements may simply be a formalistic shell for ongoing concerted activity." *Id. at 200-01*. *American Needle* discussed *Sealy* and *Topco* in relation to the single entity defense, not in the context of the *per se* rule established in those cases. And, while *American Needle* explained the policy rationale for holding parties within an entity liable for conduct committed for **[*1268]** their separate interests, it did not expressly limit the scope of *Sealy*'s and *Topco*'s development of the *per se* rule in market allocation cases to instances where the licensor firm merely acts as a formalistic shell. *See id. at 200-01*.

Defendants claim that the service areas arose from either common law trademark rights **[**57]** or plan requirements imposed vertically by the AHA and AMA. (Doc. # 1349 at 52). The court is not persuaded. First, at best, it is disputed whether the AHA or AMA required ESAs as a condition of insurance plan certification in the 1930s and 1940s. Indeed, the AHA's 1946 standards for approval of new Blue Plans only provided that new Blue Cross Plans should not be established in markets that were already served adequately by existing Plans. (Doc. # 1353-5 at 14). Moreover, the AMA's 1947 preliminary standards merely provided that the Plan was required to obtain the approval of the appropriate local or state medical association. (Doc. # 1353-6 at 82). Overlapping service areas existed at the time the AHA and AMA exercised ultimate control over certification. (*See* Doc. # 1353-5 at 19) (discussing the Blue Cross Commission's reluctance to enforce exclusive area requirements and observing "a number of [ ] instances of plans serving the same areas"). (*See also* Docs. # 1353-4 at 27, 32; 1353-5 at 27) (discussing areas where Blue Cross Plans and Blue Shield Plans competed in 1947). Thus, Defendants' insistence that the ESAs were a vertically-imposed condition of AHA or AMA certification is **[**58]** misplaced.

Second, Defendants' focus on the alleged vertical restraints imposed in the 1940s and 1950s disregards the effects wrought by the Long-Term Business Strategy and the Assembly of Plans in the 1980s. The Long-Term Business Strategy provided that all Blue Cross Plans and Blue Shield Plans in a geographic area would merge into one entity by the end of 1985. (Doc. # 1352-164 at 81-82). To facilitate this, the Association directed the chief executive officers of certain Plans to produce a merger table by no later than July 1983. (Doc. # 1352-164 at 81). The Association's representative has acknowledged that the Long-Term Business Strategy factored into the consolidation of Blue Cross and Blue Shield Plans,[14] which also constituted a consolidation of the service areas for those respective Plans. (Doc. # 1352-164 at 85). Likewise, during the Assembly of Plans, the Blue Plans approved amendments to the licensing agreements between the Association and each Plan. (Doc. # 1352-164 at 138-39). For these reasons, the court cannot conclude that the allocation of ESAs reflects conduct by a vertical licensor. Rather, the *Rule 56* evidence in the record supports the proposition that the allocation of **[**59]** areas was the result of the Association's plan to (1) consolidate Blue Cross and Blue Shield Plans and (2) issue new licensing agreements reflecting the competitive restraints agreed to by a majority of the Blue Plans.

2. The ESAs in Which Blue Plans May Sell Blue-Branded Insurance are At Least as Anticompetitive as the Exclusive Sales Areas at Issue in *Sealy* and *Topco*

As in *Sealy* and *Topco*, the Blue Plans entered into licensing agreements whereby **[*1269]** they agreed to only sell branded health insurance plans and related products within a certain geographic region. (*See, e.g.*, Doc. # 1352-49 at 3-4) (1991 Blue Cross license agreement for BCBS-AL). As a condition of these licenses, the Blue Plans explicitly agreed to not sell health insurance plans and services with the Blue Marks outside of their respective geographic service areas. (*E.g., id.* at 5). These license conditions between the Association and the individual Blue Plans are directly comparable to the license conditions enacted by the defendants in *Sealy* and *Topco. Topco, 405 U.S. at 602*; *Sealy, 388 U.S. at 352*.

---

[14] Indeed, the Association sent its executives to states with separate Blue Cross and Blue Shield insurance Plans to confer with their executives about the Long-Term Business Strategy. (Doc. # 1352-164 at 86-87). And, Association employees "may have served as mediators" that resolved issues arising during the mergers. (*Id.*). The Association's representative testified that its employees assisted in Plan mergers before the Long-Term Business Plan went into effect. (*Id.* at 87).

Furthermore, as in *Sealy*, the Blue Plans have instituted at least two additional restraints of trade along with the ESAs: they have limited the output of non-branded health insurance and related **[**60]** health financing products by the licensees within the licensee's service area(s), and they have limited the output of non-branded health insurance and related health financing products by the licensees nationwide. (*See* Docs. # 1349-15 at 20-21; 1349-16 at 7; 1349-21 at 5). *See also* *Sealy, 388 U.S. at 354-55* (discussing the aggregation of territorial and price fixing restraints conducted by Sealy). In this respect, the restraints of trade created by the Licensing Agreements and the Association's rules appear even more restrictive than those at issue in *Topco* and *Sealy* because the licensees in those cases remained free to sell any amount of non-branded products. *United States v. Topco Assocs., Inc., 319 F. Supp. 1031, 1037 (N.D. Ill. 1970)* (stating that Topco's licensees could expand by using another source of private brands and that the market allocations did not "have an appreciable influence on the decision of Topco members as to whether or not to expand"), *rev'd, Topco, 405 U.S. at 612*; *Sealy, 388 U.S. at 352* (noting that Sealy's licensees could sell private label products wherever they chose to do so). In contrast, here, there are strict limits placed on the volume of non-branded health insurance products the Blue Plans may sell both inside and outside their service areas. The record reveals that, before the Association enacted **[**61]** the National Best Efforts rule, an attorney representing Anthem's predecessors expressed "significant doubt whether, under the antitrust laws, an association like BCBSA *could* lawfully bar members from engaging in unbranded business outside their exclusive territories." (Doc. # 1555-1 at 7). In light of *Sealy* and *Topco*, that attorney's doubts were well founded.

3. Defendants' Attempts to Distinguish Their Licensing Agreements from Those in *Sealy* and *Topco* are Unavailing.

Defendants argue that there are several reasons why the ESAs created by the Licensing Agreements should not be subjected to *per se* review under *Topco* and *Sealy*. But none of these arguments are availing.

i. Unique Product

Defendants contend that the ESAs, along with other rules at issue in this case, facilitate the creation of new health insurance products. (*See* Doc. # 1352 at 36-41). In particular, Defendants claim that the Blue System provides "nationwide healthcare products available to all Blue subscribers and providers, including BlueCard, the Federal Employee Program, Blue Distinction and Blue365." (*Id.* at 37). According to Defendants, the Blue Plans require integrative mechanisms to produce a product for large national employee **[**62]** groups. (*Id.* at 38). They insist that a "new product exception" to the *per se* horizontal market allocation standard applies even in cases where cooperation is not necessary to create the product. (*Id.* at 39). Thus, they say, "[i]f the parties are doing more **[*1270]** than just allocating markets for the sole purpose of stifling competition, the rule of reason governs." (*Id.* at 40).

Defendants compare the nationwide health insurance they offer to the joint licenses created in *Broadcast Music, Inc. v. Columbia Broadcasting System, 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)* ("*BMI*"), but in doing so they seek to stretch that case far past its moorings. In *BMI*, the antitrust plaintiffs mounted a challenge to blanket music licenses. The Supreme Court recognized that the long history of antitrust cases concerning blanket licenses counseled against *per se* treatment of them. *441 U.S. at 10-16* (describing a consent decree entered into by the Government and one blanket license issuer in 1941, modifications to that consent decree, antitrust suits brought against the blanket licenses, and Congress's approval of similar blanket licenses in the *Copyright Act*). The Court also explained that the market for copyrighted music only existed because of copyright legislation and expressed doubt that those measures granted by Congress which were "reasonably **[**63]** necessary to effectuate the [copyright] rights" could be deemed *per se* violations of the Sherman Act. *Id. at 18-19*. The Court determined that the blanket license sellers provided a different product than the individual copyright holders could offer for at least three reasons: (1) the product included an aggregating service; (2) the license purchaser could immediately use all products covered by the license without conducting individual negotiations; and (3) the license purchaser had greater flexibility in music choices than a purchaser who obtained licenses for individual songs. *Id. at 21-23*. Ultimately, the Supreme Court held that "[j]oint ventures and other cooperative arrangements are not usually unlawful, at least not as price-fixing schemes, where the agreement on price is necessary to market the product at all." *Id. at 23*.

But here, *BMI* does not provide the assistance Defendants covet because, simply stated, they cannot claim they produce a unique product. The market allocations at issue are not necessary to market, sell, or produce health insurance. Insurers offered health insurance benefits on a nationwide scale in the 1940s and 1950s, although at that time they only offered indemnity benefits, not service **[**64]** benefits. (*See* Doc. # 1353-7 at 71) (discussing insurers' ability to offer uniform rates, uniform benefits, and one-stop shopping through indemnity plans). By the 1980s, the Blue Plans' market share, including their share of national health insurance accounts, had decreased because other insurers were able to provide health insurance services to those accounts. (Docs. # 1349-7 at 9-24; 1352-164 at 80-84). The plan to go to ESAs constituted a new marketing/sales strategy, not a new product. The products remain exactly the same — commercial insurance and insurance services. Thus, Defendants cannot rely on *BMI*'s unique product defense to foreclose application of the *per se* rule.

Defendants contend that, because the *Rule 56* record does not indicate that the national insurers offer products in all areas of all fifty states, other national insurers do not offer the same products as they do (or even similar ones). (Doc. # 1432 at 17). This argument fails to account for the Blues' sale of health insurance policies on a national scale well before the market allocations were implemented in the 1980s. The Blues offered a similar health insurance product -- through syndicates and with open provider networks **[**65]** -- both before and after the alleged allocations of markets; therefore, it cannot be said that the market allocations were *necessary* to market **[*1271]** the Blues' health insurance product at all. *Cf. BMI, 441 U.S. at 23*. At most, Defendants' argument indicates that the Blues' agreement has permitted them to offer a product (and, to be clear, it is precisely the same product — health insurance) in a more attractive manner. That argument does not establish, though, that the ESAs are necessary to provide health insurance or health insurance services.[15]

ii. Cooperative Ventures

Defendants next seek to compare their collaboration through the Association and the accompanying geographic market allocations to the market allocations analyzed under the rule of reason by the Supreme Court in *F.T.C. v. Actavis, 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, and by the Eleventh Circuit in *Procaps*. Neither analogy convinces the court to depart from the Supreme Court's on-point precedents in *Sealy* and *Topco*. As an initial matter, the *Actavis* opinion addressed a monopolization claim under the *Federal Trade Commission Act*, not a market allocation claim under *Section 1* of the Sherman Act. *133 S. Ct. at 2229-30*. Moreover, the Supreme Court recognized that the value of patent settlements and patent litigation **[**66]** problems counseled in favor of allowing reverse payment patent settlements. *Id. at 2234*. In rejecting the FTC's requested quick look standard, the Court determined that reverse payment settlements are sufficiently complex to warrant analysis under the rule of reason. *Id. at 2237-38*. Thus, while a reverse payment patent settlement can technically be construed as a market allocation in favor of one settling party, nothing in *Actavis* hints that horizontal geographic market allocations, such as those at issue here, are to be analyzed under the rule of reason.

Admittedly, unlike *Actavis*, the *Procaps* opinion addressed a complaint attacking an actual market allocation scheme. *Procaps, 845 F.3d at 1079*. Yet, *Procaps* involved allegations about a unique, unorthodox allocation. Procaps and Patheon were each involved in the market for softgel services and entered into a joint venture. *Id. at 1077-78*. Thereafter, Procaps filed suit under the Sherman Act against its former joint venture partner, Patheon, alleging that Patheon's acquisition of another player in the softgel industry, Banner, violated *Section 1* of the Act. *Id. at 1078-79*. Procaps specifically alleged that Patheon's acquisition of Banner placed Patheon in direct competition

---

[15] Defendants' reliance on *American Needle* and *NCAA* is also unavailing with regard to the ESAs at issue here. Both *American Needle* and *NCAA* recognized that rule of reason analysis was appropriate in those cases because they concerned sports leagues, in which collaboration between competitors is essential to creating any product at all. *American Needle, 560 U.S. at 202-03*; *NCAA, 468 U.S. at 101-02*. The very existence of the national health insurers against whom the Blue Plans compete shows that collusion between competitors is not essential to the sale of health insurance.

with Procaps, thus transforming the parties' **[**67]** legitimate joint venture into a *per se* illegal horizontal restraint. *Id. at 1079*. The Eleventh Circuit held that the scheme presented by the plaintiff did not reflect any concerted action proscribed by *Section 1*. *Id. at 1081-82*. Alternatively, it upheld the summary judgment entered against Procaps on the ground that there was no proof of anticompetitive effects of the alleged market restraint. *Id. at 1082*. The Eleventh Circuit declined to apply the *per se* market allocation rule reiterated in the Supreme Court's *Palmer* decision because the agreement at issue involved an alleged procompetitive joint venture that the plaintiff claimed became anticompetitive in light of the defendant's subsequent unilateral conduct. *Id. at 1082-84*. That limited distinction of the *per se* rule's application in *Topco, Sealy*, and *Palmer* does not apply here.

[*1272] E. National Best Efforts

The alleged scheme at issue here is not limited to Defendants' use of ESAs standing alone. As Subscribers point out, "there is more." (Doc. # 1351 at 32). In addition to allocating geographic markets through their use of ESAs, Defendants have developed additional rules which place added restraints on the Plans' ability to compete, and not only with each other.

The National Best Efforts rule, **[**68]** implemented in 2005, requires a Plan to derive at least sixty-six and two-thirds percent (66 2/3%) of its national health insurance revenue from its Blue brand. (Doc. # 1349-16 at 7). Thus, any health revenue a Blue Plan may generate from services offered under any non-Blue brand is limited in relation to its Blue branded health revenue. (Doc. # 1432 at 20-21). The National Best Efforts rule, therefore, operates as an output restriction on a Plan's non-Blue brand business.

"An agreement which has the purpose and effect of reducing output is illegal under *§ 1* of the Sherman Act." *A.D. Bedell Wholesale Co. v. Philip Morris Inc., 263 F.3d 239, 247 (3d Cir. 2001)* (collecting cases). "Horizontal price fixing and output limitation are ordinarily condemned as a matter of law under an 'illegal per se' approach because the probability that these practices are anticompetitive is so high; a per se rule is applied when 'the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output.'" *NCAA, 468 U.S. at 100* (quoting *BMI, 441 U.S. at 19-20*).

Defendants have largely defended their ESAs as incidental to trademark rights. But there is nothing in the *Rule 56* record which indicates that there is any valid connection between trademark rights and the National Best Efforts rule. **[**69]** The rule specifically restrains the Plans' ability to compete under *non-Blue* brands. This output limitation is separate from the limits related to ESAs, which prohibit the Blue Plans from competing, and thus earning revenue, outside of their area under their Blue brands.

Defendants argue that the National Best Efforts rule is not properly viewed as an output restriction because the rule leaves Plans plenty of "headroom" to compete under non-Blue brands. (Doc. # 1349 at 44). They also argue that the National Best Efforts restriction on competition under non-Blue brands generates plausible procompetitive benefits, such as "promot[ing] collaboration among Plans, encourag[ing] Plans to invest in the Blue Marks, and prevent[ing] transfer of the immense goodwill associated with the Blue Marks to other brands." (Doc. # 1556 at 41-42). The fact remains, however, that the rule places a limit on the revenue a Plan can earn under a non-Blue brand. The fact that the National Best Efforts rule imposes a relative limit, rather than an absolute limit (Doc. # 1432 at 52), is of no moment. It constitutes a limit or a restriction on the volume (output) of a Plan's non-Blue business. Thus, there is little **[**70]** question that, properly analyzed, the National Best Efforts rule is an output restriction.

Output restrictions have been called one of the "most important per se categories," along with naked horizontal price-fixing and market allocation. *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 61 (1st Cir. 2004)* (citing *U.S. Healthcare, Inc. v. Healthsource, Inc., 986 F.2d 589, 593 (1st Cir. 1993))*; *see also* *Xcaliber Int'l Ltd. LLC v. Atty. Gen. State of La., 612 F.3d 368, 375 (5th Cir. 2010)* (monopolization, price fixing, territorial divisions, output restrictions, group boycotts, and refusals to deal are considered pernicious to competition and, with **[*1273]** the exception of monopolization, are generally considered *per se* violations of the antitrust laws). In this case, a number of these "most important" *per se* categories of restrictions have been aggregated.

The court acknowledges that, in *NCAA* and *BMI*, the *per se* rule was not applied to the particular output restrictions presented under the unique facts of those cases. Indeed, the restraints in those cases were "essential if the product was to be available at all." *NCAA, 468 U.S. at 100*; *see also* *BMI, 441 U.S. at 24* . But that is not the situation here. The National Best Efforts restrictions on non-Blue brand business clearly are not necessary for the product to be "available at all." Health insurance is regularly made available to consumers without such restraints. And, similarly, it is made available in a national **[**71]** market by the National Insurers without any such restrictions. Importantly, it was available from Defendants without the National Best Efforts rule until 2005. (Doc. # 1349-21 at 5).

The undisputed evidence before the court establishes that, in 2005, Defendants adopted the National Best Efforts rule placing an output restriction on a Plan's non-Blue business. Defendants' National Best Efforts rule limits the extent to which the Plans can compete with Blue branded business under non-Blue marks. Whether the National Best Efforts rule benefitted the Plans' Blue branded business "is irrelevant. ... [Defendants have] no authority under the Sherman Act to determine the respective values of competition in various sectors of the market." *Garot Anderson Agencies, Inc. v. Blue Cross & Blue Shield United of Wis., 1993 U.S. Dist. LEXIS 3446, 1993 WL 78756, at *12 (N.D. Ill. Feb. 26, 1993)* (citing *Topco, 405 U.S. at 610-11*). Here, the National Best Efforts rule constitutes a *per se* violation of the Sherman Act, particularly when layered on top of other restrictions Defendants have placed on competition.[16]

F. BlueCard

Provider Plaintiffs (but not Subscribers) have also mounted a challenge to Defendants' BlueCard program. In particular, Providers assert that the BlueCard program constitutes a horizontal price fixing agreement and a group boycott. The court analyzes **[**72]** the standard of review that applies to each of these claims, in turn.

1. BlueCard as Price Fixing

Provider Plaintiffs argue that the BlueCard program constitutes horizontal price fixing and base that assertion on the following contentions: (1) BlueCard requires a health care provider who desires to enter the BlueCard network (and serve as an in-network provider for a Blue Plan) to agree to accept certain provider rates from each Blue Plan (note: this limits a provider's ability to negotiate different rates with various Blue Plans); (2) the Blue Plan Defendants have agreed that they will not pay any provider a different rate than the rate negotiated by the in-area Blue Plan; and (3) the Blue Plans are prohibited from negotiating separate contracting agreements with providers outside of their licensed area(s) for provision of health care services to Blue Cross and Blue Shield subscribers. (Doc. # 1350 at 30-31). According to Provider Plaintiffs, this set of agreements "completely eliminate[ ] the **[*1274]** possibility of price competition among the Blues for providers' services."[17] (*Id.* at 31).

In response, Defendants insist that application of the *per se* price fixing rule is limited to situations where **[**73]** conspirators preset prices between themselves. (Doc. # 1432 at 55). According to Defendants, the BlueCard

---

[16] While Plaintiffs have not pressed the issue in this set of motions, the court notes the existence of the Local Best Efforts rule but does not address whether it is part of the aggregation of trade restraints addressed in this opinion, including the ESAs and the National Best Efforts rule. The court reserves that question of whether the Local Best Efforts rule is a *per se* Sherman Act violation in isolation.

[17] At oral argument, the court noted that the BlueCard program consists of two sets of agreements: (1) agreements between Providers and their in-state Blue Plans to enter the Blue provider network for health care services at a particular price; and (2) agreements between the Blue Plans, through the Association, which establish the rules and procedures for BlueCard and set a fixed price for Provider services based on the rate negotiated by an in-state Blue Plan. Provider Plaintiffs agreed that they are challenging the latter category of agreements, not the former. To be sure, if they had challenged the former category of agreements between providers and Blue Plans, those agreements clearly would not constitute "price fixing" for purposes of the Sherman Act. *See* *Levine, 72 F.3d at 1548* (holding that a buyer network does not engage in price fixing prohibited by the Sherman Act if it agrees on a maximum price it is willing to pay for a product and sellers decide whether to accept that price).

program should be analyzed as a joint purchasing agreement. (*Id.* at 56). Defendants also insist that the court should not analyze the BlueCard program under a *per se* price fixing rule because the program offers significant procompetitive benefits. (*Id.* at 57). These claimed procompetitive benefits include: (1) access to high-quality insurance products with a local focus, broad provider networks, and competitive premiums; (2) access to a nationwide patient volume for health care providers; and (3) "prompt payments, ease of claims processing[,] and lower administrative costs." (Doc. # 1349 at 43).

In reply, Provider Plaintiffs argue that price fixing does not require the conspirators to agree on a specific price. (Doc. # 1557 at 25). They distinguish the agreements forming the BlueCard program from joint-purchasing agreements because (1) the agreements are related to the ESAs established by the Licensing Agreements, (2) the Blue Plans use the ESAs to create local monopolies, and (3) the lower provider prices obtained through the Blues' alleged monopolistic conduct are shared with other Plans. (*Id.* **[**74]**).

It is axiomatic that horizontal price-fixing schemes are *per se* violations of the Sherman Act. *See* *All Care Nursing Serv., Inc. v. High Tech Staffing Servs., 135 F.3d 740, 746 (11th Cir. 1998)*; *Dagher, 547 U.S. at 5*. Price fixing schemes violate the Sherman Act whether committed by sellers or buyers of goods and services. *All Care Nursing, 135 F.3d at 747* (citing *Mandeville Island Farms, Inc. v. Am. Crystal Sugar Co., 334 U.S. 219, 233-37, 68 S. Ct. 996, 92 L. Ed. 1328 (1948))*. And, the Supreme Court has broadly defined price fixing to include any "combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce." *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*.

At the same time, the court recognizes that not all agreements between competitors that affect prices may be deemed price fixing. *All Care Nursing, 135 F.3d at 747* (quoting *BMI, 441 U.S. at 23*). For example, in *All Care Nursing*, the Eleventh Circuit held that a preferred provider network of contract nurses did not qualify as a *per se* price fixing scheme because (1) all contract nursing agencies in the geographic area could submit bids to the provider network, (2) the nursing agencies could provide services to the hospitals in the preferred provider network if preferred agencies could **[*1275]** not meet the hospitals' demand, and (3) the nursing agencies in the provider network could leave the network if market conditions favored doing so.[18] *Id. at 747-48*.

Pricing decisions within a legitimate **[**75]** joint venture between competitors also do not constitute *per se* violations of the Sherman Act. *Dagher, 547 U.S. at 8*. Such a joint venture is considered a single firm for purposes of making pricing decisions if "persons who would otherwise be competitors pool their capital and share the risks of loss as well as the opportunities for profit." *Id. at 6* (quoting *Maricopa County, 457 U.S. at 356*). This is so even if the joint venture sets prices and sells products under multiple brands used by the competitors that established the joint venture. *Id. at 6-7* (explaining that such pricing decisions should be challenged under the rule of reason, not the *per se* standard).

Cooperative purchasing arrangements also do "not necessarily stifle competition," as they can be used by purchasers to "exploit[ ] the productive efficiencies that result from conducting business on a larger scale." *N. Jackson Pharmacy, Inc. v. Caremark RX, Inc., 385 F. Supp. 2d 740, 747 (N.D. Ill. 2005)* (quoting Roger D. Blair & Jeffrey L. Harrison, *Monopsony:* ***Antitrust Law*** *and Economics* 93-94 (1993)). Of course, such agreements also can allow competitors to exploit their monopsony power by driving prices below competitive levels. *Id.* (quoting Blair & Harrison, *Monopsony* at 93-94). In *North Jackson Pharmacy*, the court determined the type of cooperative purchasing conducted by the defendant, a pharmacy **[**76]** benefits manager, by analyzing whether the cooperative purchasing agreement was an ancillary restraint to a larger productive enterprise or a mere naked restraint between competitors. *Id.* It determined that the cooperative purchasing conducted by the pharmacy benefits manager must be analyzed under the rule of reason, not a *per se* standard, because (1) the benefits manager likely was able to lower prices through economies of scale, (2) the Federal Trade Commission had analyzed a merger conducted by the benefit manager and had found a low likelihood of monopsony in the relevant

---

[18] Providers have maintained throughout these actions that it is not feasible for Alabama Providers to forgo entering the BlueCard Provider network due to the Blues' overwhelming market share in Alabama. (*See, e.g.*, Doc. # 1613 at 34-35).

market, and (3) the agreement at issue was one likely to produce lower consumer prices in the short term.[19] *Id. at 749-50*.

[*1276] Here, Provider Plaintiffs do not present a classic price fixing scheme in which the competitors preset prices for purchasing goods between themselves. *Cf. Maricopa Cty., 457 U.S. at 335-36* (addressing a maximum fee schedule set by physicians for health services). Rather, they challenge an agreed set of rules whereby prices for healthcare services paid by the entire group of Blue Cross and Blue Shield insurers -- all 36 separate Blue entities -- are set **[**77]** by negotiations between a provider and its in-state Blue Plan. Moreover, the Blue Plans have agreed to not negotiate with health care providers unless they operate within a Blue Plan's ESA or in a contiguous county. While the court recognizes that concerted activity can qualify as *per se* price fixing in the absence of preset prices, *see Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980)* (applying *per se* horizontal price fixing standard to horizontal agreement to not provide credit to purchasers), the cooperative integration at the heart of the BlueCard program requires more detailed review.

Like a joint venture, the Blue Plans have integrated certain assets to create the BlueCard program. They have agreed to integrate their best provider networks into BlueCard and to allow other Blue Plans access to their best provider discounts. (*See* Docs. # 1431-30 at 4; 1431-32 at 4). Moreover, like a joint venture, the Blue Plans share a significant degree of opportunities for profit and risks of loss by relying on the BlueCard program, rather than independent negotiations, to obtain discounted provider rates. *Cf. Dagher, 547 U.S. at 6*. If a Blue Plan in a particular area negotiates particularly well with the health care providers in that area and obtains above-average **[**78]** discounts, then the other Blue Plans also receive the benefit of those discounts. But, if a Blue Plan in another area performs poorly in its provider negotiations and secures below-average discounts, then the other Blue Plans pay the higher-than-average costs for health care services. The similarities between the integrative aspects of the BlueCard program and a traditional joint venture weigh in favor of applying the rule of reason to Provider Plaintiffs' price fixing claims based on that program.

Finally, as *North Jackson Pharmacy* explains, cooperative purchasing arrangements between competitors can have procompetitive and anticompetitive effects. *385 F. Supp. 2d at 747*. They can allow purchasers to obtain the benefits of economies of scale, or they can allow purchasers to coerce suppliers into offering below-competitive prices for products. Given the plausible procompetitive benefits of the BlueCard program, Provider Plaintiffs' price fixing claims are due to be analyzed under the rule of reason, even though the Blue Plans arguably have pegged prices for services provided to out-of-state Blue Plans to those negotiated by the in-state Blue Plan.[20]

---

[19] In *North Jackson Pharmacy*, the court also noted a judicial hesitancy to interfere with cooperative arrangements in the health care industry and this concern served as its final rationale for applying the rule of reason to the Sherman Act claims against the pharmacy benefits manager. *385 F. Supp. 2d at 750* (quoting *Kartell v. Blue Shield of Mass., Inc., 749 F.2d 922, 931 (1st Cir. 1984)* (Breyer, J.)). Several Eleventh Circuit opinions have expressed a similar reluctance to apply *per se* antitrust standards to restrictive practices performed in the health care industry. *See All Care Nursing, 135 F.3d at 748* (declining to apply the *per se* group boycott rule against a preferred provider network because a recognized history of anticompetitive effect did not exist "for health-care preferred-provider programs"); *Levine, 72 F.3d at 1550-51* (declining to apply the *per se* group boycott rule to multiprovider networks, in part because the Department of Justice had determined that it lacked sufficient experience with such networks to provide a formal policy regarding them). But, in *Maricopa County*, the Supreme Court expressly rejected the argument that the *per se* price fixing rule should not be applied to the price list at issue because of the judiciary's lack of experience with the health care industry. *457 U.S. at 349-51*. Likewise, the Court rejected the assertion "that the *per se* rule must be rejustified for every industry that has not been subject to significant antitrust litigation." *Id. at 351*. In accordance with *Maricopa County,* this court does not believe that any quirks unique to the health care industry, standing alone, justify application of the rule of reason to the alleged price fixing agreements challenged in Provider Plaintiffs' claims regarding BlueCard.

[20] Again, it is noteworthy that Subscriber Plaintiffs do not challenge BlueCard as an antitrust violation. This *may* prove significant. Recently, the Supreme Court granted *certiorari* to review the application of the Sherman Act to two-sided platforms that unite distinct yet interrelated groups of customers. ***Ohio v. American Express Co., 138 S. Ct. 974, 200 L. Ed. 2d 217 (S. Ct. argued 2018)***. The *American Express* case concerns the credit card market, not the health insurance market. The Second Circuit held -- based in part on the parties' agreement -- that the *Section 1* Sherman Act claims in ***[**79]*** *American Express* are to be analyzed under the rule of reason. *United States v. Am. Express Co., 838 F.3d 179, 195-96 (2d Cir. 2016)*, *cert. granted sub. nom,* ***Ohio***

[*1277] 2. BlueCard as Group Boycott

At oral argument, Provider Plaintiffs asserted that the BlueCard program constitutes a group boycott because the Blue Plans "all agreed [ ] that as a Blue they will not contract with providers outside their service area." (Doc. # 1613 at 29). Although the group boycott claim is not discussed at depth in the parties' summary judgment briefs, the court will address it here. After careful review, the court determines that more evidentiary submissions will be required to determine the appropriate standard of review for the group boycott claims.

The Eleventh Circuit has recognized that certain group boycotts constitute *per se* **[*1278]** violations of the Sherman Act. *All Care Nursing, 135 F.3d at 746*. Yet, the Eleventh Circuit has also echoed the Supreme Court's caution against expanding the group boycott *per se* rule, as "[n]ot all concerted refusals to deal are predominantly anticompetitive." *Id. at 748* (quoting *Nw. Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 298, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)*). Group boycotts generally are only subjected to a *per se* analysis if (1) the boycott blocks access to a necessary product, facility, or market for competition, or (2) if the boycotting firms possess market power within the relevant market. *Id.* ***[**80]*** (quoting *Nw. Wholesale Stationers, 472 U.S. at 294*). Thus, "[u]nless the cooperative possesses market power or exclusive access to an element essential to effective competition, the conclusion that expulsion is virtually always likely to have an anticompetitive effect is not warranted." *Nw. Wholesale Stationers, 472 U.S. at 296*.

At this stage, neither Provider Plaintiffs nor Subscriber Plaintiffs (in connection with any other claim) have established Defendants' market power over a particular market which is the subject of the alleged group boycott against health care providers. *Cf. Nw. Wholesale Stationers, 472 U.S. at 296*. Nor have Plaintiffs pointed to an element of the market that the Blue Plans exclusively control. *Cf. id.* Because Plaintiffs have not shown that the undisputed evidence establishes at least one of these two predicate facts, the court must review the alleged boycott of health care providers and services outside of a particular Blue Plan's service area under the rule of reason.[21] *All Care Nursing, 135 F.3d at 748-49*; *Retina Assocs., P.A. v. S. Baptist Hosp. of Fla., Inc., 105 F.3d 1376, 1381 (11th Cir. 1997)*; *Levine, 72 F.3d at 1550*; *F.T.C. v. Ind. Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*.

G. Trademark Uncoupling Rules

In their summary judgment papers, Subscriber Plaintiffs briefly argue that the Association's restrictions on the use of trade names that have been used in conjunction with a Blue Mark are *per se* violations of the Sherman Act. (Doc. # 1351 at 36-38). Subscriber Plaintiffs **[**81]** insist that the trade name restriction is analogous to a horizontal market allocation because (1) the trade name restraint was instituted in 1999, and (2) the Blue Plans would commit a *per se* violation of the Sherman Act if they agreed to not compete with each other in certain areas using their individualized trade names. (*Id.* at 37).

Defendants respond that the "uncoupling rules" are not analogous to geographic market allocations because they prevent a Blue Plan from independently using any trade name that has been associated with the Blue Marks

---

v. Am. Express Co., 138 S. Ct. 355, 199 L. Ed. 2d 261 (2017). The court does not address here whether any market at issue in this case can be characterized as a two-sided market, nor does the court discuss whether that characterization would affect a determination of whether to apply a *per se* or rule of reason standard. But it will be worth seeing what the Supreme Court has to say in its *American Express* decision.

[21] The court also may need to consider plausible procompetitive benefits of the type of boycott alleged in this action before determining whether the group boycott is subject to *per se* review. *See Levine, 72 F.3d at 1550-51* (declining to apply a *per se* boycott standard to a multiprovider network because the Department of Justice had decided that it lacked sufficient experience with such entities to promulgate a formal antitrust policy); *Diaz v. Farley, 215 F.3d 1175, 1183-84 (10th Cir. 2000)* (discussing the possible procompetitive benefits of an alleged boycott against anesthesiologists at a particular hospital and the need for caution in antitrust analysis of professional health care).

nationwide. (Doc. # 1432 at 54). Moreover, Defendants claim that the rule was adopted for a procompetitive purpose and that it falls within the Association's rights as the trademark holder and licensor. (*Id.* at 54-55). Although this issue may have been under-briefed, the court is inclined to find, upon its initial review, that the uncoupling rules are subject to a rule of reason analysis.

In 1999, the Association's Board of Directors voted to recommend the uncoupling rules for distinguishing words and symbols used alongside the Blue Marks.[22] (Doc. # 1433-5 at 15-21). In their simplest application, the uncoupling rules prevent a Blue Plan from using a trade name with **[**82]** the Blue Marks and then using the same trade name to sell another health care service product without the Blue Marks. (Doc. # 1433-5 at 16, 18-19). They also prohibit the Blue Plans from using unique words and symbols associated with products sold under the Blue Marks to sell non-branded health care service products. (*Id.* at 17-18). The rules do not apply to certain tag lines approved in advance by the Association, joint advertising ventures with non-Blue entities approved by the Association, or the sale, marketing, and administration of products other than core health care products and services. (*Id.* at 18-19).

Subscriber Plaintiffs refer to the uncoupling rules as agreements not to compete, but they are actually more similar in substance to trademark agreements between competitors. Thus, the Second Circuit's analysis of restrictive trademark agreements in *Clorox Company v. Sterling Winthrop, Inc., 117 F.3d 50 (2d Cir. 1997)* is instructive. There, the producers of Pine-Sol branded products and Lysol branded products had entered into a series of agreements that restricted the products to be sold under the Pine-Sol trademark and limited when they could be promoted as disinfectants. *117 F.3d at 53-54*. After the parties entered into their trademark agreement, Clorox purchased the Pine-Sol assets **[**83]** and challenged the limitations on use of the Pine-Sol trademark under *Sections 1* and *2* of the Sherman Act. *Id. at 54*. The Second Circuit held that the trademark agreement between Lysol's and Pine-Sol's producers was to be examined under the rule of reason because (1) trademark agreements are favored by courts, (2) trademark agreements that regulate use of competing trademarks are distinguishable from trademark agreements "that in reality serve to divide markets," and (3) the agreement presented there did not create a *per se* antitrust violation, such as price fixing, market division, or a group boycott. *Id. at 55-56*.

The trademark restrictions created by the uncoupling rules in this litigation are substantially similar to those analyzed under the rule of reason in *Clorox*. As the *Clorox* court noted, the uncoupling rules restrain independent competitors from using trademarks for particular products, **[*1279]** but they do not restrain competitors from selling products under other brands or trademarks. (Those restrictions were put in place by other Assocation rules, as discussed above.) Subscriber Plaintiffs characterize the trade name uncoupling rule as an "absolute prohibition on the use of individualized trade names that have **[**84]** previously been used in conjunction with the Blue Marks" (Doc. # 1351 at 37), but a review of the uncoupling rules reveals that the Blue Plans are only prohibited from using the trade names for the sale of certain core health insurance products and services. Thus, the trade name uncoupling rule is analogous to the trademark agreement in *Clorox*, which restricted Pine-Sol's owner from using that name in connection with certain cleaning and disinfecting products. *Cf*. *117 F.3d at 53-54*. These rules are not "naked" agreements between competitors (*i.e.*, the Blue Plans). That is, the rules are not simply reciprocal agreements between the Blues to not use their trade names associated with the trademarks. Rather, the *Rule 56* evidence shows that the rules are intended to protect the strength of the Blue Marks by preventing the transfer of goodwill in the Blue Marks to other unique marks created by an individual Blue Plan. (Doc. # 1436-27 at 248-49). Because the record does not show that the uncoupling rules were used to effectuate a *per se* antitrust violation, and the uncoupling rules have potential procompetitive benefits (*i.e.*, preventing the transfer of goodwill), the uncoupling rules do not fall within a category **[**85]** of *per se* restraints under the Sherman Act.[23]

IV. Conclusion

---

[22] During that same meeting, the Board of Directors endorsed a monetary sanctions program for violations of the Licensing Agreements. (Doc. # 1433-5 at 33-35).

[23] In light of the parties' sparse briefing on the uncoupling rules, the court need not decide -- and does not decide -- whether the uncoupling rules are part of the aggregate of restraints of trade connected to the Blues' ESAs. *Cf.* *Sealy, 388 U.S. at 354-56*.

The Supreme Court jealously guards the precedential effect of its opinions. This is even true in ***antitrust law***, where the economic principles of competition policy are subject to continual evolution. The Supreme Court has specifically cautioned district courts and appellate courts against reading the tea leaves and predicting which antitrust precedents are now disfavored. *See* *State Oil, 522 U.S. at 20* (commending the court of appeals for applying the precedential opinion at issue because "it is [the Supreme Court's] prerogative alone to overrule one of its precedents"). And the Eleventh Circuit has abided by that guidance in antitrust cases. *See, e.g.,* *Major League Baseball v. Crist, 331 F.3d 1177, 1188-89 (11th Cir. 2003)* (holding that the "business-of-baseball exemption" preempted a state-law antitrust action against Major League Baseball and baseball clubs, and commenting that the court had no choice but to apply the exemption "[a]s an intermediate appellate court"); *Prof'l Baseball Sch. & Clubs, Inc. v. Kuhn, 693 F.2d 1085, 1085-86 (11th Cir. 1982)* (affirming the dismissal of an antitrust suit concerning the business of minor league baseball, but describing the business-of-baseball exemption as "anomalous"). Today, the court faithfully applies *Sealy* and *Topco* to the *Rule 56* record before it and determines **[**86]** that, in navigating the antitrust landscape in this case, those decisions and their progeny remain polestars. Thus, the court concludes that Defendants' aggregation of a market allocation scheme together with certain other output restrictions is due to be analyzed under the *per se* standard of review. Having said that, BlueCard and other alleged *Section 1* violations are due to be analyzed under the Rule of Reason. An Order consistent with this Memorandum Opinion will be entered.

[*1280] **DONE** and **ORDERED** this April 5, 2018.

UNITED STATES DISTRICT JUDGE

[Henderson v. MTC Fin. Inc.](#)

United States District Court for the Northern District of California

April 6, 2018, Decided; April 6, 2018, Filed

No. C 17-03815 JSW

Reporter

2018 U.S. Dist. LEXIS 235663 *; 2018 WL 10582120

CHARLES HENDERSON, Plaintiff, v. MTC FINANCIAL INC. dba TRUSTEE CORPS, JPMORGAN CHASE BANK, N.A., and DOES 20, inclusive, Defendants.

Core Terms

alleges, borrower, motion to dismiss, amended complaint, servicer, mortgage, modification, injunctive, declaration, pleadings, damages, motion to strike, cause of action, recorded, default, Notice, unfair

Counsel: **[*1]** For Charles Henderson, Plaintiff: Vartkes Artinian, LEAD ATTORNEY, B&D Law Group, Los Angeles, CA USA; Helen Quan, Michael Avanesian, JT Legal Group, APC, Glendale, CA USA.

For Jpmorgan Chase Bank, N.A., Defendant: John Douglas Freed, LEAD ATTORNEY, Davis Wright Tremaine LLP, San Francisco, CA USA; Joseph Edward Addiego, III, Davis Wright Tremaine LLP, San Francisco, CA USA.

Judges: JEFFREY S. WHITE, UNITED STATES DISTRICT JUDGE.

Opinion by: JEFFREY S. WHITE

Opinion

ORDER GRANTING MOTION TO DISMISS AMENDED COMPLAINT

Now before the Court is the motion to dismiss and motion to strike the amended complaint filed by Defendant JPMorgan Chase Bank, N.A. ("Chase"). Having carefully reviewed the parties' papers, considered their arguments, and the relevant legal authority, and good cause appearing, the Court GRANTS Chase's motion to dismiss.

BACKGROUND

Plaintiff Charles Henderson alleges that in December 2004, he financed property located at 1426 9th Avenue in Oakland, California (the "Property") with a loan in the amount of $222,500 and executed the Deed of Trust ("DOT") to act as security for the loan. (*See* Amended Complaint ¶ 16, Ex. A.) On December 19, 2012, after Plaintiff's failure to pay on the loan, Chase issued a Notice **[*2]** of Default ("NOD") and a Notice of Trustee's Sale ("NOS") pursuant to the DOT. (*Id.* ¶ 19, Ex. C.) The NOD indicates that Plaintiff defaulted on the loan secured by the DOT in August 2012.

On May 10, 2017, Chase caused the NOS to be recorded with the Alameda County Recorder, which indicated that Plaintiff had an unpaid principal balance and costs in amount of $188,518.24. (*Id.* ¶ 20, Ex. D.) Plaintiff alleges that Chase failed to make the required pre-foreclosure contact with him prior to recording the NOD or the DOS. (*Id.* ¶¶

21-23.) However, Plaintiff attaches Chase's declaration of compliance, stating that Chase had "tried with due diligence but was unable to contact the borrowed to discuss the borrower's financial situation and to explore options for the borrower to avoid foreclosure as required by *Cal. Civ. Code Section 2923.5*." (*Id.*, Ex. C.)

In his amended complaint, Plaintiff adds facts tending to show that, as a result of missing two mortgage payments and being denied a modification, Plaintiff had to file for Chapter 13 bankruptcy in June of 2013, and a bankruptcy plan was confirmed on July 18, 2013. (*Id.* ¶ 30.) Plaintiff contends that in the bankruptcy proceedings, Chase filed a "Response to Notice of Final **[*3]** Cure Payment" which stated that Plaintiff had cured his pre-petition default, but remained in default with regard to his post-petition arrearages. (*Id.* ¶¶ 33-35.) Although Plaintiff apparently objects to the Response filed by Chase in the bankruptcy matter, he failed to address the issue before the bankruptcy court and instead raises that issue here.

Based on these facts, Plaintiff alleges five causes of action against Chase for violations of *California Civil Code Sections 2923.5*, *2923.6*, *2923.7*, *2924.12*, and violation of the Unfair Competition Law, *California Business and Professions Code Section 17200*.

The Court shall address additional relevant facts in the remainder of its order.

ANALYSIS

A. Legal Standard for Motion to Dismiss.

A motion to dismiss is proper under *Federal Rule of Civil Procedure 12(b)(6)* where the pleadings fail to state a claim upon which relief can be granted. The Court's "inquiry is limited to the allegations in the complaint, which are accepted as true and construed in the light most favorable to the plaintiff." *Lazy Y Ranch LTD v. Behrens, 546 F.3d 580, 588 (9th Cir. 2008)*. Even under the liberal pleading standard of *Federal Rule of Civil Procedure 8(a)(2)*, "a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citing *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*).

Pursuant to *Twombly*, a plaintiff must not **[*4]** merely allege conduct that is conceivable but must instead allege "enough facts to state a claim to relief that is plausible on its face." *Id. at 570*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*). If the allegations are insufficient to state a claim, a court should grant leave to amend, unless amendment would be futile. *See, e.g., Reddy v. Litton Indus., Inc., 912 F.2d 291, 296 (9th Cir. 1990)*; *Cook, Perkiss & Liehe, Inc. v. N. Cal. Collection Serv., Inc., 911 F.2d 242, 246-47 (9th Cir. 1990)*.

As a general rule, "a district court may not consider any material beyond the pleadings in ruling on a *Rule 12(b)(6)* motion." *Branch v. Tunnell, 14 F.3d 449, 453 (9th Cir. 1994)*, *overruled on other grounds*, *Galbraith v. County of Santa Clara, 307 F.3d 1119 (9th Cir. 2002)* (citation omitted). However, documents subject to judicial notice may be considered on a motion to dismiss. In doing so, the Court does not convert a motion to dismiss to one for summary judgment. *See Mack v. South Bay Beer Distrib., 798 F.2d 1279, 1282 (9th Cir. 1986)*, *overruled on other grounds by Astoria Fed. Sav. & Loan Ass'n v. Solimino, 501 U.S. 104, 111 S. Ct. 2166, 115 L. Ed. 2d 96 (1991)*. The Court may review matters that are in the public record, including pleadings, orders and other papers filed in court. *See id.*

B. Legal Standard for Motion to Strike.

Federal Rule of Civil Procedure 12(f) provides that a court "may strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter." *Fed. R. Civ. P. 12(f)*. "Immaterial matter is that which **[*5]** has no essential or important relationship to the claim for relief or the defenses being pleaded." *Fantasy, Inc. v. Fogerty, 984 F.2d 1524, 1527 (9th Cir. 1993)* (internal quotations and citations omitted), *rev'd on other grounds by* *Fogerty v. Fantasy, Inc., 510 U.S. 517, 114 S. Ct. 1023, 127 L. Ed. 2d 455 (1994)*. "Impertinent matter consists of statements that do not pertain, and are not necessary, to the issues in question." *Id.* (internal quotations and citations omitted). In order to show that a defense is insufficient, "the moving party must demonstrate that there are no questions of fact, that any questions of law are clear and not in dispute, and that under no set of circumstances could the defense succeed." *Securities & Exchange Comm'n v. Sands, 902 F. Supp. 1149, 1165 (C.D. Cal. 1995)*.

Motions to strike are regarded with disfavor because they are often used as delaying tactics and because of the limited importance of pleadings in federal practice. *Cal. Dep't of Toxic Substances Control v. Alco Pac., Inc., 217 F. Supp. 2d 1028, 1033 (C.D. Cal. 2002)*. Ultimately, the decision about whether to strike allegations is a matter within the Court's discretion. *Id.* In addition, in the absence of prejudice to the opposing party, courts should freely grant leave to amend. *Barnes v. AT &T Pension Benefit Plan, 718 F. Supp. 2d 1167, 1170 (N.D. Cal. 2010)* (citing *Wyshak v. City Nat'l Bank, 607 F.2d 824, 826 (9th Cir. 1979)*).

C. Claim for Violation of *California Civil Code Section 2923.5*.

In the original complaint, Plaintiff alleged a violation of a provision of the California Civil Code that was not yet effective. In his amended complaint, Plaintiff alleges a violation of a related code **[*6]** section, *California Civil Code Section 2923.5*, which requires that the mortgage servicer contact the borrower and that the notice of default include a declaration stating that an authorized agent of the mortgage servicer "has tried with due diligence to contact the borrower." *Cal. Civ. Code § 2923.5(b)*.

Plaintiff alleges that this provision was violated because, although a declaration indicating that Chase had complied with the provision was indeed attached to the NOD, "[t]his pre-printed declaration was false because Plaintiff has no records or recollection that Chase attempted to contact him." (Amended Complaint ¶ 45.) The provision requires that the mortgage servicer include a declaration indicating that an authorized agent has contacted or attempted to contact the borrower. Because such a declaration was attached to the NOD, Plaintiff cannot maintain a claim that the provision was violated. (*See id.*, Ex. C.)[1] Accordingly, Chase's motion to dismiss Plaintiff's claim for violation of *California Civil Code Section 2923.5* is GRANTED with prejudice.

D. Claim for Violation of *California Civil Code Section 2923.6*.

Pursuant to *California Civil Code Section 2923.6*, the mortgage servicer shall not record a NOD or conduct a trustee sale until the servicer makes a written determination that the borrower is not eligible for a first lien modification or workout **[*7]** plan. In its first order granting the motion to dismiss the original complaint, this Court indicated that Plaintiff had "failed to plead sufficient facts to demonstrate that he even applied for or submitted a complete application for a loan modification." (Dkt. No. 17, Order dated October 2, 2017 ("Order") at 1.) In his amended complaint, Plaintiff now alleges that he began his loan modification process in early 2013 and, after submitting all requested documents, was informed over the telephone that his modification was denied. (Amended Complaint ¶¶ 56-58.) Plaintiff fails to allege specific dates of this telephonic denial, but does indicate that "[a]s a result" of the loan modification denial, he filed for Chapter 13 bankruptcy protection in June of 2013. (*Id.* ¶ 30.) Thus, the alleged denial must have occurred prior to June 2013, which is four years prior to the filing of this suit. Accordingly, Plaintiff's claim for violation of *Section 2923.6* is time-barred. In addition, Plaintiff's conclusory allegations fail to set out sufficient specific facts from which to ascertain that Plaintiff submitted a complete application for loan modification which is a necessary prerequisite to make out such a claim. **[*8]** Because the claim is time-barred,

---

[1] Regardless, any claim based upon the NOD would be barred by the statute of limitations and would have expired in December 2015, three years after the NOD's issuance. In his amended complaint, Plaintiff has still not pled facts sufficient to toll the applicable statute of limitations period based upon the discovery rule.

however, Chase's motion to dismiss Plaintiff's claim for violation of *California Civil Code Section 2923.6* is GRANTED with prejudice.

E. Claim for Violation of *California Civil Code Section 2923.7*.

California Civil Code Section 2923.7 provides that "[u]pon request from a borrower who requests a foreclosure prevention alternative, the mortgage servicer shall promptly establish a single point of contact and provide to the borrower one or more direct means of communication with the single point of contact." *Cal. Civ. Code § 2923.7(a)*. The Court maintains that the allegations remain insufficient to trigger the requirements of this provision. (*See* Order at 1-2; *see also* *Greene v. Wells Fargo Bank, N.A., No. 15-cv-0048-JSW, 2015 U.S. Dist. LEXIS 60203, 2015 WL 2159460, at *4 (N.D. Cal. May 7, 2015)* (holding that borrower must allege that she specifically requested a single point of contact be provided).) Also, similar to his other claims, Plaintiff's claim for violation of *Section 2923.7* is time-barred and, after two opportunities to do so, he still alleges no facts from which to ascertain that the claim persists after the expiration of the three year statute of limitations. Accordingly, Chase's motion to dismiss Plaintiff's claim for violation of *California Civil Code Section 2923.7* is GRANTED with prejudice.

F. Claim for Violation of *California Civil Code Section 2924.12*.

In his fourth cause of action, Plaintiff alleges that he is entitled to declaratory **[*9]** relief pursuant to *California Civil Code Section 2924.12*. Under that provision, where "a trustee's deed upon sale has not been recorded, a borrower may bring an action for injunctive relief to enjoin material violation of *Section 2923.55*, *2923.6*, [or] *2923.7* . . . . Any injunction shall remain in place and any trustee's sale shall be enjoined until the court determines that the mortgage servicer . . . has corrected and remedied the violation . . . ." *Cal. Civ. Code § 2924.12(a)*.

Section 2924.12 does not independently create a cause of action for an injunction, but rather by its terms provides for injunctive relief as a remedy for violation of the other foreclosure-related statutes. *See e.g.,* *Hart v. Bayview Loan Servicing, No. 16-cv-01309 CAS, 2016 U.S. Dist. LEXIS 63659, 2016 WL 2758245, at *4 (C.D. Cal. May 10, 2016)*. Because the Court has dismissed the predicate claims, there is no standalone claim for injunctive relief pursuant to *Section 2924.12*. Accordingly, Chase's motion to dismiss Plaintiff's claim for violation of *California Civil Code Section 2924.12* is GRANTED with prejudice.

G. Claim for Violation of *California Business and Professions Code Section 17200*.

Plaintiff's fifth cause of action alleges that Chase engaged in conduct that violated *California Business and Professions Code section 17200* ("*Section 17200*"), which prohibits activities of unfair competition, including "any unlawful . . . business act or practice and unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code § 17200*.

"A plaintiff alleging unfair business practices under these **[*10]** statutes must state with reasonable particularity the facts supporting the statutory elements of the violation." *Khoury v. Maly's of California, Inc., 14 Cal. App. 4th 612, 619, 17 Cal. Rptr. 2d 708 (1993)*. In order to state a claim under *Section 17200*, Plaintiff must have suffered an injury in fact and must have lost money or property. *See* *Cal. Bus. & Prof. Code § 17204*; *see also* *Californians for Disability Rights v. Mervyn's, LLC, 39 Cal. 4th 223, 227, 46 Cal. Rptr. 3d 57, 138 P.3d 207 (2006)* (holding that after Proposition 64, a private person has standing to sue only if he or she "has suffered injury in fact and has lost money or property as a result of such unfair competition"). The California Supreme Court has explained that the purpose of Proposition 64 "was to confine standing to those actually injured by a defendant's business practices and to curtail the prior practice of filing suits on behalf of '"clients who have not used the defendant's advertising, or had any other business dealing with the defendant . . ."' *See* *Jenkins, 216 Cal. App. 4th at 521*.

Here, Plaintiff has failed to allege any facts establishing that Chase acted unlawfully, fraudulently, or unfairly. There is no allegation that Chase's conduct would constitute a violation of ***antitrust law*** and no other remaining claims upon which to predicate liability. *See* *Puentes v. Wells Fargo Mortgage, Inc., 160 Cal. App. 4th 638, 643-44, 72 Cal. Rptr. 3d 903 (2008)* ("*[S]ection 17200* 'borrows' violations of other laws and treats them as unlawful practices that the unfair competition law makes independently **[*11]** actionable"). Additionally, Plaintiff allegations that he suffered "substantial irreparable harm" due to Chase's acts are merely conclusory and do not demonstrate that Plaintiff has suffered any actual monetary loss due to the alleged conduct. (*See* Amended Complaint ¶ 78.) Plaintiff fails to state a claim upon which relief can be granted on the predicate civil code claims and makes only a conclusory allegation that Chase's conduct is "immoral, unethical, oppressive, unscrupulous or substantially injurious to customers." (*See id.* ¶ 76, citing *Paduano v. American Honda Motor Co., Inc., 169 Cal. App. 4th 1453, 1469, 88 Cal. Rptr. 3d 90 (2009)*.) Accordingly, Chase's motion to dismiss Plaintiff's claim for violation of *California Business and Professions Code Section 17200* is GRANTED with prejudice.

H. Motion to Strike Request for Damages.

Chase also moves to strike Plaintiff's demand for general damages, compensatory damages, interest, and consequential damages. (*See* Amended Complaint at 16.) However, Plaintiff's claims are premised upon pre-foreclosure violations and the only remedy available under those provisions in an injunction to allow the servicer to correct material violations of the statute. *See* *Cal. Civ. Code § 2924.12(b)* (Only "[a]fter a trustee's deed upon sale has been recorded, a mortgage servicer . . . shall be liable to a borrower for actual economic **[*12]** damages . . . resulting from a material violation of *Section 2923.55*, *2923.6*, [or] *2923.7* . . . ."). The only relief available for a breach of *Section 17200* are injunctive relief and restitution. *See* *Cel-Tech Communications, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 179, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. Accordingly, Chase's motion to strike Plaintiff's demand for damages is GRANTED.

CONCLUSION

Based on the foregoing reasons, and having given Plaintiff two opportunities to address the deficiencies in pleading, the Court GRANTS Chase's motion to dismiss and to strike without leave to amend.[2]

IT IS SO ORDERED.

HN1[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Pursuant to *Fed. R. Civ. P. 12(b)(1)*, a party may seek dismissal of an action for lack of subject matter jurisdiction either on the face of the pleadings or by presenting extrinsic evidence. Where the party asserts a facial challenge, the court limits its inquiry to the allegations set forth in the complaint. If the challenge to jurisdiction is a facial attack the plaintiff is entitled to safeguards similar to those applicable when a *Rule 12(b)(6)* motion is made. Lack of standing is a defect in subject-matter jurisdiction and may be properly challenged under *Rule 12(b)(1)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

A *Fed. R. Civ. P. 12(b)(6)* motion to dismiss tests the sufficiency of the complaint. A pleading must contain a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)(2)*. However, plaintiffs must also plead enough facts to state a claim to relief that is plausible on its face. *Fed. R. Civ. P. 12(b)(6)*. The plausibility standard thus demands more than a formulaic recitation of the elements of a cause of action, or naked assertions devoid of further factual enhancement. Instead, the complaint must contain allegations of underlying facts sufficient to give fair notice and to enable the opposing party to defend itself effectively.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

In reviewing a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, courts must assume the truth of all factual allegations and must construe them in the light most favorable to the nonmoving party. The court need not take legal conclusions as true merely because they are cast in the form of factual allegations. Similarly, conclusory allegations of law and unwarranted inferences are not sufficient to defeat a motion to dismiss.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN4[] **Motions to Dismiss, Failure to State Claim**

In determining the propriety of a *Fed. R. Civ. P. 12(b)(6)* dismissal, courts generally may not look beyond the complaint for additional facts. A court may, however, consider certain materials—documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial notice—without converting the motion to dismiss into a motion for summary judgment. Where dismissal is appropriate, a court should grant leave to amend unless the plaintiff could not possibly cure the defects in the pleading.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN5[] **Heightened Pleading Requirements, Fraud Claims**

In alleging fraud or mistake, the plaintiff must state with particularity the circumstances constituting fraud or mistake. *Fed. R. Civ. P. 9(b)*. Failure to satisfy this heightened pleading requirement can result in dismissal of the claim. In general, the plaintiff's allegations of fraud or mistake must be specific enough to give defendants notice of the particular misconduct so that they can defend against the charge and not just deny that they have done anything wrong. This heightened pleading standard requires the plaintiff to allege fraud or mistake by detailing the who, what, when, where, and how" of the misconduct charged. In other words, the plaintiff must specify the time, place, and content of the alleged fraudulent or mistaken misconduct. However, malice, intent, knowledge, and other conditions of a person's mind may be alleged generally. *Fed. R. Civ. P. 9(b)*.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN6[] **Heightened Pleading Requirements, Fraud Claims**

Fed. R. Civ. P. 9(b) may be relaxed as to matters within the opposing party's knowledge. In those cases, a pleading is sufficient under *Rule 9(b)* if it identified the circumstances constituting fraud so that a defendant can prepare an adequate answer from the allegations.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN7[] State Regulation, Claims

Standing under California's Unfair Competition Law (UCL) and the False Advertising Law (FAL) is limited to any person who has suffered injury in fact and has lost money or property as a result of unfair competition. Cal. Bus. & Prof. Code §§ 17204, 17535. When a consumer purchases merchandise on the basis of false price information, and when the consumer alleges that he would not have made the purchase but for the misrepresentation, he has standing to sue under the UCL and FAL because he has suffered an economic injury. Any plaintiff who has standing under the UCL's and FAL's lost money or property requirement, a fortiori, have suffered any damages for purposes of establishing Consumer Legal Remedies Act, *Cal. Civ. Code § 1750 et seq.*, standing.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN8[] Standing, Elements

To establish U.S. Const. art. III standing, a plaintiff must show that he or she suffered an injury in fact, that the injury is fairly traceable to the challenged conduct, and that it is likely and not just speculative that the injury will be redressed by a favorable decision. To establish an injury in fact, the harm suffered by a plaintiff must be concrete and particularized, and there must be a sufficient likelihood that he or she will again be wronged a similar way. A plaintiff must establish a real and immediate threat of repeated injury.

Constitutional Law > ... > Case or Controversy > Standing > Elements

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN9[] Standing, Elements

Davidson held that a previously deceived consumer may have constitutional standing to seek an injunction against false advertising or labeling, even though the consumer now knows or suspects that the advertising was false at the time of the original purchase, because the consumer may suffer an actual and imminent threat of future harm. In some cases, the threat of future harm may be the consumer's plausible allegations that she will be unable to rely on the product's advertising or labeling in the future, and so will not purchase the product she would like to. In other cases, the threat of future harm may be the consumer's plausible allegations that she might purchase the product in the future, despite the fact it was once marred by false advertising or labeling, as she may reasonably, but incorrectly, assume the product was improved.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN10[] False Advertising, State Regulation

California's False Advertising Law, Business & Professions Code prohibits any unfair, deceptive, untrue, or misleading advertising. Cal. Bus. & Prof. Code § 17500. This statute makes it unlawful for a business to disseminate any statement which is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading. The statute has been interpreted broadly to encompass not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public. Consequently, even a perfectly true statement couched in such a manner that it is likely to mislead or deceive the consumer, such as by failure to disclose other relevant information, is actionable under this section.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN11[] **Trade Practices & Unfair Competition, State Regulation**

California's Unfair Competition Law (UCL) prohibits any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising. Cal. Bus. & Prof. Code § 17200. The UCL provides a separate theory of liability under each of the three prongs: unlawful, unfair, and fraudulent. The UCL expressly incorporates the False Advertising Law's prohibition on unfair advertising as one form of unfair competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN12[] **Trade Practices & Unfair Competition, State Regulation**

California's Consumer Legal Remedies Act (CLRA) prohibits unfair methods of competition and unfair or deceptive acts or practices. *Cal. Civ. Code § 1770*. Specifically, the CLRA prohibits, among other things, advertising goods or services with intent not to sell them as advertised and making false or misleading statements of fact concerning reasons for, existence of, or amounts of price reductions. *Cal. Civ. Code § 1770(a)(9)*, *(13)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN13[] **Trade Practices & Unfair Competition, State Regulation**

To state a claim under the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, the False Advertising Law, *Cal. Bus. & Prof. Code § 17500 et seq.*, and Consumer Legal Remedies Act, *Cal. Civ. Code § 1750 et seq.*, a plaintiff must allege that the defendant's purported misrepresentations are likely to deceive a reasonable consumer. A reasonable consumer is 'the ordinary consumer acting reasonably under the circumstances. Likely to deceive implies more than a mere possibility that the advertisement might conceivably be misunderstood by some few consumers viewing it in an unreasonable manner. Rather, the phrase indicates that the ad is such that it is probable that a significant portion of the general consuming public or of targeted consumers, acting reasonably in the circumstances, could be misled. In determining whether a statement is misleading under the statute, the primary evidence in a false advertising case is the advertising itself.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN14[] **Trade Practices & Unfair Competition, State Regulation**

Courts applying the reasonable consumer test to businesses' use of comparative reference prices under the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, the False Advertising Law, *Cal. Bus. & Prof. Code § 17500 et seq.*, and Consumer Legal Remedies Act, *Cal. Civ. Code § 1750 et seq.*, have distinguished between two categories: exclusive product cases and non-exclusive product cases. In exclusive product cases, a store, usually an outlet store, sells a lower-price, different version of a product sold in a traditional retail store. The outlet uses the price of the product made for the retail store as a comparative reference price on price tags but the product actually sold in the outlet store is made exclusively for the outlet and is never sold for the comparative reference price at a traditional retail store. In non-exclusive product cases, more than one retailer offers the product at issue for sale. Because other retailers offer the same product for sale, there are legitimate prices to which to compare the defendant's comparative reference price. In exclusive product cases, courts generally find that a plaintiff can proceed with his or her claims.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN15[] **Deceptive & Unfair Trade Practices, State Regulation**

Section 1770(a)(9) of the California Civil Code prohibits advertising goods or services with intent not to sell them as advertised. *Cal. Civ. Code § 1770(a)(9)*. *Section 1770(a)(13)* prohibits making false or misleading statements of fact concerning reasons for, existence of, or amounts of price reductions. *Cal. Civ. Code § 1770(a)(13)*. Moreover, the Consumer Legal Remedies Act provides relief to a consumer who suffers any damage as a result of the use or employment by a person of a method, act, or practice declared to be unlawful by *Section 1770*. *Cal. Civ. Code § 1780(a)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN16[] **State Regulation, Claims**

With respect to the "unfairness" prong, the California Supreme Court has defined the word "unfair" under the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, to mean conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition. Many courts utilize a three-part test set forth in Camacho v. Auto. Club of S. Cal. Under this test, courts consider factors including: (1) whether the consumer injury is substantial; (2) whether the injury is outweighed by any countervailing interests; and (3) whether the injury is one that consumers themselves could not reasonably have avoided. Notably, whether a practice is unfair is generally a question of fact which requires consideration and weighing of evidence from both sides and which usually cannot be made on demurrer.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN17[] **Trade Practices & Unfair Competition, State Regulation**

The U.S. District Court for the Southern District of California finds persuasive the Covell court's reasoning. In Covell, the court explained that if plaintiff ultimately prevails on her claims, she will still need to show that equitable relief is the only way to remedy a specific type of injury suffered by herself or the class. However, she may be able to do so by, for example, arguing that injunctive relief is the only way to protect the class from future deceptive behavior.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN18[] **State Regulation, Claims**

Courts have very broad discretion to determine an appropriate remedy as long as it is supported by the evidence and is consistent with the purpose of restoring the plaintiff the amount that the defendant wrongfully acquired. The court's discretion is not entirely unbounded, however, because restitution under the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, the False Advertising Law, *Cal. Bus. & Prof. Code § 17500 et seq.*, must be of a measurable amount to restore to the plaintiff what has been acquired by violations of the statutes, and that measurable amount must be supported by evidence.

Counsel: **[*1]** For Timur Safransky, on behalf of himself and all others similarly situated, Plaintiff: Zev Benjamin Zysman, LEAD ATTORNEY, Law Offices of Zev B. Zysman, APC, Encino, CA.

For Fossil Group, Inc., Fossil Stores I, Inc., Defendants: Stephanie A. Sheridan, LEAD ATTORNEY, Steptoe & Johnson LLP, San Francisco, CA.

Opinion by: MICHAEL M. ANELLO

Opinion

ORDER DENYING DEFENDANTS' MOTION TO DISMISS

[Doc. No. 11]

Plaintiff Timur Safranksy ("Plaintiff") filed a First Amended Class Action Complaint ("FAC") against Defendants Fossil Group, Inc. and Fossil Stores I, Inc. (collectively, "Defendants"), alleging violations of California's Unfair Competition Law, Business & Professions Code *§ 17200 et seq.* ("UCL"), False Advertising Law, Business & Professions Code *§ 17500 et seq.* ("FAL"), and *Consumer Legal Remedies Act, Civil Code § 1750 et seq.* ("CLRA"). *See* FAC. Defendants move to dismiss Plaintiff's FAC for failure to state a claim and lack of standing pursuant to *Federal Rules of Civil Procedure 12(b)(1)* and *12(b)(6)*. Doc. No. 11. Plaintiff filed an opposition to Defendants' motion, to which Defendants replied. Doc. Nos. 13, 14. The Court found the matter suitable for determination on the papers and without oral argument pursuant to Civil *Local Rule 7.1.d.1*. Doc. No. 18. For **[*2]** the reasons set forth below, the Court **DENIES** Defendants' motion to dismiss.

BACKGROUND[1]

Plaintiff Timur Safransky is an individual and resident of San Diego County, California. FAC ¶ 25. Defendant Fossil Group, Inc. is a Delaware corporation with its principal place of business in Richardson, Texas. *Id. ¶ 26*. Defendant Fossil Stores I, Inc. is a Delaware corporation with its principal place of business in Richardson, Texas. *Id. ¶ 27*.

On November 16, 2016, Plaintiff visited the Fossil Outlet Store located at the Carlsbad Premium Outlets in Carlsbad, California. *Id. ¶ 34*. Plaintiff "observed a large exterior window display that advertised 'Entire Store Up To

[1] Because this matter is before the Court on a motion to dismiss, the Court must accept as true the allegations set forth in the FAC. *See* *Hosp. Bldg. Co. v. Trs. Of Rex Hosp., 425 U.S. 738, 740, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*.

40% Off' and an additional '20% Off' the entire purchase." *Id.* Once Plaintiff entered the store, he noticed "prominent" signage on top of or near almost each piece of merchandise advertising a "discounted % off," or a "discounted whole-price" reduction for each item offered for sale. *Id. ¶ 35*. Believing that he was able to pay significantly less than the price listed on the price tag, Plaintiff purchased an item. *Id.* Specifically, Plaintiff purchased a Travis Workbag "bearing a Reference Price of '$198.00' on the price tag" after **[*3]** observing a sign which indicated that the bag was on sale for "40% Off Ticketed Price." *Id. ¶¶ 36-37*. Plaintiff attaches as Exhibit E a true and correct copy of the price tag attached to the Travis Workbag. *Id. ¶ 36*; *see also* FAC, Exh. E. Notably, the price tag says "LIKE STYLE" below the $198.00 figure.[2] Relying on this advertising, Plaintiff purchased the bag. *Id. ¶ 38*.

Upon check-out, Defendants provided Plaintiff with a sales receipt containing the allegedly misrepresented price. *Id. ¶ 39*. Specifically, the receipt states "REGULAR PRICE" in large, all-caps lettering directly below the name of the item "TRAVIS WORKBAG." FAC, Exh. F. The regular price corresponds with the $198.00 figure. *See id.* With a 40% discount, and an additional 20% off of the entire purchase price, Plaintiff paid a total of $102.64. *See id.*

Plaintiff alleges that Defendants intentionally misrepresent prices for items with the Like Style tags because such prices are "overstated and d[o] not represent a bona fide price at which Fossil Outlet Products were previously sold." FAC ¶ 6. Additionally, Plaintiff alleges that the advertised prices on the Like Style tags were never the "prevailing market retail price within **[*4]** the three months immediately preceding the publication of the advertised former prices, as required by California law." *Id.* The prices listed on the Like Style tags are "fictional creations intentionally designed to enable Defendants' phantom markdowns." *Id. ¶ 7*. Further, Plaintiff claims that the "Fossil Outlet Products sold at Fossil Outlet Stores are designed and manufactured for, and sold *exclusively* by, those stores[.]" *Id. ¶ 40* (emphasis in original). The Fossil Outlet Products "were never sold—or even intended to be sold—at the Reference Price advertised on the price tags." *Id.* Plaintiff contends that he and other consumers "have no realistic way to know which—if any—of Defendants' price tags and sale prices are not false or deceptive." *Id. ¶ 49*.

After Plaintiff purchased the Travis Workbag, Plaintiff conducted an investigation which revealed that Defendants "very subtly mark the items exclusively made for the Fossil Outlet Stores by including in smaller font the words 'Like Style' on the price tags attached to the Fossil Outlet Products." *Id. ¶ 28*. Plaintiff asserts that Defendants "intentionally designed the price tags this way so that their employees would be able to determine **[*5]** internally within the company those products that were made exclusively for the Fossil Outlet Store." *Id.*

Plaintiff brings this action "on behalf of himself and other similarly situated consumers who have purchased one or more Fossil Outlet Products at Fossil Outlet Stores in California that were deceptively represented as discounted from false former prices[.]"[3] *Id. ¶ 21*. Plaintiff seeks to "halt the dissemination of this false, misleading, and deceptive pricing scheme, to correct the false and misleading perception it has created in the minds of consumers, and to obtain redress for those who have purchased such products." *Id.* Plaintiff seeks restitution and other appropriate equitable remedies, including an injunction under the UCL and FAL, and restitution, damages, and an injunction under the CLRA. *Id.* Defendants move to dismiss Plaintiff's FAC on the grounds that Plaintiff lacks standing under *Rule 12(b)(1)*, and fails to allege sufficient facts under *Rule 12(b)(6)* as well as *Rule 9(b)*'s heightened pleading standard. *See* Doc. No. 11-1.

LEGAL STANDARDS

A. *Rule 12(b)(1)*

---

[2] The Court hereinafter refers to the price tags attached to items for sale at Defendants' stores as the "Like Style tags."

[3] Plaintiff expressly excludes any Fossil Outlet Products sold at Fossil Outlet Stores that advertised a price that was a prevailing market retail price within three months preceding. *See id.* ¶ 28.

HN1[] Pursuant to *Rule 12(b)(1)*, a party may seek dismissal of an action for lack of subject matter jurisdiction "either on the face of the pleadings or by presenting extrinsic evidence." **[*6]** *Warren v. Fox Family Worldwide, Inc., 328 F.3d 1136, 1139 (9th Cir. 2003)*; *see also* *White v. Lee, 227 F.3d 1214, 1242 (9th Cir. 2000)*. Where the party asserts a facial challenge, the court limits its inquiry to the allegations set forth in the complaint. *Safe Air for Everyone v. Meyer, 373 F.3d 1035, 1039 (9th Cir. 2004)*. "If the challenge to jurisdiction is a facial attack . . . the plaintiff is entitled to safeguards similar to those applicable when a *Rule 12(b)(6)* motion is made." *San Luis & Delta-Mendota Water Auth. v. U.S. Dep't of the Interior, 905 F. Supp. 2d 1158, 1167 (E.D. Cal. 2012)* (internal citation and quotation omitted). "Lack of standing is a defect in subject-matter jurisdiction and may be properly challenged under *Rule 12(b)(1)*." *Wright v. Incline Village Gen. Imp. Dist., 597 F. Supp. 2d 1191, 1199 (D. Nev. 2009)* (citing *Bender v. Williamsport Area Sch. Dist., 475 U.S. 534, 541, 106 S. Ct. 1326, 89 L. Ed. 2d 501 (1986)*).

B. *Rule 12(b)(6)*

HN2[] A *Rule 12(b)(6)* motion to dismiss tests the sufficiency of the complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. A pleading must contain "a short and plain statement of the claim showing that the pleader is entitled to relief. . . ." *Fed. R. Civ. P. 8(a)(2)*. However, plaintiffs must also plead "enough facts to state a claim to relief that is plausible on its face." *Fed. R. Civ. P. 12(b)(6)*; *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. The plausibility standard thus demands more than a formulaic recitation of the elements of a cause of action, or naked assertions devoid of further factual enhancement. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Instead, the complaint "must contain allegations of underlying facts sufficient to give fair notice and to enable the opposing party to defend itself effectively." *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*.

HN3[] In reviewing a motion to dismiss under *Rule 12(b)(6)*, courts must assume the truth of all factual allegations and must construe them **[*7]** in the light most favorable to the nonmoving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. The court need not take legal conclusions as true merely because they are cast in the form of factual allegations. *Roberts v. Corrothers, 812 F.2d 1173, 1177 (9th Cir. 1987)*. Similarly, "conclusory allegations of law and unwarranted inferences are not sufficient to defeat a motion to dismiss." *Pareto v. FDIC, 139 F.3d 696, 699 (9th Cir. 1998)*.

HN4[] In determining the propriety of a *Rule 12(b)(6)* dismissal, courts generally may not look beyond the complaint for additional facts. *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*. "A court may, however, consider certain materials—documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial notice—without converting the motion to dismiss into a motion for summary judgment." *Id.; see also* *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)*. Where dismissal is appropriate, a court should grant leave to amend unless the plaintiff could not possibly cure the defects in the pleading. *Knappenberger v. City of Phoenix, 566 F.3d 936, 942 (9th Cir. 2009)*.

C. *Rule 9(b)*[4]

HN5[] In alleging fraud or mistake, the plaintiff must "state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. P. 9(b)*. Failure to satisfy this heightened pleading requirement can result in dismissal of the claim. *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1107 (9th Cir. 2003)*. In general, the plaintiff's allegations of fraud or mistake must be "specific enough to give defendants notice of the particular misconduct . . . so that **[*8]** they can defend against the charge and not just deny that they have done anything wrong." *Id. at 1106*. This heightened pleading standard requires the plaintiff to allege fraud or mistake by detailing "the who, what, when, where, and how" of the misconduct charged. *Id. at 1106-07*. In other words, the plaintiff must specify the time,

[4] The parties acknowledge that *Rule 9(b)*'s heightened pleading standard applies to Plaintiff's claims.

place, and content of the alleged fraudulent or mistaken misconduct. *See id.* However, "malice, intent, knowledge, and other conditions of a person's mind may be alleged generally." *Fed. R. Civ. P. 9(b)*.

Moreover, ***HN6***[] "*Rule 9(b)* 'may be relaxed as to matters within the opposing party's knowledge.'" *Rubenstein v. Neiman Marcus Grp. LLC, 687 F. App'x 564, 567 (9th Cir. 2017)* (quoting *Moore v. Kayport Packaging Express, Inc., 885 F.2d 531, 540 (9th Cir. 1989))*. "In those cases, a 'pleading is sufficient under *Rule 9(b)* if it identified the circumstances constituting fraud so that a Defendant can prepare an adequate answer from the allegations.'" *Id.* (quoting *Moore, 885 F.2d at 540*).

Discussion

I. Motion to Dismiss Pursuant to *Rule 12(b)(1)*

As an initial matter, Defendants argue that Plaintiff lacks standing for three reasons: (1) Plaintiff lacks statutory standing because he has failed to allege reliance on the phrase "Like Style"; (2) Plaintiff lacks statutory standing to assert claims on behalf of purchasers who bought different Fossil Outlet products than the Travis Workbag; and (3) Plaintiff lacks Article III **[*9]** standing to seek injunctive relief because he is "no longer at risk of being deceived by Fossil's 'Like Style' pricing." Doc. No. 11-1 at 8. The Court addresses Defendants' arguments in turn.

1. Plaintiff's Statutory Standing to Assert Personal Claims

First, Defendants contend that Plaintiff lacks statutory standing under the UCL, FAL, and CLRA because he does not allege reliance on the phrase "Like Style" that appeared on the price tag of the Travis Workbag that he purchased. *See* Doc. No. 11-1 at 11. Thus, Defendants claim that Plaintiff has not sufficiently alleged that he relied on the alleged misrepresentation. *See id.*

HN7[] "Standing under the UCL and FAL is . . . limited to any person 'who has suffered injury in fact and has lost money or property' as a result of unfair competition." *Azimpour v. Sears, Roebuck & Co.. ("Azimpour I"), No. 15-CV-2798-JLS-WVG, 2016 U.S. Dist. LEXIS 188844, 2016 WL 7626188, at *3 (S.D. Cal. Oct. 17, 2016)* (quoting *Cal. Bus. & Prof. Code §§ 17204*, *17535*). In *Hinojos v. Kohl's Corp.*, the Ninth Circuit held that "when a consumer purchases merchandise on the basis of false price information, and when the consumer alleges that he would not have made the purchase but for the misrepresentation, he has standing to sue under the UCL and FAL because he has suffered an economic injury." **[*10]** *718 F.3d 1098, 1107 (9th Cir. 2013)*. Further, the Ninth Circuit "conclude[d] that any plaintiff who has standing under the UCL's and FAL's 'lost money or property' requirement, *a fortiori*, have suffered 'any damages' for purposes of establishing CLRA standing." *Id. at 1108* (emphasis in original).

Here, Defendants' argument that Plaintiff fails to allege that he relied on the words "Like Style" is misplaced. It is Defendants' alleged pricing scheme—the juxtaposition of the price listed on the Like Style tags and the in-store signage representing a certain percentage discount—that Plaintiff challenges. Plaintiff alleges that he relied on Defendants' misrepresentations when making his purchase. Specifically, Plaintiff purchased the Travis Workbag, bearing a price of "'$198.00' on the price tag," after observing "signage above the subject item that advertised a percentage discount, clearly indicating that the item was being sold at a significant discount off the Reference Price." FAC ¶¶ 36, 37. The signage above the Travis Workbag "represented that the bag was on sale for '40% Off Ticketed Price.'" *Id. ¶ 37*. Plaintiff asserts that he relied on Defendants' advertising and "believ[ed] that he was receiving a significant discount," so **[*11]** he "decided to purchase the item[.]" *Id. ¶ 38*. However, Plaintiff claims that he did not actually receive a discount because "the prevailing market retail price for the subject bag during the three months immediately prior to Plaintiff's purchase of the item was never at the represented former Reference Price." *Id.* Moreover, "Plaintiff would not have purchased the bag in the absence of Defendants' misrepresentations." *Id.* Taking Plaintiff's allegations as true, Plaintiff has sufficiently alleged that he suffered economic injury as a result of Defendants' conduct. Thus, the Court finds "[s]uch allegations satisfy reliance as to Plaintiff's in-store purchase." *Azimpour I, 2016 U.S. Dist. LEXIS 188844, 2016 WL 7626188, at *4*.

Accordingly, the Court finds that Plaintiff has statutory standing to assert his personal claims. *See Rubenstein, 687 F. App'x at 566* ("Rubenstein has both Article III and statutory standing because she sufficiently alleged economic injury and actual reliance on the Compared To prices affixed to the goods she purchased at Neiman Marcus's Last Call store."); *see also Covell v. Nine West Holdings, Inc., No. 17-CV-1371-H-JLB, 2018 U.S. Dist. LEXIS 12437, 2018 WL 558976, at *5 (S.D. Cal. Jan. 25, 2018)* (concluding that the plaintiff has statutory standing because she alleges that she only purchased the shoes because she believed she was receiving **[*12]** a significant discount, did not in fact receive a discount, and would not have purchased the shoes but for the allegedly deceptive price tags).

2. Plaintiff's Standing to Represent Individuals Who Purchased Different Items

Second, Defendants assert that Plaintiff lacks statutory standing to assert claims on behalf of customers "who purchased different items, at different prices, and with different 'Like Style' comparisons." Doc. No. 11-1 at 6. In response, Plaintiff contends this inquiry should be conducted at the class certification stage. *See* Doc. No. 13 at 7. Moreover, Plaintiff asserts that he "has standing to sue for all products on behalf of all consumers who were exposed to the same, uniform pricing scheme, regardless of the type of product purchased." *Id.* at 11.

"In the Ninth Circuit, there is 'no controlling authority' on whether a plaintiff in a class action has standing to assert claims based on products he did not purchase." *Dennis v. Ralph Lauren Corp., No. 16-CV-1056-WQH-BGS, 2017 U.S. Dist. LEXIS 140156, 2017 WL 3732103, at *6 (S.D. Cal. Aug. 29, 2017)* (quoting *Morales v. Unilever United States, Inc., No. 13-CV-2213-WBS-EFB, 2017 U.S. Dist. LEXIS 140156, 2014 U.S. Dist. LEXIS 49336, 2014 WL 1389613, at *4 (E.D. Cal. Apr. 9, 2014))*. However, "[t]he majority of the courts that have carefully analyzed the question hold that a plaintiff may have standing to assert claims for unnamed class members **[*13]** based on products he or she did not purchase so long as the products and alleged misrepresentations are substantially similar." *Cortina v. Goya Foods, Inc., 94 F. Supp. 3d 1174, 2015 WL 1411336, at *18 (S.D. Cal. 2015)* (quoting *Miller v. Ghirardelli Chocolate Co., 912 F. Supp. 2d 861, 869 (N.D. Cal. 2012)* (noting where composition of the product is less important, "cases turn on whether the alleged misrepresentations are sufficiently similar across product lines")).

In a similar case, this Court found that the plaintiff had standing to sue on behalf of purchasers of other Nordstrom Rack items with "Compare At" tags because "the characteristics and format that Plaintiff complains of remain consistent across such tags." *Branca v. Nordstrom, Inc., No. 14-CV-2062-MMA-JMA, 2015 U.S. Dist. LEXIS 176888, 2015 WL 10436858, at *5 (S.D. Cal. Oct. 9, 2015)*. The Court noted that "all of the products are marketed to the same consumers, Nordstrom Rack shoppers. Thus, product composition is of little importance and the similarity amongst the purported misrepresentations is most important[.]" *Id.*

Moreover, numerous district courts have also concluded that a plaintiff has standing to sue on behalf of items he or she did not purchase if the alleged misrepresentations are sufficiently similar. *See Dennis, 2017 U.S. Dist. LEXIS 140156, 2017 WL 3732103, at *7* (concluding that the plaintiff "has demonstrated sufficient similarities in the Defendants' alleged pricing scheme **[*14]** to avoid dismissal of any claims at this stage of the proceedings."); *Azimpour v. Sears, Roebuck & Co. ("Azimpour II"), No. 15-CV-2798-JLS-WVG, 2017 U.S. Dist. LEXIS 63516, 2017 WL 1496255, at *5 (S.D. Cal. Apr. 26, 2017)* (finding that the "Plaintiff has standing to sue on behalf of purchasers of other Sears items bearing in-store price tags similar to those relied upon by Plaintiff because he is challenging the pricing scheme, not the product."); *Anderson v. Jamba Juice Co., 888 F. Supp. 2d 1000, 1001 (N.D. Cal. 2012)* (finding that although the plaintiff purchased only two of the many flavors of smoothie kits, the plaintiff had standing to bring claims on behalf of purchasers of the other flavors because "the same alleged misrepresentation was on all of the smoothie kit[s] regardless of flavor; all smoothie kits [were] labeled 'All Natural,' and all smoothie kits contain[ed] allegedly non-natural ingredients."); *Astiana v. Dreyer's Grand Ice Cream, Inc., Nos. C-11-2910 EMC, C-11-3164 EMC, 2012 U.S. Dist. LEXIS 101371, 2012 WL 2990766, at *13 (N.D. Cal. July 20, 2012)* (concluding that the plaintiffs had standing to sue based on flavors of ice cream they did not purchase because many of the contested ingredients were the same across all of the ice creams at issue and their labels were nearly identical).

Defendants rely primarily on *Nunez v. Saks Inc.* ("*Nunez II*"), where **[*15]** the district court dismissed the plaintiff's complaint with prejudice. *No. 15-CV-2717-JAH-WVG, 2017 U.S. Dist. LEXIS 198155, 2017 WL 5973341, at *5 (S.D. Cal. Dec. 1, 2017)*. There, the plaintiff sought to represent a class of individuals "who purchased a Saks Fifth

Avenue labeled product from OFF 5TH locations in California after being exposed to material from Saks's marketing campaigns." *2017 U.S. Dist. LEXIS 198155, [WL] at *3*. In dismissing the plaintiff's first amended complaint, the court found that the plaintiff lacked standing to assert claims on behalf of individuals who purchased different items because the plaintiff failed to support his allegation of a "misleading and deceptive pricing scheme" with allegations of his own "exposure to misleading advertising[.]" *Nunez v. Saks Inc. ("Nunez I"), No. 15-CV-2717-JAH-WVG, 2017 U.S. Dist. LEXIS 125296, 2017 WL 1184058, at *5 (S.D. Cal. Mar. 22, 2017)*. In dismissing the plaintiff's third amended complaint with prejudice, the district court briefly concluded that the "Plaintiff's TAC did not remedy the deficiencies of the FAC." *Nunez II, 2017 U.S. Dist. LEXIS 198155, 2017 WL 5973341 at *4*; *see also* *Johns v. Bayer Corp., No. 9-CV-1935-DMS-JMA, 2010 U.S. Dist. LEXIS 10926, 2010 WL 476688, at * (S.D. Cal. Feb. 9, 2010)* (concluding the plaintiff lacks standing because "he cannot expand the scope of his claims to include a product he did not purchase or advertisements relating to a product he did not rely upon.").

A recent decision from this district is particularly **[*16]** instructive on this issue. In *John v. AM Retail Group, Inc.*, the same judge that decided *Nunez* found that the primary reason for dismissal, "and the distinguishing factor between *Nunez* and the present case, was that the *Nunez* plaintiff sought to bring claims for a wide range of deceptive advertising—print, in-store, and online—yet failed to allege his own personal exposure to that misleading advertising, even for the shoes that he purchased." *No. 17-CV-JAHBGS, 2018 U.S. Dist. LEXIS 45820, 2018 WL 1400718, at *4 (S.D. Cal. Mar. 20, 2018)*. The court noted that in contrast, the allegedly deceptive advertising alleged by the plaintiff in *John* "is far less comprehensive, only including Defendant's in store signage that purported to offer a substantial discount off of the 'Ticket' price." *Id.* Additionally, the plaintiff "actually alleged that he was exposed to the deceptive advertising and affirmatively relied on such when making his purchase decision." *Id.* The court concluded that the plaintiff's allegations "are sufficient to distinguish this case from *Nunez*." *Id.*

Here, Plaintiff alleges that "most, if not all Fossil Outlet Products sold in the Fossil Outlet Stores are subject to the *same* fraudulent pricing scheme[.]" FAC ¶ 10 (emphasis added). Moreover, Plaintiff's investigation **[*17]** revealed that "Defendants' deceptive advertising practices were *systematic* and *pervasive* at Fossil Outlet Stores as Fossil Outlet Products remain continuously discounted from the Reference Price listed on the tag price or they are not offered for sale at their Reference Price . . . for any substantial period of time, and in most cases, not at all[.]" *Id. ¶ 40* (emphasis added). Unlike *Nunez II*, Plaintiff alleges that he seeks to represent individuals who were exposed to the same type of in-store, deceptive advertising and labeling that he was exposed to. Thus, Plaintiff's allegations are more analogous to *John* because the deceptive advertising alleged only included Defendants' in-store signage offering discounts from the price listed on the products' price tags. *Id. ¶ 6*.

Moreover, similar to *Branca*, Plaintiff's claims do not depend on what type of product an individual purchased from a Fossil Outlet Store. Nor do Plaintiff's allegations "relate to the exact prices, percentages of savings listed on the tags, or specific characteristics of the underlying products, which would vary by product." *Branca, 2015 U.S. Dist. LEXIS 176888, 2015 WL 10436858, at *5*.[5] Rather, Plaintiff's claims depend on Fossil Outlet Products bearing the Like Style tags, and **[*18]** the surrounding in-store signage, similar to those relied upon by Plaintiff. Plaintiff challenges the alleged pricing scheme—not the actual product sold by Fossil Outlet Stores or the exact price or percentage of savings listed on the product's tag.

---

[5] Defendants urge the Court to "follow its decisions in *Oxina* and *Alaei* rather than *Branca*[.]" Doc. No. 11-1 at 7 n.1. Both cases, however, are inapposite. In *Oxina v. Lands' End, Inc.*, this Court found that the plaintiff lacked standing to bring claims on behalf of all purchasers of the defendant's apparel because the purported misrepresentation—"Made in USA"—was listed on the defendant's website and the Court could not distinguish which items the "Made in USA" statement was mistakenly applied to and where each item of apparel also had its own unique physical tag that affected the Court's assessment of the statement on the website. *No. 14-CV-2577-MMA-NLS, 2015 U.S. Dist. LEXIS 94847, 2015 WL 4272058, at *6 (S.D. Cal. June 19, 2015)*. Thus, unlike this case, the purported misrepresentations as well as the products themselves varied from item to item. Moreover, in *Alaei v. Kraft Heinz Food Co.*, a case where the composition of the product, in addition to the product's advertising, was at issue, the Court found that based upon the plaintiff's allegations, it could not "determine whether the unpurchased products are sufficiently similar to Heinz 57 Sauce to confer standing upon Plaintiff[.]" *No. 15-CV-2961-MMA-DHB, 2016 U.S. Dist. LEXIS 63914, at *8 (S.D. Cal. Apr. 22, 2016)*. Here, however, Plaintiff's exhibits demonstrate that Fossil Outlet Stores utilized the same allegedly deceptive labeling practice across numerous products—not just the product Plaintiff purchased. *See* FAC, Exhs. A-E.

Accordingly, the Court finds that Plaintiff has standing to sue on behalf of purchasers of other Fossil Outlet Products with uniform price tags and in-store signage that purported to offer a substantial discount because Plaintiff is challenging "the same basic mislabeling practice" across products. *Astiana, 2012 U.S. Dist. LEXIS 101371, 2012 WL 2990766, at *13*; *see also* *Dennis, 2017 U.S. Dist. LEXIS 140156, 2017 WL 3732103, at *7* ("Defendants' contentions regarding the differences in purchases and advertisements are best addressed at the class certification stage rather than the motion to dismiss stage.").

3. Plaintiff's Standing to Seek Injunctive Relief

Third, Defendants assert that Plaintiff lacks standing to seek injunctive relief because he is no longer at risk of being deceived by Fossil's "Like Style" pricing. Doc. No. 11-1 at 8. Plaintiff contends that consumers can have standing to seek injunctive relief under the UCL, despite having learned of the wrongful conduct at issue. *See* ***[*19]*** Doc. No. 13 at 22.

HN8[] To establish Article III standing, a plaintiff must show that he or she suffered an "injury in fact," that the injury is "fairly traceable" to the challenged conduct, and that it is "likely" and not just "speculative" that the injury will be "redressed by a favorable decision." *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. To establish an injury in fact, the harm suffered by a plaintiff must be "concrete and particularized," *id. at 560*, and there must be "a sufficient likelihood that [he or she] will again be wronged a similar way," *Bates v. UPS, 511 F.3d 974, 985 (9th Cir. 2007)* (quoting *City of Los Angeles v. Lyons, 461 U.S. 95, 111, 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983))*. A plaintiff "must establish a 'real and immediate threat of repeated injury.'" *Bates, 511 F.3d at 985* (quoting *O'Shea v. Littleton, 414 U.S. 488, 496, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974))*.

The Ninth Circuit recently addressed the split of authority among district courts regarding whether a plaintiff, who seeks to enjoin a seller or manufacturer from making false or misleading misrepresentations about an item the plaintiff previously purchased, must be able to establish that he would likely purchase the item again to satisfy the standing requirement. *See* *Davidson v. Kimberly-Clark Corp., 873 F.3d 1103, 1113 (9th Cir. 2017)*. ***HN9***[] In *Davidson*, the Ninth Circuit held that "a previously deceived consumer may have standing to seek an injunction against false advertising or labeling, even though the consumer now knows or suspects that the advertising was **[*20]** false at the time of the original purchase, because the consumer may suffer an actual and imminent . . . threat of future harm." *Id. at 1115* (internal quotation marks and citations omitted). The Ninth Circuit noted that in some cases, "the threat of future harm may be the consumer's plausible allegations that she will be unable to rely on the product's advertising or labeling in the future, and so will not purchase the product she would like to." *Id.* In other cases, "the threat of future harm may be the consumer's plausible allegations that she might purchase the product in the future, despite the fact it was once marred by false advertising or labeling, as she may reasonably, but incorrectly, assume the product was improved." *Id.* "Either way, we . . . are not persuaded that injunctive relief is *never* available for a consumer who learns after purchasing a product that the label is false." *Id.* (internal quotation marks and citation omitted) (emphasis in original).

Here, Plaintiff alleges that he "would not have made such purchase, but for Defendants' false representations and fraudulent omissions of the Reference Price of the item he purchased, as compared with the supposedly discounted price at **[*21]** which the Fossil Outlet Store offered the item for sale." FAC ¶ 16. Moreover, Plaintiff claims he "would purchase Defendants' products in the future . . . if price tags accurately reflect 'former' prices and discounts." *Id. ¶ 49*. However, Plaintiff, and other consumers, currently "have no realistic way to know which—if any—of Defendants' price tags and sale prices are not false or deceptive." *Id.* Accepting Plaintiff's allegations as true, the Court finds that Plaintiff sufficiently alleges that he desires to purchase Fossil Outlet Products, but does not purchase such products because he has no way of knowing whether Defendants' price tags and sale prices are deceptive. Similar to *Davidson*, such allegations "constitute[] a 'threatened injury [that is] certainly impending,' thereby establishing Article III standing to assert a claim for injunctive relief." *873 F.3d at 1116* (quoting *Clapper v. Amnesty Int'l USA, 568 U.S. 398, 409, 133 S. Ct. 1138, 185 L. Ed. 2d 264 (2013))*; *cf.* *John, 2018 U.S. Dist. LEXIS 45820, 2018 WL 1400718, at *7* (finding the plaintiff lacks standing to assert claims for injunctive relief because the plaintiff's "sole allegation pertaining to the prospect of future harm is that he may in the future shop at Defendant's outlet store.") (internal quotation marks omitted).

Accordingly, the Court finds that Plaintiff has standing **[*22]** to pursue injunctive relief. *See* *Davidson, 873 F.3d at 1115-16* ("Were injunctive relief unavailable to a consumer who learns after purchasing a product that the product's label is false, California's consumer protection laws would be effectively gutted[.]").

II. Motion to Dismiss Pursuant to *Rules 9(b)* and *12(b)(6)*

In his FAC, Plaintiff alleges that Defendants engage in a misleading and deceptive pricing scheme by representing, on the price tags of Fossil Outlet Products, prices that "were overstated and did not represent a bona fide price at which Fossil Outlet Products were previously sold." FAC ¶ 6. "Defendants convey their deceptive pricing scheme through in store signage offering steep discounts from the Reference Price listed on the products' price tags in the Fossil Outlet Stores," which are "fake reference prices" and "utilized only to perpetuate Defendants' fake-discount scheme." *Id.* ¶ 7. Defendants move to Dismiss Plaintiff's FAL, UCL, and CLRA claims under *Rules 12(b)(6)* and *9(b)*, and further contend that Plaintiff is not entitled to equitable relief or restitution. The Court considers each argument in turn.

1. Legal Standards

a. California's FAL, UCL, and CLRA

HN10[] California's FAL prohibits any "unfair, deceptive, untrue, or misleading advertising." **[*23]** *Cal. Bus. & Prof. Code § 17500*. The FAL provides, in relevant part:

> No price shall be advertised as a former price of any advertised thing, unless the alleged former price was the prevailing market price as above defined within three months next immediately preceding the publication of the advertisement or unless the date when the alleged former price did prevail is clearly, exactly and conspicuously stated in the advertisement.

Cal. Bus. & Prof. Code § 17501. "This statute makes it unlawful for a business to disseminate any statement 'which is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading[.]'" *Arevalo v. Bank of Am. Corp., 850 F. Supp. 2d 1008, 1023-24 (N.D. Cal. 2011)* (internal citation omitted). "The statute has been interpreted broadly to encompass not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public. . . . Consequently, even a perfectly true statement couched in such a manner that it is likely to mislead or deceive the consumer, such as by failure to disclose other relevant information, is actionable under this section." *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1162 (9th Cir. 2012)* (internal citations, quotations, and alterations omitted).

HN11[] California's UCL **[*24]** prohibits "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. The UCL provides a separate theory of liability under each of the three prongs: "unlawful," "unfair," and "fraudulent." *Stanwood v. Mary Kay, Inc., 941 F. Supp. 2d 1212, 1222 (C.D. Cal. 2012)* (citing *Lozano v. AT & T Wireless Servs., Inc., 504 F.3d 718, 731 (9th Cir. 2007))*. "The UCL expressly incorporates the FAL's prohibition on unfair advertising as one form of unfair competition." *Hinojos, 718 F.3d at 1103*. Accordingly, any violation of the FAL also violates the UCL. *Williams v. Gerber Prods.Co., 552 F.3d 934, 938 (9th Cir. 2008)* (citing *Kasky v. Nike, Inc., 27 Cal. 4th 939, 950, 119 Cal. Rptr. 2d 296, 45 P.3d 243 (2002))*.

Lastly, ***HN12***[] California's CLRA prohibits "unfair methods of competition and unfair or deceptive acts or practices." *Cal. Civ. Code § 1770*. Specifically, the CLRA prohibits, among other things, "[a]dvertising goods or services with intent not to sell them as advertised" and "[m]aking false or misleading statements of fact concerning reasons for, existence of, or amounts of price reductions." *Cal. Civ. Code § 1770(a)(9)*, *(13)*.

b. The Reasonable Consumer Test

HN13[] To state a claim under the FAL, UCL, or the CLRA, a plaintiff must allege that the defendant's purported misrepresentations are likely to deceive a reasonable consumer. *See Williams, 552 F.3d at 938* (explaining that unless the advertisement at issue targets a particularly vulnerable group, courts must evaluate claims for false or misleading advertising from the perspective **[*25]** of a reasonable consumer). "A reasonable consumer is 'the ordinary consumer acting reasonably under the circumstances.'" *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1161-62 (9th Cir. 2012)* (quoting *Colgan v. Leatherman Tool Grp., Inc., 135 Cal. App. 4th 663, 682, 38 Cal. Rptr. 3d 36 (Ct. App. 2006))*. "Likely to deceive implies more than a mere possibility that the advertisement might conceivably be misunderstood by some few consumers viewing it in an unreasonable manner." *In re Sony Gaming Networks and Customer Data Sec. Breach Litig., 903 F. Supp. 2d 942, 967 (S.D. Cal. 2012)* (citing *Lavie v. Procter & Gamble Co., 105 Cal. App. 4th 496, 508, 129 Cal. Rptr. 2d 486 (2003))*. Rather, "the phrase indicates that the ad is such that it is probable that a significant portion of the general consuming public or of targeted consumers, acting reasonably in the circumstances, could be misled." *Lavie, 105 Cal. App. 4th at 508*. "In determining whether a statement is misleading under the statute, the primary evidence in a false advertising case is the advertising itself." *Bruton v. Gerber Products Co., 961 F. Supp. 2d 1062, 1092 n.20 (N.D. Cal. 2013)* (quoting *Colgan, 135 Cal. App. 4th at 679*) (internal quotation marks omitted).

HN14[] As a general matter, courts applying the reasonable consumer test to businesses' use of comparative reference prices have distinguished between two categories: "exclusive product" cases and "non-exclusive product" cases. *Sperling v. Stein Mart, Inc., F. Supp. 3d , No. 15-CV-1411-AB-KKx, 291 F. Supp. 3d 1076, 2018 U.S. Dist. LEXIS 61770, 2018 WL 1214736, at *5 (C.D. Cal. Feb. 23, 2018)*. In exclusive product cases, a store, usually an outlet store, "sells a lower-price, different version of a product sold in a traditional retail store." *2018 U.S. Dist. LEXIS 61770, [WL] at *6*. "The outlet uses the price of the product made for the retail store as a comparative **[*26]** reference price on price tags" but the product actually sold in the outlet store "is made exclusively for the outlet and is never sold for the comparative reference price at a traditional retail store." *Id.* In contrast, in non-exclusive product cases, "more than one retailer offers the product at issue for sale. Because other retailers offer the same product for sale, there are legitimate prices to which to compare the defendant's comparative reference price." *Id.* In exclusive product cases, "courts generally find that a plaintiff can proceed with his or her claims." *Id.* This result "makes sense" because in exclusive product cases, where the outlet products "were never sold in traditional retail stores for the comparative reference prices presented on the price tags," it is "deceptive to use the full retail items as price comparators for those products." *Id.*[6]

2. Analysis

a. Rule 9(b)

Defendants argue Plaintiff's FAC does not meet the heightened pleading standards under *Rule 9(b)* because: (1) Plaintiff fails to plead the circumstances of his purchase with particularity; (2) reasonable consumers would not be deceived by the **[*27]** Like Style tags; and (3) Plaintiff does not allege facts to support his claims that Defendants' prices are deceptive. The Court addresses Defendants' arguments below.

First, Defendants contend that Plaintiff "does not claim to have viewed or relied on 'Like Style' before making his purchase, does not claim where he saw any such representation, and does not state how he interpreted this phrase, or identify any other statement that he found material." Doc. No. 11-1 at 11. Thus, Defendants claim that Plaintiff fails to allege the who, what, when where, and how of the alleged misconduct.

---

[6] Defendants argue that Plaintiff "ignores" the Ninth Circuit's recent and "significant decision" in *Sperling v. DSWC, Inc. ("DSW"), 699 Fed. Appx. 654 (9th Cir. 2017)*, and instead focuses on the Ninth Circuit's 2017 *Rubenstein* decision, "which was decided before *Sperling* and runs contrary" to *In re GlenFed, Inc., Sec. Litig., 42 F.3d 1541 (9th Cir. 1994)* (en banc) and its progeny. Doc. No. 14 at 4. The Court disagrees. Defendants fail to note that *DSW*, unlike *Rubenstein*, is a non-exclusive product case. *See Sperling, F. Supp. , 2018 U.S. Dist. LEXIS 61770, 2018 WL 1214736, at *6-7* (noting that *Rubenstein* is an exclusive product case, while *DSW* is a non-exclusive product case). Thus, because this is an exclusive product case, Plaintiff's reliance on *Rubenstein* is appropriate.

The Court finds Plaintiff's allegations are sufficient to support his claim that the Like Style tags are deceptive. In his FAC, Plaintiff alleges that on November 16, 2016 (the "when"), Plaintiff (the "who") purchased a Travis Workbag, Style SBG1136200 at a Fossil Outlet Store in Carlsbad, California (the "where"). *See* FAC ¶¶ 34-37. Plaintiff claims that Defendants misled customers through the prices on the Like Style tags and instore signage (the "what"). *Id.* ¶ 37. Regarding the "how," Plaintiff further alleges that the Travis Workbag had a price tag attached to it, bearing a price of $198.00. *Id.* ¶ 36. **[*28]** Plaintiff also "observed signage" at the store "above the subject item" which represented that the bag was on sale for "40% Off Ticketed Price" and another sign indicating "20% Off" entire purchase price. *Id.* ¶¶ 37, 34. Plaintiff alleges that he "reasonably believed the truth of the represented price attached to the price tag[.]" FAC ¶ 17. Believing that he "was receiving a significant discount from the Reference Price listed on the price tag by purchasing the bag, Plaintiff decided to purchase the item and proceeded to the cash register where he did in fact purchase the item." *Id.* ¶ 38.

Defendants emphasize that Plaintiff does not claim to have relied on the phrase "Like Style" before making his purchase or "identify any other statement that he found material." Doc. No. 11-1 at 11. Defendants rely primarily on *Chase v. Hobby Lobby Stores, Inc.* ("*Chase I*") in support of this argument. *No. 17-CV-881-GPC-BLM, 2017 U.S. Dist. LEXIS 162909, 2017 WL 4358146 (S.D. Cal. Oct. 2, 2017)*. In *Chase I*, the plaintiff purchased a photo frame after observing a sticker listing the "Marked" price as $17.99, and a placard next to the photo frame that stated "Photo Frames 50% OFF the Marked Price." *2017 U.S. Dist. LEXIS 162909, [WL] at *1*. The defendant introduced as an exhibit the placard which the plaintiff referenced **[*29]** in her complaint, which stated "Photo Frames ALWAYS 50% OFF THE MARKED PRICE*." *2017 U.S. Dist. LEXIS 162909, [WL] at *8*. The asterisk directed consumers to a disclaimer in smaller print on the placard that stated "DISCOUNTS PROVIDED EVERY DAY; MARKED PRICES REFLECT GENERAL U.S. MARKET VALUE FOR SIMILAR PRODUCTS." *Id.* In concluding that the plaintiff did not sufficiently allege the "how" of the defendant's alleged misrepresentation, the court explained that the plaintiff did not plead whether she saw the word "ALWAYS," whether she saw the asterisk, or whether she even read the disclaimer at issue. *See* *2017 U.S. Dist. LEXIS 162909, [WL] at *8-9*.

Chase I, however, is distinguishable for several reasons. First, the court did not find that the plaintiff failed to sufficiently allege the "how" of the misrepresentation by failing to address how she interpreted the term "Marked" on the price tag. Rather, the court focused on the language printed on the placard. Second, unlike *Chase I*, there is no lengthy disclaimer or asterisk directing Plaintiff to language expressly stating that the price listed on the price tag reflects the "VALUE FOR SIMILAR PRODUCTS." *2017 U.S. Dist. LEXIS 162909, [WL] at *8*. The photos of Defendants' in-store signage, attached as exhibits to the FAC, state "TAKE 50% OFF LOWEST TICKETED **[*30]** PRICE" and "SALE $129." FAC Exhs. A, C. Third, Plaintiff attaches a true and correct copy of the price tag attached to the bag that he purchased on November 16, 2016. *See* FAC, Exh. E. Below the "$198.00" figure, the price tag includes the phrase "LIKE STYLE." *Id.* Plaintiff expressly alleges that after reviewing the price tag attached to the Travis Workbag, he believed the price tag referred to the regular ticketed price of the item. FAC ¶¶ 17, 37-38. Plaintiff "understood the Reference Price representation to indicate a true former price of the identical item, as sold at a mainline Fossil retail store." FAC ¶ 17. Thus, in construing Plaintiff's allegations in the light most favorable to him, Plaintiff read the price tag and concluded that the price listed reflected the regular price of the Travis Workbag. *See* *Knapp v. Art.com, Inc., No. 16-CV-768-WHO, 2016 U.S. Dist. LEXIS 78128, 2016 WL 3268995, at *5 (N.D. Cal. June 15, 2016)* ("Viewed in the light most favorable to the nonmoving party, these allegations are sufficient to plausibly establish that Knapp interpreted the '40% off' language as advertising a discount from Art.com's former prices. Indeed, it is not clear how else Knapp could have reasonably understood the [language.]").

Further, Plaintiff explains that **[*31]** he is not challenging the use of the phrase "Like Style;" rather, Plaintiff challenges Fossil's pricing scheme "whereby Fossil systematically and routinely represented its Fossil Outlet Products as being offered to the consumer at a significant discount, when the purported discounts were, in fact, false." Doc. No. 13 at 12. Thus, the Court is mindful that the gravamen of Plaintiff's claims concern the allegedly deceptive pricing scheme. The Court finds that "[t]he pricing scheme has been alleged with requisite specificity to inform both the Court and Defendant as to the 'who, what, when, where, and how' of the alleged fraud." *John, 2018 U.S. Dist. LEXIS 45820, 2018 WL 1400718, at *7* (citing *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003))*.

Accordingly, the Court finds that Plaintiff's allegations, at this stage of the proceedings, are sufficient to satisfy Rule 9(b). *See* Rubenstein, 687 F. App'x at 567 (finding that the plaintiff had satisfied 9(b)'s "how" requirements by alleging that the defendant's use of "Compared To price tags . . . misled consumers into believing that the Compared To prices were charged by either [defendant] or other merchants in the vicinity for comparable products[.]"); *see also* John, 2018 U.S. Dist. LEXIS 45820, 2018 WL 1400718, at *7 (finding the plaintiff has met the Rule 9(b) standard by including the date he purchased the product, the store where he purchased **[*32]** the product, a description of the purchased product, a description of the advertising he relied upon when purchasing the wallet, and pictures attached as exhibits depicting the products and their corresponding advertisements).

Second, Defendants argue that Plaintiff's claims fail under Rule 9(b) because he "does not allege how reasonable consumers would interpret the phrase 'Like Style.'" Doc. No. 11-1 at 13. Specifically, Defendants contend that "reasonable consumers ***would not*** interpret 'Like Style' to mean a former price." *Id.* (emphasis in original).

In *Chase v. Hobby Lobby Stores, Inc.* ("*Chase II*"), the court found that the plaintiff "adequately redressed the deficiencies in her prior complaint" by alleging that she did not notice the word "always" on the placard, nor did she notice or read any disclaimer or other language on the placard. No. 17-cv-881-GPC-BLM, 2018 U.S. Dist. LEXIS 21165, 2018 WL 786743, at *4 (S.D. Cal. Feb. 8, 2018). The court indicated that "[t]aking Plaintiff's alleged facts as true and drawing all reasonable inferences in favor of the plaintiff, . . . it is plausible that a 'reasonable consumer' could have been misled by plaintiff's advertising" and could have believed that the defendant previously sold the item for the marked price. *Id.*

Here, the Court **[*33]** finds that it is plausible that reasonable consumers could understand the prices on the Like Style tags "to be a valid representation of a true former price on the identical product." FAC ¶ 18; *see* Stathakos v. Columbia Sportswear Co., No. 15-CV-4543-YGR, 2016 U.S. Dist. LEXIS 58310, 2016 WL 173001, at *4 (N.D. Cal. May 2, 2016) (The Court finds that it is facially plausible that plaintiffs and other reasonable consumers would understand the Reference Prices at issue here to refer to former prices for the same product than comparable prices for similar products."). The court in Chase II found that reasonable consumers could have been misled by the defendant's advertising even where a lengthy disclaimer appeared on the in-store signage indicating the photo frames are "ALWAYS" 50% off, and that the marked prices refer to the value of similar products. Here, however, there is no such explicit disclaimer. Defendants claim reasonable consumers would read the price in connection with the "Like Style" language and understand the price to be comparison to the price of a similar item—not a former price for the identical item. *See* Doc. No. 11-1 at 14. The Court is not persuaded. By Defendants' own admission, "[t]he word 'like,' in adjective form, means 'having the *same* ***[*34]*** or similar qualities.'" *Id.* (emphasis added). Thus, far from Defendants' argument that the meaning of "Like Style" "defies common sense," it is entirely plausible that a reasonable consumer would understand the price listed on the Like Style tags to represent a former price for the *same* item. Doc. No. 14 at 7.

Moreover, as Plaintiff notes, it is not the phrase "Like Style" that Plaintiff challenges. Instead, Plaintiff challenges Defendants' alleged use of a fictitious price on the price tag to inflate the discounts they offer to consumers. *See* Doc. No. 13 at 12-13 n.1. At this stage of the proceedings, the Court finds that it is plausible that reasonable consumers would understand the price listed on the Like Style tags as referring to a former price of the same product. Moreover, "whether [the price tags] actually were misleading is a matter for another day." Covell, 2018 U.S. Dist. LEXIS 12437, 2018 WL 558976, at *4. As the Ninth Circuit has noted, "[w]here, as here, the reasonable consumer test applies to a plaintiff's underlying claims, it is a 'rare situation in which granting a motion to dismiss is appropriate.'" Rubenstein, 687 F. App'x at 566 (quoting *Williams, 552 F.3d at 939*); *see also* Reid v. Johnson & Johnson, 780 F.3d 952, 958 (9th Cir. 2015) (stating that the reasonable consumer standard raises questions of fact that are appropriate for resolution **[*35]** on a motion to dismiss only in "rare situations.").

Third, Defendants claim Plaintiff has not pleaded "any facts" to support his contention that the $198.00 price was inaccurate. Doc. No. 11-1 at 16. As Plaintiff correctly notes, Plaintiff is "not required to plead that [he] has conducted a pre-suit investigation—or include the results of such investigations—in every case, particularly where the information is not within the personal knowledge of the pleader." Stathakos, 2016 U.S. Dist. LEXIS 58310, 2016 WL 1730001, at *4.

With respect to the Travis Workbag Plaintiff purchased allegedly in reliance on the price listed on the Like Style tag and 40% off representation, Plaintiff alleges that the price listed "was never the prevailing market retail price in the preceding 90 days before Plaintiff's purchase." FAC ¶ 40. Moreover, with respect to the class allegations, Plaintiff alleges that "Defendants' deceptive advertising practices were systematic and pervasive at Fossil Outlet Store as Fossil Outlet Products remain continuously discounted from the Reference Price listed on the tag price" or such products "are not offered for sale at their Reference Price (the purported 'Regular Price') for any substantial period of time, and in most cases, not at **[*36]** all[.]" *Id.* Plaintiff alleges that Fossil Outlet Products sold at Fossil Outlet Stores "are designed and manufactured for, and sold *exclusively* by, those stores, which means that such items were never sold—or even intended to be sold—at the Reference Price advertised on the price tags." *Id.* (emphasis in original). Further, Plaintiff did conduct an investigation and attaches to his FAC examples of the products Plaintiff investigated and determined to be continuously discounted from the price listed on the Like Style tags for the preceding 90 days. *See* FAC, Exhs. A-D. Thus, "Defendants' implicit request to engage in merits analysis relative to plaintiff['s] investigation is premature." *Stathakos, 2016 U.S. Dist. LEXIS 58310, 2016 WL 1730001, at *4*.

Accordingly, taking Plaintiff's allegations as true, which the Court must at this stage of the proceedings, the Court finds that Plaintiff's allegations are sufficient to satisfy *Rule 9(b)*. *See Rael v. New York & Co., No. 16-CV-369-BAS-JMA, 2017 U.S. Dist. LEXIS 110774, 2017 WL 3021019, at *4 (S.D. Cal. July 17, 2017)* (concluding that the plaintiff's allegations satisfy *Rule 9(b)* because they "give[] Defendants notice as to the basis for Plaintiff's claim that the 70% off representation was false, and the information about the discounts offered by Defendants is primarily within the Defendants' knowledge."); **[*37]** *Stathakos, 2016 U.S. Dist. LEXIS 58310, 2016 WL 1730001, at *4* (finding the plaintiffs' allegations sufficient where the plaintiffs "alleged that there should have been no reference price because the products at issue were sold exclusively at Columbia Outlet stores and were *not* previously sold at the higher Reference Price at all.") (emphasis in original).

b. Rule 12(b)(6)

Additionally, Defendants claim that Plaintiff fails to state a claim pursuant to *Rule 12(b)(6)* under the CLRA, FAL, and UCL. *See* Doc. No. 11-1 at 19-21.

Defendants first argue that Plaintiff fails to state a claim under *subdivisions (a)(9)* and *(a)(13)* of the CLRA. *See id.* at 19. Specifically, Defendants claim that Plaintiff fails to state a claim under *section (a)(9)* because "he does not allege that Fossil falsely advertised the *goods* that he purchased—instead, he merely contends that the *price* for the bag he bought was deceptive." Doc. No. 11-1 at 19 (emphasis in original). Moreover, Defendants assert Plaintiff fails to state a claim under section *(a)(13)* because "the FAC does not identify any representations by Fossil regarding 'price reductions.'" *Id.* Further, Defendants claim Plaintiff's CLRA claim fails because Plaintiff does not allege he suffered any damage as a result of Defendants' allegedly deceptive pricing scheme.

HN15[] *Section 1770(a)(9) of the California Civil Code* prohibits **[*38]** "[a]dvertising goods or services with intent not to sell them as advertised[.]" *Cal. Civ. Code § 1770(a)(9)*. *Section 1770(a)(13)* prohibits "[m]aking false or misleading statements of fact concerning reasons for, existence of, or amounts of price reductions[.]" *Cal. Civ. Code § 1770(a)(13)*. Moreover, the CLRA provides relief to a "consumer who suffers any damage as a result of the use or employment by a person of a method, act, or practice declared to be unlawful by *Section 1770*." *Cal. Civ. Code § 1780(a)*.

Here, the Court finds Plaintiff's allegations are sufficient to state a claim for violations of the CLRA. With respect to *§ 1770(a)(9)*, Plaintiff expressly alleges that the misrepresentation at issue pertains to the purported regular price and discounted price falsely advertised across all items sold at Fossil's Outlet Stores. *See* FAC ¶¶ 6-7, 9-10, 98-104. Moreover, with respect to *§ 1770(a)(13)*, Plaintiff alleges that the prices listed on the Like Style tags did not accurately reflect a true former price for the same product, and that the purported discounts were false because the product was never sold at the price listed on the tags. *See id.* ¶¶ 7, 9-10, 98-104. Finally, Plaintiff sufficiently alleges that he suffered damage, as he claims he would not have purchased the bag in the absence of Defendants' misrepresentations. **[*39]** *Id.* ¶ 38; *see Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 120 Cal. Rptr. 3d 741, 246*

P.3d 877, 890 (Cal. 2011) (concluding that a consumer's allegation that "he or she would not have bought the product but for the misrepresentation" is "sufficient to allege economic injury.").

Second, Defendants argue that Plaintiff fails to state a claim under the FAL because Plaintiff does not allege an "untrue or misleading" representation, nor does Plaintiff allege any facts to show that the price on the Like Style tag was not the prevailing price within the preceding 90 days of his purchase. Doc. No. 11-1 at 20. However, the FAC alleges specific representations and why those representations are false and misleading that are sufficient to state a claim for violations of the FAL. *See* FAC ¶¶ 6-10, 89-97.

Third, Defendants assert that Plaintiff fails to state a claim under the UCL's "unfairness" or "unlawfulness" prongs because Plaintiff has not alleged any conduct by Fossil that offends an established public policy or that violates any underlying law. *See* Doc. No. 11-1 at 20. With respect to the "unlawfulness" prong, because the Court finds that Plaintiff sufficiently alleges a violation of the FAL and the CLRA, "Plaintiff also adequately alleges a violation of the UCL 'unlawful' prong." *Rael, 2017 U.S. Dist. LEXIS 110774, 2017 WL 3021019, at *5*; *see* **[*40]** *also Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 539-40 (Cal. 1999)* ("By proscribing any unlawful business practice, [the UCL] borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable.") (internal quotation marks and citation omitted)).

HN16[] With respect to the "unfairness" prong, the California Supreme Court has defined the word "unfair" under the UCL to mean conduct that "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech, 973 P.2d at 544*. Lower courts, however, "have struggled to apply these rules in the context of consumer cases." *Rael, 2017 U.S. Dist. LEXIS 110774, 2017 WL 3021019, at *5*. Many courts utilize a three-part test set forth by the appellate court in *Camacho v. Auto. Club of S. Cal., 142 Cal. App. 4th 1394, 48 Cal. Rptr. 3d 770, 777 (Cal. Ct. App. 2006)*. Under this test, courts consider factors including: (1) whether the consumer injury is substantial; (2) whether the injury is outweighed by any countervailing interests; and (3) whether the injury is one that consumers themselves could not reasonably have avoided. *See id.* Notably, "[w]hether a practice is . . . unfair is generally a question of fact which requires consideration and weighing **[*41]** of evidence from both sides and which usually cannot be made on demurrer." *Klein v. Chevron U.S.A., Inc., 202 Cal. App. 4th 1342, 137 Cal. Rptr. 3d 293, 321 (Cal. Ct. App. 2012)* (internal quotation marks and citations omitted).

Here, Plaintiff alleges that the prices represented on the price tags were overstated and did not reflect a bona fide price at which the products were sold. FAC ¶ 6. Additionally, Plaintiff alleges that the advertised prices were not prevailing market retail prices within the three months immediately preceding the publication of the advertised prices. *Id.* Further, Plaintiff alleges that he, "like other Class members, was lured in, relied on, and was damaged by these pricing schemes that Defendants carried out." *Id. ¶ 18*. Thus, taking Plaintiff's allegations as true, the Court finds that Plaintiff has alleged Defendants engaged in conduct sufficient to meet the "unfair" prong as defined in *Camacho*. *See Rael, 2017 U.S. Dist. LEXIS 110774, 2017 WL 3021019, at *5* ("At this stage of the proceedings the Court finds Plaintiff's allegations that Defendants' false sales substantially injured consumers by inducing them to buy products they would not otherwise have purchased . . . is sufficient to meet the 'unfair' prong as defined in *Camacho*.").

c. Equitable Relief and Restitution

Defendants further argue that Plaintiff "is not **[*42]** entitled to any of the relief he seeks." Doc. No. 11-1 at 21. Specifically, Defendants claim Plaintiff's claim for equitable relief under the UCL, FAL, and CLRA fails and that Plaintiff is not entitled to restitution.

Defendants first contend that Plaintiff's claims for equitable relief under the UCL, FAL, and CLRA fail because "Plaintiff does not allege that he lacks an adequate remedy at law." Doc. No. 11-1 at 21. Defendants claim "Plaintiff's CLRA damages claim prevents him from establishing that there is no adequate remedy at law available to him." *Id.* at 21-22. Thus, Defendants request the Court dismiss Plaintiff's request for equitable relief. Plaintiff argues that he is entitled to plead equitable relief in the alternative at the pleading stage, and that he sufficiently alleges the necessity for equitable relief where an award of damages alone would not rectify the harm. Doc. No. 13 at 20.

District courts are split on whether a plaintiff's claims for equitable relief should be dismissed at the pleading stage. *Compare* Munning v. Gap, Inc., 238 F. Supp. 3d 1195, 1204 (N.D. Cal. 2017) (dismissing the plaintiff's claims for equitable relief because the plaintiff has an adequate remedy at law), *with* Covell, 2018 U.S. Dist. LEXIS 12437, 2018 WL 558976, at *8 (declining to dismiss the plaintiff's claims for equitable **[*43]** relief at the pleading stage). As Plaintiff points out, Section 17205 of the Business and Professions Code states that unless "otherwise expressly provided, the remedies or penalties provided by [the UCL] are *cumulative* to each other and to the remedies or penalties available under all other laws of [California]." Cal. Bus. & Prof. Code § 17205 (emphasis added). "Put simply, a plaintiff seeking damages is not automatically precluded from obtaining UCL relief." Covell, 2018 U.S. Dist. LEXIS 12437, 2018 WL 558976, at *7. One district court recently explained that "plaintiffs may seek injunctive and/or restitutionary equitable relief separate and apart from the same underlying claims . . . in which plaintiffs seek monetary damages." Estakhrian v. Obenstine, 233 F. Supp. 3d 824, 846 (C.D. Cal. 2017).

Here, **HN17**[] the Court finds persuasive the Covell court's reasoning. In *Covell*, the court explained that "[i]f Plaintiff ultimately prevails on her claims, she will still need to show that equitable relief is the only way to remedy a specific type of injury suffered by herself or the class. However, she may be able to do so by, for example, arguing that injunctive relief is the only way to protect the class from future deceptive behavior." 2018 U.S. Dist. LEXIS 12437, 2018 WL 558976, at *8; *see also* Aberin v. Am. Honda Motor Co., No. 16-CV-4384-JST, 2018 U.S. Dist. LEXIS 49731, at *26 (N.D. Cal. Mar. 26, 2018) ("This Court joins the many other courts, however, that have reached **[*44]** the opposite conclusion, finding no bar to the pursuit of alternative remedies at the pleading stage."); Adkins v. Comcast Corp., No. 16-CV-5969-VC, 2017 U.S. Dist. LEXIS 137881, 2017 WL 3491973, at *3 (N.D. Cal. Aug. 1, 2017) ("[T]his Court is aware of no basis in California or federal law for prohibiting the plaintiffs from pursuing their equitable claims in the alternative to legal remedies at the pleading stage."). Plaintiff expressly alleges that "[t]his deception will continue if Defendants are not enjoined from continuing their pricing scheme." FAC ¶ 18; *cf.* Gomez v. Jelly Belly Candy Co., No. 17-CV-575-CJC-FFM, 2017 U.S. Dist. LEXIS 134188, at *4 (C.D. Cal. Aug. 18, 2017) (noting that the plaintiff "has not even alleged facts that could support a future finding that monetary relief is insufficient to compensate her for the alleged harm."). Accordingly, the Court "declines to dismiss Plaintiff's claims for equitable relief." Covell, 2018 U.S. Dist. LEXIS 12437, 2018 WL 558976, at *8.

Second, Defendants assert that Plaintiff is not entitled to restitution because Plaintiff "does not allege that the bag he purchased was damaged or otherwise worth less than what he paid[.]" Doc. No. 11-1 at 25. Plaintiff argues that Defendants' challenge is misplaced and that Defendants are attempting "to elevate the pleading standard to require Plaintiff to presently identify and commit to a restitution calculation method." Doc. No. 13 at **[*45]** 23.

HN18[] Courts have "very broad discretion to determine an appropriate remedy as long as it is supported by the evidence and is consistent with the purpose of restoring the plaintiff the amount that the defendant wrongfully acquired." Astiana v. Kashi Co., 291 F.R.D. 493, 506 (S.D. Cal. 2013). "The court's discretion is not entirely unbounded, however, because 'restitution under the [UCL and FAL] must be of a measureable amount to restore to the plaintiff what has been acquired by violations of the statutes, and that measureable amount must be supported by evidence.'" Russell v. Kohl's Dep't Stores, Inc., No. 15-CV-1143-RGK-SPx, 2015 U.S. Dist. LEXIS 176123, 2015 WL 12781206, *2 (C.D. Cal. Oct. 6, 2015) (quoting Colgan, 135 Cal. App. 4th at 698).

Here, Plaintiff alleges that he "would not have purchased the bag in the absence of Defendants' misrepresentations." FAC ¶ 38. "Defendants have been unjustly enriched at the expense of Plaintiff and members of the proposed class." Id. ¶ 76. Thus, Plaintiff seeks "restitution and other appropriate equitable remedies, including an injunction under the UCL and FAL; and restitution, damages, and injunction under the CLRA." Id. ¶ 21. These allegations are "sufficient to state a claim for restitution under the UCL." Azimpour II, 2017 U.S. Dist. LEXIS 63516, 2017 WL 1496255, at *9. "[W]hether Plaintiff can submit sufficient evidence of a measurable amount of restitution is a premature **[*46]** determination at the pleading stage." *Id.; see also* John, 2018 U.S. Dist. LEXIS 45820, 2018 WL 1400718, at *8 (denying the defendant's motion to dismiss the plaintiff's claims for restitution where the plaintiff alleged that he would not have purchased the wallet without the misrepresentation made by the defendant, and that the defendant was unjustly enriched as a result of selling merchandise offered at a false discount); *Russell, 2015 U.S. Dist. LEXIS 176123, 2015 WL 12781206, at *5* ("Even though Plaintiffs have not alleged that the price they paid exceeds the value of the merchandise they purchased, they have still alleged sufficient facts to support a claim for restitution under the UCL and FAL.").

CONCLUSION

Based on the foregoing, the Court **DENIES** Defendants' motion to dismiss in its entirety.

IT IS SO ORDERED.

Dated: April 9, 2018

Opinion

[*352] **MEMORANDUM DECISION & ORDER**

COGAN, District Judge.

Plaintiff SourceOne, Inc. has sued fellow dental-supplies distribution companies Patterson Companies, Inc. and Benco Dental Supply Company, accusing them of violating *§ 1* of the Sherman Act. SourceOne contends that defendants conducted a group boycott against SourceOne's distribution partners and pressured manufacturers **[**3]** and at least one individual dentist to join the boycott. SourceOne also brought various state-law claims based on the same conduct. Before the Court are defendants' motions for summary judgment on all of SourceOne's claims.

Because SourceOne has produced evidence that tends to exclude the possibility that defendants acted independently (in other words, evidence that the inference that defendants conspired is reasonable in light of the competing inference of independent action), defendants' motions for summary judgment on the Sherman Act claim are DENIED. Defendants' motions for summary judgment on plaintiff's damages claim are also DENIED. As to the state-law claims, the Court concludes that under applicable law, SourceOne has demonstrated a genuine issue of material fact as to its civil-conspiracy and tortious-interference claims, and therefore defendants' motions for summary judgment are DENIED as to those claims. However, the Court concludes that the applicable state law would not recognize an aiding-and-abetting claim in this context, so defendants' motions for summary judgment are GRANTED as to that claim.

BACKGROUND

SourceOne alleges that dental-supplies distributors Patterson and **[**4]** Benco, as well as distributor Henry Schein, Inc. (which was originally named in the complaint but which settled with SourceOne), conspired to exclude it from the market and took overt acts in furtherance of that conspiracy by boycotting the Texas and Arizona Dental Associations' annual meetings and by **[*353]** pressuring manufacturers and individual dentists not to do business with SourceOne. The following is a non-exhaustive summary of the key evidence. As is required on a motion for summary judgment, the Court views the contested facts in the light most favorable to SourceOne.

I. Texas Dental Association's 2014 Meeting

SourceOne alleges that defendants formed the conspiracy sometime between October 2013 and January 2014. In October 2013, the Texas Dental Association (TDA) launched "TDA Perks Supplies," a TDA-branded online marketplace for dental supplies and equipment created through a partnership with SourceOne. Defendants found out about TDA Perks Supplies in mid-October 2013.

Sometime before October 23, 2013, Ron Fernandez, Benco's regional manager for San Antonio, Austin, and Houston, called John Hyden, Patterson's San Antonio regional manager, to discuss the TDA's upcoming annual meeting **[**5]** and whether their respective companies would be attending in light of the TDA's partnership with SourceOne. Fernandez testified at his deposition that one of his goals during this discussion was to identify whether Patterson would be attending the TDA meeting to avoid placing Benco at a competitive disadvantage if it pulled out of the TDA meeting and Patterson attended. Fernandez told Hyden that Benco was considering pulling out of the 2014 TDA, and asked Hyden if Patterson planned to do the same. Fernandez testified that he offered information to Hyden to induce Hyden to share similar information. Fernandez discussed what Hyden told him with others at Benco, and Hyden discussed the call with Clint Edens, his supervisor at Patterson.

On October 23, 2013, Clint Edens, Patterson's decision-maker on attending the TDA meeting, emailed his superiors, informing them that "[a]s for Patterson, we have briefly discussed this TDAPerks site (not the source) with our dealer competitors at the local San Antonio & Houston level . . . I am committed to pulling from the TDA if they do not reconsider competing with us via TDA perks [*sic*]." Glenn Showgren, a manager at Schein, also reported internally **[**6]** as early as October 31, 2013 that Patterson, Benco, and another distributor, Burkhart, were considering pulling out of the 2014 TDA meeting.

Sometime before November 20, 2013, Randall McLemore, Schein's Dallas branch manager, visited his Patterson counterpart, Bob Ingersoll, to discuss the TDA annual convention. At his deposition, McLemore conceded that this in-person conversation with Ingersoll violated Schein's antitrust policy.

By December 11, 2013 (before Patterson had publicly announced that it would pull out of the 2014 TDA), Benco's Fernandez claimed that Patterson had already decided not to attend based on a conversation he had with a Patterson manager "about three weeks ago." That same day, Fernandez told Barrett Spencer, a Benco salesperson, in a text message: "I have been talking to the directors of Schein and Patterson. We are going to be taking a stand together against them [the TDA]."

Patterson announced that it would not attend the 2014 TDA meeting on December 13, 2013. Immediately after Patterson's announcement, a regional manager at Schein informed his supervisor that Patterson had dropped out of the 2014 TDA convention and that "I firmly believe they made the move expecting **[**7]** us to follow suit."

Dave Steck, a Schein vice president, later echoed this same sense of obligation to Patterson, or at least an obligation to keep Patterson apprised of Schein's decision. In late December 2013 or early January 2014, **[*354]** Dave Misiak, then-Vice President of Sales at Patterson, called Steck to tell him that Patterson was not going to attend the 2014 TDA convention and asking Steck if Schein was attending. Steck testified that, although he had known Misiak for five or six years, it was "unusual" for Misiak to contact him. Steck told Misiak that Schein had not yet decided, but that Steck would let Misiak know once it had. Steck testified at his deposition that he felt some obligation to tell Misiak Schein's final decision because Misiak had told him of Patterson's plans. Steck testified that he informed his boss, Tim Sullivan, of the call because he thought it was important for Sullivan to know of Patterson's plans for the 2014 TDA.

A few weeks after the Misiak-Steck call, on January 21, 2014, Schein's Steck told his employees in an internal email that he needed to inform Patterson about whether Schein was attending the 2014 meeting ("Guys, I have to get back to PDCO on whether **[**8]** or not we are attending the TDA."). That same day, Steck emailed Misiak at Patterson to say that he would "be calling you to let you know about our decision on the matter we recently discussed in the next couple of days." In the same email thread, Misiak expressed outrage to Tim Rogan, another Patterson higher-up, because Steck "already told me that they were out. Full blown!" Rogan replied to Misiak immediately: "That sucks. You should call him. 'Thought I could trust you' type of conversation."

On April 8, 2014 (the day before Schein and Benco officially announced that they were not attending the 2014 TDA), Mike Rowe, Benco's Director of Sales, rejected a suggestion from Fernandez, his direct report, that Benco advertise at the TDA that it would match the prices of TDA Perks Supplies, and said that Fernandez should instead "encourage more vendor partners to join the big three dealers and boycott future conventions. [The TDA convention] dying a slow death will have more impact than matching prices."

On April 9, 2014, Schein announced that it would not attend the 2014 TDA. Later that day, Benco's Fernandez informed Steck (his counterpart at Schein) that Benco had officially decided to **[**9]** pull out of the 2014 TDA — before Fernandez had informed the sales representatives he managed. Fernandez also called Kevin Upchurch, a Schein manager in Arizona, that same day.

II. Arizona Dental Association's 2015 Meeting

Patterson's decisions not to attend the 2014 TDA and 2015 AZDA conventions[1] were made at the local level by different managers (Clint Edens for the TDA convention and Chad Bushman, Patterson's Arizona branch manager, for the AZDA convention), but both defendants' Arizona decision-makers knew about the Texas boycott and discussed it with their Texas counterparts.

On July 21, 2014, Dan Reinhardt, Patterson's Mountain West Region Manager (which included Arizona) contacted Clint Edens, the Patterson's South-Central Regional Manager, saying that Patterson's Arizona team had heard that the AZDA was collaborating with SourceOne and asking Edens about the status of Patterson's relationship with the TDA and SourceOne. Dave Misiak replied to both Reinhardt and Edens less than an hour later, instructing them to "[p]lease discuss live and no more emails on this topic."

On April 17, 2014, Chuck Cohen, Benco's managing director in Texas, emailed Brian Evans, Benco's Director for the **[**10]** Western District (including Arizona), informing Evans **[*355]** about "a new program called #TDAPerks, an effort by the Texas Dental Association to compete with traditional dental distributors" and about Schein, Patterson, and Benco's decision "independently to withdraw as an exhibitor [*sic*] at the TDA meeting this year." The email noted that Benco's Texas team was "monitoring this development closely," but that they were "not overly concerned about it growing quickly." The email asked Evans to let members of Benco's Texas team "know if you hear anything more on this issue." On July 10, 2014, Evans responded to Cohen, informing him that the AZDA had confirmed that SourceOne was an "endorsed vendor."

The Arizona decision-makers at Patterson and Benco also discussed with each other their companies' respective plans to withdraw support from the 2015 AZDA. As early as June 18, 2014, Mike Wade, Benco's regional manager in Arizona and the decision-maker on the AZDA convention, responded to an email from his salesperson asking if Benco was planning to sit out the 2015 AZDA convention. Wade said that he would "pull some local pressure" and that he was "[p]laying phone tag with Upchurch at Schein and **[**11]** will get PDCO Manager involved."

A month later, on July 21, 2014, Benco's Wade emailed Patterson's Bushman, asking for "his take on our friends at the AZDA becoming our competitors." Wade told Bushman that Benco was "looking at pulling all our [AZDA] sponsorship including the AZDA meeting." He continued, "I know that Patterson, Schein and Benco all boycotted the Texas Dental Association meeting this year after the TDA did the same thing and wanted to see if we could create the same message here in AZ." Patterson's Bushman replied an hour or so later, stating that, "[i]f the AZDA has in fact signed on with SourceOne (which it looks like they have), we will be pulling our sponsorship and attendance of the state meeting." Benco's Wade replied the next day: "We are of the same mindset. It would be gratifying to see every distributor with a local presence make a unified statement on the AZDA's ill-conceived idea to become a distribution competitor."

A week or so later, on July 30, 2014, Benco's Wade sent an email to a representative of Dentsply, a dental supplies manufacturer, asking if SourceOne was an authorized dealer of Dentsply's products and informing the representative that "I have **[**12]** communicated with our competition at Schein and Patterson and we are all of the same mind that we will not be supporting a competitor's meeting next year."

On September 2, 2014, Benco announced that it would not attend the AZDA; Patterson announced a few weeks later, on September 19, 2014. Neither defendants nor Schein attended the 2015 AZDA meeting.

III. Pressuring Manufacturers and at Least One Individual Dentist

Upon first learning about SourceOne, Patterson's Clint Edens contacted at least six manufacturers and asked about their involvement in the platform, stating that Patterson is "strongly opposed and . . . would appreciate your support."[2]

---

[1] The "AZDA convention" is officially called the Western Regional Dental Convention.

Months later, on April 8, 2014, Ron Fernandez of Benco sent an email to his supervisor, Mark Rowe, informing him that Fernandez was "going to have discussions with all of the manufacturer's [*sic*] that support the TDA Perks program" and that "Schein and Patterson have already told most of them that if they support the program, they will no longer be invited to attend their regional meetings." A few **[*356]** days later, Fernandez expressed the same sentiment in a text message to a manufacturer's representative who lauded Benco for backing out of the convention. **[**13]** Fernandez appeared to ask that representative to contact other manufacturers on his behalf: "I wish all of the manufacturers would. We need to show solidarity in our approach to dismissing them. I will have my admin send you a roster."

Around the same time, Rick Dunn, Benco's Dallas regional manager, announced in an email sent to other regional managers that because Kuraray (a manufacturer) "has chosen to support the TDA Perks program here in Texas, and I personally don't want them attending the [Benco's upcoming regional] meeting. Unless my director instructs me otherwise, I will not be contacting them." Rowe, Benco's Director of Sales, and Fernandez also replied to the chain, agreeing that Benco "will not b [*sic*] supporting Kurary [*sic*] in the great state of TX." And in Arizona, Benco's decision-maker, Mike Wade, in conveying his commitment to withdrawing Benco's AZDA sponsorship unless the dental association ended its relationship with SourceOne, told a member of his team that "[i]f all the distribution companies stand firm and *if we can pull some of the manufacturers our way maybe they* [the AZDA] *will reconsider*." (emphasis added).

In mid-April 2014, Chuck Cohen, managing director **[**14]** at Benco, emailed Frank Nowtash of Arnold Dental (a smaller distributor), informing him that Benco would no longer be able to serve as Arnold's "larger inventory" because Arnold supplied products to SourceOne. Nowtash confirmed that he received a phone call from Cohen to that effect, and that, along with significant pressure from manufacturers and his employees, Benco's displeasure with Arnold for selling to SourceOne was part of Nowtash's decision to end Arnold's relationship with SourceOne. Nowtash testified that the risk of losing Benco as a major supplier was "a factor," but not a "major factor" in this decision. In an internal email between Cohen and Mike McElaney, Benco's Vice President of Sales, McElaney told Cohen to "cut him off" if Nowtash did not agree to stop supplying to SourceOne because McElaney "would not want any of our Texas team to find out about our relationship with Frank [Nowtash] and his support of the Perks program." Once Nowtash decided that Arnold would no longer supply to SourceOne, he called Cohen to inform him.

