HN3[] **Constitutional Law, Supremacy Clause**

The filed rate doctrine, in the electricity context, results from the Federal Energy Regulatory Commission's (FERC) responsibility for setting and ensuring compliance with just and reasonable rates of wholesale electricity sale and transmission. The filed rate doctrine arises from the sum of these concepts, and holds that electricity generators who file their rates with FERC, as they are required to do by law, are insulated from lawsuits challenging those rates and from court orders having the effect of imposing a rate other than that filed with FERC. Because the filed rate doctrine is a product of federal regulatory jurisdiction staked out in the Federal Power Act, judicial enforcement of the filed rate doctrine is a matter of enforcing the *Supremacy Clause*.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > Authorities & Powers

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

HN4[] **Exemptions & Immunities, Filed Rate Doctrine**

Under the filed rate doctrine, a state must give effect to U.S. Congress' desire to give the Federal Energy Regulatory Commission (FERC) plenary authority over, interstate wholesale rates, and to ensure the states do not interfere with this authority. Moreover, courts, both state and federal, are prohibited from considering any rate other than that-filed with FERC to be the appropriate wholesale rate. As such, the filed rate doctrine prohibits a party from recovering damages measured by comparing the filed rate and the rate that might have been approved absent the conduct in issue.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Hearings & Orders > Judicial Review

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

HN5[] **Exemptions & Immunities, Filed Rate Doctrine**

The filed rate doctrine bars all claims, state and federal, that attempt to challenge a rate that a federal agency has reviewed and filed. Moreover, the United States Court of Appeals for the Ninth Circuit makes clear that the filed rate doctrine prohibits not just a state court (or a federal court applying state law) from setting a rate different from that chosen by the Federal Energy Regulatory Commission (FERC), but also from assuming a hypothetical rate different from that actually set by FERC.

HN7[] **US Federal Energy Regulatory Commission, Authorities & Powers**

As a regulatory agency, the Federal Energy Regulatory Commission has wide discretion to permit different types of tariffs.

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Hearings & Orders > Judicial Review

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

HN8[] **Hearings & Orders, Judicial Review**

Where rates are determined in a regulated market, the Federal Energy Regulatory Commission is still responsible for ensuring "just and reasonable" rates and, to that end, wholesale power rates continue to be filed and subject to agency review.

Constitutional Law > Supremacy Clause > General Overview

HN9[] **Constitutional Law, Supremacy Clause**

The Supremacy Clause, U.S. Const. art. VI, § 4, cl. 2, invalidates state laws that interfere with, or are contrary to, federal law.

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview

Constitutional Law > Supremacy Clause > General Overview

HN10[] **Federal & State Interrelationships, Federal Common Law**

In regard to a substantive preemption analysis, federal law may pre-empt state law in three different ways. First, U.S. Congress may preempt state law by so stating in express terms. Second, preemption may be inferred when federal regulation in a particular field is so pervasive as to make reasonable the inference that U.S. Congress left no room for the states to supplement it. Third, preemption may be implied when state law actually conflicts with federal law. Such a conflict arises when compliance with both federal and state regulations is a physical impossibility, or when state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of U.S. Congress.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

Energy & Utilities Law > Electric Power Industry > State Regulation > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > General Overview

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Retail Rates

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Wholesale Rates

HN11[] **Jurisdiction Over Actions, Exclusive Jurisdiction**

Federal courts hold that through the Federal Power Act (FPA), *16 U.S.C.S. § 792 et seq.*, U.S. Congress preempted states, state courts; and even federal courts from acting in areas reserved exclusively for the Federal Energy Regulatory Commission. Therefore, under the FPA, a buyer or seller of electricity may not sue in court to change the filed rate for any reason.

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview

Constitutional Law > Supremacy Clause > General Overview

HN12[] **Federal & State Interrelationships, Federal Common Law**

If the federal government occupies a field, or an identifiable portion of it, any state regulation or state court action within the same, select area is necessarily preempted. State regulation is not preempted only when it conflicts with federal law. When the federal government completely occupies a given field or an identifiable portion of it, the test of preemption is whether the matter on which the state asserts the right to act is in any way regulated by the federal government. The metaphor "occupy the field" is strongly associated with, and often taken to automatically entail, exclusive federal control.

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview

Constitutional Law > Supremacy Clause > General Overview

HN13[] **Federal & State Interrelationships, Federal Common Law**

Even if U.S. Congress has not completely occupied a field, preemption exists if enforcement of state law could stand as an obstacle to the accomplishment and execution of the full purposes and objectives of U.S. Congress.

Even if U.S. Congress has permitted concurrent regulation within a particular field, state action is preempted if it interferes with, or even potentially interferes with, federal authority.

Energy & Utilities Law > Administrative Proceedings > Preemption

Administrative Law > Separation of Powers > Primary Jurisdiction

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

Energy & Utilities Law > Administrative Proceedings > General Overview

Energy & Utilities Law > Regulators > Public Utility Commissions > Ratemaking Procedures

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > Authorities & Powers

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Civil Actions > Jurisdiction

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > General Overview

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Wholesale Rates

HN14[] **Administrative Proceedings, Preemption**

The United States Supreme Court repeatedly finds federal preemption wherever enforcement of state law would encroach on the Federal Energy Regulatory Commission's exclusive jurisdiction over wholesale interstate electricity rates.

Administrative Law > Separation of Powers > Jurisdiction

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Energy & Utilities Law > Electric Power Industry > Federal Power Act > General Overview

Administrative Law > Separation of Powers > Primary Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Energy & Utilities Law > Administrative Proceedings > General Overview

Energy & Utilities Law > Administrative Proceedings > Preemption

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > Authorities & Powers

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Civil Actions > Jurisdiction

HN15[] **Separation of Powers, Jurisdiction**

For preemption purposes, the Federal Energy Regulatory Commission's (FERC) jurisdiction need not cover the entire power industry, but rather only an "identifiable portion" of the field. FERC's exclusive jurisdiction over wholesale energy rates constitutes such an "identifiable portion" of the field.

Antitrust & Trade Law > Regulated Industries > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview

Constitutional Law > Supremacy Clause > General Overview

HN16[] **Antitrust & Trade Law, Regulated Industries**

For preemption purposes, the policy declaration that federal regulation is to extend only to those matters which are not subject to regulation by the states is one of great generality. It cannot nullify a clear and specific grant of jurisdiction, even if the particular grant seems inconsistent with the broadly expressed purpose.

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Civil Actions > Jurisdiction

Energy & Utilities Law > Administrative Proceedings > General Overview

Energy & Utilities Law > Administrative Proceedings > Preemption

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

HN17[] **Civil Actions, Jurisdiction**

The simply fact that there is an "imminent possibility" that the state regulation at issue would conflict with the Federal Energy Regulatory Commission's jurisdiction supports a finding of preemption.

Opinion

[*1074] ORDER GRANTING MOTIONS TO DISMISS

Before the Court is Defendant Powerex Corporation's to Dismiss and Motion to Strike (Ct. Rep. 3) and Defendants' Motion to Dismiss Complaint (Ct. Rec. 12). [1] A hearing was held on December 19, 2002 in San Diego, California. Plaintiffs and Defendants were present and represented by counsel.

BACKGROUND

Defendants' motions for dismissal are premised on the "filed-rate doctrine" and federal preemption principles. **[**3]** In order to resolve these legal issues; however, it is important to detail the rather complex factual context in which they arise.

A. California's Deregulated Energy Market

Plaintiff Public Utility District No. 1 of Snohomish County ("Snohomish") brings the current lawsuit seeking money damages and injunctive relief for prices charged by the Defendants, a group of energy sellers, for sales of electricity made in the deregulated California energy market in the year 2000. A proper determination of the validity of Plaintiffs claims hinges on an understanding of the nature and operation of California's deregulated energy market.

In the mid-1990s, California moved to deregulate its energy markets. *See* California Assembly Bill 1890 (AB 1890). In restructuring its energy markets, California sought to separate utilities' vertically-integrated generation, transmission, and distribution functions with a framework under which competition would be allowed in the supply of electric power. This new scheme replaced the regulation of retail rates based upon cost and reasonable rate of return with competitively determined "market-based rates." Theoretically, deregulation was supposed to **[**4]** allow the free market to set electricity prices, rather than relying on cost-based rates set through regulation.

This restructuring involved the creation of two new non-governmental corporations to coordinate the transmission and sale of electricity: the Independent System Operator ("ISO") and the California Power Exchange ("PX"); These entities were, organized under California law, but regulated by the Federal Energy Regulatory Commission ("FERC"). Pursuant to deregulation, the price of energy was no longer set by regulators, but, rather, determined through competitive auctions administered by the PX. The PX operated a continuous state-wide auction, matching bids for sale and purchase of wholesale electricity. [2] The PX matched supply bids with requirements for the delivery of electricity, as **[*1075]** expressed by demand bids from buyers. The ISO operated the electrical grid for the State of California and purchased electricity as needed to assure system reliability. If customer demand was not met by the PX, then the ISO was required to procure power to maintain the stability of the grid.

[5]** In order for the PX and ISO to become operational, FERC was required to approve certain filings by the PX and ISO. In particular, the ISO and PX filed tariffs with FERC, and FERC reviewed and approved those tariffs as an appropriate means of achieving "just and reasonable" rates before authorizing the PX and ISO markets to operate. These tariffs comprised the rules for trading in the California wholesale electricity markets. Every participant in the

---

[1] The second motion-Motion to Dismiss Complaint-is brought by a group of eight other Defendants besides Powerex.

[2] The PX is no longer operational.

market had to formally bind itself to comply with those tariffs. It is the alleged, ensuing manipulation of this new deregulated scheme that forms the basis of Plaintiffs complaint.

B. Allegations in the Complaint

Plaintiffs complaint seeks redress for alleged unfair business practices and market manipulation of the wholesale energy market by the Defendants. (Ct. Rec. 1.) More specifically, Plaintiff "alleges that defendants unlawfully manipulated the market for electric energy by fixing prices and restricting supply into the markets operated by the [PX] and the [ISO], or by engaging in other conduct for the purpose of artificially inflating the price of electricity and/or charging unlawful prices for such electricity." **[**6]** *Id.* In P 6 of its complaint, Plaintiff further alleges that it has been "forced to pay prices for electricity *in excess of rates that would have been achieved by a competitive market." Id.* (emphasis added).

Plaintiff brings a cause of action for violation of the California ***antitrust law*** ("*Cartwright Act*") and a cause of action for violation of *California's Unfair Competition Law* ("UCL"). *Id.* As to the state antitrust claim, Plaintiff alleges that Defendants "gamed" the market, which resulted in "wholesale energy being sold at prices that far exceed the price which energy would be sold in a truly competitive market." *Id.* In relation to Plaintiffs UCL claim, it alleges "defendants never filed their rates… with" the result of which "deprived the public… notice and information necessary to make informed decisions about rates." *Id.*

Of particular import to the current motion is the relief sought by Plaintiff in its complaint. Specifically, Plaintiff asks the Court to "enjoin the defendants from continuing to conduct business via the unlawful and unfair business acts or practices described herein," to order the Defendants "to disgorge" all monies wrongfully obtained, **[**7]** and to order the Defendants "to pay restitution to restore to plaintiff all funds acquired by means of any act or practice declared by this Court to be an unlawful or unfair act or practice." *Id.*

C. Ongoing FERC Proceedings

Currently, there are several cases pending before FERC regarding matters similar, if not identical, to those initiated by Plaintiff in this Court. There are pending *Section 206* proceedings at FERC filed by San Diego Gas & Electric, in which FERC is investigating whether refunds should be ordered for sales into the California wholesale energy markets. *See SDG&E v. Sellers, 92 F.E.R.C. P 61,172(2000)*. FERC is also conducting a broad investigation into whether any seller of electricity in the California wholesale markets manipulated, or "gamed," those markets. See *Fact-Finding Investigation of Potential Manipulation of Electric and Natural Gas Prices, 98 F.E.R.C. P 61,165 (2002).* Related proceedings have been brought with **[*1076]** respect to the Pacific Northwest markets. See*Puget Sound Energy v. Sellers, 96 F.E.R.C. P 63,044 (2001)*. **[**8]** Lastly, Snohomish itself has apparently filed two complaint proceedings with FERC concerning long-term power supply contracts that it executed with two suppliers. *See Nevada Power Co. and Sierra Pac. Power Co. v. Duke Energy Trading & Mktg., L.L.C., et al., 99 F.E.R.C. P 61,047(2002)* (consolidated proceedings).

Discussion

As noted, Defendants assert two related, but separate, grounds in support of their motions to dismiss Plaintiffs claims: the filed rate doctrine, and federal preemption. The validity of each of these principles as justification for dismissal is addressed, in turn, below.

I. The Filed Rate Doctrine

Defendants' motions to dismiss require the Court to consider the application of the "filed rate doctrine" to Plaintiffs state law claims. The filed rate doctrine has a long history in federal law, but here, it is being asserted in a contemporary regulatory context, which offers some new twists to its otherwise rather straightforward application. As noted above, the key feature of California's recently deregulated wholesale energy markets is the markets' reliance on "market-based rates." These rates are still subject to FERC oversight, **[**9]** but to a much lesser extent than traditional "cost-based rates." Thus, the determinant question in this case in regard to the application of the filed rate doctrine is whether the doctrine applies to the relatively new innovation of "market based rates" governing wholesale energy trading.

A. Contours of the Filed Rate Doctrine

The filed rate doctrine has its roots in the *Federal Power Act* ("FPA") itself. *See generally* *Federal Power Act*, §§ I *et seq.,* 321 as amended, *16 U.S.C.A. §§ 792 et seq.* Under the FPA, regulatory jurisdiction over electricity is divided into two components: states have regulatory authority over intrastate retail sales of electricity, and the federal government has exclusive jurisdiction over interstate, wholesale sales. Thus, in the FPA, Congress drew "a bright line easily ascertained between state and federal jurisdiction … this was done in the *Power Act* by making [FERC] jurisdiction plenary and extending to all; wholesale sales in interstate commerce except those which Congress has made explicitly subject to regulation by the States." **[**10]** *Federal Power Comm'n v. Southern California Edison Co., 376 U.S. 205, 215, 11 L. Ed. 2d 638, 84 S. Ct. 644*(1964). The "bright line" division of authority adopted by Congress precludes any attempt to inject state law into areas reserved to FERC. ***HN1***[] Where FERC has jurisdiction, that jurisdiction is exclusive. *See* *Public Utils. Comm'n of California v. FERC, 900 F.2d 269, 274(D.C. Cir. 1990)*("Here, if there be Commission jurisdiction over some component of the transaction, it is exclusive over the component.").

HN2[] *Section 824e(a) of the FPA* vests exclusive jurisdiction over interstate wholesale electricity rates and practices affecting such rates with FERC. [3] *See* *16 U.S.C. § 824e(a)*. FERC's exclusive jurisdiction extends not only to rates *per se,* but also to "any rule, regulation, practice or contract affecting such" rates. *16 U.S.C. § 824e(a)*.

[11] [*1077]** ***HN3***[] The filed rate doctrine, in the electricity context, results from FERC's responsibility for setting and ensuring compliance with just and reasonable rates of wholesale electricity sale and transmission. [4] *See* *Pacific Gas & Elec. v. Lynch, 216 F. Supp. 2d 1016, 1033(N.D. Cal. 2002)*. The filed rate doctrine arises from the sum of these concepts, and holds that electricity generators who file their rates with FERC, as they are required to do by law, are insulated from lawsuits challenging those rates and from court orders having the effect of imposing a rate other than that filed with FERC. Because the filed rate doctrine is a product of federal regulatory jurisdiction staked out in the *Federal Power Act*, judicial enforcement of the filed rate doctrine is "a matter of enforcing the *Supremacy Clause*." *Nantahala Power & Light Co. v. Thornburg, 476 U.S. 953, 963, 90 L. Ed. 2d 943, 106 S. Ct. 2349 (1986)*.

[12]** Thus, ***HN4***[] under the filed rate doctrine, "[a] State must… give effect to Congress' desire to give FERC plenary authority over, interstate wholesale rates, and to ensure the States do not interfere with this authority." *476 U.S. at 966*. Moreover, courts, both state and federal, are prohibited from considering any rate other than that-filed with FERC to be the appropriate wholesale rate. *Lynch, 216 F. Supp. 2d at 1033*. As such, "the filed rate doctrine prohibits a party from recovering damages measured by comparing the filed rate and the rate that might have been approved absent the conduct in issue." *H.J. Inc. v. Northwestern Bell Tel. Co., 954 F.2d 485, 488(8th Cir. 1992)*.

Given the exclusive jurisdiction of FERC over the PX and ISO wholesale markets, Defendants argue that Plaintiffs claims are barred because they "go to the heart of the filed rate doctrine." Defendants maintain that the Court

---

[3] *Section 824e(a)* states, in pertinent part, that FERC "shall determine the just and reasonable rate, charge, classification, rule, regulation, practice, or contract to be thereafter observed and in force, and shall fix the same by order." *See* *16 U.S.C. § 824e(a)*.

[4] Judge Walker's opinion in *Lynch* contains a comprehensive and in-depth discussion regarding the history and genesis of the filed rate doctrine.

should apply the doctrine to dismiss the Plaintiffs claims because, in order to resolve those claims, the Court would have to do precisely what the doctrine forbids, namely, set a rate different from that chosen by FERC.

[13]** The Court agrees with Defendants-the filed rate doctrine indeed bars Plaintiffs claims. As the Ninth Circuit stated in *County of Stanislaus v. Pacific Gas & Elec. Co., 114 F.3d 858, 863(9th Cir. 1997)*, ***HN5***[] "the filed rate doctrine bars all claims-state and federal-that attempt to challenge a rate that a federal agency has reviewed and filed." Moreover, the Ninth Circuit has made clear that "the filed rate doctrine [prohibits] not just a state court (or a federal court applying state law) from setting a rate different from that chosen by FERC, but also from assuming a hypothetical rate different from that actually set by FERC." *Transmission Agency of N. Cal. v. Sierra Pac. Power Co., 295 F.3d 918, 929-30(9th Cir. 2002)*.

Plaintiffs claims ask the Court to do exactly that. The allegedly improperly inflated rates paid by Plaintiff are those that resulted from the tariffs filed and approved by FERC. In its complaint, Plaintiff asserts that absent Defendants' improper conduct and anti-competitive acts, it would have paid different rates. As such, Plaintiff specifically seeks as redress the difference between the charged rates and the different, hypothetical **[**14]** rates it believes would have "been achieved in a competitive market." (Ct. Rec. 1.) Thus, in order to resolve Plaintiff's claims and provide it the damages it seeks, the Court would be expressly required to assume "a hypothetical rate different from that actually set by FERC." *Transmission, 295 F.3d at 929-30.* This, the Court cannot do. **[*1078]**

Each of the causes of action brought by Plaintiff require the Court to make this impermissible determination. As to Plaintiffs antitrust claims, Plaintiff seeks monetary compensation for "overcharges." The filed rate doctrine bars this claim because the Court would presumably have to measure the difference between the allegedly fixed wholesale price and an otherwise "just and reasonable" wholesale price. Indeed, the Ninth Circuit's decision in *County of Stanislaus* compels this conclusion. There, the plaintiff alleged that the "defendants' FERC-approved rates were the product of antitrust violations, and [sought] as damages the 'overcharge' that resulted from the fixed prices." **[**15]** *County of Stanislaus, 114 F.3d at 863*. The Ninth Circuit held, however, that such a claim was "precisely what the filed rate doctrine prohibits." *Id.*

The same result obtains concerning Plaintiff's UCL claims. Plaintiff alleges that Defendant engaged in "unlawful, fraudulent, or unfair business practices," which requires Defendants to provide "restitution to plaintiff for all funds unlawfully, unfairly or fraudulently obtained" as a result of Defendants' violations of the UCL. (Ct. Rec. 1.) Plaintiff also claims that the Court should order Defendants to "disgorge all revenues and profits acquired as a result of the unlawful business acts or practices." *Id.* Thus, to resolve this claim as well, the Court would be obliged to determine what level of disgorgement and restitution is appropriate, which, in turn, would require it to essentially determine what a "just and reasonable" rate would have been had Defendants not engaged in the alleged behavior. Such a determination, however, lies within the exclusive province of FERC, as ***HN6***[] the filed rate doctrine applies to any "state law causes of action relating to rates established by federal agencies." [5] **[**16]** *County of Stanislaus, 114 F.3d at 863*(citing Arkansas *Louisiana Gas Co. v. Hall, 453 U.S. 571, 580, 69 L. Ed. 2d 856, 101 S. Ct. 2925(1981))*.

Finally, the filed rate doctrine operates to bar the portion of Plaintiffs prayer for relief that asks the Court to order **[**17]** Defendants to "immediately cease all acts of unlawful and unfair competition and enjoin defendants from continuing to conduct business via the unlawful and unfair business acts or practices described herein."(Ct. Rec. 1.) Plaintiffs request for injunctive relief seeks to enjoin conduct subject to the tariffs filed with FERC. The FERC tariffs govern the operation of the California wholesale energy markets and, in essence, the "unlawful conduct" and "unfair business acts" that form the gravamen of Plaintiff's complaint. Issuance of the injunction

---

[5] Although not binding authority, the Court notes that in *Day v. AT&T Co., 63 Cal. App. 4th 325, 336, 74 Cal. Rptr. 2d 55(1998)*, the California Court of Appeals held, in a case involving claims brought under the UCL challenging rates that had been filed by common carriers with the Federal Communications Commission, that "[a] claim attacking rate practices made public in the filed tariff schedules asks this court in involve itself in the rate-making process, which it cannot do." Further, the court held that plaintiffs "may not seek to recover any money from respondents, whether they label their request one for *disgorgement* or otherwise." *63 Cal. App. 4th at 337* (emphasis added).

sought by Plaintiff would impose judicial oversight of all Defendants' actions, thereby effectively changing the rules established by FERC for participating in these markets. The filed rate doctrine bars this result. *See* *Town of Norwood, Mass. v. New England Power Co., 202 F.3d 408, 419(1st Cir. 2000)*(holding injunctive relief barred by filed rate doctrine because relief sought by plaintiff interfered with tariffs filed with FERC).

[*1079] B. The Filed Rate Doctrine's Application In Regard to FERC's Market Based Rates Scheme

Plaintiff attempts to avoid the determination that the filed rate doctrine **[**18]** bars its claims by attacking the doctrine's application to FERC's modern market-based rate scheme employed in California's deregulated energy market. Plaintiff maintains that the filed rate doctrine does not apply in this scenario because the doctrine only bars claims that challenge rates specifically identified by tariff. Because the filed rate doctrine supposedly is to be construed narrowly, and under a market-based rate system; FERC does not review and approve rates *before* they are charged, Plaintiff claims the filed rate doctrine has no application here. Plaintiff argues that the doctrine does not apply because the FERC filings at issue do not include all the information required in traditional cost-based or formula-based rate filings. In any event, Plaintiff also maintains that the doctrine is inapplicable because Defendants obtained waivers of the FERC filing requirements. As the following discussion reveals, however, Plaintiff's arguments are not persuasive.

As an initial matter, the Court notes that Plaintiff mischaracterizes FERC oversight in the market-based rate scheme. Contrary to Plaintiffs assertions that FERC does not approve the rates charged in advance, FERC **[**19]** in actuality accomplished this review via the tariffs it approved.

HN7[] As a regulatory agency, FERC has wide discretion to permit different types of tariffs. *See. e.g., Farmer's Union Cent. Exch., Inc. v. FERC, 236 U.S. App. D.C. 203, 734 F.2d 1486, 1501(D.C. Cir. 1984)*("FERC is not required to adhere rigidly to a cost-based determination of rates"). As a result, in the case of wholesale electricity, FERC authorized the establishment of tariff-based market mechanisms for pricing power. Yet, the rates paid by wholesale buyers remained subject to FERC jurisdiction, and subject to FERC review. While Defendants do not file specific rates with FERC prior to selling power, they sell pursuant to the terms, conditions, and formulas established by the PX and ISO tariffs. As previously noted, FERC approved those tariffs as a means of achieving "just and reasonable" rates in advance of authorizing the PX and ISO markets to operate. As such, the filed rate doctrine applies: to bar claims challenging the rates set by FERC in a market-based rate system.

Most damning to Plaintiff's arguments is the simple fact that case law does not support its contentions that the market-based **[**20]** rate system circumvents the filed rate doctrine. This argument that the introduction of a market-based rate system skirts the reach of the filed rate doctrine-has been uniformly rejected by the courts. For instance, in *Town of Norwood,* the court rejected plaintiff's argument that "the filed rate doctrine should not apply where the 'regulated' rates have been left to the free market." *202 F.3d at 419*. Instead, the court held that ***HN8***[] where rates are determined in a regulated market, "FERC is still responsible for ensuring 'just and reasonable' rates and, to that end, wholesale power rates continue to be filed and subject to agency review."*Id.*

Even more on point is Judge Walker's opinion in *Lynch.* There, the court addressed the filed rate doctrine in the same context as presented here-in regard to the market-based rate scheme central to California's deregulated wholesale energy market. The court held "despite…the unique features of the regulatory context underlying the instant dispute, the court finds that the filed rate doctrine applies here in much the same way as it does under a cost-of-service regime." **[**21]** *Lynch, 216 F. Supp. 2d at 1038*. Likewise, in ***[*1080]*** *Campbell v. San Diego Gas & Electric Co., 2001 U.S Dist. LEXIS 24297, 2001 WL 1860381(E.D. Wash. 2001)*, this Court plainly rejected the contention that the filed rate doctrine does not apply to market-based rates.

As a result, Plaintiff's additional assertion that the filed rate doctrine does not apply because the FERC filings do not include all the information required in cost-based or formula-based rate filings must be rejected. With market-based rates, FERC assures "just and reasonable" rates through a market analysis, which necessitates independent filing requirements for the market-based tariff system. *Nothing in the Federal Power Act* supports the assumption that because certain elements are necessary in a cost-based or formula-based rate tariff, they must also be found in the market-based system. As noted by Judge Walker in *Lynch,* "passing fashions in regulatory schemes of the day cannot rework the structure of the regulation established by Congress in the FPA." **[**22]** 216 F. Supp. 2d at l039. FERC has the authority to vary the oversight it wishes to employ depending on the type of rate used. As long as power generators file the information required by FERC, the filed rate doctrine is satisfied.

Lastly, the Court rejects Plaintiff's argument that the filed rate doctrine does not apply here because Defendants supposedly "waived" the FERC filing requirements. Rather, FERC appears to have only granted Defendants a waiver as to regulations used to determine cost-based rates under the Code of Federal Regulations. Since Defendants sold power pursuant to market-based rates, the requirements for cost-based rates were unnecessary and, thus, FERC waived them. This waiver does not jeopardize application of the filed rate doctrine here.

In sum, the filed rate doctrine protects FERC's decisions as to what constitutes a "just and reasonable" rate under a market-based rate system. Plaintiff's complaint cannot be characterized as anything but a direct attack on rates or an attack on matters underlying wholesale electricity rates, nor can the relief it requests be granted without affecting the terms, conditions, and rates for wholesale electricity. As such, the **[**23]** Court finds that the filed rate doctrine bars Plaintiff's claims.

II. Federal Preemption

The second ground for dismissal raised by Defendants rests on the doctrine of federal preemption. Defendants maintain that the relief Plaintiff seeks-monetary relief to reduce past rates, and injunctive relief to regulate future conduct in the wholesale electricity market-cannot be granted without interfering with exclusive federal authority over wholesale power transactions.

From the outset, it is important that the Court differentiate between the different types of preemption that exist under the law. Defendants base their motion on a substantive preemption analysis-forwarding both field and conflict preemption as a defense to Plaintiff's claims-and do not rely on jurisdictional preemption, as discussed by this Court previously in Hendricks v. Dynergy Power Marketing, Inc., 160 F. Supp. 2d 1155 (S.D. Cal. 2001). In *Hendricks,* the Court dealt with the question of whether Congress intended the Federal Power Act to completely occupy the field of energy production and distribution so as to convert the plaintiff's state law claims to a federal claim for purposes **[**24]** of removal jurisdiction. 160 F. Supp. 2d at 1158. That issue is distinct from the question raised here by Defendants: whether the Federal Power Act functions as a preemption *defense* to Plaintiffs substantive claims.

HN9[] "The Supremacy Clause, U.S. Const., Art. VI, cl. 2, invalidates state laws that 'interfere with, or are contrary to,' federal law." **[*1081]** Hillsborough County, Fla. v. Automated Med. Labs., Inc., 471 U.S. 707, 712, 85 L. Ed. 2d 714, 105 S. Ct. 2371 (1985) (quoting Gibbons v. Ogden, 22 U.S. (9 Wheat.) 1, 6 L. Ed. 23(1824)). Thus, **HN10**[] in regard to a substantive preemption analysis, federal law may pre-empt state law in three different ways. First, Congress may preempt state law by so stating in express terms. Jones v. Rath Packing Co., 430 U.S. 519, 525, 51 L. Ed. 2d 604, 97 S. Ct. 1305(1977). Second, preemption may be inferred when federal regulation in a particular field is "so pervasive as to make reasonable the inference that Congress left no room for the States to supplement it." **[**25]** Rice v. Santa Fe Elevator Corp., 331 U.S. 218, 230, 91 L. Ed. 1447, 67 S. Ct. 1146(1947). Third, preemption may be implied when state law actually conflicts with federal law. *Fidelity Fed. Say. & Loan Ass'n v. de la* Cuesta, 458 U.S. 141, 153, 73 L. Ed. 2d 664, 102 S. Ct. 3014(1982). Such a conflict arises when "compliance with both federal and state regulations is a physical impossibility," Florida Lime & Avocado Growers, Inc. v. Paul, 373 U.S. 132, 142-43, 10 L. Ed. 2d 248, 83 S. Ct. 1210(1963), or when state law "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress." Hines v. Davidowitz, 312 U.S. 52, 67, 85 L. Ed. 581, 61 S. Ct. 399(1941). It is the last two forms of preemption listed-field preemption and conflict preemption-that Defendants raise as grounds for dismissal here.

A. Field Preemption

Defendants maintain that field preemption operates to bar Plaintiff's claims because, through the *Federal Power Act, Congress* occupied the wholesale portion of the field of electricity rate regulation. Accordingly, Defendants assert that Plaintiff's claims **[**26]** are preempted because it seeks state judicial action within this field.

HN11[] Federal courts have held that "through the FPA, Congress preempted states, state courts; and even federal courts from acting in areas reserved exclusively for the FERC." See*Gulf States Utilities Co. v. Alabama Power Co.,* 824 F.2d l465, 1470(5th Cir. 1987). As previously discussed, the FPA gives the FERC exclusive jurisdiction over interstate wholesale electricity rates. *See* *16 U.S.C. §§ 824-824e*. The FPA permits utilities to charge only just and reasonable rates and to file their rates with the FERC. *16 U.S.C. §§ 824d(a-c)*. FERC may review the filed rates and, if it finds a rate to be unjust or unreasonable, it may fix a just and reasonable rate. *16 U.S.C. §§ 824e(a)*. Therefore, under the FPA, a buyer or seller of electricity may not sue in court to change the filed rate for any reason. *See e.g.,* *Montana-Dakota Utilities Co. v. Northwestern Pub. Serv. Co., 341 U.S. 246, 250, 95 L. Ed. 912, 71 S. Ct. 692:(1951)*(under "filed rate doctrine," court may neither adjudicate whether rate is reasonable nor replace filed rate **[**27]** with more reasonable one).

HN12[] If the federal government occupies a field, or an identifiable portion of it, any state regulation or state court action within the same, select area is necessarily preempted. The Supreme Court made this point clear in *Pacific Gas & Elec. Co. v. State Energy Resources Conservation & Dev. Comm.,* stating:

> State … regulation is not preempted only when it conflicts with federal law…. When the federal government completely occupies a given field or *an identiflable portion of it,* as it has done here, the test of preemption is whether "the matter on which the state asserts the right to act is in any way regulated by the federal government."

461 U.S. 190, 212-213, 75 L. Ed. 2d 752, 103 S. Ct. 1713(1983)(quoting *Rice v. Santa Fe Elevator Corp., 331 U.S. 218, 236,* ***[*1082]*** *67 S. Ct. 1146(1947, 91 L. Ed. 1447),* (emphasis added). The metaphor "occupy the field" is strongly associated with, and often taken to automatically entail, exclusive federal control. *See* **[**28]** *Public Util. Comm'n of Cal. v. FERC, 283 U.S. App. D.C. 285, 900 F.2d 269, 274(D.C. Cir. 1990)*.

Consequently, the fact that FERC maintains exclusive jurisdiction over interstate wholesale electricity rates indicates Plaintiffs state law claims are barred under the doctrine of field preemption. The only authority granted to the states under the FPA is over intrastate retail electricity sales. Because FERC retains "exclusive jurisdiction" over the regulation of interstate wholesale energy rates, under the "bright line" division of authority contained in the FPA; federal law occupies "an identifiable portion" of the regulated electricity field. Thus, to the extent that state regulation or court action would operate within the exclusive federal 'domain of wholesale energy rates, it is preempted. *Cf* *id.*

Yet, Plaintiff's claims impermissibly seek to act within this field by asking the Court to award damages, restitution, disgorgement, or the like, in order to compensate Plaintiff for the difference between the wholesale rate it paid and what the Court determines to be a reasonable rate. This would equate to direct regulation of interstate wholesale electricity **[**29]** rates, which is preempted by the FPA.

B. Conflict Preemption

HN13[] Even if Congress has not completely occupied a field, preemption exists if enforcement of state law could "stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress." *Schneidewind v. ANR Pipeline Co., 485 U.S. 293, 298, 99 L. Ed. 2d 316, 108 S. Ct. 1145(1988)*. Even if Congress has permitted concurrent regulation within a particular field, state action is preempted if it interferes with, or even potentially interferes with, federal authority. *See* *485 U.S. at 310*("When a state regulation presents the 'prospect of interference with the federal regulatory power,' then the state law may be pre-empted even though 'collision between the state and federal regulation may not be an inevitable consequence.'")(internal citations omitted). Not surprisingly, then, ***HN14***[] the Supreme Court has repeatedly found federal preemption wherever enforcement of state law would encroach on FERC's exclusive jurisdiction over wholesale interstate electricity rates. *See, e.g.,*

[30]** *Mississippi Power & Light v. Mississippi, 487 U.S. 354, 371, 101 L. Ed. 2d 322, 108 S. Ct. 2428(1988)*(holding state proceedings affecting interstate rates were preempted because "FERC has exclusive authority to determine the reasonableness of wholesale rates.")

Additionally, the Ninth Circuit has found preemption in circumstances similar to those present in this case. In *Duke Energy Trading and Marketing, L.L.C. v. Davis, 267 F.3d 1042(9th Cir. 2001)*; the Ninth Circuit dealt specifically with California's deregulated energy markets. In *Davis,* the Ninth Circuit held that executive orders issued by Governor Gray Davis under the *California Emergency Services Act* that commandeered contracts in the PX block forward market were preempted because they directly affected the terms and conditions of wholesale power sales governed by FERC. *267 F.3d at 1057-58*.

In *Transmission Agency of Northern California v. Sierra Pac. Power Co., 295 F.3d 918, 929(9th Cir. 2002)*, the Ninth Circuit found that plaintiff's tort and property claims impermissibly interfered with FERC's exclusive jurisdiction over the transmission and sale **[**31]** of wholesale electric power. In *Transmission,* plaintiff asserted state law tort and property claims based on its claimed right to a certain level **[*1083]** of interstate transmission capacity. The Ninth Circuit held that the state law claims were preempted, because the *Federal Power Act* "delegates to the Federal Energy Commission the *exclusive* authority to regulate the transmission and sale at wholesale of electric energy in interstate commerce." *295 F.3d at 928*(emphasis in original).

Similarly, it is clear that here Plaintiff's state law claims that seek repayment of wholesale rates found to be excessive under state law standards would inevitably conflict with FERC's exclusive jurisdiction to determine interstate wholesale rates. The Court would impermissibly interfere with FERC's rate-making authority if it refunds wholesale rates in this action, because in doing so the Court would essentially have to determine what constitutes "just and reasonable" rates. This conclusion is bolstered by the very fact that the same wholesale rates and rate-related practices that Plaintiff attacks here are the subject of several ongoing matters currently proceeding before **[**32]** FERC. Thus, it is difficult to escape the conclusion that any additional or different relief ordered by this Court would necessarily obstruct and frustrate FERC's proper regulatory effort.

C. Plaintiff's Arguments Against Finding Preemption

Plaintiff offers three core arguments supporting its view that its claims are not subject to federal preemption. First, Plaintiff argues that the FPA merely fills gaps in state regulation and therefore cannot preempt its claims. Second, Plaintiff contends that preemption is inapplicable because the FPA allegedly does not preempt antitrust laws. Lastly, Plaintiff asserts that there can be no conflict preemption because conflict preemption requires an "actual" conflict with an agency ruling, as opposed to a "potential future" conflict.

As to Plaintiff's first argument, it contends that Congress limited FERC's jurisdiction to those select areas not subject to existing state regulation, and thus, judicial "conduct" that may incidentally impact rates is not preempted by FERC's jurisdiction. It argues that because utility companies were subject to California antitrust and UCL regulation at the time the FPA was enacted, California retains jurisdiction **[**33]** as to these claims.

Plaintiff's argument, however, ignores the simple fact that the *Federal Power Act* granted FERC exclusive jurisdiction over the "field" at issue here-interstate wholesale energy rates. ***HN15***[] FERC's jurisdiction need not cover the entire power industry, but rather only an "identifiable portion" of the field. *See Pacific Gas & Elec. Co. v. State Energy Resources Conservation & Dev. Comm'n, 461 U.S. 190, 212-213*. FERC's exclusive jurisdiction over wholesale energy rates constitutes such an "identifiable portion" of the field. Moreover, the D.C. Circuit has rejected an argument similar to Plaintiff's, stating "we must correct California's assumption that FERC's and its jurisdiction are *concurrent*… here if there be [FERC] jurisdiction over some component of the transaction, it is exclusive over that component." *See Public Util. Comm'n of State of Cal. v. F.E.R.C., 283 U.S. App. D.C. 285, 900 F.2d 269, 274 (D.C. Cir. 1990)* (emphasis added). [6] **[**35]** Thus, Plaintiff's claim that state **[*1084]** law can be preempted only if

---

[6] In regard to its first argument, Plaintiff also points out that the FPA contains a policy declaration that federal regulation of the transmission and sale of electric energy was "to extend only to those matters which are not subject to regulation by the States."

the specific purpose of a state statute is to regulate in an area reserved to FERC is plainly wrong. **[**34]** The Ninth Circuit's decision in *Duke Energy* makes this point clear. As noted, *Duke Energy* concerned the California Governor's attempt to use his power under the *California Emergency Service Act to* commandeer property associated with the power industry. *See* *267 F.3d at 1047*. *Obviously the California Emergency Power Act* is hardly a statute whose central purpose is to regulate matters Congress intended FERC to regulate, yet the Ninth Circuit still held that the Governor could not use his emergency powers; in a manner that would affect the terms and conditions of wholesale power sales governed by FERC. *267 F.3d at 1057-58*. [7]

Plaintiff's second argument is that the *Federal Power Act* does not preempt antitrust claims. In this regard, Plaintiff notes that Congress preserved application of antitrust laws by adopting a savings clause stating that the EPA, as amended by the *Energy Policy Act,* "shall not be construed to modify, impair, or supercede the antitrust laws." *16 U.S.C. § 824k(e)(2)*. Plaintiff also argues that under the Supreme Court's **[**36]** decision in *Otter Tail Power Co. v. United States, 410 U.S. 366, 373-74, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)*, and its progeny, Defendants are not entitled to antitrust immunity and, as such, Plaintiff's antitrust claims are not preempted.

Plaintiff's argument concerning the savings clause contained in *16 U.S.C. § 824k(e)(2)* is a red herring. The savings clause only "saves" a role for federal antitrust laws in connection with certain sections of the EPA. *See* *16 U.S.C. § 824k(e)(2)*(applying clause to *sections 824i, 824j, 824l, and 824m*). *Section 824d*, which deals with interstate wholesale electricity rates; is *not* covered by the savings clause.

Plaintiff's reliance on *Otter Tail;* and its progeny, also is misplaced. In *Otter Tail,* the Department of Justice alleged that Otter Tail had "monopolized" in *Violation of the Sherman Antitrust Act* by refusing to "interconnect" and "wheel" power from other wholesalers to new municipal utilities where Otter Tail had been retailing power. **[**37]** *410 U.S. at 368*. At the time, the FPA did not grant the Federal Power Commission (FERC's predecessor) exclusive jurisdiction over the interconnection and wheeling of power issues. The FPC only had "limited authority" to order interconnections and no authority to order wheeling. *See* *id. at 375*. Ottertail argued that its refusals to deal were not subject to federal anti-trust laws. *Id. at 373*. The Court disagreed, noting that there was no pervasive regulatory scheme and, thus, "courts must be hesitant to conclude that Congress intended to override the fundamental national policies embodied in the antitrust laws." *Id. at 374*.

[*1085] *Otter Tail,* thus, relates to a different issue-antitrust immunity-that has little, if any, relation to the case at bar. The issue here is not whether Defendants are entitled to federal antitrust immunity but, rather, whether the *Supremacy Clause* prevents the Plaintiff's from employing state antitrust claims in a manner that intrudes on FERC's exclusive jurisdiction over interstate wholesale electricity rates. *See* **[**38]** *Square D. Co. v. Niagara Frontier Tarif Bureau, 476 U.S. 409, 422, 90 L. Ed. 2d 413, 106 S. Ct. 1922(1986)*(discussing distinction between antitrust immunity and preemption, stating "we disagree…with petitioners' view that the issue in *Keogh* and in this case is properly characterized as an "immunity" question. *Keogh* simply held that an award of treble damages is not an available remedy for a private shipper claiming that the rate submitted to, and approved by, the ICC was the product of an antitrust violation."). Preemption is a function of the *Supremacy Clause*, and controls the interaction between state and federal laws. *Otter Tail* addressed only the interaction of two federal laws-the *EPA and Sherman*

---

16 U.S.C. § 824(a). Plaintiff claims that California antitrust and unfair competition regulation of utilities were areas of state regulation contemplated by the policy declaration. The Supreme Court has rejected this contention, however, stating: ***HN16***[] "the policy declaration that federal regulation is 'to extend only to those matters which are not subject to regulation by the States' is one of great generality. It cannot nullify a clear and specific grant of jurisdiction, even if the particular grant seems inconsistent with the broadly expressed purpose." *Connecticut Light & Power Co. v. Federal Power Comm'n, 324 U.S. 515, 527, 89 L. Ed. 1150, 65 S. Ct. 749 (1945)*.

[7] The Supreme Court's decision in *Schneidewind* also dispels Plaintiff's argument that the relief it requests must directly regulate Wholesale rates to be preempted. There, the state statue regulating the issuance of securities did not directly regulate wholesale rates, but was nevertheless preempted because it could force gas companies to raise rates by preventing them from issuing securities. *485 U.S. at 308*("By keeping a natural gas company from raising its equity levels above a certain point, Michigan seeks to ensure that the company will charge only what Michigan considers to be a 'reasonable rate.' This is regulation of rates.").

Antitrust Act-and hence is not a preemption case. Defendants are not seeking a broad, blanket repeal of antitrust laws in their motion to dismiss, but rather seek a narrower determination of whether Plaintiff's antitrust claim (and its UCL claim) in this particular action improperly intrude upon Congress's treatment of wholesale electricity rates and conduct. [8] Thus, while as a general proposition it may be true that electric utilities subject to FERC **[**39]** jurisdiction may not enjoy antitrust immunity, it does not imply that Plaintiff may nonetheless invade FERC's jurisdiction by employing a private, state-law antitrust remedy that changes FERC-regulated interstate wholesale electricity rates.

Lastly, Plaintiff's contention that preemption requires an "actual" rather than "potential" conflict also lacks merit. To begin with, Supreme Court precedent holds otherwise. In *Schneidewind,* the Supreme Court held that ***HN17***[] the simply fact that there was an "imminent possibility" that the state regulation at issue would conflict with FERC jurisdiction supported a finding of preemption. **[**40]** *See* *485 U.S. at 310*. Likewise, in *Mississippi Power & Light,* the Court held that the Mississippi Supreme Court "erred in adopting the view that the pre-emptive effect of FERC jurisdiction turned on whether a particular matter was *actually determined* in the FERC proceedings." *487 U.S. at 373* (emphasis added).

More importantly; it is difficult to characterize this case as only presenting a "potential" conflict, as FERC is currently conducting proceedings directly related to the issues in front of this Court. FERC appears, to be in the process of making changes to the tariff rules and is investigating whether the operation of the tariffs, contracts, *etc.,* of the ISO and PX adversely affected the wholesale power markets in California. Thus, both the monetary and injunctive relief Plaintiff seeks here present direct and specific conflicts with FERC's regulatory authority.

Accordingly, **IT IS HEREBY ORDERED** that Defendant Powerex Corp.'s Motion to Dismiss and Motion to Strike (Ct. Rec. 3) and Defendants' Motion to Dismiss **[*1086]** Complaint (Ct. Rec. 12) are **GRANTED.**

IT IS SO ORDERED. The District Court Executive is hereby **[**41]** directed to enter this order and to furnish copies to counsel.

DATED this 6th day of January, 2003.

ROBERT H. WHALEY

United States District Judge

End of Document

---

[8] Plaintiff also cites several cases that followed *Otter Tail* and concluded electric utilities are not immune from federal antitrust laws. *See, e.g.* *Cantor v. Detroit Edison Co., 428 U.S. 579, 596 n.35, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)*. These cases do not deal with the issue of federal preemption of state law, however, and also have little bearing here.

HN1[] **Summary Judgment, Supporting Materials**

Under U.S. Dist. Ct., N.D. Ill., R. 56.1(a)(3), a party moving for summary judgment must submit a statement of material facts in the form of short numbered paragraphs supported by specific references to the factual record. Under U.S. Dist. Ct., N.D. Ill., R. 56.1(b)(3), two types of submissions are permitted in response to a moving party's U.S. Dist. Ct., N.D. Ill., R. 56.1 statement of facts: (1) a response to each numbered paragraph supported by references to the record, and (2) a statement of short numbered paragraphs setting forth additional facts that require denial of summary judgment, supported by citations to the record. U.S. Dist. Ct., N.D. Ill., R. 56.1(b)(3)(A)-(B).

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN2[] **Summary Judgment, Supporting Materials**

U.S. Dist. Ct., N.D. Ill., R. 56.1 serves the important function of structuring the summary judgment process so as to assist a district court by organizing the evidence, identifying undisputed facts, and demonstrating precisely how each side proposes to prove a disputed fact with material evidence. By filing an unauthorized alternative statement of facts, a party's counsel seriously hinders the court's ability to perform its task of identifying those facts actually in dispute.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Supporting Materials > Discovery Materials

HN6[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate where the pleadings, depositions, answers to interrogatories, and admissions on file, together with affidavits, if any, show that there is no genuine issue as to any material fact and that a moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. A district court must review the record in the light most favorable to a nonmoving party and draw all reasonable inferences in that party's favor. Nevertheless, the party who bears the burden of proof on an issue may not rest on the pleadings, but must affirmatively demonstrate that there is a genuine issue of material fact that requires trial. While a district court may not resolve genuine factual disputes through summary judgment, weak factual claims can be weeded out through summary judgment motions. Summary judgment may be especially appropriate in the antitrust context because of the chill antitrust litigation can have on legitimate competition. For this reason, an antitrust plaintiff opposing a motion for summary judgment must present evidence that tends to exclude the possibility that the defendant's conduct was as consistent with competition as with illegal conduct.

Antitrust & Trade Law > Sherman Act > Claims

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > Output, Exclusive & Requirements Agreements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Sherman Act, Claims**

A successful claim under § 1 of the Sherman Act requires proof of three elements: (1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in the relevant market; and (3) an accompanying injury. There are two standards for evaluating whether an alleged restraint of trade is unreasonable: the per se rule and the Rule of Reason. The per se rule is invoked when surrounding circumstances and/or the nature of the agreements makes the probability that the practices are anticompetitive so high, further inquiry into the particular market context is unnecessary.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Memoranda in Opposition

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN8[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

A plaintiff may not amend its complaint through arguments in its brief in opposition to a motion for summary judgment. There must be evidence in the record from which a jury can reasonably find that there exists a conscious commitment to a common scheme designed to achieve an unlawful objective.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > Output, Exclusive & Requirements Agreements

HN9[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

In the context of an alleged horizontal agreement, a plaintiff must adduce either direct or circumstantial evidence reveling a unity of purpose or a common design and understanding.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10[] **Per Se Rule & Rule of Reason, Sherman Act**

Because an antitrust policy divorced from market considerations will lack any objective benchmarks, analysis of claims of monopolization under § 2 of the Sherman Act, as well as § 1 of the Sherman Act claims analyzed under the Rule of Reason, requires the trier of fact to begin by delineating the relevant market. A relevant market is comprised of those commodities reasonably interchangeable by consumers for the same purposes. Because a plaintiff always bears the burden of proving relevant market, to survive summary judgment on its antitrust claims, the plaintiff must offer admissible evidence that is sufficient for a jury to find that the proposed relevant market is accurate.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

It is not required that products be completely fungible to be considered part of the same relevant market under the Sherman Act, only that they are reasonably interchangeable by consumers for the same purposes.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN12[] **Regulated Practices, Market Definition**

When an expert's opinion regarding the relevant market is not supported by sufficient facts, or when the record contradicts or renders the opinion unreasonable, it cannot support a jury's verdict.

Opinion

[*1027] **MEMORANDUM OPINION AND ORDER**

Plaintiff Menasha Corporation ("Menasha") brought this action alleging that Defendants News America Marketing In-Store, Inc. and News America Marketing In-Store Services, Inc. (collectively referred to as "News America") violated federal and state antitrust laws by entering into exclusive contracts with retail chains for the placement of at-shelf coupon dispensers and by exercising its monopoly power in the market for at-shelf coupon dispensers to foreclose competition. Now before the Court are News America's Motion for Summary Judgment, Motion In Limine to Exclude the Report and Testimony of James Tenser and the Opinions of Dr. James Langenfeld **[**3]** That Rely on Tenser's Survey Research, Motion to Strike Menasha's Responses to Defendants' Local Rule 56.1 Statement of Facts, and Motion to Strike Menasha's Statement of Facts under Local Rule 56.1. Also, before the Court is Menasha's Motion In Limine to Exclude the Relevant Market Opinions of Drs. Rapp and Stiroh.

BACKGROUND

Manufacturers of packaged goods rely on a variety of mediums to advertise and promote their products to consumers. One of the methods manufacturers sometimes choose to promote their products is the placement of a coupon dispenser next to the product on retail store shelves (referred to as "at-shelf coupon dispensers"). An at-shelf coupon dispenser is not the only method of placing coupons in proximity to product, other methods include "on-pack coupons" attached directly to the product, "tear pad coupons" affixed to the shelf near the product, and in-store demonstrations, at which demonstrators distribute coupons to consumers along with samples of the product. In addition, manufactures may choose from a variety of other in-store marketing vehicles to target consumers - shopping cart ads, shelf signs, manufacturers' displays, and supermarket flyers **[**4]** to name a few. Menasha and News America are both in the business of selling such in-store marketing products to manufacturers of packaged goods.

At issue in this case is one particular in-store marketing product: at-shelf coupon dispensers. News America sells an at-shelf coupon dispenser consisting of a reusable plastic container with a blinking red light that contains manufacturers' coupons for consumer packaged goods. News America sells at-shelf coupon dispensers directly to manufacturers, typically guaranteeing placement in particular retail chains. News America also offers manufacturers the guarantee of "category exclusivity," meaning that the manufacturer is assured that no other at-shelf coupon dispenser in a specific product category will be placed in particular retail stores during an agreed-upon period. News America is able to guarantee category exclusivity to manufacturers by entering into multi-year contracts with retail chains under which News America is granted the exclusive right to place at-shelf coupon dispensers in the chain's stores. In exchange, News America offers the retailers a percentage of the revenues News America derives from the sale of at-shelf coupon dispensers **[**5]** **[*1028]** to manufactures for placement in that chain's stores.

Menasha sells manufacturers a disposable at-shelf coupon dispenser made of paper. However, adhering to a different business model from that of News America, Menasha does not promise manufacturers category exclusivity, nor does Menasha offer to enter into revenue sharing agreements with retail chains in exchange for exclusive access to their store. In recent years, News America has enjoyed great success in expanding its business in at-shelf coupon dispensers, while Menasha's expectations for the growth of its at-shelf coupon business have not been fulfilled.

Menasha believes that News America has violated federal and state antitrust laws by entering into exclusive contracts with retail chains for the placement of at-shelf coupon dispensers. Menasha also contends that News America exercises monopoly power in the market for at-shelf coupon dispensers, and that News America has used its market power to foreclose competition. Accordingly, Menasha brought the present action alleging unreasonable restraint of trade in violation of Section 1 of the Sherman Act (Counts I and II), monopolization and attempted monopolization in violation **[**6]** of Section 2 of the Sherman Act (Counts III and IV), monopolization and attempted monopolization in violation of the Illinois Antitrust Act (Counts V and VI), restraint of trade in violation of the Illinois Antitrust Act (Count VII), "inducing refusals to deal" in violation of the Illinois Antitrust Act (Count VIII), unfair methods of competition (Count IX), and tortious interference with business relationships (Count X). Now before the Court are News America's Motion for Summary Judgment, Motion in Limine to Exclude the Report and Testimony of James Tenser and the Opinions of Dr. James Langenfeld That Rely on Tenser's Survey Research, Motion to Strike Menasha's Responses to Defendants' Local Rule 56.1 Statement of Facts, and Motion to Strike Menasha's Statement of Facts Under Local Rule 56.1. Also, before the Court is Menasha's Motion In Limine to Exclude the Relevant Market Opinions of Drs. Rapp and Stiroh. The Court will begin by addressing the parties' motions to strike and motions in limine.

MOTIONS TO STRIKE

Menasha's Statement of Material Facts

News America requests that the Court strike in its entirety the document entitled "Menasha's Statement of Material **[**7]** Facts Under L.R. 56.1," which Menasha submitted as a response to the Statement of Material Facts accompanying News America's Motion for Summary Judgment. Menasha states that this document was "submitted in reply to [News America's] Statement *as a total replacement*." (emphasis added). But, as News America correctly points out, Local Rule 56.1 in no way authorizes a "total replacement" in response to a movant's statement of facts.

HN1[] Under Local Rule 56.1(a)(3), a party moving for summary judgment must submit a statement of material facts in the form of short numbered paragraphs supported by specific references to the factual record. News America submitted such a statement. Under Local Rule 56.1(b)(3), two types of submissions are permitted in response to a moving party's Rule 56.1 statement of facts: (1) a response to each numbered paragraph supported by references to the record, and (2) a statement of short numbered paragraphs setting forth additional facts that require denial of summary judgment, supported by citations to the record. L.R. 56.1(b)(3)(A)-(B). The "total replacement" submitted by Menasha completely disregards these requirements - it is neither a response to News **[**8]** **[*1029]** America's Statement of Material Facts nor is it a true statement of additional facts as contemplated by Local Rule 56.1.

HN2[] Local Rule 56.1 serves the important function of structuring the summary judgment process so as to "assist the court by organizing the evidence, identifying undisputed facts, and demonstrating precisely how each side propose[s] to prove a disputed fact with material evidence." *Markham v. White, 172 F.3d 486, 490 (7th Cir. 1999)*. By filing an unauthorized "alternative" statement of facts, Menasha's counsel seriously hindered the Court's ability to perform its task of identifying those facts actually in dispute. *See* *Bordelon v. Chicago School Reform Bd. of Trustees, 233 F.3d 524, 527-28 (7th Cir. 2000)*. However, as News America has already gone to the trouble of responding to this document, the Court will treat this submission a statement of additional facts. Nevertheless, in ruling on News America's Motion for Summary Judgment, the Court will disregard all argumentative, conclusory, unsupported or otherwise non-conforming portions of Menasha's "Statement of Material Facts Under L.R. 56.1."

Menasha's Response to News America's **[**9]** *Statement of Facts*

News America also requests that the Court strike Menasha's Response to News America's Rule 56.1 Statement of Facts. News America has taken great pains to meticulously detail the numerous shortcomings in Menasha's Response. News America correctly points out that Menasha's Response is replete with improper argument, general denials, responses unsupported by citations to the record, and citations to large documents with no guide as to where in the document the purported fact is to be found. Although it is within this Court's discretion to enforce Local Rule 56.1 strictly, *Bordelon, 233 F.3d at 527*, the Court declines to impose the harsh penalty of striking Menasha's Response in its entirety. Nevertheless, in reaching its ruling, the Court will disregard all argumentative, conclusory, or unsupported portions of Menasha's Response to News America's Rule 56.1 Statement of Facts.

MOTIONS IN LIMINE

News America and Menasha have filed dueling motions to exclude the other's expert opinion defining the relevant antitrust market in this case. The Court will begin with News America's Motion to Exclude the Report and Testimony of James Tenser **[**10]** and the Opinions of Dr. James Langenfeld That Rely on Tenser's Survey Research.

Report and Testimony of James Tenser and Dr. James Langenfeld

James Tenser ("Tenser") is a journalist who frequently writes on issues relating to brand marketing of consumer packaged goods. Tenser has had no formal training or education in constructing and administering surveys, but was paid by Menasha to use his industry contacts to conduct a survey of brand and promotional management decision makers regarding their views on the market for in-store promotional services. Tenser's survey results focused on the unique characteristics and benefits of at-shelf coupon dispensers as perceived by brand marketing executives. Dr. James Langenfeld ("Langenfeld") used the results of this survey, along with deposition testimony and various other sources of market data, to form his opinion **[*1030]** that at-shelf coupon dispensers form a relevant market for antitrust purposes.

News America contends that Tenser's survey research suffers from multiple methodological flaws that render it unreliable, and therefore inadmissible under *Federal Rule of Evidence 702*. News America also argues that, because Tenser's results **[**11]** are unreliable, Langenfeld's opinion that at-shelf coupon dispensers constitute the relevant market must also be barred.

HN3[] Under *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993)*, courts must act as gatekeepers to ensure that expert testimony satisfies the admissibility requirements of *Federal Rule of Evidence 702*. Reliability is the touchstone for admission of expert testimony based on scientific, technical or other specialized knowledge. *Daubert, 509 U.S. at 599*. Courts have generally found consumer survey evidence admissible under *Daubert* if a qualified expert testifies that the survey was conducted according to generally-accepted principles of survey research. *See* *Simon Property Group, L.P. v. MySimon, Inc., 104 F. Supp. 2d 1033, 1039 (S.D. Ind. 2000)*; Shari Seidman Diamond, "*Reference Guide on Survey Research," in Reference Manual on Scientific Evidence* 233 (2d ed. 2000) ("*Reference Guide*"). In conducting his survey, Tenser deviated from several important principles of survey research.

For survey results to be considered reliable, the design, administration, and interpretation **[**12]** of the survey must be appropriately controlled to ensure objectivity. For a survey to be properly designed, an appropriate target population must be identified, a sample that accurately represents the target population must be selected, and procedures must be taken to reduce the likelihood of a biased sample. *Reference Guide* at 239-46. The evidence shows that none of these standard protocols of survey research were observed by Tenser. Tenser's "universe" of potential respondents consisted entirety of individuals and companies that Tenser knew through his work as journalist. Tenser did not make any attempt to select a sample to approximate the relevant characteristics of the target population. Adding further to the unreliability of his results, Tenser breached a fundamental principle of survey research by being aware of both the sponsor of the survey and its purpose while conducting his interviews. *See Reference Guide* at 266. Finally, when conducting the interviews, Tenser made no audio recording of the interviews and did not record the responses verbatim, relying instead on handwritten notes paraphrasing the responses he received. News America points to several concrete examples **[**13]** of how this failure to record responses verbatim allowed for later transcriptions that skewed the responses to sound more favorable to Menasha's view of the relevant market. Because Tenser failed to observe numerous fundamental protocols necessary to protect the objectivity and reliability of the survey, Tenser's survey report and deposition testimony do not meet the reliability requirement of *Federal Rule of Evidence 702* and must be excluded.

News America also contends that, because the results of Tenser's survey are unreliable, the Court must also exclude the opinions of Dr. Langenfeld concerning the definition of the relevant product market in this case. News America correctly asserts that, ***HN4***[] under *Federal Rule of Evidence 703*, a party seeking admission of an expert opinion based upon a survey must demonstrate that the expert's reliance on such data is reasonable. *See* *Toys "R" Us, Inc. v. Canarsie Kiddie Shop, Inc., 559 F. Supp. 1189, 1205 (E.D.N.Y. 1983)*. Although Langenfeld refers to Tenser's survey results several times throughout his report, the Court finds that Langenfeld based his opinion that at-shelf coupon dispensers are the relevant antitrust market in **[**14]** this case on numerous sources of information independent of Tenser's flawed survey. Accordingly, the Court will not grant News America's motion fully and exclude Langenfeld's **[*1031]** opinion in its entirety. However, because Tenser's survey has been found to be unreliable and inadmissible, those portions of the report quoting or otherwise referencing Tenser's survey are excluded pursuant to *Federal Rule of Evidence 703*.

Relevant Market Opinion of Drs. Rapp and Stiroh

Menasha argues that the relevant market opinion offered by News America's experts must be barred because the method they employed to determine the relevant market is unreliable and their analysis ignores "basic market realities." Specifically, Menasha contends that Rapp and Stiroh deviated from generally-accepted principles when they defined the relevant market for this case by simply "counting the number of times products are 'mentioned' in a hand-picked set of documents, and declaring that products 'mentioned' an unidentified number of times must be reasonable substitutes for [News America's] coupon machines." Menasha's motion would be well-taken if this was an accurate description of the methodology employed by **[**15]** Rapp and Stiroh. This description, however, inaccurately characterizes the methodology of Rapp and Stiroh in several significant aspects.

In forming their relevant market opinion, Rapp and Stiroh began their analysis with the Supreme Court's teaching that ***HN5***[] a relevant market for antitrust purposes consists of products that are "reasonably interchangeable by consumers for the same purposes." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. Following this standard, Rapp and Stiroh determined the purpose of at-shelf coupon dispensers, generated a universe of substitutes for at-shelf coupon dispensers that could theoretically serve the same purpose, and then examined various sources of market data to winnow this group of theoretical substitutes down to a relevant market containing products that are actually used by consumers of at-shelf coupon dispensers to achieve the same purpose. While Menasha may take issue with Rapp and Stiroh's characterization of the purpose of at-shelf coupon dispensers, or their analysis of how the market is perceived by industry participants, these criticisms do not undermine the essential **[**16]** reliability of the methods employed by News America's experts in reaching their opinion that the relevant market in this case cannot be limited to at-shelf coupon dispensers. Menasha's Motion in Limine to Exclude the Relevant Market Opinions of Drs. Rapp and Stiroh must therefore be DENIED.