In response to a July 11, 2014 email from Mark Rowe, Benco's Texas decision-maker, asking for updates on the TDA Perks Supplies program, Benco's **[**15]** Ron Fernandez responded that there was extremely low turnout at the TDA's 2014 convention and that "the doctors know they need us and aren't willing to risk our support by gambling on a poorly planned and run program," but that there are "a few like Josh Austin . . . that is [*sic*] openly bashing dental distributors." (Josh Austin is a prominent individual dentist in Texas.). Fernandez continued that, "[a]s of now, Schein, Patterson and Benco have all told him [Josh Austin] he can have the Perks program handle his service needs as well. Really interested to see how that turns out to him."

DISCUSSION

I. Sherman Act Claim

To prevail on a claim under *§ 1* of the Sherman Act, a plaintiff must prove the existence of a contract, combination or conspiracy that unreasonably restrains trade and causes antitrust injury to the plaintiff. *In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 61 (2d Cir. 2012)*. There are certain well-established situations which courts consider *per se* violations of *§ 1*, such as price-fixing, and, as relevant **[*357]** here, group boycotts involving concerted refusals to deal with a competitor. See *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 542-43 (2d Cir. 1993)*. Outside of those cases, a plaintiff can show that a conspiracy was an

---

[2] Two of the manufacturers Edens contacted, Sybron Axis and Ivoclar Vivadent, would later pressure Arnold, another distributor, to stop supplying products to SourceOne.

unreasonable restraint of trade by showing an actual adverse effect on competition as **[**16]** a whole in the relevant market — a so-called "rule of reason" violation. Id.

A plaintiff can withstand a motion for summary judgment on a *§ 1* conspiracy claim by presenting direct or circumstantial evidence "that reasonably tends to prove that the [defendants] and others had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775, (1984)*. "No formal agreement is necessary to constitute an unlawful conspiracy." *Am. Tobacco Co. v. United States, 328 U.S. 781, 809, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*; see *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 183 (2d Cir. 2012)*; *Apex Oil Co. v. DiMauro, 822 F.2d 246, 253 (2d Cir. 1987)*.

But a plaintiff relying on circumstantial evidence to demonstrate an illegal conspiracy must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. See *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. Ambiguous evidence — evidence that is equally consistent with independent conduct as with illegal conspiracy — is not enough. *United States v. Apple, Inc., 791 F.3d 290, 315 (2d Cir. 2015)*. "Parallel action is not, by itself, sufficient to prove the existence of a conspiracy; such behavior could be the result of 'coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties.'" *Apple, 791 F.3d at 315* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557 n.4, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. Even when parties engage in parallel conduct knowing that their competitors are acting similarly, that is not enough to overcome the "more than ambiguous" **[**17]** standard. See *Apex Oil, 822 F.2d at 253*; see also *Apple, 791 F.3d at 315*.

Therefore, to prevail on summary judgment using circumstantial evidence such as parallel conduct, an antitrust plaintiff must "show the existence of additional circumstances, often referred to as 'plus' factors, which . . . allow the fact-finder to infer a conspiracy." *Apex Oil, 822 F.2d at 253*. These plus factors include, but are not limited to: evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators;[3] evidence of a high level of inter-firm communications; and a common motive to conspire. *Mayor & City Council v. Citigroup, Inc., 709 F.3d 129, 136 (2d Cir. 2013)* (citations omitted).

The Court's task is to decide whether a jury could reasonably conclude from the totality of the evidence that the defendants' actions were taken as the result of a conspiracy, rather than through independent, parallel action. See *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*; *In re Publ'n Paper, 690 F.3d at 64*; see also *Apex Oil, 822 F.2d at 253*. Such an inference may be more easily drawn where the "challenged activities could not reasonably be perceived as procompetitive." **[*358]** *In re Publ'n Paper, 690 F.3d at 63* (citation omitted).

In assessing the totality of the evidence, the Court bears in mind the Second Circuit's admonition that "[a] court deciding whether to grant summary judgment should not view each piece of evidence in a vacuum. Seemingly **[**18]** innocent or ambiguous behavior can give rise to a reasonable inference of conspiracy in light of the background against which the behavior takes place." *Apex Oil, 822 F.2d at 254-55*. Conduct that would be lawful when undertaken unilaterally may still be actionable under *§ 1* when competitors agree to that conduct together. *Anderson News, 680 F.3d at 183*.

Based on the evidence presented, a jury could reasonably find that at some point between October 2013 and January 2014, defendants agreed with each other or with Schein to exclude SourceOne from the market, including by agreeing to boycott the conventions hosted by the Texas Dental Association and the Arizona Dental Association if those associations did not discontinue their relationship with SourceOne, and by pressuring individual manufacturers and at least one prominent dentist to also discontinue their relationship with SourceOne in

---

[3] As explained further below, acts taken "against apparent individual economic self-interest" are those that would have contravened a defendant's individual self-interest in the absence of collusion.

furtherance of this conspiracy. SourceOne has shown both parallel conduct and evidence to support at least three "plus factors." Based on this evidence, a jury could reasonably infer collusion over ambiguous conduct.

Defendants make two primary arguments in support of their motions: first, that their conduct was not really parallel, because Patterson announced that **[**19]** it would not attend the 2014 TDA convention nearly five months before Benco (and Schein) announced the same. Second, defendants argue that even if their conduct was parallel, it was at worst ambiguous as to any conspiracy because both companies had plausible independent reasons for the actions they took.

A. Parallel Conduct

SourceOne's circumstantial evidence of a *per se* illegal agreement to exclude is founded on defendants' parallel action in declining to attend the 2014 TDA and 2015 AZDA conventions and subsequent conventions,[4] which Patterson, Benco, and Schein had attended for many years.

As defendants point out, there was a significant delay between Patterson's December 18, 2013 announcement that it would not attend the 2014 TDA convention and Schein and Benco's announcements of the same on April 9, 2014. But the communications between Patterson, Benco, and Schein leading up to Patterson's announcement that it would not attend the 2014 TDA convention and all three companies' communications immediately afterward raise an inference that Patterson made its decision not to attend based on the explicit or implied agreement of its competitors to do the same if the TDA refused to drop its **[**20]** partnership with SourceOne.

Well before Patterson officially announced that it would not attend the 2014 TDA meeting, all three companies were communicating with each other or, at least, were aware of and monitoring each other's decision-making on the issue. A jury could find that the inter-firm communications leading up to Patterson's announcement on December 13, 2013 that it would not attend the 2014 TDA meeting demonstrate that defendants and Schein had reached some kind of agreement by then.

[*359] Communications between representatives of all three companies leading up to the announcements by Benco and Schein that they too would not attend the 2014 TDA convention could also support an inference that defendants colluded with each other or with Schein. A Benco manager contacted people with Schein's Texas and Arizona teams immediately after Benco decided internally not to attend the 2014 TDA convention, before the manager had informed his sales representatives. A jury could reasonably conclude that the Benco manager made the calls to assure Schein that Benco would follow through on the agreement to take coordinated action against dental associations unless they ended their partnerships with **[**21]** SourceOne.

Based on certain aspects of the above evidence — "plus factors" — a jury could find that the parallel conduct outlined above was the result of illegal collusion to exclude SourceOne, rather than purely independent parallel conduct. Those plus factors include: the high level of inter-firm communications and their timing, the actions taken by defendants that were contrary to their unilateral self-interest, and the market structure that gave defendants a common motive to conspire.

B. Plus Factor: High Level of Inter-Firm Communications

In examining inter-firm communications, the Court is cognizant that "evidence of the mere exchange of information by competitors cannot establish a [*per se*] conspiracy." *Apex Oil, 822 F.2d at 257-58*. Cf. *Todd v. Exxon Corp., 275 F.3d 191, 198-99 (2d Cir. 2001)* (information exchange alone is not a *per se* Sherman Act violation but may violate the rule of reason). But a high volume of communications, or communications that represent a departure from the ordinary pattern of communications among defendants, can be probative of an agreement. See *Apple, 952 F. Supp. 2d at 655 n.14*.

[4] Neither Benco nor Patterson have attended a TDA or AZDA convention since, at least through the 2017 conventions.

Inter-firm communications involving Patterson, Benco, and Schein were pervasive. There were emails, text messages, phone calls, and one in-person meeting. Patterson and Schein employees at various **[**22]** levels testified at their depositions that these inter-firm communications were unusual. The communications involved people at many levels of the companies, from salespeople to managers and decision-makers and vice presidents. And the intra-firm communications show that higher-ups at all three companies knew, at least to some extent, about the inter-firm communications between lower-level employees.

Defendants do not dispute that these communications were unusual; they argue that their irregularity does not necessarily indicate collusion in light of the unprecedented stimulus of two dental associations teaming up with another distributor to compete against them. Defendants are missing the point. What is suspicious about these inter-firm communications, in addition to their quantity, is that competitors communicated information with each other when, absent assurances of mutual support, doing so would have put each company individually at a competitive disadvantage.

C. Plus Factor: Actions Contrary to Apparent Individual Economic Self-Interest

Defendants' argument that their inter-firm communications were innocuous is closely related to their argument that not attending the TDA and AZDA **[**23]** conventions was in each company's individual economic self-interest once the TDA and the AZDA announced their partnerships with SourceOne. Defendants argue that after the dental associations became their competitors through the associations' partnerships with SourceOne, it was no longer in defendants' **[*360]** individual self-interest to attend the conventions because the money they spent on booth fees would benefit their new competitor. From there, defendants argue that their parallel acts of withdrawing from these conventions were, at best, ambiguous, because there is an equally plausible, non-collusive business explanation for their parallel conduct.

The problem with defendants' argument is that it assumes a definition of "apparent individual economic self-interest" in which defendants each know about each other's plans (and those of Schein). An action that is contrary to a firm's apparent economic self-interest is one that is implausible if undertaken alone, without the guarantee of cooperation by competitors. A unilateral economic incentive makes the inference of concerted action less plausible precisely because a jury confronted with such an incentive could just as easily infer that a **[**24]** defendant's actions were taken in response to that incentive, rather than as the product of collusion. From the correct perspective, defendants' actions in deciding not to attend the TDA and AZDA annual meetings were not clearly in their own individual economic self-interest.

As alluded to above, Patterson, Benco, and Schein hesitated to drop out of the TDA and AZDA annual conventions after they learned about the dental associations' partnerships with SourceOne. This is unsurprising, because all three distributors had, at least in the years leading up to SourceOne's endorsements by the TDA and AZDA, perceived the annual conventions to be an important marketing opportunity, competing with each other for prime booth location and overall presence. Before the TDA Perks Supplies website was announced, Rick Dunn, Benco's Dallas regional manager, encouraged the company to prioritize major dental-association events over smaller ones, stating that "Benco not attending the Dallas midwinter or TDA would be detrimental to our markets." And Benco's position as a relatively small participant in the dental-supplies-distribution market meant that it had an additional incentive to conspire with its **[**25]** larger competitors to ensure that its "stance" against the dental associations partnering with SourceOne did not disadvantage it competitively — something Benco employees acknowledged in their deposition testimony.

Benco implicitly recognizes this conclusion in its brief when it points out that the potential for commercial harm that Benco might have suffered by not attending the TDA annual convention was "substantially reduced" once Benco learned that neither Patterson nor Schein were attending. This implies that Benco *did* risk commercial harm if it chose not to attend the TDA or AZDA conventions while its primary competitors did. Although Benco makes this point to argue that, as a smaller firm in a concentrated industry, its decision not to attend the convention after its larger competitors had already announced that they would not is evidence against a conspiracy, it also suggests that each defendant individually would not have been willing to boycott the TDA or AZDA conventions without assurances from the other major players that they too would not participate unless the associations ended their partnerships with SourceOne.

These incentives could also explain the high volume of inter-firm **[**26]** communications before each company's announcement that it would not attend the conventions. Benco's Fernandez testified at his deposition that he reached out to his counterpart at Patterson to find out if Patterson was planning to attend the TDA annual meeting because it would be "favorable" to Benco to attend if Patterson did not and **[*361]** unfavorable for Benco to opt out if Patterson attended.

Patterson's Bob Ingersoll, a branch manager, testified similarly at his deposition. He said that when Schein's Randall McLemore paid him a visit (sometime in November 2013) to ask whether Patterson was attending the 2014 TDA convention, Ingersoll returned the question because Patterson would be disadvantaged if Schein attended while Patterson did not. Christopher Cobb, a Patterson salesperson, echoed McLemore's concerns about Patterson not attending the TDA in his deposition testimony. Clint Edens, Patterson's decision-maker on the TDA convention, acknowledged that Schein could have exploited Patterson's decision not to attend the convention for its own economic benefit by attending. All three distributors shared this concern: Randall McLemore of Schein testified that he asked Bob Ingersoll whether **[**27]** Patterson was planning to attend the 2014 TDA because he "thought it would be advantageous for my organization if they weren't there and we were."

Tellingly, defendants have not advanced a legitimate business reason for these inter-firm communications, such as the in-person conversation between Schein's McLemore and Patterson's Ingersoll and the phone call between Patterson's Dave Misiak and Schein's Dave Steck, in which Steck told Misiak that Schein had not yet decided whether it would attend the 2014 TDA, but that Steck would tell Misiak when Schein did make the decision.

Not only have defendants failed to advance a legitimate business reason for these communications, but, in addition, their employees acknowledged that there was no such legitimate business reason in their deposition testimony: Joe Cavaretta, a member of Schein's Texas decision-making team, admitted at his deposition that Schein did not have a legitimate business reason to share with Patterson the information Ingersoll provided during his in-person meeting with McLemore. Patterson salesperson Christopher Cobb agreed that there was no legitimate business reason for the text messages that he exchanged with Schein salesperson **[**28]** Tony Starnes about whether their respective companies were attending the 2014 TDA meeting. Schein's Dave Steck testified at his deposition that he believed making a call like the one David Misiak had made to him in late December 2013 or early January 2014 would have violated Schein's antitrust policy.

A jury could reasonably conclude that not attending the TDA or AZDA annual conventions would be contrary to each defendant's individual interests, absent assurances from the other defendant or from Schein that they too would not be attending. This "plus factor" could support the inference that defendants' conduct was the product of collusion, rather than innocuous, independent motivations.

D. Plus Factor: Motive to Conspire

All of the above evidence is further bolstered by the structure of the dental-supplies market, which gave defendants a common motive to conspire against SourceOne. According to the uncontested market evidence presented by SourceOne's expert, more than three-quarters of dental supplies are purchased through distributors (the other quarter are purchased directly from manufacturers). And the distribution market is concentrated: when SourceOne launched, Patterson and Schein **[**29]** each controlled approximately 35% of the national market, while Benco controlled approximately 10% (thus, about 80% total). Defendants enjoyed the same relative control of the market in Texas and Arizona. Defendants' market positions are protected by significant barriers to entry and expansion, including the substantial economies of scale necessary for distribution to **[*362]** the 80% of dentists who practice alone or with one other dentist, high fixed costs, and access to the most popular brands of dental supplies (the top ten manufacturers produce about 40% of dental supplies). Defendants and Schein perceived themselves to hold significant sway over the commercial viability of state dental association annual conferences because of their control of the market. Defendants' secure positions in the market and the relative ease of excluding others make the allegations of collusive behavior all the more plausible.

These plus factors also make more plausible the allegation that defendants conspired to pressure manufacturers and individual dentists to boycott SourceOne as part of their conspiracy to exclude. SourceOne has presented evidence that managers at both Patterson and Benco contacted manufacturers **[**30]** individually to pressure them not to deal with SourceOne. The email evidence recited in Part III of the Background shows that Benco at least thought that Schein and Patterson were also pressuring manufacturers not to support SourceOne and believed that their competitors were committed to excluding those manufacturers who continued to support SourceOne from the companies' regional meetings. Benco was similarly committed to excluding manufacturers, such as Kuraray, who supported SourceOne. Furthermore, despite Nowtash's testimony that pressure from Benco was not a "major factor" in his decision that distributor Arnold would cease doing business with SourceOne, a jury, given his admission that it was a factor, could reasonably discount his conclusion and instead find that pressure from Benco, both directly and indirectly, was the primary cause. A reasonable jury could conclude that defendants pressured manufacturers and distributor Arnold not to deal with SourceOne in furtherance of their conspiracy to exclude SourceOne.

As for the allegations that defendants pressured individual dentists as an overt act in furtherance of their conspiracy to boycott SourceOne, SourceOne has produced sufficient **[**31]** evidence to create a genuine dispute of material fact that defendants did so for at least one prominent dentist. The plus factors described above make the inference of collusion more plausible. As of July 2014, Benco's Texas decision-maker knew that the company was withholding service from Josh Austin as retaliation for promoting SourceOne and thought that its competitors were doing the same. Benco's Fernandez reported that he knew how other distributors were responding to pressure from this customer (confidently enough to report it to his boss, decision-maker Rowe) which suggests, at a minimum, that the distributors were taking consciously parallel action with respect to individual dentists they perceived to be siding with SourceOne, and also suggests that they were communicating with each other about it or agreed to act the same way.

Defendants argue that this evidence as to a single dentist is not enough to show that they conspired to pressure dentists generally. There is some evidence that Mike Wade, a member of Benco's Arizona division leadership and Benco's decision-maker on the AZDA, instructed his team to pressure dentists in their jurisdiction who supported SourceOne: Wade **[**32]** informed his team via email on August 1, 2014, that Benco would "reevaluate" its partnerships with AZDA if the dental association continued to partner with SourceOne, and instructed his team that "[t]he most important thing you can do is to communicate to your dentists the implications in entering the highly competitive distribution arena." But even if the evidence as to Josh Austin were the only evidence SourceOne presented at trial, the issue would go to damages, not to whether SourceOne has demonstrated **[*363]** a genuine dispute of material fact that defendants violated the Sherman Act by conspiring to boycott SourceOne and to pressure at least one individual dentist to do the same.

The above evidence (although certainly not exhaustive) demonstrates how SourceOne has marshalled sufficient evidence for a jury to reasonably conclude from the totality of the evidence that defendants' actions were taken as the result of a conspiracy, rather than through independent, parallel action. There remains a genuine dispute of material fact as to whether defendants entered into a conspiracy to exclude SourceOne.[5]

II. Information-Sharing Claim Under the Rule of Reason

---

[5] In a cursory paragraph in its opposition brief, SourceOne alleges that "[a] jury could also reasonably find that Defendants' agreement was part of a pre-existing conspiracy to boycott dentists forming group purchasing arrangements." But as defendants correctly point out, the four pieces of evidence SourceOne cites to support this argument (three email chains and a text message thread) are all inter-firm communications by Schein employees. None of them involve defendants. If SourceOne's Sherman Act claim were based solely on this theory of a pre-existing conspiracy about group-purchasing arrangements, it would fail as a matter of law.

In its opposition to defendants' motions **[**33]** for summary judgment, SourceOne argues a second theory: that defendants violated *§ 1* of the Sherman Act by agreeing to exchange information. SourceOne alleges that this concerted action of sharing material information by horizontal competitors violates the Sherman Act's prohibition on unreasonable restraints of trade.

Information-sharing is not a *per* se violation of the Sherman Act, but courts have recognized the claim under the rule of reason. See *United States v. U.S. Gypsum Co., 438 U.S. 422, 441 n.16 (1978)*; *Todd, 275 F.3d at 198-99*. Courts apply the rule of reason using a three-step burden-shifting framework.

First, the plaintiff bears the initial burden of demonstrating that the defendant's challenged behavior "had an *actual* adverse effect on competition as a whole in the relevant market." *Capital Imaging, 996 F.2d at 543*. A plaintiff can establish this actual adverse effect either "directly by showing an actual adverse effect on competition as a whole within the relevant market" or "indirectly by showing that the defendant has 'sufficient market power to cause an adverse effect on competition.'" *United States v. Am. Express Co., 838 F.3d 179, 194 (2d Cir. 2016)* (quoting *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 96 (2d Cir. 1998))*.[6] However, because market power is merely a "surrogate for detrimental effects," a plaintiff seeking to prove anticompetitive effects through market power "must show market power, plus some other **[**34]** ground for believing that the challenged behavior could harm competition in the market, such as the inherent anticompetitive nature of the defendant's behavior or the structure of the interbrand market." *Am. Express, 838 F.3d at 195-96* (quoting *Tops Mkts., 142 F.3d at 96-97*).

Once the plaintiff satisfies its initial burden to demonstrate anticompetitive effects, the burden shifts to the defendant to offer evidence of any procompetitive benefits of the agreement or concerted action. **[*364]** *Geneva Pharms. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 507 (2d Cir. 2004)*. If the defendant can show such proof of procompetitive benefits, then the burden shifts back to plaintiff to demonstrate that whatever procompetitive benefits defendant has shown could have been achieved through less restrictive means. Id.

In its opposition, SourceOne argues that its experts offered testimony about the definition of the relevant market and defendants' market power, and because defendants neither moved for summary judgment on those issues nor moved to exclude SourceOne's expert testimony on those issues, a jury could reasonably find that defendants had "sufficient market power to cause an adverse effect on competition." For the "other ground" to support its argument that defendants' conduct could harm competition in the market, SourceOne argues that **[**35]** the information defendants exchanged — whether they would continue to do business with dental associations, manufacturers, and at least one individual who supported SourceOne — was of the type most likely to be anticompetitive.

Defendants argue that SourceOne's rule-of-reason argument is facially insufficient because the information that defendants allegedly shared is not significant enough for an agreement to share it to be an unreasonable restraint of trade under the Sherman Act. Defendants argue that exchanging information about their attendance at dental conventions is fundamentally different from the price, cost, or wage information sharing that courts have determined violate the Sherman Act.

The Supreme Court has distinguished "current price information" as "having the greatest potential for generating anticompetitive effects" within the category of "the exchange of price data and other information." *Gypsum, 438 U.S. at 441 n.16*. But Gypsum does not say that only price information (current or otherwise) could possibly support a rule-of-reason violation. In the Gypsum footnote defendants cite, the Supreme Court emphasized how courts should consider the "structure of the industry involved" and the "nature of **[**36]** the information exchanged" when determining whether information sharing is pro- or anticompetitive. Id. The two considerations the Supreme Court provided would be unnecessary if only price information could support an information-exchange claim.

Here, SourceOne has put forth evidence from which a jury could conclude that defendants entered into an agreement to exchange information and that the information that defendants shared — their willingness and plans

---

[6] For this reason, defendants' argument that SourceOne has not produced any evidence that the challenged conduct had an actual adverse effect on competition as a whole is misplaced.

to deal with (or boycott) third parties who transacted with SourceOne — was significant based on the highly concentrated industry and the importance that the defendants placed on the annual dental conventions (based on their own internal communications).

SourceOne has evidence from which a jury could conclude that defendants agreed (with each other or with Schein) to exchange information. Several employees of both Benco and Patterson testified that they shared information with each other and or with Schein to induce the other party to share similar information. As discussed above, Benco's Ron Fernandez testified that he contacted John Hyden at Patterson to discuss the 2014 TDA and offered him information about whether Benco was planning **[**37]** to attend to induce Hyden to share similar information about Patterson. A few months later, after Patterson had announced it would not be attending the 2014 TDA, Dave Misiak, a Patterson vice president, contacted Dave Steck, a Schein vice president to tell him personally and to ask Steck if Schein was going to attend. Steck testified that although **[*365]** he told Misiak that Schein hadn't decided yet, he felt some obligation to tell Misiak once Schein decided because Misiak had told him of Patterson's plans. A few months later, when Benco announced that it too would not attend the 2014 TDA, Benco's Fernandez called Schein's Steck that day to tell him personally — before Fernandez had even informed the sales representatives he managed. Fernandez also called Kevin Upchurch, a Schein manager in Arizona, that same day. In addition to these specific communications, SouceOne has cited several emails in which defendants' employees reference communicating with their competitors about the dental conventions during the weeks leading up to the companies' respective decisions not to attend the TDA convention.

SourceOne has also presented evidence that the information defendants were sharing with each other **[**38]** and with Schein was material and competitively sensitive based on the structure of the industry and the nature of the information. As described in Part I.C above, defendants and Schein were initially very hesitant to drop out of the dental association conventions for fear of losing business to competitors who did attend. SourceOne has produced evidence from which a jury could conclude that defendants' communications facilitated their anticompetitive conduct in boycotting dental associations who partnered with SourceOne and pressuring manufacturers and at least one individual dentist not to deal with SourceOne, all to exclude SourceOne from the market, therefore harming competition.

Because SourceOne has produced sufficient evidence that a jury could conclude that it has satisfied its initial burden in the rule-of-reason burden-shifting scheme, defendants are not entitled to judgment as a matter of law on a claim based on SourceOne's information-exchange theory.[7]

III. Damages on Sherman Act Claim

Defendants moved for summary judgment on SourceOne's damages claim, arguing that the damages model created by Dr. Jeffrey Leitzinger, one of SourceOne's experts, fails to separate out the damages **[**39]** attributable to the different alleged actions (*e.g.*, the alleged boycott of state dental-association conventions, the alleged pressure on manufacturers, *etc.*). Defendants argue that if they prevail on summary judgment as to one or more of the alleged actions, SourceOne's damages model will be entirely inadmissible and SourceOne will have no way to prove its damages claim. This concern does not support summary judgment on defendants' damages claim, because, as described in Parts I and II of the Discussion, the Court concludes that SourceOne has produced enough evidence to create a genuine dispute of material fact as to each of the alleged actions by defendants.

Defendants have already moved *in limine* to exclude Dr. Leitzinger's expert testimony; the Court will not address that motion here. But even if the Court were to exclude the testimony defendants are seeking to exclude, that would not prevent SourceOne from establishing damages through fact-witness testimony by its own corporate officers or through the testimony of dental-association officials. See *Fed. R. Evid. 701*, advisory committee's note to 2000

---

[7] In their reply briefs, defendants argue only that SourceOne's rule-of-reason claim fails as a matter of law and that SourceOne has not produced enough evidence to satisfy its initial burden. Defendants did not argue that they could satisfy their burden at the second step, nor did they point to any evidence that their information-sharing had procompetitive effects.

amendments ("[M]ost courts have permitted the owner or officer of a business **[*366]** to testify to the value **[**40]** or projected profits of the business, without the necessity of qualifying the witness as an accountant, appraiser, or similar expert."). Defendants' motions for summary judgment on the damages claim are therefore denied.

IV. State Statutory Antitrust Claims

SourceOne also brought state-law antitrust claims under New York's Donnelly Act (*New York General Business Law §§ 340-347*), and Arizona's Uniform State Antitrust Act (*Arizona Revised Statutes Annotated §§ 44-140*). Defendants moved for summary judgment on both of these claims. Both statutes are interpreted in accordance with federal antitrust laws. None of the parties identify any reason to analyze the state claims differently than the federal claims. See, e.g., *Williams v. Citigroup, Inc., 659 F.3d 208, 211 n.2 (2d Cir. 2011)*; *Mothershed v. Justices of the Supreme Court, 410 F.3d 602, 609 (9th Cir. 2005)*. Therefore, summary judgment is denied for the same reasons given in Parts I-III of the Discussion.

V. State Common-Law Claims

Defendants also move for summary judgment on SourceOne's state common-law claims for tortious interference with prospective business relations, civil conspiracy, and aiding and abetting tortious and anticompetitive conduct.

A. Choice of Law

A federal court exercising diversity jurisdiction applies the choice-of-law rules of the state in which the court sits. See *Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496, 61 S. Ct. 1020, 85 L. Ed. 1477 (1941)*. New York courts faced with a decision about which law to apply first **[**41]** determine if there is a conflict between the laws of the jurisdictions involved. *In re Allstate Ins. Co. (Stolarz), 81 N.Y.2d 219, 223, 613 N.E.2d 936, 597 N.Y.S.2d 904, 905 (1993)*. There is a conflict if "'the applicable law from each jurisdiction provides different substantive rules' and those differences are 'relevant to the issue at hand[ ] and . . . have a significant *possible* effect on the outcome of the trial.'" *First Hill Partners, LLC v. BlueCrest Capital Mgmt. Ltd., 52 F. Supp. 3d 625, 632 (S.D.N.Y. 2014)* (alteration in original) (quoting *Fin. One Pub. Co. v. Lehman Bros. Special Fin., 414 F.3d 325, 331 (2d Cir. 2005))*. If there is no actual conflict, New York courts apply New York law. See *Wall v. CSX Transp., Inc., 471 F.3d 410, 422 (2d Cir. 2006)*.

Here, the potentially relevant jurisdictions are New York, Texas, and Arizona, and those states' laws conflict only as to the aiding-and-abetting claim. First, for a tortious-inference claim in which the defendant's interference is intended, at least in part, to advance its own competing interest, New York law requires the plaintiff to prove that the defendant interfered with the prospective relationship using criminal or fraudulent means. See *S.O. Textiles Co. v. A & E Prod. Grp., 18 F. Supp. 2d 232, 240 (E.D.N.Y. 1998)*. The laws of Arizona and Texas do not impose such a requirement. See *BP Automotive LP v. RML Waxahachie Dodge, LLC, 517 S.W.3d 186, 208 (Tex. App. 2017)*; *Dube v. Likins, 216 Ariz. 406, 412-13, 167 P.3d 93, 99-100 (Ariz. Ct. App. 2007)*.

Although the complaint does not use the words "criminal" or "fraudulent," it alleges that defendants violated federal and state antitrust acts, which, if proven, would be sufficiently criminal to constitute the predicate required for the tort of **[**42]** tortious interference. See *Anti-Monopoly, Inc. v. Hasbro, Inc., No. 94 CIV. 2120, 1995 U.S. Dist. LEXIS 8822, 1995 WL 380300, at *7 (S.D.N.Y. June 27, 1995)*. The difference in the elements is therefore immaterial; there is no actual conflict as to the laws of the three relevant jurisdictions, **[*367]** so the Court applies New York law to SourceOne's tortious-interference claim.

For a civil-conspiracy claim, Texas and Arizona both recognize the claim and require essentially the same elements. See *First United Pentecostal Church of Beaumont v. Parker, 60 Tex. Sup. Ct. J. 608, 514 S.W.3d 214, 222 (2017)*; *Wells Fargo Bank v. Ariz. Laborers, Teamsters, & Cement Mason Local No. 395 Pension Tr. Fund, 201 Ariz. 474, 498, 38 P.3d 12, 36 (2002)* (en banc). New York only recognizes civil conspiracy when it is connected to a separately pleaded underlying tort. See *ACR Sys., Inc. v. Woori Bank, 232 F. Supp. 3d 471, 479 (S.D.N.Y. 2017)*. Tortious interference with prospective business relations qualifies as an underlying tort, if adequately pleaded. See *Alexander & Alexander of N.Y., Inc. v. Fritzen, 68 N.Y.2d 968, 969, 503 N.E.2d 102, 510 N.Y.S.2d 546, 547 (1986)*. Because SourceOne has adequately pleaded a separate claim for tortious interference with prospective business relations, it can satisfy this additional requirement. And because the remaining elements are the same in all three jurisdictions, there is no conflict and, as with the tortious-interference claim, the Court will apply New York law.

Finally, as to the aiding-and-abetting claim, New York and Arizona both recognize the claim as to tortious conduct generally. Although Texas recognizes a claim for aiding and abetting a breach of fiduciary duty, *Kinzbach Tool Co. v. Corbett-Wallace Corp., 138 Tex. 565, 574, 160 S.W.2d 509, 514 (1942)*, Texas law is unclear as to aiding and **[**43]** abetting other torts, such as tortious interference with business relations. In the past, the Texas Supreme Court has discussed but declined to adopt *Restatement (Second) Torts § 876(b)*, which imposes aiding-and-abetting liability. The Court stated that even if *§ 876(b)* applied, its purpose is to "deter antisocial or dangerous behavior," which suggests that it would not apply aiding and abetting to a claim for tortious interference with business expectancy. See *Juhl v. Airington, 39 Tex. Sup. Ct. J. 830, 936 S.W.2d 640, 644 (1996)*. At least one Texas court of appeals and a federal district court in Texas have reached a similar conclusion as to the competition-related torts of misappropriation of trade secrets, civil theft, unfair competition by misappropriation, and tortious interference with contract. See *N.Y. Pizzeria, Inc. v. Syal, 56 F. Supp. 3d 875, 884 (S.D. Tex. 2014)*; *W. Fork Advisors, LLC v. SunGard Consulting Servs., LLC, 437 S.W.3d 917, 922 (Tex. App. 2014)* (same as to misappropriation of trade secrets). But see *Clayton v. Richards, 47 S.W. 3d 149, 154 (Tex. App. 2001)* (applying aiding and abetting to a claim for invasion of privacy). The Court is unwilling to conclude that Texas would recognize a claim for aiding and abetting tortious and anticompetitive conduct, as SourceOne alleges here. Because the Court concludes that one jurisdiction would not recognize a claim for aiding and abetting at all, there is an actual conflict as to the laws of the three potential jurisdictions on that claim.

As noted **[**44]** above, the Court applies New York law to the tortious-interference and civil-conspiracy claims, because there is no conflict of laws on those claims. As for the aiding-and-abetting claim, for which the laws of the relevant jurisdictions do conflict, New York courts conduct an "interest analysis" and apply the law of the jurisdiction with the greatest interest in the litigation. *Schultz v. Boy Scouts of Am., Inc., 65 N.Y.2d 189, 197, 480 N.E.2d 679, 491 N.Y.S.2d 90, 95 (1985)* (quoting *Miller v. Miller, 22 N.Y.2d 12, 15, 237 N.E.2d 877, 290 N.Y.S.2d 734, 737 (1968))*.

Defendants argue that because the majority of the alleged conduct occurred in or involved Texas, that state has the greatest **[*368]** interest in the litigation and its law should apply. SourceOne argues that because SourceOne is incorporated and headquartered in Arizona, it suffered the damages from defendants' allegedly tortious conduct there, and therefore Arizona's law should apply. SourceOne also points out that at least some of the tortious conduct occurred in Arizona too, when defendants allegedly interfered with SourceOne's relationship with the Arizona Dental Association, and, through it, with potential customers.

Under New York law, "the interest analysis is applied differently depending on whether the rules in question are conduct-regulating rules that people use as a guide to governing their primary **[**45]** conduct, or loss-allocating rules that prohibit, assign, or limit liability after the tort occurs." *Licci ex rel. Licci v. Lebanese Canadian Bank, SAL, 739 F.3d 45, 49 (2d Cir. 2013)* (Licci II) (internal quotation works and citation omitted).

Where, as here, conflicting conduct-regulating laws are at issue, the Second Circuit has concluded that the law of the jurisdiction where the allegedly tortious acts occurred (as opposed to the jurisdiction where the injury was inflicted) should generally apply because "that jurisdiction has the greatest interest in regulating behavior within its borders." *Id. at 49*. In reaching this conclusion, the Second Circuit, applying the New York Court of Appeals' decision in Schultz, explicitly considered whether the law of the place of injury or the law of the place of wrongful conduct governed; for conduct-regulating rules, it adopted the latter. See *id. at 50-51*.

The Court agrees with defendants that the majority of the tortious conduct occurred in Texas, which has the greatest interest in this case under New York's choice-of-law rules, as interpreted by Licci II. The Court will therefore apply Texas law to the aiding-and-abetting claim, and, because the Court concludes that Texas would not recognize an aiding-and-abetting claim under these circumstances, **[**46]** grants summary judgment in favor of defendants on that claim.

B. Tortious Interference with Prospective Economic Advantage

To prevail on a claim for tortious interference with prospective economic advantage under New York law, a plaintiff must show that: "(1) it had a business relationship with a third party; (2) the defendant knew of that relationship and intentionally interfered with it; (3) the defendant acted solely out of malice, or used dishonest, unfair, or improper means; and (4) the defendant's interference caused injury to the relationship." See *Carvel Corp. v. Noonan, 350 F.3d 6, 17 (2d Cir. 2003)*. Improper or wrongful means generally must amount to a crime or an independent tort, and include an excessive degree of economic pressure, physical violence, or fraud, but exclude mere acts of persuasion. *Smith v. Meridian Techs., Inc., 86 A.D.3d 557, 560, 927 N.Y.S.2d 141, 144 (2011)*.

As to the first element — a business relationship with a third-party — SourceOne has also demonstrated a reasonable probability of a future contractual relationship. Defendants argue that SourceOne cannot demonstrate that it was reasonably probable that it would have entered into a business relationship with state dental associations and dentists absent defendants' allegedly tortious **[**47]** interference. I disagree. SourceOne has produced evidence that it had a reasonable assurance that at least the Louisiana and Colorado Dental Associations would have endorsed SourceOne but for defendants' interference. SourceOne has also produced evidence that defendants' allegedly tortious conduct interfered with its future business relations **[*369]** with the Texas and Arizona Dental Associations and their members by pointing to evidence that the TDA eventually dropped its endorsement of SourceOne because of pressure from defendants and related pressure from TDA members. SourceOne cites testimony by leaders of those organizations that their endorsements of SourceOne caused problems with dentists who were upset about defendants withdrawing from the dental associations' annual conventions.

As to the second element — that defendant knew of the business relationship and intentionally interfered with it — SourceOne has produced considerable evidence, described in the Background and discussed in the Discussion Parts I-III, from which a jury could conclude that defendants intentionally tried to disrupt SourceOne's current and prospective business relationships with state dental associations, dentists, **[**48]** and manufacturers. Defendants do not deny (and could not, based on the evidence presented at summary judgment) that they knew of SourceOne's business expectancy with the Texas and Arizona Dental Associations, and knew of SourceOne's plan to seek endorsement by at least the Louisiana Dental Association.

As to the third element — that defendants used dishonest, unfair, or improper means to interfere — SourceOne has presented sufficient evidence that defendants interfered with its prospective business relationships by means that were unlawful or improper. Where "unlawful restraint of trade is effected," a competitor can be held liable for interference with prospective contractual relations. *Guard-Life Corp. v. S. Parker Hardware Mfg. Corp., 50 N.Y.2d 183, 191, 406 N.E.2d 445, 428 N.Y.S.2d 628, 632 (1980)*. "[E]ven absent a finding of antitrust violations, certain degrees of economic pressure may be sufficiently wrongful to compel a finding of liability based on this cause of action." Id.; see also *Tech. Consortium, Inc. v. Digital Commc'ns Assocs., Inc., 757 F. Supp. 197, 200 (E.D.N.Y. 1991)*.

Furthermore, the competitor justification, through which an interference intended at least in part to advance the competing interest of the interferer may be justified, simply does not apply here because it is only available where "no unlawful restraint of trade is effected, and the means employed are not **[**49]** wrongful." *Guard-Life Corp., 50 N.Y.2d at 191, 428 N.Y.S.2d at 632*. Because SourceOne has created a genuine dispute of material fact as to whether defendants violated state and federal ***antitrust law*** through an illegal boycott, defendants are not entitled to summary judgment on this claim based on the competitor justification.

As to the fourth element — causation and injury — SourceOne must show "that the wrongful acts were the proximate cause of the rejection of the plaintiff's proposed contractual relations," *Pacheco v. United Med. Assocs.,* *P.C., 305 A.D.2d 711, 712, 759 N.Y.S.2d 556, 559 (3d Dep't 2003)*, and that it suffered some actual damages, such as lost opportunities for profits on business diverted from it. *Mandelblatt v. Devon Stores, Inc., 132 A.D.2d 162, 521 N.Y.S.2d 672 (1st Dep't 1987)*. The parties did not address proximate cause in their briefing. Nevertheless, the Court is satisfied that SourceOne has produced sufficient evidence for the proximate-cause element to survive summary judgment.

> An injury or damage is proximately caused by an act, or a failure to act, whenever it appears from the evidence in the case that the act or omission played a substantial part in bringing about or actually causing the injury or damage, and that the injury or damage was either a direct result or a reasonably probable consequence of the act or omission.

[*370] *Jund v. Town of Hempstead, 941 F.2d 1271, 1286 (2d Cir. 1991)*; see also *Walley v. Bivins, 81 A.D.3d 1286, 1287, 917 N.Y.S.2d 461, 463 (4th Dep't 2011)*.

Defendants argue that there is no evidence that state **[**50]** dental associations or dentists refused to do business with SourceOne because of their actions. SourceOne, however, has produced significant evidence — in the form of testimony from leadership in the TDA and AZDA and communications from two prospective dental associations, Louisiana and Colorado — that those organizations' concerns that defendants would boycott their annual meetings was a substantial factor in their decision to not to endorse SourceOne or to cease endorsing SourceOne. SourceOne has also produced intra-company and inter-company emails in which defendants' employees discuss not attending dental association meetings to discourage the TDA, the AZDA, or other dental associations from endorsing SourceOne. From this evidence, a reasonable jury could conclude that defendants' actions were both a cause-in-fact of SourceOne's lost business (and therefore profits), and that the lost business was a foreseeable consequence of defendants' actions.

And, as described in Part III of the Discussion, SourceOne has created a genuine dispute of material fact as to damages in the form of lost profits from a continuing business relationship with the Texas Dental Association and other dental **[**51]** associations (at least the Louisiana and Colorado Dental Associations, for whom plaintiff has demonstrated a reasonable assurance of future business).

Because SourceOne has demonstrated a genuine dispute of material fact as to each contested element of its tortious-interference claim, defendants are not entitled to summary judgment on that claim.

C. Civil-Conspiracy Claims

As mentioned above, New York only recognizes a civil-conspiracy claim if it is connected to a separate underlying tort. *ACR Sys., 232 F. Supp. 3d at 479*. Once that showing has been made, a plaintiff must establish: (1) an agreement between two or more parties; (2) an overt act in furtherance of the agreement; (3) the parties' intentional participation in furtherance of the agreement; and (4) resulting damage or injury. Id.

Defendants argue that SourceOne cannot show an underlying tort, such as that they violated ***antitrust law*** by agreeing to exclude SourceOne from the market. As explained above, the Court concludes that SourceOne can survive summary judgment as to both the antitrust claims and its tortious-interference claim, so SourceOne has clearly satisfied the underlying tort requirement. See *Alexander & Alexander, 68 N.Y.2d at 969, 510 N.Y.S.2d at 547*. As for the four elements, they essentially replicate **[**52]** the elements of federal and state ***antitrust law***. SourceOne's civil-conspiracy claim therefore survives summary judgment for the same reasons given in Parts I-III of the Discussion.

D. Claims for Aiding and Abetting Tortious and Anticompetitive Conduct

Because, as described above, the Court concludes that Texas would not recognize a claim for aiding and abetting tortious and anticompetitive conduct, defendants are entitled to summary judgment on their aiding-and-abetting claims.

CONCLUSION

Defendants' motions for summary judgment [158], [161] are therefore GRANTED IN PART AND DENIED IN PART. Defendants' motions for summary judgment on the Sherman Act claim, state statutory **[*371]** antitrust claims, damages claim are denied. Applying New York law to the common-law tortious-interference and civil-conspiracy claims, defendants' motions for summary judgment as to those claims are denied. Applying Texas law to the common-law claim for aiding and abetting, defendants' motions for summary judgment as to that claim are granted.

SO ORDERED.

Pleading is governed by *Fed. R. Civ. P. 8* and *9*. *Fed. R. Civ. P. 8(a)(3)* requires the plaintiff to identify the remedy sought, but it does not require detail about the nature of the plaintiff's injury.

Civil Procedure > Judgments > Entry of Judgments > General Overview

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Special Damages

HN2[] **Judgments, Entry of Judgments**

Fed. R. Civ. P. 54(c) provides that the prevailing party receives the relief to which it is entitled, whether or not the pleadings have mentioned that relief. *Fed. R. Civ. P. 9(g)*, by contrast, does require details, but only with respect to special damages.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN3[] **Federal & State Interrelationships, Erie Doctrine**

In federal court it is the Federal Rules of Civil Procedure that determine what must be in a complaint.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN4[] **Deceptive & Unfair Trade Practices, State Regulation**

California's Customer Records Act provides that a customer injured by a violation of the Act may recover damages. *Cal. Civ. Code § 1798.84*. The statute does not define injury.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN5[] **Deceptive & Unfair Trade Practices, State Regulation**

California's judiciary understands lost money or property to mean an economic injury and states that there are innumerable ways in which economic injury may be shown. An identifiable trifle of economic injury suffices. The time value of money meets the statutory definition. Although the loss of use in case law was longer (six months), the principle that the time value of money is money or property controls.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN6[] **Deceptive & Unfair Trade Practices, State Regulation**

State courts say that significant time and paperwork costs incurred to rectify violations can qualify as economic losses.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN7[] **Deceptive & Unfair Trade Practices, State Regulation**

A person who suffers actual damage as a result of a violation of the Illinois Consumer Fraud and Deceptive Business Practices Act, *815 ILCS 505/2*, may recover. *815 ILCS 505/10a(a)*. A monthly $17 out of pocket is a form of actual damage. It is real and measurable; Illinois does not require more. And, if the plaintiff has suffered an economic loss, noneconomic injuries are compensable.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN8[] **Deceptive & Unfair Trade Practices, State Regulation**

An Illinois appellate court has held that a person who purchases credit-monitoring services after a merchant discloses personal information has not suffered actual damages. The United States Court of Appeals for the

Seventh Circuit thinks it unlikely that the Supreme Court of Illinois would agree with the actual damages portion of this decision, given the breadth of the statutory language of *815 ILCS 505/10a(a)*. Money out of pocket is a standard understanding of actual damages in contract law, ***antitrust law***, the law of fraud, and elsewhere. To get damages plaintiffs must show that a culpable data breach caused the monthly payments, but the complaint cannot be dismissed before giving the class an opportunity to do so.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN9[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23(c)(1)(A) requires the certification decision to be made at an early practicable time after a person sues as a class representative.

Counsel: For HEATHER DIEFFENBACH, SUSAN WINSTEAD, Plaintiffs - Appellants: Ben Barnow, Attorney, Erich Schork, Attorney, BARNOW & ASSOCIATES, P.C., Chicago, IL; Joseph Siprut, Attorney, SIPRUT PC, Chicago, IL.

For BARNES & NOBLE, Defendant - Appellee: Peter V. Baugher, Attorney, BAUGHER DISPUTE RESOLUTION LLC, Chicago, IL; Kenneth L. Chernof, Attorney, Allyson Himelfarb, Attorney, ARNOLD & PORTER KAYE SCHOLER LLP, Washington, DC.

Judges: Before WOOD, Chief Judge, and EASTERBROOK and HAMILTON, Circuit Judges.

Opinion by: EASTERBROOK

Opinion

[*827] EASTERBROOK, *Circuit Judge*. In 2012 Barnes & Noble discovered that scoundrels had compromised some of the machines, called PIN pads, that it used to verify payment information. They acquired details such as customers' names, card numbers and expiration dates, and PINs. Some customers temporarily lost the use of their funds while waiting for banks to reverse unauthorized charges to their accounts. Some spent money on credit-monitoring services to protect their financial interests. Some lost the value of their time devoted to acquiring new account numbers **[**2]** and notifying businesses of these changes. Many people use credit or debit cards to pay bills automatically; every time the account number changes, these people must devote some of their time and mental energy to notifying merchants that the old numbers are invalid and new ones must be used. In this suit under state law, plaintiffs seek to collect damages not from the data thieves but from Barnes & Noble. Jurisdiction rests on the *Class Action Fairness Act*, *28 U.S.C. §1332(d)*, because the proposed class contains at least 100 members, the amount in controversy exceeds $5 million, **[*828]** and minimal diversity of citizenship exists.

The district court initially held that the representative plaintiffs had suffered no loss at all—that they did not even have standing to sue. *2013 U.S. Dist. LEXIS 125730 (N.D. Ill. Sept. 3, 2013)*. After this court held in *Remijas v. Neiman Marcus Group, LLC, 794 F.3d 688 (7th Cir. 2015)*, and *Lewert v. P.F. Chang's China Bistro, Inc., 819 F.3d 963 (7th Cir. 2016)*, that consumers who experience a theft of their data indeed have standing, the district court (acting through a different judge) concluded that the complaint alleges injury. *2016 U.S. Dist. LEXIS 137078 at *8-11 (N.D. Ill. Oct. 3, 2016)*. But the judge nonetheless dismissed the complaint, ruling that it does not adequately plead damages. *Id. at *13-25*. See also *2017 U.S. Dist. LEXIS 97161 (N.D. Ill. June 13, 2017)* (dismissing an amended complaint).

This seems to us a new label for an old error. To say that the plaintiffs have standing is **[**3]** to say that they have alleged injury in fact, and if they have suffered an injury then damages are available (if Barnes & Noble violated the statutes on which the claims rest). The plaintiffs have standing because the data theft may have led them to pay money for credit-monitoring services, because unauthorized withdrawals from their accounts cause a loss (the time value of money) even when banks later restore the principal, and because the value of one's own time needed to set things straight is a loss from an opportunity-cost perspective. These injuries can justify money damages, just as they support standing.

HN1[] Pleading is governed by *Fed. R. Civ. P. 8* and *9*. *Rule 8(a)(3)* requires the plaintiff to identify the remedy sought, but it does not require detail about the nature of the plaintiff's injury. See *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. What's more, ***HN2***[] *Rule 54(c)* provides that the prevailing party receives the relief to which it is entitled, whether or not the pleadings have mentioned that relief. *Rule 9(g)*, by contrast, does require details, but only with respect to "special damages." Barnes & Noble does not contend, and the district judge did not find, that any loss plaintiffs have identified is treated as "special damages." As far as the federal rules are concerned, **[**4]** then, all this complaint needed to do was allege generally that plaintiffs have been injured.

The district court did not apply these rules, instead demanding that the complaint contain all specifics that would have been required had this suit been in state court. *2016 U.S. Dist. LEXIS 137078 at *13-19, 22-25*. But ***HN3***[] in federal court it is the federal rules that determine what must be in a complaint. See, e.g., *Walker v. Armco Steel Corp., 446 U.S. 740, 100 S. Ct. 1978, 64 L. Ed. 2d 659 (1980)*; *Gasperini v. Center for Humanities, Inc., 518 U.S. 415, 116 S. Ct. 2211, 135 L. Ed. 2d 659 (1996)*; *Shady Grove Orthopedic Associates, P.A. v. Allstate Insurance Co., 559 U.S. 393, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010)*. The fact that the federal rules do not require plaintiffs to identify items of loss (except for special damages) means that this complaint cannot be faulted as insufficient.

Still, a district court could grant judgment on the pleadings, see *Fed. R. Civ. P. 12(c)*, if none of the plaintiffs' injuries is compensable, as a matter of law, under the statutes on which they rely. We therefore turn to state law.

Heather Dieffenbach dealt with Barnes & Noble in California and contends on appeal that she suffered four kinds of injury: (1) her bank took three days to restore funds someone else had used to make a fraudulent purchase; (2) she had to **[*829]** spend time sorting things out with the police and her bank; (3) she could not make purchases using her compromised account for three days; and (4) she did not receive the benefit of her bargain with Barnes & Noble. **[**5]** The fourth of these is not a loss; it is the failure to obtain a gain from the transaction. (Dieffenbach does not contend that any of the items she purchased was defective or that Barnes & Noble promised any particular level of security, for which she paid. See *Remijas, 794 F.3d at 694-95*.) But the first three are losses, at least in economic terms.

Dieffenbach invokes two statutes: *California's Customer Records Act* and its Unfair Competition Law. ***HN4***[] The Records Act provides that a "customer injured by a violation of [this Act] may — recover damages." *Cal. Civ. Code §1798.84*. The statute does not define injury, nor does any state decision we could find. The district judge took this absence of a definition as equivalent to conditioning recovery on satisfaction of the Unfair Competition Law, which provides that "lost money or property" supports recovery. *Cal. Bus. & Prof. Code §17204*. That's a problematic move; the statutes are distinct, after all, as is their language. But this does not matter, because the first three losses that Dieffenbach identifies fit within the phrase "lost money or property".

HN5[] California's judiciary understands "lost money or property" to mean an economic injury and tells us that "[t]here are innumerable ways in which economic injury — may be **[**6]** shown." *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 323, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)*. An "identifiable trifle of economic injury" suffices. *Id. at 330 n.15* (internal quotation marks and citation omitted). We know from *Marentes v. Impac Funding Corp., 2014 Cal. App. Unpub. LEXIS 3650, 2014 WL 2157539 (Cal. App. May 23, 2014)*, that the time value of money meets the statutory definition. Although the loss of use in *Marentes* was longer (six months there, three days for Dieffenbach) the principle that the time value of money is "money or property" controls. Cf. *Burlington Northern & Santa Fe Ry. v. White, 548 U.S. 53, 126 S. Ct. 2405, 165 L. Ed. 2d 345 (2006)*, which holds that a worker suffers a compensable injury even though the employer awards back pay to make up for salary lost during a 37-day suspension. Losing the use of money for three days may be a trifle to some people (though to others it may be a calamity), but a trifling loss suffices under California law. And ***HN6***[] state courts have said that significant time and paperwork costs incurred to rectify violations also can qualify as economic losses. Compare *Sarun v. Dignity*

Health, 232 Cal. App. 4th 1159, 1169, 181 Cal. Rptr. 3d 545 (2014) ("The tangible burden of [providing tax return information and other personal financial data]" satisfies the Law), with *Lueras v. BAC Home Loans Servicing, LP, 221 Cal. App. 4th 49, 82, 163 Cal. Rptr. 3d 804 (2013)* (finding time spent "preparing and assembling materials" for a loan modification application de minimis and insufficient).

Now for Illinois. Susan Winstead, the second representative plaintiff, alleges that (1) her bank contacted her about a potentially fraudulent **[**7]** charge on her credit card statement and deactivated her card for several days; and (2) the security breach at Barnes & Noble "was a decisive factor" when she renewed a credit-monitoring service for $16.99 per month. Her claim rests on the *Illinois Consumer Fraud and Deceptive Business Practices Act*, *815 ILCS 505/2*, and the proposed class relies on materially identical laws in other states. ***HN7***[] A person "who suffers actual damage as a result of a violation of this Act" may recover. *815 ILCS 505/10a(a)*. A monthly $17 out of pocket is a form of "actual damage". **[*830]** It is real and measurable; Illinois does not require more. See *Avery v. State Farm Mutual Automobile Insurance Co., 216 Ill. 2d 100, 195-99, 835 N.E.2d 801, 296 Ill. Dec. 448 (2005)*. And, if the plaintiff has suffered an economic loss, noneconomic injuries are compensable. See, e.g., *Morris v. Harvey Cycle & Camper, Inc., 392 Ill. App. 3d 399, 402-03, 911 N.E.2d 1049, 331 Ill. Dec. 819 (2009)*.

HN8[] An Illinois appellate court has held that a person who purchases credit-monitoring services after a merchant discloses personal information has not suffered actual damages. *Cooney v. Chicago Public Schools, 407 Ill. App. 3d 358, 365-66, 943 N.E.2d 23, 347 Ill. Dec. 733 (2010)*. We think it unlikely that the Supreme Court of Illinois would agree with the "actual damages" portion of this decision, given the breadth of the statutory language. Money out of pocket is a standard understanding of actual damages in contract law, ***antitrust law*** (*Reiter v. Sonotone Corp., 442 U.S. 330, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*), the law of fraud, and elsewhere. To get damages plaintiffs must **[**8]** show that a culpable data breach caused the monthly payments, but the complaint cannot be dismissed before giving the class an opportunity to do so.

Everything we have said about California and Illinois law concerns injury. We have not considered whether Barnes & Noble violated any of these three state laws by failing to prevent villains from stealing plaintiffs' names and account data. Barnes & Noble was itself a victim. Its reputation took a hit, it had to replace the compromised equipment plus other terminals that had been shown to be vulnerable, and it lost business. None of the state laws expressly makes merchants liable for failure to crime-proof their point-of-sale systems. Plaintiffs may have a difficult task showing an entitlement to collect damages from a fellow victim of the data thieves. It is also far from clear that this suit should be certified as a class action; both the state laws and the potential damages are disparate. These and other questions need consideration on remand. That the case has been pending for 5 1/2 years without a decision by the district court whether the proposed class can be certified is problematic under ***HN9***[] *Fed. R. Civ. P. 23(c)(1)(A)*, which requires the decision to be made **[**9]** "[a]t an early practicable time after a person sues — as a class representative". All we hold today is that the complaint cannot be dismissed on the ground that the plaintiffs do not adequately allege compensable damages.

The judgment is vacated, and the case is remanded for proceedings consistent with this opinion.

LexisNexis® Headnotes

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN1[] **Involuntary Dismissals, Failure to State Claims**

The peremptory exceptions of no right of action and no cause of action are separate and distinct. *La. Code Civ. Proc. Ann. art. 927(A)(5)*, *(6)*. One of the primary differences between the exceptions of no right of action and no cause of action lies in the fact that the focus in an exception of no right of action is on whether a particular plaintiff has a right to bring a suit, while the focus in an exception of no cause of action is on whether the law provides a remedy against a particular defendant.

Civil Procedure > Dismissal > Involuntary Dismissals > Appellate Review

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN2[] **Involuntary Dismissals, Appellate Review**

An exception of no cause of action questions whether the law extends a remedy against a defendant to anyone under the factual allegations of the petition and is triable on the face of the petition. To determine the issues raised by the exception of no cause of action, each well-pled fact in the petition must be accepted as true. In reviewing a district court's ruling sustaining an exception of no cause of action, appellate courts conduct a de novo review because the exception raises a question of law, and the district court's decision is based only on the sufficiency of the petition. An exception of no cause of action should be granted only when it appears beyond doubt that the plaintiff can prove no set of facts in support of any claim that would entitle him or her to relief. Every reasonable interpretation must be accorded the language used in the petition in favor of maintaining its sufficiency and affording the plaintiff the opportunity of presenting evidence at trial. If the petition states a cause of action on any ground or portion of the demand, the exception should generally be overruled.

Civil Procedure > Dismissal > Involuntary Dismissals > Appellate Review

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN3[] **Involuntary Dismissals, Appellate Review**

The exception of no cause of action should not be maintained in part, so as to prevent a multiplicity of appeals thereby forcing an appellate court to consider the merits of the action in a piecemeal fashion. If there are two or more items of damages or theories of recovery that arise out of the operative facts of a single transaction or occurrence, a partial judgment on an exception of no cause of action should not be rendered to dismiss an item of damages or theory of recovery.

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN4[] **Standards of Review, Questions of Fact & Law**

The function of the exception of no right of action is a determination of whether a plaintiff belongs to the class of persons to whom the law grants the cause of action asserted in the petition. *La. Code Civ. Proc. Ann. art. 927(A)(6)*. In examining an exception of no right of action, a court should focus on whether the particular plaintiff has a right to bring the suit, but assume that the petition states a valid cause of action for some person. Evidence supporting or controverting an exception of no right of action is admissible; however, in the absence of evidence to the contrary, the averments of fact in the pleadings are taken as true. Determination of whether a plaintiff has a right of action is a question of law.

Civil Procedure > Judgments > Entry of Judgments > Multiple Claims & Parties

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN5[] **Entry of Judgments, Multiple Claims & Parties**

Courts treat a partial exception of no right of action no differently than a partial exception of no cause of action. The Code of Civil Procedure does not provide for a partial peremptory exception raising the objection of no right of action, and, thus, if a plaintiff has a right of action as to any one of the theories or demands for relief set out in his or her petition, the objection of no right of action should be overruled. Where the plaintiff pleads multiple theories of recovery based on a single occurrence or set of operative facts, a partial grant of an exception of no right of action, which attacks only one theory of recovery and which does not dismiss a party, is invalid as an impermissible partial judgment.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Governments > State & Territorial Governments > Claims By & Against

Governments > State & Territorial Governments > Employees & Officials

HN6[] **Deceptive & Unfair Trade Practices, State Regulation**

Extensive powers have been granted the Attorney General on behalf of the State to institute and prosecute any and all suits he or she may deem necessary for the protection of the interests and rights of the State. *La. Rev. Stat. Ann. § 13:5036*. The Attorney General has also been granted specific powers in the area of consumer protection under the Louisiana Unfair Trade Practices Act. *La. Rev. Stat. Ann. § 51:1404*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Governments > State & Territorial Governments > Claims By & Against

Governments > State & Territorial Governments > Employees & Officials

HN7[] **Deceptive & Unfair Trade Practices, State Regulation**

The Attorney General has a right of action to maintain a Louisiana Unfair Trade Practices Act claim on behalf of the State for specific purposes.

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN8[] **Justiciability, Standing**

To the extent that *State v. Abbott Laboratories, Inc., (La. App. 1 Cir. 10/21/16), 208 So.3d 384*, recognizes a partial grant of no right of action when claims arise from the same set of operative facts, it is overruled.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Governments > State & Territorial Governments > Claims By & Against

HN9[] **Deceptive & Unfair Trade Practices, State Regulation**

The State, by virtue of its statutory authority expressly granted it under the Louisiana Unfair Trade Practices Act (LUTPA), has a right to bring claims under LUTPA and to seek limited specified relief, regardless of any right that the Louisiana Department of Health may possess. The State has a right of action to proceed under the express provisions of LUTPA.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN10[] **Deceptive & Unfair Trade Practices, State Regulation**

Indirect purchasers are individuals who do not deal directly with those engaging in an unfair trade practice or activity. Rather, indirect purchasers are injured when the costs of illegal activities are passed down the distribution chain.

Opinion by: McCLENDON

Opinion

[*41] [Pg 3] **McCLENDON, J.**

The State of Louisiana appeals a judgment that sustained peremptory exceptions raising the objections of no cause of action and no right of action in favor of a drug manufacturer, dismissing the State's claims against the manufacturer with prejudice. For the reasons that follow, we reverse.

FACTS AND PROCEDURAL HISTORY

The State of Louisiana, by and through its Attorney General, filed the instant suit against AstraZeneca AB, AstraZeneca LP, AstraZeneca Pharmaceuticals LP, and Aktiebolaget Hassle (collectively "AstraZeneca") on March 18, 2015. The State alleges that AstraZeneca intentionally delayed approval of a generic equivalent to their brand pharmaceutical product Toprol-XL ® in an effort to limit competition from generic pharmaceutical manufacturers and in violation of state law.[1] As a result of a generic being delayed, the State alleges that it, through the Louisiana Medicaid **[**3]** program, paid more in reimbursement for Toprol-XL than it otherwise would have paid for the generic equivalent. The State also claims that it lost substantial amounts in reimbursements paid outside of the Medicaid program. In its lawsuit, the State asserts that its claims arise from antitrust violations under the *Louisiana Monopolies Act ("Monopolies Act"), LSA-R.S. 51:121, et seq.*, and from violations of the *Louisiana Unfair Trade Practices Act ("LUTPA"), LSA-R.S. 51:1401, et seq.* Alternatively, the State asserts that it has a claim for unjust enrichment. It seeks restitution, treble damages, attorney fees, and costs.

In response, AstraZeneca filed multiple exceptions, including the ones at issue herein — the peremptory exceptions raising the objections of no right of action and no cause of action. Following argument on AstraZeneca's exceptions, the trial court found that all claims were vested with the Department of Health and Hospitals (now Louisiana Department of Health or "LDH") rather than the State. No evidence was introduced at the hearing. Because the trial court found that all claims were vested with LDH, it sustained the exceptions of no right of action and no cause of action and dismissed the State's claims with prejudice. **[**4]**

[Pg 4] The State has appealed, assigning the following as error:

1. The trial court erred in sustaining Defendants' Exceptions of No Right of Action and No Cause of Action in this suit, based upon its finding that the State of Louisiana is not the proper party in interest to bring the suit and/or that the Louisiana Department of Health has the sole right to assert these claims.
2. The Trial Court erred in sustaining Defendants' Exceptions of No Right of Action and No Cause of Action in this suit, based upon its finding that the State of Louisiana's role as an indirect purchaser of Toprol-XL bars the State from pursuing antitrust claims and LUTPA claims.

[*42] 3. The Trial Court erred in sustaining Defendants' Exceptions of No Right of Action and No Cause of Action in this suit by dismissing the State's claims that are not derived from Medicaid expenditures.
4. The Trial Court erred in sustaining Defendants' Exceptions of No Right of Action and No Cause of Action in this suit by dismissing the State's unjust enrichment claim.

DISCUSSION

At issue in this case are the exceptions of no right of action and no cause of action. Although these two exceptions are often confused, ***HN1***[] the peremptory exceptions **[**5]** of no right of action and no cause of action are separate and distinct. *LSA-C.C.P. art. 927(A)(5)* and *(6)*; ***Badeaux v. Southwest Computer Bureau, Inc.****, 05-0612 (La. 3/17/06), 929 So.2d 1211, 1216*. The Louisiana Supreme Court has recognized that one of the primary differences between the exception of no right of action and no cause of action lies in the fact that the focus in an exception of no right of action is on whether the particular plaintiff has a right to bring the suit, while the focus in an exception of no cause of action is on whether the law provides a remedy against the particular defendant. ***Badeaux****, 929 So.2d at 1216-17*.

HN2[] An exception of no cause of action questions whether the law extends a remedy against the defendant to anyone under the factual allegations of the petition and is triable on the face of the petition. ***Badeaux****, 929 So.2d at 1217*. To determine the issues raised by the exception of no cause of action, each well-pleaded fact in the petition must be accepted as true. **Id.** In reviewing a district court's ruling sustaining an exception of no cause of action, appellate courts conduct a *de novo* review because the exception raises a question of law, and the district court's decision is based only on the sufficiency of the petition. **Id.** An exception of no cause of action should be [Pg 5] granted only when it appears beyond doubt that **[**6]** the plaintiff can prove no set of facts in support of any claim that would entitle him to relief. **Id.** Every reasonable interpretation must be accorded the language used in the petition in favor of maintaining its sufficiency and affording the plaintiff the opportunity of presenting evidence at

---

[1] Toprol-XL is a drug used to treat angina, hypertension, and congestive heart failure. The generic equivalent of Toprol-XL is metoprolol succinate.

trial. **Id.** If the petition states a cause of action on any ground or portion of the demand, the exception should generally be overruled. **Id.**

Further, the Louisiana Supreme Court has held that ***HN3***[] the exception of no cause of action should not be maintained in part, so as to prevent a multiplicity of appeals thereby forcing an appellate court to consider the merits of the action in a piecemeal fashion. ***Everything on Wheels Subaru, Inc. v. Subaru South, Inc.****, 616 So.2d 1234, 1236 (La. 1993)*. If there are two or more items of damages or theories of recovery that arise out of the operative facts of a single transaction or occurrence, a partial judgment on an exception of no cause of action should not be rendered to dismiss an item of damages or theory of recovery. ***Id.*** *at 1239*.

HN4[] As to the exception of no right of action, the function of the exception is a determination of whether plaintiff belongs to the class of persons to whom the law grants the cause of action asserted in the petition. *LSA-C.C.P. art. 927(A)(6)*; ***Badeaux****, 929 So.2d at 1217*. In examining **[**7]** an exception of no right of action, a court should focus on whether the particular plaintiff has a right to bring the suit, but assume that the petition states a valid cause of action for some person. ***Turner v. Busby****, 03-3444 (La. 9/9/04), 883 So.2d 412, 415*. Evidence supporting or controverting **[*43]** an exception of no right of action is admissible; however, in the absence of evidence to the contrary, the averments of fact in the pleadings will be taken as true. See ***Eagle Pipe & Supply, Inc. v. Amerada Hess Corp.****, 10-2267, 10-2272, 10-2275, 10 2279, 10-2289 (La. 10/25/11), 79 So.3d 246, 252-53 & 255*. Determination of whether a plaintiff has a right of action is a question of law. ***1900 Highway 190, L.L.C. v. City of Slidell****, 15-1755 (La.App. 1 Cir. 6/3/16), 196 So.3d 693, 698* (citing ***Horrell v. Horrell****, 99-1093 (La.App. 1 Cir. 10/6/00), 808 So.2d 363, 368*, writ denied, *01-2546 (La. 12/7/01), 803 So.2d 971*).

[Pg 6] Additionally, ***HN5***[] courts have treated a partial exception of no right of action no differently than a partial exception of no cause of action. This court has previously held that the Code of Civil Procedure does not provide for a partial peremptory exception raising the objection of no right of action, and, thus, if a plaintiff has a right of action as to any one of the theories or demands for relief set out in his petition, the objection of no right of action should be overruled. ***Talbot v. C&C Millworks, Inc.****, 97-1489 (La.App. 1 Cir. 6/29/98), 715 So.2d 153, 156* (citing ***Clement v. McNabb****, 580 So.2d 981, 983 (La.App. 1 Cir. 1991)* and ***Cenac Towing Co. v. Cenac****, 413 So.2d 1351, 1352 (La.App. 1 Cir. 1982))*. Where the plaintiff pleads multiple theories of recovery based on **[**8]** a single occurrence or set of operative facts, the partial grant of an exception of no right of action, which attacks only one theory of recovery and which does not dismiss a party, would be invalid as an impermissible partial judgment. ***Talbot****, 715 So.2d at 156* (citing ***Shinew v. Luciano Refrigerated Transport, Inc.****, 96-2454 (La.App. 1 Cir. 11/19/97), 706 So.2d 140, 142* and ***Poy v. Twin Oaks Nursing Home, Inc.****, 95-889 (La.App. 5th Cir. 2/14/96), 671 So.2d 15, 18-19*.

In light of these axioms, we first consider whether the Attorney General has a right of action to bring the proceeding at issue. In connection with its exception raising the objection of no right of action, AstraZeneca maintains that LDH, as opposed to the State, is the only party that has a right of action. AstraZeneca avers that the Louisiana Supreme Court has recognized: (1) state agencies with the power to "sue and be sued" as "the sole parties capable of bringing suit to enforce their rights" and (2) that lawsuits concerning the duties of such agencies should be instituted by the agency and not by the state. See ***State ex rel. Dep't of Highways v. City of Pineville****, 403 So.2d 49, 52 (La. 1981)*. AstraZeneca notes that LDH is "a body corporate with the power to sue and be sued," and contends that LDH is statutorily vested with responsibility for Medicaid. *LSA-R.S. 36:251A* and *36:254D(1)(a)(i)*. Further, AstraZeneca asserts that LDH is the owner of the funds used to reimburse pharmacies for the purchase of Toprol-XL. See *LSA-R.S. 46:153.3*. Nevertheless, AstraZeneca **[**9]** maintains that even if the funds could be classified as belonging to the State, any action against it would belong to LDH under the rationale of **City of Pineville**.

[Pg 7] On the other hand, while the State recognizes that LDH is a body corporate with the power to sue and be sued, the State maintains that it is not asserting any right that was ever solely possessed by LDH. The State avers that under the rationale of **Pineville**, the political subdivision becomes the sole party capable of asserting a claim only when the claim asserted derives from property owned (or a contract entered into) exclusively by that political subdivision or agency. The State argues that while LDH administers the Medicaid program, all Medicaid funds belong to the State. The State claims that all of the funds paid through the Medicaid **[*44]** program come from the

State's general fund and from federal funds granted the State on which the State remains obligated—funds which were never a part of LDH's budget and never the distinct property of LDH. The State additionally alleges that there were non-Medicaid funds that were also paid out by the State. As such, the State maintains that it has a right to bring this action in **[**10]** its own name stemming from its ownership of those funds.

Recently, this court addressed a similar issue in ***State v. Abbott Labs., Inc.**, 15-1854, 15-1626 (La.App. 1 Cir. 10/21/16), 208 So.3d 384*, writs denied, *17-0125, 17-0149 (La. 3/13/17), 216 So.3d 802, 216 So.3d 808*, wherein the State sued pharmaceutical manufacturers alleging that the manufacturers "engaged in an unlawful and deceptive scheme to receive Medicaid payments for drugs that were not eligible for Medicaid payments." The State raised claims under LUTPA and the Louisiana Medical Assistance Programs Integrity Law (MAPIL), *LSA-R.S. 46:437.1, et seq.*, along with claims for fraud, negligent misrepresentation, redhibition, and unjust enrichment. ***Id.** at 386-87*. In response, the manufacturers filed an exception of no right of action, asserting that the right of action belonged to the Louisiana Department of Health and Hospitals (now LDH). The trial court sustained the manufacturers' exception of no right of action and dismissed the suit. The State then appealed. ***Id.** at 387*.

On appeal, this court noted that LDH was a political subdivision that had the right to sue and be sued, and that the LDH was statutorily authorized to file suit on behalf of Medicaid. *LSA-R.S. 36:254D(2)(d)*. ***Abbott**, 208 So.3d at 388*. Nonetheless, ***HN6***[] this court recognized the extensive powers granted the Attorney General on behalf of the State **[**11]** to "institute and prosecute any and all suits he may deem necessary for the [Pg 8] protection of the interests and rights of the state." See *LSA-R.S. 13:5036*. We also recognized the specific powers granted the Attorney General in the area of consumer protection under LUTPA. See *LSA-R.S. 51:1404*.[2] ***Abbott**, **[*45]** 208 So.3d at 388-89*. With regard to the LUTPA claim, this court cited the following provisions of the act: *Louisiana Revised Statutes 51:1405* provides, in part:

> A. Unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful.

Louisiana Revised Statutes 51:1407 provides, in part:

---

[2] *Louisiana Revised Statutes 51:1404* provides, in pertinent part:

> A. The Louisiana Attorney General's Office, Public Protection Division, Consumer Protection Section shall have the following powers and duties:
>
> (1)(a) To investigate, conduct studies and research, to conduct public or private hearings into commercial and trade practices in the distribution, financing and furnishing of goods and services to or for the use of consumers.
>
> (b) In the furtherance of the above, the attorney general shall notify said seller, distributor, packer, or manufacturer who shall have the right to put on the record any and all pertinent information that may substantiate the commercial or trade practice and shall have the right of cross examination. **[**14]**
>
> (c) Public disclosure shall not be made of any trade secret and commercial or financial information obtained from a person which is of a privileged or confidential nature.
>
> (2) To suggest means of securing adequate consumer representation on public boards and commissions;
>
> (3) To advise the governor and the legislature on matters affecting consumer interests, and to assist in developing executive policies, and to develop, draft and prepare legislative programs to protect the consumer;
>
> (4) To promote consumer education;
>
> ....
>
> (6) To do such other acts as are necessary and incidental to the exercise of the powers and functions of the section.
>
> B. The attorney general may receive information and documentary material and may receive and otherwise investigate complaints with respect to acts or practices declared to be unlawful by this Chapter or other laws of this state and inform the public with respect thereto. The attorney general may institute legal proceedings and take such other actions provided for herein or which are necessary or incidental to the exercise of his powers and functions.

A. Whenever the attorney general has reason to believe that any person is using, has used, or is about to use any method, act, or practice declared by *R.S. 51:1405* to be unlawful, he may bring an action for injunctive relief in the name of the state against such person to restrain and enjoin the use of such method, act, or practice. ...

B. In addition to the remedies provided herein, the attorney general may request and the court may impose a civil penalty against any person found by the court to have engaged in any method, act, or practice in Louisiana declared to be unlawful under this Chapter. In the event the court finds the method, act, or practice to have been **[**12]** entered into with the intent to defraud, the court has the authority to impose a penalty not to exceed five thousand dollars for each violation.

[Pg 9] *Louisiana Revised Statutes 51:1408* provides, in part:

A. The court may issue such additional orders or render judgments against any party, as may be necessary to compensate any aggrieved person for any property, movable or immovable, corporeal or incorporeal, which may have been acquired from such person by means of any method, act, or practice declared unlawful by *R.S. 51:1405*, whichever may be applicable to that party under *R.S. 51:1418*. Such orders shall include but not be limited to the following:

(1)Revocation, forfeiture, or suspension of any license, charter, franchise, certificate, or other evidence of authority of any person to do business in the state.

(2) Appointment of a receiver.

(3) Dissolution of domestic corporations or associations.

(4) Suspension or termination of the right of foreign corporations or associations to do business in this state.

(5) Restitution.

B. Unless otherwise expressly provided, the remedies or penalties provided by this Chapter are cumulative to each other and to the remedies or penalties available under all other laws of this state.

Louisiana Revised Statutes 51:1416 provides:

In addition **[**13]** to remedies for contempt of court otherwise provided by law, any person who violates the terms of an injunction issued under *R.S. 51:1407* or *1408*, or an assurance of voluntary compliance as authorized under *R.S. 51:1410*, may be required to pay to the state treasurer a civil penalty of not more than five thousand dollars per violation. For the purposes of this Section, the district court issuing an injunction shall retain jurisdiction and the attorney general acting in the name of the state may petition for recovery of civil penalties provided in this Section.

Considering the foregoing statutory authority, this court concluded that "LUTPA **[*46]** expressly gives the Attorney **[**15]** General the right to bring an action for injunctive relief (*La. R.S. 51:1407A*) and request civil penalties (*La. R.S. 51:1407B*) and restitution (*La. R.S. 51:1408(A)(5)*)." ***Id.** at 389*. Accordingly, this court reversed the trial court ruling sustaining the objection of no right of action under LUTPA.

Here, AstraZeneca asserts that the **Abbott** decision is not controlling because the State, through the Attorney General, has not asserted a claim under MAPIL. However, in **Abbott**, this court held that ***HN7***[] the Attorney General has a right of action to maintain a LUTPA claim on behalf of the State for specific purposes, which it has done [Pg 10] here. Therefore, the non-existence of a MAPIL claim in this matter does not control our decision.[3] Accordingly, we conclude that the State has a right of action under LUTPA.

---

[3] Moreover, at oral argument, AstraZeneca posited that the remedies available to the State under *LSA R.S. 51:1407B* cannot be sought unless the State pursues injunctive relief in accordance with *LSA-R.S. 51:1407A*. Having not been briefed, we do not address this issue at this time. See Uniform Rules — Courts of Appeal, Rule 1-3 ("The Courts of Appeal will review only issues which were submitted to the trial court and which are contained in specifications or assignments of error, unless the interest of justice clearly requires otherwise.").

Having concluded that the State has a right of action under LUTPA, and given that the claims under LUPTA and the Monopolies Act arise from the same set of operative facts, the exception of no right of action should be overruled. ***HN8***[] To the extent that ***Abbott*** recognizes a partial grant of no right of action when the claims arise from the same set of operative facts, it is overruled. Moreover, given that the State has a specific right under LUTPA, we need not **[**16]** delineate between Medicaid and non-Medicaid expenditures at this time.

Nevertheless, AstraZeneca urges that if the cause of action is vested with LDH, then the Attorney General has no right to pursue the agency's cause of action even if the Attorney General otherwise has a general grant of authority permitting it to do so. We note that substantially similar arguments were asserted by the defendant manufacturers in **Abbott**, wherein the defendants urged that "the district court correctly recognized that the State cannot pursue claims that, by law, belong to a state agency. ... The defendants assert that the State, represented by the Attorney General, purported to bring the action in its own name in order to circumvent the prescriptive periods that would apply if DHH were the plaintiff." ***Id.*** *at 387*. Even so, the **Abbott** court recognized that ***HN9***[] the State, by virtue of its statutory authority expressly granted it under LUTPA, has a right to bring claims under LUTPA and to seek limited specified relief, regardless of any right that LDH may possess.

In light of our holding in ***Abbott***, we recognize that the State has a right of action to proceed under the express provisions of LUTPA. In so holding, however, **[**17]** we do not address whether the Medicaid funds belong to LDH or to the State, whether [Pg 11] some of the claims belong solely to LDH, what specific relief is available to the State, or whether any claims are prescribed.[4]

[*47] AstraZeneca further contends that even if the State has a right of action, it cannot maintain a cause of action as an indirect purchaser[5] of the prescription drug at issue. Although AstraZeneca couches this argument in terms of "no cause," the argument in essence is one of no right. In other words, AstraZeneca asserts that because **[**18]** the State is an indirect purchaser, it has no right to assert claims under LUTPA or the Monopolies Act.

In ***Illinois Brick Co. v. Illinois****, 431 U.S. 720, 728-29, 97 S.Ct. 2061, 2066, 52 L.Ed.2d 707 (1977)*, the United States Supreme Court held that only a direct purchaser may bring an action under *§ 4 of the Clayton Act*, or the federal antitrust provision (akin to the Louisiana Monopolies Act). Citing a number of policy concerns, the Supreme

---

[4] Although the facts are distinguishable, we note that a similar argument was addressed in ***State v. Classic Soft Trim, Inc.****, 95-804 (La.App. 5 Cir. 10/20/95), 663 So.2d 835*, writ denied, *95-2604 (La. 1/26/96) 666 So.2d 669*, wherein an action was commenced by the State, through the Attorney General, on behalf of several private parties for violations of LUTPA and the Monopolies Act. The Fifth Circuit noted that under both acts, the Legislature has determined that actions for violations of these laws may be brought by the Attorney General. **Id.** at 835. The defendants in **Classic Soft Trim** had filed an exception in the trial court urging a lack of procedural capacity on the part of the State to be a party to the action. The trial court maintained the exception, but the Fifth Circuit reversed, noting that LUTPA and the Monopolies Act (the two acts at issue here) give the Attorney General, on behalf of the State, procedural capacity to bring suits alleging violations of those Acts. **Id.** at 836. Although the defendants argued that the State's action was a "disguised private action" and that the real parties in interest were the intervenors, the Fifth Circuit held that the State had procedural capacity to proceed, noting:

> Here, the legislature has enacted certain regulations concerning commerce in this state and has empowered the Attorney General to enforce those laws both criminally and civilly, and to seek redress against violators on behalf of both the state and private parties. It is not alleged that these enactments are beyond the sovereign power of the state to control commerce within its borders, or that they violate any rights of the defendants which are protected by either the state or the federal constitutions. Absent such allegations, the statutes must be presumed valid and must be given effect by the courts of the state.

Id. at 837. Accordingly, the Fifth Circuit reinstated the State as a proper party to the action, allowing it to proceed with its claims under LUTPA and the Monopolies Act.

[5] ***HN10***[] Indirect purchasers are individuals who do not deal directly with those engaging in the unfair trade practice or activity. Rather, indirect purchasers are injured when the "costs of illegal activities are passed down the distribution chain." **Robert F. Roach, Revitalizing Indirect Purchaser Claims: Antitrust Enforcement Under New York Law, *13 PACE L. REV. 9, 11 (1993)***.

Court held that indirect purchasers were not entitled to recover. *431 U.S. at 730-35, 97 S.Ct. at 2067-69*. In support of its holding, the Supreme Court cited the unique nature of antitrust litigation, issues of multiple recovery, and the problem of allocating damages if indirect purchasers were allowed to bring suit. ***Id.*** *at 737-38, 97 S.Ct. at 2070-71*. Later, the court held that federal antitrust laws do not, however, [Pg 12] preempt states from enacting statutes that allow indirect purchasers to recover damages for their injuries. See ***California v. ARC America Corp.***, *490 U.S. 93, 101-02, 109 S.Ct. 1661, 1665-66, 104 L.Ed.2d 86 (1989)* (rejecting the argument that California's ***antitrust law***, which specifically allows indirect purchaser actions, was preempted by federal law).

Louisiana has no statute that specifically provides a right of action to an indirect purchaser; nor has a Louisiana state court addressed this specific **[**19]** issue.[6] Nonetheless, **[*48]** we need not make a determination of whether we would follow **Illinois Brick**. Regardless of whether the State is an indirect purchaser or if Louisiana courts would follow the **Illinois Brick** rationale, the State itself has a right of action under LUTPA, including a specific right of action to seek civil penalties and restitution. On this limited record based solely on the exceptions, we make no determination of whether Louisiana would follow **Illinois Brick** with regard to the indirect purchaser rule, as we need not decide this issue to determine whether the State has any right of action.

AstraZeneca also maintains that the State has no cause of action as to antitrust claims under the Louisiana Monopolies Act, because the petition alleges activity occurring in interstate commerce. Additionally, AstraZeneca asserts that reading the Monopolies Act claims and LUTPA claims *in pan materia*, the LUTPA claims sounding in antitrust should likewise be barred where the conduct at issue lacks a specific **[**20]** nexus to Louisiana.[7] However, having found that LUTPA, by its terms, gives the State a cause of [Pg 13] action, as well as a right of action, and based on decisions of both the Louisiana Supreme Court and this court that do not recognize partial exceptions of no cause of action, the exception of no cause of action must be overruled.

CONCLUSION

For the foregoing reasons, the trial court's judgment sustaining the exceptions of no right of action and no cause of action, and dismissing the State's claims with prejudice, is reversed. We overrule AstraZeneca's exceptions raising

---

[6] The Federal Fifth Circuit in ***Free v. Abbott Laboratories, Inc.***, *176 F.3d 298, 301 (5th Cir. 1999)*, aff'd, *529 U.S. 333, 120 S.Ct. 1578, 146 L.Ed.2d 306 (2000)*, believes Louisiana courts would follow the **Illinois Brick** rationale such that indirect purchasers do not have standing under Louisiana state law. The Louisiana Supreme Court, however, denied certification of the state law question of whether Louisiana ***antitrust law*** grants standing to indirect purchasers of consumer products.

Twenty-six states and the District of Columbia have judicially or legislatively "repealed" **Illinois Brick** and provided standing (or a right of action) to indirect purchasers under antitrust or consumer protection statutes. **Newberg on Class Actions, § 20:12 Indirect purchaser standing under state antitrust laws** (5th Edition). To guard against the concern first raised in **Illinois Brick**, many of these states require courts to ensure the defendants are not subject to multiple liability. Six other states have passed partial **Illinois Brick** repealer statutes. While these states do not permit indirect purchaser suits, they authorize the state attorney general to recover if the state itself is injured as an indirect purchaser or to recover on behalf of an indirect purchaser as *parens patriae*. **Id.** In contrast, thirteen states follow **Illinois Brick** by either completely barring indirect purchaser suits or by providing standing under limited circumstances. Many do so because their antitrust laws are interpreted to be harmonious with federal ***antitrust law***. **Id.** Five states have not addressed the issue. **Id.**

[7] AstraZeneca notes that the Monopolies Act generally prohibits "restraint[s] on trade or commerce" in Louisiana. *LSA-R.S. 51:122*. AstraZeneca avers that by its very terms, the Louisiana Monopolies Act applies only to intrastate commerce and does not reach the conduct alleged in the Petition — the filing of patent applications and the infringement lawsuits, which were instituted in Delaware and Missouri. But see ***Southern Tool & Supply, Inc. v. Beerman Precision, Inc.***, *01-1749 (La.App. 4 Cir. 5/1/02), 818 So.2d 256, 261*, writs denied, ***02-1509, 02-1515, 02-1531 (La. 9/20/02) 825 So.2d 1177***, ***825 So.2d 1178***, and ***825 So.2d 1179***. ("Although neither the Louisiana Supreme Court nor this Court have explicitly held that Louisiana's antitrust statutes may apply to matters involving both intrastate and interstate commerce, they have upheld application of Louisiana's antitrust laws in cases where the anti-competitive effects occurred in Louisiana.")

the objections of no right of action and no cause of action. Costs of this appeal are assessed to appellees, AstraZeneca AB, AstraZeneca LP, AstraZeneca Pharmaceuticals LP, and Aktiebolaget Hassle.

REVERSED; EXCEPTIONS OVERRULED.

Concur

[*49] PETTIGREW, J., CONCURS WITH THE RESULTS, AND ASSIGNS REASONS.

I concur with the results reached by the majority, however, I am of the opinion it was not necessary, nor is there any reason, to overrule ***State v. Abbott Labs., Inc.****, 15-1854, 15-1626 (La.App. 1 Cir. 10/21/16), 208 So.3d 384*, writs denied, *17-0125, 17-0149 (La. 3/13/17), 216 So.3d 802*, *216 So.3d 808*. Under the unique facts of **Abbott**, I am of the opinion it was legally **[**21]** correct.

[*50contd]

[EDITOR'S NOTE: The page numbers of this document may appear to be out of sequence; however, this pagination accurately reflects the pagination of the original published document.]

HOLDRIDGE, J., CONCURS WITH THE RESULT, AND ASSIGNS REASONS.

I concur with the result. I think the majority is in error in finding that "this court [does] not recognize [a] partial exception of no cause of action[.]" I agree that prior to 1997, the cases did not allow a judgment granting only a partial exception of no cause of action. *See* *Everything on Wheels Subaru, Inc. v. Subaru S., Inc., 616 So.2d 1234, 1235 (La. 1993)*. However, in 1997, the legislature authorized a partial judgment which "sustains an exception in part." *La. C.C.P. art. 1915(B)(1)*. "This amendment ... authorizes a judgment granting a partial exception of no cause of action; importantly, this amendment provides certainty as to the immediate appealability of such judgment." Frank L. Maraist, *Louisiana Civil Law Treatise: Civil Procedure*, Vol. I, § 6.7, pp. 172-173 (2d ed. 2008). As stated in *Castille v. Louisiana Medical Mut. Ins. Co., 2014-519 (La. App. 3 Cir. 11/5/14), 150 So.3d 614, 618*, "[a] partial judgment on an exception of no cause of action should not be rendered to dismiss only one theory of recovery out of several within a single cause of action. However, a partial judgment on an exception of no cause of action may be rendered **[*51]** to dismiss one of several separate causes of action." In this case, from the face of the petition and without reference to any additional facts, I agree with the majority that **[**22]** the peremptory exceptions raising the objection of no cause of action should have been denied.

Dissent by: WELCH (In Part)

Dissent

[*49contd]

[EDITOR'S NOTE: The page numbers of this document may appear to be out of sequence; however, this pagination accurately reflects the pagination of the original published document.]

[Pg 1] **WELCH, J., concurring in part and dissenting in part**.

I agree with the majority opinion insofar as it determines that the State of Louisiana has a right of action against AstraZeneca under LUTPA; that AstraZeneca's peremptory exception raising the objection of no right of action should have been overruled; that *State v. Abbott Labs., Inc., 2015-1854, 2015-1626 (La. App. Pt Cir. 10/21/16), 208 So.3d 384*, writs denied, *2017-0125, 2017-0149 (La. 3/13/17), 216 So.3d 802*, *216 So.3d 808*, should be overruled to the extent that it recognized a partial objection of no right of action when the claims arise from the same set of operative facts; and that the portion of the judgment sustaining AstraZeneca's objection of no right of action should be reversed. However, I disagree with the majority opinion insofar as it reverses that portion of the judgment of the trial court sustaining AstraZeneca's objection of no cause of action and I disagree with the majority's reasoning that AstraZeneca's objection of no cause of action was essentially one of no right of action. Based on my review of the State's petition, and accepting the well-pleaded facts set forth therein as true, **[**23]** I find that the State has failed to state a cause of action against AstraZeneca for alleged violations of the Monopolies Act, LUTPA, and unjust enrichment.

Pursuant to the Monopolies Act, "no person shall monopolize, or attempt to monopolize, or combine or conspire with any person to monopolize any part of the trade or commerce within this state." *La. R.S. 51:123*. LUTPA outlaws unfair [Pg 2] methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce. See *La. R.S. 51:1405*. As to unjust enrichment, *La. C.C. art. 2298* provides that a person who has been enriched without cause at the expense of another person is bound to compensate that person, with the term "without cause" excluding cases in which the enrichment results from a valid juridical act or the law. Furthermore, the remedy of unjust enrichment is subsidiary and is not available if the law provides another remedy for the impoverishment or declares a contrary rule. *Id.*

As set forth in the State's petition, its claims against AstraZeneca are based on its "indirect purchases" of Toprol-XL. However, the State, as an indirect purchaser, cannot state a cause of action against AstraZeneca for alleged violations of either the Monopolies **[**24]** Act or LUTPA. See ***Illinois Brick Co. v. Illinois**, 431 U.S. 720, 728-729, 97 S.Ct. 2061, 2066, 52 L.Ed.2d 707 (1997)* (holding that only a direct purchaser may bring an action under the federal anti-trust statute and that indirect purchasers are not entitled to recover); ***Free v. Abbot Laboratories, Inc.**, **[*50]** 176 F.3d 298, 301 n.9 (5th Ci. 1999)* and ***Southern Tool & Supply, Inc. v. Beerman Precision, Inc.**, 2001-1749 (La. App. 4th Cir. 5/1/02), 818 So.2d 256, 261*, writs denied, *2002-1509, 2002-1515, and 2002-1531 (La. 9/20/02), 825 So.2d 1177*, *825 So.2d 1178*, and *825 So.2d 1179* (indicating that Louisiana courts would follow the federal indirect purchaser rule); ***Federal Trade Com'n v. Mylan Laboratories, Inc.**, 99 F.Supp.2d 1, 7* (affirming the dismissal of the State's claims for damages, on behalf of indirect purchasers, based on violations of the Monopolies Act and LUTPA in accordance with the holdings of **Illinois Brick Co.** and **Free v. Abbot Laboratories)**.

In addition, the State cannot state a cause of action for violations of either the Monopolies Act or LUTPA based on operative facts (or the activities of AstraZeneca) that occurred outside of the geographic boundaries of Louisiana, *i.e.*, [Pg 3] the filing of patent applications and the infringement lawsuits that were instituted in Missouri and Delaware. See *La. R.S. 51:121* and *51:122* (prohibiting the restraint of trade or commerce in this state, with commerce defined as trade or commerce within the geographic boundaries of this state) and *La. R.S. 51:1405* (prohibiting unfair or deceptive acts or practices in the conduct of any trade or commerce).

Lastly, with respect to the State's **[**25]** claims based on unjust enrichment, the plaintiff's sought unjust enrichment damages because AstraZeneca financially "benefit[ted] from the monopoly profits on their sales of Toprol-XL" and their "unlawful scheme and anti-competitive conduct" to the economic detriment of the State. Since the State, as an indirect purchaser, cannot state a cause of action against AstraZeneca under either the Monopolies Act or LUTPA, the State cannot employ a subsidiary unjust enrichment claim to circumvent this rule. See ***Coastal Environmental Specialists, Inc. v. Chem-Lig Intern., Inc**. 2000-1936 (La. App. 1st Cir. 11/9/01), 818 So.2d 12, 19* and ***Aikens v. Microsoft Corp.**, 159 F. App'x 471, 477 (4th Cir. 2005)*. As such, the State has failed to state a cause of action for unjust enrichment.

Accordingly, the trial court correctly sustained AstraZeneca's peremptory exception raising the objection of no cause of action and I would affirm that portion of the judgment of the trial court.

Thus, I respectfully concur in part and dissent in part.

Branta, LLC v. Newfield Prod. Co.

United States District Court for the District of Colorado

April 12, 2018, Decided; April 12, 2018, Filed

Civil Action No. 1:15-cv-00416-WYD-KLM

Reporter

310 F. Supp. 3d 1166 *; 2018 U.S. Dist. LEXIS 62174 **; 2018-1 Trade Cas. (CCH) P80,353; 2018 WL 1762612

BRANTA, LLC, a Delaware limited liability company; BRANTA EXPLORATION & PRODUCTION COMPANY, LLC, a Delaware limited liability company; HARVEST (US) HOLDINGS, INC., a Delaware corporation; and HARVEST NATURAL RESOURCES, INC., a Delaware corporation, Plaintiffs, v. NEWFIELD PRODUCTION COMPANY, a Texas corporation, Defendant.

LexisNexis® Headnotes

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

HN1[] **Breach of Contract Actions, Elements of Contract Claims**

The four elements of a breach of contract claim are: (1) the existence of a valid contract; (2) performance by the plaintiff; (3) breach of the contract by the defendant; and (4) damages to the plaintiff resulting from the breach. Plaintiffs bear the burden of proving a breach by a preponderance of the evidence.

Business & Corporate Compliance > ... > Contracts Law > Breach > Material Breach

HN2[] **Breach, Material Breach**

When one party to a contract commits a material breach of that contract, the other party is discharged or excused from any obligation to perform. Reciprocal promises are presumed to be mutually dependent and the breach by one party excuses the performance of the other.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN3[] Intentional Interference, Elements

With respect to an interference claim, a mere hope for a contract is insufficient to establish a reasonable likelihood or reasonable probability that a contract could have resulted to support the existence of a prospective business relationship.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN4[] Sherman Act, Claims

Section 1 of the Sherman Act prohibits every contract, combination in the form of a trust or otherwise, or conspiracy in restraint of trade or commerce. *15 U.S.C.S. § 1*. The Colorado Antitrust Act provides that it is illegal for any person to contract, combine, or conspire with any person to rig any bid, or any aspect of the bidding process, in any way related to the provision of any commodity or service. *Colo. Rev. Stat. § 6-4-106(1)*. Courts look to federal antitrust cases to guide interpretation of the Colorado Antitrust Act. *Colo. Rev. Stat. § 6-4-119*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN5[] Regulated Practices, Price Fixing & Restraints of Trade

Despite the *Sherman Act's* broad language, almost from its inception the Act has been read to prohibit only those restraints of trade that are unreasonable. Courts analyze claims of unreasonable restraints on trade under the rule of reason doctrine. In addition to this rule of reason, the courts have also developed a doctrine of per se violations to cover those business relationships that because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN6[] Per Se Rule & Rule of Reason, Per Se Violations

Section 1 of the Sherman Antitrust Act, *15 U.S.C.S. 1*, prohibits contracts and conspiracies that restrain trade. Certain violations have been identified as per se illegal, requiring no additional proof of an unreasonable restraint of trade. Other *§ 1* violations require proof that a defendant's actions resulted in an unreasonable restraint of trade. If proven, bid rigging is one such per se violation. Any agreement between competitors pursuant to which contract offers are to be submitted to or withheld from a third party constitutes bid rigging per se violative of *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN7[] Per Se Rule & Rule of Reason, Per Se Violations

A conspiracy to rig bids in violation of *15 U.S.C.S. § 1* is essentially an agreement among actual or potential competitors which restrains competition in or effecting interstate trade or commerce. Conspiracy may be proved through direct or circumstantial evidence. Indeed, often if not generally, direct proof of a criminal conspiracy is not available and it will be disclosed only by a development and collocation of circumstances.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN8[] **Cartels & Horizontal Restraints, Price Fixing**

Where the disputed issue is the existence or scope of the alleged horizontal agreement that is to be inferred from circumstantial evidence, the first inquiry must be whether or not each firm alleged to have been a party to it was an actual or potential competitor in that market. The determination of a per se antitrust violation depends on whether there was an agreement to subvert the competition, not on whether each party to the scam could perform.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN9[] **Sherman Act, Claims**

When analyzing a claim under *15 U.S.C.S. § 1*, the Supreme Court has held that ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *Section 1* case. Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. A plaintiff seeking damages for violation of *Section 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. Therefore, the plaintiff must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] **Sherman Act, Claims**

With respect to a conspiracy claim under *15 U.S.C.S. § 1*, the Tenth Circuit in Matsushita has restated a two-part evidentiary test: (1) is the plaintiff's evidence of conspiracy ambiguous, i.e., is it as consistent with the defendants' permissible independent interests as with an illegal conspiracy; and, if so, (2) is there any evidence that tends to exclude the possibility that the defendants were pursuing these independent interests.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN11[] **Per Se Rule & Rule of Reason, Sherman Act**

The essence of a claim of violation of *Section 1 of the Sherman Act*, *15 U.S.C.S. § 1*, is the agreement itself. Without proof of an agreement to rig bids, the antitrust claims fail. Solely unilateral conduct, regardless of its anticompetitive effects, is not prohibited.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN12[] **Per Se Rule & Rule of Reason, Per Se Violations**

Direct evidence of a conspiracy in violation of *Section 1 of the Sherman Act*, *15 U.S.C.S. § 1*, is evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Evidence > Burdens of Proof > Allocation

HN13[] **Per Se Rule & Rule of Reason, Per Se Violations**

With respect to a claim of a conspiracy in violation of *Section 1 of the Sherman Act*, *15 U.S.C.S. § 1*, the burden remains on the antitrust plaintiff to introduce evidence sufficient to support a finding of an unlawful contract, combination, or conspiracy which tends to exclude the possibility that defendants were acting independently.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN14[] **Per Se Rule & Rule of Reason, Per Se Violations**

To prevail on a *Sherman Act* claim alleging bid rigging, plaintiffs must prove, by a preponderance of the evidence, that they were injured in their business or property by the alleged bid-rigging. That is, a plaintiff must show that it was injured because of the anticompetitive effects of the alleged bid-rigging. A relaxed measure of proof is afforded to the amount, but not the causation of loss — the nexus between the defendant's illegal activity and the injuries suffered must be reasonably proven.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN15[] **Intentional Interference, Elements**

Colorado recognizes the tort of intentional interference with prospective business relations. One who intentionally and improperly interferes with another's prospective contractual relation is subject to liability to the other for the pecuniary harm resulting from the loss of benefits of the relation. While the existence of an underlying contract is not required for this tort, there must be a showing of improper and intentional interference by the defendant that prevents the formation of a contract between the plaintiff and a third party. However, in order to prove that there is a protected prospective business relationship, the plaintiff must show that there is a reasonable likelihood or probability that a contract would have resulted; there must be something beyond a mere hope.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN16[] Civil Conspiracy, Elements

To support a civil conspiracy claim, a plaintiff must show: (1) two or more persons; (2) an object to be accomplished; (3) a meeting of the minds on the object or course of action; (4) an unlawful overt act; and (5) damages as to the proximate result. A plaintiff must present evidence of an agreement; the court may not infer its existence. Additionally, the purpose of the conspiracy must involve an unlawful act or unlawful means. A party may not be held liable for doing in a proper manner that which it had a lawful right to do.

Opinion

[*1171] FINDINGS OF FACT AND CONCLUSIONS OF LAW

FINDINGS OF FACT

I. STIPULATED JOINT FACTS[1]

A. PROCEDURAL BACKGROUND

1. On February 27, 2015, Plaintiffs Branta, LLC ("Branta"), Branta Exploration & Production Company, LLC ("Branta E&P"), Harvest (US) Holdings, Inc. ("Harvest"), and Harvest Natural Resources, Inc. ("HNR") filed a Complaint against Defendant Newfield Production **[**2]** Company ("Newfield"). (ECF No. 1.)

2. Newfield answered Plaintiffs' complaint on May 18, 2015. (ECF No. 13.)

3. On September 9, 2015, Plaintiffs filed their First Amended Complaint and Jury Demand, adding new defendants Crescent Point Energy Corporation and Ute Energy, LLC ("Ute Energy"). (ECF No. 35.)

---

[1] Section I contains the parties Joint Submission of Stipulated Proposed Findings of Fact ("Joint Facts") (ECF No. 496), filed on January 16, 2018.

4. On August 19, 2016, Plaintiffs filed a Motion for Partial Summary Judgment on Liability. (ECF No. 142.)

5. On December 12, 2016, Newfield filed a Motion for Summary Judgment. (ECF No. 235.)

6. Plaintiffs moved to amend their Complaint a second time and their Second Amended Complaint and Jury Demand was entered on the docket on February 1, 2017. (ECF No. 258.)

7. The Court denied both summary judgment motions on June 21, 2017. (ECF No. 415.)

8. A 10-day trial to the Court commenced on September 11, 2017.

B. PARTIES AND BACKGROUND FACTS

9. Branta is a privately held company that develops oil and natural gas resources. (ECF No. 258 ¶ 1.)

10. Branta is the parent company of Branta E&P, a privately held oil and natural gas exploration and production company. (ECF No. 258 ¶¶ 1-2.) Branta E&P is a wholly-owned subsidiary of Branta. (*Id.* at ¶ 2.)

11. HNR was a publicly traded company and the parent **[**3]** of Harvest, which invested in, acquired, and developed oil and gas assets. (ECF No. 258 ¶¶ 3-4; Nesselrode Trial Test., Vol. IV, 724:10-11.) Harvest is a wholly-owned subsidiary of HNR. (ECF No. 258 ¶ 4.)

12. In 2009, Branta E&P and Harvest owned oil and gas assets in the Uintah Basin in the State of Utah; Branta E&P own 40% of the Uinta Basin assets and Harvest owned the remaining 60%. (Edmiston Trial Test., Vol. IV, 804:24-805:3.)

13. Newfield is an oil and gas exploration and production company with operations throughout the United States and internationally, including in the Uintah Basin. (2015 Newfield Form 10-K at 3, available at http://phx.corporate-ir.net/phoenix.zhtml?c=63798&p=irol-reportsannual .)

14. In January 2011, Plaintiffs decided to conduct an auction for the sale of their Uinta Basin assets. (ECF No. 258 ¶ 15.)

15. In advance of the auction, Bank of America Merrill Lynch ("BAML"), which had been engaged to provide financial advice and assistance to Plaintiffs in connection with the auction, prepared a contact list that tracked entities Plaintiffs and/or BAML thought might be interested in the **[*1172]** Uintah Basin assets and recorded contacts with those entities. (Trial Ex. 18.) **[**4]**

16. Newfield was on BAML's contact list. (Trial Ex. 18 at BofA_000023.)

17. Throughout 2010 and 2011, Ute Energy was an oil and gas exploration and production company operating in the Uinta Basin. (Jaggers Trial Test., Vol. I, 78:1-2, 78:17-24.)

18. In early 2011, Ute Energy was interested in acquiring assets in the Uintah Basin. (Jaggers Trial Test., Vol. I, 116:9-11.)

19. The Bridgeland Exploration and Development Agreement ("Bridgeland EDA") created an Area of Mutual Interest ("AMI"). (Trial Ex. 25 at Art. XX.)

C. NEWFIELD'S CONFIDENTIALITY AGREEMENT WITH BRANTA

20. In February 2010, Branta notified Newfield of its plan to sell some of Branta E&P's share of the Uinta Basin assets. (Trial Ex. 33.)

21. To facilitate discussions of a potential sale of the Branta E&P assets to Newfield, on February 22, 2010, Branta and Newfield executed a confidentiality agreement (the "Branta Confidentiality Agreement") with respect to a potential acquisition by Newfield of Branta E&P's assets. (Trial Ex. 27.) The original term of the Branta CA was eighteen (18) months. (*Id.* at ¶ 8.)

22. Under the Branta Confidentiality Agreement, Branta agreed to share confidential and proprietary information with Newfield **[**5]** related to their Uintah Basin assets. (Trial Ex. 27.)

23. The Branta Confidentiality Agreement states that Newfield agreed "[t]o keep the [proprietary and confidential information ("PCI")] confidential and not to disclose the PCI to any entity or person except to [Newfield]'s and its affiliates' respective employees, officers, directors, counsel, accountants or consultants . . . on a need to know basis as is necessary to evaluate [Branta] or [various oil and gas exploration prospects]." (*Id.* at ¶ 3(a).)

24. The Branta Confidentiality Agreement also contains a "Non-Circumvention" clause:

> Each party hereby agrees that neither it nor its representatives will contact (whether by telephone, email, in-person meeting or otherwise) any of the other party's or its subsidiary's [sic] of affiliate's lenders, equity owners, co-working interest owners, joint exploration and development partners or other persons having existing or prospective business relations with the other party or its subsidiaries without the other party's prior express written consent obtained at least 48 hours in advance of such proposed contact, which consent may be withheld in the applicable party's sole discretion, and no such contacts may **[**6]** be conducted unless a representative of the other party is present throughout any such contacts.

(*Id.* at ¶ 4.)

25. The Branta Confidentiality Agreement states that it is governed by Texas law. (*Id.* at ¶ 12(a).)

26. The Branta Confidentiality Agreement applied to Branta and its affiliates, including Branta E&P. (Trial Ex. 27.)

27. On September 29, 2010, Newfield proposed to purchase Branta E&P's 30% interest in the Uinta Basin assets for $77 million. Newfield's proposal was rejected. (Trial Exs. 47, A35.)

28. On February 18, 2011, Newfield and Branta executed a letter that amended the Branta Confidentiality Agreement (the "Amendment Letter"). (Trial Ex. 31.)

[*1173] 29. The Amendment Letter applied to Branta and its affiliates, including Branta E&P. (*Id.* at 1.)

30. The Amendment Letter amended the Branta Confidentiality Agreement's Non-Circumvention provision to allow the parties to: (i) have contact with Harvest and its investment banker Merrill Lynch Securities in regards to Harvest's assets in the Uintah Basin; (ii) waive any prior breaches of the Branta CA arising out of any prior contacts with Harvest or Merrill Lynch Securities; and (iii) agree that the Branta CA was never intended to preclude either party "from contacting Harvest in respect **[**7]** of their respective relationships with Harvest that existed on the date of the [Branta] CA, including relationships as co-working interest owners or exploration and development partners in Uintah and Duchesne Counties, Utah." (*Id.* at 1.)

D. NEWFIELD'S CONFIDENTIALITY AGREEMENT WITH HNR

31. On February 17, 2011, HNR entered into a confidentiality agreement (the "Harvest Confidentiality Agreement") with Newfield. (Trial Ex. 32.)

32. The Harvest Confidentiality Agreement applied to HNR's subsidiaries, including Harvest. (*Id.* at 1 & ¶ 1.)

33. Under the Harvest Confidentiality Agreement, HNR and Harvest agreed to share "Evaluation Material" with Newfield. (*Id.* at 1 & ¶ 3.)

34. The Harvest Confidentiality Agreement stated that, without Harvest's prior written consent, Newfield "shall not disclose to or discuss with any third person," other than "the parent companies, subsidiaries and affiliates of the Parties . . . and each of their directors, officers, employees, agents, financial advisors or lenders, contractors, and consultants," "either the fact that discussions or negotiations are taking place concerning ['a strategic transaction involving Harvest's assets in the United States located in the Uintah Basin, State **[**8]** of Utah (a "Transaction")'] or any of the terms, conditions, or other facts with respect to any such Transaction, including the status thereof." (*Id.* at 1 & ¶ 6.)

35. The Harvest Confidentiality Agreement states that it is governed by Texas law. (*Id.* at ¶ 16.)

36. Harvest shared Evaluation Material with Newfield as provided for by the Harvest Confidentiality Agreement. (Trial Exs. 91, 92; Nesselrode Trial Test., Vol. IV, 751:19-23.)

E. COMMUNICATIONS BETWEEN NEWFIELD AND UTE ENERGY

37. Newfield did not have Plaintiffs' consent to contact Ute Energy about the auction. (Trial Exs. 57, 91.)

38. On May 18, 2011, Howard and Jaggers had a lunch meeting, and afterwards, Jaggers was disappointed. (Jaggers Trial Test., Vol. I, 156:25-157:4; Howard Trial Test., Vol. II, 332:1-3, 438:24-439:1.)

39. On May 20, 2011, Jaggers sent a letter to Howard. (Trial Ex. 1.)

F. BIDS FOR PLAINTIFFS' ASSETS

40. Before Newfield's initial March 7, 2011 bid, its technical team performed detailed economic analyses of Plaintiffs' assets. (Trial Exs. 110, 116-119, 122, 124.)

41. On March 7, 2011, Newfield submitted a bid of $196,988,000 for Harvest's assets and a bid of $90,587,000 for Branta E&P's assets, for a total bid of $287,575,000. **[**9]** (Trial Exs. 127, 128.)

42. On March 10, 2011, Bill Barrett Corporation ("BBC") submitted a bid that totaled $180,000,000 for just a portion of Plaintiffs' assets. (Trial Exs. 135, 136.)

[*1174] 43. Ute Energy did not bid on Plaintiffs' assets during the auction. (Tresca Trial Test., Vol. III, 599:10-12.)

G. NEWFIELD'S PURCHASE OF PLAINTIFFS' ASSETS

44. Newfield submitted the highest bid in the auction and was awarded the opportunity to buy the Uintah Basin assets. (Trial Ex. 142.)

45. HNR publicly announced Newfield's acquisition of Harvest's Uinta Basin assets on March 22, 2011, including the amount to be paid for the assets. (Trial Ex. B69.)

46. The sale of the Uintah Basin assets to Newfield closed on May 17, 2011. (Trial Ex. C46.)

47. After the close of the transaction, Newfield offered Ute Energy an option pursuant to the Bridgeland AMI to purchase the portion of the acquired assets located within the Bridgeland EDA, and Ute Energy exercised the option and paid approximately $12.1 million to acquire the offered assets. (Trial Exs. C11, C13.)

II. ASSET OWNERSHIP INTERESTS

1. Throughout 2010 and until March 21, 2011, Harvest (US) Holdings, Inc. ("Harvest (US)") and Brant Exploration & Production **[**10]** Company, LLC ("Branta E&P") owned a combined 100% working interest in approximately 69,399 net acres of mineral assets in the Uinta Basin (the "Uinta Basin Assets"). [Trial Ex. C49 at C49_0002, C49_0009, C49_0014, ¶¶ 2, 4, 30, 50; Nesselrode Testimony (Vol. IV — 738:16-18)]

2. Harvest Natural Resources, Inc. ("HNR") and Branta, LLC ("Branta") did not own any of the Uinta Basin Assets, except through their subsidiaries Harvest (US) and Branta E&P. [Trial Ex. C49 at C49_0002, C49_0009, C49_0014, ¶¶ 1, 3, 30, 50]

III. UTE ENERGY AND ITS AGREEMENTS WITH NEWFIELD

3. The Ute Indian Tribe owned 51% of Ute Energy, LLC ("Ute Energy"), and Quantum Energy Partners ("Quantum") owned 49%, though employees owned a part of the company, so it was not exactly 51/49. [Jaggers Testimony (Vol. I — 71:5-18; Vol. XI — 2045:19-2047:3)] Nevertheless, at all relevant times, the Ute Indian Tribe was the majority owner of Ute Energy, LLC ("Ute Energy"). [Jaggers Testimony (Vol. I — 71:5-15)]

4. Newfield had existing business relations with Ute Energy throughout 2010 and 2011, including as co-working interest owners and exploration and development partners in the Uinta Basin. [Trial Exs. 25, 28, 29, C38 at C38_0021-22 **[**11]** (Request for Admission # 20)]

5. Ute Energy and the Ute Indian Tribe were partners with Newfield under several exploration and development agreements ("EDAs") in the Uinta Basin. The relevant agreements were the Monument Butte Exploration and Development Agreement between the Ute Indian Tribe and Newfield executed on December 22, 2006, which the Ute Indian Tribe assigned to Ute Energy in 2007 (the "Monument Butte EDA"), the Bridgeland Exploration and Development Agreement between Ute Energy and Newfield executed on May 19, 2008 (the "Bridgeland EDA"), and the Rocky Point Exploration and Development Agreement and Area of Mutual Interest Agreement (the "Rocky Point EDA") executed on September 27, 2010 between Ute Energy and Newfield. [Trial Exs. 25, 28, 29]

6. EDAs are commonly used in the industry and by the Ute Indian Tribe to facilitate the exploration and development of hydrocarbons. Based on the testimony of Newfield's expert, Bruce Kramer, EDAs, like those entered into by Ute Energy **[*1175]** and Newfield, provide procompetitive benefits to the mineral owners, operators, and other working interest owners through risk- and cost-sharing, and through the ability to obtain substantial efficiencies **[**12]** and prevention of waste by allowing the development of large sections of land as a single lease. [Kramer Testimony (Vol. VII — 1346:14-1351:4, 1365:15-1367:15, 1367:23-1370:10, 1371:1-1372:10)]

7. EDAs and their associated joint operating agreements ("JOAs") often contain or are accompanied by an area of mutual interest agreement or "AMI." An area of mutual interest agreement is "an agreement between or among parties to an oil and gas farmout agreement, joint operating agreement or other agreement by which the parties describe a geographical area within which they agree to share certain additional leases or other interests acquired by any of them in the future." 8 Patrick H. Martin & Bruce M. Kramer, *Williams & Meyers Oil and Gas Law* 56 (2015). [Kramer Testimony (Vol. VII — 1350:10-1353:16, 1372:11-1374:14, 1375:6-10, 1375:13-1376:13)]

8. The purpose of a JOA is to share risks and costs, as well as information. JOAs allow for the exploration and development of oil and gas that otherwise might not get explored and developed, leading to greater production. [Tresca Testimony (Vol. III — 616:5-6, 616:12-617:23); Kramer Testimony (Vol. VII — 1343:12-1344:7)]

9. EDAs and AMIs promote risk-sharing. [Tresca Testimony (Vol. III **[**13]** — 616:12-617:23); Schulman Testimony (Vol. VI — 1130:11-22); Burtis Testimony (Vol. X — 1938:3-24)]

10. Without the EDAs at issue in this case, the minerals would likely have remained in the ground. [Kramer Testimony (Vol. VII — 1348:22-1349:12)]. Due to the Ute Tribe's lack of money and experience, and Newfield's lack of access to the tribal lands, the EDAs provided a mutually beneficial arrangement between the Ute Tribe and Newfield to develop the assets. It is unlikely that either party could have developed the assets solo. [Schulman

Testimony (Vol. VI — 1173:19-1174:2); Howard Testimony (Vol. II — 282:12-16); Packer Testimony (Vol. VII — 1422:22-1423:9)]

11. Harvest (US) and Branta E&P were parties to an AMI agreement that covered the Uinta Basin Assets. [Trial Ex. A76 at A76_0022; Tresca Testimony (Vol. III — 617:25-618:8); Edmiston Testimony (Vol. IV — 866:23-24)]

12. The Bridgeland EDA that Newfield entered into with Ute Energy contained an AMI. There was no AMI included in the Monument Butte EDA because, at the time it was executed, the Ute Tribe did not have an operating company or operating capabilities. [Packer Testimony (Vol. VII — 1421:9-13)] There was also a Rocky Point **[**14]** AMI between Newfield and Ute Energy. [Trial Ex. 29]

13. Pursuant to the AMI contained in the Bridgeland EDA, Ute Energy and Newfield agreed that they would offer to each the option to purchase additional leases acquired within the area of mutual interest pursuant to agreed-upon terms. [Trial Ex. 25 at §§ 1.10, 20.1]

14. Pursuant to the AMI associated with the Rocky Point area, which was in the form of a December 20, 2010 amendment to a preexisting AMI covering the Rocky Point area, Ute Energy and Newfield agreed to offer to each other the option to purchase assets acquired within the area of mutual interest pursuant to agreed-upon terms. In particular, Ute Energy and Newfield agreed that they would offer to each other leases acquired "through their own leasing activity [but this was] not intended to apply to acquisitions of interests by any means other than new leasing." [Trial Ex. 29 at 129-004 ¶ 1, **[*1176]** 029-002 ¶ 5; Jaggers Testimony (Vol. I — 108:9-17)]

15. The Ute Tribe was unwilling to enter into the Bridgeland EDA without the included AMI [Packer Testimony (Vol. VII — 1424:11-25)], thus the AMI was necessary to allow the Tribe to share in additional acreage opportunities that would be developed **[**15]** within the Uintah Basin.

16. It is the EDAs with its leasing and joint operating agreement aspects that create the precompetitive benefits, not the existence or nonexistence of the AMIs. [Kramer Testimony (Vol. VII — 1385:14-1386:11)] EDAs and, when included, AMIs, are negotiated provisions between the parties under the particular circumstances of each agreement, but are part of the joint collaboration to increase output of oil and gas at lower costs. [Kramer Testimony (Vol. VII — 1354:8-1356:1)]

IV. THE BRANTA CONFIDENTIALITY AGREEMENT

17. In 2010, the Branta Entities explored raising additional capital for Branta E&P, or alternatively selling Branta E&P's share of the Uinta Basin Assets. [Tresca Testimony (Vol. III — 552:22-553:4, 553:14-20, 554:10-15, 554:24-555:11)]

18. Energy Capital Solutions ("ECS") was an investment banking firm engaged by Branta in 2010 and 2011. Scott Trulock was the ECS principal with whom Branta worked. Mr. Trulock was retained to assist in identifying a financial partner to invest in Branta. [Tresca Testimony (Vol. III — 554:16-555:3, 601:15-602:3, 646:20-647:7)]

19. As part of the effort to sell its assets or finance its operations, Branta established a data **[**16]** room for prospective buyers or investors, and required any data room visitor to execute a confidentiality agreement ("CA"). [Tresca Testimony (Vol. III — 558:18-559:2, 560:22-561:4, 600:24-601:14)]

20. The Branta CA was drafted by the Branta Entities. [Tresca Testimony (Vol. III — 621:18-25)]

21. Paragraph 4 of the Branta CA, the non-circumvention provision, was a reciprocal provision intended to prevent each party from communicating with the other party's partners. [Tresca Testimony (Vol. III — 560:12-21, 623:22-624:6); Donohoue Testimony (Vol. V — 1068:24-1069:4, 1080:14-1081:20); Howard Testimony (Vol. II — 396:1-3); Trial Ex. 27 at 27-001, ¶ 4] For example, Branta could not communicate with Newfield's partners to transact business that cut out Newfield. But Branta could communicate with its own partners. Similarly, Newfield could not communicate with Branta's partners to transact business that cut out Branta. But Newfield was free to communicate

with its own partners. [Howard Testimony (Vol. II — 397:12-21); Tresca Testimony (Vol. III — 623:22-625:1, 626:4-20)]

22. Because, at the time the Branta CA was executed, Newfield and Ute Energy were partners under the three EDAs, the Branta **[**17]** CA did not prohibit Newfield from communicating with its partner, Ute Energy. [Howard Testimony (Vol. II — 396:4-20)]

23. The Branta Entities had no existing or prospective business relations with Ute Energy at the time the Branta CA was executed. [Tresca Testimony (Vol. III — 627:2-4, 627:11-18); Howard Testimony (Vol. II — 397:24-398:4)] There was no evidence presented that Harvest had an existing or prospective business relationship with Ute Energy at that time either.

24. Thus, the Branta CA prohibited Branta from communicating with Ute Energy without Newfield's prior written consent.

25. On September 29, 2010, the same day Newfield made its $77 million offer for Branta's interests, Branta E&P's manager, Fred Tresca, instructed Scott Trulock **[*1177]** of ECS to set up a meeting with Ute Energy. [Trial Ex. A31; Trial Ex. A33; Tresca Testimony (Vol. III — 628:25-630:4)] At the time, Ute Energy was Newfield's working interest partner and exploration and development partner in the Bridgeland, Monument Butte and Rocky Point EDAs. [FF # 4-5, 12-14]

26. On September 30, 2010, Mr. Trulock emailed the CEO of Ute Energy, Joseph Jaggers, asking for a meeting with Branta and Ute Energy to "see if there **[**18]** are any opportunities to work together." [Trial Exs. A31, A32, A33; Tresca Testimony (Vol. III — 630:5-19); Jaggers Testimony (Vol. I — 218:24-219:24)]

27. Mr. Jaggers agreed to a call, and, on October 4, 2010, Mr. Tresca and other representatives of the Branta Entities spoke with Ute Energy. [Trial Ex. A34; Jaggers Testimony (Vol. I — 219:25-220:7)]

28. Branta did not seek or obtain Newfield's consent prior to its September 30, 2010 outreach and October 4, 2010 conversation with Ute Energy. [Howard Testimony (Vol. II — 398:5-18)]

V. <u>THE AUCTION</u>

29. HNR was motivated to sell Harvest (US)'s share of the Uinta Basin Assets in part because it needed to raise funds to cover debts coming due in the second quarter of 2011 after unsuccessful attempts to market certain other assets in Venezuela in 2010, and intended to sell only 100% — not a part — of its interest. [Head Testimony (Vol. VIII — 1728:18-22); Edmiston Testimony (Vol. IV — 797:25-800:6, 813:10-20, 816:21-817:14, 847:12-848:5, 849:16-23, 849:11-850:24); Trial Ex. A73; Trial Ex. B15]

30. In the auction, the selling parties, here Harvest (US) and Branta E&P, controlled the auction's rules for bidding and the identities and number of competitors **[**19]** allowed to participate in the auction. The sellers and their banker (Bank of America Merrill Lynch ("BAML")) controlled the market of participating competitors by choosing whom to invite into the process, including sending the initial "teaser" and making follow-up calls to generate interest in the auction, offering confidentiality agreements and allowing access to the sellers' "data room," and sending bid guidelines describing the terms of bids. A party not invited to participate or barred from participation by the sellers was not a competitor in the auction. [Nesselrode Testimony (Vol. IV — 737:17-19, 743:1-5, 789:9-21, 780:12-15); Edmiston Testimony (Vol. IV — 817:15-819:15, 825:18-827:10, 839:25-840:9, 849:16-23, 851:9-22, 862:19-24); Sooby Testimony (Video Depo. — 118:6-119:4); Tresca Testimony (Vol. III — 583:7-11, 583:16-19, 667:10-20); Trial Ex. 5; Trial Ex. 7; Trial Ex. B15 at B15_0003, 0005]

31. Branta agreed in early January 2011 to participate as a seller with the Harvest Entities, agreed that HNR could act as a representative for both Branta Entities in the auction, and agreed to BAML's participation on behalf of the Branta Entities in the auction process. [Tresca Testimony **[**20]** (Vol. III — 575:9-576:5, 583:2-19, 644:21-645:7); Trial Ex. 30; Trial Ex. 52]

32. Plaintiffs expected that Newfield, Shell or El Paso would be the primary competitors in the auction. [Tresca Testimony (Vol. III — 601:1-4, 604:17-605:1, 676:24-677:6); Head Testimony (Vol. VIII — 1732:14-1733:5); Trial Ex. 77] They expected El Paso to be the most logical company to make a strong bid. [Trial Ex. K] Branta was aware, however, that Ute Energy could not afford to purchase the Uinta Basin Assets in their entirety. [Trial Exs. Q, T]

a. Plaintiffs Barred Newfield and Ute Energy From The Auction

33. On January 6, 2011, HNR's CEO, James Edmiston, informed Branta's Fred **[*1178]** Tresca that Ute Energy and Newfield would be excluded from the auction process, at least until a later point in the process. [Trial Ex. A43 at A43_003]

34. On January 7, 2011, Edmiston instructed BAML that Ute Energy and Newfield would not be permitted to participate in the auction unless and until he instructed BAML otherwise. [Trial Ex. 18 at 18-024; Sooby Testimony (Video Depo. — 60:24-62:18, 70:22-71:8, 72:7-15); Edmiston Testimony (Vol. IV — 853:14-855:18)] Mr. Edmiston instructed BAML to move Newfield and Ute Energy to the "B-List." **[**21]** [Trial Ex. 18 at 18-024] BAML understood Mr. Edmiston's instructions to bar Ute Energy and Newfield from participating in the auction unless and until Plaintiffs affirmatively lifted their respective bars. [Sooby Testimony (Video Depo. — 67:12-69:12, 70:22-71:8, 74:2-11, 77:01-12, 92:14-94:22, 97:19-98:4)]

35. On January 10, 2011, BAML began a calling program contacting potential buyers about the auction. [Trial Ex. 18] Potential buyers were also sent "teasers" that described the assets to be sold as well as the next steps in the sale process, which involved the execution of a confidentiality agreement, access to an online data room, and management presentations in Houston covering Land, Geology, Geophysics, Reservoir Engineering and Economics, Operations, and Facilities and Marketing. [*Id.*; Trial Ex. A76]

36. BAML's Contact List records that BAML contacted 47 different companies in its calling program and sent Teasers to 45 companies. [Trial Ex. 18] The Contact List shows that BAML never sent a Teaser to Newfield or Ute Energy, and never contacted Ute Energy in its calling program. [*Id.*]

37. On January 13, 2011, Mr. Jaggers called HNR's vice president, Karl Nesselrode, to express interest **[**22]** in the Uinta Basin Assets. [Jaggers Testimony (Vol. I — 99:21-100:14, 132:2-5)] Mr. Nesselrode testified that Mr. Jaggers expressed interest in participating in the process and that he told Mr. Jaggers that if Ute Energy were interested it needed to contact BAML. [Nesselrode Testimony (Vol. IV — 752:10-16, 754:7-22, 755:14-756:9, 793:3-11)]

38. However, in an email sent at 11:15 p.m. on the same day that Mr. Nesselrode spoke to Mr. Jaggers and reported his conversation with Mr. Jaggers to Mr. Edmiston, Mr. Edmiston reiterated his instruction to Mr. Nesselrode and BAML that "Ute Energy and Newfield are barred from the early rounds of our process due to competitive reasons." Mr. Edmiston stated "[i]f I think we need to, we will bring them in at the end . . . ." [Trial Ex. 57; Nesselrode Testimony (Vol. IV — 746:5-748:5)]

39. Mr. Nesselrode testified that, later in January 2011, he received two other calls from Mr. Jaggers expressing Ute Energy's interest in being part of the process relating to the Uinta Basin Assets and seeking information regarding the status of the data room. [Nesselrode Testimony (Vol. III — 696:17-697:1, 697:18-25; Vol. IV — 753:20-23, 758:14-759:8)]

40. Mr. Nesselrode **[**23]** indicated that he and Mr. Jaggers did not discuss bidding on any of the January phone calls regarding Ute Energy's interest in participating in the process relating to the Uinta Basin Assets because it was too early in the process to talk about bidding. [Nesselrode Testimony (Vol. IV — 758:1-13)]

b. <u>Plaintiffs Lifted The Bar On Newfield's Participation In the Auction On</u> February 15, 2011 <u>But Never Lifted The Bar On Ute Energy's Participation</u>

41. On February 15, 2011, just three weeks before the auction, Mr. Edmiston **[*1179]** decided to allow Newfield to participate in the auction and instructed BAML to invite Newfield to participate. However, Mr. Edmiston never lifted the bar on Ute Energy's participation in the auction and never instructed BAML to contact Ute Energy about participating in the auction. [Sooby Testimony (Video Depo. — 74:2-76:1, 77:1-18, 78:6-10, 79:22-80:10, 80:20-81:1, 94:17-22); Trial Ex. 90; Tresca Testimony (Vol. III — 668:13-669:21, 670:9-15); Edmiston Testimony (Vol. IV — 857:6-19, 857:24-858:4, 858:25-859:8); Head Testimony (Vol. VIII — 1738:10-19)]

42. Harvest also barred Morgan Stanley from the auction process. [Trial Ex. B12]

43. BAML invited Newfield into the process **[**24]** on February 15, 2011 by contacting Newfield's CFO, Terry Rathert, and sending a confidentiality agreement for Newfield to execute, and by inviting Newfield to schedule a visit to the data room. [Trial Exs. A95, A98, 91-92; Edmiston Testimony (Vol. IV — 856:11-14, 856:22-24)]

44. Plaintiffs did not expect companies to bid without first executing a confidentiality agreement, accessing the data room, and receiving bid procedures. Ute Energy would not have bid in the auction without first accessing the data room. [Jaggers Testimony (Vol. I — 199:1-13, 201:11-14); Jaggers Testimony (Vol. II — 257:19-258:1, 261:10-13); Nesselrode Testimony (Vol. IV — 709:13-21, 711:7-14, 758:3-10, 780:8-15); Edmiston Testimony (Vol. IV — 851:9-852:5); Sooby Testimony (Video Depo. — 21:12-19, 22:08-19, 68:9-20); Tresca Testimony (Vol. III — 667:25-668:12); Head Testimony (Vol. VIII — 1732:24-1733:6)]

45. BAML's Contact List reflects that BAML sent confidentiality agreements to 21 companies, and hosted 10 data room presentations. [Trial Ex. 18] The Contact List identifies the companies visiting the data room as El Paso, Devon, Shell, Endeavour, Bill Barrett Corporation ("BBC"), Newfield, ExxonMobil, Enduring **[**25]** Resources, ConocoPhillips, and Berry Petroleum. [*Id.*]

46. Plaintiffs never sent Ute Energy a confidentiality agreement and never invited Ute Energy to the data room, which contained proprietary information from which potential bidders could evaluate the Uinta Basin Assets. [Edmiston Testimony (Vol. IV — 851:9-853:6, 855:3-856:4, 857:8-11, 857:24-858:5, 858:25-859:3); Head Testimony (Vol. VIII — 1730:13-1731:2, 1731:16-1732:5); Nesselrode Testimony (Vol. IV — 751:24-752:9, 752:20-753:18); Trial Ex. C38 at C38_0021-22, at Request for Admission # 5; Trial Ex. 18; Sooby Testimony (Video Depo. — 77:1-18, 77:23-78:10, 78:15-17, 78:19)]

47. Neither Plaintiffs nor BAML ever contacted Ute Energy after Mr. Edmiston sent his January 13, 2011 email reiterating that Ute Energy was barred from participating in the auction. [Trial Ex. 18; Nesselrode Testimony (Vol. IV — 751:24-752:9, 752:20-753:18); Sooby Testimony (Video Depo. — 79:5-8, 79:10-80:10, 82:4-10, 83:6-23, 92:14-93:14, 93:17-94:4, 94:12-22)]

48. There is no evidence that anyone from HNR, Branta, or BAML expressed surprise that Ute Energy was not in the process or asked why Ute Energy was not involved. Instead, they reported that the data **[**26]** room attendees included "everyone you would expect." [Trial Ex. A96] There is no evidence Plaintiffs or their bankers expected Ute Energy to participate in the auction process.

c. <u>Newfield Executed A Confidentiality Agreement With HNR And Entered Into An Amendment To The Branta CA</u>

49. On February 17, 2011, Newfield and HNR entered into a confidentiality agreement (the "Harvest Confidentiality Agreement" or "Harvest CA"), so that **[*1180]** Newfield could access the data room and gather information to prepare a bid for Harvest (US)'s share of the Uinta Basin Assets. [Trial Ex. 32]

VI. <u>NEWFIELD DEVELOPS ITS BID PRESUMING ROBUST COMPETITION</u>

50. The auction for the Uinta Basin Assets was a sealed bid process, in which bidders did not know the identities or bid amounts of other bidders, or the number of other bidders. [Schulman Testimony (Vol. VI — 1142:22-1143:12); Burtis Testimony (Vol. X — 1921:1-21)]

51. Newfield did not know the number or identities of the potential bidders contacted by BAML. Newfield believed, however, that there would be robust competition in the auction from numerous bidders. [Trial Ex. 9 at 9-065; Packer Testimony (Vol. VII — 1416:7-21, 1467:13-1469:12, 1495:24-1496:22, 1534:17-20, 1543:24-1544:9); Massaro Testimony (Vol. VIII — 1567:5-14, 1574:9-18, 1604:1-6, **[**27]** 1629:20-24); Jergensen Testimony (Vol. V — 1020:20-24, 1027:13-24, 1029:24-1030:20); Rathert Testimony (Vol. IX — 1774:3-1775:7); Boothby Testimony (Vol. VIII — 1688:5-1690:5); Howard Testimony (Vol. II — 384:12-385:5]

52. For example, Newfield's Decision Review document that was presented internally to Newfield's senior management identified El Paso, Shell, Oxy, Noble and Samson as "well- capitalized—could move the needle" potential bidders. Ute Energy, along with BBC, Berry, and QEP, was identified in this document in the list of potential bidders that were "also active in the basin" but from which Newfield "expected lower level activity," along with Crescent Point Energy, a Canadian company that ultimately purchased Ute Energy's upstream business. [Trial Ex. 9 at 9-065; Jaggers Testimony (Vol. I — 191:14-16); Howard Testimony (Vol. II — 425:17-20); Massaro Testimony (Vol. VIII — 1567:5-14, 1574:9-18, 1581:20-1582:15)]

53. Bigger players such as El Paso were considered the primary competitors Newfield thought it would need to beat to win the auction. [Trial Exs. 112, 117, 118, 120, 124; Howard Testimony (Vol. II — 368:11-15, 384:15-385:5, 421:7-19); Packer Testimony (Vol. VII — 1468:3-8, **[**28]** 1468:25-1469:12); Massaro Testimony (Vol. VIII — 1567:10-14, 1574:9-16, 1577:18-23, 1582:12-15, 1604:1-6); Boothby Testimony (Vol. VIII — 1689:5-13, 1732:14-19); Rathert Testimony (Vol. IX — 1774:25-1775:7)]

54. Though Newfield identified Ute Energy as a potential competitor, Newfield never thought Ute Energy was the primary competitor it would have to beat to win the auction. [Howard Testimony (Vol. II — 421:7-19)] This is because it was widely known that Ute Energy had limitations on its ability to fund a transaction, as evidenced by discussions Ute Energy had had with Newfield as to whether it could keep up with Newfield's drilling capital campaigns. [Packer Testimony (Vol. VII — 1469:22-24); Jergensen Testimony (Vol. V — 1027:13-1028:12); Jaggers Testimony (Vol. I — 136:9-13)]

55. According to Ute Energy's CEO, Mr. Jaggers, Ute Energy was not a natural buyer for the Uinta Basin Assets because the only way Ute Energy could participate was if Newfield acquired the assets and then shared them with Ute Energy. [Jaggers Testimony (Vol. I — 203:5-14); Tresca Testimony (Vol. III — 608:8-15)]

56. The Decision Review document presented to Newfield's senior management recommended a bid of $220 **[**29]** million. [Trial Ex. 9 at 9-064; Howard Testimony (Vol. II — 374:4-13)] Newfield's initial bid was approximately $67.5 million higher than the recommended bid because Newfield anticipated robust competition. [Massaro **[*1181]** Testimony (Vol. VIII — 1593:20-1596:12); Packer Testimony (Vol. VII — 1473:21-1475:16, 1525:7-1526:11, 1543:24-1544:9)]

VII. <u>NEWFIELD IS THE SUCCESSFUL BIDDER</u>

57. On March 1, 2011, BAML sent bid procedures to Newfield and eight other potential bidders for the purchase of Harvest (US)'s share of the Uinta Basin Assets and for the purchase of Branta E&P's share of the Uinta Basin Assets. [Trial Ex. 18; Trial Ex. B15] No bid procedures were sent to Ute Energy. [*See id.*]

58. The bid procedures instructed the bidders to submit their proposals "in conformity with the guidelines" set forth in the procedures. The guidelines required that any bid be for all of Harvest (US)'s and Branta E&P's Uinta Basin Assets, respectively. [Trial Ex. B15 at B15_0004, B15_0008]

59. Plaintiffs always intended to sell 100% of the Uinta Basin Assets, not portions thereof, if possible. [Tresca Testimony (Vol. III — 644:7-20); Edmiston Testimony (Vol. IV — 816:21-817:14, 847:12-848:5, 848:16-24, 849:11-20, **[**30]** 850:10-24); Sooby Testimony (Video Depo.-- 47:19-48:1; Trial Exs. A73, 104] In fact, Harvest (US), through Mr. Edmiston, was contacted by several smaller companies regarding partial bids, but Mr. Edmiston rejected their overtures, wanting 100% of the assets to be available in the auction. [Edmiston Testimony (Vol. IV — 848:16-24); Trial Ex. A73] And, in the end, Plaintiffs rejected BBC's partial bid at $180 million. [Trial Ex. 13] Harvest never told its bankers, BAML, that they would entertain partial bids, and never invited partial bids. [Nesselrode Testimony (Vol. IV — 735:2-12, 735:23-736:7)]

60. Ute Energy understood that Plaintiffs were interested only in selling the entirety of their Uinta Basin Assets, but Ute lacked the financial ability to compete for those assets. [Jaggers Testimony (Vol. I — 189:2-7)]

61. Plaintiffs' position was that selling the whole portion of the assets would maximize the value or price they could receive—the whole being greater than the sum of the parts—and therefore that they wanted to sell the entirety of the Uinta Basin Assets together at the auction. [Tresca Testimony (Vol. III — 644:17-20)]

62. At trial, Mr. Jaggers testified that he might have approached **[**31]** Harvest (US) outside the auction process regarding a partial bid since Ute Energy could not compete for the entirety of the assets in the auction. [Jaggers Testimony (Vol. I — 114:18-20, 189:2-13)] But there was no evidence of what portion Ute Energy would have bid on, nor the price it would have paid, nor any other details. Therefore, Mr. Jaggers' testimony was speculative. Moreover, based on the evidence that Mr. Edmiston rejected all expressions of interest in partial offers made outside the auction process, I find no reason to believe that an overture from Ute Energy expressing interest in making a partial offer prior to the auction would have been more positively received. And because the nature of such a partial offer was never considered by Ute Energy, it would also be speculative to predict even what that offer would have been.

63. The Decision Review document recommending a $220 million bid was prepared by Newfield's Rocky Mountain business unit, for presentation to Newfield's senior management, which was responsible for discussing bids for significant acquisitions and the amounts of such bids, with final decisions made by Newfield's CEO, Lee K. Boothby. [Boothby Testimony **[**32]** (Vol. VIII — 1672:23-1673:11, 1675:8-1676:8, 1684:2-1685:22); Howard Testimony (Vol. II — 277:10-278:3, 342:16-343:6, 374:4-13, **[*1182]** 383:25-384:9); Massaro Testimony (Vol. VIII — 1592:19-1596:12)]

64. The Newfield bid of approximately $287.5 million was decided by Mr. Boothby, based on his determination that the maximum amount he was willing to pay for the Uinta Basin Assets was $300 million, and he wanted to submit a bid somewhat below the maximum to leave room for possible further negotiations. [Boothby Testimony (Vol. VIII — 1684:21-1686:13); Massaro Testimony (Vol. VIII — 1593:20-1596:12)]

65. On March 7, 2011, the bid deadline, Newfield submitted a bid for more than $196 million for Harvest (US)'s share of the Uinta Basin Assets and a bid for more than $90 million for Branta E&P's share of the Uinta Basin Assets, for a total bid of $287,575,000. [Trial Ex. 127; Trial Ex. 128].

66. BBC initially submitted a bid for $120 million for a portion of Harvest (US)'s share of the Uinta Basin Assets. [Nesselrode Testimony (Vol. IV — 728:18-20); Trial Ex. 13 at 13-003]

67. On March 10, 2011, BBC submitted a bid for $50 million for a portion of Branta E&P's share of the Uinta Basin Assets and an amended **[**33]** bid for $130 million for a portion of Harvest (US)'s share of the Uinta Basin Assets. [Trial Ex. 135; Trial Ex. 136]

68. Following Newfield's March 7, 2011 bid, BAML comments to Newfield caused Newfield to believe there were competitive bids for the entirety of the Uinta Basin Assets and a partial bid for an unspecified part of the Uinta Basin Assets in "the North." [Trial Ex. B41; Massaro Testimony (Vol. VIII — 1598:7-1599:7, 1603:1-19, 1604:1-6)]

69. However, Newfield did not know how many other bidders there were, their identities, their bid amounts, or the scope of the partial bid that was reported to them. [Massaro Testimony (Vol. VIII — 1603:1-19, 1604:1-6)]

70. The Branta Entities did know the identities of the other bidders as well as the bid amounts. Before Newfield's bid was accepted, Branta and/or Branta E&P used their knowledge of Newfield's bid to propose to Morgan Stanley that it finance Branta in making a bid for Harvest (US)'s 70% share of the Uinta Basin Assets. Branta told Morgan Stanley that, based on the bids, it looked like it would take $310 million to win the auction. [Trial Ex. B44 at B44_0004; Tresca Testimony (Vol. III — 583:20-584:2, 663:2-22, 664:6-665:2)] **[**34]** Morgan Stanley declined to finance Branta, stating that the $310 million price tag was "too pricey." [Trial Ex. B44 at B44_0002]

71. Between March 7 and March 11, 2011, Plaintiffs requested, through BAML, and by communications between Mr. Edmiston and Newfield's COO Gary Packer, that Newfield increase its combined bid slightly, suggesting that, if Newfield did so, it would be the high bidder. [Trial Ex. 13 at 013-003; Sooby Testimony (Video Depo. — 133:9-19, 144:6-22); Edmiston Testimony (Vol. IV — 839:14-21, 877:18-878:9, 881:3-23); Massaro Testimony (Vol. VIII — 1603:1-19, 1604:1-6)]

72. Newfield agreed to raise its bid to $295 million, to which Plaintiffs agreed. [Massaro Testimony (Vol. VIII — 1600:23-1601:2)] Newfield then requested "exclusivity," meaning that the Harvest Entities and Branta Entities would negotiate exclusively with Newfield for a period of 9 days to reach a definitive purchase and sale agreement. Plaintiffs demanded $15 million in exchange for exclusivity, and Newfield agreed, thereby making the total bid $310 million, comprised of $295 million for the Uinta Basin Assets and $15 million for exclusivity. [Trial Exs. B41, B46, B47, B48, 13 at 13-003; Edmiston Testimony **[**35]** (Vol. IV — 877:14-882:16); Massaro Testimony **[*1183]** (Vol. VIII — 1599:24-1602:17, 1603:16-19, 1604:7-9, 1604:15-1605:3)]

73. No other companies besides Newfield and BBC bid in the auction. [Edmiston Testimony (Vol. IV — 836:23-837:16, 872:18-873:7, 877:5-13); Sooby Testimony (Video Depo. — 114:5-11); Nesselrode Testimony (Vol. IV — 725:21-726:2, 728:2-6, 729:13-20)]

74. Harvest (US) and Branta E&P accepted Newfield's March 11, 2011 bids for a combined $310 million, with an agreement for exclusive negotiations for 9 days. [Trial Ex. B46 at B46_0003 ¶ F; Trial Ex. B45 at B45_0003 ¶ F]

75. On March 21, 2011, Newfield entered into two separate Purchase and Sale Agreements ("PSAs"), one with Harvest (US) and one with Branta E&P. Pursuant to those two agreements, Newfield agreed to pay Harvest (US) and Branta E&P a combined total of $308 million for the Uinta Basin Assets -- $215 million for Harvest's interests and $93 million for Branta E&P's interests. [Trial Ex. B67; Trial Ex. B68; Tresca Testimony (Vol. III — 597:14-598:1); Nesselrode Testimony (Vol. IV — 782:18-785:2)]

76. On March 22, 2011, HNR issued a press release publicly announcing the sale of Harvest's 70% interest in the Uinta Basin Assets **[**36]** to Newfield for $215 million and the expectation that the deal would close in May 2011. [Trial Ex. B69]

77. HNR also attached a copy of the executed PSA, including the PSA's appendix, to its March 25, 2011 Form 8-K filing with the Securities and Exchange Commission. [Edmiston Testimony (Vol. IV — 894:8-895:1)]

78. Pursuant to Section 10.12(a) of the PSAs between Newfield and Harvest (US) and Branta E&P, respectively, the Branta CA and Harvest CA terminated on May 17, 2011. [Trial Ex. B67 at B67_0043; Trial Ex. B68 at B68_0042-43; Howard Testimony (Vol. II — 456:10-14)]

79. Newfield did not offer Ute Energy an option to acquire any of the interests acquired in the Rocky Point EDA. [Howard Testimony (Vol. II — 436:16-437:15); Jaggers Testimony (Vol. I — 153:5-10; 154:14-19)]

VIII. <u>THERE WAS NO AGREEMENT BETWEEN NEWFIELD AND UTE ENERGY THAT UTE ENERGY NOT PARTICIPATE IN THE AUCTION</u>

80. There was no credible evidence presented at trial of an agreement between Newfield and Ute Energy that Ute Energy would not participate in the Auction in return for compensation from Newfield, as alleged by Plaintiffs in their complaint.

81. I also find that there is no credible evidence, as alleged by Plaintiffs, that an agreement **[**37]** was entered into by Daryll Howard and Mr. Jaggers during a telephone call that took place on January 13, 2011 that Ute Energy would not participate in the bidding for the Uinta Basin Assets in return for remuneration from Newfield.

a. It Was Premature For Newfield And Ute Energy To Be Talking About Bidding On January 13, 2011

82. Though Plaintiffs claim that, on January 13, 2011, Newfield and Ute Energy agreed that Ute Energy would not bid on the Uinta Basin Assets, Plaintiffs had not yet announced at that time that they would be auctioning the Uinta Basin Assets. [Jaggers Testimony (Vol. II — 267:14-268:21)]

83. And even if Newfield and Ute Energy had been informed by then of the upcoming auction, it still would have been premature to discuss bidding. Bidding was **[*1184]** the last step in a lengthy, multi-step process to obtain access to and evaluate information regarding the Uinta Basin Assets and then to formulate a bid. As Plaintiffs acknowledged, the process included BAML sending a "teaser" to potentially interested parties, interested parties negotiating and executing a confidentiality agreement, interested parties being invited to and attending the data room to review information regarding **[**38]** the Uinta Basin Assets, and interested parties being send bid procedures and invited to bid on the assets. [Trial Ex. 18; Edmiston Testimony (Vol. IV — 818:9-819:15); Nesselrode Testimony (Vol. IV — 714:4-19); Sooby Testimony (Video Depo. — 21:12-19, 22:8-19, 74:2-75:3); Howard Testimony (Vol. II — 410:8-411:5)]

84. On January 13, 2011, neither Ute Energy nor Newfield had been contacted about the forthcoming auction or sent a teaser.

85. Instead, Ute Energy had just been informed that Harvest was contemplating a sale of its assets and, in Mr. Jaggers' call with Mr. Nesselrode, learned that a data room was not even open yet for interested parties to begin evaluating the assets. [Jaggers Testimony (Vol. I — 169:16-25)]

b. The January 13, 2011 Phone Call

86. The evidence shows Mr. Jaggers called Mr. Howard on January 13, 2011 to inquire whether Newfield might be interested in acquiring the Uinta Basin Assets, which it was. [Jaggers Testimony (Vol. I — 137:3-8, 169:21-22)]

i. Mr. Jaggers' Recollection Of The January 13, 2011 Call

87. Mr. Jaggers and Mr. Howard then discussed Mr. Jaggers' belief that there were AMIs in place such that it would not make sense for Ute Energy to participate because **[**39]** of the AMIs and Ute Energy's lack of technical staff. [Jaggers Testimony (Vol. I — 138:8-13, 139:25-140:10)]

88. Mr. Jaggers testified that Mr. Howard did not ask Ute Energy not to participate during that phone call. [Jaggers Testimony (Vol. I — 140:14-15)] And Ute Energy did not agree with Newfield that Ute Energy would not participate in any other aspect of the process. [Jaggers Testimony (Vol. I — 166:3-5)]

89. Mr. Jaggers testified that he and Mr. Howard did not even discuss bidding. [Jaggers Testimony (Vol. I — 183:3-17); Jaggers Testimony (Vol. II — 261:24-262:10)]

90. Mr. Jaggers further testified that there was no agreement not to bid, outside of the parties' AMIs [Jaggers Testimony (Vol. I — 165:23-166:2, 169:7-15, 174:6-175:2, 183:3-17, 208:25-209:22); Jaggers Testimony (Vol. II — 261:24-262:19)], and no agreement that Ute Energy would receive any compensation in return for not bidding. [Jaggers Testimony (Vol. I — 183:3-17)]

91. Rather, Mr. Jaggers testified that he and Mr. Howard both misunderstood the scope of the Rocky Point AMI, and so discussed on the January 13, 2011 call that the AMIs would apply to the Uinta Basin Asset acquisition such

that Ute Energy would be able **[**40]** to participate in the acquisition if Newfield was successful in acquiring the assets. [Jaggers Testimony (Vol. I — 168:15-169:2)]

92. While Plaintiffs have pointed to testimony from Mr. Jaggers that he and Mr. Howard had discussions "regarding the AMI and agreed not to bid" [Jaggers Testimony (Vol. I — 165:17-22)], and concluded that Newfield would be the bidder [Jaggers Testimony (Vol. I — 223:14-21)], Mr. Jaggers clarified, upon further examination, that there was no agreement beyond the AMIs, and that there was no discussion of bidding specifically on the January 13, 2011 call. Any understanding regarding who would bid was derived from the normal **[*1185]** way an AMI would operate. [Jaggers Testimony (Vol. I — 223:18-19); Jaggers Testimony (Vol. II— 261:24-262:19)] As discussed in detail below, I find credible Mr. Jaggers' testimony that he did not enter into any agreement with Newfield on the January 13, 2011 call, and that any understanding as to the Uinta Basin Asset process arose solely from the parties' understanding of their AMIs.

93. There is no evidence that Mr. Jaggers ever told anyone on his team at Ute Energy or its investors that Ute Energy had an agreement with Newfield that it **[**41]** would not bid or otherwise participate in the auction for the Uinta Basin Assets on the January 13, 2011 call.

ii. Mr. Howard's Recollection Of The January 13, 2011 Call

94. Mr. Howard's testimony confirmed Mr. Jaggers' recollection of the January 13, 2011 phone call.

95. Mr. Howard testified that he learned for the first time on the January 13, 2011 call that the Uinta Basin Assets might be for sale. [Howard Testimony (Vol. II — 409:18-20)] He confirmed that he believed it was too early in the process to be talking about bidding; rather, this was a very quick call right after learning that the Uinta Basin Assets might be sold. [Howard Testimony (Vol. II — 417:8-14)]

96. Like Mr. Jaggers, Mr. Howard testified that there was no discussion about bidding on the assets during the January 13, 2011 telephone call. [Howard Testimony (Vol. II — 316:12-18, 317:9-13, 409:21-23, 410:3-7)]

97. Mr. Howard confirmed that because it was too early in the process to be talking about bidding, they were merely discussing that Harvest would be selling its Utah assets and that there were AMIs between Newfield and Ute Energy that covered the area. [Howard Testimony (Vol. II — 409:21-410:2, 411:6-14)]

98. Mr. **[**42]** Howard thus confirmed that he never asked Mr. Jaggers and Ute Energy not to make a bid on the Uinta Basin Assets [Howard Testimony (Vol. II — 415:13-18, 417:4-7)], and that they reached no agreement that Ute Energy would not bid on the Uinta Basin Assets [Howard Testimony (Vol. II — 316:12-18, 404:7-405:4, 415:4-18, 417:4-7, 417:15-23, 442:3-8)], or that Newfield would provide any compensation to Ute Energy in return for Ute Energy not bidding. [Howard Testimony (Vol. II — 417:15-19)]

99. Mr. Howard never informed his boss, Mr. Packer, that he had reached an agreement with Mr. Jaggers. [Packer Testimony (Vol. VII — 1441:14-20)] Indeed, Mr. Howard understood that he would not have been authorized to enter into any such agreement. [Howard Testimony (Vol. II — 419:8-13)]

100. And there is no evidence that Mr. Howard informed anyone else at Newfield that he and Mr. Jaggers had agreed on the January 13, 2011 telephone call that Ute Energy would not bid or otherwise participate in the auction.

iii. Later Communications Confirm No Agreement Was Reached By Newfield and Ute Energy On January 13, 2011

101. I find that evidence regarding later communications and conduct supports the testimony of **[**43]** Mr. Howard and Mr. Jaggers that there was no agreement reached on January 13, 2011 regarding Ute Energy's participation in the auction.

102. As already described above, there was no evidence presented at trial that either Mr. Howard or Mr. Jaggers informed anyone else about any supposed agreement regarding bidding. [FF # 93, 99-100]

103. Instead, on January 30, 2011, two weeks after the supposed agreement that Ute Energy would not bid and would be **[*1186]** remunerated by receipt of a share of the assets beyond its entitlement under the AMIs, Mr. Howard proposed to Newfield's management just that — that if Newfield were successful in acquiring the Uinta Basin Assets, it would share with Ute Energy even when not required to do so under the AMIs. Mr. Howard's boss, Mr. Packer, responded "first things first. . ." and directed Mr. Howard to focus first on obtaining access to the Harvest data room. [Trial Ex. 80] This confirms both that Mr. Howard had not communicated to Newfield's management that he had reached an agreement with Ute Energy and that Newfield did not perceive that it already had an agreement to share the Uinta Basin Assets with Ute Energy other than pursuant to the terms of the AMIs. **[**44]**

104. Similarly inconsistent with the existence of a bid-rigging agreement is Newfield's continued treatment internally of Ute Energy as a potential competitor in the auction. For example, Mr. Howard and his team consistently communicated internally, including to management, that Ute Energy was a competitor of Newfield's. [Packer Testimony (Vol. VII — 1451:8-23); Trial Ex. 9 at 9-065]

105. Ute Energy similarly did not behave as if it already had agreed that it would not participate in the auction process or bid as of January 13, 2011.

106. For example, Mr. Jagger placed two calls to Mr. Nesselrode in the second half of January 2011, after the supposed agreement was reached. Mr. Nesselrode confirmed that, during those conversations, Mr. Jaggers continued to express Ute Energy's interest in participating in the process. [Nesselrode Testimony (Vol. III — 696:17-697:1, 697:18-25; Vol. IV — 753:20-23, 758:14-759:8)] I find such continued expressions of interest by Ute Energy in participating in the sale process incompatible with Ute Energy having agreed not to participate in the process.

107. Another example is an email from Ute Energy's Todd Kalstrom to Kelly Donohoue of Newfield on January **[**45]** 19, 2011, a mere six days after the call. In that email, Mr. Kalstrom stated that Mr. Howard and Mr. Jaggers "have talked about reviewing the Harvest divestiture package." [Trial Ex. 67] Far from relaying that his boss had informed him that Ute Energy had reached an agreement with Newfield that Ute Energy would not participate in the auction, Mr. Kalstrom relayed only that he had been informed that Mr. Jaggers and Mr. Howard had spoken about the diligence process.

108. And on March 4, 2011, Mr. Jaggers sent an email to Newfield noting that the "7th is almost here" and asking if Newfield "was planning to submit a bid on Monday," an inquiry that is inconsistent with a preexisting agreement that Newfield would bid and not Ute Energy, as Plaintiffs allege. [Trial Ex. 115]

iv. <u>Any Understanding That Came Out Of The</u> January 13, 2011 <u>Call Related To The Application Of The Parties' AMIs</u>

109. I find that, to the extent Newfield and Ute Energy had any understanding between them coming out of the January 13, 2011 call, it was not an agreement regarding bidding or participation in the process. Rather, it was that the AMIs applied and that each would act pursuant to the parties' AMIs, or their understandings **[**46]** thereof. [Packer Testimony (Vol. VII — 1492:8-13); Jaggers Testimony (Vol. I — 175:1-9); Jaggers Testimony (Vol. II — 262:11-19); Howard Testimony (Vol. II — 320:22-321:6, 442:5-8)]

110. Mr. Jaggers testified that he expected that if anyone would make a bid it would be Newfield, and not Ute Energy, and that this expectation was based on the AMIs, not on any discussion regarding **[*1187]** who would bid. [Jaggers Testimony (Vol. II — 262:11-19)]

111. Plaintiffs attempted to discredit the testimony regarding a mutual misunderstanding of the AMIs being the focus of the January 13, 2011 call by arguing that the Rocky Point AMI's language was clear and that Newfield misled Ute Energy regarding its scope in the January 13, 2011 conversation. I find no credible evidence to support Plaintiffs' theory, nor do I find it material when evaluating whether a bid-rigging agreement was made.

112. Rather, Mr. Jaggers testified that he was unaware on January 13, 2011 that the Rocky Point AMI would not cover the assets acquired in the auction. [Jaggers Testimony (Vol. I— 138:11-13, 224:22-225:2)]

113. As detailed above, the Rocky Point AMI had been amended by the December 20, 2010 Letter Agreement [Trial Ex. 29], but **[**47]** Mr. Jaggers testified that he was not "aware that it had been amended until some point between January and May" 2011. [Jaggers Testimony (Vol. I — 224:22-225:1)] Mr. Jaggers testified further that he only discovered the Rocky Point AMI had been amended to exclude assets like the Uinta Basin Assets sometime in February or March 2011, when the Ute Energy employee who had actually executed it informed him of the change. [Jaggers Testimony (Vol. I — 225:7-10)] I find Mr. Jaggers' testimony regarding the timing of his knowledge regarding the scope of the Rocky Point AMI credible.

114. Dr. Schulman, Plaintiffs' expert, testified that he had no reason to disbelieve Mr. Jaggers' testimony that, at the time of the alleged agreement, he believed that the AMIs would give Ute Energy the opportunity to participate. [Schulman Testimony (Vol. VI — 1156:22-1157:4)]

115. Mr. Howard expressed on the call his belief that the AMIs applied, and was unaware of the limitations in the coverage of the Rocky Point AMI, at the time of the January 13, 2011 call. [Howard Testimony (Vol. II — 309:20-25, 312:8-13, 411:10-14, 414:8-10, 430:11-14) Trial Ex. 61; Trial Ex. 76]

116. Mr. Howard continued to believe thereafter **[**48]** that the Rocky Point AMI covered this transaction, as evidenced by a January 15, 2011 email from Mr. Howard stating that Newfield had "an AMI on RP and Bridgeland but not MD [*sic*] EDA." [Trial Exs. 61, 76; Howard Testimony (Vol. II — 430:11-14); Donohoue Testimony (Vol. V — 1064:10-1065:8)]

117. Indeed, though Mr. Howard had signed the Rocky Point AMI on December 20, 2011, he was not aware that it excluded the acquisition of the Uinta Basin Assets until late January, when Ms. Donohoue, Newfield's former land manager for the Rocky Mountain region, discovered Mr. Howard's misunderstanding of the Rocky Point AMI. At that time, as Ms. Donohoue testified, Mr. Howard asked her to help clear up his misunderstanding by preparing a memo summarizing each of the AMIs and Newfield's obligations thereunder. [Donohoue Testimony (Vol. V — 1043:13-15, 1064:10-1065:8); Trial Ex. 76]

118. I find that it is not unreasonable that Mr. Howard was not aware of the limited scope of the sharing obligations under the Rocky Point AMI, despite having executed it, because, as a senior executive, Mr. Howard did not read every detail of every document he signed. [Howard Testimony (Vol. II — 413:8-16)]

119. I find that **[**49]** Mr. Howard's belief at the time of the January 13, 2011 phone call that the Rocky Point AMI would cover the Uinta Basin Asset transaction was genuine. [Howard Testimony (Vol. II — 413:8-16, 414:8-10)]

120. I also do not find that Newfield misled Ute Energy by failing to affirmatively **[*1188]** disclose the plain language of the Rocky Point AMI once Mr. Howard became aware that it would not cover the Uinta Basin Asset acquisition. It is undisputed that the language is clear and unambiguous and so equally accessible and understandable to Ute Energy as to Newfield. Moreover, Mr. Howard had no reason to call Mr. Jaggers to highlight the plain language of the Rocky Point AMI because Newfield remained undecided until May 2011 as to whether it would share acquired assets irrespective of the limitations in the Rocky Point AMI. [Howard Testimony (Vol. II — 435:15-437:5); Packer Testimony (Vol. VII — 1483:16-1484:2)] Furthermore, the Harvest CA precluded such a conversation starting on February 17, 2011. [Trial Ex. 32]

c. The May 20, 2011 Letter From Mr. Jaggers To Mr. Howard

121. Plaintiffs also have pointed to a May 20, 2011 letter, Trial Exhibit 1, as evidence of an agreement between Newfield and Ute **[**50]** Energy regarding bidding in the auction.

122. The May 20, 2011 letter states that Mr. Howard asked Ute Energy "not to be involved because the existing AMIs would cover the division of interest." [Trial Ex. 1] Mr. Jaggers, however, does not recall that Mr. Howard ever made this request. [Jaggers Testimony (Vol. I — 184:8-18)]

123. The May 20, 2011 letter does not state that Newfield and Ute Energy *agreed* that Ute Energy would not bid in the auction. [Trial Ex. C08]

124. A statement that Newfield and Ute Energy "agreed" appeared in an earlier draft of the May 20, 2011 letter, but was removed from the final version of the letter because Mr. Jaggers did not think that statement accurately summarized the situation. [Trial Ex. C08; Jaggers Testimony (Vol. I — 208:25-209:22)]

125. Mr. Jaggers testified that his letter was designed to pressure Newfield to offer Ute Energy a participation option for the Rocky Point assets acquired in the auction, even though Mr. Jaggers recognized that the Rocky Point AMI did not obligate Newfield to offer such an option. [Jaggers Testimony (Vol. I — 209:23-210:2, 211:19-23, 214:14-20)]

126. And Newfield promptly pointed out the inaccuracies in Mr. Jaggers' letter, **[**51]** responding that there were "lots of allegations in this letter that are not accurate." [Trial Ex. C09]

127. I therefore find that the May 20, 2011 letter is not direct evidence that Newfield and Ute Energy had an agreement that Ute Energy would not bid in the auction.

IX. <u>UTE ENERGY DECIDED INDEPENDENTLY NOT TO PARTICIPATE IN THE AUCTION FOR THE UINTA BASIN ASSETS</u>

128. Contrary to Plaintiffs' assertion that Ute Energy's failure to submit a bid in the auction for the Uinta Basin Assets was the product of an illicit agreement, the evidence showed that Ute Energy made a unilateral decision that it would not participate in the auction or submit a bid for the Uinta Basin Assets outside the context of the auction.

129. Mr. Jaggers testified that, as the CEO of Ute Energy, he made a unilateral and independent decision that it was not in Ute Energy's economic interest to participate in the auction because he believed (mistakenly, as he later discovered) that Ute Energy would have the right to purchase a portion of the Uinta Basin Assets from Newfield under the Rocky Point AMI if Newfield was the successful bidder. [Jaggers Testimony (VolI — 138:11-13, 166:6-167:19, 168:15-169:6, 171:15-18, 224:25-225:1)] **[**52]**

[*1189] 130. Ute Energy's decision not to participate in the auction and to allow Newfield, as the larger, better-capitalized AMI partner, to try to acquire the assets conforms to the decision-making one would expect from a party that believed it would have the opportunity to share assets pursuant to the terms of an AMI.

131. Expert witness, Professor Bruce Kramer, testified that it is the custom and practice in the oil and gas industry for parties to an AMI not to bid against each other for assets covered by an AMI because doing so would be economically irrational, something the United States Department of Justice has recognized in its analysis of AMIs. [Kramer Testimony (Vol. VII — 1358:2-1360:21, 1361:2-19, 1376:14-1377:6, 1378:9-14); Jaggers Testimony (Vol. I — 188:2-16); Howard Testimony (Vol. II — 416:14-22, 417:1-3); Tresca Testimony (Vol. III — 618:17-619:5)]

132. Indeed, although the Harvest Entities and Branta Entities were parties to AMIs, neither could identify any circumstance in which they had bid against their AMI partners, and did not know of any situation in which parties to an AMI bid against each other for interests that fell within the area covered by the AMI. [Tresca Testimony **[**53]** (Vol. III — 618:24-619:5); Edmiston Testimony (Vol. IV — 866:23-24, 867:10-868:4)]

133. With his belief that Newfield would be required to share a portion of the Uinta Basin Assets with Ute Energy under the Rocky Point AMI if Newfield were successful in the auction, Mr. Jaggers' independent and unilateral decision that Ute Energy would not participate in the auction was consistent with the standard custom and practice in the industry and aligned with Ute Energy's economic self-interest. [Kramer Testimony (Vol. VII — 1358:2-1360:21, 1361:2-19, 1376:14-1377:6, 1378:9-14); Jaggers Testimony (Vol. I — 166:6-11, 167:2-23, 188:2-16)]

134. Plaintiffs' own expert, Dr. Schulman, confirmed that, if Ute Energy believed it would be able to share assets under an AMI, it is a reasonable economic inference that Ute Energy would make no bid on the assets on its own,

but, rather, would rely on the AMIs to provide Ute Energy's participation in the assets, particularly if Mr. Jaggers believed that the Rocky Point AMI applied, which he did. [Schulman Testimony (Vol. VI — 1157:10-18); Burtis Testimony (Vol. X — 1937:18-1938:2); Kramer Testimony (Vol. VII — 1376:14-25); Jaggers Testimony (Vol. I — 138:11-13, **[**54]** 171:15-18, 224:25-225: 2); Howard Testimony (Vol. II — 411:10-14)]

135. The evidence further confirmed that Ute Energy to decide not to bid since it knew that it was barred from the auction process. [Jaggers Testimony (Vol. I — 196:25-197:3, 198:2-11, 198:17-25); Trial Exs. A44, 81, 93]

136. Moreover, I find credible Mr. Jaggers' testimony that Ute Energy decided not to bid based on its own financial situation and its expectation of what it would take to win the auction.

137. First, the Bid Procedures expressly stated that bids were to be for the entirety of Plaintiffs' Uinta Basin Assets, rather than for a portion. [Trial Ex. B15 at B15_0004, 0008] Therefore, it would have been reasonable for Ute Energy to believe that it would have to bid on the entirety of the Uinta Basin Assets in order to succeed at the auction.

138. Mr. Jaggers expected the price of the Uinta Basin Assets to be around $300 million, but testified that under no circumstance could Ute Energy have bid on an asset with a value in that range, or even in the $200 million range. [Jaggers Testimony (Vol. I — 189:23-190:5, 226:14-23)]

139. Mr. Jaggers testified that Ute Energy had the ability to raise no more than **[*1190]** $100 million **[**55]** for all of the acquisitions that it was contemplating at the time. Thus, Ute Energy could not even have been certain that it could actually bid $100 million in the auction. Moreover, Ute Energy did not have such funds available when the bids were due, it did not know if the Ute Tribe would be able or willing to contribute a sufficient matching amount to even total $100 million with Quantum's hypothetical contribution, and because the $100 million was the maximum amount Ute Energy had available for all acquisitions that Ute Energy was contemplating. [Trial Ex. B92; Jaggers Testimony (Vol. I — 133:22-25, 193:1-194:17, 194:22-196:3); Jaggers Testimony (Vol. XI — 2046:3-20); Trial Ex. B96 at B96_0002]

140. Based on its financial situation, Mr. Jaggers knew Ute Energy could not compete at the $300 million level and testified that, as a result, he made the business decision not to compete at all. [Jaggers Testimony (Vol. I — 166:6-15, 166:22-167:1, 188:20-189:10, 189:23-190:10, 192:16-193:3)]

141. Mr. Jaggers' testimony about the limitations on Ute Energy's financial capacity is not discredited by Plaintiffs' suggestion that its minority owner, Quantum, was sufficiently capitalized to finance **[**56]** the acquisition of the entirety of the Uinta Basin Assets.

142. Rather, I find that the fact that Quantum, the holder of a 49% interest in Ute Energy, may have had the resources to consummate an acquisition in excess of $100 million, was immaterial because the Ute Tribe, which owned 51% of Ute Energy, was unwilling to dilute its 51% majority interest and could not afford more than its 51% of $100 million. [Jaggers Testimony (Vol. I — 193:7-194:2, 226:14-23); Jaggers Testimony (Vol. XI — 2045:19-2047:3)]

143. Because of Mr. Jaggers' belief in the validity of the AMI in the Rocky Point EDA, along with Ute Energy's financial constraints, and its understanding that Plaintiffs intended to sell the Uinta Basin Assets altogether as a single package, Ute Energy gave no consideration to participating in the auction. [Jaggers Testimony (Vol. I — 201:7-21)]

144. There was also no evidence presented that Ute Energy would have attempted to purchase part of the Uinta Basin Assets outside of the auction.

145. Mr. Jaggers testified that he had no idea what Ute Energy would have done had it known it did not have rights under the Rocky Point AMI. It would be speculative. He did not know what he would have **[**57]** offered or if he would have been successful. [Jaggers Testimony (Vol. I — 189:2-13, 201:15-21)] Regardless, Mr. Jaggers would

not have considered making an offer even on a piece of the assets if Harvest had not let Ute Energy into the data room. [Jaggers Testimony (Vol. I — 199:1-11, 201:11-14)]

146. Based on the evidence, I find that Ute Energy made the decision not to bid on the Uinta Basin Assets independently. As a result, I find that it is impossible to find with reasonable certainty that Ute Energy would have bid in the auction but for the alleged agreement.

X. UTE ENERGY'S PARTICIPATION IN THE AUCTION WOULD NOT HAVE CHANGED THE FINAL AUCTION PRICE

147. Even if Ute Energy would have participated in the auction but for the January 13, 2011 telephone call between Mr. Jaggers and Mr. Howard, Plaintiffs failed to present convincing evidence that Ute Energy's participation would have impacted the outcome of the auction in any fashion, let alone resulted in a greater price to Plaintiffs.

[*1191] a. Newfield Bid Its Maximum Amount At The Auction And Would Have Bid No More

148. Plaintiffs argued that Newfield could have and would have paid more for the Uinta Basin Assets. The evidence, however, demonstrated **[**58]** that Newfield was constrained in what it was willing to pay for the Uinta Basin Assets, with $300 million being the approximate maximum outlay it would make.

149. As announced in a publicly-filed Form 8-K, in 2010, Newfield had agreed to pay $405 million for assets in another transaction referred to as the EOG transaction. The EOG transaction fell through in December of 2010. The $405 million approved by the board for the EOG transaction was the maximum amount Newfield's CEO, Lee Boothby, was willing to ask the Newfield board to approve for acquisitions in 2011. Newfield then decided to invest approximately $100 million of that amount in the Anadarko Basin, leaving approximately $300 million for the potential purchase of the Uinta Basin Assets in March of 2011. [Boothby Testimony (Vol. VIII —1687:3-25, 1714:21-1723:22); Trial Ex. 177 at 177-002]

150. Mr. Boothby initially capped Newfield's bid at $300 million. [Boothby Testimony (Vol. VIII — 1685:16-25, 1686:14-1687:25)] Newfield's first offer of approximately $287.5 million was made so that Newfield would have room to "sharpen its pencil" in an anticipated second round of bidding and still be within Newfield's $300 million limit. [Boothby **[**59]** Testimony (Vol. VIII — 1686:1-13); Massaro Testimony (Vol. VIII — 1593:20-1596:12)]

151. After Newfield was told that there were other bids for the whole asset package, and BAML/Harvest asked Newfield to increase its bid "a little," the parties agreed to a price of $295 million. [Boothby Testimony (Vol. VIII — 1690:6-17); Massaro Testimony (Vol. VIII — 1598:7-21, 1600:19-1601:2, 1603:1-19)] However, Newfield was not prepared to go above $300 million, and agreed to pay $310 million only because it gave Newfield an additional right to negotiate exclusively to the final purchase and sale agreements on the presumption that there were other competitively-priced conforming bids. [Boothby Testimony (Vol. VIII — 1690:18-1691:13, 1691:19-1692:17, 1692:18-21); Massaro Testimony (Vol. VIII — 1600:8-1602:17, 1604:7-9, 1604:15-1605:5); Trial Ex. B41]

152. Newfield purchased exclusivity because of the expectation of competition. Not only had it had been told there were competing bids (*i.e.*, that there was competition), but Newfield also wanted to avoid Plaintiffs shopping the Newfield bid before a binding agreement could be negotiated. [Trial Ex. B47; Massaro Testimony (Vol. VIII — 1661:10-17)] In **[**60]** the end, Branta did in fact shop Newfield's bid to Morgan Stanley, though Morgan Stanley declined to compete because the assets were now "too pricey." [Trial Ex. B44]

153. The evidence at trial was unequivocal that Newfield was not willing to increase its bid beyond the $310 million it eventually bid. [Boothby Testimony (Vol. VIII —1687:12-18, 1688:1-4, 1693:4-11)]

154. Not only was the acquisition budget constrained, as detailed above, but also Newfield had to ensure a corporate rate of return of approximately 20%, and so could not increase its bid beyond the point where it could

obtain such a return. [Trial Ex. B26; Boothby Testimony (Vol. VIII — 1676:17-20, 1686:14-1687:2); Massaro Testimony (Vol. VIII — 1568:19-21, 1569:7-15)]

155. The evidence showed not only that Newfield bid its maximum amount with the $295 million plus $15 million for exclusivity, but also showed that Plaintiffs knew that Newfield was unwilling to go any higher. Harvest's CEO, Mr. Edmiston, **[*1192]** asked Newfield's COO, Mr. Packer, to pay an additional $5 million, but Mr. Packer responded that Newfield was unable to obtain authority to pay additional amounts. [Edmiston Testimony (Vol. IV — 881:9-882:16)] This testimony **[**61]** from Mr. Edmiston confirms Newfield's testimony that Newfield was unwilling to pay any more than $295 million for the Uinta Basin Assets, which became $310 million when exclusivity was added.

156. Because Newfield paid its absolute maximum for the Uinta Basin Assets, the presence of Ute Energy in the auction would not have impacted the amount Newfield offered for these assets. This is reflected by the fact that Newfield did not adjust the amount of its bid in response to notice of a partial bid, but rather based on the belief that there were other competing bids for the entirety of the Uinta Basin Assets. [Boothby Testimony (Vol. VIII — 1686:14-1687:18, 1688:5-1690:17); Massaro Testimony (Vol. VIII — 1598:9-1599:7, 1604:1-6, 1636:2-25, 1661:23-1662:2)] Moreover, a bid for $100 million from Ute Energy (its absolute maximum capability) would have been far inferior to the $180 million partial bid submitted by BBC, and thus would have been expected to have no impact on Newfield's maximum bid amount. [Burtis Testimony (Vol. X — 1988:21-1990:2)]

b. Ute Energy's Participation Would Not Have Changed Newfield's Bidding In The Auction

157. Newfield's undisputed willingness to spend no more aside, **[**62]** Plaintiffs argue that Newfield would have bid and paid more for the Uinta Basin Assets had Ute Energy participated in the auction, because the addition of a single competitor in the process would necessarily have led to a higher price for the assets.

i. Newfield Already Considered Ute Energy In Formulating Its Bids

158. Preliminarily, the evidence showed that Newfield already considered the possibility that Ute Energy would be a competitor in formulating its bids. Newfield did not know whether Ute Energy would bid in the auction, however, because of Ute Energy's small size and its majority ownership by the Ute Indian Tribe, Newfield did not believe that Ute Energy would be a meaningful competitor in the auction and did not formulate its bid based on whether Ute Energy would participate. [FF # 54] Nonetheless, Newfield included Ute Energy in its analysis of potential competitors when formulating its bid. [Trial Ex. 9 at 9_065]

ii. The Participation In The Auction Of A Single Additional Competitor Would Not Have Impacted Newfield's Bidding

159. I turn now to the parties' competing theories of the impact of a single additional competitor like Ute Energy on the outcome of the auction.

160. **[**63]** Plaintiffs' expert, Dr. Schulman, testified that the number of bidders participating in an auction is decisive with respect to how competitive the bidding will be and how high the price received. Dr. Schulman opined that, had a single additional bidder (Ute Energy) participated in the auction process, the mere presence of that additional bidder would have caused Newfield to pay a higher price for the Uinta Basin Assets. [Schulman Testimony (Vol. VI — 1124:14-16)] Indeed, Dr. Schulman opined that a bidder like Newfield would have been focused only on how many competitors were participating in the auction. [Schulman Testimony (Vol. VI— 1145:12-22)]

161. In support of his theoretical approach, Dr. Schulman relied upon a single article that he claimed demonstrated that **[*1193]** economic theory supports the conclusion that the addition of a single bidder would have an impact in a sealed bid auction of the sort used by Plaintiffs here. [Schulman Testimony (Vol. VI — 1144:25-1145:11); Burtis Testimony (Vol. X — 1926:9-1933:8)]

162. By contrast, Newfield's expert, Dr. Burtis, testified that economic theory shows that a company participating in an auction will focus on who it believes the second highest **[**64]** bidder would be. [Burtis Testimony (Vol. X — 1922:6-1925:7)] She highlighted that the article relied upon by Dr. Schulman does not conclude that the presence of

a single additional bidder in an auction necessarily results in a higher price achieved in the auction. [Burtis Testimony (Vol. X — 1929:13-1930:10)]

163. I find Dr. Burtis' explanation of the economic theory relevant to bid determination in a sealed-bid auction more persuasive in this case; but, in any event, for Dr. Schulman's thesis to have merit, the bidding party would have to know how many other bidders there were, the underlying assets would have to be valued subjectively, or the other bidders would not have considered profit maximization.

164. It is undisputed, however, that in a sealed bid auction, a participant like Newfield does not know how many other participants or bidders there are. [Schulman Testimony (Vol. VI—1143:9-12)] Thus, there is no reason to believe that Newfield would have known had Ute Energy submitted a bid or that its submission would have impacted Newfield's bid.

165. Under Dr. Burtis' theory — that a rational economic actor would consider only the second highest bidder in formulating its bid —Ute **[**65]** Energy's submission of a bid likewise would have had no impact on Newfield's bid amount because Ute Energy was not expected to be the second highest bidder, El Paso was.

166. And, consistent with Dr. Burtis' testimony regarding the applicable economic theory, Newfield based its bid on El Paso in evaluating its competition, and analyzed in detail the amount it expected El Paso, as the second highest bidder and strongest competitor, to bid. Newfield's analysis and decision review documents show it was concerned with the potential bid to come from El Paso. [Trial Ex. 9 and 9-065; Trial Ex. B25; Trial Ex. 125]

167. Newfield's analyses of competitor valuations focused on a company positioned like El Paso, making decisions about development that Newfield expected El Paso to make. [Trial Exs. B25, 125] There is no evidence that Newfield's bid analysis included any consideration of the number of potential bidders. Its analysis was focused on who it expected to submit competitive bids and at what price levels, just as Dr. Burtis testified a bidder in Newfield's position is expected to do under the economic theory of auctions.

168. The evidence demonstrated that Newfield did not believe its internal **[**66]** valuation of $220 million would be sufficient to overcome a bid from El Paso, thus leading Newfield to raise its initial bid to approximately $287 million in the hopes of being competitive with El Paso in the first stage of the auction. [Howard Testimony (Vol. II — 370:19-25)]

169. And Newfield increased its bids when informed that there were "other bidders" in the auction. [Massaro Testimony (Vol. VIII — 1598:7-1599:7, 1636:12-25, 1639:25-1640:4)] It was not informed of how many other bidders there were, so the number of bidders was irrelevant to determining whether to raise Newfield's bids. [Massaro Testimony (Vol. VIII — 1598:7-1599:7, 1636:12-25, 1639:25-1640:4); Howard Testimony (Vol. II — 328:3-329:4); Nesselrode Testimony (Vol. IV — 786:12-17)]

170. There is no evidence that the participation of an additional bidder — undisclosed to Newfield, and which was not **[*1194]** expected to be the second-highest bidder — would have impacted Newfield's decision-making or caused it to raise its bid further. [Burtis Testimony (Vol. X — 1961:10-1962:13)]

171. Based on the evidence at trial, I find that Ute Energy's participation in the auction would not have caused Newfield to submit a bid in excess **[**67]** of the $310 million winning bid. Plaintiffs' claim to the contrary is based on speculation and contradicted by the evidence.

c. <u>There Is No Evidence That Ute Energy Would Have Submitted A Bid That Would Have Impacted The Final Auction Price</u>

172. Even presuming Newfield could or would have bid more had there been additional competition, there is no credible evidence from which to conclude that Ute Energy would have submitted a bid that would have impacted the final price received by Plaintiffs for the Uinta Basin Assets, whether in the auction or outside.

173. Plaintiffs' expert, Dr. Schulman assumed that absent the alleged agreement with Newfield, Ute Energy would have bid on the Uinta Basin Assets, and, based on those assumptions, testified that such participation would have caused the price received to increase. Dr. Schulman acknowledged that if there was no such agreement, then his opinion is rendered moot. [Schulman Testimony (Vol. VI — 1137:21-1138:2)] He did not perform any of the kinds of economic analysis typically performed by economists to quantify the amount of that increase, but relied on the analysis prepared by Plaintiffs' other expert, Mr. McBeath (discussed below) to establish **[**68]** the range of values and damages. [Schulman Testimony (Vol. VI — 1126:21-1127:10, 1137:18-20)]

174. Dr. Schulman's assumption that Ute Energy would have bid on at least part of the assets ignores the weight of the evidence to the contrary, namely, that Ute Energy decided independently not to participate based on its own financial limitations, its knowledge that it was barred from the auction, and its belief that the AMIs with Newfield would have provided it the ability to participate if Newfield won the assets. [FF# 128-143]

175. Moreover, as Newfield's expert, Quentin Mimms, testified, it is improper to assume that Ute Energy would have bid (and thus could have impacted the outcome) without even addressing the record evidence that negates the validity of the assumption. [Mimms Testimony (Vol. X — 1983:9-1984:8)] Indeed, in the face of contrary evidence, it was not reasonably certain that Ute Energy would have participated in the auction but for the alleged agreement. [Mimms Testimony (Vol. X — 1984:10-22)]

176. Even if it were reasonable to assume that Ute Energy would have attempted in some manner to acquire the Uinta Basin Assets, the evidence contradicts any argument that Ute Energy **[**69]** could have submitted a competitive bid in the auction. As a result, Plaintiffs presented argument to the effect that Ute Energy would have attempted to submit a partial bid outside the auction process, and that such a bid would have led to a greater price for the entirety of the assets.

177. In support of this argument, Dr. Schulman hypothesized that it was possible Ute Energy and other companies could have bid, and the various pieces of the Uinta Basin Assets could have been sold piecemeal for more than was received when sold together. [Schulman Testimony (Vol. VI — 1139:15-19)]

178. Mr. Mimms highlighted that Dr. Schulman's suggested "but for" scenario ignores the evidence that Plaintiffs strove to sell the assets altogether and rejected expressions of interest in partial bidding. [Mimms Testimony (Vol. X — 1984:23-1985:14)] **[*1195]** Again, the failure to consider this evidence rendered Dr. Schulman's testimony unreliable and insufficient to satisfy the standard of reasonable certainty. [Mimms Testimony (Vol. X — 1986:11-19)]

179. The Branta Entities and Harvest Entities were not interested in selling only a portion of the Uinta Basin Assets in the auction, and therefore issued bid instructions **[**70]** requiring that all bids be for 100% of each Plaintiff's portion of the assets. [Trial Ex. B15 at B15_0004, 0008; Nesselrode Testimony (Vol. IV — 727:2-7, 731:10-15, 733:3-7, 735:9-16, 739:16-740:1, 740:9-20, 742:15-24); Sooby Testimony (Video Depo. — 47:19-48:1); Tresca Testimony (Vol. III—644:4-20)] There is no reason to suspect that Plaintiffs would have accepted a $100 million bid over the Newfield or BBC bids, or that a partial bid outside the auction process or within would have changed Plaintiffs' decision to accept the Newfield offer for the whole.

180. Furthermore, even if there were evidence from which I could find it reasonable to extrapolate that Plaintiffs might have been willing and able to sell the Uinta Basin Assets piecemeal, there is no evidence from which I can determine what the outcome of such a piecemeal process would have been.

181. Plaintiffs presented no evidence of what Ute Energy could have or would have bid had it decided to make an offer for part of the Uinta Basin Assets or what part of their assets Ute Energy would have bid for had it submitted a partial bid, and have not shown that Newfield's bid would have been on the remainder, or even if Newfield would **[**71]** have been willing to accept only a portion of the assets being offered. There was no evidence presented as to how the various bidders — Newfield, BBC, and, hypothetically, Ute Energy — might have bid on different pieces of the assets and how the entirety of the assets could have been sold through the auction process or outside it through a negotiated division of the assets amongst the three entities. I therefore find that it would be entirely speculative to find that Plaintiffs would have received more for the Uinta Basin Assets had Ute Energy

submitted a partial bid. This is particularly true since there is no evidence or reason to believe that Newfield would have known if Ute Energy had submitted a bid or anything about the details of such a bid.

XI. PLAINTIFFS DID NOT PROVE ANY NON-SPECULATIVE DAMAGES FROM UTE ENERGY'S ABSENCE FROM THE AUCTION WITH REASONABLE ECONOMIC CERTAINTY

182. Plaintiffs claim that they were damaged in an amount equal to the difference between the price they received from Newfield and the price Newfield would have paid had Ute Energy participated.

183. In support of this claim, Plaintiffs presented the analysis of its expert, Mr. McBeath, who purported to calculate **[**72]** a range of values that a company with the information Newfield possessed would have placed on the Uinta Basin Assets. But Newfield is the only company possessing that information so, in effect, Mr. McBeath was purporting to impute to Newfield a value for the Uinta Basin Assets.

184. Mr. McBeath admits that he did not perform or even attempt to perform a market value analysis of the Uinta Basin Assets. [McBeath Testimony (Vol. VI — 1254:9-1255:8)]

185. Mr. McBeath also did not perform an independent evaluation of the range of values of the Uinta Basin Assets because he did not perform a rigorous engineering evaluation of the production decline profiles, nor did he independently evaluate the producing formations that are included in **[*1196]** his discounted cash flow. [Gonzenbach Testimony (Vol. IX — 1787:23-1789:3)]

186. Instead, Mr. McBeath utilized the data on which he believed Newfield relied — with some modifications — to determine a range of value for the Uinta Basin Assets. [McBeath Testimony (Vol. VI — 1205:7-18, 1205:24-1206:8); Gonzenbach Testimony (Vol. IX — 1789:4-12)]

187. Mr. McBeath's analysis was unreliable and cannot be utilized to prove damages with reasonable certainty, even assuming, **[**73]** as he did, both an illegal bid-rigging agreement and causation.

188. Most importantly, Mr. McBeath presumed in his analysis that the basal carbonate formation was a "probable reserve." [McBeath Testimony (Vol. VI — 1220:21-25)]

189. To be probable reserves, an oil or gas play must be "commercial." [McBeath Testimony (Vol. VI — 1286:17-1287:4); Gonzenbach Testimony (Vol. IX — 1808:13-1809:10)] The Petroleum Reserve Management System ("PRMS"), which is regularly used in the industry to classify reserves (now, even if it was not in 2011, as Mr. McBeath testified), requires actual production or formation tests to prove commerciality. [McBeath Testimony (Vol. VI — 1286:17-22)] A well must have been drilled and competed in the horizon and been commercially produced in order to demonstrate commerciality. [Tresca Testimony (Vol. III — 638:5-10)]

190. The basal carbonate in the Uinta Basin was "virtually untested," and had not yet been proven to be commercial, at the time of the auction. [Howard Testimony (Vol. II — 380:2-21, 381:6-17); Nesselrode Testimony (Vol. IV — 766:17-20); Head Testimony (Vol. VIII — 1730:9-12); Jergensen Testimony (Vol. V — 1040:24-1041:1); Kerchner Testimony (Vol. V — **[**74]** 951:21-952:4); Packer Testimony (Vol. VII — 1415:10-23); Gonzenbach Testimony (Vol. IX — 1797:17-1798:11)]

191. No horizontal wells had yet been drilled into the basal carbonate and the only horizontal wells drilled in the Greater Monument Butte Unit below the central part of the basin had been viewed as uneconomic. [Kerchner Testimony (Vol. V — 951:21-952:4); Howard Testimony (Vol. II — 380:2-21, 381:6-17); Tresca Testimony (Vol. III — 637:10-14, 642:19-23, 643:12-15)]

192. Mr. McBeath's analysis was predicated on the expectation that the basal carbonate would be developed through horizontal drilling. As such, Mr. McBeath should not have categorized the basal carbonate as probable reserves. He claims to have done so, however, based on his belief that Newfield categorized the basal carbonate

as probable reserves and because he believed it was not a huge leap to say economic vertical production would lead to economic horizontal production. [McBeath Testimony (Vol. VI — 1234:23-1235:5)]

193. As an independent evaluator of the value of these assets, Mr. McBeath should have categorized the basal carbonate as a "contingent resource" [McBeath Testimony (Vol. VI — 1289:18-22); Gonzenbach testimony **[**75]** (Vol. IX — 1795:20-25)], based on the undisputed fact that the commerciality of the basal carbonate had not yet been proved.

194. By treating the basal carbonate as probable reserves instead of as a contingent resource, Mr. McBeath placed significant and excessive value on the basal carbonate. [Gonzenbach Testimony (Vol. IX — 1801:16-1802:11, 1804:17-1805:14, 1806:17-1807:4)] Mr. McBeath agreed that he would not usually assign any value to contingent resources when evaluating a play because of the risk factors that are associated with modeling the value of such resources. [McBeath Testimony (Vol. VI — 1289:11-17)] Moreover, he agreed that if the basal carbonate had not yet been **[*1197]** proved to be commercial, he should have assigned no value to it. [McBeath Testimony (Vol. VI — 1289:18-22)] Newfield's expert, Mr. Gonzenbach, confirmed that contingent resources are so risky that one would not typically assign any value to them. [Gonzenbach Testimony (Vol. IX — 1809:23-1810:15, 1812:12-16)]

195. The evidence is undisputed that the basal carbonate had not yet been proved commercial at the time of the auction. Mr. McBeath therefore should have given no value to the basal carbonate in his analysis; **[**76]** instead, he valued the basal carbonate at $96 million to $326 million. [McBeath Testimony (Vol. VI — 1282:18-1283:16)]

196. By contrast, Newfield in fact placed a $50 million value on the basal carbonate. [Kerchner Testimony (Vol. V — 936:9-23)] This reflected the speculative nature of the basal carbonate portion of the assets. [Kerchner Testimony (Vol. V — 936:5-23); Jergensen Testimony (Vol. V — 1032:5-20)] Mr. McBeath's analysis of what value he thinks Newfield (the only party possessing the information Mr. McBeath considered) might have placed on the assets is far less reliable than the value Newfield <u>actually</u> placed on the assets.

197. Mr. McBeath also failed to consider the costs associated with failed wells. Instead, he accounted only for the costs of successful wells, even though it is improper to presume that all wells drilled within a resource play will be successfully drilled and produced. [Kerchner Testimony (Vol. V — 954:2-14); McBeath Testimony (Vol. VI — 1272:24-1273:7)]

198. The Uinta Basin Assets were considered, by all parties, including Plaintiffs, a "resource play." [Trial Ex. 5 at 005-003; Trial Ex. 7 at 007-001; Trial Ex. 8 at 008-001]

199. Even though it is improper **[**77]** to assume that all wells drilled within a resource play will be successfully drilled and produced [Kerchner Testimony (Vol. V — 954:2-14); McBeath Testimony (Vol. VI — 1272:24-1273:7); Gonzenbach Testimony (Vol. IX — 1817:17-1818:7, 1870:14-1871:1)], Mr. McBeath accounted only for the costs of successful wells, ignoring the costs for wells that are expected to be unsuccessful.

200. Expert testimony established that when evaluating a resource play (irrespective of whether the particular formations are characterized as a contingent resource or as a reserve), one has to account for the costs of all the wells expected to be drilled, not just the successful ones, because one has to bear the cost of the unsuccessful drilling efforts as well. [Kerchner Testimony (Vol. V — 954:2-14); Gonzenbach Testimony (Vol. IX —1808:2-3, 1817:14-1818:7)]

201. The costs associated with the unsuccessful wells that Mr. McBeath did not consider were over $700 million. [McBeath Testimony (Vol. VI — 1276:14-1277:24); Gonzenbach Testimony (Vol. IX — 1813:17-1814:3, 1817:8-16, 1820:8-1821:5, 1822:1-11)]

202. By failing to account for these significant costs, Mr. McBeath vastly overstated the value of the Uinta Basin **[**78]** Assets. [Gonzenbach Testimony (Vol. IX — 1872:19-21, 1874:5-16); Trial Ex. C50 at C50_0036)]

203. Mr. McBeath's use of a risk adjustment factor did not negate the need to account for the costs of the failed wells. [Gonzenbach Testimony (Vol. IX — 1822:13-1823:2)]

204. Mr. McBeath also purported to rely on what he called "valuations" from Newfield's internal records to show that Newfield valued the Uinta Basin Assets higher than its bids. [McBeath Testimony (Vol. VI — 1210:13-24, 1220:21-25, 1295:20-1296:7)]

[*1198] 205. The "internal valuations" to which Mr. McBeath pointed (in particular, Trial Exhibit 118), however, were merely economic runs testing the impact of numerous variables and assumptions, not valuations, and should not have been viewed as valuations by Mr. McBeath, and were merely some of the runs performed by Ms. Kerchner, not all. [Kerchner Testimony (Vol. V— 926:7-17, 946:9-947:11, 946:20-25, 948:15-949:6); Howard Testimony (Vol. II — 373:12-17)] Ms. Kerchner testified unequivocally that it would be a "distortion of the work" she and her team were doing to take any of the individual runs reflected in the documents highlighted at trial by Plaintiffs and "say that's what Newfield's **[**79]** view of the value of these assets was." [Kerchner Testimony (Vol. V — 948:24-949:6)]

206. Furthermore, the "playing fields" to which Plaintiffs gave much weight did not evidence a higher internal valuation from Newfield than the bids actually made. Rather, they focused on what valuations would look like under assumptions determined to be unrealistic, and on how Newfield believed its primary competitor (El Paso) would value the assets. [Howard Testimony (Vol. II — 368:11-15, 369:2-370:10)] Plaintiffs assume this was a bid range for Newfield, but Newfield's witnesses confirmed that it was in fact an estimate of the expected competitor valuation. [Jergensen Testimony (Vol. V — 1005:11-24, 1027:2-11, 1028:16-24, 1029:24-1030:10); Kerchner Testimony (Vol. V — 956:18-957:15)]

207. And the portfolio analysis that Plaintiffs claim shows Newfield valued the Uinta Basin Assets higher than their bids also were not bid recommendations or valuations, but just an unbiased look at how the company should choose investment opportunities from amongst many options. [Packer Testimony (Vol. VII — 1463:13-15); Howard Testimony (Vol. II — 346:15-25, 359:24-360:2, 361:4-10)]

208. Rather, the uncontested evidence **[**80]** is that Newfield's Rocky Mountain Business Unit valued the Uinta Basin Assets at $220 million and recommended a bid at that level. [Howard Testimony (Vol. II — 374:4-13); Kerchner Testimony (Vol. V — 985:13-17)]

209. Based on the expectation of robust competition and reflecting its desire to win in the auction, Newfield ultimately bid approximately $310 million—$90 million above its internal valuation. [FF# 51-56, 151-152, 156] Newfield's personnel believed the $310 million bid was very aggressive. [Kerchner Testimony (Vol. V — 961:12-15)]

XII. <u>THE HARVEST ENTITIES AND BRANTA ENTITIES COULD HAVE REJECTED NEWFIELD'S BID BUT CHOSE NOT TO DO SO, AND THE FINAL AUCTION PRICE WAS WELL ABOVE THE MINIMUM EXPECTED PRICE AND WAY ABOVE PRIOR VALUATIONS OF THE UINTA BASIN ASSETS</u>

210. Whatever complaints Plaintiffs may have now about the $308 million they received from Newfield for the Uinta Basin Assets, Plaintiffs received a price that appears to have been the result of a competitive process and which was within the range expected by Plaintiffs, and which Plaintiffs agreed at the time was a great result for their companies.

211. As stated in Plaintiffs' bid procedures, the Harvest Entities and Branta **[**81]** Entities reserved the right not to sell the Uinta Basin Assets to any bidder. [Trial Ex. B15 at B15_0005, 0009] Thus, either the Harvest Entities or the Branta Entities could have decided not to sell their interests had they thought they could get **[*1199]** more for the Uinta Basin Assets than what Newfield had bid, whether from Newfield, some other party, or some combination of parties. [Tresca Testimony (Vol. III — 576:19-21, 678:13-20); Nesselrode Testimony (Vol. IV — 737:17-19, 790:12-15); Edmiston Testimony (Vol. IV — 825:24-827:10)]

212. Newfield's bid was within the range that the Branta Entities and Harvest Entities expected to receive, and well above the minimum that was expected. Prior to the auction, Mr. Edmiston told Mr. Tresca that he expected the Uinta Basin Assets would sell for between $200 to $400 million and Mr. Tresca wrote in an email that the floor was

$200 million. [Trial Ex. A43 at A43_0003; Trial Ex. A49 at A49_0002; Tresca Testimony (Vol. III — 658:19-659:12, 659:18-660:8)]

213. Newfield's bid for the Branta E&P assets was also significantly higher than the amounts offered to Branta E&P when it was exploring the sale of its assets in 2010. In 2010, BBC offered Branta E&P **[**82]** $12.7 million for its share of the Uinta Basin Assets. [Tresca Testimony (Vol. III — 607:5-15, 608:3-7)]

214. In addition, on July 1, 2010, Branta E&P sold a 10% interest in the Uinta Basin Assets to Harvest (US) for $20 million (which would equate to a value of approximately $200 million for 100% of the Uinta Basin Assets, of which approximately $60 million would be attributed to Branta E&P's remaining 30% share). [Trial Ex. A14; Edmiston Testimony (Vol. IV— 808:25-810:18); Tresca Testimony (Vol. III — 563:25-564:8, 566:10-17, 567:8-13)]

215. On September 29, 2010, Newfield offered to purchase Branta E&P's share of the Uinta Basin Assets for $77 million (which would impute a value of $210 million to the entirety of Plaintiffs' interest in the Uinta Basin Assets). [Trial Ex. 47]

216. No bid, other than those from Newfield and BBC, was received in the auction for all of the Uinta Basin Assets, despite the fact that BAML contacted 47 companies in its calling program. [Trial Ex. 18]

217. BAML, Plaintiffs' investment bank, was not surprised that Newfield was the only bidder for the entire package of Uinta Basin Assets offered by Plaintiffs, nor did BAML consider Newfield's bid too low. [Sooby **[**83]** Testimony (Video Depo. — 105:21-106:15)]

218. Mr. Edmiston, in an email to his employees, described the sale to Newfield as "an outstanding transaction for the company." [Trial Ex. B76]

219. Mr. Edmiston also wrote an email to Mr. Packer stating that: "It's not often that an asset transaction is recognized as a clear win-win for both parties. In this case, I think the market response speaks for itself in that regard." [Edmiston Testimony (Vol. IV — 887:2-12); Trial Ex. B79]

220. Harvest expressed its satisfaction with the result by awarding Mr. Edmiston and Mr. Nesselrode significant cash bonuses, $200,000 to Mr. Edmiston and $100,000 to Mr. Nesselrode. [Head Testimony (Vol. VIII — 1733:20-1734:5)]

XIII. NEWFIELD DID NOT BREACH THE CONFIDENTIALITY AGREEMENTS

221. In addition to its claim that Newfield entered into a bid-rigging agreement with Ute Energy, Plaintiffs claim that Newfield breached the Branta CA and the Harvest CA through communications it had with Ute Energy.

222. Branta does not claim any breach by Newfield of the Branta CA based on the disclosure of proprietary or confidential information. [Tresca Testimony (Vol. III — 621:13-17)]

223. Instead, Branta claims that Newfield breached **[**84]** the Branta CA by virtue of its communications with Ute Energy regarding **[*1200]** the auction, which Branta argues breached the CA's non-circumvention provision. [Tresca Testimony (Vol. III — 560:12-21, 563:6-16, 621:18-22, 685:3-6)] Branta argues that it had a prospective business relationship with Ute Energy, thus triggering the non-circumvention provision.

224. The Branta CA's non-circumvention provision, however, was never intended to bar a party from talking to its own partners. [Trial Ex. 27 at 027-002 ¶ 4] Even Branta admits that Newfield was not barred from talking to its own partners in the ordinary course of business. [Tresca Testimony (Vol. III — 590:13-19, 624:23-626:3)] And Mr. Howard testified that Newfield would never have expected the non-circumvention provision to "basically shut down any business communications that [Newfield] would have had prior to this agreement," as Branta suggests the Branta CA required. [Howard Testimony (Vol. II — 396:4-20)]

225. Moreover, Ute Energy did not have an existing or prospective business relationship with either of the Branta Entities between January 7, 2011 and the close of the transaction on May 17, 2011. Ute Energy was barred by Mr. Edmiston **[**85]** from participating in the auction process by no later than January 7, 2011, and that bar was reiterated to Mr. Nesselrode after Mr. Nesselrode spoke with Mr. Jaggers on January 13, 2011. [FF # 33-34, 38] Ute Energy had no further contact with the Harvest Entities, the Branta Entities, or BAML after the January 2011 calls between Mr. Jaggers and Mr. Nesselrode. [FF # 47] Moreover, the Branta Entities were precluded from communicating the Ute Energy under the Branta CA based on Newfield's preexisting business relationship with Ute Energy. [FF # 4-5, 12-14, 21-24]

226. Branta's sole basis for claiming that it had a prospective business relationship with Ute Energy at any relevant time is that Branta hoped Ute Energy would bid, be the high bidder, and then buy all of the assets. [Tresca Testimony (Vol. III — 680:13-17)]

227. The evidence shows that Newfield was mindful of its obligations under the Branta CA, with senior executives directing their teams to "make sure we take care to honor the CA" and to "make sure all the I's are dotted and T's are crossed." [Trial Exs. 56, 59]

228. None of the documents highlighted at trial evidenced Newfield providing any confidential information or information **[**86]** regarding the status of the auction to Ute Energy between the time Newfield gained access to the auction by executing the Harvest CA on February 17, 2011 and the transaction's closing on May 17, 2011. [Trial Exs. 95, 106, 115, 130, 132, 153, 159-161, 164]

229. And both Mr. Howard and Mr. Jaggers confirmed that no confidential information or information regarding the status of the auction was disclosed by Newfield to Ute Energy. [Howard Testimony (Vol. II — 450:16-451:22, 456:5-457:8, 464:12-470:8, 470:22-471:4); Jaggers Testimony (Vol. I — 215:2-217:14, 218:15-23)]

230. Plaintiffs presented no evidence that Newfield initiated contact with Ute Energy concerning the auction at any time between when Newfield gained access to the process (*i.e.*, the date Newfield executed the Harvest CA) and the transaction's closing on May 17, 2011. [Jaggers Testimony (Vol. I — 215:2-14); Howard Testimony (Vol. II — 470:1-8, 470:22-471:1)]

231. Moreover, there was no evidence that Newfield disclosed to Ute Energy any confidential, non-public information regarding the transaction or Plaintiffs' assets between the time Newfield gained access to the auction and the transaction's closing. **[*1201]** [Howard Testimony (Vol. **[**87]** II — 450:16-451:22, 456:5-457:8, 464:12-470:8, 470:22-471:4); Jaggers Testimony (Vol. I — 215:2-217:14, 217:18-218:4, 218:15-23); Jaggers Testimony (Vol. II — 254:11-13); Trial Ex. 95, 106, 115, 130, 132, 153, 159, 160, 161, 164]

232. Plaintiffs pointed to a slide prepared by Ute Energy and supposedly approved by Newfield in late March 2011 after Harvest had made its public disclosure of the sale as evidence that Newfield disclosed information. The slide itself, however, makes clear the source of its information was Harvest's public disclosures. [Trial Ex. 153 at 153-002; Trial Ex. 154; Howard Testimony (Vol. II — 443:17-444:8)] But no new parties could have entered the process after the date on which Plaintiffs agreed to negotiate exclusively with Newfield, March 11, 2011. [Edmiston Testimony (Vol. IV — 895:16-896:2)] Regardless, the question of how to share an asset under an existing AMI should the asset be acquired is not divulging information learned in the data room or from Harvest or Branta, nor is it divulging the status of the transaction. It is simply a discussion regarding the existing business relationship between the parties.

CONCLUSIONS OF LAW

Based on the foregoing factual **[**88]** findings, the Court hereby enters the following conclusions of law and judgment in favor of Newfield and against Plaintiffs on each of the claims for relief:

I. NO BREACH OF THE CONFIDENTIALITY AGREEMENTS

1. Both the Branta CA and the Harvest CA are governed by Texas law. [Trial Ex. 27 at 027-004; Trial Ex. 32 at 032-005; Trial Ex. 98]

2. *HN1*[] The four elements of a breach of contract claim are: (1) the existence of a valid contract; (2) performance by the plaintiff; (3) breach of the contract by the defendant; and (4) damages to the plaintiff resulting from the breach. *Velvet Snout, LLC v. Sharp, 441 S.W. 3d 448, 451 (Tex. App. 2014)*. Plaintiffs bear the burden of proving a breach by a preponderance of the evidence. *Castillo v. Case Farms of Ohio, Inc., 96 F. Supp. 2d 578, 642 (W.D. Tex. 1999)*.

HN2[] 3. "[W]hen one party to a contract commits a material breach of that contract, the other party is discharged or excused from any obligation to perform." *X Techs., Inc. v. Marvin Test Sys., Inc., 719 F.3d 406, 413 (5th Cir. 2013)* (quoting *Hernandez v. Gulf Grp. Lloyds, 875 S.W.2d 691, 692 (Tex. 1994))*.

4. Reciprocal promises are presumed to be mutually dependent and the breach by one party excuses the performance of the other. *DEW, Inc. v. Depco Forms, Inc., 827 S.W.2d 379, 382 (Tex. App. 1992)* (collecting cases).

a. The Branta CA

5. Branta does not allege that Newfield breached the Branta CA by virtue of disclosure of confidential or proprietary information. [FF# 222] Branta's claim relates exclusively to an alleged breach of paragraph 4 of the **[**89]** Branta CA — the Non-Circumvention provision. [FF # 223]

6. The Non-Circumvention provision in the Branta CA barred either party to the agreement from having contact with "any of the other party's or its subsidiary's of affiliate's lenders, equity owners, **[*1202]** co-working interest owners, joint exploration and development partners or other persons having existing or prospective business relations with the other party or its subsidiaries." [Joint Facts # 24]

7. This language is, unequivocally, mutual, and precluded Plaintiffs from having unapproved contact with Newfield's "affiliate's lenders, equity owners, co-working interest owners, joint exploration and development partners or other persons having existing or prospective business relations with the other party or its subsidiaries." [FF #21; Joint Facts # 24]

8. Ute Energy was Newfield's co-working interest owner and joint exploration and development partner. [FF # 4-5, 12-14]

9. Because Ute Energy was Newfield's co-working interest owner, the Branta Entities were precluded from having affirmative contact with Ute Energy without the prior written consent of Newfield. [FF # 22-24]

10. The Branta Entities, through their various representatives, **[**90]** contacted Ute Energy to market the Branta Entities' assets on September 30, 2010, and met with Ute Energy on October 4, 2010 to explore opportunities to work together in breach of the Non-Circumvention provision. [FF # 25-27]

11. The Branta Entities did not first seek or obtain Newfield's written consent to the communications with Newfield's partner, as required by Paragraph 4 of the Branta CA. [FF# 28]

12. I find that the Branta Entities' unapproved contacts with Ute Energy constituted a prior material breach of the Branta CA, predating and excusing any later communications between Newfield and Ute Energy.

13. Even had these unapproved contacts not constituted a prior material breach, there is no basis for finding that Newfield breached the Branta CA.

14. Plaintiffs argued that Newfield breached the Branta CA's Non-Circumvention provision by having contact with Ute Energy's Mr. Jaggers concerning the acquisition of Branta E&P's share of the Uinta Basin Assets during the term of the Branta CA.

15. The Branta CA did not prohibit Newfield from having contact with Ute Energy. The Non-Circumvention provision only prohibited Newfield from contacting "persons having existing or prospective business **[**91]** relations with [Branta, LLC] or its subsidiaries." [Joint Facts # 24] It was never intended to bar either Branta or Newfield from communicating with its own partner. [FF #21] The language of Paragraph 4 itself only bars communications with the other party's partners or those with prospective business relationships, not one's own partners. [Trial Ex. 27 at 027-002 ¶ 4]

16. Under Texas law, Branta had no prospective business relationship with Ute if it did not appear reasonably certain that a "prospective contract would have been made were it not for the [alleged] interference." *Suprise v. Dekock, 84 S.W.3d 378, 382 (Tex. App. Ct. 2002)*.

17. The Branta Entities did not have an existing or prospective business relationship with Ute Energy at the time the Branta CA was entered into. [FF # 23]

18. The Branta Entities also did not have an existing or prospective business relationship with Ute Energy between January 7, 2011 and the termination of the Branta CA because during this time Ute Energy was barred from participating in the auction process, and that bar was never lifted. [FF # 33-38, 41] Moreover, the mere hope that Ute Energy would participate in the auction is insufficient to create a prospective business relationship between Ute Energy and **[**92]** Branta. *Klein v. Grynberg, 44 F.3d 1497, 1506 (10th Cir. 1995)* (**HN3**[] mere hope for a contract is insufficient to establish a "reasonable likelihood or reasonable probability that a contract could have resulted" to support the existence of a prospective business relationship). Accordingly, I find that the Non-Circumvention provision in the CA did not **[*1203]** preclude Newfield's contacts with Ute Energy.

19. Finally, I find that Newfield engaged in no affirmative contacts with Ute Energy regarding the information obtained from the Branta Entities pursuant to the Branta CA or the acquisition of Branta E&P's share of the Uinta Basin Assets contemplated by the Branta CA, and therefore had no communications with Ute Energy that would have been barred by the Branta CA had Ute Energy been a party with whom such communications were prohibited.

b. The Harvest CA

20. The Harvest CA precluded Newfield from disclosing to Ute Energy any confidential Evaluation Materials or from discussing or disclosing the fact that discussions or negotiations were taking place concerning Harvest (US)'s assets in the Uinta Basin. [Joint Facts # 34]

21. Harvest has suggested that the harm it suffered from the alleged breach is that Ute Energy agreed not to — and did not — bid in the **[**93]** auction, causing Harvest to receive a lower price for the Uinta Basin Assets than it otherwise would have. The communication that could give rise to these damages, if such an agreement had been reached, is the January 13, 2011 telephone call between representatives of Newfield and Harvest. No harm arising out of that call could give rise to a claim for breach of the Harvest CA, however, since the Harvest CA was not executed until February 17, 2011. [Trial Ex. 32]

22. More generally, I find that no communications pre-dating the execution of the Harvest CA could be considered to breach the Harvest CA.

23. Plaintiffs also suggest that Newfield breached the Harvest CA by engaging in discussions with Ute Energy regarding the auction.

24. Plaintiffs presented no evidence that Newfield made any affirmative contact with Ute Energy regarding the auction, or that Newfield disclosed any confidential Evaluation Materials, between the time Newfield gained access to the auction on February 17, 2011 and the transaction closing on May 17, 2011. Indeed, the communications as

to which evidence was presented constituted exclusively communications from Ute Energy to Newfield, to which there is no evidence **[**94]** that Newfield substantively responded. [FF # 227-232]

25. Newfield did not provide information subject to the Harvest CA to Ute Energy prior to the termination of the CA. [FF # 227-232]

26. The March 25, 2011 email with a PowerPoint presentation that Ute Energy's Joseph Jaggers sent to Newfield's Darryl Howard, and which Mr. Howard supposedly approved, contained only publicly-available information that had already been disclosed by the Harvest Entities. [FF # 232]

27. Mr. Jaggers testified that Newfield never provided Ute Energy with any information in response to his requests. [FF # 229] Mr. Howard's general response of "looks good" to the slide sent by Mr. Jaggers on March 25, 2011 [Trial Ex. 154] did not confirm any part of the transaction that HNR had not already publicly disclosed. [FF # 230-232] I find that Mr. Howard did not disclose any information regarding the auction by indicating his approval of that slide, and thus that this communication did not violate the Harvest CA.

28. Mr. Howard likewise testified that he never shared any information about the Uinta Basin Assets auction with Ute Energy prior to the termination of the CA. [FF # 229]

[*1204] 29. In the absence of any evidence that **[**95]** Newfield affirmatively disclosed any information regarding the fact of negotiations or the status of the auction, I find that Newfield did not breach the Harvest CA.

c. <u>There Are No Damages Associated With The Alleged Breach Of Confidentiality Agreements</u>

30. Even if Newfield had violated the terms of either the Branta CA or the Harvest CA, Plaintiffs have presented no evidence of any damages arising from such breaches.

31. Harvest claims damages from breach of the Harvest CA as a result of Ute Energy's failure to participate in the auction. This outcome, if it arose from any communication whatsoever between Newfield and Ute Energy, could only have resulted from the alleged agreement reached on the January 13, 2011 call, which predated the Harvest CA by more than one month, not from any of the later correspondence cited by Plaintiffs at trial. As such, Harvest can state no claim for damages since the alleged harm occurred before the contract was even executed.

32. Branta, too, claims the damages-causing breach of the Branta CA was the January 13, 2011 call between Mr. Jaggers and Mr. Howard.

33. Plaintiffs presented no evidence that any later communication between Newfield and Ute Energy **[**96]** caused Ute Energy not to submit a bid in the action, or otherwise caused Plaintiffs any harm.

34. Moreover, Plaintiffs could not have suffered any damages after March 11, 2011, when they agreed to negotiate PSAs exclusively with Newfield as no other bidders could have participated as of that date. [Edmiston Testimony (Vol. IV — 895:16-896:2)]

35. Furthermore, Plaintiffs presented no expert testimony regarding the causation of damages or the quantum of damages arising from the alleged breaches of the Harvest CA and Branta CA.

36. Instead, Plaintiffs rely exclusively on the damages analysis presented in support of their antitrust claims, where Dr. Schulman simply presumed causation and relied on Mr. McBeath's "valuation" range. For the same reasons that the antitrust causation and damages analysis was deficient, as described in detail below, the damages calculation here cannot support an award in favor of Plaintiffs even if a breach of either confidentiality agreement had been proven.

37. Moreover, it is self-evident that there is no logical connection between any of the later communications relied upon by Plaintiffs in support of their claims and the claimed result of Ute Energy deciding **[**97]** not to participate in the auction. Those communications largely were unanswered emails from Ute Energy to Newfield. [Trial Exs. 115,

130, 132, 135] I find no reason to conclude that any later communication caused Ute Energy not to bid or caused Plaintiffs any damages.

38. Having failed to provide proof of all of the essential elements of a breach of contract claim, Plaintiffs are entitled to no relief with respect to the allege breach of the Branta CA or Harvest CA.

II. BID-RIGGING CLAIMS UNDER THE SHERMAN ANTITRUST ACT AND COLORADO ANTITRUST ACT

39. Plaintiffs allege that Newfield and Ute Energy had an agreement that Ute Energy would refrain from participating in the auction for the Uinta Basin Assets, and that such agreement was an illegal contract to rig the bidding process.

40. ***HN4***[] *Section 1 of the Sherman Act* prohibits "every contract, combination in the form of a trust or otherwise, or conspiracy **[*1205]** in restraint of trade or commerce." *15 U.S.C. § 1*.

41. Plaintiffs also claim that Newfield violated the Colorado Antitrust Act, which provides that "it is illegal for any person to contract, combine, or conspire with any person to rig any bid, or any aspect of the bidding process, in any way related to the provision **[**98]** of any commodity or service." *Colo. Rev. Stat. § 6-4-106(1)*.

42. Courts look to federal antitrust cases to guide interpretation of the Colorado Antitrust Act. *See* *C.R.S. § 6-4-119* ("[i]t is the intent of the general assembly that, in construing this article, the courts shall use as a guide interpretations given the federal courts to comparable federal antitrust laws."). Claims of bid-rigging under the Colorado Antitrust Act typically rely on federal courts' definitions of "bid-rigging." *See* *Amos v. Aspen Alps 123, LLC, 280 P.3d 1256, 1262, 2012 CO 46 (Colo. 2012)*. Therefore, I will analyze the two claims together.

43. ***HN5***[] Despite the *Sherman Act's* broad language, almost from its inception the Act has been read to prohibit only those restraints of trade that are unreasonable. *Board of Trade v. United States, 246 U.S. 231, 238, 38 S.Ct. 242, 244, 62 L.Ed. 683 (1918)*. Courts analyze claims of unreasonable restraints on trade under the rule of reason doctrine. In addition to this rule of reason, the courts have also developed a doctrine of per se violations to cover those business relationships that "because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." *Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S.Ct. 514, 518, 2 L.Ed.2d 545 (1958)*.

44. ***HN6***[] "*Section 1 of the Sherman Antitrust Act* prohibits **[**99]** contracts and conspiracies that restrain trade. Certain violations have been identified as per se illegal, requiring no additional proof of an unreasonable restraint of trade. Other *§ 1* violations require proof that a defendant's actions resulted in an unreasonable restraint of trade." *Smalley & Co. v. Emerson & Cuming, Inc., 13 F.3d 366, 367 (10th Cir. 1993)* (citation omitted).

45. If proven, bid rigging is one such per se violation. *United States v. Mobile Materials, Inc., 881 F.2d 866, 869 (10th Cir.1989)*, *cert. denied*, *493 U.S. 1043, 110 S. Ct. 837, 107 L. Ed. 2d 833 (1990)*. "Any agreement between competitors pursuant to which contract offers are to be submitted [to] or withheld from a third party constitutes bid rigging per se violative of *15 U.S.C. section 1*." *Id.* (quoting *United States v. Portsmouth Paving Corp., 694 F.2d 312, 325 (4th Cir.1982))*; *see* *Tal v. Hogan, 453 F.3d 1244, 1261 (10th Cir. 2006)*.

46. In this case, the disputed issue is whether Newfield and Ute Energy made an agreement that Ute Energy would refrain from participating in the auction for the Uinta Basis Assets during the January 13, 2011 phone call between Mr. Jaggers and Mr. Howard. It is important to note that Plaintiffs do not challenge the effective AMIs in place between Ute Energy and Newfield. Thus, I analyze Plaintiffs' claims to determine whether the alleged conduct was per se violative of ***antitrust law***.

47. ***HN7***[] A conspiracy to rig bids in violation of *15 U.S.C. § 1* is essentially an agreement among actual or potential competitors which restrains competition in **[**100]** or effecting interstate trade or commerce. *United States*

v. Beachner Constr. Co., 555 F. Supp. 1273, 1276 (D. Kan. 1983), *aff'd*, 729 F.2d 1278 (10th Cir. 1984). Conspiracy may be proved through direct or circumstantial evidence. "Indeed, often if not generally, **[*1206]** direct proof of a criminal conspiracy is not available and it will be disclosed only by a development and collocation of circumstances." *Id.*

48. The Third Circuit provides that **HN8**[] "where the disputed issue is the existence or scope of the alleged horizontal agreement that is to be inferred from circumstantial evidence, the first inquiry must be whether or not each firm alleged to have been a party to it was an actual or potential competitor in that market." United States v. Sargent Elec. Co., 785 F.2d 1123, 1127 (3d Cir. 1986).

49. The Tenth Circuit provides that "the determination of a per se antitrust violation depends on whether there was an agreement to subvert the competition, not on whether each party to the scam could perform." United States v. Reicher, 983 F.2d 168, 172 (10th Cir. 1992).

50. The evidence at trial showed that Ute Energy operated in the Uintah Basin, and it was interested in acquiring assets in the Uintah Basin in early 2011. [Joint Facts #17, 18]. Additionally, Newfield's decision review document listed Ute Energy among a list of potential bidders that was "also active in the basin," despite being a list of competitors from which Newfield **[**101]** "expected lower level activity." [FF # 52]. At trial, Mr. Jaggers testified that even though Ute Energy could not compete for the entirety of the assets, he might have approached Harvest (US) outside the auction process regarding a partial bid; even though there was no evidence of what portion Ute Energy would have bid on, or the price it would have paid. [FF #62].

51. I find that based on the evidence presented at trial, Ute Energy was a potential competitor in the auction for the Uintah Basin Assets, for antitrust purposes.

52. **HN9**[] When analyzing a Section 1 claim, the Supreme Court has held that "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a [Section] 1 case." Smalley & Co. v. Emerson & Cuming, Inc., 808 F. Supp. 1503, 1508 (D. Colo. 1992), *aff'd*, 13 F.3d 366 (10th Cir. 1993) (citing Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986) (analyzing a Section 1 claim on a motion for summary judgment)). "Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Id.* "[A] plaintiff seeking damages for violation of [S]ection 1 must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently." *Id.* (citation omitted). Therefore, plaintiff "must show that the inference of conspiracy is reasonable in light **[**102]** of the competing inferences of independent action." *Id.*

53. **HN10**[] The Tenth Circuit in Matsushita has restated a two-part evidentiary test: "(1) is the plaintiff's evidence of conspiracy ambiguous, *i.e.*, is it as consistent with the defendants' permissible independent interests as with an illegal conspiracy; and, if so, (2) is there any evidence that tends to exclude the possibility that the defendants were pursuing these independent interests." Id. at 1509 (citing Gibson v. Greater Park City Co., 818 F.2d 722, 724 (10th Cir. 1987)).

A. There Is No Evidence That Ute Energy and Newfield Agreed To Bid-Rig

54.**HN11**[] "The essence of a claim of violation of Section 1 of the Sherman Act is the agreement itself." Champagne Metals v. Ken-Mac Metals, Inc., 458 F.3d 1073, 1082 (10th Cir. 2006) (citing Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 330, **[*1207]** 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991)). Without proof of an agreement to rig bids, Plaintiffs' antitrust claims fail. *Id.* "Solely unilateral conduct, regardless of its anticompetitive effects, is not prohibited." McKenzie v. Mercy Hosp., 854 F.2d 365, 367 (10th Cir. 1988). Because Plaintiffs have not met their burden of proving the existence of an agreement to rig bids, their antitrust claims must fail.

i. There Is No Direct Evidence Of Any Bid-Rigging Agreement

55. Here, there is no direct evidence of any bid-rigging agreement between Newfield and Ute Energy. *Champagne Metals, 458 F.3d at 1083* (***HN12***[] "Direct evidence [of] a *Section 1* conspiracy . . . [is] evidence that is explicit and requires no inferences to establish **[**103]** the proposition or conclusion being asserted."). Newfield disavowed the existence of any agreement that Ute Energy would not bid in the Auction, and Ute Energy's CEO repeatedly confirmed that Ute Energy decided not to participate in the auction unilaterally, independent of Newfield. [FF # 86-100, 129-143]

56. Mr. Jaggers' May 20, 2011 letter to Mr. Howard is not direct evidence of an agreement. In that letter, Mr. Jaggers stated that Mr. Howard "asked Ute Energy not to be involved because the existing AMIs would cover the division of interest," not that Newfield and Ute Energy "agreed." [FF # 122-124] At trial, however, Mr. Jaggers was unable to recall Mr. Howard making this request [FF # 122], and such a request is ***not*** an agreement not to bid and does not necessarily give rise to the inference that this supposed request led to an actual agreement not to bid.

57. I therefore find that no direct evidence of a bid rigging agreement between Newfield and Ute Energy was presented at trial.

ii. There Is No Circumstantial Evidence Of Bid Rigging That Can Exclude The Possibility of Unilateral Decision-making By Newfield and Ute Energy

58. The circumstantial evidence also does not "exclude the **[**104]** possibility that [Ute Energy and Newfield] acted independently." *Champagne Metals, 458 F.3d at 1085* (quoting *Mitchael v. Intraco, Inc., 179 F.3d 847, 856-57 (10th Cir. 1999))*; *see also* *World of Sleep, Inc. v. La-Z-Boy Chair Co., 756 F.2d 1467, 1475 (10th Cir. 1985)* (holding ***HN13***[] a jury is not permitted to infer an agreement from certain evidence, "the burden remains on the antitrust plaintiff to introduce additional evidence sufficient to support a finding of an unlawful contract, combination, or conspiracy [which] tends to exclude the possibility that [defendants] were acting independently.") (citation omitted); *see also* *St. Louis Convention & Visitors Comm'n v. National Football League, 154 F.3d 851, 862 (8th Cir. 1998)* (noting that ***antitrust law*** "limits the range of permissible inferences from ambiguous evidence" in a *Sherman Act § 1* case and affirming judgment as matter of law where "the trial evidence did not support an inference that [defendants] were acting pursuant to the alleged conspiracy when they declined to bid").

59. Both Mr. Jaggers and Mr. Howard testified that any understanding they had emanating from the January 13, 2011 call related exclusively to their AMIs, and the partnership the companies had under those agreements. Each denied the existence of any agreement outside the AMIs to control participation in the auction process. Instead, their testimony expressed that each acted as one would expect AMI partners to behave when they believed a potential **[**105]** acquisition fell within the scope of their AMIs. [FF# 87-100, 109-120]

60. The evidence is undisputed that it is the custom and practice in the industry **[*1208]** that parties to an AMI agreement do not bid against each other for assets covered by an AMI because doing so would be economically irrational. [FF # 131] It is also undisputed that Mr. Jaggers believed at the time of the auction that Ute Energy would have the option to purchase a portion of the Uinta Basin Assets under the Rocky Point AMI if Newfield's bid was successful. [FF # 129] With that belief, it would have been economically irrational for Ute Energy to have bid in the auction [FF# 131-134], and this evidence strongly supports Mr. Jaggers' testimony that he made a unilateral and independent decision that Ute Energy would not participate in the auction.

61. It is also undisputed that Newfield was the far larger and the better capitalized of the two AMI partners, and thus the more logical company to take the lead in the effort to acquire the Uinta Basin Assets. The correspondence referring to partnering in pursuing or taking the lead arises from this logical positioning of Newfield as the lead AMI partner. [FF# 87-100, 109-120]

[106]** 62. I find that the evidence presented at trial cannot exclude the possibility of independent action in conformity with the well-accepted practices of AMI partners, and thus cannot support the existence of a bid-rigging agreement.

63. Moreover, I find that other communications and behaviors are inconsistent with the notion of a January 13, 2011 agreement between Newfield and Ute Energy regarding bidding or participation in the auction, and thus also cannot exclude the possibility of independent action.

64. First, Newfield's internal deal analyses show that Newfield believed that Ute Energy was a potential bidder in the auction, even if its inability to submit a large bid had no impact on Newfield's bid. [FF # 52, 54]

65. Second, it would have been illogical for Mr. Jaggers to express interest in the process to Mr. Nesselrode in late January 2011 had Mr. Jaggers already agreed with Mr. Howard that Ute Energy would not bid on the Uinta Basin Assets or otherwise participate in the auction process. [FF# 39, 106]

66. Third, it also would have been illogical for Ute Energy's Mr. Kalstrom to reach out to Newfield about coordinating review of the Harvest divestiture package had an agreement already **[**107]** been reached that Ute Energy would not be involved. [FF# 107]

67. Fourth, it also appears anomalous to me that, had there been an agreement between Mr. Howard and Mr. Jaggers, Mr. Howard would not have informed his boss or others within Newfield of such an important agreement. [FF# 99-100] I also would have expected evidence of other communications referencing the alleged agreement, but there was not a shred of evidence of any reference to such an agreement anywhere. Similarly, there was no evidence of any communications between Mr. Jaggers and anyone at Ute Energy or otherwise mentioning the alleged agreement.

68. Lastly, had Ute Energy agreed not to bid on the Uinta Basin Assets because Newfield was going to bid on behalf of both of them, it would have been inexplicable for Ute Energy to inquire if Newfield intended to bid just days before bids were due, and yet Ute Energy did just that. [FF # 108]

69. I find that Plaintiffs have not presented sufficient circumstantial evidence of an agreement between Newfield and Ute Energy, and certainly none that excludes the possibility of independent action.

70. I therefore find that there is no direct or circumstantial evidence supporting **[*1209]** the existence **[**108]** of an agreement between Ute Energy and Newfield pursuant to which Ute Energy agreed not to participate in the auction for the Uinta Basin Assets.

B. Plaintiffs Have Failed to Show Antitrust Injury

71. ***HN14***[] To prevail on their *Sherman Act* claim, Plaintiffs must prove, by a preponderance of the evidence, that Plaintiffs were injured in their business or property by the alleged bid-rigging. That is, Plaintiffs must show that they were injured because of the anticompetitive effects of the alleged bid-rigging. *See* *Suture Express, Inc. v. Owens & Minor Distrib., Inc., 851 F.3d 1029, 1044 (10th Cir. 2017)* ("As part of any claim under *Section 1 of the Sherman Act*, the plaintiff must establish 'an injury of the type the antitrust laws were intended to prevent.' This means that the plaintiff must show the challenged restraint actually injured competition, not merely a competitor.") (citations omitted).

72. Plaintiffs must show that they were injured in their business or property by the alleged bid-rigging, that is, that they were injured because of the anticompetitive effects of the alleged bid-rigging. *Suture Express, 851 F.3d at 1044*.

73. "The relaxed measure of proof is afforded to the amount, but not the causation of loss — the nexus between the defendant's illegal activity and the injuries suffered must be reasonably proven." **[**109]** *Wills Trucking, Inc. v. Baltimore & Ohio R.R. Co. (In re Lower Lake Erie Iron Ore Antitrust Litig.), 998 F.2d 1144, 1176 (3d Cir. 1993)* (citation omitted).

74. Here, Plaintiffs have failed to meet their burden to show that they were injured because of anticompetitive effects of the alleged bid-rigging. There is no basis to conclude that the auction price would have been higher but

for the alleged agreement or Ute Energy's absence from the bidding. The evidence shows that Newfield formulated its bid with the expectation that there would be robust competition from well-funded competitors, including El Paso, Shell, Oxy, Noble and Samson who could "move the needle" at the auction. [FF # 51-53] Ute Energy, although active in the Uinta Basin, was not a competitor that Newfield believed could "move the needle" on activity. [FF # 52]

75. During the auction process, ten companies visited the data room and attended the management presentations: El Paso, Devon, Shell, Endeavour, BBC, Newfield, ExxonMobil, Enduring Resources, ConocoPhillips, and Berry Petroleum. [FF #45]

76. Because Plaintiffs do not allege that there was any agreement between Newfield and the numerous other competitors who Newfield believed could "move the needle" on the activity and the nine other companies that visited the data room, even if I had found that **[**110]** Newfield had an agreement with Ute Energy not to bid, there is no basis on which I can conclude that Newfield's initial bid or subsequent bid would have been higher but for such an agreement.

77. After the initial bids were received, in discussions with BAML, Newfield understood that there were other bidders for the entirety of the Uinta Basin Assets and another bid for a portion of the Uinta Basin Assets. [FF # 68, 151] Thus, even assuming there was an agreement that Ute Energy would not bid, Newfield believed it still had to compete with other bidders whose identities were not known to Newfield, and whose bid amounts also were unknown, and there is no evidence from which it can be concluded that Newfield's subsequent bids would have been higher but for Ute Energy's absence as a **[*1210]** bidder. [FF # 50-51, 68-69] In fact, the internal Decision Review document that was presented to senior management recommended a bid of $220 million. [FF # 56] Newfield's initial bid was $67.5 million higher than the initial recommended bid because it anticipated robust competition. [FF# 56] Had Newfield believed it had taken Ute Energy (whom the Amended Complaint alleges was the only other "serious business **[**111]** competitor[]" that was likely to bid in the competition [ECF No. 258, ¶¶ 16-17]) out of the competition, one would predict that Newfield's initial bid would have been lower than its recommended bid, not $67 million higher, and that Newfield would not have increased its bid in the second round, nor would it have paid an additional $15 million for exclusivity. Paying for exclusivity only makes economic sense if Newfield believed there were other strong competitors still vying for the Uinta Basin Assets in the auction.

78. In addition, the evidence is undisputed that Ute Energy could not have made a bid that came close to Newfield's bid or the bid that was received from BBC [FF # 66-67, 138-140], thus suggesting that Ute Energy's participation in the auction would not have impacted the final auction price. And there is no evidence from which I can conclude that Ute Energy would have even participated in the auction but for the alleged bidding agreement.

79. Indeed, the testimony from Mr. Jaggers was that, if, hypothetically, Ute Energy were to have attempted to submit a bid for the Uinta Basin Assets, it would not have done so through the auction process because Plaintiffs' bid procedures **[**112]** directed submission of bids for the entirety of the Uinta Basin Assets and Mr. Jaggers did not believe Ute Energy was financially capable of submitting a competitive bid given the expected value of the assets. [FF # 138-140, 143] Instead, Mr. Jaggers testified that Ute Energy might have attempted to negotiate with Plaintiffs for part of the Uinta Basin Assets outside the context of the auction. [FF # 62] However, it is undisputed that Harvest and Branta intended to sell the Uinta Basin Assets a single package in the auction. [FF # 58-59]

80. At closing, Plaintiffs adopted the theory that they would have been able to obtain a higher price through the piecemeal sale of the Uinta Basin Assets outside of the auction. [Plaintiffs' Closing (Vol. XI — 2164:19-2166:4)] Plaintiffs presented no evidence, however, reflecting what part of the Uinta Basin Assets they might have sold to Ute Energy in that scenario, or the price that Ute Energy might have offered. They likewise presented no evidence that, once the Uinta Basin Assets were subdivided, Newfield would have been willing to participate in the acquisition of a part of the assets, or at what price. There was no evidence whatsoever as to the **[**113]** aggregate price that Plaintiffs would have received for the Uinta Basin Assets once broken up and sold piecemeal. For me to conclude that Plaintiffs would have obtained a higher price outside of the auction process through such a piecemeal sale would be speculative.

81. Similarly, Plaintiffs have not shown that but for the alleged agreement Newfield would have increased its bid. Rather, the evidence showed that Newfield crafted its bid with the expectation of robust competition. [Trial Ex. 9 at 9-065] The relevant Newfield business unit recommended a valuation of $220 million for the Uinta Basin Assets, but, because of the expected competition, Newfield's senior executive team increased the amount if would bid from $220 million to $287 million, and then to $295 million, with an additional $15 million to purchase the right to negotiate **[*1211]** exclusively for one week. [Trial Exs. 127, 128, 137]

82. There was no credible evidence presented at trial that Newfield would have submitted a higher bid had Ute Energy participated. Indeed, Newfield's Mr. Boothby testified categorically that he would not have agreed to pay any additional amount for the Uinta Basin Assets. [Boothby Testimony (Vol. VIII **[**114]** — 1692:18-21, 1693:4-11, 1697:10-15)]

83. Though Plaintiffs' expert, Dr. Schulman, testified that the participation of additional bidders in an auction, without more, tends to lead to a higher price paid in auctions, I did not find his testimony credible or well-founded in the economics literature on which he relied. Rather, I give credence to Dr. Burtis' testimony that, in sealed-bid auctions like the one that took place here, what matters is a bidder's expectations of competition, namely from the expected next highest bidder and its expected bid amount.

84. Dr. Burtis testified how auctions of this sort function and the paramount importance of a bidder's estimation of the valuation that other bidders are likely to attach to the asset that is the subject of the auction. [Burtis Testimony (Vol. X — 1920:4-1929:1)] According to Dr. Burtis, it is only in very specific circumstances where the number of bidders is the primary determinant of the high bid — *i.e.*, where the bidders are purchasing the asset with the intent of keeping it indefinitely for their own private benefit rather than with the intent to resell the asset in a commercial venture. [Burtis Testimony (Vol. X — 1927:3-1927:15)] **[**115]** In the context of commercial ventures, the mere presence of additional bidders is unlikely to increase a given bidder's perception of what it should bid for the asset, at least absent evidence that the existing bidders are aware of the additional bidders and if they are perceived by the existing bidders to have more resources and to value the asset higher. [Burtis Testimony (Vol. X — 1929:2-1930:10, 1932:8-22, 1958:17-1959:1)]

85. Here, there was no evidence presented that Newfield was told in the auction how many other bids had been made. Rather, Mr. Massaro and Mr. Howard were told only that there were "other bidders." [FF# 169]

86. I cannot find that Plaintiffs have shown, by a preponderance of the evidence, that the addition of a single bidder would have impacted the final outcome of the auction because Newfield was never told how many bidders — or which bidders — had participated in the auction and thus I have no reason to believe that Newfield would have raised its maximum bid value based on the participation of another bidder.

87. I also find there is no non-speculative evidence that suggests Plaintiffs would have received a price for the Uinta Basin Assets in excess of that received **[**116]** in the auction had they elected to sell the assets piecemeal.

88. I therefore find that Plaintiffs have not proven by a preponderance of the evidence that the final auction price would have been different, and therefore Plaintiffs have failed to prove antitrust injury.

C. Plaintiffs Have Failed To Show Any Non-Speculative Damages

89. Plaintiffs' theory of damages is that, but for the alleged agreement, Ute Energy would have participated in the auction and the final sale price would have been higher, with the appropriate measure of damages being the difference between the sale price ($308 million) and the final sale price in the "but for" world." [Schulman Testimony (Vol. VI — 1126:21-1127:5, 1133:8-11)]

[*1212] 90. Plaintiffs, however, have failed to establish with reasonable certainty the price they would have received in the "but for" world.

91. Furthermore, Plaintiffs speculated in closing that Ute Energy might have made an offer on part of the Uinta Basin Assets outside the auction process, that BBC would have made its bid, and that Newfield would have made a bid, and, somehow, Plaintiffs would have been able to divvy up the assets between the three parties and obtain a more favorable aggregate **[**117]** price. [Plaintiffs' Closing (Vol. XI — 2165:9-2166:4)] Plaintiffs' experts, however, did not evaluate what this scenario would look like or what the expected outcome would have been. [Mimms Testimony (Vol. X — 1984:23-1985:14, 1986:11-19, 1989:11-1990:16)] Any attempt to assign damages based on a "but for" world that was not even considered by the experts and was not supported by any evidence at trial would be speculative.

92. Even if I found an award of damages appropriate under these circumstances, I cannot rely on the damages analysis proffered at trial. Plaintiffs' expert, Mr. McBeath, provided a range of values for the Uinta Basin Assets, untethered from any analysis of what the expected bids for some or part of the assets would have been in the "but for" world. [FF # 185] He did not offer up an opinion as to what the bid or range of bids would have been had Ute Energy participated.

93. Even if Mr. McBeath's analysis were relevant to establishing what the winning bid would have been in the "but for" world, or what the aggregate amount received from the piecemeal sale Plaintiffs' hypothesized at closing would have been, it fails to provide a damages estimate with reasonable certainty. **[**118]**

94. First, Mr. McBeath's damages are predicated on the insupportable assumption that the basal carbonate was a probable reserve. To be categorized as a probable reserve, the basal carbonate had to have been proved commercial. The undisputed evidence at trial was that the basal carbonate had not been proved to be commercial at the time of the auction because no horizontal drilling had been tested, and no horizontal wells had been drilled economically. [FF# 190-191] Because Mr. McBeath improperly characterized the basal carbonate as a probable reserve, he performed a discounted cash flow analysis on it, and assigned greater value to it than appropriate.

95. As Mr. McBeath acknowledged, if the basal carbonate was not commercial, it should have been characterized as a contingent resource, with no positive value assigned to it in his valuation. [FF# 193-195] Because Mr. McBeath instead assigned a value of $96 to $326 million to the basal carbonate, his analysis cannot credibly be relied on.

96. Second, Mr. McBeath failed to account for the high costs associated with developing the Uinta Basin Assets. Harvest's own materials identify the Uinta Basin Assets as a "resource play." Even Mr. McBeath **[**119]** acknowledged that it is improper to account for the costs of successful wells only because, in resource plays, you are not assured a 100% drilling and production success rate. [FF# 197-200] And yet that is exactly what Mr. McBeath did in his damages analysis. The ignored costs were over $700 million. [FF# 201]

97. Because of these primary (not exclusive) deficiencies in Mr. McBeath's damages analysis, I find that he did not offer a damages estimate with the requisite reasonable certainty to support an award of damages in this case.

98. Even if the deficiencies identified above were not fatal, Mr. McBeath has provided an inordinately broad range for the valuation of the assets — from $328 million **[*1213]** to $653.8 million. [McBeath Testimony (Vol. VI — 1192:11-14, 1250:5-9)] This makes the top end of the valuation roughly twice that of the low end and, if the $308 million purchase price is deducted (per Plaintiffs' damages theory), gives a range of damages from $20 million to $345.8 million, making the top end of the damages range more than 17 times the bottom end. While antitrust plaintiffs are not required to prove their damages with absolute certainty, such an extreme range of potential damages **[**120]** suggests that any award would be based on no more than mere speculation. *See* *World of Sleep, v. La-Z-Boy Chair Co., 756 F.2d 1467, 1478 (10th Cir. 1985)*.

99. In recognition of the huge range offered by Mr. McBeath, Plaintiffs' counsel offered at closing that a damages award number of not more than $400 million would be non-speculative. Plaintiffs offered, and I find, no basis in the record to pick this number above any other.

100. I therefore find that, even if Plaintiffs had been able to prove at trial that there existed an agreement between Newfield and Ute Energy that Ute Energy would not participate in the auction for the Uinta Basin Assets, and that

Newfield and Ute Energy were actual or potential competitors in the auction, Plaintiffs have not proven that the final auction price would have been different, and therefore Plaintiffs have failed to prove either an antitrust injury or any damages.

III. TORTIOUS INTERFERENCE WITH PROSPECTIVE BUSINESS RELATIONSHIP WITH UTE ENERGY

101. Plaintiffs allege that Newfield interfered with their prospective business relationship with Ute Energy.

102. ***HN15***[] Colorado recognizes the tort of intentional interference with prospective business relations. *Hertz v. Luzenac Grp., 576 F.3d 1103, 1119 (10th Cir. 2009)*. "One who intentionally and improperly interferes with another's prospective **[**121]** contractual relation . . . is subject to liability to the other for the pecuniary harm resulting from the loss of benefits of the relation . . . ." *MDM Grp. Assocs., Inc. v. CX Reinsurance Co., 165 P.3d 882, 886 (Colo. App. 2007)* (quoting *Restatement (Second) of Torts § 766B* (1979)). "While the existence of an underlying contract is not required for this tort, there must be a showing of improper and intentional interference by the defendant that prevents the formation of a contract between the plaintiff and a third party." *Id.*; *cf. Puls v. Landmark Cmty. Newspapers, Inc., 335 Fed. Appx. 805, 2009 WL 1927442, at *10 (10th Cir. July 7, 2009)* (citing *MDM Grp. Assocs., Inc.*). However, in order to prove that there is a protected prospective business relationship, the plaintiff must show that there is "a reasonable likelihood or probability that a contract would have resulted; there must be something beyond a mere hope." *Hertz, 576 F.3d at 1119* (quoting *Klein v. Grynberg, 44 F.3d 1497, 1506 (10th Cir. 2008))*.

103. I found above that Ute Energy had no prospective business relationship with Branta during the relevant time period. [FF # 23, 225-226]

104. Similarly, I find that Harvest had no prospective business relationship with Ute Energy. [FF# 23]

105. Ute Energy's CEO, Mr. Jaggers, testified that Ute Energy never considered participating in the auction for the Uinta Basin Assets, and made the decision not to participate unilaterally, without any interference from or involvement of Newfield. **[**122]** [FF # 128-146]

106. Ute Energy's lack of consideration of submitting a bid in the auction, when combined with the undisputed evidence that Ute Energy lacked the resources to submit a competitive bid regardless, confirms **[*1214]** that there was not a reasonable likelihood that Ute Energy would have entered into a contract for the sale of all or part of the Uinta Basin Assets with Plaintiffs.

107. Having had no reasonable likelihood or probability that a contract would have resulted but for the alleged interference by Newfield, Plaintiffs cannot prove the tort of tortious interference with prospective business relations.

108. Even if Plaintiffs had shown a prospective business relationship between all or one of them and Ute Energy, Plaintiffs have not presented evidence of any improper conduct that would give rise to a tortious interference claim. As I have found in connection with Plaintiffs' antitrust claims, I find no evidence of an improper agreement between Ute Energy and Newfield. Moreover, I do not find that Newfield improperly deceived Ute Energy regarding the scope of the Rocky Point AMI. Mr. Howard was unaware of the limitations in the coverage of the Rocky Point AMI at the time of the **[**123]** January 13, 2011 phone call with Mr. Jaggers, as was Mr. Jaggers, himself. [FF# 112, 115-120] I do not find that Mr. Howard had an affirmative obligation to inform Mr. Jaggers or others at Ute Energy of the plain language of their contract.

IV. CIVIL CONSPIRACY

109. Plaintiffs claim that Newfield's conduct constituted a civil conspiracy.

110. ***HN16***[] To support this claim, Plaintiffs must show: (1) two or more persons; (2) an object to be accomplished; (3) a meeting of the minds on the object or course of action; (4) an unlawful overt act; and (5)

damages as to the proximate result. *Wagner v. Universal Fin'l Grp., Inc., No. 14-cv-01297, 2015 U.S. Dist. LEXIS 189637, 2015 WL 12967850, at *10 (D. Colo. Aug. 21, 2015)* (citing *Nelson v. Elway, 908 P.2d 102, 106 (Colo. 1995))*. Plaintiff must present evidence of an agreement; the court may not infer its existence. *Id.* "Additionally, the purpose of the conspiracy must involve an unlawful act or unlawful means. A party may not be held liable for doing in a proper manner that which it had a lawful right to do." *Id.* (citations omitted).

111. For the same reasons for which I find no *Sherman Act* or Colorado Antitrust Act violations, I find Plaintiffs have failed to prove that Newfield has committed a civil conspiracy.

V. CONCLUSION

112. Based on the foregoing Findings of Fact and Conclusion **[**124]** of Law, I make the following rulings. First, I find that Plaintiffs have failed to prove that Defendant Newfield breached either the Harvest CA or Branta CA by a preponderance of the evidence. Second, I find that Plaintiffs have failed to prove that Newfield and Ute Energy entered into an agreement to rig bids in violation of either the *Sherman Act* or the Colorado Antitrust Act. Third, I find that Plaintiffs have failed to prove that Newfield tortuously interfered with any prospective contract or business relationship between Plaintiffs and Ute Energy. Finally, I find that Plaintiffs have failed to prove that Newfield participated in any civil conspiracy.

113. Accordingly, Final Judgment shall enter in favor of Defendant Newfield Production Company on each of Plaintiffs' claims of relief, and each claim is hereby **Dismissed With Prejudice**.

Dated: April 12, 2018.

BY THE COURT:

2018 U.S. Dist. LEXIS 237189 *

SC LICENSING, LLC, et al., Plaintiffs, v. 5 HORIZONS GROUP, LLC, Defendant.5 HORIZONS GROUP, LLC, Counterclaimant/Third-Party Plaintiff, v. RACHEL ASHWELL, et al., Counterclaim Defendants/Third-Party Defendants.

Core Terms

License, cause of action, alleges, Trademarks, registrations, restitution, breached, products, unfair, exclusive license, Counterclaim, disgorgement, estoppel, promise, fails, terms

Counsel: **[*1]** For SC Licensing, LLC, a California limited liability company, RA Licensing, LLC, a California limited liability company, Plaintiffs: Benjamin O Aigboboh, Michael David Wilburn, LEAD ATTORNEYS, Paul A Bost, Jill M Pietrini, Sheppard Mullin Richter and Hampton LLP, Los Angeles, CA.

For 5 Horizons Group, LLC, a Missouri limited liability company, Defendant, ThirdParty Plaintiff, Counter Claimant: Alison P Buchanan, LEAD ATTORNEY, Hoge Fenton Jones and Appel Inc, San Jose, CA; Daniel D Williams, PRO HAC VICE, Hutchinson Black and Cook LLC, Boulder, CO; Wendy Wen Yun Chang, Hinshaw and Culberton LLP, Los Angeles, CA.

For Liliput & Co., LLC, Rachel Ashwell, ThirdParty Defendants: Benjamin O Aigboboh, Paul A Bost, Sheppard Mullin Richter and Hampton LLP, Los Angeles, CA.

For RA Licensing, LLC, a California limited liability company, SC Licensing, LLC, a California limited liability company, Counter Defendants: Benjamin O Aigboboh, Michael David Wilburn, LEAD ATTORNEYS, Paul A Bost, Jill M Pietrini, Sheppard Mullin Richter and Hampton LLP, Los Angeles, CA.

Judges: Dale S. Fischer, United States District Judge.

Opinion by: Dale S. Fischer

Opinion

(In Chambers) Order GRANTING in PART and DENYING in PART Motion to Dismiss Counterclaims **[*2]** (Dkt. 39)

I. FACTS

5 Horizons Group, LLC is a global products firm. Dkt. 34 (Am. Countercl.) ¶ 1. Rachel Ashwell is a designer and owner of a portfolio of brands under which furniture, décor, and other home goods are designed and marketed. Id. ¶ 9. Ashwell is the trustee of the Rachel Ashwell Revocable Trust of 2001. Id. ¶ 3. The Trust wholly owns RA Licensing and SC Licensing (RA/SC), which hold Ashwell's various trademark and product names, and Liliput, which operates brick-and-mortar and online retail stores. Id. ¶¶ 4-6.

In 2015, after several months of negotiations, 5 Horizons and RA/SC entered into the License Agreement, which granted 5 Horizons an exclusive license to RA/SC's names and trademarks for the purposes of "designing, developing, selling and distributing furniture, lighting, wall furniture products, and other home goods and décor." Id. ¶¶ 15-17.

By 2017, the parties' relationship soured. 5 Horizons alleges the Ashwell Defendants acted in concert to frustrate and circumvent the License Agreement. Id. ¶ 18-22. For example, the Ashwell Defendants continued to authorize one of 5 Horizons' competitors, Miles Talbot, to manufacture, market, and sell products covered by the License **[*3]** Agreement. Id. ¶ 22.

The parties attempted to negotiate an amended License Agreement, but were unsuccessful. Id. ¶¶ 30-31. 5 Horizons alleges that when confronted with their failures to perform as promised, RA/SC developed pretextual reasons to justify terminating the License Agreement. Id. ¶¶ 43-44. In light of RA/SC's refusal to comply with the License Agreement, 5 Horizons terminated it by letter dated October 27, 2017. Id. ¶ 47.

II. LEGAL STANDARD

Rule 12(b)(6) allows an attack on the pleadings for failure to state a claim upon which relief can be granted. "[W]hen ruling on a defendant's motion to dismiss, a judge must accept as true all of the factual allegations contained in the complaint." *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)*. However, allegations contradicted by matters properly subject to judicial notice or by exhibit need not be accepted as true, *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)*; and a court is "not bound to accept as true a legal conclusion couched as a factual allegation." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citation omitted). "Nor does a complaint suffice if it tenders naked assertion[s] devoid of further factual enhancement." Id. (alteration in original; citation and internal quotation marks omitted). A complaint must "state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. This means **[*4]** that the complaint must plead "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." Id.

Ruling on a motion to dismiss will be "a context-specific task that requires the reviewing court to draw on its judicial experience and common sense. But where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged — but it has not show[n] — that the pleader is entitled to relief." *Id. at 679* (alteration in original; citation omitted).

III. DISCUSSION

Plaintiffs and Counter-Defendants RA Licensing, LLC and SC Licensing, LLC, and Third-Party Defendants Rachel Ashwell and Liliput & Co., LLC (together, the Ashwell Defendants) move for dismissal of 5 Horizons' Second, Fourth, Fifth, Sixth, Seventh, Eighth, and Ninth Causes of Action.[1]

A. Breach of License Agreement — Failure to Secure Registration (Against RA/SC, Second Cause of Action)

In order to state a claim for breach of contract, a plaintiff must plead the **[*5]** existence of a contract, his or her performance or excuse for nonperformance; the defendant's breach; and resulting damages. See *Otworth v. S. Pac. Transp. Co., 166 Cal. App. 3d 452, 458, 212 Cal. Rptr. 743 (1985)*. A contract may be written, oral, or implied

[1] 5 Horizons has voluntarily withdrawn its Ninth Cause of Action for Conspiracy. See Dkt. 42 (Opp'n) at 17.

by conduct. *Id. at 458-59*. The complaint must identify the specific provision of the contract allegedly breached by the defendant. See *Progressive West Ins. Co. v. Superior Court, 135 Cal. App. 4th 263, 281, 37 Cal. Rptr. 3d 434 (2005)*.

5 Horizons alleges RA/SC breached ¶ 4.2 of the License Agreement by failing to maintain trademark registrations and exclusive ownership of those trademarks. Am. Countercl. ¶¶ 54-60. Paragraph 4.2 provides: "Licensor shall maintain, all registrations for the Trademarks in the jurisdictions set forth in Schedule 4.2 hereto in the Classes of Use designated therein." Dkt. 12-1 (License Agreement) ¶ 4.2. Schedule 4.2 identifies three marks ("SHABBY CHIC"; "RACHEL ASHWELL"; and "SIMPLY SHABBY CHIC"), but does not identify anything under the columns entitled, "Jurisdiction," "Class of Goods," or "Registration No." Id. at Schedule 4.2.

5 Horizons has not sufficiently alleged that RA/SC breached ¶ 4.2. Specifically, RA/SC cannot be found to have failed to maintain "all registrations for Trademarks in the jurisdiction set forth in Schedule 4.2" when Schedule 4.2 is blank. 5 Horizons' other argument—that **[*6]** RA/SC were contractually obligated to maintain the registrations for Trademarks in force at the execution of the License Agreement—is not supported by the terms of the Agreement. In fact, the Agreement expressly entitles 5 Horizons to ask RA/SC to obtain registrations, and, if they decline, to do so at its own expense. Id. As the Agreement contemplates that RA/SC might not comply, and provides its own remedy, 5 Horizons has not stated a claim for breach. 5 Horizons' reference at oral argument to ¶ 6.1 is of no assistance, as the First Amended Counterclaim alleges a failure to maintain, not a breach of representations and warranties.

With respect to the enforcement claim, 5 Horizons does not identify any provisions of the Agreement that required RA/SC to affirmatively enforce its exclusive ownership of the Trademarks. Instead, ¶ 4.5 gives RA/SC the discretion to enforce its Trademarks, and if it failed to do so, 5 Horizons was authorized to commence an enforcement action. Id. ¶ 4.5.

5 Horizons' implied covenant of good faith and fair dealing argument fails because it is not alleged in the First Amended Counterclaim. It also fails because, as discussed, RA/SC has complied with the express **[*7]** terms of the License Agreement. See *Pasadena Live, LLC v. City of Pasadena, 114 Cal. App. 4th 1089, 1094, 8 Cal. Rptr. 3d 233 (2004)* ("The implied covenant of good faith and fair dealing is limited to assuring compliance with the *express terms* of the contract, and cannot be extended to create obligations not contemplated by the contract.") (citing 1 Witkin, Summary of Cal. Law § 743, at 449 (2003 Supp.)).

The Second Cause of Action is DISMISSED.

B. Breach of License Agreement — Violation of Exclusive License (Against RA/SC, Fourth Cause of Action)

5 Horizons alleges RA/SC breached the License Agreement's exclusivity provision and has received royalties or license fees for products for which 5 Horizons held the exclusive license. Am. Countercl. ¶¶ 66-69. 5 Horizons contends it is entitled to its "lost profits" from the breach, as well as "disgorgement of [RA/SC's] ill-gotten gains." Id. ¶ 69.

RA/SC argues that disgorgement is not a proper remedy for a breach of contract action. 5 Horizons agrees that it may not receive a "double recovery" of lost profits and disgorgement, but contends it is premature to dismiss the disgorgement theory. The Court agrees. See Ajaxo Inc. v. E**Trade Group, Inc., 135 Cal. App. 4th 21, 55-57 (2005)* (finding plaintiff should be compensated for breach of an NDA by disgorging its unjust enrichment).

The Motion to **[*8]** Dismiss the Fourth Cause of Action is DENIED.

C. Promissory Estoppel (Against Liliput and Ashwell, Fifth Cause of Action)

5 Horizons alleges a claim for promissory estoppel against Liliput and Ashwell as an alternative to its breach of contract claim.[2] Am. Countercl. ¶¶ 70-76. "The elements of a promissory estoppel claim are (1) a promise clear and unambiguous in its terms; (2) reliance by the party to whom the promise is made; (3) [the] reliance must be both reasonable and foreseeable; and (4) the party asserting the estoppel must be injured by his reliance." *US Ecology, Inc. v. State, 129 Cal. App. 4th 887, 901, 28 Cal. Rptr. 3d 894 (2005)* (citation omitted).

Ashwell and Liliput dispute the first element—whether 5 Horizons has adequately pleaded that Ashwell or Liliput made a promise clear and unambiguous on its terms. The Court concludes the element is not satisfied. 5 Horizons relies on the terms of the License Agreement to allege that Ashwell and Liliput failed to live up to their promises. Am. Countercl. ¶¶ 71-72. But the License Agreement is between 5 Horizons and RA/SC, not Ashwell or Liliput. The Court is not convinced (and 5 Horizons provides no authority to support) that non-parties can be liable under a promissory estoppel theory based on the terms of **[*9]** a contract they were not party to.

The Fifth Cause of Action is DISMISSED.

D. Restitution (Against Liliput, Sixth Cause of Action)

Restitution (and unjust enrichment) "describe the theory underlying a claim that a defendant has been unjustly conferred a benefit 'through mistake, fraud, coercion, or request.'" *Astiana v. Hain Celestial Group, Inc., 783 F.3d 753, 762 (9th Cir. 2015)* (quoting 55 Cal. Jur. 3d Restitution § 2). "The return of that benefit is the remedy typically sought in a quasi-contract cause of action." Id. (citation omitted).

However, when a plaintiff fails to sufficiently plead an actionable wrong, the restitution claim must be dismissed. See *Hill v. Roll Int'l Corp., 195 Cal. App. 4th 1295, 1308 (2011)* (consumer could not maintain unjust enrichment claim absent an underlying actionable wrong). In Astiana, for example, the Ninth Circuit held the plaintiff stated a restitution claim based on allegations that defendant enticed plaintiff to purchase its products through a false and misleading label, and defendant was unjustly enriched as a result. See *Astiana, 783 F.3d at 762*.

5 Horizons' restitution claim fails because it has not sufficiently pleaded an underlying actionable wrong. 5 Horizons alleges only that Liliput acted "deceptively" when it "implied to 5 Horizons prior to execution of the License Agreement that goods sold in **[*10]** Liliput stores would be manufactured by 5 Horizons . . . ." Am. Countercl. ¶ 80. This allegation is vague and conclusory, and to the extent it sounds in fraud, is not pleaded with the requisite particularity. See *Donohue v. Apple, Inc., 871 F. Supp. 2d 913, 933 (N.D. Cal. 2012)* (dismissing restitution claim based on fraud because plaintiff "failed to sufficiently plead an actionable misrepresentation or omission").

The Sixth Cause of Action is DISMISSED.

E. Breach of Contract (Against Liliput, Seventh Cause of Action)

5 Horizons alleges that Liliput breached the License Agreement by "selling products manufactured by companies other than 5 Horizons that are subject to 5 Horizons' exclusive license." Am. Countercl. ¶¶ 84-89.

5 Horizons has not sufficiently alleged the existence of a contract between it and Liliput. The License Agreement is exclusively between RA/SC and 5 Horizons. See License Agreement at 1, 31. There are no allegations that RA/SC was empowered to commit Liliput to any of the terms. 5 Horizons' argument—that Liliput's mention in the Agreement establishes that the two companies are in "contractual privity"—is not supported by any authority at all. Without more details, a breach of contract claim does not lie against Liliput. See *Donovan v. RRL Corp., 26 Cal. 4th*

---

[2] Even though 5 Horizons' breach of contract and promissory estoppel claims are mutually exclusive, the federal rules allow plaintiffs to plead inconsistent claims and theories. See *Molsbergen v. United States, 757 F.2d 1016, 1018 (9th Cir. 1985)*.

261, 271, 109 Cal. Rptr. 2d 807, 27 P.3d 702 (2001) (contract **[*11]** formation requires an "offer communicated to the offeree and an acceptance communicated to the offeror").

The Seventh Cause of Action is DISMISSED.

F. Unfair Competition (Against Liliput, Eighth Cause of Action)

The UCL prohibits any "unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. In its Opposition, 5 Horizons clarified that it asserts its UCL claim under the "unfair" prong. Am. Countercl. ¶¶ 90-95; Opp'n at 16.

An "unfair" act is one which "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. Because the "antitrust laws . . . were enacted for the protection of *competition*, not *competitors*," *Cargill, Inc. v. Monofort of Colorado, Inc., 479 U.S. 104, 110 (1986)* (citations omitted), "[i]njury to a competitor is not equivalent to injury to competition," and thus, standing alone, cannot suffice to establish an "unfair" act under the UCL, *Cel-Tech Commc'ns, 20 Cal. 4th at 186*.

5 Horizons alleges "Liliput has sourced license products from vendors other than 5 Horizons based on its profit motive even though it knew RA/SC had provided an exclusive license for such products to 5 Horizons." Am. Countercl. **[*12]** ¶ 94.[3] Although 5 Horizons alleges a sharp and deceptive practice that caused it harm, it fails to assert harm to competition and therefore fails to allege the requisite violation of the "policy or spirit" of an ***antitrust law***. 5 Horizons, then, has not sufficiently alleged an "unfair" act in violation of the UCL. See *Prudential Ins. Co. of Am. v. Herman, Case No. SACV 09-00432-JVS (ANx), 2009 U.S. Dist. LEXIS 135351, 2009 WL 10674431, at *3 (C.D. Cal. Aug. 31, 2009)* ("The prevention of contract breaches is not tethered to any legislatively declared policy of the UCL. The legislature enacted the UCL not to protect competitors and consumers from mere contract breaches, but to protect them from 'unfair competition.'").

The Eighth Cause of Action is DISMISSED.

G. Request for Attorneys' Fees

The Court declines to impose the extreme sanction of attorneys' fees on 5 Horizons. Going forward, the Court expects the parties to conduct themselves appropriately and act in good faith.

IV. CONCLUSION

The Second, Fifth, Sixth, Seventh, and Eighth Causes of Action are DISMISSED with leave to amend. The Ninth Cause of Action is voluntarily dismissed. The Motion to Dismiss is DENIED as to the Fourth Cause of Action. An amended counterclaim may be filed and served no later than May 14, 2018. The **[*13]** Court does not grant leave to add new defendants or new claims. Leave to add defendants or claims must be sought by a separate, properly noticed motion. 5 Horizons is ordered to provide a "red-lined" copy of any amended counterclaim to chambers email in addition to a paper chambers copy.

IT IS SO ORDERED.

Date: April 12, 2018

---

[3] 5 Horizons appears to concede that it cannot allege a UCL claim based on Liliput's alleged use of 5 Horizons' intellectual property.

LexisNexis® Headnotes

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN1[] **Healthcare Litigation, Antitrust Actions**

Maryland's Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" prohibits a manufacturer or wholesale distributor from engaging in price gouging in the sale of an essential off-patent or generic drug. *Md. Code Ann., Health-Gen. § 2-802(a)*. The Act defines "price gouging" as an unconscionable increase in the price of a prescription drug. *Md. Code Ann., Health-Gen. § 2-801(c)*. "Unconscionable increase" is further defined as an increase that is excessive and not justified by the cost of producing the drug or the cost of appropriate expansion of access to the drug to promote public health and results in consumers having no meaningful choice about whether to purchase the drug at an excessive price due to the drug's importance to their health and insufficient competition in the market. *§ 2-801(f)*. The "essential" medications subject to the law are those made available for sale in Maryland that either appear on the Model List of Essential Medicines most recently adopted by the World Health Organization or are designated as an essential medicine due to their efficacy in treating a life-threatening health condition or a chronic health condition that substantially impairs an individual's ability to engage in activities of daily living. *§ 2-801(b)(1)*.

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN2[] **Healthcare Litigation, Antitrust Actions**

A manufacturer or wholesale distributor determined to be in violation of Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" may face a number of legal consequences, including a civil penalty of $10,000 per violation or an action to enjoin the sale of the medication at the increased price. *Md. Code Ann., Health-Gen. § 2-803(d)*. To assist the Maryland Attorney General in identifying violations, the Act provides that the Maryland Medical Assistance Program may notify the Attorney General in the event of a particular price increase, including when an increase would result in an increase of 50% or more in the wholesale acquisition cost of the drug within the preceding one-year period or when a 30-day supply of the drug would cost more than $ 80 at the drug's wholesale acquisition cost. *§ 2-803(a)*.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN3[] **Standards of Review, De Novo Review**

The appellate court reviews the dismissal de novo, accepting the plaintiff's well-pleaded allegations as true and drawing all reasonable inferences in the plaintiff's favor.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN4[] **Commerce Clause, Dormant Commerce Clause**

Implicit in the constitutional allocation of the power yo regulate commerce among the several states, *U.S. Const. art. I, § 8, cl. 3*, to the federal government is a corollary constraint on the power of the States to enact legislation that interferes with or burdens interstate commerce. This doctrine, known as the "dormant" commerce clause, is driven by concern about economic protectionism and seeks to prevent state regulatory measures designed to benefit in-state economic interests by burdening out-of-state competitors.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN5[] **Commerce Clause, Dormant Commerce Clause**

The principle against extraterritoriality as it relates to the Dormant Commerce Clause is derived from the notion that a State may not regulate commerce occurring wholly outside of its borders. The principle reflects the Constitution's special concern both with the maintenance of a national economic union unfettered by state-imposed limitations on interstate commerce and with the autonomy of the individual States within their respective spheres. A state law violates the extraterritoriality principle if it either expressly applies to out-of-state commerce, or has that practical effect, regardless of the legislature's intent.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN6[] **Commerce Clause, Dormant Commerce Clause**

A state statute may not regulate commerce that takes place wholly outside of the State's borders, whether or not the commerce has effects within the State. Specifically, a state law may not have the practical effect of establishing 'a scale of prices for use in other states.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN7[] **Commerce Clause, Dormant Commerce Clause**

A statute that directly controls commerce occurring wholly outside the legislating state's boundaries is invalid regardless of whether the statute's extraterritorial reach was intended by the legislature. The statute's practical effect is the focus of the inquiry.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN8[] **Commerce Clause, Dormant Commerce Clause**

In evaluating a statute's practical effect, the court considers not only the consequences of the statute itself, but also how the challenged statute may interact with the legitimate regulatory regimes of other States and what effect would arise if every State adopted similar legislation. This is because the Commerce Clause protects against inconsistent legislation arising from the projection of one state regulatory regime into the jurisdiction of another State.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN9[] **Commerce Clause, Dormant Commerce Clause**

the extraterritoriality principle is violated if the state law at issue regulates the price of any out-of-state transaction, either by its express terms or by its inevitable effect.

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN10[] **Healthcare Litigation, Antitrust Actions**

The plain language of Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" allows Maryland to enforce the Act against parties to a transaction that did not result in a single pill being shipped to Maryland. Specifically, the Act prohibits price gouging in the sale of an essential off-patent or generic drug. *Md. Code Ann., Health-Gen. § 2-802(a)*. Essential off-patent or generic drug is defined, in part, as a drug that is made available for sale in Maryland. *Md. Code Ann., Health-Gen. § 2-801(b)(1)(iv)*. This "made available for sale" language does not limit the Act's application to sales that actually occur within Maryland, nor does it restrict the Act's operation to the context of a resale transaction with a Maryland consumer. Indeed, the Act is intended to reach sales upstream from consumer retail sales. Such "upstream" sales would occur almost exclusively outside Maryland.

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN11[] **Healthcare Litigation, Antitrust Actions**

Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" targets conduct that occurs entirely outside Maryland's borders, a conclusion supported by the Act's prohibition of a manufacturer's use of the defense that it did not directly sell to a consumer in Maryland. *Md. Code Ann., Health-Gen. § 2-803(g)*.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN12[] **Commerce Clause, Dormant Commerce Clause**

A statute is invalid where it controls the price of transactions that occur wholly outside the state.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN13[] **Commerce Clause, Dormant Commerce Clause**

Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition," by its own terms, is not fixated on the price the Maryland consumer ultimately pays for the drug. Instead, the lawfulness of a price increase is measured according to the price the manufacturer or wholesaler charges in the initial sale of the drug. An unconscionable price increase is one that is excessive and not justified by the cost of producing the drug or the cost of appropriate expansion of access to the drug to promote public health. *Md. Code Ann., Health-Gen. § 2-801(f)*. Significantly, the retailers that sell the drug directly to the consumer cannot be held liable under the Act; only a manufacturer or wholesale distributor is prohibited from engaging in price gouging. *Md. Code Ann., Health-Gen. §§ 2-802(a)*, *2-803(g)*. This structure makes clear that the conduct the Act targets is the upstream pricing and sale of prescription drugs, and the parties agree that nearly all of these transactions occur outside Maryland.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN14[] **Commerce Clause, Dormant Commerce Clause**

Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" effectively seeks to compel manufacturers and wholesalers to act in accordance with Maryland law outside of Maryland. This it cannot do.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN15[] Commerce Clause, Dormant Commerce Clause

The Commerce Clause precludes the application of a state statute to commerce that takes place wholly outside of the State's borders, whether or not the commerce has effects within the State.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN16[] Commerce Clause, Dormant Commerce Clause

States may not mandate compliance with their preferred policies in wholly out-of-state transactions.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN17[] Commerce Clause, Dormant Commerce Clause

Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" is effectively a price control statute that instructs manufacturers and wholesale distributors as to the prices they are permitted to charge in transactions that do not take place in Maryland. This is precisely the conduct the rule that was applied in Baldwin and Healy aims to prevent. the Act does not establish a price schedule for prescription drugs, nor does it aim to tie the prices charged for prescription drugs in Maryland to the prices at which those drugs are sold in other states. the Act attempts to dictate the price that may be charged elsewhere for a good. Any legitimate effects the Act may have in Maryland are insufficient to protect the law from invalidation.

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN18[] Healthcare Litigation, Antitrust Actions

Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" aims to override prescription drug manufacturers' reaction to the market and to regulate the prices these manufacturers charge for their products. This is more than an upstream pricing impact -- it is a price control.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN19[] Commerce Clause, Dormant Commerce Clause

The fundamental problem with Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" is that it regulates the price of an out-of-state transaction. The Act instructs prescription drug manufacturers that they are prohibited from charging an unconscionable price in the initial sale of a drug, which occurs outside Maryland's borders. Maryland cannot, even in an effort to protect its consumers from skyrocketing prescription drug costs, impose its preferences in this manner. The practical effect of the Act is to specify the price at which goods may be sold beyond Maryland's borders.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN20[] **Commerce Clause, Dormant Commerce Clause**

The critical inquiry for Dormant Commerce Clause purposes is whether the practical effect of the regulation is to control conduct beyond the boundaries of the State.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN21[] **Commerce Clause, Dormant Commerce Clause**

The practical effect of a statute must be evaluated not only by considering the consequences of the statute itself, but also by considering how the challenged statute may interact with the legitimate regulatory regimes of other States and what effect would arise if not one, but many or every, State adopted similar legislation.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN22[] **Commerce Clause, Dormant Commerce Clause**

The Commerce Clause protects against inconsistent legislation arising from the projection of one state regulatory regime into the jurisdiction of another State.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN23[] **Commerce Clause, Dormant Commerce Clause**

The Dormant Commerce Clause does not protect the particular structure or methods of operation in a retail market.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN24[] **Commerce Clause, Dormant Commerce Clause**

If Maryland compels manufacturers to sell prescription drugs in the initial transaction at a particular price, but another state imposes a different price, then manufacturers could not comply with both laws in a single transaction. The manufacturers' compliance would require more than modification of their distribution systems; it would force them to enter into a separate transaction for each state in order to tailor their conduct so as not to violate any state's price restrictions. Even then, if a drug from a transaction addressed to another state were later made available for sale in Maryland, Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" would permit Maryland to penalize the manufacturer. The potential for the kind of competing and interlocking local economic regulation that the Commerce Clause was meant to preclude is therefore both real and significant. Thus, the Fourth Circuit is pressed to invalidate the Act.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN25[] **Commerce Clause, Dormant Commerce Clause**

Maryland's "Act concerning Public Health--Essential Off-Patent or Generic Drugs--Price Gouging--Prohibition" is unconstitutional under the Dormant Commerce Clause because it directly regulates transactions that take place outside Maryland.

Opinion by: THACKER

Opinion

[*666] THACKER, Circuit Judge:

The Association for Accessible Medicines ("AAM") appeals the district court's dismissal of its dormant *commerce clause* challenge to a Maryland statute prohibiting price gouging in the sale of prescription drugs. AAM also appeals the district court's refusal to enjoin enforcement of the statute on the basis that it is unconstitutionally vague. We hold that the statute violates the dormant *commerce clause* because it directly regulates the price of transactions that occur outside Maryland.[1] Accordingly, we reverse the district court's dismissal of that claim and remand with instructions to enter judgment in favor of AAM.

I.

Factual Background and Procedural History

A.

Maryland's Anti-Price Gouging Statute

In response to reports of price gouging by pharmaceutical manufacturers in the sale of certain prescription medications, Maryland's legislature passed **[**3]** HB 631, "An Act concerning Public Health — Essential Off-Patent or Generic Drugs — Price Gouging — Prohibition" (the "Act"), during the 2017 legislative session. J.A. 42-48.[2] Maryland's governor refused to sign the bill, citing constitutional and other concerns, and the bill became law without his signature. The Act went into effect on October 1, 2017.

HN1[] The Act prohibits "[a] manufacturer or wholesale distributor" from "engag[ing] in price gouging in the sale of an essential off-patent or generic drug." *Md. Code Ann., Health—General § 2-802(a)*. The Act defines "price gouging" as "an unconscionable increase in the price of a prescription drug." *Id. § 2-801(c)*. "Unconscionable increase" is further defined as an increase that "[i]s excessive and not justified by the cost of producing the drug or the cost of appropriate expansion of access to the drug to promote public health" and "[r]esults in consumers . . . having no meaningful choice about whether to purchase the drug at an excessive price" due to the drug's "importance . . . to their health" and "[i]nsufficient competition in the market." *Id. § 2-801(f)*. The "essential" medications subject to the law are those "made available for sale in [Maryland]" that either "appear[] on the Model List of **[**4]** Essential Medicines most recently adopted by the World Health Organization" or are "designated . . . as an essential medicine due to [their] efficacy in treating a life-threatening health condition or a chronic health condition that substantially impairs an individual's ability to engage in activities of daily living." *Id. § 2-801(b)(1)*.

HN2[] A manufacturer or wholesale distributor determined to be in violation of the Act may face a number of legal consequences, including a civil penalty of $10,000 per violation or an action to enjoin the sale of the medication at the increased price. *See Md. Code Ann., Health—General § 2-803(d)*. To assist the Maryland Attorney General in identifying violations, the Act provides that the Maryland Medical Assistance Program "may notify the Attorney **[*667]** General" in the event of a particular price increase, including when an increase "[w]ould result in an increase of 50% or more in the wholesale acquisition cost of the drug within the preceding 1-year period" or when a 30-day supply of the drug "would cost more than $80 at the drug's wholesale acquisition cost." *Id. § 2-803(a)*.

B.

AAM's Suit Challenging the Act

AAM is a voluntary organization with a membership that consists of prescription drug manufacturers and wholesale distributors **[**5]** and other entities in the pharmaceutical industry. AAM's member-manufacturers, only one of which is based in Maryland, typically sell their products to wholesale pharmaceutical distributors, *none of which are based in Maryland*. The vast majority of these sales occur outside Maryland's borders.

---

[1] Because we hold that the statute is unconstitutional pursuant to the dormant *commerce clause*, we need not address whether it is also void for vagueness.

[2] Citations to the "J.A." refer to the Joint Appendix filed by the parties in this appeal.

On July 6, 2017, AAM filed this action against Brian Frosh, Maryland's Attorney General, and Dennis R. Schrader, Secretary of the Maryland Department of Health (collectively, "Maryland"). Among other claims, AAM asserts that the Act violates the dormant *commerce clause* and is unconstitutionally vague. Maryland filed a motion to dismiss AAM's suit, which the district court granted as to the dormant *commerce clause* claim but denied as to the vagueness claim. The district court also denied AAM's motion for a preliminary injunction. AAM timely appealed.

II.

Dormant *Commerce Clause* Challenge

AAM argues that the district court improperly dismissed its claim that the Act violates the dormant *commerce clause* by directly regulating wholly out-of-state commerce. ***HN3***[] We review the dismissal de novo, "accepting [AAM's] well-pleaded allegations as true and drawing all reasonable inferences in [AAM's] favor." *Schilling v. Schmidt Baking Co., 876 F.3d 596, 599 (4th Cir. 2017)*.

A.

The Dormant *Commerce Clause* and the Principle Against Extraterritoriality

HN4[] Implicit **[**6]** in the constitutional allocation of the "Power . . . To regulate Commerce . . . among the several States," *U.S. Const. art. I, § 8, cl. 3*, to the federal government is a corollary "constraint on the power of the States to enact legislation that interferes with or burdens interstate commerce." *Brown v. Hovatter, 561 F.3d 357, 362 (4th Cir. 2009)*. This doctrine, known as the "dormant" *commerce clause*, "is driven by concern about economic protectionism" and seeks to prevent state "regulatory measures designed to benefit in-state economic interests by burdening out-of-state competitors." *Id. at 363* (quoting *Dep't of Revenue of Ky. v. Davis, 553 U.S. 328, 337-38, 128 S. Ct. 1801, 170 L. Ed. 2d 685 (2008))*.

HN5[] The principle against extraterritoriality as it relates to the dormant *commerce clause* is derived from the notion that "a State may not regulate commerce occurring wholly outside of its borders." *Star Sci., Inc. v. Beales, 278 F.3d 339, 355 (4th Cir. 2002)* (citing *Healy v. Beer Inst., 491 U.S. 324, 335-36, 109 S. Ct. 2491, 105 L. Ed. 2d 275 (1989)*; *Brown-Forman Distillers Corp. v. N.Y. State Liquor Auth., 476 U.S. 573, 582-83, 106 S. Ct. 2080, 90 L. Ed. 2d 552 (1986)*; *Edgar v. MITE Corp., 457 U.S. 624, 642-43, 102 S. Ct. 2629, 73 L. Ed. 2d 269 (1982)* (plurality opinion)). The principle "reflect[s] the Constitution's special concern both with the maintenance of a national economic union unfettered by state-imposed limitations on interstate commerce and with the autonomy of the **[*668]** individual States within their respective spheres." *Healy, 491 U.S. at 335-36* (footnote omitted). A state law violates the extraterritoriality principle if it either expressly applies to out-of-state commerce, *see Carolina Trucks & Equip., Inc. v. Volvo Trucks of N. Am., Inc., 492 F.3d 484, 491-92 (4th Cir. 2007)*, or has that "practical effect," regardless of the legislature's intent, *Star Sci., 278 F.3d at 355*.

1.

One of **[**7]** the earliest cases to address the extraterritoriality principle as it relates to the dormant *commerce clause* is *Baldwin v. G.A.F. Seelig, Inc., 294 U.S. 511, 55 S. Ct. 497, 79 L. Ed. 1032 (1935)*. The New York law at issue in *Baldwin* required milk dealers to pay a minimum amount to milk producers, even when the milk was purchased outside New York. *See id. at 519*. The parties agreed that "New York ha[d] no power to project its legislation into Vermont by regulating the price to be paid in that state for milk acquired there." *Id. at 521*. In holding that the law violated the dormant *commerce clause*, the Supreme Court observed that the law essentially operated as a duty on milk produced in other states and therefore unlawfully burdened interstate commerce. *See id. at 521-22*.

A plurality of the Court expounded on this concept nearly half a century later in *Edgar v. MITE Corp., 457 U.S. 624, 102 S. Ct. 2629, 73 L. Ed. 2d 269 (1982)* (plurality opinion). The Illinois law challenged in *Edgar* required "any takeover offer for the shares of a target company [to] be registered with the Secretary of State" if Illinois shareholders owned at least 10% of the company or if the company was organized under Illinois law or headquartered in the state, among other conditions. *Id. at 626-27* (internal footnote omitted). The Illinois Secretary of State had the authority "to deny registration to a tender offer" under certain circumstances. **[**8]** *Id. at 627*. The plurality held that the Illinois law violated the dormant *commerce clause* by "directly regulat[ing] transactions which take place across state lines, even if wholly outside the State of Illinois" because it permitted the Illinois Secretary of State to reject a tender offer even as to those shares not owned by Illinois shareholders. *Id. at 641-42*. In other words, the law granted the Illinois Secretary of State the ability to intervene in transactions between an out-of-state acquiring company and out-of-state shareholders of the target company when neither the acquiring company nor the target company's shareholders had connections to Illinois.

The Court favorably referenced both *Baldwin* and *Edgar* in *Brown-Forman Distillers Corp. v. New York State Liquor Authority, 476 U.S. 573, 106 S. Ct. 2080, 90 L. Ed. 2d 552 (1986)*. The New York law struck down in *Brown-Forman* "requir[ed] distillers to affirm that they will make no sales anywhere in the United States at a price lower than the posted price in New York," which prohibited the distillers from lowering their prices in other states. *Id. at 579-80*. The Court noted that the law regulated commerce in other states by controlling liquor prices in those states, which would "effectively force [the distiller] to abandon its promotional allowance program in States in which that program is legal, or force those other States **[**9]** to alter their own regulatory schemes in order to permit [the distiller] to lower its New York prices without violating the affirmation laws of those States." *Id. at 583-84*. As a result, the law was invalid. *See id. at 584*.