MOTION FOR SUMMARY JUDGMENT

Standard

HN6[] Summary judgment is appropriate where "the pleadings, depositions, answers to interrogatories, and admissions on file, together with affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." *FED.R.CIV.P. 56(c)*. A court must "review the record in the light most favorable to the nonmoving party and draw all reasonable inferences in that party's favor." *Vanasco v. National-Louis University, 137 F.3d 962, 964 (7th Cir. 1998)*. Nevertheless, the party who bears the burden of proof on an issue may not rest on the pleadings, but must affirmatively demonstrate that there is a genuine issue of material fact that requires trial. *Warsco v. Preferred Technical Group, 258 F.3d 557, 563 (7th Cir. 2001)*. While a district court **[**17]** may not resolve genuine factual disputes through summary judgment, "weak factual claims can be weeded out through summary judgment motions." *Collins v. Associated Pathologists, Ltd., 844 F.2d 473, 476* ***[*1032]*** *(7th Cir. 1988)*. Summary judgment may be especially appropriate in the antitrust context because of the chill antitrust litigation can have on legitimate competition. *Id. at 475-76*; *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1106 (7th Cir. 1984)*. For this reason, an antitrust plaintiff opposing a motion for summary judgment must present evidence that tends to exclude the possibility that the defendant's conduct was as consistent with competition as with illegal conduct. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*.

DISCUSSION

Menasha's Antitrust Claims

News America moves for summary judgment on Menasha's Sherman Act Section 1 claims (Counts I and II), Sherman Act Section 2 claims (Counts III and IV), and Illinois Antitrust Act claims (Counts V-VIII). News America contends that all of News America's antitrust claims can be dismissed **[**18]** for Menasha's failure to properly define a relevant market. Before examining News America's arguments, the Court must first address Menasha's assertion that analysis of the relevant market is unnecessary for its Section 1 claims because there is evidence of a horizontal conspiracy based upon exclusive contracts that are illegal per se.

Per Se Illegality under Section 1 of the Sherman Act

As part of its response to News America's criticisms of its relevant market definition, Menasha argues that relevant market analysis is irrelevant to its claims in Counts I and II because News America's contracts with retailers are "per se illegal" under Section 1 of the Sherman Act, thus obviating the need for a defined relevant market.

HN7[] A successful claim under Section 1 of the Sherman Act requires proof of three elements: (1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in the relevant market; and (3) an accompanying injury. *Denny's Marina, Inc. v. Renfro Productions, Inc., 8 F.3d 1217, 1220 (7th Cir. 1993)*. There are two standards for evaluating whether an alleged restraint of trade is unreasonable: the per se rule and the **[**19]** Rule of Reason. *See* *NCAA v. Board of Regents, 468 U.S. 85, 100-04, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)*. The per se rule is invoked when surrounding circumstances and/or the nature of the agreements makes the probability that the practices are anticompetitive so high, further inquiry into the particular market context is unnecessary. *Id. at 100*. Menasha argues that the exclusive contracts News America entered into with retailers fall within the per se rule and were part of a horizontal agreement among retailers, orchestrated by News America, to exclude News America's low-price competitors. Menasha's attempt to have its Section 1 claims analyzed under the per se rule must be rejected.

As a threshold matter, nowhere in its detailed Complaint did Menasha ever allege a News America-engineered horizontal agreement among retailers in violation of Section 1 of the Sherman Act. It is well-settled that ***HN8***[] a plaintiff may not amend its complaint through arguments in its brief in opposition to a motion for summary judgment. *Shanahan v. City of Chicago, 82 F.3d 776, 781*, (7th Cir. 1996) (citing *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101 (7th Cir. 1984)*. **[**20]** Menasha's new theory for its Section 1 claims could be rejected on this basis alone. More importantly, judged on the merits, Menasha's theory of a horizontal conspiracy simply doesn't hold water. Menasha points to no evidence **[*1033]** in the record from which a jury could reasonably find that there existed a "conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 768, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. The mere fact that large numbers of retailers agreed to News America's exclusive contracts is not sufficient to support an inference of a horizontal agreement among retailers, and is clearly insufficient to allow it to proceed to trial on this theory. *Cf.* *Id. at 768* (holding that ***HN9***[] a plaintiff must adduce either direct or circumstantial evidence reveling a "unity of purpose or a common design and understanding"). Moreover, the agreements at issue in this case do not reflect practices that are so manifestly anticompetitive so as to allow the Court to accept Menasha's invitation to view News America's conduct through the prism of the per se rule. *See* *NCAA, 468 U.S. at 103-04*; **[**21]** *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 8, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. The Court will therefore analyze Menasha's Section 1 claims under the Rule of Reason.

Menasha's Sherman Act Claims

HN10[] Because "an antitrust policy divorced from market considerations would lack any objective benchmarks" *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 n.21, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*, analysis of claims of monopolization under Section 2 of the Sherman Act, as well as Section 1 claims analyzed under the Rule of Reason, requires the trier of fact to begin by delineating the relevant market. *Fishman v. Estate of Wirtz, 807 F.2d 520, 531 (7th Cir. 1986)*. A relevant market is comprised of those "commodities reasonably interchangeable by consumers for the **[*1034]** same purposes. . . ." *du Pont, 351 U.S. at 395*. Because the plaintiff always bears the burden of proving relevant market, "to survive summary judgment on [its] antitrust claims, the plaintiff[] must offer admissible evidence that is sufficient for a jury to find that the proposed relevant market[] [is] accurate." *Berlyn, Inc. v. Gazette Newspapers, 223 F. Supp. 2d 718, 726-27 (D. Md. 2002)*. **[**22]** Based on the record before the Court, there is no evidence from which a jury could reasonably find that Menasha has met its burden of proving that the relevant market in this case is limited to at-shelf coupon dispensers.

Attempting to provide support for a relevant market limited to at-shelf coupon dispensers, Menasha's expert Dr. Langenfeld points to six ways in which at-shelf coupon dispensers provide benefits that are unique or different than other in-store promotional vehicles. Leaving aside the issues created by Dr. Langenfeld's reliance on the inadmissible survey results generated by James Tenser, the six characteristics selected by Dr. Langenfeld strike the Court as an awkward and forced attempt to "define the elements of the relevant market to suit its desire for high market share, rather than letting the market define itself." *PepsiCo, Inc. v. Coca-Cola Co., 114 F. Supp. 2d 243, 249 (S.D.N.Y. 1995)*. Four of the six characteristics of at-shelf coupon dispensers named by Dr. Langenfeld - providing consumers with a discount, conspicuousness, being "cost effective," and reaching consumers at the point of purchase - are all shared in some degree with many other **[**23]** types of in-store promotional vehicles such as on-pack coupons, tear pad coupons affixed to the shelf near the product, and in-store demonstrations at which demonstrators distribute coupons. Contrary to Menasha's suggestion, ***HN11***[] it is not required that products be completely fungible to be considered part of the same relevant market under the Sherman Act, only that they are "reasonably interchangeable by consumers for the same purposes. . . ." *du Pont, 351 U.S. at 395*. Langenfeld's focus on the relative characteristics and benefits of different in-store marketing products is the very approach to defining relevant markets repudiated by the Supreme Court in *United States v. Continental Can Co., 378 U.S. 441, 449-58, 12 L. Ed. 2d 953, 84 S. Ct. 1738 (1956)*(rejecting the plaintiff's attempt to place glass and metal containers in different relevant markets based on different characteristics).

News America points to ample evidence in the record supporting its contention that the consumers of at-shelf coupon dispensers do in fact view at-shelf coupon dispensers as reasonably interchangeable with other in-store marketing vehicles, despite the fact that each in-store **[**24]** marketing vehicle may have its own unique advantages and features. Based on the record presented, the Court cannot accept Menasha's definition of a relevant market limited to at-shelf coupon dispensers. *See* *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*(holding that ***HN12***[] when an expert's opinion regarding the relevant market is not supported by sufficient facts, or when the record contradicts or renders the opinion unreasonable, it cannot support a jury's verdict). Because Menasha has failed to provide a factual basis sufficient to justify its delineation of the relevant market, News America is entitled to summary judgment in its favor on the Sherman Act claims in Counts I-IV. *See* *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 2002 U.S. App. LEXIS 27238*, No. 00-9342, 2002 WL 31866172 (2d Cir. Dec. 24, 2002)(affirming a district court's decision to grant summary judgment in defendant's favor based on plaintiff's failure to properly define the relevant market for Sherman Act claims).

Menasha's Illinois Antitrust Act Claims

In addition to its federal antitrust claims, Menasha also alleges four violations of the Illinois **[**25]** Antitrust Act that parallel its Sherman Act claims. ***HN13***[] The Illinois Antitrust Act provides that "when the wording of this Act is identical or similar to that of a federal ***antitrust law***, the courts of this State shall use the construction of the federal law by the federal courts as a guide in construing this Act." *740 ILCS 10/11*. Menasha's claims under Section 3 of the Illinois Antitrust Act for monopolization (Count V), attempted monopolization (Count VI), and restraint of trade (Count VII) clearly parallel its Sherman Act claims set forth in Counts III, IV and I respectively. Count VIII alleges a claim for "inducing refusals to deal under the Illinois Antitrust Act." Although Menasha did not raise a refusal to deal allegation in its Sherman Act claims, the threshold requirement of defining the relevant market is applied with equal force in the context of refusals to deal. *See* *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 595, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. Accordingly, for the reasons stated in the Court's discussion of Menasha's Sherman Act claims, News America is entitled to summary judgment on Counts V-VIII of Menasha's Complaint. *See* **[**26]** *A & A Disposal and Recycling, Inc. v. Browning-Ferris Industries of Illinois, Inc., 279 Ill.App.3d 337, 664 N.E.2d 351, 215 Ill. Dec. 954 (1st Dist. 1996)*(holding that a plaintiff's failure to establish a well-defined relevant market entitles a defendant to summary judgment for claims under Section 3 of the Illinois Antitrust Act).

Menasha's Unfair Competition and Tortious Interference Claims

In Counts IX and X, Menasha alleges claims under Illinois law for unfair methods of competition and tortious interference. The Court will address each in turn.

Unfair Methods of Competition

Count IX actually contains three separate causes of action under Illinois law. In **[*1035]** Count IX, Menasha claims that News America's wrongful conduct supports claims under: (1) the Illinois Consumer Fraud and Deceptive Business Practices Act, *815 ILCS 505/1, et seq.* ("ICFA"); (2) the Uniform Deceptive Trade Practices Act, *815 ILCS 510/1, et seq.* ("DTPA"); and (3) common law unfair competition.

HN14[] ICFA was enacted to create "broad protective coverage of consumers from the many types of deceptive or unfair selling and advertising techniques used by businesses." *Duhl v. Nash Realty, Inc., 102 Ill.App.3d 483, 429 N.E.2d 1267, 1277, 57 Ill. Dec. 904 (1st Dist. 1981)*. **[**27]** For a competing business to have standing to sue under ICFA, it must establish by clear and convincing evidence how the complained-of conduct implicates consumer protection concerns. *Speakers of Sport, Inc. v. ProServ, Inc., 178 F.3d 862, 868 (7th Cir. 1999)*; *Hartman Co. v. Capital Bank and Trust Co., 296 Ill.App.3d 593, 694 N.E.2d 1108, 1117, 230 Ill. Dec. 830 (1st Dist. 1998)*. The plaintiff can meet this burden by establishing, *inter alia*, how the requested relief would serve to protect the interests of consumers. *Brody v. Finch Univ. of Health Sciences, 298 Ill.App.3d 146, 698 N.E.2d 257, 269, 232 Ill. Dec. 419 (2d Dist. 1998)*. Menasha contends that the required nexus to consumer interests is met by the fact that consumers were given the benefit of News America's coupons but were denied the benefit of coupons from Menasha's dispensers due to News America's exclusive contracts with retailers. This fact, standing alone, is insufficient to support Menasha's contention that its dispute with News America implicates the type of consumer protection concerns contemplated by the Act. *See* *Speakers of Sport, 178 F.3d at 868*. **[**28]** Menasha therefore has no standing to sue under ICFA and News America is entitled to summary judgment on this aspect of Count IX.

Count IX also alleges a claim under the Uniform Deceptive Trade Practices Act (the "DTPA"). ***HN15***[] DTPA was designed to address conduct involving either misleading trade identification or false and deceptive advertising. *See* *Industrial Specialty Chemicals, Inc. v. Cummins Engine Co., 902 F. Supp. 805, 812 (N.D. Ill. 1995)*; *see also* *815 ILCS 510/2*. Even construing the record in the light most favorable to Menasha, this is simply not a case implicating conduct related to consumer confusion or deception, and DTPA therefore does not provide Menasha with a remedy. *See* *Hooker v. Columbia Pictures Indus., Inc., 551 F. Supp. 1060, 1065 (N.D. Ill. 1982)*. Menasha's common law unfair competition claim does not need to be addressed separately, since DTPA is merely a codification of the Illinois common law of unfair competition. *McGraw-Edison Co. v. Walt Disney Productions, 787 F.2d 1163, 1173 n.9 (7th Cir. 1986)*. For the foregoing reasons, News America is entitled to summary judgment on Count IX.

Tortious Interference

[29]** ***HN16***[] In Illinois, the elements of a claim for tortious interference with prospective business relations are: (1) a reasonable expectation of entering into a valid business relationship; (2) the defendant's knowledge of the plaintiff's expectancy; (3) purposeful interference by the defendant that prevents the plaintiff's legitimate expectancy from ripening into a valid business relationship; and (4) damages to the plaintiff resulting from such interference. *Fellhauer v. City of Geneva, 142 Ill.2d 495, 568 N.E.2d 870, 878, 154 Ill. Dec. 649 (1991)*. The theory underlying this tort is that some conduct is so odious that it goes beyond the bounds of legitimate competitive practices. *Aviani v. Sisters of St. Mary, 1987 U.S. Dist. LEXIS 9824, 1987 WL 18934*, at *3 (N.D. Ill. Oct. 22, 1987).

[*1036] Menasha has not, as is its burden, pointed the Court to facts establishing how individual business relationships were directly spoiled by specific acts of News America. Rather, Menasha puts forward a generalized complaint that its at-shelf coupon dispenser business was not as successful as it could have been due to the presence of News America in the market. The record provides no basis for a finding **[**30]** that tortious conduct on the part of News America was the cause of Menasha's difficulties in building business relationships with the retail chains in question. Rather, the record indicates that Menasha made a conscious decision not to compete with News America directly. As one Menasha executive put it, Menasha preferred the "old-fashioned way of doing business," rejected News America's business model, and avoided direct competition with News America when possible. Conversely, a company called FloorGraphics had great success in breaking into the market and establishing relationships with large retail chains by offering financial incentives to retailers similar to those offered by News America. Menasha's difficulties in maintaining and expanding its business for at-shelf coupon dispensers is not attributable to tortious interference by News America, but to Menasha's refusal (or inability) to adapt its business model to new realities. "That is the process known as competition, which though painful, fierce, frequently ruthless, sometimes Darwinian in its pitilessness, is the cornerstone of our highly successful economic system. *Competition is not a tort."* *Speakers of Sport, 178 F.3d at 865* **[**31]** (Posner, C.J.) (emphasis added). Accordingly, News America is entitled to summary judgment on Count X.

CONCLUSION

For the reasons set forth above, Menasha's Motion In Limine to Exclude the Relevant Market Opinions of Drs. Rapp and Stiroh is **DENIED**, News America's Motion In Limine to Exclude the Report and Testimony of James Tenser and the Opinions of Dr. James Langenfeld That Rely on Tenser's Survey Research is **GRANTED IN PART AND DENIED IN PART**. News America's Motion to Strike Menasha's Responses to Defendants' Local Rule 56.1 Statement is **DENIED**. News America's Motion to Strike Menasha's Statement of Material Facts under Local Rule 56.1 is **DENIED**. News Motion or Summary Judgment is **GRANTED** and the case is **DISMISSED** pursuant to *Federal Rule of Civil Procedure 56*.

IT IS SO ORDERED.

Harry D. Leinenweber, Judge

United States District Court

Date: January 7, 2003

JUDGMENT IN A CIVIL CASE

Decision by Court. This action came before the Court. The issues have been tried or heard and a decision has been rendered.

IT IS HEREBY ORDERED AND ADJUDGED that the motion for Summary Judgment by News America is GRANTED **[**32]** and the case dismissed.

Date: 1/7/2003

Four B Corp. v. Ueno Fine Chems. Indus., Ltd.

United States District Court for the District of Kansas

January 8, 2003, Decided

CIVIL ACTION No. 01-2394-CM

Reporter

241 F. Supp. 2d 1258 *; 2003 U.S. Dist. LEXIS 434 **; 2003-1 Trade Cas. (CCH) P73,942

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **In Rem & Personal Jurisdiction, In Personam Actions**

Plaintiffs bear the burden to establish personal jurisdiction over defendants. In order to demonstrate personal jurisdiction sufficient to defeat a motion to dismiss, plaintiffs need only make a prima facie showing that jurisdiction exists.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN2[] **In Rem & Personal Jurisdiction, In Personam Actions**

In ascertaining the facts necessary to establish jurisdiction, the court must accept as true the allegations set forth in the complaint to the extent they are uncontroverted by the defendants' affidavits. However, plaintiffs have the duty to support jurisdictional allegations in a complaint by competent proof of the supporting facts if the jurisdictional allegations are challenged by an appropriate pleading. The plaintiffs' complaint and any affidavits submitted are to be construed, and any doubts are to be resolved, in the light most favorable to the plaintiffs. Eventually, of course, plaintiffs must establish jurisdiction by a preponderance of the evidence, either at a pretrial evidentiary hearing or at trial.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN3[] **Choice of Law, Forum & Place**

Whether a federal court has personal jurisdiction over nonresident defendants in a diversity action is determined by the law of the forum state.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN4[] **In Personam Actions, Minimum Contacts**

In analyzing a motion to dismiss for lack of personal jurisdiction under *Fed. R. Civ. P. 12(b)(2)*, the court applies a two-part test. First, it determines if defendants' conduct falls within one of the provisions of the state long-arm statute. Second, it determines whether defendants had sufficient minimum contacts with the forum state to satisfy the constitutional guarantee of due process.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN5[] **In Rem & Personal Jurisdiction, In Personam Actions**

Under the Kansas long-arm statute, a non-resident submits to the jurisdiction of the State of Kansas as to any cause of action arising from the "transaction of any business" within Kansas. *Kan. Stat. Ann. § 60-308(b)(1)*.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN6[] **In Rem & Personal Jurisdiction, In Personam Actions**

For purposes of *Kan. Stat. Ann. § 60-308(b)(1)*, "business" is transacted within the state when an individual is within or enters this state in person or by agent and, through dealing with another within the state, effectuates or attempts to effectuate a purpose to improve his economic conditions and satisfy his desires. The transaction of business exists when the nonresident purposefully does some act or consummates some transaction in the forum state.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN7[] In Rem & Personal Jurisdiction, In Personam Actions

For jurisdiction to exist under *Kan. Stat. Ann. § 60-308(b)(1)* there must be a nexus between the transaction of business and the alleged claim.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN8[] In Rem & Personal Jurisdiction, In Personam Actions

In ascertaining the facts necessary to establish jurisdiction, the district court must accept as true the allegations set forth in the complaint to the extent they are uncontroverted by defendant's affidavits. Only the well pled facts of the complaint, as distinguished from conclusory allegations, must be accepted as true. Therefore, the court's determination of the issue before it involves an application of the law to the facts as set forth in the affidavits and complaints, favoring the plaintiff where a conflict exists, as well as a determination as to the legal sufficiency of plaintiff's jurisdictional allegations in light of the facts presented.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > Constitutional Limits

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN9[] In Rem & Personal Jurisdiction, Constitutional Limits

Kan. Stat. Ann. § 60-308 should be liberally construed to assert personal jurisdiction over nonresident defendants to the full extent permitted by the *Due Process Clause of the Fourteenth Amendment to the U.S. Constitution*.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN10[] In Rem & Personal Jurisdiction, In Personam Actions

Kan. Stat. Ann. § 60-308(b)(2) provides that any person submits to the jurisdiction of the Kansas courts as to any cause of action arising from the commission of a tortious act within the state. *Kan. Stat. Ann. § 60-308(b)(2)*.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN11[] In Rem & Personal Jurisdiction, In Personam Actions

Kansas courts find that Kansas's long-arm jurisdiction is properly invoked under *Kan. Stat. Ann. § 60-308(b)(2)* where a plaintiff alleges the commission of tortious activity outside the State of Kansas that causes injury within the State of Kansas.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN12[] **Regulated Practices, Private Actions**

In contrast to claims of tortious behavior, a civil antitrust violation brought pursuant to federal ***antitrust law*** may be established without evidence of unlawful intent. A showing of an anticompetitive effect may be sufficient.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN13[] **In Rem & Personal Jurisdiction, In Personam Actions**

See *Kan. Stat. Ann. § 60-308(b)(7)*.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN14[] **In Rem & Personal Jurisdiction, In Personam Actions**

The legislative intent of *Kan. Stat. Ann. § 60-308(b)(7)* is to grant in personam jurisdiction to the courts of the state over those who engage in the manufacture, sale, or servicing of products if they receive or can anticipate some direct or indirect financial benefit from the sale, trade, use or servicing of their products within the state.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Torts > Products Liability > General Overview

HN15[] **In Rem & Personal Jurisdiction, In Personam Actions**

Kan. Stat. Ann. § 60-308(b)(7) is traditionally been applied in product liability cases and is intended to provide jurisdiction over foreign manufacturers and/or suppliers in products liability cases. A "product liability" case references a legal theory by which liability is imposed on the manufacturer or seller of a defective product.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Torts > Malpractice & Professional Liability > Attorneys

Torts > Products Liability > General Overview

HN16[] **In Rem & Personal Jurisdiction, In Personam Actions**

Kan. Stat. Ann. § 60-308(b)(7) specifically applies only to product liability injury.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > Statutory Sources

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN17[] In Personam Actions, Minimum Contacts

Due process allows a state to exercise personal jurisdiction over a nonresident when the nonresident has certain minimum contacts with the forum state such that the maintenance of the suit does not offend traditional notions of fair play and substantial justice.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN18[] In Rem & Personal Jurisdiction, In Personam Actions

The Tenth Circuit endorses a three part analysis for use when examining whether a non-resident defendant has sufficient minimum contacts with the forum to satisfy constitutional requirements: (1) the non-resident defendant must do some act or consummate some transaction with the forum or perform some act by which he purposefully avails himself of the privilege of conducting activities in the forum, thereby invoking the benefits and protections of its laws, (2) the claim must be one which arises out of or results from the defendant's forum-related activities, (3) exercise of jurisdiction must be reasonable.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN19[] In Rem & Personal Jurisdiction, In Personam Actions

Jurisdiction must rest on a person's activity deliberately directed toward the forum state.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN20[] In Rem & Personal Jurisdiction, In Personam Actions

Even absent a prima facie showing that defendants sold directly to purchasers in the forum state, plaintiffs can establish purposeful availment. Under the "stream of commerce" theory, a defendant's contacts with the forum state need not be direct to satisfy due process requirements. The deliberate, although perhaps indirect, introduction of products into the stream of commerce with the expectation of distribution in particular areas may be enough to satisfy the minimum contacts/purposeful availment test.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN21[] In Personam Actions, Placement of Product in Commerce

Generally, simply placing a product into the stream of commerce, without more, is not sufficient to satisfy the constitutional standard for personal jurisdiction. Instead, "additional conduct" is generally required to indicate an intent or purpose to serve the market in the forum state. A defendant's mere awareness that the stream of commerce may or will sweep the product into the forum state does not convert the mere act of placing the product into the stream into an act purposefully directed toward the forum state.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN22[] **Jurisdiction, Jurisdictional Sources**

In determining whether the exercise of jurisdiction is so unreasonable as to violate "fair play and substantial justice," the court considers: (1) the burden on the defendant, (2) the forum state's interest in resolving the dispute, (3) the plaintiff's interest in receiving convenient and effective relief, (4) the interstate judicial system's interest in obtaining the most efficient resolution of controversies, and (5) the shared interest of the several states in furthering fundamental substantive social policies.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN23[] **In Rem & Personal Jurisdiction, In Personam Actions**

For purposes of determining personal jurisdiction, the Tenth Circuit recognizes that because modern commercial transactions often involve little contact with the forum beyond that of mail and telephone communications defending a suit in a foreign jurisdiction is not as burdensome as in the past.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN24[] **In Rem & Personal Jurisdiction, In Personam Actions**

For purposes of determining personal jurisdiction, there is a recognized advantage to having a local court determine questions of local law.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN25[] **In Rem & Personal Jurisdiction, In Personam Actions**

For personal jurisdiction determination purposes, the key inquiry in determining whether the forum state is the most efficient place to litigate the dispute is the location of witnesses, where the wrong underlying the lawsuit occurred, what forum's substantive law governs the case, and whether jurisdiction is necessary to prevent piecemeal litigation.

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Jurisdiction

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN26[] **Conflict of Law, Jurisdiction**

The court's analysis of the fifth factor in determining whether the exercise of jurisdiction is so unreasonable as to violate fair play and substantial justice focuses on whether the exercise of personal jurisdiction by the forum state affects the substantive social policy interests of other states or foreign nations.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN27[] **In Rem & Personal Jurisdiction, In Personam Actions**

There is an "interplay" between the two components of the due process inquiry, 1) the purposeful availment and its relation to the claim and 2) the reasonableness of the exercise of jurisdiction, such that, depending on the strength of the defendant's contacts with the forum state, the reasonableness component of the constitutional test may have a greater or lesser effect on the outcome of the due process inquiry.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

International Trade Law > Dispute Resolution > International Commercial Arbitration > Arbitration

HN28[] **In Rem & Personal Jurisdiction, In Personam Actions**

The unique burdens placed upon one who must defend oneself in a foreign legal system should have significant weight in assessing the reasonableness of stretching the long-arm of personal jurisdiction over national borders.

Opinion

[*1259] MEMORANDUM AND ORDER

This purported class action arises out of an alleged international conspiracy to fix the prices of sorbates, including potassium sorbate and sorbic acid, which are chemical preservatives used in food products. Plaintiffs are "indirect purchasers" of sorbates, **[**3]** who allegedly purchased products containing sorbates that were manufactured and sold by defendants. Plaintiffs allege that defendants engaged in the manufacture and sale of sorbates throughout the world and specifically in Kansas. Plaintiffs further allege that defendants' conspiracy to control the prices of sorbates affected over $ 1 billion in U.S. commerce and that they sustained damages due to defendants' actions. Plaintiffs contend that defendants' actions in fixing the prices of sorbates was in violation of Kansas ***antitrust law***, *Kan. Stat. Ann. § 50-101, et seq.*

Pending before the court are defendants Ueno Fine Chemicals Industry (USA), **[*1260]** Inc., Ueno Fine Chemicals Industry, Ltd., and Chisso Corporation's Motions to Dismiss for Lack of Personal Jurisdiction (Docs. 105, 107 & 109). All moving defendants (referenced collectively herein as "defendants") ask the court to dismiss them from the action based upon a finding that the exercise of personal jurisdiction over them is improper. As set forth herein, defendants' motions are granted.

. **Motion to Dismiss for Lack of Personal Jurisdiction Under *Fed. R. Civ. P. 12(b)(2)***

HN1[] Plaintiffs bear the burden to establish **[**4]** personal jurisdiction over defendants. *Fed. Deposit Ins. Corp. v. Oaklawn Apartments, 959 F.2d 170, 174 (10th Cir. 1992)*. In order to demonstrate personal jurisdiction sufficient to defeat a motion to dismiss, plaintiffs need only make a prima facie showing that jurisdiction exists. [1] *Ten Mile Indus. Park v. W. Plains Serv. Corp., 810 F.2d 1518, 1524 (10th Cir. 1987)*. ***HN2***[] In ascertaining the facts necessary to establish jurisdiction, the court must accept as true the allegations set forth in the complaint to the extent they are uncontroverted by the defendants' affidavits. *Id.* However, plaintiffs have the "duty to support jurisdictional allegations in a complaint by competent proof of the supporting facts if the jurisdictional allegations are challenged by an appropriate pleading." *Pytlik v. Prof'l Res., Ltd., 887 F.2d 1371, 1376 (10th Cir. 1989)*. The plaintiffs' complaint and any affidavits submitted are to be construed, and any doubts are to be resolved, in the light most favorable to the plaintiffs. *Fed. Deposit, 959 F.2d at 174*.

[5]** ***HN3***[] Whether this federal court has personal jurisdiction over the moving nonresident defendants in this diversity action is determined by the law of Kansas, as it represents "the law of the forum state." *Yarbrought v. Elmer Bunker & Assocs., 669 F.2d 614, 616 (10th Cir. 1982)*; *see also* *Fed. R. Civ. P. 4(e)*. ***HN4***[] In analyzing a motion to dismiss for lack of personal jurisdiction under *Rule 12(b)(2)*, the court applies a two-part test. First, it determines if defendants' conduct falls within one of the provisions of the Kansas long-arm statute. Second, it determines whether defendants had sufficient minimum contacts with Kansas to satisfy the constitutional guarantee of due process. *See* *Equifax Servs., Inc. v. Hitz, 905 F.2d 1355, 1357 (10th Cir. 1990)*. The court now applies these tests to determine whether plaintiffs have met their burden to make a prima facie showing of this court's personal jurisdiction over each of the moving defendants.

. **Defendant Ueno Fine Chemicals Industry (USA), Inc.'s Motion (Doc. 105)**

[1] Eventually, of course, plaintiffs must establish jurisdiction by a preponderance of the evidence, either at a pretrial evidentiary hearing or at trial. ***Behagen v. Amateur Basketball Ass'n of U.S.A.*, *744 F.2d 731, 733 (10th Cir. 1984)*; *Wilson v. Olathe Bank, 1998 U.S. Dist. LEXIS 5509*, *1998 WL 184470*,** at *1 (D. Kan. March 2, 1998).

Plaintiffs contend that the exercise of jurisdiction over defendants is appropriate under subsections (b)(1), (b)(2), and (b)(7) **[**6]** of the Kansas long-arm statute. *Kan. Stat. Ann. § 60-308*. Moreover, plaintiffs contend that the exercise of jurisdiction over defendants comports with due process principles. Defendant Ueno Fine Chemicals Industry (USA), Inc. (referenced as "Ueno USA") asserts that it is not subject to personal jurisdiction in this court under either the "transacting business" or the "product liability" provisions of the Kansas long-arm statute. In addition, defendant Ueno USA asserts that the exercise of jurisdiction over it would violate federal due process concepts because **[*1261]** it has not "purposefully directed" activities toward Kansas and further that such exercise of jurisdiction would violate traditional notions of fair play and substantial justice.

. **Kansas Long-Arm Statute**

. ***Section 60-308(b)(1)***

Defendant Ueno USA contends that it has not "purposefully" done any business in Kansas or directed any activity toward Kansas. In addition, defendant Ueno USA contends that plaintiffs' claims do not and cannot arise from any act or transaction by Ueno USA in Kansas.

HN5[] Under the Kansas long-arm statute, a non-resident submits to the jurisdiction of the State of Kansas as to any cause **[**7]** of action arising from the "transaction of any business" within Kansas. *Kan. Stat. Ann. § 60-308(b)(1)*.

HN6[] "Business" is transacted within the state when an individual is within or enters this state in person or by agent and, through dealing with another within the state, effectuates or attempts to effectuate a purpose to improve his economic conditions and satisfy his desires. The transaction of business exists when the nonresident purposefully does some act or consummates some transaction in the forum state.

Volt Delta Res., Inc. v. Devine, 241 Kan. 775, 778, 740 P.2d 1089, 1092 (1987). "The transaction of business exists when the nonresident purposefully does some act or consummates some transaction in the forum state." *Anderson v. Heartland Oil & Gas, Inc., 249 Kan. 458, 467-68, 819 P.2d 1192, 1199 (1991)*. ***HN7***[] For jurisdiction to exist under subsection (b)(1) of *§ 60-308*, there must be a nexus between the transaction of business and the alleged claim. *Kluin v. Am. Suzuki Motor Corp., 56 P.3d 829, 835 (2002)*.

Finding the requisite "transaction of any business" demands an examination of all of the defendants' activities **[**8]** within Kansas which related to the present cause of action. Here, plaintiffs generally allege that defendant Ueno USA "directly or through its affiliates, engaged in the business of the manufacture, distribution and/or sale of sorbates throughout the United States and the world, including Kansas." (Pls.' Compl. at P14). In addition, plaintiffs allege that "through distributors, defendants sold sorbates in Kansas to various indirect purchasers." (*Id.* at P53).

However, defendant Ueno USA presents an affidavit contending that Ueno USA "does not sell any sorbates products to any resident of Kansas" and that it "has not sold any sorbate products to [plaintiffs] Four B Corporation, Cosentino Group, Inc., Cosentino Enterprises, Inc. or Mid Am Food Enterprises, Inc." [2] (Def. Ueno USA's Resp., Ohashi aff. at PP4 & 5). In addition, defendant Ueno USA's affidavit indicates that it has "on some occasions shipped sorbates to factories located in Kansas at the request of only a very few customers, all of whom were located outside of Kansas." (*Id.* P4).

[2] The court notes that this affidavit indicates defendant Ueno USA did not sell sorbates products to four of the five plaintiffs herein. The affidavit does not reference plaintiff Falley's, Inc.

[9]** ***HN8***[] "In ascertaining the facts necessary to establish jurisdiction, the district court must accept as true the allegations set forth in the complaint to the extent they are *uncontroverted* by defendant's affidavits." *Ten Mile Indus. Park, 810 F.2d at 1524* (emphasis added) (citing *Behagen, 744 F.2d at 733*). Only the well pled facts of the complaint, as distinguished from conclusory allegations, must be accepted as true. *Id.* Therefore, the court's determination **[*1262]** of the issue before it "involves an application of the law to the facts as set forth in the affidavits and complaints, favoring the plaintiff where a conflict exists, as well as a determination as to the legal sufficiency of plaintiff's jurisdictional allegations in light of the facts presented." *Id.*

Here, plaintiffs have alleged that defendants distributed or sold sorbates to various indirect purchasers in Kansas. However, defendant Ueno USA has controverted these allegations in a verified affidavit. Although plaintiffs present an affidavit and portions of a court hearing transcript with their response, neither of these sworn documents support the allegation that defendant **[**10]** Ueno USA has "transacted business" in the State of Kansas. Accordingly, the court finds plaintiffs have failed to controvert defendant Ueno USA's affidavit other than by conclusory allegations in their complaint and briefs. Therefore, the court finds plaintiffs' unverified allegations do not establish the "transaction of business" within the meaning of *§ 60-308(b)(1)*, nor do they satisfy the necessary showing of a sufficient nexus between the business transacted, i.e., the defendants' sale of sorbates in Kansas, and the alleged claim, i.e., unlawful price fixing of sorbates sold in Kansas.

Accordingly, although ***HN9***[] the court recognizes that *§ 60-308* should be "liberally construed to assert personal jurisdiction over nonresident defendants to the full extent permitted by the *due process clause of the Fourteenth Amendment to the U.S. Constitution*," *Volt Delta Res., Inc., 241 Kan. at 777, 740 P.2d at 1092*, the court finds that plaintiffs have failed to make the threshold prima facie showing that the exercise of jurisdiction under *§ 60-308(b)(1)* is appropriate. Defendant Ueno USA's motion is granted on this basis.

o ***Section 60-308(b)(2)***

Plaintiffs assert **[**11]** that this court may properly assert personal jurisdiction over defendant Ueno USA under *§ 60-308(b)(2)* because plaintiffs' complaint "alleges economic injury resulting from defendant['s] alleged intentional tortious conduct, i.e., breach of Kansas antitrust statutes." (Pls.' Resp. at 5). Defendant Ueno USA does not address the application of *§ 60-308(b)(2)* to the facts in this case, nor does it offer a specific responsive argument to plaintiffs' assertion of jurisdiction under *§ 60-308(b)(2)* in its response brief.

Section 60-308(b)(2) ***HN10***[] provides that any person submits to the jurisdiction of the Kansas courts "as to any cause of action arising from . . . [the] commission of a tortious act within this state." *Kan. Stat. Ann. § 60-308(b)(2)*. ***HN11***[] Kansas courts have found that Kansas's long-arm jurisdiction is properly invoked under *§ 60-308(b)(2)* where a plaintiff alleges the commission of tortious activity outside the State of Kansas that causes injury within the State of Kansas. *Ling v. Jan's Liquors, 237 Kan. 629, 633, 703 P.2d 731, 734 (1985)* ("Although [the defendant] has never done business in Kansas, [its] conduct allegedly caused injury . . . in Kansas **[**12]** and, therefore, the alleged tort is deemed to have occurred in Kansas"); *Dazey Corp. v. Wolfman, 948 F. Supp. 969, 973 (D. Kan. 1996)* (construing *Kan. Stat. Ann. § 60-308(b)(2)*).

Although plaintiffs' responsive brief summarily indicates that "Plaintiffs' Complaint alleges economic injury resulting from defendants' intentional tortious conduct, i.e., breach of Kansas antitrust statute" (Pls.' Resp. at 5), plaintiffs' complaint does not allege a tort claim against defendant Ueno USA. Instead, plaintiffs' complaint alleges that defendant Ueno USA's actions violate Kansas antitrust laws, *Kan.* ***[*1263]*** *Stat. Ann. § 50-101 et seq.* Plaintiffs have provided no legal support for their contention that a violation of Kansas antitrust laws constitutes tortious behavior. [3] Because plaintiffs bear the burden to establish personal jurisdiction over defendants, *Fed. Deposit, 959 F.2d at 174*, and have not presented authority to support their argument, the court declines to find that plaintiffs' allegations of Kansas ***antitrust law*** violations are per se allegations of the commission of tortious activity sufficient to bring defendant Ueno USA's alleged actions within **[**13]** the purview of *§ 60-308(b)(2)*.

Accordingly, the court finds that plaintiffs have failed to make a prima facie showing that the exercise of jurisdiction under *§ 60-308(b)(2)* is appropriate. Defendant Ueno USA's motion is granted on this basis.

o *Section 60-308(b)(7)*

Defendant Ueno USA next asserts that it has not engaged in solicitation or service activities in Kansas nor received or anticipated any direct or indirect financial benefit from the sale, trade, use or servicing of its products in Kansas, as required **[**14]** for application of *§ 60-308(b)(7)*. Moreover, defendant Ueno USA contends it "is not the type of 'product liability' defendant that the Kansas legislature intended to reach" with *§ 60-308(b)(7)*. (Def. Ueno USA's Mot. at 5).

Section 60-308(b) ***HN13***[] provides that any person submits to the jurisdiction of the Kansas courts as to any cause of action arising from . . . (7) [the] causing to persons or property within this state any injury arising out of an act or omission outside of this state by the defendant if, at the time of the injury either (A) the defendant was engaged in solicitation or service activities within this state; or (B) products, materials or things processed, serviced or manufactured by the defendant anywhere were used or consumed within this state in the ordinary course of trade or use.

Kan. Stat. Ann. § 60-308(b)(7). As noted recently by the Kansas Supreme Court, ***HN14***[] "the legislative intent of *K.S.A. 60-308(b)(7)* was to grant in personam jurisdiction to the courts of this state over those who engage in the manufacture, sale, or servicing of products if they receive or can anticipate some direct or indirect financial benefit from the sale, trade, use **[**15]** or servicing of their products within this state." ***Ling, 237 Kan. at 631*****,** ***703 P.2d at 733*** (citing ***Tilley v. Keller Truck & Implement Corp., 200 Kan. 641, 648, 438 P.2d 128, 133-34 (1968))*****.**

Section 60-308(b)(7) ***HN15***[] has traditionally been applied in product liability cases and "was intended to provide[] jurisdiction over foreign manufacturers and/or suppliers in products liability cases." ***Johnson v. Goodyear, S.A. Colmar Berg*****,** ***716 F. Supp. 531, 533 (D. Kan. 1989)*** (citing *Tilley, 200 Kan. at 647*). Accordingly, this court must decide whether subsection (b)(7) is appropriately applied in an antitrust case, where the alleged injury does not arise from the malfunction of the product at issue but instead from a conspiracy to control its price.

A "product liability" case references a "legal theory by which liability is imposed on the manufacturer or seller of a defective product." Black's Law Dictionary 1225 (7th ed. 1999). None of the cases cited by plaintiff indicate that subsection **[*1264]** (b)(7) is properly applied outside the typical product liability scenario. Moreover, in ***J.E.M. Corporation v. McClellan*****,** ***462 F. Supp. 1246, 1249 (D. Kan. 1978)*****,** **[**16]** the court noted ***HN16***[] that subsection (b)(7) "specifically applies only to product liability injury." ***Id. at 1250*****.** In addition, this court previously has found that because subsection (b)(7) was designed to apply in "product hazard" cases, it had no application in a malpractice action against attorneys. ***Stonecipher v. Sexton*****,** ***54 F.R.D. 435, 438 (D. Kan. 1972)*****.**

---

[3] The court notes that, ***HN12***[] in contrast to claims of tortious behavior, a civil antitrust violation brought pursuant to federal ***antitrust law*** may be established without evidence of unlawful intent. A showing of an anticompetitive effect may be sufficient. ***McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980)*****;** ***United States v. United States Gypsum Co., 438 U.S. 422, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*****.**

Consequently, the court finds plaintiffs have failed to make a prima facie showing that the exercise of jurisdiction under *§ 60-308(b)(7)* is appropriate in this antitrust violation case. Defendant Ueno USA's motion is granted on this basis.

. Due Process Considerations

Defendant Ueno USA next contends that the exercise of jurisdiction over it in this case would offend traditional notions of fair play and substantial justice and would be inconsistent with due process principles. As noted, to establish personal jurisdiction in a diversity case, plaintiffs must meet the requirements of the forum's long-arm statute and the federal Constitution. ***Williams v. Bowman Livestock Equip. Co.*, *927 F.2d 1128, 1131 (10th Cir. 1991)*.** The court has found that personal **[**17]** jurisdiction is lacking under the provisions of the long-arm statute asserted. However, even where the long-arm statute provided a basis for the exercise of jurisdiction, the court now finds that the exercise of jurisdiction over defendant Ueno USA would violate due process principles.

HN17[] Due process allows a state to exercise personal jurisdiction over a nonresident when the nonresident has "certain minimum contacts with [the forum state] such that the maintenance of the suit does not offend 'traditional notions of fair play and substantial justice.'" ***Int'l Shoe Co. v. Washington, 326 U.S. 310, 316, 90 L. Ed. 95, 66 S. Ct. 154 (1945)*. *HN18***[] The Tenth Circuit has endorsed a three part analysis for use when examining whether a non-resident defendant has sufficient minimum contacts with the forum to satisfy constitutional requirements. ***Rambo v. Am. S. Ins. Co.*, *839 F.2d 1415, 1419 n.6 (10th Cir. 1988)*.**

(1) The non-resident defendant must do some act or consummate some transaction with the forum or perform some act by which he purposefully avails himself of the privilege of conducting activities in the forum, thereby invoking the benefits **[**18]** and protections of its laws.

(2) The claim must be one which arises out of or results from the defendant's forum-related activities.

(3) Exercise of jurisdiction must be reasonable.

Id.

o **Purposeful Availment**

HN19[] Jurisdiction must rest on a person's activity deliberately directed toward the forum state. ***Packerware Corp. v. B & R Plastics, Inc.*, *15 F. Supp. 2d 1074, 1081 (D. Kan. 1998)*.** Examining plaintiffs' allegations in light of defendant Ueno USA's verified affidavit, the court finds that plaintiffs have failed to set forth a sufficient prima facie showing that defendant Ueno USA performed an act "by which [it] purposefully availed [itself] of the privilege of conducting activities in the forum, thereby invoking the benefits and protections of its laws." *Id.*

Here, plaintiffs have failed to set out a prima facie case premised on direct contacts with the forum state. Although plaintiffs have alleged that defendant Ueno USA manufactured or sold sorbates in Kansas either directly or indirectly, these allegations have been controverted. Moreover, **[*1265]** plaintiffs have failed to come forward with "competent proof" **[**19]** of those controverted allegations as set forth by the applicable standard. ***Pytlik, 887 F.2d at 1376*.** Where there is no prima facie showing that defendants directly sold sorbates in Kansas, or directed others to do so on their behalf, purposeful availment is not present.

However, ***HN20***[] even absent a prima facie showing that defendants sold directly to purchasers in Kansas, plaintiffs could establish purposeful availment. Under the "stream of commerce" theory, a defendant's contacts with the forum state need not be direct to satisfy due process requirements. The deliberate, although perhaps indirect, introduction of products into the stream of commerce with the expectation of distribution in particular areas may be enough to satisfy the minimum contacts/purposeful availment test. *See* ***World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 297, 62 L. Ed. 2d 490, 100 S. Ct. 559 (1980)*** (noting purposeful availment may occur by actions or even a single act for which the defendant "should reasonably anticipate being haled into court in the forum state"); ***Fidelity and Cas. Co. of N.Y. v. Philadelphia Resins Corp.***, ***766 F.2d 440, 446 (10th Cir. 1985)***. **[**20]** ***HN21***[] Generally, simply placing a product into the stream of commerce, without more, is not sufficient to satisfy the constitutional standard for personal jurisdiction. ***Asahi Metal Indus. Co., Ltd. v. Superior Court of Cal., 480 U.S. 102, 112, 94 L. Ed. 2d 92, 107 S. Ct. 1026 (1987)*** ("The placement of a product into the stream of commerce, without more, is not an act of the defendant purposefully directed toward the forum State."). Instead, "additional conduct" is generally required to "indicate an intent or purpose to serve the market in the forum State." *Id.* A defendant's mere "awareness that the stream of commerce may or will sweep the product into the forum State does not convert the mere act of placing the product into the stream into an act purposefully directed toward the forum State." *Id.; see also* ***Packerware Corp., 15 F. Supp. 2d at 1081*** (recognizing broad approach to stream of commerce theory as set out in *Asahi Metal*).

Plaintiffs allege that "Since 1979, the defendants and their co-conspirators sold and distributed sorbates in a continuous and uninterrupted flow of interstate and foreign trade and commerce to customers located **[**21]** in states or countries other than the states or countries in which the defendant and its co-conspirators produced sorbates." (Pls.' Compl. at P51). Plaintiffs further allege that the "business activities of the defendant and its co-conspirators that are the subject of this Petition were within the flow of, and substantially affected, interstate and foreign trade and commerce; consequently, these activities have affected and continue to affect trade and commerce in Kansas." (*Id.* at P52). [4] However, plaintiffs have not alleged additional conduct by defendants evidencing an intent by defendant Ueno USA to direct its product to the State of Kansas.

[22]** Even when drawing all reasonable inferences from the record in favor of plaintiffs, the court finds that plaintiffs have failed to **[*1266]** sufficiently allege a prima facie case of purposeful availment under a stream of commerce theory. Plaintiffs' complaint simply alleges defendant Ueno USA placed its product into the stream of commerce and that this placement had an effect on the Kansas economy. Plaintiffs fail to allege any contacts that demonstrate defendant Ueno itself created a substantial connection with the State of Kansas. *See* ***Burger King Corp. v. Rudzewicz, 471 U.S. 462, 475, 85 L. Ed. 2d 528, 105 S. Ct. 2174 (1985)*** (noting jurisdiction is proper where contacts "proximately result from actions by the defendant *himself* that create a 'substantial connection' with the forum State").

o **Relation of Claim to Activities in Forum**

Accordingly, without a sufficient allegation of purposeful availment, the court finds that plaintiffs are unable to establish that their claim that defendant Ueno USA unlawfully fixed the price of the sorbates sold in Kansas in violation of Kansas ***antitrust law*** satisfies the second element of the due process analysis, **[**23]** i.e., that the "claim must be one which arises out of or results from the defendant's forum-related activities."

o **Reasonableness**

The court next examines whether plaintiffs have made a sufficient showing that this court's exercise of jurisdiction over the moving defendants would be reasonable. ***HN22***[] In determining whether the exercise of jurisdiction is so unreasonable as to violate "fair play and substantial justice," the court considers:

(1) the burden on the defendant, (2) the forum state's interest in resolving the dispute, (3) the plaintiff's interest in receiving convenient and effective relief, (4) the interstate judicial system's interest in obtaining the most efficient

[4] The court finds these allegations are uncontroverted by any of defendant Ueno USA's submittals. Although defendant Ueno USA's affidavit indicates that it does "not sell any sorbates products to any resident of Kansas" and sets out the distribution channels through which it receives and sells its sorbate products, it does not refute plaintiffs' allegations that its business activities of selling and distributing sorbates were placed in the stream of commerce. In fact, defendant Ueno USA's affidavit indicates that, at one point in the distribution chain through which it receives its sorbates, goods are delivered "for sale to customers in the United States." (Def. Ueno USA's Mot., Komatsu aff. at P5).

resolution of controversies, and (5) the shared interest of the several states in furthering fundamental substantive social policies.

OMI Holdings, Inc. v. Royal Ins. Co. of Canada*, *149 F.3d 1086, 1095-96 (10th Cir. 1998) (citing ***Asahi Metals Indus., 480 U.S. at 113*)**.

The first factor weighs in favor of defendant Ueno USA. Defending itself in this forum will be burdensome on defendant Ueno USA. Defendant Ueno USA is a Delaware corporation **[**24]** with its principal place of business in New York. Moreover, defendant Ueno USA has no offices or employees in Kansas. However, this finding is not dispositive because, despite the apparent burden on defendant Ueno USA in defending itself in this forum given its geographical distance from Kansas, ***HN23***[] the Tenth Circuit has recognized that because "modern commercial transactions often involve little contact with the forum beyond that of mail and telephone communications . . . defending a suit in a foreign jurisdiction is not as burdensome as in the past." ***Cont'l Am. Corp. v. Camera Controls Corp.*, *692 F.2d 1309, 1314 (10th Cir. 1982)***.

The second factor weighs in favor of plaintiffs. Plaintiffs allege violations of Kansas ***antitrust law*** based on defendant Ueno USA's alleged distribution or sales of sorbates in Kansas. Moreover, resolution of plaintiffs' claims may require interpretation of novel issues of first impression under Kansas's antitrust laws. ***HN24***[] There is a recognized advantage to "having a local court determine questions of local law." ***Chrysler Credit Corp. v. Country Chrysler, Inc.*, *928 F.2d 1509, 1516 (10th Cir. 1991)***.

The third **[**25]** factor is neutral. Plaintiffs are either Kansas corporations or entities that own and operate grocery stores in Kansas or have purchased products containing sorbates from Kansas grocery **[*1267]** wholesalers. Plaintiffs are suing on behalf of themselves and purportedly on behalf of a class of retail grocers that purchased products in Kansas. Plaintiffs' claims are raised under Kansas law. However, there has been no showing that plaintiffs' "chances for recovery will be greatly diminished by forcing [them] to litigate in another forum because of that forum's laws or because the burden may be so overwhelming as to practically foreclose pursuit of the lawsuit." ***OMI Holdings, 149 F.3d at 1097***. The court is unconvinced that plaintiffs could not receive effective relief in an alternate forum.

The fourth factor weighs slightly in favor of plaintiffs. ***HN25***[] The "key inquiry" in determining "whether the forum state is the most efficient place to litigate the dispute . . . [is] the location of witnesses, where the wrong underlying the lawsuit occurred, what forum's substantive law governs the case, and whether jurisdiction is necessary to prevent piecemeal litigation." *Id.* **[**26]** (citations omitted). First, there is evidence that witnesses necessary to litigate the present case are located both within and outside the state. Second, the underlying wrongful conduct asserted in this lawsuit occurred in various locations where meetings occurred and agreements were allegedly made regarding the fixing of sorbate prices. Although there is no evidence that these meetings or agreements were entered into in Kansas, plaintiffs' alleged damages arise from the defendants' sale or distribution of sorbates with unlawfully fixed prices in Kansas, either directly or indirectly as alleged in plaintiffs' complaint. Third, Kansas law governs the case. Finally, the court notes that several defendants have filed a motion to transfer this case to the United States District Court for the Northern District of California, contending that piecemeal litigation may be avoided by such transfer. However, at the time of the court's review of the current motion, it appears that the related case has been resolved. Therefore, although the record contains reference to other similar suits either pending or now resolved in other jurisdictions, it does not appear that maintenance of the currently **[**27]** pending action would promote piecemeal litigation.

Finally, as set out by the Tenth Circuit, ***HN26***[] the court's analysis of the fifth factor "focuses on whether the exercise of personal jurisdiction by Kansas affects the substantive social policy interests of other states or foreign nations." *Id.* With respect to defendant Ueno USA, neither party has set forth an analysis of this factor. Accordingly, the court finds that this factor is neutral.

o **Conclusion**

The court finds that, even where a few of the reasonableness factors weigh in favor of plaintiffs, these factors are not strong enough to overcome the lack of sufficient allegations of purposeful direction. ***HN27***[] There is an "interplay" between the two components of the due process inquiry -- 1) the purposeful availment and its relation to the claim and 2) the reasonableness of the exercise of jurisdiction -- "such that, 'depending on the strength of the defendant's contacts with the forum state, the reasonableness component of the constitutional test may have a greater or lesser effect on the outcome of the due process inquiry.'" ***OMI Holdings, 149 F.3d at 1091*** (quoting ***Int'l Shoe, 326 U.S. at 316*****).** **[**28]** Here, recognizing that some of the factors weigh in favor of plaintiffs, the court finds that because no minimum contacts have been established, the burdens placed on the alien defendant are not justified. *See* ***Asahi Metal Indus., 480 U.S. at 114*** (noting where minimum contacts established "often the interests of the plaintiff and the **[*1268]** forum in the exercise of jurisdiction will justify even the serious burdens placed on the alien defendant"). Therefore, the court finds that on the present facts, even when construed in the light most favorable to plaintiffs, the "maintenance of the suit" against defendant Ueno USA would offend "traditional notions of fair play and substantial justice." ***Int'l Shoe, 326 U.S. at 316*****.** Defendant Ueno USA's motion is granted on this additional basis.

. Defendants Ueno Fine Chemicals Industry, Ltd. and Chisso Corporation's Motions (Doc. 107 & 109)

Similar to the arguments set forth by defendant Ueno USA, both defendants Ueno Fine Chemicals Industry Ltd. (referenced as "Ueno Ltd.") and Chisso Corporation's (referenced as "Chisso Corp.") assert that they are not subject to personal jurisdiction in this court under **[**29]** the Kansas long-arm statute. In addition, defendants Ueno Ltd. and Chisso Corp. assert that the exercise of jurisdiction over them would violate federal due process concepts because they have not "purposefully directed" activities toward Kansas and further that such exercise of jurisdiction would violate traditional notions of fair play and substantial justice.

o **Kansas Long-Arm Statute**

Consistent with its analysis above, the court finds the exercise of jurisdiction over defendants Ueno Ltd. and Chisso Corp. is not appropriate under subsections (b)(1), (b)(2), or (b)(7) of *Kan. Stat. Ann. § 60-308*. Similar to the allegations made regarding defendant Ueno USA, plaintiffs allege that "at all relevant times," defendants Ueno Ltd. and Chisso Corp., "directly or through its affiliates, engaged in the business of the manufacture, distribution and/or sale of sorbates throughout the United States and the world, including Kansas." (Pls.' Compl. at PP13 & 19). In addition, consistent with their allegations against defendant Ueno USA, plaintiffs allege that defendants Ueno Ltd. and Chisso Corp. "through distributors . . . sold sorbates in Kansas to various indirect purchasers. **[**30]** " (*Id.* at P53). Defendants Ueno Ltd. and Chisso Corp. have set forth affidavits contending that they have not transacted business in Kansas. Generally, these defendants contend that they do not sell any sorbates products to any resident of Kansas and that they have not sold any sorbate products to the plaintiffs in this action. Moreover, these defendants contend that they have no offices, employees, or ownership interests in Kansas. (Def. Ueno Ltd.'s Resp., Ohashi aff.) (Def. Chisso Corp.'s Resp., Akuzawa aff.).

Similar to its analysis with respect to the insufficiency of the allegations against defendant Ueno USA, the court finds that plaintiffs' unverified allegations that defendants Ueno Ltd. and Chisso Corp. distributed or sold sorbates to various indirect purchasers in Kansas, when considered in light of defendant Ueno Ltd and Chisso Corp.'s verified affidavits, fail to satisfy the necessary showing of the transaction of business in Kansas under subsection (b)(1) of *Kan. Stat. Ann. § 60-308(b)(1)*.

Moreover, because identical claims are made against defendant Ueno Ltd. and Chisso Corp., the court finds, under its analysis set forth above, that plaintiffs' **[**31]** allegations under the Kansas ***antitrust law*** are insufficient to bring their claims against defendants Ueno Ltd. and Chisso Corp. within the purview of subsection (b)(2) or (b)(7) of *Kan. Stat. Ann. § 60-308*. Accordingly, the court finds plaintiffs have failed to make the threshold prima facie showing that the exercise of jurisdiction under *§ 60-308(b)(1)*, *(b)(2)*, or *(b)(7)* is appropriate. Defendants Ueno Ltd. and **[*1269]** Chisso Corp.'s motions are granted on this basis.

o **Due Process Considerations**

The Tenth Circuit's three part standard governs the court's analysis here. ***Rambo, 839 F.2d at 1419 n.6*.** Given the similarity of these defendants' arguments to those asserted by defendant Ueno USA and the similar allegations by plaintiffs against all three moving defendants, [5] the court finds that the analysis set forth above regarding purposeful availment and relation of claim to activities in the forum is dispositive here.

[32]** In addition, the court's analysis of the reasonableness of its exercise of jurisdiction over defendants Ueno Ltd. and Chisso Corp. is also generally dispositive here. However, additional factors must be considered when examining the first factor under the reasonableness inquiry--the burden on defendant. Specifically, defendants Ueno Ltd. and Chisso Corp.'s status as foreign corporations requires the court to examine the additional burden that would be imposed where these defendants are required to defend themselves in this jurisdiction.

As set out by the Supreme Court, ***HN28***[] the "unique burdens placed upon one who must defend oneself in a foreign legal system should have significant weight in assessing the reasonableness of stretching the long-arm of personal jurisdiction over national borders." ***Asahi Metal Indus., 480 U.S. at 114*.** Here, the exercise of jurisdiction over defendants Ueno Ltd. and Chisso Corp. would force them to travel outside their home country and to litigate the present claims in a foreign forum. Given the analysis set forth above regarding the interplay between the two components of the due process analysis, the court finds that this **[**33]** additional factor weighing in favor of defendants Ueno Ltd. and Chisso Corp. bolsters the court's finding that the exercise of jurisdiction over these defendants is not reasonable. The court finds the interests of the plaintiffs and of this forum in asserting jurisdiction over defendants Ueno Ltd. and Chisso Corp. are not sufficient to outweigh the burdens placed on defendants Ueno Ltd. And Chisso Corp. in light of the plaintiffs' failure to establish purposeful availment.

Considering the relevant factors, the court finds that on the present facts construed in the light most favorable to plaintiffs, the "maintenance of the suit would offend 'traditional notions of fair play and substantial justice.'" ***Int'l Shoe, 326 U.S. at 316*.** Defendants Ueno Ltd. and Chisso Corp.'s motions are granted on this additional basis.

. **Order**

IT IS THEREFORE ORDERED that defendants Ueno Fine Chemicals Industry (USA), Inc., Ueno Fine Chemicals Industry, Ltd., and Chisso Corporation's Motions to Dismiss for Lack of Personal Jurisdiction (Docs. 105, 107 & 109) are hereby granted. Defendants Ueno Fine Chemicals Industry (USA), Inc., Ueno Fine **[*1270]** Chemicals Industry, **[**34]** Ltd., and Chisso Corporation are hereby dismissed from this case.

Dated this 8th day of January 2003, at Kansas City, Kansas.

CARLOS MURGUIA

United States District Judge

---

[5] The court finds that the plaintiffs' allegations regarding the placement of the defendants' products in the stream of commerce or the effect that their placement had on the Kansas economy have not been controverted by either defendant Chisso Corp. or defendant Ueno Ltd. Defendant Ueno Ltd. made the same showing as noted above for defendant Ueno USA. In addition, defendant Chisso Corp. verified that it "sells sorbates to several Japanese corporations" that then "resell the sorbates to other distributors that sell the product either to still other distributors or to the end users." (Def. Chisso's Mot., Akuzawa aff. at P2). Defendant Chisso also verified that it "does not control the activities of [the corporations] that sell its products."

HN5[] **Jurisdiction, Jurisdictional Sources**

The United States Supreme Court has implied immunity from the antitrust laws in particular and discrete instances to assure that a federal agency entrusted with regulation in the public interest can carry out that responsibility free from the disruption of conflicting judgments that might be voiced by courts exercising jurisdiction under the antitrust laws.

Antitrust & Trade Law > Regulated Industries > General Overview

Business & Corporate Law > ... > Actual Authority > Implied Authority > General Overview

Governments > Legislation > Expiration, Repeal & Suspension

HN6[] **Authority to Act, Actual Authority**

With respect to the antitrust laws, the implied repeal doctrine has been summarized as operating in two narrowly-defined situations, to wit, first, when an agency, acting pursuant to a specific congressional directive, actively regulates the particular conduct challenged, and second, when the regulatory scheme is so pervasive that Congress must be assumed to have forsworn the paradigm of competition.

Antitrust & Trade Law > Regulated Industries > Financial Institutions > General Overview

Business & Corporate Compliance > ... > Regulators > US Securities & Exchange Commission > Necessity for Regulation

Business & Corporate Compliance > ... > Labor & Employment Law > Affirmative Action > Program Compliance

HN7[] Regulated Industries, Financial Institutions

Implied immunity exists where allowing an antitrust lawsuit to proceed would conflict with Congress's implicit determination that the Securities and Exchange Commission (SEC) should regulate the alleged anti-competitive conduct. The source of the conflict may, but need not, involve affirmative SEC action. Conflict also can exist where the SEC has jurisdiction over the challenged activity and deliberately has chosen not to regulate it.

Antitrust & Trade Law > Regulated Industries > General Overview

Governments > Legislation > Expiration, Repeal & Suspension

HN8[] Antitrust & Trade Law, Regulated Industries

Antitrust immunity is not to be presumed from the mere existence of overlapping authority; rather the analysis must focus on the "potential" for conflicts between the antitrust laws and an authorized regulatory scheme. The term "plain repugnancy" has been used to describe the tension between statutes that justifies implied repeal. The antitrust laws may not apply when such laws would prohibit an action that a regulatory scheme might allow.

Business & Corporate Compliance > ... > Regulators > US Securities & Exchange Commission > Necessity for Regulation

Governments > Legislation > Expiration, Repeal & Suspension

Securities Law > Blue Sky Laws > Offers & Sales

Antitrust & Trade Law > Regulated Industries > Financial Institutions > General Overview

HN9[] US Securities & Exchange Commission, Necessity for Regulation

The Securities Exchange Act of 1934, 15 U.S.C.S. § 78a et seq., impliedly repeals 15 U.S.C.S. § 1 of the Sherman Act with respect to the listing and trading of equity options, because the implied repeal is necessary to preserve the authority of the Securities and Exchange Commission (SEC) to regulate that conduct. The Exchange Act itself does not prohibit agreements for exclusivity in options listing, and the SEC has taken varied positions with respect to the appropriateness of multiplicity, in part because under the Exchange Act it is concerned with more than just the protection of competition, which is the sole aim of antitrust legislation. The SEC must consider, in addition, the economic health of the investors, the exchanges, and the securities industry. Thus, in evaluating the wisdom under the Exchange Act of requiring or prohibiting multiple listings, the SEC has perforce balanced the interest of promoting competition, on the one hand, against undesirable potential effects, on the other hand, such as market fragmentation, financial injury to regional exchanges, and deleterious structural changes in the markets in order to carry out its statutory duty to enhance the economically efficient execution of securities transactions. 15 U.S.C.S. § 78k-1(a)(1)(C)(i).