[*669] Just three years later, the Supreme Court considered a similar Connecticut law in *Healy v. Beer Institute, 491 U.S. 324, 109 S. Ct. 2491, 105 L. Ed. 2d 275 (1989)*. The law, which was aimed at preventing Connecticut residents from crossing state lines to purchase cheaper beer, required beer producers to affirm that their Connecticut prices were, "at the moment of posting, no higher than the prices at which those products are sold in the bordering States." *Id. at 326*. From its "cases concerning the extraterritorial effects of state economic regulation," *id. at 336* (citing *Brown-Forman, 476 U.S. at 579, 581-83*; *Edgar, 457 U.S. at 642-43*; *Baldwin, 294 U.S. at 528*), the Supreme Court outlined the principle against extraterritoriality:

1) ***HN6***[] A state statute may not regulate "commerce that takes place wholly outside of the State's borders, whether or not the commerce has effects within the State." *Id. at 336*. Specifically, a state law may not have "the practical effect of establishing 'a scale of prices for use in other states.'" *Id.* (quoting *Baldwin, 294 U.S. at 528*).

2) ***HN7***[] "A statute that directly controls commerce occurring wholly outside the [legislating state's] boundaries . . . is invalid regardless of whether **[**10]** the statute's extraterritorial reach was intended by the legislature." *Id.* The statute's "practical effect" is the focus of the inquiry. *Id.*

3) ***HN8***[] In evaluating a statute's "practical effect," the Court considers "not only . . . the consequences of the statute itself, but also . . . how the challenged statute may interact with the legitimate regulatory regimes of other States and what effect would arise if . . . every[] State adopted similar legislation." *Id. at 336*. This is because "the *Commerce Clause* protects against inconsistent legislation arising from the projection of one state regulatory regime into the jurisdiction of another State." *Id. at 336-37*.

Applying these three directives, the Court invalidated the Connecticut law due to its "undeniable effect of controlling commercial activity occurring wholly outside the boundary of the State." *Id. at 337*. The Court also emphasized that "the practical effect of this affirmation law, in conjunction with the many other beer-pricing and affirmation laws that have been or might be enacted throughout the country, is to create just the kind of competing and interlocking local economic regulation that the *Commerce Clause* was meant to preclude." *Id.*

2.

Maryland asserts that in *Pharmaceutical Research & Manufacturers of America v. Walsh, 538 U.S. 644, 669, 123 S. Ct. 1855, 155 L. Ed. 2d 889 (2003)*, the Supreme Court limited the **[**11]** principle against extraterritoriality in the dormant *commerce clause* context to price affirmation statutes. The Maine law at issue in *Walsh* established a program through which the state would "attempt to negotiate rebates with drug manufacturers to fund the reduced price for drugs offered to [program] participants." *Id. at 649*. The petitioner challenged the law on the basis "that the rebate requirement constitutes impermissible extraterritorial regulation." *Id. at 669*. The Supreme Court concluded that "[t]he rule that was applied in *Baldwin* and *Healy*" did not apply to the rebate program because "unlike price control or price affirmation statutes, '[the program] does not regulate the **[*670]** price of any out-of-state transaction, either by its express terms or by its inevitable effect.'" *Id.* (quoting *Pharm. Research & Mfrs. of Am. v. Concannon, 249 F.3d 66, 81-82 (1st Cir. 2001))*.

Maryland's reading of this language, while adopted by two of our sister circuits, is too narrow. The Supreme Court's statement does not suggest that "[t]he rule that was applied in *Baldwin* and *Healy*" applies *exclusively* to "price control or price affirmation statutes." *See* *Walsh, 538 U.S. at 669*. Instead, the Court's statement emphasizes that ***HN9***[] the extraterritoriality principle is violated if the state law at issue "regulate[s] the price of any out-of-state **[**12]** transaction, either by its express terms or by its inevitable effect." *Id.* The Maine program challenged in *Walsh* directly affected only transactions in Maine and did not impact the prices drug manufacturers could charge elsewhere. Further, the Illinois statute at issue in *Edgar*, which permitted the Secretary of State to block the takeover of a target company with certain connections to Illinois, clearly was not a price control or price affirmation statute, but the Court nonetheless concluded that it ran afoul of the principle against extraterritoriality. *See* *457 U.S. at 627, 641-42*; *see also* *Healy, 491 U.S. at 333 n.9* (stating that *Edgar* "significantly illuminates the contours of the constitutional prohibition on extraterritorial legislation"). We therefore reject Maryland's argument that *Walsh* limited the extraterritoriality principle only to price affirmation statutes.

B.

AAM's Challenge to the Act

We now turn to the merits of AAM's dormant *commerce clause* challenge. AAM asserts that the Act directly regulates the prices charged for prescription drugs in out-of-state transactions, even though its provisions are triggered only when one of those drugs is available for sale in Maryland. Maryland acknowledges that the Act is intended to reach the manufacturers' **[**13]** conduct in the series of wholesale transactions that occur "upstream" from consumer retail sales but argues that these indirect effects do not violate the dormant *commerce clause*'s prohibition on direct regulation.

We agree with AAM that the district court erroneously upheld the Act under the dormant *commerce clause*. First, the Act is not triggered by any conduct that takes place within Maryland. Second, even if it were, the Act controls the prices of transactions that occur outside the state. Finally, the Act, if similarly enacted by other states, would impose a significant burden on interstate commerce involving prescription drugs. All of these factors combine to create a violation of the dormant *commerce clause*.

1.

The Act is Not Limited to Sales Wholly Within Maryland

In reaching its conclusion, the district court emphasized that the Act's provisions "are triggered only when there is a drug . . . made available for sale *within* the state." J.A. 486 (emphasis in original). The district court likened the Act to the Virginia statute at issue in *Star Scientific*, but this comparison is inapposite. *See* *id. at 485-86*. The Virginia statute at issue in *Star Scientific* did not apply to sales to distributors, retail chains, or consumers *outside Virginia* ***[**14]*** . Instead, it specifically required tobacco manufacturers selling cigarettes *in Virginia* to join a nationwide settlement agreement or place into escrow a fee of two cents per cigarette actually sold in the state. *See* *Star Sci., 278 F.3d at* ***[*671]*** *346*. The relevant conduct penalized by that statute was the sale of a cigarette *in Virginia*.

In contrast, here, ***HN10***[] the Act's plain language allows Maryland to enforce the Act against parties to a transaction that did not result in a single pill being shipped to Maryland. Specifically, the Act prohibits "price gouging in the sale of an essential offpatent or generic drug." *Md. Code Ann., Health—General § 2-802(a)*. "Essential offpatent or generic drug" is defined, in part, as a drug "[t]hat is made available for sale in [Maryland]." *Id. § 2-801(b)(1)(iv)*. This "made available for sale" language does not limit the Act's application to sales that actually occur within Maryland, nor does it restrict the Act's operation to the context of a resale transaction with a Maryland consumer. Indeed, Maryland acknowledges that the Act is intended to reach sales upstream from consumer retail sales. *See* Oral Argument at 20:45-55, *Ass'n for Accessible Meds. v. Frosh*, No. 17-2166 (4th Cir. Jan. 24, 2018), http://www.ca4.uscourts.gov/oral-argument/listen-to-oral-arguments **[**15]** ("[T]he conduct that violates the statute could manifest itself in a wholesale transaction that occurs out-of-state.").[3] Such "upstream" sales would occur almost exclusively outside Maryland.

Therefore, ***HN11***[] the Act targets conduct that occurs entirely outside Maryland's borders, a conclusion supported by the Act's prohibition of a manufacturer's use of the defense that it did not directly sell to a consumer in Maryland. *See Md. Code Ann., Health—General § 2-803(g)* ("[A] person who is alleged to have violated a requirement of this subtitle may not assert as a defense that the person did not deal directly with a consumer residing in [Maryland]."). The district court thus erred in relying on the Act's "made available for sale" language to uphold the Act.

2.

The Act Impacts Transactions that Occur Wholly Outside Maryland

Even if the Act did require a nexus to an actual sale in Maryland, ***HN12***[] it is nonetheless invalid because it still controls the price of transactions that occur wholly outside the state. *See Brown-Forman, 476 U.S. at 580* ("The mere fact that the effects of New York's ABC Law are triggered only by sales of liquor within the State of New York . . . does not validate the law if it regulates the out-of-state transactions of distillers who sell in-state."). **[**16]** ***HN13***[] The Act, by its own terms, is not fixated on the price the Maryland consumer ultimately pays for the drug. Instead, the lawfulness of a price increase is measured according to the price the manufacturer or wholesaler charges *in the initial sale of the drug*. An "unconscionable" price increase is one that "[i]s excessive and not justified by the cost of producing the drug or the cost of appropriate expansion of access to the drug to promote public health." *Md. Code Ann., Health—General § 2-801(f)*. Significantly, the retailers that sell the drug directly to the consumer cannot be held liable under the Act; only "[a] manufacturer or wholesale distributor" is prohibited from "engag[ing] in price gouging." *Id. § 2-802(a)*; *see id. § 2-803(g)*. This structure makes clear that the conduct the Act targets is the upstream pricing and sale of prescription drugs, and the parties agree that nearly all of these transactions occur outside Maryland.[4]

[*672] Therefore, ***HN14***[] the Act effectively seeks to compel manufacturers and wholesalers to act in accordance with Maryland law outside of Maryland. This it cannot do. *See Healy, 491 U.S. at 336* (***HN15***[] "[T]he '*Commerce Clause* . . . precludes the application of a state statute to commerce that takes place wholly outside of the State's borders, whether or not the commerce **[**17]** has effects within the State' . . . ." (quoting *Edgar, 457 U.S. at 642-43*)); *Rocky Mountain Farmers Union v. Corey, 730 F.3d 1070, 1103 (9th Cir. 2013)* (explaining that ***HN16***[] "[s]tates may not mandate compliance with their preferred policies in wholly out-of-state transactions" (citing *Walsh, 538 U.S. at 669*)).

More importantly, ***HN17***[] the Act is effectively a price control statute that instructs manufacturers and wholesale distributors as to the prices they are permitted to charge in transactions that do not take place in Maryland. This is precisely the conduct "[t]he rule that was applied in *Baldwin* and *Healy*" aims to prevent. *Walsh, 538 U.S. at 669* (concluding that the Maine law at issue was valid in part because "Maine does not insist that manufacturers sell

[3] Thus, even if we applied a limiting construction to require a consumer sale in Maryland prior to enforcement of the Act, Maryland's own interpretation of the Act clarifies that it targets not a consumer retail sale but the manufacturer's initial sale of the drug.

[4] AAM challenges the Act only as it applies to these out-of-state sales.

their drugs to a wholesaler for a certain price"). We acknowledge that the Act does not establish a price schedule for prescription drugs, nor does it aim to tie the prices charged for prescription drugs in Maryland to the prices at which those drugs are sold in other states. *See* Healy, 491 U.S. at 338; Brown-Forman, 476 U.S. at 582. But like the laws struck down in Healy and Brown-Forman, the Act attempts to dictate the price that may be charged elsewhere for a good. Any legitimate effects the Act may have in Maryland are insufficient to protect the law from invalidation. *See* Brown-Forman, 476 U.S. at 580.

3.

The Act Implicates a Price Control as Opposed to **[**18]** an Upstream Pricing Impact

Maryland attempts to justify the Act by arguing that its out-of-state pricing implications are merely "the upstream pricing impact of a state regulation." Freedom Holdings, Inc. v. Spitzer, 357 F.3d 205, 220 (2d Cir. 2004). But the Act is unlike the statute at issue in *Freedom Holdings*, which banned the importation of cigarettes manufactured by companies that did not comply with an escrow law similar to the one we upheld in *Star Scientific. See* id. at 211-14. The importers in *Freedom Holdings* argued that the New York law regulated out-of-state commerce by requiring manufacturers to sell cigarettes at a higher price "to purchasers in sales transactions that occur wholly outside [New York]." Id. at 220. The Second Circuit rejected the argument, holding that "[t]he extraterritorial effect described by [the importers] amounts to no more than the upstream pricing impact of a state regulation" and observing that "a similar pricing impact might result from any state regulation of a product." *Id.* The price change caused by the New York law at issue in *Freedom Holdings* -- unlike that mandated by the Act here -- was the result of natural market forces and was not artificially imposed by the laws of another state. By contrast, ***HN18***[] the Act aims to override prescription **[**19]** drug manufacturers' reaction to the market and to regulate the prices these manufacturers charge for their products. This is more than an "upstream pricing impact" -- it is a price control.

Therefore, ***HN19***[] the fundamental problem with the Act is that it "regulate[s] the price of [an] out-of-state transaction." Walsh, 538 U.S. at 669. The Act instructs prescription drug manufacturers **[*673]** that they are prohibited from charging an "unconscionable" price in the initial sale of a drug, which occurs outside Maryland's borders. Maryland cannot, even in an effort to protect its consumers from skyrocketing prescription drug costs, impose its preferences in this manner. The "practical effect" of the Act, much like the effect of the statutes struck down in *Brown-Forman* and *Healy*, is to specify the price at which goods may be sold beyond Maryland's borders. *See* Healy, 491 U.S. at 336 (***HN20***[] "The critical inquiry is whether the practical effect of the regulation is to control conduct beyond the boundaries of the State." (citing Brown-Forman, 476 U.S. at 579)). The district court erred by failing to account for this impact.

4.

The Act Burdens Interstate Commerce in Prescription Drugs

The Act's significant scope is further illuminated by the burden similar legislation would place on interstate **[**20]** commerce. *See* Healy, 491 U.S. at 336 (***HN21***[] "[T]he practical effect of the statute must be evaluated not only by considering the consequences of the statute itself, but also by considering how the challenged statute may interact with the legitimate regulatory regimes of other States and what effect would arise if not one, but many or every, State adopted similar legislation."). Because the Act targets wholesale rather than retail pricing, an analogous restriction imposed by a state other than Maryland has the potential to subject prescription drug manufacturers to conflicting state requirements. *See* id. at 336-37 ("Generally speaking, ***HN22***[] the Commerce Clause protects against inconsistent legislation arising from the projection of one state regulatory regime into the jurisdiction of another State."); Brown-Forman, 476 U.S. at 583-84. And the Act's relatively subjective definition of what constitutes an unlawful price increase only exacerbates the problem. If multiple states enacted this type of legislation, then a manufacturer may consummate a transaction in a state where the transaction is fully permissible, yet still be subject to an enforcement action in another state (such as Maryland) wholly unrelated to the transaction.

In upholding the Act, the district court referred **[**21]** to this conundrum as a "practical problem" and suggested that prescription drug manufacturers could simply modify their distribution systems to track the shipments of drugs bound for Maryland and isolate those drugs in order to comply with the Act. J.A. 489-90. It is indeed true that ***HN23***[] the dormant *commerce clause* does not "protect[] the particular structure or methods of operation in a retail market." *Exxon Corp. v. Governor of Md., 437 U.S. 117, 127, 98 S. Ct. 2207, 57 L. Ed. 2d 91 (1978)*. But the Act requires manufacturers and wholesale distributors to do more than alter their distribution channels. It sets prescription drug prices in a way that "interfere[s] with the natural function of the interstate market" by superseding market forces that dictate the price of a good. *McBurney v. Young, 569 U.S. 221, 235, 133 S. Ct. 1709, 185 L. Ed. 2d 758 (2013)* (quoting *Hughes v. Alexandria Scrap Corp., 426 U.S. 794, 806, 96 S. Ct. 2488, 49 L. Ed. 2d 220 (1976))*. ***HN24***[] If Maryland compels manufacturers to sell prescription drugs in the initial transaction at a particular price, but another state imposes a different price, then manufacturers could not comply with both laws in a single transaction. The manufacturers' compliance would require more than modification of their distribution systems; it would force them to enter into a separate transaction for each state in order to tailor their conduct so as not to **[*674]** violate any state's price restrictions. Even then, if a drug **[**22]** from a transaction addressed to another state were later made available for sale in Maryland, the Act would permit Maryland to penalize the manufacturer. The potential for "the kind of competing and interlocking local economic regulation that the *Commerce Clause* was meant to preclude" is therefore both real and significant. *Healy, 491 U.S. at 337*. We are thus pressed to invalidate the Act.

5.

In sum, we hold that ***HN25***[] the Act is unconstitutional under the dormant *commerce clause* because it directly regulates transactions that take place *outside Maryland*. We therefore reverse the district court's dismissal of this claim and remand this matter to the district court with instructions to enter judgment in favor of AAM.

To be clear, we in no way mean to suggest that Maryland and other states cannot enact legislation meant to secure lower prescription drug prices for their citizens. Indeed, the Supreme Court upheld a Maine law with that very aim in *Walsh. See 538 U.S. at 653-54, 669-70*.

Although we sympathize with the consumers affected by the prescription drug manufacturers' conduct and with Maryland's efforts to curtail prescription drug price gouging, we are constrained to apply the dormant *commerce clause* to the Act. Our dissenting colleague suggests that by doing so, we imply that prescription **[**23]** drug manufacturers have a constitutional right to engage in price gouging. *See post* at 57-58. This is a sweeping and incorrect conclusion to draw from our holding that Maryland is prohibited from combating prescription drug price gouging *in the manner utilized by the Act*. Prescription drug manufacturers are by no means "constitutionally entitled," *id.* at 57, to engage in abusive prescription drug pricing practices. But Maryland must address this concern via a statute that complies with the dormant *commerce clause of the U.S. Constitution*.

III.

Conclusion

For the foregoing reasons, we reverse the district court's dismissal of AAM's dormant *commerce clause* challenge and remand with instructions to enter judgment in favor of AAM. AAM's request for an injunction pending this appeal is denied as moot.

REVERSED AND REMANDED WITH INSTRUCTIONS

Dissent by: WYNN

Dissent

WYNN, Circuit Judge, dissenting:

After a series of high-profile incidents in which several generic pharmaceutical manufacturers imposed multiple-thousand-fold price increases for single-source generic drugs that treat rare and life-threatening conditions, the Maryland legislature enacted legislation prohibiting "unconscionable" price increases for certain generic drugs "made available for sale" to Maryland consumers. **[**24]** *Md. Code Ann. Health-Gen. §§ 2-801 to - 803* (2017). But a trade association representing generic pharmaceutical manufacturers—which styles itself the "Association for Accessible Medicines" ("AAM" or "Plaintiff")—brought this action to enjoin the Maryland statute on grounds that it violates the dormant *Commerce Clause* and is unconstitutionally vague. The district court upheld Maryland's authority under the dormant *Commerce Clause* to protect its citizens from the abusive pricing practices at issue. I agree with the district court's holding, but my colleagues in the majority hold otherwise.

[*675] In particular, the majority opinion holds that the Maryland statute violates the dormant *Commerce Clause*'s "extraterritoriality doctrine" to the extent that it applies to sales of generic drugs between manufacturers and distributors consummated outside of Maryland, even when the generic drugs involved in such out-of-state transactions are subsequently resold to Maryland consumers. *Ante* at 13-15. Put differently, the majority opinion concludes that the *Commerce Clause* bars Maryland from protecting its citizens against unconscionable pricing practices by out-of-state generic drug manufacturers who distribute their drugs to Maryland's citizens through an out-of-state intermediary. That conclusion **[**25]** conflicts with the approach taken by several of our sister circuits in deciding whether a state statute's extraterritorial reach violates the dormant *Commerce Clause*.

Contrary to the majority opinion's conclusion, Maryland is authorized under its "general police powers to regulate matters of legitimate local concern." *Lewis v. BT Inv. Mgrs., Inc., 447 U.S. 27, 36, 100 S. Ct. 2009, 64 L. Ed. 2d 702 (1980)* (internal quotation marks omitted). Here, Maryland legitimately targeted generic drug pricing practices specifically designed to prey on the special vulnerabilities of a defenseless group of Maryland's citizens. Simply put, the Maryland statute—which applies equally to in-state and out-of-state manufacturers and distributors—does not implicate the concerns that lie at the heart of the Supreme Court's dormant *Commerce Clause* jurisprudence: economic protectionism, discrimination against interstate commerce, and State regulation of streams of transactions that never cross through the State's borders. *See* *Dep't of Revenue of Ky. v. Davis, 553 U.S. 328, 337-38, 128 S. Ct. 1801, 170 L. Ed. 2d 685 (2008)*. Accordingly, I respectfully dissent.

I.

Two recent reports by the federal government regarding generic drug pricing gave rise to Maryland taking action to protect its citizens from abusive pricing practices by a subset of generic drug manufacturers. Both reports were prompted by media stories highlighting **[**26]** significant increases in the price of certain generic drugs. *See, e.g.*, Jonathan D. Alpern *et al.*, High-Cost Generic Drugs—Implications for Patients and Policy Makers, 371 N. Engl. J. Med. 1859, 1859-60 (2014); Andrew Pollack, *Once a Neglected Treatment, Now an Expensive Specialty Drug*, N.Y. Times, Sept. 21, 2015, at B1.

The first report, prepared by the Government Accountability Office ("GAO") in response to a request by a bipartisan group of legislators, examined pricing trends for generic drugs covered by the Medicare program's outpatient prescription drug benefit, commonly referred to as "Medicare Part D." *See* U.S. Gov't Accountability Off., GAO-16-706, Generic Drugs Under Medicare: Part D Generic Drug Prices Declined Overall, but Some Had Extraordinary Price Increases (2016) [hereinafter, "GAO Report"]. The GAO Report found that for a basket of 1,441 "established generic drugs"—"drugs that were continuously billed under Medicare Part D . . . during [the] study period"—prices fell, on average, 0.7 percent per quarter from the first quarter of 2010 through the second quarter of 2015. *See id.* at 9. Although prices for established generic drugs generally declined during the 2010 to 2015 period, **[**27]** the GAO Report further found that "315 of the 1,441 established drugs experienced an extraordinary price increase—a price increase of at least 100 percent." *Id.* at 12. Notably, the number of established drugs experiencing a price increase of at least 100 percent *increased* during the five-year study period: **[*676]** 45 drugs experienced such an increase between the first quarter of 2010 and the first quarter of 2011, whereas 103 drugs experienced such an increase between the first quarter of 2014 and the first quarter of 2015. *Id.* at 12, 18.

A smaller subset of established generic drugs experienced even more "extraordinary" price increases—48 such drugs experienced a price increase of 500 percent or greater and 15 such drugs experienced a price increase of 1,000 percent or greater. *Id.* at 14. The vast majority of these extraordinary price increases persisted throughout the term of the study. *Id.* at 18.

Most of the established generic drugs experiencing extraordinary price increases were not among the 100 most heavily prescribed established generic drugs covered under Medicare Part D. To that end, stakeholders interviewed by GAO reported that "[i]f a generic drug serves a small [patient] population, . . . it [is] more susceptible to **[**28]** price increases" because "there may be little financial incentive for a [competing] manufacturer to enter the market" and thus less "downward pressure on price." *Id.* at 24. Stakeholders also reported that supplier and buyer consolidation can drive price increases, as can difficulty manufacturing a particular generic drug. *Id.* The second report, prepared by the United States Senate Special Committee on Aging, investigated and analyzed several "abrupt and dramatic" price increases for certain generic drugs. *See* Senate Special Comm. on Aging, *Sudden Price Spikes in Off- Patent Prescription Drugs: The Monopoly Business Model that Harms Patients, Taxpayers, and the U.S. Health Care System* 3 (2016) [hereinafter, "Senate Report"]. The Senate Report examined the circumstances surrounding large price increases for seven generic drugs, all of which had lacked patent protection for decades, sold by four generic pharmaceutical companies—two of which were formed and managed by sinceconvicted investor Martin Shkreli.[1]*Id.* at 5-6. All seven price increases exceeded 300 percent, with five of the price increases at or exceeding 2,000 percent. *Id.* at 6.

The Senate investigation **[**29]** revealed that the four companies followed a common "business model" in acquiring and marketing the seven generic drugs. *Id.* at 4. In particular, each case involved a (1) single-source generic drug (2) distributed through a "closed distribution system" that (3) was essential to—the "gold standard" for—(4) treating a rare condition. *Id.* at 4, 30-31. Each of these four characteristics allowed the company to "exercise de facto monopoly pricing power, and then impose and protect astronomical price increases," the Senate committee found. *Id.* at 4.

For example, single-source drugs distributed through closed-distribution systems—which make it harder for potential entrants to bring to market a competitive product or attract and retain patients—are unlikely to face competition, thereby allowing sellers to charge monopoly prices, notwithstanding the generic drug's lack of patent protection. *Id.* at 4, 30-31. Likewise, when a generic drug is the "gold standard" for treating a particular condition, physicians continue to prescribe the drug, even in the face of substantial price increases. *Id.* at 30; *see also, e.g.*, *id.* at 56 (chief executive of one generic firm explaining that it had monopoly "pricing **[*677]** power" for a generic drug that is the standard-of-care for **[**30]** treating a rare and deadly disease because, absent the drug, patients would face "liver failure or a liver transplant or even death"). And because the generic drugs treat a "rare" condition "the patient population dependent upon them [is] too small to organize effective opposition to the price increase." *Id.* at 31.

The Senate Report found that the large price increases "devastated patients . . . across the nation," many of whom were "forced to go without vital medicine[s]" or switch to alternative, potentially less effective, therapies. *Id.* at 7-8. The price increases also harmed providers. For example, the Johns Hopkins Health System, which is headquartered in Maryland, reported that it lost nearly $1 million in 2015 alone as a result of several-hundred-fold price increases for two of the drugs. *Id.* at 6-8. The price increases also led to increases in spending by governmental health care programs, including state Medicaid programs. *Id.* at 110. The report further concluded that existing federal competition laws were inadequate to prevent the dramatic price increases and suggested several statutory and regulatory remedies. *Id.* at 116-25.

After reviewing these reports, the Maryland legislature decided to enact legislation to combat what **[**31]** it concluded were abusive pricing practices by certain generic drug suppliers. To that end, on May 27, 2017, the

---

[1] On March 9, 2018, the U.S. District Court for the Southern District of New York sentenced Shkreli to seven years' imprisonment for securities fraud and conspiracy to commit securities fraud. Stephanie Clifford, *Citing "Multitude of Lies," Judge Sentences Shkreli to 7 Years in Fraud Case*, N.Y. Times, Mar. 10, 2018, at B2.

Maryland General Assembly passed HB 631. That statute, which went into effect on October 1, 2017, prohibits manufacturers and distributors from engaging in "price gouging" in the sale of an "essential off-patent or generic drug." *Md. Code Ann. Health-Gen. § 2-802(a)*. The statute exempts "wholesale distributors" from liability, however, if they impose a price increase that "is directly attributable to additional costs for the drug imposed on the wholesale distributor by the manufacturer of the drug." *Id. § 2-802(b)*.

HB 631 defines "essential off-patent or generic drug" as a drug: (1) "[f]or which all exclusive marketing rights, if any, granted under the federal *Food, Drug, and Cosmetic Act*, *§ 351 of the federal Public Health Service Act*, and federal patent law have expired"; (2) that is listed on the Model List of Essential Medicines, as adopted by the World Health Organization, or that has been has been designated, according to specified criteria, an "essential medicine" by the Maryland Secretary of Health; (3) "[t]hat is actively manufactured and marketed for sale in the United States by three or fewer manufacturers"; and **[**32]** (4) that is "made available for sale" in the State of Maryland. *Id. § 2-801(b)(1)*. "Essential off-patent or generic drug" also includes any "drug-device combination product used for the delivery of a drug" for which all exclusive marketing rights have expired. *Id. § 2-801(b)(2)*. Although HB 631 regulates only those generic drugs "made available for sale" in Maryland, "a person who is alleged to have violated [the statute] may not assert as a defense that the person did not deal directly with a consumer residing in the State." *Id. §§ 2-801(b)(1)*, *2-803(g)*.

The statute defines "price gouging" as an "unconscionable increase in the price of a prescription drug." *Id. § 2-801(c)*. Tracking many aspects of the "business model" identified in the Senate Report, the statute provides that an "unconscionable increase" means an increase in price that (1) "[i]s excessive and not justified by the cost of producing the drug or the cost of appropriate expansion of access to the drug to promote public health"; and (2) "[r]esults in consumers for whom the drug has been prescribed having no meaningful choice about whether to purchase the drug at an excessive price" due to the "importance of **[*678]** the drug to their health" and insufficient market competition. *Id. § 2-801(f)*.

HB **[**33]** 631 authorizes the Attorney General to petition a Maryland circuit court to restrain or enjoin violations of the statute; restore money to consumers obtained as a result of violations; require manufacturers that have engaged in "price gouging" to provide the drug to participants in any state health plan or state health program at the drug's last permissible price for a period of up to one year; and order civil penalties of up to $10,000. *Id. § 2-803(d)*.

HB 631 also confers monitoring authority on the State's Medicaid program, the Maryland Medical Assistance Program (the "Medicaid Program"). In particular, the Medicaid Program may notify the Attorney General of certain price increases to an "essential off-patent or generic drug." Specifically, the Medicaid Program may notify the Attorney General if (1) a price increase, either by itself or together with other price increases, would cause a fifty percent or more increase, as measured within a one year time period, to the wholesale acquisition cost or price paid by the Medicaid Program; and (2) it would cost $80 at the wholesale acquisition cost to obtain a thirty day supply of the maximum recommended dosage, a full course of treatment, or if the **[**34]** drug is not made available in such quantities, it would exceed $80 at the wholesale acquisition cost to obtain a thirty day supply or full course of treatment. *Id. § 2-803(a)*. After receiving notification of such an increase, the Attorney General may demand that the manufacturer imposing the increase submit documentation that itemizes the cost of production; provides explanation for the price increase, including information related to any expenditures made to "expand access to the drug," as well as the associated benefits to the public health; and any other relevant information. *Id. § 2-803(b)*.

II.

On appeal, AAM argues that HB 631, as applied to any transaction consummated outside of Maryland's borders, violates the *Commerce Clause*, regardless of whether the drugs involved in such transaction later are resold in Maryland. Before addressing the merits of that claim, it is first necessary to determine what the Maryland legislature intended when it limited HB 631's extraterritorial reach to generic drugs "made available for sale" in Maryland. *Id. § 2-801(b)(1)*. The district court held, correctly in my view, that HB 631 is "triggered only when there is a drug . . . made available for sale *within* [Maryland]." *Ass'n for Accessible Meds. v. Frosh, No. 17-cv-1860, 2017 U.S. Dist. LEXIS 161168, 2017 WL 4347818, at *6 (D. Md. Sept. 29, 2017)*. **[**35]** The majority opinion, however, concludes that HB 631 "is not triggered by any conduct that takes place within Maryland." *Ante* at 12; *see also id.* at 12-13

("*[Section 2-801(b)(1)](#)*'s] plain language allows Maryland to enforce [HB 631] against parties to a transaction that did not result in a single pill being shipped to Maryland."); *id.* at 14 (asserting that HB 631 does not "require a nexus to an actual sale in Maryland"). For several reasons, I disagree with the views of my colleagues in the majority.

To begin, the majority opinion's conclusion that HB 631 requires no "nexus to an actual sale in Maryland," *id.* at 14, runs contrary to the State's representation as to its own statute's extraterritorial reach. Before the district court and this Court, the State repeatedly asserted that HB 631 "*in no way prohibits* any of AAM's members from selling drugs at a conscience-shocking price to distributors, to the extent that those drugs are later sold in California or in any other state." J.A. 291 (emphasis added); *see also* Appellee's Br. 7 (representing **[*679]** that HB 631 "applies only when drugs are sold in Maryland"). Put differently, the State represents that HB 631 "does not reach, or purport to reach, any stream of commerce **[**36]** *that does not end in Maryland*." Mem. In Support of Defs.' Mot. to Dismiss, at 23, *Ass'n for Accessible Meds. v. Frosh*, No. 17-cv-1860 (D. Md. Aug. 14, 2017), ECF No. 29-1 (emphasis added). Because pre-enforcement constitutional challenges to state statutes—like AAM's dormant *Commerce Clause* challenge—are disfavored, *see* *Wash. State Grange v. Wash. State Republican Party, 552 U.S. 442, 450-51, 128 S. Ct. 1184, 170 L. Ed. 2d 151 (2008)*, and because the State repeatedly has represented that HB 631's reach does not extend to generic drugs that are not later sold in Maryland, principles of federalism and judicial restraint dictate that we construe the statute's reach as not extending to any stream of commerce that does not end in Maryland.

The majority opinion's conclusion that the statute extends to drugs not ultimately sold in Maryland also conflicts with AAM's understanding of the statute's extraterritorial reach. In particular, AAM asserts that HB 631 "reach[es] 'sale[s]' that take place outside of Maryland, *so long as the objects of those sales are later resold in Maryland*." Appellant's Br. 28 (emphasis added). AAM, therefore, has not challenged the State's representation—and the district court's conclusion—that HB 631 is "triggered only when there is a drug . . . made available for sale *within* [Maryland]." *Frosh, 2017 U.S. Dist. LEXIS 161168, 2017 WL 4347818, at *6*. **[**37]** In such circumstances, the majority opinion errs in reaching out to reject the State's construction of its own statute, and AAM's acquiescence in that construction. *Cf.* *United States v. Al-Hamdi, 356 F.3d 564, 571 n.8 (4th Cir. 2004)* ("It is a well settled rule that contentions not raised in the argument section of the opening brief are abandoned.").

Even if the parties disagreed as to whether the statute's applicability requires an in-state sale, Maryland rules of statutory construction—which this Court must follow—support rejecting the majority opinion's broad interpretation of the statute's extraterritorial reach. *See* *Carolina Trucks & Equip., Inc. v. Volvo Trucks of N. Am., Inc., 492 F.3d 484, 489 (4th Cir. 2007)* ("In construing a state law, we look to the rules of construction applied by the enacting state's highest court.").

In *Carolina Trucks*, this Court considered a dormant *Commerce Clause* challenge to a South Carolina statute that prohibited motor vehicle manufacturers from "sell[ing], directly or indirectly, a motor vehicle to a consumer in this State, except through a new motor vehicle dealer." *Id. at 488*. The plaintiff argued that the phrase "in this State" modified only the term "consumer," meaning the statute prohibited "manufacturer-to-consumer sales to South Carolina buyers without regard to the state in which the sales took place"—including sales consummated **[**38]** outside of South Carolina's borders. *Id.* Noting that "[t]he statute is ambiguous as to what 'in this State' modifies," this Court rejected the plaintiff's proposed broad construction of the statute's extraterritorial reach. *Id at 488-89*. In reaching that conclusion, we emphasized that broadly construing the ambiguous statutory language would run contrary to South Carolina rules of statutory construction, which "provide that statutes must not be read to operate outside the state's borders." *Id.*

Like the statute at issue in *Carolina Trucks*, *Section 2-801(b)(1)*'s limitation of HB 631's reach to essential generic drugs "made available for sale" in Maryland is at least ambiguous as to the statute's extraterritorial reach. In particular, this Court reasonably could interpret the statute as **[*680]** applying only to those specific unconscionably priced pills that are sold or resold in Maryland—as the State represents and the district court concluded—or as extending to any unconscionably priced generic drug, some pills of which are "made available for sale" in Maryland, regardless of whether the particular pills subject to an enforcement action actually are sold or resold in Maryland—as the majority concludes. And like South Carolina **[**39]** law, Maryland law dictates that "unless an intent to the contrary is *expressly* stated, acts of the legislature will be presumed not to have any extraterritorial effect." *Chairman of Bd. of Trs. of Emps.' Ret. Sys. v. Waldron, 285 Md. 175, 183-84, 401 A.2d 172 (Md. 1979)* (emphasis added). *Carolina Trucks*, therefore, requires that we reject a "broader interpretation" of *Section 2-801(b)(1)*'s extraterritorial reach, like that adopted by the majority opinion.

Additionally, the majority opinion's broad construction of the statute's extraterritorial reach conflicts with the rule of construction, applied by Maryland courts, requiring a court "whenever reasonably possible, [to] construe and apply a statute to avoid casting serious doubt upon its constitutionality." *R.A. Ponte Architects, Ltd. v. Invs.' Alert, Inc., 382 Md. 689, 857 A.2d 1, 18 (Md. 2004)* (quoting *Becker v. State, 363 Md. 77, 767 A.2d 816, 824 (Md. 2001))*. To be sure, a State statute that regulated sales in streams of commerce not ending in that State would raise significant concerns under the dormant *Commerce Clause*. But that is not a concern here because Maryland law obliges that we interpret the law narrowly—and in accordance with the State's own construction—as applying only to sales in streams of commerce ending in Maryland.

III.

Because HB 631 regulates, at most, sales of essential generic drugs in streams of commerce that end in Maryland, AAM's *Commerce Clause* challenge is without merit.

The *Commerce Clause* entrusts Congress with **[**40]** the authority "[t]o regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes." *U.S. Const. art. I, § 8, cl. 3*. The Supreme Court "has long recognized that this affirmative grant of authority to Congress also encompasses an implicit or 'dormant' limitation on the authority of the States to enact legislation affecting interstate commerce." *Healy v. Beer Inst., 491 U.S. 324, 326 n.1, 109 S. Ct. 2491, 105 L. Ed. 2d 275 (1989)*. To that end, the "dormant" *Commerce Clause* "prohibits States from legislating in ways that impede the flow of interstate commerce." *Star Sci., Inc. v. Beales, 278 F.3d 339, 355 (4th Cir. 2002)*. Although some earlier Supreme Court decisions broadly applied the dormant *Commerce Clause* to invalidate state laws, "modern" dormant *Commerce Clause* jurisprudence "is driven by concern about economic protectionism—that is, regulatory measures designed to benefit in-state economic interests by burdening out-of-state competitors," *Davis, 553 U.S. at 337-38* (internal quotation marks omitted).

AAM does not argue that HB 631 implicates either of these concerns underlying the Supreme Court's modern dormant Commerce Cause jurisprudence: discrimination against interstate commerce or favoring in-state economic interests over out-of-state economic interests. Rather, AAM contends—and the majority opinion agrees—that HB 631 violates the "extraterritoriality doctrine."

The extraterritoriality **[**41]** doctrine—a judge-made doctrine which states that a State may not regulate "commerce occurring wholly outside [its] boundaries," *Healy, **[*681]** 491 U.S. at 336*; *see also Star Sci., 278 F.3d at 355*—has been characterized by our sister circuits as the "the most dormant" of the Supreme Court's dormant *Commerce Clause* jurisprudence, *Energy & Envtl. Legal Inst. v. Epel (EELI), 793 F.3d 1169, 1172 (10th Cir. 2015)* (Gorsuch, J.); *IMS Health Inc. v. Mills, 616 F.3d 7, 29 n.27 (1st Cir. 2010)* ("Extraterritoriality has been the dormant branch of the dormant *Commerce Clause*."), *vacated sub nom. on other grounds IMS Health, Inc. v. Schneider, 564 U.S. 1051, 131 S. Ct. 3091, 180 L. Ed. 2d 911 (2011)*. Indeed, several circuits have questioned the continuing vitality of the extraterritoriality doctrine following the Supreme Court's decision in *Pharmaceutical Research & Manufacturers of America v. Walsh*, which "pointedly referred to [the extraterritoriality doctrine] as 'the rule that was applied in *Baldwin* [*v. G.A.F. Seelig, Inc., 294 U.S. 511, 55 S. Ct. 497, 79 L. Ed. 1032 (1935)*,] and *Healy*.'" *IMS Health, 616 F.3d at 29 n.27*; *EELI, 793 F.3d at 1174-75*; *see also Am. Beverage Ass'n v. Snyder, 735 F.3d 362, 381 (6th Cir. 2013)* (Sutton, J., concurring) (noting that there never has been "a single Supreme Court dormant *Commerce Clause* holding that relied exclusively on the extraterritoriality doctrine to invalidate a state law").

Not only have courts questioned the extraterritoriality doctrine's continuing vitality, judges and commentators also have questioned the constitutional rationale underlying the doctrine, in light of new and expanded modes of interstate commerce, changes to the Supreme Court's interpretation **[**42]** of the *Commerce Clause*, and the availability of potentially more appropriate constitutional provisions, like the *Due Process Clause*, to ensure that States do not unduly extend their regulatory authority beyond their borders. *See Am. Beverage, 735 F.3d at 377-80* (describing the extraterritoriality doctrine as "a relic of the old world with no useful role to play in the new"); Brandon P. Denning, *Extraterritoriality and the Dormant* Commerce Clause*: A Doctrinal Post-Mortem*, 73 La. L. Rev. 979, 998 (2013); Jack L. Goldsmith & Alan O. Sykes, *The Internet and the Dormant* Commerce Clause, 110 Yale L.J. 785, 788-90, 806 (2001). Nevertheless, unless and until the Supreme Court repudiates the extraterritoriality doctrine as a separate line of dormant Commerce Clause jurisprudence, we are constrained to determine whether HB 631, as applied to out-of-state transactions involving essential generic drugs later sold in Maryland, amounts to a regulation of "commerce occurring wholly outside [Maryland's] borders," as the Supreme Court used that phrase in *Healy*.

The majority opinion concludes that HB 631 regulates "*commerce* occurring wholly outside the boundaries of [Maryland]," Healy, 491 U.S. at 336 (emphasis added)—and therefore violates the dormant Commerce Clause—because it "controls the price of *transactions* that occur wholly outside of the state," *ante* at 14 (emphasis added). I, however, conclude that the **[**43]** Supreme Court's Commerce Clause jurisprudence—including its decisions applying the extraterritoriality doctrine, in particular—and this Court's decisions applying that jurisprudence do not support equating a single "transaction" with "commerce," as the majority opinion does in striking down HB 631.

The Supreme Court first defined "commerce," as that term is used in the Commerce Clause, in Gibbons v. Ogden, 22 U.S. (9 Wheat.) 1, 6 L. Ed. 23 (1824) (Marshall, J.). There, the appellee argued that the meaning of commerce is "limit[ed] to traffic, to buying and selling, or the interchange of commodities." Id. at 189. Writing for the Court, Chief Justice Marshall **[*682]** rejected the appellee's narrow definition—which sought to limit the meaning of commerce to a single exchange of goods—stating that "[c]ommerce, undoubtedly, is traffic, but it is something more: it is intercourse. It describes the commercial intercourse between nations, and parts of nations, in all its branches . . ." Id. at 189-90.

Notwithstanding Chief Justice Marshall's expansive definition of commerce in *Gibbons*, between the late Nineteenth Century and the New Deal the Supreme Court narrowly interpreted the term, treating each distinct transaction within a single stream of economic activity as a piece of "commerce." For example, in Carter v. Carter Coal Co., 298 U.S. 238, 56 S. Ct. 855, 80 L. Ed. 1160 (1936), the **[**44]** Supreme Court struck down a federal law establishing boards responsible for determining the wages, hours, and working conditions of coal mine employees, id. at 280-84. The Court concluded that Congress lacked power under the Commerce Clause to regulate coal mine workers' terms of employment because "the relation of employer and employee . . . in all producing occupations is purely local in character." Id. at 303. In reaching this conclusion, the Court rejected the argument that the subsequent sale of the mined coal rendered the terms of the miners' employment in "commerce," and therefore subject to congressional regulation. *Id.* "Mining brings the subject-matter of commerce into existence. Commerce disposes of it," the Court held. Id. at 304. *Carter* is one example of a series of cases excluding "production" and "manufacturing" from the definition of "commerce." *See also, e.g.,* Champlin Ref. Co. v. Corp. Comm'n of State of Okl., 286 U.S. 210, 235, 52 S. Ct. 559, 76 L. Ed. 1062 (1932) ("[Oil] production is essentially a mining operation, and therefore is not a part of interstate commerce, even though the product obtained is intended to be and in fact is immediately shipped in such commerce."); United States v. E.C. Knight Co., 156 U.S. 1, 12, 15 S. Ct. 249, 39 L. Ed. 325 (1895) ("Commerce succeeds to manufacture, and is not a part of it.").

The Supreme Court abandoned the production-commerce distinction in a series of cases **[**45]** beginning with NLRB v. Jones & Laughlin Steel Corp., 301 U.S. 1, 40, 57 S. Ct. 615, 81 L. Ed. 893 (1937) ("[T]he fact that the employees here concerned were engaged in production is not determinative."). As Justice Jackson explained in Wickard v. Filburn, 317 U.S. 111, 63 S. Ct. 82, 87 L. Ed. 122 (1942)—which held that the growing of wheat for personal consumption constituted commercial activity subject to congressional regulation, id. at 128-29—"[w]hether the subject of the regulation in question was 'production,' 'consumption,' or 'marketing,' is . . . not material for purposes of deciding the question of federal power" to regulate commerce under the Commerce Clause, id. at 124. Accordingly, in cases involving the scope of the federal government's power under the Commerce Clause, the Supreme Court now interprets the term "commerce" as encompassing a stream of transactions—including those transactions necessary to produce a good, such as labor contracts, and those by virtue of which the good is distributed and sold to end-users.[2]

[*683] The now-abandoned production-commerce distinction reflected an effort by the Supreme Court to draw a bright line between the regulatory powers of the States and those of the federal government, each of which the Court viewed as "exclusive." *E.C. Knight, 156 U.S. at 11*. The Supreme Court's more expansive interpretation of the meaning of commerce in cases like *Jones & Laughlin* ***[**46]*** and *Wickard*—which returned to Chief Justice Marshall's expansive definition of the term set forth in *Gibbons*—necessarily entailed a narrowing of the restrictions on state regulatory authority imposed by the dormant *Commerce Clause*. To that end, at the same time as the Court authorized the federal government to exercise "power over traditionally 'local' activities," a separate line of Supreme Court decisions empowered the States to "share regulatory authority" in areas previously reserved to the federal government by, in appropriate circumstances, "regulat[ing] commerce that eventually would cross state lines." *Am. Beverage, 735 F.3d at 377-78* (collecting cases). As one commentator explained, "[j]ust as . . . the permissive scope for congressional commerce action has broadened . . . the prohibitive effect of the clause has been progressively narrowed. The trend has been toward sustaining state regulation formerly regarded as inconsistent with Congress' unexercised power over commerce." *Id. at 378* (quoting Wiley Rutledge, A Declaration of Legal Faith 68 (1947)).

Therefore, under the modern definition of "commerce"—which encompasses a stream of transactions—a State regulates "commerce occurring wholly outside of [its borders]," *Healy, 491 U.S. at 336*, if no transactions **[**47]** in that stream take place within the State's borders. Put differently, "State *A* cannot use its [consumer protection] law to make a seller in State *B* charge a lower price to a buyer in *C*." *In re Brand Name Prescription Drugs Antitrust Litig., 123 F.3d 599, 613 (7th Cir. 1997)* (Posner, J.). When viewed in that light, HB 631 does not regulate "commerce"—as the Supreme Court has used that term in *Commerce Clause* cases—occurring wholly outside of Maryland's borders. In particular, HB 631 applies only to upstream sales in streams of transactions that end in Maryland, *see supra* Part II, and therefore does not regulate any stream of economic activity that does not enter Maryland's borders.

That is precisely the conclusion the Seventh Circuit reached in *Brand Name Prescription Drugs*. There, a group of pharmacies alleged that certain prescription drug manufacturers were engaged in a price-fixing conspiracy. *123 F.3d at 602-03*. Like the consumers protected by HB 631, the pharmacies did not purchase the drugs directly from the manufacturers. *Id. at 603*. Rather, the manufacturers sold the drugs to wholesalers, which in turn sold the drugs to the pharmacies. *Id.* Because the Supreme Court has barred "indirect purchasers," like the pharmacies, from seeking relief under the *Sherman Act*, *see* *Ill. Brick Co. v. Illinois, 431 U.S. 720, 736, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, the pharmacies sought relief under **[**48]** Alabama's **[*684]** antitrust statute, *Brand Name Prescription Drugs, 123 F.3d at 612*. Notwithstanding that the sales between manufacturers and wholesalers were consummated outside of Alabama, the Seventh Circuit held that Alabama pharmacies—but not pharmacies in other States—could seek relief under the Alabama statute without violating the extraterritoriality doctrine. *Id. at 613*; *see also* *K-S Pharmacies, Inc. v. Am. Home Prods. Corp., 962 F.2d 728, 731 (7th Cir. 1992)* (Easterbrook, J.) (holding that Wisconsin statute did not violate extraterritoriality doctrine because statute did not regulate "sales outside Wisconsin for *resale outside Wisconsin*" (emphasis added)).

---

[2] The majority opinion notes that in *Pharmaceutical Research & Manufacturers of America v. Walsh, 538 U.S. 644, 123 S. Ct. 1855, 155 L. Ed. 2d 889 (2003)*, the Supreme Court agreed with the First Circuit's conclusion that a statute did not violate the extraterritoriality doctrine because "unlike price control or price affirmation statutes, '[the program] does not regulate the price of any out-of-state *transaction*, either by its express terms or by its inevitable effect,'" *ante* at 10 (emphasis added) (quoting *Walsh, 538 U.S. at 669* (quoting *Pharm. Research & Mfrs. of Am. v. Concannon, 249 F.3d 66, 81-82 (1st Cir. 2001))*). But if a statute does not regulate the price in *any* out-of-state transaction, it certainly does not regulate prices in out-of-state "commerce," a term which the Supreme Court has defined more broadly. Accordingly, *Walsh* did not consider, much less decide, the relevant issue in the instant case—whether a State may regulate an out-of-state "transaction," if that transaction is a component of "commerce," part of which occurs in the State.

In accordance with the meaning of "commerce" adopted in *Jones & Laughlin* and *Wickard* and applied in *Brand Name Prescription Drugs*, none of the three dormant *Commerce Clause* cases upon which the majority opinion relies—*Baldwin, Healy*, and *Brown-Forman Distillers v. N.Y. State Liquor Auth., 476 U.S. 573, 106 S. Ct. 2080, 90 L. Ed. 2d 552 (1986)*, *ante* at 7-10[3]—holds that a nondiscriminatory State law regulating an upstream transaction in a stream of transactions that ends in the State—like HB 631—constitutes an unconstitutional regulation of "wholly" out-of-state "commerce." Rather, each of the three cases turns on the principle concerns animating the Supreme Court's dormant *Commerce Clause* jurisprudence: economic protectionism, discrimination against interstate commerce, and State regulation of a stream of transactions **[**49]** that never crosses through the State's borders.

In *Baldwin*, the Supreme Court considered a New York statute setting minimum prices that New York distributors of milk had to pay to New York dairies. *294 U.S. at 519*. The statute further provided that "there shall be no sale within [New York] of milk bought outside [of New York] unless the price paid to the producers was one that would be lawful upon a like transaction within [New York]." *Id.* The Court concluded that the latter aspect of the statute violated the dormant *Commerce Clause*, explaining "New York has no power to project its legislation into[, for example,] Vermont by regulating the price to be paid in that state for milk acquired there." *Id. at 521*. The Court further held that the statute violated the dormant *Commerce Clause* because it had the purpose of "suppress[ing] or mitigat[ing] the consequences of competition between the states." *Id. at 522*. "If New York, in order to promote the economic welfare of her farmers, may guard them against competition with the cheaper prices of Vermont, the door has been opened to rivalries and reprisals that were meant to be averted by subjecting commerce between the states to the power of the nation," the Court explained. *Id.; Brown-Forman, 476 U.S. at 580* (explaining **[**50]** that *Baldwin* stood for the proposition that "[w]hile a State may seek lower prices for its consumers, it may not insist that producers or consumers in other States surrender whatever competitive advantages they may possess"); *Milk Control Bd. of Pa. v. Eisenberg Farm Prods., 306 U.S. 346, 353, 59 S. Ct. 528,* ***[*685]*** *83 L. Ed. 752 (1939)* (explaining that *Baldwin* struck down the New York law because it "amounted in effect to a tariff barrier set up against milk imported into [New York]."). Accordingly, concerns about economic protectionism—that the New York law was intended to favor in-state interests at the expense of out-of-state producers and consumers—undergirded *Baldwin*.

Likewise, in *Brown-Forman*, the Court struck down a New York "price-affirmation" statute that "requir[ed] every liquor distiller or producer that sells liquor to wholesalers within [New York] to sell at a price that is no higher than the lowest price the distiller charges wholesalers anywhere else in the United States." *476 U.S. at 575*. In the event a distiller desired to lower its posted price in another State, it had to seek approval of a New York regulator. *Id. at 583*. The Court held that the price-affirmation statute violated the *Commerce Clause* because it had the effect of "regulat[ing] out-of-state transactions" by controlling the prices out-of-state distillers **[**51]** could charge to *out-of-state customers*—i.e., for liquor that would *never* be sold in New York. *Id. at 582* ("Once a distiller has posted prices in New York, it is not free to change its prices *elsewhere in the United States* during the relevant month." (emphasis added)). *Brown-Forman*, therefore, struck down the New York statute because it had the effect of regulating the price charged in streams of commerce that *never* entered New York's borders.

Healy also involved a "price-affirmation" statute, pursuant to which Connecticut "require[d] out-of-state shippers of beer to affirm that their posted prices for products sold to Connecticut wholesalers are, as of the moment of the posting, no higher than the prices at which those products are sold in . . . bordering states." *491 U.S. at 326*. The Court concluded that the statute violated the dormant *Commerce Clause* for several reasons. First, the Connecticut statute—like the New York statute at issue in *Brown-Forman*—had the effect of controlling the prices of beer in States other than Connecticut. *Id. at 337-38*. In particular, Connecticut's affirmation and posting requirements, effectively locked in the prices brewers could charge in other States because if they changed their prices in those States **[**52]** as a result of "prevailing market conditions," they would violate the Connecticut statute. *Id. at 338*.

[3] The majority opinion also relies on the Supreme Court's decision in *Edgar v. MITE Corp., 457 U.S. 624, 102 S. Ct. 2629, 73 L. Ed. 2d 269 (1982)*, which addressed whether a state anti-takeover statute violated the Supremacy and *Commerce Clauses of the Constitution*. *Ante* at 7-8. The extraterritoriality analysis in Justice White's opinion in *Edgar*, however, did not receive support from a majority of the Court. *Id. at 626, 641-43* (opinion of White, J.). And the Court subsequently rejected a dormant *Commerce Clause* challenge to a similar, but not identical, state anti-takeover statute. *See CTS Corp. v. Dynamics Corp. of Am., 481 U.S. 69, 87-88, 107 S. Ct. 1637, 95 L. Ed. 2d 67 (1987)*.

Furthermore, the posting and affirmation requirements effectively barred brewers from providing retroactive discounts, like promotional and volume discounts, outside of Connecticut, allowing Connecticut to exert further "control" over prices charged in neighboring states. *Id.* The "Connecticut Statute, like the New York law struck down in *Brown-Forman*," the Court explained, "requires out-of-state shippers to forgo the implementation of competitive pricing schemes in *out-of-state markets* because those pricing decisions are imported by statute into the Connecticut market regardless of local competitive conditions." *Id. at 339* (emphasis added); *see also* *Freedom Holdings, Inc. v. Spitzer, 357 F.3d 205, 221 n.16 (2d Cir. 2004)* ("The [*Healy*] Court held the statute to be unconstitutional because it had the effect of *controlling prices in neighboring states* . . . ." (emphasis added)).

Additionally, the Connecticut statute "discriminate[d] against brewers and shippers of beer engaged in interstate commerce" because such brewers faced greater restraints on their pricing than brewers that operated solely within Connecticut. *Id. at 340-41*. Finally, the Court asserted that the statute impermissibly **[**53]** favored in-state interests at the expense **[*686]** of out-of-state interests by "depriv[ing] businesses and consumers *in other States* of 'whatever competitive advantages they may possess' based on conditions of the local market." *Id. at 339* (emphasis added) (quoting *Brown-Forman, 476 U.S. at 580*). Therefore, like *Baldwin*, concerns about economic protectionism were at the heart of *Healy*.

As then-Judge, now-Justice Gorsuch explained after closely analyzing the Court's opinions in *Baldwin, Brown-Forman*, and *Healy*, "[i]n all three cases, then, the Court . . . faced (1) a price control or price affirmation regulation, (2) linking in-state prices to those charged elsewhere, with (3) the effect of raising costs for out-of-state consumers or rival businesses." *EELI, 793 F.3d at 1172-73*; *see also* *Pharm. Research & Mfrs. of Am. v. Concannon, 249 F.3d 66, 81 (1st Cir. 2001)* ("The statutes in [*Baldwin, Brown-Forman*, and *Healy*] involved regulating the prices charged in the home state and those charged in other states in order to benefit the buyers and sellers in the home state, resulting in a direct burden on the buyers and sellers in the other states."). In other words, "a careful look at the holdings in [*Baldwin, Brown-Forman*, and *Healy*] suggests a concern with preventing discrimination against out-of-state rivals or consumers"—the concern **[**54]** over economic protectionism underlying the Supreme Court's dormant *Commerce Clause* jurisprudence, generally. *EELI, 793 F.3d at 1173*. The extraterritoriality doctrine, therefore, as explicated in *Baldwin, Brown-Forman*, and *Healy*, applies "*only* [to] price control or price affirmation statutes that link in-state prices with those charged elsewhere and discriminate against out-of-staters." *Id. at 1174* (emphasis added).

Other circuits also have recognized the limited scope of the extraterritoriality doctrine, as the Supreme Court applied that doctrine in *Baldwin, Brown-Forman*, and *Healy. See Ass'n des Eleveurs de Canards et d'Oies du Quebec v. Harris, 729 F.3d 937, 951 (9th Cir. 2013)* ("*Healy* and *Baldwin* are not applicable to a statute that does not dictate the price of a product and does not 't[ie]' the price of its in-state products to out-of-state prices."); *IMS Health, 616 F.3d at 30* (recognizing that the Supreme Court "has only struck down two related types of statutes on extraterritoriality grounds"—price affirmation statutes and "statutes that force an out-of-state merchant to seek regulatory approval in one State before undertaking a transaction in another" (internal quotation marks omitted)).

Here, HB 631 is not a price affirmation statute, nor does it link in-state prices to out-of-state prices. HB 631 also does **[**55]** not dictate the prices that manufacturers or distributors charge to downstream purchasers in States other than Maryland. Additionally, it is undisputed that HB 631 does not favor in-state interests at the expense of out-of-state interests—it subjects out-of-state and in-state manufacturers and distributors to the same unconscionability limitation. And it is undisputed that HB 631 does not discriminate against interstate commerce—manufacturers and distributors remain free to engage in interstate commerce, they just may not charge unconscionable prices for essential generic drugs later sold to Maryland consumers. HB 631, therefore, does not violate the extraterritoriality doctrine, as that doctrine was applied in *Baldwin, Brown-Forman*, and *Healy*. Indeed, *Brown-Forman* expressly recognized that "a State may seek lower prices for its consumers"—precisely what HB 631 does—without violating the *Commerce Clause*. *476 U.S. at 580*.

[*687] This Court reached a similar conclusion in *Star Scientific*, which involved a Virginia statute that imposed a per-cigarette escrow obligation on manufacturers of cigarettes sold in Virginia. *278 F.3d at 346*. Any manufacturer that failed to put the money in escrow was subject to civil fines and barred from selling cigarettes **[**56]** to Virginia consumers. *Id.* Like AAM, Star Scientific argued that the escrow statute violated the extraterritoriality doctrine as applied to cigarette manufacturers located outside of Virginia such as Star Scientific, because the statute "require[d] [Star Scientific] to make payments on cigarettes sold by it to *independent distributors in other states* if the cigarettes are later sold into Virginia." *Id. at 354* (emphasis added). Also like AAM, Star Scientific asserted that *Healy*'s prohibition on a State's regulation of "commerce occurring wholly outside of its borders" barred States from "attempt[ing] to regulate *aspects of the stream of commerce*"—*i.e.*, transactions—"that occur upstream, outside the State's borders." *Id. at 355* (emphasis added). This Court rejected that argument, holding that the Virginia statute did not violate the dormant *Commerce Clause* because the statute's applicability—like that of HB 631—was limited "to the sale of cigarettes 'within the Commonwealth.'" *Id. at 356* (quoting Va. Code. Ann. § 3.1-336.2.A). This Court further distinguished *Brown-Forman* and *Healy* on grounds that the Virginia statute (1) was not "aiming at or reacting to *commerce outside of Virginia*," (2) "ha[d] no effect on transactions undertaken by out-of-state distributors **[**57]** *in other States*," and (3) "does not insist on price parity with cigarettes sold *outside of the State*." *Id.* (emphasis added).

Like the statute in *Star Scientific*, HB 631 applies only to essential generics drugs sold in Maryland. *See supra* Part II. And like the statute in *Star Scientific*, HB 631 is not "aim[ed]" at "commerce" outside of Maryland, has no effect on transactions undertaken by out-of-state distributors with consumers outside of Maryland, and does not insist on "price parity" with essential generic drugs sold outside of Maryland. *Id.* Accordingly, HB 631 implicates none of the extraterritoriality concerns this Court recognized in *Star Scientific*.

In striking down HB 631, therefore, the majority opinion extends the extraterritoriality doctrine beyond the contexts in which the Supreme Court and this Court previously have applied it. The majority opinion acknowledges that in doing so, it diverges from the approach taken by several of our sister circuits, which interpret the extraterritoriality doctrine far more narrowly. *Ante* at 10. For several reasons, I do not believe such an expansion is warranted.

To begin, the majority opinion's expansive interpretation of the extraterritoriality **[**58]** doctrine substantially intrudes on the States' reserved powers to legislate to protect the health, safety, and welfare of their citizens. *See, e.g., L'Hote v. City of New Orleans, 177 U.S. 587, 596, 20 S. Ct. 788, 44 L. Ed. 899 (1900)*. The Supreme Court long has recognized that the limitation on state regulatory power imposed by the dormant *Commerce Clause* "is by no means absolute." *Lewis, 447 U.S. at 36*. "Rather, [i]n the absence of conflicting federal legislation, the States retain authority under their general police powers to regulate matters of legitimate local concern, even though interstate commerce may be affected." *Id.* "And because consumer protection is a field traditionally subject to state regulation, '[courts] should be particularly hesitant to interfere with [a] State's efforts [to protect consumers] under the guise of the [dormant] *Commerce Clause*.'" *SPGGC, LLC v. Blumenthal, 505 F.3d 183, 194 (2d Cir. 2007)* (quoting *United* ***[*688]*** *Haulers Ass'n v. Oneida-Herkimer Solid Waste Mgmt. Auth., 550 U.S. 330, 344, 127 S. Ct. 1786, 167 L. Ed. 2d 655 (2007))*. Yet that is precisely what the majority opinion does in striking down HB 631, which amounts to an effort by the Maryland legislature to protect some of the State's most vulnerable citizens from the abusive pricing practices detailed in the GAO and Senate Reports.

Additionally, the majority opinion's broad construction of the extraterritoriality doctrine also calls into question the constitutionality of numerous state antitrust and consumer protection **[**59]** statutes. For example, many States allow indirect purchasers to seek relief under their state antitrust laws against manufacturers which engage in an antitrust conspiracy, notwithstanding that such indirect purchasers did not purchase the allegedly price-fixed product directly from the manufacturer. *See California v. ARC Am. Corp., 490 U.S. 93, 99-100, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)* (holding that the Sherman Act, which does not allow indirect purchaser actions, does not preempt state laws that allow indirect purchasers to obtain relief); *see also, e.g., Brand Name Prescription Drugs, 123 F.3d at 613* (applying Alabama ***antitrust law*** in indirect purchaser action by Alabama pharmacies against out-of-state drug manufacturers); *Clayworth v. Pfizer, Inc., 49 Cal. 4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066, 1070 (Cal. 2010)* (applying California ***antitrust law*** in indirect purchaser action by California pharmacies against out-of-state drug manufacturers). Yet under the majority opinion, all such laws would be unconstitutional to the extent they allow an in-state consumer to seek relief against an upstream out-of-state seller which sold the price-fixed product in an out-of-state transaction.

Likewise, numerous States impose safety, quality, and labeling restrictions on goods sold by out-of-state manufacturers through out-of-state distributors to in-state consumers. Courts consistently uphold such statutes in the **[**60]** face of Commerce Clause challenges as legitimate exercises of such States' police powers. *See, e.g.,* Rocky Mountain Farmers Union v. Corey, 730 F.3d 1070, 1103-04 (9th Cir. 2013) (upholding California environmental regulation governing the composition of gasoline, which applied to out-of-state producers that distributed gasoline through out-of-state distributors, and explaining that "California may regulate with reference to local harms, structuring its internal markets to set incentives for firms to produce less harmful products *for sale in California*" (emphasis added)); Int'l Dairy Foods Ass'n v. Boggs, 622 F.3d 628, 647-48 (6th Cir. 2010) (rejecting dormant Commerce Clause challenge to state milk labeling law); Nat'l Elec. Mfrs. Ass'n v. Sorrell, 272 F.3d 104, 110-12 (2d Cir. 2001) (rejecting dormant Commerce Clause challenge to state labeling law for lightbulbs). Yet under the broad construction of the extraterritoriality doctrine in the majority opinion, none of these statutes would pass constitutional muster because they regulate wholly out-of-state "transactions." *See* EELI, 793 F.3d at 1175 (rejecting broader construction of extraterritorial doctrine because "if any state regulation that 'control[s] . . . conduct' out of state is *per se* unconstitutional, wouldn't we have to strike down state health and safety regulations that require out-of-state manufacturers to alter their designs or labels"). None of the Supreme Court's extraterritoriality doctrine opinions **[**61]** provides any indication that the Court intended for the doctrine to invalidate such a broad swath of state statutes.

* * * *

[*689] In sum, the Supreme Court's Commerce Clause jurisprudence does not support equating a single out-of-state transaction with "commerce" for purposes of the extraterritoriality doctrine. And contrary to the majority opinion's holding, neither the Supreme Court nor this Court ever has relied on the extraterritoriality doctrine as the sole basis to invalidate a state statute regulating products ultimately sold within the state's borders. The majority opinion's application of the extraterritoriality doctrine also conflicts with the approach taken by several of our sister circuits, including in factually indistinguishable cases. And the majority opinion's expansion of the extraterritoriality doctrine significantly incurs on the States' reserved police powers and would render numerous longstanding state laws unconstitutional. In such circumstances, I cannot join the majority opinion's conclusion that HB 631 violates the extraterritoriality doctrine.

IV.

The majority opinion concludes that HB 631 violates the dormant Commerce Clause for two additional reasons: (1) "an analogous restriction imposed by **[**62]** a state other than Maryland has the potential to subject prescription drug manufacturers to conflicting state requirements" and (2) it "interferes with the natural function of the interstate market by superseding market forces that the dictate the price of a good." *Ante* at 17-18. I conclude that neither argument warrants barring Maryland—or any other State—from protecting its citizens from the abusive generic drug pricing practices the legislature sought to address.

Regarding the first reason, *Healy* directed courts confronted with extraterritoriality challenges to consider "how the challenged statute may interact with the legitimate regulatory regimes of other States and what effect if not one, but many or every, State adopted similar legislation." 491 U.S. at 336. According to the majority opinion, HB 631 poses a risk of subjecting manufacturers to "'the kind of competing and interlocking local regulation that the Commerce Clause was meant to preclude'" because "[i]f Maryland compels manufacturers to sell prescription drugs in the initial transaction at a particular price, but another state imposes a different price, then manufacturers could not comply with both laws in a single transaction." *Ante* at 18 (quoting **[**63]** Healy, 491 U.S. at 338). This contention is wrong as a matter of both fact and law.

As a matter of fact, HB 631 does not "compel[] manufacturers to sell prescription drugs . . . *at a particular price*." *Id.* (emphasis added). Rather, it forbids manufacturers from imposing an "unconscionable" price increase for essential generic drugs. § 2-801(c). Generic drug manufacturers, therefore, retain broad discretion to set prices for essential generic drugs and to increase the prices of such drugs, even if another state adopted a similar law. Accordingly, the majority opinion's contention that a manufacturer could not comply with two such laws in a single transaction is speculative, at best, and therefore does not offer a basis for striking down a state statute on extraterritoriality grounds, particularly when AAM identifies no State which has adopted, or intends to adopt, a potentially conflicting regulation. *See* Rocky Mountain, 730 F.3d at 1104-05 ("To show the threat of inconsistent regulation, Plaintiffs must either present evidence that conflicting, legitimate legislation is already in place or that the threat of such legislation is both actual and imminent." (internal quotation marks omitted)); Sorrell, 272 F.3d at 112 ("It is not enough to point to a risk of conflicting **[**64]** regulatory **[*690]** regimes in multiple states; there must be an actual conflict between the challenged regulation and those in place in other states.").

As a matter of law, the majority opinion does not cite any authority—nor have I found any—holding that the dormant Commerce Clause entitles manufacturers to consummate all sales to a distributor in "a single transaction." On the contrary, as the majority opinion acknowledges, *ante* at 18, courts have recognized that a State can adopt a consumer protection law that may require a manufacturer to sell different products or versions of products for resale in the State than it sells in other States. For example, in *Sorrell*, the Second Circuit considered an extraterritoriality challenge to a Vermont statute that required special labeling on all mercury-containing light bulbs sold in Vermont. 272 F.3d at 107. A trade group representing light bulb manufacturers challenged the statute on extraterritoriality grounds, asserting that "[g]iven the manufacturing and distribution systems used by its members . . . if its members continue selling in Vermont, they would also be forced as a practical matter to label lamps sold in every other state." Id. at 110. The court rejected that argument, explaining that, **[**65]** by its terms, the statute did "not inescapably require manufacturers to label" lamps sold outside of Vermont and that "[t]o avoid the statute's alleged impact on other states, lamp manufacturers could arrange their production and distribution processes to produce labeled lamps solely for the Vermont market." *Id.*

Likewise, in *International Dairy*, the Sixth Circuit considered an extraterritoriality challenge by milk processors to an Ohio law regulating milk products on grounds that "due to the complex national distribution channels through which milk products are delivered" and the costs associated with altering the nationwide distribution system, milk processors would be "forced" to comply with the Ohio law "nationwide." 622 F.3d at 647. The court rejected that argument, emphasizing that the Ohio law did not require processors to sell milk in other States in conformance with the Ohio regulation, nor did it preclude other States from regulating milk in a different manner. Id. at 647-48; *see also* SPGGC, 505 F.3d at 194 (concluding that state consumer protection law regulating the terms and conditions of gift cards did not violate extraterritoriality doctrine because the law did not "directly regulate sales of gift cards in other states" **[**66]** and did not "prevent other states from regulating gift card sales differently within their own territories").

Like the statutes at issue in *Sorrell* and *International Dairy*, HB 631 does not require generic drug manufacturers to sell drugs destined for resale outside of Maryland at conscionable prices. On the contrary, HB 631 does not purport to regulate the price of essential generic drugs that do not enter Maryland's borders, nor does it bar other States from regulating differently the price of essential generic drugs sold to consumers within their borders. And AAM has not argued—much less proven—that its members could not restructure their distribution processes and contracts to ensure that distributors do not resell unconscionably priced generic drugs into Maryland. Again to the contrary, there would seem to be no obstacle to a generic drug manufacturer entering into a single contract with a distributor for an essential generic drug, under which the manufacturer imposes a conscience-shocking price increase for those pills the distributor resells outside of Maryland and a non-conscience-shocking price increase for the pills the distributor resells in Maryland. The contract could further **[**67]** require the distributor to indemnify the manufacturer against any **[*691]** liability resulting from any unconscionably priced pills that make their way into the Maryland market, unintentionally or otherwise. Accordingly, "[t]o the extent [HB 631] may be said to 'require' [conscionable pricing for drugs] sold outside [Maryland], then, it is only because the manufacturers are unwilling to modify their production and distribution systems to differentiate between [Maryland]-bound and non-[Maryland]-bound [drugs]." Sorrell, 272 F.3d at 110. That is not a basis for relying on the dormant Commerce Clause to invalidate a state consumer protection statute, like HB 631.[4] Id. at 110-11.

---

[4] The majority opinion further maintains that complying with HB 631 "would require more than modification of [manufacturers'] distribution systems; it would force them to enter into a separate transaction for each state in order to tailor their conduct so as not to violate any state's price restrictions." *Ante* at 18. But at this preliminary juncture of the litigation, AAM has put forward no evidence that other States intend to impose similar statutes regulating the pricing of generic drugs, let alone evidence that its

The majority opinion's assertion that HB 631 violates the dormant *Commerce Clause* because it "'interferes with the natural function of the interstate market' by superseding market forces that dictate the price of a good" fares no better. *Ante* at 18 (quoting *McBurney v. Young, 569 U.S. 221, 235, 133 S. Ct. 1709, 185 L. Ed. 2d 758 (2013))*. As a matter of fact, the market at issue—like many markets for health care goods and services—is not one that "natural[ly] function[s]." *See generally* Erin C. Fuse Brown, *Resurrecting Health Care Rate Regulation*, *67 Hastings L.J. 85, 92-103 (2015)* (describing a variety of market failures in the health care system). On the contrary, the essential generic drugs at **[**68]** issue in this case present classic examples of market failure. The "business model" detailed in the Senate Report—which HB 631 targets—shows that the generic drug manufacturers that imposed conscience-shocking price increases exploited patients who were at a gross disadvantage in terms of bargaining power. That disadvantage derived from a lack of alternative manufacturers of the drugs—such increases were generally imposed for single-source generic drugs distributed through a "closed distribution system"—and from the fact that the drugs were essential to treating rare and life-threatening conditions. Senate Report at 4, 30-31. Because such patients lack alternatives and face a debilitating illness or even death absent these drugs, they must accept whatever price a manufacturer charges.

The Senate Report reveals that the generic manufacturers recognized and sought to exploit this bargaining inequality by imposing dramatic price increases. For example, Retrophin CEO Shkreli stated in an email explaining a 1,900 percent increase for one generic drug, which was the "only treatment for a rare disease called cystinuria," that "[t]he next generation of pharma guys (or the smart ones) understand **[**69]** the inelasticity of certain products. The insurers really don't care. They just pass [the price increase] through [to patients]." *Id.* at 41, 44-45. Likewise, Valeant CEO J. Michael Pearson explained that Valeant had monopoly "pricing power" for another generic drug that is the standard-of-care for treating a rare and deadly disease—and therefore was able to impose a multiple-thousand-fold price increase—because, absent the drug, patients would face "liver failure or a liver transplant or even death." *Id.* at 6, 56.

By analogy to the issue in this case, the Supreme Court long has recognized that States may "supersede market forces," **[*692]** *ante* at 18, by imposing wage and price restrictions when gross inequality in bargaining power leads to market failure, *see, e.g.,* *W. Coast Hotel Co. v. Parrish, 300 U.S. 379, 399, 57 S. Ct. 578, 81 L. Ed. 703 (1937)* (upholding state minimum wage law because, in part, "[t]he exploitation of a class of workers who are in unequal position with respect to bargaining power and are thus relatively defenseless against the denial of a living wage is not only detrimental to their health and well being, but casts a direct burden for their support on the community.").

As a matter of law, since the demise of the *Lochner* doctrine, the Supreme Court has held that "[t]he Constitution **[**70]** does not guarantee the unrestricted privilege to engage in a business or conduct it as one pleases," and therefore that "statutes prescribing the terms upon which those conducting certain businesses may contract, or imposing terms if they do enter into agreements, are within the state's competency." *Nebbia v. New York, 291 U.S. 502, 527-28, 54 S. Ct. 505, 78 L. Ed. 940 (1934)*. To that end, the Supreme Court and lower courts have rejected numerous constitutional challenges to nondiscriminatory state statutes that control the price of goods or services, or otherwise interfere with "market forces that dictate the price of a good" or service. *See, e.g.,* *Milk Control Bd., 306 U.S. at 351-53* (rejecting dormant *Commerce Clause* challenge to Pennsylvania law establishing minimum prices for milk); *W. Coast Hotel, 300 U.S. at 398-400* (upholding Washington minimum wage law for female employees); *Nebbia, 291 U.S. at 515, 539* (upholding New York law which established a "Milk Control Board" to fix minimum and maximum retail prices for milk); *All. of Auto. Mfrs. v. Gwadosky, 430 F.3d 30, 32-33 (1st Cir. 2005)* (rejecting dormant *Commerce Clause* challenge to Maine law prohibiting motor vehicle manufacturers from "adding state-specific surcharges to wholesale motor vehicle prices in order to recoup the costs of their compliance with [state] retail-reimbursement laws"); *Grant's Dairy—Maine, LLC v. Comm'r of Me. Dep't of Agric., Food & Rural Res., 232 F.3d 8, 19-24 (1st Cir. 2000)* (rejecting dormant *Commerce Clause* challenge to Maine law establishing minimum price for milk). Accordingly, **[**71]** even if the markets for essential generic drugs were "natural[ly] function[ing]"—which they are not—Maryland would be entitled to regulate prices charged in those

---

members would have to enter into "separate transaction[s]" to comply with multiple such laws, rather than by simply modifying their distribution systems and contracts.

markets for the public interest, so long as the regulation did not favor in-state interests at the expense of out-of-state interests or discriminate against interstate commerce.

V.

In striking down HB 631—legislation enacted to restrain abusive generic drug pricing practices specifically designed to prey on the special vulnerabilities of a defenseless group of Maryland citizens—the majority opinion "empower[s] the judiciary and leave[s] . . . state legislatures and everyone else on the sidelines." *Kolbe v. Hogan, 849 F.3d 114, 150 (4th Cir. 2017)* (Wilkinson, J., concurring). To begin, the majority opinion ignores basic principles of federalism and judicial restraint to reject the State's own interpretation of the statute's extraterritorial reach. Then, relying on its own expansive interpretation of HB 631's reach, the majority opinion extends the extraterritoriality doctrine beyond the contexts in which the Supreme Court and this Court previously have applied it, and in a manner contrary to the approach taken by several other circuits. The majority opinion's expansive conception **[**72]** of the extraterritoriality doctrine renders numerous state consumer protection statutes unconstitutional, and significantly expands federal **[*693]** courts' authority to second-guess States' efforts to protect their citizens. I do not believe that either the Framers or the Supreme Court intended for the *Commerce Clause* to serve such a purpose.

At the end of the day, AAM argues—and the majority opinion concludes—that, absent federal regulation, its members are *constitutionally entitled* to impose conscience-shocking price increases on Maryland consumers, so long as AAM's members sell their essential generic drugs to Maryland consumers through out-of-state intermediaries. But "[t]he Constitution does not secure to any one liberty to conduct his business in such fashion as to inflict injury upon the public at large, or upon any substantial group of the people." *Nebbia, 291 U.S. at 538-39*. And the dormant *Commerce Clause* is not a "roving license" for federal courts to strike down non-discriminatory state consumer protection laws, like HB 631. *SPGGC, 505 F.3d at 194* (quoting *United Haulers, 550 U.S. at 343*). Accordingly, I respectfully dissent from the majority opinion's conclusion that HB 631 violates the extraterritoriality doctrine.

Opinion

ORDER GRANTING SAMSUNG'S MOTION FOR ANTISUIT INJUNCTION

Re: Dkt. Nos. 234, 235, 240, 244, 277, 278

INTRODUCTION

Defendants/counterclaim-plaintiffs Samsung Electronics Co., Ltd., Samsung Electronics America, Inc., and Samsung Research America, Inc. (collectively, "Samsung") seek to enjoin plaintiffs Huawei Technologies Co., Ltd., Huawei Device USA, Inc. and Huawei Technologies USA, Inc. (collectively, "Huawei") from enforcing injunction orders issued by the Intermediate People's Court of Shenzhen ("Shenzhen Court"). The Shenzhen Court orders found that Samsung is infringing two of Huawei's Chinese standard essential patents ("SEPs"), and enjoined Samsung's Chinese affiliates from manufacturing and selling its 4G LTE standardized smartphones in China. As a prerequisite to granting this relief, the Shenzhen Court considered whether the parties had complied with their obligations to license their SEPs on fair, reasonable, and nondiscriminatory ("FRAND") **[*8]** terms. Both parties have asserted breach of contract claims in this action based on the other's alleged failure to license their SEPs on FRAND terms.

Under the framework established in *E. & J. Gallo Winery v. Andina Licores S.A., 446 F.3d 984 (9th Cir. 2006)*, Samsung has demonstrated that it is entitled to an antisuit injunction preventing Huawei from enforcing the injunction orders issued by the Shenzhen Court. Those orders could render meaningless the proceedings here, and the risk of harm to Samsung's operations in China in the interim is great. Its motion is GRANTED.

BACKGROUND[1]

I. FACTUAL BACKGROUND

A. The Parties

Huawei and Samsung are major players in the world of wireless telecommunications—a world governed by cellular technology standards, such as the 3G UMTS and 4G LTE standards developed by the Third Generation Partnership Project ("3GPP") and promulgated by standard setting organizations like the European

[1] Portions of the background are redacted in accordance with the administrative motions submitted by both parties. Those motions are addressed at the end of this order.

Telecommunications Standards Institute ("ETSI").[2] Both Huawei and Samsung have agreed to license their declared standard essential patents ("SEPs") on fair, reasonable, and non-discriminatory ("FRAND") terms and conditions under ETSI's Intellectual Property Rights ("IPR") Policy. Compl. ¶ 63 (Dkt. No. 1[redacted], Dkt. No. 3-4[under seal]); *see also* ***[*9]*** Samsung's Answer and Am. Counterclaims ¶ 29 ("Samsung admits that ETSI members who are subject to a commitment to offer licenses on FRAND terms and conditions are obligated not to refuse to enter a license for declared, essential patents that is fair, reasonable, and non-discriminatory.")(Dkt. No. 91[redacted]; Dkt. No. 90-2[under seal]); *id.* ¶ 54 ("Samsung admits that SEC has submitted IPR licensing declaration forms to ETSI expressing SEC's [Samsung Electronics Co., Ltd.] preparedness to grant licenses on FRAND terms and conditions for certain patents as set forth in those declarations in accordance with the ETSI IPR Policy."); Samsung's Licensing Declarations (Samsung's Answer and Am. Counterclaims, Exs. 14, 23-26, 29, 34; Dkt. Nos. 91-14, -18, -23-26, -29, -34); Huawei's Licensing Declaration (Huawei's Compl., Exs. 2.1-2.43, Dkt. Nos. 3-1-13[under seal]).

B. Samsung's Manufacturing Operations in China

Samsung's Chinese manufacturing hubs have a production capacity of [TEXT REDACTED BY THE COURT], the second largest worldwide. T. Wang Decl. ¶ 5 (Dkt. No. 240-48[under seal]). In 2015 and 206, Samsung **[*10]** manufactured [TEXT REDACTED BY THE COURT] in China, of which [TEXT REDACTED BY THE COURT] were imported to the United States. *Id.* ¶¶ 6, 7. In the same years, Samsung sold [TEXT REDACTED BY THE COURT] units of LTE devices in China for a total revenue of [TEXT REDACTED BY THE COURT]. *Id.*

C. Negotiation History

In 2011, the parties began discussing a cross-license for their respective patent portfolios, but they disagreed on the scope of those licenses. *E.g.*, 3/2/15 Letter from Huawei to Samsung re" Patent Licensing Negotiation (Stake Decl. ¶ 19, Ex. 19, Dkt. No. 234-10[under seal]). I will not recount the history of their failure to reach agreement in the ensuing years, since all of the information has been filed under seal, except to wonder aloud how it can be in the interest of these important multi-national corporations to slog through unending litigation around the globe rather than figure out a process to resolve their differences if agreement is impossible.

II. PROCEDURAL HISTORY

Huawei filed this action on May 24, 2016, asserting infringement of 11 of its SEPs, and alleging that Samsung breached "its commitment to enter into a SEP cross-license with [Huawei] on FRAND terms and conditions." **[*11]** Compl. ¶¶ 1, 4. Huawei also asks the court to set the terms and conditions for a global FRAND cross license under the parties' respective worldwide portfolios of essential 3G and 4G patents, and to enjoin Samsung from "seeking injunctive relief against Huawei (including affiliates) in any jurisdiction with respect to any alleged infringement of any patent essential to 3GPP standards."[3] Compl. at Prayer for Relief, E. Samsung answered and filed counterclaims, including patent infringement claims for its own declared essential SEPs, declarations of non-

---

[2] Standard Setting Organizations "establish technical specifications to ensure that products from different manufacturers are compatible with each other." *Microsoft Corp. v. Motorola, Inc., 696 F.3d 872, 875 (9th Cir. 2012)*("Microsoft II")(citing Mark A. Lemley, *Intellectual Property Rights and Standard—Setting Organizations*, *90 Calif. L.Rev. 1889 (2002)*). Many courts have expounded on the benefits of standards in various industries. *See, e.g., Microsoft Corp. v. Motorola, Inc., 795 F.3d 1024, 1030 (9th Cir. 2015)*("*Microsoft IV*"); *Apple, Inc. v. Motorola Mobility, Inc., 2011 U.S. Dist. LEXIS 72745, 2011 WL 7324582, at *1 (W.D. Wis. June 7, 2011)*.

[3] Huawei points out that it has not sought preliminary injunctive relief attempting to halt any of the seven remaining actions brought by Samsung in China, which seek injunctive relief against Huawei based on its alleged infringement of Samsung's SEPs. Opp'n at 8.

infringement and invalidity of Huawei's patents, and claims for antitrust violation in violation of section 2 of the Sherman Act,[4] and breach of contract. Answer and Am. Counterclaims at 47-114.

The next day,[5] Huawei filed 11 separate actions in China, ten of which it filed in the Intermediate People's Court of Shenzhen ("Shenzhen Court") where Huawei is based. Xie Decl. ¶ 3 (Dkt. No. 235-2). Eight of the actions involve 3G and 4G SEPs, including direct counterparts to patents-in-suit. *Id.* Each action seeks a determination on whether the SEP is infringed, and if so, whether an injunction should issue.[6] *Id.* Samsung countered with fourteen of its own actions **[*12]** in China, alleging Huawei is infringing Samsung's SEPs and seeking injunctive relief. Wang Decl. ¶¶ 2-8; Xie Decl. ¶ 2 n.1. Seven of those SEP actions remain pending.[7] *See* Xie Decl. ¶ 2 n.1.

The Chinese actions have proceeded quicker than this one. *See* Wang Decl. ¶ 9 (describing status of the various actions). In particular, the Shenzhen court has held trials on two of Huawei's SEPs and two of Samsung's SEPs. Wang Decl. ¶¶ 9, 10. The trials addressed both FRAND issues and technical issues specific to each SEP. *Id.* ¶ 9. During these trials, the parties had full opportunities to present their evidence and argument. *Id.* ¶ 11; *see also id.* ¶¶ 12-19 (explaining the proceedings before the Shenzhen court that form the basis for this motion).

On January 11, 2018, the Shenzhen Court issued orders finding that Samsung is infringing two of Huawei's Chinese SEPs and enjoining Samsung's Chinese affiliates from manufacturing and selling its 4G LTE standardized smartphones in China.[8] Xie Decl. ¶ 7; Jan. 11, 2018 Shenzhen Court Civil Judgment, certified translation ("Shenzhen Order")(Stake Decl. ¶ 37, *id.*, Ex. 36, Dkt. No. 277-5[under seal]).[9] The Chinese patents are direct counterparts to **[*13]** two of Huawei's asserted patents, U.S. Patent Nos. 8,369,278 and 8,885,587. Xie Decl. ¶ 4. The Shenzhen Court evaluated the evidence and found that "Huawei's behaviors had complied with FRAND principles while Samsung's behaviors had not complied with FRAND principles." Shenzhen Order at 205. The Shenzhen Court decided that Huawei's six presuit offers to Samsung "were made within the reasonable range according to the strength of SEPs owned by Huawei" and that Huawei's offers "had complied with FRAND principles." *See* Shenzhen Order at 200-203. As to Samsung, the court found that its initial insistence on "binding SEP licensing and non-SEP licensing ... violated FRAND principles for SEP licensing negotiations" and contributed to "serious[] delay[]" in the negotiations. Shenzhen Order at 180. It also found that "Samsung had made significant

---

[4] As part of this claim, "Samsung seeks an order enjoining Huawei from pursuing injunctive relief for infringement of patents, including those asserted here and in the parallel Chinese actions, that Huawei contends are essential to ETSI and 3GPP standards." Am. Counterclaims ¶ 322.

[5] Huawei indicates that it filed the Chinese actions "simultaneously," and that those actions reflect a different date due to the time difference between here and China. And it highlights Samsung's acknowledgement that the actions were "simultaneous[ly]" filed. *See* Samsung's Answer and Am. Counterclaims ¶ 340 ("Yet simultaneous with its filing of this action, Huawei filed eight actions against Samsung in China based on Huawei's declared essential patents, seeking only injunctions as relief for Samsung's alleged infringement... ."); *id.* ¶ 543 ("Around the same time as Huawei filed its Complaint here, Huawei initiated several patent infringement actions in China, seeking to enjoin Samsung from making, using, selling, or importing products that practice 3GPP standards.").

[6] Huawei has also initiated a rate-setting and royalty payment suit in China. Wang Decl. ¶ 2; Xie Decl. ¶ 22.

[7] The parties filed a total of 42 infringement actions in China, one corresponding to each patent, both SEP and non-SEP. Wang Decl. ¶ 5. In parallel with those proceeding, all 42 patents underwent invalidation procedures at the Patent Reexamination Board ("PRB"). *Id.* ¶ 6. Once a patent is invalidated by the PRB, it must be withdrawn or dismissed. *Id.* ¶ 7. Twenty-two infringement suits remain between the parties—12 involving Huawei's SEPs and 7 involving Samsung's SEPs. *Id.* ¶ 8.

[8] The Shenzhen court ordered a further continuation of the trial on Samsung's two SEPs, and presumably heard that additional evidence on February 27-28, 2018. Wang Decl. ¶ 9. The parties are awaiting decisions in those two suits. *Id.*

[9] Huawei noted that Samsung submitted only the order in case number 840, but actually seeks to enjoin orders issued in both case numbers 840 and 816. Wang Decl. ¶ 12 n.1. It indicated that "[t]he FRAND issues contemplated, evidence and expert opinion presented, and Court's decision were substantively the same in both the 840 and 816 cases." *Id.* It also represented that it accepts the accuracy of the certified translation "[f]or purposes of this motion only[.]" Opp'n at 6 n.2.

mistakes during technical negotiations," which "seriously delayed the negotiations and clearly violated FRAND principles... directly leading to more than six years of negotiations between both parties without any progress." *Id.* at 185. It concluded that Samsung's sole SEP licensing offer "did not comply with FRAND principles." *Id.* at 204.

Samsung filed a notice of appeal on January 26, 2018. Xie Decl. **[*14]** ¶ 8. It filed this motion on February 1, 2018. Mot. to Enjoin Huawei from Enforcing the Injunction Issued by the Intermediate People's Court of Shezhen ("Mot.")(Dkt. No. 278-2[redacted]; Dkt. No. 278-1[under seal]). It claims that if its appeal is unsuccessful, it will have to close its factories in China, affecting [TEXT REDACTED BY THE COURT], be forced into a negotiation at a disadvantage or be compelled into a global adjudication of all FRAND issues with Huawei, which it stoutly resists.

Since the initial case management conference, Huawei has urged the court to bifurcate the issues and address the breach of contract and related FRAND issues first, which would likely moot the patent infringement claims. *See* Joint Case Management Conference St. at 2-5 (Dkt. No. 67); Minute Entry for Initial CMC held on 9/13/16 (Dkt. No. 75); Huawei's Br. ISO its Request to Bifurcate (Dkt. No. 84). Samsung has insisted that bifurcation was not the most efficient course because the FRAND licensing obligation cannot be determined without "assessing whether and to what extent [the patents-in-suit] are valid, infringed, enforceable, and essential to the relevant ETSI standard." Samsung's Opp'n to Bifurcation at 2 (Dkt. No. 85). I denied Huawei's **[*15]** request to bifurcate, and issued a case management order setting a schedule for the parties to narrow the issues in preparation for a two-week trial. Order Regarding Case Management Proposals (Dkt. No. 143).

LEGAL STANDARD

"A federal district court with jurisdiction over the parties has the power to enjoin them from proceeding with an action in the courts of a foreign country, although the power should be 'used sparingly.'" *Seattle Totems Hockey Club, Inc. v. Nat'l Hockey League, 652 F.2d 852, 855 (9th Cir. 1981)*. "Such injunctions allow the court to restrain a party subject to its jurisdiction from proceeding in a foreign court in circumstances that are unjust." *E. & J. Gallo Winery v. Andina Licores S.A., 446 F.3d 984, 989 (9th Cir. 2006)*("*Gallo")*. The Ninth Circuit employs "a three-part inquiry for assessing the propriety of such an injunction." *Microsoft Corp. v. Motorola, Inc., 696 F.3d 872, 881 (9th Cir. 2012)*("*Microsoft II* ")*; see also* *Gallo, 446 F.3d at 990* (establishing framework for determining whether to issue anti-suit injunction).

> First, we determine whether or not the parties and the issues are the same in both the domestic and foreign actions, and whether or not the first action is dispositive of the action to be enjoined. Second, we determine whether at least one of the so-called *Unterweser* factors applies. Finally, we assess whether the injunction's impact on comity is tolerable.

Microsoft II, 696 F.3d at 881 (citations and internal quotation marks omitted); **[*16]** *see* *id. at 882* (referring to three-part inquiry as the "*Gallo* framework").

DISCUSSION

Samsung moves to enjoin Huawei from enforcing the injunctions issued in the Shenzhen Orders.[10] As a preliminary matter, the parties dispute whether Samsung must establish the usual requirements for a preliminary injunction, in addition to satisfying the three-part *Gallo* test for an anti-suit injunction. Huawei's Opp'n to Samsung's Mot. to Enjoin Huawei from Enforcing the Injunction Issued by the Intermediate People's Court of Shenzhen at 4, 13, 23 ("Opp'n")(Dkt. No. 277-4[redacted]; Dkt. No. 277-3[under seal]); Reply ISO Samsung's Mot. for a Preliminary Antisuit Injunction at 2 ("Reply")(Dkt. No. 277-3[under seal]; Dkt. No. 277-4[redacted]). As the district court noted in *Microsoft Corporation v. Motorola, Inc.*, "[u]nder a literal reading of *Gallo*, a showing of irreparable harm, balance of

---

[10] As previously mentioned, Samsung references one order from the court, but it actually seeks to enjoin Huawei from enforcing two orders issued by the Shenzhen court on January 11, 2018. *See supra* note 9.

equities, and public interest might still be required to obtain an anti-suit injunction." 871 F. Supp. 2d 1089, 1097 n.10 (W.D. Wash. 2012)("*Microsoft I*"); *see* Gallo, 446 F.3d at 991 ("[Movant] need not meet the usual test of a likelihood of success on the merits of the underlying claim to obtain an anti-suit injunction . . . . Rather, [movant] need only demonstrate that the factors specific to **[*17]** an anti-suit injunction weigh in favor of granting the injunction.").

The court went on to note two things—the absence of an analysis on the traditional *Winter* factors in *Applied Medical Distribution Corp. v. Surgical Co. BV, 587 F.3d 909, 913 (9th Cir. 2009)*, and the fact that the Third Circuit explicitly replaced all four *Winter* factors with the three-part *Gallo* test. *Microsoft I, 871 F. Supp. 2d at 1097 n.10*. It nonetheless analyzed the remaining *Winter* factors "[f]or completeness[.]" *Id.* But the Ninth Circuit, in affirming the district court's grant of the foreign anti-suit injunction, focused only on the three-part *Gallo* test. *Microsoft II, 696 F.3d at 881*. *But see id. at 883-84* ("Ordinarily, we do not assess at all the likelihood of success on the merits in a case like this, because when a preliminary injunction is also a foreign anti-suit injunction, the likelihood-of-success aspect of the traditional preliminary injunction test is replaced by the *Gallo* test."). The Ninth Circuit's analysis convinces me that I need only focus on the three-part inquiry under *Gallo*, and need not analyze the traditional *Winter* factors for obtaining a preliminary injunction.

Because Samsung relies so heavily on that Ninth Circuit decision, *see* Mot. at 11-17, 19-21, I will begin with a background of that case.

I. *MICROSOFT V. MOTOROLA*

The decision in *Microsoft* ***[*18]*** *v Motorola* addressed the parties' obligations with respect to patents they declared essential to the H.264 video coding standard set by the International Telecommunications Union ("ITU"). *Microsoft II, 696 F.3d at 875-876*. The ITU's Common Patent Policy requires each member to "submit a declaration to the ITU stating whether it is willing to 'negotiate licenses with other parties on a non-discriminatory basis on reasonable terms and conditions.'" *Id. at 876*. Motorola submitted numerous declarations to the ITU promising to grant licenses to its SEPs on "reasonable and nondiscriminatory," or "RAND" terms.[11] *Id.*

"In October 2010, Motorola sent Microsoft two letters offering to license certain of its standard-essential patents." *696 F.3d at 876*. Motorola attached to the letter a "non-exhaustive list" of its U.S. and foreign patents that it declared essential to the H.264 standard and included in its license offer. *Id.* On November 9, Microsoft filed a breach of contract action against Motorola based on the theory that it was a third-party beneficiary to Motorola's RAND obligations, which it alleged Motorola breached by proposing unreasonable royalty terms. *Id. at 878*. The next day, Motorola filed a patent infringement suit, and the two cases were consolidated. **[*19]** *Id.* In February 2012, the district court granted partial summary judgment for Microsoft, concluding that (1) Motorola had binding commitments to offer its declared SEPs on RAND terms, and (2) Microsoft was a third-party beneficiary of those commitments. *Id.* The court denied summary judgment on the two remaining issues of whether Motorola's initial offer letter had to include RAND terms, and whether its offers breached RAND obligations. *Id. at 879*. It scheduled those claims for a bench trial in November 2012. *Id.*

Eight months after the domestic actions were filed, Motorola sued Microsoft in Germany for infringement of two of its German patents, and it sought to enjoin Microsoft from selling allegedly infringing products in Germany. *696 F.3d at 879*. On May 2, 2012, the German court issued its ruling,[12] holding that (1) Microsoft did not have a license to use Motorola's patents, (2) any commitment between Motorola and the ITU was not enforceable by Microsoft because German law does not recognize third-party contractual rights, and (3) Microsoft infringed Motorola's

---

[11] "RAND" and "FRAND" are "legally equivalent abbreviations." *Microsoft II, 696 F.3d at 877 n.2*.

[12] By this time, Microsoft had already obtained a temporary restraining order ("TRO") enjoining Motorola from enforcing any injunction obtained in the German action. *696 F.3d at 880*.

German patents. *Id.* It enjoined Microsoft from "offering, marketing, using or importing or possessing" the accused products in Germany. *Id.*

The "German injunction **[*20]** [was] not self-enforcing." *696 F.3d at 879*. Motorola had to "post a security bond covering potential damages to Microsoft should the infringement ruling be reversed on appeal[,]" then Microsoft could file a motion to stay the injunction in the German appellate court. *Id.* Alternatively, Microsoft could avoid enforcement of the injunction by employing "the *Orange Book* procedure," under which it would make "an unconditional offer to conclude a license agreement" with Motorola. *Id.*

On May 14, the district court converted the TRO, *see supra* note 12, into a preliminary injunction. *Id. at 880*. The Ninth Circuit affirmed this decision. I will reference its reasoning as I analyze each factor.

II. APPLICATION OF THE *GALLO* TEST

A. The Parties and the Issues are the Same

"The threshold consideration for a foreign anti-suit injunction is 'whether or not the parties and the issues are the same' in both the domestic and foreign actions, 'and whether or not the first action is dispositive of the action to be enjoined.'" *Microsoft II, 696 F.3d at 882* (quoting *Gallo, 446 F.3d at 991*). The consideration should be approached functionally, "not in a technical or formal sense, but in the sense that all the issues in the foreign action ... can be resolved in the local action." *Id. at 882-83* (internal **[*21]** quotation marks omitted). "[W]hen the parties in the two actions are the same, the two questions of whether 'the issues are the same' and whether 'the domestic action is dispositive of the foreign action' collapse into one." *Microsoft I, 871 F. Supp. 2d at 1098*.

1. The Parties Are Functionally the Same

Both sides agree that the parties are functionally the same (although not identical). Mot. at 12; Opp'n at 16. Huawei Technologies Co., Ltd. and Samsung Electronics Co., Ltd. are parties to both actions, and some of their affiliates or subsidiaries are parties in each action. Xie Decl. ¶ 3; Since "[p]erfect identity of parties is not required for an anti-suit injunction[,]" *Microsoft I, 871 F. Supp. 2d at 1098*, this is sufficient to establish that the parties are functionally the same.

2. The Issues Are Functionally the Same

Samsung insists that the primary issue in the Shenzhen cases is at issue here—namely, the availability of injunctive relief for Huawei's SEPs, which are subject to contractual licensing obligations under Huawei's FRAND commitments. *See* Mot. at 12-15. It argues that "[e]ach party acknowledges it has contractual FRAND obligations for its global portfolio of telecommunications SEPs, contends it has complied with those obligations and that the **[*22]** other party has not, and has asked this Court to bar the other party from obtaining injunctive relief anywhere in the world on those SEPs." Mot. at 12; *see* Compl. ¶ 1 ("Huawei and Samsung have made binding commitments to the European Telecommunications Standards Institute ("ETSI")—a 3GPP organizational partner which promulgates standards developed by 3GPP—to license these standard-essential patents ("SEPs") on terms and conditions that are fair, reasonable, and non-discriminatory ("FRAND").)(Dkt. No. 59).

It urges that *Microsoft v. Motorola* is instructive because it "involved highly similar facts[.]" *Id.* at 13. Motorola argued that the U.S. action could not resolve the German action "because patent law is uniquely territorial and patents have no extraterritorial effect." *Microsoft II, 696 F.3d at 883*. The district court rejected this argument, and the Ninth Circuit agreed. According to the district court, Microsoft's contract claim would resolve Motorola's German patent claims "because the European Patents at issue in the German Action were included in Motorola's October 29 Letter offering a worldwide license for Motorola's H.264 Standard-essential patents, and because Motorola contracted with the ITU to license the European **[*23]** Patents on RAND terms to all applicants on a worldwide basis." *Id.* (quoting district court decision). It determined that the district court's decisions on summary judgment (that Motorola's RAND declarations to the ITU created a contract enforceable by Microsoft as a third-party beneficiary and that the contract governed the availability of injunctive relief for declared SEPs) were not "legally erroneous,"[13] and therefore, it was not "an abuse of discretion for the district court to rule that the U.S. contract action might dispose of the German patent action." *Id. at 884*.

The Ninth Circuit cited Motorola's "sweeping promise" in its declarations to the ITU, which included "a guarantee that the patent-holder [would] not take steps to keep would-be users from using the patented material, such as seeking an injunction, but [would] instead proffer licenses consistent with the commitment made." *Id. at 884*. The court summarized, "that there [*was*] a contract, that it [was] enforceable by Microsoft, and that it encompasse[d] not just U.S. patents but also the patents at issue in the German suit." *Id. at 885* (emphasis in original). It concluded that irrespective of the district court's ultimate determination as to whether Motorola **[*24]** actually breached its contract, "injunctive relief against infringement is arguably a remedy inconsistent with the licensing commitment." *Id.*

As in *Microsoft v. Motorola*, Huawei alleges that Samsung breached its contractual obligations under ETSI, Compl. ¶ 1, and seeks relief barring Samsung from obtaining injunctive relief on its declared SEPs anywhere in the world. Samsung insists, therefore, that "this action will necessarily resolve the fundamental issue presented in the Shenzhen injunction action, namely, whether injunctive relief is appropriate for alleged infringement of SEPs that are subject to contractual FRAND licensing obligations." Mot. at 14. It also notes that there is no dispute that the Chinese SEPs fall within the global portfolios of SEPs, Xie Decl. ¶ 3, and Huawei listed those Chinese SEPs in the Letters of Assurance attached to its complaint, Huawei's Licensing Declarations (Compl., Exs. 2.1-2.43). And it emphasizes that the two Chinese SEPs are direct counterparts of patents asserted here. Xie Decl. ¶¶ 4, 7.

But Huawei underscores critical factual distinctions here; namely, differences in the positions of the parties and the decision of the foreign court. *See* Opp'n **[*25]** at 13-15. First, Microsoft initiated the domestic action and asked the court to set the FRAND rate. *Microsoft I, 871 F. Supp. 2d at 1099*. In addition, it did not contest the essentiality or infringement of Motorola's standard-essential patents. *Microsoft Corp. v. Motorola, Inc., 2013 U.S. Dist. LEXIS 60233, 2013 WL 2111217, at *59 (W.D. Wash. Apr. 25, 2013)*("*Microsoft III*"); *2013 U.S. Dist. LEXIS 60233, [WL] at *61*. So, Huawei contends, "Samsung's attempt to cast itself in the role of Microsoft ... is perverse." Opp'n at 13. Samsung did not initiate this action, and it *is* contesting the essentiality and infringement of Huawei's declared SEPs. Second, Huawei distinguishes its own conduct from Motorola's. It notes that it filed this action and the Chinese actions "at the same time," not as "an end run around this action." *Id.* at 14. This is unlike what happened in *Microsoft*, where Motorola filed its German suit several months into the U.S. RAND litigation, in a deliberate effort to force Microsoft to accept non-RAND terms. *See* *Microsoft IV, 795 F.3d at 1046* ("The evidence that the rates Motorola sought were significantly higher than the RAND rate found by the court suggested that Motorola sought to capture more than the value of its patents by inducing holdup, and that it filed infringement actions to facilitate that strategy by preventing Microsoft from using its patents—and therefore from implementing the **[*26]** 802.11 and H.264 standards—until it obtained a license at a rate significantly higher than the RAND rate."); *id.* ("In the absence of a fear of irreparable harm as a motive for seeking an injunction, the jury could have inferred that the real motivation was to induce Microsoft to agree to a license at a higher-than-RAND rate."). Third, it underscores the "critical distinction" that the German court issued its injunction without evaluating whether Motorola had complied with its FRAND commitment. *See* *Microsoft II, 696 F.3d at 879*. It contrasts that decision with the Shenzhen Order, which explicitly considered and decided the underlying FRAND issues as a predicate to determining whether Huawei was entitled to an injunction. In other words, the Shenzhen court issued injunctive relief *because* it found that Samsung had not complied with its FRAND obligations.[14]

---

[13] It emphasized that it was not deciding whether the district court's determinations were "proper" because those issues were not before it on this interlocutory appeal. *Microsoft II, 696 F.3d at 884*.

[14] Huawei also argues that the Shenzhen Order should give rise to collateral estoppel effect when final. Opp'n at 15 (citing *Walia v. Aegis Center Point Devs. Private Ltd., 2014 U.S. Dist. LEXIS 10433, 2014 WL 296003 at *2 (N.D. Cal. Jan. 27, 2014)*

But those undeniable and important differences are irrelevant to whether this action is dispositive of the foreign action. Both parties have presented me with a breach of contract claim based on the other's alleged failure to abide by its commitments to ETSI.[15] Neither party disputes the other's right to enforce that contract as a third-party beneficiary. **[*27]** And the availability of injunctive relief for each party's SEPs depends on the breach of contract claims. As in *Microsoft*, "[t]he contractual umbrella over the patent claims" controls, *Microsoft II, 696 F.3d at 883*, and dictates that this action is dispositive of Huawei's Chinese actions. *See id.* ("In other words, the party was 'not seeking to enjoin [a party from litigating in] a foreign court on the basis of a patent validity or infringement finding by a United States court' but on the basis of a contract interpretation by a U.S. court.")(quoting *Medtronic, Inc. v. Catalyst Research Corp., 518 F.Supp. 946 (D. Minn. 1981)*, *aff'd*, *664 F.2d 660 (8th Cir. 1981))*.

Samsung also points to Huawei's prior requests that I address the FRAND issues first, which, in Huawei's estimation, "would moot patent infringement damages if Samsung is, in fact, a willing licensee." Huawei's Br. ISO Bifurcation at 4-5 (Dkt. No. 84). By underscoring Huawei's prior position regarding bifurcation, Samsung seeks to highlight the dispositive nature of the FRAND contract claims. But Samsung previously insisted that bifurcation was inappropriate because I had to first determine whether each asserted patent was valid, enforceable, infringed, and essential before I could decide an appropriate FRAND royalty rate. Since I only **[*28]** have the power to decide those "prerequisite" issues for U.S. SEPs, under Samsung's logic, I would not be able to decide a FRAND rate for the parties' global portfolios; rather, I would only have the ability to determine a FRAND rate for U.S. SEPs. Samsung has also argued that the court lacks the *authority* to set FRAND terms for any cross-license between the parties. *See* 9/6/16 Joint Case Management St. at 2 ("Samsung contends that Huawei, as yet, has not set forth a sufficient basis for its request for Declaratory Judgment of FRAND Terms and Conditions for a Cross-License, and Samsung reserves its rights to seek dismissal or other appropriate relief on any such claim, including on the basis of lack of subject matter jurisdiction."); *id.* at 7 ("[T]he Court has no jurisdiction to 'set' FRAND terms for a general cross license.")(Dkt. No. 67).[16]

Even beyond the question of whether I have the ability to determine a FRAND royalty rate (whether based on global or domestic SEPs), I am at a loss as to how I (or a jury) could decide the breach of contract claims. Unlike in *Microsoft*, the parties' contract claims are based on whether their respective licensing offers were FRAND, not merely **[*29]** whether seeking "injunctive relief against infringement is arguably a remedy inconsistent with the licensing commitment." *696 F.3d at 885*. *See, e.g.*, Compl. ¶ 57 (describing how Samsung's negotiation conduct breached its FRAND obligations); Answer and Am. Counterclaims ¶ 542 ("Huawei did not make an offer to license Huawei's Patents-in-Suit on FRAND terms and conditions to Samsung before filing its Complaint for patent infringement and to date has not done so."). How am I to adjudicate whether those offers were FRAND, if that determination depends on valuation of global portfolios, and can only be made subsequent to finding each patent valid and essential to the standard? *See, e.g.*, Reply at 9 ("As a result, no tribunal, here or elsewhere, will have ever critically examined Huawei's licensing structure and determine what appropriate rates would be—let alone

("Collateral estoppel applies to foreign judgments so long as the parties in the prior action were afforded due process rights."); *see also* *U.S. v. Kashamu, 656 F.3d 679, 683 (7th Cir. 2011)* ("U.S. court[s] [] generally give preclusive effect to [a] foreign court's finding as a matter of comity.")). I need not address that argument at this time.

[15] Huawei notes that Samsung has not "articulate[d] any likelihood of success on those [antitrust and contractual FRAND] claims that could result in final relief enjoining Huawei from obtaining an injunction elsewhere." Opp'n at 17 n.15 (citing Mot. at 12-17). It is true that "a ballpark, tentative assessment of the merits of the contract dispute is intrinsically bound up with the threshold anti-suit injunction inquiry... ." *Microsoft II, 696 F.3d at 884*. But that does not mean that Samsung must establish a likelihood of success on its claims. To the contrary, that inquiry is *replaced*, in part, by the question of whether this contract action will dispose of the Chinese patent actions. *See id.* Assuming I can decide the breach of contract claims, *see* discussion *infra*, this action will dispose of those actions in either one of two scenarios—if Huawei's breach of contract claim is unsuccessful, or if Samsung's breach of contract claim is successful. One way or the other, this action will resolve the propriety of injunctive relief for the parties' declared SEPs.

[16] In an added wrinkle, it was necessary to limit this case to a manageable scope. *See* Civil Pretrial Order (Dkt. No. 208). So I will not even be deciding those "prerequisite" issues for the parties' entire portfolios of U.S. SEPs. Assuming without deciding that I have the *authority* to set FRAND rates, accepting Samsung's reasoning that each patent must first be evaluated would render me unable to decide a FRAND rate based on all of the parties' U.S. SEPs.

adjudicated issues of validity or infringement of the patents at issue, which is a predicate to a true FRAND analysis."). If I take Samsung's reasoning to its logical conclusion, I see no end to this case, and certainly no way for this action to dispose of the parties' foreign patent actions.[17]

Huawei urges me to reject Samsung's seemingly inconsistent **[*30]** positions because it "does not merit exercise of [my] equitable power[,]" Opp'n at 16, and "[c]ourts derive the ability to enter an anti-suit injunction from their equitable powers." *Gallo, 446 F.3d at 989*. It insists that judicial estoppel dictates that "Samsung should be barred from now claiming entitlement to an anti-suit injunction." Opp'n at 16; *see also id.* at 17 (citing *New Hampshire v. Maine, 532 U.S. 742, 751, 121 S. Ct. 1808, 149 L. Ed. 2d 968 (2001)*, in which the Supreme Court recognized that "judicial estoppel forbids use of 'intentional self-contradiction ... as a means of obtaining unfair advantage'")). This is tempting, given that Samsung insists on its right to have its American patents litigated here but seeks to postpone the impact of having Chinese patents litigated in China.

I conclude that estoppel need not bar Samsung from seeking this antisuit injunction. That said, Samsung will not be able to argue that the breach of contract claims depend on evidence not before me, such as the validity, infringement, and essentiality of foreign patents. Judicial estoppel will apply to preclude such arguments. *See New Hampshire, 532 U.S. at 749* ("[J]udicial estoppel[] 'generally prevents a party from prevailing in one phase of a case on an argument and then relying on a contradictory argument to prevail in another phase.'"). **[*31]** But I will not require Samsung's "commitment or consent" that I "should decide the FRAND terms of a global patent cross-license." *See* Opp'n at 17. The appropriate remedy for Huawei's breach of contract claim may very well be the injunctive relief issued by the Shenzhen court. But I must have the opportunity to adjudicate that claim without Samsung facing the threat of the Shenzhen court injunctions.

B. The *Unterweser* Factors

Under the *Unterweser* factors, a court may enjoin foreign litigation "when it would (1) frustrate a policy of the forum issuing the injunction; (2) be vexatious or oppressive; (3) threaten the issuing courts *in rem* or *quasi in rem* jurisdiction; or (4) where the proceedings prejudice other equitable considerations." *Seattle Totems, 652 F.2d at 855*.

1. Domestic Policy and Other Equitable Considerations

Samsung argues that allowing Huawei to enforce the Shenzhen Court's injunction would frustrate specific domestic policies against injunctive relief on SEPs and general public policies against anticompetitive conduct and breaches of contract. Mot. at 18. The bulk of precedent supports its position. *See, e.g., Microsoft II, 696 F.3d at 884* ("Implicit in such a sweeping promise [made by Motorola to standards-setting organization] is, **[*32]** at least arguably, a guarantee that the patent-holder will not take steps to keep would-be users from using the patented material, such as seeking an injunction, but will instead proffer licenses consistent with the commitment made."); *id. at 885* ("[I]njunctive relief against infringement is arguably a remedy inconsistent with th[at] licensing commitment."); *Realtek Semiconductor Corp. v. LSI Corp., 946 F. Supp. 2d 998, 1006-07 (N.D. Cal. 2013)*("In promising to license on RAND terms, defendants here admit that monetary damages, namely a RAND royalty, would be adequate compensation for any injury it has suffered as a result of Realtek's allegedly infringing conduct."); *Apple, Inc. v. Motorola Mobility, Inc., No. 11-CV-178-BBC, 2012 U.S. Dist. LEXIS 181854, 2012 WL 5416941, at *15 (W.D. Wis. Oct. 29, 2012)*(" I agree with Apple that from a policy and economic standpoint, it makes sense that in most

[17] In fact, Samsung attacks Huawei's characterization that the Shenzhen court truly considered FRAND issues. *See* Reply at 2 ("[The Shenzhen proceedings] focused only on allegations of Samsung's purported 'bad faith' negotiation positions without evaluating the size of or justification for Huawei's proposed rates. [citation] Nowhere does the Shenzhen court address whether Huawei's original 1.5% rate or variations thereon is FRAND or justified in any objective way."); *id.* at 7 ("But the Chinese court did not determine the appropriate terms of a worldwide FRAND license—it only made nebulous findings of conduct in the context of the Chinese patents that it declared 'complied with FRAND principles' and then granted the injunction.").

situations owners of declared-essential patents that have made licensing commitments to standards-setting organizations should be precluded from obtaining an injunction or exclusionary order that would bar a company from practicing the patents.")

But Huawei insists that there is no "per se rule that injunctions are unavailable for SEPs[.]" *Apple Inc. v. Motorola, Inc., 757 F.3d 1286, 1331 (Fed. Cir. 2014)*, *overruled on other grounds by* *Williamson v. Citrix Online, LLC, 792 F.3d 1339 (Fed. Cir. 2015)*. It highlights precedent and policy that suggest "an injunction may be justified where an **[*33]** infringer unilaterally refuses a FRAND royalty or unreasonably delays negotiations to the same effect." *Id. at 1332* (citing U.S. Dep't of Justice and U.S. Patent and Trademark Office, *Policy Statement on Remedies for Standard—Essential Patents Subject to Voluntary F/RAND Commitments*, at 7-8 (Jan. 8, 2013)); *see also* Makan Delrahim, Asst. Attorney General, Antitrust Division, U.S. Dept. of Justice, Remarks as Prepared for Delivery at USC Gould School of Law — Application of Competition Policy to Technology and IP Licensing: Taking It to the Limit: Respecting Innovation Incentives in the Application of ***Antitrust Law*** (Nov. 10, 2017), available at https://www.justice.gov/opa/speech/file/1010746/download ("A patent holder cannot violate the antitrust laws by properly exercising the rights patents confer, such as seeking an injunction or refusing to license such a patent.")(Greenblatt Decl. ¶ 5, *id.*, Ex. 4, Dkt. No. 240-8).

That may be true, but the policy that is undermined is this court's ability to determine the propriety of injunctive relief in the first instance. *See, e.g., Zynga, Inc. v. Vostu USA, Inc., No. 11-CV-02959-EJD, 2011 U.S. Dist. LEXIS 89378, 2011 WL 3516164, at *3 (N.D. Cal. Aug. 11, 2011)*("But one clear policy that all federal courts recognize—even those which have been loath to interfere with foreign proceedings—is the need to protect the **[*34]** court's own jurisdiction."). There is a risk of inconsistent judgments if I were to find that Huawei is not entitled to seek injunctive relief for its SEPs. *See* *Microsoft I, 871 F. Supp. 2d at 1100* ("Courts have found that court policies against avoiding inconsistent judgments, forum shopping and engaging in duplicative and vexatious litigation sufficient to satisfy this step."). In addition, in the absence of an antisuit injunction, Samsung faces the risk of significant harm, not just in China, but with impacts percolating around the world. The Chinese injunctions would likely force it to accept Huawei's licensing terms, before any court has an opportunity to adjudicate the parties' breach of contract claims.[18] Under these circumstances, the Shenzhen Order "interfere[s] with 'equitable considerations' by compromising the court's ability to reach a just result in the case before it free of external pressure on [Samsung] to enter into a 'holdup' settlement before the litigation is complete." *Microsoft II, 696 F.3d at 886*. As in *Microsoft*, the Chinese actions "have frustrated this court's ability to adjudicate issues properly before it." *Microsoft I, 871 F. Supp. at 1100*. The integrity of this action, therefore, will be lessened without an anti-suit injunction. *See id.*

C. Vexatious [*35] or Oppressive

In *Microsoft II*, the Ninth Circuit concluded that the district court had not abused its discretion in finding that the timing and location of the foreign action "raise[d] concerns of forum shopping and duplicative and vexatious litigation." *Microsoft II, 696 F.3d at 886*. Samsung highlights the same concerns here, and once again insists that the district court's finding in *Microsoft* should control. Mot. at 19; *see* *Microsoft II, 696 F.3d at 886* (finding Motorola's proceedings in Germany to enforce its patents were "a procedural maneuver designed to harass Microsoft with the threat of an injunction removing its products from a significant European market and so to interfere with the court's ability to decide the contractual questions already properly before it.").

Huawei filed the Chinese actions at issue the day after it filed this one,[19] so the same timing concerns present in *Microsoft* are not present here. *See* *Microsoft II, 696 F.3d at 879* (noting that Motorola initiated the German patent litigation "several months into the ... domestic litigation"). But it did choose its home court for the majority of the Chinese actions, which implicates concerns of forum shopping. Huawei insists that the Chinese actions are neither

---

[18] Even though the Shenzhen court evaluated the parties' licensing negotiations, it was not presented with breach of contract claims.

[19] Huawei phrases the timing as "simultaneously" because China is a day ahead of the United States. *E.g.*, Opp'n at 20.

duplicative nor vexatious because it committed **[*36]** to dismiss them if Samsung would consent to a court or arbitrator dictating the FRAND terms of a cross-license. But its own Vice President admitted that it uses injunctive relief "as a bargaining chip":

> Today, the number of disputes is on the rise, but we see fewer cases of injunction. Perhaps judges are quite reluctant to hear injunction cases because of its staggering impact on the market. Sure enough, the core issue is price; 90% or even 99% of the patent disputes are about price. Even if injunction order were to be enforced, does Huawei really want to kick Samsung out of China? Is it possible? Of course not. And is it possible for Apple to kick Samsung out of the US? No. That being said, when faced with potential licensees who are negotiating in bad faith, unwilling to pay fair royalties, you may want to file an injunction order with the court. At the end of the day, your purpose is to get the royalties in return, while using legal action as a bargaining chip. This is how things have changed over time.

Talk of Huawei's Jianxin Ding S-816 Samsung China (Stake Decl. ¶ 2; *id.*, Ex. 1; Dkt. No. 235-7). Huawei explains that this statement is consistent with its position that injunctive **[*37]** relief may be appropriate when a party has refused to comply with its FRAND obligations. And it insists that it filed the Chinese actions because it "did not know (and still does not know) the scope of ultimate rulings from this Court on FRAND." Opp'n at 20. Given the near simultaneity of the actions and the uncertainty over scope, I am unwilling to label the foreign suits "vexatious" or "oppressive." *See* *Microsoft II, 696 F.3d at 886* (explaining that "litigation may have some merit and still be 'vexatious,' which is defined as 'without reasonable or probable cause or excuse; harassing; annoying.'")(quoting *Black's Law Dictionary* 1701 (9th ed.2009)).

Since "at least one of the so-called '*Unteweser* factors' applies," I will proceed to assess whether the injunction's impact on comity is tolerable. *Microsoft II, 696 F.3d at 881*.

III. INJUNCTION'S IMPACT ON COMITY

"Comity is 'the recognition which one nation allows within its territory to the legislative, executive or judicial acts of another nation, having due regard both to international duty and convenience, and to the rights of its own citizens, or of other persons who are under the protection of its laws.'" *Gallo, 446 F.3d at 994* (quoting *Hilton v. Guyot, 159 U.S. 113, 164, 16 S. Ct. 139, 40 L. Ed. 95 (1895))*. In *Gallo*, the Ninth Circuit excerpted a "detailed analysis of comity" **[*38]** by the D.C. Circuit in *Laker Airways Ltd. v. Sabena Belgian World Airlines, 731 F.2d 909, 235 U.S. App. D.C. 207 (D.C. Cir. 1984)*. *Id.*

> "Comity" summarizes in a brief word a complex and elusive concept—the degree of deference that a domestic forum must pay to the act of a foreign government not otherwise binding on the forum.... However, there are limitations to the application of comity. When the foreign act is inherently inconsistent with the policies underlying comity, domestic recognition could tend either to legitimize the aberration or to encourage retaliation, undercutting the realization of the goals served by comity. No nation is under an unremitting obligation to enforce foreign interests which are fundamentally prejudicial to those of the domestic forum. Thus, from the earliest times, authorities have recognized that the obligation of comity expires when the strong public policies of the forum are vitiated by the foreign act.

Id. at 995 (quoting *Laker Airways, 731 F.2d at 937*).

"*Gallo* requires not that we calculate the precise quantum of the injunction's interference with comity, but only that we estimate whether any such interference is so great as to be intolerable." *Microsoft II, 696 F.3d at 886*. In *Microsoft II*, the Ninth Circuit found that "comity is less likely to be threatened in the context of a private contractual dispute than in a dispute **[*39]** implicating public international law or government litigants." *Id. at 887*. The parties here find themselves "in the context of a private contractual dispute." As in that case, "it does not raise any 'public international issue.'" *Id. at 888* (quoting *Gallo, 446 F.3d at 994*).

Samsung points out that the Shenzhen Order provides that "Huawei can agree after the appeal that the injunction will not be enforced, and further states that the Shenzhen Court would also permit non-enforcement if the parties agree to an SEP cross-license." Shenzhen Order at 209; Xie Decl. ¶ 7. So the relief it seeks would have no impact on the Chinese courts; rather, it asks me to restrain Huawei from enforcing any injunction order until I have the opportunity to determine the propriety of injunctive relief for the parties' SEPs. It specifically notes that Huawei would remain free to seek damages for infringement of its Chinese patents while this action is pending.

Courts may also consider "[t]he order in which the domestic and foreign suits were filed" in evaluating the impact on comity. *See* *Microsoft II, 696 F.3d at 887*. As discussed, Huawei filed the Chinese actions the day after it filed the complaint here.[20] Since this action preceded the Chinese actions—if only by one day—enjoining **[*40]** the foreign action would not "intolerably impact comity." *Id.* The scope of the injunction further indicates that the impact on comity is tolerable. *See id.* Samsung seeks only to enjoin Huawei from enforcing the Chinese injunctions until I have an opportunity to evaluate the propriety of injunctive relief for the parties' SEPs. Since Samsung has appealed the injunction order, the parties estimate a few months before it becomes final. We are scheduled to proceed to trial in December of this year. The scope of this anti-suit injunction, limited to a particular order dealing with two patents, a specific form of relief, and estimated to last less than six months, presents a negligible impact on comity. *See id.*

IV. ADMINISTRATIVE MOTIONS

The parties filed administrative motions to seal portions of their briefing and attachments. Dkt. Nos. 234, 240, 244. I ordered the parties to file supplemental declarations in support of sealing certain material. Order (Dkt. No. 270). They submitted those declarations and narrowly tailored their requests for sealing only that information that could cause them competitive harm. Supp. Zhang Decl. ISO Huawei's Admin. Mot. (Dkt. No. 277); Supp. Gray Decl. ISO **[*41]** Samsung's Admin. Mot. (Dkt. No. 278). Because they have established compelling reasons for sealing their narrowly tailored requests, *Kamakana v. City & Cty. of Honolulu, 447 F.3d 1172, 1178 (9th Cir. 2006)*, their administrative motions are GRANTED.

CONCLUSION

In accordance with the foregoing, Samsung's motion to enjoin Huawei from enforcing the injunction orders issued by the Shenzhen court is GRANTED. Huawei should not seek to enforce those orders until I have the ability to determine the breach of contract claim it chose to present in this action prior to filing the Chinese actions.

IT IS SO ORDERED.

Dated: April 13, 2018

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Governments > Legislation > Statute of Limitations > Pleadings & Proof

HN1[] **Involuntary Dismissals, Failure to State Claims**

A motion to dismiss may be granted when a claim is barred under a statute of limitations. A court may dismiss a complaint pursuant to *Fed. R. Civ. P. 12(b)(6)* when it appears from the face of the complaint that the claim is time-barred and no facts are alleged to avoid the bar of the statute. In deciding a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court must assume all facts in the complaint to be true and must construe all reasonable inferences most favorably to the complainant.

Business & Corporate Compliance > ... > Labor & Employment Law > Employer Liability > False Claims Act

Governments > Legislation > Statute of Repose

Governments > Legislation > Statute of Limitations > Time Limitations

HN2[] Employer Liability, False Claims Act

31 U.S.C.S. § 3731(b) provides that a civil action may not be brought under the False Claims Act (1) more than 6 years after the date on which a violation of 31 U.S.C.S. § 3729 is committed, or (2) more than 3 years after the date when facts material to the right of action are known or reasonably should have been known by an official of the United States charged with responsibility to act in the circumstances, but in no event more than 10 years after the date on which the violation is committed, whichever occurs last.

Business & Corporate Compliance > ... > Labor & Employment Law > Employer Liability > False Claims Act

Governments > Legislation > Statute of Limitations > Time Limitations

HN3[] Employer Liability, False Claims Act

Courts have recognized three approaches to interpreting how the statute of limitations in 31 U.S.C.S. § 3731(b) applies to actions brought under the False Claims Act by a private person in which the government declines to intervene. The first approach interprets 31 U.S.C.S. § 3731(b)(2) as applying to the government only and as inapplicable in cases where the government does not intervene. The second approach asserts that private parties are entitled to the 10 year statute of limitations in 31 U.S.C.S. § 3731(b)(2) and that the limitations period begins on the date the government should have known of facts material to the right of action. Finally, the third approach is that the private party stands in for the government where the government declines to intervene, and that the limitations period begins to run on the date that the plaintiff knew or should have known the facts relevant to the right of action.

Business & Corporate Compliance > ... > Labor & Employment Law > Employer Liability > False Claims Act

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > Tolling

HN4[] Employer Liability, False Claims Act

When considering which statute of limitations applies to qui tam actions brought by private individuals under the False Claims Act, in which the government declines to intervene, equitable tolling, codified for the government at 31 U.S.C.S. § 3731(b)(2), should similarly be available for a private plaintiff.

Governments > Legislation > Statute of Limitations > Tolling

HN5[] Statute of Limitations, Tolling

The fact that a federal statute sets a time limitation for a suit does not restrict the power of the federal courts to hold that the statute of limitations is tolled under certain circumstances not inconsistent with legislative purpose. This is despite the fact that neither the legislative history nor the text of the statute clearly provide for such a right for a particular party, to the extent that one party must be substituted for another explicitly provided that right. Moreover, claims for equitable tolling apply where a plaintiff has been pursuing his or her rights diligently and where extraordinary circumstances prevented timely filing.

Business & Corporate Compliance > ... > Labor & Employment Law > Employer Liability > False Claims Act

Governments > Legislation > Interpretation

Governments > Legislation > Statute of Limitations > Time Limitations

HN6[] Employer Liability, False Claims Act

The plain meaning of *31 U.S.C.S. § 3731(b)*, providing a statute of limitations for private party claims under the *False Claims Act*, is ambiguous. Moreover, given the breadth of interpretations of the legislative history of this statute, it is equally as ambiguous. While the plain language of a statute is the starting point for statutory interpretation, and the purpose of statutory interpretation is to give effect to the intent of Congress, canons of statutory interpretation need not be conclusive and other circumstances evidencing congressional intent can overcome their force. This is undoubtedly so where both the plain language of the statute and legislative history are unclear.

Governments > Legislation > Statute of Limitations > Time Limitations

Labor & Employment Law > ... > False Claims Act > Scope & Definitions > Qui Tam Actions

HN7[] Statute of Limitations, Time Limitations

In *False Claims Act* cases brought by a private party in the Northern Division of the United States District Court for the District of South Dakota, in which the government declines to intervene, the plaintiff's knowledge determines the applicable limitations period, under *31 U.S.C.S. § 3731(b)*, because the plaintiff stands in for the government and the limitations period begins to run on the date the plaintiff knew or should have known the facts relevant to the right of action, as qui tam plaintiffs are merely agents suing on behalf of the government, which is always the real party in interest.

Business & Corporate Compliance > ... > Corporations > Corporate Governance > Directors & Officers

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Labor & Employment Law > Employer Liability > False Claims Act > Scope & Definitions

Business & Corporate Law > Agency Relationships > Types > Employees & Employers

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] Corporations, Directors & Officers

In order to survive a motion to dismiss for failure to state a claim on which relief can be granted, a plaintiff must allege sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A plausible claim must plead factual content that allows a court to draw the reasonable inference that the defendant is liable for the misconduct alleged. A prima facie case under the False Claims Act (FCA) requires that (1) the defendant made a claim against the United States, (2) the claim was false or fraudulent, and (3) the defendant knew the claim was false or fraudulent. Liability under the FCA attaches to the claim for payment, rather than the underlying fraud. Under the FCA, a defendant must have actual knowledge, and act in deliberate ignorance of or have reckless disregard of the truth or falsity of the information in presenting a materially false claim. *31 U.S.C.S. § 3729(b)(1)(A)*. Proof of specific intent to defraud the government is not required. Further, the knowledge of officers and key employees of a corporation, obtained while acting in the course of their employment and within the scope of their authority, is imputed to the corporation itself.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Labor & Employment Law > Employer Liability > False Claims Act > Burdens of Proof

HN9[] Heightened Pleading Requirements, Fraud Claims

The heightened pleading standard for fraud under *Fed. R. Civ. P. 9(b)* applies to claims brought under the *False Claims Act*, to include reverse false claims. Under *Rule 9(b)*, a party must state with particularity the circumstances constituting fraud. To meet this standard, a plaintiff's complaint alleging fraud must identify who, what, where, when, and how. Pleading with the requisite particularity includes the requirement to plead the materiality of the false claims to payment. When a claim is based on facts peculiarly within the opposing party's knowledge, allegations may be pled on information and belief so long as they are accompanied by a statement of facts on which the belief is founded and the pleader identifies efforts made to obtain additional information. This relaxed standard, though, does not remove the plaintiff's requirement to plead the equivalent of the first paragraph of any newspaper story.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Labor & Employment Law > Employer Liability > False Claims Act > Burdens of Proof

Labor & Employment Law > ... > False Claims Act > Scope & Definitions > Qui Tam Actions

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN10[] Heightened Pleading Requirements, Fraud Claims

When a plaintiff bringing a qui tam action under the *False Claims Act* alleges a systematic practice of fraud, the plaintiff need not allege details of every alleged fraudulent claim but, if the defendants' actions could, but may not necessarily have led to the submission of false claims, must provide some representative examples of the defendants' alleged fraudulent conduct, specifying the time, place, and content of their acts and the identity of the actors within the statute of limitations. A plaintiff may satisfy the particularity requirement of *Fed. R. Civ. P. 9(b)* in cases of systematic fraud without pleading representative examples of false claims where the plaintiff pleads particular details of a scheme to submit false claims paired with reliable indicia that lead to a strong inference that claims were actually submitted, such as by pleading details about the defendant's billing practices and pleading personal knowledge of the defendant's submission of false claims.

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > Notice Requirement

HN11[] Involuntary Dismissals, Failure to State Claims

When, on a motion to dismiss for failure to state a claim, extrinsic evidence outside the pleadings is considered by a court, the motion must be treated as one for summary judgment. However, a district court may consider materials necessarily embraced by the pleadings. When deciding a motion to dismiss, the court may consider the complaint and documents whose contents are alleged in a complaint and whose authenticity no party questions. Where a party has actual notice of all the information in a movant's papers and has relied upon these documents in framing the complaint, the necessity of translating a *Fed. R. Civ. P. 12(b)(6)* motion into one under *Fed. R. Civ. P. 56* is largely dissipated.

Business & Corporate Compliance > ... > Labor & Employment Law > Employer Liability > False Claims Act

Governments > Legislation > Statute of Limitations > Time Limitations

HN12[] Employer Liability, False Claims Act

The limitations period under *31 U.S.C.S. § 3731(b)(1)* of the False Claim Act begins to run on the date the false claim was actually submitted.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN13[] Complaints, Requirements for Complaint

Allegations may be pled on information and belief when facts are likely to be peculiarly within the opposing party's knowledge, but such belief must be accompanied by facts justifying the belief and a statement identifying efforts made to obtain additional information.

Labor & Employment Law > Employer Liability > False Claims Act > Scope & Definitions

HN14[] False Claims Act, Scope & Definitions

A motion to dismiss may properly encompass the materiality of a defendant's false claims to the government's decision to pay a claim. The False Claims Act (FCA) defines materiality as having a natural tendency to influence, or be capable of influencing, the payment or receipt of money or property. *31 U.S.C.S. § 3729(b)(4)*. The fact that the government is entitled to refuse payment if aware of a violation is insufficient to meet the materiality requirement. However, a false statement is considered material under the FCA if either (1) a reasonable person would likely attach importance to it or (2) the defendant knew or should have known that the government would attach importance to it.

Business & Corporate Compliance > ... > Agriculture & Food > Governments > Agriculture & Food

Labor & Employment Law > Employer Liability > False Claims Act > Scope & Definitions

HN15[] Governments, Agriculture & Food

When applying the *False Claims Act* to statements made to the United States Department of Agriculture, Farm Services Agency (FSA) in connection with farm subsidy payments, farm disaster payments, and loans for farmers, the ownership interest of individuals for an entity seeking benefits from the FSA, as well as their engagement in that entity, are central to the payment eligibility criteria for farm subsidies established in 7 C.F.R. pt. 1400 — Payment Limitation and Payment Eligibility. Indeed, identifying who or what is participating and therefore how payments may be attributed is the cornerstone to most program eligibility. A reasonable person would therefore likely attach importance to a statement of ownership interests to the FSA in a farm operating plan, and these considerations, in determining an individual's eligibility for farm subsidies, undoubtedly influence the payment of farm subsidies by the government as required by *31 U.S.C.S. § 3729(b)(4)*.

Business & Corporate Compliance > ... > Agriculture & Food > Governments > Agriculture & Food

HN16[] **Governments, Agriculture & Food**

The regulations codified at 7 C.F.R. pt. 1400 provide detailed guidance for the attribution of payments from the United States Department of Agriculture, Farm Services Agency by the pro rata share of a person's interest in an entity, used to establish an individual's cumulative payments against their annual payment limits, *7 C.F.R. § 1400.105*. Payment limitations per person are established in *7 C.F.R. § 1400.1(f)* and average adjusted gross income limitations are set forth in *7 C.F.R. § 1400.500(a) - (d)*. The payment eligibility requirements state that to be considered eligible to receive payments with respect to a particular farming operation, a person or legal entity must be actively engaged in farming with respect to such operation. *7 C.F.R. § 1400.201*. The requirement to be actively engaged in farming continues to be an area in which the government has recognized potential for fraud. Requirements for active engagement in farming are established separately for different entities or individuals engaged in farming operations.

Business & Corporate Compliance > ... > Agriculture & Food > Governments > Agriculture & Food

HN17[] **Governments, Agriculture & Food**

Under regulations of the United States Department of Agriculture, Farm Services Agency, for a farming operation conducted predominately by family members, in order to be actively engaged in fanning, an adult family member must (1) have a share of the profits or losses from the farming operation commensurate with such person's contribution to the operation and (2) make contributions to the farming operation that are at risk for a loss, with the level of risk being commensurate with such person's claimed share of the farming operation. *7 C.F.R. § 1400.208*. Contribution is defined as providing land, capital, or equipment assets, and the actions of providing active personal labor or active personal management to a farming operation in exchange for, or with the expectation of, deriving benefit based solely on the success of the farming operation. *7 C.F.R. § 1400.3*. Active personal management includes general supervision and direction of activities or services reasonably related and necessary to the farming operation, which may potentially not require physically visiting the farming operation.

Business & Corporate Compliance > ... > Agriculture & Food > Governments > Agriculture & Food

HN18[] **Governments, Agriculture & Food**

Under regulations of the United States Department of Agriculture, Farm Services Agency, a requirement to be actively engaged in farming adheres for members of a corporation, with the additional requirement that active personal labor-and active personal management is (i) performed on a regular basis, (ii) identifiable and documentable, and (iii) separate and distinct from such contributions of any other member of the farming operation. *7 C.F.R. § 1400.204(a)(2)(i) - (iii)*. As of 2011, an exception to the requirement that a member be actively engaged in farming exists where at least 50 percent of the stock is held by members that are actively providing labor or management. *7 C.F.R. § 1400.204(a)(2)*, *(c)(1)*. It is also possible, as of 2011, for one spouse to contribute either active personal labor, active personal management, or a combination of these for both spouses. *7 C.F.R. § 1400.204(a)(2)*.

Business & Corporate Compliance > ... > Agriculture & Food > Governments > Agriculture & Food

HN19[] **Governments, Agriculture & Food**

Under regulations of the United States Department of Agriculture, Farm Services Agency, like an exception for spouses included under corporations, as of 2009, a provision in the regulation under "Persons" indicates that where one spouse is actively engaged in farming the other spouse need not be. *7 C.F.R. § 1400.202(b)*. However, this provision specifically references such spouse's active engagement in farming as fulfilling the other spouse's requirement to do so under *7 C.F.R. § 1400.202(a)(1)(ii)*. It therefore does not nullify the requirement in the same section for each spouse to provide capital as provided in *7 C.F.R. § 1400.202(a)(1)(i)*. Nor does this provision alongside the less restrictive requirements for family members under *7 C.F.R. § 1400.208* or spousal members of a corporation under *7 C.F.R. § 1400.204(a)(2)* suggest that neither spouse is required to contribute capital to the farming operation.

Business & Corporate Compliance > ... > Agriculture & Food > Governments > Agriculture & Food

HN20[] **Governments, Agriculture & Food**

Under regulations of the United States Department of Agriculture, Farm Services Agency, the provisions of 7 C.F.R. pt. 1400 provide that any change in a farming operation that increase the number of persons or legal entities to which the provisions of the regulations apply must be bona fide and substantive. *7 C.F.R. § 1400.104*. It contains specific provisions for refunding payments received if the person or legal entity fails to comply with the provisions of the regulations and adopts or participates in adopting a scheme or device designed to evade the regulations. *7 C.F.R. § 1400.5*.

Antitrust & Trade Law > Clayton Act > Defenses

Business & Corporate Law > ... > Directors & Officers > Management Duties & Liabilities > Defenses

Labor & Employment Law > Employer Liability > False Claims Act > Scope & Definitions

HN21[] **Clayton Act, Defenses**

The intracorporate conspiracy doctrine, developed within the context of ***antitrust law***, holds that a corporation cannot conspire with its employees, agents, or subsidiaries, as that would amount to conspiring with itself. The doctrine turns on specific antitrust objectives and at least one district court has held that it is not available under the False Claims Act (FCA). On the other hand, a handful of district courts have extended the intracorporate conspiracy doctrine to bar claims for conspiracy under the FCA. This includes two district court cases from the United States Court of Appeals for the Eighth Circuit, which assume that plaintiffs in a claim for conspiracy under the FCA must plead facts of conspiracy outside the corporate structure in order not to be barred by the intracorporate conspiracy doctrine.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Labor & Employment Law > Employer Liability > False Claims Act > Burdens of Proof

Labor & Employment Law > Employer Liability > False Claims Act > Scope & Definitions

HN22[] **Heightened Pleading Requirements, Fraud Claims**

The particularity requirement of *Fed. R. Civ. P. 9(b)* applies to conspiracy claims brought under the *False Claims Act*. To state a claim for conspiracy under *31 U.S.C.S. § 3729(a)(1)(C)*, it must be shown that the conspirators intended to defraud the government. Although it is not necessary to show that the conspirators intended a false record or statement to be presented directly to the government, the plaintiffs must establish that they agreed that the false record or statement would have a material effect on the government's decision to pay a false or fraudulent claim. A plaintiff need not provide proof of express agreement but must establish a tacit understanding between the parties which may be shown wholly through the circumstantial evidence of each defendant's actions.

Civil Procedure > Pleading & Practice > Pleadings > Complaints

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Labor & Employment Law > Employer Liability > False Claims Act > Scope & Definitions

HN23[] **Pleadings, Complaints**

Pursuant to *Fed. R. Civ. P. 8(d)*, a party may plead two or more statements of a claim or defense alternatively or hypothetically. Where alternative statements are made, a pleading is sufficient if any one of them is sufficient. *Fed. R. Civ. P. 8(d)(2)*. Moreover, a party may state as many separate claims or defenses as it has, regardless of consistency. *Fed. R. Civ. P. 8(d)(3)*. This rule is also recognized in South Dakota. S.D. Codified Laws § 15-6-8(a), (e). The fact that a relator's claim for unjust enrichment may be inconsistent with claims brought under the *False Claims Act* is not a reason for dismissal.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN24[] **Equitable Relief, Quantum Meruit**

Unjust enrichment occurs when one confers a benefit upon another who accepts or acquiesces in that benefit, making it inequitable to retain that benefit without paying. To establish a prima facie claim for unjust enrichment in South Dakota, a plaintiff must claim that a defendant (1) received a benefit, (2) the defendant was cognizant of that benefit, and (3) the retention of the benefit without reimbursement would unjustly enrich the recipient. The relevant inquiry in determining whether the recipient was unjustly enriched is whether the circumstances are such that equitably the beneficiary should restore to the benefactor the benefit or its value. Further, an enrichment is unjust if it lacks an adequate legal basis, i.e., it results from a transaction that the law treats as ineffective to work a conclusive alteration in ownership rights.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN25[] **Equitable Relief, Quantum Meruit**

While a claim for unjust enrichment may exist where a person is unjustly enriched at the expense of another, the consecrated formula "at the expense of another" can also mean "in violation of the other's legally protected rights," without the need to show that the claimant has suffered a loss. Where a breach of fiduciary duty is at issue, the defendant's benefit is regarded as being at the plaintiff's expense because it resulted in a wrong committed against him or her.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN26[] **Amendment of Pleadings, Leave of Court**

A decision whether to allow a plaintiff to amend a complaint is left to the sound discretion of a district court. Amendments may be denied where they unduly prejudice the non-moving party or are futile.

Opinion by: CHARLES B. KORNMANN

Opinion

ORDER

BACKGROUND

On behalf of the United States and himself, Dr. John A. Millin ("Relator," together with the United States, "plaintiffs") filed suit on July 18, 2016, against Larry **[*2]** F. Krause and Krause-Allbee Trucking, Inc. ("defendants") in a *qui tam* action under the *False Claims Act ("FCA"), Title 31 U.S.C. § 3729, et. seq.*, as amended, to recover damages and penalties related to defendants' alleged false claims for payment to the United States Department of Agriculture, Farm Services Agency ("FSA") in connection with farm subsidy payments, farm disaster payments, and loans for farmers. Relator alleges that defendant Krause misrepresented the ownership of Krause-Allbee Trucking by submitting filings to the FSA stating that Relator and his then spouse, Lori Millin, maintained ownership interests in Krause-Allbee Trucking, when Relator did not maintain any such ownership interest. Relator states that he discovered he did not hold any ownership interest in Krause-Albee Trucking after divorce from his then spouse, when his attorney contacted defendants to request Krause-Allbee Trucking's financial statements.

Specifically, Relator alleges that Krause filed documents with the FSA or the United States Department of Agriculture or both in 2002, indicating that Relator and his then spouse owned stock in Krause-Allbee Trucking. Krause also allegedly signed and submitted to the FSA a document **[*3]** stating that Relator designated Krause-Allbee Trucking to receive FSA payments to which Relator was entitled. The same Farm Operating Plan listing ownership interests in Krause-Allbee Trucking was again filed in 2003 with the FSA. In 2004, 2005, and 2006, Relator alleges that Krause filed documents with the FSA, stating Relator and his then spouse held the same ownership interests in Krause-Allbee Trucking.

According to plaintiffs' Complaint, filings with the FSA on behalf of Krause-Allbee Trucking for 2007, 2008, and 2009 similarly list Relator and his then spouse as holding ownership interests in Krause-Allbee Trucking. Documents from 2009 include minutes of a corporate meeting dated January 14, 2009, indicating that Relator and his then spouse were the only stockholders of Krause-Allbee Trucking. Relator alleges that additional documents from 2009, including the Farm Operating Plan, list Relator and his then spouse as guarantors of a loan to Krause-Allbee Trucking from the First State Bank of Warner, but that both Krause and the First State Bank of Warner have represented that Relator never guaranteed such a loan. Relator further alleges that, from 2010-2015, Krause filed Farm Operating **[*4]** Plans with the FSA, listing Relator and his then spouse as holding ownership interests in Krause-Allbee Trucking.

In 2002, 2006, and 2009 the FSA sent Krause-Allbee Trucking letters confirming the stock ownership, stating that "[y]ou are 'actively engaged in farming' and eligible for payments and benefits" and "Adjusted Gross Income provisions have been met based on your certifications." According to plaintiffs' Complaint, Krause-Allbee Trucking received subsidies from the FSA of $307,924 in 2008, $62,506 in 2009, $347,134 in 2010, $72,205 in 2011, $258,104 in 2012 and $108,585 in 2013. Plaintiffs' Complaint argues that the alleged false statements regarding ownership interests were material to the FSA's grant of farm subsidies, because Krause's payments would have otherwise been capped by limits on an individual's receipt of farm subsidies. By listing Relator and his then spouse as owners of Krause-Allbee Trucking, plaintiffs' Complaint alleges that "[d]efendants were able to receive farm subsidy payments to which they would not have been entitled if Krause and his wife were listed as the owners of Krause-Allbee Trucking."

Plaintiffs' Complaint further states that Krause may have filed **[*5]** similar statements on behalf of Krause-Allbee Farming, Inc. or L&L General Partnership or both, and that these entities, along with K&L Land & Cattle, LLC, received subsidies from the FSA based on Farm Operating Plans submitted to the FSA.

Plaintiffs filed claims for relief under the FCA, *31 U.S.C. § 3729(a)(1)*, *(i)* for presenting a false claim for payment or approval, (ii) making or using a false record or statement material to a false claim, (iii) conspiring to defraud the Government, and (iv) using a false record or statement to conceal, avoid, or decrease an obligation to pay or transmit money or property to the Government (also called a "reverse false claim"). Plaintiffs' Complaint also seeks a declaratory judgment pursuant to *28 U.S.C. § 2201* for Relator regarding his ownership interest in Krause-Allbee Trucking, as well as a claim of unjust enrichment against defendants for receiving payments from farm subsidy programs on Relator's behalf.

Defendants move to dismiss plaintiffs' claims based on the statute of limitations codified in the FCA at *31 U.S.C. § 3731 (b)*, stating that the six-year limitation on claims bars "the majority of plaintiffs' claims. Defendants also submit that plaintiffs' Complaint failed to meet the plausibility requirement **[*6]** of *Fed. R. Civ. P. 8(a)* and the particularity requirement of *Fed. R. Civ. P. 9(b)* for fraud claims. Defendants further argue that plaintiffs' conspiracy claim is barred by the intracorporate conspiracy doctrine. Relator's request for declaratory judgment, defendants state, must be dismissed if the FCA claims are dismissed, as the *Declaratory Judgment Act* does not provide an independent basis for jurisdiction. Finally, defendants argue that Relator's claim for unjust enrichment must be dismissed, stating that Relator has not pled the elements required for such a claim. These arguments are addressed in turn below.

Plaintiffs filed an opposition to the motion to dismiss requesting, in the alternative, leave to amend the Complaint.

DECISION

I. The applicable statute of limitations under the FCA, *31 U.S.C. § 3731(b)*

HN1[] A motion to dismiss may be granted "when a claim is barred under a statute of limitations." *Bradley Timberland Res. v. Bradley Lumber Co., 712 F.3d 401, 406 (8th Cir. 2013)* (*citing* *Varner v. Peterson Farms, 371 F.3d 1011, 1016 (8th Cir. 2004))*. A court may dismiss a complaint pursuant to *Fed. R. Civ. P. 12(b)(6)* when it appears from the face of the complaint that the claim is time-barred and no facts are alleged to avoid the bar of the statute. *Wong v. Wells Fargo Bank N.A., 789 F.3d 889, 897 (8th Cir. 2015)* (*citing* *Illig v. Union Elec. Co., 652 F.3d 971, 976 (8th Cir. 1995))*; *Varner v. Peterson Farms, 371 F.3d 1011, 1016 (8th Cir.2004)*; and *Brictson v. Woodrough, 164 F.2d 107 (8th Cir. 1947)*. In deciding a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court must assume "all facts in the complaint to be true" and must construe "all reasonable inferences **[*7]** most favorably to the complainant." *U.S. ex rel. Raynor v. Nat'l Rural Utilities Co-op. Finance. Corp., 690 F.3d 951 (8th Cir. 2012)* (*citing* *B&B Hardware, Inc. v. Hargis Indus., Inc., 569 F.3d 383, 387 (8th Cir.2009)*; and *Eckert v. Titan Tire Corp., 514 F.3d 801, 806 (8th Cir.2008))*.

Assuming that all of the facts in plaintiffs' Complaint are true and drawing inferences in plaintiffs' favor, plaintiffs' claims allege that defendants may have committed violations of the FCA each year from 2002-2015. However, **HN2**[] 31 U.S.C. § 3731(b) provides that a civil action may not be brought under the FCA

> (1) more than 6 years after the date on which the violation of section 3729 is committed, or
> (2) more than 3 years after the date when facts material to the right of action are known or reasonably should have been known by the official of the United States charged with responsibility to act in the circumstances, but in no event more than 10 years after the date on which the violation is committed, whichever occurs last.

Whether 31 U.S.C. § 3731(b)(1) or (b)(2) applies in the instant case, then, determines whether false claims submitted after 18 July 2010 or 18 July 2006 remain viable. Because it is clear from the face of the Complaint that plaintiffs plead claims that may be barred by the statute of limitations—specifically, any false claims allegedly submitted by defendants prior to either of these dates—we may decide this issue as raised in the defendants' motion to dismiss.

Plaintiffs **[*8]** and defendants acknowledge that where, as here, the government declines to join a civil action brought by a private person, the Eighth Circuit has not determined which limitations period applies. Moreover, circuit courts are split on this issue. As a question of first impression in our circuit on which a number of courts are in disagreement, then, this Court undertakes a review of rationale given by leading opinions regarding which statute of limitations applies to private actions brought under the FCA.

Why Congress has not acted over a period of 25 years to address all these questions and different interpretations of the statute is a mystery to me. This inaction is a detriment to litigants and the courts.

a. Interpretations of *31 U.S.C. § 3731(b)* in the Eighth Circuit

In their motion to dismiss plaintiffs' claims as barred by the statute of limitations, defendants state that the six-year limitation applies here, "as the three-year limitation applies only to the government." In support of this statement, defendants cite an unreported case (*U.S. ex rel. Read v. Central Plains Clinic, 1998 U.S. Dist. LEXIS 15642, 1998 WL 663330 (D.S.D. 1998)*), an Eighth Circuit case in which the six-year statute of limitations was not on appeal and so not considered in the Court's decision (*Baycol Prods. Litig., 732 F.3d 869 (2013))*, and two cases from the District **[*9]** of Minnesota which cite an Eighth Circuit case, Joshi, as precedent (*U.S. ex rel. Dicken v. Nw. Eye Center, P.A., 2017 U.S. Dist. LEXIS 83130, 2017 WL 2345579 (D. Minn. 2017)*; and *U.S. ex rel. Sammarco v. Ludeman, 2010 U.S. Dist. LEXIS 17470, 2010 WL 681454 (D. Minn. 2010)* (unreported)). The Court in Joshi, however, in fact declined to decide whether *§ 3731(b)(2)* applies where the government does not intervene (*U.S. ex rel. Joshi v. St. Luke's Hosp., Inc., 441 F.3d 552, 559 (8th Cir. 2006))*. There is no case law that otherwise determines how this Court must decide this issue.

HN3[] Courts have recognized three approaches to interpreting how the statute of limitations in *31 U.S.C. § 3731(b)* applies to actions brought by a private person in which the government declines to intervene. The first approach, which defendants argue this court should adopt, interprets *§ 3731(b)(2)* as applying to the government only and as inapplicable in cases where the government does not intervene. *U.S. ex rel. Sanders v. N. Am. Bus. Indus., Inc., 546 F.3d 288 (4th Cir. 2008)*. The second approach asserts that private parties are entitled to the 10 year statute of limitations *§ 3731(b)(2)* and that the limitations period begins on the date the government should have known of facts material to the right of action. *U.S. ex rel. Pogue v. Diabetes Treatment Ctrs. of Am., 474 F.Supp.2d 75 (D.D.C. 2007)*. Finally, the third approach is that the private party stands in for the government where the government declines to intervene, and that the limitations period begins to run on the date that the plaintiff knew or should have known the facts relevant to the right of action. *U.S. ex rel. Hyatt v. Northrop Corp., 91 F.3d 1211 (9th Cir. 1996)*.

b. First approach: Limiting private [*10] plaintiffs to the six year limitations period

In Sanders, the Fourth Circuit decided that, based upon a claimed plain reading of *§ 3731(b)*, it is clear that Congress intended *clause (b)(2)* of that section to apply only to cases in which the government is a party, as reading *clause (b)(2)* to apply when the government is not a party produces the "bizarre" result in which "the limitations period in a relator's action depends on the knowledge of a nonparty to the action." *U.S. ex rel. Sanders v. N. Am. Bus. Indus., Inc., 546 F.3d 288, 293 (4th Cir. 2008)*. Such an interpretation of the government's awareness of facts relevant to the claim "does not notify the relator of anything, so that knowledge cannot reasonably begin the limitations period for a relator's claims." *Id. at 294*. Moreover, the government official responsible for acting on such knowledge cannot "be charged with any responsibility other than to see that the government brings or joins an FCA action within the limitations period." *Id.* There is no responsibility for such official to assume that a private party will bring an FCA action.

The Fourth Circuit further explains that, following the Supreme Court's decision in Graham, it is clear that the reference to a "civil action" in *§ 3731(b)*'s preface should not be interpreted to mean that **[*11]** all civil actions are covered by each clause of *§ 3731(b)*, but rather that "only a subset of civil actions may benefit from the extended limitations period in *§ 3731(b)(2)*—those in which the government is a party." *Id. at 295* (*citing Graham Cty. Soil & Water Conservation Dist. v. ex rel. Wilson, 545 U.S. 409, 411, 125 S. Ct. 2444, 162 L. Ed. 2d 390 (2005)*). The Fourth Circuit notes that *§ 3731(b)(2)* is almost identical to another federal statute, *28 U.S.C. § 2416(c)*, which "tolls the generally applicable statute of limitations in actions brought by the United States—and only by the United States—until 'facts material to the right of action' are actually or constructively known by an 'official of the United States charged with the responsibility to act in the circumstances.'" *Sanders at 294* (internal citations omitted). It is argued then that Congress transcribed language enacted in *28 U.S.C. § 2416(c)*, which applies only to the government, when adopting *§ 3731(b)(2)*, suggesting that Congress intended *§ 3731(b)(2)* to similarly only apply to the government.[1] *Id.*

Interpreting *§ 3731 (b)(2)* to apply to private plaintiffs could result in unfavorable outcomes. In addition to requiring defendants, in asserting a statute of limitations defense, "to seek out and litigate the identity and knowledge of a government official not a party to the action," it would also allow private plaintiffs to delay in filing an action, **[*12]** increasing their own recovery in doing so and rendering the six-year statute of limitations in *§ 3731(b)(1)* superfluous. *Id. at 295*. A private plaintiff's failure to timely file a claim may also cause the government to lose the opportunity to bring a criminal action for the fraud, which must be filed "within five years of the violation," although this outcome could also occur in the event a plaintiff exercises the full six-year limitations period set forth in *§ 3731(b)(1)*. *Id.* (*citing 18 U.S.C. §§ 287*, *3282*). In the present case, there is no search required because the FSA operates in Aberdeen, S.D., and is readily available to litigants.

Sanders notes that the majority of federal circuit and district courts follow an approach which limits private plaintiffs to a six-year statute of limitations under the FCA. *Id. at 296*. While Sanders does not engage in an exhaustive inquiry into congressional intent and statutory history, the Fourth Circuit looks to the Tenth Circuit's decision in Sikkenga to support its argument that *§ 3731 (b)(2)* is adopted from *28 U.S.C. § 2416(c)*. In Sikkenga, the Tenth Circuit, outlining the different approaches to interpreting *§ 3731(b)*, acknowledges that the plain language of the statute "is ambiguous," and thereafter performs a lengthy statutory analysis, ultimately **[*13]** determining "that *§ 3731(b)* was not intended to apply to private qui tarn relators at all." *U.S. ex rel. Sikkenga v. Regence Bluecross Blueshield of Utah, 472 F.3d 702, 722, 725 (10th Cir. 2006)*. Sanders leverages this analysis in its decision. In fact, it is virtually impossible to determine what Congress intended,

c. Second approach: the government's knowledge determines the limitations period

In U.S. ex rel. Pogue v. Diabetes Treatment Centers of America, the District Court for the District of Columbia held that the statute of limitations should begin to run when the government becomes aware of facts material to the

[1] This Court notes that, as articulated by the District Court in U.S. ex rel. Griffith v. Conn, *15 U.S.C. § 78u-6* ("Securities whistleblower incentives and protection") also contains language similar to that included in *§ 3731(b)(2)* that, like *28 U.S.C. § 2416(c)*, applies only to the government. *117 F.Supp.3d 961 (E.D.Ky. 2015)*.

claim. The District Court opined that, because § 3731(b)(2) does not explicitly exclude private plaintiffs, and because the phrase "whichever occurs last" appears, as offset, to apply both to § 3731(b)(1) and (b)(2), the prefatory language "[a] civil action" should render both (b)(1) and (b)(2) as applying to all civil claims. U.S. ex rel. Pogue v. Diabetes Treatment Ctrs. of Am., 474 F.Supp.2d 75, 84, 85 (D.D.C. 2007). However, as discussed above, the Supreme Court expressly rejected this interpretation of § 3731(b)'s preface in Graham, and this Court is unpersuaded that any other reading would require interpreting "whichever occurs last" as applying only to § 3731(b)(2) as the District Court argues. Rather, it is clear that "whichever occurs last" determines which limitations period should apply should the government **[*14]** choose to intervene in a claim brought by a private plaintiff, in line with the Supreme Court's reading in Graham that "[a] civil action" does not include all civil actions,

After determining that the legislative history of the statute "shows, if anything, a desire to ensure that the government's rights are not impaired by the conduct of some other person," the Pogue opinion further reasons that § 3731 (b)(2) could not apply to a private plaintiff, because this would result in a situation where "the government could conceivably find itself time-barred when it intervenes in a *qui tarn* case in which a relator waited more than three years to bring suit." Id. at 87. This reasoning assumes that, in cases where the government does intervene, the government would not receive the benefit of a plain reading of the statute, contrary to the Pogue Court's own rationale for its interpretation of § 3731(b)(2). The Pogue Court observed that, interpreting § 3731(b)(2) such that the government is only bound by its own knowledge where it intervenes, would "allow the government to change the applicable limitations period by deciding to intervene," an outcome the Court characterizes as "unusual." However, I see nothing unusual in this outcome. As **[*15]** implicitly acknowledged by the Sanders decision, in a case brought by a private party, the private party will typically control when the government discovers the facts material to the right of action. Pursuant to § 3730(b), the government may elect to intervene in the action within 60 days (subject to permitted extensions) of the plaintiff filing its complaint. The complaint is not served on the defendant until ordered by the court. 31 U.S.C. § 3730(b)(2). The applicable statute of limitations, if at issue, could be apparent shortly after a private plaintiff files its complaint.

It is clear from the discussion in Sanders (outlined above) that interpreting § 3731 (b)(2) as applying to the government only results in outcomes that are unfavorable to the timely filing of suit, the government's rights to pursue fraud claims, and the convenience of both plaintiffs and defendants. Although Pogue takes issue with the rationale provided in decisions that follow Sanders that, were a private plaintiff not limited to the six year limitations period, that plaintiff might sleep on the claim, this argument is unconvincing. The Pogue decision argues that the first to file rule and public disclosure bar encourage private plaintiffs to file claims **[*16]** rapidly. U.S. ex rel. Pogue v. Diabetes Treatment Ctrs. of Am., 474 F.Supp.2d 75, 84, 88 (D.D.C. 2007). However, for many private plaintiffs, as here, the likelihood of the fraud they have knowledge of becoming public or being acted on by another party is limited. Moreover, plaintiffs that are the original source of information for such fraud will be able to exercise an exception to the public disclosure bar. For the reasons stated here, this Court does not find the approach put forward by the District Court in Pogue persuasive.

d. Third approach: the plaintiff's knowledge determines the limitations period

The third approach to interpreting § 3731(b)(2) is that, in cases where the government chooses not to intervene, the plaintiff stands in for the government and the limitations period begins to run on the date the plaintiff knew or should have known the facts relevant to the right of action. In Hyatt v. Northrop Corp., the Ninth Circuit adopted this approach, relying, however, on the same argument, perhaps refuted by the Supreme Court's Graham decision, put forward by Pogue: that the prefatory language of § 3731(b) referring to "[a] civil action" should be read so that both §§ 3731(b)(1) and (b)(2) apply to any civil actions. U.S. ex rel. Hyatt v. Northrop Corp., 91 F.3d 1211, 1214 (9th Cir. 1996). Noting that the legislative history is "at best ambiguous," particularly with regard to **[*17]** the use of the word "government," the Ninth Circuit posits that inconsistent use of "government" "is actually consistent with the [Court's] theory of the Act because *qui tam* plaintiffs are merely agents suing on behalf of the government, which is always the real party in interest." Id. at 1215. This Court agrees with the Ninth Circuit that the private plaintiff filing an FCA claim stands in for the government's interest. The Ninth Circuit's finding that the legislative history is ambiguous provides sufficient rationale to render this general observation dispositive in determining which limitations period applies to a plaintiff's claim in which the government does not intervene. I prefer to base my decision here on matters of equitable tolling and the facts of the present case.

The Ninth Circuit reasoned that ***HN4***[] equitable tolling, codified for the government in the FCA at *§ 3731(b)(2)*, should similarly be available for a private plaintiff. *Id. at 1216*. I agree with that proposition. The Ninth Circuit cited legislative history only in support of equitable tolling on the government's behalf. ***HN5***[] The fact that a federal statute sets a time limitation for a suit "does not restrict the power of the federal courts to hold that the **[*18]** statute of limitations is tolled under certain circumstances not inconsistent with legislative purpose" and I agree with that as well. *Am. Pipe & Const. Co. v. Utah, 414 U.S. 538, 559, 94 S. Ct. 756, 38 L. Ed. 2d 713 (1974)*. This is despite the fact that neither the legislative history nor the text of the statute clearly provide for such a right for a particular party, to the extent that one party must be substituted for another explicitly provided that right. Moreover, I note that claims for equitable tolling apply where a plaintiff has been pursuing his rights diligently and where "extraordinary circumstances" prevented timely filing. *Menominee Indian Tribe of Wisconsin v. U.S., 136 S.Ct. 750, 755, 193 L. Ed. 2d 652 (2016)* (internal citations omitted). All of that exists here.

The defendants were in charge of the defendant corporation's action and had sole control of corporate records. Mr. Krause misrepresented many times in writing and under oath the status of Relater and his then wife. It is possible, of course, that Relater and his then wife had rights, obligations, and legal status which were altered as a result of the divorce to shield corporate assets from any claims of Relator. These are questions of fact to be later determined. This is true also as to whether any guarantees of corporate debt were involved. I cannot imagine a clearer case in which **[*19]** equitable tolling should be used.

There is another logical reason why the longest period of tolling should be used. If the Court has erred in not using a six year statute of limitations and the case is tried with an award including more than a six year period, the case would be retried. I realize that the use of interrogatories to the jury may prevent this, but that remains to be seen,

e. The third approach as modified as set forth above should apply in the Northern Division of the District of South Dakota

It is clear from this overview of interpretations of *§ 3731(b)* that ***HN6***[] the plain meaning of the statute is ambiguous. Moreover, given the breadth of interpretations of the legislative history of this statute, we are persuaded that it is equally as ambiguous. While the plain language of a statute is the starting point for statutory interpretation, and the purpose of statutory interpretation "is to give effect to the intent of Congress," canons of statutory interpretation "need not be conclusive" and "other circumstances evidencing congressional intent can overcome their force." *U.S. v. Milk, 281 F.3d 762, 766, 767 (8th Cir. 2002)*; *U.S. v. McAllister, 225 F.3d 982, 986 (8th Cir. 2000)* (internal citations omitted); and *Chickasaw Nation v. U.S., 534 U.S. 84, 94, 122 S. Ct. 528, 151 L. Ed. 2d 474 (2001)*. This is undoubtedly so where, as here, both the plain language of the statute and **[*20]** legislative history are unclear. ***HN7***[] The third approach, as modified, should be used in the Northern Division of the District of South Dakota in FCA cases in which the government does not intervene. In light of this determination, the Court finds that any false claims alleged by plaintiffs to have been made by defendants prior to 18 July 2006 are barred by the statute of limitations.

II. The complaint must plead claims for fraud plausibly and with particularity

HN8[] In order to survive a motion to dismiss for failure to state a claim on which relief can be granted, the plaintiff must allege "sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Torti v. Hoag, 868 F.3d 666, 671 (8th Cir. 2017)* (internal citations omitted). A plausible claim must plead "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* (internal citations omitted). A prima facie case under the FCA requires that "(1) the defendant made a claim against the United States; (2) the claim was false or fraudulent; and (3) the defendant knew the claim was false or fraudulent." *U.S. ex rel. Raynor v. Nat'l Rural Utilities Co-op. Finance, Corp., 690 F.3d 951, 955 (8th Cir. 2012)* (*citing*U.S. v. Basin Elec. Power Coop., 248 F.3d 781, 803 (8th Cir. 2001)). Liability under the FCA attaches to the claim for payment, rather **[*21]** than the underlying fraud. Baycol Prods. Litig., 732 F.3d 869, 874 (8th Cir. 2013).

Under the FCA, a defendant must have "actual knowledge," act "in deliberate ignorance of or have "reckless disregard of the truth or falsity of the information" in presenting a materially false claim. Baycol Prods. Litig., 732 F.3d at 875; 31 U.S.C. § 3729(b)(1)(A). Proof of specific intent to defraud the government is not required. U.S. ex rel. Quirk v. Madonna Towers, Inc., 278 F.3d 765, 767 (8th Cir. 2002). Further, the "knowledge of officers and key employees of a corporation, obtained while acting in the course of their employment and within the scope of their authority, is imputed to the corporation itself." Acme Precision Products. Inc. v. Am. Alloys Corp., 422 F.2d 1395. 1398 (8th Cir. 1970).

HN9[] The heightened pleading standard for fraud under Fed. R. Civ. P. 9(b) applies to claims brought under the FCA, to include reverse false claims. Raynor at 956; and Olson v. Fairview Health Services of Minnesota, 831 F.3d 1063, 1073 (8th Cir. 2016). Under Rule 9(b), a party "must state with particularity the circumstances constituting fraud." Raynor at 956. (internal citations omitted). "To meet this standard," the plaintiff's complaint "alleging fraud 'must identify who, what, where, when, and how.'" *Id.* (internal citations omitted). Pleading with the requisite particularity includes the requirement to plead the materiality of the false claims to payment. Olson at 1070; and Universal Health Services, Inc. v. U.S., ex rel. Escobar, 136 S.Ct. 1989, n.6, 195 L. Ed. 2d 348 (2016). When a claim is based on facts "peculiarly within the opposing party's knowledge," allegations may be pled "on information and belief so long as they are "accompanied **[*22]** by a statement of facts on which the belief is founded" and the pleader identifies "efforts made to obtain additional information." Drobnak v. Andersen Corp., 561 F.3d 778, 784 (8th Cir. 2009) (internal citations omitted). This relaxed standard, though, does not remove the plaintiff's requirement to plead "the equivalent of the first paragraph of any newspaper story." *Id.*

HN10[] When a plaintiff alleges a systematic practice of fraud, the plaintiff need not allege details of "every alleged fraudulent claim" but, if the defendants actions could, but may not necessarily have led to the submission of false claims, must provide "*some* representative examples of [the defendants'] alleged fraudulent conduct, specifying the time, place, and content of their acts and the identity of the actors" within the statute of limitations. U.S. ex rel. Joshi v. St. Luke's Hosp., Inc., 441 F.3d 552, 555, 557 (8th Cir. 2006) (affirming lower court's dismissal of complaint and refusal of leave to amend where plaintiff's specific claims of fraud were barred by the statute of limitations); and U.S. ex rel. Thayer v. Planned Parenthood of the Heartland, 765 F.3d 914, 918 (8th Cir. 2014) (clarifying the scope of the Joshi ruling). A plaintiff may satisfy the particularity requirement of Rule 9(b) in cases of systematic fraud without pleading representative examples of false claims where the plaintiff pleads "particular details of a scheme to submit false claims **[*23]** paired with reliable indicia that lead to a strong inference that claims were actually submitted," such as "by pleading details about the defendant's billing practices and pleading personal knowledge of the defendant's submission of false claims." Thayer at 918.

In light of this Court's determination regarding the applicable limitations period for plaintiffs' FCA claims, Relator's allegations of false claims defendant submitted on or after the date when "barring" first occurs must be pled with the requisite plausibility and particularity to withstand a motion to dismiss under Fed. R. Civ. P. 12(b)(6). This date is 18 July 2006. The Complaint alleges that defendants filed Farm Operating Plans "and other documents" every year from 2006 to 2015 indicating that Relator and his then spouse were each 50% shareholders in Krause-Allbee Trucking. In opposition to defendants' motion to dismiss, Relator appends Farm Operating Plans dated June 13, 2006, July 26, 2007, May 19, 2009, May 12, 2010, June 6, 2011, and July 23, 2013, as well as minutes of corporate meetings dated January 15, 2007, January 14, 2008, and January 14, 2009, among other documents. This Court will not consider facts pled by Relator outside of the statute of limitations **[*24]** as representative examples or fulfilling the requisite particular details of a pattern of fraud as such fraud must nonetheless not be time-barred. Joshi at 555. However, this Court considers the Farm Operating Plans as potentially representative examples of fraud which Relator alleges defendants committed from 2006-2015.

a. The Court may consider Farm Operating Plans and 2009 corporate minutes submitted by Relator

HN11[] When on a motion to dismiss for failure to state a claim, extrinsic evidence outside the pleadings is considered by the court, the motion must be treated as one for summary judgment. Mattes v. ABC Plastics, Inc., 323 F.3d 695, n.4 (8th Cir. 2003). However, a district court may consider materials "necessarily embraced by the pleadings." *Id.* (*quoting* Porous Media Corp. v. Pall Corp., 186 F.3d 1077, 1079 (8th Cir. 1999)). When deciding a motion to dismiss, the court "may consider the complaint and documents whose contents are alleged in a complaint and whose authenticity no party questions." Kushner v. Beverly Enters., Inc., 317 F.3d 820, 831 (8th Cir. 2003). Where a party "has actual notice of all the information in [a] movant's papers and has relied upon these documents in framing the complaint the necessity of translating a Rule 12(b)(6) motion into one under Rule 56 is largely dissipated." Cortec Indus., Inc. v. Sum Holding L.P., 949 F.2d 42, 47-48 (2d Cir. 1991). Because the Complaint refers to the Farm Operating Plans and 2009 minutes of a corporate meeting, copies of which **[*25]** are included in the opposition to defendants' motion to dismiss, this Court will consider the Farm Operating Plans and 2009 minutes of corporate meeting without converting this motion to one for summary judgment. This Court need not consider the 2007 or 2008 minutes of meetings, as they are not mentioned in the Complaint.

The Farm Operating Plan dated June 13, 2006, is outside of the statute of limitations as HN12[] the limitations period under the False Claim Act § 3731 (b)(1) begins to run on "the date the false claim was actually submitted." Graham Cty. Soil & Water Conservation Dist. v. ex rel. Wilson, 545 U.S. 409, 415, 125 S. Ct. 2444, 162 L. Ed. 2d 390 (2005). The 2007 Farm Operating Plan is an update to the 2006 Farm Operating Plan and indicates no change to the share ownership provided therein: John Millin, 32%; Lori Millin, 43%; and Brian Ellison, 25%. The 2009 Farm Operating Plan is signed by Larry Krause and Lori A. Millin, who is listed as "President — Director" with Relator listed as "Vice President — Director," and each as holding 50% ownership in Krause-Allbee Trucking. The 2009 Farm Operating Plan lists Lori Millin as maintaining 50% "Active Personal" management of the company, with Relator maintaining 25% "Active Personal" management. Relator's management is described as including participating in management **[*26]** meetings and being responsible for major decisions. The plan also states that Lori and Relator are guarantors of a loan at "First State Bank of Warner in Warner, SD." The 2009 minutes of corporate meeting list Lori and John Millin as the only stockholders and directors. The 2010 and 2011 Farm Operating Plans are re-certifications of the 2009 Farm Operating Plan, signed by Lori A. Millin. The 2013 Farm Operating Plan, signed by Larry Krause on July 23, 2013, maintains the same ownership and active personal management interests in Krause-Allbee Trucking for both Lori Millin and Relator as stated in the 2011 plan. Relator includes correspondence from Krause's counsel, Kennith Gosch, dated June 22, 2015, stating that "John Millin is not now nor has he ever been a shareholder" in Krause-Allbee Trucking, as well as a letter from First State Bank, dated August 17, 2015, that states that "John Millin is not a guarantor for any obligation of Krause-Allbee Trucking." It appears to be undisputed that false information was submitted to the government many times.

The Complaint alleges that "[u]pon information and belief, documents filed in 2007, 2008, and/or 2009 with the FSA by Krause-Allbee Trucking, **[*27]** including Farm Operating Plans, show a similar ownership structure to that as stated in 2006." Further, the Complaint states that "[u]pon information and belief, Krause filed documents, including but not limited to Farm Operating Plans, in 2010 and 2011 on behalf of Krause-Allbee Trucking indicating that there were no ownership changes for 2010 and 2011" from the 2009 filings. The Complaint also alleges that "[u]pon information and belief," Krause filed 2012, 2013, 2014, and 2015 Farm Operating Plans indicating that Relator held a 50% ownership in Krause-Allbee Trucking. HN13[] Allegations may be pled on information and belief when facts are, as here, likely to be "peculiarly within the opposing party's knowledge," but such belief must be accompanied by facts justifying the belief and a statement identifying "efforts made to obtain additional information." Drobnak at 784. Relator supports the allegation that defendants filed Farm Operating Plans in 2007, 2009, 2010, 2011 and 2013 indicating Relator's ownership in Krause-Allbee Trucking with a copy of those plans. The opposition to defendants' motion to dismiss additionally identifies Relator's efforts, by way of e-mail communication through his counsel, **[*28]** to obtain additional information regarding his ownership interest from Krause. The 2007, 2009, 2010, 2011 and 2013 Farm Operating Plans are pled as representative of a scheme of fraud undertaken by defendants until 2015.

Relator has pled the "first paragraph of any newspaper story," meeting the heightened pleading requirements for Fed. R. Civ. P. 9(b) and plausibility requirements of Fed. R. Civ. P. 8(a) for claims beginning in 2007. Krause or Lori Millin submitted Farm Operating Plans in 2007, 2009, 2010, 2011 and 2013 to the FSA for farm subsidies. The plans are stamped with the date of receipt by the Brown County FSA in Aberdeen as July 26, 2007, May 19, 2009, May 26, 2010, June 8, 2011, and July 29, 2013, respectively. These Plans indicate an ownership interest in Krause-Allbee Trucking for Relator of 32 to 50%, although attorney Gosch has stated that Relator was never a shareholder in the company. The 2009-2013 Farm Operating Plans also indicate that Relator participated in management meetings on a regular basis and was responsible for major decisions, although Relator states that he had no engagement of any kind with the company. Farm Operating Plans determine "payment eligibility and limitation **[*29]** determinations for farm subsidies" as is clear from the form documents.

Moreover, the form Farm Operating Plans contain a certification section that defendant Krause signed stating that "I certify that all information entered on this document ... is true and correct," that "I understand that furnishing incorrect information will result in forfeiture of payments and may result in the assessment of a penalty," and that "it is my responsibility to timely notify FSA in writing of any changes that may affect these representations." It is clear that the requirements for a prima facie case under the FCA have been met by Relator, as Relator has demonstrated that (1) the defendants made claims against the United States—here, the FSA; (2) the claims were false or fraudulent in stating Relator's ownership interest; and (3) the defendants knew, or were at least in "reckless disregard of the truth or falsity of the information" of the claim. Relator has further sufficiently pled representative examples of a scheme of fraud—he has clearly specified "the time, place, and content" of the fraudulent behavior as well as "the identity of the actors"—to warrant retaining claims from 2007 to 2015 inclusive. **[*30]** *Joshi at 557*. Relator need not plead personal knowledge of defendants' submission of false claims where, as here, he is able to meet the standard set forth by Joshi.

b. Relator has demonstrated defendants' false claims were material to payment

Following *Escobar,* ***HN14***[] a motion to dismiss may also properly encompass the materiality of a defendant's false claims to the government's decision to pay a claim. The FCA defines materiality as "having a natural tendency to influence, or be capable of influencing, the payment or receipt of money or property." *31 U.S.C. § 3729(b)(4)*. The fact that the government is entitled to refuse payment if aware of a violation, as is suggested by the certification provision of the Farm Operating Plans, is insufficient to meet the materiality requirement. *Escobar at 2004*. However, a false statement is considered material under the FCA if "either (1) a reasonable person would likely attach importance to it or (2) the defendant knew or should have known that the government would attach importance to it." *U.S. ex rel. Miller v. Weston Educ., Inc., 840 F.3d 494, 503-4 (8th Cir. 2016)*. ***HN15***[] The ownership interest of individuals for an entity seeking benefits from the FSA, as well as their engagement in that entity, are central to the payment eligibility criteria for farm subsidies established in 7 CFR Part 1400 **[*31]** — Payment Limitation and Payment Eligibility. Indeed, "[i]dentifying who or what is participating and therefore how payments may be attributed is the cornerstone to most program eligibility." CONG. RESEARCH SERV., R44739, U.S. FARM PROGRAM ELIGIBILITY AND PAYMENT LIMITS 5 (2017). A reasonable person would therefore likely attach importance to the statement of ownership interests to the FSA in the Farm Operating Plan, and these considerations, in determining an individual's eligibility for farm subsidies, undoubtedly influence the payment of farm subsidies by the government as required by *§ 3729(b)(4)*.

The pertinent regulations in force at the time the 2009, 2010, 2011 and 2013 Farm Operating Plans were submitted demonstrate that the defendants' false claims were material to the government's decision to-pay claims. The version of 7 CFR Part 1400 in force in 2007 differs slightly from the versions discussed below, but is materially the same; differences are indicated with footnotes. ***HN16***[] The regulations codified at 7 CFR Part 1400 provide detailed guidance for the attribution of payments by the pro rata share of a person's interest in an entity, used to establish an individual's cumulative payments against their annual payment limits, *7 CFR § 1400.105*.[2] Payment limitations per person are established in *§ 1400.1(f)* and average adjusted gross income limitations are set forth in *§ 1400.500(a)-(d)*.[3] The payment eligibility requirements state that "[t]o be considered eligible to receive payments

[2] "While the 2007 regulations do not provide guidance for the attribution of payments, payment limitations per person are "applied on a 'direct attribution' method with respect to the individual or entity." *§ 1400.1(g)*, n.1.

with respect to a particular farming operation, a person or legal entity must be actively engaged in farming with respect **[*32]** to such operation." *7 CFR § 1400.201*. The requirement to be actively engaged in farming has evolved since its inclusion in the 1987 Farm Program Payments Integrity Act, but continues to be an area in which the government has recognized potential for fraud. CONG. RESEARCH SERV., R44656, USDA'S ACTIVELY ENGAGED IN FARMING (AEF) REQUIREMENT 3 (2016) (stating that the actively engaged in farming requirement may "facilitate[e] the creation of new farm operation members simply to expand an operation's farm payment receipts.") Requirements for active engagement in farming are established separately for different entities or individuals engaged in farming operations. What follows looks at the provisions governing potentially relevant entities for the current instance.

HN17[] For a farming operation conducted predominately by family members, in order to be actively engaged in fanning, the adult family member must

> (1) [h]ave a share of the profits or losses from the farming operation commensurate with such person's contribution to the operation and (2) [m]ake contributions to the farming operation that are at risk for a loss, with the level of risk being commensurate with such person's claimed share of the farming **[*33]** operation. *7 CFR § 1400.208*.[4]

Contribution is defined as "providing land, capital, or equipment assets, and the actions of providing active personal labor or active personal management to a farming operation in exchange for, or with the expectation of, deriving benefit based solely on the success of the farming operation." *7 CFR § 1400.3*. Active personal management includes "general supervision and direction of activities" or "[s]ervices reasonably related and necessary to the farming operation," which could potentially not require physically visiting the farming operation. However, taking Relator's allegations as true that Relator had no engagement of any type with the farming operation nor contributed any capital or other assets, this Court must presume for the purposes of deciding the motion to dismiss that Relator was not "actively engaged in farming," and that he otherwise made no "contributions to the farming operation."

HN18[] The requirement to be actively engaged in farming adheres for members of a corporation, with the additional requirement that the "active personal labor-and active personal management" is "(i) [performed on a regular basis; (ii) [identifiable and documentable; and (iii) [s]eparate and distinct **[*34]** from such contributions of any other ... member of the farming operation." 7 CFR § 1400, *204(a)(2)(i)-(iii)*.[5] As of 2011, an exception to the requirement that a member be actively engaged in farming exists where "[a]t least 50 percent of the stock is held by ... members that are actively providing labor or management." *7 CFR § 1400.204(a)(2)*, *(c)(1)*. It is also possible, as of 2011, for one spouse to contribute either active personal labor, active personal management, or a combination of these for both spouses. *7 CFR § 1400.204(a)(2)*. While the 2009, 2010, 2011 and 2013 Farm Operating Plans state that Lori Millin will "be responsible for the minor decisions," to include "financial" and "tax decisions," and will take responsibility for "the planning and direction of the farming operation," to include "mak[ing] the cattle buying decisions," "the major decisions," and "participat[ing] in management meetings on a regular basis," defendants provide no indication that Lori Millin was actively providing labor or management or otherwise seek to counter Relator's argument that these statements were fraudulently made. The 2007 Farm Operating Plan provides no indication that Lori or John Millin provided any management function. Since Relator states that his then-wife was **[*35]** not "actively engaged in the management of any farming operations" for the duration of his marriage, accepting his allegations as true, this Court must also presume that Lori Millin was not "actively providing labor or management" to the farming operation for the purpose of this motion to dismiss.

---

[3] *See §§ 1400.1(g)*, *1400.600* (2007).

[4] The 2007 regulations state that "an adult family member who makes a significant contribution of active personal management, active personal labor, or a combination of active personal labor and active personal management shall be considered to be actively engaged in farming." The 2007 regulations do not define contribution. This does not change the analysis in the present paragraph.

[5] This clarification does not exist in the 2007 regulations; however, this does not change the analysis in this paragraph.

HN19[] Like the exception for spouses included under corporations, as of 2009, a provision in the regulation under "Persons" indicates that where one spouse is actively engaged in farming the other spouse need not be. *7 CFR § 1400.202(b)*. However, this provision specifically references such spouse's active engagement in farming as fulfilling the other spouse's requirement to do so under *§ 1400.202(a)(1)(ii)*. It therefore does not nullify the requirement in the same section for each spouse to provide capital as provided in *paragraph (a)(1)(i)*. Nor do we read this provision alongside the less restrictive requirements for family members under *§ 1400.208* or spousal members of a corporation under *§ 1400.204(a)(2)* as suggesting that neither, spouse is required to contribute capital to the farming operation. This Court notes that neither party has alleged that any property, to include marital property, was contributed to Krause-Allbee Trucking's farming operations by Lori or John Millin **[*36]** to fulfill the active personal management requirement. While the 2007 Farm Operating Plan states that Lori and John Millin contributed 846.4 acres of leased land to the farming operating for $50 per acre, and while such lease of land to the farming operation may be sufficient to satisfy the requirement for capital under 7 CFR § 1400, the spousal exception described here was not available in 2007, and defendants allege in the 2009 Farm Operating Plan that the cash-rent tenant rule is not applicable as John and Lori Millin will contribute active personal management. Nor is the loan with the First State Bank of Warner sufficient to satisfy the capital requirement, as any loan provided by a person to fulfill *paragraph (a)(1)(i)* must not be co-signed or guaranteed by "[a]ny other person" that "has an interest in such farming operation." The 2009, 2010, 2011 and 2013 Farm Operating Plans, however, list both John and Lori Millin as guarantors for the loan from the First State Bank of Warner, and Lori Millin is also listed as having an ownership interest in Krause-Allbee Trucking. Moreover, given Relator's allegations, representations regarding the loan must be presumed to be false.

HN20[] The provisions of 7 CFR Part 1400 moreover provide that **[*37]** "[a]ny change in a farming operation that would increase the number of persons or legal entities to which the provisions of this part apply must be bona fide and substantive." *7 CFR § 1400.104*.[6] It contains specific provisions for refunding payments received "if the person or legal entity fails to comply with the provisions of this part and adopts or participates in adopting a scheme or device designed to evade this part." *7 CFR § 1400.5*.[7] Defendants should have been aware, then, that the government would attach importance to the ownership interests in Krause-Allbee Trucking indicated on the Farm Operating Plan.

For the above reasons, this Court finds that (1) a reasonable person would likely attach importance to the ownership interests indicated on the Farm Operating Plans submitted to the FSA and (2) defendants should have known the government would attach importance to those representations. The false claims were then material to the government's decision to pay claims. This determination, alongside the determination that plaintiffs have pled representative examples of a prima facie case under the FCA, leads this Court to the conclusion that plaintiffs have clearly pled facts for fraud in connection with Krause-Allbee **[*38]** Trucking's claim for farm subsidies from 2007-2015 with the requisite particularity and plausibility under the FCA's *§§ 3729(a)(1)(A)* and *(a)(1)(B)*.

However, because Relator has pled no facts, other than Krause's alleged ownership, with regard to Krause-Allbee Farming, Inc., L&L General Partnership, and K&L Land & Cattle, LLC, any claims involving these entities should be dismissed. Moreover, Relator's reverse false claim under *§ 3729(a)(1)(G)* should also be dismissed, as Relator has alleged no facts showing that defendants' claims were either "material to an obligation to pay or transmit money or property to the Government" or that the defendants "knowingly concealed] or knowingly and improperly avoid[ed] or decreased] an obligation to pay or transmit money or property to the Government." *31 U.S.C. §§ 3729(a)(1)(G)*; *see also* *U.S. v. Q Intern. Courier, Inc., 131 F.3d 770, 773 (8th Cir. 1997)* (holding that reverse false claims require that "a defendant must have had a present duty to pay money or property" to the government). Rather, Relator's Complaint alleges defendants received unearned subsidies from the FSA, not that defendants avoided paying

---

[6] *See* *§ 1400.109* (2007).

[7] The 2007 regulation reads slightly differently but is substantively the same: "All or any part of the payment otherwise due a person on all farms in which the person has an interest may be withheld or be required to be refunded if the person adopts or participates in adopting a scheme or device designed to evade this part or that has the effect of evading this part."

money owed to the government. While it is possible that defendants could have reduced loan repayment rates for loans received through farm subsidy programs, Relator has **[*39]** not pled this claim with any specificity.

III. Relator's claim for conspiracy under the FCA

Relator's final claim under the FCA is that Krause and Krause-Allbee Trucking "conspired with one another to defraud the government by getting false or fraudulent claims allowed or paid" in violation of 31 U.S.C."*§ 3729(a)(1)(C)*. Defendants state that this claim is barred by the intracorporate conspiracy doctrine. The Eighth Circuit has yet to determine the applicability of this doctrine to claims brought under the FCA. ***HN21***[] The intracorporate conspiracy doctrine, developed within the context of ***antitrust law***, holds that a corporation cannot conspire with its employees, agents, or subsidiaries, as that would amount to conspiring with itself. *See, e.g.*, *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. The doctrine "turns on specific antitrust objectives" and at least one district court has held that it is not available under the FCA. *Cedric Kushner Promotions. Ltd. v. King, 533 U.S. 158, 166, 121 S. Ct. 2087, 150 L. Ed. 2d 198 (2001)*; and *U.S. ex rel. Harris v. Lockheed Martin Corp., 905 F.Supp.2d 1343 (N.D.Ga. 2012)* (holding that the intracorporate conspiracy doctrine does not apply to criminal conspiracies under *18 U.S.C. § 371* and that, because the conduct plaintiffs alleged would constitute a violation of both that statute and the civil liability provisions of *§ 3729(a)*, the intracorporate doctrine cannot shield the same conspiracy alleging criminal wrongdoing **[*40]** from civil liability); *see also* *U.S. v. President and Fellows of Harvard College, 323 F.Supp.2d 151, n.40 (D.Mass. 2004)* (stating that "it is questionable whether" the intracorporate conspiracy doctrine would apply to an FCA case but without ruling on the issue). On the other hand, a handful of district courts have extended the intracorporate conspiracy doctrine to bar claims for conspiracy under the FCA. *See* *U.S. v. Gwinn, 2008 U.S. Dist. LEXIS 26361, 2008 WL 867927, 24 (S.D.W.Va. 2008)* (collecting cases). This includes two district court cases from the Eighth Circuit, which assume that plaintiffs in a claim for conspiracy under the FCA must plead facts of conspiracy outside the corporate structure in order not to be barred by the intracorporate conspiracy doctrine. *U.S. ex rel. Scharber v. Golden Gate Nat'l Senior Care. LLC, 135 F.Supp.3d 944, 967 (D.Minn. 2015)*; and *U.S. v. Cathedral Rock Corp., 2007 U.S. Dist. LEXIS 88280, 2007 WL 4270784, 6 (E.D.Mo. 2007)* (not reported). This Court is persuaded by the rationale provided by the Northern District of Georgia: because the intracorporate conspiracy doctrine does not apply to criminal conspiracy, and because the conduct that Relator alleges would constitute a violation of both *18 U.S.C. § 371* and the civil liability provisions of *§ 3729(a)*, the intracorporate conspiracy must not shield the same conspiracy from civil liability. *See e.g.*, McAndrew v. Lockheed Martin Corp.*, 206 F.3d 1031, 1034 (11th Cir. 2000)*.

This Court also finds that Relator has plead a claim under *31 U.S.C. § 3729(a)(1)(C)* with the particularity required of *Fed. R. Civ. P. 9(b)*. ***HN22***[] The particularity requirement of *Fed. R. Civ. P. 9(b)* applies to conspiracy claims brought under **[*41]** the FCA. *U.S. ex rel. Grubbs v. Kanneganti, 565 F.3d 180, 193 (5th Cir. 2009)*. To state a claim for conspiracy under *§ 3729(a)(1)(C)*, it must be shown that the conspirators intended "to defraud the government." *Allison Engine Co., Inc. v. U.S. ex rel. Sanders, 553 U.S. 662, 672-73, 128 S. Ct. 2123, 170 L. Ed. 2d 1030 (2008)*. Although "it is not necessary to show that the conspirators intended the false record or statement to be presented directly to the Government," the plaintiffs must establish "that they agreed that the false record or statement would have a material effect on the Government's decision to pay the false or fraudulent claim." *Id.* A plaintiff need not provide proof of express agreement, but must establish "a tacit understanding between the parties" which may be shown "wholly through the circumstantial evidence of each defendant's actions." *Aguilar v. PNC Bank, N.A., 853 F.3d 390, 402 (8th Cir. 2017)*. Relator has pled facts of an agreement to support claims for conspiracy under *§ 3729(a)(1)(C)* by furnishing the minutes of Krause-Allbee Trucking's corporate meeting, dated January 14, 2009. These minutes of corporate meeting indicate that both John Millin and his then spouse are stockholders and officers of Krause-Allbee Trucking. This Court finds that these minutes of meeting, in addition to the Farm Operating Plans submitted by defendants, provide sufficient circumstantial evidence to establish a tacit understanding that defendants intended **[*42]** to defraud the government to support claims for conspiracy under *31 U.S.C. § 3729(a)(1)(C)*. Because I also hold that the intracorporate conspiracy doctrine does not apply to claims under the FCA, the claim for conspiracy under the FCA should not be dismissed.

IV. Declaratory judgment of ownership interests in Krause-Allbee Trucking

This Court will not dismiss Relator's claims for declaratory judgment of Relator's current or former ownership interest in Krause-Allbee Trucking under *28 U.S.C. § 2201*. As this Court will not dismiss all of Relator's claims under the FCA, independent federal jurisdiction exists as required under *28 U.S.C. § 2201(a)*. Defendants argue that this Court should nonetheless dismiss the request for declaratory judgment as "Krause-Allbee Trucking's ownership" is "a matter of state corporate and common law." However, this Court's jurisdiction over Relator's claim is proper as a matter of supplemental jurisdiction and defendants put forward no other reason that this claim should be dismissed. *28 U.S.C. § 1367*.

V. Relator's claim for unjust enrichment

HN23[] Pursuant to *Fed. R. Civ. P. 8(d)*, a party may plead "2 or more statements of a claim or defense alternatively or hypothetically." Where alternative statements are made "the pleading is sufficient if any one of them **[*43]** is sufficient." *Fed. R. Civ. P. 8(d)(2)*. Moreover, a party "may state as many separate claims or defenses as it has, regardless of consistency." *Fed. R. Civ. P. 8(d)(3)*. This rule is also recognized in South Dakota. *SDCL 15-6-8(a)*, (e). The fact that Relator's claim for unjust enrichment may be inconsistent with claims brought under the FCA is not a reason for dismissal.

In the instant case, Relator has pled a claim for unjust enrichment that is plausible on its face and that allows this court "to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Torti v. Hoag, 868 F.3d at 671*. ***HN24***[] Unjust enrichment "occurs 'when one confers a benefit upon another who accepts or acquiesces in that benefit, making it inequitable to retain that benefit without paying.'" *Hofeldt v. Mehling, 2003 SD 25, 658 N.W.2d 783, 788 (S.D. 2003)*. To establish a prima facie claim for unjust enrichment in South Dakota, the plaintiff must claim that the defendant (1) received a benefit; (2) the defendant "was cognizant of that benefit"; and (3) "the retention of the benefit without reimbursement would unjustly enrich the recipient." *Mack v. Mack, 2000 SD 92, 613 N.W.2d 64, 69 (S.D. 2000)*. The relevant inquiry in determining whether the recipient was unjustly enriched "is whether the circumstances are such that equitably the beneficiary should restore to the benefactor the benefit or its value." **[*44]** *Dowling Family P'ship v, Midland Farms, 2015 SD 50, 865 N.W.2d 854, 863 (S.D. 2015)* (internal citations omitted). Further, "[a]n enrichment is unjust if it 'lacks an adequate legal basis; [i.e.,] it results from a transaction that the law treats as ineffective to work a conclusive alteration in ownership rights.'" *Id.* (internal citations omitted).

South Dakota state courts follow the Restatement of Restitution and Unjust Enrichment. *See, e.g.*, *FarmPro Services. Inc. v. Finneman, 2016 SD 72, 887 N.W.2d 72 (S.D. 2016)*; *Dowling Family P'ship, 2015 SD 50, 865 N.W.2d 854 (S.D. 2015)*; *Hofeldt, 2003 SD 25, 658 N.W.2d 783 (S.D. 2003)*; *Juttelstad v. Juttelstad, 587 N.W.2d 447, 1998 SD 121 (S.D. 1998)*; *Talley v. Talley, 1997 SD 88, 566 N.W.2d 846 (S.D. 1997)*; and *Hofer v. Bon Homme Hutterian Brethren, Inc., 79 S.D. 150, 109 N.W.2d 258 (S.D. 1961)*. ***HN25***[] While a claim for unjust enrichment may exist where a person "is unjustly enriched at the expense of another," "the consecrated formula 'at the expense of another' can also mean 'in violation of the other's legally protected rights,' without the need to show that the claimant has suffered a loss." Restatement (Third) of Restitution & Unjust Enrichment § 1, cmt. a (Am. Law Inst. 2011). Where the breach of fiduciary duty is at issue, "the defendant's benefit is regarded as being 'at the plaintiff's expense' because it resulted in a wrong committed against him." Daniel Friedmann, Restitution of Benefits Obtained Through the Appropriation of Property or the Commission of a Wrong, 80 COLUM. L. REV. 504, 504 (1980).

Accepting Relator's factual allegations as true, if the claims against defendants do not succeed under the FCA, Relator has nonetheless pled a prima facie case for unjust enrichment. The defendants (1) **[*45]** received a benefit of subsidies for their farm operation and Relator has pled that the inclusion of Relator's interest in Krause-Allbee Trucking on the Farm Operating Plans was material to the FSA's decision to issue those subsidies. Defendants, having drafted and submitted the Farm Operating Plans to the FSA, and received the subsidies, (2) were "cognizant of that benefit." Finally, as Relator was never compensated for the liquidation of his possible interest in Krause-Allbee Trucking, Inc., (3) "the retention of the benefit without reimbursement would unjustly enrich the recipient."

VI. Relator's request to amend the complaint

HN26[] A decision whether to allow a plaintiff to amend a complaint is "left to the sound discretion of the district court." *Popoalii v. Correctional Medical Services, 512 F.3d 488, 497 (8th Cir. 2008)* (internal citations omitted). Amendments may be denied where they unduly prejudice the non-moving party or would be futile. *Id.* Relator's request for leave to amend the Complaint in the brief in opposition to defendants' motion to dismiss violates one of the local rules in the District of South Dakota. D.S.D. LR 15.1. Without the court and defendants receiving a proposed amendment to the Complaint along with the motion to amend, granting the motion **[*46]** to amend Would allow Relator leeway to state unexpected claims. Allowing such would be unduly prejudicial to the opposing party. The motion to amend should therefore be denied, without prejudice.

ORDER

Now, therefore,

IT IS ORDERED:

1. Defendants' motion to dismiss, Doc. 33, is granted in part and denied in part. With regard to Count I — False Claims Act *§ 3729(a)(1)*, Count II — False Claims Act *§ 3729(a)(2)*, and Count III — Conspiring to Defraud the Government of plaintiffs' Complaint, Doc. 1, defendants' motion to dismiss is granted for any claims prior to July 18, 2006.
2. Defendants' motion to dismiss is granted in full for Count IV — Reverse False Claims of plaintiffs' complaint.
3. Defendants' motion to dismiss Count V — Declaratory Judgment and Count VI — Unjust Enrichment of plaintiffs' Complaint are denied.
4. Plaintiffs' request to amend the Complaint, Doc. 41, is denied, without prejudice.

Dated this 14th day of April, 2018.

BY THE COURT:

/s/ Charles B. Kornmann

Opinion

CIVIL MINUTES—GENERAL

Proceedings (In Chambers): ORDER RE: PLAINTIFF AND COUNTER-DEFENDANT BANK LEUMI'S MOTION TO DISMISS FIRST AMENDED COUNTERCLAIM [31]

Before the Court is the Motion to Dismiss First Amended Counterclaim (the "Motion") filed by Plaintiff and Counter-Defendant Bank Leumi USA ("Bank Leumi") on February 20, 2018. (Docket No. 31). On March 23, 2018, Defendant and Counterclaimant R&R Food Services, LLC ("R&R") filed an Opposition. (Docket No. 36). On April 2, 2018, Bank Leumi filed a Reply. (Docket No. 37). The **[*2]** Court held a hearing on April 16, 2018.

For the reasons set forth below, the Motion is **GRANTED *with leave to amend*** in its entirety.

R&R's breach of contract claim fails because it does not allege the terms of the relevant "written contract" between R&R and Bank Leumi. The allegations are too vague to determine whether or not there has plausibly been a breach.

R&R's negligence claim fails because R&R's Opposition does not grapple with Bank Leumi's arguments that banks owe no duty to monitor their depositors' accounts and that the claim is barred by the "economic loss" rule.

R&R's "unfair competition" claim (which, based on the Opposition, is construed as a UCL claim) fails because the FACC does not suggest that Bank Leumi engaged in "fraudulent," "unlawful," or "unfair" conduct within the meaning of the UCL.

Finally, R&R's conversion claim fails because the FACC does not suggest that Bank Leumi ever exercised dominion over R&R's funds to the exclusion of R&R; rather, it alleges that Bank Leumi allowed BCI to move (or "sweep") the funds from one account to another.

I. BACKGROUND

A. Bank Leumi's Complaint Seeking Declaratory Relief

On September 28, 2017, Bank Leumi, a New York chartered bank, **[*3]** filed a Complaint against R&R, an Oklahoma limited liability company, and Robert L. Brown, Jr., an Oklahoma resident and R&R's owner/manager, seeking declaratory relief. (Complaint (Docket No. 1) ¶¶ 1-3, 18-21). Bank Leumi alleges the following:

Defendant Brown, who is blind, is a licensed manager under the Randolph-Sheppard Act, *20 U.S.C. § 107*, a federal statute that "prioritizes the employment of blind persons in the operation and management of vending facilities on federal government property." (*Id.* ¶ 8).

Non-party Blackstone Consulting, Inc. ("BCI"), "is a U.S. minority-owned provider of government and private industry support services." (*Id.* ¶ 9).

At some point in 2013, the Oklahoma Department of Rehabilitation Services selected R&R and Brown to operate a "Full Food Service" contract (the "Dining Contract") at dining facilities at an Army base in Fort Sill, Oklahoma. (*Id.* ¶ 10). In September 2013, R&R and Brown entered a contract with BCI (the "R&R-BCI Contract") pursuant to which BCI agreed to provide "administrative, operational and accounting services, among other services, in connection with the [Dining] Contract." (*Id.* ¶ 11).

In connection with the R&R-BCI Contract, Defendants and BCI jointly **[*4]** opened an account at a Bank Leumi branch office in Los Angeles. (*Id.* ¶ 12). They named the account "R&R Food Services LLC" and provided BCI's Los Angeles address as the mailing address associated with the account. (*Id.* ¶ 13). Ronald Blackstone, BCI's principal, and certain other individuals affiliated with BCI were designated as administrators and authorized users of the bank account. (*Id.* ¶ 14). Defendants "granted written and oral authority for BCI and its agents to deposit [and to] withdraw funds from the Account by way of journals, checks and wires in order to fulfill the terms of the [Dining] Contract." (*Id.* ¶ 15).

Bank Leumi alleges that "a dispute exists between BCI and Defendants over the terms of the [Dining] Contract and specifically, the amount of proceeds from the [Dining] Contract properly owed to R&R and Brown as opposed to BCI and Blackstone, and vice versa." (*Id.* ¶ 16). BCI has sued R&R in the United States District Court for the Western District of Oklahoma in relation to those parties' dispute regarding the distribution of proceeds under the Dining Contract and the R&R-BCI Contract. (Docket No. 30).

Defendants have demanded in writing that Bank Leumi reimburse them **[*5]** approximately $7.6 million in "funds they contend were wrongfully withdrawn from the Account by BCI from January 2017 to August 2017." (Complaint ¶ 17).

Bank Leumi alleges that the contested withdrawals by BCI "were properly authorized by the [R&R-BCI Agreement] and pursuant to the documentation signed by Defendants in connection with the Account together with the course of dealing between and among BCI, Defendants, and [Bank Leumi] over the past almost four years." (*Id.*).

Bank Leumi seeks "a judicial determination of the parties' rights and duties and a judicial declaration stating that [Bank Leumi] did not violate any contractual agreement or standard of care owed to Defendants, if any, and that [Bank Leumi] acted properly in providing BCI and its agents with access to the Account." (*Id.* ¶ 21).

B. <u>R&R's First Amended Counterclaim</u>

On February 5, 2018, R&R filed its operative First Amended Counterclaims ("FACC") against Bank Leumi. (Docket No. 26). R&R alleges the following:

On September 17, 2013, "R&R entered into a written contract with Bank Leumi ... to open a deposit account." (FACC ¶ 1). On the same day, Brown, on behalf of R&R, signed the following seven documents in connection with **[*6]** the Bank Leumi account opening:

- "Deposit Account Signature Card";
- "Deposit Account Application";
- "Schedule 1 Authorized Signatory Certification";
- "Schedule 2 Optional Limitation for Authorized Signatories";
- "Schedule 3 Members/Ownership Certification," which states that Brown owns 100% of R&R;
- "Schedule 4 Customer Administrator Certification," which names Daniel Silver, a BCI employee, a "Customer Administrator" (the "Silver Authorization"); and
- "Payment Order Requests Agreement," which "identifies Brown as the only authorized requestor."

(*Id.* ¶¶ 7-12, 16, 23). R&R alleges that the Silver Authorization states that Daniel Silver "is not a token user"; "is not an approver"; and "is authorized for inquiry or input only." (*Id.* ¶¶ 13-15).

On the same day (September 17, 2013), Daniel Silver signed a "Schedule 4 Customer Administrator Certification," which R&R alleges "purports to give Jodi Park [another BCI employee] status as 'Customer Administrator'" and refers to as the "Park Authorization." (*Id.* ¶¶ 18, 22). As with the Silver Authorization, R&R alleges that the Park Authorization states that Jodi Park "is not a token user"; "is not an approver"; and "is authorized for inquiry or **[*7]** input only." (*Id.* ¶¶ 19-21).

On September 24, 2013, two Bank Leumi officers signed the "Application" (presumably the Deposit Account Application) and the Payment Order Requests Agreement. (*Id.* ¶¶ 24-25).

R&R alleges, upon information and belief, that "BCI and [Bank] Leumi entered into a written contract which governed account(s) that BCI maintained at [Bank] Leumi in 2017." (*Id.* ¶ 26).

R&R alleges that, on 13 separate occasions between February 6, 2017 and August 3, 2017, Bank Leumi, without obtaining authorization (verbal or written) from R&R or otherwise communicating with R&R, "permitted BCI to sweep" a total of $10,090,951.01 from "R&R's account ending in 4201 to BCI":

DATE	AMOUNT
2/6/17	$1,612,149.66
2/21/17	$1,524,544.97
3/6/17	$1,402.00
3/27/17	$34,223.08
4/10/17	$752,116.55

DATE	AMOUNT
4/17/17	$1,087,724.21
4/18/17	$1,127,002.64
5/3/17	$134,793.85
5/23/17	$1,165,703.03
5/31/17	$39,701.92
6/23/17	$1,216,912.59
7/17/17	$40,848.56
8/3/17	$1,353,827.95
TOTAL	**$10,090,951.01**

(*Id.* ¶¶ 29-86).

R&R alleges that, from January 2017 to August 2017, Bank Leumi issued R&R's monthly account statements to: R AND R FOOD SERVICES LLC C/O BLACKSTONE CONSULTING INC 11726 SAN VICENTE BLVD STE 550 LOS ANGELES CA 90049. (*Id.* ¶¶ 27, 28, 37, 46, **[*8]** 59, 72, 77, 82). R&R does not allege that Bank Leumi sent its monthly account statements to some other address prior to January 2017 or otherwise allege that addressing the account statements as it did between January 2017 and August 2017 was improper. (*Id.*, *passim*).

R&R asserts four claims for relief against Bank Leumi: (1) breach of written contract; (2) negligence; (3) "unfair competition"; and (4) conversion. (*Id.* ¶¶ 87-116).

II. PLEADING STANDARD

In ruling on the Motion under *Rule 12(b)(6)*, the Court follows *Bell Atlantic v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, and their Ninth Circuit progeny. "Dismissal under *Rule 12(b)(6)* is proper when the complaint either (1) lacks a cognizable legal theory or (2) fails to allege sufficient facts to support a cognizable legal theory." *Somers v. Apple, Inc., 729 F.3d 953, 959 (9th Cir. 2013)*. "To survive a motion to dismiss, a complaint must contain sufficient factual matter . . . to 'state a claim for relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*). The Court must disregard allegations that are legal conclusions, even when disguised as facts. *See id. at 681* ("It is the conclusory nature of respondent's allegations, rather than their extravagantly fanciful nature, that disentitles them to the presumption of truth."); *Eclectic Properties E., LLC v. Marcus & Millichap Co., 751 F.3d 990, 996 (9th Cir. 2014)*. "Although 'a well-pleaded complaint may proceed even if it strikes **[*9]** a savvy judge that actual proof is improbable,' plaintiffs must include sufficient 'factual enhancement' to cross 'the line between possibility and plausibility.'" *Eclectic Properties, 751 F.3d at 995* (quoting *Twombly, 550 U.S. at 556-57*) (internal citations omitted).

The Court must then determine whether, based on the allegations that remain and all reasonable inferences that may be drawn therefrom, the complaint alleges a plausible claim for relief. *See Iqbal, 556 U.S. at 679*; *Cafasso, U.S. ex rel. v. Gen. Dynamics C4 Sys., Inc., 637 F.3d 1047, 1054 (9th Cir. 2011)*. "Determining whether a complaint states a plausible claim for relief is 'a context-specific task that requires the reviewing court to draw on its judicial experience and common sense.'" *Ebner v. Fresh, Inc., 838 F.3d 958, 963 (9th Cir. 2016)* (quoting *Iqbal, 556 U.S. at 679*). Where the facts as pleaded in the complaint indicate that there are two alternative explanations, only one of which would result in liability, "plaintiffs cannot offer allegations that are merely consistent with their favored explanation but are also consistent with the alternative explanation. Something more is needed, such as facts tending to exclude the possibility that the alternative explanation is true, in order to render plaintiffs' allegations plausible." *Eclectic Properties, 751 F.3d at 996-97*; *see also Somers, 729 F.3d at 960*.

III. DISCUSSION

A. Breach of Contract

R&R alleges, "upon information and belief," **[*10]** that Bank Leumi "breached its written contract with R&R on [the 13 separate occasions between February 6, 2017 and August 3, 2017 discussed above] by allowing, permitting or facilitating the sweep of funds from R&R's account ending in 4201 to BCI because it did not have R&R's authorization for that sweep." (FACC ¶¶ 89-101). Conversely, R&R alleges that it "did all, or substantially all, of the things required of it under the terms of its written agreement with [Bank] Leumi." (*Id.* ¶ 88).

Bank Leumi primarily argues that R&R's breach of contract claim should be dismissed because it is impermissibly vague. The Court agrees.

R&R has alleged that, on September 17, 2013, in connection with opening the relevant Bank Leumi account, Brown (on behalf of R&R) signed seven different documents and that Daniel Silver (on behalf of BCI) signed one document. R&R also alleges that two Bank Leumi officers signed two documents — the "Application" and the "Payment Order Requests Agreement" **-** on September 24, 2013. Perhaps the "written contract" that R&R alleges Bank Leumi breached by "allowing, permitting or facilitating the sweep of funds" from its account is the "Application" and/or the "Payment Order **[*11]** Requests Agreement" (perhaps with the other documents incorporated by reference), but it is not at all clear from the FACC.

While R&R need not necessarily attach the alleged "written contract" to its FACC, it must at least quote the relevant provisions of that "written contract" or, at a bare minimum, describe them in enough detail to allow the Court to determine the nature of parties' obligations and if there has plausibly been performance on R&R's part and a breach on Bank Leumi's part. R&R's failure to do that is fatal to its breach of contract claim. *See, e.g., Conroy v. Capital One, N.A.*, No. EDCV 14-01314-VAP (RZx), 2014 WL 12586070, at *6 (C.D. Cal. Sept. 15, 2014) (dismissing breach of contract and good faith and fair dealing claims where plaintiff did "not attach these documents [comprising the alleged contract], set out their terms verbatim in the FAC, or provide a careful analysis of their terms.") (citing *McKell v. Washington Mut., Inc., 142 Cal. App. 4th 1457, 1489, 49 Cal. Rptr. 3d 227 (2006))*; *Kent v. Microsoft Corp., No. SACV 13-0091 DOC (ANx), 2013 U.S. Dist. LEXIS 93932, 2013 WL 3353875, at *3 (C.D. Cal. July 1, 2013)* (dismissing breach of contract claim where "Plaintiff provides no information as to what exactly was promised by the Defendant" and "does not provide any of the terms of his alleged contract with Defendant") (citing *McKell, 142 Cal. App. 4th at 1489*); *Alvarado v. Aurora Loan Services, LLC, No. SACV 12-0524-DOC-(JPRx), 2012 U.S. Dist. LEXIS 135637, 2012 WL 4475330, at *4 (C.D. Cal. Sept. 20, 2012)* (claim of breach **[*12]** of written contract requires attaching a copy, setting forth the terms verbatim, or at a minimum alleging the substance of the relevant terms, which is more difficult) (citing *Harris v. Rudin, Richman & Appel, 74 Cal. App. 4th 299, 307, 87 Cal. Rptr. 2d 822 (1999)* and *McKell, 142 Cal. App. 4th at 1489*).

In its Opposition, R&R argues that it has adequately pled "the existence of a contractual relationship between R&R and [Bank] Leumi..." (Opp. at 7). The Court does not doubt, based upon the Complaint and the FACC, that R&R and Bank Leumi had ***some*** contractual relationship. The FACC's failing lies not in pleading the ***existence*** of a contractual relationship but in pleading the ***terms*** of that contractual relationship.

In any Second Amended Counterclaims, R&R obviously must rectify this lack of pleading, preferably by attaching the documents that allegedly form the written contract.

Accordingly, the Motion is **GRANTED *with leave to amend*** as to the breach of contract claim.

B. Negligence

In connection with its negligence claim, R&R alleges that Bank "Leumi had a duty of care towards its depositor R&R" and that Bank Leumi breached that duty of care by "fail[ing] to adequately supervise its employees, fail[ing] to have proper procedures in place for the transfer of funds from a deposit account, and fail[ing] to follow standard **[*13]** banking practices..." (FACC ¶¶ 105-106). R&R alleges that these failures were manifested "in permitting the sweeps from R&R's account to BCI's account without obtaining R&R's permission...." (*Id.* ¶ 107).

Bank Leumi argues that R&R's negligence claim should be dismissed because (1) Under California law, Bank Leumi does not have a duty to supervise R&R's account activity; (2) R&R has not plausibly alleged that Bank Leumi failed to act reasonably under the circumstances; and (3) in light of the fact that R&R alleges only monetary losses in connection with a contractual relationship, the negligence claim is barred by California's "economic loss" rule. (Mot. at 10-15).

In its Opposition, R&R argues that "it is well established that a bank has 'a duty to act with reasonable care in its transactions with its depositors.... The duty is an implied term in the contract between the bank and its depositor.'" (Opp. at 10) (quoting *Chazen v. Centennial Bank, 61 Cal. App. 4th 532, 543, 71 Cal. Rptr. 2d 462 (1998))*. But *Chazen* says nothing about a bank's duty (or lack thereof) to police its depositor's account activity — and therefore does not rebut the first and second branches of Bank Leumi's argument.

Moreover, R&R has entirely ignored Bank Leumi's argument based on California's "economic **[*14]** loss" doctrine. The doctrine generally prohibits contracting parties from recovering in tort where their damages are purely economic and the alleged wrongdoing is within the scope of the contractual relationship. *See, e.g., In re iPhone Application Litig., 844 F. Supp. 2d 1040, 1064 (N.D. Cal. 2012)* ("[I]n California, a consumer may not recover under a negligence theory 'for purely economic loss due to disappointed expectations, unless he can demonstrate harm above and beyond a broken contractual promise.'") (quoting *Robinson Helicopter Co., Inc. v. Dana Corp., 34 Cal. 4th 979, 988, 22 Cal. Rptr. 3d 352, 102 P.3d 268 (2004))*. Based on the allegations and arguments before it, the Court concludes that the doctrine applies.

Apart from the merits, the fact that Bank Leumi's arguments were ignored in the Opposition is itself a sufficient basis to dismiss the negligence claim. *See, e.g., Walsh v. Nev. Dep't of Human Res., 471 F.3d 1033, 1037 (9th Cir. 2006)* (plaintiff who failed to address issues raised in a defendant's motion to dismiss in his opposition brief "has effectively abandoned his claim, and cannot raise it on appeal"); *Silva v. U.S. Bancorp, No. 5:10-cv-01854-JHN-PJWx, 2011 U.S. Dist. LEXIS 152817, 2011 WL 7096576, at *4 (C.D. Cal. Oct. 6, 2011)* ("[T]he Court finds that Plaintiff concedes his ... claim should be dismissed because he failed to address Defendants' arguments in his Opposition."); *Conservation Force v. Salazar, 677 F. Supp. 2d 1203, 1211 (N.D. Cal. 2009)* ("Where plaintiffs fail to provide a defense for a claim in opposition, the claim is deemed waived.") (citing **[*15]** *Locricchio v. Office of U.S. Trustee, 313 Fed. Appx. 51, 52 (9th Cir. 2009))*

Accordingly, the Motion is **GRANTED *with leave to amend*** as to R&R's negligence claim.

C. "Unfair Competition"

R&R alleges that Bank Leumi acted "unfairly," "unlawfully," and "fraudulently" "when it allowed the sweep of funds from R&R's account ending in 4201 to BCI's account at [Bank] Leumi without having obtained R&R's authorization or permission for the sweeps." (FACC ¶¶ 109-111). Although R&R does not say so explicitly in the FACC, it is clear from the Opposition that R&R intends to assert a claim for relief under California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof Code § 17200 et seq.* (*See* Opp. at 10-12).

The UCL creates a private right of action for those injured by "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. "Because the statute is written in the disjunctive, it is violated where a defendant's act or practice violates any of the foregoing prongs." *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1168 (9th Cir. 2012)*. The UCL "does not proscribe specific activities," but rather "borrows violations of other laws and treats them as unlawful practices that the [UCL] makes independently actionable." *Puentes v. Wells Fargo Home Mortgage., Inc., 160 Cal. App. 4th 638, 643-44, 72 Cal. Rptr. 3d 903 (2008)* (internal quotation marks and citations omitted). R&R appears to allege, without any factual adornment, that Bank Leumi violated all three prongs of the UCL. (*See* FACC ¶¶ 109-111). **[*16]**

Conduct is "fraudulent" under the UCL if it is "likely to deceive." *Morgan v. AT & T Wireless Servs., Inc., 177 Cal. App. 4th 1235, 1254, 99 Cal. Rptr. 3d 768 (2009)*. The particularity requirement of *Rule 9(b)* applies to claims under the fraudulent prong of the UCL. *See* *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)*; *Sosa v. Bank of New York Mellon Trust, No. C 12-00144 LB, 2012 U.S. Dist. LEXIS 92291, 2012 WL 2568188, at *4 (N.D. Cal. July 2, 2012)*; *Briosos v. Wells Fargo Bank, 737 F. Supp. 2d 1018, 1033 (N.D. Cal. 2010)*. *Rule 9(b)* requires the plaintiff to allege "the who, what, when, where, and how" of the alleged fraudulent conduct, *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)*, and "set forth an explanation as to why [a] statement or omission complained of was false and misleading," *In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1548 (9th Cir. 1994)* (en banc) (superseded by statute on other grounds). Nothing in the FACC suggests that Bank Leumi made ***any*** representations to R&R, let alone any deceptive representations. R&R thus fails to state a claim under the "fraudulent" prong of the UCL.

Conduct is "unlawful" under the UCL if it "violate[s] another 'borrowed' law." *Davis, 691 F.3d at 1168* (quoting *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999))*; *cf.* *People ex rel. Bill Lockyer v. Fremont Life Ins. Co., 104 Cal. App. 4th 508, 515, 128 Cal. Rptr. 2d 463 (2002)* ("With respect to the *unlawful* prong, virtually any state, federal or local law can serve as the predicate for an action under *section 17200*.") (internal quotation marks, citations, and alterations omitted; emphasis in original). Because R&R has not plausibly alleged that Bank Leumi's complained-of actions violate any other independent law, it has not stated a claim under the "unlawful" prong of the UCL.

"The UCL does not define the term **[*17]** 'unfair,'" and "the proper definition of 'unfair' conduct against consumers is currently in flux' among California courts." *Davis, 691 F.3d at 1169* (internal quotation marks and citations omitted).

In the consumer context (as opposed to the competitor context), some California courts hold "that 'unfair' conduct occurs when that practice 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.'" *Id.* (quoting *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 886-87, 85 Cal. Rptr. 2d 301 (1999))*. "Under this approach, courts must examine the practices' 'impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer.'" *Id.* (quoting *S. Bay Chevrolet, 72 Cal. App. 4th at 886*).

Other California courts, finding the above test "too amorphous," interpret "unfair" to mean "'conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.'" *Id.* (quoting *Cel-Tech, 20 Cal. 4th at 187*). In order to find "unfairness" under this test, the alleged wrongdoing must "'be tethered to some legislatively declared policy or proof of some actual or threatened **[*18]** impact on competition.'" *Id.* (quoting *Cel-Tech, 20 Cal. 4th at 185*).

No matter which test applies, R&R has not stated a claim under the "unfair" prong of the UCL. Under the first test, it is impossible to tell whether Bank Leumi's allowance of monetary "sweeps" from R&R's account might be deemed "immoral, unethical, oppressive, unscrupulous" and so forth without knowing whether the alleged "written contract" between R&R and Bank Leumi permitted BCI to make (and Bank Leumi to allow) such "sweeps." If that "written contract" permitted such "sweeps," Bank Leumi would have strong (and dispositive) "reasons [and] justifications" for allowing BCI to conduct the "sweeps." Under the second test, nothing in the FACC suggests that Bank Leumi's conduct towards R&R (or anyone else) threatens an incipient violation of an ***antitrust law*** or otherwise harms competition.

Accordingly, the Motion is **GRANTED *with leave to amend*** as to R&R's "unfair competition" claim.

D. Conversion

"Conversion is the wrongful exercise of dominion over the property of another." *Greka Integrated, Inc. v. Lowrey, 133 Cal. App. 4th 1572, 1581, 35 Cal. Rptr. 3d 684 (2005)* (internal quotation marks and citations omitted). In order to state a viable claim for conversion, a plaintiff must allege that (1) he owned or had a right to possess the property **[*19]** at the time of the conversion; (2) the defendant converted the property by a "wrongful act or disposition of property rights"; and (3) plaintiff suffered damages as a result. *Id.*

As Bank Leumi correctly argues, R&R's conversion claim fails because nothing in the FACC suggests that Bank Leumi actively pilfered or otherwise exercised dominion over R&R's funds; the FACC merely suggests that Bank Leumi allowed BCI to transfer these funds from one account to another. That transfer is insufficient for a viable conversion claim. *See, e.g., Spates v. Dameron Hosp. Assn., 114 Cal. App. 4th 208, 222, 7 Cal. Rptr. 3d 597 (2003)* ("Not every failure to deliver property to the rightful owner constitutes a conversion... The act of removing personal property from one place to another, without an assertion of ownership or preventing the owner from exercising all rights of ownership in such personal property, is not enough to constitute conversion.") (internal quotation marks and citations omitted); *Simonian v. Patterson, 27 Cal. App. 4th 773, 781-82, 32 Cal. Rptr. 2d 722 (1994)* ("The simple act of moving items" belonging to another did not constitute conversion where the defendant "did not exercise dominion over those items sufficient to convert them to his own use in denial of plaintiff's rights.").

Accordingly, the Motion is **GRANTED *with leave to amend*** as to R&R's **[*20]** conversion claim.

IV. CONCLUSION

For the reasons set forth above, the Motion is **GRANTED *with leave to amend*** in its entirety.

R&R shall file its Second Amended Counterclaims, if any, by **May 7, 2018**. While there may be a second set of counterclaims, there will be no third. Any future successful motion to dismiss the Second Amended Counterclaims will be granted ***without leave to amend***.

IT IS SO ORDERED.

Gomez v. Mort. Elec. Registration Sys.

Opinion

CIVIL MINUTES - GENERAL

Proceedings: Plaintiff's Motion For An Order Remanding Removed Action Back to State Court [25];

Defendant Erica Jones Motion to Dismiss First Amended Complaint [33]

Defendant's Wells Fargo Bank, N.A., Mortgage Electronic Registration Systems, Inc., And HSBC USA N.A. Motion to Dismiss Verified First Amended Complaint [37]

The Court and counsel confer. The plaintiff submits on the tentative order.

Plaintiff's Motion For An Order Remanding Removed Action Back to State Court [25] is **DENIED**.

Defendant Erica Jones Motion to Dismiss First Amended Complaint [33] is **GRANTED** with leave to amend.

Defendant's Wells Fargo Bank, N.A., Mortgage Electronic Registration Systems, Inc., and HSBC USA N.A. Motion to Dismiss Verified First Amended Complaint [37] is **GRANTED** with leave to amend.

The Plaintiff's Second Amended Complaint is due no later than May 25, 2018.

I. Background

A. Procedural History

Plaintiff Francisco Gomez ("Plaintiff"), in pro per, brings this action against Defendants Mortgage Electronic Registration Systems, Inc. ("MERS"); **[*2]** HSBC Bank USA ("HSBC"); Quality Loan Services Corporation ("Quality"); Wells Fargo Bank, N.A. ("Wells Fargo" and together with MERS, and HSBC "Defendant Companies"); and Erica Jones ("Jones") concerning events surrounding the foreclosure of Plaintiff's real property. *See generally* First Amended Complaint ("FAC"), Docket No. 30.

Plaintiff initially filed in state court and Defendants timely removed the action on November 20, 2017, invoking diversity jurisdiction. *See* Notice of Removal ("NOR"), Docket No. 1 at 2. On January 25, 2018, the Court adopted its tentative ruling dismissing Plaintiff's original complaint with leave to amend. *See* Order, Docket No. 28; *see also* Notice of Removal, Ex. A ("Compl."), Docket No. 1-1. The court's review of the FAC indicates that there are minimal differences between the original Complaint and the FAC, other than the deletion of five causes of action. *See generally* FAC. Defendant Companies and Jones now move to dismiss in separate motions, pursuant to *Federal Rule of Civil Procedure ("Rule") 12(b)(6)*. *See* Defendant Companies' Motion to Dismiss the FAC ("Companies' MTD"), Docket No. 37; Jones's Motion to Dismiss the FAC ("Jones's MTD"), Docket No. 33. Plaintiff filed two separate oppositions to those **[*3]** motions. Plaintiff's Opposition to Jones's MTD ("Pl.'s Opp. Jones's MTD"), Docket No. 39; Plaintiff's Opposition to Defendant Companies' MTD ("Pl.'s Opp. Companies' MTD"), Docket No. 40. Defendant Companies and Jones then filed separate replies in support of their motions. Defendant Companies' Reply in Support of Their MTD ("Companies' Reply MTD"), Docket No. 43; Jones's Reply in Support of Her MTD ("Jones's Reply MTD"), Docket No. 42. Additionally, Plaintiff moves to remand the action back to state court. Plaintiff's Motion to Remand ("MTR"), Docket No. 25. Defendant Companies filed their opposition to the MTR. Defendant Companies' Opposition to Plaintiff's MTR ("MTR Opp."), Docket No. 29. Plaintiff then filed his reply in support of the MTR. Plaintiff's Reply in Support of Motion to Remand ("MTR Reply"), Docket No. 36.

B. Plaintiff's Allegations

On May 8, 2007, Plaintiff obtained a residential home loan from non-party Mortgageit, Inc., in the amount of $825,000.00 (the "Loan"). *See* FAC ¶ 15; Defendant's Request for Judicial Notice ("RJN"), Ex. A ("Note") at pages 1-3, Docket No. 38-1. The Loan was secured by a Deed of Trust against the real property known as 3518 Abbey Lane, Oxnard, **[*4]** California (the "Property"). *See* FAC ¶ 1; RJN Ex. B ("DOT") at pages 5-22, Docket No. 38-1. The DOT was recorded on May 15, 2017. *See* DOT. NDEX West, LLC was substituted in as trustee on February 19, 2010. *See* RJN Ex. C ("Notice of Substitution I") at pages 23-25, Docket No. 38-1. MERS assigned the DOT to HSBC on February 24, 2010. FAC ¶ 18; RJN Ex. D ("First ADOT") at pages 26-27, Docket No. 38-1. Jones signed the First ADOT on behalf of MERS. FAC ¶ 18; First ADOT. Jones is identified as an Assistant Secretary of MERS. FAC ¶ 18. Plaintiff claims that Jones did not work for MERS at that time, nor has she ever worked at MERS. *Id.* ¶¶ 18, 21-25. Plaintiff further charges that the MERS Board never authorized Jones to assign the DOT on MERS' behalf. *Id.* ¶¶ 21-26. As a result, Plaintiff contends that the First ADOT is void and that the DOT was never assigned to HSBC. *Id.* ¶¶ 31-34. Plaintiff also alleges that Jones's lack of authorization to sign on MERS behalf means that the First ADOT "contains a fraudulent assertion that said [First ADOT] was either executed by an Officer of MERS, or was executed by one with valid power or authority to execute such a document for MERS as an officer . . **[*5]** . ." *Id.* ¶ 35.

Plaintiff also claims that the Note was never transferred from the original holder and that any such transfer made after the closing date would have violated the relevant Pooling and Servicing Agreement ("PSA"). *Id.* ¶¶ 18, 36. Plaintiff avers that the party that notarized the First ADOT did so with the knowledge that Defendant Jones lacked authorization to sign the transfer. *Id.* ¶¶ 38-41. Plaintiff contends that another assignment of the DOT was recorded, again bearing the signature of an individual not authorized by MERS to execute that document. *Id.* ¶¶ 45-48; RJN Ex. F ("Second ADOT") at pages 35-37, Docket No. 38-1. On March 3, 2014, a second Substitution of Trustee was recorded pursuant to which Quality became the new trustee under the DOT. FAC ¶ 72; RJN Ex. G.

In December of 2013, Plaintiff applied for a loan modification from Wells Fargo. *See* FAC ¶ 59. Wells Fargo declined his application. *Id.* ¶¶ 60-65. Plaintiff previously sought and received a loan modification in 2010. *See* RJN Ex. E ("LMA") at pages 28-34, Docket No. 38-1. A notice of default was recorded, followed by a Notice of Trustee's Sale, with the sale to take place on February 28, 2017. FAC ¶¶ 74-76. The **[*6]** Property was sold on February 28, 2017 to a third-party, who duly recorded the Trustee's Deed Upon Sale. *Id.* ¶ 76; RJN Ex. J ("DUTS") at pages 49-52, Docket No. 38-1.

II. Motion To Remand

Plaintiff moves to remand the case to state court, claiming the absence of complete diversity of citizenship. MTR ¶¶ 11-25.

A. Legal Standard

"Federal courts are courts of limited jurisdiction," and have subject matter jurisdiction only to the extent "authorized by Constitution and statute." *Kokkonen v. Guardian Life Ins. Co. of Am., 511 U.S. 375, 377, 114 S. Ct. 1673, 128 L. Ed. 2d 391 (1994)* (citing *Willy v. Coastal Corp., 503 U.S. 131, 136-137, 112 S. Ct. 1076, 117 L. Ed. 2d 280 (1992)*; *Bender v. Williamsport Area School Dist., 475 U.S. 534, 541, 106 S. Ct. 1326, 89 L. Ed. 2d 501 (1986))*. "It is to be presumed that a cause lies outside this limited jurisdiction, and the burden of establishing the contrary rests upon the party asserting jurisdiction." *Id.* (citing *Turner v. Bank of N. Am., 4 U.S. (4 Dall.) 8, 11, 1 L. Ed. 718, 4 Dall. 8 (1799))*; *McNutt v. Gen. Motors Acceptance Corp., 298 U.S. 178, 182-83, 56 S. Ct. 780, 80 L. Ed. 1135 (1936))*. The removal statute is strictly construed against removal jurisdiction, and "[f]ederal jurisdiction must be rejected if there is any doubt as to the right of removal in the first instance." *See* *Gaus v. Miles, Inc., 980 F.2d 564, 566 (9th Cir. 1992)* (citing *Boggs v. Lewis, 863 F.2d 662, 663 (9th Cir. 1988)*; *Takeda v. Northwestern Nat'l Life Ins. Co., 765 F.2d 815, 818 (9th Cir. 1985)*; *Libhart v. Santa Monica Dairy Co., 592 F.2d 1062, 1064 (9th Cir. 1979))*.

Diversity jurisdiction exists if the plaintiff has different citizenship from all defendants and the amount in controversy exceeds $75,000. *See* *28 U.S.C. § 1332(a)*; *Owen Equip. & Erection Co. v. Kroger, 437 U.S. 365, 373, 98 S. Ct. 2396, 57 L. Ed. 2d 274 (1978)*. For removals based in diversity, the removing defendant typically must show that the parties were completely diverse when the case was filed and removed, *Strotek Corp. v. Air Transp. Ass'n. of Am., 300 F.3d 1129, 1131 (9th Cir. 2002)*, and that the amount **[*7]** in controversy exceeded $75,000 at the time of removal, *Matheson v. Progressive Specialty Ins. Co., 319 F.3d 1089, 1091 (9th Cir. 2003)*.

B. Analysis of Citizenship

1. Quality's Citizenship

The crux of the motion to remand rests on Quality's citizenship. Plaintiff contends that Quality is a citizen of California. MTR ¶ 12. Defendant Companies do not dispute that Quality is a citizen of California. *See generally* MTR Opp. Instead, they argue that Quality is a fraudulently joined and/or a nominal defendant, and the Court should therefore disregard its citizenship for diversity purposes. MTR Opp. at 2-8.

a. Nominal Defendant

Plaintiff argues that Quality never filed a declaration of non-monetary status pursuant to *California Civil Code § 2924l*. MTR ¶ 13. Though Quality did file a declaration of non-monetary status (sometimes referred to as "DNMS"), NOR, Ex. B at 132, Docket No. 1-1, Defendant Companies argue that Quality's "status as a nominal and fraudulent joined party is not based on the trustee's DNMS . . . Defendants do not rely on the DNMS or Plaintiff's failure to object to the DNMS. . . ."[1] MTR Opp. at 2. Instead, Defendants argue that aside from recording foreclosure notices, Plaintiff alleges no conduct by Quality to support its cause of action against Quality. MTR Opp. at 5.

Courts will ignore nominal parties' citizenship for jurisdictional purposes where they "have no interest in the action and are merely joined to perform the ministerial act of conveying the title if adjudged to the complainant." *Prudential Real Estate Affiliates, Inc. v. PPR Realty, Inc., 204 F.3d 867, 873 (9th Cir. 2000)* (citations and quotations omitted, punctuation altered). While it is true that trustees are often deemed nominal parties, however, that is not the case where a complaint contains substantive allegations against the trustee. *See* *Osorio v. Wells Fargo Bank, No. C 12-02645-RS, 2012 U.S. Dist. LEXIS 78073, 2012 WL 2054997, at *2 (N.D. Cal. June 5, 2012)* ("Admittedly, trustees are often deemed nominal parties, but an exception is made where the complaint contains substantive allegations against the trustee or seeks to recover money damages from the trustee") (collecting cases, citations omitted).

Courts have remanded foreclosure actions on the grounds that Quality was not a nominal or fraudulently joined defendant, but those cases included allegations that Quality violated specific statutes. *See, e.g.,* *Javaheri v. JP Morgan Chase Bank N.A., No. CV-15-04762-DMG, 2015 U.S. Dist. LEXIS 134378, 2015 WL 5822579, at *2 (C.D. Cal. Oct. 1, 2015)* ("[The plaintiff] does allege that Quality improperly recorded a notice of sale against his property while his loan modification application **[*9]** was pending, in violation of *California Civil Code section 2924.18(a)(1)*"); *Mulleneaux v. Wells Fargo Bank, N.A., No. CV-17-00780-BRO, 2017 U.S. Dist. LEXIS 92569, 2017 WL 2604249, at *5 (C.D. Cal. June 15, 2017)* (plaintiff bringing substantive violations against Quality, including violations of *California Civil Code §§ 2923.55* and *2923.6(e)*); *Freeman v. Wells Fargo Bank, N.A., No. 16-CV-03790-RS, 2016 U.S. Dist. LEXIS 117709, 2015 WL 4535785, at *4 (N.D. Cal. Aug. 31, 2016)* (plaintiff claiming Quality violated *California Civil Code §§ 2923.55* and *2924.17*)).

Here, even in the original Complaint where Plaintiff attempted to plead six causes of actions, only the UCL claim was alleged against Quality (and that cause of action made only one implicit reference to Quality, in the header, alleging the UCL claim "Against All Defendants"). *See* Compl. ¶¶ 150-66. Plaintiff makes the same sole reference to Quality in a cause of action within the header of now Count I (formerly the fourth cause of action). FAC ¶¶ 132-53. Though the Complaint and FAC question Quality's role as trustee, the challenge to Quality's status as trustee is not part of the lone UCL claim against Quality nor does any of Quality's allegedly improper actions make up the UCL claim. FAC ¶¶ 86, 50-66, 132-53; Compl. ¶¶ 84, 150-66. To the Court, this demonstrates Quality's status as a nominal defendant in this action. Despite the chance to amend, Plaintiff alleged **[*10]** no substantive claim against Quality that could possibly form the basis of recovery.[2] Because Quality is merely trustee and the relevant

---

[1] The Court would find that Quality's declaration of non-monetary status, dated November 15, 2017, was filed too close in time to the November 20, 2017 removal of this action. NOR; NOR, Ex. B (declaration of non-monetary status), Docket No. 1-1. Most courts have held that for a party to receive nominal party status through the filing of a declaration of non-monetary status, pursuant to *California Civil Code 2924l*, removal must occur after the 15-day statutory period has expired without objection. *See* *Melamed v. JPMorgan Chase Bank, N.A., No. LA CV-15-04314-JAK, 2015 U.S. Dist. LEXIS 138482, 2015 WL 5923533, at *4 (C.D. Cal. Oct. 8, 2015)*; *see also* *Silva v. Wells Fargo Bank N.A., No. CV 11-03200-GAF, 2011 U.S. Dist. LEXIS 64636, 2011 WL 2437514, at * 4 (C.D. Cal. June 16, 2011)* **[*8]** (citation omitted); *Jenkins v. Bank of Am., N.A., No. CV 14-04545-MMM, 2015 U.S. Dist. LEXIS 11528, 2015 WL 331114, at *6 (C.D. Cal. Jan. 26, 2015)*. Therefore, Quality's declaration of non-monetary status does not transmute nominal status to Quality.

[2] In one case granting a motion to remand, the court noted that Plaintiff challenged Quality's role as trustee, but that case also included substantive claims against Quality. *See* *O'Rourke v. Litton Loan Servicing LP, No. EDCV 11-00450-VAP(DTBx), 2011 U.S. Dist. LEXIS 163808, 2011 WL 13225138, at *7 (C.D. Cal. Aug. 15, 2011)* (holding that "Plaintiff's allegations against Quality

pleadings contain no causes of action against it (other than the UCL claim), the Court would find Quality to be a nominal defendant.[3] *See generally* Complaint; *see also generally* FAC.

b. Fraudulently Joined Defendant

Defendant Companies argue that Quality is also a fraudulently joined defendant. MTR Opp. at 3-8. Plaintiff argues that is not the case. MTR ¶¶ 16-24.

Because there is a general presumption against fraudulent joinder, defendants seeking to rely on the exception bear a "heavy" burden of proof. *Mendoza v. Host Int'l, Inc., No. CV 13-8671-GHK, 2014 U.S. Dist. LEXIS 13282, 2014 WL 367296, at *1 (C.D. Cal. Feb. 3, 2014)* (quoting *Hunter, 582 F.3d at 1046*). To meet that burden, the removing party "must negate every possible scenario within the ambit of a well-pled claim," *Iniguez v. Vantium Cap., Inc., No. C 13-00037-WHA, 2013 U.S. Dist. LEXIS 41776, 2013 WL 1208750, at *2 (N.D. Cal. Mar. 25, 2013)* (citations omitted), and must do so by "clear and convincing evidence," *Hamilton Materials Inc. v. Dow Chem. Corp., 494 F.3d 1203, 1206 (9th Cir. 2007)*. A defendant may present facts in the form of summary judgment-type evidence showing the joinder to be fraudulent. *McCabe, 811 F.2d at 1339*; *Morris, 236 F.3d at 1068* (citing *Cavallini v. State Farm Mutual Auto Ins. Co., 44 F.3d 256, 263 (5th Cir.1995)* ("[F]raudulent joinder claims may be resolved by 'piercing the pleadings' and considering summary **[*11]** judgment-type evidence")). But district courts "must resolve all disputed questions of fact," *Good v. Prudential Ins. Co. of Am., 5 F.Supp.2d 804, 807 (N.D. Cal. 1998)*, and "all material ambiguities in state law" in the plaintiff's favor, *Macey v. Allstate Prop. & Cas. Ins. Co., 220 F.Supp.2d 1116, 1117 (N.D. Cal. 2002)*. "Thus, if there is a non-fanciful possibility that plaintiff can state a claim under state law against the non-diverse defendants, the court must remand." *Barsell v. Urban Outfitters, Inc., No. 09-CV-2604-MMM, 2009 U.S. Dist. LEXIS 123475, 2009 WL 1916495, at *3 (C.D. Cal. July 1, 2009)* (quotations omitted); *Sun v. Bank of Am. Corp., No. 10-CV-4-AG, 2010 U.S. Dist. LEXIS 19554, 2010 WL 454720, at *3 (C.D. Cal. Feb. 8, 2010)* ("[I]n the Ninth Circuit, a . . . defendant is . . . fraudulently joined if, after all disputed questions of fact and all ambiguities in the controlling state law are resolved in the plaintiff's favor, the plaintiff could not possibly recover against the [defendant]"). Failing to state a claim "is not sufficient to invoke fraudulent joinder or nominal party status." *Newman v. Select Portfolio Servicing, Inc., No. C-13-03685 JSC, 2013 U.S. Dist. LEXIS 151097, 2013 WL 5708200, at *4 (N.D. Cal. Oct. 21, 2013)* (citing *Latino v. Wells Fargo Bank, 2011 U.S. Dist. LEXIS 119804, 2011 WL 4928880, at *3 (E.D. Cal. Oct. 17, 2011))*.

Plaintiff argues that Quality is not a fraudulently joined defendant. MTR ¶¶ 16-24. Defendant Companies argue that Plaintiff's UCL claim against Quality is "based entirely on its recording of foreclosure notices." MTR Opp. at 5 (citing Compl. ¶¶ 72-74). Defendant Companies also note that the original Complaint does not reference Quality under the UCL cause of action. MTR Opp. at 5 (citing Compl. ¶¶ 150-166). **[*12]** The Court need not address whether Plaintiff is a fraudulently joined defendant because it has already found Quality to be a nominal defendant above. Quality's citizenship is therefore immaterial for diversity purposes.

2. Other Parties' Citizenship

Defendant Companies state in the NOR that Wells Fargo is a citizen of South Dakota, HSBC is a citizen of Virginia, MERS is a citizen of Delaware, and that Plaintiff is a citizen of California. *See* NOR at 2-5. Plaintiff does not dispute any of those contentions. *See generally* MTR. The Court will consider the aforementioned parties' citizenship as such.

---

in the FAC include potentially substantive claims and, more critically, challenge Quality's role as the named Trustee. . . . [i]t is unclear whether Quality is a nominal defendant in this action.").

[3] Both the Complaint and the FAC make a number of factual allegations involving Quality. FAC ¶¶ 5, 73, 74, 75, 76, 83, 85-86, 104, 129; Compl. ¶¶ 5, 71-74, 81, 83-84, 102, 127, 183. In one of those factual allegations, Plaintiff challenges Quality's authority to act on behalf of the other defendants and questions whether Quality "validly substituted in as successor Trustee of Plaintiff's DOT." FAC ¶ 86; Compl. ¶ 84. Nonetheless, none of these factual allegations form the basis of a cause of action in either the Complaint or the FAC. *See generally* Compl.; *see also* FAC.

Because the Court disregards Quality's California citizenship, the Court would find that complete diversity of citizenship exists as to the remaining parties.

C. Analysis of Amount in Controversy

To invoke diversity jurisdiction, the party asserting jurisdiction must show the amount in controversy exceeds $75,000. *See* 28 U.S.C. § 1332(a); Valdez v. Allstate Ins. Co., 372 F.3d 1115, 1117 (9th Cir. 2004). "Where it is not facially evident from the complaint that more than $75,000 is in controversy, the removing party must prove, by a preponderance of the evidence, that the amount in controversy meets the jurisdictional threshold." Matheson v. Progressive Specialty Ins. Co., 319 F.3d 1089, 1090 (9th Cir. 2003) (per curiam). "While a defendant's notice of removal need **[*13]** include only a plausible allegation that the amount in controversy exceeds the jurisdictional threshold, evidence establishing the amount is required once the plaintiff contests, or the court questions, the defendant's allegation." Dart Cherokee Basin Operating Co., LLC v. Owens, 135 S. Ct. 547, 554, 190 L. Ed. 2d 495 (2014). Once the plaintiff contests, or the court questions the allegation and where "the complaint does not demand a dollar amount, the removing defendant bears the burden of proving by a preponderance of evidence that the amount in controversy exceeds $75,000." Kroske v. U.S. Bank Corp., 432 F.3d 976, 980 (9th Cir. 2005), *as amended on denial of reh'g and reh'g en banc* (Feb. 13, 2006) (quoting Singer v. State Farm Mut. Auto Ins. Co., 116 F.3d 373, 376 (9th Cir. 1997)).

As the NOR points out, Plaintiff seeks damages of "no less than $2,000,000" and seeks to extinguish a residential home loan of $825,000. NOR at 10-13. The value of the Property upon foreclosure was $623,000. *Id.* at 13. The MTR does not dispute any of these figures nor does it argue that the amount in controversy requirement is not satisfied. *See generally* MTR. The Court would find the amount in controversy satisfied.

Therefore, because the Court finds complete diversity of citizenship and an amount in controversy in excess of $75,000, the Court concludes that it has subject matter jurisdiction over this action and denies Plaintiff's motion to remand.

II. Motion to Dismiss [*14]

A. Legal Standard

Under Rule 12(b)(6), a defendant may move to dismiss for failure to state a claim upon which relief can be granted. Fed. R. Civ. P. 12(b)(6). A complaint may be dismissed for failure to state a claim for one of two reasons: (1) lack of a cognizable legal theory; or (2) insufficient facts under a cognizable legal theory. Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007); *see also* Mendiondo v. Centinela Hosp. Med. Ctr., 521 F.3d 1097, 1104 (9th Cir. 2008) ("Dismissal under Rule 12(b)(6) is appropriate only where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory.").

In deciding a 12(b)(6) motion, a court "may generally consider only allegations contained in the pleadings, exhibits attached to the complaint, and matters properly subject to judicial notice." Swartz v. KPMG LLP, 476 F.3d 756, 763 (9th Cir. 2007). The court must construe the complaint in the light most favorable to the plaintiff, accept all allegations of material fact as true, and draw all reasonable inferences from well-pleaded factual allegations. Gompper v. VISX, Inc., 298 F.3d 893, 896 (9th Cir. 2002); *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir.)*, *amended on denial of reh'g*, 275 F.3d 1187 (9th Cir. 2001); Cahill v. Liberty Mutual Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996). The court is not required to accept as true legal conclusions couched as factual allegations. Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009). Where a plaintiff facing a 12(b)(6) motion has pled "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged," the motion should be **[*15]** denied. *Id.*; Sylvia Landfield Trust v. City of Los Angeles, 729 F.3d 1189, 1191 (9th Cir. 2013). But if "the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged — but it has not show[n] . . . the pleader is entitled to relief." *Iqbal, 556 U.S. at 679* (citations omitted).

Pro se filings are construed liberally. *See, e.g., Hebbe v. Pliler, 627 F.3d 338, 342 (9th Cir. 2010)*; *Weilburg v. Shapiro, 488 F.3d 1202, 1205 (9th Cir. 2007)*. "Dismissal of a *pro se* complaint without leave to amend is proper only if it is absolutely clear that the deficiencies of the complaint could not be cured by amendment." *Weilburg, 488 F.3d at 1205* (quoting *Schucker v. Rockwood, 846 F.2d 1202, 1203-04 (9th Cir. 1988))*; *see also* *Ramirez v. Galaza, 334 F.3d 850, 861 (9th Cir. 2003)* ("Leave to amend should be granted unless the pleading 'could not possibly be cured by the allegation of other facts and should be granted more liberally to pro se plaintiffs.'") (quoting *Lopez v. Smith, 203 F.3d 1122, 1130-31 (9th Cir. 2000)* (*en banc*).

B. Analysis

1. Defendant Companies' Request for Judicial Notice

Defendant Companies request that the Court take judicial notice of ten documents in deciding its Motion. *See generally* RJN. These ten documents are the same documents requested in its previous RJN. *See* November 27, 2017 Request for Judicial Notice, Docket No. 9. Plaintiff opposes this request. *See* Plaintiff's March 22, 2018 Memorandum of Points and Authorities in Opposition to Moving Defendants' RJN ("Opp. RJN"), Docket No. 41. Plaintiff echoes its **[*16]** reasoning regarding the prior request for judicial notice. *See* Opp. RJN; *see also* Plaintiff's December 27, 2017 Memorandum of Points and Authorities in Opposition to Defendant Companies' RJN, Docket No. 15.

Generally, a court may not consider material beyond the pleadings in ruling on a motion to dismiss for failure to state a claim. *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)* (citation omitted). There are two exceptions: (1) when material is attached to the complaint or necessarily relied on by the complaint, and (2) when the court takes judicial notice of matters of public record, provided the facts are not subject to reasonable dispute. *Id. at 688-89* (further indicating that on a motion to dismiss, a court may properly look beyond the complaint to matters of public record and that doing so does not convert a *Rule 12(b)(6)* motion to one for summary judgment).

Here, Exhibits A through J are all properly subject to judicial notice. This is because two of these documents are referred to in the FAC and their authenticity is not questioned (Exs. A, E) while the remaining documents are true and correct copies of official public records (Exs. B-D, F-J). *See* RJN at 2-4. All of the documents are of the type that courts routinely take judicial notice of in foreclosure **[*17]** related cases. *See* *In re Davies, 565 F.App'x 630, 632 (9th Cir. 2014)* (holding that recorded assignment of deed trust was document of legal force and thus proper subject of judicial notice); *Farber v. JPMorgan Chase Bank N.A., No. 12-CV-2367-GPC-BGS, 2014 U.S. Dist. LEXIS 2203, 2014 WL 68380, at *3 (S.D. Cal. Jan. 8, 2014)* ("Federal courts routinely take judicial notice of facts contained in publically recorded documents, including Deeds of Trust, because they are matters of public record, and are not reasonably in dispute."). Moreover, many of these documents form the basis of Plaintiff's claims, are referred to throughout the FAC, and are explicitly incorporated by reference into the FAC. *See generally* FAC. As such, the Court grants Defendant Companies' RJN and will consider those documents incorporated by reference into the FAC for the purposes of the pending motions. *See* *Branch v. Tunnell, 14 F.3d 449, 453-54 (9th Cir. 1994)* (indicating that "documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the pleading" may be considered in ruling on a motion to dismiss); *see also* *U.S. v. Ritchie, 342 F.3d 903, 908 (2003)* (holding that if a document forms the basis of a plaintiff's complaint, the district court may consider it as part of the complaint and assume its contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*).

Plaintiff **[*18]** argues that judicial notice of these documents is improper because the documents contain "a large number of material and relevant disputed factual claims . . . ." Plaintiff's Opposition to RJN at 4, Docket No. 41. Plaintiff further argues that judicial notice is improper because the documents are "the very type of documents that the Plaintiff asserts are void and unenforceable." *Id.* Plaintiff fails to identify any specific factual assertions that appear in these documents that are in dispute. Furthermore, while the Court takes judicial notice of the existence and recordation of the documents and the facts contained therein, it does not take notice that they *are legally valid and enforceable* documents. In other words, Plaintiff's arguments as to the fraudulent and void nature of the documents in question are not defeated through judicial notice alone.

In sum, the Court grants Defendant Companies' RJN in full.

2. Count I - UCL

Plaintiff alleges one cause of action in the FAC, rooted in the UCL. FAC ¶¶ 132-53. Only Paragraphs 147 through 151 were added to the UCL cause of action in the FAC; the rest are essentially copy pasted from the previous Complaint. *Id.* ¶¶ 147-51. Plaintiff cites law **[*19]** on unfair business practices in three of the five newly added paragraphs. *Id.* ¶¶ 147-49.

The UCL proscribes three avenues to challenge business practices: if they are "[1] unlawful, [2] unfair or [3] fraudulent . . . ." *Khoury v. Maly's of California, Inc., 14 Cal. App. 4th 612, 619, 17 Cal. Rptr. 2d 708, 712 (1993)*. First, unlawful business practices are those "forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made." *Saunders v. Superior Court, 27 Cal. App. 4th 832, 838-39, 33 Cal. Rptr. 2d 438 (1994)*. Second, unfair business practices "means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. Third, fraudulent business practices are those "likely to deceive the public." *McKell v. Washington Mut., Inc., 142 Cal. App. 4th 1457, 1471, 49 Cal. Rptr. 3d 227 (2006)*.

a. Standing to Bring UCL Claim

Defendant Companies argue that Plaintiff lacks standing under the UCL because he "fails to plead facts showing that he suffered any injury or loss, let alone an injury or loss due to Wells Fargo's alleged conduct in violation of the UCL." Companies' MTD at 13-14. Plaintiff counters that "Defendants' illegal, unfair and unlawful conduct caused Plaintiff's home to be sold in foreclosure." Pl.'s Opp. Companies' MTD at 11.

To establish statutory standing under the **[*20]** UCL, "a private plaintiff [must] have suffered 'injury in fact and lost money or property as a result of the unfair competition.'" *Rubio v. Capital One Bank, 613 F.3d 1195, 1203 (9th Cir. 2010)* (quoting *Cal. Bus. & Prof. Code § 17204*) (punctuation altered). To establish standing, then, a UCL plaintiff must show that he or she "'lost money or property' sufficient to constitute an 'injury in fact' under Article III of the Constitution, and also requires a 'causal connection' between [the defendant's] alleged UCL violation and [his or] her injury in fact." *Id. at 1203-04* (citations omitted); *Hall v. Time Inc., 158 Cal. App. 4th 847, 855, 70 Cal. Rptr. 3d 466 (2008)* ("The phrase 'as a result of' in its plain and ordinary sense means 'caused by' and requires a showing of a causal connection or reliance on the alleged misrepresentation").

As mentioned above, Plaintiff argues that Defendants' "illegal, unfair and unlawful conduct caused Plaintiff's home to be sold in foreclosure." Pl.'s Opp. Companies' MTD at 11. Defendant Companies argue that Plaintiff's financial hardship and resulting failure to make mortgage payments led to foreclosure, rather than Defendants' actions. Companies' MTD at 13-14. Without sufficient allegations that Defendants caused the loss of the Property, the Court would not find standing for Plaintiff to assert this cause of action. *See* *Hernandez v. Specialized Loan Servicing, LLC, No. CV 14-9404-GW, 2015 U.S. Dist. LEXIS 8695, 2015 WL 350223, at *8 (C.D. Cal. Jan. 22, 2015)* ("Without this allegation, the **[*21]** thing that caused [the plaintiff's] balance to increase or the title on her property to cloud under her then-existing mortgage was the failure to pay.") (citing *Hall, 158 Cal. App. 4th at 855*; *Schwartz v. Provident Life & Accident Ins. Co., 216 Cal. App. 4th 607, 613, 157 Cal. Rptr. 3d 275 (2013))*. The Court would therefore dismiss this claim.

b. Unlawful Prong

Plaintiff eliminated all causes of action in the FAC, except for Count I, formerly the fourth cause of action, alleging Defendants' violation of the UCL. *See generally* FAC. To the extent Count I is based on any of Plaintiff's prior causes of action eliminated from the FAC, this claim fails. *See Puentes v. Wells Fargo Home Mortg., Inc., 160 Cal.App.4th 638, 643-44, 72 Cal. Rptr. 3d 903 (2008)* ("[S]ection 17200 'borrows' violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable . . . ."). Those claims are no longer part of this action and they were dismissed by the Court in their previous form. As such, Plaintiff's UCL claim fails on the unlawful prong because the FAC only contains that claim and no other independent causes of action. *See Ingels v. Westwood One Broad. Servs., Inc., 129 Cal. App. 4th 1050, 1060, 28 Cal. Rptr. 3d 933 (2005)* ("A defendant cannot be liable under *§ 17200* for committing 'unlawful business practices' without having violated another law.") (citation and internal quotation marks omitted).

c. Unfair Prong

"A business practice is unfair within the meaning of the UCL if it violates **[*22]** established public policy or if it is immoral, unethical, oppressive or unscrupulous and causes injury to consumers which outweighs its benefits." *McKell v. Wash. Mut. Inc., 142 Cal. App. 4th 1457, 1473, 49 Cal. Rptr. 3d 227 (2006)*. The California Courts of Appeal have identified three different test for unfairness under the UCL:

> The test applied in one line of cases requires that the public policy which is a predicate to a consumer unfair competition action under the unfair prong of the UCL must be tethered to specific constitutional, statutory, or regulatory provisions.
>
> A second line of cases applies a test to determine whether the alleged business practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers and requires the court to weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim.
>
> The test applied in a third line of cases draws on the definition of unfair in *section 5 of the Federal Trade Commission Act (15 U.S.C. § 45, subd. (n))*, and requires that (1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided.

*Phipps v. Wells Fargo Bank, N.A., No. CV 10-02025-LJO, 2011 U.S. Dist. LEXIS 10550, 2011 WL 302803, at *16 (E.D. Cal. Jan. 27, 2011)* **[*23]** (internal citations and quotation marks omitted).

In the FAC, Plaintiff alleges the same three pieces of conduct as "unfair" that he alleged in the original Complaint: (1) wrongful foreclosure; (2) requesting unnecessary documentation to "provide a basis for denying loss mitigation options, such as a loan modification" and for failing to properly consider Plaintiff's Loan Modification Agreement; and (3) failing to "investigate claims of loss mitigation approvals or defects with the foreclosing documents or appropriateness of the parties foreclosing and in doing so such activity provides the basis for an 'unfair' inquiry . . . ." FAC ¶ 135(a)-(c). Because the FAC contains substantially the same factual allegations as the Complaint, the Court would dismiss the cause of action under the unfair prong of the UCL because Plaintiff does not plead sufficient facts to support this claim, just as it failed to do so before. *See Mendiondo, 521 F.3d at 1104*.

d. Fraudulent Prong

To properly plead a UCL claim based on fraud, a plaintiff must "satisfy the particularity requirement of [*Federal Rule of Civil Procedure] Rule 9(b)*." *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)*. "A violation can be shown even if no one was actually deceived, relied upon the fraudulent practice, or sustained any damage. Instead, it is **[*24]** only necessary to show that members of the public are likely to be deceived." *Schnall v. Hertz Corp., 78 Cal. App. 4th 1144, 1167, 93 Cal. Rptr. 2d 439 (2000)* (citation and quotation marks omitted).

Plaintiff eliminated his *California Civil Code § 1572* causes of action against Erica Jones and MERS alleging fraud. *See generally* FAC. Even so, the Court previously dismissed those causes of action for failing to state a claim. As it stands, the FAC does not plead sufficient factual allegations demonstrating fraud, and cannot satisfy the particularity requirement of *Rule 9(b)*. Plaintiff makes conclusory statements such as "Defendant's scheme is premised on fabricating documents and using them . . . to conceal its fraudulent, illegal, and unfair practices." FAC

¶ 150. Plaintiff also alleges that "[t]he scheme is unquestionably unlawful, unfair, and fraudulent for purposes of *Section 17200*. It relies on fraudulent real estate documents to complete its schemes and continues in its loan modification procedural practices." *Id.* ¶ 151. The Court would find that Plaintiff has not pleaded with particularity a UCL claim under the fraudulent prong.

e. Insufficient Allegations Against Jones

Jones argues that there are no specific factual allegations as part of the UCL claim against her. Jones's MTD at 2-3. Plaintiff rebuts, pointing to various factual **[*25]** allegations in the Complaint against Jones, namely Jones's lack of authority to execute the First ADOT. Pl.'s Opp. Jones's MTD at 9-12. Though Plaintiff is correct that the FAC alleges that Jones lacked the authority to execute the First ADOT, it does not allege this as a basis for the UCL claim. FAC ¶¶ 18-35, 132-53. As such, the Court would also dismiss Count I in the FAC against Jones for containing insufficiently pleaded factual allegations against her. *See* *Mendiondo, 521 F.3d at 1104*.

f. Statute of Limitations on UCL Claim Against Jones

Jones argues that Plaintiff's UCL claim against her expired under the four-year statute of limitations because Jones executed the First ADOT over seven years ago. Jones's MTD at 2. Plaintiff rebuts, arguing that Jones's fraudulent concealment justifies the tolling of the statute of limitations until March 10, 2017. Pl.'s Opp. Jones's MTD at 5-9.

For the same reasons stated above and in the previous Order, Plaintiff has insufficiently pleaded fraudulent conduct. More specifically, he failed to plead the who, what, when, where and how of Jones's alleged fraudulent concealment, required to establish tolling. *Yumul v. Smart Balance, Inc., 733 F. Supp. 2d 1117, 1133 (C.D. Cal. 2010)* (holding that the plaintiff "failed adequately to allege fraudulent concealment sufficient **[*26]** to establish tolling."). The Court would therefore dismiss the UCL claims against Jones because her allegedly improper conduct occurred outside of the four-year period proscribed in the UCL. *See* *Cal. Bus. & Prof. Code § 17208*.

III. Conclusion

For the reasons stated above, the Court would **GRANT** Defendant Companies' MTD and **GRANT** Jones's MTD. The Court would dismiss the sole remaining claim in the FAC **WITHOUT** prejudice and would give Plaintiff 30 days to file a second amended complaint. As to Plaintiff's motion to remand, for the above reasons the Court would **DENY** that motion.

Neptun Light, Inc. v. City of Chi.

United States District Court for the Northern District of Illinois, Eastern Division

April 16, 2018, Decided; April 16, 2018, Filed

Case No. 17-CV-8343

Reporter

2018 U.S. Dist. LEXIS 63440 *; 2018-1 Trade Cas. (CCH) P80,355; 2018 WL 1794769

NEPTUN LIGHT, INC., Plaintiff, v. CITY OF CHICAGO; CHICAGO INFRASTRUCTURE TRUST; and AMERESCO, INC., Defendants.

Core Terms

luminaires, Lighting, bidding, anticompetitive, antitrust, alleges, manufacturers, proposals, rule of reason, market power, Sherman Act, anti trust law, specifications, Defendants', contractors, relevant market, purchaser, products

Opinion by: AMY J. ST. EVE

Opinion

MEMORANDUM OPINION AND ORDER

AMY J. ST. EVE, District Court Judge:

Defendants City of Chicago (the "City"), Chicago Infrastructure Trust ("CIT"), and Ameresco, Inc. (collectively, "Defendants") have moved pursuant to *Federal Rule of Civil Procedure 12(b)(6)* to dismiss Plaintiff Neptun Light, Inc.'s Complaint alleging a violation of *Section 1 of the Sherman Act, 15 U.S.C. § 1*. (R. 18.) For the following reasons, the Court grants Defendants' motion.

BACKGROUND

This case concerns streetlights, and how the City went about procuring subcontractors to **[*2]** supply new and energy-efficient ones. The Complaint alleges that in November 2016 the City prepared a revamp of the City's lights with "smart lighting." To get the process underway, the City issued the Chicago Smart Lighting Project Request for Proposals ("RFP") to various contractors. (Compl. ¶ 22.) The City did so "in coordination" with CIT (*id.*), which is a nonprofit organization that assists the City "in providing alternative financing and project delivery options for transformative infrastructure projects" (*id.* ¶ 16). With their RFP, the City and CIT sought to "select a single Proposer that delivers the best value." (*Id.* ¶ 24.) The RFP therefore requested "competitive detailed proposals," or bids, and the City and CIT would consider only proposals that satisfied the RFP's stated criteria. (*Id.* ¶¶ 23-25.)

The RFP required that bids must include new "LED Luminaires," a type of efficient electric-lighting unit, and that those luminaires meet certain specifications for installation in 270,000 fixtures. (*Id.* ¶ 28.) These RFP specifications—including wattage, range, and weight requirements—were specific to various different "lighting contexts," such as alley, residential, or arterial **[*3]** streets. (*Id.* ¶ 30.) The RFP also attached Form 4, which contractors had to complete by filling in data for their luminaires. (*Id.* ¶ 32.) Contractors further had to submit physical samples with their bids under the RFP. (*Id.* ¶ 33.)

The RFP contemplated that the City and CIT could conduct a demonstration of the submitted luminaires, and if they did, they would "utilize the relevant samples submitted by each Proposer." (*Id.* ¶¶ 34-35.) A comprehensive demonstration, however, was to occur only after the deadline to submit bids. (*Id.* ¶ 37.) The RFP stated that its goal was "to create a fair and uniform basis for the evaluation of the Proposals" and that the City would award the contract to the "Proposer whose Proposal conforms to the requirements of the RFP" and after considering the criteria it would "determine which proposal represents the 'best value.'" (*Id.* ¶ 36.) The RFP initially called for bids by December 14, 2016, but through a later addendum dated December 9, 2016, the City and CIT moved the deadline to January 9, 2017. (*Id.* ¶ 39.)

The Complaint alleges that Defendants ran afoul of the RFP in an effort to steer the luminaire subcontracting deal to General Electric ("GE") Lighting **[*4]** and away from Neptun and other competitors. According to the Complaint, this effort became evident in December 2016. That month, the City and CIT performed a neighborhood demonstration, but rather than use luminaires supplied by "each" subcontractor, as the RFP contemplated, they used only GE Lighting's luminaires. (*Id.* ¶¶ 40-48.) The next month, on the deadline of January 9, 2017, the City and CIT received six proposals from contractors, including ones from Commonwealth Edison ("ComEd"), Aldridge Electric, Inc., Itron, Inc., and Ameresco. ComEd's proposal listed GE Lighting as the luminaire manufacturer, but explained that GE Lighting's luminaires could not meet each specification for all lighting contexts. (*Id.* ¶¶ 56, 57-58.) GE Lighting's luminaires also had not been independently tested by a recognized laboratory, as the RFP required. (*Id.* ¶¶ 57-61.) Similarly, Aldridge's bid listed GE Lighting, and Aldridge too conceded that GE Lighting's luminaires did not meet specifications. (*Id.* ¶¶ 62-64.)

Itron, meanwhile, listed Neptun as its luminaire subcontractor. Neptun, unlike GE Lighting, provided the required data and samples. (*Id.* ¶ 51.) Ameresco listed yet another luminaire manufacturer, **[*5]** but it noted that it could work with another "major manufacturer" already "aligned with another contractor" should "the CIT, City, and Parks have an interest in utilizing their products"—a not-so-subtle hint that Ameresco could secure GE Lighting's luminaires, according to the Complaint. (*Id.* ¶ 54.)

The City and CIT ultimately selected Ameresco as the project's contractor. No comprehensive demonstration of Ameresco's listed luminaires took place, however, as the RFP required. (*Id.* ¶ 66.) Instead, in February 2017, Ameresco notified Neptun that it was fielding additional luminaire sub-bids based on revised specifications. (*Id.* ¶ 68.) The City and CIT made many of those revisions to account for GE Lighting's shortcomings, according to the Complaint. Indeed, one of the revisions obviated the need to submit physical samples, which GE Lighting had failed to do in the first instance. (*Id.* ¶¶ 69, 72-73.) After receiving Ameresco's notice about the revised specifications, Neptun again had its luminaires tested independently, and it submitted documentation with its "best proposal," providing "all information the City asked for." (*Id.* ¶¶ 72, 70.) In March 2017, Ameresco informed Neptun that it **[*6]** was not selected for any lighting context. GE Lighting was selected for five. (*Id.* ¶¶ 74-75.)

The Complaint goes on to allege in some detail how Neptun's luminaires were more efficient—by cost, lifespan, wattage—than GE Lighting's in each of the five lighting contexts GE Lighting was awarded. (*Id.* ¶¶ 78-106.) Looking for answers, Neptun sent a letter to Ameresco. The letter noted that Neptun, unlike GE Lighting, was a Chicagoland company, and that it "performed unequivocally" better than the companies selected. Ameresco never responded. (*Id.* ¶¶ 108-109.) Neptun then turned to the City, which did respond, and stated that it had suggested to Ameresco to "reach out to the broadest possible market by contacting each of the manufacturers of the six proposals, including Neptun." (*Id.* ¶ 113.) The City asserted further that Neptun did not provide the "best value" considering several factors, including "local manufacturing capability, large-scale experience, low dirt depreciation, and affordable lifecycle cost." (*Id.* ¶ 114.) According to the Complaint, those assertions were not only unsupported, they were simply wrong. The Complaint alleges, for example, that Neptun already makes luminaires **[*7]** in a Chicago suburb (*id.* ¶ 119), has manufactured over 400,000 luminaires (*id.* ¶ 125), includes better sealing properties in its luminaires than GE Lighting (*id.* ¶ 128), and offers less expensive, longer lasting luminaires than GE Lighting (*id.* ¶ 131).

Based on the City's empty justifications and in light of how the luminaire bidding panned out, the Complaint claims that Defendants entered into an unlawful agreement in violation of *Section 1 of the Sherman Act*. That agreement, it alleges, entailed "relaxing" the specification requirements and then holding a "purportedly open and free competition to select luminaire manufacturers as a pretext in order to include GE Lighting as a luminaire manufacturer—notwithstanding the inferiority of GE Lighting's luminaires." (*Id.* ¶ 133.) The Complaint claims that not only did GE Lighting's selection contravene the RFP's stated goal to host a competitive bidding process and find the "best value," it also contravened Illinois law, which requires that "all purchase orders or contracts . . . involving amounts in excess of $10,000, made by or on behalf of [a] municipality, shall be let by free and open competitive bidding." (*Id.* ¶ 134 (quoting 65 ILC 5/8-10-3).) **[*8]** The Complaint alleges that Defendants' unlawful agreement to fix the bidding process for GE Lighting has harmed Neptun, which could have earned millions on the project, and Chicagoans, who now suffer less efficient and more expensive luminaires over their streets. (*Id.* ¶¶ 136-140.)

LEGAL STANDARD

"A motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* challenges the viability of a complaint by arguing that it fails to state a claim upon which relief may be granted." *Camasta v. Jos. A. Bank Clothiers, Inc., 761 F.3d 732, 736 (7th Cir. 2014)*; *see also* *Hill v. Serv. Emp. Int'l Union, 850 F.3d 861, 863 (7th Cir. 2017)*. Under *Rule 8(a)(2)*, a complaint must include "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. To survive a *Rule 12(b)(6)* challenge, a "complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. Courts, of course, accept all well-pleaded facts as true and draw reasonable inferences in the plaintiff's favor. *See, e.g.,* *Forgue v. City of Chicago, 873 F.3d 962, 966 (7th Cir. 2017)*. After "excising the allegations not entitled to the presumption" of truth, courts "determine whether the remaining factual allegations plausibly suggest an entitlement to relief." *McCauley v. City of Chicago, 671 F.3d 611, 616 (7th Cir. 2011)*.

ANALYSIS

Antitrust law's precept is the protection of competition, not competitors. *See* *Woodman's Food Mkt., Inc. v. Clorox Co., 833 F.3d 743, 747 (7th Cir. 2016)* (citing *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 338, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*; *Olympia Equip. Leasing Co. v. W. Union Tel. Co., 797 F.2d 370, 376 (7th Cir. 1986)*. It is not a catchall business tort designed **[*9]** to recompense the market's also-rans, even if their losses are the result of unfairness or deception. *See* *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 137, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*; *Havoco of Am., Ltd. v. Shell Oil Co., 626 F.2d 549, 558 (7th Cir. 1980)*.

The Complaint claims that Neptun lost the luminaire deals, and GE Lighting won those deals, because Defendants entered into an anticompetitive agreement to that end which purportedly violated *Section 1 of the Sherman Act*. "To state a claim for a *Section 1* violation," a plaintiff "must plead facts plausibly suggesting: (1) a contract, combination, or conspiracy (*i.e.*, an agreement); (2) a resultant unreasonable restraint of trade in a relevant market; and (3) an accompanying injury." *Ass'n of Am. Physicians & Surgeons, Inc. v. Am. Bd. of Med. Specialties, No. 14-CV-02705, 2017 U.S. Dist. LEXIS 205845, 2017 WL 6821094, at *3 (N.D. Ill. Dec. 13, 2017)* (citing *Agnew v. Nat'l Collegiate Athletic Ass'n, 683 F.3d 328, 335 (7th Cir. 2012))*. "Regarding the second element, where, as here, the alleged anticompetitive conduct does not amount to a *per se* violation of the Sherman Act, courts assess the defendants' conduct under the Rule of Reason analysis." *United States ex rel. Blaum v. Triad Isotopes, Inc., 104 F. Supp. 3d 901, 923 (N.D. Ill. 2015)* (citing *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007))*; *see also, e.g., FTC v. In. Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)* (the "test of legality [under the rule of reason] is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition").[1]

Generally, the rule of reason "requires not only that the plaintiff allege and prove anticompetitive effects, but additionally, as **[*10]** with all antitrust claims, that the injury complained of be of a type that the antitrust laws were designed to guard against, and further that the antitrust violation be the direct cause of plaintiff's injury." *Havoco, 626 F.2d at 556*. "More specifically, a plaintiff must show that the defendants' conduct had an anticompetitive effect in a relevant market, and that the defendants have market power in that market." *Triad Isotopes, 104 F. Supp. 3d at 923* (citing *Menasha Corp. v. News Am. Mktg. In-Store, Inc., 354 F.3d 661, 663 (7th Cir. 2004))*; *see also Slep-Tone Entm't Corp. v. Elwood Enters., Inc., 165 F. Supp. 3d 705, 713 (N.D. Ill. 2015)* ("the rule of reason requires a showing that the alleged violator has 'market power' through an agreement that has produced adverse or anticompetitive effects within the relevant and specifically defined geographic market").

The Complaint in this case falls short of pleading a rule-of-reason claim. "The first requirement in every suit based on the Rule of Reason is market power." *Menasha, 354 F.3d at 663*; *see also, e.g., Agnew, 683 F.3d at 335* ("As a threshold matter, a plaintiff must show that the defendant has market power"); *Sanjuan v. Am. Bd. of Psychiatry & Neurology, Inc., 40 F.3d 247, 251 (7th Cir. 1994)* ("Substantial market power is an essential ingredient of every antitrust case under the Rule of Reason."); *Hardy v. City Optical Inc., 39 F.3d 765, 767 (7th Cir. 1994)* (reiterating the Seventh Circuit's "rule that substantial market power is a threshold requirement of all rule of reason" cases). Nowhere does the Complaint even attempt to allege that the **[*11]** City, CIT, or Ameresco have such power. *See, e.g., 42nd Parallel N. v. E St. Denim Co., 286 F.3d 401, 405 (7th Cir. 2002)* (affirming dismissal because the plaintiff "nowhere alleges that [the defendant] has such market power").

The Complaint likewise fails to allege a relevant market in which Defendants could have power. A plaintiff bears the "burden of describing a cognizable market under the Sherman Act." *Agnew, 683 F.3d at 346*; *accord Republic Tobacco Co. v. N. Atl. Trading Co., 381 F.3d 717, 738 (7th Cir. 2004)* (a plaintiff must define both a product and a geographic market to describe a cognizable market). The Complaint simply makes no effort to do so. *See House of Brides, Inc. v. Alfred Angelo, Inc., No. 11 C 07834, 2014 U.S. Dist. LEXIS 1850, 2014 WL 64657, at *5 (N.D. Ill. Jan. 8, 2014)* ("[f]ailure to identify a relevant market is a proper ground for dismissing a Sherman Act claim") (citing *Nat'l Hockey League Players' Ass'n v. Plymouth Whalers Hockey Club, 325 F.3d 712, 719-20 (6th Cir. 2003))*. Neptun, however, argues that there is "no dispute" about what the relevant market is; the Complaint alleges that the City asked Ameresco to obtain bids from "the broadest possible market" of luminaire manufacturers and the relevant geographic is, "obviously," the City of Chicago. (R. 30 at 7-8.) Even assuming the Complaint "identif[ied] the market for luminaire manufacturers" in Chicago, that is not a cognizable antitrust market. For one, "luminaire manufacturers" are not a product or a service. Further, to the extent Neptun means to reference a market for luminaires, there are insufficient **[*12]** allegations (and no arguments) explaining how that is a market independent of other lighting products. *See, e.g., Fed. Trade Comm'n v. Advocate Health Care Network, 841 F.3d 460, 467 (7th Cir. 2016)* ("Product markets usually include the product at issue and its substitutes, the other products that are reasonably interchangeable with it").

---

[1] Neptun does not contest Defendants' assertion that this is a rule-of-reason case, as it is, given the allegedly vertical agreement. *Accord Leegin, 551 U.S. at 886-88*.

Setting those arguments aside, what the Complaint plainly takes issue with is not a lack of competition in a *market*, but a lack of competition with respect to one *customer* and one *contract*. But as the Seventh Circuit held in Havoco, "there must be some allegation of a harmful effect on a more generalized market than" a single purchaser and a single contract.[2] 626 F.2d at 558-59; *accord* City of New York v. Grp. Health Inc., 649 F.3d 151, 156 (2d Cir. 2011) ("A single purchaser's preferences . . . cannot define a market."); Smalley & Co. v. Emerson & Cuming, Inc., 808 F. Supp. 1503, 1512 (D. Colo. 1992), *aff'd*, 13 F.3d 366 (10th Cir. 1993) ("A relevant product market defined as one product sold to one customer does not make sense under the antitrust laws") (citing Havoco, 626 F.2d at 558).

Related to the Complaint's failure to allege a market is its failure to allege anticompetitive effects. In bringing a rule-of-reason claim, a "plaintiff must allege, not only an injury to himself, but an injury to the market as well." Agnew, 683 F.3d at 335 (quoting Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1107 (7th Cir. 1984)). "[T]he absence of a sufficient allegation of anticompetitive effects in a Sherman Act complaint is fatal to the existence **[*13]** of the cause of action." Havoco, 626 F.2d at 554; *see also, e.g.,* Agnew, 683 F.3d at 335; 42nd Parallel, 286 F.3d at 405.

Courts have long recognized that it is not anticompetitive for purchasers to "exercise [their] independent discretion as to parties with whom [they] will deal." United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919); *accord Expert Masonry, Inc. v. Boone Cnty.,* Ky., 440 F.3d 336, 347 (6th Cir. 2006) ("there is no economic rationale to restrict, as a violation of Section 1, a buyer's latitude in selecting the entity from whom it will purchase products or services"). "[T]he normal principle," therefore, is that "a buyer is entitled to choose among various sellers who offer competing products or services." Great Escape, Inc. v. Union City Body Co., 791 F.2d 532, 539-40 (7th Cir. 1986) (parenthetically quoting Dunn & Mavis, Inc. v. Nu-Car Driveaway, Inc., 691 F.2d 241, 245 (6th Cir. 1982)). That principle applies even when the buyer's decision stemmed from unfair competition; "unfair competition, as such, does not violate the antitrust laws." Sutliff, Inc. v. Donovan Cos., Inc., 727 F.2d 648, 655 (7th Cir. 1984) ("The legislators who passed the Sherman Act did not make ordinary business torts federal torts for which treble damages could be recovered"). Thus, although the "manipulat[ion]" of a "bidding process" by a purchaser may give rise to "a claim grounded in tort or contract," "the absence of any allegation of an anticompetitive effect prevents these claims from coming within the purview of the antitrust laws." Car Carriers, 745 F.2d at 1109-1110 (stating also, "[t]ortious activities in the form, for example, of unfair competition **[*14]** do not contravene the antitrust laws unless accompanied by the requisite anticompetitive effect"); *see also* Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 62 (1st Cir. 2004) (even if Blue Cross "manipulated the bidding," "the antitrust laws are not meant to police bad management"); Sitkin Smelting & Ref. Co. v. FMC Corp., 575 F.2d 440, 448 (3d Cir. 1978) (where losing bidder complained that purportedly open bid system was in fact fixed by the biddee for another bidder, stating the conduct was "clearly reprehensible" but "the Sherman Act may not be extended beyond its intended scope and used to police the morals of the marketplace").

Neptun's theory of harm runs headlong into that law. Neptun's clearest articulation of the alleged harm is that "[d]esiring and selecting a more expensive and poorly-performing product in advance of any bidding, and irrespective of the performance . . . is anticompetitive." (R. 30 at 4-5.) That theory has no recognition in the law (as evidenced by Neptun's lack of caselaw support), and for good reason; otherwise, purchasers who make decisions that are anything from uninformed to thriftless would be subject to antitrust lawsuits and treble damages. *See, e.g.,* Expert Masonry, 440 F.3d at 348 (in an unsuccessful bidder case, "certainly antitrust liability cannot be premised on improvident business decisions"). Elsewhere, Neptun **[*15]** describes Defendants' failure to "hold[ ] a true competition." (R. 30 at 12.) But even if that were true, "[t]he Sherman Act does not require competitive bidding"; it prohibits only "unreasonable restraints on competition," and Neptun has failed to allege any such restraints. Nat'l Soc. of Prof'l Eng'rs v. United States, 435 U.S. 679, 694, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978); *see also, e.g.,* JetAway Aviation, LLC v. Bd. of Cnty. Comm'rs of Cnty. of Montrose, Colo., 754 F.3d 824, 853-54 (10th Cir. 2014).