Antitrust & Trade Law > Regulated Industries > General Overview

Governments > Legislation > Expiration, Repeal & Suspension

Business & Corporate Law > ... > Authority to Act > Actual Authority > General Overview

Business & Corporate Law > ... > Actual Authority > Implied Authority > General Overview

HN10[] **Antitrust & Trade Law, Regulated Industries**

The appropriateness of an implied repeal of the antitrust laws does not turn on whether the antitrust laws conflict with the current view of a regulatory agency; rather, it turns on whether the antitrust laws conflict with an overall regulatory scheme that empowers the agency to allow conduct that the antitrust laws would prohibit.

Antitrust & Trade Law > Regulated Industries > General Overview

Business & Corporate Law > ... > Actual Authority > Implied Authority > Conduct of Parties

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Governments > Legislation > Expiration, Repeal & Suspension

HN11[] **Antitrust & Trade Law, Regulated Industries**

In determining whether the antitrust laws have been impliedly repealed, the proper focus is not on the an agency's current regulatory position but rather on the agency's authority to permit conduct that the antitrust laws would prohibit.

Administrative Law > Judicial Review > Standards of Review > Deference to Agency Statutory Interpretation

Administrative Law > Judicial Review > Standards of Review > General Overview

Administrative Law > Separation of Powers > Legislative Controls > Implicit Delegation of Authority

HN12[] **Standards of Review, Deference to Agency Statutory Interpretation**

A court may not substitute its own construction of a statutory provision for a reasonable interpretation made by the administrator of an agency to which interpretive authority has been delegated. Although some deference may be accorded to an agency's view on a matter within its particular expertise, the decision as to whether, in a given set of circumstances, one statutory scheme supersedes the other is, "in the end," to be made by the courts.

Antitrust & Trade Law > Regulated Industries > Financial Institutions > General Overview

Governments > Legislation > Expiration, Repeal & Suspension

Business & Corporate Compliance > ... > Regulators > US Securities & Exchange Commission > Necessity for Regulation

HN13[] **Regulated Industries, Financial Institutions**

The determination of whether implied repeal of the antitrust laws is necessary to make the Securities Exchange Act of 1934, *15 U.S.C.S. § 78a et seq.*, provisions work is a matter for the courts.

Business & Corporate Compliance > ... > Regulators > US Securities & Exchange Commission > Necessity for Regulation

Securities Law > Blue Sky Laws > Types of Securities > Options, Subscription Rights & Warrants

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Regulated Industries > Financial Institutions > General Overview

Securities Law > Civil Liability Considerations > Remedies > Equitable Relief

HN14[] **US Securities & Exchange Commission, Necessity for Regulation**

The Securities and Exchange Commission (SEC) has ample statutory authority, which it has repeatedly exercised, to regulate the listing and trading of equity options. Although the SEC's present stance is that agreements for exclusive listing are forbidden, the SEC has the power to alter that position if it concludes that other concerns within its domain outweigh the need to protect competition. The United States Court of Appeals for the Second Circuit sees no way to reconcile that SEC authority, which may be exercised to permit agreements for exclusive listing of equity options, with the antitrust laws. Accordingly, with respect to the listing and trading of options on securities exchanges, the Securities Exchange Act of 1934, *15 U.S.C.S. § 78a et seq.*, impliedly immunizes defendants against liability under *15 U.S.C.S. § 1* of the Sherman Act.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Immunity

Governments > Legislation > Expiration, Repeal & Suspension

HN15[] **Class Actions, Compromise & Settlement**

Although the doctrine of implied repeal of the antitrust laws is sometimes described in terms of the district court's "antitrust jurisdiction," it is more properly viewed as conferring an immunity that is an affirmative defense that does not affect the court's subject matter jurisdiction over the action.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN16[] **Subject Matter Jurisdiction, Federal Questions**

As a general matter, where a complaint is so drawn as to seek recovery directly under the Constitution or laws of the United States, a district court has subject matter jurisdiction unless the federal claim clearly appears to be immaterial and made solely for the purpose of obtaining jurisdiction or where such a claim is wholly insubstantial and frivolous. Thus, the district court has jurisdiction where the right of the petitioners to recover under their complaint will be sustained if the Constitution and laws of the United States are given one construction and will be defeated if they are given another.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN17[] **Subject Matter Jurisdiction, Federal Questions**

The "inadequacy" of a federal claim is ground for dismissal for lack of subject-matter jurisdiction only when the claim is so insubstantial, implausible, foreclosed by prior decisions of the United States Supreme Court, or otherwise completely devoid of merit as not to involve a federal controversy. Once a federal court has determined that a plaintiff's jurisdiction-conferring claims are not insubstantial on their face, no further consideration of the merits of the claim is relevant to a determination of the court's jurisdiction of the subject matter. Thus, the district court's subject matter jurisdiction to entertain a suit based on a federal claim that is not wholly insubstantial, frivolous, or foreclosed by prior decisions of the Supreme Court, is not defeated by the defendant's assertion of a position that is properly characterized as an affirmative defense.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Immunity

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Waiver & Preservation of Defenses

HN18[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Most immunities are affirmative defenses. In addition to the 19 affirmative defenses set forth in *Fed. R. Civ. P. 8(c)*, that rule requires any other matter constituting an avoidance or an affirmative defense to be pleaded. Affirmative defenses and avoidances other than those specifically referenced in *Rule 8(c)* have been found to include common law immunity, statutory immunity, and exemption under a statute or regulation. Affirmative defenses can be waived; lack of subject matter jurisdiction cannot be waived.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Governments > Legislation > Expiration, Repeal & Suspension

HN19[] **Antitrust & Trade Law, Exemptions & Immunities**

In discussing whether a given federal securities statute impliedly repeals an ***antitrust law***, the United States Supreme Court has not suggested that the implied repeal deprives a district court of subject matter jurisdiction. It has instead referred to the implied repeal as giving the defendant "immunity" from liability under the antitrust laws.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Immunity

HN20[] Antitrust & Trade Law, Exemptions & Immunities

Although an implied antitrust immunity prevents a court from exercising jurisdiction under the antitrust laws, in none of its cases has the United States Supreme Court suggested that that immunity is anything more than an affirmative defense.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Constitutional Law > The Judiciary > General Overview

Governments > Legislation > Expiration, Repeal & Suspension

HN21[] Antitrust & Trade Law, Exemptions & Immunities

There can be no suggestion that the immunity conferred on a private entity on the basis that it is subject to one set of laws that takes precedence over another law is on a par with the immunity enjoyed by a government. The immunity conferred by an implied repeal of the antitrust laws simply prevents the court from imposing liability under those laws.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Governments > Legislation > Expiration, Repeal & Suspension

HN22[] Sherman Act, Jurisdiction

A determination of whether there is an implied repeal requires a thorough analysis of the precise practice that has been challenged and the regulatory scheme with respect to that practice.

Judges: Before: KEARSE and JACOBS, Circuit Judges, and JONES, District Judge [*].

Opinion by: KEARSE

Opinion

[*138] KEARSE, *Circuit Judge*:

Plaintiffs in these class action suits, which were consolidated for pretrial purposes in the United States District Court for the Southern District of New York, appeal from a judgment of that court, Richard Conway Casey, *Judge*, dismissing their claims that the conduct of defendants American Stock Exchange, Inc. ("AMEX"), *et al*., in restricting stock-exchange listings of certain securities for options trading violated *§ 1* of the Sherman Antitrust Act, *15 U.S.C. § 1 (2000)* ("Sherman Act"). The district court granted summary judgment in favor of defendants, ruling that the Sherman Act, insofar as it might have applicability to the listing and trading of options on securities exchanges regulated by the Securities and Exchange Commission ("SEC" **[**5]** or "Commission"), has been impliedly repealed by the Securities Exchange Act of 1934, *15 U.S.C. § 78a et seq. (2000)* ("Exchange Act"). Plaintiffs also appeal from a post judgment order of the district court, ruling that the implied repeal of the Sherman Act with respect to plaintiffs' claims deprived the court of subject matter jurisdiction to entertain motions, made under *Fed. R. Civ. P. 23(e)* prior to the court's ruling on the motions for summary judgment, for judicial approval of settlement agreements entered into between plaintiffs and certain of the defendants. On appeal, plaintiffs contend principally that the district court erred (a) in holding that the Sherman Act's application to restrictions on options listing and trading is impliedly repealed by the Exchange Act, and (b) in ruling that the court lacked jurisdiction to approve the proposed settlements of these class actions. For the reasons that follow, we affirm the dismissal of the antitrust claims, but we vacate the post judgment order and remand for further proceedings with respect to the settlement agreements.

I. BACKGROUND

[*] Honorable Barbara S. Jones, of the United States District Court for the Southern District of New York, sitting by designation.

The present litigation involves the trading of equity options on **[**6]** various stock exchanges. The facts material to the district court rulings that are the subject of this appeal are not in dispute.

A. *The Complaints, the Motions To Dismiss, and the History of SEC Regulation of Options Trading*

Plaintiffs are persons who purchased equity options after December 31, 1994. Defendants are AMEX, the Chicago Board Options Exchange, Inc. ("CBOE"), the New York Stock Exchange, Inc. ("NYSE"), the Pacific Stock Exchange, Inc. ("Pacific Exchange"), the Philadelphia Stock Exchange, Inc. ("Philadelphia Exchange") (collectively "the Exchanges"), and members of the Exchanges that acted as market makers and specialists in options trading (the "market maker defendants"). In early 1999, various plaintiffs commenced more than 20 class actions alleging that defendants had conspired to restrict the listing and trading of particular options to one stock exchange at a time, thereby restraining trade in such options in violation of *§ 1* of the Sherman Act.

[*139] The Judicial Panel on Multi district Litigation transferred the actions to the Southern District of New York for consolidated pretrial proceedings. A consolidated complaint was filed, alleging antitrust violations **[**7]** as described above and seeking monetary and injunctive relief. In January 2000, the Exchanges, joined by the market maker defendants, moved pursuant to *Fed. R. Civ. P. 12(b)(6)* for dismissal of the consolidated complaint on the ground, *inter alia*, that Congress had impliedly repealed the antitrust laws with respect to the listing and trading of options by empowering the SEC to regulate those matters.

The history of the SEC's regulation of options trading on securities exchanges is undisputed and is set forth in detail in the Opinion and Order of the district court dated February 14, 2001, which dismissed the antitrust claims, *see* *In re Stock Exchanges Options Trading Antitrust Litigation, 2001 U.S. Dist. LEXIS 1381, 99* Civ. 962, 2001 WL 128325 (S.D.N.Y. Feb. 15, 2001) ("District Court Opinion" or "February 14 Opinion"). The course of that regulation is summarized here.

The trading of options on national exchanges began in 1973 when CBOE became registered as a national exchange; such trading was regulated in Rule 9b-1, promulgated by the Commission under the Exchange Act, *see* SEC Rule 9b-1, *17 C.F.R. § 240.9b-1*. When other exchanges proposed to list options **[**8]** for trading, the SEC commenced a study of the practice, including the question of whether the trading of options on a given class of securities should be allowed to proceed on multiple exchanges. *See* *SEC Release No. 10490, 1973 SEC LEXIS 2349*, at *1, *9-*10 (Nov. 14, 1973). After a public hearing, the Commission concluded in 1974 that additional study was required before allowing, *inter alia*, "multiple exchange option trading." *SEC Release No. 11144, 1974 SEC LEXIS 2108*, at *4 (Dec. 19, 1974). At that time, the SEC authorized AMEX to allow options trading, and it noted that AMEX did not intend to allow dual trading. *See* *1974 SEC LEXIS 2108* at *5.

In 1976, the SEC allowed CBOE to list options that were already traded on another exchange. *See generally* *49 S.E.C. 1158*, *SEC Release No. 26809, 1989 SEC LEXIS 828*, at *5 (May 11, 1989) . It also allowed the Pacific Exchange to commence options trading and noted that that Exchange planned to list options that were being traded on other exchanges. *See* *SEC Release No. 12283, 1976 SEC LEXIS 2040*, at *3 (Mar. 30, 1976). In early 1977, the Commission invited public comment on multiple listing, *see* *SEC Release No. 13325, 1977 SEC LEXIS 2290*, at *1 (Mar. 3, 1977) **[**9]** , and expressed concern that, in the course of trading options listed on more than one exchange, floor members of certain exchanges might be violating the Exchange Act, *see* *SEC Release No. 13433, 1977 SEC LEXIS 2036*, at *1 (Apr. 5, 1977). Later in 1977, the Commission requested that the exchanges voluntarily cease the listing of new options classes pending a comprehensive SEC review of options trading. *See* *SEC Release No. 13760, 1977 SEC LEXIS 1251*, at *1 (July 18, 1977). It proposed to issue a rule temporarily barring such new listings if the exchanges would not suspend them voluntarily; the rule became unnecessary because the exchanges complied voluntarily, *see* *SEC Release No. 15026, 1978 SEC LEXIS 997*, at *3 (Aug. 3, 1978), and continued to comply until the SEC lifted the moratorium in 1980, *see* *SEC Release No. 16701, 1980 SEC LEXIS 1784*, at *1 (Mar. 26, 1980) ("SEC Mar. 26, 1980 Release").

In 1980, the Commission permitted the resumption of new listings and trading **[*140]** generally, but it stated that it needed to consider further whether to continue its current policy of restricting multiple **[**10]** trading in exchange-traded options or whether to permit a more unfettered competitive environment in which an options exchange would be free to trade any eligible options class, subject to the adequacy of its surveillance and other self-regulatory capabilities.

> *1980 SEC LEXIS 1784* at *22-*23. As the district court noted,
>
> the SEC identified a number of possible adverse effects from multiple trading, including (i) market fragmentation; (ii) the likelihood that meaningful competition among market centers may be, at best, transitory because of member firms' automatic order routing practices; and (iii) the potential negative impact on the financial position of the regional exchanges. [SEC Mar. 26, 1980 Release] *1980 SEC LEXIS 1784* at *28-*30. The Commission believed that some of its concerns might be alleviated by the development of market integration facilities, and expressed an inclination toward multiple trading. However, the SEC deferred further action, requesting that the exchanges consider "whether, and to what extent, the development of market integration facilities would minimize concerns regarding market fragmentation and maximize competitive opportunities in the options markets." *1980 SEC LEXIS 1784* at *32. **[**11]**

District Court Opinion, 2001 U.S. Dist. LEXIS 1381, 2001 WL 128325, at *4.

On May 30, 1980, the SEC approved a plan, formulated by the exchanges jointly, for the single, or exclusive, listing of any new equity option. *See* *SEC Release No. 16863, 1980 SEC LEXIS 1378*, at *1-*2 (May 30, 1980). The new listings were to be allocated among the several exchanges on a rotating basis. *See id*. While permitting multiple listings of other types of options and of over-the-counter securities, the Commission remained concerned that "unlimited multiple trading of equity options at this time might result in significant deleterious structural changes in the markets, with a resultant decrease in competition in other areas such as services relating to execution and clearing functions." *SEC Release No. 17577, 1981 SEC LEXIS 1976*, at *17 (Feb. 26, 1981) (footnote omitted).

In 1987, the Commission proposed the adoption of a multiple-trading rule and announced the commencement of a proceeding to consider, *inter alia*, whethertopermit such multiple-market trading. *See* SEC Release No. 34-24613, *1987 SEC LEXIS 4394*, at *5 (June 18, 1987). In 1989, the Commission **[**12]** announced the adoption of Rule 19c-5, which it described as allowing "an exchange unilaterally [to] decide, as a business matter, not to multiply trade any particular option," but prohibiting an exchange from "reaching an agreement with one or more other exchanges to refrain from multiple trading." SEC Release No. 34-26870, *1989 SEC LEXIS 941*, at *39 (May 26, 1989). Multiple listing was to be implemented gradually. Rule 19c-5 provided that, as of January 22, 1990, an exchange was to be prohibited from adopting any rule, policy, or practice that limited its ability to list any equity options that had first been listed on an exchange on or after that date, *see* SEC Rule 19c-5(a)(1), *17 C.F.R. § 240.19c-5(a)(1) (2002)*; from January 22, 1990, to January 21, 1991, an exchange was to be prohibited from adopting such a rule, policy, or practice with respect to 10 classes of options that had been listed on another exchange prior to January 22, 1990, *see* SEC Rule 19c-5(a)(2), *17 C.F.R. § 240.19c-5(a)(2) (2002)*; and effective January 21, 1991, an exchange **[*141]** was to be prohibited from adopting such a rule, policy, or **[**13]** practice with respect to any equity options, *see* SEC Rule 19c-5(a)(3), *17 C.F.R. § 240.19c-5(a)(3) (2002)* ("No rule, stated policy, practice, or interpretation of this exchange shall prohibit or condition, or be construed to prohibit or condition or otherwise limit, directly or indirectly, the ability of this exchange to list any stock options class because that options class is listed on another options exchange.").

Notwithstanding the terms of Rule 19c-5, the SEC, shortly before the Rule was to become effective, asked exchanges to refrain from the multiple listing of such options as had previously been listed only singly. (*See*, *e.g.*, Letter from SEC Chairman Richard C. Breeden to AMEX Chairman James R. Jones, dated January 9, 1990, at 3.) Such requests were renewed over the next 2 1/2 years. (*See*, *e.g.*, Letter from SEC Chairman

Richard C. Breeden to CBOE Chairman Alger B. Chapman, dated July 31, 1991, at 2 ("As you know, I have repeatedly asked the options exchanges not to commence multiple listing under Rule 19c-5" pending the development of a cost-effective linkage mechanism); Letter from SEC Chairman Richard C. Breeden to AMEX **[**14]** Chairman James R. Jones, dated June 30, 1992, at 4 ("Although Rule 19c-5 remains in effect, I would ask you to extend the application of the voluntary moratorium until November 20, 1992, to provide the exchanges adequate time to make any rule changes or operational enhancements necessary to implement [a proposed] Phase-In Plan.").)

The SEC's moratorium on multiple listing was lifted beginning in November 1992. By the end of 1994, all equity options were eligible for multiple listing. The Commission had noted, however, that it retained ultimate authority over such listings:

> Section 19(h) [of the Exchange Act] provides the Commission with the authority to take action against an exchange if the Commission finds that the exchange is in violation of the [Exchange] Act, the rules and regulations thereunder, or its own rules. Accordingly, notwithstanding the [phase-in] Plan, the Commission has the authority to prevent an exchange from listing a new option if the Commission finds that the option does not meet the exchange's initial options listing standards.

SEC Release No. 34-29698, *1991 SEC LEXIS 1864*, at *12 (Sept. 17, 1991) . In 1997, the SEC exercised **[**15]** this authority to approve the sale by NYSE of its options business to CBOE. The SEC rejected assertions that the sale tended to create a monopoly, stating that it "would regard any anticompetitive arrangements in the trading of options to be of very serious concern, but [that] after reviewing the proposed transfer closely, the Commission disagrees with these assertions." SEC Release No. 34-38542, *1997 SEC LEXIS 900*, at *21 (Apr. 23, 1997).

As noted in the District Court Opinion, the Commission since 1997 has

> continued to oversee the options markets and to approve coordinated activity by the exchanges. Pursuant to Rules 12d1-3 and 12d2-2, respectively, the SEC is informed each time an exchange proposes to list or delist an equity options class. The SEC recently authorized the exchanges to act jointly with respect to a number of issues, such as (1) planning strategies for options quote message traffic, (2) developing an inter-market linkage plan for multiply traded options and (3) phasing-in the implementation of decimal pricing.

District Court Opinion, 2001 U.S. Dist. LEXIS 1381, 2001 WL 128325, at *6 (citing SEC Release No. 34-41843, *1999 SEC LEXIS 1807*, at *1 (Sept. 8, **[*142]** 1999); **[**16]** SEC Release No. 34-42029, *1999 SEC LEXIS 2215*, at *1 (Oct. 19, 1999); SEC Release No. 34-42360, [2000] SEC LEXIS 114, at *1 (Jan. 28, 2000). Indeed, the SEC, as well as the United States Department of Justice ("DOJ"), investigated assertions of antitrust violations such as those alleged in the present class actions. In September 2000, the SEC found that certain exchanges had improperly followed a course of conduct that limited multiple listing. *See*, *e.g.*, *SEC Release No. 43268, 2000 SEC LEXIS 1881*, at *8 (Sept. 11, 2000) ("Member firms of certain of the respondent exchanges made proposals to multiply list options. In order to avoid or defe multiple listing, the respondent exchanges rebuffed or denied these proposals without an adequate basis in their rules and, in some instances, threatened or harassed member firms who made the proposals."). The exchanges in question were censured, and they agreed, *inter alia*, to change certain procedures that had facilitated exclusivity of listing. *2000 SEC LEXIS 1881* at *15.

In connection with defendants' motions to dismiss the consolidated complaint on the ground that the SEC's authorized **[**17]** regulation of the listing and trading of options constituted an implied repeal of the Sherman Act with respect to such matters, the DOJ submitted to the district court a brief on behalf of the United States as *amicus curiae*, arguing that implied repeal is not warranted. The DOJ's brief stated that

> the court can, and should, hold that the alleged conduct, which as alleged contravenes both SEC rule and the Sherman Act, is, like other conspiracies in restraint of trade, subject to the federal antitrust laws. To avoid any possible future conflict with SEC regulatory policy, the court should consider including in any injunction language permitting otherwise enjoined conduct should the SEC, acting pursuant to statutory authorization, permit such conduct in the future.

. . . .

> The court should hold that there is no implied repeal of the antitrust laws with respect to alleged conduct prohibited by SEC rule.

(DOJ *amicus curiae* brief to the district court, dated June 1, 2000, at 12-13.)

The district court invited the SEC as well to submit its views as *amicus curiae*. The Commission complied, in a brief in which it concurred in the view of the DOJ "that **[**18]** the federal antitrust laws are not impliedly repealed with respect to the conduct alleged in these cases, if it occurred." (SEC *amicus curiae* brief to the district court, dated June 16, 2000, at 2.) The Commission stated that

> this is an unusual case, in which the Commission has addressed the precise conduct at issue and has decided to prohibit it in order to provide competition among the exchanges. It does not present a situation where, in our view, the antitrust laws are impliedly repealed, such as where the securities laws authorize the conduct or the Commission has approved or permitted it, either expressly or implicitly--for example, by failing to act with respect to conduct 8 subject to the Commission's pervasive regulation.

(*Id*. at 2-3.)

Thereafter, the district court notified the parties that it would convert defendants' *Rule 12(b)(6)* motions, to the extent that they were based on the theory of implied repeal, to motions for summary judgment. The court invited the parties to file additional papers and indicated that it would decide the implied repeal issue first, which might dispose of the entire antitrust dispute. Oral argument of the motions was **[**19]** heard in November 2000.

[*143] B. *The Proposed Settlements*

In the meantime, plaintiffs had reached settlement agreements with certain of the 17 defendants. In May 2000, plaintiffs entered into agreements with the Pacific Exchange and the Philadelphia Exchange. In September 2000, plaintiffs entered into agreements with AMEX, CBOE, and of the market maker defendants. The agreements, with certain caveats, called for the settling defendants to pay the plaintiff class a total of more than $ 84 million. As ***HN1***[] court approval is required for the settlement of a class action, *see* *Fed. R. Civ. P. 22* 23(e), plaintiffs and those defendants promptly moved in the district court for approval of the respective settlement agreements. In October 2000, the court delayed consideration of the approval motions, stating that it would first determine whether the Sherman Act , to theextent it was invoked in these actions, had been impliedly repealed by the Exchange Act. The court indicated that it would consider the requests for preliminary approval of the settlement agreements after it decided the summary judgment motions.

C. *The District Court's Decisions*

In its February 14, 2001 opinion, **[**20]** the district court granted defendants' summary judgment motions on the ground of implied repeal. The court described the above course of SEC regulation and noted that although the Commission's view had varied considerably as to whether or not multiple listing and trading of equity options should be allowed or prohibited, Commission regulation had been pervasive. The court concluded that, based on the principles set out in *Gordon v. New York Stock Exchange, Inc., 422 U.S. 659, 45 L. Ed. 2d 463, 95 S. Ct. 2598 (1975)*, the Exchange Act impliedly repealed the Sherman Act with respect to the listing and trading of equityoptions on securities exchanges regulated by the SEC. *See* *District Court Opinion, 2001 U.S. Dist. LEXIS 1381, 2001 WL 128325*, at *7.

Following issuance of the February Opinion and prior to the entry of a judgment, plaintiffs and some of the settling defendants asked the district court to set a date for argument of the pending *Rule 23(e)* motions for preliminary judicial approval of the settlement agreements. Motions for such approval had first been filed in mid-2000. Without setting a date to hear those motions, the court entered a final judgment dismissing the consolidated **[**21]** complaint on March 2, 2001 ("March 2001 Judgment" or "Judgment").

By order dated March 6, 2001, the court scheduled argument on the motions for approval of the proposed settlements. In connection with those motions, plaintiffs sought clarification of the March 2001 Judgment. Although the Judgment itself indicated merely that summary judgment was granted, the district court in its February 14 Opinion had stated:

> *This Court has no jurisdiction* to determine whether [plaintiffs'] allegations have any substantive merit. Because the listing and trading of options classes falls within the purview of the regulatory scheme devised by Congress to govern the securities industry, and the active exercise of that authority by the Securities and Exchange Commission . . . conflicts with the operation of the antitrust laws, the Court cannot proceed to adjudicate this matter.

District Court Opinion, 2001 U.S. Dist. LEXIS 1381, 2001 WL 128325, at *1 (emphasis added). Accordingly, on March 16, 2001, plaintiffs moved pursuant to *Fed. R. Civ. P. 59(e)* for an amendment of the Judgment, to

> clarify[] whether the March [2001] Judgment was intended by the Court to be 11 a dismissal **[**22]** for lack of subject matter **[*144]** jurisdiction pursuant to *Fed. R. Civ. P. 12* 12(h)(3), or a dismissal on the merits based upon the affirmative defense of the implied repeal doctrine pursuant to *Fed. R. Civ. P. 56(b)*. If it is the latter, plaintiffs respectfully request that the Court also amend the March [2001] Judgment to provide that it shall only apply to those defendants who had not 16 entered into an agreement to settle all claims asserted against them prior to the entry of the judgment on March 2, 2001 . . . unless the Court subsequently enters an Order denying final approval of the proposed settlements pursuant to *Fed. R. Civ. P. 23(e)* which becomes final after the exhaustion of any appeals, in which event, the March [2001] Judgment would then apply to all of the defendants.

(Plaintiffs' Motion To Alter or Amend Judgment Pursuant to *Rule 59(e) of the Federal Rules of Civil Procedure*, at 1.)

In an Opinion and Order dated April 24, 2001, reported at *171 F. Supp. 2d 174 (2001)* ("April Order"), the district court denied the motion to alter or amend the March 2001 Judgment and refused to approve the settlement agreements on the ground that, "by entering summary **[**23]** judgment in favor of the defendants on the implied repeal issue, this Court divested itself of subject matter jurisdiction over plaintiffs' antitrust claims." *171 F. Supp. 2d at 177*. The court concluded that it thus lacked jurisdiction to entertain the motions for approval of the class action settlements:

> Plaintiffs are correct that federal subject matter jurisdiction was appropriate at the outset of the litigation because *at that time* a dispute existed as to whether the antitrust laws applied to plaintiffs' claims. However, through its Summary Judgment Order, the Court resolved this issue by holding that the antitrust laws were impliedly repealed with respect to the defendants' conduct and dismissed the case. At that point, there was no longer any cause of action over which the Court could exercise jurisdiction.

April Order, 171 F. Supp. 2d at 178 (emphasis in original).

These appeals followed.

II. DISCUSSION

On appeal, plaintiffs contend principally that the district court's application of the doctrine of implied repeal to the allegations of this case was erroneous because there is no conflict between the Exchange Act and the **[**24]** Sherman Act since agreements to restrict the listing and trading of equity options to one exchange at a time are prohibited by both the Sherman Act and SEC Rule 14 19c-5. As to their motions for preliminary court approval of the proposed settlement agreements, plaintiffs contend, *inter alia*, that the district court erred in concluding that the Exchange Act's implied repeal of the Sherman Act deprived the court of jurisdiction to entertain the approval motions. For the reasons that follow, we conclude that the district court's ruling of implied appeal was correct; but we disagree with its conclusion that that ruling deprived it of subject matter jurisdiction over the case.

A. *Implied Repeal of the Antitrust Laws*

HN2[] "It is a cardinal principle of construction that repeals by implication are not favored." United States v. Borden Co., 308 U.S. 188, 198, 84 L. Ed. 181, 60 S. Ct. 182 (1939). The basic framework for analysis of whether federal securities laws impliedly repeal § 1 of the Sherman Act with respect to particular conduct, *i.e.*, whether a defendant is entitled to immunity from liability under the antitrust laws for that conduct, has been set out **[**25]** by the Supreme Court in Silver v. New York Stock Exchange, 373 U.S. 341, 10 L. Ed. 2d 389, 83 S. Ct. **[*145]** 1246 (1963), Gordon v. New York Stock Exchange, Inc., 422 U.S. 659, 45 L. Ed. 2d 463, 95 S. Ct. 2598 (1975) ("*Gordon*"), and United States v. National Association of Securities Dealers, Inc., 422 U.S. 694, 45 L. Ed. 2d 486, 95 S. Ct. 2427 (1975) ("*NASD*").

In *Silver*, the Court established the baseline principle that HN3[] repeal of the antitrust laws by the Exchange Act is to be "implied only if necessary to make that Act work, and even then only to the minimum extent necessary." 373 U.S. at 357. *Silver* involved an antitrust challenge to an order, issued by NYSE pursuant to its Constitution and existing rules, requiring its members to remove any private direct telephone connections they had with offices of nonmember firms. The Court concluded that the Exchange Act did not impliedly repeal the antitrust laws with respect to that NYSE order because, although the Exchange Act gave the SEC

> the power to request exchanges to make changes in their rules, § 19(b), 15 U.S.C. § 78s(b), and **[**26]** impliedly, therefore, to disapprove any rules adopted by an exchange, see also § 6(a)(4), 15 U.S.C. § 78f(b)(4), it did not give the Commission jurisdiction to review particular instances of enforcement of exchange rules.

Silver, 373 U.S. at 357. Because the SEC lacked the authority to regulate the conduct challenged in the complaint, the Court concluded that there was no potential for the antitrust laws to overlap or conflict with the regulatory power of the SEC. *See* id. at 358. Further, given the absence of SEC authority, there was a need for applicability of the antitrust laws, for if those laws were deemed inapplicable the challenged conduct would be unreviewable. *See* id. at 358-59. The Court stated that

> HN4[] *applicability of the antitrust laws . . . rests on the need for vindication of their positive aim of insuring competitive freedom*. Denial of their applicability would defeat the congressional policy reflected in the antitrust laws without serving the policy of the Securities Exchange Act. Should review of exchange self-regulation be provided through a vehicle other than the antitrust **[**27]** laws, a different case as to antitrust exemption would be presented.

Id. at 360 (emphases added).

Such a "'different case'" was presented in *Gordon*, *see*422 U.S. at 685. The conduct challenged there was the practice of securities exchanges and their members of using fixed rates of commission; and unlike the conduct at issue in *Silver*, the fixing of commission rates was subject to ample SEC regulatory authority. The Supreme Court in *Gordon* reiterated the principle enunciated in *Silver* that repeal of the antitrust laws by the Exchange Act is to be "implied only if necessary to make the Securities Exchange Act work, and even then only to the minimum extent necessary," 422 U.S. at 683 (internal quotation marks omitted), and proceeded to explore the history of the rate agreements, the statutory authority conferred on the SEC to regulate commission-rate practices, and the agency's exercise of that authority. The Court noted that

> the commission rate practices of the exchanges have been subjected to the scrutiny and approval of the SEC. If antitrust courts were to impose different standards or requirements, **[**28]** the exchanges might find themselves unable to proceed without violation of the mandate of the courts or of the SEC. Such different standards are likely to result because **[*146]** the sole aim of antitrust legislation is to protect competition, whereas the SEC must consider, in addition, the economic health of the investors, the exchanges, and the securities *industry*. Given the expertise of the SEC, the confidence the Congress has placed in the agency, and the active roles the SEC and the Congress have taken, permitting courts throughout the country to conduct

> their own antitrust proceedings would conflict with the regulatory scheme authorized by Congress rather than supplement that scheme.
> . . . . Although SEC action in the early years appears to have been minimal, it is clear that since 1959 the SEC has been engaged in deep and serious study of the commission rate practices of the exchanges and of their members, and has required major changes in those practices. The ultimate result of this long-term study has been a regulatory decree requiring abolition of the practice of fixed rates of commission as of May 1, 1975, and the institution of full and complete competition.

Gordon, 422 U.S. at 689-90 **[**29]** (footnotes omitted) (emphases added).

The *Gordon* Court also noted that although Congress had subsequently enacted a statutory section adopting the SEC regulatory provision banning fixed rates, Congress also explicitly provided that the SEC, under certain circumstances and upon the making of specified findings, was empowered to allow the resumption of fixed rates. *See* id. at 691. The Court concluded that with respect to commission-rates agreements, the Exchange Act impliedly repealed the Sherman Act:

> In sum, the statutory provision authorizing regulation, § 19(b)(9), the long regulatory practice, and the continued congressional approval illustrated by the new legislation, point to one, and only one, conclusion. The Securities Exchange Act was intended by the Congress to leave the supervision of the fixing of reasonable rates of commission to the SEC. Interposition of the antitrust laws, which would bar fixed commission rates as *per se* violations of the Sherman Act, in the face of positive SEC action, would preclude and prevent the operation of the Exchange Act as intended by Congress and as effectuated through SEC regulatory activity. Implied repeal **[**30]** of the antitrust laws is, in fact, necessary to make the Exchange Act work as it was intended; failure to imply repeal would render nugatory the legislative provision for regulatory agency supervision of exchange commission rates.

Gordon, 422 U.S. at 691.

In *NASD*, the Court was confronted with a Sherman Act suit by the government alleging, *inter alia*, that the National Association of Securities Dealers, along with certain mutual funds, fund underwriters, and broker-dealers, had agreed to restrict the sale, and to fix the resale prices, of mutual fund shares in the secondary market. *See* 422 U.S. at 700. The *NASD* Court, while rejecting the defendants' contention that their conduct was authorized by the language of § 22(f) of the Investment Company Act of 1940 ("1940 Act"), 15 U.S.C. § 80a-22(f), concluded that the "pervasive regulatory scheme," 422 U.S. at 735, established by the 1940 Act and the 1938 Maloney Act amendments to the Exchange Act, *see* 15 U.S.C. § 78o-3, gave the SEC authority to regulate such conduct and that the implied repeal of the Sherman Act **[**31]** with respect to that conduct was necessary in order to preserve the Commission's flexibility to perform its authorized function:

> **[*147]** There can be little question that the broad regulatory authority conferred upon the SEC by the Maloney and Investment Company Acts enables it to monitor the activities questioned in Count I, and the history of Commission regulations suggests no laxity in the exercise of this authority. To the extent that any of appellees' ancillary activities frustrate the SEC's regulatory objectives it has ample authority to eliminate them.
>
> Here implied repeal of the antitrust laws is "necessary to make the [regulatory scheme] work." Silver v. New York Stock Exchange, 373 U.S., at 357. In generally similar situations, **HN5**[] we have implied immunity in particular and discrete instances to assure that the federal agency entrusted with regulation in the public interest could carry out that responsibility free from the disruption of conflicting judgments that might be voiced by courts exercising jurisdiction under the antitrust laws. . . . *In this instance, maintenance of an antitrust action for activities so directly related to the SEC's responsibilities* **[**32]** *poses a substantial danger that appellees would be subjected to duplicative and inconsistent standards*. This is hardly a result that Congress would have mandated. We therefore hold that with respect to the activities challenged in Count I of the complaint, the Sherman Act has been displaced by the pervasive regulatory scheme established by the Maloney and Investment Company Acts.

NASD, 422 U.S. at 734-35 (footnotes omitted) (emphasis added); *see also* *id. at 722* (finding "no way to reconcile the Commission's power to authorize these restrictions with the competing mandate of the antitrust laws").

In light of the Supreme Court's decisions in *Silver*, *Gordon*, and *NASD*, this Court has summarized ***HN6***[] the implied repeal doctrine as operating in "two narrowly-defined situations," to wit, "first, when an agency, acting pursuant to a specific Congressional directive, actively regulates the particular conduct challenged, . . . and second, when the regulatory scheme is so pervasive that Congress must be assumed to have forsworn the paradigm of competition." *Northeastern Telephone Co. v. AT&T, 651 F.2d 76, 82 (2d Cir. 1981)*, **[**33]** *cert. denied*, *455 U.S. 943, 71 L. Ed. 2d 654, 102 S. Ct. 1438 (1982)*; *see* *id. at 83-84* (finding no implied repeal of the antitrust laws where the Federal Communications Act of 1934, *47 U.S.C. §§ 151-609*, did not expressly authorize the Federal Communications Commission to approve protective coupler designs that unreasonably restricted competition, and application of the Sherman Act would not frustrate that agency's ability to regulate the telecommunication industry); *see also* *Finnegan v. Campeau Corp., 915 F.2d 824, 828 (2d Cir. 1990)* (holding that, with respect to disclosures of price information in the context of a tender offer, the Sherman Act was impliedly repealed by the Williams Act, *15 U.S.C. §§ 78m(d)-(e)* and *78n(d)-(f)*).

These principles have most recently been applied by this Court in *Friedman v. Salomon/Smith Barney, Inc., 313 F.3d 796, 2002 U.S. App. LEXIS 26355*, No. 01-7207, 2002 WL 31844676 (2d Cir. Dec. 20, 2002), in which we considered allegations that underwriters and brokerage firms participated in a price-fixing scheme, designed to stabilize the market price of securities sold in initial public **[**34]** offerings, by prohibiting the immediate resale of such securities. We noted that

> ***HN7***[] implied immunity exists where allowing an antitrust lawsuit to proceed would conflict with Congress's implicit determination that the SEC should regulate the alleged anti-competitive conduct. . . . **[*148]** The source of the conflict may, but need not, involve affirmative SEC action. Conflict also can exist where the SEC has jurisdiction over the challenged activity and deliberately has chosen not to regulate it.

2002 U.S. App. LEXIS 26355, 2002 WL 31844676, at *4. We reviewed the history of the regulation of price stabilization practices in both the distribution and aftermarket phases of public offerings. *313 F.3d 796, 2002 U.S. App. LEXIS 26355*, WL at *5. We noted that the Exchange Act gave the SEC authority to regulate such conduct, that the SEC had repeatedly acknowledged its awareness of such conduct, and that it had exercised its regulatory authority over such conduct even though it had never elected to prohibit it, and that the Exchange Act "allows price stabilization practices that the SEC does not prohibit," *313 F.3d 796, 2002 U.S. App. LEXIS 26355*, WL at *6. We concluded that, given the conflict between the statutory scheme and the antitrust laws, "implied immunity **[**35]** bars plaintiffs' [antitrust] challenge to price stabilization practices in the aftermarket." *Id*.

To be sure, ***HN8***[] antitrust immunity is not to be presumed from the mere existence of overlapping authority; rather the analysis must focus on the "potential" for "*conflicts* between the antitrust laws and an authorized] regulatory scheme," *Strobl v. New York Mercantile Exchange, 768 F.2d 22, 27* (2d Cir.) ("*Strobl*") (emphasis in original), *cert. denied*, *474 U.S. 1006, 88 L. Ed. 2d 459, 106 S. Ct. 527 (1985)*. This Court and the Supreme Court have used the term "plain repugnancy" to describe the tension between statutes that justifies implied repeal. *See* *Gordon, 422 U.S. at 682*; *Strobl, 768 F.2d at 27*. In *Strobl*, we noted that the "antitrust laws may not apply when such laws would prohibit an action that a regulatory scheme might allow," *id*.; but we saw no potential for regulatory permission of the conduct at issue there, to wit, manipulation of commodity prices, because the Commodities Exchange Act itself specifically forbade price manipulation, *see* *id. at 27-28*.

In the present case, we agree with the district court's conclusion **[**36]** that the ***HN9***[] Exchange Act impliedly repeals *§ 1* of the Sherman Act with respect to the listing and trading of equity options, because the implied repeal is necessary to preserve the authority of the SEC to regulate that conduct. The history of the Commission's extensive study and regulation of such matters is set out in Part I.A. above and in the district court's February 14 Opinion, 2001 U.S. Dist. LEXIS 1381, 2001 WL 128325, at *1-*6. The Exchange Act itself does not prohibit agreements for exclusivity in options listing, and, as described, the Commission has taken varied positions with respect to the appropriateness of multiplicity, in part because under the Exchange Act it is concerned with more than just the protection of competition, which is "the sole aim of antitrust legislation," *Gordon, 422 U.S. at 689*. "The SEC must consider, in addition, the economic health of the investors, the exchanges, and the securities industry." *Id*. Thus, in evaluating the wisdom under the Exchange Act of requiring or prohibiting multiple listings, the Commission has perforce balanced the interest of promoting competition, on the one hand, against undesirable potential effects, on the other hand, such as market **[**37]** fragmentation, *see* SEC Mar. 26, *1980 Release, 1980 SEC LEXIS 1784, at *28*, financial injury to regional exchanges, see *id. at *30 n.47*, and "deleterious structural changes in the markets," *SEC Release No. 17577, 1981 SEC LEXIS 1976*, at *17 (Feb. 26, 1981), in order to carry out its statutory duty to enhance "the 'economically efficient execution of securities transactions,'" SEC Release No. 34-24613, *1987 SEC LEXIS 4394*, at *29-*30 (June 18, 1987) (quoting *15 U.S.C. § 78k-1(a)(1)(C)(i)*).

[*149] Although plaintiffs contend that an implied repeal is not needed to avoid conflicts here because exclusivity agreements are now prohibited by both the antitrust laws and the SEC, that contention misperceives the proper analytical focus. ***HN10***[] The appropriateness of an implied repeal does not turn on whether the antitrust laws conflict with the current view of the regulatory agency; rather it turns on whether the antitrust laws conflict with an overall regulatory scheme that empowers the agency to allow conduct that the antitrust laws would prohibit. *Accord Friedman v. Salomon/Smith Barney, Inc., 2002 U.S. App. LEXIS 26355, 2002 WL 31844676*, at *4. In *Gordon* **[**38]** , for example, the SEC had "required abolition of the practice of fixed rates of commission as of May 1, 1975, and [required] the institution of full and complete competition." *Gordon, 422 U.S. at 690*. Thus, when the case reached the Supreme Court, the fixing of commission rates was prohibited by both the antitrust laws and the SEC. Yet, the Court did not suggest that an implied repeal had become inappropriate because of that convergence. Rather, noting the potential for a change in the Commission's view, *see* *id. at 691*, the Court stated that "permitting courts throughout the country to conduct their own antitrust proceedings would conflict with *the regulatory scheme* authorized by Congress," *id. at 690* (emphasis added), and that the "implied repeal of the antitrust laws *is*, in fact, necessary to" avoid "rendering nugatory *the legislative provision for regulatory agency supervision*," *id. at 691* (emphases added). Thus, ***HN11***[] the proper focus is not on the Commission's current regulatory position but rather on the Commission's authority to permit conduct that the antitrust laws would prohibit. *See*, *e.g.*, *NASD*, 422 U.S. at 721-22 **[**39]** ("necessarily" concluding that the challenged agreements were "immune from liability under the Sherman Act" where the Court could "see no way to reconcile" that Act with "*the Commission's power* to authorize these restrictions" (emphasis added)).

Plaintiffs also contend, relying on *Chevron U.S.A. Inc. v. Natural Resources Defense Council, Inc., 467 U.S. 837, 81 L. Ed. 2d 694, 104 S. Ct. 2778 (1984)*, that the district court was required to defer to the SEC and DOJ views, submitted to it as *amici curiae*, that there is no need for an implied repeal here. We disagree. *Chevron* dealt with the deference that is due when an agency interprets a statute that it is responsible for enforcing. *See* *467 U.S. at 844* ***HN12***[] ("a court may not substitute its own construction of a statutory provision for a reasonable interpretation made by the administrator of an agency" to which interpretive authority has been delegated). Although some deference may be accorded to an agency's view on a matter within its particular expertise, the decision as to whether, in a given set of circumstances, one statutory scheme supersedes the other is, "in the end," to be made by the **[**40]** courts. *Gordon, 422 U.S. at 686* ***HN13***[] ("The determination of whether implied repeal of the antitrust laws is necessary to make the Exchange Act provisions work is a matter for the courts."); *see also* *Ricci v. Chicago Mercantile Exchange, 409 U.S. 289, 306-08, 34 L. Ed. 2d 525, 93 S. Ct. 573 (1973)*.

In the present case, the district court plainly took into account the proffered views of the SEC as to questions within that agency's expertise, to wit, its authority under the Exchange Act to regulate the listing and trading of equity options and the permissibility of the challenged practices under that statute. The court was not required to accept the views expressed to it by the SEC and the DOJ that the implied repeal of the antitrust laws by the **[*150]** Exchange Act with respect to these practices was not needed. We also note, although it is not necessary to our decision, that, in the wake of the district court's ruling of implied repeal, the SEC, unlike the DOJ, has not urged reversal.

In sum, **HN14**[] the SEC has ample statutory authority, which it has repeatedly exercised, to regulate the listing and trading of equity options. It has at times encouraged multiple listing **[**41]** and at times disapproved of that practice. The DOJ has taken the position that the challenged conduct "as alleged contravenes . . . the Sherman Act." (DOJ *amicus curiae* brief to the district court, dated June 1, 2000, at 12.) Although the SEC's present stance is that agreements for exclusive listing are forbidden, the Commission has the power to alter that position if it concludes that other concerns within its domain outweigh the need to protect competition. We see no way to reconcile that SEC authority, which may be exercised to permit agreements for exclusive listing of equity options, with the antitrust laws. Accordingly, we affirm the district court's ruling that, with respect to the challenged conduct, the Exchange Act impliedly immunizes defendants against liability under § 1 of the Sherman Act.

B. *Jurisdiction To Entertain the Preliminary Settlement Motions*

We disagree, however, with the district court's view that its holding of implied repeal deprived it of jurisdiction to consider the parties' pending motions for judicial approval of their proposed settlements of this consolidated class action. **HN15**[] Although the doctrine of implied repeal is sometimes described **[**42]** in terms of the district court's "antitrust jurisdiction," *e.g.*, *Strobl, 768 F.2d at 27*, we think it is more properly viewed as conferring an immunity that is an affirmative defense that does not affect the court's subject matter jurisdiction over the action.

HN16[] As a general matter, where a complaint "is so drawn as to seek recovery directly under the Constitution or laws of the United States," *Bell v. Hood, 327 U.S. 678, 681, 90 L. Ed. 939, 66 S. Ct. 773 (1946)*, the district court has subject matter jurisdiction unless the federal claim "clearly appears to be immaterial and made solely for the purpose of obtaining jurisdiction or where such a claim is wholly insubstantial and frivolous," *id. at 682-83*. Thus, the district court has jurisdiction where "the right of the petitioners to recover under their complaint will be sustained if the Constitution and laws of the United States are given one construction and will be defeated if they are given another." *Id. at 685*. **HN17**[] The "inadequacy" of a federal claim is ground for "dismissal for lack of subject-matter jurisdiction . . . only when the claim is 'so insubstantial, implausible, **[**43]** foreclosed by prior decisions of this Court, or otherwise completely devoid of merit as not to involve a federal controversy.'" *Steel Co. v. Citizens for a Better Environment, 523 U.S. 83, 89, 140 L. Ed. 2d 210, 118 S. Ct. 1003 (1998)* (quoting *Oneida Indian Nation v. County of Oneida, 414 U.S. 661, 666, 39 L. Ed. 2d 73, 94 S. Ct. 772 (1974))*. Once a federal court has determined that a plaintiff's jurisdiction-conferring claims are not insubstantial on their face, "no further consideration of the merits of the claim is relevant to a determination of the court's jurisdiction of the subject matter." *Baker v. Carr, 369 U.S. 186, 199, 7 L. Ed. 2d 663, 82 S. Ct. 691 (1962)*. Thus, the district court's subject matter jurisdiction to entertain a suit based on a federal claim that is not wholly insubstantial, frivolous, or foreclosed by prior decisions of the Supreme Court, is not defeated by the defendant's **[*151]** assertion of a position that is properly characterized as an affirmative defense.

HN18[] Most immunities are affirmative defenses. *See*, *e.g.*, *Gomez v. Toledo, 446 U.S. 635, 640, 64 L. Ed. 2d 572, 100 S. Ct. 1920 (1980)* (qualified immunity for a public official); **[**44]** *Murphy v. Waterfront Commission of New York Harbor, 378 U.S. 52, 104, 12 L. Ed. 2d 678, 84 S. Ct. 1594 (1964)* (White, J., concurring) (absolute immunity); *Troxler v. Owens-Illinois, Inc., 717 F.2d 530, 532-33 (11th Cir. 1983)* (statutory immunity); 2 *Moore's Federal Practice § 8.07[5]* (3d ed. 1999) ("In addition to the 19 affirmative defenses set forth[in *Fed. R. Civ. P.] 8(c)*[, that Rule] requires 'any other matter constituting an avoidance or an affirmative defense' to be pleaded. Affirmative defenses and avoidances other than those specifically referenced [in *Rule 8(c)*] have been found to include common law immunity, statutory immunity, [and] exemption under a statute or regulation . . . .") (footnotes omitted). Affirmative defenses can be waived, *see*, *e.g.*, *McCardle v. Haddad, 131 F.3d 43, 51 (2d Cir. 1997)*; *Satchell v. Dilworth, 745 F.2d 781, 784 (2d Cir. 1984)*; lack of subject matter jurisdiction cannot be waived, *see*, *e.g.*, *Bender v. Williamsport Area School District, 475 U.S. 534, 541, 89 L. Ed. 2d 501, 106 S. Ct. 1326 (1986)*; *Louisville & Nashville R.R. Co. v. Mottley, 211 U.S. 149, 152, 53 L. Ed. 126, 29 S. Ct. 42 (1908)*; **[**45]** *Fed. R. Civ. P. 12(h)(3)*.

HN19[] In discussing whether a given federal securities statute impliedly repeals an ***antitrust law***, the Supreme Court has not suggested that the implied repeal deprives the district court of subject matter jurisdiction. It has instead referred to the implied repeal as giving the defendant "immunity" from liability under the antitrust laws. Thus, in *Silver*, the Court never referred to federal courts' "antitrust jurisdiction" or used the phrase "subject matter jurisdiction." The *Silver* Court used the term "jurisdiction" only in connection with the power of the SEC to regulate the challenged conduct. *See*, *e.g.*, 373 U.S. at 357 ("Commission jurisdiction"); id. at 358 ("Commission's lack of jurisdiction"). *Silver* was described in *Gordon* as dealing with conduct that would be a *per se* violation of the Sherman Act "absent any *immunity* derived from the regulatory laws." Gordon, 422 U.S. at 683 (emphasis added).

In the earlier stages of the *Gordon* litigation, the opinions of the lower courts, whose rulings of implied repeal were eventually upheld, had spoken not only in terms of antitrust **[**46]** immunity or exemption from the antitrust laws, but also in terms of a "denial of antitrust jurisdiction," Gordon v. New York Stock Exchange, Inc., 498 F.2d 1303, 1305 (2d Cir. 1974), or the "withdrawal of antitrust jurisdiction," id. at 1309 n.8, or the "court['s] lack[of] jurisdiction to entertain an anti-trust attack on the commission structure of the Exchanges," Gordon v. New York Stock Exchange, Inc., 366 F. Supp. 1261, 1264 (S.D.N.Y. 1973). However, no issue in that litigation hinged on whether the implied repeal impacted the court's subject matter jurisdiction, and the Supreme Court in *Gordon* described the lower-court rulings as "utilizing the framework for analysis of antitrust immunity in the regulated securities area that was established a decade ago in *Silver*," 422 U.S. at 662 (describing the district court opinion), and "devoting its opinion to the problem of antitrust immunity," *id*. (describing the court of appeals opinion).

The Supreme Court itself in *Gordon*, except for an analogy drawn to the jurisdiction of the Interstate Commerce Commission, referred to jurisdictiononlyinconnectionwiththe **[**47]** regulatory power of **[*152]** the SEC. Never using the phrases antitrust jurisdiction or subject matter jurisdiction, the Supreme Court in *Gordon* at the outset described its task as "resolution of the issue of antitrust immunity for fixed commission rates," id. at 663, and it thereafter repeatedly referred to the question as whether there was "antitrust immunity" or simply "immunity," *see*, *e.g.*, id. at 686 ("the immunity issue"); id. at 688 ("We are concerned with whether antitrust immunity, as a matter of law, must be implied in order to permit the Exchange Act to function as envisioned by the Congress. The issue of the wisdom of fixed rates becomes relevant only when it is determined that there is no antitrust immunity."); id. at 689 ("We agree with the District Court and the Court of Appeals, and with respondents, that to deny antitrust immunity with respect to commission rates would be to subject the exchanges and their members to conflicting standards.").

Similarly, in *NASD*, the Supreme Court generally spoke of the implied repeal doctrine in terms of antitrust immunity rather than a lack of federal-court **[**48]** jurisdiction. *See*, *e.g.*, 422 U.S. at 705 ("The questions presented require us to determine whether § 22(d) obligates appellees to engage in the practices challenged in Counts II-VIII and thus necessarily confers antitrust immunity on them."); id. at 719 ("implied antitrust immunity is not favored"); id. at 726 (discussing government's "contention that the SEC's exercise of regulatory authority has been insufficient to give rise to an implied immunity for agreements conforming with § 22(f)"); id. at 730 ("the question presented is whether the SEC's exercise of regulatory authority . . . is sufficiently pervasive to confer an implied immunity"). ***HN20***[] Although an implied antitrust immunity prevents a court from "*exercising* jurisdiction under the antitrust laws," id. at 734 (emphasis added), in none of these cases did the Supreme Court suggest that that immunity was anything more than an affirmative defense.

There is, of course, one type of immunity not discussed above--a government's sovereign immunity--that has frequently been referred to as imposing constraints that are jurisdictional. *See* **[**49]** , *e.g.*, United States v. Sherwood, 312 U.S. 584, 586, 85 L. Ed. 1058, 61 S. Ct. 767 (1941) ("the terms of [the] consent [of the United States, as sovereign] to be sued in any court define that court's jurisdiction to entertain the suit"); *but see* Wisconsin Department of Corrections v. Schacht, 524 U.S. 381, 389, 141 L. Ed. 2d 364, 118 S. Ct. 2047 (1998) (a state's immunity under the "Eleventh Amendment . . . does not automatically destroy original jurisdiction"); Calderon v. Ashmus, 523 U.S. 740, 745 n.2, 140 L. Ed. 2d 970, 118 S. Ct. 1694 (1998) ("while the Eleventh Amendment is jurisdictional in the sense that it is a limitation on the federal court's judicial power . . . we have recognized that it is not coextensive with the limitations on judicial power in Article III"). Whether or not sovereign immunity poses a jurisdictional obstacle is of no moment here, for ***HN21***[] there can be no suggestion that the immunity conferred on a private entity on the basis that it is subject to one set of laws that takes precedence over another law is on a par with the immunity enjoyed by a government. The immunity conferred by an implied repeal of **[**50]** the antitrust laws simply prevents the court from imposing liability under those laws.

In the present case, plaintiffs' claims under the Sherman Act were neither frivolous nor contrived merely to create federal jurisdiction. Nor were their claims foreclosed by prior decisions of the Supreme Court, since ***HN22***[] a determination of whether **[*153]** there is an implied repeal requires a thorough analysis of the precise practice that has been challenged and the regulatory scheme with respect to that practice. *See generally* *Gordon, 422 U.S. at 663*. Thus, the district court, as it indicated in its April Order, had jurisdiction at the outset to decide whether defendants were entitled to immunity from liability under the antitrust laws. Since the parties sought approval of their settlement agreements before the court had adjudicated the immunity defense, and since such a defense may be waived, the court had jurisdiction to entertain and rule on the motions for approval of the proposed settlements. Having entered a final judgment without dealing with those pending motions, the court should have entertained them in conjunction with the subsequent motion to alter or amend the final judgment, **[**51]** and it should have granted the latter motion if it approved the proposed settlements.

Finally, we note that defendant LETCO, which was a party to the September settlement agreement, has argued that plaintiffs' appeal from the district court's April Order is moot as to the parties to that agreement because the agreement was, by its terms, automatically rescinded as a result of the district court's denial of the approval motions. We reject LETCO's mootness contention because the rescission terms of the settlement agreement have no bearing on the question presented for review, namely, the correctness of the April Order's ruling that the district court lacked subject matter jurisdiction to entertain the approval motions after finding implied repeal of the antitrust laws.

We express no view as to the correctness of LETCO's contention that the September settlement agreement became void because of the occurrence of an event specified in that agreement. That question may be considered by the district court on remand.

CONCLUSION

We have considered all of the parties' contentions on this appeal and, except to the extent indicated above, have found them to be without merit. The dismissal **[**52]** of the claims asserted in the consolidated complaint is affirmed; the April Order refusing to entertain the motions for approval of the class action settlement agreements is vacated, and the matter is remanded for further proceedings not inconsistent with this opinion.

Miller's Pond Co., L.L.C. v. City of New London

Superior Court of Connecticut, Judicial District of New London, Complex Litigation Docket At Norwich

Opinion

MEMORANDUM OF DECISION ON DEFENDANTS' MOTION FOR SUMMARY JUDGMENT

FACTS

The plaintiff, Miller's Pond Company, L.L.C., is a limited liability company located in Waterford, Connecticut and the owner of a seventy-seven acre man-made lake called Miller's Pond. The individual plaintiffs, Gary Saunders and Thomas Schacht, are the founding and managing members of the company, respectively. By complaint dated August 4, 2000, the plaintiffs brought action against the City of New London, the City of New London Water and Water Pollution Control Authority, the Town of Waterford and the Town of Waterford Water Pollution Control Authority, seeking monetary damages, declaratory and injunctive relief pursuant to the Connecticut Antitrust Act for the defendants' alleged anti-competitive conduct.

The plaintiffs claim that since 1988 they have attempted to sell or develop Miller's Pond **[*2]** as a water source to utilities in the communities of New London and Waterford and portions of Montville and East Lyme, and as a private water supply for industrial or recreational facilities in those geographical areas. It is alleged that the defendants own, operate and control every significant source of fresh water and related water supply facilities located within their municipal borders and capable of serving said areas, except for Miller's Pond. Through various contractual and other arrangements, the plaintiffs claim that the defendants have intentionally thwarted the plaintiffs' ability to expand their business.

The four-count complaint alleges violations of *Sections 35-26* (restraint of trade), 35-27 (monopolization), 35-28 (per se unlawful acts) and 35-29 (illegal tying arrangements) of the Connecticut General Statutes, the Connecticut Antitrust Act. By motion dated April 1, 2002, the defendants move for summary judgment as to all four counts of the plaintiffs' complaint claiming that their alleged conduct falls within the state action immunity provision of the Act and that the plaintiffs lack antitrust standing. The court heard oral argument on the defendants' motion for summary **[*3]** judgment on September 23, 2002.

DISCUSSION

Pursuant to *Practice Book Section 17-45*, ***HN1***[] "summary judgment shall be rendered forthwith if the pleadings, affidavits and any other proof submitted show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." [1] (Internal quotation marks omitted.) *Miles v. Foley, 253 Conn. 381, 385, 752 A.2d 503 (2000)*. ***HN2***[] "In deciding a motion for summary judgment, the trial court must view the evidence in the light most favorable to the nonmoving party." (Internal quotation marks omitted.) *Sherwood v. Danbury Hospital, 252 Conn. 193, 201, 746 A.2d 730 (2000)*. "In ruling on a motion for summary judgment, the court's function is not to decide issues of material fact, but rather to determine whether any such issues exist." *Nolan v. Borkowski, 206 Conn. 495, 500, 538 A.2d 1031 (1988)*. ***HN3***[] "The party seeking summary judgment has the burden of showing the absence of any genuine issue [of] material facts . . ." (Internal quotation marks omitted.) *Hertz Corp. v. Federal Insurance Co., 245 Conn. 374, 381, 713 A.2d 820 (1998)*. **[*4]** "To satisfy his burden the movant must make a showing that it is quite clear what the truth is, and, that excludes any real doubt as to the existence of any genuine issue of material fact." (Internal quotation marks omitted.) *Witt v. St. Vincent's Medical Center, 252 Conn. 363, 372 n.7, 746 A.2d 753 (2000)*.

[*5] *STATE ACTION IMMUNITY*

Section 35-31(b) of the General Statutes, a provision of Connecticut's Antitrust Act setting forth one of the exceptions to the Act, provides as follows: ***HN5***[] "Nothing contained in this chapter shall apply to those activities of any person when said activity is specifically directed or required by a statute of this state, or of the United States." The defendants claim that their activities fall within this exception and that they are entitled to judgment as a matter of law.

For purposes of this motion only, the defendants stated at oral argument that they are admitting the allegations of the complaint. [2] All of the alleged conduct, they argue, falls within the immunity provision of *Section 35-31(b)*. The

[1] *Practice Book Section 17-45* provides in part: ***HN4***[] "A motion for summary judgment shall be supported by such documents as may be appropriate, including but not limited to affidavits, certified transcripts of testimony under oath, disclosures, written admissions and the like." Plaintiffs maintain the motion should be denied because no affidavit was filed. Defendants argue that, since they admit all the allegations of plaintiffs' complaint for purposes of the motion, and defendants do not raise any factual issues, they are entitled to summary judgment in this case as a matter of law as if it were common law motion for judgment on the pleadings. See *Boucher v. Zimmer, 160 Conn. 404, 408, 279 A.2d 540 (1971)*. The court agrees.

[2] The complaint alleges that the following activities violate the provisions of Connecticut's Antitrust Act: provisions in the 1988 Waterford-New London agreement require the parties' best efforts to deter the construction and operation of new water systems in these municipalities and prohibit Waterford from developing and connecting any additional source of water supply available to it unless New London makes the determination that a "water supply emergency" exists; a 1990 agreement between Waterford and Montville restricts Montville's ability to develop its own water sources or water system or to purchase water from other sources; New London and Waterford have identified Miller's Pond as an existing and future component of their water supply systems in various public statements and documents without obtaining plaintiffs' consent, thereby interfering with plaintiffs' ability to develop and market Miller's Pond as a water source; the defendants have refused to respond to plaintiffs' attempts to sell them water and have refused the plaintiffs access to essential water facilities; and New London has misrepresented the capacity of its system to provide water to its customers in order to prevent the development of Miller's Pond as a competitive source of supply. R

basis for their claim is that they operate water utilities pursuant to and in accordance with a very comprehensive scheme of local, regional and state regulation. New London's initial authority originates with a special act adopted by the legislature on July 5, 1871. By the provisions of that act, the city of New London was "authorized and empowered" to "take and convey from . . . [any] . . . ponds, or streams, in the town of Waterford, **[*6]** or any other town, or from any other source of supply, natural or artificial, in said towns, such supply of water as the necessities or convenience of the inhabitants of said city [of New London] may require . . ." A subsequent special act, adopted by the legislature in 1901, further authorized New London to exercise the power of eminent domain in the towns of Salem, Waterford, East Lyme or Montville for the purpose of obtaining an additional water supply.