---

[2] In a footnote, Neptun notes that other courts have "rejected" the "single contract theory." Whatever that means, this Court follows the Seventh Circuit, and its holding that, absent allegations that "a single purchaser represented the entire market for a commodity," a market definition of one purchaser is "so narrow" as to "discourage [rather] than to protect competition, the ward of the antitrust laws." Havoco, 626 F.2d at 559 & n. 6.

The Seventh Circuit was clear in *Havoco*: "a loss by the plaintiff of a single contract with a single purchaser is simply not equivalent to a deleterious effect on the market." *626 F.2d at 558*. "Otherwise the mere fact that one party bid successfully against another party for a contract would be equivalent to an anticompetitive effect and would raise the specter of an antitrust action being used as a remedy for any tortious conduct during the course of the competition." *Id.* This is precisely the sort of claim Neptun advances.[3] *Accord Nelson v. Monroe Reg'l Med. Ctr., 925 F.2d 1555, 1577 (7th Cir. 1991)*; *Triad Isotopes, 104 F. Supp. 3d at 925*; *see also, e.g., Orson, Inc. v. Miramax Film Corp., 79 F.3d 1358, 1370 (3d Cir. 1996)* ("assertions about improper bidding, without more, lack antitrust significance"); *Car Carriers, 745 F.2d at 1110* ("When stripped to its essential allegations, the complaint does no more than state plaintiffs' commercial disappointment at losing [Ford's] patronage.").

One final matter is worth addressing.[4] In addition to failing to state a rule-of-reason **[*16]** claim, Neptun alleges an "inherently implausible" conspiracy. *Car Carriers, 745 F.2d at 1109*. It claims that Defendants agreed to circumvent competitive bidding procedures and steer business toward a less efficient, more expensive competitor. But it provides no reason whatsoever as to why Defendants would conspire to injure themselves. It does not suggest that GE Lighting was somehow involved in the conspiracy, let alone name it as a defendant. Nor does it allege an iota of upside for Defendants in driving business toward a company that would cost them more money while providing a worse product. The Court "is not required to don blinders[,] ignore commercial reality," and permit such an illogical claim to enter costly antitrust discovery. *Id. at 1110*; *see also Stamatakis Indus., Inc. v. King, 965 F.2d 469, 471-72 (7th Cir. 1992)* ("A theory of liability attributing irrationality to consumers does not get very far.").

CONCLUSION

Neptun has failed to allege an antitrust violation. Indeed, it is "hard to ignore the suspicion that the facts [of this case] have been forced into an antitrust mold to achieve federal jurisdiction." *Car Carriers, 745 F.2d at 1110*. The Court therefore grants Defendants' motion, but will dismiss the Complaint without prejudice. Neptun has until May 7, 2018, to file an amended complaint, **[*17]** if it believes it can articulate a claim consistent with this Opinion and its counsel's *Rule 11* obligations.

[3] Neptun's attempt to render *Havoco* ineffective by limiting its applicability to cases in which there is a single losing party is unavailing. *Havoco's* reasoning did not hinge on the fact that there was one injured plaintiff; as later courts have recognized, *Havoco* applies all the same when there are multiple unsuccessful bidders. *See, e.g., Triad Isotopes, 104 F. Supp. 3d at 925* (*Havoco* foreclosed antitrust claim alleging that "Defendants have reduced competition in the Chicago-area market by preventing legitimate low-cost *bidders* such as Plaintiff from competing equally" for a contract) (emphasis added).

[4] Because the points addressed are dispositive, the Court does not address Defendants' other arguments. *See Expert Masonry, 440 F.3d at 345* (questions of immunities should be considered only after determining whether an antitrust claim has been adequately asserted); *see also, e.g., Alarm Detection Sys., Inc. v. Orland Fire Prot. Dist., 194 F. Supp. 3d 706, 727 n. 8 (N.D. Ill. 2016)*.

Daldumyan v. World Fin. Group Ins. Agency, Inc.

Court of Appeal of California, Second Appellate District, Division Five

April 17, 2018, Opinion Filed

Opinion by: KRIEGLER, Acting P. J.

Opinion

[*] Judge of the Los Angeles Superior Court, assigned by the Chief Justice pursuant to article VI, section 6 of the California Constitution.

Plaintiff and appellant Artak Daldumyan appeals from a judgment following an order sustaining a demurrer as to certain causes of action and an order granting summary judgment as to the remaining causes of action in favor of defendant and respondent World Financial Group Insurance Agency, Inc. (the Insurance Agency). On appeal, Daldumyan contends: (1) the complaint stated causes of action for breach of an implied-in-fact contract, unjust enrichment, fraud, and violation of the unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*), or was capable of amendment to state these causes of action; (2) there are triable issues of fact with respect to his causes of action for promissory estoppel, intentional interference with contract, and intentional interference with prospective **[*2]** economic advantage; and (3) his claims are not barred by the doctrine of claim preclusion based on allegations in the complaint that the Insurance Agency is the alter ego of a marketing company, whose liability was determined in a prior arbitration action.

As to the ruling on the demurrer, we conclude that the complaint does not allege an implied-in-fact contract between Daldumyan and the Insurance Agency for payment of commissions, and it cannot be amended to do so. It also cannot state a quasi-contract claim for restitution, because the benefits received by the Insurance Agency were incidental to Daldumyan's performance of his written contract with the marketing company. The complaint alleged a cause of action for fraudulent concealment of material facts, however, namely that the Insurance Agency was created in August 2005 as a separate entity to collect commissions, with no obligation to pay compensation and without any notice to the agents selling the products. Daldumyan also has alleged a cause of action for violation of the unfair competition law based on an unfair or fraudulent business practice. The judgment must be reversed, and the demurrer to the causes of action for fraud **[*3]** and violation of the unfair competition law overruled.

Summary adjudication of the promissory estoppel cause of action was proper, however, because there was no evidence of any clear promise on behalf of the Insurance Agency or reliance by Daldumyan. The cause of action for intentional interference with prospective economic advantage was also properly adjudicated in favor of the Insurance Agency, because there was no evidence that the Insurance Agency's conduct relating to this claim was independently wrongful. Triable issues of fact exist as to the cause of action for intentional interference with contract, however, and summary adjudication must be denied as to that cause of action.

Daldumyan's surviving causes of action are not barred by the doctrine of claim preclusion, because the Insurance Agency's liability for the claims is not derivative of the liability of the party to the earlier action. The Insurance Agency's liability is based on actions that the Insurance Agency is alleged to have taken or failed to have taken, not because it stands in privity with the marketing company. We reverse the judgment, with directions.

FACTS AND PROCEDURAL BACKGROUND

In 1996, Daldumyan entered into **[*4]** an "Associate Membership Agreement" with World Marketing Alliance, Inc. (the Alliance) to sell insurance products. The Alliance was affiliated with WMA Securities, Inc. Daldumyan signed an acknowledgement stating, "I am or will soon apply to become an insurance agent of the insurance agency World Marketing Alliance and possibly a registered representative of the broker-dealer WMA Securities, Inc. (either or both referred to as [the Alliance])."

Daldumyan became a licensed insurance agent in 1996. As an independent contractor under the contract with Alliance, Daldumyan sold insurance products and recruited additional independent contractors in a hierarchical marketing structure. The contract provided for Daldumyan to receive commissions on the products and services that he sold and on products sold by the "downline" associates in his hierarchy. After Daldumyan obtained his securities license, he entered into a contract with WMA Securities as a registered representative.

In 2001, the insurance and financial services holding company Aegon, N.V., formed the wholly owned subsidiary World Financial Group, Inc. (the Marketing Company). The Marketing Company acquired select assets of the Alliance, **[*5]** including Daldumyan's contract. The Marketing Company is similarly a multi-level marketing organization that enters into contracts with independent contractors primarily to sell insurance products provided by other companies. The Marketing Company offers independent contractor insurance agents a business platform to run independent financial services and insurance businesses. The independent contractors are referred to as associates or agents. The agents may recruit additional individuals. Agents earn commissions on the insurance products that they sell personally and on the sales by agents who are recruited under them in their hierarchy.

Aegon owned or obtained another wholly owned subsidiary, which was renamed the Insurance Agency in 2001. The Insurance Agency holds the license to sell the insurance products that the independent contractor insurance agents sell. The Insurance Agency has distribution agreements with other insurance companies which provide for payment of commissions to the Insurance Agency on sales made by its agents. The Insurance Agency conducts business through the independent contractor agents who have contracted with the Marketing Company. The Marketing Company **[*6]** operates the computer system which computes and pays the insurance commissions earned by the independent contractors on the products sold through the Insurance Agency. For each policy sold, the computer system calculates the amount for each person entitled to a share of the commission.

Aegon also owns Transamerica Financial Advisors, Inc. (Financial Advisors), which is the successor to WMA Securities. Financial Advisors is a registered securities dealer and brokerage regulated by the Securities and Exchange Commission (SEC). Daldumyan became a representative and earned commissions from Financial Advisors. Financial Advisors also uses the Marketing Company to calculate commissions and issue payments to registered representatives in compliance with SEC regulations. There are no contractors recruited and commissions earned for other contractors' sales in this context.

Financial Advisors belongs to a self-regulatory group called the Financial Industry Regulatory Authority (FINRA). FINRA adopted rules governing the conduct of outside business activities and private securities transactions. FINRA members enforce the FINRA rules. Outside business activities and private securities transactions **[*7]** by registered representatives are not entirely prohibited, but the rules require disclosure before engaging in them.

In November 2011, the Marketing Company terminated an associate named Pedram Mehrian, who was below Daldumyan in his hierarchy, based on criminal charges for rape. Daldumyan's contract provided that a terminated associate's hierarchy would "roll up" to Daldumyan, meaning that every associate and registered representative should move one level closer to Daldumyan and increase Daldumyan's commissions. A few days after Mehrian's hierarchy automatically rolled up to Daldumyan, the hierarchy was restructured to allocate Mehrian's hierarchy to his brother, who was a junior associate below Daldumyan. Daldumyan complained to Xuan Nguyen, Kent Davies,[1] and Joseph DiPaolo about the improper transfer of Mehrian's hierarchy to his brother.

In May 2012, Daldumyan's clients told him that they were receiving telephone calls from Financial Advisors, the Marketing Company, and the Insurance Agency. The callers were asking whether Daldumyan had solicited them to invest in various businesses. The same person would call twice, once claiming to be with the Marketing Company and once claiming **[*8]** to be with the Insurance Agency. The Insurance Agency has a compliance department, which included Vice President Kathryn Taylor, Assistant Secretary Stephanie Hosier, and Lauren Hodges. The Insurance Agency's compliance department called all of Daldumyan's active clients and downline associates. Taylor, Hosier, and Hodges are employees of the Marketing Company, but perform work for the Marketing Company and the Insurance Agency. Daldumyan called Taylor about the concerns of his clients and associates. Taylor told him that they were following the regular routine that they conduct in any investigation.

In August 2012, the officers and directors of the Insurance Agency included Paul Mineck, Susan Davies, John Joseph, DiPaola, Leesa Easley, and Janice Curcio. They are also employees of the Marketing Company.

On August 17, 2012, Taylor sent an e-mail to a small number of individuals stating that the Insurance Agency received notification from Financial Advisors that Daldumyan had been terminated for cause. The Insurance Agency recommended that the Marketing Company follow suit based on certain provisions of the associate contract. Taylor explained that a virtual vote was being conducted on **[*9]** Insurance Agency agent Daldumyan and asked the recipients to select either "'[f]ollow suit with [Financial Advisors]' and terminate from the Marketing Company for cause," or "'Allow agent to stay with [the Marketing Company].'" Mineck, Susan, Lilian Palacio and Joseph voted to follow suit with Financial Advisors.

---

[1] More than one participant has the last name Davies, so they will be referred to individually by their first names for clarity.

In August 2012, the Marketing Company terminated Daldumyan's agreement and stopped paying commissions to him.

Arbitration

On March 1, 2013, Daldumyan initiated an arbitration claim against the Marketing Company for several causes of action, including breach of contract, breach of the implied covenant of good faith and fair dealing, promissory estoppel, unjust enrichment, fraudulent inducement and intentional infliction of emotional distress. Daldumyan filed an amended demand increasing his demand from $10 million to $50 million dollars. Two arbitration hearings were held in July 2014.

Allegations of the Complaint in the Instant Case

On August 13, 2014, Daldumyan filed the complaint in the instant case against the Insurance Agency. Daldumyan filed an amended complaint on April 1, 2015, for breach of implied-in-fact contract, intentional interference with contract, intentional interference **[*10]** with prospective economic advantage, unjust enrichment, promissory estoppel, fraud, and violation of *Business and Professions Code section 17200*. In addition to the facts above, the complaint alleged that the Insurance Agency and the Marketing Company are affiliated, meaning they are subsidiaries that are both ultimately owned by Aegon. Prior to August 9, 2005, product providers paid the commissions that were earned by associates directly to the Marketing Company, who paid the associates their portions based on commission schedules. On August 9, 2005, the Insurance Agency registered as an active insurance agent with the California Department of Insurance. The Marketing Company became merely the payment coordinator for the Insurance Agency to process the payment of commissions earned through the sale of insurance products for product providers to associates as directed by the Insurance Agency. The Marketing Company is not an agent authorized to transact insurance business in California. On August 9, 2005, the Insurance Agency and the Marketing Company caused the appointments held by Marketing Company associates to become connected with the Insurance Agency's registration as an active insurance agent without any written notice **[*11]** to the Marketing Company associates. Pursuant to this arrangement, the Marketing Company asserts now that it is simply a paymaster for the Insurance Agency. The Marketing Company associates, including Daldumyan, were "kept in the dark regarding this move."

The Insurance Agency and the Marketing Company are alter egos of one another. They maintain such a unity of interest and ownership that the separate personality of the two corporations no longer exists. They use their purported separate corporate forms to perpetrate fraud, circumvent adjudication of disputes, and accomplish other wrongful and inequitable purposes. Since August 9, 2005, the Insurance Agency has retained a portion of the commissions earned by Daldumyan and continues to retain portions of commissions earned through his business.

The Marketing Company had no basis to terminate Daldumyan's agreement or to stop paying his vested commissions. The Insurance Agency acted in conjunction with the Marketing Company. The Marketing Company claimed to have terminated his contract because Financial Advisors terminated an agreement with him, but the contract did not permit for termination based on a termination of the agreement with **[*12]** Financial Advisors. Furthermore, the Financial Advisors termination was unauthorized and a sham. The Insurance Agency and the Marketing Company sent notices to insurance product providers with whom Daldumyan had appointments stating that he was no longer with the Marketing Company.

A. Implied-in-Fact Contract

Daldumyan's cause of action for breach of implied-in-fact contract additionally alleged that the Insurance Agency has selling agreements with other insurance companies that permit the Insurance Agency and the independent contractors to sell insurance products on behalf of the Insurance Agency. An implied-in-fact contract was formed between the Insurance Agency and Daldumyan on August 9, 2005. The implied contract incorporated certain provisions of Daldumyan's written contract, including paying commissions to Daldumyan (1) arising from the sale of the insurance products of the companies with which Daldumyan had appointments, and (2) arising from his hierarchy of several hundred associates, who were made Insurance Agency agents on August 9, 2005.

The implied contract required the Insurance Agency to pay commissions to Daldumyan for the sale of authorized products and services, income **[*13]** from trails, and income from renewals. Having received the benefit of the selling agreements with the various insurance companies, the Insurance Agency was to pay the commissions earned from the sale of the product providers pursuant to the commission schedules which Insurance Agency published through the Marketing Company's internal website. The Insurance Agency had a further duty to continue paying Daldumyan vested commissions generated by his hierarchy of downline associates, even if he chose to stop making sales. The Insurance Agency also had a duty not to interfere with his appointments with insurance product providers and his effort to sell the products of providers.

Daldumyan fully performed his obligations under the implied-in-fact contract. In August 2012, the Insurance Agency breached the contract by failing to pay Daldumyan commissions of approximately $70,000 that he earned and was owed from his own sales before his termination. Beginning in August 2012, the Insurance Agency breached the contract by failing to pay him commissions, including trail and renewal commissions. The contract was never terminated and there was no basis to terminate the contract. It was not dependent **[*14]** on his contract with Financial Advisors. Insurance Agency also breached the implied covenant of good faith and fair dealing by failing to pay commissions due and owing from direct sales and sales by downline associates without good, just or legitimate cause.

B. Tortious Interference with Contract

Daldumyan alleged with respect to the cause of action for tortious interference with contract that he had a valid contract with the Marketing Company, under which the Marketing Company agreed to pay a percentage of commissions and bonus pools. On August 9, 2005, the Insurance Agency, along with the Marketing Company, caused Daldumyan's appointments to be connected to the Insurance Agency without notification or authorization. The Insurance Agency knew about Daldumyan's contract with the Marketing Company and intended to interfere with it by connecting the appointments to the Insurance Agency. In August 2012, the Insurance Agency interfered with Daldumyan's contract with the Marketing Company by causing the Marketing Company to terminate its contract with Daldumyan without any basis or standing and causing a breach in the contractual relationship.

The Insurance Agency knew Daldumyan had been appointed **[*15]** with multiple insurance product providers on behalf of whom the Insurance Agency is listed as an authorized agent. By working with the Marketing Company to terminate Daldumyan's contract and withhold vested commissions, they also prevented him from selling products for providers and deprived him of future sales, commissions, trails and renewal income. The Insurance Agency and the Marketing Company sent notices to insurance product providers with which Daldumyan had appointments, stating that Daldumyan was no longer with the Marketing Company and forcing the termination of Daldumyan's appointments with multiple product providers. Daldumyan's contracts and appointments with various product providers were terminated, including ING, Allianz Life Insurance Company of North America, Western Reserve Life Assurance Company of Ohio, Transamerica Financial Life Insurance Company, and others. The Insurance Agency's conduct caused interference with Daldumyan's contracts with third party product providers, resulting in millions of dollars in damages.

C. Intentional Interference with Prospective Economic Advantage

With respect to his cause of action for intentional interference with prospective economic **[*16]** advantage, Daldumyan alleged that he built a client base of thousands of customers over 16 years as an associate of the Marketing Company. Around May and June 2012, the Insurance Agency and the Marketing Company contacted Daldumyan's customers in various manners, including telephone calls and letters. The Marketing Company claimed this investigation was conducted by the Insurance Agency, through Marketing Company employees using

Marketing Company resources. Daldumyan began receiving inquiries from his customers, who were concerned about the contacts. The Insurance Agency's conduct was intended to harass Daldumyan and interfere with his business relationships with customers. The interference caused damages in an amount to be proved at trial.

Daldumyan also recruited many associates to join the Marketing Company. By August 2012, he had a hierarchy of 480 "downline" agent associates. Daldumyan had existing business relationships with the associates in his hierarchy and a probability of future economic benefit from these relationships. In May and June 2012, the Insurance Agency and the Marketing Company contacted the downline associates through telephone calls and letters about various **[*17]** subjects under false pretenses. The Marketing Company claimed the investigation was conducted by the Insurance Agency, through Marketing Company employees using Marketing Company resources. The investigations gave the downline associates the impression that Daldumyan had engaged in wrongdoing. Daldumyan began receiving inquiries from concerned associates. The Insurance Agency and the Marketing Company made threats to Daldumyan's family members who were downline associates, including his father. The Insurance Agency's conduct was intended to harass Daldumyan and interfere with his prospective business relationships with the associates and his customers. The interference caused damages in an amount to be proved at trial.

The Insurance Agency further interfered with Daldumyan's existing business relationships with several product providers by working in conjunction with the Marketing Company to wrongfully terminate Daldumyan's contract. The Insurance Agency and the Marketing Company sent notices to the insurance product providers that Daldumyan had appointments with stating that he was no longer with the Marketing Company, forcing the termination of the appointments. As a consequence, **[*18]** Daldumyan was deprived of a future relationship with any of these product providers for at least three years following his termination. Had the Insurance Agency not interfered with Daldumyan's prospective economic advantage, Daldumyan would have continued to generate commissions since August 2012. The interference caused damages in an amount according to proof at trial.

D. Unjust Enrichment

Daldumyan alleged in his cause of action for unjust enrichment that he built his hierarchy and sold insurance products based on the Marketing Company's representations about the business, thereby permitting the Insurance Agency to collect a portion of the commissions generated by the sales. The Insurance Agency had wrongfully withheld payments of Daldumyan's commissions since August 2012, and failed to pay the commissions to him, so the Insurance Agency has been unjustly enriched by the benefit conferred upon it by Daldumyan in an amount to be determined at trial.

E. Promissory Estoppel

The cause of action for promissory estoppel alleged that to induce Daldumyan to sell products and grow his hierarchy of associates, the Marketing Company held itself out as a multi-level marketing company that offered **[*19]** a business platform to individuals seeking to run an independent financial services and insurance business. In reliance on these continued representations, Daldumyan dedicated time and money to build a business, under the belief that he was building his own independent business. The Insurance Agency uses Marketing Company employees to make representations through the Marketing Company, since the Insurance Agency does not have its own employees. The Insurance Agency is the entity allowed under California law to collect and pay commissions on the sale of insurance products. The Insurance Agency, through the Marketing Company, makes representations to its agents that the insurance business they are building is their own business in which they can become vested and continue to earn commissions from their sales and the commissions generated by their hierarchy even after they retire. After an agent retires, the Marketing Company claims it has sole discretion to terminate and divest associates of their own business and stop paying commissions. The Marketing Company steps into the shoes of the Insurance Agency when it discusses payment of commissions, appointments with product providers and **[*20]** communicating with associates, because the Insurance Agency does not have separate employees. Daldumyan relied on clear and unambiguous promises to dedicate 16 years to the Marketing

Company and affiliated companies, including the Insurance Agency. He was injured and suffered damages in an amount according to proof.

F. Fraud

Daldumyan alleged fraud in the creation of a scheme by the Insurance Agency and the Marketing Company. The Marketing Company uses the Insurance Agency to transact insurance business in the state of California without the Marketing Company having the proper licenses or being admitted as an authorized agent. To induce Daldumyan to sell the products of providers and to recruit a hierarchy of associates for the Insurance Agency, the Marketing Company held itself out as a multi-level marketing company that offers a business platform to individuals seeking to run an independent financial services and insurance business. In reliance on these representations, Daldumyan and other associates dedicated time and money to build a business and recruit associates, in order to collect commissions from their own sales and their associates' sales, under the belief that they were building **[*21]** their own independent business.

Since August 9, 2005, the Insurance Agency has been comprised of officers and directors who are also officers and directors of the Marketing Company. The Insurance Agency does not have its own employees. The Insurance Agency uses employees of the Marketing Company to make representations through the Marketing Company. The Insurance Agency is the entity that has the ability to collect and pay commissions based on the sale of insurance products as a licensed insurance agent in California. The Insurance Agency through the Marketing Company continually makes representations to its agents that the insurance business they are building is their own business in which they can become vested and earn commissions even after they retire. Then, the Marketing Company later claims it has sole discretion to terminate and divest associates of their own business and stop paying commissions.

The Insurance Agency intentionally leads associates to believe it is a department within the Marketing Company. Associates, including Daldumyan, are shocked to discover the Insurance Agency purports to be a separate entity on which they are dependent to receive payment of commissions, **[*22]** but with which they do not have a written contract. The Marketing Company employees cannot distinguish between the companies. The Insurance Agency concealed its intent to rely on a separate corporate existence from the Marketing Company in order to deprive Daldumyan of commissions due and owing to him, including vested commissions, and put up further legal road blocks to Daldumyan's attempts to seek judicial redress. The Insurance Agency and the Marketing Company knew the representations made to Daldumyan were false when they were made and they made the representations recklessly with disregard for the truth. Daldumyan's reliance was reasonable, and as a proximate result of the Insurance Agency's conduct, Daldumyan has been damaged in an amount according to proof at trial.

G. Unfair Competition

In Daldumyan's claim for violation of the unfair competition law, he alleged the Insurance Agency and the Marketing Company maintained such a unity of interest and ownership that the separate personalities of the two corporations no longer exist. They behaved in a manner inconsistent with the separate corporate existence of the two entities. They used their purported separate corporate forms to **[*23]** perpetrate fraud, circumvent adjudication of disputes, and accomplish other wrongful and inequitable purposes.

An agent must be licensed by the Department of Insurance to transact insurance business in California. The Marketing Company is not authorized to transact insurance business in California. The Insurance Agency and the Marketing Company have created an unlawful and fraudulent scheme through which the Marketing Company uses the Insurance Agency to transact insurance business in California without the proper licenses. The Marketing Company associates who are licensed by the Department of Insurance are designated by the Marketing Company and the Insurance Agency as authorized agents of the Insurance Agency without the consent of the associates.

The Insurance Agency retains a percentage of commissions generated by associates of the Marketing Company, who are licensed agents and sell products. The associates are required by contract to litigate disputes with the

Marketing Company in arbitration before the American Arbitration Association (AAA) pursuant to Georgia law. The Insurance Agency does not maintain written contracts with associates, so there is no forum selection for disputes **[*24]** between associates and the Insurance Agency. The Marketing Company and associates who are registered representatives of Financial Advisors are required by FINRA to arbitrate disputes between themselves and Financial Advisors through FINRA arbitration. The Insurance Agency, the Marketing Company, and their affiliated entities use their corporate forms to erect legal road blocks to associates seeking judicial redress of their wrongful conduct. The Insurance Agency, along with the Marketing Company, are structured so aggrieved associates do not have an appropriate forum to seek legal redress, because the Insurance Agency and the Marketing Company have defenses they raise in each forum. This conduct by the Insurance Agency is intended to deceive associates and is fraudulent and unfair. The Insurance Agency will continue to engage in these unlawful, unfair and fraudulent practices, and therefore, should be enjoined from engaging in such conduct.

Daldumyan sought an amount of damages to be determined at trial, injunctive and declaratory relief, punitive damages, and an order of costs and attorney fees.

Demurrer to Amended Complaint

The Insurance Agency filed a demurrer to the amended complaint **[*25]** in May 2015. The Insurance Agency argued in the demurrer that the complaint failed to state a cause of action for breach of contract because Daldumyan could not have both an express contract and an implied contract governing the obligation to pay him commissions on sales. The fraud claim did not allege a false representation attributable to the Insurance Agency, and the promissory estoppel claim was duplicative of the fraud claim. Daldumyan had not stated an unfair competition claim, because he had not alleged an independent, actionable wrong.

Daldumyan opposed the demurrer, and the Insurance Agency filed a reply. A hearing was held on June 2, 2015. Daldumyan argued with respect to the cause of action for fraud that the Insurance Agency had a duty to disclose the new entities were being formed, the Insurance Agency was directing that commissions be paid, and the Marking Company was the entity making payments to agents. As to the unfair competition claim, the trial court stated that the Marketing Company's violation of insurance law by selling insurance when the Insurance Agency held the license did not cause damages to Daldumyan. His termination and lost commissions did not result from **[*26]** the Marketing Company practicing without a license. The trial court acknowledged that Daldumyan was not relying on alter ego allegations to establish liability for the causes of action for intentional interference with contract, intentional interference with prospective economic advantage, and promissory estoppel.

The trial court sustained the demurrer without leave to amend as to the causes of action for breach of contract, unjust enrichment, fraud, and violation of *Business and Professions Code section 17200*. The court overruled the demurrer as to the causes of action for intentional interference with contract, intentional interference with prospective economic advantage, and promissory estoppel.

Arbitration Award

On May 28, 2015, following two additional days of arbitration hearings and briefing, the arbitrators issued an award in favor of Daldumyan on causes of action for breach of contract and breach of the implied covenant of good faith and fair dealing. The arbitration award contained the following findings:

Daldumyan's contract provided that the Alliance had contractual relationships with certain companies "(collectively, the 'Preferred Companies', or individually, a 'Preferred Company')" which authorized the Alliance or **[*27]** its members to sell various products and to designate Alliance members for appointment with the Preferred Companies as independent sales representatives with respect to their products and services. The termination provisions of Daldumyan's contract allowed the Alliance to terminate the agreement for cause, which included "any breach of the Associate's contract(s) with any of the Preferred Companies."

On August 12, 2012, Financial Advisors terminated Daldumyan's contract to sell securities after concluding that Daldumyan failed to timely disclose outside business activities and private securities transactions. The contract between Financial Advisors and Daldumyan was not within the scope of the arbitration clause, and Financial Advisors was not a party to the arbitration.

On August 20, 2012, the Marketing Company terminated its contract with Daldumyan, because Financial Advisors had terminated him as a registered securities representative. The Marketing Company divested him of commissions which had been vested as of the time of his termination based on the sales level he had attained in the hierarchy. The commission stream from a contractor who was terminated for committing a felony was **[*28]** transferred to another contractor downline from Daldumyan, rather than to Daldumyan.

The arbitrators found that Financial Advisors was not a product provider and was not considered a Preferred Company under the contract between the Marketing Company and Daldumyan. Since Financial Advisors was not a Preferred Company, any breach of Daldumyan's contract with Financial Advisors did not constitute a cause for termination under the agreement with the Marketing Company. The Marketing Company could not rely on Financial Advisors' termination of Daldumyan to terminate him from the Marketing Company. The arbitrators found the Marketing Company had no contractual right to terminate the contract with Daldumyan, divest him of his commissions and bonuses (past, present and future), or transfer the commission stream from the terminated contractor to a downline contractor.

The arbitrators also found that the Marketing Company breached its covenant of good faith and fair dealing with Daldumyan by transferring the commission stream improperly, terminating him and divesting him of his contractual rights. The record established that the acts were done to deprive him of the benefits of the contract and **[*29]** not in good faith. No additional damages were being assessed for this cause of action, however, because the damages awarded covered all allowable causes of action. The arbitrators concluded that there was insufficient evidence to find in favor of Daldumyan on the remaining causes of action for promissory estoppel, fraudulent inducement, unjust enrichment, and intentional infliction of emotional distress.

Daldumyan had sought as damages: (1) the loss of commissions earned on products sold by himself or members of his hierarchy prior to his termination; (2) the loss of commissions vested to him prior to his termination; (3) consequential economic damages; (4) attorney fees and costs; (5) punitive damages; and pre- and post-judgment interest.

The arbitrators concluded a reasonable assumption for Daldumyan's working life was 23 years based on his age, health and the nature of the work. The panel selected the model of damages provided by the Marketing Company which reflected their finding that both the termination and the transfer of commissions were improper. The panel concluded the Marketing Company's conduct did not warrant an award of punitive damages and denied Daldumyan's request for **[*30]** punitive damages.

After further proceedings to establish attorney fees and costs, the arbitrators awarded Daldumyan damages of $5,241,273.35, legal fees of $703,575, and costs of $72,855.86, plus post-award interest. In addition, the arbitrators ordered their fees, as well as the administrative expenses of the dispute resolution organization, to be paid by the Marketing Company. The Marketing Company was required to reimburse Daldumyan for the arbitration fees and expenses that he had paid of $115,946.80.

The sole dissenting member of the arbitration panel would have found any company contracting with the Marketing Company to be a Preferred Company under the associate contract, including Financial Advisors, and would have awarded substantially reduced damages in favor of Daldumyan. The Marketing Company filed a motion in federal court to vacate the arbitration award, which was denied. Daldumyan filed a motion to confirm the award in federal court, which the Marketing Company did not oppose. The federal court confirmed the arbitration award on November 23, 2015. On December 14, 2015, Daldumyan acknowledged that the Marketing Company had satisfied the judgment.

Motion for Summary Judgment [*31] and Supporting Evidence

In January 2016, the Insurance Agency filed a motion for summary judgment, or in the alternative summary adjudication, as to the remaining causes of action. The Insurance Agency argued that the claims that survived demurrer were barred by the doctrine of res judicata, because the complaint alleged the Insurance Agency was the alter ego of the Marketing Company. Daldumyan had already litigated his causes of action against the Marketing Company in the arbitration action. The arbitration ruling set a ceiling for recovery against any alter ego. The issue of his lost commission income had been determined, which was identical to the harm alleged in the instant action. Where the judgment has been fully satisfied, res judicata bars subsequent suit. In addition, the Insurance Agency argued that the alter ego allegation established it was in privity with the Marketing Company. Daldumyan could have raised his causes of action in the arbitration, which involve the same factual nucleus, because a nonsignatory can be compelled to arbitrate if sued as an alter ego.

In addition, the Insurance Agency argued that the promissory estoppel cause of action was based on four alleged **[*32]** promises: (1) Daldumyan would be paid commissions on sales of insurance products; (2) he would be paid commissions on sales of insurance products by downline associates in his hierarchy; (3) he would become vested in his commissions; and (4) he was building his own independent business. The promises alleged as the basis for promissory estoppel were made by the Marketing Company. No promise had been identified as having been made by the Insurance Agency. There also could be no promissory estoppel when a valid contract existed governing the subject matter.

Daldumyan did not identify independently wrongful conduct as the basis for his intentional interference with prospective economic advantage. He also did not allege specific economic relationships that offered a probability of future economic benefit.

Daldumyan could not rely on conduct by employees of the Marketing Company, through the alter ego allegation, to allege interference with contract, because the Marketing Company could not interfere with its own contract. A true statement to Daldumyan's insurance product providers that he was no longer with the Marketing Company could not serve as the basis for intentional interference either. **[*33]** Although the Insurance Agency's agreements with the product providers required the providers to terminate Daldumyan, the existence of the contracts was not actionable and there was no evidence that the Insurance Agency exercised its rights under those contracts.

The Insurance Agency submitted the declaration of its officer Paul Mineck in support of its motion for summary judgment. Mineck declared that he is an officer and Vice President of the Insurance Agency. He is also Senior Vice President and Chief Marketing Officer of the Marketing Company. He is an independent contractor with respect to Financial Advisors. In August 2012, the president and a vice president of Financial Advisors told him that Daldumyan's conduct with respect to undisclosed business activities, including his apparent conduct in connection with an Armenian timeshare project, appeared to violate FINRA's disclosure rules. Mineck understood that a violation of FINRA's rules would constitute a breach of a registered representative's contract with Financial Advisors. Their statements caused Mineck to wonder if the Marketing Company should terminate its business relationship with Daldumyan.

Financial Advisors held a meeting **[*34]** in August 2012 as part of its investigation to determine whether Daldumyan violated FINRA disclosure rules. Mineck participated in the meeting at the invitation of Financial Advisors as a representative of the Marketing Company. Mineck found Daldumyan's answers to questions to be evasive and not credible. Because the meeting focused on the securities aspect of Daldumyan's business, the Insurance Agency did not request to participate in the meeting.

Two days after Financial Advisors' termination of Daldumyan, the Marketing Company obtained a uniform termination notice for the securities industry stating that Financial Advisors had terminated Daldumyan for violating FINRA disclosure rules regarding outside business activities and private securities transactions. On August 17, 2012, Kathryn Taylor, an employee of the Marketing Company, requested that Mineck and several other employees of the Marketing Company vote on whether to terminate Daldumyan's contract based on Financial Advisors' termination. Taylor circulated the form from Financial Advisors with her request. The group unanimously voted to terminate the contract. On August 20, 2012, the Marketing Company provided notice to Daldumyan **[*35]** that his contract had been terminated for cause. The Marketing Company also provided this notice to other companies, including Transamerica Premier Life Insurance Company.

The Insurance Agency also submitted a request to take judicial notice of the arbitration award and Daldumyan's acknowledgement of payment of the judgment, in addition to a declaration from attorney Kirk Hornbeck.

Opposition to the Motion for Summary Judgment and Supporting Evidence

Daldumyan opposed the motion for summary judgment. He argued that claim preclusion did not apply, because the arbitration did not involve the same parties. The Insurance Agency had expressly asserted that the AAA did not have jurisdiction over it or the subject matter in Daldumyan's subpoena for records. He argued that the Insurance Agency and the Marketing Company relied on their separate legal existence in the arbitration and should not be able to bar claims against the Insurance Agency now, based on the allegations of alter ego liability. The purpose of the alter ego doctrine is to prevent misuse of the corporate laws and requires a finding of fact. The judgment against the Marketing Company was not for damages caused by the Insurance **[*36]** Agency. Daldumyan's recovery in the arbitration was for the Marketing Company's conduct and no determination had been made that the Insurance Agency was its alter ego.

Daldumyan noted that his claims against the Insurance Agency allow recovery of additional damages that are not limited to contract damages. For the torts of interference with contract or prospective economic advantage, he is entitled to compensation for all the detriment proximately caused by the tort, including unforeseen expenses, emotional suffering, damages to reputation, and punitive damages where the interference was done with malice.

Daldumyan pointed out that the Insurance Agency did not exist in 1996 when he entered into his contract with the Alliance and agreed to arbitrate any disputes. In the arbitration proceedings, the Marketing Company was uncooperative, refused to produce documents pertaining to commission payments that were relevant for calculating damages, and later produced information in a meaningless form, insisting it could not provide the information in a relevant form. Documents prepared by the marketing department showed Daldumyan's damages were many times the amount of the arbitration award, but **[*37]** the discovery was provided too late and the arbitration panel relied on the Marketing Company's calculation of damages. The information pertaining to commissions was in the Insurance Agency's control as the entity contracting with product providers.

With respect to promissory estoppel, Daldumyan argued that Insurance Agency executives and/or board members made representations pertaining to the compensation that Insurance Agency agents would earn from the sale of insurance products. The same individuals represented on behalf of the Insurance Agency that Daldumyan was building his own insurance agency, which entitled him to vested commissions from his own sales and from sales of other agents. Since the Marketing Company is not a licensed insurance agency and does not have contracts with product providers, the Marketing Company cannot have insurance agents. The representations had to have been made regarding the Insurance Agency compensating its agents to induce reliance by the agents.

On the issue of intentional interference with prospective economic advantage, Daldumyan argued the Insurance Agency violated the principal's duty to deal with an agent fairly and in good faith by conspiring **[*38]** with Financial Advisors and the Marketing Company to terminate his contracts with those companies. There were triable issues of fact to establish his expectation that he could continue to generate commissions from sales to his client base.

There were also triable issues of material fact as to his cause of action for intentional interference with contract. The Insurance Agency was aware that he had contracts with the Marketing Company and product providers. The Insurance Agency intentionally acted to induce the breach or disruption of those contracts, causing damages. Taylor is employed by the Marketing Company, but performs duties for the Marketing Company and the Insurance Agency. She worked as the compliance supervisor of the Insurance Agency's compliance department. She opened an investigation pertaining to Daldumyan on behalf of the Insurance Agency. Hodges, an Insurance Agency compliance specialist, participated in the investigation. The Insurance Agency's investigation file contained handwritten notes showing the Insurance Agency's attempt to find any purported violation to attribute to Daldumyan in order to terminate his relationship with the Marketing Company, Financial Advisors, **[*39]** and the product providers. Mineck voted with others to terminate Daldumyan's contract with Financial Advisors, although he did not work for Financial Advisors and conceded that there was no evidence of any violation of FINRA rules. Mineck and other Insurance Agency executives voted to terminate Daldumyan's contract with the Marketing Company. On August 17, 2012, the Insurance Agency notified Daldumyan that the contract with the Marketing Company was terminated.

In addition to compensatory damages in the form of lost income, Daldumyan sought punitive damages against the Insurance Agency for interference with Daldumyan's relationships with his customers.

Daldumyan submitted his own interrogatory responses in which he alleged detailed promises had been made by the Insurance Agency, by the Marketing Company acting on behalf of the Insurance Agency, or by the Marketing Company as the alter ego of the Insurance Agency. Daldumyan noted that the Insurance Agency and the Marketing Company had been evasive regarding what capacities individuals worked in when they performed certain functions. Both companies had promised to pay commissions on the sale of products through documentation provided by **[*40]** the Insurance Agency's employees. At every annual convention, key executives of the Insurance Agency and the Marketing Company, including Kent and Susan Davies, Mineck, DiPaolo, Joseph, and others represented to Daldumyan and other independent contractor agents that they would continue to earn commissions on insurance products they sold as insurance agents. These individuals also made promises on behalf of the Insurance Agency that Daldumyan, as an agent, would continue to earn commissions from the sale of products by his hierarchy. They represented on behalf of the Insurance Agency that he was building his own independent business which entitled him to commissions from his own sales and his hierarchy, and he was vested in these commissions. Daldumyan concluded that the representations were made on behalf of the Insurance Agency, because the Marketing Company cannot have independent contractor insurance agent and does not have contractual relationships with product providers to pay commissions. Daldumyan provided specific details from several convention presentations about the value for agents of the Insurance Agency in building their own agencies.

Daldumyan submitted his own declaration **[*41]** and the declaration of his attorney Sylvia Sultanyan. Daldumyan provided the Insurance Agency's responses to interrogatories in support of his opposition as well. In particular, the Insurance Agency responded that it delegated its obligation to pay commissions on the sale of any insurance products made by independent contractor insurance agents to the Marketing Company, which functioned as the Insurance Agency's "paymaster." Daldumyan had agreed to the arrangement by entering into the contract with the Alliance, which the Marketing Company acquired as an asset acquisition in 2001. Daldumyan, the Marketing Company, and the person most qualified at the Insurance Agency would know that agents of the Insurance Agency are paid exclusively by the Marketing Company. The Insurance Agency and the Marketing Company have a servicing arrangement pursuant to which the Marketing Company functions as the paymaster for the Insurance Agency, among other things, in exchange for a monthly expense allocation. In this manner, the Insurance Agency delegated its obligation to pay commissions on the sale of insurance products to the Marketing Company. The Insurance Agency has never paid Daldumyan any commissions. **[*42]** The selling agreements that the Insurance Agency has with insurance carriers entitled the Insurance Agency to commissions on any sales of insurance products that Daldumyan made through the Insurance Agency. The Insurance Agency has not paid any portion of commissions retained from the sale of insurance products to the Marketing Company. The Insurance Agency derives 99 percent of its revenues from commissions on the sale of insurance products and the remainder is from intercompany interest booked to the Insurance Agency. The Insurance Agency does not maintain hierarchies, which is exclusively a function of the Marketing Company's multi-level marketing platform.

Daldumyan also provided the Insurance Agency's discovery admissions. The Insurance Agency admitted that the individuals who work for the Insurance Agency do not work exclusively for the Insurance Agency. Pursuant to a servicing arrangement between the Insurance Agency and the Marketing Company, certain Marketing Company employees perform certain compliance-related, licensing, and/or other functions on behalf of the Insurance Agency in exchange for an expense allocation.

The Insurance Agency did not admit that it was the alter ego **[*43]** of the Marketing Company. It responded that the Insurance Agency and the Marketing Company are affiliates, not alter egos. They qualify as affiliates because they are independent subsidiaries under the common control of Aegon, but they are separate legal entities that operate as separate entities under the direction and control of different groups of officers and directors.

The Insurance Agency admitted that it receives commission income from insurance product providers based on the sales of insurance products by independent contractor insurance agents and that it has no obligation to pay the independent contractor agents a portion of the commissions arising from their sales. The Insurance Agency would not admit that it had an obligation to pay independent contractor agents a portion of the commissions arising from their sale of insurance products. The Insurance Agency also would not admit that it directs the Marketing Company to pay the independent contractor agents a portion of the commissions arising from their sales of insurance products or from the sales of their hierarchy of independent contractor agents. The Insurance Agency would not admit that it retained a portion of the commissions **[*44]** generated from the independent contractor agents' sales of insurance products.

The Insurance Agency admitted that it permitted Daldumyan to sell the insurance products of product providers with whom the Insurance Agency had selling agreements, in that Daldumyan was "piggybacking" on the Insurance Agency's relationships with the product providers as a sub-agent, but the right to collect the commissions generated from Daldumyan's sales belonged to the Insurance Agency alone.

The Insurance Agency admitted that it does not issue paychecks or any type of compensation to the Marketing Company employees who perform services for the Insurance Agency. Instead, the Marketing Company provides an expense allocation to the Insurance Agency in the form of a monthly journal entry, to compensate the Marketing Company and the Marketing Company employees who perform those services.

Daldumyan submitted copies of letters that he received from product providers stating they received requests to terminate his distribution channel contracts or stating that they were terminating his agreement due to a notification that he was no longer with the Marketing Company.

Daldumyan submitted the minutes of a committee **[*45]** meeting called by Taylor, which seem to be minutes of an Insurance Agency committee meeting. The voting members listed are Mineck, Joseph, Davies, and Lilian Palacio. Non-voting members listed who attended the meeting are DiPaola, Easley, Taylor, Suzanne Imbrogno, Tim Smith, Hosier, and Hodges. The minutes state that the Insurance Agency "will be on a stand still" until Daldumyan's termination notice from Financial Advisors is submitted. Easley asked if termination for cause on the broker-dealer side automatically led to termination on the agency side. Following an unrecorded discussion, Joseph stated that they would have a virtual vote after Financial Advisors had officially terminated Daldumyan, and he instructed that no information should be given unless someone requested it.

Daldumyan submitted copies of the virtual votes. He submitted a "WFG Compliance Complaint Log." A complaint or issue was raised by Kent and received by reviewers Hosier and Hodges on June 6, 2012. The log stated that the investigation information was provided to Financial Advisors because Daldumyan was approved with them. Financial Advisors determined that Daldumyan had participated in unapproved outside business **[*46]** activities, unapproved private securities transactions, and unapproved personal investments, so they terminated him for cause. The log stated, "Following suit, [the Insurance Agency] sent out a virtual vote and decided to terminate agent for cause of being terminated from [Financial Advisors]."

Daldumyan also submitted the Insurance Agency's written objections to his subpoena in the arbitration matter, including "because the AAA does not have the authority to compel the overbroad pre-hearing document production sought by the Subpoena of a non-party."

He submitted Kent's deposition testimony. Kent did not understand the technical connection between the Marketing Company and the Insurance Agency. As far as he understood, Taylor was the Director of the Insurance Agency Compliance and Hodges worked for the Insurance Agency in the same department. He was notified by the

Insurance Agency that Daldumyan was terminated. The Marketing Company did no investigation in connection with the termination of Daldumyan.

Daldumyan submitted Hodges's deposition testimony as well. Hodges stated that she is a Compliance Analyst for the Marketing Company and the Insurance Agency, but she is paid by the Marketing **[*47]** Company. Hodges made several specific handwritten notes, but has no recollection about where she obtained the information and only recalls speaking with Taylor about Daldumyan's investigation.

Daldumyan submitted portions of the reporter's transcript from the arbitration hearings. A witness testified in the arbitration that the Marketing Company does not have a compliance department. The employees for the Marketing Company are used in connection with the Insurance Agency in a compliance capacity on behalf of the Insurance Agency. Taylor and Hodges are employees of the Marketing Company, but their primary function is the duties that they perform on behalf of the Insurance Agency's compliance department. They are also involved in agency relations for the Marketing Company, which is conflict resolution between hierarchies. The hierarchies are a construct of the Marketing Company. Taylor and Hodges performed functions on behalf of the Insurance Agency as Marketing Company employees. The Insurance Agency does not have a payroll or a list of employees. Those functions are fulfilled by employees of the Marketing Company.

Daldumyan provided the deposition testimony of Janice Curcio, who was **[*48]** the person most qualified to testify for the Insurance Agency. The agents do not have their own contracts with product providers. Instead, they are listed with the product providers as sub-agents under the Insurance Agency. A conversation between Mehrian's brother and Kent in 2012 started the investigation into Daldumyan. The Insurance Agency's compliance department, specifically Taylor, and Financial Advisors' compliance department ran the investigation pertaining to Daldumyan. The concerns about Daldumyan's outside business activities related to a bank and a resort. Agents with knowledge of the outside business activities were brought to the Insurance Agency compliance department for interviews. Outside business activities are not prohibited for an insurance agent. Outside business activities are relevant to registered representatives of a broker-dealer, but the Insurance Agency is not a broker-dealer. The Insurance Agency's investigation into Daldumyan's outside business activities was part of the Insurance Agency's investigation file, because the Insurance Agency and Financial Advisors worked the cases at the same time and shared information.

Curcio explained that the practice was **[*49]** for the Insurance Agency to notify the product providers that the agent was appointed, and the Insurance Agency would keep the records.

Daldumyan provided the Marketing Company's interrogatory responses in the arbitration proceedings. The Marketing Company identified all persons with knowledge of the investigation suggesting Daldumyan violated FINRA rules and breached his Financial Advisors agreement to be Mineck, Joseph, Susan, Palacio, Taylor and Hosier. The Marketing Company has no selling agreements with insurance companies or mutual fund companies. The Marketing Company's function is to process commission payments received by either Financial Advisors or the Insurance Agency for payment to Marketing Company associates who are properly licensed, registered and appointed registered representatives of Financial Advisors, or properly licensed, appointed agents of the Insurance Agency.

Reply and Trial Court Ruling

The Insurance Agency filed a reply. A hearing was held on July 22, 2016. The trial court found privity existed between the Insurance Agency and the Marketing Company based on the allegations of the complaint that the Insurance Agency was the alter ego of the Marketing Company. **[*50]** There was no evidence that any employee of the Insurance Agency was separate from an employee of the company in arbitration. The gravamen of the complaint was that the Marketing Company terminated the written agreement and is liable to Daldumyan for vested commissions. Daldumyan stated that he was not seeking a double recovery. The trial court granted the motion for summary judgment on the ground that Daldumyan's recovery in the arbitration action covered the claims that had been asserted against the Insurance Agency or could have been asserted in the arbitration, even though the defendant at arbitration was the Marketing Company. The trial court entered judgment in favor of the Insurance Agency on August 5, 2016. Daldumyan filed a timely notice of appeal.

DISCUSSION

Demurrer

A. Standard of Review

"On appeal from a judgment dismissing an action after sustaining a demurrer without leave to amend, the standard of review is well settled. We give the complaint a reasonable interpretation, reading it as a whole and its parts in their context. [Citation.] Further, we treat the demurrer as admitting all material facts properly pleaded, but do not assume the truth of contentions, deductions or **[*51]** conclusions of law. [Citations.] When a demurrer is sustained, we determine whether the complaint states facts sufficient to constitute a cause of action." (*City of Dinuba v. County of Tulare (2007) 41 Cal.4th 859, 865, 62 Cal. Rptr. 3d 614, 161 P.3d 1168* (*Dinuba*).)

When a demurrer is sustained without leave to amend, we determine "whether there is a reasonable possibility that the defect can be cured by amendment: if it can be, the trial court has abused its discretion and we reverse." (*Dinuba, supra, 41 Cal.4th at p. 865*; *Doe v. United States Youth Soccer Assn., Inc. (2017) 8 Cal.App.5th 1118, 1122, 214 Cal. Rptr. 3d 552*.)

B. Implied-in-Fact Contract

Daldumyan contends the allegations of the complaint were sufficient to state a cause of action for breach of an implied-in-fact contract between the Insurance Agency and himself, or they could be amended to do so. We disagree.

An implied contract is one where the existence and terms of the agreement are manifested by the parties' conduct. (*Civ. Code, § 1621*.) In order to plead a cause of action for implied contract, "the facts from which the promise is implied must be alleged." (*Youngman v. Nevada Irrigation Dist. (1969) 70 Cal.2d 240, 247, 74 Cal. Rptr. 398, 449 P.2d 462*.) "Like an express contract, an implied-in-fact contract requires an ascertained agreement of the parties. (*Silva v. Providence Hospital of Oakland (1939) 14 Cal.2d 762, 773, 97 P.2d 798*; 1 Witkin, Summary of Cal. Law (10th ed. 2005) Contracts, § 102, p. 144.)" (*Unilab Corp. v. Angeles-IPA (2016) 244 Cal.App.4th 622, 636, 198 Cal. Rptr. 3d 211*.)

The allegations of the complaint show there was no agreement between the Insurance Agency and Daldumyan for the Insurance Agency **[*52]** to make payments to Daldumyan. Daldumyan had a written contract to receive certain commissions from the Marketing Company in exchange for his performance under the associate contract. There is no allegation that he ever received payments from the Insurance Agency or expected to receive payments from the Insurance Agency. He was not even aware that the Insurance Agency had connected his appointment to the Insurance Agency's registration with the Department of Insurance. The Insurance Agency never made any payment to Daldumyan, so it did not establish any contract to make payments through its course of conduct. The Insurance Agency had selling agreements with insurance product providers that required the providers to pay amounts to the Insurance Agency based on products and services that the agents sold, but the agreements did not require the Insurance Agency to pay any amount to the agents. If the Marketing Company failed to pay Daldumyan the amounts that he was entitled to receive under his associate contract with the Marketing Company, the Insurance Agency had no separate or independent obligation to pay him those amounts based on an implied contract. The complaint fails to allege **[*53]** an implied contract for payment by the Insurance Agency, and Daldumyan has not shown that the complaint could be amended to allege an implied contract between these parties. Since the allegations and the briefs concern a contract for the payment of commissions, we do not consider whether an implied contract arose for any other purpose as a result of the Insurance Agency's conduct.

C. Quasi-Contract (Unjust Enrichment)

Daldumyan contends that the complaint alleges a cause of action for unjust enrichment, which is considered to be a quasi-contract claim for restitution. We disagree.

"'The right to restitution or quasi-contractual recovery is based upon unjust enrichment. Where one obtains a benefit which he may not justly retain, he is unjustly enriched. The quasi-contract, or contract "implied in law," is an obligation created by the law without regard to the intention of the parties, and is designed to restore the aggrieved party to his former position by return of the thing or its equivalent in money. [Citations.] [¶] However, "[t]he mere fact that a person benefits another is not of itself sufficient to require the other to make restitution therefor."' (1 Witkin, Summary of Cal. Law (9th **[*54]** ed. 1987) Contracts, § 91, pp. 122-123.) Thus, '[e]ven when a person has received a benefit from another, he is required to make restitution "only if the circumstances of its receipt or retention are such that, as between the two persons, it is unjust for him to retain it."' (*Ghirardo v. Antonioli (1996) 14 Cal.4th 39, 51, 57 Cal. Rptr. 2d 687, 924 P.2d 996*; accord, *First Nationwide Savings v. Perry (1992) 11 Cal.App.4th 1657, 1663, 15 Cal. Rptr. 2d 173*.)" (*California Medical Assn. v. Aetna U.S. Healthcare of California, Inc. (2001) 94 Cal.App.4th 151, 171, fn. 23, 114 Cal. Rptr. 2d 109*, italics omitted (*California Medical*).) "Ordinarily, restitution is required only if '"the benefits were conferred by mistake, fraud, coercion or request."' [Citation.]" (*Prakashpalan v. Engstrom, Lipscomb & Lack (2014) 223 Cal.App.4th 1105, 1132, 167 Cal. Rptr. 3d 832* (*Prakashpalan*).)

"[A] quasi-contract action for unjust enrichment does not lie where, as here, express binding agreements exist and define the parties' rights. (Cf. *Eisenberg v. Alameda Newspapers, Inc. (1999) 74 Cal.App.4th 1359, 1387, 88 Cal. Rptr. 2d 802*; *Lance Camper Manufacturing Corp. v. Republic Indemnity Co. (1996) 44 Cal.App.4th 194, 203, 51 Cal. Rptr. 2d 622*; *Hedging Concepts, Inc. v. First Alliance Mortgage Co. (1996) 41 Cal.App.4th 1410, 1419-1420, 49 Cal. Rptr. 2d 191*.) 'When parties have an actual contract covering a subject, a court cannot—not even under the guise of equity jurisprudence—substitute the court's own concepts of fairness regarding that subject in place of the parties' own contract.' (*Hedging Concepts, Inc., at p. 1420*.)" (*California Medical, supra, 94 Cal.App.4th at p. 172*, fns. omitted.)

"In *Hedging Concepts*[*, supra*,] *41 Cal.App.4th 1410, 49 Cal. Rptr. 2d 191*, the appellate court stated: 'A quantum meruit or quasi-contractual recovery rests upon the equitable theory that a contract to pay for services rendered is implied by law for reasons of justice. [Citations.] However, it is well settled that there is no equitable basis for an implied-in-law **[*55]** promise to pay reasonable value when the parties have an actual agreement covering compensation.' (*Id. at p. 1419*.) The appellate court also stated: 'Quantum meruit is an equitable theory which supplies, by implication and in furtherance of equity, implicitly missing contractual terms. Contractual terms regarding a subject are not implicitly missing when the parties have agreed on express terms regarding that subject. A quantum meruit analysis cannot supply "missing" terms that are not missing. "The reason for the rule is simply that where the parties have freely, fairly and voluntarily bargained for certain benefits in exchange for undertaking certain obligations, it would be inequitable to imply a different liability . . . ."' (*Ibid.*)" (*California Medical, supra, 94 Cal.App.4th at p.172, fn. 27*.)

In *California Medical*, defendant insurance company Aetna collected premiums from enrollees and entered into contracts with intermediary companies that would pay physicians for services rendered to enrollees. The intermediaries contracted directly with the physicians, including provisions that the physicians would "look solely" to the intermediaries for payment for health services provided to enrollees in Aetna's plans. (*California Medical, supra, 94 Cal.App.4th at pp.156-157, fn. 7*.) Several intermediaries became insolvent **[*56]** and failed to pay physicians, despite having received payment from Aetna. The physicians filed an action against Aetna alleging quasi-contract, among other theories, to obtain payment. The appellate court held that as a matter of law, where the subject matter of the claim was governed by express contracts that defined the parties' rights, there could be no quasi-contract claim. In *California Medical*, the issue of whether the physicians were entitled to compensation from Aetna was addressed by the contracts between the physicians and the intermediaries, contracts between the intermediaries and Aetna, and contracts between the enrollees and Aetna, so there could be no action for quasi-contract in that case. (*Id. at pp. 172-173*.) The *California Medical* court further found that nothing in that case precluded Aetna's risk-shifting arrangement or obligated Aetna to guarantee payment to the physicians if the intermediaries failed to pay them after Aetna had made payments to the intermediaries for their services. (*Ibid.*)

Lastly, the court found that the physicians' quasi-contract claim also failed "because under the circumstances alleged here, any benefit conferred upon defendants by Physicians was simply an **[*57]** incident to Physicians' performance of their own obligations to Intermediaries under the Intermediary-Physician Agreements. (*Major-Blakeney Corp. v. Jenkins (1953) 121 Cal.App.2d 325, 340-341, 263 P.2d 655*.) As noted by the appellate court in *Major-Blakeney Corp.*, '"A person who, incidentally to the performance of his own duty or to the protection or the improvement of his own things, has conferred a benefit upon another, is not thereby entitled to contribution."' (*Id. at pp. 340-341*; accord, *Griffith Co. v. Hofues (1962) 201 Cal.App.2d 502, 508, 19 Cal. Rptr. 900*; see 1 Witkin, Summary of Cal. Law, *supra*, Contracts, § 97, pp. 126-127 ['where the plaintiff acts in performance of his own duty or in protection or improvement of his own property, any incidental benefit conferred on the defendant is not unjust enrichment'].)" (*California Medical, supra, 94 Cal.App.4th at p. 174*.)

In the instant case, no quasi-contract claim has been stated, because Daldumyan had a written contract with the Marketing Company. His successful performance under the associate contract entitled him to payments from the Marketing Company. Any benefits received by the Insurance Agency from product providers were simply incident to Daldumyan's performance of his contract with the Marketing Company. Since Daldumyan was not entitled to restitution, the trial court properly sustained the demurrer without leave to amend as to the quasi-contract claim for restitution of commissions **[*58]** received by the Insurance Agency based on sales of insurance products by Daldumyan and the associates in his hierarchy.

D. Fraud

Daldumyan contends that the complaint alleges a fraud cause of action based on fraudulent concealment and misrepresentation. We conclude that he stated a cause of action for fraudulent concealment.

"The elements of a claim for fraudulent concealment require the plaintiff to show that: '(1) the defendant . . . concealed or suppressed a material fact, (2) the defendant [was] under a duty to disclose the fact to the plaintiff, (3) the defendant . . . intentionally concealed or suppressed the fact with the intent to defraud the plaintiff, (4) the plaintiff [was] unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact, and (5) as a result of the concealment or suppression of the fact, the plaintiff must have sustained damage.' [Citation.] The duty to disclose may be established where there is a confidential relationship between the parties, defendant has made a representation which was likely to mislead due to the nondisclosure, there is active concealment of undisclosed matters, or one party has sole knowledge of **[*59]** or access to material facts and knows such facts are not known to or discoverable by the other party." (*Prakashpalan, supra, 223 Cal.App.4th at p. 1130*.)

In this case, Daldumyan alleged that on August 9, 2005, the Insurance Agency caused Daldumyan's appointment to become connected with the Insurance Agency's registration as an active insurance agent in California instead of the Marketing Company without providing any notice to Daldumyan. Beginning in August 2005, the Insurance Agency began collecting the commissions on sales made by Daldumyan and the associates in his hierarchy without any notice to associates or obligation to make payments to associates. Under Daldumyan's contract with the Marketing Company, he was required to arbitrate disputes with the Marketing Company under Georgia law, but the Insurance Agency was not required to arbitrate and was not subject to the jurisdiction of the arbitration proceedings, which increased the burden on Daldumyan when he sought resolution of his disputes. Without his knowledge, the restructuring potentially required litigation in multiple forums with the danger of conflicting results. The Insurance Agency had knowledge or access to the material facts about the effect of the corporate payment **[*60]** restructuring of which Daldumyan was not made aware. Daldumyan's complaint alleges that he was unaware of the material facts that the Insurance Agency concealed and his reliance on the fraudulent conduct was reasonable and justifiable. It also alleges that he was damaged according to proof at trial. This was sufficient to allege a cause of action for fraudulent concealment.

Daldumyan's fraud cause of action was also based on misrepresentations. "The elements of fraud are (1) the defendant made a false representation as to a past or existing material fact; (2) the defendant knew the representation was false at the time it was made; (3) in making the representation, the defendant intended to deceive the plaintiff; (4) the plaintiff justifiably relied on the representation; and (5) the plaintiff suffered resulting damages. (*Lazar v. Superior Court (1996) 12 Cal.4th 631, 638, 49 Cal. Rptr. 2d 377, 909 P.2d 981*.)" (*West v. JPMorgan Chase Bank, N.A. (2013) 214 Cal.App.4th 780, 792, 154 Cal. Rptr. 3d 285*.)

No justifiable reliance has been alleged as to these representations. The same types of representations were made by the Alliance and the Marketing Company before August 2005, namely, that the companies offered a business platform for individuals seeking to run an independent business and agents could build their own business in which they can become vested, **[*61]** continue to earn commission from their sales and the commissions generated by the hierarchies. Daldumyan invested nine years building a career in multi-level marketing of insurance products prior to August 2005—initially with the Alliance and continuing with the Marketing Company—based on these representations. Daldumyan's written contract governed the payment and vesting of commissions and the termination of the contractual rights. Daldumyan has not alleged that he took any action or refrained from taking any action in reliance on representations made after August 2005 by the Insurance Agency through the Marketing Company. The demurrer was properly sustained as to fraud based on misrepresentation, but must be overruled as to fraudulent concealment.

E. Unfair Competition

Daldumyan contends that the complaint alleged a cause of action for violation of the unfair competition law. We agree.

"The primary purpose of the UCL is '"the preservation of fair business competition." [Citations.]' (*Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527* (hereafter *Cel-Tech*).) This purpose includes '"the right of the public to protection from fraud and deceit."' [Citations.]" (*People ex rel. Bill Lockyer v. Fremont Life Ins. Co. (2002) 104 Cal.App.4th 508, 514-515, 128 Cal. Rptr. 2d 463*, italics omitted (*Fremont Life Ins. Co.*).)

The UCL defines "unfair competition" **[*62]** to include "any unlawful, unfair or fraudulent business act or practice." (*Bus. & Prof. Code, § 17200*.) "Written in the disjunctive, this language 'establishes three varieties of unfair competition.' (*Podolsky v. First Healthcare Corp. (1996) 50 Cal.App.4th 632, 647, 58 Cal. Rptr. 2d 89*.)" (*Fremont Life Ins. Co., supra, 104 Cal.App.4th at p. 515*.)

"The three prongs of the law have different thresholds. Under its 'unlawful' prong, 'the UCL borrows violations of other laws . . . and makes those unlawful practices actionable under the UCL.' (*Lazar v. Hertz Corp. (1999) 69 Cal.App.4th 1494, 1505, 82 Cal. Rptr. 2d 368*.) Thus, a violation of another law is a predicate for stating a cause of action under the UCL's unlawful prong." (*Prakashpalan, supra, 223 Cal.App.4th at p. 1133*.)

"To establish an unfair business act or practice, a plaintiff must establish the unfair nature of the conduct and that the harm caused by the conduct outweighs any benefits that the conduct may have. (*McKell v. Washington Mutual, Inc. (2006) 142 Cal.App.4th 1457, 1473, 49 Cal. Rptr. 3d 227*.)" (*Prakashpalan, supra, 223 Cal.App.4th at pp. 1133-1134*.) "A business act or practice is unfair when the conduct 'threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.' (*Cel-Tech*[*, supra*,] *20 Cal.4th at p. 187*.)" (*Prakashpalan, supra, 223 Cal.App.4th at p. 1133*.) "In a consumer case, determining whether a business practice is 'unfair' involves 'weigh[ing] the utility of the defendant's conduct against the gravity of the harm to the alleged **[*63]** victim.' (*Smith v. State Farm Mutual Automobile Ins. Co. (2001) 93 Cal.App.4th 700, 718, 113 Cal. Rptr. 2d 399*.)" (*Ibid.*)

"The *unfairness* prong has been employed to enjoin deceptive or sharp practices. [Citations.] The court also has determined that *unfair* business practices include unconscionable provisions in standardized agreements. (*People v. McKale (1979) 25 Cal.3d 626, 634-637, 159 Cal. Rptr. 811, 602 P.2d 731* [tenants of mobile home park required to sign documents that include illegal provisions].)" (*Fremont Life Ins. Co., supra, 104 Cal.App.4th at pp. 515-516*, fn. omitted.)

"Finally, the *fraud* prong of *section 17200* 'bears little resemblance to common law fraud or deception.' [Citation.] Under *section 17200*, '[t]he test is whether the public is likely to be deceived. [Citation.]' . . . [Citation.]" (*Fremont Life Ins. Co., supra, 104 Cal.App.4th at p. 516*.) "Thus, in order to state a cause of action based on a fraudulent business act or practice, the plaintiff must allege that consumers are likely to be deceived by the defendant's conduct. (*Committee on Children's Television, Inc. v. General Foods Corp. (1983) 35 Cal.3d 197, 211, 197 Cal. Rptr. 783, 673 P.2d 660*.)" (*Prakashpalan, supra, 223 Cal.App.4th at p. 1134*.) "Traditional fraud requirements, such as intent or actual reliance, are inapplicable to the UCL." (*Id. at p. 1133*.) "'This means that a *section 17200* violation, unlike common law fraud, can be shown even if no one was actually deceived, relied upon the fraudulent practice, or sustained any damage. [Citation.]' [Citation.]" (*Fremont Life Ins. Co., supra, 104 Cal.App.4th at pp. 516-517*.)

"A distinguishing feature of the UCL is that it does not provide a private action for damages or other legal remedies. Instead, the UCL provides an equitable **[*64]** means to prevent unfair practices in the future and restore money or property to victims of those practices. [Citation.] Thus, remedies are limited to injunctive relief and restitution." (*Prakashpalan, supra, 223 Cal.App.4th at p. 1133*.) "'Injunctions are "the primary form of relief available under the UCL to protect consumers from unfair business practices," while restitution is a type of "ancillary relief."' [Citation.] Restitution is available 'to restore to any person in interest any money or property . . . which may have been acquired by means of such unfair competition.' (*§ 17203*.)" (*In re Tobacco Cases II (2015) 240 Cal.App.4th 779, 790, 192 Cal. Rptr. 3d 881*.)

"'[T]he equitable remedies of the UCL are subject to the broad discretion of the trial court. [Citation.] The UCL does not *require* "restitutionary or injunctive relief when an unfair business practice has been shown. Rather, *[section 17203*] provides that the court '*may* make such orders or judgments . . . as may be necessary to prevent the use or employment . . . of any practice which constitutes unfair competition . . . or as may be necessary to restore . . . money or property.'"' [Citation.]" (*In re Tobacco Cases II, supra, 240 Cal.App.4th at p. 790*.)

In this case, both the unfair and fraud prongs of *section 17200* apply to the allegations. The difficulty that an independent contractor insurance agent would have in attempting to ascertain **[*65]** the corporate payment structure from the associate contract is unfair in the sense of a deceptive or sharp practice. The arbitration provisions in the associate contracts with the Marketing Company, while the Insurance Agency has the right to collect commissions and is not subject to the jurisdiction of the arbitration proceedings for purposes of discovery or resolution of any disputes, are at least unfair, and arguably unconscionable. The fact that information about the Insurance Agency's collection of commissions on sales from product providers without any corresponding obligation to pay compensation to agents is not conspicuously set forth in an agreement, waiver, or notice to the independent contract insurance agents is likely to deceive, which also brings this set of circumstances within the fraud prong of *section 17200*.

Daldumyan's complaint sought injunctive relief. We conclude that the complaint states a cause of action for violation of the unfair competition law. A private plaintiff has standing to bring an action under the UCL only if he or she "has suffered injury in fact and has lost money or property as a result of the unfair competition." (*Bus. & Prof. Code, § 17204*; *Durell v. Sharp Healthcare (2010) 183 Cal.App.4th 1350, 1359, 108 Cal. Rptr. 3d 682*.) Daldumyan lost commissions due to the **[*66]** improper termination of his associate contract. He was unable to obtain payment from the entity that collects the commissions because the payment structure had been changed without notification to the associates, and the nature of the separation was concealed from him and the other independent contractor agents. Instead of one economical arbitration to resolve his disputes, Daldumyan was required to pursue actions in two different forums to obtain discovery and resolution of the issues underlying his termination. He lost the business that he had spent his adult life building as a result of alleged interference by the Insurance Agency in his contract and did not have the recourse that he expected to be able to pursue, because he had been misled about, or the companies failed to notify him of, their separate nature. Daldumyan's allegations are sufficient to state that he suffered injury in fact and lost money or property because of the unfair competition.

Summary Adjudication

A. Standard of Review

"We review orders granting or denying a summary judgment motion de novo." (*Crown Imports, LLC v. Superior Court (2014) 223 Cal.App.4th 1395, 1403, 168 Cal. Rptr. 3d 228* (*Crown Imports*).) "'As to each claim as framed by the complaint, the defendant must present facts to negate an essential **[*67]** element or to establish a defense. Only then will the burden shift to the plaintiff to demonstrate the existence of a triable, material issue of fact. [Citation.]' [Citation.] 'There is a triable issue of material fact if, and only if, the evidence would allow a reasonable trier of fact to find the underlying fact in favor of the party opposing the motion in accordance with the applicable standard of proof.' (*Aguilar v. Atlantic Richfield Co. (2001) 25 Cal.4th 826, 850, 107 Cal. Rptr. 2d 841, 24 P.3d 493*.)" (*Crown Imports, supra, 223 Cal.App.4th at p. 1403*.) "'We liberally construe the evidence in support of the party opposing summary [adjudication] and resolve doubts concerning the evidence in favor of that party.' (*Yanowitz v. L'Oreal USA, Inc. (2005) 36 Cal.4th 1028, 1037, 32 Cal. Rptr. 3d 436, 116 P.3d 1123*.)" (*Petitpas v. Ford Motor Co. (2017) 13 Cal.App.5th 261, 269, 220 Cal. Rptr. 3d 185*.)

B. Promissory Estoppel

Daldumyan contends there are triable issues of fact as to his cause of action for promissory estoppel. We disagree.

""'The elements of a promissory estoppel claim are "(1) a promise clear and unambiguous in its terms; (2) reliance by the party to whom the promise is made; (3) [the] reliance must be both reasonable and foreseeable; and (4) the party asserting the estoppel must be injured by his reliance."'" [Citation.]" (*Granadino v. Wells Fargo Bank, N.A. (2015) 236 Cal.App.4th 411, 416, 186 Cal. Rptr. 3d 408* (*Granadino*).)

""[A] promise is an indispensable element of the doctrine of promissory estoppel. The cases are uniform in holding that this doctrine cannot be invoked **[*68]** and must be held inapplicable in the absence of a showing that a promise had been made upon which the complaining party relied to his prejudice . . . ." [Citation.] The promise must, in addition, be "clear and unambiguous in its terms." [Citation.] "Estoppel cannot be established from . . . preliminary discussions and negotiations."' [Citation.]" (*Granadino, supra, 236 Cal.App.4th at p. 417*.) ""'Promissory estoppel applies whenever a "promise *which the promissor should reasonably expect* to induce action or forbearance on the part of the promisee or a third person and which does induce such action or forbearance" would result in an "injustice" if the promise were not enforced . . . .'" [Citation.]" (*Id. at p. 418*.)

Daldumyan alleged that the Insurance Agency promised through documentation provided by its employees to pay him commissions on the sale of products. He alleged that executives of the Insurance Agency and the Marketing Company represented at annual conventions that independent contractor agents would continue to earn commissions on insurance products they sold as insurance agents. These individuals also made promises on behalf of the Insurance Agency that Daldumyan, as an agent, would continue to earn commissions from the sale **[*69]** of products by his hierarchy. They represented on behalf of the Insurance Agency that he was building his own independent business which entitled him to commissions from his own sales and his hierarchy, and he was vested in these commissions. Daldumyan concluded that the representations were made on behalf of the Insurance Agency, because the Marketing Company cannot have independent contractor insurance agents and does not have contractual relationships with product providers to pay commissions. Daldumyan provided details of several convention presentations about the value for agents of the Insurance Agency in building their own agencies.

In response to the summary judgment motion, no evidence of a clear, unambiguous promise by the Insurance Agency was submitted. No evidence was submitted to support finding that any employee promised that the Insurance Agency would pay commissions to Daldumyan or other associates. In addition, there is no evidence that Daldumyan took any action or refrained from taking any action in reliance on the statements that he has submitted. Prior to 2005, Daldumyan worked for nine years to build a successful career selling financial and insurance products and **[*70]** recruiting associates. The promotional statements made in documents and at conventions were no different than the promises that caused him to enter into the associate contract with the Alliance and continued with the Marketing Company. Had the statements not been made after 2005, there is no evidence that Daldumyan would have taken any different action. Summary adjudication was proper for the cause of action for promissory estoppel.

C. Intentional Interference with Contract

Daldumyan contends that there are triable issues of material fact concerning his cause of action for intentional interference with contract. We agree.

"[A] stranger to a contract may be liable in tort for intentionally interfering with the performance of the contract." (*Pacific Gas & Electric Co. v. Bear Stearns & Co. (1990) 50 Cal.3d 1118, 1126, 270 Cal. Rptr. 1, 791 P.2d 587* (*Pacific Gas*).) The elements necessary to state a cause of action for intentional interference with contractual relations are "(1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of this contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage." (*Ibid.*)

"It is not a requirement **[*71]** that 'the defendant's conduct be wrongful apart from the interference with the contract itself. [Citation.]' (*Quelimane Co. v. Stewart Title Guaranty Co. (1998) 19 Cal.4th 26, 55, 77 Cal. Rptr. 2d 709, 960 P.2d 513* (*Quelimane*).)" (*Popescu v. Apple Inc. (2016) 1 Cal.App.5th 39, 51, 204 Cal. Rptr. 3d 302*.)

A tort cause of action for interference with a contract cannot be maintained against a party to the contract or the agent of a party to the contract, because a party to a contract cannot interfere with its own contract. (*Asahi Kasei Pharma Corp. v. Actelion Ltd. (2013) 222 Cal.App.4th 945, 963-964, 166 Cal. Rptr. 3d 134* (*Asahi Kasei*); *Applied Equipment Corp. v. Litton Saudi Arabia Ltd. (1994) 7 Cal.4th 503, 513, 507, 514, 28 Cal. Rptr. 2d 475, 869 P.2d 454*; *Mintz v. Blue Cross of California (2009) 172 Cal.App.4th 1594, 1604, 92 Cal. Rptr. 3d 422* ["it is settled that 'corporate agents and employees acting for and on behalf of a corporation cannot be held liable for inducing a breach of the corporation's contract'"].) A corporate owner, however, does not have an absolute privilege to interfere with a subsidiary's contract. (*Asahi Kasei, supra, 222 Cal.App.4th at pp. 962*; *Collins v. Vickter Manor, Inc. (1957) 47 Cal.2d 875, 883, 306 P.2d 783* [privilege of corporation owners "to cause the corporation to discontinue its relations with plaintiffs, in the belief that such a course of action was in the best interests of the corporation, is a matter of defense, to be decided by a resolution of the factual issues presumptively involved"]; *Culcal Stylco, Inc. v. Vornado, Inc. (1972) 26 Cal.App.3d 879, 882-883, 103 Cal. Rptr. 419* [parent corporation is not privileged under all circumstances to intentionally interfere with contract of a subsidiary].)

In the instant case, there were triable issues of fact as to whether the Insurance Agency interfered with the Marketing Company's **[*72]** contract with Daldumyan. Daldumyan submitted evidence from which a trier of fact could conclude that the Marketing Company and Daldumyan had a valid contract, of which the Insurance Agency was fully aware. The Insurance Agency was the entity that had a compliance department. There was evidence that the Insurance Agency investigated whether Daldumyan engaged in outside business activities, even though the activities were not prohibited under his contract with the Marketing Company and were unrelated to his ability to sell insurance products as an agent of the Insurance Agency. Mineck declared that employees of the Marketing Company voted to terminate Daldumyan's contract, but Daldumyan submitted evidence from which a trier of fact could conclude that the investigation and termination of Daldumyan was conducted in their capacities as officers and directors of the Insurance Agency, and as employees performing work for the Insurance Agency. Officers and directors of the Insurance Agency voted to terminate Daldumyan even though they had no contract with Daldumyan and were not parties to his contract with the Marketing Company. Based on the recommendation received from the Insurance Agency, **[*73]** the Marketing Company followed the direction of the Insurance Agency to terminate and divest Daldumyan. A trier of fact could find that the Insurance Agency's intentional acts in investigating and voting to terminate Daldumyan based on business activities that were not precluded under his contract with the Marketing Company were designed to induce a breach or disruption of his contractual relationship with the Marketing Company, and in fact caused a breach of his contractual relationship with the Marketing Company, resulting in damages to Daldumyan. The motion for summary adjudication of the cause of action for intentional interference with contract must be denied.

D. Intentional Interference with Prospective Economic Advantage

Daldumyan did not raise the issue of intentional interference with prospective economic advantage until his reply brief. We find no independently wrongful conduct has been alleged apart from the alleged interference itself, and therefore, summary adjudication of the cause of action for intentional interference with prospective economic advantage was proper.

"'The elements of a claim of interference with economic advantage and prospective economic advantage are: **[*74]** """ (1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentional [or negligent] acts on the part of the defendant designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the acts of the defendant." [Citations.]' [Citation.]" [Citation.]' (*Winchester Mystery House, LLC v. Global Asylum, Inc. (2012) 210 Cal.App.4th 579, 596, 148 Cal. Rptr. 3d 412*.)" (*Crown Imports, LLC v. Superior Court (2014) 223 Cal.App.4th 1395, 1404, 168 Cal. Rptr. 3d 228* (*Crown Imports*).)

"An additional element is required. 'The tort of intentional interference with prospective economic advantage is not intended to punish individuals or commercial entities for their choice of commercial relationships or their pursuit of commercial objectives, unless their interference amounts to independently actionable conduct. [Citation.]' (*Korea Supply Co. v. Lockheed Martin Corp. (2003) 29 Cal.4th 1134, 1158-1159, 131 Cal. Rptr. 2d 29, 63 P.3d 937*.) As such, courts require an additional element, that the alleged interference must have been wrongful by some measure beyond the fact of the interference itself. (*Della Penna v. Toyota Motor Sales, U.S.A., Inc. (1995) 11 Cal.4th 376, 392-393, 45 Cal. Rptr. 2d 436, 902 P.2d 740*.) For an act to be sufficiently independently wrongful, it must be 'unlawful, that is, . . . it is proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal **[*75]** standard.' (*Korea Supply Co. v. Lockheed Martin Corp., supra, 29 Cal.4th at p. 1159*.)" (*Crown Imports, supra, 223 Cal.App.4th at p. 1404*.)

"The independently wrongful act must be the act of interference itself, but such act must *itself* be independently wrongful. That is, '[a] plaintiff need not allege the interference and a second act independent of the interference. Instead, a plaintiff must plead and prove that the conduct alleged to constitute the interference was independently wrongful, i.e., unlawful for reasons other than that it interfered with a prospective economic advantage. [Citations.]' (*Stevenson Real Estate Services, Inc. v. CB Richard Ellis Real Estate Services, Inc. (2006) 138 Cal.App.4th 1215, 1224, 42 Cal. Rptr. 3d 235*.)" (*Crown Imports, supra, 223 Cal.App.4th at p. 1404*.)

"It is the plaintiff's burden to plead and prove that the defendant's conduct is independently wrongful in order to recover. The fact that the defendant's conduct was independently wrongful is an element of the cause of action itself. (*Bed, Bath & Beyond of La Jolla, Inc. v. La Jolla Village Square Venture Partners (1997) 52 Cal.App.4th 867, 881, 60 Cal. Rptr. 2d 830*.)" (*Crown Imports, supra, 223 Cal.App.4th at pp.1404-1405*.)

Daldumyan's allegations of interference with prospective economic advantage were based on the telephone calls that the Insurance Agency made to clients and associates during its investigation of Daldumyan's business activities. He has not provided evidence of any independent actionable wrongdoing in the Insurance Agency's telephone calls and questions to clients and associates beyond the interference with Daldumyan's prospective economic advantage. Summary adjudication **[*76]** of this cause of action is proper.

E. Claim Preclusion

Finally, the Insurance Agency contends Daldumyan's action is barred by the doctrine of claim preclusion. Specifically, the Insurance Agency contends that it is in privity with the Marketing Company for purposes of claim preclusion because Daldumyan alleged the Insurance Agency is the alter ego of the Marketing Company. The Insurance Agency asserts the judgment in the arbitration proceedings precludes Daldumyan from relitigating any causes of action resolved in the arbitration, as well as any causes of action that could have been raised in the arbitration. This analysis is incorrect.

"*Claim preclusion* 'prevents relitigation of the same cause of action in a second suit between the same parties or parties in privity with them.' [Citation.] Claim preclusion arises if a second suit involves (1) the same cause of action (2) between the same parties (3) after a final judgment on the merits in the first suit. [Citations.] If claim preclusion is established, it operates to bar relitigation of the claim altogether." (*DKN Holdings LLC v. Faerber (2015) 61 Cal.4th 813, 824, 189 Cal. Rptr. 3d 809, 352 P.3d 378* (*DKN Holdings*).)

"*Issue preclusion* prohibits the relitigation of issues argued and decided in a previous case, even if the second **[*77]** suit raises different causes of action. [Citation.] Under issue preclusion, the prior judgment conclusively resolves an issue actually litigated and determined in the first action. [Citation.] There is a limit to the reach of issue preclusion, however. In accordance with due process, it can be asserted only against a party to the first lawsuit, or one in privity with a party." (*DKN Holdings, supra, 61 Cal.4th at p. 824*.)

"Issue preclusion differs from claim preclusion in two ways. First, issue preclusion does not bar entire causes of action. Instead, it prevents relitigation of previously decided issues. Second, unlike claim preclusion, issue preclusion can be raised by one who was not a party or privy in the first suit. (*Vandenberg v. Superior Court (1999) 21 Cal.4th 815, 828, 88 Cal. Rptr. 2d 366, 982 P.2d 229*.) 'Only the party *against whom* the doctrine is invoked must be bound by the prior proceeding. [Citations.]' (*Ibid.*) In summary, issue preclusion applies (1) after final adjudication (2) of an identical issue (3) actually litigated and necessarily decided in the first suit and (4) asserted against one who was a party in the first suit or one in privity with that party." (*DKN Holdings, supra, 61 Cal.4th at pp. 824-825*.)

"When a defendant's liability is entirely derived from that of a party in an earlier action, claim preclusion bars the second action because **[*78]** the second defendant stands in privity with the earlier one. (See *Richard B. LeVine, Inc. v. Higashi (2005) 131 Cal.App.4th 566, 576-77, 32 Cal. Rptr. 3d 244*; *Brinton v. Bankers Pension Services, Inc. (1999) 76 Cal.App.4th 550, 557-558, 90 Cal. Rptr. 2d 469*.)" (*DKN Holdings, supra, 61 Cal.4th at pp. 827-828*.) """A claim against a defendant, based on the alter ego theory, is not itself a claim for substantive relief, e.g., breach of contract . . . , but rather, procedural, i.e., to disregard the corporate entity as a distinct defendant and to hold the alter ego individuals liable on the obligations of the corporation where the corporate form is being used by the individuals to escape personal liability, sanction a fraud, or promote injustice."' (*Greenspan v. LADT LLC [(2010) 191 Cal.App.4th 486,] 516, 121 Cal. Rptr. 3d 118*, citing *Hennessey's Tavern, Inc. v. American Air Filter Co. (1988) 204 Cal.App.3d 1351, 1359, 251 Cal. Rptr. 859*.)" (*Wells Fargo Bank, N.A. v. Weinberg (2014) 227 Cal.App.4th 1, 7-8, 173 Cal. Rptr. 3d 113*.)

Daldumyan cannot maintain claims against the Insurance Agency where the Insurance Agency's liability is only derivative of the Marketing Company's liability. The causes of action remaining in the lawsuit, however, are based directly on the Insurance Agency's actions; liability does not depend on a finding of alter ego. In particular, the cause of action for intentional interference with contract is based on the Insurance Agency's liability for its own alleged actions to disrupt the contract between the Marketing Company and Daldumyan. No cause of action for intentional interference with contract was determined in the arbitration.

The cause of action for fraudulent **[*79]** concealment is also based on the Insurance Agency's own actions in that Insurance Agency failed to notify agents of changes. Fraudulent concealment was not a cause of action litigated in the arbitration proceedings. The cause of action for violation of *Business and Professions Code section 17200* was not a cause of action determined by the earlier arbitration proceeding, nor could it have been, because the provisions of California's unfair business law did not apply under the Georgia law applied in the arbitration. We note that Daldumyan is precluded, however, from relitigating the amount that he was damaged as a result of the Marketing Company's breach of the contract and the covenant of good faith and fair dealing. The arbitrators determined the issue of Daldumyan's damages for breach of contract, including the amount of lost commissions, the consequential economic damages, and his legal fees stemming from the arbitration proceedings. Judgment was entered by the federal court confirming the arbitration award in favor of Daldumyan. Daldumyan is bound by the issues conclusively determined in the prior proceeding. The issue of contract damages, including lost commissions and consequential economic losses, was actually litigated **[*80]** and necessarily decided in the earlier action to which Daldumyan was a party. He may continue to litigate issues pertaining to other relief, such as injunctive relief or tort damages that have not previously been determined.

DISPOSITION

The judgment is reversed. The order granting summary judgment and the order sustaining the demurrer are reversed. The trial court is directed to enter a new and different order sustaining the demurrer as to causes of action for implied-in-fact contract and unjust enrichment, but overruling the demurrer as to causes of action for fraudulent concealment and violation of *Business and Professions Code section 17200*. The trial court is also directed to grant summary adjudication of the causes of action for promissory estoppel and intentional interference with prospective economic advantage, but deny summary adjudication of the cause of action for intentional interference with contract. In the interests of justice, the parties are to bear their own costs on appeal.

KRIEGLER, Acting P. J.

We concur:

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN2[] **Standards of Review, De Novo Review**

A courts review of exceptions of no right of action and no cause of action are de novo. It is well settled that pursuant to *La. Code Civ. Proc. Ann. art. 2164*, an appellate court must render its judgment upon the record on appeal. The record on appeal is that which is sent by the trial court to the appellate court and includes the pleadings, court minutes, transcript, judgments and other rulings. The appellate court cannot review evidence that is not in the record on appeal and cannot receive new evidence. Memoranda and exhibits not filed in evidence are not part of the record on appeal. The briefs of the parties and the attachments thereto are not part of the record on appeal. Further, this court does not consider exhibits filed in the record which were not filed into evidence.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN3[] **Trade Practices & Unfair Competition, State Regulation**

The Louisiana antitrust laws were not enacted for the protection of competitors but were instead enacted to protect competition.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN4[] **Price Fixing & Restraints of Trade, Horizontal Market Allocation**

When analyzing an alleged agreement to restrain trade the court must first determine whether it should be categorized as horizontal or vertical.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN5[] **State Regulation, Claims**

Because Louisiana is a fact pleading state, *La. Code Civ. Proc. Ann. art 862*, a petition must set forth material facts upon which the alleged cause of action is based and conclusions of law are not sufficient to meet the injury requirement in an antitrust case and neither can it be met by broad allegations of harm to the market as an abstract entity. Moreover, not every business arrangement that restrains trade in some manner is illegal. Every claim made under *La. Rev. Stat. Ann. § 51:122* must include an allegation of damage to competition. Importantly, the United States Supreme Court has made it clear that even an act of pure malice by one business competitor against another does not, without more, state an antitrust claim; the antitrust laws do not create a federal law of unfair competition or purport to afford remedies for all torts committed by or against persons engaged in commerce. Of additional and significant importance in assessing a plaintiff's allegations of antitrust is the well-established jurisprudence which holds that only in exceptional circumstances can a single brand in a market of competing brands constitute a relevant market for antitrust purposes. And those circumstances are limited to situations in which consumers are locked in to a specific brand by the nature of the product.

Civil Procedure > ... > Service of Process > Proof of Service > Affidavits & Certificates of Service

Civil Procedure > Pleading & Practice > Pleadings > Time Limitations

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] **Proof of Service, Affidavits & Certificates of Service**

A pleading is not filed in an action until it has been delivered to the clerk for that purpose; therefore, a party obliged to file a pleading within a time limitation must insure actual delivery, since it is the time when the clerk receives actual delivery of the pleading that is determinative of whether a pleading has been timely filed. A certificate of service upon opposing counsel is not considered a timely filing.

Opinion by: SYLVIA R. COOKS

Opinion

[*10] [Pg 1] **COOKS, Judge**.

In this expedited appeal we are asked to review the trial court's ruling denying Trey Coker's Exception of No Cause of Action regarding Gene Haymon's action based on *Louisiana's **Antitrust Law**, La.R.S. 51:122 et seq.*, and the trial court's ruling denying in part and granting in part an exception of no right of action raised by the trial court.

> ***HN1***[] The denial of exceptions of no cause of action and no right of action are normally **[*11]** not appealable. However, *La. R.S. 51:134* and *51:135* provide for an immediate appeal of such an interlocutory judgment related to antitrust claims. *See Plaquemine Marine, Inc. v. Mercury Marine, 2003-1036 (La.App. 1st Cir.7/25/03), 859 So.2d 110, 114, n. 3*.

HPC Biologicals, Inc. v. UnitedHealthcare of La., 16-585 p. 6 (La.App. 1 Cir. 5/26/16), 194 So.3d 784, 791-92. Gene Haymon asserts in his Motion to Dismiss **[**3]** Appeal that this appeal should be dismissed because Coker waived his right to an expedited appeal and failed to designate issues on appeal. We referred this motion to the merits and after due consideration the Motion to Dismiss Appeal is denied.

HN2[] Our review of exceptions of no right of action and no cause of action are de novo,[1] and:

> It is well settled that pursuant to *La. C.C.P. art. 2164*, an appellate court must render its judgment upon the record on appeal. The record on appeal is that which is sent by the trial court to the appellate court and includes the pleadings, court minutes, transcript, judgments and other rulings. The appellate court cannot review evidence that is not in the record on appeal and cannot receive new evidence. Memoranda and *exhibits not filed in evidence* are not part of the record on appeal. The briefs of the parties and the attachments thereto are not part of the record on appeal. Further, this court does not consider *exhibits filed in the record which were not filed into [Pg 2] evidence*. *Tranum v. Hebert, 581 So.2d 1023 (La.App. 1st Cir.1991)*, *writ denied*, *584 So.2d 1169 (La.1991)*.

Titlesite, L.C. v. Webb, 36,437 p. 12 (La.App. 2 Cir. 12/11/02), 833 So.2d 1061, 1068-69.

We first address the propriety of the trial court's denial of Coker's Exception of No Cause of Action regarding Gene Haymon's allegations of antitrust violations under Louisiana **[**4]** law. After conducting a de novo review we reverse the trial court and hereby render judgment in favor of Trey Coker granting his Exception of No Cause of Action for the alleged antitrust violations raised by Gene Haymon in his Original Answer and First Amended Answer, Reconventional Demand, Third Party Demand, and Cross Claim.[2]

The basis of Gene Haymon's antitrust claim is that Coker and Clary conspired to defame Gene Haymon in order to restrain the business of his son, David Haymon, as a State Farm Insurance agent. Gene asserts that he "need only allege the existence of an agreement between Mr. Coker and Mr. Clary that was knowingly entered into" and he maintains he has gone even further by alleging that "the conspiracy between Mr. Coker and Mr. Clary injured the competition in the Leesville market by *preventing Gene from practicing* [as a part-time agent with his son]" (emphasis added). He also alleges as a basis for his antitrust claim "that the conspiracy between Mr. Coker and Mr. Clary *prevented him from making money as a State Farm sub-agent*" (emphasis added). Additionally, Gene states at paragraph 120 of his "First Amended Answer . . .":

> **[*12]** [Pg 3] Coker's conspiracy with the Clary's **[**5]** and their private investigator(s) to defame Gene and David to increase Coker's State Farm business and 'help' Clary's lawsuit violates La. antitrust laws and has had the effect of reducing competition in the Vernon Parish insurance market. The Coker-Clarys anti-trust violations

[1] *See Vermilion Hosp., Inc. v. Patout, 05-82 (La.App. 3 Cir. 6/8/05), 906 So.2d 688* and cases cited therein.

[2] For the reasons that will later be discussed in this opinion, we cannot consider Haymon's proposed supplemental and amending petition. However, we note that if we were able to consider the allegations made in the proposed "First Supplemental and Amending Amended Answer, Reconventional Demand, Third Party Demand and Cross Claim" it would not alter our finding herein as the proposed pleading does nothing to cure the deficiencies.

> have caused, and continue to cause, great emotional harm to Gene and damage his reputation. Coker and the Clarys are thus solidarily liable for conspiracy to defame Gene in order to unreasonably restrain David's trade in violation of *La. R.S. 54:122* (sic).[3]

In his Third-Party Demand Gene Haymon alleges "State Farm's policy holders have contracts with State Farm, not State Farm's agents." Taking this allegation as truthful, as we must for these purposes, this demonstrates that there can be no antitrust injury to consumers that could result from the alleged conspiracy between Coker and Clary because any insurance contracts entered into by consumers will be with State Farm and not with any agent whose trade is allegedly restrained. Additionally, some three years ago when Gene Haymon sought to dismiss the antitrust claims asserted against him by the Clarys he maintained:

> There is no way Plaintiffs can plausibly allege customers **[**6]** cannot choose what insurance products they wish to purchase from whichever insurance company, or that consumers are harmed in any way in their choice and ability to purchase insurance policies from State Farm or any other insurer. Consumers could and can get insurance policies from any number of sources.

Gene Haymon also alleges, in paragraph 108 of his First Amended Answer:

> By 2012, State Farm's saturation policy had made it harder for individual agents to generate premiums. State Farm also eliminated many of the financial products agents could sell and reduced the percentage of agents' take on premiums charged on the remaining products. State Farm also greatly increased its premiums to cover for its devastating losses from weather-related events, thereby causing State Farm to price itself out of the market for a large number of budget-minded customers.

[Pg 4] Additionally, and even more telling, is Gene Haymon's allegation in paragraph 109 which states:

> Additionally, David [Haymon] and Clary both had to overcome competition by State Farm's two other Vernon Parish agents, including third party defendant Trey Coker, as well as agents from surrounding parishes.

Phrased another way, this **[**7]** last paragraph, taken as true, states that David Haymon, Clary and Coker all had to compete for consumers' business with each other and two other State Farm agents in Vernon Parish and an unspecified number of agents in surrounding parishes. Moreover, all of these State Farm Agents were competing against all other insurance companies' agents in the area for the local consumers' business. Thus, the alleged conspiracy to defame David and hurt his and/or Gene's bottom line presents no harm to consumers who are shopping for insurance in a very competitive market. This allegation belies any conceivable harm to competition or to consumers and indeed indicates that the alleged conspiracy did not and could not harm consumers. It directly contradicts the conclusory assertion that the alleged conspiracy "had the effect of reducing competition in the **[*13]** Vernon parish insurance market." ***HN3***[] The antitrust laws *were not enacted for the protection of competitors* but were instead enacted *to protect competition. See* *Plaquemine Marine, Inc. v. Mercury Marine, 03-1036 (La.App. 1 Cir. 7/25/03), 859 So.2d 110*, *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, and *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. The only real injuries alleged to have resulted from the alleged conspiracy are monetary and emotional damages to Gene Haymon, not to consumers.

Louisiana Revised Statutes 51:122 provides: **[**8]**

> [Pg 5] A. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce in this state is illegal.
>
> B. Whoever violates this Section shall be fined not more than five thousand dollars, or imprisoned, with or without hard labor, not more than three years, or both.
>
> C. For purposes of this Title, a parent corporation, limited liability company, partnership, or partnership-in-commendam is not capable of conspiring with any subsidiary that it controls, and each such controlled subsidiary is not capable of conspiring with any other wholly owned subsidiary controlled by the same common parent.

---

[3] The reference should be to *La. R.S. 51:122*.

D. For the purposes of this Part only, an officer or employee of a legal entity is not capable of conspiring with the legal entity or with another officer or employee of the legal entity when they are acting on behalf of the entity.

HN4[] When analyzing an alleged agreement to restrain trade the court must first determine whether "it should be categorized as horizontal or vertical." *HPC Biologicals, Inc., 194 So.3d at 793*. The trial court at one point in the hearing expressed the thought that Gene Haymon's allegation of antitrust violations "appears to be more horizontal [but] I think there's components **[**9]** that are going to overlap with vertical." Gene Haymon asserts his allegations set forth a horizontal violation. We find the allegations establish neither. A horizontal combination occurs between competitors to restrain trade at the same level of distribution and generally are considered a "per se" violation of the antitrust laws. *See* *Van Hoose v. Gravois, 11-976 (La.App. 1 Cir. 7/7/11), 70 So.3d 1017*. A vertical restraint on trade is imposed by persons who are at differing levels of distribution, most commonly by the one who is higher up the chain of distribution. To prove a vertical restraint on trade a plaintiff must prove the alleged restraint violates the "rule of reason." *Van Hoose, 70 So.3d at 1022*. *See* *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*.

[Pg 6] ***HN5***[] Because our state is a fact pleading state, *La.Code Civ.P. art 862*, a petition must set forth material facts upon which the alleged cause of action is based and "conclusions of law are not sufficient" to meet the injury requirement in an antitrust case and neither can it be met "by broad allegations of harm to the 'market' as an abstract entity." *Plaquemine Marine, Inc. 859 So.2d at 118*, and cases cited therein. Moreover, "not every business arrangement that restrains trade in some manner is illegal[.]" *Id.* Every claim made under *La.R.S. 51d:122* "must include an allegation of *damage to competition*." *Id.* (emphasis added). Importantly, **[**10]** the United States Supreme Court has made it clear that "[e]ven an act of pure malice by one business competitor against another does not, without more, state an antitrust claim; **[*14]** the antitrust laws do not create a federal law of unfair competition or 'purport to afford remedies for all torts committed by or against persons engaged in [] commerce." *Plaquemine Marine, Inc., 859 So.2d at 119*, *citing* *Brooke Group Ltd. v. Brown & Williamson Tobacco Group, 509 U.S. 209, 225, 113 S.Ct. 2578, 2589, 125 L. Ed. 2d 168 (1993)*. Of additional and significant importance in assessing Gene Haymon's allegations of antitrust is the well-established jurisprudence which holds "that only in exceptional circumstances can a single brand in a market of competing brands constitute a relevant market for antitrust purposes." *HPC Biologicals, Inc., 194 So.3d at 794*, *citing* *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 488 (5th Cir. 1984)*. And "[t]hose circumstances are limited to situations in which consumers are 'locked in' to a specific brand by the nature of the product." *Id., citing* *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481-82, 112 S.Ct. 2072, 119 L. Ed. 2d 265 (1992)* and *PSKS, Inc. v. Legion Creative Leather Prods., Inc., 615 F.3d 412, 418 (5th Cir. 2010)*, *cert denied 562 U.S. 1217, 131 S.Ct. 1476, 179 L. Ed. 2d 301 (2011)*. Gene Haymon's allegations clearly state that the insurance [Pg 7] consumers in Vernon Parish are not locked in to any specific brand of insurance nor are they in any way locked in to dealing with any particular State Farm agent if they desire to contract insurance with State Farm. Gene Haymon's allegations fall far short of articulating any form of antitrust violation **[**11]** under state or federal law and as we have noted herein, even if we were to consider his proposed additional pleadings he still would not meet the test. For the reasons stated we reverse the trial court's ruling and hereby grant Trey Coker's exception of no cause of action to Gene Haymon's claims based on antitrust.

We also find the trial court erred in considering any of the allegations contained in the proposed "First Supplemental and Amending Amended Answer, Reconventional Demand, Third Party Demand and Cross Claim" and we cannot and have not considered it in our de novo review of this matter. On December 29, 2017, Gene Haymon filed a "Motion for Leave to File First Supplemental and Amending Amended Answer, Reconventional Demand, Third Party Demand and Cross Claim." Attached to the motion as an Exhibit was Gene Haymon's proposed "First Supplemental and Amending" pleading. The trial court issued a rule to show cause on January 18, 2018, concerning this Motion for Leave to File setting a hearing date on the motion for February 7, 2018. The court held the hearing on February 7, 2018, and because of the time-consuming nature of the matter continued to hear various motions and exceptions **[**12]** on the next day, February 8, 2018. During the course of the hearing on February 8, 2018, the trial court stated from the bench that it would grant Gene Haymon's Motion for Leave to File his proposed "First Supplemental and Amending Amended" pleading. As the hearing on Coker's exceptions progressed the trial judge, over multiple objections by opposing counsel, considered both the earlier pleading, which had been filed of [Pg 8] record in October 2017, and the later *proposed* "Supplemental Amending Amended . . ." pleading which had not been filed in the record. By the date of the hearing the "First Supplemental and Amending Amended Answer, Reconventional Demand, Third Party Demand and Cross Claim" had not been officially and properly filed in the record and had not been served on the adverse parties. Gene Haymon filed his First Amended Answer, Reconventional Demand, Third Party Demand, and Cross Claim by presenting it to **[*15]** the clerk's office for filing,[4] accompanied by the filing fee and costs for service, but by the date of the hearing he had done no such filing of the "First Supplemental and Amending Amended Answer . . ." nor had he paid any filing fee or costs for service nor directed **[**13]** the clerk to serve the pleading.

> It is settled that ***HN6***[] a pleading is not "filed in an action" **until it has been delivered to the clerk <u>for that purpose</u>**; therefore, a party obliged to file a pleading within a time limitation must insure actual delivery, since it is the time when the clerk receives actual delivery of the pleading that is determinative of whether a pleading has been timely filed. *Squatrito v. Barnett, 338 So.2d 975 (La.App. 4th Cir.1976)*.
>
> . . . .
>
> A certificate of service upon opposing counsel is not considered a timely filing. *Squatrito, supra.*

American Bank & Trust Co. v. Huval Financial Services, 460 So.2d 91, 93 (La.App. 3rd Cir. 1984) (emphasis added).

The proposed "First Supplemental Amending Amended Answer . . ." exists in the record *only as an exhibit* attached to a motion. At the hearing in which the [Pg 9] trial court said he granted the motion for leave to file, the exhibit was not introduced as evidence and to date, as pointed out by Mover in brief and at oral argument, has not been officially filed in the record "for the purpose" intended.

Lastly, we find there is no support in Louisiana law for a trial court issuing an advisory opinion or declaratory ruling finding a pleading states a cause of action or right of action when such an exception has not been filed alleging such deficiencies. We therefore reverse the trial court's ruling **[**14]** that denied in part and granted in part an exception of no right of action based upon the unfiled pleading.

The trial court judgment denying Trey Coker's Exception of No Cause of Action is hereby reversed, vacated, and judgment is rendered granting Trey Coker's Exception of No Cause of Action.

All costs of this appeal are assessed against Gene Haymon.

MOTION TO DISMISS APPEAL DENIED.

REVERSED; JUDGMENT RENDERED; REMANDED.

End of Document

[4] After a hearing on Gene Haymon's Motion for Leave to File his First Amended Answer the trial court granted the motion and ordered that the pre-trial order previously decreed be amended to change the deadline to file pleadings in the matter to December 31, 2017. This Order was signed on October 30, 2017. On October 31, 2017, counsel for Gene Haymon sent a copy of the pleading to the clerk of court accompanied by a cover letter along with a fee of $500.00 to cover the cost of filing and service. That pleading was stamped by the clerk of court dated October 31, 2017, as the date filed in the record.

ORDER DENYING MOTION TO DISMISS BROUGHT BY ZOOVE, VHT, VHT STARSTAR, AND STARSTEVE; GRANTING MOTION TO DISMISS BROUGHT BY MBLOX WITHOUT LEAVE TO AMEND; DENYING MBLOX'S MOTION FOR SANCTIONS; AND SETTING CASE MANAGEMENT CONFERENCE

[Re: ECF 220, 221, 222, and 224]

Plaintiff Sumotext Corporation ("Sumotext") brought this action to enforce its alleged rights to lease StarStar numbers — vanity mobile dial codes such as "**LAW" and "**MOVE" — from Defendant Zoove, Inc. ("Zoove").[1] Zoove administers the national mobile dial code registry ("the registry"), and it has exclusive rights to operate StarStar numbers for all major carriers, including AT&T, Verizon Wireless, T-Mobile, and Sprint. Sumotext built a business around leasing StarStar numbers from Zoove and subleasing them to customers while providing related software and services. That business was successful until Zoove was acquired by Defendant VHT StarStar, after which Zoove terminated all Sumotext's existing StarStar leases and offered new leases at rates 1,000 times what Sumotext had been paying. Zoove's acquisition and **[*3]** subsequent dealings with Sumotext allegedly were in furtherance of an unlawful conspiracy to monopolize the StarStar market. Sumotext asserts claims against Zoove, VHT StarStar, and others for violations of federal ***antitrust law*** and state common law.

This order addresses two motions to dismiss Sumotext's third amended complaint ("TAC") pursuant to *Federal Rule of Civil Procedure 12(b)(6)* and a motion for sanctions against Sumotext pursuant to *Federal Rule of Civil Procedure 11* and *28 U.S.C. § 1927*. For the reasons discussed below, the motion to dismiss brought by Defendants Zoove, VHT StarStar, Virtual Hold Technology LLC ("VHT"), and StarSteve, LLC ("StarSteve") is DENIED[2]; the motion to dismiss brought by Defendant Mblox, Inc. ("Mblox") is GRANTED WITHOUT LEAVE TO AMEND; and the motion for sanctions brought by Mblox is DENIED. A Case Management Conference is set for May 24, 2018.

I. BACKGROUND[3]

Sumotext began leasing StarStar numbers from Zoove in 2012. TAC ¶¶ 22-24. Sumotext struggled initially, but eventually it built up a successful business based on subleasing StarStar numbers to customers while also providing related software and services. *Id.* ¶¶ 27-28. In 2014, Mblox acquired Zoove as a wholly owned subsidiary. *Id.* ¶¶ 7, 29. During Mblox's ownership, Sumotext continued **[*4]** with its successful business model. *Id.* ¶¶ 29-35. By that time, many competitors had followed Sumotext into the StarStar product/service market, which Sumotext describes as containing three segments: the leasing segment, the reselling (subleasing) segment, and the servicing segment. *Id.* ¶¶ 28, 106, 116-18.

One such competitor, StarSteve, decided to combine with Zoove in order to monopolize the StarStar market. *Id.* ¶¶ 65-67. In pursuit of that goal, StarSteve entered into a letter of intent ("LOI") with Mblox in September 2015, outlining a deal in which StarSteve would acquire Mblox, StarSteve and Mblox would divide StarStar customers and territories, and other competitors would be barred from the market. *Id.* ¶¶ 68-69. However, StarSteve determined that it lacked the capital and expertise to go forward with the acquisition of Zoove on its own. *Id.* ¶ 70. StarSteve ultimately entered into a joint venture with VHT to create a new limited liability company, VHT StarStar, for the purpose of acquiring Zoove, monopolizing the StarStar market, and eliminating Sumotext as a competitor. TAC ¶¶ 71-73. As part of the pre-acquisition due diligence for VHT StarStar's purchase of Zoove, Mblox disclosed **[*5]** all of its customer agreements, including its contracts with Sumotext. *Id.* ¶ 75. VHT, StarSteve, and VHT StarStar used that confidential information to target Sumotext's customers, approaching them and representing that Sumotext did not have the right to renew its StarStar leases and that those leases would be terminated upon VHT StarStar's purchase of Zoove. *Id.* ¶ 76. According to Sumotext, those representations were false and were made to persuade Sumotext's customers to abandon it and lease StarStar numbers directly from Zoove and VHT StarStar. *Id.* ¶¶ 76-77.

---

[1] It appears that Zoove now does business as "StarStar Mobile." For the sake of simplicity, the Court will refer to the Zoove/StarStar Mobile entity as "Zoove."

[2] Zoove, VHT StarStar, and VHT filed a motion to dismiss (ECF 222) which was joined by StarSteve (ECF 224).

[3] The background section is drawn from Sumotext's factual allegations, which are accepted as true for purposes of evaluating the *Rule 12(b)(6)* motions to dismiss. *See* *Reese v. BP Exploration (Alaska) Inc., 643 F.3d 681, 690 (9th Cir. 2011)*.

Sumotext became aware of the above-described conduct and informed Mblox that it objected to the sale of Zoove. TAC ¶¶ 79-81. Sumotext "warned Mblox from completing the transaction — thus furthering, joining, and profiting from the conspiracy — in the face of known unlawful schemes." *Id.* ¶ 81. Mblox nonetheless went forward with the sale of Zoove to VHT StarStar in December 2015. *Id.* ¶ 97.

After the sale, Zoove — controlled by StarSteve, VHT, and VHT StarStar — terminated all of Sumotext's StarStar leases in breach of written contracts. TAC ¶¶ 100-01. Sumotext was informed that it could lease StarStar numbers only if it agreed **[*6]** to onerous new leasing terms which included an increase in rates from an average of $500 per month per StarStar number to an average of $500,000 per month per number. *Id.* ¶ 102. Others in the market were targeted as well. *Id.* ¶ 104. For example, Dawson Law Firm's lease fee for **CRASH was raised from $1,000 per month for a nationwide lease to $5,000 per month for just the South Florida Region. *Id.* Another lessee, A-Z Lock and Key, was not permitted to renew its lease of **LOCKS. *Id.*

Sumotext, then under the belief that VHT had acquired Zoove, filed this action against VHT and Zoove in March 2016 for breach of contract and related state law claims. Compl., ECF 1. Sumotext later added StarSteve, VHT StarStar, and Mblox as defendants and expanded its pleading to assert federal antitrust claims as well as state law claims. The operative TAC contains claims for: (1) breach of contract against Zoove; (2) breach of the implied covenant of good faith and fair dealing against Zoove; (3) tortious interference with contract against VHT, StarSteve, and VHT StarStar; (4) restraint of trade in violation of *Section 1* of the Sherman Act against VHT, StarSteve, VHT StarStar, Zoove, and Mblox; and (5) conspiracy **[*7]** to monopolize and monopolization in violation of *Section 2* of the Sherman Act against VHT, StarSteve, VHT StarStar, Zoove, and Mblox. TAC, ECF 185-4.

Two separate *Rule 12(b)(6)* motions are pending before the Court, one brought by Zoove, VHT, VHT StarStar, and StarSteve, and the other by Mblox. Both motions are limited to Sumotext's federal antitrust claims (Claims 4 and 5). Sumotext's state law claims (Claims 1, 2, and 3) are not at issue. Mblox also has filed a motion for sanctions against Sumotext.

II. MOTIONS TO DISMISS

A. Legal Standard

"A motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim upon which relief can be granted 'tests the legal sufficiency of a claim.'" *Conservation Force v. Salazar, 646 F.3d 1240, 1241-42 (9th Cir. 2011)* (quoting *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001))*. While a complaint need not contain detailed factual allegations, it "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A claim is facially plausible when it "allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.*

B. Zoove, VHT, VHT StarStar, and StarSteve

Zoove, VHT, VHT StarStar, and StarSteve (collectively, "Moving Parties") contend that Sumotext has failed to state a claim against them for violation **[*8]** of the Sherman Act under either *Section 1* (Claim 4) or *Section 2* (Claim 5).

1. Sherman Act *Section 1* (Claim 4)

Claim 4 alleges restraint of trade in violation of *Section 1* of the Sherman Act. That section provides: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. To plead a *Section 1* claim, a plaintiff "must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*.

Moving Parties argue that Sumotext fails to meet this pleading standard in two respects. First, they assert that Sumotext does not plausibly allege injury arising from a combination or conspiracy between two or more entities, because the facts upon which the *Section 1* claim is based are equally consistent with unilateral business decisions by Zoove. To the extent that other entities were involved in Zoove's decisions, **[*9]** Moving Parties assert that the common ownership of those entities dictates that they be viewed as a single enterprise which cannot collude with itself. Second, Moving Parties contend that the TAC does not contain sufficient factual particularity as to who at each of the defendant companies did what, and when, to join and further the conspiracy. *See Kendall, 518 F.3d at 1048* (finding *Section 1* claim deficient where it did not "answer the basic questions: who, did what, to whom (or with whom), where, and when?"). The Court addresses those arguments in turn.

a. Unilateral Business Decisions

Section 1 "does not reach conduct that is wholly unilateral." *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (internal quotation marks and citation omitted). "Unilateral conduct by a single firm, even if it appears to restrain trade unreasonably, is not unlawful under *section 1* of the Sherman Act." *The Jeanery, Inc. v. James Jeans, Inc., 849 F.2d 1148, 1152 (9th Cir. 1988)* (internal quotation marks and citation omitted). Moving parties contend that all of the conduct of which Sumotext complains, e.g., Zoove's termination of Sumotext's StarStar leases and increased pricing for new leases, are just as consistent with unilateral business decisions by Zoove as they are with an unlawful conspiracy. Under those circumstances, Moving Parties argue, Sumotext does not plausibly **[*10]** allege a *Section 1* violation. *See Twombly, 550 U.S. at 557* (discussing "[t]he need at the pleading stage for allegations plausibly suggesting (not merely consistent with) agreement"); *Kendall, 518 F.3d at 1049* ("Allegations of facts that could just as easily suggest rational, legal business behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws.").

Moving Parties' argument might be persuasive were Sumotext relying solely on allegations that Zoove terminated its StarStar leases and increased its pricing. However, the TAC contains other allegations that plausibly suggest an agreement by VHT and StarSteve — two separate entities — to acquire Zoove for the purpose of monopolizing the StarStar market and eliminating Sumotext as a competitor. Prior to Mblox's sale of Zoove, Sumotext was the strongest competitor in the StarStar market by volume of StarStar leases and revenue. TAC ¶ 103. As soon as StarSteve and VHT agreed to form VHT StarSteve for the purpose of acquiring Zoove, they went after Sumotext's customers aggressively. *Id.* ¶¶ 71-78. Steve Doumar of StarSteve, Wes Hayden of VHT, and Greg Garvey of VHT told Sumotext's customers that Sumotext did not have the right **[*11]** to renew its StarStar leases and that those leases would be terminated once VHT StarStar acquired Zoove. *Id.* ¶¶ 76-79. Those communications interfered with Sumotext's relationships with its customers, making it difficult for Sumotext to collect on outstanding invoices and thus affecting Sumotext's cash flow. *Id.* ¶¶ 77-78. Once VHT StarStar acquired Zoove, Hayden and Garvey replaced Zoove's directors and senior officers with themselves. *Id.* ¶ 271. Doumar, Hayden, and Garvey, acting on behalf of VHT, StarSteve, and VHT StarStar, caused Zoove to terminate Sumotext's StarStar leases and offer new leases "so onerous that it would have prevented Sumotext from reselling its StarStar numbers." *Id.* ¶¶ 99-102. For example, the rate for Sumotext to lease a StarStar number was increased from $500 per month per number to $500,000 per month per number. *Id.* ¶ 102.

The Court concludes that these allegations constitute "enough factual matter (taken as true) to suggest that an agreement was made." *See Twombly, 550 U.S. at 556*. "Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will **[*12]** reveal evidence of illegal agreement." *Id.* Such a reasonable expectation is raised here. Of course, Sumotext will have to prove the illegal agreement in order to prevail on its *Section 1* claim, and proof may be difficult to muster. However, Sumotext's ability to prove its claims is a question for another day. *See Twombly, 550 U.S. at 556* (a complaint that alleges facts sufficient to suggest an anticompetitive agreement "may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely.") (internal quotation marks and citation omitted).

Relying on *Copperweld*, Moving Parties argue that to the extent other entities were involved in Zoove's business decisions, the Zoove-related entities constitute a single enterprise which cannot collude with itself. In *Copperweld*, the Supreme Court held that "the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act." *Copperweld, 467 U.S. at 771*. In a later decision, *American Needle*, the Supreme Court clarified that the appropriate inquiry "is one of competitive reality," and that "it is not determinative that two parties to an alleged *§ 1* violation **[*13]** are legally distinct entities." *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 196, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*. "The key is whether the alleged contract, combination . . . , or conspiracy is concerted action — that is, whether it joins together separate decisionmakers." *Id. at 195*.

Based on the allegations of the TAC, *Copperweld* does not appear to be applicable. Sumotext alleges that StarSteve and VHT initially formed the conspiracy to monopolize at a time when the two companies were entirely separate entities which were horizontal competitors of Sumotext. Compl. at 2:17-23, ¶¶ 71-73. Moving Parties argue that those allegations are factually incorrect, and that "VHT ultimately bought Zoove outright through a wholly owned subsidiary, rather than in a joint venture with StarSteve." Motion to Dismiss at 8, ECF 222. Moving Parties also dispute Sumotext's characterization of VHT as a horizontal competitor. *Id.* at 14. While Moving Parties ultimately may disprove Sumotext's allegations, at this stage in the proceedings the Court's role is not to resolve factual disputes but to determine whether the TAC states a viable *Section 1* claim. It does for the reasons discussed herein.

It is unclear which, if any, of the defendant entities may be viewed as a single enterprise after Zoove was acquired. While **[*14]** it is alleged that VHT StarStar wholly owned Zoove after the acquisition, StarSteve and VHT remained distinct entities with StarSteve owning a minority of the shares in VHT StarStar and VHT owning a majority. TAC ¶¶ 7, 71-72. Some district courts within the Ninth Circuit have held that minority ownership in a corporation is insufficient to trigger *Copperweld*. See, e.g., *Aspen Title & Escrow, Inc. v. Jeld-Wen, Inc., 677 F. Supp. 1477, 1486 (D. Or. 1987)* ([O]nly corporations which are owned 100% in common, or a de minimis amount less than 100%, are covered by the *Copperweld* rule.").

Moving Parties rely on *Freeman*, in which the Ninth Circuit held that the single-entity rule may apply to "partnerships or other joint arrangements in which persons who would otherwise be competitors pool their capital and share the risks of loss as well as the opportunities for profit." *Freeman v. San Diego Ass'n of Realtors, 322 F.3d 1133, 1147-48 (9th Cir. 2003)* (internal quotation marks and citation omitted). However, "the fact that joint venturers pursue the common interests of the whole is generally not enough, by itself, to render them a single entity." *Id. at 1148*. "[T]he single-entity inquiry is fact-specific." *Id.* In *Freeman*, the case had reached the summary judgment stage and thus that fact-specific inquiry was resolved on a fully developed record. It may be that once **[*15]** the record in this case is fully developed, Moving Parties will be able to demonstrate that the single-entity rule does apply. Because application of the rule is not apparent from the TAC, however, the rule does not constitute a basis for dismissal of Sumotext's *Section 1* claim at the pleading stage.

Moving Parties' arguments based on Zoove's asserted unilateral business decisions and on the single-entity rule thus do not warrant dismissal of Sumotext's *Section 1* claim.

b. Factual Particularity

Nor is the Court persuaded by Moving Parties' assertion that the TAC lacks sufficient factual particularity as to the role of each defendant. The Court dismissed Sumotext's prior iteration of its pleading in part because of a failure to distinguish between defendants that Sumotext referred to as the "VHT StarStar Parties." Order of June 26, 2017

("June 2017 Order") at 16, ECF 175. The Court noted that allegations which lump multiple defendants together are insufficient to put any one defendant on notice of the conduct upon which the claims against it are based. *See* *Chuman v. Wright, 76 F.3d 292, 295 (9th Cir. 1996)*. Moving Parties contend that the TAC does not cure this defect, and that it fails to allege each defendant's role in the conspiracy. *See* *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 1117 (N.D. Cal. 2008)* (complaint **[*16]** "must allege that each individual defendant joined the conspiracy and played some role in it"). However, the TAC distinguishes between the defendants, identifies the individuals who acted on behalf of the entity defendants, and explains each defendant's role in the alleged conspiracy. For example, Sumotext identifies the founders of the conspiracy as Doumar, Hayden, and Garvey; explains which entities those individuals represented and in what capacity, and describes the conduct each individual undertook on behalf of his corporate entity. TAC ¶¶ 65-68, 70-78, 133-41. Claims 4 and 5 break down the antitrust claims element by element, identifying by name each individual and entity whose conduct forms the basis of the claims. While Moving Parties do cite some instances where Sumotext used terms such as "monopolists" and "members of the joint venture," the Court has no difficulty concluding that the TAC as a whole identifies each defendant's role with adequate particularity.

Accordingly, Moving Parties' motion to dismiss Sumotext's *Section 1* Claim (Claim 4) is DENIED.[4]

2. Sherman Act *Section 2* (Claim 5)

Claim 5 alleges conspiracy to monopolize and monopolization in violation of *Section 2* of the Sherman Act. That section **[*17]** provides: "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other persons, to monopolize any part of the trade or commerce . . . shall be deemed guilty of a felony." *15 U.S.C. § 2*. To state a civil claim for conspiracy to monopolize, the plaintiff must allege facts showing: (1) the existence of a combination or conspiracy to monopolize; (2) an overt act in furtherance of the conspiracy; (3) the specific intent to monopolize; and (4) causal antitrust injury. *Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1158 (9th Cir. 2003)*. To state a civil claim for monopolization under this provision, the plaintiff must allege facts showing: (1) the possession of monopoly power in the relevant market; (2) the willful acquisition or maintenance of that power; and (3) causal antitrust injury. *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)*.

Sumotext alleges a "successful conspiracy to monopolize." TAC ¶ 302. Moving Parties contend that Sumotext has not made out a claim of monopolization for several reasons. First, they argue that Sumotext does not adequately plead a relevant market, because Sumotext defines the relevant market as the market for Zoove's StarStar leases. Second, even assuming that the relevant market is the StarStar market as alleged by Sumotext, Moving Parties assert **[*18]** that Sumotext does not allege facts showing that Defendants' conduct resulted in monopolization of the market. Moving Parties also dispute Sumotext's position that the StarStar numbers are an essential facility, and they argue that absent application of the essential facilities doctrine, Sumotext's monopolization claim against Zoove is inadequate. And finally, Moving Parties argue that if Defendants are treated as a single entity, Defendants cannot be liable simply because it holds a natural monopoly on its own product (StarStar numbers).

For the most part, Moving Parties' arguments are merely a rehash of arguments previously rejected by the Court in its order addressing motions to dismiss the second amended complaint. *See* June 2017 Order, ECF 175. No party sought reconsideration of that ruling, and the Court sees no need to revisit it in detail here. Moving Parties' arguments regarding the *Section 2* claim therefore are addressed briefly as follows.

a. Relevant Market

---

[4] In setting forth its reasoning for this ruling, the Court has touched on only those portions of the TAC necessary to dispose of the grounds for dismissal argued in the motion: that Sumotext's allegations are equally consistent with unilateral business decisions by Zoove and that Sumotext has failed to allege each defendant's role in the conspiracy with adequate particularity. The Court need not, and does not, address every issue raised in the parties' briefing, for example, whether Sumotext's group boycott theory properly is evaluated as per se unlawful or under the rule of reason.

"In order to state a valid claim under the Sherman Act, a plaintiff must allege that the defendant has market power within a relevant market." *Solyndra Residual Trust v. Suntech Power Holdings Co., 62 F. Supp. 3d 1027, 1044 (N.D. Cal. 2014)* (internal quotation marks and citation omitted). "A relevant market has two dimensions: **[*19]** the relevant geographic market and the relevant product market." Id. (internal quotation marks and citation omitted). Where the complaint's definition of relevant market is facially unsustainable, the antitrust claim may be dismissed. *Id.* (internal quotation marks and citation omitted).

Sumotext alleges that "[t]he relevant product/service market is the national market for mobile dial codes, which is comprised of three segments: leasing, reselling, and servicing (collectively, the "Market"). TAC ¶ 106. Sumotext also alleges that "[t]he relevant geographic market for mobile dial codes is the United States because mobile dial codes are: a. Registered and leased from the Registry on a nationwide basis; b. Supported by all major wireless carriers in the U.S.; and c. Called from and interconnected to phone lines throughout all the fifty states." *Id.* ¶ 107.

The Court previously found this market definition to be adequate for pleading purposes, rejecting the argument that Sumotext cannot define the relevant market to comprise a commodity controlled solely by Zoove. June 2017 Order at 16, ECF 175. While recognizing that the Sherman Act generally does not restrict a private business from exercising **[*20]** its own independent discretion as to parties with whom it will deal, *see Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, the Court found that Sumotext had alleged facts sufficient to bring this case within a narrow exception to the general rule on the basis that the registry is an "essential facility." June 2017 Order at 16. The Court acknowledged the defense argument that Sumotext had not alleged facts showing that StarStar numbers cannot be reasonably or practically replicated, and considered Defendants' speculation that StarStar numbers are interchangeable with all telephone numbers, with 800 numbers, and with web-based links. *See MetroNet Servs. Corp. v. Qwest Corp., 383 F.3d 1124, 1129-30 (9th Cir. 2004)* ("A facility is essential only if it is otherwise unavailable and cannot be reasonably or practically replicated.") (internal quotation marks and citation omitted). However, the Court concluded that Sumotext had alleged facts sufficient to support its position that the registry is an essential facility. June 2017 Order at 16. The Court noted that whether Sumotext's definition ultimately will stand was not a question to be answered on a motion to dismiss. *Id.*

Moving Parties simply ignore the Court's prior ruling, repeating arguments that the Court already has rejected, for example, that Zoove has a **[*21]** unilateral right to choose with whom it deals; and that Sumotext has not alleged facts showing that StarStar numbers are not reasonably interchangeable with 10-digit phone numbers, 5-digit common short codes, and internet domain names. Repetition of arguments previously considered and rejected by the Court does not constitute a basis for dismissal under *Rule 12(b)(6)*.

b. Monopolization

Moving Parties argue that Sumotext has not alleged facts showing specific intent to control prices or destroy competition in the relevant market as required for a monopolization claim. They argue that Zoove's conduct was motivated by legitimate business reasons, and that Zoove's unilateral decision to change its business model cannot give rise to a *Section 2* claim regardless of who owns it.

As an initial matter, specific intent is required only for the claim of conspiracy to monopolize, not for a claim of monopolization itself. *See Somers, 729 F.3d at 963* (listing elements of claim for monopolization); *Paladin, 328 F.3d at 1158* (listing elements of conspiracy to monopolize). Moreover, the Court cannot make a factual finding that Zoove's conduct was motivated by unilateral, legitimate business justifications as Moving Parties seem to want. Moving Parties urge the Court to **[*22]** disregard as irrelevant Sumotext's allegations regarding the change in ownership of Zoove, because Zoove always had and still has sole authority with respect to StarStar leases and could have engaged in exactly the same conduct even if it had been retained by Mblox. The fact that Zoove *could* have made a unilateral business decision to terminate Sumotext's StarStar leases even if Doumar, Hayden, Garvey, and their respective companies had never entered the picture is not relevant. As discussed in Section II.B.1.a above, it is alleged that StarSteve and VHT entered into a joint venture to acquire control of Zoove and eliminate Sumotext as a competitor, and that they succeeded in both goals. Those allegations, and the supporting facts discussed above, are sufficient to make out a *Section 2* claim.

c. Essential Facilities Doctrine

Moving Parties dispute the application of the essential facilities doctrine. That argument is addressed in part above in connection with Sumotext's market definition.

The Court addresses one additional argument made by Moving Parties: that even if the registry is an essential facility, Sumotext has not alleged that Zoove refused to deal with Sumotext. Moving Parties argue **[*23]** that it appears on the face of the complaint that Zoove did offer to deal with Sumotext, pointing to allegations that Zoove offered StarStar leases to Sumotext at approximately a 10,000% mark-up. "An offer to deal with a competitor only on unreasonable terms and conditions can amount to a practical refusal to deal." *MetroNet, 383 F.3d at 1132*. Another court in this district has held that a 400% price increase was tantamount to a refusal to deal. *See Safeway Inc. v. Abbott Labs., No. C 07-05470 CW, 2010 U.S. Dist. LEXIS 2145, 2010 WL 147988, at *7 (N.D. Cal. Jan. 12, 2010)*. This Court concludes that Sumotext's allegation of the mark-up in the lease rate from $500 per month per StarStar number to $500,000 per month per StarStar number, along with allegations regarding other new lease conditions, are sufficient to allege a practical refusal to deal. *See* TAC ¶¶ 102, 167.

d. Single Entity Monopolization

Finally, Moving Parties argue that if all Defendants are viewed as a single entity, there can be no viable *Section 2* claim. However, a firm's unilateral refusal to deal with its rivals can give rise to antitrust liability. *See Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 448, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*; *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 608-611, 105 S. Ct. 2847, 86 L. Ed. 2d 467, (1985)*.

Accordingly, Moving Parties' motion to dismiss Sumotext's *Section 2* Claim (Claim 5) is DENIED.

C. Mblox

Mblox moves to dismiss Claims 4 and 5 under the *Sherman Act* — the only claims asserted **[*24]** against it — on three grounds. Mblox argues that the TAC does not contain facts showing that Mblox: (1) joined in the alleged conspiracies, (2) had specific intent to seize monopoly power, or (3) caused Sumotext antitrust injury. Because the first ground is dispositive, the Court need not reach the other two.

The Court granted Mblox's motion to dismiss the second amended complaint on the basis that Sumotext had not alleged facts showing that Mblox had joined the alleged conspiracies to restrain trade under *Section 1* of the Sherman Act or monopolize under *Section 2* of the Sherman Act. June 2017 Order 8-10, ECF 175. The Court summarized the evidentiary facts that had been alleged, namely, that Mblox: failed to enforce a confidentiality agreement with the VHT StarStar parties; sold Zoove for a premium price, and assigned Sumotext's contracts, with knowledge that Sumotext's contracts would be terminated after the sale; and retained certain of its existing customers when it sold Zoove. *Id.* The Court found that although those factual allegations perhaps could give rise to an inference that Mblox entered into the alleged conspiracies, they just as easily give rise to an inference that Mblox made a legitimate **[*25]** business decision to sell Zoove and retain certain of its customers. *Id.* at 9. The Court relied on *Syufy Enterprises* in concluding that Mblox's participation in the conspiracy could not be inferred from Mblox's knowledge that the other defendants intended to terminate Sumotext's contracts following Mblox's sale of Zoove. *See Syufy Enterprises v. Am. Multicinema, Inc., 793 F.2d 990, 1000 (9th Cir. 1986)* ("[A] supplier who licenses a product to another does not join the licensee in a conspiracy to monopolize merely because the licensee turns around and exploits the license for its own monopolistic purposes.").

With respect to Sumotext's arguments that Mblox's retention of certain StarStar numbers supported its *Section 2* claim, the Court agreed that the type of carve-out referenced by Sumotext might give rise to a plausible inference that Mblox joined the alleged conspiracies, but it indicated that it could not draw such an inference from the bare-bones allegations provided in the second amended complaint. The Court granted Sumotext leave to amend its Sherman Act claims against Mblox on that basis.

In the TAC, Sumotext repeats the allegations previously found to be deficient by the Court regarding Mblox's failure to enforce the confidentiality agreement and sale of Zoove with knowledge **[*26]** that Sumotext's contracts would be terminated after the sale. TAC ¶¶ 142-66. Sumotext does expand on its allegations regarding Mblox's alleged carve-out, alleging that Tom Cotney of Mblox "inserted language in the agreements" to (1) "carve out exclusive rights to lease StarStar numbers to a list of over 30 marquee prospective StarStar customers"; and (2) "block Mblox's rivals from leasing, reselling or servicing mobile dial codes." TAC ¶ 166; 287. Those allegations do not specify which "agreements" contained the language in question. In fact, the quoted language is drawn from the September 2015 LOI between Mblox and StarSteve, which never came to fruition, and a November 2015 draft of the Stock Purchase Agreement ("SPA") between Mblox and VHT StarStar, which was not the final version executed. TAC Exhs. 9, 12. As discussed above, StarSteve did not go forward with the purchase of Zoove pursuant to the LOI. Moreover, the portion of the LOI referenced in the TAC is designated as non-binding. The Final SPA between Mblox and VHT does not contain any of the language quoted in the TAC regarding the alleged carve-out and horizontal restrictions. Final SPA, ECF 208-3. Although the Final SPA **[*27]** is not attached to Sumotext's pleading, it is referenced in the TAC and the Court considers it under the incorporation by reference doctrine. *See* *Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)*.

Sumotext argues that the Court should not assume that the carve-out and horizontal restrictions negotiated by Mblox in earlier, non-final documents were abandoned just because those provisions were not included in the Final SPA between Mblox and VHT StarStar. Sumotext speculates that the parties may have secretly entered into carve-out and horizontal restriction provisions despite the fact that it appears from the Final SPA that Mblox actually exited the StarStar market. The Court finds Sumotext's theory to be implausible. Certainly it is not more plausible than the other possibility, which is that the Final SPA actually contains the whole of the parties' agreement and Mblox actually left the StarStar market. Consequently, Sumotext has failed to allege facts showing that Mblox joined the alleged conspiracies. *See* *Twombly, 550 U.S. at 557* (discussing "[t]he need at the pleading stage for allegations plausibly suggesting (not merely consistent with) agreement"); *Kendall, 518 F.3d at 1049* ("Allegations of facts that could just as easily suggest rational, legal business behavior by the defendants **[*28]** as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws.").

For these reasons, Sumotext's claims against Mblox are subject to dismissal. In reaching this conclusion, the Court has paid particular attention to Sumotext's contention that Mblox may be liable for selling Zoove with knowledge that the buyers intended to breach Sumotext's contracts. Sumotext has not cited, and the Court has not discovered, a single case imposing antitrust liability in similar circumstances. Absent such authority, the Court is not persuaded that a seller's knowledge that the *buyer* may engage in illegal conduct renders the seller culpable.

A district court ordinarily must grant leave to amend unless one or more of the *Foman* factors is present: (1) undue delay, (2) bad faith or dilatory motive, (3) repeated failure to cure deficiencies by amendment, (4) undue prejudice to the opposing party, and (5) futility of amendment. *Foman v. Davis, 371 U.S. 178, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*; *see also* *Eminence Capital, LLC v. Aspeon, Inc., 316 F.3d 1048, 1052 (9th Cir. 2003)* (discussing *Foman* factors). While the Court finds no undue delay (factor 1) or bad faith (factor 2), the other factors favor dismissal without leave to amend. Despite multiple opportunities to amend its pleading, Sumotext has failed **[*29]** to allege a viable claim against Mblox (factor 3). Sumotext's repeated attempts to cure the defects in its claims against Mblox have prejudiced Mblox's ability to obtain resolution (factor 4). And finally, the Court is satisfied that Sumotext has made its best efforts to state a viable claim against Mblox and it has come up short; any further opportunity to amend likely would be futile (factor 5).

Accordingly, Mblox's motion to dismiss Claims 4 and 5 (the only claims against it) is GRANTED WITHOUT LEAVE TO AMEND.

III. MOTION FOR SANCTIONS

Mblox moves for sanctions against Sumotext for continuing to assert claims against Mblox in the TAC. Mblox's motion is brought under *Federal Rule of Civil Procedure 11* and *28 U.S.C. § 1927*.

A. Legal Standards

Rule 11 of the Federal Rules of Civil Procedure imposes upon attorneys a duty to certify that they have read any pleadings or motions they file with the court and that such pleadings and motions are well-grounded in fact, have a colorable basis in law, and are not filed for an improper purpose. *Fed. R. Civ. P. 11(b)*. If a court finds a violation of this duty, it may impose appropriate sanctions to deter similar conduct. *Fed. R. Civ. P. 11(c)(1)*; *see also Cooter & Gell v. Hartmarx Corp., 496 U.S. 384, 393, 110 S. Ct. 2447, 110 L. Ed. 2d 359 (1990)* ("[T]he central purpose of *Rule 11* is to deter baseless filings in district court."). However, "*Rule 11* is an extraordinary remedy, one to be exercised **[*30]** with extreme caution." *Operating Eng'rs Pension Trust v. A-C Co., 859 F.2d 1336, 1345 (9th Cir. 1988)*. *Rule 11* sanctions should be reserved for the "rare and exceptional case where the action is clearly frivolous, legally unreasonable or without legal foundation, or brought for an improper purpose." *Id. at 1344*. "Where, as here, the complaint is the primary focus of *Rule 11* proceedings, a district court must conduct a two-prong inquiry to determine (1) whether the complaint is legally or factually 'baseless' from an objective perspective, and (2) if the attorney has conducted 'a reasonable and competent inquiry' before signing and filing it." *Christian v. Mattel, Inc., 286 F.3d 1118, 1127 (9th Cir. 2002)*.

Under *28 U.S.C. § 1927*, a court may impose sanctions on an attorney who unreasonably and vexatiously multiplies the proceedings. The statute is intended to deter harassing legal tactics and to compensate their victims. *See Haynes v. City and Cty. of San Francisco, 688 F.3d 984, 987-88 (9th Cir. 2012)*. A court may award sanctions under *§ 1927* if the moving party shows (1) that opposing counsel acted unreasonably; (2) that, by doing so, counsel multiplied proceedings; and (3) that counsel acted with subjective bad faith. *MGIC Indem. Corp. v. Moore, 952 F.2d 1120, 1121 (9th Cir. 1991)*.

B. Discussion

The Court is quite familiar with the parties, counsel, and the claims in this action, having presided over significant motion practice since the complaint was filed more than two years ago. The Court has no difficulty **[*31]** in concluding that the requirements for sanctions under *Rule 11* and *§ 1927* are not present here. Although the Court ultimately has dismissed Sumotext's claims against Mblox without leave to amend, the Court cannot say that any iteration of the complaint was objectively baseless. Mblox was in the thick of the transaction that led to the exclusion of Sumotext from the StarStar market, and the Court was not satisfied until this last round of motion practice that Sumotext ultimately could not state a claim against Mblox.

It is clear that Sumotext's counsel conducted a reasonable and competent inquiry before filing each of the pleadings, including the operative TAC. The fact that the Court was not persuaded by Sumotext's arguments regarding the significance of Mblox's alleged knowledge of the other defendants' intentions does not mean that those arguments were frivolous. The Court is satisfied that counsel did not violate *Rule 11* by filing the TAC, or act with subject bad faith as required for sanctions under *§ 1927*.

Mblox's motion for sanctions against Sumotext is DENIED.

IV. ORDER

(1) The motion to dismiss brought by Defendants Zoove, VHT StarStar, VHT, and StarSteve is DENIED;

(2) The motion to dismiss brought by **[*32]** Mblox is GRANTED WITHOUT LEAVE TO AMEND;
(3) The motion for sanctions brought by Mblox is DENIED; and
(4) A Case Management Conference is set for 11:00 a.m. on May 24, 2018 to discuss the case schedule in light of the Court's rulings on the motions to dismiss.

Dated: April 19, 2018

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate when the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. Fed. R. Civ. P. 56(a). Where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial. A court draws all reasonable inferences in favor of the non-moving party while ignoring conclusory allegations, improbable inferences, and unsupported speculation. Id.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Accompanying Documentation

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN2[] **Opposing Materials, Accompanying Documentation**

On a motion for summary judgment, the onus is on the moving party to demonstrate that no genuine dispute of material fact exists. Once the moving party makes this showing, the nonmoving party must point to specific facts demonstrating a trialworthy issue. Rather than rest upon the mere allegations or denials in the pleading, the nonmovant must set forth specific facts showing that there is a genuine issue of material fact as to each issue upon which it would bear the ultimate burden of proof at trial. Evidence illustrating the factual controversy cannot be conjectural or problematic; it must have substance in the sense that it limns differing versions of the truth which a factfinder must resolve at an ensuing trial.