[*7] At the present time, several statutes and the regulations of several state agencies regulate the development of water resources throughout the state of Connecticut. The defendants enumerated several statutes and regulations which evidence a legislative design for the provision of drinking water to the public. The purpose for such intensive regulation is stated in *Section 25-33c of the General Statutes*:

> ***HN6***[] Legislative finding. The General Assembly finds that an adequate supply of potable water for domestic, commercial and industrial use is vital to the health and well-being of the people of the state. Readily available water for use in public water systems is limited and should be developed with a minimum of loss and waste. In order to maximize efficient and effective development of the state's public water supply systems and to promote public health, safety and welfare, the Department of Public Health shall administer a procedure to coordinate the planning of public water supply systems.

According to the defendants, these special acts, statutes and regulations, as a whole, direct or mandate activities which are encompassed by the state action immunity **[*8]** provision. More specifically, the defendants argue that they are required to provide an adequate supply of safe drinking water to their residents, that New London is authorized to create a municipal water system and that, once it opts to create such a system, it is then required to abide by the numerous statutes and regulations controlling the distribution of the water through its system. The plaintiffs argue that being "authorized" or "empowered" to create a municipal water authority does not equate to activity being "specifically directed or required" by the state. Further, plaintiffs claim that the regulatory scheme is addressed primarily to the retail sale of water and that the plaintiffs are claiming they are being prevented from competing in the wholesale market by conduct clearly outside the scope of the statutes and regulations.

The state action immunity provision of Connecticut's Antitrust Act has been discussed by our Supreme Court in the cases of *Mazzola v. Southern New England Telephone Co., 169 Conn. 344, 363 A.2d 170 (1975)*, and *Westport Taxi Service v. Westport Transit District, 235 Conn. 1, 664 A.2d 719 (1995)*. In *Mazzola*, the **[*9]** Court noted as follows:

> ***HN7***[] The exception authorized by 35-31(b) represents a narrowly drawn version of the doctrine of "state action" immunity from antitrust liability articulated by the United States Supreme Court in *Parker v. Brown, 317 U.S. 341, 350-51, 63 S. Ct. 307, 87 L. Ed. 315*. The court in that case carved out an exemption from Sherman Act liability for activities "commanded" or "directed" by a state legislature. *Id.* *Section 35-31(b)* limits that holding by purporting to immunize only activities which are "specifically" required or directed by state or federal statutes.

Mazzola, supra, at 359. Applying this standard, the Court concluded that the activities of the defendant telephone company, authorized by a tariff which became effective through the implementation of the procedure set forth in *Section 16-19 of the General Statutes*, were not "specifically directed" by the state and, therefore, not exempt from antitrust liability. The Court reached this conclusion because "the role that is statutorily assigned to the PUC [Public Utilities Commission] in rendering effective tariffs proposed by companies such as the **[*10]** defendant amounts to little more than acquiescence in a program originated by the defendant." *Id., at 365-66*.

In the *Westport Taxi* case, the defendant did not specially plead state action immunity and the issue was not raised during the trial of the case. The issue surfaced in the context of post-trial briefs. After citing to and quoting from Mazzola, supra, the Court concluded the record was factually insufficient to permit appellate review. [3]

In addition to the two Connecticut Supreme Court decisions, there is a superior court decision and a federal district court decision addressing the applicability of Section 35-31(b) to certain activities claimed to be monopolistic. In Professional Ambulance Service, Inc. v. Blackstone, 35 Conn.Sup. 136, 400 A.2d 1031 (1978), an ambulance **[*11]** service provider brought suit against the mayor of East Hartford for issuing directives in accordance with certain state health department regulations. The regulations created primary service areas for emergency services and, in following these regulations, the mayor assigned one responder to his area and restricted the advertising of any other emergency services providers. The plaintiff claimed a loss of business as the result of the defendant's activities.

Judge Covello concluded that the defendant's conduct was not in violation of the antitrust statutes because he was simply following the regulations as promulgated, thereby affording him state action immunity. Judge Covello discussed the *Mazzola* and *Parker v. Brown* cases and concluded Section 35-31(b) applied and exempted these activities from antitrust liability. The court first noted that "the parties sought to be enjoined from alleged antitrust activities are not the officers of a private company regulated by a state agency, but are the officials of the state and municipal agencies themselves, pursuing emergency medical service functions directed by the statutes." Id., at 142. After reviewing the statutes **[*12]** and regulations pertaining to the emergency medical care service system, the court concluded as follows:

> It is evident that the totality of the mandate set out in these statutes furnishes an adequate basis and authority for the promulgation of regulations creating the primary service areas, assigning one responder to each such area and limiting or restricting the advertising of those who would provide emergency services or personnel. The court therefore concludes that the activities here in issue represent the product of specifically directed state action.

Id., at 143.

The opinion in the federal district court case, issued in 2000, was also written by Judge Covello. In Wheelabrator Environmental Systems v. Galante, 136 F. Supp. 2d 21, 2000 WL 863029 (D. Conn. 2000), the plaintiff brought a breach of contract suit against the defendant for failure to deliver waste to a designated Wheelabrator facility. Wheelabrator is a private company that operates waste-to-energy resource recovery facilities in Connecticut. The defendant filed a counterclaim alleging Wheelabrator violated certain provisions of Connecticut's Antitrust Act. Wheelabrator moved for judgment **[*13]** on the pleadings as to defendant's counterclaim, claiming it should be dismissed in its entirety on the basis of the state action immunity provision.

All of the alleged conduct of Wheelabrator arose out of its contractual relationship with the Housatonic Resources Recovery Authority (HRRA). Wheelabrator was authorized by statute to enter into the subject waste agreement with HRRA. Judge Covello, after citing *Mazzola* and *Parker v. Brown* and his previously decided case of *Professional Ambulance Service, Inc.,* concluded that the "totality of the mandate set out in [the applicable municipal solid waste management] statutes provides an adequate basis for the court to conclude that Wheelabrator's actions, as alleged in the second amended counterclaim, were specifically directed or required by state statute, and thus, immune from liability under the Connecticut Antitrust Act. (Citation omitted.) The Connecticut legislature has promulgated several laws which direct municipalities in the handling of MSW [municipal solid waste] management and specifically establish a municipal resources recovery authority's power to enter into contracts for the disposal of MSW." (Internal quotation **[*14]** marks omitted.) Id., 5-6.

All of the foregoing cases refer to the *Parker v. Brown* case, a United States Supreme Court decision, as the origin of the state action immunity doctrine. It is interesting to note that this doctrine has evolved through the years; under

---

[3] As previously noted, in this case the defendants have admitted as true the factual allegations in the complaint for purposes of this motion only. There are no factual issues in dispute.

federal antitrust laws, the defendants' activities would clearly be exempt from liability. Judge Covello, in the *Wheelabrator* case, provides a summary of federal case law addressing state action immunity.

> "The Supreme Court first articulated what has become known as the state action defense to the Sherman Act" in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. *Automated Salvage Transport, Inc. v. Wheelabrator Envtl. Sys., Inc., 155 F.3d 59, 68 (2d Cir. 1998)*. This defense exempts "anticompetitive conduct engaged in as an act of government by the State as sovereign, or, by its subdivisions, pursuant to state policy to displace competition." *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 413, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*. In order for a state's subdivision to qualify for state action immunity, it must "identify **[*15]** a 'clearly expressed state policy' that authorizes its [anticompetitive] actions." *Cine 42nd Street Theater Corp. v. Nederlander Org., Inc., 790 F.2d 1032, 1043 (2d Cir. 1986)*. This burden is met when the subdivision can show that the anti-competitive action was a "foreseeable consequence of the state delegation" of authority (i.e., "that the 'legislature contemplated the action complained of' "). *Id*. (citing *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 415, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978))*.
>
> Once the court determines that a state subdivision is immune from antitrust liability for its "foreseeable" anti-competitive conduct, "the immunity should be extended to include private parties acting under the direction of the [subdivision]." *Zimomra v. Alamo Rent-A-Car, Inc., 111 F.3d 1495, 1500 (10th Cir. 1997)*; see also *Cine 42nd Street Theater Corp. v. Nederlander Org., 790 F.2d 1032, 1048 (2d Cir. 1986)* (holding that "the private [parties] acting in concert with the [state subdivision] are also entitled to state immunity" for their "foreseeable action"). "The success of an antitrust **[*16]** action should depend upon the nature of the activity challenged, rather than on the identity of the defendant." *Southern Motor Carriers Rate Conference v. United States, 471 U.S. 48, 58-59, 85 L. Ed. 2d 36, 105 S. Ct. 1721 (1985)*. Thus, "where private parties are acting under the compulsion of a municipality or other political subdivision, the same ['foreseeable consequence'] test should apply to determine state action immunity regardless of who the named defendants are." *Zimomra v. Alamo Rent-A-Car, Inc., 111 F.3d 1495, 1499-1500 (10th Cir. 1997)*.

Wheelabrator, supra, 136 F. Supp. 2d 21, 6-7.

In 1992, Connecticut's legislature enacted ***HN8***[] *Section 35-44b of the General Statutes*, which provides that Connecticut courts "shall be guided by interpretations given by the federal courts to federal antitrust statutes." As noted in *Mazzola*, and restated in the 1995 *Westport Taxi* case, however, *Section 35-31(b)* of our statutes has no parallel in the federal antitrust statutes. Therefore, although the defendants' activities would clearly be exempt under the federal antitrust laws, this court follows Connecticut case law in its determination.

[*17] The fact that the defendants are municipalities and municipal agencies is an important, although not a determinative, factor. The defendants, being authorized to establish a water supply business, are heavily regulated by the statutory and regulatory scheme pertaining to the distribution of water. The legislature has determined that an adequate supply of potable water is vital to the health and well-being of the public and set forth a comprehensive procedure for the development of the state's public water supply systems. *Section 25-33c, Connecticut General Statutes.* Once New London decided to operate its own public water supply system, it was compelled to comply with a myriad of state requirements.

Providing a safe and adequate supply of water is a legislative mandate. Because New London chose to do so with a municipal system, rather than having a private water company provide the water, does not divest the defendant of the protection afforded by the state action immunity provision of the antitrust statutes. The distribution of water is heavily regulated by the state and New London, being authorized and opting to create a municipal water system, is now directed **[*18]** by the state as to its activities in this area. Although New London is not *required* to have a *municipal* water system, unlike the situations in Judge Covello's cases wherein the designation of a single emergency services provider and the establishment of a comprehensive program for solid waste disposal were mandated, the court finds the difference to be a difference without a distinction. The fact is that a safe water supply is required and, once the municipality undertakes to provide it on its own rather than through a private water company, the distribution of that water and the activities connected therewith are specifically directed by the state. Further, the court finds that the defendants' activities fall within the scheme outlined in those state statutes and regulations. For these reasons, the defendants' activities are exempt from antitrust liability pursuant to *Section 35-31(b) of the General Statutes.*

ANTITRUST STANDING

Defendants' motion is denied as to the claim that plaintiffs do not have antitrust standing. The conduct alleged would be sufficient to bring an antitrust claim absent the exemption described above. Plaintiffs seek **[*19]** to compete in the southeast Connecticut wholesale water market. ***HN9***[] Their claimed injury is causally linked to an antitrust violation and as the allegedly injured parties, they are the proper persons to maintain the action. *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 109, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*.

CONCLUSION

The court grants the defendants' motion for summary judgment as to all counts of the plaintiffs' complaint. The claims are barred by the doctrine of state action immunity as set forth in *Section 35-31(b) of the General Statutes.*

BY THE COURT

McLachlan, J.

HN1[] **Discovery, Methods of Discovery**

Summary judgment is warranted when the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[] **Summary Judgment, Evidentiary Considerations**

On a motion for summary judgment, an issue is genuine if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. A fact is material if it directly relates to the legal elements of a claim or defense to an extent that could affect the outcome of the case. In deciding whether a genuine issue of material fact exists, the court views the evidence in the light most favorable to the nonmovant and draws all reasonable inferences in that party's favor.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN3[] **Burdens of Proof, Movant Persuasion & Proof**

When a motion for summary judgment is directed against a party that bears the burden of proof, the movant bears the initial responsibility of informing the district court of the basis of the motion, and identifying those portions of the record which it believes demonstrate the absence of a genuine issue of material fact. If that showing is made, the nonmovant, then, has the burden of demonstrating the existence of a genuine issue of material fact requiring a trial. More specifically, the nonmovant is required to establish that it has sufficient evidence to enable a jury to find in its favor.

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN8[] **Antitrust & Trade Law, Sherman Act**

The provisions of the Rhode Island Antitrust Act, *R.I. Gen. Laws §§ 6-36-4*, -6, mirror those of sections 1-2 (*15 U.S.C.S. §§ 1-2*) of the Sherman Act and section 3 (*15 U.S.C.S. § 14*) of the Clayton Act and are construed in the same manner as the federal statutes. *R.I. Gen. Laws § 6-36-2(b)* requires state ***antitrust law*** to be construed in harmony with judicial interpretations of comparable federal antitrust statutes. The only material difference between *R.I. Gen. Laws § 6-36-6* and *15 U.S.C.S. § 14* is that *R.I. Gen. Laws § 6-36-6* applies to agreements for the sale of services as well as commodities.

Antitrust & Trade Law > Sherman Act > Claims

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Sherman Act, Claims**

In order to prevail on a claim under *section 1* (*15 U.S.C.S. § 1*) of the Sherman Act, plaintiffs must establish that: (1) the defendants participated in a conspiracy or some other form of concerted activity; (2) the conspiracy or concerted activity unreasonably restrained trade; and, (3) the restraint affected interstate commerce. Plaintiffs also must demonstrate an injury of a type that the antitrust laws were intended to prevent (i.e., an "antitrust injury"); a causal relationship between the violation and the resulting injury and standing to assert the claim.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Evidence > Admissibility > Circumstantial & Direct Evidence

HN10[] **Antitrust & Trade Law, Sherman Act**

For purposes of a claim under *section 1* (*15 U.S.C.S. § 1*) of the Sherman Act, the defendants' participation in a conspiracy or some other form of concerted action may be proven either by direct evidence or by circumstantial evidence. However, circumstantial evidence, alone, will not support a finding of conspiracy if that evidence is equally consistent with a finding that the defendants did not conspire.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

For purposes of a claim under *section 1* (*15 U.S.C.S. § 1*) of the Sherman Act, circumstantial evidence of concerted action may include proof of consciously parallel behavior, but parallel behavior, by itself, is not sufficient to distinguish concerted action from independent acts that, coincidentally, are similar. That is especially true when the alleged conduct is consistent with a legitimate business purpose. Accordingly, additional evidence is required to establish "plus" factors that tend to exclude the possibility that the defendants acted independently.

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] Antitrust & Trade Law, Sherman Act

For purposes of a claim under *section 1* (*15 U.S.C.S. § 1*) of the Sherman Act, the principal "plus" factors are: (1) that the defendants had a motive and an opportunity to conspire; and (2) that the defendants acted contrary to their economic self-interest so that their conduct cannot be explained on legitimate business grounds. Proof of these plus factors may include evidence of meetings attended by the defendants followed shortly thereafter by parallel behavior that goes beyond what would be expected absent an agreement. It also may include evidence that the defendants acted contrary to their self-interest.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing

Not all concerted action that, in some way, restrains trade is illegal. Courts recognize that some business combinations or agreements that adversely affect a particular competitor may have pro-competitive effects that outweigh their anti-competitive effects. Therefore, the Sherman Act focuses on the net effect of a challenged practice and prohibits only conduct that unreasonably restrains trade. Since the antitrust laws were enacted for the "protection of competition, not competitors," a restraint is not deemed unreasonable unless it harms competition.

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN14[] Antitrust & Trade Law, Sherman Act

While motive is a relevant consideration in determining whether concerted actions violate the Sherman Act, the ultimate question is whether the challenged conduct unreasonably restrains trade. Some restraints may be deemed unreasonable per se and some may be found unreasonable under the "rule of reason."

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN15[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Restraints that are inherently anti-competitive because they have a pernicious effect on competition and lack any redeeming virtue are deemed unreasonable per se. In order to be classified as a per se violation, a restraint must be one that a court can predict with confidence will be condemned by the "rule of reason."

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN16[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In the case of a per se violation, the plaintiff is not required to prove an actual anti-competitive effect. Nor is the plaintiff required to prove the defendants' market power or any other indicia that the challenged conduct is likely to harm competition. Rather, anti-competitive effects are presumed.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN17[] **Practices Governed by Per Se Rule, Boycotts**

Because the per se rule condemns conduct without inquiring into market conditions or the actual impact of the conduct on competition, the per se rule is applied sparingly and only where the adverse impact on competition is obvious and substantial. Thus, the designation of per se violation generally is limited to agreements to fix prices, limit production, and engage in certain types of group boycotts.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN18[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

A horizontal agreement is an agreement between firms occupying the same level of the market structure. A "group boycott" exists where competitors agree with each other not to deal with a supplier or distributor if it continues to serve a competitor whom they seek to injure.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > General Overview

HN19[] **Practices Governed by Per Se Rule, Boycotts**

An arrangement under which a distributor agrees to deal exclusively with one manufacturer is described as a vertical arrangement that does not constitute a per se violation of the antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN21[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

The United States Supreme Court is reluctant to adopt rules designating restraints imposed in the context of business relationships as per se violations where the economic impact of certain practices is not immediately obvious. The validity of exclusive dealing arrangements, instead is determined under the "rule of reason" which requires proof of actual or threatened anti-competitive effects in the relevant market. Furthermore, such agreements are held to pass muster even under "rule of reason" analysis absent evidence that the price of the goods in question has increased; the quality has decreased, or the choices available to consumers have been diminished in some way other than preventing them from selecting the plaintiff.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN22[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The lawfulness of practices that are not per se violations of the antitrust laws is determined by applying the "rule of reason." The test prescribed by the "rule of reason" is whether, under all of the circumstances, the challenged practice is unreasonably restrictive of competitive conditions.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN23[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In contrast to cases involving per se violations, plaintiffs in cases where the "rule of reason" is applied must prove that the challenged practice causes an antitrust injury. In other words, they must prove that the practice harms competition. The plaintiffs also must prove that the harm caused by the challenged practice outweighs any beneficial effects on competition. Generally, restraints that are ancillary to legitimate business goals and are not seriously anti-competitive will pass muster under "rule of reason" analysis.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN24[] **Regulated Industries, Higher Education & Professional Associations**

Antitrust injury may be demonstrated in either of two ways. It may be proven directly by presenting evidence of actual injury to competition in the relevant market or it may be proven indirectly by showing the likelihood of serious injury to competition. An actual injury to competition may be shown by demonstrating that the challenged practice has increased prices or reduced output. A potential injury to competition may be shown by presenting evidence that the defendants possess sufficient market power in the relevant market to significantly threaten competition.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN25[] **Private Actions, Remedies**

For purposes of demonstrating antitrust injury, market power is defined as the power to raise prices above competitive levels or to exclude competition. Market share is only one of the factors to be considered in determining whether a particular defendant has market power and there is no talismanic test for ascertaining what share of the relevant market a defendant must have in order to possess sufficient market power to threaten competition.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN26[] **Private Actions, Remedies**

Since market power is merely a "surrogate" for determining the likelihood of actual injury to competition, it need not be established where proof of actual injury exists. Moreover, even in cases where market power is relevant, market power, alone, does not establish an antitrust violation. Rather, market power is described as a filter for separating those practices that pose a sufficient threat to competition to warrant further analysis from those that do not. Thus, once market power is proven, the nature, purpose, and duration of the restraint and its effect on competition in the relevant market must be assessed.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN27[] **Private Actions, Remedies**

For purposes of demonstrating antitrust injury, when actual harm to competition is demonstrated, the issue becomes whether that harm is justified or outweighed by some pro-competitive benefit. If there is no legitimate pro-competitive benefit the challenged practice will be held unlawful.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN28[] **Private Actions, Remedies**

For purposes of demonstrating antitrust injury, when potential harm to competition is alleged, analysis is a two-step process. The first step is to identify the relevant market which includes both the market for the product or service and the geographic market. The second step is to assess the effect of the challenged practice on competition in the relevant market and on consumers. Among the factors to be considered in making that assessment are the degree of market power possessed by the defendants, the extent of market foreclosure resulting from the challenged practice; the impact on competitors and competitive justifications for the practice. Other factors include the duration of the exclusive arrangement and the height of entry barriers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN29[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

The test for determining whether an exclusive dealing arrangement violates the antitrust laws is essentially the same under section 3 (*15 U.S.C.S. § 14*) of the Clayton Act and under the Rhode Island Antitrust Act, *R.I. Gen. Laws §§ 6-36-4*, -6, as it is under *section 1* (*15 U.S.C.S. § 1*) of the Sherman Act, except that *15 U.S.C.S. § 14* applies only to agreements relating to the sale of goods or commodities.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Insurers

HN30[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

The United States Supreme Court has held that, in a network pharmacy arrangement, the agreements between health insurers and participating pharmacies are merely arrangements for the purchase of goods and services by the health insurer.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Commercial Interference > Business Relationships > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN31[] **Intentional Interference, Elements**

Under Rhode Island law, in order to prevail on a claim of intentional interference with business relationships, a plaintiff must prove: 1) the existence of a business relationship or expectancy, 2) that the defendants knew of that relationship or expectancy, 3) that the defendants intentionally interfered with that relationship or expectancy, and 4) that the interference caused the plaintiff to sustain the harm in question.

Torts > ... > Business Relationships > Intentional Interference > Defenses

Torts > ... > Commercial Interference > Business Relationships > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN32[] **Intentional Interference, Defenses**

On a claim of intentional interference with business relationships, a defendant is not liable simply for committing an intentional act that interferes with a plaintiff's business relationships. The interference also must be impermissible or unjustified. Otherwise, a defendant would be liable for legitimately competing with a plaintiff for business. The plaintiff bears the initial burden of showing that the interference was not legally privileged or justified. If that showing is made, the burden shifts to the defendant to prove justification.

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > General Overview

HN33[] **Antitrust & Trade Law, Clayton Act**

The Clayton Act applies only to parties to agreements for the "sale of goods." *15 U.S.C.S. § 14*.

Opinion

[*182] **MEMORANDUM AND ORDER**

ERNEST C. TORRES, Chief United States District Judge.

Stop and Shop Supermarket Company ("Stop & Shop") and Walgreen Eastern Co., Inc. ("Walgreens") brought this action pursuant to Section 1 of the Sherman Act, *15 U.S.C. § 1*; Section 3 of the Clayton Act, *15 U.S.C. § 14*; and sections 4 and 6 of the Rhode Island Antitrust Act, *R.I. Gen. Laws §§ 6-36-4*, *-6*. The plaintiffs claim that the defendants have restrained trade and limited competition in the Rhode Island market for the sale of prescription pharmaceuticals covered by health insurance plans and that they have tortiously interfered with the plaintiffs' business relationships by creating a "closed network" of pharmacies at which plan subscribers are required to fill their prescriptions in order to obtain maximum reimbursement.

The claims against United Healthcare of New **[**3]** England, Inc. ("UHC"), Provider Health Services, Inc. ("PHS"), Maxi-Drug, Inc., d/b/a Brooks Pharmacy ("Brooks"), C. Daniel Haron and Ronald Bochner have been dismissed pursuant to the terms of a settlement agreement allowing the plaintiffs' pharmacies to join the network that serves UHC and is managed by PHS. The remaining defendants have filed two summary judgment motions, one by Blue Cross and Blue Shield of Rhode Island and Coordinated Health Partners, Inc., d/b/a Blue Chip (collectively referred to as "Blue Cross") and one by CVS Corporation ("CVS") PharmaCare Management Services, Inc. ("PharmaCare"), Thomas E. Morrison and Greg Weishar.

Because this Court finds that the exclusive dealing arrangement at issue is not a *per se* violation of the antitrust laws and does not tortiously interfere with the plaintiffs' business relationships; and, because this Court further finds that there are disputed factual issues that must be resolved in order to determine whether the arrangement unreasonably restrains trade, the motions for summary judgment are granted in part and denied in part.

Facts

The record reveals the undisputed facts to be as follows. Blue Cross and UHC offer **[**4]** a variety of health insurance and HMO plans that pay the major portion of the cost of prescription pharmaceuticals obtained by their subscribers. Approximately **[*183]** 60% of Rhode Islanders covered by such plans are Blue Cross customers. An additional 25% are UHC customers.

Until 1997, Blue Cross had a mostly "open" pharmacy system in which subscribers could purchase prescription drugs at any pharmacy. Blue Cross also self managed the pharmacy benefits programs under its plans. Thus, Blue Cross, itself, determined what pharmaceuticals were covered; negotiated with individual pharmacies to establish the prices for pharmaceuticals purchased pursuant to the plans; and processed claims by subscribers.

In the fall of 1997, Blue Cross decided to hire a pharmacy benefits manager ("PBM") to administer the pharmacy benefits programs under its plans. Typically, a PBM establishes a "closed network" of participating pharmacies that agree to discount the prices that they charge for prescription pharmaceuticals purchased pursuant to a particular insurer's health insurance plans. The network pharmacies further agree not to join any other PBM network that competes with the PBM for that insurer's business. **[**5]** Pharmacies are induced to join such a network by the expectation that they will receive a greater volume of business because the insurer whose plans are administered by the PBM provides plan subscribers with an incentive to patronize network pharmacies by offering more generous reimbursement for pharmaceuticals purchased at those pharmacies than for pharmaceuticals purchased at non-network pharmacies and because the PBM agrees to limit the number of pharmacies in its network.

In September 1997, Blue Cross sent out a request for proposals and received competing bids from three PBM's: PharmaCare, PCS and WellPoint. PCS's bid was rejected because PCS was unwilling to share in the risk that the program would lose money.

PharmaCare, a subsidiary of CVS, proposed a closed network consisting of all of the CVS pharmacies and most of the independent pharmacies in Rhode Island. CVS's fifty-two pharmacies in Rhode Island account for roughly forty-one percent of the third-party reimbursed purchases of prescription drugs in the state.

WellPoint proposed a closed network consisting of pharmacies operated by plaintiffs Stop & Shop and Walgreens. Stop & Shop operates eighteen pharmacies and Walgreens **[**6]** operates fifteen pharmacies in Rhode Island.

WellPoint's bid was lower than PharmaCare's but Blue Cross expressed some dissatisfaction with both bids and gave the two PBMs an opportunity to submit modified bids. In December 1997, after receiving the modified bids, Blue Cross decided to select PharmaCare as its PBM but no agreement was signed at that time. The plaintiffs allege that WellPoint's bid was superior to PharmaCare's and that PharmaCare was selected for unspecified ulterior motives.

At the time that Blue Cross selected PharmaCare, UHC already had a "closed" network consisting primarily of Brooks pharmacies and managed by PHS (the "UHC/PHS network"). Brooks is the second largest retail pharmacy chain in Rhode Island with forty-two retail outlets and approximately nineteen percent of Rhode Island's third-party reimbursed pharmaceutical sales.

Blue Cross's selection of PharmaCare came on the heels of discussions among representatives of UHC, PHS and CVS about expanding the UHC/PHS network and including CVS in it. During those discussions, UHC officials told PHS officials that UHC wanted to include more pharmacies in the UHC/PHS network. Stop & Shop, Walgreens, and CVS all **[**7]** expressed **[*184]** an interest in joining the network, but Ronald Bochner, PHS's president, rejected the overtures by Stop & Shop and Walgreens.

In January 1998, Thomas Morrison, CVS's vice president of pharmacy services, contacted Bochner, and the two men discussed CVS's interest in joining the UHC/PHS network. Around that same time, Greg Weishar, the president of PharmaCare, wrote to Bochner offering to admit the PHS pharmacies into the Blue Cross/PharmaCare network if CVS was admitted into the UHC/PHS network. Weishar, also, rebuffed requests by Stop & Shop and Walgreens to join the Blue Cross/PharmaCare network.

On February 19, 1998, PHS agreed to allow CVS to join the UHC/PHS network. However, negotiations between PharmaCare, PHS and Brooks continued and it was not until May 18, 1998, that contracts were executed between PharmaCare and PHS and between PharmaCare and Brooks allowing Brooks and the other PHS pharmacies to join the Blue Cross/PharmaCare network. Those contracts prohibited Brooks and PHS's other member pharmacies from participating in other networks competing for Blue Cross's business and they prohibited PharmaCare from admitting into the Blue Cross/PharmaCare network pharmacies **[**8]** other than the existing members of that network and the members of the PHS network. Blue Cross ultimately approved admission of the PHS pharmacies into the Blue Cross/PharmaCare network pursuant to a provision in the agreement between Blue cross and PharmaCare requiring that such approval be obtained.

On November 19, 1998, Blue Cross and PharmaCare executed the agreement making PharmaCare Blue Cross's PBM for a period of three years beginning on January 1, 1999.

Blue Cross plans create a financial incentive for subscribers to patronize network pharmacies by providing subscribers with a higher level of reimbursement for prescription pharmaceuticals purchased at network pharmacies than for those purchased at non-network pharmacies. However, from the facts presented thus far, it is impossible to determine the precise nature or extent of that incentive. Blue Cross offers an array of plans in which the methods of reimbursement for the purchase of prescription pharmaceutical products vary greatly and the parties have failed to explain the relevant provisions of those plans or the differences, if any, in the amounts that subscribers are required to pay for prescription pharmaceuticals at **[**9]** network pharmacies as opposed to non-network pharmacies.

The plaintiffs have presented evidence that, since the establishment of Blue Cross's closed network, their sales of prescription pharmaceuticals to Blue Cross subscribers have declined; they have been forced to curtail plans to expand; the retail price of prescription pharmaceuticals at network pharmacies has increased and the level of services provided to consumers has been reduced.

The Plaintiffs' Claims

Count I of the amended complaint alleges that the defendants conspired to unreasonably restrain trade in violation of *§ 1 of the Sherman Act* by excluding the plaintiffs from competing in the Rhode Island market for the retail sale of prescription pharmaceutical products that are reimbursed by insurance. [1]

[10]** **[*185]** Count II alleges that the defendants established an exclusive dealing arrangement that violates *§ 3 of the Clayton Act* and *§ 1 of the Sherman Act* because it reduces competition and tends to create a monopoly for the defendants in the Rhode Island market for the retail sale of prescription pharmaceutical products that are reimbursed by insurance.

Count III alleges that the conduct that is the subject of the claims in Counts I and II also violates the Rhode Island Antitrust Act.

Count IV alleges that, by excluding the plaintiffs from their network, the defendants intentionally interfered with the business relationships between the plaintiffs and their present and future pharmacy customers.

As already noted, the plaintiffs have settled their claims against the UHC and PHS defendants; and, pursuant to the terms of that settlement agreement, they have been allowed to join the UHC/PHS network.

Summary Judgment Standard

HN1[] Summary judgment is warranted when "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled **[**11]** to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. ***HN2***[] An issue is genuine if "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. A fact is material if it directly relates to the legal elements of a claim or defense to an extent that could affect the outcome of the case. *Id.* In deciding whether a genuine issue of material fact exists, the Court views the evidence in the light most favorable to the nonmovant and draws all reasonable inferences in that party's favor. *Sheinkopf v. Stone, 927 F.2d 1259, 1262 (1st Cir. 1991)*.

HN3[] When a motion for summary judgment is directed against a party that bears the burden of proof, the movant bears the "initial responsibility of informing the district court of the basis of the motion, and identifying those portions of [the record] which it believes demonstrate the absence of a genuine issue of material fact." *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. If that showing is made, the nonmovant, then, has the burden of demonstrating the existence of a genuine issue of material fact requiring **[**12]** a trial. *Dow v. United Bhd. of Carpenters and Joiners of Am., 1 F.3d 56, 58 (1st Cir. 1993)*. More specifically, the nonmovant is required to establish that it has sufficient evidence to enable a jury to find in its favor. See *DeNovellis v. Shalala, 124 F.3d 298, 306 (1st Cir. 1997)*.

Analysis

I. The Anti-Trust Claims

The gravamen of the plaintiffs' antitrust claims is that the combined Blue Cross/PharmaCare and UHC/PHS network creates an exclusive dealing arrangement that violates the antitrust laws.

---

[1] Count I also alleges that the defendants "conspired . . . to allocate markets and to artificially raise, fix, maintain or stabilize pharmaceutical reimbursement rates and co-payment levels, resulting in higher prices for prescription pharmaceutical products . . . restraint of competition among providers . . . and an unlawful increase in market power by Defendants" but those allegations are neither explained in the plaintiffs' memoranda nor supported by any proffered evidence. Am. Compl. P 72.

HN4[] An exclusive dealing arrangement is one in which a buyer agrees to purchase all or a significant portion of its requirements of a product or service solely from a particular seller or sellers. William C. Holmes, **[*186]** ***Antitrust Law*** Handbook § 2:23, at 352 (2001) (the "Antitrust Handbook").

Here, it appears that Blue Cross provides incentives for its subscribers to patronize network pharmacies by providing greater reimbursement for prescription pharmaceuticals purchased from network pharmacies than for those purchased at non-network pharmacies. In exchange, network pharmacies have agreed not to join any competing network and to discount **[**13]** the price of prescription pharmaceuticals sold to Blue Cross and its subscribers. At this juncture, it is difficult to determine whether such an arrangement amounts to an exclusive dealing agreement because, as already noted, the exact nature and extent of the differing reimbursements provided by Blue Cross are unknown.

Moreover, the plaintiffs' claim that the arrangement runs afoul of the antitrust laws is undermined by the fact that the plaintiffs, themselves, were part of WellPoint's network that unsuccessfully sought a similar arrangement with Blue Cross and by the fact that one of the conditions of the agreement settling the plaintiffs' claims against UHC and PHS was that the plaintiffs be permitted to join the UHC/PHS network.

A. The Relevant Statutes

Both *Section 1 of the Sherman Act* and *Section 3 of the Clayton Act* are aimed at activities that interfere with competitive markets and their ability to provide adequate supplies of quality goods at reasonable prices. *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 4, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. The objective of those statutes is the "protection of competition, not competitors." *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962).* ***[**14]***

HN5[] *Section 1 of the Sherman Act* seeks to accomplish that objective by prohibiting concerted action that unreasonably restrains trade. It provides:

> Every contract, combination in the form of a trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal.

15 U.S.C. § 1.

HN6[] *Section 3 of the Clayton Act* prohibits selling a commodity on the condition that the purchaser refrain from dealing with the seller's competitors. It provides:

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods . . . or other commodities . . . or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement or understanding that the lessee or purchaser thereof shall not use or deal in the goods . . . or other commodities of a competitor or competitors of the lessor or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement or understanding may be to substantially lessen competition or tend to create a monopoly in any line **[**15]** of commerce.

15 U.S.C. § 14.

HN7[] Exclusive dealing arrangements that involve commodities may be challenged under either statute but those that involve a service or something other than a commodity may be challenged only under *Section 1 of the Sherman Act*. Antitrust Handbook § 5:3, at 528-29.

HN8[] The provisions of the *Rhode Island Antitrust Act* mirror those of §§ *1-2 of the Sherman Act* and *§ 3 of the Clayton Act* and are construed in the same manner as **[*187]** the federal statutes. [2] *Greater Providence MRI Ltd. P'ship v. Medical Imaging Network of Southern New England. Inc., 32 F. Supp. 2d 491, 493 (D.R.I. 1998)*; *ERI Max*

[2] The only material difference between *R.I. Gen. Laws § 6-36-6* and *§ 3* of the clayton Act is that *§ 6-36-6* applies to agreements for the sale of services as well as commodities.

Entm't. Inc. v. Streisand, 690 A.2d 1351, 1353 n.l (R.I. 1997) (*Rhode Island General Laws § 6-36-2(b)* requires state ***antitrust law*** to be "construed in harmony with judicial interpretations of comparable federal antitrust statutes").

[16]** B. The Sherman Act Claim

HN9[] In order to prevail on their *Sherman Act* claim, the plaintiffs must establish that:

(1) The defendants participated in a conspiracy or some other form of concerted activity;

(2) The conspiracy or concerted activity unreasonably restrained trade; and,

(3) The restraint affected interstate commerce.

T.W. Elec. Serv., Inc. v. Pacific Elec. Contractors Ass'n, 809 F.2d 626, 632-33 (9th Cir. 1987); see also *DM Research v. College of Am. Pathologists, 2 F. Supp. 2d 226, 228 (D.R.I. 1998)*.

The plaintiffs also must demonstrate an injury of a type that the antitrust laws were intended to prevent (i.e., an "antitrust injury"); a causal relationship between the violation and the resulting injury and standing to assert the claim. Antitrust Handbook § 2:2, at 151.

1. Concerted Action

HN10[] The defendants' participation in a conspiracy or some other form of concerted action may be proven either by direct evidence or by circumstantial evidence. *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 768, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. However, circumstantial evidence, alone, will not support a finding of **[**17]** conspiracy if that evidence is equally consistent with a finding that the defendants did not conspire. *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*.

HN11[] Circumstantial evidence of concerted action may include proof of consciously parallel behavior, but parallel behavior, by itself, is not sufficient to distinguish concerted action from independent acts that, coincidentally, are similar. That is especially true when the alleged conduct is consistent with a legitimate business purpose. Antitrust Handbook § 2:4, at 153-56. Accordingly, additional evidence is required to establish "plus" factors that "tend to exclude the possibility that the defendants acted independently." *Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., Inc., 998 F.2d 1224, 1232 (3rd Cir. 1993)*.

HN12[] The principal "plus" factors are:

(1) That the defendants had a motive and an opportunity to conspire; and

(2) That the defendants acted contrary to their economic self-interest so that their conduct cannot be explained on legitimate business grounds.

Id. at 1242.

Proof of these plus factors may include evidence **[**18]** of meetings attended by the defendants followed shortly thereafter by parallel behavior that goes beyond what would be expected absent an agreement. It also may include evidence that the defendants acted contrary to their self-interest. Antitrust Handbook §§ 2:6, at 174-75.

Here, there is evidence that the defendants engaged in parallel behavior by con **[*188]** temporaneously expanding the Blue Cross/PharmaCare and the UHC/PHS networks to include the same pharmacies and to exclude the plaintiffs. There also is evidence that the expansion was preceded by a series of meetings, telephone calls, and correspondence in which representatives of PharmaCare, CVS, PHS, and Brooks discussed the possibility of admitting CVS into the UHC/PHS network; admitting Brooks and the PHS pharmacies into the Blue

Cross/PharmaCare network and establishing a uniform reimbursement plan. Furthermore, there is evidence that the admission of Brooks into the Blue Cross/PharmaCare network was contingent upon the admission of CVS into the UHC/PHS network and vice versa. In addition, there is evidence that Blue Cross was aware of those discussions and that its approval was necessary to allow Brooks into the Blue Cross/PharmaCare **[**19]** network. Finally, there is evidence that the decisions to admit CVS into the UHC/PHS network and Brooks into the Blue Cross/PharmaCare network were made shortly after those discussions and within a few months of each other.

That evidence is sufficient to support an inference that the defendants engaged in concerted action to expand the two networks, but is sheds no light on whether the purpose or effect of that action was to unreasonably restrain trade in connection with the retail sale of prescription pharmaceutical products.

2. Unreasonable Restraint

HN13[] Not all concerted action that, in some way, restrains trade is illegal. Courts have recognized that some business combinations or agreements that adversely affect a particular competitor may have pro-competitive effects that outweigh their anti-competitive effects. See, e.g., *Standard Oil Co. of California v. United States, 337 U.S. 293, 306-307, 93 L. Ed. 1371, 69 S. Ct. 1051 (1949)* (describing the potential pro-competitive virtues of exclusive dealing arrangements). Therefore, the *Sherman Act* focuses on the net effect of a challenged practice and prohibits only conduct that unreasonably restrains trade. *State Oil Co. v. Khan, 522 U.S. 3, 10, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997).* ***[**20]*** Since the antitrust laws were enacted for the "protection of competition, not competitors," a restraint is not deemed unreasonable unless it harms competition. *Brown Shoe Co., 370 U.S. at 320*.

The plaintiffs' assertion that the "mutual expansion" of the two networks was designed to lessen competition between Blue Cross and UHC is neither plausible nor supported by any evidence. If anything, it appears more likely that the expansion increased competition between Blue Cross and UHC because it permitted their potential customers to choose between the insurers based on a comparison of the plans that they offered rather than on a preference for doing business with a particular pharmacy.

Nor is it rational to infer that Blue Cross agreed to expand the two networks in order to lessen competition among pharmacies selling prescription pharmaceuticals. The rationale for a closed network is that limiting the number of pharmacies enables the insurer to negotiate lower prices for the prescription pharmaceuticals that it purchases by holding out the prospect that network pharmacies will receive a larger volume of business from the insurer's subscribers. Increasing the number of **[**21]** network pharmacies decreases the volume of business that each pharmacy is likely to get; and, therefore, diminishes the pharmacies' incentive to discount the prices charged to the insurer and its subscribers.

[*189] The plaintiffs' failure to explain how the expansion of the two networks lessened competition between Blue Cross and UHC or why Blue Cross would want to lessen competition among pharmacies lends credence to the evidence presented by Blue Cross that its purpose was to accommodate the desire of CVS to gain access to the PHS network. In any event, ***HN14***[] while motive is a relevant consideration in determining whether concerted actions violate the *Sherman Act*, the ultimate question is whether the challenged conduct unreasonably restrains trade. *U.S. Healthcare, Inc. v. Healthsource, Inc., 986 F.2d 589, 596 (1st Cir. 1993)* ("Motive can . . . be a guide to expected effects, but effects are still the central concern of the antitrust laws, and motive is mainly a clue.").

Some restraints may be deemed unreasonable *per se* and some may be found unreasonable under the "rule of reason." See *Khan, 522 U.S. at 10*. Here, the plaintiffs claim the defendants' exclusive **[**22]** dealing arrangement is unlawful under either method of analysis.

3. The Alleged *Per Se* Violation

HN15[] Restraints that are inherently anti-competitive because they have a "'pernicious effect on competition and lack any redeeming virtue'" are deemed unreasonable *per se. Northwest Wholesale Stationers, Inc. v. Pacific Stationary and Printing Co., 472 U.S. 284, 289, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)* (quoting *Northern Pacific, 356 U.S. at 5*) In order to be classified as a *per se* violation, a restraint must be one that a court can "predict with confidence" will be condemned by the "rule of reason." *Arizona v. Maricopa County Med. Soc'y, 457 U.S. 332, 344, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*.

HN16[] In the case of a *per se* violation, the plaintiff is not required to prove an actual anti-competitive effect. Nor is the plaintiff required to prove the defendants' market power or any other indicia that the challenged conduct is likely to harm competition. Rather, anti-competitive effects are presumed. *U.S. Healthcare, 986 F.2d at 593*.

HN17[] Because the *per se* rule condemns conduct without inquiring into market conditions or the actual impact of the conduct on competition, **[**23]** the *per se* rule is applied sparingly and only where the adverse impact on competition is obvious and substantial. *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 15-16, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*; *Drug Emporium, Inc. v. Blue cross of Western New York, Inc., 104 F. Supp. 2d 184, 188 (W.D.N.Y. 2000)*. Thus, the designation of *per se* violation generally is limited to agreements to fix prices, limit production, and engage in certain types of group boycotts. *U.S. Healthcare, 986 F.2d at 593*; *Double D Spotting Serv., Inc. v. Supervalu, Inc., 136 F.3d 554, 558 (8th Cir. 1998)* (citations omitted).

The plaintiffs concede that some exclusive dealing arrangements do not run afoul of the antitrust laws but they assert that the one at issue in this case is unlawful *per se* because it is a "horizontal agreement[] among competitors to eliminate competition" from the market for third-party reimbursed prescription drugs that amounts to a "group boycott." Pls.' Mem. in Opp'n to CVS's Mot. for Summ. J. at 10. This Court rejects that argument for several reasons.

First, the challenged arrangement is neither a horizontal agreement among **[**24]** competitors nor a group boycott. ***HN18***[] A horizontal agreement is an agreement between firms occupying the same level of the market structure. *Business Elec. Corp. v. Sharp Elec. Corp., 485 U.S. 717, 730, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)*. A "group boycott" exists where "competitors **[*190]** agree with each other not to deal with a supplier or distributor if it continues to serve a competitor whom they seek to injure." *U.S. Healthcare, 986 F.2d at 593*. Here, Blue Cross, PharmaCare, CVS and their counterparts in the UHC/PHS network occupy different levels of the market for third-party reimbursed prescription drugs. Blue Cross and UHC, in effect, are buyers; CVS and Brooks are sellers; and PharmaCare and PHS administer the prescription benefits programs of the two insurers and negotiate the prices to be paid by the insurers to participating pharmacies. Thus, any agreement between the insurers and/or the PBMs, on the one hand, and the pharmacies, on the other hand, is not a group boycott. Rather, it is more akin to ***HN19***[] an arrangement under which a distributor agrees to deal exclusively with one manufacturer which has been described as a vertical arrangement that does not constitute a *per se* violation **[**25]** of the antitrust laws. *Id. at 594*. Nor is there even an allegation that the network pharmacies with which the plaintiffs compete for the sale of third-party reimbursed prescription drugs, have agreed among themselves not to deal with Blue Cross or UHC if the insurers do business with the plaintiffs.

Second, it is not "obvious" that the plaintiffs have been excluded from the relevant market. Even assuming, *arguendo,* that the relevant market is the market for third-party reimbursed prescription drugs, it is far from clear that expansion of the PharmaCare and PHS networks has precluded the plaintiffs or any other pharmacies from competing in that market. The exclusion claim rests on the premise that the challenged arrangement prevents Blue Cross and UHC subscribers from purchasing prescription drugs from non-network pharmacies. However, there is no evidence that subscribers are prohibited from patronizing non-network pharmacies. There is some evidence that subscribers may receive higher levels of reimbursement for prescription pharmaceuticals purchased at network pharmacies than for those purchased at non-network pharmacies. Nevertheless, from the facts presented, **[**26]** it is impossible to determine precisely what financial incentives those differences may create for subscribers to patronize network pharmacies, or whether such incentives impair the plaintiffs' ability to compete for subscribers' business by lowering their prices to the levels charged by network pharmacies. In any event, it appears that the plaintiffs and other non-network pharmacies can compete for the business of Blue Cross and its subscribers every three years when the exclusive dealing agreements expire.

Third, to the extent that Blue Cross and UHC subscribers are deterred from patronizing non-network pharmacies because their plans might require them to pay less for prescription pharmaceuticals at network pharmacies, the reduction in price may be a redeeming virtue that makes *per se* treatment inappropriate.

Fourth, it is difficult to see how expansion of the two networks has harmed competition or the plaintiffs. If anything, it has increased competition among the network pharmacies by enabling them to vie for the business of both Blue Cross and UHC subscribers. Nor can the plaintiffs point to any injury they have sustained as a result of the expansion. On the contrary, prior **[**27]** to the expansion, the plaintiffs were excluded from both the PharmaCare and PHS networks; but since their settlement with PHS, they, now, are excluded only from Blue Cross's portion of the market. Furthermore, expansion of the networks has increased the pharmacy choices available to consumers by making it easier for Blue Cross subscribers to select pharmacies **[*191]** in the PHS network and for UHC subscribers to select pharmacies in the PharmaCare network.

Finally, ***HN20***[] courts, generally, have held that exclusive dealing arrangements similar to the one at issue in this case provide potential competitive benefits that make it inappropriate to treat them as *per se* violations of the antitrust laws. See e.g., *Capital Imaging Assoc., P.C. v. Mohawk Valley Medical Assocs., 996 F.2d 537, 545 (2d Cir. 1993)* (rejecting *per se* challenge to exclusive dealing arrangement between an HMO and an independent practice association of member physicians given Supreme Court's reluctance to extend *per se* doctrine and because of recognized pro-competitive virtues of independent practice association forms of HMOs);*Jefferson Parish, 466 U.S. 2, 26-29, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)* (exclusive **[**28]** dealing agreement requiring that all anesthesiology services required by a hospital's patients be performed by a particular group of doctors is not a *per se* violations of the *Sherman Act*) ;*U.S. Healthcare, 986 F.2d at 593-97* (exclusive dealing agreement between an HMO and its panel doctors does not constitute a group boycott that would justify treating it as a *per se* violation). Indeed, at least one court has held, specifically, that an exclusive pharmacy network virtually identical to the one in this case did not run afoul of the *Sherman Act* as a *per se* violation. *Drug Emporium, 104 F. Supp. 2d at 188-190*. That court noted ***HN21***[] the Supreme Court's reluctance "to adopt rules designating 'restraints imposed in the context of business relationships' as *per se* violations 'where the economic impact of certain practices is not immediately obvious.'" *Id. at 188* (quoting *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 458-459, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986))*.

The validity of exclusive dealing arrangements, instead has been determined under the "rule of reason" which requires proof of actual or threatened anti-competitive effects in the **[**29]** relevant market. Antitrust Handbook §§ 1:4, at 40-42. Furthermore, such agreements have been held to pass muster even under "rule of reason" analysis absent evidence that the price of the goods in question has increased; the quality has decreased, or the choices available to consumers have been diminished in some way other than preventing them from selecting the plaintiff. *Capital Imaging, 996 F.2d at 547*; see also *U.S. Healthcare, 986 F.2d at 595-97*.

4. Rule of Reason Analysis

HN22[] The lawfulness of practices that are not *per se* violations of the antitrust laws is determined by applying the "rule of reason." The test prescribed by the "rule of reason" is "whether, under 'all of the circumstances,' the challenged practice is 'unreasonably restrictive of competitive conditions.'" Antitrust Handbook § 2:10, at 193.

HN23[] In contrast to cases involving *per se* violations, plaintiffs in cases where the "rule of reason" is applied must prove that the challenged practice causes an antitrust injury. In other words, they must prove that the practice harms competition. *Drug Emporium, 104 F. Supp. 2d at 189*. The plaintiffs also **[**30]** must prove that the harm caused by the challenged practice outweighs any beneficial effects on competition. *U.S. Healthcare, 986 F.2d at 595*.

Generally, restraints that are ancillary to legitimate business goals and are not seriously anti-competitive will pass muster under "rule of reason" analysis. See *Tower Air, Inc. v. Federal Express Corp., 956 F. Supp. 270, 283 (E.D.N.Y. 1996)* (ancillary restraints are lawful if they are subordinate to a separate, legitimate transaction **[*192]** and they serve to make the transaction more effective).

HN24[] Antitrust injury may be demonstrated in either of two ways. It may be proven directly by presenting evidence of actual injury to competition in the relevant market or it may be proven indirectly by showing the likelihood of serious injury to competition. *Law v. National Collegiate Athletic Ass'n, 134 F.3d 1010, 1019 (10th Cir. 1998)*; *Drug Emporium, 104 F. Supp. 2d at 189*. An actual injury to competition may be shown by demonstrating that the challenged practice has increased prices or reduced output. *Law, 134 F.3d at 1019*. A potential injury to competition **[**31]** may be shown by presenting evidence that the defendants possess sufficient market power in the relevant market to significantly threaten competition. *Id.*; Antitrust Handbook § 2:10, at 198.

HN25[] Market power has been defined as the power to raise prices above competitive levels or to exclude competition. *Reazin v. Blue Cross & Blue Shield of Kansas, Inc., 899 F.2d 951, 966 (10th Cir. 1990)* (citation omitted). Market share is only one of the factors to be considered in determining whether a particular defendant has market power and there is no talismanic test for ascertaining what share of the relevant market a defendant must have in order to possess sufficient market power to threaten competition. *Id. at 967*.

HN26[] Since market power is merely a "surrogate" for determining the likelihood of actual injury to competition, it need not be established where proof of actual injury exists. *Indiana Fed'n of Dentists, 476 U.S. at 460-61*. Moreover, even in cases where market power is relevant, market power, alone, does not establish an antitrust violation. *CDC Technologies, Inc. v. IDEXX Lab., Inc., 186 F.3d 74, 81 (2d Cir. 1999)* **[**32]** (citations omitted). Rather, market power has been described as a filter for separating those practices "that pose a sufficient threat to competition to warrant further analysis" from those that do not. Antitrust Handbook § 2:10, at 198. Thus, once market power is proven, the nature, purpose, and duration of the restraint and its effect on competition in the relevant market must be assessed. *Id. CDC Technologies, 186 F.3d at 81* (market power, alone, is insufficient; plaintiff also must set forth other grounds to believe that the defendant's behavior will harm competition market-wide); *Greater Providence MRI, 32 F. Supp. 2d at 494* (the "court must consider the extent of the foreclosure, the relative strength of the party, the relative value of the commerce at issue, and the buyer's and seller's business justifications for the arrangement") (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 329, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961))*.

HN27[] When actual harm to competition is demonstrated, the issue becomes whether that harm is justified or outweighed by some pro-competitive benefit. *CDC Technologies, 186 F.3d at 80 n.4*; see also, **[**33]** *National Collegiate Athletic Ass'n v. Board of Regents of Univ. of Oklahoma, 468 U.S. 85, 100-101, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)* (though agreement had actual anti-competitive effect of fixing prices, the restraint was not unreasonable because without it, competition, itself, would not be possible). If there is no legitimate pro-competitive benefit the challenged practice will be held unlawful. *United States v. Brown Univ., 5 F.3d 658, 669 (3d Cir. 1993)*.

HN28[] When potential harm to competition is alleged, analysis is a two-step process. The first step is to identify the relevant market which includes both the market for the product or service and the **[*193]** geographic market. *Levine v. Central Florida Med. Affiliates, Inc., 72 F.3d 1538, 1552 (11th Cir. 1996)*. The second step is to assess the effect of the challenged practice on competition in the relevant market and on consumers. See *id. at 1552-53*. Among the factors to be considered in making that assessment are the degree of market power possessed by the defendants, the extent of market foreclosure resulting from the challenged practice; the impact on competitors and competitive justifications for **[**34]** the practice. Antitrust Handbook § 2:23, at 353; *Greater Providence MRI, 32 F. Supp. 2d at 494*. Other factors include the duration of the exclusive arrangement and the height of entry barriers. *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1059 (8th Cir. 2000)*

Here, there is some evidence that sixty percent of Rhode Island residents covered by health care plans are insured by Blue Cross; [3] that the plaintiffs have curtailed their plans to, expand their pharmacy operations; that the retail

[3] It appears that an additional twenty-five percent are insured by UHC, but that statistic is of questionable relevance given the fact that the plaintiffs are no longer excluded from the UHC/PHS network.

prices charged at network pharmacies exceed the prices charged at non-network pharmacies [4] and that the level of service provided at network pharmacies has been reduced.

[35]** Whether the plaintiffs can prove these things; whether they can prove that these things are attributable to the challenged practice; and whether they can prove that the expanded networks have harmed or threaten to harm competition to a degree that is not outweighed by legitimate business justifications or a reduction in the amount paid for prescription pharmaceuticals by Blue Cross subscribers, are questions that cannot be answered on a motion for summary judgment because those answers turn on the resolution of disputed facts and the subtly nuanced inferences to be drawn from those facts.

C. The Clayton Act and Rhode Island Anti-Trust Act Claims

HN29[] The test for determining whether an exclusive dealing arrangement violates the antitrust laws is essentially the same under *§ 3 of the Clayton Act* and under the *Rhode Island Anti-Trust Act as it is under § 1* of the Sherman Act, *Greater Providence MRI, 32 F. Supp. 2d at 493*, except that *§ 3 of the Clayton Act* applies only to agreements relating to the sale of goods or commodities, *Norte Car Corp. v. FirstBank Corp., 25 F. Supp. 2d 9, 18 (D.P.R. 1998)* (*Clayton Act* applies to commodities, not services). **[**36]**

Blue Cross argues that the *Clayton Act* is inapplicable because its agreement with PharmaCare was an agreement for PharmaCare to provide PBM services to Blue Cross and its members. This Court is not persuaded by that argument. The alleged antitrust violation focuses on the plaintiff's exclusion from the defendants' closed pharmacy network; and, consequently, from the market for third-party reimbursed prescription pharmaceuticals. The Blue Cross-PharmaCare agreement was an integral part of that arrangement. Therefore if the plaintiffs are able to prove that the exclusive dealing arrangement violated the antitrust laws, Blue Cross would **[*194]** not be insulated from liability simply because it did not contract directly with the pharmacies. See *Greater Providence MRI, 32 F. Supp. 2d at 495*. Indeed, ***HN30***[] the Supreme Court has held that, in a network pharmacy arrangement similar to the one in this case, the agreements between health insurers and participating pharmacies are "merely arrangements for the purchase of goods and services by Blue Shield." *Group Life & Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 214, 59 L. Ed. 2d 261, 99 S. Ct. 1067 (1979)*.

Because the test for determining whether **[**37]** an exclusive dealing arrangement violates the *Clayton Act* and/or the *Rhode Island Anti-Trust Act* is the same as the test under the *Sherman Act*, the analysis is the same. Accordingly, for reasons previously stated, the challenged practice does not constitute a *per se* violation and whether it withstands scrutiny under the rule of reason is a factual question to be determined at trial.

II. The Intentional Interference Claim

HN31[] Under Rhode Island law, in order to prevail on a claim of intentional interference with business relationships, a plaintiff must prove:

1. The existence of a business relationship or expectancy.
2. That the defendants knew of that relationship or expectancy.
3. That the defendants intentionally interfered with that relationship or expectancy.
4. That the interference caused the plaintiff to sustain the harm in question.

Mesolella v. City of Providence, 508 A.2d 661, 669 (R.I. 1986)

HN32[] That does not mean that a defendant is liable simply for committing an intentional act that interferes with a plaintiff's business relationships. The interference also must be impermissible or unjustified. *Id. at 669-670.* ***[**38]*** Otherwise, a defendant would be liable for legitimately competing with a plaintiff for business. See *Nadel v.*

[4] To the extent that the alleged increase in retail prices refers to prices paid by consumers who are not covered by health care plans, it is difficult to see what bearing the alleged price disparity would have on the plaintiffs' claim since the plaintiffs have defined the relevant market as the market for reimbursed prescription pharmaceuticals.

Play-By-Play Toys & Novelties, Inc., 208 F.3d 368, 382 (2d Cir. 2000) (requiring proof that the defendant acted with the sole purpose of harming the plaintiff or used dishonest, unfair, or improper means). The plaintiff bears the initial burden of showing that the interference was not legally privileged or justified. *Belliveau Bldg. Corp. v. O'Coin, 763 A.2d 622, 627 (R.I. 2000)*; see also *Mesolella, 508 A.2d at 669-70*. If that showing is made, the burden shifts to the defendant to prove justification. *Belliveau, 763 A.2d at 627*.

Here, the plaintiffs claim that the closed pharmacy network interferes with the relationship or prospective relationship between them as sellers of prescription pharmaceuticals and Blue Cross's subscribers as buyers. That claim rests on the premise that Blue Cross's subscribers are the buyers of reimbursed prescription pharmaceuticals.

However, that premise is inconsistent with the plaintiffs' claim that Blue Cross is liable under the *Clayton Act*. ***HN33***[ ] The Clayton Act applies only to parties **[**39]** to agreements for the "sale of goods." *15 U.S.C. § 14*. Since the only goods at issue in this case are the prescription pharmaceuticals sold by the various pharmacies, Blue Cross cannot be viewed as a party to an agreement for the sale of goods unless it is deemed the buyer of those goods.

Blue Cross also must be viewed as the buyer of the prescription pharmaceuticals obtained by its subscribers because it pays the lion's share of their cost. *Drug Emporium, 104 F. Supp. 2d at 191*; see also *Kartell v. Blue Shield of Massachusetts, Inc., 749 F.2d 922, 926 (1st Cir. 1984)* (Blue **[*195]** Shield "bought" health care services from physicians for its insureds because it paid a large part of the bill and set the amount of the charge). In fact, as already noted, the Supreme Court has described similar agreements as "merely arrangements" under which the pharmaceuticals are purchased by the health insurer. *Royal Drug, 440 U.S. at 214*.

Conclusion

For all of the foregoing reasons, the defendants' motions for summary judgment are granted in part and denied in part as follows:

1. The motions are granted with **[**40]** respect to Counts I - III to the extent that those counts allege *per se* violations. Otherwise, the motions with respect to those counts are denied.
2. The motions are granted with respect to Count IV.

HN2[] **Regulated Practices, Price Fixing & Restraints of Trade**

With regard to ***antitrust law***, substantial foreclosure in a relevant market is not necessarily unlawful, but whether the restraint is horizontal or vertical, substantial foreclosure is ordinarily a requirement for a seller arguing that she or he has been unreasonably excluded from opportunities to sell.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN3[] **Private Actions, Standing**

The doctrine of antitrust standing is occasionally used to describe but-for causation, and perhaps more often to exclude indirectly injured parties who have suffered actual injury but as a result of violations that directly injured intermediate entities. Perhaps the most common use of the phrase is to describe cases where there is actual injury from an antitrust violation but the impact on the would-be plaintiff results from what closer analysis reveals to be a pro-competitive transaction.

Opinion by: LYNCH

Opinion

[*52] LYNCH, *Circuit Judge*. Dr. Alga Morales-Villalobos, an anesthesiologist, brought antitrust claims under *15 U.S.C. § 1 (2000)* (*Section 1* of the Sherman Anti-Trust Act) and pendent state law claims against her former employers, the overlapping directors of an anesthesiology group and two hospitals. She alleged that the exclusive dealing arrangement between the hospitals and the group prevented her from competing to offer her services. She also alleged that the defendants engaged in a group boycott to exclude her from the anesthesiology group, which had an exclusive contract at local hospitals, and subsequently denied **[**2]** her certification to practice at those hospitals.

The defendants moved to dismiss for failure to state a claim, which the court allowed, with leave to amend. Morales-Villalobos then filed an amended complaint amplifying her allegations. The district court granted the motion to dismiss the amended complaint, holding that Morales-Villalobos had failed to sufficiently allege the relevant geographic market and an antitrust injury. *Morales-Villalobos v. Garcia-Llorens, 193 F. Supp. 2d 401, 405-09 (D.P.R. 2002)*(opinion and order). We reverse, though sympathetic to the difficulties posed by this area of law.

I.

HN1[] We review de novo a district court's dismissal of a complaint for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*. *Chute v. Walker, 281 F.3d 314, 318 (1st Cir. 2002)*. "We accept as true the well-pleaded factual allegations of the complaint, **[*53]** draw all reasonable inferences therefrom in the plaintiff's favor and determine whether the complaint, so read, [may] justify recovery on any cognizable theory." *Martin v. Applied Cellular Tech., Inc., 284 F.3d 1, 6 (1st Cir. 2002)*. "The issue is whether the complaint states a claim **[**3]** under the Sherman Act,

---

* Of the Northern District of Illinois, sitting by designation.

assuming the factual allegations to be true and indulging to a reasonable degree a plaintiff who has not yet had an opportunity to conduct discovery." *DM Research, Inc. v. Coll. of Am. Pathologists, 170 F.3d 53, 55 (1st Cir. 1999)*.

The facts as described in plaintiff's complaint are as follows. Morales-Villalobos is an anesthesiologist living in the town of Arecibo, approximately 56 miles west of San Juan. In July 1995 she became an employee of Arecibo Respiratory Care, Inc., ("ARC") one of the co-defendants. ARC provided anesthesiology services under an exclusive contract to the two hospitals in Arecibo performing surgeries: Hospital Dr. Susoni ("HDS") and Hospital Regional de Arecibo Cayetano Coll y Toste, which was managed by a subsidiary of HDS, Dr. Susoni Health Community Services. This subsidiary later purchased that hospital outright. The complaint provides no information on the length of the exclusive contract. The co-defendants -- Miguel Garcia-Llorens, Jose Arturo Garcia-Llorens, and Manuel Matos -- are the sole shareholders of ARC and members of the Board of Directors of HDS. ARC is, in turn, the majority shareholder of HDS. Jose **[**4]** Arturo Garcia-Llorens and Manuel Matos are themselves certified anesthesiologists.

Morales-Villalobos alleges that Jose Arturo Garcia-Llorens, Miguel Garcia-Llorens, and Manuel Matos were all involved -- as HDS directors -- in the decision to award an exclusive contract to ARC; indeed, no other HDS board members participated in the decision. The complaint alleges that the exclusive contract between ARC and HDS was motivated by corrupt self-dealing between the directors and stockholders of the two corporations, several of whom are themselves anesthesiologists and presumably benefitted from the exclusive agreement. The inference may be drawn that the reasons for the arrangement, accordingly, were not competitive. Morales-Villalobos received medical privileges as a physician at HDS in September 1995, which appear to have extended to the Hospital Regional de Arecibo as well. In September 1997, her privileges were renewed at HDS and the Hospital Regional de Arecibo for a further two years.

On December 1, 1998, Morales-Villalobos was fired from her position at ARC by Miguel Garcia-Llorens, the President of ARC, despite the absence of patient complaints (as alleged in the complaint, which **[**5]** we must take to be true). The following year, Morales-Villalobos was not recertified for privileges at HDS. Because of ARC's exclusive arrangement with HDS, once plaintiff was fired by ARC, she could not find work as an anesthesiologist at either hospital in Arecibo. HDS also rejected a request by Dr. Ramos Escoda, Morales-Villalobos's former husband and a surgeon who practices in Arecibo, to have her administer anesthesia to his private surgery patients at HDS. Other physicians in the area have also indicated their willingness to use Morales-Villalobos's services, but are prevented from doing so at these hospitals. Moreover, HDS prevented Morales-Villalobos from entering the medical facility by placing fliers on the walls and posting security guards at the hospital doors.

Morales-Villalobos alleges that HDS and the Hospital Regional de Arecibo have "complete market power" in the Arecibo region, because they are able to offer a **[*54]** complete line of medical services, and because they are the only hospitals approved as Medicare providers. They are the only hospitals within the Health Region of Arecibo, as defined by the Health Reform Program of the Government of Puerto Rico, which provides **[**6]** medical care for indigent patients. Patients covered under the Health Reform Program are not allowed to seek services in San Juan or other cities in Puerto Rico. Morales-Villalobos alleges she provides Medicare services to patients of Dr. Escoda. Half of the total revenue received by the Arecibo hospitals comes from Medicare, which provides health coverage for individuals 65 years old or older, *42 U.S.C. § 1395c (2002)*. An inference may be drawn that such patients are less likely to be able to make a 56-mile trip to hospitals in San Juan.

The other health region relatively near Arecibo is the Manati Health Region, which encompasses the city of Manati, in which there are three hospitals at which surgery is performed. Morales-Villalobos says it would be impossible for her to practice in Manati, because all of these hospitals have exclusive contracts with anesthesiology groups. Perhaps more importantly, her referring physicians in the Arecibo region do not have privileges in Manati.

Morales-Villalobos also alleges that the quality of patient care has worsened as a result of ARC's exclusive contract. She cites understaffing, with one anesthesiologist routinely **[**7]** expected to cover two geographically-separated hospitals, and nurses administering anesthesia without the supervision of an anesthesiologist. She also alleges an increase in cost relative to other sectors of the market.

Morales-Villalobos alleges that she has been blocked from practicing anesthesiology in Arecibo, her hometown, and that she has also suffered damages to her professional reputation as a result of her termination by ARC. She alleges there are doctors who wish to use her as an anesthesiologist but cannot because she has been denied privileges at the only hospitals in Arecibo. She characterizes herself as a competitor of ARC. She requests either renewal of her medical privileges at HDS facilities and an order requiring defendants to allow her to administer to elective private patients, or a declaration that the exclusive contract is illegal, economic damages, and an order to open HDS to Medicare providers.

II.

The district court dismissed Morales-Villalobos's complaint on two bases: first, that she failed to adequately define the geographic market; and second, that she lacked antitrust standing. Neither issue can be evaluated without reference to plaintiff's theories **[**8]** of recovery. At this most preliminary stage, the bare bones of two different theories are suggested by plaintiff's complaint. The first is that, as an anesthesiologist in Arecibo, she is a direct competitor of ARC and is precluded by the exclusive dealing arrangement from offering her services to the only two hospitals in Arecibo. The second is that the defendants have engaged in a group boycott, in a horizontal arrangement excluding her through expulsion, which precludes her from offering her services. Neither theory is actionable as a per se violation.

The district court dismissed the claim first for lack of a proper geographic market. Here, the plaintiff's claim is that, as a seller of services, she was foreclosed from the outlets reasonably available. For an anesthesiologist, the primary outlets for her services are ordinarily hospitals and clinics. Of course, ***HN2***[] even substantial foreclosure in a relevant market is not necessarily unlawful, *see* *Tampa Elec. Co. v. [*55] Nashville Coal Co., 365 U.S. 320, 328-29, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*, but whether the restraint is horizontal or vertical, substantial foreclosure is ordinarily a *requirement* for a seller **[**9]** arguing that she or he has been unreasonably excluded from opportunities to sell. *Id.*

In this instance, the *extent* of foreclosure depends greatly on whether the plaintiff's market is anesthesiology services within Arecibo, or whether the market encompasses the neighboring town of Manati, or whether it includes other parts or all of Puerto Rico, or whether it also includes part or all of the continental United States. Depending on the circumstances, foreclosure might range from nearly complete (in Arecibo) to a trivial percentage (if the market is the entire United States). There is no mechanical rule -- the issue depends on circumstances, *see* 2A P.E. Areeda & H. Hovenkamp, ***Antitrust Law*** P 570, at 342-44 (2d ed. 2002) -- and while there are arguments for a larger market, the matter cannot be resolved on the face of the complaint.

The district court also dismissed on grounds that the plaintiff lacked antitrust standing. ***HN3***[] The doctrine of antitrust standing is occasionally used to describe but-for causation, *see* *SAS of P.R., Inc. v. P.R. Tel. Co., 48 F.3d 39, 43 (1st Cir. 1995)*, and perhaps more often to exclude indirectly injured parties who have suffered **[**10]** actual injury but as a result of violations that directly injured intermediate entities, *e.g.*, *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 494, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)* (excluding indirect purchasers). Perhaps the most common use of the phrase is to describe cases where there is actual injury from an antitrust violation but the impact on the would-be plaintiff results from what closer analysis reveals to be a pro-competitive transaction. *E.g.*, *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*.

Here it is not apparent, on a motion to dismiss, why Morales-Villalobos lacks antitrust standing. She claims to be directly injured by exclusion from ARC and, in consequence of that exclusion and the exclusive dealing arrangement, by exclusion from the two Arecibo hospitals. There is thus alleged but-for causation, a direct injury to plaintiff as a supplier, and no obvious reason why -- if the exclusive dealing or group boycott charges amount to a violation -- the injury to her would not be of the kind that antitrust laws are intended to address. If some reason does **[**11]** exist, defendants can develop it on remand.

Of course, the defendants may be expected to argue that quality control and other legitimate concerns justify whatever exclusive dealing arrangements exist, as well as the exclusion of the plaintiff from ARC. [1] But these are matters that go to the question of whether the arrangements are violations of the antitrust laws and not whether the plaintiff is a proper party to vindicate those claims. As to whether the arrangements are anti-competitive, this is obviously a factual matter that -- given the allegations -- can hardly be resolved on the face of the complaint.

[12]** It is true that many of these antitrust cases brought by excluded medical care providers are ultimately decided against plaintiffs, usually after summary judgment or trial. *See, e.g.*, *Mathews v. Lancaster **[*56]** Gen. Hosp., 87 F.3d 624 (3d Cir. 1996)*; *Oksanen v. Page Mem'l Hosp., 945 F.2d 696 (4th Cir. 1991)*; *Benjamin v. Aroostook Med. Ctr., 937 F. Supp. 957 (D. Me. 1996)*; *Leak v. Grant Med. Ctr., 893 F. Supp. 757 (S.D. Ohio 1995)*. But that does not mean all such claims are hopeless and should be resolved by motion to dismiss the complaint.

Reversed. Costs are awarded to Morales-Villalobos.

End of Document

[1] Going beyond the allegations of the complaint, defendants' memorandum in support of their motion to dismiss states that plaintiff was fired because "in [ARC's] principals' considered view, she was not performing her duties adequately." Yet defendants chose to test the complaint by *Rule 12(b)(6)* motion, and the district court judge quite appropriately considered the motion under the *Rule 12(b)(6)* standards.

Big Island Candies, Inc. v. Cookie Corner

United States District Court for the District of Hawaii

January 15, 2003, Decided ; January 15, 2003, Date Opinion Filed

CIV. NO. 01-00449 SOM/LEK

Reporter
244 F. Supp. 2d 1086 *; 2003 U.S. Dist. LEXIS 1746 **

BIG ISLAND CANDIES, INC., a Hawaii Corporation, Plaintiff, vs. THE COOKIE CORNER, a Hawaii General Partnership, JAMES McARTHUR and ANGUS McKIBBIN, THE COOKIE MASTERS OF HAWAII aka HAWAII COOKIE MASTERS aka MASTER OF HAWAIIAN COOKIES, a Hawaii General Partnership, Defendants.

Subsequent History: Partial summary judgment granted by, Partial summary judgment denied by *Big Island Candies, Inc. v. Cookie Corner, 2003 U.S. Dist. LEXIS 11290 (D. Haw., May 30, 2003)*

Disposition: [1]** PLAINTIFF'S MOTION FOR PARTIAL SUMMARY JUDGMENT GRANTED IN PART AND DENIED IN PART AND DEFENDANTS' CROSS-MOTION FOR PARTIAL SUMMARY JUDGMENT DENIED.

HN1[] **Supporting Materials, Discovery Materials**

Summary judgment shall be granted when the pleadings, depositions, answers to interrogatories and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. One of the principal purposes of summary judgment is to identify and dispose of factually unsupported claims and defenses.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

Evidence > Burdens of Proof > Allocation

HN2[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment must be granted against a party that fails to demonstrate facts to establish what will be an essential element at trial. A moving party without the ultimate burden of persuasion at trial--usually, but not always, the defendant--has both the initial burden of production and the ultimate burden of persuasion on a motion for summary judgment.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] **Summary Judgment, Evidentiary Considerations**

All evidence and inferences must be construed in the light most favorable to the nonmoving party. Inferences may be drawn from underlying facts not in dispute, as well as from disputed facts that the judge is required to resolve in favor of the nonmoving party. When "direct evidence" produced by the moving party conflicts with "direct evidence" produced by the party opposing summary judgment, the judge must assume the truth of the evidence set forth by the nonmoving party with respect to that fact.

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

Civil Procedure > Judgments > Summary Judgment > Partial Summary Judgment

HN4[] **Motion Practice, Content & Form**

Under U.S. Dist. Ct., D. Haw., R. 7.9, a cross-motion must raise the same subject matter as the original motion.

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

HN5[] **Federal Unfair Competition Law, Trade Dress Protection**

Trade dress protection extends only to design features that are nonfunctional. The party claiming protectable trade dress has the burden at trial of demonstrating that the design is nonfunctional.

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

HN6[] **Federal Unfair Competition Law, Trade Dress Protection**

In evaluating the functionality of a design, the court focuses not on the individual elements, but rather on the overall visual impression that the combination and arrangement of those elements create. However, in a product configuration case in which each of the individual elements of the product configuration is functional, the "overall appearance" of the product cannot be the basis for a finding of nonfunctionality.

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

HN7[] **Federal Unfair Competition Law, Trade Dress Protection**

Functionality denotes utility. The court considers multiple factors to determine whether the design is functional: (1) whether the design yields a utilitarian advantage, (2) whether alternative designs are available, (3) whether advertising touts the utilitarian advantages of the design, and (4) whether the particular design results from a comparatively simple or inexpensive method of manufacture. No single factor is dispositive; all should be weighed collectively.

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

Trademark Law > Conveyances > General Overview

HN8[] **Federal Unfair Competition Law, Trade Dress Protection**

A design feature is not functional by definition if it increases appeal and sales of the product.

Trademark Law > ... > Infringement Actions > Defenses > General Overview

HN9[] **Infringement Actions, Defenses**

Acquiescence, like laches, is a personal defense that relates to a plaintiff's conduct with respect to a particular defendant.

Business & Corporate Compliance > ... > Registration Procedures > Federal Registration > Principal Register

HN10[] **Federal Registration, Principal Register**

See 15 U.S.C.S. § 1052(e)(5).

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Trade Dress Protection > Causes of Action

Trademark Law > ... > Registration Procedures > Federal Registration > Degree of Protection

Trademark Law > Trademark Cancellation & Establishment > Registration Procedures > General Overview

Business & Corporate Compliance > ... > Registration Procedures > Federal Registration > Principal Register

HN11[] **Trade Dress Protection, Causes of Action**

The general principles qualifying a mark for registration under § 2 (15 U.S.C.S. § 1052) of the Lanham Act are for the most part applicable in determining whether an unregistered mark is entitled to protection under § 43(a) (15 U.S.C.S. § 1125(a)) of the Lanham Act.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN12[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) permits dismissal for failure to state a claim upon which relief can be granted. On a motion to dismiss pursuant to Rule 12(b)(6), review is limited to the contents of the complaint, and all allegations of material fact are taken as true and construed in the light most favorable to the nonmoving party.

Trademark Law > Subject Matter of Trademarks > Labels, Packaging & Trade Dress

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

Trademark Law > ... > Infringement Actions > Defenses > General Overview

Trademark Law > Trademark Cancellation & Establishment > Priority > General Overview

HN13[] **Subject Matter of Trademarks, Labels, Packaging & Trade Dress**

In trademark law, ownership rights in a trademark may be acquired through continuous prior use.

Business & Corporate Compliance > ... > Abandonment > Unintentional Abandonment > Loss of Significance

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Waiver & Preservation of Defenses

Trademark Law > Abandonment > General Overview

HN14[] Unintentional Abandonment, Loss of Significance

Abandonment of a mark causes the mark to fall into the public domain. Under the Lanham Act, a mark may be deemed "abandoned" in one of two situations: (1) when its use has been discontinued with intent not to resume such use, and (2) when any course of the owner, including acts of omission as well as commission, causes the mark to become the generic name for the goods or services on or in connection with which it is used or otherwise to lose its significance as a mark. *15 U.S.C.S. § 1127*.

Trademark Law > Abandonment > General Overview

HN15[] Trademark Law, Abandonment

In the Ninth Circuit, failure to sue other potential infringers does not constitute abandonment.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Trade Dress Protection > Causes of Action

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Unclean Hands

Trademark Law > ... > Infringement Actions > Defenses > General Overview

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

HN16[] Trade Dress Protection, Causes of Action

To prevail on a defense of unclean hands in a Lanham Act suit, the defendant must demonstrate that the plaintiff's conduct is inequitable and that the conduct relates to the subject matter of its claims. Equity requires that those seeking its protection shall have acted fairly and without fraud or deceit as to the controversy in issue.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

Transportation Law > ... > Federal Powers > Powers of Congress > Channels of Commerce

Trademark Law > Subject Matter of Trademarks > Labels, Packaging & Trade Dress

Transportation Law > Interstate Commerce > Definition of Commerce

Transportation Law > ... > Federal Powers > Powers of Congress > Instrumentalities of Commerce

Transportation Law > Intrastate Commerce

HN17[] Infringement Actions, Determinations

As defined in the Lanham Act, "commerce" refers to all commerce which may lawfully be regulated by Congress. *15 U.S.C.S. § 1127*. The definition of interstate commerce is fairly broad, encompassing (1) the channels of interstate commerce; (2) the instrumentalities of interstate commerce, or persons and things in interstate commerce, even though the threats may come only from intrastate activities; and (3) those activities that substantially affect interstate commerce. Under that definition, even a defendant who is engaged solely in intrastate commerce may be held liable under the Lanham Act if the plaintiff uses the asserted mark in interstate commerce, as even the "local use" of the challenged product design or packaging may substantially affect the strength of the plaintiff's mark.

Opinion

[*1087] *ORDER GRANTING IN PART AND DENYING IN PART PLAINTIFF'S MOTION FOR PARTIAL SUMMARY JUDGMENT AND DENYING DEFENDANTS' CROSS-MOTION FOR PARTIAL SUMMARY JUDGMENT*

1. *INTRODUCTION.*

Plaintiff Big Island Candies, Inc. ("BIC"), has sued Defendants The Cookie Corner, James McArthur, Angus McKibbin, and Cookie Masters of Hawaii (collectively "Cookie Corner") for misappropriation of trade dress in connection with Cookie Corner's manufacture and sale of a shortbread cookie dipped diagonally in chocolate (a "diagonally dipped shortbread cookie"). BIC alleges **[**2]** that it has protectable unregistered trade dress rights in (1) the design of BIC's diagonally dipped **[*1088]** shortbread cookie ("the BIC Cookie") and (2) the packaging of the BIC Cookie.

On October 30, 2002, BIC moved for partial summary judgment on the issues of distinctiveness, functionality, and likelihood of confusion (Part I of BIC's motion), and on twenty-one of Cookie Corner's numbered defenses (Part II of BIC's motion) (the "Oct. 30 motion"). The parties stipulated to the bifurcation of that motion on December 5, 2002. Only (1) the functionality of the BIC Cookie design absent the packaging (Section I.B. of BIC's motion) and (2) certain defenses raised by Cookie Corner (Part II of BIC's motion) are presently before this court. While BIC seeks a judgment that the BIC Cookie design is nonfunctional, Cookie Corner has filed a cross-motion for partial summary judgment, arguing that the BIC Cookie design is functional.

Because there are genuine issues of fact as to whether BIC's product design is functional, the court DENIES summary judgment to both parties on the issue of functionality. For the reasons stated below, the court GRANTS in part and DENIES in part BIC's motion with respect **[**3]** to certain defenses raised by Cookie Corner.

2. *BACKGROUND FACTS.*

BIC began selling the BIC Cookie in 1985. The BIC Cookie is a rectangular shortbread cookie with "bull-nose" corners, [1] dipped diagonally in chocolate. The chocolate covers approximately one-half of the cookie. BIC has advertised and sold the BIC Cookie continuously since 1985.

[1] "Bull-nose" corners are rounded corners. There are at least two different methods that can be used to create rectangular shortbread cookies. One method is to bake a sheet of shortbread and then cut the shortbread into rectangles, which gives the resulting cookies squared-off, crumbly corners. The second method, used by both BIC and Cookie Corner, is to cut the dough into rectangles before baking the shortbread; the baked cookies have rounded, smooth corners.

Sometime in 2000 or 2001, Cookie Corner began selling its own rectangular shortbread cookie with "bull-nose" corners, dipped diagonally in chocolate (the "Cookie Corner Cookie"). Like the BIC Cookie, the **[**4]** Cookie Corner Cookie is also approximately half-covered in chocolate.

3. *STANDARD OF REVIEW.*

HN1[] Summary judgment shall be granted when:

> the pleadings, depositions, answers to interrogatories and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law.

Fed. R. Civ. P. 56(c); *see also* *Addisu v. Fred Meyer, Inc., 198 F.3d 1130, 1134 (9th Cir. 2000)*. One of the principal purposes of summary judgment is to identify and dispose of factually unsupported claims and defenses. *Celotex Corp. v. Catrett, 477 U.S. 317, 323-24, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*.

HN2[] Summary judgment must be granted against a party that fails to demonstrate facts to establish what will be an essential element at trial. *See* *id. at 323*. A moving party without the ultimate burden of persuasion at trial--usually, but not always, the defendant--has both the initial burden of production and the ultimate burden of persuasion on a motion for summary judgment. *Nissan Fire & Marine Ins. Co., Ltd. v. Fritz Cos., 210 F.3d 1099, 1102 (9th Cir. 2000)*. **[**5]**

HN3[] All evidence and inferences must be construed in the light most favorable to the nonmoving party. *T.W. Elec. Service, Inc. v. Pac. Elec. Contractors Ass'n, 809 F.2d 626, 631 (9th Cir. 1987)*. Inferences may **[*1089]** be drawn from underlying facts not in dispute, as well as from disputed facts that the judge is required to resolve in favor of the nonmoving party. *Id.* When "direct evidence" produced by the moving party conflicts with "direct evidence" produced by the party opposing summary judgment, "the judge must assume the truth of the evidence set forth by the nonmoving party with respect to that fact." *Id.*

4. *ANALYSIS.*

1. The Cross-Motion Is Disregarded to the Extent That Cookie Corner Seeks Summary Judgment on the Issue *of Whether the BIC Cookie Design Is Generic.*

Cookie Corner devotes a large portion of its "cross-motion" to arguing that the design of the BIC Cookie is generic. ***HN4***[] Under Local Rule 7.9, a cross-motion must raise the "same subject matter" as the "original motion." The "original motion" in this case is BIC's motion for partial summary judgment on the issue of functionality and with respect to certain numbered defenses.

The question of **[**6]** whether the BIC Cookie is generic relates to the issue of distinctiveness, not functionality. *See, e.g.,* *Two Pesos, Inc. v. Taco Cabana, Inc., 505 U.S. 763, 768, 120 L. Ed. 2d 615, 112 S. Ct. 2753 (1992)*. Distinctiveness is addressed in Section I.A. of the Oct. 30 motion. [2] Pursuant to the stipulated bifurcation of the Oct. 30 motion, Section I.A., i.e., the question of distinctiveness, is not presently before this court. Accordingly, the court disregards the portion of Cookie Corner's cross-motion that seeks summary judgment with respect to the question of whether the BIC Cookie design is distinctive or generic.

2. *Both the Motion* **[**7]** *and the Cross-Motion for Partial Summary Judgment on the Issue of Functionality Are Denied.*

---

[2] BIC itself confuses the questions of functionality and distinctiveness in the Oct. 30 motion. In Section I.A. of the Oct. 30 motion, which argues that the BIC Cookie design and packaging are nonfunctional, BIC states: "[The BIC Cookie] trade dress does not serve any utilitarian function. The trade dress is distinctive and identifies BIC." Oct. 30 Mot. at 12.

Both BIC and Cookie Corner have moved for partial summary judgment on the issue of the functionality of the BIC Cookie design. Because there is a genuine issue of material fact as to whether the design of the BIC Cookie is functional, neither party is entitled to summary judgment with respect to the question of functionality.

HN5[] Trade dress protection extends "only to design features that are nonfunctional." *Clicks Billiards, Inc. v. Sixshooters, Inc., 251 F.3d 1252, 1258 (9th Cir. 2001)*. As the party claiming protectable trade dress, BIC has the burden at trial of demonstrating that the design of the BIC Cookie is nonfunctional. *TrafFix Devices, Inc. v. Marketing Displays, Inc., 532 U.S. 23, 32, 149 L. Ed. 2d 164, 121 S. Ct. 1255 (2001)*.

HN6[] In evaluating the functionality of the BIC Cookie design, the court focuses "not on the individual elements, but rather on the overall visual impression that the combination and arrangement of those elements create." *Clicks, 251 F.3d at 1259*. However, the Ninth Circuit has cautioned that, in a product configuration case in which each of the **[**8]** individual elements of the product configuration is functional, the "overall appearance" of the product cannot be the basis for a finding of nonfunctionality. *Tie Tech, Inc. v. Kinedyne Corp., 296 F.3d 778, 786 (9th Cir. 2002)* (citing *Leatherman Tool Group v. Cooper Indus., Inc, 199 F.3d 1009, 1013 (9th Cir. 1999)*, *vacated in part on other grounds, 532 U.S. 424, 149 L. Ed. 2d 674, 121 S. Ct. 1678 (2001))*. **[*1090]**

The Ninth Circuit shares the common view that ***HN7***[] "functionality denotes utility." *Clicks, 251 F.3d at 1260*. The court considers multiple factors to determine whether the BIC Cookie design is functional: "(1) whether the design yields a utilitarian advantage, (2) whether alternative designs are available, (3) whether advertising touts the utilitarian advantages of the design, and (4) whether the particular design results from a comparatively simple or inexpensive method of manufacture." *Disc Golf Ass'n, Inc. v. Champion Discs, Inc., 158 F.3d 1002, 1006 (9th Cir. 1998)* (citations omitted). No single factor is dispositive; "all should be weighed collectively." *Id.*

On the present record, genuine issues of fact remain with respect to **[**9]** each factor of the test, precluding summary judgment as to the functionality of the design.

Before discussing the four factors of the *Disc Golf* test for functionality, however, the court addresses Cookie Corner's contention that, in the Ninth Circuit, "two standards of functionality" exist, a utilitarian standard and an "aesthetic functionality" standard. Defs.' Mem. in Supp. Of Defs.' Cross-Mot. for Partial Summ. J. & in Opp. to Pl.'s Mot. for Partial Summ. J. at 24 ("Defs.' Cross-Mot. & Opp."). Some circuits, relying on the Ninth Circuit's decision in *Pagliero v. Wallace China Co., 198 F.2d 339, 344 (9th Cir. 1952)* (holding that hotel china patterns were not protected in part because the patterns "satisfied [the purchaser's] demand for the aesthetic as well as for the utilitarian"), have adopted a theory termed "aesthetic functionality" under which purely aesthetic product features are deemed functional. *But see* 1 J.T. McCarthy, *McCarthy on Trademarks and Unfair Competition* § 7:81 (4th ed. 2002) (arguing that "aesthetic functionality" is an oxymoron). The Ninth Circuit, however, "has consistently retreated from the position taken in [*Pagliero* **[**10]**]." *Id.* § 7:80. *Clicks* noted that the Ninth Circuit has not adopted the theory of "aesthetic functionality." *251 F.3d at 1260* ("Nor has this circuit adopted the 'aesthetic functionality' theory, that is, the notion that a purely aesthetic feature can be functional.").

Cookie Corner argues that, nonetheless, "'aesthetic functionality' is alive and well in the Ninth Circuit," Defs.' Reply at 15, because *Pagliero* has not been overruled and is still applicable to product features. *See Fabrica Inc. v. El Dorado Corp., 697 F.2d 890, 895 (9th Cir. 1983)* (noting that "this court has specifically limited application of the *Pagliero* functionality test to product features and has refused to apply the test to cases involving trade dress [3] and packaging").

While *Pagliero* has not been explicitly **[**11]** overruled, subsequent cases have narrowed Pagliero's effect. Those cases have noted that a literal reading of Pagliero's statement that a product feature that is "an important ingredient in the commercial success of the product" is not protectable would defeat the purpose of trademark law, as "a trademark is always functional in the sense that it helps sell goods by identifying their manufacturer." *Vuitton et Fils*

3 Fabrica's distinction between "trade dress" and "product features" is somewhat confusing given that "trade dress" includes product shape and configuration. *See* 1 McCarthy § 7:54.

S.A. v. J. Young Enterprises, Inc., 644 F.2d 769, 774 (9th Cir. 1981). Rather, "the policy expressed in *Pagliero* and the cases decided under it is aimed at avoiding the use of a trademark to monopolize a design feature which, in itself and apart from its identification of source, improves the usefulness or appeal of the object it adorns." *Id.* However, ***HN8***[] the Ninth Circuit "has specifically rejected the notion that a **[*1091]** design feature is functional by definition if it increases appeal and sales of the product." *Fabrica, 697 F.2d at 895-96*. The thrust of these cases, as Ninth Circuit law on the subject has developed, suggests that the aesthetic appeal of the BIC Cookie design should not be considered in the functionality analysis. [4]

[12]** Even if, under Ninth Circuit law, the aesthetic appeal of the BIC Cookie should be considered in the court's analysis of functionality, there is no evidence that customers demand the BIC Cookie because of the aesthetic features of its design, apart from the design's identification of source. *See Vuitton,* 644 F.2d at 774. Nor can the court conclude, given the present record, that BIC designed the BIC Cookie to satisfy consumers' "demand for the aesthetic."

Given the above, the court applies the four-factor "utilitarian functionality" test in *Disc Golf.*

1. *Utilitarian Advantage.*

Cookie Corner argues that the design of the BIC Cookie offers multiple utilitarian advantages. First, it argues that the rectangular BIC Cookie uses one of only three basic cookie shapes--round, square, and rectangular--that are less likely to break in transit and easier to manufacture than other shapes. It then argues that "it is a common practice" to coat one-half of the cookie in chocolate, and that there are three ways to half-dip a rectangular cookie: a "vertical" dip, a "horizontal" dip, and a "diagonal" dip. Cookie Corner contends that only the vertical dip and the diagonal **[**13]** dip offer the "functional feature" of giving the consumer "chocolate in every bite," and that the diagonal dip offers a larger undipped "handle" for the consumer to hold while eating the cookie.

Cookie Corner further argues that the larger handle also makes the dipping process more convenient for the cookie dippers during cookie production, and that the diagonal dip, in contrast to the vertical and horizontal dips, provides the dipper with two reference points (the corners) so that the cookies will be consistently covered one-half in chocolate.

BIC argues that the design of the BIC Cookie offers no utilitarian advantage to either BIC itself or customers. BIC argues that (1) at least eight shapes of shortbread cookies are commonly used; (2) consumers do not necessarily demand half-dipped cookies with "chocolate in every bite"; (3) even if some consumers do demand half-dipped cookies with "chocolate in every bite," a diagonally dipped cookie does not necessarily provide "chocolate in every bite," as a consumer could eat the end with little to no chocolate without biting into the dipped portion of the cookie; (4) the diagonal dip is not necessarily more efficient for dippers; and (5) **[**14]** consumers may not actually use the undipped portion as a handle, and, even if they do, an undipped handle can be achieved using other dip patterns.

There is a genuine issue of fact as to whether the BIC Cookie design offers any utilitarian advantage. BIC has not established that the BIC Cookie design is nonfunctional. Cookie Corner, for its part, has **[*1092]** not established that it is entitled to summary judgment.

The court notes that some of Cookie Corner's arguments relate to the manufacturing process, which should more appropriately be addressed in connection with the fourth factor of the functionality test. Therefore, the court leaves the question of whether the design is more efficient for dippers to its analysis of the fourth factor.

2. *Availability of Alternative Designs.*

---

[4] Cookie Corner contends that *Clicks* and *Pagliero* can be reconciled by equating a "purely aesthetic feature" (which is nonfunctional according to *Clicks*) with a "mere arbitrary embellishment, a form of dress … primarily adopted for the purposes of identification and individuality" (which is nonfunctional under *Pagliero*). Presumably, Cookie Corner then intends to argue that the BIC Cookie design is neither "purely aesthetic" nor "mere arbitrary embellishment." It is not entirely clear to the court how, under these circumstances, reliance on *Pagliero* would help Cookie Corner establish that the BIC Cookie design was functional.

It is undisputed that alternative cookie designs are available. Both parties have presented evidence that shortbread cookies may be produced in a wide variety of shapes, including oval and pineapple shapes, and that multiple dipping patterns are available. The parties disagree, however, on the number of alternative designs that are relevant, with Cookie Corner arguing, for instance, that only there are only **[**15]** three common cookie shapes (round, square, and rectangular) that provide the same types of utilitarian advantages, and with BIC contending that there are at least eight.

3. *Advertising.*

BIC denies that it has ever advertised that the BIC Cookie offers any utilitarian advantage.

In support of its contention that BIC has "touted … the utilitarian advantages of the design," Defs.' Cross-Mot. & Opp. at 27, Cookie Corner offers a number of articles from the press, including articles from magazines *Candy Industry* and *Hawaii Business.*

Most of the articles offered by Cookie Corner do not tout any utilitarian advantage of the BIC Cookie design. For instance, a May 2002 *Candy Industry* article features statements attributed to BIC's founder and President, Allan Ikawa ("Ikawa"), explaining BIC's production process. [5] If anything is indeed "touted" in the *Candy Industry* articles, it is the complexity of BIC's production process.

[16]** Cookie Corner does offer one article, however, that suggests that BIC may have touted a utilitarian advantage of the BIC Cookie design, although not in advertising. An article in the August 2000 issue of *Hawaii Business* describes the process that led to the BIC Cookie's design. According to that article, Ikawa developed the BIC Cookie in response to Maui hoteliers' specifications for a cookie to include in their hotels' mini-bars. The article's author wrote: "The snack food had to fit nicely in a box. It had to be crumble-proof …. The Maui Marriott's food and beverage manager also had a suggestion: How about a diagonal dip of chocolate so that the cookie could be inserted into a scoop of ice cream?" [6]

Cookie Corner has not highlighted that particular paragraph **[**17]** of the *Hawaii Business* article as evidence that BIC has touted the utilitarian advantages of the BIC Cookie design. However, this court finds that the paragraph raises a genuine issue of fact as to the third factor of the test for functionality.

[*1093] 4. *Whether the BIC Cookie Design Results from a Comparatively Simple or Inexpensive Method of Manufacture.*

It is unclear whether the BIC Cookie design results from "a comparatively simple or inexpensive method of manufacture." The parties agree that the only way to achieve the precise diagonal dip pattern of the BIC Cookie, given a shape and size similar to that of the BIC Cookie, is by dipping the cookie by hand. Cookie Corner argues that it is easier to hand-dip diagonally than horizontally because of the natural endpoints created by the opposite corners and because of the larger undipped "handle" for the dippers to hold.

Neither party has offered evidence as to whether machine-dipping is simpler than hand-dipping, or vice versa. BIC asks this court to assume that hand-dipping is a more complex process, but it offers no evidence to that effect. Cookie Corner appears to be contending that hand-dipping is a "simple method of manufacture, **[**18]** " but Cookie Corner does not claim or offer evidence that hand-dipping is simpler than machine manufacturing. Defs.' Cross-Mot. & Opp. at 27. Instead, Cookie Corner argues that, *if* one wants to hand-dip a rectangular shortbread cookie so that half of the cookie is covered, a diagonal dip is the most efficient method. That argument is not

---

[5] The statements highlighted by Cookie Corner include Ikawa's statements that BIC "couldn't find a machine that could provide the proper angle of chocolate," and that the dipping line is efficient because production switches between shortbreads and dipped products to chocolate batches. The article also explains how BIC Cookies are manufactured.

[6] The court considers the articles offered by Cookie Corner, because statements directly or indirectly attributed to BIC's President are not hearsay, and the articles themselves are offered as evidence of touting rather than as assertions of truth.

persuasive, even assuming that a rectangular cookie dipped half in chocolate is otherwise functional, as it is not clear that hand-dipping is simpler or less expensive than using a machine. Moreover, BIC disputes Cookie Corner's contention that it is easier for those doing the dipping to dip cookies diagonally, taking into account the four corners of the cookie, than to dip the cookies vertically.

3. *Defenses.*

1. Summary Judgment Is Granted With Respect to the Eighth Defense (Laches), Tenth Defense (Acquiescence), Eleventh Defense (Estoppel), Twenty-Ninth Defense (Section 2 of the Lanham Act), Thirty-Second Defense (Statute of Limitations), Thirty-Fourth Defense (*First Amendment*), Forty-Fourth Defense (Standing), and Forty-Ninth Defense (Copyright *Masquerading as Trademark*).

Cookie Corner does not oppose summary judgment on its Eighth **[**19]** Defense (laches), Eleventh Defense (estoppel), Thirty-Second Defense (statute of limitations), Thirty-Fourth Defense (*First Amendment*), Forty-Fourth Defense (standing), and Forty-Ninth Defense (copyright masquerading as trademark). Summary judgment is granted as to those six defenses asserted in Cookie Corner's Answer to Second Amended Complaint.

Summary judgment is granted as to the Tenth Defense. The Tenth Defense ***HN9***[] (acquiescence by BIC), like the Eighth Defense (laches), is a personal defense that relates to a plaintiff's conduct with respect to a particular defendant. [7] *See* 2 McCarthy § 17:17; 5 *id.* §§ 31:41-43. Cookie Corner concedes that BIC's suit against Cookie Corner is timely, as BIC filed suit shortly after Cookie Corner began selling its own diagonally dipped shortbread cookie ("Cookie Corner Cookie"). Cookie Corner has not alleged that BIC has ever engaged in any affirmative conduct that would convey its implied consent to Cookie Corner's use of the asserted trade dress.

[20]** Summary judgment is granted as to the Twenty-Ninth Defense, which states, "Defendants intend to rely upon all **[*1094]** § 2 bars." Section 2(e)(5) of the Lanham Act provides, ***HN10***[] "No trademark by which the goods of the applicant may be distinguished from the goods of others shall be refused registration on the principal register on account of its nature unless it … consists of a mark which … comprises any matter that, as a whole, is functional." *15 U.S.C. § 1052(e)(5)*. BIC seeks protection of its trade dress under section 43(a) of the Lanham Act, *15 U.S.C. § 1125(a)*, not registration under section 2. It is true that ***HN11***[] "the general principles qualifying a mark for registration under § 2 of the Lanham Act are for the most part applicable in determining whether an unregistered mark is entitled to protection under § 43(a)." *Two Pesos, Inc. v. Taco Cabana, Inc., 505 U.S. 763, 768, 120 L. Ed. 2d 615, 112 S. Ct. 2753 (1992)*. However, section 2 of the Lanham Act does not become applicable to the instant case and provide Cookie Corner with a defense just because functionality may, if Cookie Corner is correct, bar both registration and **[**21]** claims under section 43(a) of the Lanham Act.

2. *Summary Judgment Is Denied on the First Defense (Failure to State a Claim).*

Cookie Corner's First Defense asserts that BIC fails to state a claim upon which relief can be granted. ***HN12***[] *Rule 12(b)(6)* permits dismissal on that ground. On a motion to dismiss pursuant to *Rule 12(b)(6)*, review is limited to the contents of the complaint, and all allegations of material fact are taken as true and construed in the light most favorable to the nonmoving party. *See* *Fed'n of African Am. Contractors v. City of Oakland, 96 F.3d 1204, 1207 (9th Cir. 1996)* (citations omitted).

Cookie Corner contends that the three "design" elements of the BIC Cookie design are "generic and functional on their face." As this court has determined that genuine issues of material fact remain as to the question of functionality, and as the parties and the court have addressed neither the question of genericness nor the question of the packaging of the BIC Cookie, summary judgment is denied on the First Defense.

3. *Summary Judgment Is Granted on the Seventh Defense (Continuous Prior Use).*

---

[7] McCarthy notes that there is a great deal of "semantic confusion" in the case law with respect to "acquiescence," "laches," and "estoppel by laches." 5 McCarthy § 31:41.

The Seventh Defense states, "Defendants intend to rely on **[**22]** the defense of continuous prior use." ***HN13***[] In trademark law, ownership rights in a trademark may be acquired through continuous prior use. Cookie Corner has not claimed that it is a prior user of the BIC Cookie design or packaging. Cookie Corner contends only that BIC is "neither the first nor the exclusive user of the alleged trade dress." Defs.' Cross-Mot. & Opp. at 28.

It is undisputed that, as between BIC and Cookie Corner, BIC is the prior user of the trade dress at issue. Cookie Corner has not alleged that any specific third party has priority over BIC based on that third party's continuous prior use. At the hearing on the present motions, Cookie Corner admitted that it had not identified any such party. Even if Cookie Corner were able to identify such a third party, that would not affect Cookie Corner's rights in relation to BIC. *See* *Comm. for Idaho's High Desert, Inc. v. Yost, 92 F.3d 814, 820-21 (9th Cir. 1996)*.

4. *Summary Judgment Is Granted on the Ninth Defense (Abandonment/ Waiver).*

In its Ninth Defense, Cookie Corner states that it is relying on "the defense of abandonment and/ or waiver." ***HN14***[] Abandonment of a mark causes the mark to fall into the public **[**23]** domain. Under the Lanham Act, a mark may be deemed "abandoned" in one of two situations: (1) "when its use has been discontinued with intent not to resume such use," and (2) "when any course of the owner, including **[*1095]** acts of omission as well as commission, causes the mark to become the generic name for the goods or services on or in connection with which it is used or otherwise to lose its significance as a mark." *15 U.S.C. § 1127*.

Cookie Corner does not allege that BIC has ever discontinued its use of the trade dress in issue. Rather, Cookie Corner's assertion of the Ninth Defense is based on the allegation that "numerous other parties use Plaintiff's alleged trade dress and Plaintiff has failed to enforce its alleged rights against said parties." Defs.' Cross-Mot. & Opp. at 28. Cookie Corner says that, as a result, BIC has lost any rights to the claimed trade dress.

Some cases speak of the plaintiff's failure to sue other potential infringers in terms of "abandonment." 2 McCarthy § 17:17. ***HN15***[] In the Ninth Circuit, however, failure to sue other potential infringers does not constitute abandonment. *See* *Century 21 Real Estate Corp. v. Sandlin, 846 F.2d 1175, 1181 (9th Cir. 1988)* **[**24]** (stating that "discovery that revealed other potential infringers would be irrelevant under the law of this circuit"); *U.S. Jaycees v. San Francisco Junior Chamber of Commerce, 354 F. Supp. 61, 73-74 (N.D. Cal. 1972)*, *aff'd* 513 F.2d 1226 (9th Cir. 1975) (noting that "numerous cases" have held that "the existence of infringers other than the defendant was irrelevant to a determination of whether the defendant should be enjoined from continuing in its infringement of plaintiffs' trademarks and in its unfair competition").

Accordingly, BIC is granted summary judgment on Cookie Corner's Tenth Defense. The court notes, however, that the existence of other potential infringers may well be relevant to other issues in this case, including whether or not the alleged trade dress is generic or distinctive. *See* 2 McCarthy § 17:17 (noting that "failure to prosecute others" is relevant only to "the possible impact such failure may have on the strength of the plaintiff's mark").

5. *Summary Judgment Is Granted on the Twelfth Defense (Unclean Hands).*

The Twelfth Defense asserts that BIC has "unclean hands." ***HN16***[] To prevail on a defense of unclean hands in a **[**25]** Lanham Act suit, Cookie Corner must "demonstrate that [BIC's] conduct is inequitable and that the conduct relates to the subject matter of its claims." *Fuddruckers, Inc. v. Doc's B.R. Others, Inc., 826 F.2d 837, 847 (9th Cir. 1987)*. "Equity requires that those seeking its protection shall have acted fairly and without fraud or deceit as to the controversy in issue." *Id.* (citation and emphasis omitted). Cookie Corner has not alleged any basis for the defense of "unclean hands" other than its claim that BIC failed to enforce its alleged rights in the disputed trade dress against persons other than Cookie Corner. Cookie Corner has not identified anything suggesting that BIC acted with fraud or deceit or unfairness. Without more, a reasonable factfinder could not find inequitable conduct by BIC that would serve as a defense for Cookie Corner. If future discovery yields a basis for this defense, Cookie Corner's remedy is to seek an extension of the deadline to amend pleadings, if the amendment deadline has passed by then. If an extension is granted, Cookie Corner may then seek leave to file an amended answer.

6. *Summary Judgment Is Granted on the Sixteenth Defense* **[**26]** *(Federal Preemption of State Law) and the Seventeenth Defense (Sears-Compco).*

The Sixteenth Defense asserts that "Plaintiff's state-based claims are preempted by federal law." The Seventeenth Defense asserts that "Plaintiff's asserted rights in the facts of this case undermine the objectives of U.S. patent and **[*1096]** U.S. copyright laws and are, therefore, preempted by said laws. (Sears-Compco)." Cookie Corner does not allege that any specific provision of Hawaii state law or any specific "asserted right" is preempted by federal law. Rather, Cookie Corner acknowledged at the hearing that the Sixteenth and Seventeenth Defenses were premised on what it speculates might be a ruling by this court that the alleged trade dress was functional, but nevertheless protected by Hawaii state law, allegedly in violation of the principles set forth in the *Sears-Compco* lines of cases. *See* 1 McCarthy §§ 7:55-58. *See* *Compco Corp. v. Day-Brite Lighting, Inc., 376 U.S. 234, 11 L. Ed. 2d 669, 84 S. Ct. 779, 1964 Dec. Comm'r Pat. 421, 1964 Dec. Comm'r Pat. 432 (1964)*; *Sears, Roebuck & Co. v. Stiffel Co., 376 U.S. 225, 11 L. Ed. 2d 661, 84 S. Ct. 784, 1964 Dec. Comm'r Pat. 425 (1964)*. *See also* *Bonito Boats, Inc. v. Thunder Craft Boats, Inc., 489 U.S. 141, 103 L. Ed. 2d 118, 109 S. Ct. 971 (1989)*. **[**27]** Although Cookie Corner's arguments regarding federal preemption of state law could be raised in the appeal of a future ruling, speculation that this court may commit alleged errors of law does not provide a valid defense against BIC's claims. Accordingly, summary judgment is granted on the Sixteenth and Seventeenth Defenses.

7. *Summary Judgment Is Granted on the Twenty-First Defense (Interstate Commerce) and the Fifty-Fifth Defense (Rule 12).*

Cookie Corner asserts in its Twenty-First Defense that "Plaintiff's alleged mark and/ or Defendants' allegedly infringing mark are not used in, nor do they have a significant impact upon, interstate or international commerce." For purposes of this motion, the court construes the reference to a "mark" to be a reference to the trade dress of the BIC Cookie design. The Fifty-Fifth Defense is a vague assertion that "Plaintiff is barred from obtaining any of the relief it seeks herein by the defenses identified in *Rule 12 of the Federal Rules of Civil Procedure*." Cookie Corner has clarified this assertion by saying that the Fifty-Fifth Defense was intended to assert a lack of subject matter jurisdiction given the absence of interstate commerce.

[28]** Cookie Corner argues that this court lacks subject matter jurisdiction over BIC's claims because Cookie Corner has not used in interstate commerce the trade dress in issue. Cookie Corner does not dispute that BIC is engaged in interstate commerce and that BIC uses its asserted trade dress in interstate commerce.

Cookie Corner admits that it solicits and accepts telephone and facsimile orders, and that it has sent the Cookie Corner Cookie to customers in various states across the mainland. It does not allege or offer any evidence that these sales are isolated or that Cookie Corner does not intend to continue to ship these cookies to other states.

HN17[] As defined in the Lanham Act, "commerce" refers to "all commerce which may lawfully be regulated by Congress." *15 U.S.C. § 1127*. The definition of interstate commerce is fairly broad, encompassing (1) the channels of interstate commerce; (2) the instrumentalities of interstate commerce, or persons and things in interstate commerce, "even though the threats may come only from intrastate activities"; and (3) those activities that substantially affect interstate commerce. *United States v. Lopez, 514 U.S. 549, 558-59, 131 L. Ed. 2d 626, 115 S. Ct. 1624 (1995)*. **[**29]** Under that definition, even a defendant who is engaged solely in intrastate commerce may be held liable under the Lanham Act if the plaintiff uses the asserted mark in interstate commerce, as even the "local use" of the challenged product design or packaging may substantially affect the strength of the plaintiff's mark. *See, e.g.,* *Thompson Tank & Mfg. Co. v. Thompson, 693 F.2d 991, 993 (9th Cir. 1982)*; *Maier Brewing* ***[*1097]*** *Co. v. Fleischmann Distilling Corp., 390 F.2d 117, 119-20 (9th Cir. 1968)*. [8] As Cookie Corner concedes that it ships the Cookie Corner Cookie to other states, its activities clearly meet the "commerce" requirement of section 43(a). [9] Morever, even if Cookie Corner advertised and sold the Cookie Corner Cookie only

---

[8] While some of these cases indicate that local use may "affect," rather than "substantially affect," interstate commerce, the common view is clearly that intrastate infringement of a mark substantially affects interstate commerce when the trademark owner's reputation and goodwill have been "built up by use in interstate commerce." *Franchised Stores of N.Y., Inc. v. Winter, 394 F.2d 664 (2d Cir. 1968)*; 4 McCarthy § 25:56. *See also* *Wells Fargo & Co. v. Wells Fargo Express Co., 556 F.2d 406, 427 (9th Cir. 1977)* (citing *Franchised Stores* and stating that "purely intrastate infringing activities which [have] a substantial adverse impact on the reputation and good will of of a registrant whose products [are] sold in interstate commerce [are] actionable").

in Hawaii, its activities would have a substantial effect on interstate commerce through its effect on the strength of BIC's alleged trade dress, which BIC uses in interstate commerce. The Twenty-First Defense (interstate commerce) would therefore remain unavailable even in that event. Summary judgment is granted on the Twenty-First Defense. As the Fifty-Fifth Defense is premised on a lack of subject matter jurisdiction given **[**30]** Cookie Corner's claimed noninvolvement in interstate commerce, summary judgment is also granted as to the Fifty-Fifth Defense.

[31]** 8. *Summary Judgment Is Denied on the Thirtieth Defense (Good Faith) and the Fifty-Sixth Defense (Advice of Others).*

The Thirtieth Defense asserts that "Defendants have acted in good faith." The Fifty-Sixth Defense asserts a defense of "lack of requisite intent by virtue of the reasonable reliance of Defendants upon the advice and/ or expertise of others." On the present record, the court cannot conclude that there is an absence of disputes as to material facts relating to these two defenses. BIC states, correctly, that ***HN18***[] good faith is no defense to liability under section 43(a) of the Lanham Act. However, Cookie Corner's intent is relevant to the question of damages. For example, BIC has a dilution claim under *15 U.S.C. § 1125(c)*. While there may well be questions as to whether BIC can establish all the elements of a dilution claim, the claim, at this point, is pending, and dilution damages, should BIC establish dilution, are expressly affected by willfulness. *See* *§ 1125(c)(2)* (stating that, ***HN19***[] if willful intent is proven, additional remedies are available to the owner of a mark).

9. *Summary Judgment Is Granted on the Thirty-First Defense (Antitrust* **[**32]** *Violations) and the Thirty-Seventh Defense (Public Policy).*

There is no evidence that BIC has violated federal or state ***antitrust law***, as asserted in the Thirty-First Defense. Nor is there any evidence supporting the Thirty-Seventh Defense.

There is no evidence that BIC's claims are barred on public policy grounds beyond the policies underlying the statutes under which BIC seeks relief and the policies to which Cookie Corner's other defenses relate. In considering BIC's claims, the court will consider the public policy underlying the relevant statutes, but Cookie Corner has no independent "public policy" defense.

[*1098] Summary judgment is granted on both the Thirty-First and the Thirty-Seventh Defenses.

10. *Summary Judgment Is Denied on the Thirty-Ninth Defense.*

The Thirty-Ninth Defense states that "[BIC] is barred from obtaining any of the relief it seeks herein because [BIC] has failed to establish facts sufficient to subject Defendants to liability under applicable law." Although BIC states in its motion that it seeks summary judgment on this defense, BIC provided no argument as to the Thirty-Ninth Defense. Summary judgment on this defense is denied.

11. *Summary Judgment* **[**33]** *Is Denied on the Forty-Third Defense (Public Domain).*

The Forty-Third Defense asserts that "the allegedly protectable interests of Plaintiff are in the public domain and/ or are standard in the relevant industry." ***HN20***[] Genericness is a bar to a finding that a particular alleged trade dress is protected. The rationale underlying this rule is that a finding of genericness signifies that the generic "thing" is in the public domain and therefore may not be appropriated as a trademark. *See* 2 McCarthy § 12:2 (noting that "generic names are regarded by the law as free for all to use" and that "they are in the public domain"). This court has not yet addressed the question of genericness with respect to either the BIC Cookie design or the BIC Cookie packaging.

5. *CONCLUSION.*

---

[9] *See also* 4 McCarthy § 25:57 (noting that "modern decisions interpreting the 'use in commerce' requirement for infringement of federally registered marks have virtually eliminated the 'local use' defense").

For the foregoing reasons, both the motion and the cross-motion for partial summary judgment are denied with respect to the issue of functionality. BIC's motion for partial summary judgment is granted in part and denied in part with respect to Cookie Corner's defenses. Summary judgment is granted to BIC as to Cookie Corner's Seventh Defense (continuous prior use), Eighth Defense (laches), Ninth Defense (abandonment/ **[**34]** waiver), Tenth Defense (acquiescence), Eleventh Defense (estoppel), Twelfth Defense (unclean hands), Sixteenth Defense (federal preemption of state law), Seventeenth Defense *(Sears-Compco),* Twenty-First Defense (interstate commerce), Twenty-Ninth Defense (section 2 of the Lanham Act), Thirty-First Defense (antitrust violations), Thirty-Second Defense (statute of limitations), Thirty-Fourth Defense (*First Amendment*), Thirty-Seventh Defense (public policy), Forty-Fourth Defense (standing), Forty-Ninth Defense (copyright masquerading as trademark), and Fifty-Fifth Defense (*Rule 12*). Summary judgment is denied as to the First Defense (failure to state a claim), Thirtieth Defense (good faith), Thirty-Ninth Defense (failure to establish facts sufficient to subject Cookie Corner to liability), Forty-Third Defense (public domain), and Fifty-Sixth Defense (advice of others).

IT IS SO ORDERED.

DATED: Honolulu, Hawaii, January 15, 2003.

HN3[] Arbitration, Foreign Arbitral Awards

Legal errors are not among the grounds that the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, 1970, 21 U.S.T. 2517, T.I.A.S. No. 6997, implemented by *9 U.S.C.S. §§ 201-08*, gives for refusing to enforce international arbitration awards. Under domestic law, as well as under the Convention, arbitrators have completely free rein to decide the law as well as the facts and are not subject to appellate review. Courts thus do not sit to hear claims of factual or legal error by an arbitrator.

HN4[] Alternative Dispute Resolution, Mandatory ADR

Arbitrators regularly handle claims under federal statutes. The United States Court of Appeals for the Seventh Circuit does not see any reason why things should be otherwise for antitrust issues--nor, more importantly, does the United States Supreme Court, which has held that international arbitration of antitrust disputes is appropriate.

HN7[] **Alternative Dispute Resolution, Judicial Review**

While the efficacy of the arbitral process requires that substantive review at the award-enforcement stage remain minimal, it does not require intrusive inquiry to ascertain that the tribunal took cognizance of the antitrust claims and actually decided them.

Counsel: For BAXTER INTERNATIONAL, INCORPORATED, Plaintiff - Appellant: Constantine L. Trela, SIDLEY AUSTIN BROWN & WOOD, Chicago, IL USA.

For ABBOTT LABORATORIES, Defendant - Appellee: R. Mark McCareins, WINSTON & STRAWN, Chicago, IL USA.

Judges: Before CUDAHY, COFFEY, and EASTERBROOK, Circuit Judges. CUDAHY, Circuit Judge, dissenting.

Opinion by: EASTERBROOK

Opinion

[*830] EASTERBROOK, *Circuit Judge*. Baxter International invented sevoflurane in the 1960s. This substance, a gas at room temperature, has good anesthetic properties. But it was too difficult and costly to produce commercially until the early 1980s, when Baxter devised an efficient process for its manufacture. Baxter obtained two process patents, the latter of which expires in December 2005. But the anesthetic gas still could not be sold in the United States unless it first received the FDA's approval, and Baxter was not willing to bear the costs of the required medical testing. So in 1988 it granted to Maruishi Pharmaceutical Company, of Japan, an exclusive worldwide license to practice the sevoflurane process patents Baxter owned or was pursuing. Maruishi obtained approval to sell the anesthetic in Japan, where it was a great success, as it has become in other nations since. This suggested that it would be **[**2]** worth obtaining the FDA's approval to sell in the United States. Abbott Laboratories took a sublicense from Maruishi in 1992, obtained the FDA's approval after spending approximately $ 60 million on testing, and in 1995 began selling sevoflurane in the United States. Maruishi remains the sole manufacturer under the Baxter patents; Abbott resells sevoflurane that it purchases from Maruishi, which pays Baxter a royalty based on its total sales. Today sevoflurane is the best-selling gas used for anesthesia in the United States, with approximately 58% of sales. Desflurane holds 35% of this market, and isoflurane accounts for almost all of the remaining sales. Isoflurane is not protected by any patent and sells for less, but it is slower in both onset and recovery and has an irritating taste and smell. Desflurane likewise has an annoying smell and aftertaste, though its properties otherwise are comparable to sevoflurane--which therefore has become the anesthetic of choice and commands a premium price.

Sevoflurane's success gave rivals an incentive to invent around Baxter's process patents. Ohio Medical Associates (now known as Ohmeda) set out in 1997 to do just this. In 1999 Ohmeda obtained **[**3]** a patent for a new way of making sevoflurane, distinct from Baxter's process but equivalently cheap and effective. It planned to introduce a rival sevoflurane anesthetic, which it could do by filing a "me too" application with the FDA. Ohmeda could receive approval without costly tests just by showing that the finished product is identical to Abbott's.

Before Ohmeda could bring sevoflurane to market, it was acquired (in 1998) by Baxter--which decided to proceed with Ohmeda's plans and compete with the sevoflurane made by Maruishi and sold in the United States by Abbott. Baxter concluded that it would make more from selling Ohmeda-process sevoflurane than it would lose in reduced royalties from Maruishi for Baxter-process sevoflurane. **[*831]** Abbott, which contends that it has spent more than $ 1 billion to commercialize sevoflurane (including distribution of equipment for administering the drug and marketing to alert anesthesiologists to its benefits) did not welcome competition before the expiration of the Baxter patents. Abbott initiated arbitration under the Baxter-Maruishi agreement (to which it had become a party in 1992) and the Convention on the Recognition and Enforcement of Foreign **[**4]** Arbitral Awards, [1970] 21 U.S.T. 2517, , implemented by T.I.A.S. No. 69979 U.S.C. §§ 201-08. The agreement specifies a multi-national tribunal, which consisted of a U.S. attorney, a Spanish attorney, and a Japanese law professor.

Abbott contended that Baxter's sale of Ohmeda-process sevoflurane before the Baxter patents expired would violate the exclusivity term of the license; Baxter replied, first, that the license does not explicitly forbid Baxter itself from competing with Maruishi (in other words, that exclusivity means only that Baxter can not issue any other licenses), and, second, that if the license does forbid Baxter from competing, then it violates U.S. ***antitrust law***, particularly *§ 1* of the Sherman Act, *15 U.S.C. § 1*, and is unenforceable. The arbitrators ruled against Baxter on both issues. The tribunal held that the license is exclusive in the strong sense and that any reduction in competition is attributable to Baxter's decision to purchase the competing Ohmeda process while bound by this promise not to compete with its licensee. On cross suits filed by Abbott and Baxter, the district judge then directed Baxter **[**5]** to comply with the award, rejecting its contention that the license, as construed by the tribunal, violates the Sherman Act or the public policy of the United States. The judge observed that competition from desflurane, isoflurane, and sevoflurane made by any other process (for the sevoflurane molecule is unpatented)is unaffected. *2002 U.S. Dist. LEXIS 5475* (N.D. Ill. Mar. 26,2002).

Baxter argues at length in this court that the Baxter-Maruishi license, construed to keep Ohmeda-process sevoflurane off the U.S. market until 2006, is a territorial allocation unlawful *per se* under *§ 1* of the Sherman Act. But the initial question is whether Baxter is entitled to reargue an issue that was resolved by the arbitral tribunal. We think not; ***HN1***[] a mistake of law is not a ground on which to set aside an award. See *George Watts & Son, Inc. v. Tiffany & Co., 248 F.3d 577 (7th Cir. 2001)*. *Section 207* ***HN2***[] says that "the court shall confirm the award unless it finds one of the grounds for refusal or deferral of recognition or enforcement of the award specified in the said Convention." ***HN3***[] Legal errors are not among the grounds that the Convention gives for refusing to enforce **[**6]** international awards. Under domestic law, as well as under the Convention, arbitrators "have completely free rein to decide the law as well as the facts and are not subject to appellate review." *Commonwealth Coatings Corp. v. Continental Casualty Co., 393 U.S. 145, 149, 21 L. Ed. 2d 301, 89 S. Ct. 337 (1968)*. "Courts thus do not sit to hear claims of factual or legal error by an arbitrator". *Paperworkers v. Misco, Inc., 484 U.S. 29, 38, 98 L. Ed. 2d 286, 108 S. Ct. 364 (1987)*.

HN4[] Arbitrators regularly handle claims under federal statutes. See, e.g., *Rodriguez de Quijas v. Shearson/American Express, Inc., 490 U.S. 477, 104 L. Ed. 2d 526, 109 S. Ct. 1917 (1989)* (claims under the Securities Act of 1933); *Shearson/American Express, Inc. v. McMahon, 482 U.S. 220, 96 L. Ed. 2d 185, 107 S. Ct. 2332 (1987)* (claims under the Securities Exchange Act of 1934 and the Racketeer Influenced and Corrupt Organizations Act); *Scherk v. Alberto-Culver Co., 417 U.S. 506, 41 L. Ed. 2d 270, 94 S. Ct. 2449 (1974)* (international arbitration of claims under the Securities **[*832]** Exchange Act of 1934). We do not see any reason why things **[**7]** should be otherwise for antitrust issues--nor, more importantly, does the Supreme Court, which held in *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 87 L. Ed. 2d 444, 105 S. Ct. 3346 (1985)*, that international arbitration of antitrust disputes is appropriate.

Mitsubishi did not contemplate that, once arbitration was over, the federal courts would throw the result in the waste basket and litigate the antitrust issues anew. That would just be another way of saying that antitrust matters are not arbitrable. Yet this is Baxter's position. It wants us to disregard the panel's award and make our own decision. The Supreme Court's approach in *Mitsubishi* was different. It observed (*473 U.S. at 639 n.21*):

> The utility of the Convention in promoting the process of international commercial arbitration depends upon the willingness of national courts to let go of matters they normally would think of as their own. Doubtless, ***HN5***[] Congress may specify categories of claims it wishes to reserve for decision by our own courts without contravening this Nation's obligations under the Convention. But we decline to subvert the spirit of the United **[**8]** States' accession to the Convention by recognizing subject-matter exceptions where Congress has not expressly directed the courts to do so.

Starting from scratch in court, as Baxter proposes, would subvert the promises the United States made by acceding to the Convention.

According to Baxter, there is a difference between arbitrating an antitrust issue (the subject of *Mitsubishi*) and *creating* one--which it accuses these arbitrators of doing. If the tribunal had construed the Baxter-Maruishi agreement differently, there would have been no antitrust problem. Baxter relies on the observation in *George Watts* that ***HN6***[] arbitrators are not allowed to command the parties to violate rules of positive law. That's true enough, but *whether* the tribunal's construction of the Baxter-Maruishi agreement has that effect was a question put to, and resolved by, the arbitrators. They answered no, and as between Baxter and Abbott their answer is conclusive. This is a point anticipated in *Mitsubishi*, which observed (*id. at 638*): ***HN7***[] "While the efficacy of the arbitral process requires that substantive review at the award-enforcement stage remain minimal, it would not **[**9]** require intrusive inquiry to ascertain that the tribunal took cognizance of the antitrust claims and actually decided them." The arbitral tribunal in this case "took cognizance of the antitrust claims and actually decided them." Ensuring this is as far as our review legitimately goes.