Antitrust & Trade Law > Sherman Act

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN3[] **Antitrust & Trade Law, Sherman Act**

The provisions of the Rhode Island Antitrust Act mirror those of *§§ 1* and *2 of the Sherman Act*, *15 U.S.C.S. §§ 1* and *2*, and are construed in the same manner as the federal statutes.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN4[] **Scope, Monopolization Offenses**

The kinship between monopoly and monopsony suggests that similar legal standards should apply to claims of monopolization and to claims of monopsonization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN5[] **Actual Monopolization, Claims**

Section 2 of the Sherman Act makes it unlawful to monopolize, or attempt to monopolize any part of the trade or commerce among the several states, or with foreign nations. *15 U.S.C.S. § 2*. The elements of monopolization are (1) possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN6[] Actual Monopolization, Anticompetitive & Predatory Practices

In the absence of any purpose to create or maintain a monopoly, the *Sherman Act* does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal. However, the high value that we have placed on the right to refuse to deal with other firms does not mean that the right is unqualified. That is, under certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] Actual Monopolization, Claims

In Data General, the First Circuit interpreted Aspen Skiing as casting serious doubt on the proposition that the United States Supreme Court has adopted any single rule or formula for determining when a unilateral refusal to deal is unlawful. Indeed, the court recognized that under Aspen Skiing a monopolist's unilateral refusal to deal may arise in very different situations. Other courts have likewise acknowledged that refusal-to-deal law generally -- and Aspen Skiing and Trinko specifically -- is concerned with harm to competition without a valid business justification, which can manifest itself in myriad ways.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Evidence > Burdens of Proof > Burden Shifting

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN8[] Actual Monopolization, Claims

In Data General, the First Circuit set forth a burden-shifting framework that requires a plaintiff to prove a prima facie case that includes showing a monopolist's unilateral refusal to deal with its competitors (as long as the refusal harms the competitive process). Once proved, the monopolist may nevertheless rebut such evidence by establishing a valid business justification for its conduct. The court added that, in general, a business justification is valid if it relates directly or indirectly to the enhancement of consumer welfare. Thus, pursuit of efficiency and quality control might be legitimate competitive reasons for an otherwise exclusionary refusal to deal, while the desire to maintain a monopoly market share or thwart the entry of competitors would not. In essence, a unilateral refusal to deal is prima facie exclusionary if there is evidence of harm to the competitive process; a valid business justification requires proof of countervailing benefits to the competitive process.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN9[] Actual Monopolization, Claims

An offer to deal with a competitor only on unreasonable terms and conditions can amount to a practical refusal to deal for purposes of *§ 2 of the Sherman Act*, *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN10[] **Scope, Monopolization Offenses**

The law does not impose, and a court may not dictate, the precise terms that a defendant must accept; but the law does impose a duty on the defendant to compete fairly, and specifically to not forego short term profits for the purpose of blocking competition and maintaining a monopoly. And in order to enforce this duty, the court -- in fact the jury -- must consider the parties' conduct in the context of the particular markets at issue. Antitrust analysis must sensitively recognize and reflect the distinctive economic legal setting of the regulated industry to which it applies.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN11[] **Conspiracy to Monopolize, Sherman Act**

Section 1 of the Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states. *15 U.S.C.S. § 1*. A conspiracy is born when two or more entities that previously pursued their own interests separately combine to act as one for their common benefit. *Section 1* by its plain terms reaches only "agreements" -- whether tacit or express.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN12[] **Conspiracy to Monopolize, Elements**

At the summary judgment stage a *15 U.S.C.S. § 1* plaintiff's offer of conspiracy evidence must tend to rule out the possibility that the defendants were acting independently. It does not reach independent decisions, even if they lead to the same anticompetitive result as an actual agreement among market actors. In addition, the United States Supreme Court has limited the range of permissible inferences from ambiguous evidence in a *§ 1* case, holding that, at summary judgment, conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy that allows plaintiffs' evidence to reach a jury. But this evidence will reach the jury when it shows parallel behavior that would probably not result from chance, coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Types of Evidence > Circumstantial Evidence

HN13[] **Conspiracy to Monopolize, Elements**

If a plaintiff builds its *15 U.S.C.S. § 1* case around circumstantial evidence, it must rely on "plus factors" as proxies for direct evidence of an agreement. Plus-factor evidence is evidence pointing toward conspiracy; that is, evidence tending to rule out the possibility that the defendants were acting independently.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN14[] **Conspiracy to Monopolize, Elements**

Courts have identified -- and the First Circuit in Evergreen and R.M. Packer Co. countenanced -- a non-exhaustive list of three *15 U.S.C.S. § 1* plus factors: (1) evidence that the defendant had a motive to enter into an antitrust conspiracy; (2) evidence that the defendant acted contrary to its interests; and (3) evidence implying a traditional conspiracy. The third factor, evidence implying a traditional conspiracy, consists of non-economic evidence that there was an actual, manifest agreement not to compete, which may include proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN15[] **Conspiracy to Monopolize, Elements**

A tacit understanding or a wink and a nod can be sufficient for a *15 U.S.C.S. § 1* conspiracy.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN16[] **Conspiracy to Monopolize, Elements**

The United States Supreme Court long ago dispensed with the notion that a court can slice and dice the record in a way that scrutinizes each individual piece of evidence for conspiratorial motive under *15 U.S.C.S. § 1*. Rather, a court must evaluate the evidence based on its aggregate effect, and draw reasonable inferences from the evidence as a whole.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN17[] **Actual Monopolization, Claims**

A plaintiff's monopolization and conspiracy claims are not mutually exclusive. To be clear, behavior consistent with unilateral self-interest refers to lawful independent conduct that furthers competition. There is no discernible reason why an antitrust plaintiff cannot assert both a unilateral monopolization claim and a conspiracy claim; and indeed, the case law supports that these claims can coexist.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN18[] **Conspiracy to Monopolize, Elements**

In *15 U.S.C.S. § 1* cases where acts against self-interest are not fully explained, traditional evidence of conspiracy, i.e., conversations, assurances, and swapping value among the alleged conspirators, prove instructive.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN19[] **Conspiracy to Monopolize, Elements**

Section 1 of the Sherman Act prohibits conspiring to restrain trade whereas § 2 forbids conspiring to attain or maintain a monopoly. Beyond the common requirement of agreement, a § 1 conspiracy has different elements than a § 2 conspiracy. While § 1 of the Sherman Act forbids contracts or conspiracies in the restraint of trade or commerce, § 2 addresses the actions of single firms that monopolize or attempt to monopolize, as well as conspiracies and combinations to monopolize.

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN20[] Intentional Interference, Elements

Although it may be sufficient, it is not necessary for a plaintiff to lodge a successful antitrust claim in order to prove a claim for tortious interference with contractual relations or interference with prospective contractual relations.

Antitrust & Trade Law > Sherman Act > Claims

HN21[] Sherman Act, Claims

To prove causation, a Sherman Act plaintiff must demonstrate that its injury was caused "by reason of" the defendant's anticompetitive conduct. 15 U.S.C.S. § 15(a). A plaintiff need not prove that the antitrust violation was the sole cause of its injury, but only that it was a material cause. The law recognizes that when an injury is attributable to other factors independent of the challenged conduct, a plaintiff has not met its burden.

Antitrust & Trade Law > Sherman Act > Claims

HN22[] Sherman Act, Claims

Antitrust laws have been interpreted to incorporate common law principles of causation. Contingencies, conjecture, and speculation will not support a finding of proximate cause, and will, therefore, not support a finding of antitrust liability.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN23[] Sherman Act, Claims

In the context of an alleged Sherman Act injury, whether the defendants' assumed conduct had been a substantial or material cause of the losses claimed by plaintiff is properly a factual determination for jury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN24[] Actual Monopolization, Anticompetitive & Predatory Practices

To create a jury question on harm to competition in the First Circuit, evidence of actual, present competition is not necessary as long as the evidence shows that the potential for competition exists.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Affirmative Defenses

Torts > Remedies > Damages > Reductions of Damages

Antitrust & Trade Law > Sherman Act > Defenses

HN25[] **Actual Monopolization, Claims**

Although antitrust plaintiffs have a duty to mitigate their losses, the failure to mitigate is an affirmative defense, which the defendant must plead and prove.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN26[] **Remedies, Damages**

Any model supporting a plaintiff's damages case must be consistent with its liability case, particularly with respect to the alleged anticompetitive effect of an antitrust violation.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN27[] **Contract Interpretation, Good Faith & Fair Dealing**

Virtually every contract contains an implied covenant of good faith and fair dealing between the parties.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN28[] **Remedies, Damages**

When an antitrust plaintiff demonstrates it has been damaged, a jury may award nominal damages.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN29[] **Exemptions & Immunities, Parker State Action Doctrine**

The state-action doctrine immunizes from challenge conduct that is the intentional or foreseeable result of state or local government policy. And it has two elements for immunizing supposed compelled conduct: first, the challenged restraint must be one clearly articulated and affirmatively expressed as state policy; second, the policy must be actively supervised by the state itself.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN30[] **Parker State Action Doctrine, Local Governments & Private Parties**

In Patrick, the United States Supreme Court set forth that the active supervision requirement of the state-action doctrine mandates that the state exercise ultimate control over the challenged anticompetitive conduct. The mere presence of some state involvement or monitoring does not suffice. To invoke the doctrine also necessitates that state officials have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy.

Opinion

[*472] **OPINION AND ORDER**

WILLIAM E. SMITH, Chief Judge.

I. Background[1]

In this antitrust action, Plaintiffs Steward Health Care System, LLC, Blackstone Medical Center, Inc., f/k/a Steward Medical Holding Subsidiary Four, Inc., and Blackstone Rehabilitation Hospital, Inc. (collectively, **[**3]** "Steward") claim Defendant Blue Cross & Blue Shield of Rhode Island ("Blue Cross") unlawfully blocked Steward from entering the Rhode Island health care and health insurance markets, by thwarting its attempt to purchase a failing community hospital in receivership, Landmark Medical Center ("Landmark"), in Woonsocket, Rhode Island. (Pls.' Corrected Statement of Disputed Facts ("SDF") ¶ 49, ECF No. 171-1.)

This is a complicated case, and the area of ***antitrust law*** governing the claims is, to put it kindly, confused and opaque. As explained in detail below, the Court's view on the outcome of this motion has changed as a result of careful and complete review of the record and the law; and without question, this is a close case - one that highlights the difficulty of applying less-than-clear antitrust doctrines and precedents to one of the most complicated and volatile sectors of the national economy. In the end, the analysis below has convinced the Court that a trial is required on all counts of Steward's Amended Complaint (ECF No. 90), and therefore Blue Cross's Motion for Summary Judgment (ECF No. 157) will be denied in full (Counts I-XVIII).

A. Landmark

Landmark Medical Center ("Landmark") **[**4]** is a "community based" hospital **[*473]** that has served northern Rhode Island since 1988. See Landmark Medical Center, History, https://www.landmarkmedical.org/About-Us/History.aspx (last visited Apr. 16, 2018). In 2008, facing increasingly difficult financial straits, Landmark entered receivership under the supervision of the Rhode Island Superior Court. (SDF ¶¶ 53, 62.) After entering receivership, Landmark operated under a court-appointed Special Master. (Id. ¶ 62.) Justice Michael Silverstein of the Rhode Island Superior Court oversaw the receivership proceedings and appointed attorney Jonathan Savage as Special Master. (Id. ¶ 63.) Special Master Savage solicited bids for Landmark from prospective buyers, including hospital systems Lifespan, Prime, and Steward. (Id. ¶ 64.)

As early as 1996, Lifespan sought to potentially acquire Landmark. (Id. ¶ 65.) Lifespan's interest resurfaced in the context of Landmark's receivership proceedings in April 2009 when the Special Master requested that Maria Montanaro, then-CEO of Thundermist Health Center ("Thundermist"),[2] "outline a plan for how health services would be delivered in Woonsocket in the event that Landmark were to close." (SDF ¶ 66; Dep. **[**5]** of Maria Montanaro ("Montanaro Dep.") at 38-39, SDF Ex. 27, ECF No. 206-27.) The plan devised by Montanaro "called for the elimination of inpatient acute care at Landmark, and for the facility to provide primarily urgent care, emergency services, and outpatient surgery." (Id. ¶ 67; SDF Ex. 101, ECF No. 210-13; Dep. of Mary Wakefield ("Wakefield Dep.") at 31:1-6, SDF Ex. 30, ECF No. 206-30; Montanaro Dep. at 42:1-45:3, SDF Ex. 27; Dep. of George Vecchione ("Vecchione Dep.") at 14:8-14:14, SDF Ex. 29, ECF No. 206-29.) Underlying the plan was the idea that "a viable way to sustain Landmark hospital given its current financial and operational burdens [did] not appear to exist." (SDF ¶ 69.)

---

[1] This factual discussion, as well as the facts noted throughout this opinion, are taken from the parties' statements of undisputed and disputed facts, as well as the attached exhibits; where disputed, inferences are drawn in favor of the nonmoving party, Steward.

[2] Thundermist is a "major primary care provider" with a large group of primary care physicians that serves many patients in the Woonsocket area. (Pls.' Corrected Statement of Disputed Facts ("SDF") ¶ 47, ECF No. 171-1; id. ¶ 83; Dep. of Robert E. Guyon 94:8-9, SDF Ex. 5, ECF No. 206-5 (explaining Thundermist is key source of prospective patients for area hospitals)). Thundermist provides care to many people who are poor and historically uninsured or underinsured. Few of Thundermist's patients are commercially insured. (See, e.g., SDF Ex. 128, ECF No. 160-29; see also Thundermist Health Center, About Us,, http://www.thundermisthealth.org/AboutUs/AboutUsOverview.aspx (last visited Apr. 16, 2018) ("Thundermist Health Center's goal is to bring healthcare to the people who need it most. . . . Nearly 40% of Thundermist's 42,000 patients in 2013 were uninsured. In 2014, we provided $6.6 million in unreimbursed care."). "Thundermist wanted a future for health care delivery in which it would play a significant role." (Pls.' Statement of Additional Undisputed Facts ("SAUF") ¶ 155, ECF No. 177-1; SAUF Ex. 50, ECF No. 177-51.)

B. The Steward Model

Steward is a for-profit hospital system,[3] which owns and operates multiple hospitals in neighboring Massachusetts.[4] (Id. ¶¶ 9, 11.) In its contracts with Massachusetts health insurance companies, Steward receives compensation on a per-member-per-month ("PMPM") basis rather than a fee based on individual service(s) performed. (Id. ¶ 15.) As Steward describes it, this is a "risk-based" model, in which Steward shoulders "some amount of financial risk of providing **[**6]** healthcare services to the health insurers' members." (Id.) To be **[*474]** successful, such a relationship requires a "working, constructive business relationship that involves the sharing of information and other cooperation" between health insurers and Steward.[5] (Id. ¶ 16.) Moreover, the success of Steward's healthcare vision requires that "the payer and provider must together develop a system for sharing the health-care and health-expense history of the insured patient population, also develop an analytic for total medical expense ('TME') of that population, and agree on reasonable grounds for reducing TME and improving the quality of care." (Pls.' Statement of Additional Undisputed Facts ("SAUF") ¶ 196, ECF No. 177-1.)

Steward's vision was to offer a new, atypical health-care-provider model to Rhode Island. (SDF ¶ 35.) This model was premised on "(1) right-siting care, such that community-based, routine services are performed in community settings, whether hospitals, urgent care centers, ambulatory services centers, or physicians' offices; (2) improving the quality of care provided in the community; [and] (3) negotiating on behalf of an integrated network of physicians and hospitals to drive **[**7]** lower premiums." (SDF ¶ 40.) In exchange for participation in its own "narrow network," Steward would accept lower reimbursement rates. (Id.)

As a part of Steward's vision, its executives believed it could turn around the quality problems Landmark faced; indeed, "that was the fundamental premise of Steward's turnaround plan for the hospital." (SDF ¶ 54.) "Landmark quality of care is generally good, although it has room for improvement." (Id.)

Steward's long term goals extended beyond Landmark; it wanted to acquire more hospitals in Rhode Island. (SDF ¶ 28.) To this end, Steward petitioned the state legislature to amend the Rhode Island Hospital Conversion Act "to eliminate a three-year waiting period between hospital acquisitions by for-profit hospitals, which would have allowed Steward to buy more than one Rhode Island Hospital in a three year period." (SAUF ¶ 139.)

C. The Caritas and Steward Bid To Acquire Landmark

In August 2010, over one year after the receivership commenced, Caritas, Steward's predecessor, submitted a bid to acquire Landmark.[6] (SDF ¶ 76.) A contract with Blue Cross was a precondition to Caritas's proposed Asset Purchase Agreement ("APA"). (Id. ¶ 77.) Feeling that it **[**8]** lacked the essential partners, including Blue Cross, for a successful transaction over Landmark, Caritas withdrew its bid in December 2010. (Id. ¶ 78.) In a press release following the failed transaction, the Special Master "indicated critical discussions related to reimbursement rates with Blue Cross/Blue Shield of Rhode Island did not produce tangible results." (Id.) He added, "To date, this has been our biggest hurdle. Unfortunately, attempts to address our inadequate reimbursement rates with Blue Cross were not productive and in fact stalled our negotiations with Caritas." (Id.)

In May 2011, Steward submitted a new bid to acquire Landmark. (SDF ¶ 79.) An APA was proposed, and although amended fifteen times, this mostly extended the closing deadlines. (Id. ¶¶ 79, 81, 82.) While the various APA versions included numerous conditions, "[n]ot all important matters were included as conditions in the APA, **[*475]** nor were all conditions in the APA clearly 'important.'" (Id. ¶ 79.) Rather than rigid requirements, Steward considered the conditions to be "flexible leverage points for negotiations," or even "window dressing." (Id. ¶¶ 79,

---

[3] Cerberus Capital Management, LP owns a majority and controlling interest in Steward. (SDF ¶ 9.)

[4] At its inception in 2010, Steward owned six hospitals in Massachusetts; by 2012, it owned eleven hospitals. (SDF ¶ 11.)

[5] Steward's risk-based-contract model also contemplates that Steward would compete to an extent with health insurers "for the same premium dollars and Steward performs some functions traditionally performed by insurers." (SDF ¶ 16.)

[6] Steward's acquisition of Caritas was finalized in November 2010. (SDF ¶ 13.)

82.) Indeed, after realizing certain conditions could not be **[**9]** met, Steward nevertheless plowed ahead in attempting to acquire Landmark. (Id. ¶ 79.)

For example, the APA submitted in March 2012 included the following conditions: "An agreement to purchase 100% of Rhode Island Specialty Hospital" ("RISH"); a Memorandum of Understanding ("MOU") with Thundermist; and "[a]n agreement to purchase the interest of 21st Century Oncology ('21st Century') in Southern New England Regional Cancer Center ('SNERCC'), a cancer treatment facility owned jointly by 21st Century and Landmark."[7] (SDF ¶ 81.) Steward made clear that it would consider waiving the Thundermist and SNERCC conditions if and when it became necessary, if that meant Steward would successfully acquire Landmark. (Id. ¶ 82.) ("You know, at the end of the day, it's us and Blue Cross that need to come to an agreement.").

The key to Steward's effort to acquire Landmark was an acceptable arrangement with Blue Cross on reimbursement rates, because, as with all Rhode Island hospitals, this was the primary source of income for services rendered at Landmark. (See id. ¶ 98; SAUF ¶ 173.) For about a year from September 2011 to September 2012, with the assistance of various facilitators, Steward and Blue Cross **[**10]** exchanged numerous and detailed reimbursement-rate proposals for Landmark. (SDF ¶ 86.) Over the course of these negotiations, Steward saw Blue Cross as "moving backwards" because its offers of rate increases always included "quality targets that were unrealistic, given Landmark's condition." (Id.) Blue Cross would not discuss modifying these targets, even though it had done so for other providers. (Id. ¶ 88.) In one of the last mediation sessions the parties had with the Rhode Island Attorney General, the Attorney General informed Steward executives that Blue Cross "just do[es]n't want you to do business in this state." (Id. ¶ 86.)

Steward believed Blue Cross's proposed quality metrics (a part of Blue Cross's Standard Quality Program) were unattainable, so over the long course of negotiations, it proposed quality metrics different than those Blue Cross advanced, but which it believed to be achievable. (SDF ¶ 100.) For example, in September 2011, Steward introduced a proposal for quality metrics "based on year-over-year improvement at Landmark, as opposed to targets based on national averages." (Id.) At every turn, Blue Cross rejected Steward's proposals and refused to stray from its **[**11]** Quality Program's methodology.[8] (Id.)

Beyond the financial issues, Steward needed and wanted Blue Cross to be a "'willing partner.'" (Id. ¶ 88.) After all, the viability of Steward's proposed model turned on a "non-hostile relationship" with Blue Cross. (Id.) Although not expressly set out as an APA condition, everyone involved understood that an agreement with Blue Cross was essential for a successful **[*476]** contract over Landmark. (SDF ¶ 112.)

On August 6, 2012, negotiations being facilitated by the Attorney General came to an acrimonious stop when Steward's team walked away in response to what it viewed as an unproductive, obstinate negotiating approach by Blue Cross. (Id. ¶ 86.) Steward's decision to walk away was met with considerable anger because at the time, some viewed Steward as petulantly abandoning a process that so many people had invested in deeply.[9] Nonetheless, with some prodding, the parties reengaged. (SDF ¶ 87.)

---

[7] The conditions with respect to Thundermist and SNERCC, however, were later omitted from the May 2011 APA and the first *seven amendments* to the APA. (SDF ¶ 82.)

[8] Such provisions were eventually included in the agreed-upon quality program between Blue Cross and Prime, which eventually acquired Landmark. (SDF ¶ 100.) Additionally, "Blue Cross made changes in its quality program for Prime that it had refused to make for Steward, including measuring certain quality metrics against Landmark's past performance and not against national averages." (Id. ¶ 101.)

[9] This ire was best reflected in a letter sent to Steward by the Attorney General. (SDF Ex. 207, ECF No. 204-10.) This letter was met with a fiery and pointed response from Dr. de la Torre, Steward's CEO, summarizing what Steward viewed as Blue Cross's bad faith tactics and the Attorney General's bias and intimidating behavior. (Def.'s Statement of Undisputed Facts ("SUF") Ex. 102, ECF No. 169-33.)

On September 4, 2012, Steward sent a letter to Justice Silverstein that offered two, alternative paths to finalizing the Landmark acquisition. (SDF ¶ 114.) One path consisted of "satisfying the three conditions, with or without an agreement with Blue Cross." (Id. **[**12]**) The other required an agreement with Blue Cross but waived the RISH and Thundermist conditions, and allowed Steward to "deal with SNERCC later." (Id.) A final mediation session with retired Chief Justice Frank Williams of the Rhode Island Supreme Court occurred on September 12, 2012. (Id. ¶ 89.) Alas, this mediation too was unsuccessful. (See id.) Steward publicly announced its decision to withdraw its Landmark bid on September 27, 2012. (Id.) Steward announced,

> In order to move forward with Steward's model of care several conditions needed to be met. These conditions were clearly spelled out in the Asset Purchase Agreement and accepted by the Court. These conditions have not been met. When we were notified that these conditions could not be met, we presented a second path by which we would waive two of these conditions. This alternate condition was also not met.

(Id. ¶ 117.) The difference between Steward's and Blue Cross's rate proposals is the subject of considerable dispute, but, as calculated by Steward, was $3 million. (See SDF ¶ 97.)

D. The "Red Team"

Blue Cross's Chief Financial Officer ("CFO") Michael Hudson, an individual involved in Steward negotiations from August to September 2012, spearheaded what Blue Cross called the "Red Team" in July 2012. (SDF ¶ 87.) The Red Team was a group of Blue Cross employees charged with identifying and analyzing potential competitive threats. (SDF ¶ 87; SAUF ¶ 142.) One of those employees was Linda Winfrey, an Assistant Vice President at Blue Cross responsible for gauging "risks to the enterprise up to and including disruption of services." (SDF ¶ 87.) AVP Winfrey had been considering these issues for **[**13]** Blue Cross since at least May 2012, when she circulated (and later presented at an executive leadership meeting) a document that highlighted Blue Cross's most pressing threats; at the top of that list was the "potential of new competitors entering the market including Accountable Care Organizations (ACO)," which could "result in significant enrollment losses and could negatively affect our long term viability as a health plan." (Id.) In a similar presentation in July 2012, "Competition in the Post-*PPACA* World," "ACO: Supplier Leverage" and "Limited Network Carrier (Steward/Fallon?)" were pinpointed as "new threats" with a high "likelihood of entry to RI market" and a substantial "adverse impact on BCBSRI." (Id.) AVP Winfrey also approved the idea of analyzing Steward's **[*477]** prospective threat in the first round of the Red Team's analysis. (Id.) In that analysis, the Red Team included "a map to show just how well positioned [Steward is] in the southeast part of MA . . . they have St. Anne's, Good Sam's, Morton, Norwood . . . they basically have RI bordered. Then Landmark would be the tip of the spear." (Id.)

Blue Cross expressed concern about ACOs and risk-based contracting, which could strip **[**14]** some or all of an insurance company's traditional functions, and the profits associated with insurance companies bearing risk. (See, e.g., SAUF ¶ 146; SAUF Ex. 35, ECF No. 177-36 at 12 ("[T]he possibility exists for the ACO to develop a level of integration that makes an outside insurer redundant"); Dep. of Dorothy Coleman ("Coleman Dep.") at 435:3-13, 437:18-438:5, SAUF Ex. 7, ECF No. 214-7 (highlighting risk that ACO might team up with an insurance company, which could severely test Blue Cross's relevance)). Blue Cross viewed these issues, referred to as "disintermediation," and the process of "providers becoming payers," as existential threats. (See SAUF ¶ 146.) Blue Cross CEO Peter Andruszkiewicz testified in his deposition that "disintermediation," i.e., "providers becoming payers" and "eliminat[ing] the intermediary known as the payer" "was a concern among my team, me, and every health insurance executive in the United States at this time frame." (Dep. of Peter Andruszkiewicz ("Andruszkiewicz Dep.") at 93, SAUF Ex. 6, ECF No. 214-6.) Likewise, Mark Waggoner, a member of Blue Cross's Executive Leadership Team ("ELT") and a key participant in Caritas discussions, recalled "discussion **[**15]** at Blue Cross at about this same time about the possibility that the ACO model or integrated delivery system could in some sense replace a conventional insurance company" because "you saw some of that happening in some parts of the country" and disintermediation was the "trend in [nationwide] conversations at that point in time." (Dep. of Mark Waggoner ("Waggoner Dep.") at 298, SAUF Ex. 11, ECF No. 214-11.)

The Red Team also analyzed other prospective scenarios, including one in which Prime entered Rhode Island. (SAUF ¶ 147; SAUF Ex. 37, ECF No. 177-38; SAUF Ex. 38, ECF No. 177-39.)

E. Blue Cross's Contract with Landmark

Under the *twelfth amendment* to Landmark's Hospital Participation Agreement with Blue Cross, the Landmark-Blue Cross contract was set to expire July 16, 2012. (SDF ¶ 102.) With negotiations faltering, on May 21, 2012, Blue Cross filed an application for a material modification with the Rhode Island Department of Health ("DOH"), which included draft notice letters informing Blue Cross's subscribers and providers that Landmark might go "out of network." (Id. ¶ 104.) Upon receipt of Blue Cross's material-modification application, the DOH informed Blue Cross that it should send "revised member **[**16]** and physician notification letters" detailing "that until the Department completes its review of this potential change and issues its determination, members will be able to continue to receive covered services at [Landmark and RHRI] at the in-network benefit level, if [the material modification] is not approved prior to the termination of the contract." (Id. ¶ 105.)

This material modification request sent shock waves through the receivership players. On July 2, 2012, Special Master Savage, noting the critical stage of negotiations between Steward and Blue Cross, sought a temporary restraining order ("TRO") from Justice Silverstein to stop Blue Cross from putting Landmark out of network and distributing the letters to subscribers and providers. The Superior **[*478]** Court denied the TRO on July 6, 2012; and on July 9, 2012, Blue Cross mailed letters to providers and subscribers explaining that Landmark might soon be "out of network."[10] (Id. ¶¶ 107-08.) On July 16, 2012, Blue Cross's contract with Landmark terminated; thereafter Blue Cross compensated subscribers directly for healthcare services provided at Landmark. (Id. ¶ 109.) Landmark remained out of network until August 31, 2012, when Blue **[**17]** Cross and Landmark agreed to extend the terms of their participation contract until three months after a buyer acquired the hospital. (Id. ¶ 110.) In agreeing to extend the Landmark contract with Blue Cross as part of a settlement approved by Justice Silverstein, the Special Master felt he had no choice but to bend to Blue Cross's will given the hopsital's precarious condition. With court approval, on September 12, 2012, Landmark was officially back in network. (Id.)

In June 2012, Blue Cross's contracting group considered the risks facing Blue Cross if it chose not to renew any of its contracts with various community hospitals, including Landmark. (SAUF ¶ 179.) Blue Cross knew that removing a hospital from its network could substantially cost Blue Cross because it would force its subscribers to access other, more expensive, in-network hospitals (such as Rhode Island Hospital, Miriam Hospital, or Women's & Infants Hospital). (Id.) Blue Cross also knew that without a contract, Landmark might be forced to close. (Id.) Steward suggests, and Court accepts as true for purposes of this motion, that "Blue Cross knew that the material modification process typically took 4-6 months, and that **[**18]** the cost of being out of contract with [Landmark/]Steward in advance of DOH approval would cost Blue Cross an estimated $3 million per month." (Id. ¶ 180.) Even without contemplating this cost, Steward adds, it would cost Blue Cross much more to remove Landmark from its network than "what Steward was then seeking in terms of reimbursement rate increases." (Id. ¶ 181.) Nevertheless, in spite of knowing full well the short term costs of its decision, Blue Cross concluded that the "path forward for Landmark was to 'hold our position since the material modification ha[d] already been filed.'" (Id.)

Steward states: "Despite the financial risk to Blue Cross of pursuing the material modification, Blue Cross' demands in exchange for a swift resolution on the material modification were those that it believed were necessary to end Steward's bid for the hospital. As Mike Hudson, Blue Cross' CFO and then lead negotiator with Steward explained, he was not going to even talk further with Steward until he learned whether Landmark accepted Blue Cross' terms, since those terms '[c]ould force Steward's hand — if they [Landmark] agreed to the contract, then Steward is likely out." (Id. ¶ 184.)

F. Blue **[**19]** Cross Reaches a Deal with Prime over Landmark

---

[10] Although Blue Cross had from time to time filed paperwork to initiate the material-modification process during lagging negotiations with other hospitals, this move was unprecedented: "at no time before the Landmark situation had it ever sent out letters to subscribers and doctors alerting them that any other hospital was about to be out of network." (SAUF ¶ 175.) "Nor had Blue Cross ever before stopped payments to a hospital that was still officially 'in network' and instead directed payments to the subscribers, leaving to the hospital the difficult burden of collecting the monies due from the patients themselves." (Id. ¶ 176.)

Once Steward withdrew from the process, Prime[11] submitted a proposed APA for Landmark to the Special Master on **[*479]** September 26, 2012. (SDF ¶ 119.) After lengthy negotiations, Prime acquired Landmark on December 31, 2013. (Id. ¶¶ 122, 125.) The quality program Blue Cross reached with Prime included provisions that it would not accept when presented by Steward, namely evaluating Landmark "based on improvement in Landmark's performance against past performance" rather than national averages. (Compare SDF Ex. 195 at 6-7, ECF No. 203-16, and SDF Ex. 198 at 14, ECF 204-1 ("Blue Cross Blue Shield of Rhode Island Hospital Quality Program 2014") ("BCBSRI compares each hospital . . . to the threshold targets established using the national average results from a selected comparison measurement period . . . unless otherwise determined by contract."), with SDF Ex. 197 at 11, ECF No. 203-18 (Blue Cross and Prime agreement over Landmark) ("Both parties to establish mutually agreeable improvement targets based on Landmark's own baseline CY 2013 data . . . .")). Although Prime has succeeded to some degree in righting the ship for Landmark by increasing patient **[**20]** volume and revenue, (see SDF ¶ 127), it is hotly disputed whether Prime brought efficiency and innovation to Rhode Island through Landmark. (See id.; SDF Ex. 37 at 25, ECF No. 171-38 (noting Landmark's operating expenses under Prime increased from $109.3 million in 2013 to $130.6 million in 2015 and $130.4 million in 2016). Indeed, Prime has not developed an ACO, a significant physician network, or risk-based contracts. (See SAUF ¶ 197; Prime 30(b)(6) Dep. of Richard R. Charest ("Charest Dep.") at 74:10-76:5, 85:10-15, SAUF Ex. 14, ECF No. 214-14 ("We don't have risk-based contracts."); SAUF Ex. 102 at 3, ECF No. 215-27 (Jones of Thundermist recalling meeting with Prime CEO, where "it was clear to me that the Prime model does not consider health care efficiency as an overall goal.")). Although at Landmark now "[t]here's a nice piano in the entrance" and "[i]t's looking nicer," Prime has not made substantive improvements "in terms of quality or community partnership." (SAUF ¶ 201; Dep. of Charles "Chuck" Jones ("Jones Dep.") 286:18-287:4, SAUF Ex. 12, ECF No. 214-12.)

G. Procedural History

Steward filed its first complaint against Blue Cross on June 4, 2013, in which Steward alleged that **[**21]** Blue Cross's unilateral conduct violated *Section 2 of the Sherman Act* and *Section 6-36-5 of the Rhode Island Antitrust Act*. (Compl. ¶¶ 62-114, ECF No. 1.) On July 15, 2013, Blue Cross moved to dismiss Steward's complaint (ECF No. 16); this Court denied Blue Cross's motion on February 19, 2014 (ECF No. 34); see also *Steward Health Care Sys., LLC v. Blue Cross & Blue Shield of R.I., 997 F. Supp. 2d 142 (D.R.I. 2014)* ("Steward I"). Following the commencement of discovery, Steward filed an amended complaint on August 26, 2015, adding claims under *Section 1 of the Sherman Act*, suggesting Blue Cross's conduct was part of a conspiracy with Lifespan and Thundermist to keep Steward out of Rhode Island.

On July 14, 2017, Blue Cross moved for summary judgment on all counts of Steward's amended complaint. Steward filed a response in opposition (ECF No. 172) on August 11, 2017, to which Blue Cross replied (ECF No. 219) on August 25, 2017. The Court heard oral argument by the parties on September 26, 2017 (ECF No. 229). With a firm trial date approaching in January 2018, on November 29, 2017, the Court issued a Notice Regarding Defendant's Motion for Summary Judgment (ECF No. 338) indicating that it tentatively had decided to grant Blue Cross's summary-judgment **[*480]** motion on all counts, and cancelling the trial date. The Court noted **[**22]** that an Opinion and Order would be forthcoming. Since that Notice, the Court's assessment of Blue Cross's motion has evolved; this Opinion and Order sets forth the reasons for the Court's determination that summary judgment should be denied.

II. Legal Standard

HN1[] Summary judgment is appropriate when "the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. "Where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no 'genuine issue for trial.'" *Evergreen Partnering Grp., Inc. v. Pactiv Corp., 832 F.3d 1, 7 (1st Cir. 2016)* (quoting *Matsushita Elec. Ind. Co. v. Zenith Radio Corp., 475 U.S. 574, 585-86, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986))*. The Court "draws all

[11] With forty-four hospitals and 43,500 employees, in fourteen states, Prime has substantial experience in the business of reviving distressed hospitals. (SDF ¶ 120.)

reasonable inferences in favor of the non-moving party while ignoring conclusory allegations, improbable inferences, and unsupported speculation." Id. (quoting *Alicea v. Machete Music, 744 F.3d 773, 778 (1st Cir. 2014))*.

HN2[] The onus is on the moving party to demonstrate that no genuine dispute of material fact exists. *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. "Once the moving party makes this showing, the nonmoving party must point to specific facts demonstrating a trialworthy issue." *United States v. Giordano, 898 F. Supp. 2d 440, 447 (D.R.I. 2012)*. Rather than rest "upon the mere allegations or denials in the pleading," the nonmovant "must set forth specific facts showing that there is a genuine issue of material fact as to each issue upon which **[**23]** [it] would bear the ultimate burden of proof at trial." *Santiago-Ramos v. Centennial P.R. Wireless Corp., 217 F.3d 46, 53 (1st Cir. 2000)*. "[E]vidence illustrating the factual controversy cannot be conjectural or problematic; it must have substance in the sense that it limns differing versions of the truth which a factfinder must resolve at an ensuing trial." *Mack v. Great Atl. & Pac. Tea Co., 871 F.2d 179, 181 (1st Cir. 1989)*.

III. Discussion

A. The Refusal-To-Deal Claim (Counts I, II, V, VI, IX, X, XIII, and XIV)[12]

In 1980, Judge Keith of the Sixth Circuit Court of Appeals complained that the question of when "a monopolist ha[s] a duty to deal . . . is one of the most unsettled and vexatious in the antitrust field." *Byars v. Bluff City News Co., 609 F.2d 843, 846 (6th Cir. 1980)*. Although nearly forty years of ink has spilled on the topic - including the Supreme Court's - Judge Keith's lament is as apt today as it was when Jimmy Carter was President.[13] As **[*481]** one commentator succinctly put it, "There is a problem with *Section 2* of the Sherman Act: nobody knows what it means." Thomas A. Lambert, Defining Unreasonably Exclusionary Conduct: The "Exclusion of a Competitive Rival" Approach, *92 N.C. L. Rev. 1175, 1177 (2014)*. Nevertheless, this Court must resolve the difficult (and admittedly close) Sherman Act *section 2* question posed by this case: has Steward raised a triable issue as to whether Blue Cross engaged in a predatory refusal to deal **[**24]** by blocking Steward from entry into the Rhode Island health care and health insurance markets? While the question is close - and indeed the Court was initially inclined to grant summary judgment - careful consideration of the case law, facts, and the applicable antitrust policy objectives, has convinced the Court that the answer is yes, and therefore Blue Cross's motion must be denied.

HN5[] *Section 2* of the Sherman Act makes it unlawful to "monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*. "The elements of monopolization are '(1) possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'"[14] *Díaz Aviation Corp. v. Airport Aviation Servs., 716 F.3d 256, 265 (1st Cir.*

[12] To the extent that Steward asserts claims under the Rhode Island Antitrust Act, as opposed to the *Sherman Act*, this Court, like the parties, analyzes the claims together, here and throughout this Opinion (including Steward's conspiracy claims). See *R.I. Gen. Laws § 6-36-2(b)*; *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 239 F. Supp. 2d 180, 186-87 (D.R.I. 2003)* (***HN3***[] "The provisions of the *Rhode Island Antitrust Act* mirror those of *§§ 1-2* of the Sherman Act . . . and are construed in the same manner as the federal statutes."). For similar reasons, the Court likewise does not separate out Steward's monopsonization and attempted monopsonization claims from Steward's monopolization and attempted monopolization claims. See *Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 320-22, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)* (***HN4***[] "The kinship between monopoly and monopsony suggests that similar legal standards should apply to claims of monopolization and to claims of monopsonization.").

[13] Indeed, one recent law review article recounts various descriptions for the standard to discern exclusionary conduct in a manner that this Court can appreciate. See Katharine Kemp, A Unifying Standard for Monopolization: "Objective Anticompetitive Purpose", 39 Hous. J. Int'l L. 113, 115 (2017) ("The standards applicable to the second element, exclusionary conduct, have been variously described as 'vacuous,' 'uncertain,' 'elusive,' 'unclear,' 'unsettled,' 'oxymoronic,' 'in substantial disarray,' 'in dire need of correction,' and plagued by 'serious definitional inadequacies.'" (citations omitted)).

[14] Blue Cross's monopoly power - which is "typically proven by defining a relevant market and showing that the defendant has a dominant share of that market" - has been assumed by the parties for purposes of this motion. *Díaz Aviation Corp. v. Airport*

2013) (quoting United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)). **HN6**[] "In the absence of any purpose to create or maintain a monopoly, the act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal **[**25]** . . . ."[15] United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919). "However, '[t]he high value that we have placed on the right to refuse to deal with other firms does not mean that the right is unqualified.'" Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004) (quoting Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)). That is, "[u]nder certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate § 2." Id.; see also Pacific Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 448, 129 **[*482]** S. Ct. 1109, 172 L. Ed. 2d 836 (2009) ("[T]here are rare instances in which a dominant firm may incur antitrust liability for purely unilateral conduct.").

The two leading cases in this area - Aspen Skiing and Trinko - are well-known, often-cited, and require detailed discussion. Aspen Skiing involved the Aspen ski area, which comprised four distinct mountains. The defendant owned three mountain areas, and the plaintiff owned the fourth. For more than fifteen years, the parties had arranged to issue a joint-ski pass for access to all four mountains. So when the defendant suddenly terminated the joint-ski-pass agreement, the plaintiff - concerned that skiers would no longer frequent its mountain without a joint-ski pass available - "tried a variety of increasingly desperate measures to re-create the joint ticket, even to the point of in effect offering to buy the defendant's **[**26]** tickets at retail price." Trinko, 540 U.S. at 408-09 (citing Aspen Skiing, 472 U.S. at 593-94). The defendant steadfastly refused to recreate the joint-ski-pass arrangement. Aspen Skiing, 472 U.S. at 594. The issue before the Aspen Skiing Court was whether defendant Ski Co., in terminating its four-mountain ticket with plaintiff Highlands, was "attempting to exclude rivals on some basis other than efficiency." Id. at 605. The Court concluded that there was sufficient evidence to suggest that the defendant "was not motivated by efficiency concerns and that it was willing to sacrifice short-run benefits and consumer goodwill in exchange for a perceived long-run impact on its smaller rival," and therefore upheld a jury verdict for the plaintiff. Id. at 610-11.

Several years later, in Trinko, the Court reconsidered Aspen Skiing and distinguished it. 540 U.S. at 408-11. Trinko involved firms regulated under the Telecommunications Act of 1996, which required that incumbent local exchange carriers ("ILECs"), like defendant Verizon, share (i.e., "unbundle") aspects of its network with prospective entrants, competitive local exchange carriers ("CLECs"). 540 U.S. at 402. The plaintiff lodged a class action pursuant to § 2 on behalf of CLECs, which complained that Verizon filled rivals' orders in a slow and discriminatory manner so as to **[**27]** discourage customers from choosing its competitors' services. Id. at 404-05. The Court held that the facts of Trinko were not comparable to those in Aspen Skiing. Id. at 408-11. In doing so, it noted that the Aspen Skiing Court "found significance in the defendant's decision to cease participation in a cooperative venture," adding that the "unilateral termination of a voluntary (and thus presumably profitable) course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end." "Similarly, the defendant's unwillingness to renew the ticket even if compensated at retail price revealed a distinctly anticompetitive bent." Id. at 409.

Both Aspen Skiing and Trinko provide significant guidance on what a refusal-to-deal claim might (Aspen Skiing) - or might not (Trinko) - look like. But neither dictated what such a claim must look like. As this Court reads these cases, they do not specify granular factual predicates that must be present for a refusal-to-deal claim to move forward; rather, the Supreme Court identified facts that, in the circumstances of each case, pointed toward conduct that may or may not be characterized as "exclusionary" or "anticompetitive." Aspen Skiing, 472 U.S. at 603-04. In Aspen

---

Aviation Servs., 716 F.3d 256, 265 (1st Cir. 2013) (citing Coastal Fuels of P.R., Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 196-97 (1st Cir. 1996)).

[15] The Supreme Court in Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004) quoted this passage from United States v. Colgate & Co. but left out the key qualifying language, "In the absence of any purpose to create or maintain a monopoly[.]" 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919). Although this omission perhaps reflects the Supreme Court's narrowing of Section 2 liability in Trinko, the qualifying language in Colgate has never been countermanded and appears to remain the standard.

Skiing, the Supreme Court concluded **[**28]** "Ski Co.'s decision to terminate the all-Aspen ticket" could "fairly be characterized as exclusionary . . . ." *472 U.S. at 604*. When the Court discussed **[*483]** and distinguished Aspen Skiing in Trinko, it noted that "[t]he Court there found significance in the defendant's decision to cease participation in a cooperative venture." *540 U.S. at 409* (citing *472 U.S. at 608, 610-11)*; the Court added, "[t]he unilateral termination of a voluntary . . . course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end." Id. (emphasis added); and finally, "the defendant's unwillingness to renew the ticket even if compensated at retail price revealed a distinctly anticompetitive bent." Id. (second emphasis added). The Court's descriptive, provisional language makes clear that it regarded Aspen Skiing as a paradigmatic example of - not a paint-by-numbers kit for - unlawful refusals to deal. See *Trinko, 540 U.S. at 411* ("Antitrust analysis must always be attuned to the particular structure and circumstances of the industry at issue.").

Much of the confusion over Aspen Skiing and Trinko results from courts of appeals that either misread or deliberately extend the holdings of these cases, construing them in a rigid fashion to require, for **[**29]** example, an explicit prior course of dealing.[16] See, e.g., *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1074 (10th Cir. 2013)* ("First, as in Aspen, there must be a preexisting voluntary and presumably profitable course of dealing between the monopolist and rival.") (emphasis added); *In re Elevator Antitrust Litig., 502 F.3d 47, 52 (2d Cir. 2007)* (requiring "alleg[ation] that defendants terminated any prior course of dealing" as "the sole exception to the broad right of a firm to refuse to deal with its competitors"); *Covad Commc'ns Co. v. BellSouth Corp., 374 F.3d 1044, 1049 (11th Cir. 2004)* ("Trinko now effectively makes the unilateral termination of a voluntary course of dealing a requirement for a valid refusal-to-deal claim under Aspen."). Novell (authored by now-Justice Gorsuch) and In re Elevator Antitrust Litigation, in particular, use emphatic language to describe the "mandatory" holding of Trinko; Covad uses less strident words ("effectively makes . . . unilateral termination . . . a requirement"). But without sugar-coating it, Aspen Skiing and Trinko just do not say what these courts say they do. And while there may be antitrust policy reasons that support pulling back the reins on refusal-to-deal claims, it is up to the Supreme Court to take this step. Until then, Aspen Skiing and Trinko, in this Court's view, should be applied as written, in concert with the instructive holdings **[**30]** of the First Circuit.[17]

The First Circuit has not had occasion to interpret Trinko, but what it has said about Aspen Skiing is instructive. ***HN7***[] In Data General Corp. v. Grumman Sys. Support Corp., the court interpreted Aspen Skiing as "casting serious doubt on the proposition **[*484]** that the Court has adopted any single rule or formula for determining when a unilateral refusal to deal is unlawful." *36 F.3d 1147, 1183 (1st Cir. 1994)*, abrogated on other grounds by *Reed Elsevier, Inc. v. Muchnick, 559 U.S. 154, 130 S. Ct. 1237, 176 L. Ed. 2d 18 (2010)*. Indeed, the court recognized that under Aspen Skiing "a monopolist's unilateral refusal to deal" may arise "in . . . very different situation[s]." Id.

Other Courts have likewise acknowledged that refusal-to-deal law generally - and Aspen Skiing and Trinko specifically - is concerned with harm to competition without a valid business justification, which can manifest itself in myriad ways. See, e.g., *In re Thalomid & Revlimid Antitrust Litig., No. 14-6997 (KSH) (CLW), 2015 U.S. Dist. LEXIS 177541, 2015 WL 9589217, at *15 (D.N.J. Oct. 29, 2015)* ("[The defendant] reads Aspen Skiing and Trinko too narrowly. The termination of the dealing between Ski Co. and Highlands was used as circumstantial evidence of Ski Co.'s demonstrated anticompetitive motivation, along with its lack of legitimate business justifications for doing so."); *Helicopter Transp. Servs. v. Erickson Air-Crane, Inc., No. CV 06-3077-PA, 2008 U.S. Dist. LEXIS 3466, 2008 WL*

---

[16] Indeed, at the motion-to-dismiss stage, this Court may well have implied that Steward must meet what the Court described as the "baseline requirements" of a refusal-to-deal claim: the "unilateral abandonment of a voluntary course of dealing, forsaking of short-term profits, refusal to transact business with the plaintiff even if compensated at rates set by the defendant, and concomitant inability to provide a legitimate business rationale . . . ." *Steward I, 997 F. Supp. 2d at 153*. After a more careful review of the cases, however, the Court is of the view that to require, without exception, each of these factors to make out a refusal-to-deal claim (as Blue Cross would have it) is to misconstrue Aspen Skiing and Trinko.

[17] A policy reason against requiring the termination of a prior course of dealing is that to do so would be to discourage new, mutually beneficial market arrangements, thereby entrenching the status quo. See *Olympia Equip. Leasing Co. v. W. Union Tel. Co., 797 F.2d 370, 376 (7th Cir. 1986)* (Posner, J.) ("[T]he law would be perverse if it made Western Union's encouraging gestures the fulcrum of an antitrust violation.").

151833, at *9 (D. Or. Jan. 14, 2008) **[**31]** ("That Erickson and HTS had no prior course of dealing is immaterial. The Supreme Court has never held that termination of a preexisting course of dealing is a necessary element of an antitrust claim. It was merely one of several facts in Aspen Skiing that supported a finding that the refusal to deal was intended to exclude competition rather than to advance a legitimate business interest.").[18]

The question this Court must decide on summary judgment, then, is whether a genuine and material factual dispute exists as to whether Blue Cross's conduct, which Steward characterizes as a unilateral refusal to deal with Steward, amounts to illegal exclusionary conduct as opposed to lawful, vigorous competition. Data General provides a rubric to assess this question. There, ***HN8***[] the court set forth a burden-shifting framework that requires a plaintiff to prove a prima facie case that includes showing "a monopolist's **[**32]** unilateral refusal to deal with its competitors (as long as the refusal harms the competitive process)." *Data General, 36 F.3d at 1183*. Once proved, the monopolist "may nevertheless rebut such evidence by establishing a valid business justification for its conduct."[19] *Id. at 1183*. The court added:

> **[*485]** In general, a business justification is valid if it relates directly or indirectly to the enhancement of consumer welfare. Thus, pursuit of efficiency and quality control might be legitimate competitive reasons for an otherwise exclusionary refusal to deal, while the desire to maintain a monopoly market share or thwart the entry of competitors would not. In essence, a unilateral refusal to deal is prima facie exclusionary if there is evidence of harm to the competitive process; a valid business justification requires proof of countervailing benefits to the competitive process.

Id. (internal citations omitted).

Blue Cross has not structured its summary judgment argument to correspond to the Data General burden shifting rubric; it has instead directed its argument almost exclusively at Steward's theory at the prima-facie stage, while peppering its argument here and there with legitimate business reasons for its behavior. Likewise, **[**33]** the Court will not attempt to frame its analysis along a strict Data General framework, but will deal with the arguments, essentially as presented by Blue Cross. The bottom line is that the evidence Steward has presented meets its prima facie burden, and Blue Cross's claim of legitimate business reasons - to the extent the Court can identify them[20] - is sufficiently rebutted by Steward.

---

[18] Indeed, commentators more-or-less agree that the Supreme Court has chosen not to enunciate an all-encompassing framework for refusal-to-deal liability. See, e.g., James A. Keyte, The Ripple Effects of Trinko: How It Is Affecting *Section 2* Analysis, 20 Antitrust 44, 49 (Fall 2005) ("Lower courts . . . have not read Trinko as even attempting to construct a generalized predation test or endorsing any particular analysis . . . ."); Robert A. Skitol, Three Years After Verizon v. Trinko: Broad Dissatisfaction with the Whole Thrust of Refusal to Deal Law, 6 Antitrust Source 1, 1 (2007) ("Today, after more than three years of experience with lower courts' applications of the Court's ruling, Trinko has proven to be among the least satisfactory antitrust opinions of the Supreme Court in the past three decades. It has unsettled more than it has settled; made the law less rather than more predictable; and exacerbated more than resolved the most contentious controversies in monopolization and attempted monopolization cases."); Edward D. Cavanagh, Trinko: A Kinder, Gentler Approach to Dominant Firms Under the Antitrust Laws?, *59 Me. L. Rev. 111, 126 (2007)* ("The question of when non-price exclusionary behavior by a monopolist is unlawful is complex. The Court in Trinko chose not to articulate a bright-line rule.").

[19] The D.C. Circuit Court of Appeals endorsed a similar burden-shifting framework in *United States v. Microsoft Corp., 253 F.3d 34, 58-59, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*. There, recognizing the difficulty in "stating a general rule between exclusionary acts, which reduce social welfare, and anticompetitive acts, which increase it," the court laid out a five-step framework to decide "[w]hether any particular act of a monopolist is exclusionary, rather than merely a form of vigorous competition." *Id. at 58-59*. The Microsoft five-step framework, while not binding, may be useful at trial in framing instructions for the jury.

[20] Blue Cross's argument rests primarily upon a theory that it did not, as a matter of law, refuse to deal with Steward in violation of *Section 2*. Its legal argument is incorrect for the reasons explained.

Aspen Skiing and Trinko, properly read, provide useful guidance as to whether Blue Cross's conduct amounted to a refusal to deal motivated by anticompetitive animus. While the indicators of anticompetitive animus here vary somewhat from what the Supreme Court identified in *Aspen Skiing* and *Trinko*, those differences are reflective of the very different marketplaces at issue (healthcare and health insurance as opposed to ski resorts and regulated telecommunications). Potentially anticompetitive behavior by market participants is bound to manifest itself differently in different markets. See *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 466-67, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***.").

Here, Steward sets forth an abundance of evidence that points toward a "distinctly **[**34]** anticompetitive bent," which could in turn persuade a reasonable jury that Blue Cross unlawfully monopolized the relevant markets by excluding Steward from Rhode Island.

Some of the evidence that supports Steward's theory, viewed in the light most favorable to Steward, is as follows.[21] The first category of evidence that points toward exclusionary conduct concerns Blue Cross's conduct with respect to Landmark itself and whether Blue Cross terminated its prior course of dealing with Landmark to keep Steward out of Rhode Island. The evidence suggests that Blue Cross terminated a longstanding, presumably profitable course of dealing with Landmark in order to block Steward. It is of no consequence **[*486]** that Blue Cross did not have or terminate a prior course of dealing directly with Steward at Landmark, for the reasons discussed above; the critical question is how Blue Cross dealt with Landmark in the context of the effort by Steward to purchase it.

It is undisputed that Blue Cross and Landmark entered into a hospital-participation agreement in 2006, which had been routinely extended multiple times. (SDF ¶ 57.) That all ended when Blue Cross allowed its contract with Landmark to expire on July **[**35]** 16, 2012. (See id. ¶¶ 102, 109.) In May 2012, while in the midst of difficult negotiations with Steward in connection with Steward's bid to acquire Landmark through the receivership, Blue Cross filed the necessary papers with the DOH for a "material modification" - i.e., official permission to remove Landmark from its provider network. (SDF ¶ 104; SDF Ex. 202, ECF No. 212-45.) This step was not necessarily unusual, as Blue Cross had, on other occasions, taken steps to institute the material modification process with the DOH when negotiations with other hospitals stalled. (SAUF ¶ 175.) Blue Cross, however, did not stop there. Although it had not yet received DOH approval, on July 9, 2012, Blue Cross informed subscribers via letter that the Landmark contract would expire on July 16, and "[i]f the [DOH] approves the network change, Landmark Medical Center will be considered out of network on August 1, 2012 . . . ." (SAUF Ex. 84 at 2, ECF No. 215-9.) Blue Cross added, "Despite our continued efforts to resolve the current situation, we feel it's important to notify our members that a resolution is doubtful at this time." (Id.)

Never before had Blue Cross mailed a letter to doctors and subscribers **[**36]** notifying them of the immediate and impending removal of a member hospital from its network. To be clear, it was not just the notification that was remarkable; never before or since has Blue Cross kept true to its initial material modification application promise by actually allowing a hospital to go "out of network."[22]

---

[21] As with the factual background presented at the outset of the Opinion, this review of Steward's evidence is not intended to be exhaustive. Rather, it simply highlights a sample of Steward's factual presentation, which is sufficient under *Rule 56* to raise a genuine and material factual dispute requiring a trial.

[22] Deposition testimony of Blue Cross employees is enlightening. Blue Cross's CFO Michael Hudson testified:

> Q. Has it been Blue Cross's experience that when it sends out letters announcing that hospitals are going to be out of network after a certain date, that those letters have no impact on usage of the hospital?
>
> A. I don't have data that indicate that one way or the other. I would say that the point is, no hospital's ever been out of network. . . . But in the time I was there, with no hospital that I was aware of, nor any, you know, significant medical group have they ever actually gone nonparticipating.
>
> . . .

The consequences of Blue Cross permitting a hospital to - for the first time ever - go "nonparticipating," and of sending a letter to members about it were significant; so significant, in fact, that the Special Master tried to put a halt to it and to extend Blue Cross's contract with Landmark. (SDF ¶ 103; SDF Ex. 90, ECF No. 210-2; SDF Ex. 219, ECF No. 213-14.) On July 2, 2012, the Special Master moved for **[*487]** an emergency TRO "to preserve the status quo by restraining Blue Cross . . . from notifying subscribers or the public that it has filed a request for material modification of health insurance plans in order to remove Landmark Medical Center . . . from its provider network." (SAUF ¶ 177; SAUF Ex. 83 at 3, ECF No. 215-8.) In that filing, the Special Master argued that, "[s]ending a letter to subscribers and providers notifying them that LMC and RHRI will be out-of-network providers after August 6, 2012 is premature and very likely misleading and inaccurate. . . . [g]iven the hurdles that Blue Cross must overcome to obtain DOH approval and such additional federal **[**38]** approvals that may be needed." (SAUF Ex. 83 at 5-6.) He added, "Injunctive relief is further warranted to protect Landmark, patients and physicians from the chaos and confusion that will result from a letter that incorrectly advises them that [Landmark] and RHRI will be out-of-network providers as of August 6, 2012."[23] (Id. at 9.)

Blue Cross's conduct in removing Landmark from its network and prematurely notifying subscribers about such a possibility strayed far from its ordinary course of dealing with Landmark, or any other hospital for that matter. A reasonable jury could conclude that Blue Cross's uniquely hard-core approach with respect to Landmark, just as negotiations with Steward were at a critical stage, was not a legitimate business decision, but was designed to kill the Steward acquisition. Indeed, Blue Cross itself implicitly recognized this in its application for material modification to the DOH: "Despite our best efforts to provide Steward with a fair and reasonable rate . . . we are concerned that we may not be able to come to an agreement with Steward . . . . If we are not able to come to agreement with Steward by [July 16, 2012], Landmark will then become non-participating in **[**39]** the BCBSRI network." (SDF Ex. 202 at 2.)[24] It is undisputed that Landmark remained out of network until August 31, 2012, at which point the Special Master and Blue Cross agreed to extend the terms of the hospital participation contract until three months after a buyer acquired Landmark. (SDF ¶ 110.) The Special Master agreed to this settlement, however, only because Landmark's condition once removed from network left him no other choice but to accept whatever terms Blue Cross demanded. (SDF Ex. 205 at 3, 4, ECF No. 204-8 (in Special Master's emergency petition to superior court for instructions on September 6, 2012, explaining that Landmark going out of network caused "the cash receipts of Landmark" to "decline[] precipitously" and "a substantial loss of patients" and "The Special Master believes that the very survival of Landmark and RHRI is at stake and that he had no other alternative but to execute

---

> Q. Can you remember any other occasion during your tenure at Blue Cross where, with respect to one of the hospitals in Rhode Island, you sent out letters to people saying, On such-and-such a date, Westerly or South County or whoever it might be, is going to be out of network?
>
> A. Not in the time I worked there.

(Dep. of Michael Hudson ("Hudson Dep.") 146:2-16, 148:4-10, SAUF Ex. 9, ECF No. 214-9.)

And Shawn Donahue, Blue Cross's Director of Government Relations, had a consistent recollection:

> Q. So since 2012, has Blue Cross sent out letters to members **[**37]** informing them that a hospital will be removed from its network?
>
> A. . . . I don't recall that I'm aware of any such letters.

(Dep. of Shawn Richard Donahue ("Donahue Dep.") at 310:5-9, SAUF Ex. 8, ECF No. 214-8.)

[23] It is of little consequence that Justice Silverstein did not grant the TRO; the important point is that the Special Master perceived this move by Blue Cross as a potentially catastrophic economic event.

[24] Other evidence the jury may have to consider includes the Attorney General's comment to Steward officials at a negotiation session that, Blue Cross "just do[es]n't want you to do business in this state." (SDF ¶ 86 (quoting Dep. of Joseph Maher at 182:21-183:17, SDF Ex. 7, ECF No. 206-7; see also Dep. of Ralph de la Torre at 167:17-23, SDF Ex. 1, ECF No. 206-1 ("The message is Blue Cross is going to do anything to keep you out. They literally cut off funds to a hospital that is going bankrupt, and the Special Master is powerless to change it. The judge, he's kind of there, kind of not. It's another body shouting a clear message that, 'They just don't want you.'").

the MOU on the conditions imposed by Blue Cross . . . ."); Dep. of Jonathan N. Savage at 143:4-5, SDF Ex. 28, ECF No. 206-28 (Special Master describing his agreement to Blue Cross's **[*488]** MOU as "an absolute and total capitulation" to Blue Cross's terms)).

Blue Cross knew how its demands **[**40]** could impact Steward. As Blue Cross CFO (and then-lead negotiator) Mike Hudson made clear in an email leading up to Landmark moving back in network and in the midst of the Blue Cross-Steward negotiations: "Landmark asked the judge to have us pay them instead of the member and was willing to accept the prior contracted rates. . . . Could force Steward's hand - if [Landmark] agree[s] to the contract, then Steward is likely out." (SDF Ex. 91, ECF No. 210-3.) And it appears that's precisely what happened.

Next, and perhaps most importantly, Steward presents plethora evidence that Blue Cross sacrificed short-term profits for the longer-term benefit of eradicating potential competition from Steward. For example, in June 2012, Blue Cross conducted a "Contract Renewal Risk Analysis & Strategic Assessment," in which it "identif[ied] and weigh[ed] the risks to BCBSRI and [its] members associated with the failure to reach agreement [with] four community hospitals currently in negotiation" including Landmark.[25] (SAUF Ex. 71 at 2-3, ECF No. 214-71.) Blue Cross identified a number of financial "risks" in the event of non-renewal or termination of a community-hospital contract, including "[f]inancial **[**41]** exposure of non-participation status and flow of services to other entities." (Id. at 3.) These financial exposure risks included: (1) "payment to full charge exposure upon non-participation," i.e., having to pay hospitals at regular, undiscounted rates for patients who still used the now out-of-network hospital; and (2) the cost of "moving services to higher cost hospitals," i.e., having to pay higher reimbursement rates at the other in-contract hospitals where subscribers would now seek care because Blue Cross removed their previous top-choice hospital from the network. (Id.) This latter category was most potentially impactful because, Blue Cross recognized, "[a]ll" of the four community hospitals with contracts set to expire in 2012 (including Landmark) "are in dire financial trouble and all are likely to fail if their BCBSRI agreement is not renewed." (Id.)

In its internal analysis, Blue Cross calculated exactly how much it would cost to pay the reimbursement rate increases Steward was seeking (i.e., the "[p]osition [v]ariance based on current [negotiation] positions") and compared it to how much it would cost to allow Landmark to go out of network, and likely shut its doors. (Id. at 4-5.) Blue Cross **[**42]** estimated that Landmark going out of network and/or closing would cost Blue Cross $9.8 million. (Id. at 5.) This exceeded by over $4 million the amount Blue Cross estimated it would lose if it accepted the rate increases proposed by Steward for Landmark, which would cost $5.4 million.[26] (Id. at 4.)

In one presentation slide titled "Risk Factors Integrated View," Blue Cross uses a graphic to assess and value the various "risk factors" for each of the four community **[*489]** hospitals, assigning each risk factor a value between one and four points. (Id. at 8.) In the "Financial Impact" category evaluated by Blue Cross, Landmark was the only hospital of the four to receive a full four points. (Id.) With respect to the three other community hospitals, Blue Cross assessed that "[b]ecause of [the] significant risk," it would consider additional rate increases and work toward achieving contracts to keep these hospitals in network. (See id. at 9.) Despite identifying an out of contract or closed Landmark as its most serious risk, Blue Cross elected to stay the course: "We recommend that we continue to hold our position with Landmark since the material modification has already been filed." (Id.) Blue Cross had on occasion before filed **[**43]** papers to initiate material modification for negotiation leverage when discussions with other hospitals lagged, but in those instances Blue Cross always reached an agreement before taking the extreme and unusual step of announcing to its members that a hospital would be out-of-network and allowing a contract to terminate. (See SAUF ¶ 175; Hudson Dep. at 146:21-148:16, SAUF Ex. 9; Donahue Dep. 310:2-13, SAUF Ex. 8

---

[25] The objective of this assessment by Blue Cross was to "provide recommendations taking into account the relevant considerations and how best to strategically proceed." (SAUF Ex. 71 at 3, ECF No. 214-71.)

[26] And, Steward contends there is more. This loss does not include the pre-material modification costs estimated to be $3 million per month, over a period of four to six months. (SAUF ¶ 180; SAUF Ex. 71; Dep. of Mark Waggoner at 184:12-185:3, SAUF Ex. 11, ECF No. 214-11.). Notably, even Blue Cross's estimate that Steward's proposal would cost $5.4 million is disputed. Steward suggests it would have cost $3 million, (see SDF ¶ 97; DSUF Ex. 102, ECF No. 169-33 (de la Torre letter to Attorney General)), which, if true, would make this loss even greater.

("There's been contentious negotiations adversarial, but they generally get resolved before they get to this phase.")).

This evidence more than suffices to create a trial-worthy issue as to whether Blue Cross sacrificed short-term profits (by letting the Landmark contract lapse) for the long-term benefit of keeping Steward out of Rhode Island. And if more were needed, which it is not, Steward's experts confirm this point. (See SAUF ¶ 182; Expert Report of Professor Leemore Dafny, SAUF Ex. 22 at 13, ECF No. 214-22 ("[T]hese analyses corroborate BCBSRI's contemporary analyses showing that rejecting Steward's offers was costly to BCBSRI.")).

Steward also presents evidence to suggest that the proposals made and rejected by Blue Cross amounted to a refusal to deal, because Blue Cross **[**44]** negotiated in bad-faith. This evidence is complicated in light of what both parties acknowledge is the "complex and highly differentiated" aspect of hospital services, (see Def.'s Mem. in Supp. of Mot. for Summ. J. ("Def.'s Mem.") 29, ECF No. 157); Pl.'s Resp. in Opp'n to Def.'s Mot. for Summ. J. ("Pls.' Resp.") 32, ECF No. 172-1); but Blue Cross cannot hide behind this complexity to escape the material factual disputes that Steward has effectively uncovered. For present purposes, the Court need not decide the proper methodology to assess appropriate hospital reimbursement rates (indeed, both parties have different takes on this subject, which itself suggests it is a matter for trial). It is sufficient that Steward has sufficiently created a factual dispute as to whether Blue Cross refused to deal with Steward over Landmark by proposing rates below the averages it paid to other Rhode Island hospitals, and rejecting proposals consistent with what it accepted for other hospitals, essentially negotiating in bad faith with Steward.

The evidence Steward sets forth is as follows. It is not disputed that Blue Cross pays a range of reimbursement rates to various hospitals in Rhode Island. In **[**45]** 2010 when Caritas (Steward's predecessor) first attempted to acquire Landmark, an OHIC study titled "Variations in Hospital Payment Rates by Commercial Insurers in Rhode Island" reported that the rates paid to Landmark were twenty-two percent below the average for all Rhode Island hospitals, and even farther below the rates that some Lifespan and CNE-affiliated hospitals received. (SDF Ex. 67 at 16 & Fig. 10, ECF No. 208-11.) Steward argues the highest rate increase it proposed to Blue Cross (in May 2012) was for Landmark to be reimbursed at ninety-five percent of the average Blue Cross paid to all hospitals in Rhode Island, with an option to receive an **[*490]** additional five percent based on quality, which practically amounted to about a fifteen percent rate increase.[27] (See SAUF Ex. 106, ECF No. 215-31; SAUF ¶ 203.) What is important is that Steward has produced evidence that it proposed reimbursement rates for Landmark at a level lower than what Blue Cross was paying other hospitals (based on averaging the rates).

Blue Cross argues that "the undisputed evidence shows that the rates Blue Cross offered Steward at Landmark were higher than the rates Blue Cross paid comparable hospitals for **[**46]** comparable services." (Def.'s Mem. 29-30.) At summary judgment this Court need not accept at face value what Blue Cross contends are the appropriate hospital comparators. Indeed, Blue Cross undermines its own position on this point in its brief: after suggesting what the proper hospital-rate comparison should be, i.e., which hospitals Landmark can and cannot be compared to for calculating reimbursement rates, in other parts of its brief it argues that because hospital services are so different, no two hospitals can really be compared for these purposes at all. (See id.) Then, remarkably, Blue Cross pivots again to argue that the appropriate comparison is actually between Steward and Prime, the entity that ultimately acquired Landmark.[28] (See, e.g., id. at 34.)

Regardless of what it now asserts for purposes of this motion, Blue Cross's own evidence and analysis supports the premise that Blue Cross had been comparing Landmark to other hospitals - including Lifespan and CNE hospitals that Blue Cross more generously reimbursed - because patients would be leaving Landmark for those hospitals upon Landmark's closure. (See, e.g., SAUF Ex. 71.) The upshot is that, at trial, Steward and Blue Cross will **[**47]** have the opportunity to argue which hospitals Landmark should and should not properly be compared to for rate-

---

[27] Steward also offered Blue Cross a lower rate increase for Landmark of 7.4% per year for two years, to be offset by significant reductions in Blue Cross's payments to Steward's St. Anne's hospital. (See SDF Ex. 157 at 5, ECF No. 199-12.)

[28] Blue Cross may ultimately be correct that the terms on which it eventually agreed with Prime are relevant for some purpose at trial, but the Court need not decide that question on this motion.

increase purposes. While Blue Cross's view of this world of rate setting may ultimately persuade a jury that it was operating in good faith and not refusing to deal, summary judgment is not appropriate.

Although the Court is satisfied that the above discussion explains why Steward's refusal-to-deal claim must advance to trial, Blue Cross has raised several additional arguments to rebut Steward's *Section 2* claim. None of these arguments change the outcome.

First, Blue Cross argues that it could not have refused to deal because "it was Steward that walked away from negotiations and refused to deal." (Def.'s Mem. 17.) As a matter of law, it does not matter that Steward "walked away" from the negotiating table, if Blue Cross made an offer that it knew could not be accepted. See *MetroNet Servs. Corp. v. Qwest Corp., 383 F.3d 1124, 1132-33 (9th Cir. 2004)* (***HN9***[] "An offer to deal with a competitor only on unreasonable terms and conditions can amount to a practical refusal to deal."). Blue Cross's own belief in its good faith and its suggestion that it invested "enormous effort to try to get a deal done with Steward at Landmark," (Def.'s Mem. 20), is not dispositive at summary **[**48]** judgment; the record contains sufficient evidence from which a reasonable juror could conclude otherwise, i.e., that Blue Cross was moving backwards in negotiations with **[*491]** Steward, including imposing knowingly unattainable quality metrics on Steward. Specifically, Steward contends that Blue Cross responded to Steward's proposals with counter-proposals that moved backwards then requested a response, effectively attempting to force Steward to bargain against itself. (See, e.g., SDF Ex. 155, ECF No. 211-12; SDF Ex. 179, ECF No. 212-22; SDF Ex. 180, ECF No. 212-23; see also Rich Dep. 193:24-194:6, SDF Ex. 11, ECF No. 206-11 ("I think this is part of the fundamental problem in Mark [Waggoner's] email, his last sentence. . . . 'We welcome a proposal.' We had already bid. They gave us a bid that was effectively lower, and they're asking us for a counter, what we believe to be [bargaining] against ourselves."). Next, Steward cites comments by Andruszkiewicz in an August 6, 2012 Providence Business News article, indicating that Blue Cross might offer a "limited-network" product that could exclude certain hospitals, including Landmark. (See SDF Ex. 181, ECF No. 212-24.) And finally, Steward points **[**49]** to an email from Mark Hudson of Blue Cross to Mark Rich of Steward - both lead negotiators for the respective entities - in which Hudson writes,

> You reiterated your demand that Landmark be included in all BCBSRI products, including those that may have a limited or tiered network. In the event BCBSRI offers products with tiers in the future, the tiers will be determined based on cost and quality. Granting preferred status to providers who otherwise wouldn't qualify would impair the quality of any tiered product, especially when granting such status was made to an organization that refuses to participate in quality improvement initiatives.

(SDF Ex. 182 at 3, ECF No. 212-25.) A jury will have to decide if this was, as Steward contends, bad faith, backward negotiations, or as Blue Cross says, just good business.

Next, Blue Cross argues that in order for Steward's claim to move forward, this Court must "impose on a state-regulated insurer a novel antitrust duty to purchase hospital services." (Def.'s Mem. 34.) In suggesting that Steward's legal theory is "unprecedented," Blue Cross argues that "Steward asks this Court to find that Blue Cross had an antitrust duty to accept particular reimbursement **[**50]** rates proposed by the acquirer of a failing Rhode Island hospital." (Id. at 35.) This is melodrama, as are Blue Cross's unsubstantiated assertions that to allow Steward's claim to clear summary judgment requires the Court to "assum[e] the role of a regulator of health insurer provider networks," and thus "upset the delicate balance that OHIC and Blue Cross strike when fulfilling their public interest missions." (Id. at 35-36.)

It is simply incorrect to say that to recognize the possibility of a refusal-to-deal by Blue Cross requires the Court to impose a "novel antitrust duty" by requiring that Blue Cross accept the reimbursement rates that Steward proposed. ***HN10***[] The law does not impose, and this Court may not dictate, the precise terms that Blue Cross must accept; but the law does impose a duty on Blue Cross to compete fairly, and specifically to not forego short term profits for the purpose of blocking competition and maintaining a monopoly. And in order to enforce this duty, the Court - in fact the jury - must consider the parties' conduct in the context of the particular markets at issue. *Town of Concord v. Bos. Edison Co., 915 F.2d 17, 22 (1st Cir. 1990)* (Breyer, C.J.) ("[A]ntitrust analysis must sensitively recognize and reflect the distinctive economic legal setting **[**51]** of the regulated industry to which it applies." (internal quotations and citations omitted)). If the jury finds in favor of Steward, it will need to consider the question of damages (discussed below), but none of this equates to the result Blue Cross purportedly fears.

[*492] In addition, Blue Cross overstates the role of OHIC regulations and the supposed "delicate balance" that enforcing the antitrust laws would upset in this case. Indeed, the meager regulatory context at play here is far different from what the Supreme Court recognized - and underscored - in Trinko. OHIC's role is distinguishable from the FCC's regulatory function in Trinko, both in scope and effect.

In Trinko, the Supreme Court emphasized "[t]he specific nature of what the 1996 [Telecommunications] Act compels," which included "statutory restrictions upon Verizon's entry into the potentially lucrative market for long-distance service." *540 U.S. at 409, 412*. "Authorization by the FCC require[d] state-by-state satisfaction of *§ 271*'s competitive checklist, which as [the Court has] noted includes the nondiscriminatory provision of access to UNEs." *Id. at 412*.

There is nothing even close to this enforced infrastructure sharing arrangement in the OHIC scheme. The **[**52]** RI OHIC regulatory scheme is essentially a rate setting mechanism, one that ensures that rates will not increase too much in a given year without good reasons and approval.[29]

Further, the "Office of Health Insurance Commissioner" does not regulate health care providers or doctors nor the prices they charge for services; instead, as its name suggests, it regulates health insurers and insurance. (Dep. of former OHIC Commissioner Chris Koller ("Koller Dep.") at 225:22-226:3, SDF Ex. 26 ("Q. If a hospital had requested a waiver, would you have considered it? A. We have no jurisdiction over hospitals.").

So rather than present "a regulatory structure designed **[**53]** to deter and remedy anticompetitive harm," *Trinko, 540 U.S. at 412*, in which circumstances "the additional benefit to competition provided by antitrust enforcement will tend to be small," id., here, as in similar cases, "[t]here is nothing built into the regulatory scheme which performs the antitrust function," id. (alteration in original) (quoting *Silver v. N.Y. Stock Exch., 373 U.S. 341, 358, 83 S. Ct. 1246, 10 L. Ed. 2d 389 (1963))*. Thus, "the benefits of antitrust are worth its sometimes considerable disadvantages." Id.

For all the reasons discussed above, Steward's refusal-to-deal claims for unlawful monopolization and monopsonization clear the summary-judgment bar. Blue Cross's motion for summary judgment with respect to these counts will therefore be denied.[30]

---

[29] The 2012 Rate Approval Conditions provided,

> Upon written request of an issuer, supported by the hospital's written agreement with the issuer's request, the Commissioner may approve exceptions to the index limit for those hospital contracts which the issuer demonstrates, to the Commissioner's satisfaction, align significant financial responsibility for the total costs of care for a defined population and set of services in manners generally consistent with the alternative Medicare payment mechanisms proposed under the *Affordable Care Act*. Issuers are encouraged to file such requests.

(SDF Ex. 43 at 2, ECF No. 206-43.) And former OHIC Commissioner Chris Koller testified: "[W]e would consider and possibly approve exceptions to the index limit and the quality incentives. In other words . . . this was a wide-open area if the hospital and the issuer -- the insurer --wanted to do something different." (Dep. of Chris Koller ("Koller Dep."), SDF Ex. 26 at 235:16-21, ECF No. 206-26.)

[30] One final point: Steward also points to Blue Cross's conduct toward St. Anne's and Morton - two Steward-owned hospitals in the area of Massachusetts bordering Rhode Island with which Blue Cross had direct, prior dealings - as evidence of its anticompetitive bent toward Steward/Landmark. This too is complicated, but in summary, Blue Cross proposed shifting patients who used St. Anne's and Morton to the "BlueCard" program, which allowed Blue Cross to pay the reimbursement rates negotiated between Blue Cross Blue Shield of Massachusetts ("BCBSMA") and Steward, rather than renegotiating new contracts with new rates with these hospitals. Blue Cross forecasted that this move would annually save it $3.2 million. But it would lose about half of that because the BlueCard Program imposed a hefty administrative fee. (SAUF Ex. 89 at 4; SAUF Ex. 90.) So Steward offered Blue Cross a better deal: a new direct contract with St. Anne's at the same rates paid by BCBSMA, but without the administrative fee. (See SDF ¶ 136.) Steward's proposal offered Blue Cross the added benefit that its Medicare Advantage program subscribers could continue to access these hospitals, whereas under the BlueCard program, they could not.

[*493] B. The Conspiracy Claims

1. Conspiracy in Restraint of Trade (Counts IV, VIII, XII, and XVI)

Blue Cross also moves for summary judgment with respect to Steward's conspiracy claims.[31] ***HN11***[] *Section 1* of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. A conspiracy is born when "two or more entities that previously pursued their own interests separately . . . combin[e] to act as one for their common benefit." *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. "*Section 1* by its plain **[**54]** terms reaches only 'agreements'— whether tacit or express." *White v. R.M. Packer Co., 635 F.3d 571, 575 (1st Cir. 2011)* (emphasis added) (citing *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 553, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

Importantly, ***HN12***[] "at the summary judgment stage a *§ 1* plaintiff's offer of conspiracy evidence must tend to rule out the possibility that the defendants were acting independently." *Twombly, 550 U.S. at 554 (2007)* (citing *Matsushita, 475 U.S. at 574*).[32] "It does not reach independent decisions, even if they lead to the same anticompetitive result as an actual agreement among market actors." *R.M. Packer Co., 635 F.3d at 575*. "In addition, the Supreme Court has 'limit[ed] the range of permissible inferences from ambiguous evidence in a *§ 1* case,' holding that, at summary judgment, 'conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy' that allows plaintiffs' evidence to reach a jury." *Id. at 577* (alteration in original) (emphasis added) (quoting *Matsushita, 475 U.S. at 588*). But this evidence will reach the jury when it shows 'parallel behavior that would probably not result from chance, coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties.'" Id. (quoting *Twombly, 550 U.S. at 557 n.4*).

[*494] ***HN13***[] Steward builds its case **[**55]** around circumstantial evidence, so it must rely on "plus factors" as "proxies for direct evidence of an agreement." *Evergreen Partnering Grp., Inc. v. Pactiv Corp., 720 F.3d 33, 46 (1st Cir. 2013)* (quoting *In re Flat Glass Antitrust Litig., 385 F.3d 350, 359-60 (3d Cir. 2004))*. Plus-factor evidence is "evidence pointing toward conspiracy," *R.M. Packer Co., 635 F.3d at 577*, that is, evidence "tend[ing] to rule out the possibility that the defendants were acting independently," *Twombly, 550 U.S. at 554*.

HN14[] Courts have identified - and the First Circuit in Evergreen and R.M. Packer Co. countenanced - a non-exhaustive list of three *Section 1* plus factors: "(1) evidence that the defendant had a motive to enter into a[n] [antitrust] conspiracy; (2) evidence that the defendant acted contrary to its interests; and (3) 'evidence implying a traditional conspiracy.'" *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 321-22 (3d Cir. 2010)* (quoting *Flat Glass, 385 F.3d at 360*); cf. *Twombly, 550 U.S. at 557* ("A statement of parallel conduct . . . needs some . . . further circumstance," or "further factual enhancement" to plead a plausible *§ 1* claim). "The third factor, 'evidence implying a traditional conspiracy,' consists of 'non-economic evidence "that there was an actual, manifest agreement not to compete,"' which may include 'proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are

---

(See SAUF Ex. 89; SAUF ¶ 187.) Blue Cross rejected these entreaties as well, arguably forsaking short term profits for the purpose of further impeding Steward's effort to break into Rhode Island.

[31] Like Steward's refusal-to-deal claim, the Court analyzes Steward's conspiracy counts brought under the Rhode Island Antitrust Act together with Steward's conspiracy counts brought under the *Sherman Act*. (See supra note 13.)

[32] The law of conspiracy, like refusal-to-deal law, is no model of clarity for trial courts trying to make sense of - and apply - its standards. See, e.g., 1 John J. Miles Health Care and ***Antitrust Law*** § 2A:6 (2018) ("The line between permissible inference and impermissible speculation is not clear and never will be."); William H. Page, Tacit Agreement Under *Section 1* of the Sherman Act, 81 Antitrust L.J. 593, 594 (2017) ("The outcomes on these motions depend in large part on what the courts think a Section 1 agreement is. Even after 125 years of Section 1 litigation, however, the meaning of that fundamental concept remains uncertain.").

shown.'" *In re Ins. Brokerage Antitrust Litig., 618 F3d at 322* (quoting *Flat Glass, 385 F.3d at 361*); see **[**56]** also *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 661 (7th Cir. 2002)*; 6 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1434b (2017).

Before delving into the evidence, a few other fundamental principles are worth noting. The first concerns "conspiracy." Blue Cross tries hard to raise the bar on Steward, suggesting that an illicit "agreement" requires explicit evidence that minds have met. (See Def.'s Mem. 42-45.) This is not correct. ***HN15***[] A tacit understanding or a wink and a nod can be sufficient.[33] See *United States v. Beaver, 515 F.3d 730, 738 (7th Cir. 2008)* ("Although the existence of . . . an agreement is the essence of the government's *§ 1* conspiracy allegation . . . . the government was required only to establish that the [defendants] had a tacit understanding based upon a long course of conduct to limit their discounts." (internal quotation marks and citations omitted)); *Am. Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)* ("Where the circumstances **[*495]** are such as to warrant a jury in finding that the conspirators had a unity of purpose or a common design and understanding, or a meeting of the minds in an unlawful arrangement, the conclusion that a conspiracy is established is justified."); *Esco Corp. v. United States, 340 F.2d 1000, 1007 (9th Cir. 1965)* ("[I]t is well recognized law that any conspiracy can ordinarily only be proved by inferences drawn from relevant and competent circumstantial evidence, including **[**57]** the conduct of the defendants charged. A knowing wink can mean more than words." (citation omitted)).

Second, and perhaps more important for dealing with Blue Cross's motion, ***HN16***[] the Supreme Court long ago dispensed with the notion that a court can slice and dice the record in a way that scrutinizes each individual piece of evidence for conspiratorial motive. Rather, **[**58]** the Court must evaluate the evidence based on its aggregate effect, and draw reasonable inferences from the evidence as a whole. *Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)* ("In cases such as this, plaintiffs should be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each."); *United States v. Patten, 226 U.S. 525, 544, 33 S. Ct. 141, 57 L. Ed. 333 (1913)* ("It hardly needs statement that the character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole." (citations omitted)); *Evergreen, 720 F.3d at 47* ("While each of [plaintiff's] allegations of circumstantial agreement standing alone may not be sufficient to imply agreement, taken together, they provide a sufficient basis to plausibly contextualize the agreement necessary for pleading a *§ 1* claim.").

With these principles guiding its analysis, the Court finds in the record substantial evidence that, for conspiracy purposes,[34] tends to exclude an inference of independent conduct. In marshalling the evidence, Steward highlights

---

[33] Blue Cross is wrong to suggest that the law forbids only outright confessions of anticompetitive animus. See 3B Areeda & Hovenkamp, supra, ¶ 308. The Seventh Circuit has persuasively addressed this issue:

> [N]o single piece of the evidence that we're about to summarize is sufficient in itself to prove a price-fixing conspiracy. But that is not the question. The question is simply whether this evidence, considered as a whole and in combination with the economic evidence, is sufficient to defeat summary judgment. . . . We tried in *Troupe v. May Department Stores Co., 20 F.3d 734, 736-37 (7th Cir. 1994)*, to straighten out the confusing (and, as it seems to us, largely if not entirely superfluous) distinction between direct and circumstantial evidence. The former is evidence tantamount to an acknowledgment of guilt; the latter is everything else including ambiguous statements. These are not to be disregarded because of their ambiguity; most cases are constructed out of a tissue of such statements and other circumstantial evidence, since an outright confession will ordinarily obviate the need for a trial.

In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 661-62 (7th Cir. 2002).

[34] At the outset, ***HN17***[] Steward's monopolization and conspiracy claims are not mutually exclusive. The Court rejects Blue Cross's suggestion that because Steward argues Blue Cross had unilateral, illicit motives to exclude Steward, it necessarily acted "consistent with its unilateral self-interest" and thus could not have illegally conspired against Steward. To be clear, behavior consistent with unilateral self-interest refers to lawful independent conduct that furthers competition. See *In re Flat Glass Antitrust Litig., 385 F.3d 350, 360-61 (3d Cir. 2004)* ("Evidence that the defendant acted contrary to its interests means

four separate but related episodes: (1) the "treat-and-transfer" model developed by Lifespan and Thundermist, with Blue Cross's encouragement, for a failed Landmark; (2) rate concessions **[**59]** offered by Lifespan to Blue Cross in exchange for additional patient volume; and Thundermist's decisions to (3) shift OB patients and (4) reject an MOU with Steward (including a proposal that **[*496]** Thundermist itself had proposed). (See Pl.'s Resp. 43-67.)

First, a reasonable juror could conclude that part of the agreement between Blue Cross, Lifespan, and Thundermist to block Steward from Rhode Island was premised on the treat-and-transfer plan proposed as an alternative to Steward acquiring Landmark. The treat-and-transfer model, which sought to make Landmark "less than a full-service, acute-care hospital," (Wakefield Dep. at 32:1-6, SDF Ex. 30), was conceived in April of 2009 by Maria Montanaro, then-CEO of Thundermist, in a letter to Special Master Savage.[35] (See SDF Ex. 101). Landmark was placed in receivership in 2008, (see SDF ¶ 62), around the same time Caritas emerged as a prospective acquirer of the hospital. (See SDF Ex. 102 at 4-5, ECF No. 210-14.) In May 2009 in a letter to Justice Silverstein, Montanaro detailed her concerns regarding Landmark's "possible affiliation with Caritas Christi." (Id.) She wrote,

> To me, this should not be about the **[**60]** survival of an institution, but rather about how to best deliver the highest quality, most cost-effective care in northern RI. It is possible, that the most sustainable model of high quality, cost effective care would be one that does not include a full service, licensed hospital.

(Id. at 5.)

The evidence also supports the inference that Blue Cross was in on the plan for treat-and-transfer as the alternative to a Caritas/Steward-owned Landmark. In the fall of 2010, Caritas took part in discussions and meetings with Blue Cross over acquiring Landmark. (SDF Ex. 108, ECF No. 210-20; SDF Ex. 109, ECF No. 210-21.) On November 18, 2010, Mark Waggoner of Blue Cross reported to Blue Cross's ELT that then-Blue Cross CEO Jim Purcell wanted Blue Cross to occupy a greater role over Landmark's future. He stated:

> Jim Purcell called me earlier this week to chat about Caritas/Landmark. He seems to be leaning more towards to wanting to step off of the sideline and play more of a broker role in a local solution to Landmark. Apparently, he had a conversation earlier in the week with M. Montan[a]ro of Thundermist . . . that may have influenced his thinking a bit about the role we might play.

(SDF Ex. 105 at 2, ECF **[**61]** No. 210-17.) Before getting back to Caritas, Purcell touched base with Lifespan and Thundermist to convey his reaction to the Caritas proposal and a plan for Lifespan and Thundermist to meet with Justice Silverstein to discuss treat-and-transfer: "Maria [Montanaro (Thundermist)] and George [Vecchione (Lifespan)] know we'll send our letters this Wednesday [the rejection letter to Caritas and the Special Master], and they will ask for a meeting with the Judge." (SDF Ex. 107 at 2, ECF No. 210-19.) Lifespan and Thundermist conferred about how to keep Blue Cross happy and on board: "It is important to BCBSRI to head in this direction [integrated service delivery networks], and would give them further reasons to support our work together on the model we are proposing." (SDF Ex. 111 at 3, ECF No. 210-23.)

Before meeting with the judge, Blue Cross first huddled with Lifespan and Thundermist. (SDF Ex. 113 at 2, ECF No. 210-25.) Notes from that meeting indicate that discussion topics included: (1) undermining Caritas's efforts to

---

evidence of conduct that would be irrational assuming that the defendant operated in a competitive market."). There is no discernable reason why an antitrust plaintiff cannot assert both a unilateral monopolization claim and a conspiracy claim; and indeed, the case law supports that these claims can coexist. See, e.g., *Microsoft Corp., 253 F.3d at 70* (rejecting defendant's argument that "the District Court's holding of no liability under *§ 1* necessarily precludes holding it liable under *§ 2*."); *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 197 (3d Cir. 2005)* ("[A] finding in favor of the defendant under *Section 1* of the Sherman Act . . . [does] not 'preclude the application of evidence of . . . exclusive dealing to support the *[Section] 2* claim.' . . . A court's refusal to accept one theory rather than another [does not] undermine[] the claim as a whole . . . [and] the [plaintiff] can obtain all the relief to which it is entitled under *Section 2* and has chosen to follow that path without reference to *Section 1* . . . ." (quoting *LePage's, Inc. v. 3M, 324 F.3d 141, 157 n.10 (3d Cir. 2003))*).

[35] It appears undisputed that this plan was conceived prior to Steward coming into the picture. This simple fact does not, however, defeat the powerful inference gleaned from the evidence that the treat-and-transfer model resurfaced with Steward in mind, once it entered the picture.

acquire Landmark; and (2) underscoring treat and **[*497]** transfer as the preferred alternative. (See SDF Ex. 117 at 2, ECF No. 210-29.) In 2012, CEO Peter Andruszkiewicz of **[**62]** Blue Cross (Purcell's successor) and CEO George Vecchione of Lifespan discussed the treat-and-transfer plan in the context of Andruszkiewicz's calculation that Landmark would not go to Steward. (See SDF Ex. 118, ECF No. 210-30.) Montanaro, who by then had left Thundermist to become a Blue Cross consultant, reported to Chuck Jones, her successor as Thundermist CEO:

> Peter [Andruszkiewicz] tells me that he believes Steward will fail to acquire here in RI. He has no intention of giving into their demands. He has talked with George [Vecchione], who has told him "with as much certainty as he has ever heard George use" that Lifespan WILL step in and take over the hospital, following the model we developed with them years ago. Peter wants to see Care NE then do the OB piece. He talked with George and his leadership about this yesterday.

(SDF Ex. 118 at 2.) Montanaro concluded her email with a prediction about Landmark: "Peter thinks it will be Lifespan." (Id.) An internal Lifespan email, sent a few weeks later adds more. Lifespan's new CEO Timothy Babineau (Vecchione's successor) wrote to his leadership team:

> Peter [Andruszkiewicz] called me yesterday to update me on a 5 hour meeting he had on **[**63]** Monday with the AG, Steward (Ralph himself!) and George Nee trying to mediate an agreement. At the end of the day, BCBSRI put an offer on the table that Peter described as still being within OHIC's guidelines. He did not elaborate and I did not ask.
> They are meeting again next Monday (5 hours scheduled) during which Steward is supposed to react/accept/counter BCBSRI most recent offer.
>
> The real reason for the phone call was for Peter to let me know that he told the AG that it was his (Peter A's) understanding that Lifespan would be willing/interested to re-engage in discussions with Landmark should Steward pull out. He indicated the AG heard that but seemed (in Peter's words) "underwhelmed". I affirmed that this was still our position but offered no specifics. **Question**---is it worth a call to the AG to re-affirm our position, or should we remain on the sidelines at this point?

(SDF Ex. 120 at 2, ECF No. 210-32.) Lifespan's CFO clarified, "Peter's saying, you know, there's another alternative; you don't have to come so hard after me." (Wakefield Dep. 181:13-15. SDF Ex. 30.)

The above evidence, when stitched together, makes clear that a reasonable juror could conclude that the treat-and-transfer **[**64]** model for Landmark was one part of an understanding between Blue Cross, Lifespan, and Thundermist aimed at keeping Steward out of Rhode Island.

The next conspiratorial "episode" cited by Steward concerns the link between rate concessions for Blue Cross by Lifespan in exchange for increased patient volume, which presumably would come from Landmark. Steward concedes that Thundermist is not directly implicated in this chapter of the conspiracy saga.[36]

[*498] First, Steward offers evidence to make sense of why Lifespan would suddenly retreat from what had been otherwise highly contentious negotiations with Blue Cross. (See SAUF Ex. 77, ECF No. 215-2; SAUF ¶ 170 (Lifespan demanding rate increases in excess of six percent and adjusting its position only nominally over several months)). Lifespan informed Blue Cross that it would only back down on its rate demands in exchange for additional patients: "Lifespan is willing to consider more substantive reductions to their position only if Blue Cross can provide additional service volume." (SAUF Ex. 78 at 5, ECF No. 215-3.)

Now, Steward asks, where might Blue Cross come up with more patient volume to satisfy Lifespan? A reasonable juror could conclude **[**65]** that the answer was Landmark. It was no secret that Lifespan would be the primary beneficiary of a weakened or defeated Landmark. (See SAUF Ex. 75 at 9, ECF No. 182-15 (Blue Cross noting

---

[36] Although Thundermist is not directly linked to this part of Steward's theory, it does not have to be. See *Pinkerton v. United States, 328 U.S. 640, 646, 66 S. Ct. 1180, 90 L. Ed. 1489 (1946)* (no requirement that each conspirator actively participate in each act in furtherance of the conspiracy); *United States v. Barker Steel Co., 985 F.2d 1123, 1129-30 (1st Cir. 1993)*. This makes sense, especially in light of the directive that this Court view the evidence in totality rather than isolation.

subscribers in vicinity of Landmark used Lifespan hospitals, Miriam and RIH); (SAUF Ex. 71 at 6) (evaluating effect of Blue Cross's failure to renew Landmark contract: "Rhode Island and Miriam would see an influx of the majority of medical/surgical and outpatient services"); SAUF Ex. 22 at Fig. 35 (predicting Landmark going "out of network" would cause nearly forty-five percent of previous-Landmark patients to use a Lifespan hospital). Indeed, Lifespan mapped out Landmark's impact on RIH and Miriam, whether it thrived under Steward's ownership or failed if "Steward bails." (SAUF Ex. 69, ECF No. 214-69.) Unsurprisingly, Lifespan predicted a vast financial reward in the event that Landmark went under, and it forecasted a significant financial blow if Steward acquired Landmark. (Id.)

But that's not all. Steward also cites the June 2012 Blue Cross Contract Analysis in which Blue Cross identified the hefty cost of failing to renew community hospitals like Landmark because patients dispersing to costlier **[**66]** hospitals came with an added financial sting to Blue Cross. In this context, Blue Cross's analysis recommended "[w]ith Lifespan and CNE facilities as a primary recipient of the service migration, we would engage discussions with these systems to establish a longer term plan to develop service capacity at favorable payment levels." (SAUF Ex. 71 at 9 (emphasis added)). Blue Cross added, "[b]y doing so, we would be in a better position to manage the impact to the network and more strategically leverage options that currently do not exist." (Id.) In an update to that same July 2012 presentation, Blue Cross added that "in order to address the potential movement of services to other hospitals in the future, we have initiated discussions with Lifespan on opportunities involving additional volume and the impact on payment levels." (SAUF Ex. 76 at 7, ECF No. 215-1.) In August 2012, Blue Cross documented that "Lifespan is willing to consider more substantive reductions to their position only if Blue Cross can provide additional service volume." (SAUF Ex. 78 at 5.)

Seemingly out of the blue, in September 2012, at the same time negotiations with Steward were cratering, Lifespan's rate demands declined **[**67]** to 4.8% for commercial. (SAUF Ex. 79 at 3, ECF No. 215-4) (email summarizing Lifespan's proposal). According to Blue Cross documents, Steward asserts, this pivot saved Blue Cross nearly $12 million, and was in stark contrast to the ordinary course of highly contentious Lifespan-Blue Cross negotiations that preceded it. (Compare SAUF Ex. 80, ECF No. 215-5 (showing total savings (loss) with respect to Lifespan as "$11,862,139"); with SAUF Ex. 81, ECF No. 215-6 (email from Blue Cross CFO Coleman to Andruszkiewicz and Waggoner regarding 2011 Lifespan negotiations) ("BCBSRI **[*499]** achieved (almost) Lifespan's original request of $24 [million] in additional revenue. Just a friendly reminder of how much we gave to the cause."). A reasonable juror could conclude that Blue Cross secured rate concessions from Lifespan in exchange for added patient volume, which could only come from Landmark, once Steward was removed from the picture.

The next chapter of Steward's conspiracy claim colors the alleged role played by Thundermist. Steward contends that Thundermist's decisions to (1) move OB patient referrals from Landmark to Women & Infants Hospital in 2011 and (2) to not sign an MOU to be an affiliated **[**68]** provider with Steward/Landmark were similarly motivated by exclusionary goals.

With respect to Thundermist's shift of OB patients, a reasonable juror could conclude that it was one piece of the larger plan to exclude Steward. First, in November 2011, Jones of Thundermist sought "for Lifespan to commit to support publicly our shared vision of health care in Northern Rhode Island in the face of a threatened or actual Steward departure." (SDF Ex. 125, ECF No. 210-37.) In other words, before pulling the trigger on a shift of patients, Jones needed cover and support from Lifespan:

> I remain inclined to move Thundermist's OB service to [Women & Infants hospital, part of Care New England]. I therefore need to take Jon Savage and Steward at their words and prepare to defend my decision against a Steward announcement to abandon Landmark and publicly blame Thundermist for the decision.
>
> In this context it will be important for me to be able to point to Lifespan's interest in developing an appropriate care model for Northern Rhode Island. Given the timeframe involved, I believe a letter to me (or press release if you prefer) describing the model of care Lifespan would be willing to support publicly, **[**69]** with Thundermist, in Northern Rhode Island.

(Id.) Remarkably, in spite of the fact that Thundermist's patients would be sent to CNE - Lifespan's primary competitor - Lifespan agreed to annually pay Thundermist $150,000, which replaced annual payments from

Landmark that would cease upon terminating the Landmark arrangement. (SDF Ex. 125; Jones Dep. at 109:7-110:14, 115:7-18, SDF Ex. 24, ECF No. 206-24 ("Q. Okay. So because the Women and Infants deal wasn't going to include Thundermist being paid for that, you told Lifespan that by moving to Women and Infants, you were going to lose the $135,000 that you were getting from Landmark and you wanted their help in making that up? A. Yes.").

The explanations provided by Thundermist and Lifespan do little to clear the air about this strange payment. In his deposition, Jones suggested that this "[f]inancial support" was "to support development of these more closely integrated networks of care." (SDF Ex. 125.) Lifespan's George Vecchione in turn said: "It wasn't just to fill a loss, a gaping hole, and no prospects for benefit. Frankly, I viewed it as an investment." (Vecchione Dep. 140:4-12, SDF Ex. 29.) And, as noted above, in an email to Jones, **[**70]** Montanaro wrote that Blue Cross's Peter Andruszkiewicz "want[ed] to see Care NE then do the OB piece." (SDF Ex. 118 at 2.) These explanations raise more questions than answers, and at least give the appearance of Blue Cross acting as a puppet-master distributing the spoils. And the payment persisted for six consecutive years. (Wakefield Dep. 172-174, SDF Ex. 30.) In her deposition, CFO Wakefield could not pinpoint another circumstance, with the exception of unions, where Lifespan "supported" an organization to the tune of $150,000. (Id. at 174. But see Vecchione Dep. 139-140, SDF Ex. 29 (recalling **[*500]** two grants from Lifespan, one to Thundermist and another to Providence Health, but noting, "There's not many of them")). Curiously, Lifespan did not keep track nor inquire of what purpose Thundermist put the $150,000, and there were no real conditions imposed on how Thundermist disbursed Lifespan's generous donation. CEO Jones testified that the payment had no strings attached:

> Q. And under this agreement, besides reporting and keeping track of things, what is Thundermist required to do in return under the public health grant agreement?
> A. Continue to provide charity care for our community.
>
> Q. Do you **[**71]** do the same things you had to do anyways?
> A. Yes.
> Q. So there's no new obligations imposed by this?
> A. No.
> Q. This was just giving you 150,000 and you have to meet certain reporting requirements for legal purposes?
> A. Yes.
> Q. And was reporting to Lifespan required?
> A. No.
> Q. And did you do any reporting to Lifespan about what you did with the money?
> A. No.

(Jones Dep. at 127:19-128:16, SDF Ex. 24.) And Lifespan CEO George Vecchione testified consistently:

> Q. And did she [Montanaro], in fact, put some of the money to that use, to your knowledge?
> A. I don't . . . recall. What she did with the money, I don't know. It's not that I don't recall, I don't know.
> Q. Meaning that you don't think you ever knew?
> A. Correct.
> Q. Part of the grant process is not some sort of follow-up by the recipient to say, Gosh, here's the great things we do with your money?
> A. Correct. Um-hm.
> Q. Can you - I take it you can't point to some particular thing that Thundermist did thanks to the grant money that you were providing, or can you?
> A. I can't.

(Vecchione Dep. at 141:3-19, SDF Ex. 29.) Although early on in the Lifespan-Thundermist negotiations, Lifespan's grant had been incorporated into the two entities' Partnership Model, **[**72]** (see SDF Ex. 128, ECF No. 210-40), the funds were later buried in a different "Public Health Grant Agreement," which unlike the former, was never disclosed to the DOH. (Jones Dep. at 129-130, SDF Ex. 24.) Moreover, in the context of anticipating Thundermist's prospective relationship with Steward if it acquired Landmark, Jones detailed how he saw the interplay between OB patients and a Steward presence:

> I think if they stay, whether or not we move OB, our relationship with Steward becomes more complicated . . . . If they stay and we don't want to cooperate with them, I believe they could do some damage or at least make

> life difficult for us to do anything but cooperate. So although I wouldn't be happy about the scenario where we move OB and Steward decides to stay, I don't think it's that much different from the scenario where we do nothing, and they decide to stay. Either way, Thundermist's ability to make independent decisions in the best interests of our patients could be compromised by a Steward presence. That threat only goes away entirely if we move OB.

(SDF Ex. 126, ECF No. 210-38.)

And what role did Blue Cross play in all of this? In addition to Lifespan, Jones looked to Blue **[**73]** Cross to provide assurances **[*501]** that they too would stand behind his decision to shift patients. Prior to making the OB-patient-shift announcement, Jones intended to "set up [a] meeting between Peter A [of Blue Cross] and George [of Lifespan] to get commitments on a common communications plan." (SDF Ex. 129, ECF No. 210-41.) Soon-to-be consultant for Blue Cross and former CEO of Thundermist, Montanaro, offered a helping hand to Thundermist. (SDF Ex. 130, ECF No. 210-42 ("Nice talk with Peter A. He thinks you should walk away from Landmark and let them close. He said [to] call him and he will talk to you about it, if you want."; see also Andruszkiewicz Dep. at 270:4-5, SDF Ex. 12, ECF No. 206-12 ("I supported his decision.")). This was the support Jones wanted and needed to move forward with the shift - and Blue Cross delivered. (See SDF Ex. 131, ECF No. 210-43 ("Chuck felt supported by Peter's earlier call.")). At the end of the day, rather than an "independent" decision by Thundermist, a reasonable juror could conclude that Thundermist's shift of OB patients from Landmark to Women & Infants, and the concomitant payment from Lifespan, was all part of an understanding to keep Steward out **[**74]** of Rhode Island.

The final, and perhaps most glaring part of Steward's conspiracy story concerns Thundermist's abrupt rejection of an MOU with Steward. Throughout the time period that treat and transfer and OB patient shifting was being discussed, Thundermist was also in talks with Steward. Jones had been working with Steward on an MOU that considered, among other things, patient referrals and certain areas of exclusivity with Steward/Landmark. (See SDF Ex. 133, ECF No. 210-45; SDF Ex. 134, ECF No. 210-46.) Although Thundermist and Steward traded various MOU proposals, on May 11, 2012, Jones met with Steward and indicated that he was no longer willing to enter any agreement. Perhaps most illuminating, Jones would not even sign the April 30 proposal that he had himself proposed to Steward.

And indeed, the evidence indicates that Jones did not come to this epiphany on his own; behind the scenes, Jones surveyed a wide range of opinions in approaching his talks with Steward. He "talked with Peter A (BCBSRI) and Dennis Keefe (CNE). These conversations, and discussions with just about every other health leader in RI, have helped me clarify a bit." (SDF Ex. 135, ECF No. 210-47.)

But it was Blue **[**75]** Cross that had Jones all eyes and ears. Jones's follow-up notes from the May 11 meeting with Steward recount why he did not sign the MOU: "[y]ou're asking me to give up participation with an organization that has 70% market share?" (SDF Ex. 139, ECF No. 210-51.) Jones's reaction to Blue Cross's apparent pressure is even more peculiar given the few commercially insured patients Thundermist had, and the fact that Thundermist's capacity would not have been affected by either version of the proposed MOU. (See Jones Dep. at 292, SDF Ex. 24 ("Q. [I]s there anything that the agreement would have prevented you from doing with an insurer that you've now done? A. No, I don't think so. I can't think of anything."). Later, Jones erased any doubt about Blue Cross's influence on his approach to an MOU with Steward. (See id. at. 216:2-13 ("Q. 'You have no market share in Rhode Island. You're asking me to give up participation with an organization that has 70 percent market share?' That's a reference to Blue Cross. Correct? A. Yes. Q. And that was the concern that the deal with Steward would give you -- give up your opportunity to have participation with Blue Cross. Correct? A. As an example of the **[**76]** - yes, of what could happen."). In the aftermath of his Steward meeting, Jones calculated how he would - and would not - broach the subject with the press: "If we respond, we cannot avoid **[*502]** the statement that we have not reached agreement with Steward. I wouldn't even say that 'we have not yet reached agreement' because that infers an agreement is possible." (SDF Ex. 140, ECF No. 210-52.) He added, "[o]ur close partners know what our position is and inferring in a public statement that there's still hope for an agreement seems disingenuous." (Id.)

Jones's "close partners," namely Blue Cross by way of Montanaro, also played a role in making sure Jones was prepared for his Steward meeting. (SDF Ex. 141 at 3, ECF No. 210-53 (Interoffice Memorandum from Montanaro to

Blue Cross executives) ("Chuck Jones continues to seek m[y] advice on issues with Steward Healthcare."). And when Jones offered to pay Montanaro for the "long meeting" in which she helped Jones craft "talking points," she insisted that would not be necessary: "No need to bill you I was on BCBS's dime and spent the time with their full support. They think very highly of you and were happy to contribute me to the cause today." (SAUF **[**77]** Ex. 51 at 2, ECF No. 214-51; see also id. (email from Montanaro to Jones) "Nice job taking it in and pushing some of the points. I am impressed. I thanked Peter [Andruszkiewicz] for you in hosting the meeting at BCBS today. He said he ran into Constantino,[37] who was saying he thinks the 'air is coming out of Steward[']s balloon.'"). Montanaro even drafted a proposed letter to be sent from Jones to Steward with a list of reasons to resist Steward. (SAUF Ex. 55, ECF No. 214-55.) She instructed Jones: "As groups line up and pick sides, so will Thundermist need to do the same . . . . This will be true as you deepen your relationship with payers and with some, but not all of the hospitals with which you currently have referral relationships." (emphasis added). Jones heard the message loud and clear, which explains his eventual refusal to sign any version of a Steward MOU, including the version he had crafted. (SDF Ex. 139.) A reasonable juror could conclude that, instead of an independent action by Thundermist, Jones's choice was to align with Blue Cross (and Lifespan) to keep Steward out of Rhode Island.

Finally, ***HN18***[] in cases **[**78]** where acts against self-interest are not fully explained, traditional evidence of conspiracy, i.e., conversations, assurances, and swapping value among the alleged conspirators, prove instructive. See *R.M. Packer Co., 635 F.3d at 583*. And as the aforementioned evidence makes clear, the indicators pointing to a conspiracy are numerous in this case. The record is replete with assurances, conversations, and exchanges of value. Ultimately, Steward has provided more than enough evidence that tends to exclude the inference of independent conduct; and a reasonable juror could conclude that the conduct of the players here amounted to an illicit agreement to keep Steward out of Rhode Island. For these reasons, Blue Cross's motion with respect to Steward's conspiracy claims must be denied.

2. Conspiracy To Monopolize/Monopsonize (Counts III, VII, XI and XV)

HN19[] *Section 1* of the Sherman Act prohibits conspiring to restrain trade whereas *Section 2* forbids conspiring to attain or maintain a monopoly.[38] Blue Cross's argument **[*503]** on summary judgment is that "conspiracy claims under *Section 1* and *Section 2* will both fail if . . . the record does not show an unlawful agreement," (see Blue Cross's Reply in Supp. Mot. for Summary J. 30 n.16); see also *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 99 (3d Cir. 2010)* ("To prevail on a *section 1* claim or **[**79]** a *section 2* conspiracy claim, a plaintiff must establish the existence of an agreement . . . ."). As discussed infra, the Court disagrees with Blue Cross about what the record shows on this point, i.e., a reasonable juror could find an illicit agreement between Blue Cross, Lifespan, and Thundermist on these facts. Beyond this common requirement of agreement, a *Section 1* conspiracy has different elements than a *Section 2* conspiracy. See, e.g., *Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 847 F.3d 1221, 1231 (10th Cir. 2017)*; *Invamed, Inc. v. Barr Lab., 22 F. Supp. 2d 210, 217 (S.D.N.Y. 1998)* ("While *section 1* of the Sherman Act forbids contracts or conspiracies in the restraint of trade or commerce, *section 2* 'addresses the actions of single firms that monopolize or attempt to monopolize, as well as conspiracies and combinations to monopolize.'" (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 454, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*). Yet Blue Cross - as the movant - has not sufficiently parsed these substantive differences, nor has it specifically challenged Steward's *Section 2* conspiracy claim by attacking the presence of specific intent to enable or maintain a monopoly or monopsony position between Blue Cross, Lifespan, and Thundermist. See *In re Zinc Antitrust Litig., 155 F. Supp. 3d 337, 382 (S.D.N.Y. 2016)* ("The specific intent to monopolize, rather than the power to exclude competitors, is the key element of a conspiracy to monopolize claim."); *Oxbow Carbon & Minerals LLC v. Union Pac. R.R. Co, 926 F. Supp. 2d 36, 47 (D.D.C. 2013)* (dismissing *Section 2* conspiracy claim that

[37] This is a reference to former State Representative and House Finance Committee Chairman, Steven Costantino, then-Secretary of Health and Human Services, with significant involvement in the Rhode Island health care and insurance marketplace. See Ian Donnis, Steven Costantino Appointed To Head Vermont Insurance Program, Rhode Island Public Radio (Feb. 9, 2015), http://ripr.org/post/steven-costantino-appointed-head-vermont-insurance-program . Constantino is now commissioner of the Department of Vermont Health Access. See id.

[38] For purposes of this motion, the Court need not separately discuss Steward's conspiracy-to-monopolize and conspiracy-to-monopsonize claims, as the relevant analysis is the same.

lacked factual allegations about "how the **[**80]** defendants used the agreement to monopolize the rail freight market"). While Steward appears to have mustered little evidence to support Blue Cross may ultimately merit judgment as a matter of law on Steward's conspiracy to monopolize/monopsonize claims, for now it survives summary judgment because Blue Cross has not specifically addressed it, beyond unsuccessfully arguing that there was no evidence of agreement. Therefore, summary judgment is denied on Counts III, VII, XI, and XV.

C. State-Law Tort Claims (Counts XVII and XVIII)

Much of Blue Cross's argument on Steward's state law claims is built on the proposition that, "[w]here conduct does not violate the antitrust laws, the conduct also is not tortious as a matter of law because '***antitrust law*** provides the best available barometer — indeed the only available barometer — of whether or not Blue Cross'[s] conduct can be found to be "wrongful" or "illegitimate"—and hence, tortious.'" (See Def.'s Mem. 79 (quoting *Ocean State Physicians Health Plan, Inc. v. Blue Cross & Blue Shield of R.I., 883 F.2d 1101, 1114 (1st Cir. 1989))*). Because the Court has found that Steward's antitrust claims are viable, it follows that Steward's state-law-tort claims survive summary judgment.[39]

[*504] D. Blue Cross's Remaining Arguments

Blue **[**81]** Cross makes several independent and substantial arguments to support its summary judgment motion, all of which fail, but which require some discussion.

1. Causation

Blue Cross suggests that other superseding causes are responsible for Steward's alleged injuries, namely (1) Steward's apparent inability to satisfy the APA conditions unrelated to Blue Cross; and (2) the OHIC regulations that allegedly cabined the rates that Blue Cross could offer Steward.

HN21[] To prove causation, a *Sherman Act* plaintiff must demonstrate that its injury was caused "by reason of" the defendant's anticompetitive conduct. *15 U.S.C. § 15(a)*. The parties agree that a plaintiff "need not prove that the antitrust violation was the sole cause of [its] injury, but only that it was a material cause." *Sullivan v. Nat'l Football League, 34 F.3d 1091, 1103 (1st Cir. 1994)*. Causation is a factor that establishes antitrust standing. See *Sterling Merch., Inc. v. Nestlé, S.A., 656 F.3d 112, 120-21 (1st Cir. 2011)*. The law recognizes that when an injury "[i]s attributable to . . . other factors independent of" the challenged conduct, a plaintiff has "not . . . met its burden." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 126-27, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*.

As this Court said at the motion-to-dismiss stage, ***HN22***[] "[A]ntitrust laws have been interpreted to incorporate common law principles of causation." *Steward I, 997 F. Supp. 2d at 158* (quoting *Rhode Island Laborers' Health & Welfare Fund v. Philip Morris, Inc., 99 F. Supp. 2d 174, 187 (D.R.I. 2000)* (alteration in original)). "'Contingencies, conjecture, and **[**82]** speculation will not support a finding of proximate cause,' and will, therefore, not support a finding of antitrust liability." Id. (quoting *Philip Morris, Inc., 99 F. Supp. 2d at 187*).

Steward has presented sufficient evidence to survive summary judgment and to place the causation question before the jury. Specifically, there is a material factual dispute about whether failure to reach a deal with Blue Cross caused Steward to abandon the Landmark negotiations, in the form of (1) testimony of Steward witnesses; (2) conduct of Steward players; and (3) conduct of other key players.

---

[39] Incidentally, the Court rejects Blue Cross's spin on Ocean State Physicians. A close reading of that opinion makes clear that, ***HN20***[] although it may be sufficient, it is not necessary for a plaintiff to lodge a successful antitrust claim in order to prove a claim for tortious interference with contractual relations or interference with prospective contractual relations. *Ocean State Physicians, 883 F.2d at 1114* ("To be sure, not all business torts are 'exclusionary' under the antitrust laws. In an appropriate case, a plaintiff might fail to establish an antitrust violation but still establish that certain torts had been committed." (citation omitted)); see also *Kartell v. Blue Shield of Mass., Inc., 749 F.2d 922, 933-34 (1st Cir. 1984)* (highlighting possibility that Blue Shield's conduct - though not an antitrust violation - "might amount to minor business torts").

Blue Cross asserts that a "force other than the antitrust violation fully accounts for" Steward's alleged injury because Steward would not waive and could not satisfy three conditions in the APA: (1) the RISH condition (the May 2011 APA encompassed a condition for Landmark's purchase of 100% of RISH); (2) the Thundermist condition (a MOU with Thundermist); and (3) the SNERCC condition (that Landmark attain a majority interest in SNERCC, owned by 21st Century). (Def.'s Mem. 55 (quoting *In re Canadian Import Antitrust Litig., 470 F.3d 785, 791-92 (8th Cir. 2006)))*. Steward's evidence sufficiently calls into question whether each or any of these conditions were requirements, or more akin to bargaining chips in Steward's quest to **[**83]** reach an acceptable agreement with Blue Cross over Landmark.

Just a sample of Steward's evidence makes the point: Steward highlights extensive testimony that reaching a deal with Blue Cross was the only dispositive condition for Steward. (See, e.g., Dep. of Ralph de la Torre ("de la Torre Dep.") at 45-46, **[*505]** SDF Ex. 1, ECF No. 206-1 ("A. I firmly believe at every stage of this agreement, and still believe now, that there is only one predicate condition to success in that area in caring for the totality of the patient, and that's Blue Cross Blue Shield, okay. . . . So that was the only truly predicate condition."); id. at 49-50 ("I mean, conditions can be on a document, but at the end of the day, I think everybody understood that it was Blue Cross . . . the AG never called in 21st Century Oncology. They never called in Thundermist. It was always Blue Cross. Again, actions speak louder than words. That's pretty clear to me that everybody understood that it was us and them at the end."); Dep. of Joshua Putter at 98:2-11, SDF Ex. 9, ECF No. 206-9 ("[S]o the cancer center wasn't like a go, no-go type of thing. We were going to acquire Landmark and figure out the cancer center strategy. We wanted to acquire **[**84]** it. That wasn't a, if we don't acquire all of it, we're not going to do it type of decision. . . . [W]e, Steward, abandoned the Landmark deal because of the Blue Cross rates, not because of the cancer center.")).

As to the first two conditions (RISH and Thundermist), Steward set forth, for instance, a letter to Justice Silverstein on September 4, 2012, in which Steward informed the court that, "progress on the three conditions has been fleeting" and "as an alternative, [Steward] proposed that if BCBSRI is able to execute a participation agreement with Steward, Steward Health Care will waive conditions (i) [MOU with Thundermist] and (ii) [100% interest in RISH] . . . ." (SDF Ex. 144 at 3, ECF No. 210-56.) Similarly, Steward sets forth evidence that it was willing to waive the SNERCC condition. (See, e.g., de La Torre Dep. at 122-123, SDF Ex. 1 ("Q. . . . [D]id Steward, to your knowledge, ever express to anyone, mediator, attorney general, Jon Savage, Justice Silverstein, anybody, that Steward would waive condition (iii), meaning an agreement with 21st Century where Steward would own 100 percent of SNERCC? A. Absolutely."); id. at 123 ("A. I can unequivocally tell you that I expressed it to Savage, **[**85]** unequivocally. And I'm pretty sure that I said to the judge, 'With the appropriate contract, we could even waive [the SNERCC condition,]' but that's harder to come by.")).

As to Blue Cross's second causation argument (that OHIC regulations capped what Blue Cross could offer Steward and therefore caused Steward's alleged injury) Steward sets forth sufficient evidence to create a jury question. As discussed supra, the OHIC regulations themselves and communications by OHIC belies Blue Cross's rigid reading of the regulations. Blue Cross reluctantly acknowledges this when it states, "[u]nder certain narrow circumstances, OHIC considered waivers from these regulations from other insurers." (Def.'s Mem. 66.)

It is not dispositive (even if true, which Blue Cross can attempt to show at trial) that Steward "never discussed any such exception with OHIC." (Id.) Steward advances sufficient evidence to suggest it was Blue Cross - and not Steward - that had the burden to raise such exceptions with OHIC. (See SDF Ex. 43 at 2, ECF No. 206-43 ("Issuers [insurers] are encouraged to file such requests [for exceptions].")). After all, as discussed above, OHIC regulates health insurers - not hospitals and **[**86]** doctors.

Moreover, the facts suggest that Blue Cross never viewed the OHIC regulations as inflexible as it now casts them, (see Def.'s Mem. 66.), and that Steward did in fact raise the issue of approaching OHIC for an exception, in the context of bundling rate increases and quality metrics with Steward's other hospitals in Massachusetts and Landmark. Steward proposed "bundling" reimbursement agreements for Landmark, St. Anne's, and Morton whereby **[*506]** Steward would accept a lower increase for St. Anne's and Morton hospitals to achieve higher rates at Landmark, while still satisfying OHIC. And Blue Cross recognized the potential viability of this approach in spite of OHIC. (See, e.g., BCBSRI/Steward Proposal Summary August 5, 2012 3, SDF Ex. 186, ECF No. 212-29 ("BCBSRI agrees with Steward's proposed concept of bundling several of its hospitals in a way that creates value and will allow BCBSRI to justify additional increases at Landmark for 2012; while aligning with the OHIC Hospital Contracting Conditions.")).

Moreover, Steward's evidence refutes, or at least creates a factual dispute, with respect to Blue Cross's suggestion that "[t]he other major insurers in Rhode Island—Tufts and United" **[**87]** understood too that "the OHIC regulations were binding." (Def.'s Mem. 66; see also 2011 OHIC Standards 16, SDF Ex. 44 ("Too much prescriptiveness may encourage an excessive focus on compliance and discourage the kind of payment reform and innovation which was intended."); id. (suggesting OHIC approved contracts involving United and Tufts where OHIC conditions were not fully complied with); Dep. of Todd Whitecross at 120, SDF Ex. 31, ECF No. 206-31 (suggesting Tufts offered rate increases above OHIC cap because at that time, it "didn't have a formal relationship with [Prime]")).

It will be for the jury to decide the extent OHIC regulations entered into the parties' negotiations calculus and whether they or something else caused Steward's alleged injury. This is not simply a question, as Blue Cross suggests, of "interpreting regulatory text in light of government purposes," a matter of law reserved for this Court, (see Def.'s Mem. 66 (quoting *Kolbe v. BAC Home Loans Servicing, LP, 738 F.3d 432, 443 (1st Cir. 2013)))*; instead, it is a factual question of what caused Steward's attempted acquisition of Landmark to fail, as to which Steward will bear the ultimate burden of proof at trial. See *Addamax Corp. v. Open Software Found., 152 F.3d 48, 54 (1st Cir. 1998)* (***HN23***[ ] In the context of an alleged *Sherman Act* injury, "whether the defendants' **[**88]** assumed conduct had been a substantial or material cause of the losses claimed by [plaintiff]" was properly a "factual determination" for jury).

2. Harm to Competition

Blue Cross claims summary judgment should also enter because there is no evidence that Blue Cross's alleged conduct harmed competition. It argues: (1) merely swapping out one potential buyer (Steward) for another actual buyer (Prime) is of no inherent consequence under the antitrust laws; and (2) Prime's acquisition of Landmark benefited consumers (and thus competition) because Prime charges lower prices than those Steward would have charged. This argument is a silver bullet aimed at the wrong target.

HN24[ ] To create a jury question on harm to competition in this circuit, "evidence of actual, present competition is not necessary as long as the evidence shows that the potential for competition exists." *Sullivan, 34 F.3d at 1100*. The Sullivan court's discussion of harm to competition is particularly instructive. There, defendants the National Football League and multiple organizations that owned NFL franchises (collectively, "NFL"), appealed a jury finding that the NFL had harmed competition and therefore violated the antitrust laws by prohibiting member-football-team **[**89]** owners from offering public stock in their teams. *Id. at 1094*. The plaintiff, a former owner of the New England Patriots, prevailed at trial after challenging the NFL's policy that required him to sell his team to a private buyer rather than to the public. Id. In asserting **[*507]** there was inadequate evidence of harm to competition, the NFL endorsed a narrow conception of competition, suggesting "that the alleged effect of its ownership policy [was] to reduce prices of NFL team ownership interests, rather than to raise prices which is normally the measure of an injury to competition." *Id. at 1101*. The court rejected the NFL's tapered vantage point and declared, "The Supreme Court has emphasized, however, that overall consumer preferences in setting output and prices is more important than higher prices and lower output, per se, in determining whether there has been an injury to competition." Id. (citing *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 107, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984) (NCAA)*). The court added, "regardless of the exact price effects of the NFL's policy, the overall market effects of the policy are plainly unresponsive to consumer demand for ownership interests in NFL teams. . . . Thus, a jury could conclude that the NFL's policy injured competition by making the relevant market **[**90]** 'unresponsive to consumer preference.'" Id. (quoting *NCAA, 468 U.S. at 107*). In the face of the NFL's suggestion that plaintiff's "position was based on nothing more than sheer speculation," the Court emphasized that "[i]t would be difficult indeed to provide direct evidence of competition when the NFL effectively prohibits it." *Id. at 1100*. Thus, Sullivan countenances that measuring harm to competition is more complicated than simply assessing price and output - evidence of efficiency is also pertinent. See *id. at 1100-02*.

Blue Cross misses this when it declares, "[i]n order to establish harm to competition, a plaintiff must show 'a reduction in output and an increase in prices in the relevant market.'" (Def.'s Mem. 69 (quoting *Sterling Merch., 656 F.3d at 121* (first emphasis added))). Blue Cross omits the qualifying language, derived from *Sullivan, 34 F.3d at 1097*, that harm to competition is "usually measured" in this way. This case is far from "usual" - and it is not an instance where prospective harm to competition can only be assessed by a reduction in output or an increase in consumer prices.[40]

Blue Cross's argument that swapping out one potential hospital buyer for another actual buyer only works if the jury rejects Steward's theory that what it brought to the marketplace was a **[**91]** new competitive health care delivery model that Blue Cross feared and sought to defeat. In other words, there is a difference, Steward contends, in a "Steward Landmark" and a "Prime Landmark," and this affects the legal parameters for assessing harm to competition. Blue Cross's own assessments acknowledge that Steward offered something new and different to Rhode Island. (See, e.g., Andruszkiewicz Dep. at 297:9-13, SAUF Ex. 6 ("The other, which actually is a positive in terms of Steward's acquisition of Landmark, was that we knew that they did bring some innovation, a different kind of model for the way care was delivered, and we thought that was a good thing."); id. at 27:11-27:8, 39:9-39:12 ("[Dr. de la Torre and Steward] have their model and I think it's an advancement over, you know, what's been happening in Massachusetts" "because it's moving away from sort of the siloed sort of approach by providers and the fee for service only, you know, methodology of providers getting paid.")). The same was true of Thundermist's early assessments of the Steward model. In a September 28, 2011 email to Montanaro, Jones writes:

> **[*508]** met with Steward . . . [g]enerally impressed with what they are doing, **[**92]** including developing partnerships with tertiary hospitals for specialty care and progress on radiology quality. Showing very good quality and cost results on the MA AQC. With the new Tufts plan offering 15-30% discounts for their community model of care, they are a serious threat to the status quo.

(SAUF Ex. 98 at 2, ECF No. 215-23.) And Montanaro's March 26, 2010 testimony before Justice Silverstein strikes the same chord:

> Now that we have health care reform and we understand much more about the direction in which health care is going, a great deal of change is going to be needed among all hospital systems and their relationship to primary care and specialist care. In my preliminary conversations with Ralph de la Torre and his senior leadership team at Caritas, I feel very confident and actually enthusiastic about . . . their approach to meeting those opportunities and challenges across their whole system; and particularly . . . for the care delivery in northern Rhode Island.

(SAUF Ex. 99 at 61:5-17, ECF No. 215-24.) Blue Cross also recognized the value of the plan Steward offered and acknowledged that Prime was not - and never purported to be - Steward. (See SAUF Ex. 101 at 2, ECF No. **[**93]** 215-26 (email from Blue Cross's Mark Waggoner to Blue Cross employees) (comparing "Prime, vs. a few months ago w Steward" and outlining the logic to explain variances in negotiation rates with Steward versus Prime: "we believed there to be extensive value to engaging with Steward at higher rates given the integrated delivery capabilities they could bring to the market in year 3?"); Jones Dep. 285-286, SAUF Ex. 12 (describing conversation with Dr. Reddy of Prime, who "didn't know what an ACO was" which, among other things, made it "clear to [Jones] that the Prime model does not consider healthcare system efficiency as an overall goal"); id. at 286:18-287:4 ("Q. And [Prime] made improvements in how [Landmark] looks or repair it or make it more modern or anything? A. There's a nice piano in the entrance, and I think they've redone a couple -- I took a tour of one of the floors. It looks nicer, yes. Q. Has there been any substantive improvement at Landmark, in your view? A. Not in terms of quality or community partnership, no.")). Even Prime acknowledged that it had none of Steward's ambitions with respect to bringing a risk-based model or ACOs into Rhode Island. (Charest Dep. at 74:10-17, **[**94]** SAUF Ex. 14 ("Q. [D]oes Prime have any plans to participate in an ACO product in Rhode Island? A. No. . . . They've not found an ACO product that's been acceptable to them"); id. at 85:15 ("We don't have risk-based contracts.").

What Steward claims it could have introduced into the Rhode Island health care and health insurance markets was potentially beneficial to competition, and blocking it had potential antitrust consequences. See, e.g., *Federal Trade*

---

[40] Although, Blue Cross cannot, as a matter of undisputed fact, satisfy that test either.

Comm'n v. Arch Coal, Inc., 329 F. Supp. 2d 109, 146 (D.D.C. 2004) ("An important consideration when analyzing possible anticompetitive effects is whether the acquisition would result in the elimination of a particularly aggressive competitor in a highly concentrated market . . . ." (citations and quotations omitted)); cf. Brooke Grp. v. Brown & Williamson, 509 U.S. 209, 223-24, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993) (describing "maverick" firm, i.e., a firm that, for a variety of reasons, is more likely to "stray[] from the group"); United States v. H&R Block, Inc., 833 F. Supp. 2d 36, 79 (D.D.C. 2011) ("In the context of ***antitrust law***, a maverick has been defined as a particularly aggressive competitor that 'plays a disruptive role in the market to the benefit of customers.'" **[*509]** (quoting Merger Guidelines § 2.1.5)). That is, it is both legally and factually important to the antitrust analysis that Steward - a hospital owner that wanted to bring change and to eventually compete to **[**95]** potentially minimize or displace the modern and traditional role of insurance companies - was swapped out with a hospital system that concededly had no - and was even arguably troubled by - such aspirations. (See Jones Dep. at 286:7-10, SAUF Ex. 12.)

The evidence that Blue Cross's alleged refusal to deal with Steward harmed competition is plentiful. Steward presents evidence that Blue Cross's "Red Team"[41] - the group of employees and consultants who considered business threats - identified and analyzed Steward's potential competitive impact.[42] (See, e.g., SAUF Ex. 31, ECF No. 214-31 (presentation to Blue Cross's ELT of potential competitive "risks to BCBSRI" of a Steward ACO partnering with Tufts to offer a new, less-expensive, higher-quality product to Rhode Island); SAUF Ex. 28, ECF No. 214-28 (email between Red Team members) ("One thought I had was in order to really press the issue of how big a potential threat Steward is, maybe change the map to show just how well positioned they are in the southeast part of MA...they have St. Anne's, Good Sam's, Morton, Norwood, and Quincy...they basically have RI bordered. Then [L]andmark would be the tip of the spear. . . . It'll look like they're **[**96]** getting ready for a blitzkrieg!"); SAUF Ex. 29.) Steward presents evidence that Blue Cross employees were apprehensive that if Steward acquired Landmark, in addition to its continued operation of hospitals in nearby Massachusetts, the "Steward Community Choice health plan" with rates "15% to 30% below a comparable broad network plan" offered in partnership with Tufts in Massachusetts could more effectively infiltrate Rhode Island. (See, e.g., SAUF Ex. 32, ECF No. 214-32 (email from Blue Cross employee Daniel Belvin to other employees: "I do not expect to see this move [of Steward's Community Choice Plan] in Rhode Island at launch since the required physicians and hospitals are all community hospitals and affiliated physicians in Massachusetts (Saint Anne's in Fall River is the closest at this time). However, if the Landmark acquisition goes through it could lead to a more effective entry point for this product into our market."); cf. SAUF Ex. 23 at 3, ECF No. 214-23 (Sept. 2012 Red Team Scenarios, "Expansion of Community Choice Product into Rhode Island": "However with Steward facilities in nearby Fall River (St. Anne's Medical Center) and Taunton (Morton Hospital), Bristol and Newport **[**97]** counties may also be served, bringing cost-effective coverage to more than 72% of the state's population."). And Steward presents evidence that Blue Cross was generally anxious about the potential competitive impact that ACOs and risk-based contracting **[*510]** posed for insurance companies. (See, e.g., SAUF Ex. 35 at 11 ("Just supporting such structures is insufficient because the possibility exists for the ACO to develop a level of integration that makes an outside insurer redundant."); Coleman Dep. at 435-38, SAUF Ex. 7 (Blue Cross's then-CFO describing how an ACO in collaboration with a hospital could risk "disintermediation" of Blue Cross, i.e., "the health care insurance company is no longer relevant"); Andruszkiewicz Dep. at 93:3-5, SAUF Ex. 6 (describing "disintermediation" as the provider "eliminat[ing] the intermediary known as the payer and [then] becom[ing] the provider and payer"); id. at 93:7-13 ("And so [disintermediation] was a concern among my team, me, and every health insurance executive in the United States at this time frame. And so we're walking here the fine line, in the way I guess I'd describe it, between having a partnership with this provider and

---

41 The Red Team's motto was "Attack Adapt Advance" and its logo appears to be a hatchet enclosed within the "shield" of Blue Cross's emblem. (See, e.g., SAUF Ex. 29 at 2, ECF No. 214-29.)

42 Blue Cross has its own assignment of meaning to the Red Team documents, which may ultimately persuade the jury. The Red Team's September 2012 presentation to Blue Cross's ELT included a disclaimer that, "Information included in the presentation is for illustrative purposes only; names and scenarios do not represent real life situations and parties could be interchanged." (SAUF Ex. 31 at 2.) Despite Blue Cross's proviso, how close the Red Team's analysis tracks in time and substance the reality of what Steward was seeking to bring to Rhode Island does more than raise a few eyebrows - it raises a genuine factual dispute over the meaning of the Red Team documents to both Blue Cross and this case. Indeed, the Red Team's cast of characters included those with major influence in real-life negotiations, including Consultant Maria Montanaro. (See id.)

protecting ourselves **[**98]** from them taking away our business."); Waggoner Dep. at 298:9-21, SAUF Ex. 11 ("Q. [W]asn't there some discussion at Blue Cross at about this same time about the possibility that the ACO model or integrated delivery system could in some sense replace a conventional insurance company? A. I'm sure there was. I don't recall, you know, specific conversations. But the trend in conversations at that point in time, there was a lot of conversation like that in the country at that point in time.")).

Blue Cross's second argument that Prime's acquisition of Landmark benefited consumers (and thus competition) because Prime charges lower prices than those Steward proposed is saturated with material factual disputes. Even assuming that the calculus is as narrow at Blue Cross suggests, Steward presents evidence that a Steward-owned Landmark would have saved Blue Cross (and therefore consumers) money. (See, e.g., SAUF Ex. 86 at 6, ECF No. 215-11 ("Redirection of care to lower cost, non-network community hospital would have tremendous impact on lowering healthcare costs."); Eisenstadt Rep. ¶ 58, SDF Ex. 39, ECF No. 206-39 ("Steward would not have needed to achieve any volume growth at **[**99]** Landmark relative to 2011 for BCBSRI and its employer accounts to have been financially better off in 2015."). But see Noether Rep. ¶¶ 203-12, SDF Ex. 40, ECF No. 206-40 (Blue Cross's expert concluding Blue Cross saved money with Prime)). At bottom, whether competition was harmed is a matter of how the jury sees the question and assesses the facts.

Finally, Blue Cross's argument that "the actual evidence, as opposed to speculation about the future effect of Steward's business plans, shows that Steward's acquisition of Landmark would have harmed Rhode Islanders in the form of higher healthcare costs." (Def.'s Mem. 74.) Like the boy who kills his parents and then pleads for mercy as an orphan, Blue Cross's argument is the height of chutzpah. Steward cannot be faulted for having no direct evidence of the competitive benefits that it could have brought to Rhode Island when the barricade was erected by Blue Cross's allegedly exclusionary conduct. The Supreme Court long ago closed the door to this reasoning when it stated, "the most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created." *Coastal Fuels of P.R., Inc. v. Caribbean Petrol. Corp., 79 F.3d 182, 200 (1st Cir. 1996)* (quoting **[**100]** *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 256, 66 S. Ct. 574, 90 L. Ed. 652 (1946))*. To modify slightly what the First Circuit said in Sullivan, "It would be difficult indeed to provide direct evidence of competition when [Blue Cross] effectively prohibit[ed] it." *34 F.3d at 1100*.

[*511] 3. Damages

Blue Cross suggests that the Court should exclude Steward's damages model because all but a small portion of its damages could have been mitigated, and that Steward's damages model clashes with Steward's claims because it does not distinguish between damages caused by lawful versus unlawful conduct.[43]

Several overarching principles guide the Court's analysis. First, ***HN25***[] although antitrust plaintiffs have a duty to mitigate their losses, see, e.g., *Golf City, Inc. v. Wilson Sporting Goods, Co., 555 F.2d 426, 436 (5th Cir. 1977)*, the failure to mitigate is an affirmative defense, which the defendant must plead and prove. See, e.g., *Pierce v. Ramsey Winch Co., 753 F.2d 416, 436-37 (5th Cir. 1985)* ("[D]efendant bears the burden of demonstrating a failure to mitigate . . . ."); *Malcolm v. Marathon Oil Co., 642 F.2d 845, 863 (5th Cir. 1981)* ("[T]he burden of showing that the victim of [the anticompetitive] conduct failed to minimize his damages rests with the wrongdoer." (quotations and citations omitted)). And second, on a summary-judgment motion, the defendant must clear that hurdle as a matter of undisputed fact. See *Creative Copier Servs. v. Xerox Corp., No. Civ.A 301CV155SRU, 2005 U.S. Dist. LEXIS 19402, 2005 WL 2175138, at *5 (D. Conn. Sept. 2, 2005)* (deeming mitigation of damages **[**101]** in antitrust case a "classic example of a disputed issue of material fact").

It is also significant that, ***HN26***[] "any model supporting a plaintiff's damages case must be consistent with its liability case, particularly with respect to the alleged anticompetitive effect of the violation." *Comcast Corp. v. Behrend, 569 U.S. 27, 133 S. Ct. 1426, 1433, 185 L. Ed. 2d 515 (2013)*. Blue Cross asserts that Steward could

43 This section cross-references Steward's previously filed Motion in Limine To Exclude Damages Testimony of Keith Ghezzi and Marc Sherman (ECF No. 161).

have mitigated all but $800,000 of its damages by accepting Blue Cross's proposed reimbursement rates. This factual assertion essentially acknowledges that summary judgment is not appropriate. In reality, this part of Blue Cross's motion amounts to a motion in limine to restrict the evidence of damages at trial. It asks the Court to shun Steward's liability case as a matter of law. However it is characterized, the argument is rejected. Blue Cross suggests that Steward - in the midst of intense and seemingly ongoing, good-faith negotiations - was required to step back, identify a breach, i.e., an antitrust violation, and then accept Blue Cross's latest offer (having determined it was in bad faith), because not doing so would neglect its duty to mitigate. This is nonsensical, and, not surprisingly, finds no support in the law, in antitrust or otherwise. Cf. *In re Kellett Aircraft Corp., 186 F.2d 197, 198-99 (3d Cir. 1950)* ("The rule **[**102]** of mitigation of damages may not be invoked by a contract breaker as a basis for hypercritical examination of the conduct of the injured party, or merely for the purpose of showing that the injured person might have taken steps which seemed wiser or would have been more advantageous . . . ."); *Koby v. United States, 53 Fed. Cl. 493, 497 (2002)* ("Accordingly, courts have been reluctant to require parties, under the duty to mitigate, to deal further with the breaching party . . . ."). The offer Blue Cross says Steward should have accepted is part and parcel of Blue Cross's alleged anticompetitive conduct; it cannot be said that, as a matter of law, the duty to mitigate required Steward to accept Blue Cross's arguably bad faith offers in order to mitigate.