Treating Baxter as bound (*vis-a-vis* Abbott) by the tribunal's conclusion that the license (as construed to provide strong exclusivity) is lawful does not condemn the public to tolerate a monopoly. If the three-corner arrangement among Baxter, Maruishi, and Abbott really does offend the Sherman Act, then the United States, the FTC, or any purchaser of sevoflurane is free to sue and obtain relief. None of them would be bound by the award. As far as we can see, however, only Baxter is distressed by the award--and Baxter, as a producer, is a poor champion of consumers. See *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*; *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*; *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. **[**10]**

What relief the Antitrust Division, the FTC, or a consumer would obtain, if there is an antitrust problem, is an interesting **[*833]** question. Baxter thinks that the solution should be an order allowing it to sell Ohmeda-process sevoflurane. It wants to take its acquisition of Ohmeda as given and ask what consequences it has for exclusivity under the Baxter-Maruishi agreement. Yet this is anachronistic. The Baxter-Maruishi agreement came first, and its exclusivity rule was a lawful ancillary agreement designed to induce Maruishi and its sublicensees to make the investments needed to bring the new drug to market. See generally *Polk Bros., Inc. v. Forest City Enterprises, Inc., 776 F.2d 185 (7th Cir. 1985)*; *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 253 U.S. App. D.C. 142, 792 F.2d 210 (D.C. Cir. 1986)* (Bork, J.). At the time Baxter acquired Ohmeda it was obliged by contract to refrain from producing sevoflurane until 2006. (This is how the tribunal understood the Baxter-Maruishi agreement, and a court must accept this interpretation.) So if there is an antitrust problem, it lies in the acquisition--and the remedy would be divestiture of the Ohmeda **[**11]** process patent. Baxter can achieve that outcome on its own. Baxter, which can solve unilaterally any antitrust problem, is in no position to insist that the burden of solution fall on Abbott by depriving it of the benefit of the exclusive Baxter-Maruishi license. Why should a decision Baxter made in 1998 reduce the rights Abbott enjoys under a promise Baxter made to Maruishi in 1988? But it is unnecessary to pursue this line of argument. All that matters today is that the arbitrators have concluded that the antitrust laws (and Baxter's related arguments, which we need not address) do not diminish Abbott's contractual rights--and that decision is conclusive between these parties.

AFFIRMED

Dissent by: CUDAHY

Dissent

CUDAHY, *Circuit Judge,* dissenting. To understand fully why the majority's enforcement of this dubious arbitration award is misguided, a brief synopsis of the background material not fully described by the majority is essential. In 1983 and in 1988 Baxter gave options to Maruishi to license patents covering the one-step process of manufacturing sevoflurane. By 1992, when negotiations with Abbott concerning the introduction of sevoflurane in the United States were undertaken, Baxter's **[**12]** product and method-of-use patents for sevoflurane had expired. Arbitration Transcript at 675-83 ("Arb. Tr."). Hence, the only patents that Baxter could license to Maruishi and that Maruishi could in turn sublicense to Abbott were those covering the one-step manufacturing *process*, which were still in effect. In its negotiations with Baxter, Maruishi considered attempting to obtain a covenant not to compete not only with respect to the one-step process but also as to sevoflurane itself, but instead turned its attention elsewhere. Maruishi concluded that the exclusive license for the one-step process and related intellectual property was "sufficient protection." *See* Arb. Tr. at 523-24. The 1992 negotiations with Abbott dealt only with the one-step process. Arb. Tr. at 386-91.

In 1992, when sublicensing to Abbott was negotiated, two distinct sets of agreements were involved in the negotiations. First, there were the Sevoflurane Agreements establishing the terms of the licenses, and granting exclusive rights to Maruishi and to Abbott to manufacture sevoflurane under the one-step patent, to all improvements on the one-step patents and to all technology and confidential proprietary **[**13]** information ("know-how") acquired during the development of the one-step process. Next, all the parties entered into a Dispute Resolution Agreement (DRA), first, to ensure that in the event of a dispute commercialization of sevoflurane would go forward and, second, to provide a mechanism (arbitration) for **[*834]** resolving disputes arising from the Sevoflurane Agreements that would arguably impair what the parties referred to as the "Original Commercial Relationship" (OCR). The arbitrators were instructed by the DRA to attempt to maintain this Original Commercial Relationship--an "unusual" concept. Appellant's Br. at 9.

By the late 1990s, Ohmeda had developed and patented a different, *three-step* process to make sevoflurane suitable to be marketed as a generic drug. Subsequently, Baxter acquired Ohmeda. Faced with the threat of generic competition--always anticipated, but now apparently to be undertaken by Baxter--Abbott sought arbitration. The arbitration panel conceded that the Baxter-Maruishi *licensing* agreement would not preclude Baxter's offering generic competition because this licensing agreement covered only the one-step manufacturing process, which bore no relation to the **[**14]** three-step process. But a two-member majority of the panel found that, under the Dispute Resolution Agreement invoking the Original Commercial Relationship, Baxter's proposed sales of generic sevoflurane could be enjoined because they would reduce Abbott's revenues below monopoly levels, even though the expectation of generic competition was nothing new. The third member of the arbitral panel (the only American) dissented since he concluded that the arbitrators were not authorized to act independent of the licensing agreement itself. The majority also found a breach of an Illinois state duty of good faith, which the dissenting arbitrator thought specious.

The majority upholds the arbitration award here by declaring that, once the arbitrators have spoken to the antitrust issues and in effect commanded the parties to violate the Sherman Act, the courts have no business intervening. Of course, the doctrine that requires extreme deference by the courts to arbitration awards is based on the theory that the parties to a contract may cede broad, almost unlimited, power to an arbitration panel to interpret their agreement. *See* First Options of Chicago, Inc. v. Kaplan, 514 U.S. 938, 131 L. Ed. 2d 985, 115 S. Ct. 1920 (1995); **[**15]** *see also* IDS Life Ins. Co. v. Royal Alliance Assoc., Inc., 266 F.3d 645, 649 (7th Cir. 2001) ("Within exceedingly broad limits, the parties to an arbitration agreement choose their method of dispute resolution and are bound by it however bad their choice appears to be either ex ante or ex post."). In fact, the arbitrators function almost as agents of the parties to extend their deal to cover unforeseen circumstances. *See* E. Associated Coal Corp. v. United Mine Workers of America, 531 U.S. 57, 62, 148 L. Ed. 2d 354, 121 S. Ct. 462 (2000) (telling courts to "treat the arbitrator's award as if it represented an agreement between [the parties] as to the proper meaning of the contract's words."); EEOC v. Indiana Bell Tel. Co., 256 F.3d 516, 522 (7th Cir. 2001) ("The arbitrator acts on their (joint) behalf, with whatever authority the contract bestows. The resulting award is effectively the parties' joint decision."). All this rests on the proposition that the parties are free to adjust rights and liabilities *among themselves* as they see fit and through the instrumentality of arbitration to follow wherever the situation may demand. In this bilateral context a commitment **[**16]** to deference cannot be questioned.

But other considerations enter the mix when the issue becomes a matter of the arbitrators', in interpreting a statute, commanding the parties to break the law or to violate clearly established norms of public policy. [1] **[**17]** In the case before us, the arbitrators have instructed Abbott and Baxter (by imposing on Baxter a broad covenant not to compete with respect to sales of **[*835]** sevoflurane itself) to effect a horizontal allocation of markets, a clear violation of the Sherman Act. Under the arbitral decision, Abbott is granted a monopoly [2] in the sale of sevoflurane in the United States.

For some considerable time not long in the past, the law of the land was that antitrust disputes were not arbitrable. *See* Am. Safety Equip. Corp. v. J. P. Maguire & Co., 391 F.2d 821 (2d Cir. 1968); Applied Digital Tech., Inc. v. Continental Cas. Co., 576 F.2d 116 (7th Cir. 1978). Claims made under the Sherman Act were not merely private claims, but were quasi-public claims designed to protect the rights of consumers and the public at large. Applied Digital Tech., 576 F.2d at 117. Since more than merely the rights of the parties were at issue, the agreement of the parties to arbitrate could not supersede the public's presumed interest in a judicial resolution of antitrust claims.

The growing fondness for arbitration, however, eventually **[**18]** eliminated the prohibition on submitting antitrust matters to arbitration. Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 87 L. Ed. 2d 444, 105 S. Ct. 3346 (1985), did not purport to directly overturn the doctrine that domestic antitrust claims could not be arbitrated, but subsequently, the Supreme Court in dicta and most of the Courts of Appeal considering the issue have interpreted *Mitsubishi* as placing antitrust and other statutory claims within the ambit of arbitration. *See*, *e.g.*,

---

[1] As the majority notes, the present case is governed by the 1958 Convention on the Recognition and Enforcement of Foreign Arbitral Awards, 21 U.S.T. 2517, T.I.A.S. No. 6996, implemented by 9 U.S.C. §§ 201 et seq. ("Convention"). 9 U.S.C. § 207 commands a court to enforce an arbitration award under the Convention unless one of the grounds for refusal to enforce found in the Convention is present. Article V(2)(b) of the Convention allows a court to refuse to enforce an arbitration award when "recognition or enforcement of the award would be contrary to the public policy of that country."

[2] There is no dispute that Baxter's Ohmeda is the only generic competitor in the sevoflurane market for the foreseeable future, nor is there a dispute that the arbitral decision's prohibition on the sale of generic sevoflurane by Baxter preserves monopoly prices and levels of output of Abbott's sevoflurane product.

Gilmer v. Interstate/Johnson Lane Corp., 500 U.S. 20, 28, 114 L. Ed. 2d 26, 111 S. Ct. 1647 (1991) ("The Sherman Act, the Securities Exchange Act of 1934, RICO, and the

Securities Act of 1933 all are designed to advance important public policies, but, as noted above, claims under those statutes are appropriate for arbitration."); Seacoast Motors of Salisbury, Inc. v. DaimlerChrysler Motors Corp., 271 F.3d 6 (1st Cir. 2001); Kotam Elecs., Inc. v. JBL Consumer Prods., Inc., 93 F.3d 724 (11th Cir. 1996); Sanjuan v. Am. Bd. of Psychiatry & Neurology, Inc., 40 F.3d 247 (7th Cir. 1994); **[**19]** Nghiem v. NEC Elec., Inc., 25 F.3d 1437 (9th Cir. 1994); Swensen's Ice Cream Co. v. Corsair Corp., 942 F.2d 1307 (8th Cir. 1991).

The present case is a good example of the extent to which arbitration has come to pervade the legal culture. First, the parties here constructed an elaborate, pre-dispute arbitration agreement that not only served to regulate the licensing agreement itself, but also, in an extraordinary spasm of creativity during the arbitration, generated a new and seemingly boundless cause of action, entirely separate from the license itself, under which the parties could presumably proceed. Then, during the arbitral process, Baxter submitted to the arbitrators the supplemental argument [3] that, if the arbitrators pursued what eventually did become their **[*836]** line of decision, they would be commanding unlawful conduct under the Sherman Act. And finally, neither Baxter nor Abbott contend that arbitration was inappropriate for resolution of the antitrust claim.

[20]** Now, the majority has taken the process one giant step further and has found that *Mitsubishi* not only allows submission of statutory and antitrust claims to arbitration, but denies our prerogative to refuse to enforce awards that command unlawful conduct. [4] The deciding circumstance, according to the majority, is that the question was put to, and decided by, the arbitrators themselves. Maj. Op. at 5-6 ("That's true enough, [that arbitrators are not allowed to command unlawful conduct,] but *whether* the construction of the Baxter-Maruishi agreement has that effect was a question put to, and resolved by, the arbitrators. . . . As between Baxter and Abbott, their answer is conclusive."). Therefore, under the majority's analysis, the rule that unlawful conduct cannot be commanded by arbitrators is consumed by the exception that, if the arbitrators themselves say that what they have commanded is not unlawful, then "their answer is conclusive."

[21]** This cannot be correct. While *Mitsubishi* and its progeny make clear that the choice of the arbitral forum is to be respected, they do not confer on the arbitrators a prerogative to preemptively review their own decisions and receive deference on that review in subsequent judicial evaluations. [5] The majority is way off-base when it says that Baxter seeks merely to have us disregard the panel's decision and "throw the result in the waste basket." Maj. Op. at 5. Instead, we are performing exactly the traditional function of judicial review properly assigned only to us.

Therefore, I do not think we can simply note the arbitration panel's resolution of the **[**22]** antitrust issue and consider our work done. Instead, we must fulfill our judicial responsibilities and examine the effect of the outcome

---

[3] It is an important distinction that this rather meta-juridical antitrust claim "decided" by the arbitrators was not a simple claim by Baxter against Abbott, but rather a request by Baxter that the arbitrators step back and consider the larger implications of their underlying decision. This distinction becomes clear when one recognizes that this issue could simply have been ignored by the arbitrators and considered for the first time in the district court--the arbitrators' interpretation of the license and the DRA did not involve antitrust issues. But, if Baxter had not raised the antitrust issue during arbitration, it would have risked being met with a defense of waiver to consideration of the issue here. Yet, on the other hand, Baxter's position here might well have been strengthened if it had chosen not to bring the question forward during arbitration and thereby armed Abbott with the (dispositive, as it turns out) argument for deference to the arbitration award.

[4] The Convention itself provides grounds for refusing to confirm an award under "public policy" principles. This circuit has recognized grounds (under the Federal Arbitration Act) for refusing to confirm if an arbitration panel acts in manifest disregard of the law, or, as otherwise viewed, if the arbitrators' decision commands a party to act unlawfully. George Watts & Son, Inc. v. Tiffany & Co., 248 F.3d 577 (7th Cir. 2001). Rather than repeatedly referring to the applicable tests, I will simply refer to "unlawful conduct."

[5] It is clear that the arbitrators were doing exactly that-- reviewing their own decision--and not deciding issues of law necessary to interpret the various agreements. The panel's "decision" on the antitrust issues is that "it considers that no illegality results from the interpretation of the Sevoflurane Agreements in this Award." Supp. App. at 18-19.

commanded by the arbitral award. [6] This means that we have to determine **[*837]** whether, going forward, the horizontal restraint on Baxter's competing with Abbott in the sevoflurane market violates the Sherman Act.

Sometimes, of course, a horizontal restraint is a necessary part of an endeavor that, in the whole, benefits consumers. *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. 85, 101, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)*. **[**23]** That is the claim here--that Abbott would not have undertaken to launch sevoflurane commercially had it not been guaranteed against all competition by Baxter. Yet it is conceded that there was no express covenant not to compete. [7] Baxter gave an exclusive license to the one-step process but no guarantee against competition in sevoflurane produced by some other process. The absence of an express covenant not to compete strongly suggests that such a covenant could not have been the *sine qua non* of Abbott's launching sevoflurane in the United States market.

[24]** The majority unquestioningly accepts the contrary proposition of Abbott, that this broad implied noncompete covenant was "a lawful ancillary agreement designed to induce Maruishi and its sublicensees to make the investments needed to bring the new drug to market." Maj. Op. at 5. First, as I have already noted, Maruishi has never argued that it needed, or believed it had received, the broad noncompete found by the arbitrators. Second, this statement begs the question of what possible added incentive Abbott could have received from this additional guarantee of monopoly above and beyond the scope of the one-step patent. [8] **[**26]** By agreeing to completely exclude itself from any activity in the sevoflurane market that involved the one-step process, the know-how related to the one-step process or any "improvement" on the technology or know-how of the one-step process patents, Baxter relegated itself to a position identical to that of the other potential competitors that were **[*838]** anticipated by Abbott. Abbott had the incentive to commercialize sevoflurane in the United States with the knowledge that competitors like Ohmeda were lying in wait to "free-ride" on Abbot's regulatory approval and commercialization **[**25]** efforts. There is no reason why Abbott would lose any of its incentive if Baxter were added to the list of potential competitors (or would gain incentive if Baxter were excluded from the list), so long as Baxter remained excluded from one-step competition and was barred from using any of the knowhow and

---

[6] My analysis takes place in the context that the meaning of the Sevoflurane Agreements, as interpreted by the arbitrators, is not contested by Baxter. Therefore, although the arbitrators' findings seem a bit far-fetched to me, I take as a given that the DRA contains a broad, if implied, covenant not to compete that prohibits Baxter from competing with Abbott in any way in the sevoflurane market. This, of course, does not respond to the issue of lawfulness, which is the subject of my substantive analysis.

[7] The majority bolsters its deference argument by glossing over some significant nuances in the various Baxter-Maruishi-Abbott agreements and the arbitral decision. The arbitrators did not hold "that the license is exclusive in the strong sense. "Maj. Op. at 3. In fact, the arbitrators found that the license, which is limited solely to the one-step process and all associated know-how and technology, was not violated in any way by Baxter's actions regarding the three-step process. Supp. App. at 13-14. The "strong" noncompete was *implied from the DRA*, which the arbitration panel found contained its own independent cause of action and provided relief to Abbott for *any* conduct by Baxter that reduced the monopoly revenue Abbott would otherwise receive under the one-step licenses. In theory, under the broad language of the arbitral award, even if Baxter invented and brought to market (before 2005) a completely new and different inhalable anesthetic that competed with sevoflurane and reduced Abbott's revenues from it, Baxter would be in violation of the DRA and enjoined from any manufacture and sale. See Supp. App. at 15, PP 25, 26.

[8] I note briefly the questions raised by the Fourth Circuit's decision in *Compton v. Metal Products, Inc., 453 F.2d 38 (4th Cir. 1971)*. In that case, a patentee licensed its patented technology together with a broad (express) noncompete that went far beyond the scope of the patented technology. The court found this agreement not to compete an unlawful restraint of trade. I am unconvinced by the district court's efforts to distinguish *Compton* from the present case on the basis of the degree to which Baxter was restricted. *Abbott Labs. v. Baxter Intern., Inc., 2002 U.S. Dist. LEXIS 5475, 2002 WL 467147*, *9 (N.D. Ill March 27, 2002). The point of *Compton* is that restraints on competition beyond the scope of the licensed patented technology are unlawful. *453 F.2d at 45* ("We think that by agreeing to restrictions on his own competition which he could not compel of others, the patentee has extended the monopoly granted by the patent laws beyond its legal bounds."). This agreement to restrictions that extend and enhance the scope of the patent monopoly is also what is objectionable here.

technology associated with its development of the one-step process. [9] I do not think that there could rationally have been any pro-competitive effect from the enhanced noncompete implied by the arbitrators.

Arbitration proceedings aside, and given that a covenant not to compete was not essential to Abbott's market development, Abbott and Baxter could not lawfully agree to this arrangement without violating the Sherman Act, and I fail to see why a panel of arbitrators, on behalf of the parties, can interpret a prior agreement of these parties to reach the same unlawful result.

It is, of course, not the interests of the parties themselves that are primarily at stake in the outcome of this arbitration. Instead the interest of the consuming public is at stake. That public faces higher prices and a constrained supply of sevoflurane as a result of Abbott's monopoly, conferred by the arbitrators. **[**27]** When public rights are at stake, there is good reason to be more reluctant to defer totally to the arbitrators, since they are acting as delegates of the private parties, not of the consuming public. Too deferential an attitude by the courts when the rights of the consuming public are at stake can severely undermine the foundations of our economy. For there can be little doubt that granting Abbott a monopoly to produce sevoflurane in the United States will raise prices and restrict supply. And applying the analysis of the majority to arbitration awards yet to come will open a royal detour around the antitrust laws.

Nor would a denial of the remedy imposed by the arbitrators result in a real loss to Abbott, since Abbott admitted at the arbitration hearing that it had anticipated and planned for generic competition and had specifically anticipated competition from Ohmeda. Arb. Tr. at 323-25; Supp. App. at 19. In fact, Abbott negotiated with Maruishi provisions that would "account[] for the downsides of generic competition." Arb. Tr. at 323. The purchase of Ohmeda by Baxter produced a windfall for Abbott whereby Abbott was able to manipulate the arbitration to its advantage and escape **[**28]** the competition it had earlier anticipated.

It is not my role to critique the arbitration decision--however flawed--except in this case to object to its anticompetitive outcome, which orders the parties to violate the antitrust laws. The interest of consumers was not represented on the arbitration panel and the panel's decision ignored consumer interests. Defense of public interests is sometimes better fulfilled by courts than by arbitration panels.

Nor am I much reassured by the substitute antitrust enforcement possibilities mentioned by the majority. It is conceivable that the Federal Trade Commission **[*839]** or the Justice Department might attack Abbott's monopoly conferred by the arbitrators or that another competitor might surface to provide competition from a generic sevoflurane manufactured by some process yet to be invented, but these possible sources of law enforcement or of competition are all hypothetical. I know of no authority for the theory that the existence of hypothetical sources of antitrust enforcement or of competition can be a defense to an agreement violative of the antitrust laws or to an arbitration award imposing such an agreement.

So while I agree with the majority **[**29]** that antitrust claims are arbitrable, and I also agree that the grounds for refusing to enforce an arbitration award are limited, I do not agree that there is support in the law for the majority's excision of antitrust arbitration from the general framework of judicial review that prohibits an arbitration panel's award from commanding illegal conduct. And in the case before us, the arbitration panel's ruling granting Abbott a monopoly in the United States sevoflurane market commands illegal conduct on the part both of Baxter and Abbott and is unenforceable.

I would remand with instructions not to enforce the arbitral award, and I therefore respectfully DISSENT.

---

[9] In fact, an argument can be made that Baxter was disadvantaged compared to other competitors by virtue of its agreement with Abbott and association with the one-step process. Baxter would face, as it did in the arbitration in the present case, the hurdle of showing that it did not succumb to the temptation to use any of its existing knowledge and technology base, a hurdle not faced by an outside competitor.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) allows a party to move to dismiss a complaint where the complaint fails to state a claim upon which relief can be granted. In reviewing a motion to dismiss, a district court accepts the allegations in the complaint as true and draws all reasonable inferences in favor of a non-moving party. A motion to dismiss will only be granted if a plaintiff can prove no set of facts in support of its claim that will entitle it to relief. A court may look at the complaint and any documents attached to, or incorporated by reference in, the complaint.

Under *15 U.S.C.S. § 1* of the Sherman Act, every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states is unlawful. Under *15 U.S.C.S. § 2* of the Sherman Act, any person who shall monopolize, or attempt to monopolize, or combine or conspire to monopolize any part of the trade or commerce among the several states shall be deemed guilty of a felony. In both sections of the statute, therefore, the unlawful activity must affect trade or commerce.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > General Overview

HN5[] Antitrust & Trade Law, Sherman Act

Although the Sherman Act does not define what activity constitutes "trade or commerce," Congress identified restraints and barriers in business competition as the problem the statute was intended to address. The Sherman Act was intended to prevent restraints to free competition in business and commercial transactions because those restraints tend to restrict production, raise prices or otherwise control the market to the detriment of purchasers or consumers of goods and services. "Trade or commerce," as used in the Sherman Act, therefore, necessarily relates to the business of the exchange of goods in the marketplace. Consequently, the "trade or commerce" element of the Sherman Act does not apply to all transactions, but rather to those transactions that can be characterized as business or commercial.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Business & Corporate Law > Nonprofit Corporations & Organizations > General Overview

HN6[] Higher Education & Professional Associations, Colleges & Universities

Non-profit organizations are not per se entitled to exemption from the Sherman Act. However, when these organizations perform acts that are the antithesis of commercial activity, they are immune from antitrust regulation. The legislative history of the Sherman Act reveals that it was not intended to reach noncommercial activities that are intended to promote social causes. A district court will examine the nature of the conduct of the non-profit organization and the totality of the circumstances in determining if a transaction is business or commercial, and thus subject to Sherman Act liability. The exchange of money for services is the hallmark of a commercial transaction.

Opinion by: GEORGE B. DANIELS

Opinion

MEMORANDUM OPINION AND ORDER

GEORGE B. DANIELS, DISTRICT JUDGE:

Plaintiff Bronx Legal Services ("BLS") brought suit against defendants alleging violations of the Legal Services Corporation Act, federal and state anti-trust violations, retaliation in violation of the *First Amendment*, violations of the New York Judiciary Law, and state tort claims. Defendant Legal Services Corporation ("LSC") filed a motion to dismiss and defendant Legal Services for New York City ("LSNY") filed a motion for judgment on the pleadings. For the reasons stated below, defendants' motions are granted. [1]

[*2] ***HN1***[] *Federal Rule of Civil Procedure 12(b)(6)* allows a party to move to dismiss a Complaint where the Complaint "fails … to state a claim upon which relief can be granted[.]" *FED. R. CIV. P. 12(b)(6)*. In reviewing a motion to dismiss, this Court accepts the allegations in the Complaint as true and draws all reasonable inferences in favor of the non-moving party. See *Patel v. Searles, 305 F.3d 130, 134-35 (2d Cir. 2002)*. Here, a motion to dismiss will only be granted if the plaintiff can prove no set of facts in support of its claim that would entitle it to relief. See *Citibank, N.A. v. K-H Corp., 968 F.2d 1489, 1494 (2d Cir. 1992)*. A court may look at the Complaint and any documents attached to, or incorporated by reference in, the Complaint. See Dangler v. New York City off *Track Betting Corp., 193 F.3d 130, 138 (2d Cir. 1999)*.

The Legal Services Act Claim

Plaintiff argues that the concerted actions of LSC and LSNY to "force" BLS to reorganize itself as a wholly-owned subsidiary of LSNY or else lose federal LSC funding violates the Legal Services Corporation Act ("LSC Act"). Plaintiff argues that the statute and regulations **[*3]** require that LSC award funds based on competitive bidding among legal service providers, and that the reorganization plan violates that mandate.

LSC is a non-profit corporation established in 1974 by the LSC Act for the purpose of "providing financial support for legal assistance in noncriminal proceedings or matters to persons financially unable to afford legal assistance." *42 U.S.C. § 2996b(a)*. LSC itself does not directly provide any legal services to clients. It provides grant money and contracts with various other legal services organizations. Those organizations either provide legal services, or in turn sub-contract out to another organization. LSNY currently is the only legal services organization in New York City that receives grant money directly from LSC. LSNY, in turn, sub-contracts out to seven county-wide legal services organizations to provide legal services to indigent clients. Plaintiff is one of LSNY's sub-grantee organizations that directly service clients. [2] The regulations adopted by LSC require that legal services

---

[1] This Court will treat LSNY's motion for judgment on the pleadings as a motion to dismiss as the same standard applies to both motions. See *Burnette v. Carothers, 192 F.3d 52, 56 (2d Cir. 1999)*.

organizations seeking to obtain LSC funds go through a competitive bidding process, whereby qualified applicants submit applications **[*4]** to LSC for grants and contracts. See *45 C.F.R. § 1634.1*.

In support of its argument that the reorganization plan violates the competitive bidding mandate, plaintiff argues that since 1998 the number of LSC-funded legal services organizations has decreased nationwide from 262 to 207. Plaintiff contends that that decrease is a direct result of LSC's nationwide initiative to reorganize and consolidate legal services organizations.

However, even if this is true, this does not lead to the conclusion that the competitive bidding mandate has been violated. ***HN2***[] The regulations only indicate that a "competitive system" will be used to award grants and contracts to applicants. **[*5]** See *45 C.F.R. § 1634.1*. Neither the LSC Act nor the regulations mandate a specific number of grants that must be awarded each year, and plaintiff does not contend that they do. Nor does plaintiff allege that LSC has refused to take applications, or is utilizing some other means to prevent county-wide legal services organizations, like BLS, from independently applying directly and competing for LSC funds. In fact, if plaintiff chooses to reject LSNY's reorganization plan, and LSNY does not renew its funding contract with BLS, plaintiff has alleged nothing in its Complaint that would lead to the conclusion that it could not apply directly on its own for LSC funding. Plaintiff simply has not alleged any facts sufficient to state a claim that defendants' actions have violated the competitive bidding requirement.

Plaintiff further argues that LSC's actions are arbitrary and capricious, and not authorized by the "Powers, duties, and limitations" section or by the "Grants and contracts" section of the Act. [3] ***HN3***[] The "Powers, duties, and limitations" section authorizes LSC to "provide financial assistance to qualified programs furnishing legal assistance to eligible **[*6]** clients, and to make grants to and contracts with" a variety of legal service providers. *42 U.S.C. § 2996e(a)(1)(A)*. Pursuant to the "Grants and contracts" section, LSC is required to "insure that grants and contracts are made so as to provide the most economical and effective delivery of legal assistance to persons in both urban and rural areas[.]" *42 U.S.C. § 2996f(a)(3)*.

By the plain language of the "Powers, duties, and limitations" section, LSC is not required to give out money to every applicant, rather only those that are "qualified." Further, the "Grants and contracts" section mandates that LSC only give out money in a manner that is economical and that effectively delivers legal assistance. Therefore, the Act necessarily empowers LSC to make a determination, in light of the goals and mandates of the Act, as to what criteria constitutes a successful **[*7]** application, and turn down those applicants that do not meet that criteria. LSC has determined that if LSNY, a grantee legal services organization, wants to continue to receive LSC funds, it must better structure itself so as to more efficiently and effectively meet the needs of the indigent in New York City. In response, LSNY made the determination that city-wide consolidation of sub-grantee legal services organizations, like plaintiff, was the best method of achieving this goal. Although plaintiff may not agree with defendants' determination, it is not arbitrary or capricious. Plaintiff simply has not alleged any facts that, even if taken as true, would lead to the conclusion that defendants' actions violated the LSC Act. Therefore, defendants' motions to dismiss the LSC Act claim are granted.

The Anti-Trust Claims

Plaintiff argues that defendants' actions violate three anti-trust provisions. First, plaintiff argues that defendants actions constitute an unlawful conspiracy in restraint of trade, in violation of *§ 1* of the Sherman Act. Second,

---

[2] The six other sub-grantee organizations are: Brooklyn Legal Services Corporation A, Brooklyn Legal Services Corporation B, Bedford-Stuyvesant Legal Services, Harlem Legal Services, MFY Legal Services, and Queens Legal Services. LSNY seeks to reorganize all seven of its sub-grantee organizations into wholly-owned subsidiaries.

[3] Plaintiff made this argument for the first time at oral argument. Nonetheless, this Court will address it.

plaintiff argues that defendants violated *§ 2* of the Sherman Act by conspiring to monopolize the relevant market. Lastly, plaintiff **[*8]** argues that defendants conduct violates the Donnelly Act, New York's ***antitrust law***. [4]

HN4[] *Section 1* of the Sherman Act makes unlawful "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of *trade or commerce* among the several States[.]" *15 U.S.C. § 1 (2002)* (emphasis added). *Section 2* of the Sherman Act provides that "any person who shall monopolize, or attempt to monopolize, or combine or conspire … to monopolize any part of the *trade or commerce* among the several States … shall be deemed guilty of a felony[.]" *15 U.S.C. § 2(2002)* **[*9]** (emphasis added). In both sections of the statute, therefore, the unlawful activity must affect "trade or commerce."

HN5[] Although the Sherman Act does not define what activity constitutes "trade or commerce," the Supreme Court has noted that the legislative history of the Act reveals that Congress identified restraints and barriers in *business competition* as the problem the statute was intended to address. See *Apex Hoisery Co. v. Leader, 310 U.S. 469, 493 n.15, 84 L. Ed. 1311, 60 S. Ct. 982 (1940)* ("'Business competition' was the problem considered and … the act was designed to prevent restraints of trade which had a significant effect on such competition.") The Act was intended to prevent "restraints to free competition in business and commercial transactions" because those restraints tend "to restrict production, raise prices or otherwise control the market to the detriment of purchasers or consumers of goods and services." *Hamilton Chapter of Alpha Delta Phi v. Hamilton College, 128 F.3d 59, 63 (2d Cir. 1997)*, quoting *Apex Hosiery, 310 U.S. at 493*. "Trade or commerce," as used in the Act, therefore, necessarily relates **[*10]** to the business of the exchange of goods in the marketplace. See e.g., *Dedication and Everlasting Love to Animals v. Humane Soc'y of the United States, Inc., 50 F.3d 710, 712 (9th Cir. 1995)* (hereinafter "D.E.L.T.A.") (noting that the Supreme Court has spoken of the term "commerce" in the Act as relating to the purchase, sale, or exchange of commodities.) Consequently, the "trade or commerce" element of the Act does not apply to all transactions, but rather to those transactions that can be characterized as "business" or "commercial." See e.g., *United States v. Brown Univ., 5 F.3d 658, 665 (3d Cir. 1993)* (analyzing a *§ 1* claim and finding that "it is axiomatic that section one of the Sherman Act regulates only transactions that are commercial in nature.")

HN6[] Non-profit organizations are not per se entitled to exemption from the Sherman Act. However, when these organizations "perform acts that are the antithesis of commercial activity, they are immune from antitrust regulation." Id. "The legislative history of the Sherman Act reveals that it was not intended to reach noncommercial activities that are intended to promote social causes." *Hamilton College, 128 F.3d at 63*; **[*11]** see also D.E.L.T.A., 50 F.3d at 713.

A court will examine the nature of the conduct of the non-profit organization and the totality of the circumstances in determining if a transaction is business or commercial, and thus subject to Sherman Act liability. See *Brown Univ., 5 F.3d at 666*. The exchange of money for services is the hallmark of a commercial transaction. See id. Consequently, in Brown Univ., the Third Circuit found that when a non-profit university offers a student financial aid, the university has engaged in commercial activity, as the student by accepting the financial aid package, must make a complementary payment to the university of the remaining balance of the tuition not covered by financial aid. See id.

In this case, even taking plaintiff's allegations as true, which this Court must on a motion to dismiss, plaintiff still does not allege any facts that could support its anti-trust claims. Defendants' actions, as alleged, are purely non-commercial. There is no exchange of money for services here, or anything else akin to a business or commercial transaction. Although LSC provides federal funds to LSNY, LSC does not receive **[*12]** anything in return from LSNY. Likewise, when LSNY passes those funds down to BLS, LSNY does not receive anything in return from plaintiff for this money. Rather, BLS uses the money to provide free legal services to the indigent population in the

---

[4] With the exception of the effect on interstate commerce, the Donnelly Act was patterned after the Sherman Act. Therefore, the Donnelly Act is generally interpreted consistently with the Sherman Act. See *Empire Volkswagen Inc. v. World-Wide Volkswagen Corp., 814 F.2d 90, 98 n.4 (2d Cir. 1987)*; *Kramer v. Pollock-Krasner Found., 890 F. Supp. 250, 254 (S.D.N.Y. 1995)*.

Bronx. Rather than a business or commercial exchange, this situation is more akin to a series of charitable gifts from one party to another.

Further, plaintiff has not alleged, and could not possibly allege, that anything about the relationship between the parties or the reorganization plan will cause any of the harms the Sherman Act was intended to prevent, such as restriction of the product (here, legal services), a raise in prices, or other controls on the market that are to the detriment of the consumer (here, the indigent Bronx population). There has been no allegation that, if BLS becomes a wholly-owned subsidiary of LSNY, it will adversely affect the availability of attorneys or that the legal services will no longer remain free to the indigent. In short, LSNY's plan to reorganize the provision of free legal services to the indigent in New York City is not "trade or commerce" within the meaning of the Sherman Act as the plan fits squarely **[*13]** within the type of social causes that are exempt from regulation by the Act. Therefore, defendants' motions to dismiss plaintiff's *§ 1* and *§ 2* Sherman Act claims, as well as plaintiff's Donnelly Act claim are granted.

First Amendment **Retaliation Claim**

Plaintiff argues that LSNY, as the result of pressure from LSC, instituted its reorganization plan to retaliate against BLS for filing a previous lawsuit against defendants in May 2000. In that lawsuit, brought by both BLS and Queens Legal Services, the plaintiffs there sought injunctive relief preventing defendants from requiring them to disclose the full names of their clients and the nature of the representation on the grounds that such disclosure would violate their ethical and professional responsibilities. Plaintiffs in that suit further sought to enjoin defendants from terminating their LSC funds as the result of their refusal to provide such information. [5]

[*14] ***HN7***[] A plaintiff asserting a *First Amendment* retaliation claim must put forth non-conclusory allegations: "(1) that the speech or conduct at issue was protected, (2) that the defendant took adverse action against the plaintiff, and (3) that there was a causal connection between the protected speech and the adverse action." *Garcia v. S.U.N.Y. Health Sciences Cntr., 280 F.3d 98, 106-07 (2d Cir. 2001)*; *Diesel v. Town of Lewisboro, 232 F.3d 92, 107 (2d Cir. 2000)*.

With respect to LSC, plaintiff has failed to allege a set of facts sufficient to meet the third element of the test for retaliation, namely a causal connection between plaintiff's filing of the May 2000 lawsuit and LSNY's adoption of the reorganization plan. The Complaint states that as early as 1998, LSC had embarked on a program to coordinate and integrate the provision of legal services on a unified statewide basis throughout the country. In fact, in the summer of 1998, the Complaint alleges that LSC had met with LSNY to discuss LSC's initiative to consolidate legal services in New York City. The Complaint further states that between 1998 and 2001, the number of legal services organizations nationwide **[*15]** receiving LSC funds dropped from 262 to 207. Thus, it is clear from the Complaint that LSC began the consolidation initiative long before BLS had filed the May 2000 lawsuit. It is just as clear that the consolidation initiative is nationwide, rather than an effort to target BLS or Queens Legal Services for bringing the May 2000 lawsuit.

Further, the September 5, 2000 letter from LSC to LSNY that plaintiff relies upon does not add support to plaintiff's argument. That letter, written by an LSC representative, neither mandates nor directs LSNY to consolidate on a city-wide basis. Rather, the letter proposes to LSNY at least four possible options so as to improve the quality of legal services to New York City indigent clients. The proposed options LSC gave to LSNY were: 1) create separate LSC-funded grantee programs; 2) transform LSNY into one city-wide program with offices as opposed to grantee agencies; 3) "make a compelling case" to continue with LSNY's current structure; or 4) develop "something else" to achieve the desired goal. LSC Br., Exh. B. The letter concludes by stating that LSNY must submit a proposal to LSC as to how it plans to restructure itself by March 1, 2001, and **[*16]** that if LSC is not satisfied with that proposal, LSC may choose to find some other mechanism to disperse grant funds in New York City. Id. It is clear

---

[5] In an order dated August 8, 2002, this Court granted defendants' motions for summary judgment in that case and dismissed that Complaint in its entirety. See *Bronx Legal Servs. v. Legal Servs. Corp., No. 00 CIV. 3423, 2002 U.S. Dist. LEXIS 14674 , 2002 WL 1835597* (S.D.N.Y. Aug. 8, 2002).

that the possible city-wide consolidation discussed in the LSC letter was never in mandatory terms, and that LSC left it to the discretion of LSNY as to how to implement internal changes. Thus, even drawing all reasonable inferences in favor of plaintiff, there is no set of facts alleged in the Complaint which could support plaintiff's claim that LSC "coerced" LSNY into adopting its reorganization plan in order to retaliate against BLS for filing the May 2000 lawsuit.

With respect to LSNY, plaintiff has also failed to allege sufficient facts to establish a causal connection between the May 2000 lawsuit and the alleged retaliatory conduct. As noted above, plaintiff's Complaint alleges that LSC and LSNY began discussing reorganization and consolidation as early as 1998, a full two years before BLS filed the May 2000 lawsuit.

Furthermore, the history of the May 2000 lawsuit is inconsistent with plaintiff's contention that LSNY retaliated against BLS for filing that suit. In early January 2000, as part of an internal audit, LSC's Office **[*17]** of the Inspector General ("OIG") randomly selected thirty grantee organizations and asked them to provide certain information regarding the cases they handled, including client names. LSNY was one of the thirty randomly selected grantee organizations. Since LSNY has no clients, this information would have to come from its seven sub-grantee organizations. LSNY opposed this request as did another grantee organization that had been selected, the Legal Aid Bureau located in Baltimore, Maryland. BLS and Queens Legal Services, as two of LSNY's sub-grantee organizations, also opposed this request. On March 22, 2000, the OIG issued two administrative subpoenas requiring LSNY and the Baltimore Legal Aid Bureau to produce the information. On April 25, 2000, the OIG filed a petition in United States District Court for the District of Columbia for summary enforcement of those subpoenas. [6]

[*18] BLS and Queens Legal Services feared that if LSC terminated LSNY's funding over this issue, they in turn would lose their funding. They then filed the May 2000 suit in this Court against both LSNY and LSC. As noted earlier, BLS and Queens Legal Services requested injunctive relief in that suit preventing defendants from requiring them from disclosing the full names of their clients and the nature of the representation. They also sought an injunction preventing defendants from terminating their LSC funds as a result of their refusal to provide such information. See *Bronx Legal Serv. v. Legal Serv. Corp., No. 00 CIV. 3423, 2002 U.S. Dist. LEXIS 14674, 2002 WL 1835597*, (S.D.N.Y. Aug. 8, 2002). One month after BLS filed the May 2000 suit, the D.C. District Court ruled on the OIG's petition, finding in favor of the OIG. See *United States v. Legal Serv. for New York City, 100 F. Supp.2d 42 (D.D.C. 2000)*. LSNY appealed to the D.C. Circuit. [7] The district court's decision was affirmed on appeal on May 25, 2001. See *United States v. Legal Serv. for New York City, 346 U.S. App. D.C. 83, 249 F.3d 1077 (D.C. Cir. 2001)*.

[*19] The history of the May 2000 lawsuit reveals that, at least until the D.C. Circuit's adverse ruling against LSNY in May 2001, LSNY had taken the same position as BLS on the issues relating to BLS's May 2000 lawsuit. Therefore, when LSNY received the September 5, 2000 letter, and when the LSNY Board of Directors voted in favor of city-wide consolidation in March 2001, [8] LSNY still favored plaintiff's position with respect to the issues BLS raised in the May 2000 lawsuit. In fact, LSNY did not give up its fight against the OIG with regard to the issue of disclosure until the D.C. Circuit ruled against LSNY, a full year after BLS had filed the May 2000 lawsuit. Therefore, the history of the May 2000 lawsuit belies plaintiff's contention that LSNY enacted the reorganization plan so as to retaliate against BLS for filing the May 2000 lawsuit.

Plaintiff further contends that the timing of LSNY's announcement in November 2001 of the reorganization plan to **[*20]** consolidate on a city-wide basis is evidence of retaliation against BLS for filing the May 2000 lawsuit. Although this announcement came after the D.C. Circuit's adverse ruling, the LSNY Board of Directors had voted eight months earlier in March 2001 to adopt the consolidation plan. That vote occurred while LSNY was still in active litigation against the OIG, and thus, while LSNY was still litigating in favor of plaintiff's position with regard to

[6] Neither BLS nor Queens Legal Services were served with subpoenas, nor named as respondents in the enforcement proceeding in D.C. District Court.

[7] The Legal Aid Bureau was not a party to the appeal.

[8] See Thompson Aff. P 73, Pl's Mot. for a Prelim. Inj.

the issues raised in plaintiff's May 2000 lawsuit. The timing of the November 2001 announcement, therefore, fails to support plaintiff's argument. Plaintiff simply has not alleged any set of facts in the Complaint which could reasonably lead to a causal connection between plaintiff's filing of the May 2000 lawsuit and LSNY's decision to institute the reorganization plan. Therefore, defendants' motions to dismiss the *First Amendment* retaliation claim are granted.

The New York Judiciary Act Claim

Plaintiff argues that if it acquiesces to LSNY's reorganization plan, the plan will cause BLS to engage in the unauthorized practice of law, in violation of § 495(1) of the New York Judiciary Act. ***HN8***[] The New York Judiciary Act prohibits any **[*21]** corporation from "practicing or appearing as an attorney-at-law for any person in any court in this state or before any judicial body[.]" N.Y. JUDICIARY ACT § 495(1) (McKinney 2002). However, § 495(7) of the Act provides an exemption for "organizations which have as their primary purpose the furnishing of legal services to indigent persons." Id. § 495(7). Plaintiff concedes that it, as well as LSNY, currently fall under the Act's exemption. Plaintiff claims, however, that if it is forced to become a wholly-owned subsidiary of LSNY, both BLS and LSNY would lose their exemption status.

Plaintiff's argument fails to state a claim for two reasons. First, ***HN9***[] § 476-a of the Act states that only the Attorney General or a bar association formed in accordance with New York law are authorized to bring a civil action for unlawful practice of law. See Id. at § 476-a; *Lawrence v. Houston, 172 A.D.2d 923, 567 N.Y.S.2d 962, 964 (N.Y. App. Div. 1991)*. Plaintiff, therefore, does not have standing to bring this cause of action. Second, even if plaintiff did have standing, plaintiff's contention that both BLS and LSNY would lose their exemption status because plaintiff would **[*22]** now be subject to the "corporate control" of LSNY is insufficient to state a claim. Even if BLS becomes a wholly-owned subsidiary of LSNY, the primary purpose of both organizations will remain the same, namely to furnish legal services to indigent persons. Thus the exemption under § 495(7) will still apply. Plaintiff has not alleged any set of facts that would cause BLS or LSNY to fall outside of § 495(7) exemption. Therefore, defendants' motions to dismiss the New York Judiciary Act claim are granted.

The Breach of Fiduciary Duty Claim

Plaintiff contends that LSNY owes BLS a fiduciary duty, and that LSNY and LSC conspired to breach that fiduciary duty. Plaintiff contends that the fiduciary relationship arose because BLS and LSNY are parties to a joint venture.

HN10[] Parties to a joint venture owe one another a fiduciary duty. See *Gover v. Escudo Constr. Corp., 288 A.D.2d 435, 733 N.Y.S.2d 894 (N.Y. App. Div. 2001)*. In determining if a joint venture exists, a court will consider "the intent of the parties (express or implied), whether there was joint control and management of the company, whether there was a sharing of the profits as well as a sharing of the **[*23]** losses and whether there was a combination of property, skill or knowledge." *Mendelson v. Feinman, 143 A.D.2d 76, 531 N.Y.S.2d 326, 328 (N.Y. App. Div. 1988)*. If the contract does not expressly impose fiduciary duties, plaintiff bears the burden of alleging extraordinary circumstances that create a fiduciary relationship. See *Calvin Klein Trademark Trust v. Wachner, 123 F. Supp.2d 731, 733-34 (S.D.N.Y. 2000)*.

The Complaint fails to allege any facts that would establish a joint venture between BLS and LSNY. The governing 2001 contract between BLS and LSNY explicitly disavows any partnership relationship, stating that "nothing herein shall constitute a partnership between the OLSC [9] and LSNY or any relationship of principal and agent between the OLSC and LSNY." LSNY Br., Exh. B at § 14.9. The contract also provides LSNY with the "authority in its discretion either independently or in consultation with representatives of the OLSC" to institute "program modification and reorganization on a city-wide basis or otherwise[.]" Id. at § 11.1. The contract further states that the contract "constitutes the entire agreement of the parties relating to **[*24]** the subject matter hereof." Id. at § 14.12. The

[9] "OLSC" stands for Operating Legal Services Corporation. This is the term given to the seven legal services organizations in New York City (including BLS) that sub-contracted with LSNY to receive LSC funds.

terms of the contract do not create a fiduciary relationship, and plaintiff has not alleged any extraordinary circumstances to overcome the language in the contract. Therefore, defendants' motions to dismiss the breach of fiduciary duty claim are granted as LSNY had no fiduciary relationship with BLS in the first instance. [10]

[*25] The Tortious Interference with Business Relations Claim

Plaintiff argues that LSNY's reorganization plan constitutes tortious interference with plaintiff's business relations, and that LSC conspired with LSNY to implement this plan. Plaintiff contends that by adopting this plan, LSNY intends to appropriate for itself all of plaintiff's funding opportunities and contracts, as well as hire away all of BLS's employees.

HN11[] To prove tortious interference with business relations, a plaintiff must show, *inter alia,* the existence of a business relationship between the plaintiff and a third party. See *Boule v. Hutton, 138 F. Supp.2d 491, 510 (S.D.N.Y. 2001)*. Plaintiff must allege that the defendant interfered with a *specific* contract, rather than generally with the plaintiff's business opportunities. See *Kramer v. Pollock-Krasner Found., 890 F. Supp. 250, 258 (S.D.N.Y. 1995)*; see e.g., *Lesesne v. Lesesne, 292 A.D.2d 507, 740 N.Y.S.2d 352, 354 (N.Y. App. Div. 2002)* (affirming dismissal of tortious interference claim because plaintiff failed to allege breach of a specific contract between the plaintiff and a third party).

[*26] In this case, plaintiff has failed to allege that LSNY interfered with a specific contract it had with a third party. Rather, the Complaint only generally alleges that LSNY intends to appropriate for itself all of plaintiff's current funding opportunities and contracts, and hire away all of plaintiff's employees. Such generalized allegations are insufficient as a matter of law to sustain a tortious interference of business relations claim. Therefore, defendants' motions to dismiss the tortious interference with business relations claim are granted.

Conclusion

Defendants' motions to dismiss the Complaint and for judgment on the pleadings are granted in their entirety for the reasons stated above. [11]

[*27] Dated: January 17, 2003

SO ORDERED:

GEORGE B. DANIELS

United States District Judge

End of Document

---

[10] Plaintiff's breach of fiduciary duty claim against LSC is based upon its allegation that LSC "conspired" with LSNY to breach LSNY's fiduciary duties to plaintiff. However, conspiracy to commit a tort is not in itself a cause of action under New York law. See *Alexander & Alexander v. Fritzen, 68 N.Y.2d 968, 503 N.E.2d 102, 510 N.Y.S.2d 546 (N.Y. 1986)*. Therefore, the claim against LSC for conspiracy to breach the fiduciary relationship must also fail for this separate and independent reason. For the same reasons, plaintiff's "conspiracy" claim against LSC for tortious interference with business relations must also fail.

[11] Plaintiff's request for leave to amend the Complaint in the event any of its claims are found deficient is denied. Plaintiff has also filed a motion for Preliminary Injunction enjoining LSNY from withholding grant funding from BLS after January 1, 2003. That motion is based solely upon plaintiff's claims for breach of fiduciary duty and tortious interference with business relations. As today's decision disposes of all claims in favor of defendants, plaintiff's motion for a Preliminary Injunction is also denied.

HN8[] **Standards of Review, De Novo Review**

The appellate court reviews de novo the district court's dismissal of a complaint for lack of subject matter jurisdiction. A complaint may be dismissed for lack of subject matter jurisdiction only if it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. In its review, the appellate court assumes the truth of the allegations made and construes them favorably to the pleader.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > Damages

International Trade Law > General Overview

HN10[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The United States Court of Appeals for the District of Columbia Circuit holds that the words "a claim" in *15 U.S.C.S. 6a(2)* of the Foreign Trade Antitrust Improvements Act, *15 U.S.C.S. § 6a*, refer to a private action, not merely a government action to enforce the Sherman Act. In other words, "giving rise to a claim" means giving rise to someone's private claim for damages or equitable relief. To satisfy this requirement, the plaintiff must allege that some private person or entity has suffered actual or threatened injury as a result of the United States' effect of the defendant's violation of the Sherman Act.

Civil Procedure > ... > Justiciability > Standing > General Overview

HN11[] **Justiciability, Standing**

The United States Courts of Appeals are instructed to decide for themselves whether the party seeking judicial review has standing, even if the issue was not decided below. The appellate courts are thus required to address the issue of standing even if the courts below have not passed on it. Every federal appellate court has a special obligation to satisfy itself not only of its own jurisdiction, but also that of the lower courts in a cause under review.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > Preliminary Considerations > Justiciability > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN12[] **Clayton Act, Claims**

To meet the constitutional requirements of standing under the Clayton Act, an antitrust plaintiff must establish injury-in-fact or threatened injury-in-fact caused by the defendant's alleged wrongdoing.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN13[] **Private Actions, Standing**

To establish standing, an antitrust plaintiff must establish antitrust injury, that is, injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

International Trade Law > General Overview

HN14[] **Regulated Practices, Price Fixing & Restraints of Trade**

The antitrust laws do not merely forbid price-fixing in United States' commerce, but rather forbid price-fixing that harms United States' commerce. Thus, the antitrust laws forbid the fixing of prices in foreign markets where that conduct harms United States' commerce.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

HN15[] **Private Actions, Standing**

To establish antitrust injury for purposes of standing, the injury should be the type of loss that the claimed violations of the Sherman Act would be likely to cause.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN16[] **Private Actions, Standing**

To determine whether antitrust plaintiffs have standing, the court must consider the following factors: the directness of the injury, whether the claim for damages is speculative, the existence of more direct victims, the potential for duplicative recovery, and the complexity of apportioning damages.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN17[] **Standards of Review, Abuse of Discretion**

The appellate court reviews the district court's decision not to exercise supplemental jurisdiction for abuse of discretion.

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > Preliminary Considerations > Jurisdiction > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN19[] **Jurisdiction, Jurisdictional Sources**

Under *28 U.S.C.S. § 1367*, the district court has supplemental jurisdiction over related claims when it has original jurisdiction over the initial claim. When the district court has dismissed claims properly before it, it retains discretion to decide whether or not to dismiss other claims as to which it may exercise supplemental jurisdiction. The district court may decline to exercise supplemental jurisdiction over a claim if, for example, the district court has dismissed all claims over which it has original jurisdiction. *28 U.S.C.S. § 1367(c)(3)*. But if the district court dismissed the underlying claim on jurisdictional grounds, then it could not exercise supplemental jurisdiction.

Opinion by: EDWARDS

Opinion

[*340] EDWARDS, *Circuit Judge:* **[**2]** The action in this case was filed under *section 1* of the Sherman Act, *15 U.S.C. § 1*, *sections 4* and *16* of the Clayton Act, *15 U.S.C. § 15* and *26*, the antitrust laws of foreign nations, and international law, on behalf of all foreign purchasers of certain vitamins, vitamin premixes, and bulk vitamin products and precursors, against a number of corporations, both foreign and domestic, who distribute and sell these vitamin products around the world. Appellants contend that appellees engaged in an over-arching worldwide conspiracy to raise, stabilize, and maintain the prices of vitamins; that this cartel operated on a global basis and affected virtually every market where appellees operated worldwide; and that appellees' unlawful price-fixing conduct had adverse effects in the United States and in other nations that caused injury to appellants in connection with their foreign purchases of vitamin products. Appellees moved to dismiss the action in the District Court, asserting that the court lacked subject matter jurisdiction under the federal antitrust laws, because the injuries plaintiffs sought to redress were allegedly sustained in transactions **[**3]** that lack any direct connection to United States commerce. The District Court granted the motion to dismiss and appellants now appeal.

This appeal requires us to interpret the Foreign Trade Antitrust Improvements Act ("FTAIA"), *15 U.S.C. § 6a*, to determine the jurisdictional reach of the federal antitrust laws. ***HN1***[] FTAIA, which amended the Sherman Act, provides that the Sherman Act "shall not apply to conduct" involving trade or commerce with foreign nations unless "such conduct has a direct, substantial, and reasonably foreseeable effect" on trade or commerce in the United States, and "such effect gives rise to a claim" under the provisions of the Sherman Act. *Section 6a(1)* of FTAIA makes it clear that our federal antitrust laws regulate foreign conduct only where that conduct has the proscribed "effects" on domestic or foreign United States commerce. And *§ 6a(2)* of FTAIA provides that the antitrust laws are inapplicable unless the effect of extraterritorial conduct on United States commerce "gives rise to a claim" under the Sherman Act. The District Court held that, under FTAIA, a plaintiff must establish that the injuries it seeks to remedy actually arose from **[**4]** the anticompetitive effects of the defendants' conduct on United States commerce. In other words, it is not enough for a plaintiff to show that other persons were injured by such United States effects; the United States effects themselves must give rise to plaintiff's claim. This *restrictive view* of FTAIA's jurisdictional reach finds support in the Fifth Circuit. *See* *Den Norske Stats Oljeselskap As v. Heeremac Vof, 241 F.3d 420 (5th Cir. 2001)*.

Appellants contend that the District Court misconstrued FTAIA. According to appellants, FTAIA applies to "conduct" that has a "direct, substantial, and reasonably foreseeable effect" on United States commerce, *if* - not merely to the extent that - the requisite United States effects are found. Thus, according to appellants, Congress did not limit jurisdiction to "the same claim" as that on which the jurisdictional effects are based. Rather, Congress provided only that "a" claim cognizable under the Sherman Act must exist. Once a jurisdictional nexus exists, FTAIA does not limit the types of plaintiffs who may seek relief. Thus, according to appellants, it does not matter that the transactions in **[*341]** which they purchased **[**5]** vitamins took place outside of United States commerce. This *less restrictive view* of FTAIA's jurisdictional reach finds support in the Second Circuit. *See* *Kruman v. Christie's Int'l PLC, 284 F.3d 384 (2d Cir. 2002)*.

In the alternative, appellants claim that their complaint states a viable cause of action even under the District Court's *restrictive view* of FTAIA. Appellants contend that appellees caused injury to purchasers outside of the United States as a result of the anticompetitive effects of price changes and supply shifts in United States commerce. Not only was United States commerce directly affected by the worldwide conspiracy, appellants say, but the cartel raised prices around the world in order to keep prices in equilibrium with United States prices in order to avoid a system of arbitrage. Thus, according to appellants, the "fixed" United States prices acted as a benchmark for the world's vitamin prices in other markets. On this view of the alleged facts, appellants claim that the foreign plaintiffs were injured as a direct result of the increases in United States prices even though they bought vitamins abroad. The District Court did not address **[**6]** this alternative theory of jurisdiction. Neither the Second Circuit nor the Fifth Circuit embrace this view of FTAIA's jurisdictional reach, nor do we. In light of our disposition in favor of appellant on other grounds, we find it unnecessary to address this "alternative" theory of subject matter jurisdiction.

We can find no "plain meaning" in *§ 6a(2)* of FTAIA. Nor do we find any easy resolution of this case by reference to the decisions of the Second and Fifth Circuits. The majority opinion in *Den Norske Stats Oljeselskap As v. Heeremac Vof* seems to us to endorse a view of FTAIA that is overly rigid, in light of the words of the statute and relevant portions of the legislative history. And, as we explain below, the opinion in *Kruman v. Christie's International PLC* seems to reach too far in its view of subject matter jurisdiction. Our view of the statute falls somewhere between the views of the Fifth and Second Circuits, albeit somewhat closer to the latter than the former.

HN2[] We hold that where the anticompetitive conduct has the requisite harm on United States commerce, FTAIA permits suits by foreign plaintiffs who are injured solely by that conduct's effect on foreign commerce. **[**7]** The anticompetitive conduct itself must violate the Sherman Act and the conduct's harmful effect on United States commerce must give rise to "a claim" by someone, even if not the foreign plaintiff who is before the court. Although the language of *§ 6a(2)* does not plainly resolve this case, we believe that our holding regarding the jurisdictional reach of FTAIA is faithful to the language of the statute. We reach this conclusion not only by virtue of our literal reading of the statute, but also in light of the statute's legislative history and underlying policies of deterrence emanating from the Supreme Court's decision in *Pfizer, Inc. v. Government of India, 434 U.S. 308, 54 L. Ed. 2d 563, 98 S. Ct. 584 (1978)*.

Because the foreign plaintiffs here have alleged that the United States effects of appellees' cartel give rise to antitrust claims by parties injured in the United States from transactions occurring in the United States, we hold that subject matter jurisdiction is proper. We also find that appellants have standing to sue under the antitrust laws. We therefore reverse the District Court's decision, vacate the judgment against appellants, and remand the case **[**8]** for further proceedings consistent with this opinion.

I. BACKGROUND

HN3[] *Section 1* of the Sherman Act makes unlawful "every contract, combination … **[*342]** or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations…." *15 U.S.C. § 1*. ***HN4***[] *Section 4* of the Clayton Act confers a cause of action on "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws," and provides for treble damages. *Id. § 15(a)*. ***HN5***[] *Section 16* of the Clayton Act entitles "any person, firm, corporation or association … to sue for and have injunctive relief … against threatened loss or damage by a violation of the antitrust laws…." *Id. § 26*. In 1982, Congress enacted ***HN6***[] FTAIA, which amended the Sherman Act to make the Sherman Act inapplicable to non-import foreign commerce unless the conduct has a "direct, substantial, and reasonably foreseeable effect" on domestic commerce, and "such effect gives rise to a claim under" the Sherman Act. *Id. § 6a*. The text of FTAIA provides, in full:

> ***HN7***[] *Sections 1 to 7* of this title shall not apply to conduct involving trade or commerce (other than import trade **[**9]** or import commerce) with foreign nations unless-
> (1) such conduct has a direct, substantial, and reasonably foreseeable effect-
> (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or
> (B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and
>
> (2) such effect gives rise to a claim under the provisions of *sections 1 to 7* of this title, other than this section.
>
> If *sections 1 to 7* of this title apply to such conduct only because of the operation of paragraph (1)(B), then *sections 1 to 7* of this title shall apply to such conduct only for injury to export business in the United States.

Id.

Appellees ("vitamin companies") are manufacturers and distributors of vitamins and vitamin products. Appellants ("foreign purchasers" or "foreign plaintiffs") are foreign corporations domiciled in various foreign countries, who purchased vitamins abroad from the vitamin companies or their alleged co-conspirators from January 1, 1988 to February 1999, for delivery outside the United States. The plaintiffs in this case originally **[**10]** filed a class action suit on behalf of foreign and domestic purchasers of vitamins, alleging "a massive and long-running conspiracy" among the vitamin companies and their co-conspirators "with the purpose and effect of fixing prices, allocating market share, and committing other unlawful practices designed to inflate the prices of various vitamins … sold to the Plaintiffs and other purchasers both within and outside the United States." Amend. Compl. at P 1, Joint Appendix ("J.A.") 15-16. The plaintiffs sought injunctive relief and damages under *§ 1* of the Sherman Act; *§§ 4* and *16* of the Clayton Act; the antitrust laws of relevant foreign nations; and international law. *Id.* at P 7, J.A. 19.

The vitamin companies moved to dismiss the suit as to the foreign plaintiffs pursuant to *FED. R. CIV. P. 12(b)(1)* for lack of subject matter jurisdiction under the federal antitrust laws, and for lack of standing under the federal antitrust laws. They also urged the District Court to decline to exercise supplemental jurisdiction over the foreign law claims, and to dismiss the international law claims for failure to state a claim upon which relief may be granted. The District Court held that **[**11]** it lacked subject matter jurisdiction under FTAIA over the foreign plaintiffs' claims. *See* **[*343]** *Empagran S.A. v. F. Hoffman-La Roche, Ltd., 2001 U.S. Dist. LEXIS 20910, 2001 WL 761360, at 2-4* (D.D.C. June 7, 2001). The "critical question in this case," the District Court stated, "is whether allegations of a global price fixing conspiracy that affects commerce both in the United States and in other countries gives persons injured abroad in transactions otherwise unconnected with the United States a remedy under our antitrust laws." *2001 U.S. Dist. LEXIS 20910, [WL] at 2.* The District Court held that, because the conspiracy's effect on U.S.

commerce did not cause the foreign purchasers' injury, the court did not have jurisdiction over the foreign purchasers' claims. *See* *2001 U.S. Dist. LEXIS 20910, [WL] at 2-4* .

Because the District Court dismissed the foreign purchaser's federal claims for lack of subject matter jurisdiction, it found that it did not need to reach the issue of standing with respect to the foreign plaintiffs. *See* *2001 U.S. Dist. LEXIS 20910, [WL] at 5* . The District Court declined to exercise supplemental jurisdiction over the foreign purchasers' foreign law claims, because "these foreign law claims raise novel and complex issues of foreign law, the court has already **[**12]** dismissed all federal claims brought by the foreign plaintiffs for lack of subject matter jurisdiction," and because of "comity and efficiency reasons." *2001 U.S. Dist. LEXIS 20910, [WL] at 8* . Finally, the District Court dismissed the foreign purchasers' claims under customary international law for failure to state a claim, because the court could not find the existence of a customary international law proscribing the conduct alleged. *See* *2001 U.S. Dist. LEXIS 20910, [WL] at 9* . The foreign purchasers filed an interlocutory appeal.

At the time of its decision, the District Court deferred ruling on the defendants' motion to dismiss the domestic plaintiffs' federal antitrust claims, and directed the domestic plaintiffs to supplement their complaint to provide more detailed factual allegations. *2001 U.S. Dist. LEXIS 20810, [WL] at 4, 6* . At the suggestion of the District Court, for practicality, *see* *2001 U.S. Dist. LEXIS 20910, [WL] at 7 n.5* , the domestic plaintiffs in the case subsequently entered into a court-approved stipulation that transferred their claims to another action pending before the District Court, *Procter & Gamble Co. v. BASF AG*, No. 99-3046 (M.D.L. No. 1285), which involved similar claims against substantially the same defendants. The parties thereby agreed that the **[**13]** domestic plaintiffs had no pending claims in the instant case. On September 10, 2001, the District Court granted the defendants' motion for an order directing entry of final judgment, and on April 26, 2002, the District Court entered final judgment for the defendants in the instant case. The foreign plaintiffs' appeal is therefore no longer interlocutory.

II. ANALYSIS

A. Subject Matter Jurisdiction

HN8[🡅] This court reviews *de novo* the District Court's dismissal of a complaint for lack of subject matter jurisdiction. *Nat'l Taxpayers Union, Inc. v. United States, 314 U.S. App. D.C. 377, 68 F.3d 1428, 1432 (D.C. Cir. 1995)*. A complaint may be dismissed for lack of subject matter jurisdiction only if "'it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.'" *Sinclair v. Kleindienst, 229 U.S. App. D.C. 13, 711 F.2d 291, 293 (D.C. Cir. 1983)* (quoting *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957))*. In our review, this court assumes the truth of the allegations made and construes them favorably to the pleader. *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*. **[**14]**

In this case, the foreign purchasers, who bought vitamins exclusively outside the United States, allege that the vitamin companies conspired to fix vitamin prices around the world, and that the foreign purchasers paid inflated prices for vitamins abroad as a result of the global conspiracy. FTAIA makes the Sherman Act **[*344]** inapplicable to conduct in foreign commerce unless the conduct has "a direct, substantial, and reasonably foreseeable effect" on domestic commerce and "such effect gives rise to a claim under" the Sherman Act. *See* *15 U.S.C. § 6a(1)*.

As an initial matter, the parties appear to dispute the scope of the "conduct" that should be considered for our FTAIA analysis. Essentially, appellants argue that the relevant conduct is the "massive international cartel, exercising global market power." Appellants' Br. 19. Appellees argue that the relevant conduct is solely the market transactions between them and the foreign plaintiffs overseas. Appellees' Br. 20-21. Both the Second and Fifth Circuits have adopted appellants' approach, and appellants' approach is correct. *See* *Kruman, 284 F.3d at 398*; *Den Norske, 241 F.3d at 426*. **[**15]** Indeed, the *Kruman* court rejected a narrow definition of "conduct" as "the precise acts that caused injury," and instead adopted a broader definition of "conduct" as "acts that are illegal under the Sherman Act," that is, the international price-fixing conspiracy. *Kruman, 284 F.3d at 398*. The complaint in this case alleges an international price-fixing conspiracy among the vitamin companies, and appellees "do not contest that the vitamin cartel produced substantial effects in the United States" for the purpose of this appeal. Oral

Argument Transcript, at 30-31. In light of this concession by appellees, it is unnecessary for us to explore further the precise parameters of the definition of "conduct," since there is no real dispute that the vitamin companies' conduct had "a direct, substantial, and reasonably foreseeable effect" on U.S. commerce. We therefore accept that the "direct, substantial, and reasonably foreseeable effect" requirement under *§ 6a(1)* of FTAIA is met. Additionally, in light of appellees' concession that the vitamin cartel produced substantial effects on U.S. commerce, it is unnecessary for us to address appellees' argument that regulating foreign **[**16]** business transactions would exceed the powers granted to Congress under the *Commerce Clause*. *See* Appellees' Br. 16-17.

The precise issue presented in this appeal is whether the "gives rise to a claim" requirement under *§ 6a(2)* of FTAIA authorizes subject matter jurisdiction where the defendant's conduct affects both domestic and foreign commerce, but the plaintiff's claim arises only from the conduct's foreign effect. In other words, the question is whether FTAIA precludes actions under the Sherman Act unless a plaintiff shows that the injuries it seeks to remedy arise from the anticompetitive effects of the defendant's conduct on U.S. commerce; or, alternatively, is it enough for a plaintiff to show that the anticompetitive effects of the defendant's conduct on U.S. commerce give rise to an antitrust claim under the Sherman Act by someone, even if not the plaintiff who is before the court.

The Supreme Court first addressed the foreign reach of the Sherman Act in *American Banana Co. v. United Fruit Co., 213 U.S. 347, 53 L. Ed. 826, 29 S. Ct. 511 (1909)* (Holmes, J.), which held that the Sherman Act did not apply to conduct occurring outside the United States. **[**17]** Eighteen years later, the Court moderated this approach, and held that the Sherman Act authorized jurisdiction over foreign defendants, as long as some of the defendants' conduct occurred within the United States and the conduct affected domestic commerce. *See* *United States v. Sisal Sales Corp., 274 U.S. 268, 275-76, 71 L. Ed. 1042, 47 S. Ct. 592 (1927)*.

In 1945, in an important opinion by Judge Learned Hand, the Second Circuit held that a federal court has jurisdiction over foreign conduct as long as the conduct was intended to, and actually did, **[*345]** affect U.S. commerce. *See* *United States v. Aluminum Co. of Am., 148 F.2d 416, 443-44 (2d Cir. 1945)* ("*Alcoa*"). Judge Hand said that a "state may impose liabilities, even upon persons not within its allegiance, for conduct outside its borders that has consequences within its borders which the state reprehends." *Id. at 443*. Under *Alcoa*, jurisdiction depends upon whether the conduct had an effect on domestic commerce, not where the conduct took place. "Conduct which has no consequences within the United States" does not come within the reach of U.S. antitrust laws. *Id. Alcoa's* "effects **[**18]** test" is now well accepted. *See, e.g.*, *Laker Airways Ltd. v. Sabena, Belgian World Airlines, 235 U.S. App. D.C. 207, 731 F.2d 909, 922 (D.C. Cir. 1984)* ("It has long been settled law that a country can regulate conduct occurring outside its territory which causes harmful results within its territory."); *see also* IA PHILIP E. AREEDA & HERBERT HOVENKAMP, ANTI- TRUST LAW P 270, at 336 (2d ed. 2000) ("The central point, now well established, is that conduct, whether at home or abroad, can be reached by our antitrust laws when it affects competition within the United States or export competition from the United States."). The Supreme Court expressly embraced the "effects test" in *Hartford Fire Insurance Co. v. California, 509 U.S. 764, 125 L. Ed. 2d 612, 113 S. Ct. 2891 (1993)*, stating that "it is well established by now that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States." *Id. at 796* (citing *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 582 n.6, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*; *Alcoa*, 148 F.2d at 444). **[**19]**

In 1982, Congress enacted FTAIA, to "encourage the business community to engage in efficiency producing joint conduct in the export of American goods and services." H.R. REP. NO. 97-686, at 2 (1982). As the Supreme Court has noted, "FTAIA was intended to exempt from the Sherman Act export transactions that did not injure the United States economy." *Hartford Fire Ins., 509 U.S. at 796-97 n.23* (citations omitted). FTAIA was also passed to enact a "single, objective test - the 'direct, substantial, and reasonably foreseeable effect' test" that "will serve as a simple and straightforward clarification of existing American law…." H.R. REP. NO. 97-686, at 2. FTAIA thus endorsed *Alcoa*'s "effects test." *See id.* at 5 ("Since Judge Learned Hand's opinion in [*Alcoa*], it has been relatively clear that it is the situs of the effects as opposed to the conduct, that determines whether United States ***antitrust law*** applies.").

Since the enactment of FTAIA, the D.C. Circuit has had one occasion to apply the statute. In *Caribbean Broadcasting System, Ltd. v. Cable & Wireless PLC, 331 U.S. App. D.C. 226, 148 F.3d 1080, 1086-87 (D.C. Cir.*

1998), the court **[**20]** considered whether FTAIA authorizes subject matter jurisdiction over a Caribbean radio station's claim that a competing Caribbean radio station violated the Sherman Act by falsely telling U.S. advertisers that its own radio signal reached the entire Eastern Caribbean so that the advertisers would believe that it alone could fulfill their advertising needs. The precise question was whether the complaint by a foreign plaintiff against a foreign defendant adequately alleged that the latter's anticompetitive conduct had a "direct, substantial, and reasonably foreseeable effect" on U.S. commerce, as required by FTAIA's first prong. This court found that the anticompetitive conduct of the defendant radio station harmed the U.S. advertisers who had to pay higher prices because of it. We stated: "In this context it appears that antitrust injury to [the plaintiff] is ultimately a harm to U.S. purchasers of radio advertising. By keeping [the plaintiff] out of the market, [the defendant] **[*346]** denied such purchasers the benefit of competition." *Id.* Thus, we held that FTAIA authorized subject matter jurisdiction in that case.

The decision in *Caribbean* did not expressly address FTAIA's **[**21]** second prong - requiring that the effects of the anticompetitive conduct on U.S. commerce "give[] rise to a claim under" the antitrust laws - which is at issue in the instant appeal. However, in the course of addressing the first prong's "direct, substantial, and reasonably foreseeable effect" requirement, the *Caribbean* decision noted that the foreign radio station's "antitrust injury … is ultimately a harm to U.S. purchasers of radio advertising." *Id.* This conclusion followed from the facts of that case, in which the foreign company's injury and the U.S. purchasers' injury were two sides of the same coin: the defendant radio station's false representations to its U.S. advertisers had the effect of misleading the U.S. advertisers, and causing them to buy advertising from the false advertiser at inflated prices; these purchases based on false information were what shut the plaintiff radio station out of the advertising market. Thus, it is possible to read *Caribbean* to have assumed, on the facts of that case, that the effect of the conduct on U.S. commerce gave rise to the plaintiff's claim. If so, *Caribbean* simply did not address the question at issue in the instant **[**22]** case, where the effect of the vitamin companies' conduct on U.S. commerce does not give rise to the plaintiffs' claim for redress.

There is another equally plausible way to read the *Caribbean* decision. Although the foreign plaintiff's loss of opportunity to sell advertising and the higher prices paid by U.S. advertisers were clearly interrelated, the higher prices paid by U.S. advertisers did not cause or give rise to the foreign plaintiff's loss of opportunity to sell advertising. One then could not say that the U.S. effect "gave rise **[*347]** to" the plaintiff's claim. It is thus possible that *Caribbean* impliedly interpreted the "gives rise to a claim" prong of FTAIA to be satisfied even where the U.S. effect does not "give rise to" the foreign plaintiff's claim.

We need not determine which of these two readings of FTAIA's second prong is implied by *Caribbean*. Both interpretations appear plausible. *Compare, e.g.,* Den Norske, 241 F.3d at 430 ("The effect on United States commerce in [*Caribbean*] … gave rise to the injury suffered by the plaintiff, a competing radio station - that is, exclusion of the plaintiff from the market for United States advertising **[**23]** dollars."), *with id.*, 241 F.3d at 436-37 (Higginbotham J, dissenting) ("[*Caribbean*] did not require that the injury to American advertisers 'give[] rise to' the plaintiff's cause of action; its determination that the injury gave rise to 'a' claim was sufficient."). In any event, because *Caribbean* only addressed FTAIA's "direct, substantial, and reasonably foreseeable effect" prong, we hesitate to derive a firm interpretation of the "gives rise to a claim" prong from that case. The law of the circuit thus leaves unanswered the question whether FTAIA requires that the plaintiff's claim arise from the U.S. effect of the anticompetitive conduct. This is an issue of first impression in this circuit.

1. Circuit Split

As noted above, the Second and Fifth Circuits have split on this very question of statutory interpretation. The District Court in the instant case followed the Fifth Circuit's *Den Norske* decision, which held that the federal antitrust laws do not apply to claims in which the plaintiff's injury does not arise from the conspiracy's anticompetitive domestic effect. Den Norske, 241 F.3d at 427. That is, even if a conspiracy **[**24]** results in higher prices in the United States, that domestic effect must "give rise to" the plaintiff's injury. By contrast, the Second Circuit in *Kruman* held that FTAIA allows suit by a plaintiff whose injury does not arise from the conduct's harm to domestic commerce, as long as that conduct's "domestic effect violated the substantive provisions of the Sherman

Act." *Kruman, 284 F.3d at 400*. As in the instant case, the "direct, substantial, and reasonably foreseeable effect" prong of *§ 6a(1)* was satisfied in those two cases, and the question at issue was whether the "gives rise to a claim" prong of *§ 6a(2)* was satisfied where the U.S. effect of the conduct did not give rise to the plaintiff's claim.

In the Fifth Circuit's *Den Norske* case, a Norwegian oil corporation conducting business exclusively in the North Sea brought an antitrust conspiracy claim against providers of heavy-lift barge services, alleging that the defendants' conduct inflated the plaintiff's operating costs in the North Sea and also inflated oil prices in the U.S. market. The majority opinion in *Den Norske* interpreted the "gives rise to a claim" prong as demanding that the domestic **[**25]** effect give rise to the plaintiff's claim, not merely to someone's claim. *Den Norske, 241 F.3d at 427*. Because the plaintiff's injury arose solely from the foreign effect, and not from the domestic effect of the defendant's conduct, the Fifth Circuit found subject matter jurisdiction lacking.

Judge Patrick Higginbotham dissented, writing that he was "not persuaded that when illegal conduct produces these domestic effects, that Congress intended to close the door to a foreign company injured by the same illegal conduct." *Id. at 431* (Higginbotham J., dissenting). Judge Higginbotham found that the literal text of the words "gives rise to a claim" supported jurisdiction: "The word 'a' has a simple and universally understood meaning. It is the indefinite article.... If the drafters of FTAIA had wished to say 'the claim' instead of 'a claim,' they certainly would have." *Id. at 432*. In light of the purpose of FTAIA "to exempt exporting from antitrust scrutiny, not to limit the liability of participants in transnational conspiracies that affect United States commerce," Judge Higginbotham worried that the majority's "interpretation of the **[**26]** FTAIA transforms a safe harbor for American exporters into a boon for foreign cartels that restrain commerce in the United States." *Id. at 433, 434*. Judge Higginbotham emphasized the deterrence rationale animating the Sherman and Clayton Acts, and feared that global conspiracies that affect U.S. commerce could be inadequately deterred in the absence of suits by foreign plaintiffs:

> Conspirators facing antitrust liability only to plaintiffs injured by their conspiracy's effects on the United States may not be deterred from restraining trade in the United States. A worldwide price-fixing scheme could sustain monopoly prices in the United States even in the face of such liability if it could cross-subsidize its American operations with profits from abroad. Unless persons injured by the conspiracy's effects on foreign commerce could also bring antitrust suits against the conspiracy, the conspiracy could remain profitable and undeterred.

Id. at 435.

In the Second Circuit's *Kruman* case, buyers and sellers at foreign auctions filed suit against the two largest auction houses, Christie's and Sotheby's, alleging that the auction houses had conspired **[**27]** to fix prices in the United States and abroad for their services as auctioneers, and had inflated commissions. In addressing this claim, the Second Circuit explained that FTAIA is an amendment to the Sherman Act, rather than to the Clayton Act, and, as **[*348]** such, focuses only on the prohibition of a defendant's anticompetitive conduct, rather than on what injury a plaintiff must suffer to bring suit. Thus, the court reasoned, the argument that FTAIA limits liability to injury arising out of the conduct's domestic effect conflates the Clayton Act, to which a plaintiff's injury is relevant, and the Sherman Act, to which only a defendant's conduct is relevant. *See* *Kruman, 284 F.3d at 397-99*. The court then interpreted the "gives rise to a claim" language as requiring only "that the domestic effect violate the substantive provisions of the Sherman Act," rather than "that the domestic effect give rise to an injury that would serve as the basis for a Clayton Act action." *Id. at 400*. The Second Circuit read Congress' use of the indefinite article in "gives rise to a claim" to mean that "the 'effect' on domestic commerce need not be the basis for a plaintiff's **[**28]** injury, it only must violate the substantive provisions of the Sherman Act." *Id.*

The Second Circuit also relied on policy considerations in interpreting FTAIA. In line with its view that FTAIA governs what conduct by a defendant is regulated by the Sherman Act, rather than which plaintiffs can bring suit, the court reasoned that

> when anticompetitive conduct is directed at both foreign and domestic markets, the success of an anticompetitive scheme in foreign markets may enhance the effectiveness of an anticompetitive scheme in the domestic market. When a foreign scheme magnifies the effect of the domestic scheme, and plaintiffs affected only by the foreign scheme have no remedy under our laws, the perpetrator of the scheme may have a greater incentive to pursue both the foreign scheme and the domestic scheme rather than the domestic scheme alone.

> Our markets suffer when the foreign scheme is not deterred because the domestic scheme may have a greater chance of success when it is supplemented by the foreign scheme.

Id. at 403. Thus, the Second Circuit found that "our markets can benefit from the additional deterrence of conduct affecting foreign **[**29]** markets." *Id.* (citing *Pfizer, 434 U.S. at 313-15*).

2. FTAIA's Language: "Effect" that "Gives Rise to a Claim"

Appellants' and appellees' arguments regarding the meaning of FTAIA's "gives rise to a claim" language largely correspond to the reasoning adopted in the Second Circuit's and the Fifth Circuit's opinions, respectively. On the Fifth Circuit's restrictive view of FTAIA, the statute allows suit only where the plaintiff is injured by the U.S. effects of the anticompetitive conduct. *Den Norske, 241 F.3d at 427*. On the Second Circuit's less restrictive view, the statute also allows suit where the plaintiff is injured in foreign commerce by anticompetitive conduct whose "domestic effect … violates the Sherman Act," even if the domestic effect of the conduct does not injure the plaintiff. *Kruman, 284 F.3d at 401*.

Appellants make two arguments about the language of FTAIA that we reject. First, echoing the Second Circuit, appellants argue that the Fifth Circuit's restrictive interpretation of "gives rise to a claim" renders superfluous the concluding provision of FTAIA, which states that, if the Sherman Act applies only **[**30]** because the conduct affects "export commerce or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States," *15 U.S.C. § 6a(1)(B)*, then it applies "to such conduct only for injury to export business in the United States," *id. § 6a*. *See* Appellants' Br. 22-23; *Kruman, 284 F.3d at 396*; *Den Norske, 241 F.3d at 432 n.5* (Higginbotham, J., dissenting). In other **[*349]** words, if subsections 1 and 2 of FTAIA already provide that the Sherman Act applies only where the U.S. effect gives rise to the plaintiff's injury, why would Congress need to add the final proviso that, regarding injury to export commerce, the Sherman Act only applies to injury to U.S. export commerce?

We think that there is a reading of the final proviso of FTAIA that would not render it superfluous, even if one were to adopt the Fifth Circuit's and the District Court's restrictive interpretation of "gives rise to a claim." The final proviso could be intended to clarify that, although subsection 1(B) speaks of a "person engaged in" export commerce, the Sherman Act does not extend to *all* injury sustained by such a person **[**31]** as a result of the defendant's anticompetitive conduct, but, rather, only to injury to his export business sustained within the United States. In other words, the proviso precludes an exporter from suing for injury to some aspect of his export business suffered outside the United States. *See* IA AREEDA & HOVENKAMP, *supra, P 262,* at 360 (explaining that the final proviso "is designed to make clear that a foreign firm operating an export business in the United States continues to be protected by the antitrust laws with respect to that business but not with respect to its operations outside the United States"). This limitation would not render the final proviso superfluous under an interpretation of subsection 2 requiring that the plaintiff be injured by the conduct's domestic effect to be able to sue.

Second, appellants place significance on the fact that, in providing that the Sherman Act shall not apply to foreign commerce "unless … such conduct" has a U.S. effect that "gives rise to a claim," Congress chose the word "unless" rather than the phrase "except to the extent that." Appellants contend that "unless" enables the conduct itself to be actionable so long as the U.S. **[**32]** effect is present, whereas "except to the extent that" would make the Sherman Act apply only to the extent that the conduct that causes the U.S. effect also gives rise to the plaintiffs' claim. *See* Appellants' Br. 17-19. This is overreading. Like the District Court, we are unconvinced that "unless" and "to the extent that" would have such different meanings in this statute.

At bottom, however, we agree with appellants that *§ 6a(2)* supports subject matter jurisdiction in this case. Although both the Second Circuit and the Fifth Circuit found the "gives rise to a claim" language of *§ 6a(2)* to be plain in opposite ways, we find that the language does not clearly resolve the question whether "a claim" means the plaintiff's claim. The Fifth Circuit's view that "a claim" plainly refers to the plaintiff's claim must depart from the literal language - "gives rise to a claim" - and substitute the words "gives rise to the plaintiff's claim" in order to reach the *plain meaning* to which the court subscribes. The Second Circuit construes broadly Congress' use of the indefinite article in "a claim," such that "a claim" really means "civil action … by the federal government to enforce **[**33]** or prevent a substantive violation of the Sherman Act pursuant to *15 U.S.C. § 4*"; hence, the words "gives rise to a claim" mean that the conduct's domestic effect "only must violate the substantive provisions of the Sherman Act." *Kruman, 284 F.3d at 399-400*. We think that this interpretation of the words "a claim" gives short shrift to *§ 6a(2)*'s explicit requirement that the domestic effect "give[] rise to a claim" - in other words, the language is far from clear as to whether that requirement can be satisfied merely by a violation of the Sherman Act, rather than by antitrust injury to the plaintiffs or others who could bring a claim under the provisions of the Clayton **[*350]** Act that create a cause of action for Sherman Act violations.

Our view of the statute falls somewhere between the views of the Fifth and Second Circuits, albeit somewhat closer to the latter than the former. ***HN9***[] We hold that, where the anticompetitive conduct has the requisite effect on United States commerce, FTAIA permits suits by foreign plaintiffs who are injured solely by that conduct's effect on foreign commerce. The anticompetitive conduct itself must violate the Sherman Act **[**34]** and the conduct's harmful effect on United States commerce must give rise to "a claim" by someone, even if not the foreign plaintiff who is before the court. Thus, the conduct's domestic effect must do more than give rise to a government action for violation of the Sherman Act, but it need not necessarily give rise to the particular plaintiff's (private) claim. This interpretation has the appeal of literalism. *Cf. Den Norske, 241 F.3d at 432* (Higginbotham, J., dissenting) ("The word 'a' has a simple and universally understood meaning…. If the drafters of FTAIA had wished to say 'the claim' instead of 'a claim,' they certainly would have.").

Although the language of *§ 6a(2)* does not plainly resolve this case, we believe that our holding regarding the jurisdictional reach of FTAIA is a faithful to the language of the statute. We reach this conclusion not only by virtue of our literal reading of the statute, but also in light of the statute's legislative history and underlying policies of deterrence, which we address in parts A.4. and A.5., *infra*. We first consider the Second Circuit's structural argument in support of its less restrictive view of *§ 6a(2)*.

[**35] 3. FTAIA's Structure

Appellants adopt the Second Circuit's structural argument - namely that, because FTAIA amended the Sherman Act rather than the Clayton Act, FTAIA only speaks to the question what conduct is prohibited, not which plaintiffs can sue. *See* Appellants' Reply Br. 6-7; *Kruman, 284 F.3d at 397-400*. Because FTAIA is an amendment to the Sherman Act, this structural argument deems Congress in FTAIA to have addressed only the Sherman Act's prohibition of anticompetitive conduct, putting out of view the Clayton Act's conferral of a cause of action on those injured by Sherman Act violations. Appellants argue: "Since the focus of the FTAIA is on the defendants' conduct, which is regulated by the Sherman Act, it is this conduct alone that violates the Sherman Act. To require that the injury of domestic purchasers be the basis for the injury suffered by Plaintiffs … improperly imports a concept applicable to *Section 4* of the Clayton Act." Appellants' Reply Br. 6-7.

This argument is plausible but ultimately unconvincing. The Clayton Act, which gives plaintiffs a cause of action under the Sherman Act, was in effect at the time that FTAIA was enacted, **[**36]** and FTAIA speaks explicitly of "giving rise to a claim under" the Sherman Act. The concept of a claim arising under the Sherman Act is clearly one that is present in the Clayton Act's conferral of a cause of action on those injured by Sherman Act violations. It is thus equally plausible to think that Congress referred to *both* prohibited conduct and plaintiffs' injury, importing concepts from both the Sherman and Clayton Acts, in *making* the nexus of "conduct," "effect," and "claim" the key to FTAIA. The view that FTAIA must be taken to refer only to defendants' conduct tends to ignore the fact that FTAIA does refer on its face to the conduct's effect giving rise to a claim, which arguably refers to a plaintiff's injury. Congress may well have imported a concept from the Clayton Act in amending the Sherman Act, notwithstanding appellants' **[*351]** and the Second Circuit's assumption of categorical precision on Congress' part.

The Second Circuit's heavy reliance on this argument led to its rather expansive holding to the effect that: "Rather than require that the domestic effect give rise to an injury that would serve as the basis for a Clayton Act action, subsection 2 of the FTAIA only **[**37]** requires that the domestic effect violate the substantive provisions of the

Sherman Act." *Kruman, 284 F.3d at 400*. According to the Second Circuit, "a violation of the Sherman Act is not predicated on the existence of an injury to a plaintiff. In fact, the only civil action that can be brought directly under the Sherman Act is one by the federal government to enforce or prevent a substantive violation of the Sherman Act pursuant to *15 U.S.C. § 4*." *Id. at 399*. The Second Circuit thereby held that violation of the Sherman Act is sufficient to meet the "gives rise to a claim" requirement of subsection 2. In the Second Circuit's view, the words "a claim" in FTAIA mean an action by the government, not a private claim. The Second Circuit justified this view in a footnote, with three arguments: that the definition of the words "a claim" does not exclude this meaning, *id. at 400* (citing BLACK'S LAW DICTIONARY 240 (7th ed. 1999)); that FTAIA's specific reference to "a claim under the provisions of *sections 1 to 7* of this title" means a claim brought *directly* pursuant to the Sherman Act, *id.*; and that Congress has **[**38]** not exclusively used the word "claim" to refer to a private action for damages, *id.* (citing the Federal Trade Commission Act, *15 U.S.C. § 45(a)(3)*, which gives the FTC "the power to enforce the substantive provisions of the FTCA regardless of whether a plaintiff has suffered injury").

While we acknowledge that the words "a claim" do not necessarily exclude a government action, the usual meaning of "a claim" is a private action. Thus, unlike the Second Circuit, we do not think that violation of the Sherman Act is necessarily the same thing as "giving rise to a claim" under it. Furthermore, the concept of "giving rise to a claim" may well be a concept from the Clayton Act, which creates a private cause of action for Sherman Act violations. As noted above, we believe that, in order to satisfy FTAIA, a plaintiff must show that the anticompetitive conduct violates the Sherman Act and that the conduct's U.S. effect gives rise to someone's claim under it. As the Second Circuit itself noted, "the existence of a Sherman Act violation does not depend on whether anyone has actually suffered an injury. Conduct may violate the Sherman Act but not be actionable under *section **[**39]** 4* of the Clayton Act because it did not cause injury." *Kruman, 284 F.3d at 397* (citing *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1419 (7th Cir. 1989))*. "The 'mere presence' of a per se violation under Sherman Act *§ 1* 'does not by itself bestow on any plaintiff a private right of action for damages,' which is a 'gift of *section 4* of the Clayton Act.'" II AREEDA & HOVENKAMP, *supra*, § 337c, at 313 (quoting *Indiana Grocery, 864 F.2d at 1419*). And "while actual injury is required to seek treble damages under *section 4* of the Clayton Act, *15 U.S.C. § 15*, a plaintiff may bring an antitrust action seeking prospective injunctive relief under *section 16* of the Clayton Act for conduct violating the Sherman Act without suffering an actual injury." *Kruman, 284 F.3d at 397* (citing *15 U.S.C. § 26*; *McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 243, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980)*; *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969))*. But the **[**40]** Sherman Act may be enforced by the government even when no private plaintiff claims actual or threatened injury. *See* *15 U.S.C. § 4* ("The several **[*352]** district courts of the United States are invested with jurisdiction to prevent and restrain violations of *sections 1 to 7* of this title; and it shall be the duty of the several United States attorneys … to institute proceedings in equity to prevent and restrain such violations.").

HN10[] We hold that the words "a claim" in subsection 2 of FTAIA refer to a private action, not merely a government action to enforce the Sherman Act. In other words, "giving rise to a claim" means giving rise to someone's private claim for damages or equitable relief. To satisfy this requirement, the plaintiff must allege that some private person or entity has suffered actual or threatened injury as a result of the U.S. effect of the defendant's violation of the Sherman Act. In the instant case, the conspiracy's U.S. effects did allegedly injure and did give rise to the claim of some private entities - namely the domestic plaintiffs who filed suit along with the foreign plaintiffs against the vitamin companies.

4. Legislative History

Both appellants **[**41]** and appellees argue that FTAIA's legislative history supports their respective readings of the statute. Parts of the report from the House Committee that drafted FTAIA suggest that plaintiffs injured by the U.S. effects of the anticompetitive conduct may sue, which of course is consistent with the restrictive view of FTAIA's jurisdictional reach. However, there is much in the legislative history to suggest that foreign plaintiffs injured solely by the foreign effects of the anticompetitive conduct may sue, so long as the conduct also harms U.S. commerce. This legislative history supports the less restrictive view of FTAIA's jurisdictional reach, consistent with the position advanced by appellants and endorsed by the Second Circuit. What is most noteworthy is that the presence of legislative history that is consistent with the restrictive view does not (when read in context) denigrate or exclude the less restrictive view, whereas the less restrictive view includes within it the view that plaintiffs harmed by the U.S. effects can sue. This leads us to conclude that the legislative history as a whole supports the less restrictive interpretation of FTAIA that would allow plaintiffs injured **[**42]** by the conduct's foreign effects to bring suit even where the conduct's U.S. effects do not give rise to the plaintiff's claim.

Appellees argue that the following passage from the House Report demonstrates that Congress intended for the Sherman Act to apply only in cases where the plaintiff's injury arose from anticompetitive effect on U.S. commerce:

> The Committee did not believe that the bill reported by the Subcommittee was intended to confer jurisdiction on injured foreign persons when that injury arose from conduct with no anticompetitive effects in the domestic marketplace. Consistent with this conclusion, the full Committee added language … to require that the "effect" providing the jurisdictional nexus must also be the basis for the injury alleged under the antitrust laws. This does not, however, mean that the impact of the illegal conduct must be experienced by the injured party within the United States…. It is **[*353]** sufficient that the conduct providing the basis of the claim has had the requisite impact on the domestic or import commerce of the United States….

H.R. REP. NO. 97-686, at 11-12. This passage states that the U.S. "'effect' providing the jurisdictional **[**43]** nexus must also be the basis for the injury alleged under the antitrust laws," which is consistent with appellees' restrictive view that the plaintiffs' injury must arise from the conduct's U.S. effect. However, the sentences that immediately follow make clear that "it is sufficient that the conduct providing the basis of the claim has had the requisite impact on" U.S. commerce, which supports appellants' broader view of the statute's "gives rise to a claim" requirement. Indeed, the "this does not, however, mean that the impact of the illegal conduct must be experienced by the injured party within the United States" language, which follows immediately after the discussion of the restrictive view, strongly suggests that Congress did not intend to exclude the less restrictive basis for subject matter jurisdiction under FTAIA.

Under the heading "Imports and Purely Foreign Transactions," the House Report states:

> A transaction between two foreign firms, even if American-owned, should not, merely by virtue of the American ownership, come within the reach of our antitrust laws…. There should be no American antitrust jurisdiction absent a direct, substantial and reasonably foreseeable **[**44]** effect on domestic commerce or a domestic competitor…. It is thus clear that wholly foreign transactions as well as export transactions are covered by the [FTAIA], but that import transactions are not.

Id. at 9-10. This passage also suggests that the restrictive view of the statute does not exclude the less restrictive interpretation. On the one hand, the antitrust laws do not extend to "wholly foreign transactions," such as a transaction between two foreign firms. On the other hand, when the passage is read as a whole, this restriction seems to be contemplated only where there is no "direct, substantial and reasonably foreseeable effect on domestic commerce." This implies that where there *is* such an effect, jurisdiction over foreign transactions is proper. This surely does not support appellees' view of the statute.

Parts of FTAIA's legislative history plainly support the broader view of the statute. For example, the House Report states that

> the domestic "effect" that may serve as the predicate for antitrust jurisdiction … must be of the type that the antitrust laws prohibit…. For example, a plaintiff would not be able to establish United States **[**45]** antitrust jurisdiction merely by proving a *beneficial* effect within the United States, such as increased profitability of some other company or increased domestic employment, when the plaintiff's damage claim is based on an extraterritorial effect on him of a different kind.

H.R. REP. NO. 97-686, at 11. The focus here seems to be on whether the conduct's domestic effect violates the antitrust laws, rather than on whether the conduct's domestic effect gives rise to the plaintiff's claim. This passage suggests that the plaintiff need only allege that the defendant's conduct actually had an effect on the domestic market and that such effect violated the antitrust laws. But more tellingly, in the course of explaining that a plaintiff whose "damage claim is based on an extraterritorial effect" cannot establish jurisdiction where the conduct has a "*beneficial* effect within the United States," the passage implicitly assumes that a plaintiff whose claim is based on a foreign effect *can* establish jurisdiction where the conduct has a *harmful* effect within the United States. This example addresses the situation in which the same conduct has both domestic and foreign effects, **[**46]** and clearly assumes that the plaintiff's claim does not arise from the conduct's U.S. effect. It specifies that the hypothetical beneficial U.S. effect could be "increased profitability of some other company or increased domestic employment," which obviously could not give rise to a claim under the antitrust laws. But significantly, this example does not assume that the fact that the claim arises from something other than **[*354]** the U.S. effect precludes subject matter jurisdiction. Rather, it is clearly the fact of the U.S. effect being beneficial - and therefore the absence of harmful effect under the "effect" prong - that would render jurisdiction improper. This passage thus suggests that the plaintiff can invoke jurisdiction where the anticompetitive conduct's U.S. effect does not give rise to the plaintiff's claim, as long as the conduct has a harmful, not beneficial, effect on U.S. commerce.

In another passage, the House Report states:

> Any major activities of an international cartel would likely have the requisite impact on United States commerce to trigger United States subject matter jurisdiction. For example, if a domestic export cartel were so strong as to have a "spillover" **[**47]** effect on commerce within this country - by creating a world-wide shortage or artificially inflated world-wide price that had the effect of raising domestic prices - the cartel's conduct would fall within the reach of our antitrust laws. Such an impact would, at least over time, meet the test of a direct, substantial and reasonably foreseeable effect on domestic commerce.

H.R. REP. NO. 97-686, at 13. This suggests that Congress intended for subject matter jurisdiction to exist over the conduct of an international cartel that had an effect on domestic commerce, even if the plaintiff's claim does not arise from that domestic effect. Again, the focus for subject matter jurisdiction purposes here is on whether the defendant's conduct has "the requisite impact on United States commerce," rather than whether the plaintiff in particular was injured by that impact. This passage's example of a domestic export cartel, which presumably directs its anticompetitive conduct to foreign markets, but whose conduct also has a "'spillover' effect on commerce within this country" exemplifies this point, because such a cartel's conduct would give rise to claims by foreign and domestic plaintiffs. **[**48]** In understanding the conduct of such a cartel to be likely to "fall within the reach of our antitrust laws," nothing in this passage restricts that reach to suits *only* by the domestic plaintiffs injured by the conduct's spillover effects. Admittedly, nothing in this passage explicitly allows suits by plaintiffs injured abroad by a "world-wide shortage or artificially inflated world-wide price" rather than by the domestic spillover effects. But we think that given the clear concern here with the *conduct* that creates the world-wide shortage or price inflation that in turn creates domestic spillover effects, it would be counter-intuitive and arbitrary to read Congress to intend to limit jurisdiction to only the subset of claims brought by plaintiffs injured by the spillover effects of the conduct at issue. Since the same conduct injures both foreign plaintiffs and domestic plaintiffs, and it is clearly the conduct that Congress aims to reach with our antitrust laws, it is reasonable to read Congress as envisioning suits by any plaintiffs who would enable our antitrust laws to reach and deter that conduct.

The House Report makes this point explicit:

> The intent of the Sherman **[**49]** and FTC Act amendments in H.R. 5235 is to exempt from the antitrust laws *conduct* that does not have the requisite domestic effects. This test, however, does not exclude all persons injured abroad from recovering under the antitrust laws of the United States. A course of conduct in the United States - *e.g.*, price fixing not limited to the export market - would affect all purchasers of the target products or services, whether the purchaser is foreign or domestic. The *conduct* has requisite effects within the United States, even if some purchasers take title abroad or suffer economic injury abroad. *Cf., e.g.*, *Pfizer Inc., et al. v.* ***[*355]*** *Government of India, et al., 434 U.S. 308, 54 L. Ed. 2d 563, 98 S. Ct. 584 (1978)*. Foreign purchasers should enjoy the protection of our antitrust laws in the domestic marketplace, just as our citizens do.

Id. at 10. Explicitly envisioning recovery for plaintiffs who "suffer economic injury abroad," this passage seems to support appellants' less restrictive reading of the statute. But appellees point out that this passage, which seems to allow recovery by foreign plaintiffs injured abroad as long as the conduct has **[**50]** the "requisite domestic effects," also expressly states that "foreign purchasers should enjoy the protection of our antitrust laws in the *domestic* marketplace" (emphasis added). This sentence suggests that foreign plaintiffs can sue under the antitrust laws for injury suffered in the domestic market. Arguably, this statement lends some support to appellees' restrictive view of the statute, but not much.

In sum, there is much in the legislative history that supports the *less restrictive view* of FTAIA's jurisdictional reach. There are isolated statements that are consistent with the restrictive view, but they are never offered to denigrate or exclude the less restrictive view of the statute. This is telling, we think, for if Congress intended to reject the less restrictive view of FTAIA's jurisdictional reach, there was absolutely no reason to discuss this possible basis for subject matter jurisdiction along with the restrictive view. We therefore conclude that the less restrictive view of jurisdiction is consistent with a literal interpretation of *§ 6a(2)*, and this interpretation is perfectly consistent with the legislative history.

5. Deterrence

The Supreme Court's **[**51]** decision in *Pfizer, Inc. v. Government of India, 434 U.S. 308, 54 L. Ed. 2d 563, 98 S. Ct. 584 (1978)*, which was issued before Congress enacted FTAIA, is cited approvingly in the legislative history to FTAIA. *See* H.R. REP. NO. 97-686, at 10. *Pfizer* therefore may offer some clues as to Congress' intent in enacting FTAIA.

In *Pfizer*, the Supreme Court articulated policy reasons for holding that a foreign plaintiff was entitled to sue for treble damages under the antitrust laws to the same extent as any other plaintiff. Noting that one purpose of *§ 4* of the Clayton Act is "to deter violators and deprive them of 'the fruits of their illegality,'" the Supreme Court reasoned that denying a foreign plaintiff injured by an antitrust violation the right to sue "would permit a price fixer or a monopolist to escape full liability for his illegal actions" and "would lessen the deterrent effect" of the antitrust laws. *See* *Pfizer, 434 U.S. at 314-15* (citations omitted). Moreover,

> if foreign plaintiffs were not permitted to seek a remedy for their antitrust injuries, persons doing business both in this country and abroad might be tempted to enter **[**52]** into anticompetitive conspiracies affecting American consumers in the expectation that the illegal profits they could safely extort abroad would offset any liability to plaintiffs at home. If, on the other hand, potential antitrust violators must take into account the full costs of their conduct, American consumers are benefitted by the maximum deterrent effect of treble damages upon all potential violators.

Id. at 315.

On this deterrence logic, the Second Circuit in *Kruman* refuted the view that suits by domestic plaintiffs injured by a global conspiracy's domestic effects could adequately enforce our antitrust laws. The Second Circuit noted that, when a foreign anticompetitive scheme enhances the success of a domestic scheme, the perpetrator would have a greater incentive to pursue **[*356]** the global scheme, which would ultimately harm U.S. consumers if a plaintiff harmed only by the foreign effect of a global scheme had no U.S. remedy. *See* *Kruman, 284 F.3d at 403* (citing *Pfizer, 434 U.S. at 313-15*). Judge Patrick Higginbotham's dissent in *Den Norske* similarly emphasized that allowing foreign plaintiffs to sue would protect **[**53]** U.S. consumers by deterring perpetrators from engaging in global conspiracies that harm U.S. markets. *See* *Den Norske, 241 F.3d at 435* (Higginbotham, J., dissenting). Judge Higginbotham, following *Pfizer*, reasoned that a global price-fixing scheme could sustain monopoly prices in the United States even in the face of domestic liability, since the profits from abroad would subsidize the U.S. operations. "Unless persons injured by the conspiracy's effects on foreign commerce could also bring antitrust suits against the conspiracy, the conspiracy could remain profitable and undeterred." *Id.*

We find this deterrence reasoning, drawn from *Pfizer*, and amplified in Judge Higginbotham's opinion in *Den Norske*, most compelling. The less restrictive interpretation of the "gives rise to a claim" language of FTAIA, allowing suits by foreign plaintiffs injured by the foreign effects of a global conspiracy, serves "the United States' narrow interest in vigorous domestic competition" better than the restrictive interpretation disallowing such suits. *Id.*

at 438-39. *Pfizer*'s concern was that denying a foreign plaintiff injured by an antitrust violation **[**54]** a remedy under our antitrust laws would permit a price fixer to escape full liability for his conduct, which would lessen the deterrent effect of the antitrust laws. This concern applies squarely to this case. Disallowing suits by foreign purchasers injured by a global conspiracy because they themselves were not injured by the conspiracy's U.S. effects runs the risk of inadequately deterring global conspiracies that harm U.S. commerce. Suits only by those injured by the U.S. effects of a conspiracy may not provide sufficient deterrence; a conspirator could expect that illegal profits abroad would offset his liability in the U.S., leaving the conspirator with an incentive to engage in global conspiracy. Allowing suits by those injured solely in foreign commerce, where the anticompetitive conduct also harmed U.S. commerce, forces the conspirator to internalize the full costs of his anticompetitive conduct.

Even assuming, *arguendo,* that the antitrust laws are only intended to protect selfish national interests, suits by foreign purchasers harmed solely by a conspiracy's foreign effects are necessary to protect U.S. commerce from global conspiracies. This reasoning is also supported **[**55]** by FTAIA's legislative history, which notes: "As the Supreme Court pointed out in *Pfizer*, … to deny foreigners a recovery could under some circumstances so limit the deterrent effect of United States ***antitrust law*** that defendants would continue to violate our laws, willingly risking the smaller amount of damages payable only to injured domestic persons." H.R. REP. NO. 97-686, at 10.

We are persuaded that, if foreign plaintiffs could not enforce the antitrust laws with respect to the foreign effects of anticompetitive behavior, global conspiracy would be underdeterred, since the perpetrator might well retain the benefits that the conspiracy accrued abroad. There would be an incentive to engage in global conspiracies, because, even if the conspirator has to disgorge his U.S. profits in suits by domestic plaintiffs, he would very possibly retain his foreign profits, which may make up for his U.S. liability. In any case, the profitability of the global conspiracy would depend on the uncertainties of foreign antitrust enforcement. The U.S. consumer would only gain, and would not lose, **[*357]** by enlisting enforcement by those harmed by the foreign effects of a global conspiracy. We think **[**56]** that *Pfizer* supports this view and that the citation to *Pfizer* in the legislative history of FTAIA suggests that Congress meant to endorse it as well.

6. Conclusion on Subject Matter Jurisdiction

On the basis of the foregoing, we conclude that the less restrictive view of FTAIA's jurisdictional reach, allowing subject matter jurisdiction in this case, is what Congress meant to achieve. The District Court erred in dismissing the foreign plaintiffs' federal antitrust claims for lack of subject matter jurisdiction, since under the less restrictive interpretation, the foreign plaintiffs can establish that the global conspiracy's "direct, substantial, and reasonably foreseeable effect" on domestic commerce "gives rise to a claim" under the antitrust laws.

B. Standing

Appellees contend that, even if subject matter jurisdiction is proper, the case should nonetheless be dismissed because the foreign purchasers lack standing. Because the District Court concluded that it lacked subject matter jurisdiction over the foreign plaintiffs' claims, it declined to address the standing issue. Although the District Court did not rule on the issue, it was fully presented below, **[**57]** as well as before this court. Appellants ask this court to remand the case so that the District Court may examine the issue in the first instance, or alternatively, to find that they have standing.

While the District Court's failure to rule on the issue of standing "might be thought to warrant a remand, so that the district court [may] consider the matter in the first instance, the Supreme Court has instructed ***HN11***[] the courts of appeals to decide for themselves whether the party seeking judicial review has standing, even if the issue was not decided below…." *Found. on* *Econ. Trends v. Lyng, 291 U.S. App. D.C. 365, 943 F.2d 79, 82 (D.C. Cir. 1991)* (citing *FW/PBS, Inc. v. City of Dallas, 493 U.S. 215, 107 L. Ed. 2d 603, 110 S. Ct. 596 (1990))*. We are thus "required to address the issue [of standing] even if the courts below have not passed on it…." *FW/PBS, 493 U.S. at 230* (citing *Jenkins v. McKeithen, 395 U.S. 411, 421, 23 L. Ed. 2d 404, 89 S. Ct. 1843 (1969))*. "Every federal appellate court has a special obligation to 'satisfy itself not only of its own jurisdiction, but also that of the lower courts in a cause under **[**58]** review'…." _FW/PBS, 493 U.S. at 231_ (citing _Bender v. Williamsport Area Sch. Dist., 475 U.S. 534, 541, 89 L. Ed. 2d 501, 106 S. Ct. 1326 (1986)_ (citing _Mitchell v. Maurer, 293 U.S. 237, 244, 79 L. Ed. 338, 55 S. Ct. 162 (1934)))_.

_HN12_[] To meet the constitutional requirements of standing under the Clayton Act, an antitrust plaintiff must establish "injury-in-fact or threatened injury-in-fact caused by the defendant's alleged wrongdoing." _Andrx Pharms., Inc. v. Biovail Corp. Int'l, 347 U.S. App. D.C. 178, 256 F.3d 799, 806 (D.C. Cir. 2001)_ (citing _Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983))_. The foreign purchasers have constitutional standing. They allege that they suffered injury-in-fact when they paid inflated prices for vitamins directly to the defendants. This injury was allegedly caused by defendants' conspiracy to fix vitamin prices around the world. There is no dispute that the foreign plaintiffs in this case have been injured by paying inflated prices for vitamins.

In addition, **_HN13_**[] an antitrust plaintiff must **[**59]** establish "antitrust injury," that is, "'injury of the type the antitrust laws were intended to prevent and that flows from **[*358]** that which makes defendants' acts unlawful." _Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)_ (quoting _Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977))_. Appellees argue that the plaintiffs' injuries "are not 'injury of the type the antitrust laws were intended to prevent,' because those laws do not forbid the fixing of prices in the markets in which Plaintiffs purchased vitamins, but only in U.S. commerce." Appellees' Br. 42 (citation omitted). We disagree.

In this case, plaintiffs allege that the defendants engaged in a global conspiracy that had an effect on U.S. and foreign commerce. **_HN14_**[] The antitrust laws do not merely forbid price-fixing in U.S. commerce, but rather forbid price-fixing that harms U.S. commerce. _See, e.g._, _Laker Airways, 731 F.2d at 922_ ("It has long been settled law that a country can regulate conduct occurring outside its territory which causes harmful results within its territory. **[**60]** "); _Alcoa_, 148 F.2d at 443-44; _cf._ _Pfizer, 434 U.S. at 314_ ("The fact that Congress' foremost concern in passing the antitrust laws was the protection of Americans does not mean that it intended to deny foreigners a remedy when they are injured by antitrust violations."). Thus, the antitrust laws forbid the fixing of prices in foreign markets where that conduct harms U.S. commerce. Where defendants' global conspiracy harms U.S. commerce, the mere fact that the foreign purchasers bought vitamins solely in foreign markets does not mean that the foreign purchasers lack standing to sue.

In _Brunswick_, the Supreme Court explained that, **_HN15_**[] to establish "antitrust injury," the injury should be "'the type of loss that the claimed violations'" of the Sherman Act "'would be likely to cause.'" _Brunswick, 429 U.S. at 489_ (quoting _Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 125, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969))_. The foreign purchasers of vitamins here were injured by conduct that violated the Sherman Act - a global price-fixing conspiracy. The foreign plaintiffs' paying of inflated prices in foreign commerce **[**61]** was loss of the type that violation of the Sherman Act would be likely to cause. Moreover, the arguments that have already persuaded us that, where anticompetitive conduct harms domestic commerce, FTAIA allows foreign plaintiffs injured by anticompetitive conduct to sue to enforce the antitrust laws similarly persuade us that the antitrust laws intended to prevent the harm that the foreign plaintiffs suffered here. The foreign purchasers' injury therefore must be deemed to be "of the type that the antitrust laws were intended to prevent and that flows from that which makes the defendant's conduct unlawful." _Brunswick, 429 U.S. at 489_. Appellants can therefore establish "antitrust injury."

In addition, **_HN16_**[] we must consider the following additional _Associated General Contractors_ factors to determine whether appellants are "proper plaintiffs": "the directness of the injury, whether the claim for damages is 'speculative,' the existence of more direct victims, the potential for duplicative recovery and the complexity of apportioning damages." _Andrx Pharms., 256 F.3d at 806_ (citing _Associated Gen. Contractors, 459 U.S. at 542-45_). The foreign **[**62]** plaintiffs allegedly purchased vitamins at inflated prices directly from the defendants, and their injury arose from defendants' alleged conspiracy to inflate prices. The injury is direct and the claim for damages is not speculative. Allowing the foreign plaintiffs to sue does not risk duplicative recovery or complex damage apportionment.

[*359] Appellees finally argue that "there is a large body of 'more appropriate plaintiffs,'" namely the "hundreds of U.S. plaintiffs, as well as a class of domestic purchasers," who have sued the defendants. Appellees' Br. 44. But these domestic plaintiffs have not been harmed more directly by the foreign effects of the conspiracy than the foreign purchasers, and appellees do not suggest that the domestic plaintiffs can seek to recover for the same injury that the foreign plaintiffs suffered. The domestic plaintiffs are not more direct victims of defendants' conduct than the foreign plaintiffs, since the foreign plaintiffs have been injured just as directly as the domestic plaintiffs as a result of the defendants' conduct. Furthermore, for the reasons already explained, the foreign plaintiffs play an important role in the deterrence of the global conspiracy, **[**63]** a role that cannot be filled adequately by the domestic plaintiffs alone. Therefore, the foreign plaintiffs are proper plaintiffs to bring suit in this case.

We conclude that the foreign plaintiffs in this case have standing to bring their federal antitrust claims.

C. Supplemental Jurisdiction

Appellants contend that, after the District Court dismissed the foreign plaintiffs' federal antitrust claims for lack of subject matter jurisdiction, it erred in declining to exercise supplemental jurisdiction over the foreign plaintiffs' foreign law claims pursuant to *28 U.S.C. § 1367*. Appellants argue that "the district court has original subject matter jurisdiction over the claims of the domestic plaintiffs under the Sherman Act, and consequently, should have exercised supplemental jurisdiction over the claims of the foreign plaintiffs." Appellants' Br. 27-28.

HN17[] This court reviews the District Court's decision not to exercise supplemental jurisdiction for abuse of discretion. *See* *Diven v. Amalgamated Transit Union Int'l & Local 689, 309 U.S. App. D.C. 23, 38 F.3d 598, 601 (D.C. Cir. 1994)*. *28 U.S.C. § 1367* provides **[**64]** that, ***HN18***[] "in any civil action of which the district courts have original jurisdiction, the district courts shall have supplemental jurisdiction over all other claims that are so related to claims in the action within such original jurisdiction that they form part of the same case or controversy under Article III." *28 U.S.C. § 1367*. ***HN19***[] Under *28 U.S.C. § 1367*, "the District Court has supplemental jurisdiction over related claims when it has original jurisdiction over the initial claim." *Harris v. Sec'y, U.S. Dep't of Veterans Affairs, 326 U.S. App. D.C. 362, 126 F.3d 339, 346 (D.C. Cir. 1997)*. "When the District Court has dismissed claims properly before it, it retains discretion to decide whether or not to dismiss other claims as to which it may exercise supplemental jurisdiction." *Id.* The District Court "may decline to exercise supplemental jurisdiction over a claim" if, for example, "the district court has dismissed all claims over which it has original jurisdiction." *28 U.S.C. § 1367(c)(3)*. But "if the district court dismissed the underlying claim on jurisdictional grounds, then it could not exercise supplemental jurisdiction. **[**65]** " *Saksenasingh v. Sec'y of Educ., 326 U.S. App. D.C. 370, 126 F.3d 347, 351 (D.C. Cir. 1997)*.

When the District Court dismissed the foreign plaintiffs' underlying federal antitrust claim on jurisdictional grounds, it had no discretion to exercise supplemental jurisdiction at all over the foreign plaintiffs' foreign law claims. Appellants' assumption that the District Court's remaining jurisdiction over the *domestic* plaintiffs' claims can serve as the basis of supplemental jurisdiction over the foreign plaintiffs' foreign law claims is implausible, and appellants cite no cases to support this assumption. When the District Court dismissed the foreign plaintiffs' claims on jurisdictional grounds, the remaining original jurisdiction over the domestic plaintiffs' claims was irrelevant to **[*360]** the exercise of supplemental jurisdiction over the foreign plaintiffs' foreign law claims. The dismissal of the foreign plaintiffs' federal antitrust claims on jurisdictional grounds precluded the District Court from exercising supplemental jurisdiction over any of the foreign plaintiffs' additional claims over which the court did not have original jurisdiction.

We recognize that the District Court has already **[**66]** articulated reasons that counsel against exercising supplemental jurisdiction, such as comity, efficiency, and the novelty and complexity of the issues of foreign law involved. The posture of the case has now changed, however, because we reverse the District Court's decision on subject matter jurisdiction and vacate its judgment against appellants. On remand, the District Court will have original jurisdiction over the foreign plaintiffs' federal antitrust claims. Therefore, the District Court must consider anew whether to exercise its discretion to accept supplemental jurisdiction over the foreign plaintiffs' foreign law claims. But the District Court still retains discretion to decline to exercise supplemental jurisdiction over the foreign law claims pursuant to *28 U.S.C. § 1367*.

III. CONCLUSION

For the reasons stated above, we reverse the District Court's decision, vacate the judgment against appellants, and remand the case for further proceedings consistent with this opinion.

Dissent by: KAREN LECRAFT HENDERSON

Dissent

KAREN LECRAFT HENDERSON, *Circuit Judge*, dissenting:

I disagree with the majority's interpretation of the Foreign Trade Antitrust Improvements **[**67]** Act (FTAIA), *15 U.S.C. § 6a*, and, consequently, with its disposition of this appeal. [1] The majority decides whether a court has jurisdiction over claims asserted by a plaintiff in one action by reference to a hypothetical claim another party could, perhaps, raise in some other proceeding. This seems a peculiar notion. The more natural reading of the statutory language, I believe, is the narrower one adopted by the district court below and by the Fifth Circuit in *Den Norske Stats Oljeselskap AS v. HeereMac VOF, 241 F.3d 420 (5th Cir. 2001)*, under which the phrase "gives rise to a claim" refers to the claim advanced by the plaintiff in the action before the court. This reading, to me, reflects the Congress's "unambiguously expressed intent" under *Chevron USA Inc. v. Natural Resources Defense Council, Inc., 467 U.S. 837, 842-43, 81 L. Ed. 2d 694, 104 S. Ct. 2778 (1984)*. It is also consistent with the legislative history that the majority cites.

[68]** The Fifth Circuit's narrower construction is unambiguously supported by the House Report's declaration that "the 'effect' providing the jurisdictional nexus must also be the basis *for the injury alleged* under the antitrust laws." H.R. Rep. 97-686, at 11-12 (emphasis added); *see* maj. op. at 23-24. The plain meaning of this statement is not undercut, as the majority contends, by the two sentences that follow; they simply explain that, so long as "the basis of the claim has had the requisite impact on the domestic or import commerce of the United States," [2] the claim does not fail simply **[*361]** because "the impact of the illegal conduct" is not "experienced by the injured party within the United States." H.R. Rep. No. 97-686, at 12; *see* maj. op. at 24. Another excerpt the majority quotes similarly explains that "foreign purchasers should enjoy the protection of our antitrust laws in the *domestic* marketplace, just as our citizens do" so long as "the conduct has the requisite effects within the United States, even if some purchasers *take title* abroad or *suffer economic injury* abroad." *See* H.R. Rep. No. 97-686, at 10 (quoted in maj. op. at 27) (emphasis added). Taken **[**69]** together, these two excerpts make clear that neither the situs of the injury nor the nationality of the claimant is jurisdictionally dispositive so long as there is a sufficient domestic impact or effect to satisfy subsection (1) of the FTAIA. Neither excerpt purports to eliminate the requirement in subsection (2) that such domestic impact give rise to the claimed injury wherever and by whomever felt. Other of the majority's citations likewise relate to the first prong of the jurisdictional test, in subsection (1), and so are of no assistance in construing the second prong of the test set out in subsection (2). *See* maj. op. at 24-26 (quoting H.R. Rep. No. 97-686, at 9-10, 11, 13). Finally, the Report expressly relies, as the majority observes, on the United States Supreme Court's decision in *Pfizer v. Government of India, 434 U.S. 308, 54 L. Ed. 2d 563, 98 S. Ct. 584 (1978)*, but only for the broad proposition that "to deny foreigners a recovery could *under some circumstances* so limit the deterrent effect of United States ***antitrust law*** that defendants would continue to violate our laws, willingly risking the smaller

---

[1] I nonetheless agree with the majority's determination that the district court lacked discretion to exercise supplemental jurisdiction once it had dismissed all of the appellants' claims under United States law. *See* maj. op. at 34-36.

[2] Notably, the word "claim" in the quoted language refers to the specific claim asserted by the injured party.

amount of damages payable only to injured **[**70]** domestic persons." H.R. Rep. No. 97-686, at 10 (quoted in maj. op. at 30) (emphasis added). The Report does not suggest the deterrence policy discussed in *Pfizer* justifies expanding jurisdiction beyond the limits expressed in subsection (2) of the FTAIA.

Finally, I believe that our decision in *Caribbean Broadcasting Sys., Ltd. v. Cable & Wireless PLC, 331 U.S. App. D.C. 226, 148 F.3d 1080 (D.C. Cir. 1998)*, cannot be construed to support the majority's interpretation of the FTAIA. As a textual matter, the court in *Caribbean* addressed only subsection (1) of the FTAIA, with nary a mention of subsection (2). Even were we to presume that the court *sub silentio* considered the second prong of the jurisdictional test, the plaintiffs' allegations plainly show that, notwithstanding the majority's contrary assertion, *see* maj. op. at 14, the alleged domestic effect did in fact give **[**71]** rise to the foreign plaintiff's anti-trust claim. In *Caribbean Broadcasting* the court found the foreign plaintiff had adequately alleged that (1) the defendants engaged in "anticompetitive conduct"--"namely, that the defendants made fraudulent misrepresentations to advertisers and sham objections to a government licensing agency in order to protect their monopoly" over FM radio advertising in "the market for English-language radio broadcast advertising in the Eastern Caribbean"; (2) "U.S. customers in the relevant market suffered antitrust injury, to wit, they paid excessive prices for advertising because of the unlawful actions of [the defendants]"; and (3) the foreign plaintiff "was and remains foreclosed from selling advertising to many of those U.S. companies that had purchased advertising time from [the defendant radio broadcaster]." *148 F.3d at 1087*. Thus it is clear that the defendants' fraudulent anticompetitive conduct had the effect of causing U.S. companies to advertise only with the defendants and that this effect gave rise to the foreign plaintiff's claim for lost customers.

In sum, because I believe that the plain language in subsection (2) of the **[**72]** FTAIA **[*362]** expressly limits jurisdiction to a claim which itself arises from the domestic antitrust effect required under subsection (1) of the statute, I respectfully dissent.

Opinion by: OWEN M. PANNER

Opinion

PANNER, J.

Plaintiffs Confederated Tribes of Siletz Indians of Oregon, Smokey Point Hardwoods, Inc., and Ross-Simmons Hardwood Lumber Co., bring this antitrust action against Defendant Weyerhaeuser Company. The Third Amended Complaint alleges that "Plaintiffs are the owners and operators **[*3]** of three alder sawmills in Oregon and Washington that were forced out of business in 1998-2001 as a result of defendant's illegal anti-competitive actions." Plaintiffs seek a total of $ 36.6 million in compensatory damages, before trebling, plus attorney fees and costs.

Defendant has moved for summary judgment. Also pending are Defendant's Motion to Exclude Plaintiffs' Experts' Testimony, and Defendant's Motion to Strike Plaintiffs' New Expert Testimony. Defendant's reply brief also requests that certain of Plaintiffs' exhibits be stricken. All of the foregoing motions are denied.

Defendant's Motions to Exclude and to Strike

1. Defendant's Motion to Exclude (Rasmussen, Tedder, and Zerbe)

This motion seeks to exclude the testimony of Plaintiffs' expert witnesses on Daubert, grounds. *Rule 702* provides that:

> If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education, may testify thereto in the form of an opinion or otherwise, if (1) the testimony is based upon sufficient facts or data, (2) the testimony is the product **[*4]** of reliable principles and methods, and (3) the witness has applied the principles and methods reliably to the facts of the case.

Defendant argues that economists Mark Rasmussen, Dr. Philip Tedder, and Dr. Richard Zerbe failed to use what Defendant believes to be the only proper methodology for defining the relevant market and showing that the Defendant possesses monopoly power. Although the Supreme Court has expanded Daubert to other expert fields, this does not appear to be what the Court had in mind when it authorized the trial courts to exclude "junk science." Rather, Defendant is arguing the merits of this antitrust case under the cloak of a Daubert motion. In deciding whether to grant summary judgment, this court is free to look beyond the expert's bottom-line conclusions. See *Rebel Oil Co., Inc. v. Atlantic Richfield Co., 51 F.3d 1421, 1435-36 (9th Cir. 1995)*. If the expert opinions fail to establish the essential elements of Plaintiffs' case, then the remedy would be to grant summary judgment, not to exclude those opinions as "unreliable."