As to Blue Cross's suggestion that Steward's damages model is based in part on Blue Cross's failure to participate in a **[*512]** "collaborative relationship" with Steward and that holding Blue Cross responsible for failing to engage in such a relationship exceeds the law's proscription with respect to "lawful" conduct, Blue Cross can make this argument at trial. For now, Steward has created a genuine dispute of material fact that Blue Cross would, if it had acted in good faith, implemented a **[**103]** rate agreement with Steward that included a collaborative, risk-based agreement in year three, which is consistent with an antitrust approach to calculating damages: "an expert may construct a reasonable offense-free world as a yardstick for measuring what, hypothetically, would have happened 'but for' the defendant's unlawful activities." *LePage's, Inc. v. 3M, 324 F.3d 141, 165 (3d Cir. 2003)*. Part of the world Steward constructs as the reality but for Blue Cross's refusal to deal with Steward embraces a "cooperative" business relationship between Steward and Blue Cross - not because the antitrust laws required such a relationship, rather because the parties projected such an arrangement through their course of dealing. In other words, Steward's expert simply details what is implicit in every contract: the duty of good faith and fair dealing. See *Dovenmuehle Mortg., Inc. v. Antonelli, 790 A.2d 1113, 1115 (R.I. 2002)* (per curiam) (***HN27***[] "[V]irtually every contract contains an implied covenant of good faith and fair dealing between the parties." (quoting *Centerville Builders, Inc. v. Wynne, 683 A.2d 1340, 1342 (R.I. 1996))*. It is premature to conclude, as Blue Cross does, that accepting Steward's damages model fails to distinguish between lawful and unlawful conduct. Unlike the many cases Blue Cross cites in which conduct had already been deemed lawful or unlawful, **[**104]** here there is no previously adjudicated, lawful conduct to filter out from Steward's model. Cf. *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1163 (7th Cir. 1983)* (reversing jury award where plaintiff's damages model assumed illegality of all of defendant's charged acts, when liability was predetermined as to only seven). And based on the viability of Steward's claims as outlined above, summary judgment is not the time to test Blue Cross's damages theory.

A final point: although damages will be further examined at trial, a plaintiff is not required to quantify damages to sustain a damages award in this context; ***HN28***[] when an antitrust plaintiff demonstrates it has been damaged, a jury may award nominal damages. See *Sciambra v. Graham News, 892 F.2d 411, 415 (5th Cir. 1990)* ("[P]roof of an antitrust violation and the fact of damage is a sufficient basis for an award of nominal damages."); *Home Placement Serv., Inc. v. Providence J. Co., 819 F.2d 1199, 1207, 1210 (1st Cir. 1987)* (affirming nominal damages award where plaintiff established fact of damage but did not set forth adequate evidence "to permit a trier of fact to ascertain the amount of damages by just and reasonable inference"). Blue Cross's declarations over damages do not suffice to grant summary judgment against Steward.

4. State-Action Doctrine

Finally, Blue Cross avers that the state-action doctrine forecloses Steward's antitrust claims **[**105]** because state regulation compelled the supposedly unreasonable rates that Blue Cross offered. As a matter of law, the Court doubts that the state-action doctrine contemplates these circumstances, and, even if it did, Blue Cross's argument is deficient for many of the reasons outlined above with respect to the OHIC regulations.

HN29[] The state-action doctrine immunizes from challenge conduct that is the intentional or foreseeable result of state or local government policy. See *Parker v. Brown, 317 U.S. 341, 351, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. And it has two elements **[*513]** for immunizing supposed compelled conduct: "[f]irst, the challenged restraint must be 'one clearly articulated and affirmatively expressed as state policy'; second, the policy must be 'actively supervised' by the State itself." *Ca. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)* (quoting *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978))*. For purposes of argument, Steward concedes the first prong and solely addresses the second, the "active supervision prong."

HN30[] In Patrick v. Burget, the Supreme Court set forth that "the active supervision requirement mandates that the State exercise ultimate control over the challenged anticompetitive conduct." *486 U.S. 94, 101, 108 S. Ct. 1658, 100 L. Ed. 2d 83 (1988)*. The "mere presence of some state involvement or monitoring does not suffice." Id. To invoke the doctrine also necessitates that "state officials have **[**106]** and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy." Id.; see also *FTC v. Ticor Title Ins. Co., 504 U.S. 621, 634-35, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)* ("[The active-supervision inquiry's] purpose is to determine whether the State has exercised sufficient independent judgment and control so that the details of the rates or prices have been established as a product of deliberate state intervention, not simply by agreement among private parties. . . . The question is not how well state regulation works but whether the anticompetitive scheme is the State's own."). A brief summation of the state-action doctrine standard alone crystallizes why it does nothing to bar Steward's claims here. Because it cannot be said that Blue Cross's "anticompetitive acts were truly the product of state regulation," Blue Cross cannot "claim state-action immunity from *Sherman Act* liability." *Patrick, 486 U.S. at 100*; see also *Ticor, 504 U.S. at 636* ("state-action immunity is disfavored.").

In any event, assuming arguendo that that the doctrine somehow contemplates these circumstances, Steward easily overcomes it. As a matter of disputed fact: (1) OHIC has no authority over hospitals - only health insurers; (2) based on OHIC's own publications, OHIC **[**107]** has previously excepted application of its regulations for certain hospitals, and OHIC regulations are not inflexible in the sense that they would prohibit Blue Cross from ever offering rate increases of a certain amount. Thus, Steward has at least created a material factual dispute regarding the "active supervision" prong. Blue Cross's request for summary judgment on this ground fails.

E. Conclusion

For the reasons outlined above, the Court DENIES Blue Cross's Motion for Summary Judgment (ECF No. 157) on all Counts of Steward's Amended Complaint (ECF No. 90). Accordingly, Counts I-XVIII will proceed to trial.

IT IS SO ORDERED.

THE STATE OF TEXAS, Plaintiff, v. O.S.T LOUNGE, et al., Defendants.

Core Terms

alcohol, federal law, federal issue, preempts, state law, implicates, regulation, state-law, argues, interstate, preemption, disputed, removal, liquor

Counsel: **[*1]** For State Of Texas Plaintiff: Rosemarie Donnelly, LEAD ATTORNEY, Harris County Attorney's Office, Houston, TX.

For O.S.T. Lounge, John Calvin Grant, My Peerless Place, LLC, Jackie Lee Hairston, Jr., The Miller Living Trust In Care of Trustee Paula Maria Miller, The Real Property Known As 6556 Peerless, Houston, Texas 77021, Eric Demetrius Tart, Defendants: Jeremy A. Williams, Attorney at Law, Houston, TX.

Judges: Lee H. Rosenthal, Chief United States District Judge.

Opinion by: Lee H. Rosenthal

Opinion

MEMORANDUM AND OPINION GRANTING THE PLAINTIFF'S MOTION TO REMAND

The State of Texas sued O.S.T. Lounge in Texas state court, alleging that the Lounge is an unlicensed after-hours bar that sells alcohol without the required permits and that has been linked to repeated criminal activity and violence. The State assert claims for common nuisance under *Chapter 101 of the Texas Alcoholic Beverage Code*, for selling alcohol without the required licenses or permits, for common nuisance under *Texas Civil Practice & Remedies Code §§ 125.001-125.047*, and seeks injunctive relief.

O.S.T. Lounge removed, arguing that the State's claims are "predicated on the effect and interpretation of federal regulation," making federal-question jurisdiction proper. (Docket Entry No. 1 at 2). The **[*2]** State moves to remand, arguing that there is no federal question and no federal removal jurisdiction. (Docket Entry No. 3). The parties agree that the petition, on its face, asserts only state-law claims. (Docket Entry No. 3 at 2; Docket Entry No. 5 at 2). The issue is whether federal law preempts the state-law claims or whether the claims require the resolution of a substantial disputed question of federal law.

"Under th[e] 'well-pleaded complaint' rule, a federal court has original or removal jurisdiction only if a federal question appears on the face of the plaintiff's well-pleaded complaint; generally, there is no federal jurisdiction if the plaintiff properly pleads only a state law cause of action." *Bernhard v. Whitney Nat'l Bank, 523 F.3d 546, 551 (5th Cir. 2008)*. "Even an inevitable federal defense does not provide a basis for removal jurisdiction." *Id.*

The "artful pleading doctrine" is a narrow exception that allows removal only "where state law is subject to complete preemption." *Id.* (citing *Terrebonne Homecare, Inc. v. SMA Health Place, Inc., 271 F.3d 186, 188-89 (5th Cir. 2001)* ("The artful pleading doctrine does not apply, however, unless federal law completely preempts the field.")).

Complete preemption is present when a "federal statute `so forcibly and completely displaces state law that the plaintiff's cause of action **[*3]** is either wholly federal or nothing at all.'" *Hoskins v. Bekins Van Lines, 343 F.3d 769, 773 (5th Cir. 2003)* (quoting *Carpenter v. Wichita Falls Ind. School Dist., 44 F.3d 362, 366 (5th Cir. 1995))*. The Supreme Court recognizes complete preemption only in three areas: the Labor Management Relations Act, ERISA, and the National Bank Act. *See* *Ben. Nat'l Bank v. Anderson, 539 U.S. 1, 8, 123 S. Ct. 2058, 156 L. Ed. 2d 1 (2003)*. This case implicates none of those statutes, and complete preemption does not apply.

A second exception allows removal of "a case pleading only state law claims" if "the vindication of a right under state law necessarily turn[s] on some construction of federal law." *Bernhard, 523 F.3d at 551* (quoting *Franchise Tax Bd. v. Const. Laborers Vacation Trust, 463 U.S. 1, 9, 103 S. Ct. 2841, 77 L. Ed. 2d 420 (1983))*. "The federal courts have jurisdiction over a state law claim that 'necessarily raise[s] a stated federal issue, actually disputed and substantial, which a federal forum may entertain without disturbing any congressionally approved balance of federal and state judicial responsibilities.' *Id.* (quoting *Grable & Sons Metal Prods. v. Darue Eng 'g & Mfg., 545 U.S. 308, 314, 125 S. Ct. 2363, 162 L. Ed. 2d 257 (2005))*. "[T]he mere presence of a federal issue in a state cause of action does not automatically confer federal-question jurisdiction." *Willy v. Coastal Corp., 855 F.2d 1160, 1168 (5th Cir. 1988)*.

O.S.T. Lounge argues that the State's state-law claims "depend on the resolution of federal law" because those state laws "attempt to regulate in an area where there has been a history of significant federal presence." (Docket Entry No. 5 at 2). O.S.T. Lounge's argument conflates the two **[*4]** exceptions to the well-pleaded complaint rule. It argues that federal law preempts the State's claims and that resolving the claims requires the court to apply federal law, creating federal-question jurisdiction. The court disagrees.

A disputed federal issue creates federal-question jurisdiction in a case that otherwise raises only state-law claims when: "(1) resolving a federal issue is necessary to resolution of the state-law claim; (2) the federal issue is actually disputed; (3) the federal issue is substantial; and (4) federal jurisdiction will not disturb the balance of federal and state judicial responsibilities." *Singh v. Duane Morris LLP, 538 F.3d 334, 338 (5th Cir. 2008)*. The issue is whether resolving the state-law claims presented in this case requires the court to resolve a substantial or disputed federal issue. O.S.T. Lounge appears to argue that, because the State seeks to: (1) restrain O.S.T.'s right to sell alcohol; (2) restrain O.S.T.'s right to allow others to consume alcohol; and (3) restrain O.S.T.'s right to advertise on the internet, federal statutes are implicated and substantial disputed federal issues must be decided. O.S.T.'s arguments are unpersuasive.

O.S.T. argues that *Section 5 of the Federal Trade Commission Act, 15 U.S.C. § 45*, is implicated. **[*5]** *Section 5* states: "Unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce, are hereby declared unlawful." *§ 45(a)(1)*. O.S.T. Lounge argues that the fact that the Federal Trade Commission may regulate interstate commerce to address unfair competition or unfair or deceptive acts or practices preempts state alcohol laws. O.S.T. cites *Liquor Corp. v. Duffy, 479 U.S. 335, 107 S. Ct. 720, 93 L. Ed. 2d 667 (1987)*, and *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*, which addressed whether wholesale and retail pricing schemes for the sale and distribution of alcohol were inconsistent with federal ***antitrust law***. By contrast, this case involves a single local establishment allegedly selling alcohol without the proper state licenses. There are no antitrust allegations, no challenges to an unlawful pricing scheme, and no indication that O.S.T. Lounge is engaged in the interstate sale or distribution of alcohol. Nothing implicates the Federal Trade Commission Act.

Second, O.S.T. Lounge argues that the State's attempt to restrain its rights to advertise is "explicitly preempted by the *Commerce Clause*." (Docket Entry No. 5 at 4). O.S.T. Lounge cites to *Capital Cities Cable v. Crisp, 467 U.S. 691, 104 S. Ct. 2694, 81 L. Ed. 2d 580 (1984)*, *Jameson & Co. v. Morgenthau, 307 U.S. 171, 59 S. Ct. 804, 83 L. Ed. 1189 (1939)*, and *Dickerson v. Bailey, 87 F. Supp. 2d 691 (S.D. Tex. 2000)*. In *Crisp,* the Supreme Court addressed an Oklahoma law that banned using out-of-state signals to retransmit cable television **[*6]** advertisements for alcoholic beverages as part of local programming. The Court held that the extensive nature of the FCC regulatory scheme for commercial cable television preempted state and local regulations in the area and that the Oklahoma advertising ban directly conflicted with the federal regulations. *Id. at 704*. The Court also explained that while the Twenty *First Amendment* reserves to the states the power to "regulate the importation and use of intoxicating liquor within their borders," the federal government "plainly retains authority under the *Commerce Clause* to regulate interstate commerce in liquor." *Id. at 712-13*; *see also* *Dickerson, 87 F. Supp. 2d at 693* (addressing whether a Texas statute prohibiting Texans from importing more than three gallons of wine for personal use without a special permit, unless the resident personally accompanied the liquor as it entered the state). This case does not implicate interstate alcohol sales or purchases that would require applying or interpreting federal law.

Finally, O.S.T. Lounge argues that the presumption against preemption does not apply in areas historically regulated by the federal government, such as the regulation of alcohol under the *Federal Alcohol Administration Act*, *27 U.S.C. § 203*. The purpose of that Act is to regulate **[*7]** the interstate distribution, production, and importation of alcohol. *Section 121* of the Federal Alcohol Administration Acts explains:

> All fermented, distilled, or other intoxicating liquors or liquids transported into any State or Territory or remaining therein for use, consumption, sale or storage therein, shall upon arrival in such State or Territory be subject to the operation and effect of the laws of such State or Territory enacted in the exercise of its police powers, to the same extent and in the same manner as though such liquids or liquors had been produced in such State or Territory, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise.

27 U.S.C. § 121. This section specifically reserves a state's ability to regulate alcohol within its borders and expressly states that federal law does not to preempt state laws regulating intrastate alcohol use, consumption, sale, or storage. *See also* *Craig v. Boren, 429 U.S. 190, 205, 97 S. Ct. 451, 50 L. Ed. 2d 397 (1976)*. Texas requires licenses to sell alcohol within the State under the Texas Alcoholic Beverage Code. *Chapter 101 of the Code* provides for injunctive relief against selling alcohol without the proper licenses or permits. An action under that provision neither implicates **[*8]** nor requires the resolution of a substantial question of federal law.

This case presents no federal question. The court lacks subject-matter jurisdiction, making remand proper. This case is remanded to the 11th Judicial District Court of Harris County, Texas.

SIGNED on April 23, 2018, at Houston, Texas.

Judges: CLAUDIA WILKEN, United States District Judge.

Opinion by: CLAUDIA WILKEN

Opinion

ORDER ON MOTIONS TO EXCLUDE PROPOSED EXPERT TESTIMONY

(Dkt. Nos. 704, 807, 809-52)

Now pending are Plaintiffs' motions to exclude the proposed testimony of Dr. James J. Heckman and Dr. Kenneth G. Elzinga, and Defendants' motions to exclude portions of the proposed testimony of Dr. Daniel A. Rascher, Dr. Roger G. Noll and Dr. Edward P. Lazear. For the following reasons, the Court grants Plaintiffs' motion to exclude the opinions of Dr. Elzinga. The Court grants in part and denies in part Plaintiffs' motion to exclude the opinions of Dr. Heckman. The Court denies without prejudice Defendants' motion to exclude portions of the opinions of Drs. Rascher, Noll and Lazear. **[*24]**

BACKGROUND

Plaintiffs are current and former student-athletes in the sports of men's Division I Football Bowl Subdivision (FBS) football and men's and women's Division I basketball. Defendants are the NCAA and eleven conferences that participated, during the relevant period, in FBS football and in men's and women's Division I basketball. Plaintiffs allege that Defendants violated federal ***antitrust law*** by conspiring to impose an artificial ceiling on the scholarships and benefits that student-athletes may receive in return for their elite athletic services. See *15 U.S.C. § 1*. All claims for damages having settled, only claims for injunctive relief remain in this multidistrict litigation.

On March 28, 2018, this Court granted in part and denied in part the parties' cross-motions for summary judgment, in an order that provided additional background. *In re NCAA Ath. Grant-In-Aid Cap Antitrust Litig., Nos. 14-md-02541-CW, 14-cv-02758-CW, 2018 U.S. Dist. LEXIS 52230, 2018 WL 1524005 (N.D. Cal. Mar. 28, 2018)*. The Court held that Plaintiffs had met their initial burden under a rule of reason analysis to show that Defendants' challenged restraints are agreements that produce significant anticompetitive effects affecting interstate commerce, within the same relevant market defined by this Court **[*25]** in *O'Bannon v. NCAA, 7 F. Supp. 3d 955, 962-63 (N.D. Cal. 2014)*, and affirmed by the Ninth Circuit in *O'Bannon v. NCAA, 802 F.3d 1049, 1079 (9th Cir. 2015)*.

The Court denied the parties' summary judgment motions as to whether Defendants had met their burden to prove that the challenged restraints serve the asserted procompetitive purposes of integrating academics with athletics and preserving the popularity of the NCAA's product by promoting its current understanding of amateurism, as they did in *O'Bannon. 802 F.3d at 1073* (quoting *7 F. Supp. 3d at 1005*). The Court granted Plaintiffs' motion for summary judgment on Defendants' other proffered procompetitive justifications. The Court denied Defendants' motion for summary judgment on whether two proposed less restrictive alternatives advanced by Plaintiffs would achieve any of Defendants' legitimate objectives in a substantially less restrictive manner. The Court scheduled a bench trial on the questions of procompetitive justifications and less restrictive alternatives.

LEGAL STANDARD

Under the Federal Rules of Evidence, "the trial judge must ensure that any and all scientific testimony or evidence admitted is not only relevant, but reliable." *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 589, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*.

Rule 702 permits an expert to offer opinion testimony on a subject if:

> (a) the expert's scientific, technical, or other specialized knowledge will help the trier **[*26]** of fact to understand the evidence or to determine a fact in issue;
> (b) the testimony is based on sufficient facts or data;
> (c) the testimony is the product of reliable principles and methods; and
> (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702.

In evaluating whether an expert's opinion testimony will help the trier of fact to understand the evidence or determine a fact in issue, the Court considers whether the testimony fits the facts of the case and is "relevant to the task at hand." See *Daubert, 509 U.S. at 591, 597*. In assessing the relevance or "fit" of expert testimony, "scientific validity for one purpose is not necessarily scientific validity for other, unrelated purposes." *Id. at 591*.

To evaluate the reliability of expert opinion testimony, a court must consider the factors set out in Daubert, which include "whether the theory or technique in question can be (and has been) tested, whether it has been subjected to peer review and publication, its known or potential error rate and the existence and maintenance of standards controlling its operation, and whether it has attracted widespread acceptance within a relevant scientific community." *509 U.S. at 593-94*. "One very significant fact to be considered **[*27]** is whether the experts are proposing to testify about matters growing naturally and directly out of research they have conducted independent of the litigation, or whether they have developed their opinions expressly for purposes of testifying." *Daubert v. Merrell Dow Pharmaceuticals, 43 F.3d 1311, 1317 (9th Cir. 1995)* (on remand). The "test of reliability is 'flexible,' and Daubert's list of specific factors neither necessarily nor exclusively applies to all experts or in every case." *Kumho Tire Co., Ltd. v. Carmichael, 526 U.S. 137, 141, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. The focus "must be solely on principles and methodology, not on the conclusions that they generate." *Daubert, 509 U.S. at 595*.

DISCUSSION

I. Dr. Elzinga

Plaintiffs move to exclude the opinions of Dr. Elzinga regarding the definition of the relevant antitrust market in this matter and Defendants' power within that market. Following this Court's March 28, 2018 summary judgment ruling, the only remaining questions for trial are: (1) whether Defendants have come forward with evidence supporting the two claimed procompetitive effects of the challenged restraints, and (2) whether Plaintiffs can show that any legitimate objectives could be achieved in a substantially less restrictive manner. Defendants do not contend that Dr. Elzinga's testimony is relevant to the availability of less restrictive alternatives. **[*28]**

Dr. Elzinga was asked by defense counsel "to assess whether the economic evidence is consistent with Plaintiffs' monopsony-cartel hypothesis or whether the economic evidence is consistent with an efficient market explanation."

Mar. 21, 2017 Elzinga Rpt. at 5. He concluded that the "relevant market in this case is a multi-sided market for college education in the United States" in which colleges operate as multi-sided platforms that balance their pricing to different constituents in the same way that a magazine must balance its pricing to subscribers and advertisers. Id. at 26. However, in the summary judgment order, the Court adopted the single-sided market definition from O'Bannon, the market for a college education combined with athletics or alternatively the market for the student-athletes' athletic services. Dr. Elzinga's reports and opinions, therefore, address an issue that is not part of this case. Defendants have conceded that both sides' Daubert motions would be moot to the extent that the Court granted summary judgment on any given issue.

Defendants argue that in addition to opining on the definition of the relevant market, Dr. Elzinga reached a "distinct conclusion that the NCAA's **[*29]** amateurism rules are procompetitive," which "does not turn on the adoption of his multi-sided market." Defs. Opp. at 44 n.25 (citing Mar. 21, 2017 Elzinga Rpt. at 7-8); see also Jan. 16, 2018 Hearing Tr. at 74-77. Plaintiffs respond that any proposed testimony by Dr. Elzinga on the issue of procompetitive justifications is dependent on his foreclosed opinions on market definition. The Court agrees. Any testimony Dr. Elzinga gives regarding procompetitive benefits in his hypothetical multi-sided market is not relevant to procompetitive effects in the relevant market. *Daubert, 509 U.S. at 591*.

Defendants contend that Dr. Elzinga also opines that "the NCAA's financial aid rules provide a mechanism for avoiding an inefficient market failure, born of the incentive to free ride on the benefits of amateurism." Mar. 21, 2017 Elzinga Rpt. at 100. Therefore, he states, "The rules limiting play to schools that only allow eligible players on their teams is [sic] merely implementing the efficient solution, in which case the rules are not anticompetitive, they are procompetitive." Id. Dr. Elzinga assumes that there is a procompetitive benefit to compensation restrictions and opines that the NCAA rules are necessary to prevent **[*30]** some schools from obtaining those purported benefits without themselves implementing the necessary restrictions. This opinion does not provide any support for Defendants' argument that the NCAA's current rules restricting student-athlete compensation preserve the popularity of the NCAA's product by promoting its current understanding of amateurism. Defendants do not contend that it supports their argument regarding the integration of academics and athletics.

Instead, this argument relates to an issue separate from the procompetitive justifications to be tried, namely, that college athletics requires that certain uniform rules be followed if its product is to be available. *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 101, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. This is why a rule of reason analysis is applied rather than a per se rule of illegality. *O'Bannon, 802 F.3d at 1062*. The questions for trial, however, are not addressed by Dr. Elzinga: whether the current, challenged rules have the two procompetitive benefits remaining at issue in this case, and whether less restrictive alternatives to those rules exist.

Dr. Elzinga's opinions are not relevant to any of the issues remaining for trial and will not assist the Court. The Court grants the motion to exclude his proposed testimony.

II. Dr. Heckman **[*31]**

Plaintiffs move to exclude the testimony of Dr. Heckman, who was asked to evaluate human capital and economic outcomes for student-athletes as compared to comparable individuals who did not engage in collegiate athletics. He concluded that there are substantial benefits to athletics participation. Mar. 21, 2017 Heckman Rpt. at 4-7. Defendants seek to offer Dr. Heckman's testimony on the topic of the procompetitive effects of the challenged restraints. Jan. 16, 2018 Hearing Tr. at 76-77.

Plaintiffs move to exclude Dr. Heckman's testimony for three reasons. First, they argue that, like his testimony in O'Bannon, it does not suggest that student-athletes benefit specifically from the challenged restrictions, and therefore it is not relevant to this case. *7 F. Supp. 3d at 980*. Defendants respond that the disputed issue is not whether college has benefits, but whether student-athletes in particular share in those benefits or whether, instead, Defendants subordinate student-athletes' academic well-being to Defendants' financial gain. This issue is relevant, and the weight of Dr. Heckman's testimony on it is a factual question for trial.

Second, Plaintiffs contend that Dr. Heckman's econometric analysis is not **[*32]** reliable because he does not control for scholarship amounts, he is unable to ascertain which members of the data sets are Division I basketball or FBS football players and he uses data sets that are so old that no class member appears in them. Dr. Heckman's data was drawn from surveys conducted by the United States Department of Education in 1988 and 2002. Plaintiffs have not identified any better data sets on which Dr. Heckman could have relied. Their criticisms of Dr. Heckman's data and methodology relate to the weight of the evidence, not its admissibility.

Finally, Plaintiffs move to exclude two categories of opinions in Dr. Heckman's June 21, 2017 reply report that they contend were not adequately disclosed in his opening report and are unreliable speculation.[1] Dr. Heckman's reply report responds to the May 16, 2017 report of Dr. Noll. Dr. Noll's report, in turn, was submitted in rebuttal to the March 21, 2017 reports of Drs. Elzinga and Heckman.

Plaintiffs' first objection is to Dr. Heckman's conclusion that Dr. Noll does not establish a college labor market monopsony or monopsony effects in such a market. Like Dr. Elzinga's proposed testimony, this conclusion is no longer relevant **[*33]** due to this Court's summary adjudication of the issues of market definition and the anticompetitive effects in the relevant market. Accordingly, the Court grants Plaintiffs' motion to exclude Dr. Heckman's testimony on this topic.

Plaintiffs also move to exclude Dr. Heckman's testimony that Dr. Noll ignores the equilibrium effects of Plaintiffs' proposed rule changes, including adverse effects for some or all class members. Dr. Heckman opines that Dr. Noll erroneously assumes that Plaintiffs' proposed rule changes would not result in other, detrimental changes to aspects of the student-athletes' relationship with the college, such as a loss of mentoring and coaching. This testimony remains sufficiently relevant to Defendants' proffered procompetitive justification that the NCAA's current rules promote the integration of academics and athletics to survive the "fit" prong of the Daubert inquiry. Moreover, it is sufficiently responsive to Dr. Noll's opinions. The Court denies the motion to exclude this proposed testimony.

III. Drs. Rascher, Noll and Lazear

Defendants move to exclude the testimony of Plaintiffs' economics experts Drs. Rascher, Noll and Lazear on three grounds. First, Defendants **[*34]** argue that the testimony of all three of these experts does not "fit" the facts of this case because it would, they say, "contradict the Ninth Circuit's clear holding that the NCAA's financial aid rules serve the procompetitive purposes of integrating academics with athletics and promoting amateurism." Mot. at 54. This argument merely duplicates Defendants' summary judgment motion, which was denied in relevant part. The Court therefore denies it for the reasons explained in the March 28, 2018 order.

Second, Defendants argue that neither Dr. Lazear nor Dr. Noll is a qualified expert in college athletics or the laws and NCAA rules that govern them and that their opinions on those topics should be excluded. Defendants' focus here is not on any opinion set forth in the experts' reports, but on two portions of deposition testimony elicited by Defendants. Dr. Lazear testified to his understanding that ***antitrust law*** reflects an unambiguous societal judgment that when prices or quantities are restricted, the social cost outweighs the social benefit. Lazear Depo. at 176:20-178:24. Dr. Noll testified that that student-athletes' cost of attendance is calculated using the federal guidelines, which **[*35]** were not specifically designed as guidelines for athletic scholarships. Noll Depo. at 90:11-22. Plaintiffs respond that they will not offer expert testimony on legal conclusions. They contend, however, that the Court should withhold any ruling until trial, when specific objections can be addressed in context. Especially because this will be a non-jury trial, the Court denies Defendants' motion to exclude this testimony without prejudice to objection at trial, if necessary.

Third, Defendants contend that the opinions of Drs. Rascher and Lazear are unsupported by econometric or other analysis reflecting a generally accepted methodology. This includes their opinions that spending on coaches, administrators and facilities is currently inflated (supra-competitive) and that, absent the challenged rules, such spending would be reduced and redirected to student-athletes as cash compensation. Dr. Rascher compared

---

[1] Dr. Heckman's June 21, 2017 reply report is titled "Rebuttal Report of Professor James J. Heckman." To avoid confusion with the rebuttal reports submitted on May 16, 2017, however, the Court refers to it as a reply report.

colleges' spending on coaching and facilities with that of professional sports teams. He did not compare increases in colleges' spending on athletic facilities with their spending on other facilities. Dr. Lazear admitted that he had not done empirical analysis that there is an overuse **[*36]** of capital or under-utilization of labor in the relevant market, but testified that he had looked at data associated with this market, such as data on the payment of coaches and the building and use of facilities. These objections go to the weight of the evidence at trial, not to its admissibility. The Court denies the motion to exclude the proposed testimony of Plaintiffs' experts.

CONCLUSION

For the reasons set forth above, the Court GRANTS Plaintiffs' motion to exclude the proposed testimony of Dr. Elzinga (Docket No. 807 in Case No. 14-md-02541 and Docket No. 376 in Case No. 14-cv-02758). The Court GRANTS IN PART AND DENIES IN PART Plaintiffs' motion to exclude the proposed testimony of Dr. Heckman (Docket No. 809-52 in Case No. 14-md-02541 and Docket No. 374-52 in Case No. 14-cv-02758). The Court DENIES WITHOUT PREJUDICE Defendants' motion to exclude portions of the proposed testimony of Drs. Rascher, Noll and Lazear (Docket No. 704 in Case No. 14-md-02541 and Docket No. 327 in Case No. 14-cv-02758).

IT IS SO ORDERED.

Opinion

MEMORANDUM OPINION

Gentex Corporation, Gibson & Barnes, and James T. Wegge filed a motion to dismiss the amended complaint filed by Helicopter Helmet, LLC, and Government Surplus Sales, Inc. For the reasons that follow, those motions are granted.

I. BACKGROUND[1]

A. The Parties

Defendant Gentex Corporation, Plaintiff Helicopter Helmet, LLC **[*2]** ("HHC"), and Plaintiff Government Surplus Sales, Inc. ("GSS"), all manufacture helmets for use by helicopter passengers.[2] Defendant Flight Suits d/b/a Gibson & Barnes ("G&B") is the exclusive distributor of Gentex's helicopter helmets.[3] Defendant James Wegge is G&B's director.[4]

B. G&B's 2013 Advertising Campaign and the White Papers

In 2013, G&B ran an advertisement titled "Is Your Helmet a Dangerous Counterfeit?"[5] The ad stated that "[t]housands of helicopter pilots and crews wear dangerous counterfeit helmets," which "look like real [Gentex] helmets . . . [b]ut are assembled from obsolete, defective, and 20-year-old military-surplus parts."[6] Such helmets, the ad stated, "aren't even tested," and contain parts that "can hurt you in a side impact."[7]

Also in 2013, G&B issued a number of publications on "[t]he [u]se of [o]bsolete and [n]onconforming" parts in helicopter helmets.[8] These documents—styled "White Papers"—noted that certain unidentified "[c]ompanies" were developing their own replacement parts for certain types of helicopter helmets; these replacement parts, however, "did not conform to . . . military specifications."[9] As a result, the White Papers charged, helmets containing **[*3]** these parts were dangerously unsafe.[10] The White Paper on "obsolete" or "nonconforming" earcups, for example, contained a graph showing the results of drop tests performed on a "mil-spec" helmet and on an unidentified "[n]onconforming [h]elmet" ("Drop Test Graph").[11] That White Paper also contained an image showing damage to

---

[1] When considering a motion to dismiss for failure to state a claim, a court assumes the truth of all factual allegations made in the complaint. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. The material in this section, then, is taken entirely from Plaintiffs' Amended Complaint, ECF No. 29, and is presumed true for present purposes.

[11] *Id.*

an unidentified helmet with "[n]onconforming" parts after a drop test ("Damaged Helmet Graphic").[12] None of the White Papers mentioned any helicopter helmet manufacturer by name.[13]

C. The Accident Prevention Bulletin and the Aviation Life Support Equipment Handbook

One of these White Papers made its way to the United States Department of the Interior ("DOI").[14] As a result, the DOI's Office of Aviation Services ("OAS"), with the assistance Defendants, issued an Accident Prevention Bulletin ("AP Bulletin").[15] Similar to the White Papers, the AP Bulletin warned of the dangers of helicopter helmets with "outdated components" that fail to meet military specifications, and contained copies of the Drop Test Graph and the Damaged Helmet Graphic.[16] Unlike the White Papers, however, the AP Bulletin mentioned a helicopter helmet manufacturer by name; specifically, **[*4]** it noted that the earcups in some of Gentex's helmets—"original version[s]" of the SPH-4B model—"do not meet current agency standards," and that owners of that helmet should purchase a "conversion kit." The AP Bulletin, though, did not mention any other manufacturer. As a result of the safety issues highlighted in the AP Bulletin, the DOI's Bureau of Land Management ("BLM") awarded G&B a sole source contract for Gentex helmets.[17]

Defendants' relationship with the OAS continued after the issuance of the AP Bulletin. The OAS publishes an Aviation Life Support Equipment Handbook ("2008 ALSE Handbook"), which "regulates all helmets that are purchased for [federal] government agencies."[18] Among other things, the ALSE Handbook notes which helicopter helmets have been approved[19] for use by DOI personnel, specifically identifying several of Gentex's helmets as well as several helmets by other manufacturers.[20] After the publication of the AP Bulletin, Defendants "caused DOI personnel" to draft[21] an updated ALSE Handbook ("2013 ALSE Handbook") that listed only Gentex helmets as "approved," removing all references to non-Gentex helmets.[22]

D. Investigation by the Department of the Interior's Office of [*5] the Inspector General

Although the 2013 ALSE Handbook never made it out of draft form, it was relied upon by the DOI for some helmet contracts.[23] As a result, HHC complained to the DOI's Office of the Inspector General ("OIG").

---

12 *Id.*

13 The White Papers talked about the use of such parts in "SPH" helmets. *Id.* Although not identified in the White Papers, Gentex is the manufacturer of such helmets. ECF No. 29 (Amended Complaint) at 4 n.2.

17 ECF No. 29 (Amended Complaint) ¶ 28; Ex. G to ECF No. 29.

18 ECF No. 29 (Amended Complaint) ¶ 13.

19 To meet DOI approval, helicopter helmets must either (1) conform to a United States Military standard, (2) be otherwise approved for use in United States Military helicopters, or (3) conform to a American National Standard Institute standard. Ex. A to ECF No. 29 ("ALSE Handbook") at 3.

20 *Id.*

21 ECF No. 29 (Amended Complaint) ¶ 29.

22 Ex. H to ECF No. 29 (2013 ALSE Handbook) at 8-9.

23 ECF No. 29 (Amended Complaint) ¶ 30.

The OIG's summary report on this incident noted that it investigated "allegations that a helicopter helmet company misled the [BLM] to believe that only one type of helicopter helmet, available only through a single vendor, was acceptable for DOI use," as well as "alleg[ations] that the company and other vendors colluded with BLM personnel to draft an update of the [2008 ALSE Handbook] to benefit only two companies . . . ."[24] The summary report, however, found only that the DOI "improperly applied helmet standards from the draft [2013 H]andbook, which was pending approval, rather than the standards listed in the currently[-]approved handbook."[25] It did not contain any finding on the alleged collusion.

As a result of the investigation, BLM cancelled the sole-source contract with G&B and the OAS removed the AP Bulletin from its website.[26] In a letter to the OIG, OAS noted that, in the future, it would "ensure that all data solicited from, or provided by, the aviation **[*6]** industry is vetted for accuracy and free of any advertising rhetoric prior to incorporating the language into publications."[27] The letter also indicated OAS's intention to "publish a list of the helmet models that have met the ALSE [H]andbook standards in a manner that affords frequent updates."[28]

E. Procedural History

Plaintiffs initiated this action on May 1, 2017. Their operative complaint narrates the above allegations and argues that Defendants' actions, which were intended to drive Plaintiffs out of business, violated federal antitrust laws, state defamation and civil conspiracy law, the Delaware Consumer Fraud Act, the *Federal Trade Commission* Act, and the Lanham Act, and unjustly enriched Defendants at Plaintiffs' expense.[29] Defendants have moved to dismiss this complaint for lack of personal jurisdiction, improper venue, and failure to state a claim.[30]

II. DISCUSSION

A. Standard of Review

When considering a motion to dismiss for failure to state a claim upon which relief may be granted,[31] a court assumes the truth of all factual allegations in the plaintiff's complaint and draws all inferences in favor of that party;[32] the court does not, however, assume the truth of any of the complaint's **[*7]** legal conclusions.[33] If a

[33] *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. *See also* *Connelly v. Lane Constr. Corp., 809 F.3d 780, 786 (3rd Cir. 2016)*.

complaint's factual allegations, so treated, state a claim that is plausible — *i.e.*, if they allow the court to infer the defendant's liability — the motion is denied; if they fail to do so, the motion is granted.[34]

B. Whether This Court Has Personal Jurisdiction Over G&B and Mr. Wegge

G&B and Mr. Wegge argue that this Court lacks personal jurisdiction over them, and that Plaintiffs' suit should be dismissed on that basis.

Personal jurisdiction takes two forms: general jurisdiction and specific jurisdiction.[35] Plaintiffs do not argue that this Court has general jurisdiction over G&B and Mr. Wegge; consequently, Plaintiffs must show the existence of specific jurisdiction. To do so, Plaintiffs must point to competent evidence in the record.[36]

This Court's exercise of personal jurisdiction is limited only by the *Due Process Clause*.[37] Therefore, Plaintiffs need merely show some "affiliation between [Delaware] and the underlying controversy"—*i.e.*, show that the suit arises out of or relates to G&B and Mr. Wegge's contacts with Delaware.[38]

Plaintiffs have sustained their burden. Their complaint alleges several causes of action based on, *inter alia*, Defendants' alleged creation and dissemination **[*8]** of the White Papers.[39] And they have produced uncontroverted evidence that G&B and Mr. Wegge distributed these White Papers into Delaware.[40] This Court, therefore, has specific personal jurisdiction over G&B and Mr. Wegge.

C. Whether Venue Is Proper in This Court as to Mr. Wegge

Mr. Wegge argues that venue is improper in this Court as to the antitrust claims against him. He observes that the *Clayton Act* allows a plaintiff to sue a defendant "in the district in which the defendant resides or is found,"[41] and notes that he neither resides in, nor can be found in, Delaware.

In federal antitrust cases, however, venue may be established under the Clayton Act *or* under the general venue statute.[42] The general venue statute, in turn, states that an action may be brought in any judicial district "in which a substantial part of the events or omissions giving rise to the claim occurred."[43] And as noted above, Plaintiffs' claim

[41] *15 U.S.C. § 15(a)*.

[42] *Delong Equip. Co. v. Washington Mills Abrasive Co., 840 F.2d 843, 855 (11th Cir. 1988)*

is partly based on Defendants' dissemination of White Papers into Delaware.[44] Therefore, venue is proper in this Court.

D. Whether There Is a Private Right of Action Under the Federal Trade Commission Act

Gentex, G&B, and Mr. Wegge argue that there is no private right of action under the **[*9]** Federal Trade Commission. In response, Plaintiffs abandon that claim.[45]

E. Whether Plaintiffs Have Stated a Claim for Unjust Enrichment

Gentex, G&B, and Mr. Wegge argue that Plaintiffs have not stated a claim for unjust enrichment because they have not alleged a nexus between their loss and Defendants' gain.

Under Delaware law, unjust enrichment is "the unjust retention of a benefit to the loss of another, or the retention of money or property of another against the fundamental principles of justice or equity and good conscience."[46] To plausibly allege their claim for unjust enrichment, then, Plaintiffs must allege some relationship between their impoverishment and Defendants' enrichment.[47]

In their complaint, Plaintiffs allege that unjust enrichment occurred when the BLM awarded a sole-source contract to Defendants, since HHC had previously provided helmets to that agency's Alaska State Office.[48] Plaintiffs do *not* allege, however, that they had any vested right or interest in providing helmets to the BLM—they do not, for example, allege that the BLM breached any contract with them in order to deal with Defendants. This circumstance, therefore, cannot be classified as "the unjust retention of **[*10]** a benefit to the loss of another, or the retention of money or property of another." And Plaintiffs do not identify any other direct "relationship between [Defendants'] enrichment and [Plaintiffs'] impoverishment." Therefore, their unjust enrichment claim will be dismissed.

F. Whether Plaintiffs Have Stated a Claim for Defamation

Gentex, G&B, and Mr. Wegge argue that Plaintiffs have not stated a claim for defamation because none of the allegedly defamatory statements mention any of the Plaintiffs directly.

Under Delaware law, a plaintiff bringing a claim for defamation must allege that the statement at issue "refers to the plaintiff."[49] Here, Plaintiffs point to several of G&B's advertisements that warn of unsafe "counterfeit" helicopter helmets, and to the White Papers which discuss the safety of various "obsolete" and "nonconforming" helicopter helmet parts.[50] None of these publications, however, mention any Plaintiff either directly or obliquely. Plaintiffs

[50] Exs. D and E to ECF No. 29.

argue that, in light of small number of helicopter helmet manufacturers that supply the national market,[51] G&B's statements must be understood as referring to HHC or GSS. Plaintiffs, however, point to no Delaware legal authority supporting **[*11]** such a "group libel" theory, nor can this Court find any.[52] Even if such authority existed, this Court cannot see how the advertisements or the White Papers could plausibly be understood to refer to HHC or GGS. Therefore, Plaintiffs' defamation claims will be dismissed.

G. Whether Plaintiffs Have Stated a Claim Under the Delaware Consumer Fraud Act

Gentex, G&B, and Mr. Wegge argue that Plaintiffs have not stated a claim under the *Delaware Consumer Fraud Act ("DCFA")* because the allegedly actionable statements identified by Plaintiffs are neither false, misleading, confusing or likely to cause any misunderstanding.

The DCFA creates liability for a host of deceptive trade practices.[53] Plaintiffs claim that Defendants' publication of the Damaged Helmet Graphic violated the DCFA's prohibition on "false or misleading statements of fact" that "disparage[] the goods or services, or business of another."[54] Specifically, Plaintiffs aver that this graphic "was intended to unlawfully influence expectations of what would happen if a consumer did not wear a Gentex helmet . . . [and to] damage the reputation of products produced by HHC, GS[S], and other competitors."[55] As an initial matter, this Court **[*12]** notes that Plaintiffs do not claim that the Damaged Helmet Graphic is false—*i.e.*, Plaintiffs do not claim that the pictured helmet was not actually damaged after a drop test. Instead, Plaintiffs claim that the graphic is misleading because the helmet "in fact passed the impact test required by ALSE standards."[56] This Court, however, fails to see how it would be misleading for an advertiser to fail to point out the positive aspects of its competitors' products. Further, I fail to see how the graphic disparages Plaintiffs' goods, since it does not identify either HHC or GSS as the manufacturer of the helmet. In fact, Plaintiffs' *complaint* doesn't even identify the manufacturer of the pictured helmet, other than to say that it was "non-Gentex."[57] In sum, the Damaged Helmet Graphic does not violate the DCFA.

Plaintiffs also claim that Defendants' reference to the SPH-5 helmet as "Mil-Spec" in the White Papers violated the DCFA's prohibition on trade practices that create a "likelihood of confusion or of misunderstanding as to affiliation, connection, or association with, or certification by, another."[58] Specifically, Plaintiffs aver that this reference causes consumers to believe that **[*13]** the SPH-5 helmet has been somehow approved by the United States Military.[59]

[55] ECF No. 29 (Amended Complaint) ¶ 101.

[56] *Id.* ¶ 27.

[57] *Id.*

[58] *6 Del. C. §2532(a)(3)*

[59] ECF No. 29 (Amended Complaint) ¶ 102.

The White Papers themselves, however, make it obvious that "Mil-Spec" simply means "conform[ing] to the current military specifications."[60]

Plaintiffs' DCFA claims, therefore, will be dismissed.[61]

H. Whether Plaintiffs Have Stated a Claim Under the Lanham Act

Defendants argue that Plaintiffs have not stated a claim under the *Lanham Act* because Plaintiffs have not alleged any false or misleading statements made by Defendants about either Plaintiffs' or Defendants' products.

In order to state a claim for false advertising under the Lanham Act, a plaintiff must, *inter alia*, allege that defendant "made false or misleading statements as to his own product or another's."[62] But as discussed *supra*, none of the statements identified by Plaintiff meet that threshold. Defendants' reference to non-Gentex helmets as "counterfeit," "obsolete," and "nonconforming" cannot be understood as referring to Plaintiffs' products. Defendants' claim that the SPH-5 helmet is "Mil-Spec," for example, means simply that it meets "current military specifications." And the Damaged Helmet Graphic is neither false nor misleading. Plaintiffs' Lanham Act **[*14]** claim, therefore, will be dismissed.

I. Whether Plaintiffs Have Stated an Antitrust Claim

Defendants argue that Plaintiffs have not stated an antitrust claim because Plaintiffs have not alleged an antitrust injury and because Defendants' conduct was immunized by the *Noerr-Pennington* doctrine.

As the United States Court of Appeals for the Third Circuit has noted, "antitrust liability cannot be predicated solely on petitioning to secure government action."[63] Therefore, to the extent that Plaintiffs' antitrust claims are based upon Defendants' alleged attempt to influence action[64] by the OAG and other DOI agencies, Defendants' actions[65] were immunized under the *Noerr-Pennington* doctrine.

---

[60] ECF No. 29-1, Ex. E ("The Use of Obsolete and Nonconforming Earcups In Commercial SPH Helicopter Helmets") at 11; ("The Use of Obsolete and Nonconforming Retentions In Commercial SPH Helicopter Helmets") at 11; ("The Use of Obsolete and Nonconforming Shells In Commercial SPH Helicopter Helmets") at 7.

[61] Gentex argues that the heightened pleading standard of *Federal Rule of Civil Procedure 9(b)* applies to claims under the DCFA. Because Plaintiffs have failed to state a claim under the customary, lower pleading standard, it need not—and does not—decide whether *Rule 9(b)* is applicable.

[62] *Pernod Ricard USA, LLC v. Bacardi U.S.A., Inc., 653 F.3d 241, 248 (3d Cir. 2011)*.

[63] *Armstrong Surgical Center, Inc. v. Armstrong County Memorial Hosp., 185 F.3d 154, 158 (3d Cir. 1999)*.

[64] This is true even if the governmental action in question was the purchase of helicopter helmets, because the "Third Circuit does not recognize a commercial exception to the *Noerr-Pennington* [d]octrine." *Asphalt Paving Systems, Inc. v. Asphalt Maintenance Solutions, LLC, 2013 U.S. Dist. LEXIS 46017, 2013 WL 1292200 * 5 (E.D. Pa. March 28, 2013)*.

[65] Plaintiffs argue that Defendants' actions vis-à-vis the OAG and DOI were "a mere sham to cover what [was] actually nothing more than attempt to interfere directly with [Plaintiffs'] business relationships." *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 380, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*. The "sham exception" to the *Noerr-Pennington* doctrine only applies, however, when a defendant's "activities are not genuinely aimed at procuring favorable government action at all." *Id.* Because this theory of Plaintiffs' claims rests on Defendants' alleged ability to obtain government action (*e.g.*, the publishing of the AP Bulletin and the 2013 ALSE Handbook, and the government's purchase of helicopter helmets), the sham exception does not apply. *See* Daniel A. Crane, Antitrust 181(2014) ("An anticompetitive scheme that could work only if the defendant is successful in persuading the government to take action favorable to it is, by definition, not a sham.")

To the extent that Plaintiffs' antitrust claims do not rest on that basis—and instead rest solely on Defendants' advertising campaign, including publication of the White Papers—Plaintiffs have failed to allege a sufficient injury. To bring a federal antitrust claim,[66] a plaintiff must allege "the existence of *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flow[] from that which makes defendants' acts unlawful."[67] Federal **[*15]** ***antitrust law***, however, "does not compel your competitor to praise your product or sponsor your work."[68] To the extent that Plaintiffs were harmed by Defendants' apparently successful publicity campaign, the proper response is to create better publicity themselves. ***Antitrust law***, after all, "protect[s] competition, not competitors."[69]

Plaintiffs' antitrust claims, therefore, will be dismissed.[70]

III. CONCLUSION

For the reasons discussed above, all claims in Plaintiffs' Amended Complaint will be dismissed. Because this Court finds that amendment will be futile, the dismissal will be with prejudice. An appropriate Order follows.

BY THE COURT:

/s/ Matthew W. Brann

Matthew W. Brann

United States District Judge

ORDER

AND NOW, this 1st day of May 2018, in accordance with the accompanying Memorandum Opinion, **IT IS HEREBY ORDERED** that:

1. The Motion to Dismiss filed by Defendant Gentex Corporation, ECF No. 37, is **GRANTED WITH PREJUDICE**.

2. The Motion to Dismiss filed by Defendants Flight Suits d/b/a Gibson & Barnes and James T. Wegge, ECF No. 39, is **GRANTED WITH PREJUDICE**.
3. The Clerk of Court is directed to close this case.

BY THE COURT:

---

[66] *15 U.S.C. § 15* creates a private right of action for "any person who shall be injured in his business or property by reason of anything forbidden by the antitrust laws"—*i.e.*, for violations of the *Sherman Act*.

[67] *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*; *see also id.* ("[I]njury, although causally related to an antitrust violation, nevertheless will not qualify as 'antitrust injury' unless it is attributable to an anti-competitive aspect of the practice under scrutiny, since it is inimical to the antitrust laws to award damages for losses stemming from continued competition.")

[68] *Santana Products, Inc. v. Bobrick Washroom Equipment, Inc., 401 F.3d 123, 132 (3d Cir. 2005)* (quoting *Schachar v. American Academy of Ophthalmology, Inc., 870 F.2d 397, 399 (7th Cir. 1989))*.

[69] *Mathews v. Lancaster General Hosp., 87 F.3d 624, 641 (3d Cir. 1996)*.

[70] Because Plaintiffs' civil conspiracy claim is derivative of Plaintiffs' other claims, and because all other claims have been dismissed, Plaintiffs' civil conspiracy claim will also be dismissed.

/s/ Matthew W. Brann

Opinion

MEMORANDUM OF DECISION RE #178.00

Procurement, LLC ("Procurement") and Ahuja Holdings, LLC ("Holdings") are competing real estate developers. Procurement alleges in this lawsuit that Holdings and an individual named Gurpreet Ahuja ("Ahuja") engaged in a protracted course of groundless legal proceedings and related wrongful acts intended to cripple plaintiff's ability to proceed with a development project involving the construction of a large child-care center and approximately twenty residential units on High Ridge Road in Stamford, Connecticut ("the Project"). Efforts by Procurement to obtain the necessary zoning approvals from the relevant municipal zoning authorities began almost a decade ago. According to Procurement, those efforts were opposed every step of the way by Ahuja, now deceased,[1] who owned neighboring property. Procurement claims that Ahuja was in fact a "straw" objector acting at the behest of Holdings, an entity controlled by Ahuja's son, Nicholas Ahuja, and her former husband, Ajay Ahuja. This lawsuit alleges that Ahuja's groundless legal obstructionism was motivated by her desire to further her family's business interests rather **[*2]** than any legitimate concerns about zoning or land use.

---

[1] Ahuja passed away on December 28, 2016. Her estate has been substituted as a defendant.

Presently before the court is defendants' motion for summary judgment based on the *Noerr-Pennington* doctrine. For the reasons set forth in this memorandum, the motion is granted in defendants' favor on the First through Sixth Counts of the operative complaint. The *Noerr-Pennington* doctrine immunizes defendants from liability for acts undertaken by them in connection with the underlying administrative and judicial zoning-related proceedings, which are the subject of the first six counts. Summary judgment is denied on the Seventh Count of the complaint, however, because that claim relates to defendants' non-petitioning activity directed at Procurement's lenders and tenants, conduct that is not protected under *Noerr-Pennington*.

Background Facts and Proceedings

The current litigation arises out of a series of interrelated administrative and judicial proceedings over the past seven-plus years involving Procurement's High Ridge Road Project. For ease of reference, the court will describe the allegedly wrongful activity at issue using two basic categories. The first includes three distinct, though related, administrative and judicial proceedings, **[*3]** each involving defendants' opposition to a particular zoning application made by plaintiff in connection with its High Ridge Road Project. The second category of alleged wrongdoing involves what Procurement calls defendants' "non-petitioning activity," which relates to defendants' interactions with non-governmental participants in the Project—neighbors, lenders, and actual or prospective tenants. Each of these activities is summarized below.

The "First Application"

The initial round of administrative and judicial proceedings arose out of a set of applications submitted by Procurement to the Stamford Zoning Board (Board) in April 2010. These included an application for special exception approval, and an application for approval of site and architectural plans, each of which related to Procurement's intention to develop a two-story building consisting of a day-care center and nine residential units on the subject property ("First Application"). The Board held hearings on the First Application in December 2010, and voted on January 10, 2011 to deny the application for a special exception. Procurement timely appealed the denial to the superior court.

Ahuja's formal involvement in the First **[*4]** Application did not come until over a year later, on February 22, 2012, when she filed a motion to intervene in the appeal pending in the superior court. The motion described her status as a statutorily aggrieved landowner pursuant to *General Statutes §8-8*, based on the fact that she owned property within 100 feet of the subject property. Ahuja alleged that her participation as an intervenor had become necessary because there was no longer true adversity between plaintiff (Procurement) and defendant (the Board) due to the Board's recent action on a second, modified zoning application made by Procurement, which the Board had approved while the appeal of the decision in the First Application was pending. (The "Second Application" is described in greater detail below.)[2] Ahuja argued that Procurement and the Board were now essentially on the same side, and would settle the appeal unless the court permitted her to intervene in support of the Board's denial of the special exception sought in the First Application.

Ahuja's motion to intervene was denied by the court (Adams, J.), on May 30, 2012. See *Procurement, LLC v. City of Stamford Zoning Board*, No. FST-CV-11-6008292, "Memorandum of Decision Re: Motion to Intervene" (Entry #122.00, "Intervention MOD") [*54 Conn. L. Rptr. 109, 2012 Conn. Super. LEXIS 1380]* **[*5]** . The Intervention MOD weighed the various factors relevant to permissive intervention and determined that a majority of those considerations counseled denial of Ahuja's motion to intervene. The existence of Ahuja's then-pending appeal from the Board's approval of the Second Application (see below at pp. 5-6) gave Judge Adams pause, because it was possible that intervention might not lead to more efficient proceedings in light of that appeal, see Intervention MOD, *2012 Conn. Super. LEXIS 1380 at *4*, but Judge Adams ultimately chose to exercise his discretion to deny intervention. To ensure that Ahuja's interests would be protected, Judge Adams ordered the parties to provide three

[2] The parties have not explained precisely why the Board's approval of the Second Application, which occurred on December 12, 2011, did not render moot the ongoing judicial proceedings relating to the First Application. Whatever the reason, it is clear from the record that a live dispute remained with respect to certain aspects of the First Application even after approval of the Second Application.

weeks' notice to Ahuja in the event of a settlement, which would allow her to participate in any hearing for judicial approval of the settlement under *General Statutes §8-8(n)*. There is no suggestion anywhere in the Intervention MOD, express or implied, that Ahuja's motion to intervene was frivolous, vexatious or otherwise objectively unreasonable.

Ahuja sought appellate review of Judge Adams' intervention order by filing a timely petition for certification pursuant to *General Statutes §8-8(o)* and *Practice Book §81-1*. Certification was *granted* by the Appellate Court on October 24, 2012. **[*6]** A game of litigation chess followed. Procurement (which had opposed Ahuja's motion to intervene) filed a motion in the superior court case to implead Ahuja as a party defendant on May 25, 2013. Ahuja (who had sought to intervene) initially objected to Procurement's motion to implead The Board also objected. Judge Berger granted the motion to implead on August 23, 2013. Ahuja withdrew its appeal in the Appellate Court on October 4, 2013, and the superior court case proceeded on the merits. Ahuja's trial brief, filed on October 15, 2013, adopted the Board's trial brief in its entirety and added less than two pages of additional argument. Judge Berger held a merits hearing on December 6, 2013, and issued a decision on February 14, 2014. See *Procurement, LLC v. City of Stamford Zoning Board*, No. LND-HHD-CV-116035946, Memorandum of Decision 2/14/14 ("Berger MOD 2/14/14") [*55 Conn. L. Rptr. 397, 2014 Conn. Super. LEXIS 353]*. Judge Berger found that the Board's decision denying a special exception was not supported by substantial evidence, and therefore sustained Procurement's appeal in connection with the First Application.

The Second Application

In late July 2011, after the Board's denial of the First Application and while the appeal of that **[*7]** denial was pending in the superior court, Procurement filed a second application for a special permit with the Board. The Second Application sought to develop a day-care center and twenty-two residential units at the subject property, an increase from the nine units proposed in the First Application. A series of five public hearings on the Second Application were held by the Board in the latter part of 2011 (September 26, 2011; October 6, 2011; October 11, 2011; October 26, 2011; and November 10, 2011). The Board voted to approve the Second Application on December 12, 2011.

Ahuja appealed the Board's decision. See *Gurpreet Ahuja v. Zoning Board of the City of Stamford and Procurement, LLC,.*[3] The matter was fully briefed and argued in the superior court. On January 4, 2013, Judge Berger issued a memorandum of decision denying the appeal ("Berger MOD 1/4/13"). Ahuja filed a petition for certification from that decision, which was denied by the Appellate Court on July 24, 2013.

The Third Application

On September 17, 2014, Procurement filed another zoning application, which requested modification of certain conditions imposed by the Board in its approval of the Second Application. More particularly, **[*8]** Procurement sought to increase the number of residential units from seventeen to nineteen units; increase the amount of available parking by three additional spaces; open an entrance exit on Bradley Place without the obligation to install a traffic signal; and change the form of residential ownership from condominiums to apartments. After public hearings, the Board approved the Third Application on November 17, 2014. Ahuja appealed the Board's decision to the superior court on or about December 2, 2014. Procurement moved to dismiss the appeal on the ground that it was not returned to court within the time required by *General Statutes §52-46a*. The motion to dismiss was granted on July 6, 2015. No appeal was taken.

The "Non-Petitioning" Activity

---

[3] The appeal was filed in the Judicial District of Stamford, where it was assigned docket number FST-CV12-6012665. It was later transferred to the Land Use Docket, where it was assigned Docket No. LND-HHD-CV12-6035945, *2013 Conn. Super. LEXIS 49*. The appeal in the First Application, discussed above, also had been transferred to the Land Use Docket. Judge Marshall K. Berger, Jr. presided over both appeals, and coordinated their management. By agreement of the parties, the appeal in connection with the Second Application was heard before the appeal of the administrative decision in the First Application. See Berger MOD 2/14/14, *2014 Conn. Super. LEXIS 353 at *4* (describing procedure).

Procurement also alleges that defendants engaged in wrongful conduct outside of the immediate context of the legal proceedings described above. These allegations relate to false or otherwise tortious communications that Procurement claims were made by defendants to various non-governmental individuals or entities with some role in the overall fate of the Project. See Pl. Br. at 13-15. According to Procurement, defendants (1) spread false information about the development **[*9]** plans to neighbors, in an effort to mobilize opposition to the Project, Pl. Br. at 17; (2) contact Procurement's "lending institutions with the goal of controlling the debt that secured Procurement's property," *id.* at 14; and (3) contact or interfere with Procurement's current or prospective tenant relationships, *id.* See Affidavit of Nagi Osta dated January 13, 2017, at ¶¶7-9, 19.

The Pending Lawsuit

This lawsuit was commenced by Procurement in 2016. The operative complaint contains seven counts, all of which relate in some way to defendants' alleged campaign to impede Procurement's Project by wrongful means. See Substituted First Amended Complaint dated February 8, 2017 ("complaint"). Four counts of the complaint are brought solely against Ahuja personally—the First Count, for common-law vexatious litigation; the Second Count, for vexatious litigation under *General Statutes §52-568*, the Third Count, for abuse of process, and the Fourth Count, which alleges that the conduct underlying the first three counts violates the Connecticut Unfair Trade Practices Act, *C.G.S. §42-110g* (CUTPA). Two other counts are directed solely at defendant Holdings (the Fifth Count, for aiding and abetting Ahuja's wrongful conduct as alleged in the first **[*10]** four counts; and the Sixth Count, for a violation of CUTPA). The Seventh Count alleges tortious interference with contractual and business relations against both defendants.

Defendants have moved for summary judgment on all counts. The sole basis for their motion is the *Noerr-Pennington* doctrine, which, as explained below, confers immunity from civil liability for "petitioning activity" protected by the *first amendment*. Broadly speaking, *Noerr-Pennington* immunizes activity undertaken by persons who use the official channels of governmental agencies and courts to advocate their cause, even if that cause consists of nothing more than seeking an outcome adverse to a business competitor and/or favorable to the petitioner's own economic interests. Plaintiff has filed an objection to the motion for summary judgment, and each party has submitted extensive written memoranda and supporting materials. Oral argument was heard on November 27, 2017. In mid-March 2018, at plaintiff's initiative and over defendants' objection, the court allowed the parties to submit supplemental briefs. Argument on the supplemental submissions was heard on March 29, 2018.

Discussion

A. The *Noerr-Pennington* Doctrine and the Sham Exception **[*11]**

The *Noerr-Pennington* doctrine originally developed as a judge-made limitation on the reach of federal statutory antitrust liability. Its origins are described in *Zeller v. Consolini, 59 Conn.App. 545, 758 A.2d 376 (2000)*, the first appellate court decision in Connecticut to apply the doctrine:

> [The doctrine traces its origins] to a trio of federal antitrust cases, *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S.Ct. 609, 30 L.Ed.2d 642 (1972)*; *United Mine Workers v. Pennington, 381 U.S. 657, 85 S.Ct. 1585, 14 L.Ed.2d 626 (1965)*; *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S.Ct. 523, 5 L.Ed.2d 464 (1961)*; and their progeny, collectively referred to as the *Noerr-Pennington* doctrine. In short, the *Noerr-Pennington* doctrine "shields from the Sherman Act [*15 U.S.C. §1 et seq.*] a concerted effort to influence public officials regardless of intent or purpose." *United Mine Workers v. Pennington, supra, at 670, 85 S.Ct. 1585*. The United States Supreme Court has reasoned that "it would be destructive of rights of association and of petition to hold that groups with common interests may not, without violating the antitrust laws, use the channels and procedures of state and federal agencies and courts to advocate their causes and points of view respecting resolution of their business and economic interests vis-a-vis their competitors." *California Motor Transport Co. v. Trucking Unlimited, supra, at 510-11, 92 S.Ct. 609*.

59 Conn.App. at 550.

Zeller observed that not all anti-competitive conduct automatically qualifies for protection under *Noerr-Pennington*. The principal exception to *Noerr-Pennington* immunity has been carved out for so-called "sham" petitioning activity:

> Although **[*12]** the *Noerr-Pennington* doctrine provides broad coverage to petitioning individuals or groups, its protection is not limitless. In *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., supra, 365 U.S. at 144, 81 S.Ct. 523*, the United States Supreme Court, albeit in dictum, established a "sham exception" to the general rule, stating: "There may be situations in which a publicity campaign, ostensibly directed toward influencing governmental action, is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor and the application of the Sherman Act would be justified." *Id.* In short, petitioning activity is not protected if such activity is a mere sham or pretense to interfere with no reasonable expectation of obtaining a favorable ruling.

Zeller, supra, 59 Conn.App. at 550-52.

Zeller itself was a suit for tortious interference with a business relationship and vexatious litigation, not for antitrust violations, and it illustrates that the *Noerr-Pennington* doctrine (including the "sham" exception) long ago outgrew the confines of its original domain in federal ***antitrust law***. Over the past fifty years, the doctrine has gained widespread acceptance in a broad range of contexts involving "petitioning activity" (both legislative and adjudicative) **[*13]** far outside of the domain of antitrust. See, e.g., *New W., L.P. v. City of Joliet, 491 F.3d 717, 722 (7th Cir. 2007)* ("*Noerr-Pennington* has been extended beyond the antitrust laws, where it originated, and is today understood as an application of the *first amendment's* speech and petitioning clauses"); *Suburban Restoration Co. v. ACMAT Corp., 700 F.2d 98, 101-02 (2d Cir. 1983)* (observing that *Noerr-Pennington* doctrine safeguards *first amendment* rights, and predicting that Connecticut courts would apply the doctrine to CUTPA and common-law causes of action); Steven Bieszczat, *First Amendment Protection for Unfair Labor Practices*?: *Reexamining the Noerr-Pennington Doctrine*, 2017 U.Ill.L.Rev. 1579, 1595-96 (2017) ("[N]umerous state and federal courts have extended *Noerr-Pennington* immunity to protect petitioning activity from liability under a variety of statutes and common-law claims . . . including suits for defamation, tortious interference with contract and business relations, civil rights violations, and intentional infliction of emotional distress, among others") (footnotes omitted); Aaron R. Gary, *First Amendment Petition Clause Immunity from Tort Suits: In Search of A Consistent Doctrinal Framework*, *33 Idaho L. Rev. 67, 95-97 (1996)* ("Innumerable federal and state courts have concluded that the *Noerr-Pennington* doctrine is rooted in the *First Amendment* right to petition and therefore must be applied to all claims implicating that right, not just **[*14]** to antitrust claims. Accordingly, the doctrine has been applied to claims for tortious interference with contract and with business relations/economic advantage, defamation, violation of civil rights, abuse of process, and intentional infliction of emotional distress") (footnotes omitted).

The *Zeller* case, quoted above, reflects Connecticut's participation in this doctrinal expansion. See *Zeller, supra, 59 Conn.App. at 554* ("The *Noerr-Pennington* doctrine is a well-established body of law applicable to a wide variety of situations involving petitioning activity, including local zoning and other municipality matters. Seventeen years [after the *Suburban Restoration Co. v. ACMAT Corp.* decision, *supra*] we fulfill the Second Circuit's prophecy and adopt the *Noerr-Pennington* doctrine and its accompanying sham exception as the applicable analysis for cases such as this one") (footnote omitted). Although the Connecticut Supreme Court still has not yet had occasion to embrace the doctrine officially,[4] the Appellate Court recently confirmed its commitment to *Noerr-Pennington* in another case involving state tort claims, *Diamond 67, LLC v. Oatis, 167 Conn.App. 659, 686-88, 144 A.3d 1055 (2016)* (applying *Noerr-Pennington* to various tort claims arising out of zoning litigation). In addition, numerous Connecticut **[*15]** trial court decisions (before and after *Zeller*) have applied *Noerr-Pennington* in a wide array of cases arising under Connecticut statutory and common law. See, e.g., *Diamond 67, LLC v. Oatis, No. X03HHDCV126030610S, 2017 Conn. Super. LEXIS 4487, 2017 WL 5056255, at *19-*22 (Conn.Super.Ct., Sept. 18, 2017)* (finding that *Noerr-Pennington* defense shielded defendants from liability for statutory vexatious litigation in connection with underlying zoning litigation); *3Ventres v. Goodspeed Airport, LLC, No. X07CV01402085S, 2008 Conn. Super. LEXIS 1363,*

[4] The Connecticut Supreme Court discussed *Noerr-Pennington* as an accepted antitrust doctrine in *Bridgeport Harbour Place I, LLC v. Ganim, 303 Conn. 205, 219-23, 32 A.3d 296 (2011)*. The discussion was probably *dicta*, but it is reliable *dicta*.

2008 WL 2426790, at *19 (Conn.Super.Ct., May 27, 2008) (granting summary judgment in defendant's favor, on *Noerr-Pennington* grounds, in connection with claims of malicious prosecution and abuse of process), aff'd, 301 Conn. 194, 21 A.3d 709 (2011); Roncari Dev. Co. v. GMG Enterprises, Inc., 45 Conn.Sup. 408, 414, 718 A.2d 1025 (Super.Ct., 1997) [19 Conn. L. Rptr. 237].

B. The Parties' Disagreement Regarding the Sham Exception

The issue in the present case is not whether the *Noerr-Pennington* doctrine applies at all to defendants' activity—both sides agree, at least with respect to defendants' core litigation-related activities in the underlying administrative and judicial proceedings, that defendants were engaged in "petitioning activity" subject to *Noerr-Pennington* analysis.[5] The principal dispute on summary judgment is over the proper application of the sham exception under the circumstances of this case. Defendants contend that the sham exception **[*16]** does not apply, as a matter of law, because their litigation activity was objectively reasonable in each of the three proceedings described earlier in this memorandum. Their position is that because all three legal proceedings were objectively reasonable, the analysis stops there, and they must prevail as a matter of law under *Professional Real Estate Investors, Inc. v. Columbia Pictures Industries, Inc., 508 U.S. 49, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*, the leading United States Supreme Court case on the sham exception.

Procurement disagrees, and contends that defendants' motivations and intentions must be considered as part of any *Noerr-Pennington* analysis. Its argument is based largely on a line of cases interpreting United States Supreme Court precedent to limit the scope of *Professional Real Estate Investors* to circumstances not present here. Procurement relies on the Supreme Court decision in *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*, a case decided more than twenty years before *Professional Real Estate Investors*, but understood by some federal courts to provide an alternative "sham" analysis in cases involving "multiple" acts of petitioning activity—which includes the present case, according to Procurement. Procurement insists that because the sham exception described in *California Motor Transport* requires inquiry into defendants' **[*17]** subjective motivations and intentions, this case cannot be resolved by summary judgment.

One would think that the proper analysis under the sham exception to *Noerr-Pennington* would be firmly established and crystal clear by now, after five decades of active adjudication in the federal courts. That does not seem to be the situation. This state of affairs is particularly ironic because the United States Supreme Court unquestionably believed that it *was* settling the issue thirty years ago, once and for all, in *Professional Real Estate Investors, supra.* The *Professional Real Estate Investors* decision began its discussion of the sham exception by noting the then-existing confusion wrought by "inconsistent and contradictory" definitions of the sham exception by various federal appeals courts around the country. *508 U.S. at 55*. *Professional Real Estate Investors* expressly set out to eliminate that confusion by establishing a simple two-part test for determining whether the sham exception applies in any particular case:

> First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a **[*18]** favorable outcome, the suit is immunized under *Noerr*, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals "an attempt to interfere *directly* with the business relationships of a competitor," *Noerr, supra, 365 U.S., at 144, 81 S.Ct., at 533* (emphasis added), through the "use [of] the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon," *Omni, 499 U.S., at 380, 111 S.Ct., at 1354* (emphasis in original).

Id. at 60-61.

---

[5] As noted, plaintiff argues that a portion of defendants' allegedly wrongful conduct involved non-petitioning activity, which is not protected by *Noerr-Pennington*. This argument is addressed separately at pp. 53-57 below.

The two-part test set forth in *Professional Real Estate Investors* exhibits all of the signs of a definitive, fully articulated statement of the sham exception to the *Noerr-Pennington* doctrine, for all occasions. The Court even sought to provide the doctrine with a stable historical pedigree firmly rooted in the common law of torts, which imposed liability for the initiation of wrongful civil proceedings under comparable circumstances:

> The existence of probable cause to institute legal proceedings precludes a finding that an antitrust defendant has engaged in sham litigation. The notion of probable cause, **[*19]** as understood and applied in the common-law tort of wrongful civil proceedings, requires the plaintiff to prove that the defendant lacked probable cause to institute an unsuccessful civil lawsuit and that the defendant pressed the action for an improper, malicious purpose. [Footnote and citations omitted.] Probable cause to institute civil proceedings requires no more than a "reasonabl[e] belie[f] that there is a chance that [a] claim may be held valid upon adjudication" (internal quotation marks omitted). *Hubbard v. Beatty & Hyde, Inc., 343 Mass. 258, 262, 178 N.E.2d 485, 488 (1961)*; *Restatement (Second) of Torts §675, Comment e*, pp. 454-55 (1977). Because the absence of probable cause is an essential element of the tort, the existence of probable cause is an absolute defense . . . Just as evidence of anticompetitive intent cannot affect the objective prong of *Noerr*'s sham exception, a showing of malice alone will neither entitle the wrongful civil proceedings plaintiff to prevail nor permit the factfinder to infer the absence of probable cause. *Stewart, supra*, 98 U.S., at 194; *Wheeler, supra, 65 U.S. at 551*; 2 C. Addison, Law of Torts §1, ¶853, pp. 67-68 (1876); T. Cooley, *supra*, at *184. When a court has found that an antitrust defendant claiming *Noerr* immunity had probable cause to sue, that finding compels the conclusion that a reasonable litigant in the defendant's position could realistically **[*20]** expect success on the merits of the challenged lawsuit. Under our decision today, therefore, a proper probable cause determination irrefutably demonstrates that an antitrust plaintiff has not proved the objective prong of the sham exception and that the defendant is accordingly entitled to *Noerr* immunity.

Id. at 62-63.[6]

Professional Real Estate Investors appears to settle any doubt about the correct analysis used to determine whether the *Noerr-Pennington* "sham" exception applies in any given case. More particularly, the case clearly establishes the proper relationship between the objective and subjective prongs of the two-part analysis, by holding in unequivocal terms that a defendant's wrongful, anti-competitive motivations are *irrelevant* to the first stage of the test, which asks only "[i]f an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome . . ." *Id. at 60*. Under *Professional Real Estate Investors*, if probable cause existed, then "the [conduct] is immunized under *Noerr* . . ." *Id.* This basic point reflects defendants' position here: a finding of probable cause based on the first ("objective") step of the analysis means that the *NoemPennington* "sham" **[*21]** analysis is over, and a defendant must prevail, regardless of subjective intent.

Plaintiff disagrees, and contends that *Professional Real Estate Investors* is not the last word on the subject. It points to a line of federal circuit court cases, decided after *Professional Real Estate Investors*, which have limited the applicability of its two-part "sham" exception analysis. See Pl. Br. at 15-16, citing *Hanover 3201 Realty, LLC v. Village Supermarkets, Inc., 806 F.3d 162, (3d Cir. 2015)*; *Waugh Chapel S., LLC v. United Food & Commercial Workers Union Local 27, 728 F.3d 354, 363-64 (4th Cir. 2013)*; *Primetime 24 Joint Venture v. Nat'l Broad. Co., 219 F.3d 92, 101 (2d Cir. 2000)*; and *USS-POSCO Indus. v. Contra Costa Cnty. Bldg. & Constr. Trades Council, AFL-*

---

[6] This common-law framework is immediately recognizable to anyone in Connecticut familiar with the law of vexatious litigation. "For purposes of a vexatious suit action, [t]he legal idea of probable cause is a bona fide belief in the existence of the facts essential under the law for the action and such as would warrant a man of ordinary caution, prudence and judgment, under the circumstances, in entertaining it . . . Probable cause is the knowledge of facts, actual or apparent, strong enough to justify a reasonable man in the belief that he has lawful grounds for prosecuting the defendant in the manner complained of . . . Thus, in the context of a vexatious suit action, the defendant lacks probable cause if he lacks a reasonable, good faith belief in the facts alleged and the validity of the claim asserted." *Falls Church Group, Ltd. v. Tyler, Cooper & Alcorn, LLP, 281 Conn. 84, 94-95, 912 A.2d 1019 (2007)* (citations omitted); see *DeLaurentis v. New Haven, 220 Conn. 225, 256, 597 A.2d 807 (1991)*; *Vandersluis v. Weil, 176 Conn. 353, 356, 407 A.2d 982 (1978)*; *Ives v. Bartholomew, 9 Conn. 309, 312 (1832)*; *Sterling v. Adams, 3 Day 411 (1809)* (discussing statutory claim for vexatious suit under precursor to *General Statutes §52-568*).

CIO, 31 F.3d 800, 810-11 (9th Cir. 1994). Plaintiff argues that these cases hold that the *Professional Real Estate Investors* two-part test applies only in cases where the underlying petitioning activity involved a *single* proceeding; where the defendant's petitioning activity involves "a whole series of legal proceedings" or a "pattern of baseless, repetitive claims," then, plaintiff argues, a different "sham" test applies. The "sham" analysis used for petitioning activity involving multiple underlying proceedings, according to plaintiff, is derived from California Motor Transport Co. v. Trucking Unlimited, supra.

The *California Motor Transport* analysis advanced by plaintiff applies a more "holistic" inquiry than the two-part test applicable under *Professional Real Estate Investors* to petitioning activity involving single underlying proceedings. In plaintiff's words:

> The *California* ***[*22]*** *Motor* [*Transport*] pattern test requires the Court to look at whether "the legal filings were made, not out of a genuine interest in redressing grievances, but as part of a pattern or practice of successive filings undertaken essentially for the purposes of harassment." Primetime 24 Joint Venture v. National Broadcasting Co., supra, 219 F.3d at 101. Further, the focus is not whether some of the claims have merit, but whether the legal challenges "are brought pursuant to a policy of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival." *Id.* "A court should perform a holistic review that may include looking at the defendant's filing success—i.e., win-loss percentage—as circumstantial evidence of the defendant's subjective motivations." *Hanover* 3201 Realty, LLC v. Village Supermarkets, Inc., supra, 806 F.3d at 180. "Courts should also consider other evidence of bad faith as well as the magnitude and nature of the collateral harm imposed by plaintiffs by defendants' petitioning activity (e.g., abuses of the discovery process and interference with access to governmental agencies)." Id. at 181.

Pl. Br. at 15-16.

The court has considered these competing arguments carefully, and rejects plaintiff's position. The court will apply the two-part analysis articulated in *Professional Real Estate* ***[*23]*** *Investors* to determine whether defendants are entitled to summary judgment under *Noerr-Pennington*. Two basic reasons underlie this legal conclusion.

First, assuming that there are in fact two different "sham" exception tests under federal law, plaintiff misapprehends the circumstances that will trigger application of the "holistic" analysis under *California Motor Transport* rather than the two-part *Professional Real Estate Investors* test. Plaintiff argues that *Professional Real Estate Investors* applies only where a "*single*" underlying lawsuit is involved, while *California Motor Transport* applies to petitioning activity involving multiple proceedings. Pl. Br. at 16 (emphasis in plaintiff's brief); *id.*, at 17 (relying on a string-cite to the aforementioned line of cases from the Second, Third, Fourth and Ninth circuits to support contention that "*California Motor* [applies] to a series of sham petitions and *Professional Real Estate* [applies] to a single sham petition"). But this is not an accurate statement of the holding of the cases addressing this issue. To the contrary, there is a very substantial body of case law holding that the *Professional Real Estate Investors* two-part test applies well **[*24]** beyond the "single" case scenario defined by plaintiff.[7] See, e.g., ERBE Elektromedizin GMBH v. Canady Technology, LLC, 629 F.3d 1278, 1291 (Fed.Cir. 2010) ("[T]he three relevant lawsuits ERBE filed to which Canady Technology directs our attention . . . do not implicate a test for 'a whole series of legal proceedings'") (citations omitted); Amarel v. Connell, 102 F.3d 1494, 1519-20 (9th Cir. 1997) (holding that two lawsuits is not a "series" or "pattern" sufficient to trigger the *California Motor Transport* analysis); Polaris Industries, Inc. v. Arctic Cat, Inc., Civil No. 15-4475 (JRT/FLN), 2017 U.S. Dist. LEXIS 47748, 2017 WL 1180426, at *5-*7 (D.Minn. 2017) ("Thus, the Court finds that the three relevant [patent] cases that Polaris filed against Arctic Cat do not involve a 'whole series

---

[7] Unfortunately, neither party took advantage of multiple opportunities to brief the specific issue presented here (i.e., whether plaintiff's "holistic" version of the *California Motor Transport* test applies to a case, like the present one, involving more than one but fewer than many underlying proceedings). In other words, neither party brought to the court's attention any of the cases cited in the text immediately following this footnote. This appears to have been a strategic choice, at least on plaintiff's part. The court suggests no impropriety whatsoever—lawyers make comparable strategic decisions all the time. They must, however, live with the consequences when the sleeping dog awakens; at least in this court's view, plaintiff has waived the right to mount a *post hoc* challenge to the court's holding as it relates to the extensive body of case law that plaintiff chose not to brief before the court issued its decision.

of legal proceedings' necessitating application of the *California Motor* [*Transport*] . . . standard"); *In re Flonase Antitrust Litigation, 795 F.Sup.2d 300, 309-10 n.10 (E.D.Pa. 2011)* ("In order to qualify as a "pattern or practice" of successive filings, however, the number of petitions must be voluminous. Here, GSK's conduct consists of, at most, five "petitions" . . . No court has applied the [*California Motor Transport*] test to a "series" of five petitions; indeed, courts have expressly declined to apply the test in cases involving up to nine petitions") (citations omitted);[8] *In re Fresh Del Monte Pineapple, No. 04MD1628(RMB)(MHD), 2007 U.S. Dist. LEXIS 1372, 2007 WL 64189, at *17 (S.D.N.Y. Jan. 4, 2007)*, subsequently aff'd sub nom., *Am. Banana Co. v. J. Bonafede Co., 407 F.App'x 520 (2d Cir. 2010)*.[9]

The court has not located even a single case from any jurisdiction holding that three underlying proceedings—the number involved in the present matter—is enough to trigger *California Motor Transport*. More to the point, the present case does not involve anything like the high-volume petitioning activity involved in *California Motor Transport*, the case that generated the "holistic" analysis which plaintiff urges the court to apply here. The *California Motor Transport* litigation arose due to threats by a consortium of trucking companies to undertake massive, concerted action to institute state and federal proceedings to resist and defeat applications by respondents, a competitor group, to acquire operating rights or to transfer or register those rights. *404 U.S. at 509*. A policy or pattern of massive petitioning activity, in other words, was integral to the anti-competitive conduct at issue, and it would have been entirely impractical (and unnecessary) for a court to consider the merits of each particular petition under those circumstances. Likewise, the Ninth Circuit case relied on by plaintiff, *USS-POSCO, supra*, involved high-volume, coordinated **[*26]** union activities which included twenty-nine lawsuits, *31 F.3d at 811*, as well as computer-generated automatic petitioning contesting all permits issued to non-union contractors, *31 F.3d at 810-11*. The Second Circuit's *Primetime* case, similarly, involved petitioning activity taking the form of "huge volumes of simultaneous [statutorily-authorized "signal strength"] challenges" churned out automatically, without regard to merit, for the specific purpose of imposing overwhelming testing costs on satellite operators. *219 F.3d at 100-01*.

In sum, the federal cases that rely on the *California Motor Transport* analysis involve underlying circumstances nothing like the present lawsuit. The present case involves a small number of underlying proceedings, and the objective reasonableness of each respective proceeding can be analyzed with ease, as both parties have demonstrated in their briefs.[10]

---

[8] In *re Flonase* was issued three years before the decision in *Hanover* *3201 Realty, LLC v. Village Supermarkets, Inc., supra*, in which the Third Circuit applied the *California Motor Transport* test in a case involving four underlying legal proceedings.

[9] The court in *In re Fresh Del Monte Pineapple* ***[*25]*** explained its holding this way: Although plaintiffs on this motion target two separate lawsuits [as constituting sham litigation], they do not explicitly invoke this alternative [*California Motor Transport*] test, and with good reason, since it does not seem to apply absent a large volume of repeated, consistently baseless litigation. *See, e.g., Marchon Eyewear, Inc. v. Tura LP, 2002 U.S. Dist. LEXIS 19628, 2002 WL 31253199, at *8 (E.D.N.Y. Sept. 30, 2002)* (counterclaim for sham litigation alleged only two prior lawsuits and the current one, thus distinguishing *Primetime*). See also *Applera Corp. v. MJ Research, Inc., 303 F.Sup.2d 130, 133-34 (D.Conn. 2004)* (explaining context of *Primetime*, as involving "'huge volumes' of legal challenges," referred to as "automatic petitioning") (quoting *Primetime*, [*supra*,] *219 F.3d at 95-96, 101)*."

[10] The court has seen only a single decision, from anywhere in the country, that even remotely lends support to plaintiff's position regarding *California Motor Transport*. See *Hanover* *3201 Realty, LLC v. Village Supermarkets, Inc., supra.* That case provides the slenderest of reeds upon which to base its argument, and collapses quickly upon review. In a 2-1 decision, the *Hanover 3201 Realty, LLC* majority concluded that the "sham" exception to *Noerr-Pennington* should be analyzed under *California Motor Transport* rather than *Professional Real Estate Investors*, despite the fact that the underlying petitioning activity involved only four legal proceedings (consisting of one lawsuit and three administrative challenges). The majority's entire analysis of the point under discussion consists of three sentences:

> Defendants argue as a threshold matter that the four actions they filed against Hanover Realty are too few to even qualify as a pattern or series. We are not convinced. In so concluding, we do not set a minimum number requirement **[*27]** for the applicability of *California Motor* or find that four sham petitions will always support the use of *California Motor*. It is sufficient for our purposes that four petitions were filed against Hanover Realty and it alleges that Defendants filed these sham proceedings at every opportunity to obstruct Hanover Realty from "obtaining all necessary government approvals."

This court does not suggest that *California Motor Transport* has been overruled, or that its less methodical, more "holistic" analysis has been or should be superseded, in every imaginable context, by the two-step test set forth in *Professional Real Estate Investors*. There appear to be certain circumstances that have arisen, particularly in federal litigation, in which the underlying proceedings involve very high-volume filings (especially administrative petitions that can be automatically or mechanically filed in large numbers), leading the reviewing court to conclude that the flexible, multi-factored, more subjective standard described in *California Motor Transport* offers the best means to decide if the petitioning activity is a sham. But not in cases like this one.[11]

There is a second, **[*28]** conceptually-based reason to refuse plaintiff's invitation in this case to apply the "holistic" *California Motor Transport* test rather than the *Professional Real Estate Investors* two-part test. It should be recalled that this litigation involves purely state law causes of action. The *Noerr-Pennington* analysis was developed to safeguard *first amendment* concerns, and it operates to ensure that the antitrust statutes, and comparable statutory and common-law liability rules prohibiting unfair methods of competition, are not enforced in a manner that would infringe on constitutionally-protected petitioning activity. But no court ever has suggested that the precise contours of the sham exception as articulated by the United States Supreme Court are *constitutionally* mandated. In other words, there is no reason to believe that any concerns of a *constitutional* magnitude are implicated in choosing between the "sham" exception as articulated in *California Motor Transport* as opposed to *Professional Real Estate Investors*. One approach may be better than the other in the service of substantive *antitrust* doctrine, but the court is not aware of any *first amendment* values that would be protected by one but not the other of the **[*29]** two "sham exception" tests under consideration. Nor has plaintiff argued otherwise. This means that Connecticut is free to adopt the "sham" exception from either case, or even devise an exception of its own making, in any case involving a state cause of action, so long as the Connecticut rule does not tread on a defendant's constitutional rights.

It follows that even if plaintiff were correct (contrary to the court's holding above) that the *California Motor Transport* analysis would be used to decide the present case in a lawsuit asserting a *federal* cause of action, there is no requirement that Connecticut blindly follow the federal analysis in a case brought only under state law. To put the same point in different terms, the task here is not to predict what the United States Supreme Court would do if it were deciding the present case under the federal antitrust laws. (Pages 13-21 above represent the court's best effort to apply federal precedent to this case and decide the issue under existing *Noerr-Pennington* doctrine.) The question, rather, is what "sham exception" test the *Connecticut* Supreme Court would employ to safeguard *first amendment* values in connection with plaintiff's *state* law claims **[*30]** under the circumstances of this case. This

---

Hanover *3201 Realty, supra, 806 F.3d at 181*. Suffice it to say that the dissenting opinion is far more persuasive. *Id. at 196-201* (Greenberg, J., dissenting). Among other things, the dissenting judge notes that "no court of which I am aware has applied [*California Motor Transport*] in circumstances comparable to those here . . ." *Id. at 196*.

[11] One federal court recently questioned whether California Motor Transport should play any role in the Noerr-Pennington "sham" exception analysis, in light of Professional Real Estate Investors. See *Puerto Rico Telephone Co., Inc. v. San Juan Cable, LLC, 874 F.3d 767, 771-72 (1st Cir. 2017)*, petition for cent. docketed, No. 17-1215 (March 1, 2018). In a plurality decision, the opinion containing the judgment of the court expresses the view that the holding in Professional Real Estate Investors is intended to state a categorical rule for the "sham" exception in all Noerr-Pennington cases. "We find ourselves quite skeptical of the notion that a defendant's willingness to file frivolous cases may render it liable for filing a series of only objectively reasonable cases . . . Nor is there any pragmatic reason to presume that [Professional Real Estate Investors'] protections for nonfrivolous petitioning activity disappear merely because the defendant exercises its right to engage in such activity on multiple occasions." Id. A concurring opinion (which is the controlling opinion on this issue for precedential purposes within the First Circuit) agrees that the California Motor Transport "holistic" approach is inapplicable on the facts presented, but argues that California Motor Transport retains a role to play in the appropriate case, at least in the antitrust context. *Id. at 774-77* (Torruella, J., concurring). The Puerto Rico Telephone Co. case is noted here solely to show that the relationship between California Motor Transport and Professional Real Estate Investors has not yet been resolved with finality at the federal level. In retrospect, it appears that the seeds of the disagreement were planted all the way back in Justice Stevens' concurrence in Professional Real Estate Investors. See *Professional Real Estate Investors, 508 U.S. at 67-76* (Stevens, J., concurring). In this respect, it bears mention that notwithstanding his disagreement with "some of the unnecessarily broad dicta in the Court's opinion," Justice Stevens's concurring opinion makes it clear that he joined in the Court's "holding that an objectively reasonable effort to litigate cannot be a sham regardless of subjective intent." *Id. at 67*.

court believes that our high court would apply the two-part "sham exception" analysis articulated in *Professional Real Estate Investors*.

The most compelling reason to believe that our appellate courts would apply the two-part test of *Professional Real Estate Investors* is that it safeguards constitutional concerns using a simple, easy-to-administer legal framework similar to Connecticut common-law doctrine governing wrongful litigation torts of vexatious litigation and malicious prosecution. The first step in the *Professional Real Estate Investors* analysis is similar (though not identical) to the "probable cause" element of the common-law tort doctrine, while the second step bears similarity to the common-law "malice" inquiry. See, e.g., *Bhatia v. Debek, 287 Conn. 397, 405-07, 410-11, 948 A.2d 1009 (2008)*; *Vandersluis v. Weil, supra, 176 Conn. at 356*; *McGann v. Allen, 105 Conn. 177, 186, 134 A. 810 (1926)*.[12]

The similarity between the federal immunity doctrine under *Professional Real Estate Investors* and state wrongful-litigation doctrine **[*31]** is evident in one additional respect. Under both doctrines, a finding in favor of the defendant

---

[12] In light of this point, it is fair to ask why *Noerr-Pennington* is needed at all in the context of a vexatious litigation case under Connecticut law. *Noerr-Pennington* was developed in the field of ***antitrust law***, to safeguard *first amendment* "petition clause" rights in contexts where the underlying liability standard, if given unrestrained application, may threaten those rights. But it would appear that the liability standard for vexatious litigation, unlike the liability standard for antitrust violations, *already* provides that same basic protection—a defendant cannot be liable for vexatious litigation unless the underlying litigation activity was undertaken without probable cause and with malice. Because the liability standard covers the same basic ground as the immunity doctrine, it is not immediately apparent what specific purpose is served by the immunity doctrine in this context. The question is not an idle one because the immunity injects an additional layer of complexity into these cases, as the present proceedings illustrate. Nor is it enough to say that under *Zeller v. Consoli*, the *Noerr-Pennington* doctrine applies to lawsuits for common-law vexatious litigation, and this court has no business wondering why. The problem is that a trial court must determine at a doctrinal level precisely what (if anything) *Noerr-Pennington* adds to existing vexatious litigation doctrine in order to adjudicate dispositive motions, requests to charge, and countless other matters that require a very particularized understanding of the interrelationship between the immunity doctrine and the liability standard. We have clues but no definitive answer regarding the precise relationship between the liability standard and the immunity defense. *Zeller v. Consoli* noted that "the *Noerr-Pennington* doctrine is similar to existing law in Connecticut governing the torts of interference with business relations and vexatious litigation," *59 Conn.App. at 554 n.5*, but did not have occasion to delineate the precise nature of that similarity. One other superior court judge has addressed one aspect of this issue, and concluded that the liability standard for vexatious litigation does *not* cover precisely the same ground as the sham exception under *Noerr-Pennington*. See *Diamond 67, LLC v. Oatis, No. X03HHD-CV-126030610, 2017 Conn. Super. LEXIS 4487, 2017 WL 5056255, at *20-*22 (Super.Ct., Sept. 18, 2017) (Moll, J.)*. Plaintiff in *Diamond 67* argued that a finding in plaintiff's favor on its vexatious litigation claim necessarily defeated any *Noerr-Pennington* defense, on the theory that the doctrinal elements of the tort and the immunity are essentially two sides of the same coin. *Id., 2017 Conn. Super. LEXIS 4487, 2017 WL at *22*. Judge Moll disagreed, stating that the argument "ignores entirely the second prong of the *Noerr-Pennington* [sham exception], namely, that the vexatious proceedings concealed an attempt to interfere directly with the business relationship of a competitor." This point is correct in that the second prong of the "sham" exception is formulated in specific terms focusing on competitor injury, while the malice element in vexatious litigation doctrine is phrased in more general terms, asking if the defendant pursued the underlying proceedings "for a purpose other than that of securing the proper adjudication of the claim on which they are based." *Restatement (Second) Torts §676* (1977); *accord* Connecticut Jury Instructions (Civil), Instruction 3.13-6A. ("A person acts with malice when (he/she) acts primarily for an improper purpose—that is, for a purpose other than that of securing the proper adjudication of the claim on which the (action/proceeding) is based.") But it seems plausible that the second prong of the sham exception is nothing more than a specialized application of the common-law malice standard, for use in the antitrust context—the "competitor injury" formulation is taken from *Professional Real Estate Investors*, a Sherman Act case. See *508 U.S. at 60-61*. If that is right, then the precise "competitor injury" formulation applicable in the antitrust context is not itself constitutionally compelled, and the common-law malice standard can be substituted for it without impairing its function. This returns us to the original question: in a vexatious litigation case, what does *Noerr-Pennington* add that is not already covered by the liability standard itself? The issue has not been briefed in the present case, and it does not require resolution here. The beginning of the answer no doubt lies in the fact that the liability standard for vexatious litigation and the immunity standard under *Noerr-Pennington* serve two somewhat different functions; the former protects the societal interest in encouraging citizens to seek redress uninhibited by the fear of retaliatory litigation, whereas the latter protects *first amendment* "right to petition" values. Whether both of these interests can be protected by a single doctrinal safeguard (rather than the double-layered protection of a strict liability standard plus an immunity defense) is a question for another day.

at the probable-cause stage of the analysis *requires* a judgment in defendant's favor *regardless of defendant's subjective intent*. See *Professional Real Estate Investors, supra, 508 U.S. at 57* ("We left unresolved [in *California Motor Transport*] the question presented by this case—whether litigation may be sham merely because a subjective expectation of success does not motivate the litigant. We now answer this question in the negative and hold that an objectively reasonable effort to litigate cannot be sham regardless of subjective intent"); *id. at 60* ("Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation"); *McGann v. Allen, supra, 105 Conn. at 187* (in malicious prosecution claim under Connecticut law: "If probable cause exists, it is an absolute protection against an action for malicious prosecution, even when malice is proved"); *Vandersluis v. Weil, supra, 176 Conn. at 356* (same in vexation litigation suit); cf. *Restatement (Second (Torts) §669A (1977)* ("Improper Purpose Not Evidence of Lack of Probable Cause").

It is significant in this regard that the leading Connecticut case adopting *Noerr-Pennington* concluded its analysis by holding that summary judgment was properly granted in **[*32]** that case based solely on the trial court's finding that the defendants had probable cause to pursue the underlying litigation. *See* *Zeller v. Consolini, supra, 758 A.2d at 386*. It also is significant that *Zeller* quoted *Professional Real Estate Investors* itself in support of this holding:

> Because we find that the petitioning was not objectively baseless, we need not consider the second prong of the *Noerr-Pennington* sham exception, namely, whether the defendants' actions constituted an attempt to interfere with the plaintiffs through abuse of the petitioning process. "Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation." *Professional Real Estate Investors, Inc. v. Columbia Pictures Industries, Inc., supra, 508 U.S. at 60*.

Zeller v. Consolini, supra, 758 A.2d at 386 n.8.[13]

The *Zeller* case, at the very least, lends compelling support to the court's decision to apply the *Professional Real Estate Investors* two-part test in the present case. As noted, *Zeller* applies that test to determine the viability of the *Noerr-Pennington* "sham" exception in a case involving multiple underlying proceedings. Plaintiff points out that *Zeller* also quotes the discussion of the sham exception from *California Motor Transport*, see 758 A2.d at 380-81, but the dual citation only confirms that *California Motor Transport* and *Professional Real Estate Investors* ***[*33]*** are not disharmonious. As explained above, the Supreme Court in *Professional Real Estate Investors* believed that it was simply refining *California Motor Transport* by answering a question left open there. *508 U.S. at 57*. *Zeller* uses *California Motor Transport* to explain the basic idea behind the sham exception, and gives examples of misconduct that may fall under the "sham" exception. The actual doctrinal analysis deployed in *Zeller*, however, is the two-step test of *Professional Real Estate Investors*. We know this with certainty because the court's analysis never gets beyond the first step (probable cause) of the *Professional Real Estate Investors* test, and finds it unnecessary to consider any question of defendants' subjective motivation.

The same point applies to *Diamond 67, LLC v. Oatis, 167 Conn. App. 659, 144 A.3d 1055*, a case also involving a multiplicity of underlying administrative and judicial proceedings. Once again, the Appellate Court apparently was not confronted with an argument that it must "choose" between the two Supreme Court cases, *California Motor Transport* and *Professional Real Estate Investors*. (*Diamond 67*, in fact, does not even cite to *California Motor Transport*.) *Diamond 67* briefly explains the **[*34]** general principle underlying the sham exception using language taken by *Zeller* from *California Motor Transport*, *167 Conn.App. at 688*. But, as in *Zeller*, the Appellate Court in *Diamond 67* makes it very clear that the actual doctrinal test used "to define the sham exception" is the two-part test of Professional Real Estate Investors. *Id. at 687*.[14] This understanding is corroborated by the fact that the trial judge

---

[13] The *Zeller* decision also quotes with approval the following statement of the trial court, which the trial judge made after finding that defendants had probable cause to pursue the underlying litigation: "[Defendants'] motives behind these actions are irrelevant to the finding of probable cause." *Id. at 386*.

[14] It warrants mention that *Diamond 67* involved allegations that defendants made misrepresentations of fact to the administrative and judicial tribunals hearing the underlying proceedings. *167 Conn.App. at 688-89* (reviewing allegations that defendants had told the relevant tribunals, falsely, that the project threatened to pollute a source of public drinking water). The

who tried the case on remand scrupulously applied the *Professional Real Estate Investors* two-part test. *See* Diamond 67, LLC v. Oatis, No. X03HHD-CV-126030610, 2017 Conn. Super. LEXIS 4487, 2017 WL 5056255, at *20-*22 (Super.Ct., Sept. 18, 2017) (finding that plaintiff satisfied the first prong but not the second prong of the "sham" exception, and therefore failed to overcome the *Noerr-Pennington* defense).

One final legal point requires discussion before turning to the particular circumstances of this case. In its determined effort to find a place to inject subjective (intent-based) considerations into the analysis, plaintiff insists, especially in its supplemental briefing,[15] that it is inaccurate to characterize as entirely objective the **[*35]** probable-cause determination that functions as the first step of the *Noerr-Pennington* "sham" test. Plaintiff contends that probable cause in this context also has a subjective component, because, in addition to the requirement that the claims asserted by the defendant be objectively reasonable, Connecticut law also requires that defendant's allegations must be made in "good faith," which, plaintiff observes, plainly includes consideration of a party's *subjective* state of mind. See Pl. Amended Supp. Br. at 2 (arguing that as part of the probable cause analysis, "the Court must decipher whether defendants had a bona fide belief in the existence of facts essential under the law to establish that probable cause existed for their actions"). Plaintiff relies on numerous Connecticut cases and other authorities stating, in one way or another, that there is a "good faith" or "actual belief" element to the probable cause inquiry. See, e.g., DeLaurentis v. New Haven, 220 Conn. 225, 256, 597 A.2d 807 (1991) (emphasis added). ("For purposes of a vexatious suit action, [t]he legal idea of probable cause is a *bona fide belief* in the existence of the facts essential under the law for the action and such as would warrant a man of ordinary caution, prudence and judgment, **[*36]** under the circumstances, in entertaining it . . . Thus, in the context of a vexatious suit action, the defendant lacks probable cause if he lacks a reasonable, *good faith* belief in the facts alleged and the validity of the claim asserted") (citations and internal quotation marks omitted; emphasis added).

Defendants' position is that the probable-cause inquiry is purely objective in nature, under both the first prong of the *Noerr-Pennington* "sham" exception and Connecticut's law of vexatious litigation. With respect to *Noerr-Pennington*, defendants cite the explicit holdings of the leading cases previously discussed in this memorandum, including *Real Estate Investors Professionals* and *Zeller*, each of which speaks unequivocally on the issue: "Only if challenged litigation is [found to be] objectively meritless [in the first stage of the analysis] may a court examine the litigant's subjective motivation [in the second stage of the analysis]." Professional Real Estate Investors, supra, 508 U.S. at 60; Zeller v. Consoli, supra, 59 Conn.App. at 563 n.9 (quoting the foregoing holding from *Professional Real Estate Investors*, and affirming summary judgment for defendant based on the objective reasonableness of claims, without reaching issue of defendants' subjective intentions).[16] As for the probable-cause **[*37]** analysis undertaken in the vexatious litigation context under Connecticut law, defendants' position finds direct support in a leading Supreme

---

ultimate precedential value of the *Noerr-Pennington* discussion in *Diamond 67* may be clouded due to the fact that the Appellate Court does not address whether vexatious litigation claims rooted in allegations of fraud or misrepresentation are subject to a specialized version of the "sham" exception used in cases involving fraud. See Scott Filmore, *Defining the Misrepresentation Exception to the Noerr-Pennington Doctrine*, 49 U. Kan. L. Rev. 423 (2001) (discussing federal cases "examining whether misrepresentations to the government are protected by the *Noerr-Pennington* Doctrine or whether such conduct falls into a variant of the sham exception known as the 'misrepresentation exception'"); United States v. Philip Morris USA, Inc., 566 F.3d 1095, 1123, 386 U.S. App. D.C. 49 (D.C. Cir. 2009) ("Defendants' attempt to invoke *Noerr-Pennington* as protection fails because the doctrine does not protect deliberately false or misleading statements"). A similar doctrine, known as the *Walker Process* exception, holds that *Noerr-Pennington* immunity is unavailable to a party who has made intentional misrepresentations to the United States Patent and Trademark Office in the procurement of a patent. See, e.g., S3 Graphics Co. v. ATI Techs. ULC, No. CV 11-1298-LPS, 2014 U.S. Dist. LEXIS 16928, 2014 WL 573358, at *3 (D.Del. Feb. 11, 2014) (explaining rule derived from Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S.Ct. 347, 15 L.Ed.2d 247 (1965). The "fraud" exception to *Noerr-Pennington*, a "sham" exception sub-doctrine, is further discussed below at pp. 39-40.

[15] More than three months after argument on the pending motion, plaintiff filed a motion for permission to file supplemental briefing (as amended, Doc. Entry #205.00, dated March 19, 2018). The supplemental brief contends that plaintiff's opposition to summary judgment has been strengthened by the deposition testimony of Nicholas Ahuja taken on March 9, 2018. See Doc. Entry #206.00 (brief and exhibits). This court granted plaintiff leave to file its supplemental brief, over objection.

[16] See also Professional Real Estate Investors, supra, 508 U.S. at 57. ("We . . . hold that an objectively reasonable effort to litigate cannot be sham regardless of subjective intent.")

Court case expressly holding that "[t]he probable cause standard applied to a vexatious litigation action against a litigant is a purely objective one." *Falls Church Grp., Ltd. v. Tyler, Cooper & Alcorn, LLP, supra, 281 Conn. at 98* ("[T]he probable cause standard applied to a vexatious litigation action against a litigant is a purely objective one"); see also *Rockwell v. Rockwell, 178 Conn.App. 373, 390, 175 A.3d 1249 (2017)* (same); *Hebrew Home & Hosp., Inc. v. Brewer, 92 Conn.App. 762, 768, 886 A.2d 1248 (2005)*.

The confusion is understandable, but the conflict is a false one. It dissolves once we make two important distinctions. The first distinction, under Connecticut vexatious litigation law, is between a probable-cause inquiry focused on the *factual* allegations in the underlying proceedings and a probable-cause inquiry focused on the *legal* basis for the underlying claims. A subjective inquiry is required as part of the probable-cause inquiry in vexatious litigation cases to the extent that a plaintiff contends that the defendant falsified or misrepresented the *factual* basis for claims in the underlying proceedings. But plaintiff is incorrect when it seeks to characterize this as a "subjective" inquiry into a defendant's intentions or motivations *per se*, because **[*38]** it is not that. The inquiry is not concerned with questions of intent or motivation; it examines the state of defendant's *knowledge*, that is, it asks what facts defendant knew, or should defendant have known, at the time the allegations were made. The objective inquiry then examines whether a reasonable person would conclude that those facts establish probable cause under applicable law. See generally Kenneth Rosenthal, *Vexatious Litigation in Connecticut: Malicious Prosecution of Civil Actions, Probable Cause, and Lawyer Liability*, 84 Conn. B.J. 255, 262-66 (2010) (explaining distinction between "factual tenability" of underlying claim, which involves subjective inquiry into what defendant knew or should have known when allegations were made, versus "legal tenability" of underlying claim, which is an objective inquiry).[17] See also 3 *Restatement (Second) Torts §675, comment d* (1977) (for purposes of the probable cause analysis applicable to wrongful civil proceedings, stating that a person "cannot have a reasonable belief in the existence of facts on which proceedings are based if he knows that the alleged facts are not true and his claim is based on false testimony . . .")[18]

The second distinction overlooked by plaintiff **[*39]** is the difference between the specific probable cause inquiry conducted under the first step of the *Noerr-Pennington* "sham" test, on the one hand, and the probable cause inquiry under *state* vexatious litigation doctrine. As discussed in the preceding paragraph, plaintiff's argument that the court must consider the "subjective" component of the probable-cause inquiry is based on plaintiff's understanding of *Connecticut* law defining probable cause in the context of vexatious litigation cases. Although the *Noerr-Pennington* cases sometimes describe the probable cause test under federal and state law as "equivalents," *Diamond 67, LLC v. Oatis, supra, No. X03HHD-CV-126030610, 2017 Conn. Super. LEXIS 4487, 2017 WL 5056255, at *21* (citing cases), this description is only accurate, strictly speaking, with reference to the *objective* prong of the vexatious litigation analysis, because the first (probable cause) step of the *Noerr-Pennington* sham exception has no "subjective" component. This is not to say that *Noerr-Pennington* immunity is available to parties whose petitioning activity includes making knowingly false misrepresentations of material fact in the underlying proceedings. See n.14 above. But that particular type of misconduct does not disqualify the petitioner **[*40]** from *Noerr-Pennington* immunity under the "probable cause" component of the sham exception. Instead, the *Noerr-Pennington* cases have established a separate "fraud exception" analysis for cases involving claims of factual misrepresentation. See above n.14, and below at pp. 39-40. It is a mistake to conflate the analysis under the *Noerr-*

---

[17] The Rosenthal article very ably untangles the two strands of the probable cause doctrine using extensive citation to Connecticut Supreme Court precedent to illustrate the point. Even the *Falls Church* decision, which emphasizes the "purely objective" nature of the probable cause inquiry in Connecticut, acknowledges the critical distinction between the state of defendant's *knowledge* (i.e., the facts he or she knows when making the underlying legal claims), and the defendant's subjective *intentions* or *motivations*. See *281 Conn. at 99*. Only the latter are irrelevant to the probable cause inquiry. *Id.*; cf. *Devenpeck v. Alford, 543 U.S. 146, 153, 125 S. Ct. 588, 160 L. Ed. 2d 537 (2004)* ("Our cases make clear that an arresting officer's state of mind (except for the facts that he knows) is irrelevant to the existence of probable cause") (citations omitted).

[18] Each of the two aspects of the probable cause inquiry—the requirement of legal tenability and factual tenability—are part of the standard formulation of the Connecticut doctrine: "The legal idea of probable cause is a bona fide belief in the existence of the facts essential under the law for the action and such as would warrant a man of ordinary caution, prudence and judgment, under the circumstances, in entertaining it." *Wall v. Toomey, 52 Conn. 35, 36 (1884)*.

Pennington fraud exception with the "probable cause" analysis under Connecticut law. Plaintiff's analysis is flawed by this mistake.

C. Application of *Noerr-Pennington* to the Circumstances of this Case

For purposes of the present motion, the question on summary judgment is whether a reasonable juror could conclude, on this record, that the sham exception to the *Noerr-Pennington* doctrine applies to defendants' conduct. The summary judgment standard itself is well-settled. See *Practice Book §17-49*; see, e.g., *Grenier v. Commissioner of Transportation, 306 Conn. 523, 534-35, 51 A.3d 367 (2012)*; *Windsor Financial Savings & Loan Ass'n v. Reliable Mechanical Contractors, LLC, 175 Conn.App. 651, 658-59, 168 A.3d 586 (2017)*.[19] A slight nuance is added to the summary judgment analysis with respect to the first part of the sham exception (the so-called "objective" prong), because this probable cause determination ultimately presents a question of law. A recent Appellate Court decision summarizes the relevant case law:

> [There is an] ample body of Connecticut precedent holding that the existence **[*41]** of probable cause is a question of law to be decided by the court. See, e.g., *Falls Church Group, Ltd. v. Tyler, Cooper & Alcorn, LLP, 281 Conn. 84, 94, 912 A.2d 1019 (2007)* ("the existence of probable cause is an absolute protection . . . and what facts, and whether particular facts, constitute probable cause is always a question of law" [internal quotation marks omitted]); *Brodrib v. Doberstein, 107 Conn. 294, 296, 140 A. 483 (1928)* (existence of probable cause "is always a question of law"); *Giannamore v. Shevchuk, 108 Conn.App. 303, 312, 947 A.2d 1012 (2008)* ("[t]he issue of probable cause . . . ultimately presents a question of law that must be determined by the court"). For that reason, the appellate courts of this state have upheld judgments rendered in favor of defendants in vexatious litigation actions in which the court rendered summary judgment as a matter of law; see *Lichaj v. Sconyers, 163 Conn. App. 419, 428-29, 137 A.3d 26 (2016)*; *Hebrew Home & Hospital, Inc. v. Brewer, 92 Conn.App. 762, 773, 886 A.2d 1248 (2005)*; as well as cases in which the court bifurcated the issue of probable cause, conducted an evidentiary hearing, and then concluded that probable cause existed. See *Falls Church Group, Ltd. v. Tyler, Cooper & Alcorn, LLP, supra, at 90-92*.

Rockwell v. Rockwell, 178 Conn.App. 373, 388-89, 175 A.3d 1249 (2017); see also *Rieffel v. Johnston-Foote, 165 Conn.App. 391, 396-97, 139 A.3d 729 (2016)*; *Charlotte Hungerford Hosp. v. Creed, 144 Conn.App. 100, 116, 72 A.3d 1175, 1185 (2013)* ("Whether there is probable cause in a given case is a question of law, upon which our scope of review is plenary"); *Byrne v. Burke, 112 Conn.App. 262, 275, 962 A.2d 825 (2009)*.[20]

Although the existence of probable cause presents a question of law, the issue can be decided on summary judgment only if there is no disputed issue with respect to any of the underlying facts material to the probable cause determination. **[*42]** See, e.g., *DeLaurentis v. City of New Haven, supra, 220 Conn. at 252-53* ("Whether the facts are sufficient to establish the lack of probable cause is a question ultimately to be determined by the court, but when the facts themselves are disputed, the court may submit the issue of probable cause in the first instance to a jury as a mixed question of fact and law. *Cosgrove Development Co. v. Cafferty, 179 Conn. 670, 671, 427 A.2d 841 (1980)*; see 3 *Restatement (Second), Torts §681B* [1977]").

---

[19] Defendants, as the moving parties, bear the burden to demonstrate that they are entitled to judgment as a matter of law. See *Ramirez v. Health Net of N.E., Inc., 285 Conn. 1, 10-11, 938 A.2d 576 (2008)* ("it is the movant who has the burden of showing the nonexistence of any issue of fact"). Plaintiff at trial bears the burden of proving that the sham exception applies to the petitioning activity at issue. *Professional Real Estate Investors, supra, 508 U.S. at 61*.

[20] The reason for the rule has been explained in various ways. See *Armco, Inc. v. S. Rock, Inc., 778 F.2d 1134, 1137 (5th Cir. 1985)* ("[W]ere probable cause left to the jury the rights of defendants might not be sufficiently safeguarded and the bringing of complaints would be discouraged . . . [T]he general rule is that suits for malicious prosecution are viewed with disfavor and are to be carefully guarded against . . . [M]alicious prosecution cases present situations difficult for the jury to distinguish. There is a constant interplay between the original lawsuit and the malicious prosecution suit . . . This difficulty coupled with the reluctance of the courts to have potential plaintiffs feel a chilling effect from a possible counter lawsuit sheds some light upon the reason for the development of this rule") (citation omitted).

The court's probable cause analysis under the "sham" exception to *Noerr-Pennington* will proceed in two parts. First, the court will examine the issue as it relates to each of the underlying legal proceedings involving plaintiff's three zoning applications. See above at pp. 3-6 (describing the administrative and judicial components of the three underlying zoning applications). Second, because plaintiff has argued that some of the alleged misconduct occurred outside the framework of actual proceedings (what plaintiff calls "non-petitioning conduct"), the court will analyze that contention separately.

1. Petitioning Activity

The First Application

The challenged conduct in connection with the First Application involves Ahuja's motion to intervene in the appeal filed by plaintiff after its initial application was denied by the Board. Ahuja moved to intervene in the superior **[*43]** court; the motion was denied; she sought certification to appeal the denial with the Appellate Court; certification was granted; after first opposing intervention, Procurement changed course and moved to join Ahuja as a party; after first opposing the motion, Ahuja withdrew her appeal in the Appellate Court and participated in the superior court proceedings; the trial court then reversed the Board's decision (i.e., ruled against the Board and Ahuja).

It bears emphasis that Procurement was the *losing* party at the administrative level in the first proceeding, and Ahuja sought to intervene in the superior court appeal on behalf of the *prevailing* party, the Board. It follows that the *merits* of Ahuja's position opposing Procurement's appeal, which essentially mirrored the Board's own litigation position, could hardly be considered objectively unreasonable under these circumstances—Ahuja was supporting the prevailing party at the time. Perhaps for this reason, Procurement's probable cause argument does not challenge Ahuja's legal claims regarding the underlying merits, but instead focuses on her activity in connection with the intervention itself. Plaintiff primarily argues that the petition **[*44]** to intervene contains numerous false allegations of fact regarding the Board's intention to settle the zoning dispute with Procurement. See Pl. Br. at 9, 17-18, 20; Pl. Supplemental Br. at 4, 6.

Applying the first prong of the *Noerr-Pennington* "sham" analysis, the court finds that Ahuja's petitioning activity in connection with the First Application was objectively reasonable as a matter of law. Intervention was sought primarily based on the fact that Procurement and the Board might enter into a global settlement of their zoning dispute. See Motion to Intervene at ¶11; Intervention MOD, *2012 Conn. Super. LEXIS 1380 at *1-2* ("In support of her motion to intervene Ahuja contends that unless she is made a party to this [action], she will be vulnerable to a settlement reached between Procurement and the Zoning Board . . ."). In opposing intervention, Procurement evidently did not challenge Ahuja's standing. See Intervention MOD, *2012 Conn. Super. LEXIS 1380 at *2*. It also acknowledged that it was, in fact, engaged in serious settlement discussions with the Board. *2012 Conn. Super. LEXIS 1380 at *2*. Its opposition to intervention was based on the contention that the Board itself adequately represented Ahuja's interests, and to allow intervention would allow her to have veto power over the proposed settlement. The trial court **[*45]** considered the factors weighing for and against intervention, and concluded that the motion should be denied. Judge Adams observed that if Procurement and the Board ultimately were able to settle the matter, Ahuja would have an opportunity to object at the hearing mandated under *General Statutes §8-8(n)*.[21] *2012 Conn. Super. LEXIS 1380 at *4*.

Procurement does not appear to contend that Ahuja's motion to intervene was legally untenable. Nor could such an argument credibly be maintained. Certainly nothing in the Intervention MOD suggests that Judge Adams considered the motion to be frivolous in any respect. To the contrary, it appears that Judge Adams viewed Ahuja's position as reasonable, though ultimately unpersuasive, and he exercised his discretion to deny intervention only after due consideration of the relevant legal factors under *Horton v. Meskill, 187 Conn. 187, 197, 445 A.2d 579 (1982)*. See Intervention MOD, *2012 Conn. Super. LEXIS 1380 at *2*. The trial court understood that individual objectors will sometimes seek to intervene as parties in zoning appeals when it appears that the municipal zoning authority and

---

[21] *General Statutes §8-8(n)* provides that no settlement of a zoning appeal is effective unless and until a hearing is held and the settlement is approved by the court.

developer, once at odds, had reached a settlement. See *id. at 3-4* (citing other superior court cases). Such efforts usually are unsuccessful—but not always. See, e.g., *Walker v. Branford Planning & Zoning Comm'n, No. CV-10-6009763S, 2010 WL 4276686, at *5 (Conn.Super.Ct. Sept. 28, 2010) [50 Conn. L. Rptr. 654, 2010 Conn. Super. LEXIS 2486]* (granting intervention **[*46]** in zoning appeal after considering possibility of settlement between principal parties); *One Hundred Nine N., LLC v. New Milford Planning Comm'n, No. DBD-CV-06-4006246S, 2008 WL 2168994, at *4 (Conn.Super.Ct. May 6, 2008) [45 Conn. L. Rptr. 510, 2008 Conn. Super. LEXIS 1146]* (permitting intervention in zoning appeal despite prospect of settlement between principal parties).

A further indication of the potential legal viability of Ahuja's position is found in the fact that the Appellate Court *granted* certification to review Judge Adams' ruling. This action necessarily means that at least two members of the Appellate Court found Ahuja's argument worthy of appellate consideration. See *General Statutes §8-8(o)*. Frivolous claims ordinarily do not earn certification. The Appellate Court's interest in this matter substantiates the conclusion that Ahuja's petition to intervene was not doomed to fail from the outset. In point of fact, plaintiff has not cited any appellate authority demonstrating, or even hinting, that a reasonable person under the circumstances would have believed that Ahuja's motion to intervene had no realistic chance of success.

Procurement's fact-based claims fare no better. It argues that Ahuja's petition to intervene contained various factual misrepresentations that would remove any basis for probable **[*47]** cause. Procurement claims that a reasonable factfinder could conclude, on this record, that Ahuja herself was not even aware at the time of filing that her lawyer had filed the petition to intervene (filed on February 22, 2012), and, more particularly, that she was not aware personally of certain factual representations made in the motion until months after the motion was filed.[22] It contends that a factfinder could reasonably conclude that Ahuja lacked probable cause because she had no personal knowledge of the facts alleged in the motion to intervene filed under her name. Procurement does *not* contend that the material factual allegations in Ahuja's petition to intervene were themselves false. To the contrary, it is undisputed that Procurement *was* in settlement negotiations with the Board at the time. See Intervention MOD, *2012 Conn. Super. LEXIS 1380 at *2*. Plaintiff's argument is that Ahuja herself was ignorant of the underlying facts; the petition was prepared and submitted by her lawyer in collaboration with Ahuja's son and/or ex-husband, who were acting on behalf of defendant Holdings, which was the "real" party in interest. Plaintiff contends that Ahuja was a "straw" intervenor, used by her son and ex-husband to establish statutory **[*48]** aggrievement based on her ownership of property within 100 feet of the High Ridge Road Project. See *General Statutes §8-8(a)(1)*.

Plaintiff's theory regarding Ahuja's factual ignorance does not provide a legal basis for defeating *Noerr-Pennington* immunity. It is true that the immunity is lost if a petitioner intentionally makes material misrepresentations of fact to the government. See n.14 above (discussing "fraud" exception). But under that doctrine, it is not enough that the factual allegations are made by a petitioning party who speaks without knowing whether or not the allegations are true; to lose *Noerr-Pennington* immunity under the so-called fraud exception, there must have been a deliberate and material misrepresentation of fact. See *Mercatus Group, LLC v. Lake Forest Hospital, 641 F.3d 834, 842-43 (7th Cir. 2011)* ("a misrepresentation renders an adjudicative proceeding a sham only if the misrepresentation (1) was intentionally made, with knowledge of its falsity; and (2) was material, in the sense that it actually altered the outcome of the proceeding"); *United States v. Philip Morris USA, Inc., supra, 566 F.3d at 1123* ("Defendants' attempt to invoke *Noerr-Pennington* as protection fails because the doctrine does not protect deliberately false or misleading statements"); *Kottle v. Northwest Kidney Centers, 146 F.3d 1056, 1060 (9th Cir. 1998)* ("litigation can be deemed a sham if a party's knowing fraud upon, or its **[*49]** intentional misrepresentations to, the court deprive the litigation of its legitimacy") (inner quotation marks and citation omitted); *Edmondson & Gallagher v. Alban Towers Tenants Ass'n, 48 F.3d 1260, 1267, 310 U.S. App. D.C. 409 (D.C. Cir. 1995)* ("[N]either the *Noerr-Pennington* doctrine nor the *First Amendment* more generally protects petitions predicated on *fraud* or *deliberate* misrepresentation") (emphasis added; describing the holding in *Whelan v. Abell, 48 F.3d 1247, 310 U.S. App. D.C. 396 (D.C. Cir. 1995))*; *Potters Medical Center v. City Hosp. Ass'n, 800 F.2d 568, 580-81 (6th Cir. 1986)*; *St. Joseph's Hospital, Inc. v. Hospital Corp. of America, 795 F.2d 948, 955 (11th Cir. 1986)*; *Ottensmeyer v.*

---

[22] Procurement focuses primarily on the allegations in the intervention motion about the potential settlement of the zoning dispute by the Board and Procurement, and the potential legal effects of such a settlement. See Pl. Br. at 8-9.

Chesapeake & Potomac Tel. Co. of Md., 756 F.2d 986, 994 (4th Cir. 1985); Bath Petroleum Storage, Inc. v. Mkt. Hub Partners, L.P., 129 F.Sup.2d 578, 593 (W.D.N.Y.), aff'd *229 F.3d 1135 (2d Cir. 2000)*.

As a matter of law, plaintiff cannot prevail under *Noerr-Pennington* on its theory regarding Ahuja's alleged ignorance of the facts contained in her petition to intervene, because no reasonable factfinder could conclude, on this record, that Ahuja deliberately made any false representation of material fact to the court in connection with her efforts to intervene in the First Application.[23]

Procurement's claim that Ahuja acted as a "straw" for her son and ex-husband is also unavailing. Procurement's evidence at most would support the view that Ahuja's opposition to the project primarily was motivated by family loyalty rather than any particularized knowledge of the facts or deep conviction regarding the merits. Her activity is immunized because the claims contained in her motion were supported by probable cause under the *Noerr-Pennington* **[*50]** "sham" exception; the fact that her son and/or husband were pursuing their own interests by petitioning through her does not deprive any of the defendants of *Noerr-Pennington* immunity. See Baltimore Scrap Corp. v. David J. Joseph Co., 237 F.3d 394, 400-01 (4th Cir. 2001) (*Noerr-Pennington* protects even non-parties whose petitioning activity is carried out through "straw petitioners); Liberty Lake Investments, Inc. v. Magnuson, 12 F.3d 155, 157-59 (9th Cir. 1993); Opdyke Inv. Co. v. City of Detroit, 883 F.2d 1265, 1273 (6th Cir. 1989).

The Second Application

On December 12, 2011, while the first appeal was pending, plaintiff's second application for a special permit and architectural/site plan approval was approved by the Board. See above at pp. 5-6. Ahuja appealed to the superior court pursuant to General Statutes §8-8. The principal ground for her appeal was that the Board lacked subject matter jurisdiction to act because Procurement failed to comply with the notice requirements for public hearings as required under the Stamford City Charter ("Charter").[24] The notice argument was based on the fact that the Board did not publish notice regarding two of the four public hearings held in connection with the second application. The undisputed facts were described by the trial court:

> The Board published notice in the *Stamford Advocate* on September 14, 2011 and September 21, 2011 for a public hearing to be held on September 26, 2011. The Board **[*51]** was unable to complete the hearing on that date and continued the hearing to October 6, 2011. Due to the large number of citizens who still wished to speak that evening, the Board continued the hearing to October 24, 2011; yet on that evening, the hearing was abruptly closed to overcrowding. The Board [then] . . . caused notice to be published notice in the *Stamford Advocate* on October 28, 2011 and November 4, 2011 for a public hearing on November 10, 2011.

Ahuja contended on appeal primarily[25] that the failure to publish public notice with regard to two of the "continuation" hearings (October 6, 2011 and October 24, 2011) violated the relevant provisions of the Stanford

---

[23] The court need not decide whether plaintiff's "ignorance" theory would be sufficient to establish that Ahuja lacked probable cause for purposes of satisfying the *liability* standard for vexatious litigation in Connecticut. The issue here is whether defendant is entitled to summary judgment on its *Noerr-Pennington defense*, and so the only question is whether, on this record, that doctrine immunizes defendants as a matter of law.

[24] The parties appear to agree that the notice requirements for zoning matters in Stamford are governed by the Charter. See Berger MOD 1/4/13, 2013 Conn. Super. LEXIS 49 at *3 ("Unlike most zoning commissions . . . planning and zoning in Stamford are governed by 26 Spec. Laws 1228, No. 619, hereinafter referred to as the Stanford Charter (1953, rather than by the General Statutes").

[25] Ahuja also attacked the sufficiency of the notices on the ground that Procurement amended its application shortly before the last hearing date, which, according to Ahuja, rendered the prior notices "misleading" and obligated the Board to publish a new notice reflecting the change. The court has reviewed the parties' respective briefs submitted to the trial court on these subsidiary issues, reviewed the key cases, and has read Judge Berger's decision as it relates to these issues. In this court's view, although Ahuja's subsidiary legal claims on this point did not prevail, the arguments unquestionably were supported by probable cause as a matter of law.

Charter, §C6-40-11 and §C6-40-12. Section C6-40-11, entitled "Notice of Public Hearings," provides in pertinent part as follows:

> Notice of each public hearing held with respect to amendments of the Zoning Regulations and Map or applications for approval of site and architectural plans and/or requested uses shall be given by publishing in an official newspaper the time, place and purpose of such hearing . . . Said notice shall be published at least twice, the first not more than fifteen nor less than ten days before such **[*52]** hearing, the last not less than two days before such hearing . . .

Section §C6-40-12, entitled "Hearings," states:

> If more than one public hearing is considered by the Zoning Board to be necessary or advisable, additional hearings may be held upon due notice, as herein above set forth, provided no more than ninety days shall elapse between the first and last hearing on any one petition, unless the petitioner agrees in writing to an extension of such period.

The "notice" issue was fully briefed in the trial court, and Judge Berger issued a written decision resolving the issue in favor of the Board. See Berger MOD 1/4/13, *2013 Conn. Super. LEXIS 49 at *3*. Judge Berger's MOD is thoughtful, and his conclusions are supported by another superior court in a different case involving the same charter provisions. *Id.* at 5-6 (citing Judge Adams' decision in *Carberry v. Zoning Board of Appeals*). Judge Berger's reasoning regarding the notice issue distinguished between new hearings and the "continuation" hearings occurring on October 6, 2011 and October 24, 2011, and concluded that a separate notice is not required in the latter context. The court mostly emphasized the impracticality of Ahuja's position, and suggested that adopting **[*53]** Ahuja's construction of the governing charter provisions might make it impossible for the Board to comply with the statutory timing requirements set forth in *General Statutes §8-7d(a)*. See Berger MOD 1/4/13, *2013 Conn. Super. LEXIS 49 at *3* & n.4.[26]

This court finds that Ahuja's legal claims regarding notice were supported by probable cause. The argument lost, and perhaps it should have lost, but it was by no means groundless. To the contrary, the text of the relevant charter provisions provided Ahuja with a solid foundation to contend that a new notice was required for *every* public hearing, "continuation" or otherwise. Section C6-40-11 of the Charter contains the basic requirement that the Board give notice of a public hearing to be held on certain types of zoning applications. Section C6-40-12 goes on to provide specifically for the situation where a matter before the Board requires more than one hearing: "If more than one public hearing is considered by the Zoning Board to be necessary or advisable, *additional hearings may be held upon due notice, as herein above set forth* . . ." (emphasis added). Ahuja's argument—that the literal text of §C6-40-12 requires notice of any and all "additional hearing[s]" held in connection with an application—posits **[*54]** a very plausible construction of the charter provision. The text of §C6-40-12 does not limit its application to "new" or "separate" hearings, or otherwise create a category of "continuation" hearings exempt from the notice requirement. The provision's literal terms would seem to include *any* "additional" hearing, and its context would appear to contemplate precisely the situation confronted in connection with the Second Application, when the first public hearing was insufficient to complete the Board's full consideration of the zoning matter at issue.

Judge Berger's decision rests on his unstated but clearly discernible view that it would be unworkable to read the charter provision literally to require a newly published notice every time a zoning hearing is continued. See Berger MOD 1/4/13, *2013 Conn. Super. LEXIS 49 at *6* & n.4. The court's construction to avoid such a result is proper, of course, see *Town of Wallingford v. Werbiski, 274 Conn. 483, 491-92, 877 A.2d 749 (2005)*; *State v. Brown, 242 Conn. 389, 402-04, 699 A.2d 943 (1997)*—at the end of the day, practical considerations may require the literal

[26] Procurement also argues that Ahuja's notice argument was meritless because she had actual notice of the hearings at issue and her son appeared at the hearings on her behalf, thereby waiving any right to claim defective notice. See Pl. Br. at 7-8. Judge Berger noted this point in a footnote to his decision, see Berger MOD 1/4/13, *2013 Conn. Super. LEXIS 49 at *3 n.7*, but did not rest his decision on a finding of waiver. Moreover, "failure to give newspaper notice [to the general public] is a subject matter jurisdictional defect," and cannot be waived. *Lauer v. Zoning Commission, 220 Conn. 455, 461-62, 600 A.2d 310 (1991)*. Whether or not Procurement's "actual notice"/waiver argument would ultimately prevail, it certainly does not render Ahuja's appeal frivolous. Nothing in Judge Berger's MOD suggests otherwise.

terms of a statute or ordinance to yield to practical necessity. But under our rules of construction, which accord strong preference to the literal meaning of the text, no one fairly can say that Ahuja's literal reading of the text was unreasonable. **[*55]** At worst, Ahuja's argument proved unworkable for logistical reasons. Again it should be pointed out that the trial court's MOD never suggested that Ahuja's argument was frivolous or unreasonable.

The Third Application

The Third Application was submitted by Procurement to modify certain conditions that the Board had placed on the development project in its previous decisions. These modifications, among other things, sought to increase the number of units approved to nineteen units; increase the amount of available parking by three additional spaces; open an entrance exit on Bradley Place without the obligation to install a traffic signal; and change the form of ownership from condominiums to apartments. It is clear from the record of the underlying administrative proceeding, which this court has reviewed,[27] that there was some amount of neighborhood opposition to the Third Application. The thrust of this opposition was that the conditions attached by the Board to its prior approval of the Project in December 2011 (as part of the Second Application) was based on a compromise reached by Procurement with opponents of the Project; the neighbors claimed that Procurement's Third Application reneged **[*56]** on important components of that prior agreement by seeking modifications that would, among other things, increase the number of residential units from seventeen to nineteen and change the form of residential ownership from condominium to rental units. See Board Meeting Minutes 11/10/14, at pp. 4-5.

In a 4-1 split decision, the Board voted to approve the Third Application on November 17, 2014, effective November 21, 2014. It appears from the court's review of the Return of Record that the majority failed to provide any reasons for its approval. See Board Meeting Minutes 11/17/14, at 9. The record reveals only that during the Board's brief deliberations, Stamford's Associate Planner read aloud to the Board from the text of Condition #2 to the Board's prior approval of the special exception (Second Application) dated 12/12/11. *Id.* Condition 2 stated that the Project's "residential development shall be limited to a total of seventeen units to be in condominium form of ownership." The meeting minutes reflect that the Board members were polled, and the majority indicated that they "were okay with adding the two additional units." *Id.* The Board did not explain why **[*57]** the modification was "okay."

Ahuja appealed the Board's decision to the superior court by complaint dated December 2, 2014, with a return date January 6, 2015. The appeal claimed, among other things, that there was not "substantial evidence" in the record to support the Board's approval of the special exception under §19-3.2 of the Stamford Zoning Regulations. Procurement moved to dismiss the appeal on the ground that it was not returned to court within the time required by *General Statutes §52-46a*.[28] The motion to dismiss was granted on July 6, 2015. No appeal was taken from that disposition.

The court finds that Ahuja had probable cause to appeal from the Third Application, because her legal claims in that appeal were objectively reasonable as a matter of law under the first step of the *Professional Real Estate Investors/Zeller* analysis. Any appeal of this nature faces an uphill battle under the "substantial evidence" standard. But appeals of this type, many with far less substance, are standard fare in Connecticut courts, and it is this court's considered view is that Ahuja's appeal, although probably not a winner, showed above-average merit. A reasonable litigant in Ahuja's position realistically may have expected **[*58]** success on the merits of her appeal from the Third Application.

Procurement's application sought modifications to the conditions that had been attached to the earlier approval of the proposal to develop the subject property. The Project, as modified, consisted of two buildings housing nineteen residential units, eighty-five parking spaces, and construction and operation of a large day-care center. The issue before the Board was whether the application met the standards set forth in §19-3.2 of the Stamford Zoning Regulations. Plaintiff argues, without any elaboration or specificity, that summary judgment cannot be granted in Ahuja's favor because there was "substantial evidence" to support the Board's decision to grant the special

[27] See *Ahuja v. Zoning Board et al.*, No. FST-15-6024272, Return of Record (Entries 41-#106.00-109).

[28] The complaint was not returned to court until January 4, 2015.

exception. See Pl. Br. at 10, 19. The issue is not so simple. While the "substantial evidence" rule certainly weighs in favor of upholding the Board's decision, and prohibits a court from substituting its judgment for that of the Board, the standard of review is not toothless. See *Martland v. Zoning Comm'n, 114 Conn.App. 655, 663, 971 A.2d 53 (2009)* ("The evidence supporting the decision of a zoning board must be substantial . . . The corollary to this rule is that absent substantial evidence in the record, a court may not affirm the **[*59]** decision of the board"). Indeed, as Procurement itself learned when it prevailed in its own appeal from the Board's denial of the First Application, the "substantial evidence" standard hardly spells automatic defeat for the plaintiff in zoning appeals. See Berger MOD 2/14/14. To be sure, it is probably more difficult to obtain reversal of the approval of a special exception than to successfully challenge the denial of a special exception. Ultimately each case will rise or fall on its own merits. See generally 9A Robert A. Fuller, *Connecticut Land Use Law and Practice* §33.4 (Special Permits and Special Exceptions) (4th ed. 2015). But this court's extensive review of cases in this area leads it to conclude that Ahuja had probable cause to appeal from the Board's approval of the Third Application.

We do not know what a reviewing court would have done on this particular appeal because the case was dismissed on procedural grounds.[29] But this court's review of the underlying record leads to the firm conviction that a court considering the merits reasonably might have concluded that substantial evidence did not support the Board's decision to grant the special exception sought in the Third Application. **[*60]** It is unlikely, but a reversal might have been obtained based upon a court's view of the evidence in light of the five relevant categories to be taken into account under §19-3.2 of the Stamford Zoning Regulations. More likely is the possibility that a superior court would have been particularly concerned that the Board originally saw fit, in December 2011, to place express conditions on its approval of the special exception by allowing a maximum of seventeen residential units, but then, in 2014, changed that limitation to permit the developer to increase the number of units to nineteen without justifying the modification, and without explaining what circumstance leading to the original limitation had changed.[30]

A reviewing court's concern in this regard might have been magnified by the suggestion in the record, voiced by more than a few neighbors, that Procurement's Third Application sought modifications to conditions that previously had been agreed upon as part of a compromise deal. Whatever the ultimate *legal* significance of this allegation, at the very least it provides the appeal with sufficient equitable traction to get a court's attention. In any event, the issue here is not who ultimately **[*61]** would have prevailed on appeal; it is whether an objective litigant would consider the appeal to have had any realistic chance of success. The answer is yes.

Procurement also argues that summary judgment cannot be granted because Ahuja has failed to submit an affidavit or other evidence rebutting allegations of wrongdoing contained in paragraphs 10, 29, and 30 of the complaint. Procurement focuses in particular on paragraph 29, which alleges in pertinent part that "counsel representing the Defendants indicated that his clients were aware that they could only succeed at delaying the Project and did not have any chance for succeeding on the merits of the underlying appeals . . ." See Pl. Br. at 5-6, 14; Pl. Supplemental Br. at 6. Procurement's argument relies for legal support on a fragmentary quotation from a Supreme Court case stating that "the nonmoving party may rest on mere allegations or denials contained in [its] pleadings" to defeat summary judgment when a moving party fails to show that there are no genuine issues of material fact. Pl. Br. at 14 (quoting *Romprey v. Safeco Ins. Co., 310 Conn. 304, 320-21, 77 A.3d 726 (2013))*.

This argument misapprehends governing summary judgment doctrine. The general rule is the opposite of that promoted by Procurement: **[*62]** the non-moving party may not rely on the mere allegations contained in its pleadings to defeat summary judgment:

> We have repeatedly held that "(i)n order to oppose successfully a motion for summary judgment, the opposing party must recite facts in accordance with Practice Book §300 (now §381) which contradict those offered by the

---

[29] No claim is made that Ahuja's procedural default, which resulted from her late return of process to court, itself established a lack of probable cause.

[30] It is not clear what evidence in 2014 suddenly made the Board majority "okay" with a 10% increase in a maximum set just a few years before. There may be an answer to this question, of course, but the Board did not identify it, and plaintiff's brief to this court does not identify it.

> moving party." *Dorazio v. M.B. Foster Electric Co., 157 Conn. 226, 229, 253 A.2d 22 (1968)*; *McColl v. Pataky, 160 Conn. 457, 460, 280 A.2d 146 (1971)*; *Dowling v. Kielak, 160 Conn. 14, 17, 273 A.2d 716 (1970)*; *Loubet v. Loubet, 155 Conn. 695, 696, 230 A.2d 552 (1967)*; see also *James & Hazard, Civil Procedure* (2d Ed. 1977) pp. 149-50. A party seeking to resist summary judgment may not rely on underlying pleadings containing only general denials, or upon the pleadings of someone not a party to the motion for summary judgment to establish the existence of a "genuine issue" as to a material fact. *Plouffe v. New York, N.H. & H.R. Co., 160 Conn. 482, 490, 280 A.2d 359 (1971)*; *United Oil Co. v. Urban Redevelopment Commission, 158 Conn. 364, 378-79, 260 A.2d 596 (1969)*; see also *Boyce v. Merchants Fire Insurance Co., 204 F.Sup. 311, 314 (D.Conn. 1962)*, aff'd, per curiam, *308 F.2d 806 (2d Cir. 1962)*.

Citizens Nat. Bank v. Hubney, 182 Conn. 310, 312-13, 438 A.2d 430 (1980); accord *Squeo v. Norwalk Hosp. Ass'n, 316 Conn. 558, 597-98, 113 A.3d 932 (2015)* ("Accordingly, they could not continue to rely on their pleadings to defeat the defendants' motion for summary judgment but, instead, were obliged to submit affidavits or other documentary evidence in support of their claims. See *Practice Book §17-45*. This they failed to do").

It appears that Procurement intends to invoke the exception to this general rule, which applies in circumstances where the moving party has failed to meet its threshold burden to negate each claim set forth in the complaint—or, in a motion **[*63]** seeking summary judgment on the moving party's special defense, as here, to establish an evidentiary basis supporting the defense. The exception is usually explained as follows:

> An important exception exists, however, to the general rule that a party opposing summary judgment must provide evidentiary support for its opposition, and that exception has been articulated in our jurisprudence with less frequency than has the general rule. On a motion by [the] defendant for summary judgment, the burden is on [the] defendant to negate each claim as framed by the complaint . . . It necessarily follows that it is only [o]nce [the] defendant's burden in establishing his entitlement to summary judgment is met [that] the burden shifts to [the] plaintiff to show that a genuine issue of fact exists justifying a trial . . . Accordingly, [w]hen documents submitted in support of a motion for summary judgment fail to establish that there is no genuine issue of material fact, the nonmoving party has no obligation to submit documents establishing the existence of such an issue.

Rockwell v. Quintner, 96 Conn.App. 221, 227-30, 899 A.2d 738 (citations and internal quotation marks omitted), cert. denied, *280 Conn. 917, 908 A.2d 538 (2006)*; see *Squeo, supra, 316 Conn. at 594-96*.