2. Defendant's Motion to Exclude (Nelson)

Defendant moves to exclude the expert opinion of William Nelson on the ground he is unqualified to **[*5]** offer an opinion because he is not an economist by training. Nelson has over 25 years of experience managing alder sawmills in the Pacific Northwest. Knowledge of the local lumber market, the suppliers, their purchasing practices, historical prices, plus an understanding of the reasons why customers purchase alder (rather than some other hardwood) for a particular application, are all useful in defining the relevant market and understanding whether Weyerhaeuser possesses, or has attempted to acquire, monopoly power.

Defendant also contends this opinion should be excluded because Nelson failed to fully disclose the "methodology" underlying his conclusions, or provide the "quantitive data supporting that opinion." Instead of books and academic theories, Nelson based his opinion upon his extensive personal experience and knowledge of the timber market in this region. Under the circumstances of this case, that does not justify excluding his opinion. Cf. *Lucas Automotive Eng'g, Inc. v. Bridgestone/Firestone, Inc., 275 F.3d 762, 768 n.3 (9th Cir. 2001)*. The opinion of an expert derived from real world experience can be as valid as the opinion of an economist whose only knowledge of a sawmill **[*6]** comes from reading National Geographic. [1] Defendant may cross-examine Nelson and offer its own expert opinions. The jury will decide how much weight to give to their respective conclusions.

3. Defendant's Motion to Strike New Expert Testimony (Rasmussen, Zerbe, and Ehinger)

After Defendant moved to strike Plaintiffs' expert testimony because the experts did not analyze the data in the manner that Defendant contends is legally required, Plaintiffs instructed their experts to perform the analysis that Defendant said was missing. Defendant now moves to strike the expert affidavits of Rasmussen and Zerbe on the ground that these additional conclusions were not disclosed to Defendant until November 12, 2002. Defendant argues that any expert studies had to be completed by October 24, 2002, when expert discovery closed.

I deny the motion. The supplemental expert testimony was generated in direct response to Defendant's attack upon the original expert reports. Plaintiffs first learned **[*7]** of Defendant's contentions after the discovery deadline, and acted promptly to remedy the alleged deficiency. Some courts have granted a motion to strike in similar circumstances, reasoning that a Plaintiff may not wait until the Defendant files for summary judgment, and points to the holes in the Plaintiff's case, before belatedly plugging those holes with a new expert opinion. However, that rationale places undo emphasis on law as a contest of skill between rival lawyers, at the expense of doing justice. At this stage of the proceedings, if there is sufficient evidence to support the Plaintiffs' case, I will not exclude that evidence simply because Plaintiffs failed to anticipate the need for it until the defect was pointed out by their opponent. The court is not grading a law school moot court exercise. Nor is this a situation in, which the Plaintiff has completely changed the version of events he told at deposition in order to forestall defeat, *i.e.*, a "sham" affidavit. Finally, trial is not until April 2003, so there is little risk of unfair prejudice.

Defendant also moves to strike the expert testimony of Paul Ehinger, on the ground his report was not disclosed until November **[*8]** 11, 2002, and because it allegedly addresses a "new" issue. Plaintiffs counter that this report simply responds to Defendant's motion for summary judgment, which asserts that Plaintiffs cannot show significant barriers to entry of the relevant market, which is an essential element of their antitrust claim.

Plaintiffs should have anticipated the need for testimony on this issue, and not waited until a summary judgment motion was pending before obtaining an expert report that was necessary to establish an essential element of their case. However, I will not preclude Plaintiffs from presenting that evidence now that the deficiency has been called to their attention. In addition, Plaintiffs told Defendant on Oct. 24 that they were in the process of obtaining an expert affidavit from Ehinger, and disclosed the subject matter (though not the substance) of his testimony. Defendant was on notice that Ehinger had been retained and the general scope and purpose of his report.

Given the time remaining until trial (Defendant received this report in early November and the trial is not until April), there is little unfair prejudice in allowing this testimony. Having to go to trial, instead of prevailing **[*9]** on summary judgment, is not unfair prejudice. If Defendant requests, I will allow Defendant to depose any new experts (or on any new opinions) and file any responsive expert disclosure reports.

4. Defendant's Motion (in footnote 11 of its Reply Brief) to Strike Various Documents

Defendant seeks to strike various deposition excerpts because Plaintiffs' counsel neglected to attach the court reporter's certification. That defect can easily be remedied (and, in fact, was cured almost two months before oral

[1] That is a general principle, not a characterization of the particular expert retained by Defendant. Dr. Pozdena's report indicates that he has more than 20 years of experience researching the forest products industry.

argument). Defendant also complains that Plaintiffs didn't cite the specific line numbers of the testimony they rely upon, citing the page numbers instead. Again, the defect (if any) is readily curable.

Next, Defendant seeks to strike evidence concerning conduct that pre-dates the 4-year limitations period. However, evidence of events occurring more than four years prior to-the filing of an antitrust complaint may still be admissible for various purposes, *e.g.*, to establish the wrongful nature and character of the defendant's conduct during the limitations period. See *Reid Brothers Logging Co. v. Ketchikan Pulp Co., 699 F.2d 1292, 1305-06 (9th Cir. 1983)*. Therefore, I deny that request.

Defendant **[*10]** raises other arguments, none of which have merit. All of Defendant's motions to strike and to exclude testimony are denied.

Defendant's Motion for Summary Judgment

Plaintiffs cite a handful of musty cases for the proposition that summary judgment is disfavored in antitrust cases. That is no longer true. The usual summary judgment standards apply. See, e.g., *Geneva Pharmaceuticals Tech. Corp. v. Barr Labs., 201 F. Supp.2d 236, 266 (S.D.N.Y. 2002)* (rejecting identical argument).

The elements of a claim for monopolization under *Section 2* of the Sherman Act are "(1) the possession of monopoly power in the relevant market, and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. "Monopoly power" is "the power to control prices or exclude competition" from the relevant market. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. The plaintiff must also show that it suffered a "causal antitrust injury." *Smilecare Dental Group v. Delta Dental Plan of Calif., Inc., 88 F.3d 780, 783 (9th Cir. 1996)*. **[*11]** [2]

A claim for attempted monopolization under *Section 2* of the Sherman Act requires proof of the following: (1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct directed toward accomplishing that purpose; (3) a dangerous probability of successfully achieving market power in the relevant market; and (4) causal antitrust injury. *Id.*

The Third Amended Complaint, simply stated, alleges that the Plaintiffs owned alder sawmills in Oregon and Washington, but did not have their own timber supply (or at least not enough logs to keep their mills running). The plaintiffs had to buy logs on the open market. Weyerhaeuser allegedly took various wrongful actions aimed at tying up the available alder timber, intentionally **[*12]** raising the price that Plaintiffs had to pay for logs, and otherwise preventing the Plaintiffs from obtaining an adequate supply of red alder logs, at a reasonable price, to operate their sawmills. The net effect (and intent) was to destroy competition, leaving Weyerhaeuser with a monopoly in the alder market in this region, able to dictate both the price paid to alder producers for their logs and the price paid by consumers for finished alder lumber.

For purposes of this motion only, Weyerhaeuser concedes that its intentions are a disputed factual question. Assuming the truth of the evidence proffered by Plaintiffs, a jury could find that Defendant has engaged in wrongful conduct aimed at destroying competition, and which might be viewed as economically irrational but for its adverse effect on competition. [3] The record also suggests that the number of non-Weyerhaeuser alder sawmills in this

---

[2] "Causal antitrust injury" means an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Atlantic Richfield v. USA Petroleum, 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. "The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior." *Id. at 344*.

region has declined precipitously in recent years, though the parties dispute the reasons for (and legal significance of) that decline.

Weyerhaeuser's principal argument for summary judgment is that it does not possess a monopoly in the relevant market, properly defined. The relevant market for antitrust purposes is generally defined in terms of the "product market" and "geographic market." "[A] product market is typically defined to include the pool of goods or services that qualify as economic substitutes because they enjoy reasonable interchangeability of use and cross-elasticity of demand." *Thurman Indus., Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1374 (9th Cir. 1989)*. See also *E. I. du Pont de Nemours, 351 U.S. at 394-95* (commodities reasonably interchangeable by consumers for the same purposes constitute the product market). But cf. *Rebel Oil, 51 F.3d at 1436* (court must consider elasticity of supply as well as that of demand).

"Cross-elasticity of demand" between products is "the extent to which consumers will change their consumption of one product in response to a price change in another." *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 469, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. **[*14]** For instance, if consumers would simply shift to Chevrolet cars in the event that Ford cars become too expensive, then the relevant market may be "cars" in a particular price range and not just the universe of "Ford cars." "Cross-elasticity of demand exists if consumers would respond to a slight increase in the price of one product by switching to another product." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 227 (2d Cir. 1999)*.

The "geographic market" is the area of effective competition where buyers can turn for alternate sources of supply. *Morgan, Strand, Wheeler & Biggs v. Radiology, Ltd., 924 F.2d 1484, 1490 (9th Cir. 1991)*. If small changes in the price of a product in one location will cause customers to turn to alternatives available in another location, then these sources are part of the same relevant market.

The definition of the relevant market is, ultimately, a mixed question of fact and law for the jury. See *Forsyth, 114 F.3d at 1476*. Unless the Plaintiffs' market definition is wrong as a matter of law, or unsupported by the record, it is an issue for the jury to decide. *Id. at 1477* (denial of summary judgment proper even though the court thought the **[*15]** defendant's evidence was more persuasive).

Defendant contends the relevant market is all finished hardwood lumber, nationwide (or perhaps even internationally), and that Weyerhaeuser controls just over two percent of this market. Plaintiffs point to two relevant markets: [4] (1) the market for finished alder, lumber, of which Weyerhaeuser allegedly has a 75 percent share, and (2) the market for alder sawlogs in the Pacific Northwest, of which Weyerhaeuse allegedly has a 65 percent share.

Red alder is harvested in commercial quantities **[*16]** almost exclusively in the Pacific Northwest. According to Plaintiffs' experts, sawlogs must be processed soon after cutting, and cannot feasibly be transported long distances or stockpiled indefinitely. There are special sawmills dedicated to producing alder lumber, as opposed to other species. Those mills cannot readily utilize other varieties of timber, nor are sufficient quantities of other hardwood sawlogs available in this region to keep a mill running, and it is not feasible to import sawlogs from other regions even if they were available. Alder is distinct from other hardwoods, both in uses, grading, and pricing. See, e.g., Wheeler Declaration. Defendant's expert disputes many of these assertions, but the court cannot resolve that dispute on summary judgment.

---

[3] I recognize that Defendant has evidence it believes depicts a very different picture of Weyerhaeuser's actions, and the reasons why the Plaintiffs' sawmills are **[*13]** now out of business. However, on a motion for summary judgment the evidence must be viewed in the light most favorable to the non-moving party.

[4] Plaintiffs repeatedly use the term "submarket," as do some Ninth Circuit opinions. See, e.g., *Morgan, Strand, Wheeler & Biggs, 924 F.2d at 1490* ("A submarket exists if it is sufficiently insulated from the larger market so that supply and demand are inelastic with the larger market.") However, the concept of a "submarket" adds little to the analysis. See, e.g., Phillip Areeda, ***ANTITRUST LAW***, P 533 (2d. ed 2002) ("[s]peaking of 'submarkets' merely confuses the issue"). The task is to define the relevant market in a given case, which is a fact-based inquiry. That the relevant market may be defined more narrowly in a given case does not change the ultimate inquiry.

Defendant also relies upon Plaintiff Smokey Point's response to Request for Admission No. 5, [5] but the question was ambiguous. It is unclear whether Smokey Point was admitting that red alder lumber can serve as a substitute for other hardwoods--because of alder's superior qualities--or admitting that other hardwoods can readily replace alder. In addition, there are varying degrees of substitutability. See Pozdena Report, **[*17]** p. 11; Wheeler Decl. See also *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1271 (9th Cir. 1975)* ("where there is a *high degree* of substitutability . . . two [products] should be considered in the same market") (emphasis added). Finally, the record indicates that particular grades of alder are used for very different purposes. It may be that other hardwood species are readily substituted for the low grade alder used to make pallets, but not for the high grade alder used to make furniture or guitars. On this record, I cannot say. The requested admission lacks essential details and cannot bear the great weight Defendant places upon it.

Defendant next argues that sawlogs are not the end product, and the antitrust laws exist to protect consumers, so the only relevant market is finished lumber. However, the antitrust laws apply to inputs as well as outputs. See *Telcor, Communications, Inc. v. Southwestern Bell Tel. Co., 305 F.3d 1124, 1132-36 (10th Cir. 2002)* (relevant market from perspective of those Plaintiffs was pay phone locations, **[*18]** rejecting contention that relevant market must be viewed from perspective of retail end-users, for whom cell phones could be a substitute product).

The protections of the Sherman Act are not limited to individual retail consumers. "The statute does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers. Nor does it immunize the outlawed acts because they are done by any of these. The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated." *Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. 219, 236, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)* (citations omitted). [6] See also *American Ad Management, Inc. v. General Tel. Co. of Calif., 190 F.3d 1051, 1057-58 (9th Cir. 1999)* (a plaintiff need not be a consumer to establish antitrust injury).

Much of the finished alder lumber is itself an "input" that will be purchased by other businesses and transformed into furniture, guitars, and other products. Nevertheless, **[*19]** the antitrust laws guard against a monopoly in the sale of those inputs. Cf. *R.C. Dick Geothermal Corp., 890 F.2d 139, 143-44 (9th Cir. 1989)* (en banc) (relevant market was steam, which is not a final retail consumer product but merely an input to be used by other businesses); *Case-Swayne Co. v. Sunkist Growers, Inc., 369 F.2d 449, 457 (9th Cir. 1966)* (relevant market was oranges available at a reasonable price to orange juice manufacturer, even though oranges was not the final product but only an input), reversed on other grounds, *389 U.S. 384, 88 S. Ct. 528, 19 L. Ed. 2d 621 (1967)*. Likewise, a business can also be a "consumer." If Weyerhaeuser has monopolized the market for alder sawmill logs, it is immaterial that the victims are other mills. Cf. *Case-Swayne, 369 F.2d at 457* (immaterial that plaintiff was rival juice manufacturer rather than ultimate consumer, and market monopolized was the input and not the retail juice market).

Defendant argues that such an antitrust claim has to be asserted by a seller of timber, not a rival buyer of logs. However, the Plaintiffs in *Telcor* were not sellers of pay phone locations, but would-be competitors of Southwestern Bell unable to gain a **[*20]** toehold in the market because of Southwestern Bell's alleged stranglehold over pay phone locations that was perpetuated by anti-competitive practices. Likewise, the plaintiff in *Case-Swayne* was a rival juice manufacturer unable to obtain oranges due to Sunkist's alleged anti-competitive practices. Plaintiffs make analogous allegations here.

It also seems appropriate to limit the sawlog market geographically. From the Plaintiffs' perspective, it is of little solace that cherry sawlogs may be available in the southeastern United States, if--as a result of anti-competitive conduct--no logs are available, at a reasonable cost, to feed their mills here in the Pacific Northwest. Cf. *Mandeville*

---

[5] The identical question and answer are in the requests for admissions posed to the other Plaintiffs (though numbered differently).

[6] The continuing validity of this principle was restated in *Blue Shield v. McCready, 457 U.S. 465, 472, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*.

Island Farms, 334 U.S. at 236 ("Nor is the amount of the nation's sugar industry which the California refiners control relevant, so long as control is exercised effectively in the area concerned.")

As Defendant acknowledges, this is an area of ***antitrust law*** on which even experts disagree. For purposes of this summary judgment motion, it is not necessary to resolve all those disagreements or to articulate a grand theory of ***antitrust law***. I am satisfied that Plaintiffs have stated a claim upon which they **[*21]** may be entitled to relief, assuming the jury finds that the evidence at trial supports Plaintiffs' contentions.

Defendant next argues that there are no significant barriers to entry, [7] based upon the cost of opening a sawmill, and the alleged entrance of other competitors. Some of these facts are disputed. See, e.g., Ehinger Decl., P 10. A jury could also find other barriers to entry beyond the mere cost to outfit a sawmill, including the alleged monopolization of inputs (*i.e.*, alder sawlogs) and a history of alleged anti-competitive conduct. Cf. *Telcor Communications, 305 F.3d 1124* (prospective competitors unable to obtain suitable locations for their pay phones, coupled with history of anti-competitive conduct by Southwestern Bell).

Defendant also asserts that "'raising rivals' costs,' at least in the form that Plaintiffs present in this case, has never been accepted by any court as the basis for the predatory conduct element of a *Section 2* claim, especially in the absence of proof that such conduct caused the defendant to operate at a loss or that such conduct raised the costs of the defendant's rivals disproportionately greater than it raised the defendant's own costs." Defendant further argues that "even if predatory pricing may be considered to be predatory conduct in violation of *Section 2*, merely reducing one's profit margins to gain a competitive advantage while still selling at a profitable level can never be predatory conduct as a matter of law."

In Forsyth v. Humana, the Ninth Circuit held that a hospital's "alleged policy of funneling indigent and low-paying patients to competitors raises a factual question whether such conduct *increased the operating costs of those competitors* by imposing on them the costs of caring for indigent patients." *114 F.3d at 1478* (emphasis added). "[T]hese anticompetitive practices enabled Sunrise to, and it did, **[*23]** charge higher prices for hospital services. These higher prices translated into higher copayments and premium payments. Such an increase in consumer prices caused by the asserted conduct would constitute antitrust injury of the type the antitrust laws were designed to prevent." Id.

Forsyth may be distinguishable because the plaintiffs were employees and employers complaining about high health care premiums, rather than competitors of Humana. However, Forsyth cited other authorities. See, e.g., *Multistate Legal Studies, Inc. v. Harcourt Brace Jovanovich Legal and Professional Publications, Inc., 63 F.3d 1540, 1553 (10th Cir. 1995)* (monopolist's practice of scheduling courses to conflict with competitor's course could raise competitor's costs, and therefore, "would qualify as anticompetitive conduct"); *Premier Electrical Const. Co. v. Nat'l Electrical Contractor's Ass'n, 814 F.2d 358, 368 (7th Cir. 1987)* (when defendant raised its rivals' costs, it raised the market price to its own advantage); T. Krattenmaker & S. Salop, Anticompetitive Exclusion: Raising Rivals' Costs to Achieve Power Over Price, *96 YALE L.J. 209, 235-62 (1986)*. [8] Purposely inflating a competitor's costs can, in some **[*24]** instances, be anti-competitive.

Defendant is correct that, at least in the foregoing instances, the increase in costs disproportionately favored the Defendant. However, when competitors lack deep pockets, a monopolist may be willing to raise both its

[7] Entry barriers are "additional long-run costs that were not incurred by the incumbent firms but must be incurred by new entrants." *Rebel Oil, 51 F.3d at 1439*, citing *Los Angeles Land Co. v. Brunswick Corp., 6 F.3d 1422, 1427-28 (9th Cir. 1993)*. Examples of such barriers include: (1) license requirements; (2) control of an essential or superior resource; (3) entrenched buyer preferences for established brands; (4) capital market evaluations imposing higher **[*22]** capital costs on new entrants; and (5) economies of scale. Id.

[8] Cf. *Oahu Gas Service, Inc. v. Pacific Resources Inc., 838 F.2d 360, 368-69 (9th Cir. 1988)* (discussing when a monopolist's refusal to aid a competitor violates the antitrust laws). Clearly antitrust liability may be premised upon theories other than mere predatory retail pricing.

competitor's costs, and its own costs, in the short run, to be rid of those competitors in the long run. That is little different from predatory pricing aimed at putting the competition out of business.

In addition, Weyerhaeuser allegedly would have earned a much greater profit on alder sales, at least in the short run, but for the anti-competitive conduct complained of. I see no practical difference between predatory pricing that results in a company purposely selling a product at a loss of one cent per unit, versus selling the same product at a profit of only one cent per unit when the company would have earned a larger profit but for its anti-competitive conduct. **[*25]** Assuming the truth of the Plaintiffs' contentions, a jury could find that the conduct Weyerhaeuser allegedly engaged in would have been "economically irrational but for its adverse effect on competition." Some courts have deemed this sufficient to constitute anti-competitive or predatory conduct for purposes of proving a *Section 2* violation. See also Pozdena Depo. at 33-34 (such conduct might be proscribed by the antitrust laws if it "had no legitimate purpose" and was aimed at destroying competition).

Of course, there is a critical distinction between deliberately driving up costs for the purpose of destroying competition and letting logs rot in the yard just to keep competitors from obtaining those logs for their own mills, versus outbidding rivals for scarce resources that both companies require with any price increase resulting from normal market forces when demand exceeds supply. The former may be unlawful anti-competitive behavior, while the latter is simply business. The antitrust laws exist to protect competition, not to protect specific companies from the effects of legitimate competition. A firm may also acquire and maintain a monopoly simply by being a better competitor or **[*26]** having better production methods; the Sherman Act does not outlaw such monopolies nor is it intended to shield inefficient competitors from competition. See *Alaska, Airlines, Inc. v. United Airlines, Inc., 948 F.2d 536, 547 (9th Cir. 1991)*. However, at this stage in the proceedings the court is unable to say, as a matter of law, that Weyerhaeuser's conduct did not violate the Sherman Act.

Defendant also argues that Plaintiffs' theory of the case is irrational, because Defendant could have bought the Plaintiffs' mills for less than it allegedly spent to drive them out of business through other means. Even assuming those figures are accurate, it does not mandate a grant of summary judgment. For one thing, this argument assumes that Defendant knew the eventual cost from the start. That is not always the case, as many a car owner has discovered after spending more money to repeatedly repair the car than it would have cost to simply replace it at the outset. A jury might ultimately find Defendant's argument persuasive, but it does not carry the day here.

Defendant advances several other arguments, but they do not alter the result. Plaintiffs have made a sufficient showing to survive a motion **[*27]** for summary judgment. There are conflicting expert opinions, theories of the case, and explanations for Weyerhaeuser's conduct and the reasons why the Plaintiff sawmills went out of business. The parties also are far apart on the issue of damages, if Plaintiffs do prevail on liability.

Conclusion

Defendant's Motion (# 46) to Exclude Plaintiffs' Experts' Testimony is DENIED. Defendants' Motion (# 67) to Strike Plaintiffs' New Expert Opinions is DENIED. Defendant's additional Motions to Strike (contained in footnote 11 of its Reply brief, # 66) are DENIED. Defendants' Motion (# 42) for Summary Judgment is DENIED.

DATED this 21st day of January, 2003.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

Dismissal is appropriate pursuant to *Fed. R. Civ. P. 12(b)(6)* if the complaint fails to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. In this inquiry, the court must accept as true and view in the light most favorable to the non-movant the well-pleaded allegations of the complaint. The court need not accept as true unsupported conclusions and unwarranted inferences. However, it is the duty of the court to view the complaint as a whole and to base rulings not upon the presence of mere words but, rather, upon the presence of a factual situation which is or is not justiciable.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN2[] **Responses, Defenses, Demurrers & Objections**

Fed. R. Civ. P. 8 requires a "short and plain" statement of a claim or defense. *Fed. R. Civ. P. 8(a)* and *(b)*. It is well settled that the Federal Rules intend a liberal pleading standard. Federal courts may not impose a more demanding standard of pleading beyond the liberal system of notice pleading set up by the Federal Rules. Indeed, *Rule 8* expressly mandates that each averment of a pleading shall be simple, concise, and direct. *Fed. R. Civ. P. 8(e)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

HN3[] **Defenses, Demurrers & Objections, Motions to Strike**

Fed. R. Civ. P. 12(f) allows a court to strike "any insufficient defense" from any pleading. Motions to strike affirmative defenses are disfavored. When ruling on such a motion, the court must construe all facts in favor of the nonmoving party and deny the motion if the defense is sufficient under the law.

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN4[] **Contracts Law, Breach**

The tort of interference with a contract requires an intentional act that is a significant factor in causing the breach of the contract. Without a breach, there is no viable tortious interference claim. As to this point, Delaware law is well-settled.

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN5[] **Contracts Law, Breach**

It would be a novel holding for the court to rule that a breach of contract action can be maintained against a person who is not a party to the contract being sued upon. A party to a contract cannot sue a person who is not a party to that contract for breach of contract.

Contracts Law > Contract Modifications > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Contracts Law > Breach > Breach of Contract Actions > General Overview

Contracts Law > Breach > General Overview

HN6[] **Contracts Law, Contract Modifications**

A mutual modification of a contract certainly is not a breach.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN7[] **Pleadings, Counterclaims**

The elements of the tort of tortious interference with prospective business opportunities are: (a) the reasonable probability of a business opportunity, (b) the intentional interference by defendant with that opportunity, (c) proximate causation, and (d) damages, all of which must be considered in light of a defendant's privilege to compete or protect his business interests in a fair and lawful manner.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN8[] **Intentional Interference, Elements**

The tort of tortious interference with prospective business opportunities requires a valid business relationship or expectancy.

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN9[] **Commercial Interference, Prospective Advantage**

To sustain the tort of interference with a business opportunity, the interference must have been improper.

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN10[] **Commercial Interference, Contracts**

Normally, lawful actions cannot form the basis of a claim of tortious interference; however, in the sham litigation context, the mere initiation of a lawsuit may be wrongful if it constitutes unlawful antitrust activity.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN11[] **Antitrust & Trade Law, Exemptions & Immunities**

The term "sham litigation" refers to an exception to the doctrine of antitrust immunity. Immunity to certain antitrust suits was established by the United States Supreme Court. The cases established that the Sherman Act does not prohibit persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly. The Supreme Court refused to impute to Congress an intent to invade the *First Amendment* right to petition. Thus, the Noerr-Pennington doctrine protects those who petition the government from antitrust liability. Later caselaw extended Noerr antitrust immunity to the approach of citizens to administrative agencies and to courts. However, such immunity is not afforded to "sham" petitioning that is only an attempt to interfere directly with the business relationships of a competitor. Litigation is a mere "sham" if it is objectively baseless and subjectively motivated to interfere with business competition by using a governmental process as an anticompetitive weapon. A counterclaim of sham litigation is, essentially, an assertion that ***antitrust law*** has been violated.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Labor > Statutory Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Sherman Act > General Overview

Patent Law > Infringement Actions > General Overview

HN12[] **Scope, Exemptions**

The sham litigation exception applies to the National Labor Relations Act in the same way it applies to the Sherman Act. Other courts have applied the immunity principles of Noerr-Pennington to other contexts. It follows that if the Noerr-Pennington immunity principles apply in these contexts, the sham litigation exception to immunity applies as well. Other cases have explicitly or implicitly accepted the sham exception in the patent infringement context.

Torts > Intentional Torts > Abuse of Process > Elements

Torts > Intentional Torts > Abuse of Process > General Overview

Torts > Intentional Torts > Malicious Prosecution > General Overview

HN19[] Patent Law, Infringement Actions

Abuse of process may be alleged in a patent infringement case as in any other. A claim of abuse of process is established when the defendant proves that the plaintiff had an ulterior purpose and committed a willful act in the use of the process that is not proper in the regular conduct of the proceedings. There must be some definite act or threat not authorized by the process or aimed at an objective not legitimate in the use of process. There is no liability where the plaintiff has done nothing more than carry out the process to its authorized conclusion.

Opinion

MEMORANDUM AND ORDER

I. INTRODUCTION

On December 11, 2001, the plaintiffs, TruePosition, Inc. and KSI, Inc. (collectively "TruePosition") filed a complaint against the defendant, Allen Telecom, Inc. ("Allen"). In the complaint, TruePosition alleges that Allen has infringed three of its patents, namely U.S. Patent No. 4,728,959 ("the '959 patent"), U.S. Patent No. 6,108,555 ("the '555 patent"), and U.S. Patent No. 6,119,013 ("the '013 **[*2]** patent"). Each of these patents discloses a technology for locating cellular phones. In its Answer and Counterclaims (D.I. 6, 48), the defendant asserted six affirmative defenses to the plaintiffs' claims, as well as five counterclaims.

Presently before the court is TruePosition's Motion to Dismiss and/ or Strike the Defendant's Counterclaims III, IV, and V, and Affirmative Defenses III and VI (D.I. 58). For the following reasons, the court will grant in part and deny in part the plaintiffs' motion.

II. STANDARDS OF REVIEW

The plaintiffs move to dismiss Counterclaims III, IV, and V pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. ***HN1***[] Dismissal is appropriate pursuant to this Rule if the complaint fails "to state a claim upon which relief can be granted." *FED. R. CIV. P. 12(b)(6)*. In this inquiry, the court must accept as true and view in the light most favorable to the non-movant the well-pleaded allegations of the complaint. *Doug Grant, Inc. v. Greate Bay Casino Corp., 232 F.3d 173, 183-84 (3d Cir. 2000)*. The court 'need not accept as true "unsupported conclusions and unwarranted inferences. "' *Id.* (quoting *City of Pittsburgh v. West Penn Power Co., 147 F.3d 256, 263 n.13 (3d Cir. 1998))* **[*3]** (quoting *Schuylkill Energy Res., Inc. v. Pennsylvania Power & Light Co., 113 F.3d 405, 417 (3d Cir. 1997))*. However, it is the duty of the court 'to view the complaint as a whole and to base rulings not upon the presence of mere words but, rather, upon the presence of a factual situation which is or is not justiciable.' *232 F.3d at 184* (quoting *City of Pittsburgh, 147 F.3d at 263*).

The plaintiffs rely upon *Federal Rules of Civil Procedure 8* and *12(f)* for their motion to strike Affirmative Defenses III and VI. ***HN2***[] *Rule 8* requires a "short and plain" statement of a claim or defense. *FED. R. CIV. P. 8(a)* and *(b)*. It is well settled that the Federal Rules intend a liberal pleading standard. *See Leatherman v. Tarrant county Narcotic Intelligence & Coordination Unit, 507 U.S. 163, 168, 122 L. Ed. 2d 517, 113 S. Ct. 1160 (1993)* (holding that federal courts may not impose a more demanding standard of pleading beyond "the liberal system of 'notice pleading' set up by the Federal Rules"). Indeed, *Rule 8* expressly mandates that "each averment of a pleading shall be simple, concise, and direct." *FED. R. CIV. P. 8(e)*.

HN3[] *Rule 12(f)* allows a court to **[*4]** strike "any insufficient defense" from any pleading. *FED. R. CIV. P. 12(f)*. Motions to strike affirmative defenses are disfavored. *Proctor & Gamble Co. v. Nabisco Brands, Inc., 697 F. Supp. 1360, 1362 (D. Del. 1988)*. When ruling on such a motion, "the court must construe all facts in favor of the nonmoving party … and deny the motion if the defense is sufficient under the law." *Id.*

III. DISCUSSION

A. Counterclaim III

Counterclaim III alleges tortious interference with a contract. The plaintiffs move to dismiss the counterclaim pursuant to *Rule 12(b)(6)* on the grounds that it fails to plead an essential element of the alleged tort, namely, a breach of the relevant contract.

HN4[] The tort of interference with a contract requires "an intentional act that is a significant factor in causing the breach of the contract." [1] *Cantor Fitzgerald, L.P. v. Cantor, 724 A.2d 571, 584 (Del. Ch. 1998)*. Without a breach, there is no viable tortious interference claim. As to this point, Delaware law is well-settled. *See id.; see also Associated/ Acc Int'l, LTD. v. Dupont Flooring Sys. Franchise Co., 2002 U.S. Dist. LEXIS 6464*, at *27-28 (D. **[*5]** Del. 2002); *DeBakey Corp. v. Raytheon Serv. Co., 2000 Del. Ch. LEXIS 129, 2002 WL 1273317 (Del. Ch. 2000)*; *Boyer v. Wilmington Materials, 1997 Del. Ch. LEXIS 97, 1997 WL 382979 (Del. Ch. 1997)*; *Irwin & Leighton, Inc. v. W.M. Anderson Co., 532 A.2d 983, 992 (Del. Ch. 1987)*. There is no discussion in these cases as to behavior that could constitute tortious interference when no breach of contract occurs. Presumably, this is because there is no conduct that could constitute the tort of interference with a contract, unless a breach of that contract results. [2]

[*6] In this case, the contract at issue is between AT&T Wireless Services, Inc. ("AT&T") and Allen for the purchase of Allen's wireless location systems, which systems are the subject of the present patent infringement suit. In its counterclaim, Allen alleges that the plaintiffs, by filing the present suit and by publicizing it, intended to cause a breach of the AT&T contract. Answer and Counterclaims (D.I. 48) PP 17-18. This is insufficient to state a claim of tortious interference with a contract because, as the defendant concedes, there has been no breach of the AT&T contract. [3] Answering Brief at 10. Therefore, Counterclaim III must be dismissed.

[*7] B. Counterclaim IV

Counterclaim IV alleges tortious interference with prospective business opportunities. ***HN7***[] The elements of this tort are: '(a) the reasonable probability of a business opportunity, (b) the intentional interference by defendant with that opportunity, (c) proximate causation, and (d) damages, all of which must be considered in light of a defendant's privilege to compete or protect his business interests in a fair and lawful manner.' *DeBonaventura v. Nationwide Mut. Ins. Co., 428 A. 2d 1151, 1153 (Del. 1981)* (quoting *DeBonaventura v. Nationwide Mut. Ins. Co., 419 A.2d 942, 947 (Del. Ch. 1980))* (citations omitted). The plaintiffs move to dismiss the counterclaim on the grounds that the defendant cannot prove all of the required elements, namely, a prospective business opportunity, or an interference with that opportunity.

---

[1] Contrary to the defendant's paraphrasing, the court did not style this element as requiring only some kind of interference and no resultant breach. *See* Answering Brief at 9.

[2] Although the defendant acknowledges that "a review of the relevant case law shows that the cases are universally precipitated by a breach of contract," it maintains that "the absence of a total breach does not foreclose recovery for damages caused by improper interference." Answering Brief at 10-11. This assertion is unpersuasive as it applies to interference with a contract, particularly given Allen's conspicuous failure to cite any supporting caselaw for it. Furthermore, Allen's contention that a breach of contract is not required in such a case because "the applicable tort here is, for a reason, labeled 'tortious *interference* with contractual relations' not 'tortious *breach* of contractual relations,'" Answering Brief at 12 n.5 (emphasis added), is astounding in its fatuity. The tort is not labeled "tortious breach of contractual relations" because a non-party to a contract generally is not bound by the contract and thus can not breach the contract. *See, e.g., Traffas v. Bridge Capital Investors II, 1993 U.S. Dist. LEXIS 12028, 1993 WL 339293 (D. Kan. 1993)*, at *3 ***HN5***[] ("It would be a novel holding for the court to rule that a breach of contract action can be maintained against a person who is not a party to the contract being sued upon …. A party to a contract cannot sue a person who is not a party to that contract for breach of contract."); ***Credit Gen. Ins. Co. v. Midwest Indem. Corp.,916 F. Supp. 766, 772 (N.D. Ill. 1996)*** (finding "ludicrous" the defendants' contention that a non-party to a contract can breach that contract).

[3] The court is mindful of Allen's contention that "much of this may … be a matter of semantics." Answering Brief at 12 n.6. Allen argues that, because the original AT&T contract was modified subsequent to TruePosition's initiation of the present suit, it suffered a complete loss of the original anticipated contract. *Id.* Apparently, Allen wishes the court to view this "loss" as a breach. However, ***HN6***[] a mutual modification of a contract certainly is not a breach. *See, e.g., Anderson v. Golden, 569 F. Supp. 122, 140 (S.D. Ga. 1982)* (distinguishing between breach and mutual modification). To the extent such a loss represents the loss of an economic expectation, the corresponding tort is interference with a prospective business opportunity. The court reiterates that Delaware law requires a breach to sustain the tort of interference with a contract.

The only "prospective business opportunity" at issue in the counterclaim is the AT&T contract. As stated above, the defendant acknowledges a completed and continuing contract with AT&T. Allen's expected business opportunity, thus, appears to have been consummated before the allegedly tortious conduct of the plaintiffs. **[*8]** This is particularly true because "the probability of the business opportunity must be assessed at the time of the alleged interference." *Malpiede v. Townson, 780 A.2d 1075, 1099 (Del. 2001)*. In this case, the alleged interference occurred after Allen had been awarded the contract with AT&T. Answer and Counterclaims (D.I. 48) P 17.

Allen maintains, however, that the plaintiffs' interference caused a modification of the expected contract terms. Following TruePosition's commencement of a patent infringement action against Allen and a press release announcing the same, Allen allegedly incurred additional legal expenses in renegotiating certain provisions of the AT&T contract, more onerous indemnification terms in the contract, and damages to its reputation. Thus, Allen contends, TruePosition's actions interfered with its expected business opportunity in that the final terms of the AT&T contract differed from the original terms. For purposes of this motion only, this is sufficient to state a claim of tortious interference with prospective business opportunities. *See* *McHugh v. Board of Educ., 100 F. Supp. 2d 231, 247 n.15 (D. Del. 2000)* (noting that ***HN8***[] the **[*9]** tort requires "a valid business relationship or expectancy" and citing cases).

Assuming that these facts constitute a sufficient interference, the counterclaim may be challenged on other grounds, namely, that Allen has not shown that the plaintiffs engaged in any wrongful conduct. ***HN9***[] To sustain the tort of interference with a business opportunity, the interference must have been improper. *Bohatiuk v. Delaware Chiropractic Servs. Network, L.L.C., 1997 Del. Super. LEXIS 215*, at *8-10 (Del. Super. 1997). The conduct at issue is the filing of a patent infringement suit and the public announcement of the suit by a press release. ***HN10***[] Normally, lawful actions cannot form the basis of a claim of tortious interference, particularly in light of TruePosition's "privilege to compete and protect its own business interests." *Acierno v. Preit-Rubin, Inc., 199 F.R.D. 157, 164-65 (D. Del. 2001)* (dismissing tortious interference with contractual relations claim because defendant corporation and real estate investment trust, in failing to affirmatively suggest to County that competitor plaintiff's property be included in a traffic impact study, committed no wrongful conduct) **[*10]** (citing caselaw). In this case, however, the defendant also has alleged the counterclaim of "sham litigation." In the sham litigation context, the mere initiation of a lawsuit may be wrongful if it constitutes unlawful antitrust activity. Because the court will allow the "sham litigation" counterclaim to stand, *see infra* Section I.C., the tortious interference with a prospective business opportunity claim must survive as well. It is axiomatic that if the defendant can prove that the instant lawsuit is merely a "sham" and violative of ***antitrust law***, then the filing of the lawsuit constitutes improper conduct. Therefore, in the interest of consistency, and viewing the pleadings in the light most favorable to Alien, Counterclaim IV survives the instant motion to dismiss.

C. Counterclaim V

TruePosition moves for the dismissal of Counterclaim V, which alleges "sham litigation," on the grounds that such a cause of action does not exist. ***HN11***[] The term "sham litigation" refers to an exception to the doctrine of antitrust immunity. Immunity to certain antitrust suits was established by the Supreme Court in *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*, **[*11]** and *Mine Workers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*. These cases established that "the Sherman Act does not prohibit … persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly." *Noerr, 365 U.S. at 136*. The Supreme Court refused to "impute to Congress an intent to invade" the *First Amendment* right to petition. *Id. at 136*. Thus, the *Noerr-Pennington* doctrine protects those who petition the government from antitrust liability.

Later caselaw extended *Noerr* antitrust immunity to "the approach of citizens … to administrative agencies … and to courts." *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 510, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)*. However, such immunity is not afforded to "sham" petitioning that is only "an attempt to interfere directly with the business relationships of a competitor." *Noerr, 365 U.S. at 144*. Litigation is a mere "sham" if it is objectively baseless and subjectively motivated to interfere **[*12]** with business competition by using a governmental process 'as an anticompetitive weapon.' *Professional Real Estate Investors v. Columbia Pictures Indus., 508 U.S. 49, 123 L. Ed. 2d 611, 113 S. Ct. 1920 (1993)* (quoting *Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 380, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991))*.

The plaintiffs urge that "sham litigation" is not a cognizable cause of action. The court cannot agree. A counterclaim of sham litigation is, essentially, an assertion that ***antitrust law*** has been violated. Indeed, in litigation leading to the Court's decision in *Professional Real Estate Investors,* Columbia Pictures had sued the defendant, PRE, for copyright infringement. *508 U.S. at 52*. The defendant counterclaimed, accusing Columbia of violations of *§§ 1* and *2* of the Sherman Act, 26 Stat. 209, as amended, *15 U.S.C. §§ 1-2*. *Id.* "In particular, PRE alleged that Columbia's copyright action was a mere sham that cloaked underlying acts of monopolization and conspiracy to restrain trade." *Id.* Although the counterclaim did not survive summary judgment on the facts of the case, the Court upheld the validity **[*13]** of the sham counterclaim itself. Indeed, in announcing a two-part test for its application, the Court only clarified the existence and context of the sham litigation exception. [4]

Since *Professional Real Estate Investors,* **[*14]** the sham litigation exception has been invoked in varied contexts. For example, in a recent case, the Supreme Court refused to strip antitrust immunity from an employer who filed a losing and retaliatory lawsuit where the suit was not objectively baseless. *BE&K Constr. Co. v. NLRB, 536 U.S. 516, 153 L. Ed. 2d 499, 122 S. Ct. 2390 (2002)*. In so doing, the Court implicitly held that ***HN12***[] the sham litigation exception applies to the National Labor Relations Act in the same way it applies to the Sherman Act. *See 122 S. Ct. at 2402* (Scalia, J., concurring) ("The implication of our decision today is that … we will construe the National Labor Relations Act … in the same way we have already construed the Sherman Act: to prohibit only lawsuits that are *both* objectively baseless *and* subjectively intended to abuse process.") (emphasis in original). Other courts have applied the immunity principles *of Noerr-Pennington* to other contexts. *See, e.g., State of Missouri v. National Organization of Women, 620 F.2d 1301, 1318-19 (8th Cir. 1980)* (applying *Noerr-Pennington* liability principles to state tort laws); **[*15]** *Video International Production, Inc. v. Warner-Amex Cable Communications, Inc., 858 F.2d 1075, 1084(5th Cir. 1988)* (holding that *Noerr-Pennington* doctrine applies to Civil Rights Act liability); *Gorman Towers, Inc. v. Bogoslavsky, 626 F.2d 607, 614-15 (8th Cir. 1980)* (same). It follows that if the *Noerr-Pennington* immunity principles apply in these contexts, the sham litigation exception to immunity applies as well. [5] Other cases have explicitly or implicitly accepted the sham exception in the patent infringement context. *See, e.g., Carroll Touch, Inc. v. Electro Mechanical Sys., 15 F.3d 1573 (D.C. Cir. 1993)* (discussing sham litigation counterclaim in patent infringement context); *U.S. Philips Corp. v. Sears Roebuck & Co., 55 F.3d 592, 597 (Fed. Cir. 1995)* (rejecting sham counterclaim on the facts of the case).

[*16] In sum, the court can find no justification for refusing to allow the sham exception to be litigated in the instant case. Indeed, a copyright infringement action, like that at issue in *Professional Real Estate Investors,* and a patent infringement action such as the one at issue here present such analogous contexts regarding the application of the

---

[4] Of course, as already stated, a violation of ***antitrust law*** underlies any sham exception to antitrust immunity. Although the defendant has not specifically pled a violation of the Sherman Act in Counterclaim V, the invocation of the sham litigation doctrine is sufficient to give notice of the basis of its claim. This is particularly true in the context of a *Rule 12(b)(6)* motion to dismiss, and in light of both the liberal pleading philosophy of the Federal Rules and the court's responsibility 'to examine the complaint to determine if the allegations provide for relief on any possible theory.' *O ' Boyle v. Jiffy Lube Int'l, Inc., 866 F.2d 88, 93 (3d Cir. 1989)* (quoting C. WRIGHT & A. MILLER, FEDERAL PRACTICE AND PROCEDURE, § 1357, at 601-02 (1969) (footnotes omitted)).

[5] Unlike the defendant, however, the court recognizes a distinction between the *Noerr- Pennington* doctrine, which shields petitioners from antitrust liability, and the sham litigation exception, which strips this immunity when the petition is meritless and anticompetitive in nature. *See, e.g.,* Answering Brief at 15 ('… the Noerr-Pennington *[i.e.,* "sham litigation"] doctrine …').

sham litigation exception that it would strain credibility to announce a relevant and dispositive difference between them. Thus, Counterclaim V may remain, to succeed or fail as it may in the ensuing litigation. [6]

[*17] D. Affirmative Defense III

As its third affirmative defense, Alien alleges that TruePosition engaged in "fraud and/ or inequitable conduct" in acquiring the relevant patents. The plaintiffs move to strike the defense, as well as Counterclaim I, which is predicated on the inequitable conduct defense, on the grounds that the affirmative defense does not meet the pleading requirements of *Federal Rule of Civil Procedure 9(b)*.

HN13[] *Rule 9* requires that all pleadings of fraud or mistake "be stated with particularity." *FED. R. CIV. P. 9(b)*. [7] These averments, however, remain subject to the liberal pleading standard of *Rule 8*, which requires only a "short and plain" statement of a claim or defense. *See* *In re Westinghouse Sec. Litig., 90 F.3d 696, 703 (3d Cir. 1996)* (citing cases); *see generally* *Leatherman,* 507 U.S. at 168 (holding that federal courts may not impose a more demanding standard of pleading beyond "the liberal system of 'notice pleading' set up by the Federal Rules"); 5 CHARLES ALAN WRIGHT & ARTHUR R. MILLER FEDERAL PRACTICE AND PROCEDURE § 1281, at 520-21 (1990) (pleading with particularity under *Rule 9(b)* should be done consistently with **[*18]** the general philosophy of *Rule 8*); 2A JAMES W. MOORE, MORRE'S FEDERAL PRACTICE P 8.13, at 8-58 (2d ed. 1995) (the mandate of *Rule 8* applies "even where the Rules command particularity, as in the pleading of fraud under *Rule 9(b)*") (footnote omitted).

The pleading requirements are satisfied by Alien's third affirmative defense. The defense constitutes one paragraph which names the title and publication date of at least one allegedly withheld material prior art publication. ***HN14***[] In the context of alleged inequitable conduct before the PTO during a patent prosecution, "pleadings that disclose the name of the [allegedly withheld] relevant prior art and disclose the acts of the alleged fraud fulfill the requirements of *Rule 9(b)*." *EMC Corp. v. Storage Tech. Corp., 921 F. Supp. 1261, 1263 (D. Del. 1996)*. **[*19]** The third affirmative defense discloses at least this much, and thus suffices "to apprise the other party of what is being alleged in a manner sufficient to permit responsive pleadings" as *Rule 9* requires. 5 WRIGHT & MILLER § 1296 (1990).

TruePosition objects that the named publication is relevant to only certain of their patents and, therefore, the defendant has not sufficiently pled the defense of inequitable conduct as to the other patents. The court declines, however, to weigh the relevance and materiality of the allegedly withheld prior art for purposes of this motion. ***HN15***[] It is the court's duty for purposes of this motion only to test the sufficiency of the pleading, not to resolve disputed facts or decide the merits of the case. *Kost v. Kozakiewicz, 1 F.3d 176, 183 (3d Cir. 1993)*. Furthermore, ***HN16***[] the Third Circuit has made clear that, although "it is certainly true that allegations of 'date, place or time'" satisfy the pleading requirements, "nothing in [*Rule 9*] requires them." *Seville Industrial Machinery v. Southmost Machinery, 742 F.2d 786, 791*. The affirmative defense, as pled, suffices to place the plaintiffs on notice of the misconduct with **[*20]** which they are charged. *Id.; see also* *Scripps Clinic and Research Found., et al. v. Baxter Travenol Lab., et al, 1988 U.S. Dist. LEXIS 1972, 1988 WL 22602*, at *3 (D. Del.) (defense of inequitable conduct sufficiently pled when defendant simply "alleged that [the plaintiff] failed to identify to the PTO relevant prior art of which it was aware").

[6] In this vein, the court stresses that the defendant, of course, will be tasked in the ensuing litigation with proving the elements of the sham litigation exception, namely, that the present patent infringement suit is objectively baseless and subjectively motivated by an intent to interfere with competition. *See* *Carroll Touch, 15 F.3d at 1583* (holding that sham litigation counterclaim could not survive summary judgment because defendant did not establish a genuine issue regarding whether the patent infringement action was baseless).

[7] Because the court has found that Alien's pleadings satisfy the heightened pleading requirements of *Rule 9(b)*, it need not address the defendant's argument that *Rule 9(b)* may not apply to allegations of inequitable conduct.

The motion to strike the third affirmative defense, and to dismiss Counterclaim I, which is at least partially premised on the defense of inequitable conduct, is denied.

E. Affirmative Defense VI

Finally, the plaintiffs move to strike Affirmative Defense VI, abuse of process, on the grounds that it is not a defense to a patent infringement action, and that, in any event, it has not been pled properly.

The plaintiffs are correct that ***HN17***[] abuse of process is not a defense to a patent infringement action. Rather, it is a tort, *see* PROSSER, LAW OF TORTS, § 121 (4th Ed. 1971), which should have been pled as a counterclaim. This mistake is not fatal, however. ***HN18***[] *Federal Rule of Civil Procedure 8(c)* states that "when a party has mistakenly designated ... a counterclaim as a defense, the court on terms, if justice so requires, shall treat the pleading **[*21]** as if there had been a proper designation." *FED. R. CIV. P. 8(c)*. The court will view the defendant's averment of the "defense" of abuse of process as a counterclaim.

HN19[] Abuse of process may be alleged in a patent infringement case as in any other. *See, e.g., Bayer AG v. Sony Elecs., Inc., 229 F. Supp. 2d 332 (D. Del. 2002)*. A claim of abuse of process is established when "the defendant ... proves that the plaintiff had an 'ulterior purpose' and committed 'a willful act in the use of the process that is not proper in the regular conduct of the proceedings.'" *Id. at 368* (quoting *Feinman v. Bank of Delaware, 728 F. Supp. 1105, 1115 (D. Del. 1990)*, *aff'd, 909 F.2d 1475 (3d Cir. 1990))*. "There must be 'some definite act or threat not authorized by the process or aimed at an objective not legitimate in the use of process ... there is no liability where the [plaintiff] has done nothing more than carry out the process to its authorized conclusion.'" *Id.* (citations omitted).

The defendant has asserted that the "plaintiffs have abused the judicial process by bringing the present action based on the patents that plaintiffs **[*22]** know are invalid, unenforceable, and/ or not infringed." Answer and Counterclaims (D.I. 48) at 8. There is no elaboration in the Answer and Counterclaims. The defendant's briefing, however, contends that "the same averments with regard to TruePositions tortious interference with Allen's business contracts and relations also establish a basis to proceed against TruePosition for abuse of process." Answering Brief at 17-18 n.10.

The defendant's averments are sufficient to sustain a *Rule 8*, *Rule 12(f)*, or *Rule 12(b)(6)* motion to strike and/ or dismiss. Allen has offered a "short and plain" statement of the claim and has presented a factual context that, viewed in the light most favorable to Allen, states an abuse of process claim. Again, it is the court's duty for purposes of this motion only to test the sufficiency of a complaint, not to resolve disputed facts or decide the merits of the case. *Kost, 1 F.3d at 183*. Despite the defendant's anemic presentation of its abuse of process claim, the facts presented in the context of its sham litigation and tortious interference claims suffice to state a claim for relief for abuse of process as well. The plaintiffs' motion to **[*23]** dismiss the claim is denied.

IV. CONCLUSION

The court concludes that the defendant's tortious interference with a contract claim can not be sustained because there has been no breach of contract. Allen's other counterclaims of tortious interference with prospective business opportunities, sham litigation, declaratory judgment, and abuse of process survive this motion to dismiss. Likewise, the defendant's third affirmative defense of fraud and/ or inequitable conduct may remain.

For the foregoing reasons, IT IS HEREBY ORDERED that:

1. TruePosition's Motion to Dismiss and/ or Strike (D.I. 58) is GRANTED IN PART and DENIED IN PART.

2. Counterclaim III, alleging tortious interference with a contract, is DISMISSED.

Justification is an affirmative defense to both an antitrust claim and a claim for tortious interference. *Tex. Bus. & Com. Code Ann. § 15.05(g)* (Vernon 2002). Justification can be based on the exercise of either: (1) the party's own legal rights; or (2) the party's good faith claim to a colorable right, even though the claim ultimately proves to be mistaken. When the party conclusively establishes it had a legal right to engage in the complained-of conduct, the party's motive for engaging in that conduct is irrelevant.

Opinion

MEMORANDUM OPINION

Before Justices James, FitzGerald, and Dodson [1]

Opinion By Justice James

The Money Masters, Inc. (Money Masters), The Masters of Money and Credit Corp. (Masters of Money), The Masters System, Inc. (Masters System), and Bruce Danielson (Danielson) (collectively appellants) appeal summary judgments in favor of TRW, Inc. (TRW), Trans Union Corp. (Trans Union), CSC Credit Services, **[*2]** Inc. (CSC), Experian Corp. (Experian), TRW/Experian employees Diane Fleming (Fleming) and Kelly Currie (Currie) (collectively credit reporting agencies), and Texaco, Inc. (Texaco). In a conditional cross-appeal, the credit reporting agencies challenge the trial court's denial of additional grounds for summary judgment. We affirm the trial court's judgment.

Background

Money Masters, Masters of Money, and Masters System (collectively corporate appellants) are "for-profit" consumer credit counseling and restoration companies founded by Danielson at different times during the 1990s. [2] Their client population consists of individuals attempting to "clean" their credit record by having creditors remove negative account information that was (a) incorrect altogether; (b) had been at one point correct but had been either "charged off" or paid; [3] or (c) was correct but could be paid in full or some lesser negotiated amount. If the clients did not already have their credit reports, appellants would request them from Trans Union, CSC, TRW and Experian, [4] after obtaining their clients' powers of attorney. According to Danielson, in order to assist the clients properly, it was necessary **[*3]** to have both the consumer version of the credit report, as well as the commercial version, which contained additional consumer and credit rating information. Appellants would review the reports and consult with their clients to determine what information needed correction, or what outstanding balances could be paid. Once that determination was made, appellants would contact the credit reporting agencies and/or creditors,

---

[1] The Honorable Carlton B. Dodson, Justice, Court of Appeals, Seventh District of Texas at Amarillo, Retired, sitting by assignment.

[1] The Honorable Carlton B. Dodson, Justice, Court of Appeals, Seventh District of Texas at Amarillo, Retired, sitting by assignment.

[2] According to the deposition testimony of Danielson, Masters of Money is actually a mortgage business which provided credit restoration services only "for a short time."

[3] This could include a judgment that had been vacated, lien that had been released, or bankruptcy that had been dismissed.

[4] Experian purchased TRW's credit reporting agency in 1996. Appellants do not differentiate between the two in their allegations against them. Accordingly, neither do we and any reference to either shall be deemed a reference towards both.

including Texaco, inquiring about those "errors" and offering to pay outstanding balances in exchange for the removal from the report of the negative information.

[*4] Over a period of time, Danielson noticed the credit reporting agencies and Texaco were not responding to appellants' requests for credit reports or dispute resolution and his businesses were failing. At Experian, the requests were handled by either Fleming or Currie. According to the credit reporting agencies, they did not respond directly to appellants' requests for credit reports because they could not verify the authenticity of the powers of attorney. Additionally, the reporting agencies and Texaco did not respond to the requests to delete negative or delinquent accounts, once those accounts had been paid, because, in their opinion, deleting negative but accurate information rendered the credit reports false and misleading. However, the credit reporting agencies did send appellants' clients' credit reports directly to the clients and also responded directly to the clients concerning any "legitimate" inquiries. Those responses were often accompanied by an "information sheet" advising the clients of some of the risks of working with credit clinics and of their consumer rights, including their right to deal directly with the credit reporting agencies and creditors at no cost. The **[*5]** "information sheet" also advised appellants' clients that they could report any unsatisfactory experiences with credit clinics to the local attorney general or Better Business Bureau.

In order to continue to provide services to the clients, appellants began obtaining the clients' credit reports from collection agencies or resellers. Appellants would also prepare the necessary disputes for their clients and have the clients submit the disputes. However, after a period of time, appellants were no longer able to obtain the reports from collection agencies or resellers. Apparently, the credit reporting agencies had informed those agencies and resellers that credit clinics such as the corporate appellants used the reports for allegedly wrongful purposes, and the reports should not be provided to appellants. At approximately the same time, the credit reporting agencies were exchanging information with each other about the credit clinics through a "clinic task force," and Texaco began advertising the "PrivacyGuard" program, which provided Texaco credit card holders direct access to their credit reports. In addition to exchanging information about credit clinics in general, the clinic task **[*6]** force, which met about once a month, also conducted a limited survey on consumers' opinions of credit clinics. The task force later communicated the results, along with their own concerns about credit clinics, to the Federal Trade Commission (FTC). The FTC later began a public campaign on fraudulent credit clinics, although the corporate appellants were apparently never identified as a part of that group. The FTC also promulgated a set of telemarketing rules under which the FTC intended to prosecute fraudulent credit clinics.

In 1996, appellants sued the credit reporting agencies and Texaco, [5] asserting various antitrust claims pursuant to the Texas Free Enterprise and Antitrust Act of 1983 ("the Texas Antitrust Act"). *See* *TEX. BUS. & COM. CODE ANN. § 15.01-.52* (Vernon 2002). These claims consisted of conspiracy to boycott, restraint of trade, monopolization, attempt to monopolize, and conspiracy to monopolize. Additionally, appellants asserted claims for tortious interference with existing contracts and prospective business relationships. The complaints stemmed primarily from (a) the credit reporting agencies' refusal to provide appellants copies **[*7]** of their clients' credit reports; (b) the agencies' granting Texaco access to credit reports for purposes of the PrivacyGuard program; (c) the agencies' and Texaco's refusal to investigate credit disputes submitted by appellants on behalf of their clients; (d) the agencies' encouraging appellants' clients to deal directly with the bureaus and creditors; and (e) the agencies' lobbying for anti-credit clinic legislation. According to Danielson, these actions destroyed Money Masters, causing it to file for bankruptcy, [6] and resulted in Masters System's failure.

The credit reporting agencies and Texaco answered by filing both general and verified denials and asserting **[*8]** various affirmative defenses, including estoppel, legal justification, privilege, statute of limitations, and the *Noerr-Pennington* doctrine. [7] **[*9]** After the parties had conducted substantial discovery, the credit reporting agencies and

---

[5] Appellants also filed suit against Consumer Credit Counseling Service of Greater Dallas, Inc., National Foundation for Consumer Credit, and Equifax, Inc. The trial court subsequently dismissed those claims and they are not part of this appeal.

[6] Money Masters filed for bankruptcy in December 1993. The bankruptcy was closed in November 1996.

Texaco also filed both individual and joint traditional and no evidence summary judgment motions on all of appellants' claims. The trial court heard these motions December 2, 1998. At the time, the live pleading was appellants' third amended petition. Two days later, the trial court entered the following order:

On December 2, 1998, came on to be heard the following Defendants' Motions for Summary Judgment, the Responses filed by Plaintiffs, and the replies and objections filed by defendants, and after hearing the arguments of counsel, the Court ORDERS:

Texaco['s] Motion for Summary Judgment is GRANTED.

Defendants' Joint Motion for Summary Judgment on [Danielson's] Claims . . . for Lack of Standing is GRANTED.

Defendants' Joint Motion for Summary Judgment on All Claims Asserted by Money Masters is GRANTED.

Defendants' Motion for Summary Judgment on All Claims Asserted in Plaintiff's Third Amended Petition is GRANTED. [8]

Defendants' Motion for Partial Summary Judgment on the Basis of Statute of Limitations is DENIED.

Trans Union's Motion for Partial Summary Judgment on Plaintiffs' Causes of Action for Tortious Interference is DENIED.

Defendants' Motion for Partial Summary Judgment on *Noerr-Pennington* Affirmative Defense is DENIED.

By separate written instrument, the court also entered a final "take nothing" judgment dismissing appellants' suit with prejudice.

On appeal, appellants present six points of error. In their first point, appellants argue (a) the trial court's judgment lacks finality and is fatally defective; and (b) the credit reporting agencies are judicially estopped from appealing any rulings unfavorable to them. In their second through sixth points of error, appellants challenge the court's order granting the following motions:

[*10] (a) the credit reporting agencies' and Texaco's joint motion for summary judgment on Danielson's claims for lack of standing;

(b) the credit reporting agencies and Texaco's joint motion for summary judgment on all claims asserted by Money Masters;

(c) Texaco's motion for summary judgment; and,

(d) the credit reporting agencies and Texaco's motion for summary judgment on all claims asserted in the third amended petition.

In two conditional cross-points, the credit reporting agencies contend the court erred in denying their motions for partial summary judgment on the basis of limitations and the *Noerr-Pennington* doctrine. Since our jurisdiction in this case is contingent upon having a final, appealable judgment, we begin by addressing appellant's first point of error. *See* *TEX. CIV. PRAC. & REM. CODE ANN. §§ 51.012*, *51.014* (Vernon 1997 & Supp. 2003); *Lehmann v. Har-Con Corp., 39 S.W.3d 191, 195, 44 Tex. Sup. Ct. J. 364 (Tex. 2001)*. [EDITOR'S NOTE: TEXT WITHIN THESE SYMBOLS [O> <O] IS OVERSTRUCK IN THE SOURCE.]. **Finality and Validity of Judgment**

---

[7] *See* *E.R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*.

[8] We note this motion was filed by the credit reporting agencies. However, Texaco subsequently joined this motion, specifically adopting the arguments raised in the motion and also incorporating by reference the arguments made in its individual summary judgment motion.

In their first point of error, appellants contend the trial court entered a "fatally defective **[*11]** final

judgment." Appellants base their contention on the following docket sheet entry:

D's msj (>). Texaco granted (leave to supp granted) on vicarious lia; all granted on jud estop, [O>tortious int<O] conspiracy, [O>anti-trust<O] ok, (Noerr-Pennington), [9] ind claims of Danielson. Ok as to [O>anti-trust <O], boycott,, tort int, s of l. (judge's initials)

Appellants maintain this entry reflects they prevailed on the interference, antitrust, and boycott claims, and also on appellees' affirmative defenses of *Noerr-Pennington* and statute of limitations. Appellants note, however, that the order actually entered by the court grants the motion for summary judgment on all claims asserted in the third amended petition, a motion not mentioned in the docket sheet entry, while at the same time appearing to leave the interference claims to be tried. Because the interference **[*12]** claims purportedly remain outstanding, appellants argue the judgment is not final, despite its language dismissing appellants' action. Additionally, because of the discrepancy between the docket sheet and the order, appellants argue the order is fatally defective. Appellants assert the docket sheet entry controls, and, because the credit reporting agencies and Texaco prepared the "fatally defective" order, the credit reporting agencies are judicially estopped from challenging the judgment. We reject appellants' contentions.

As the parties are aware, we, too, questioned the finality of the judgment and by order issued July 18, 2002, abated the appeal to allow the trial court to enter a final appealable judgment. Specifically, we directed the trial court to dispose of the interference claims and modify the judgment so as to make it a final appealable judgment. We also directed the clerk to file a supplemental record containing the modified judgment. On November 27, 2002, we reinstated the appeal, after receiving the supplemental record.

We have reviewed that record and conclude the modified judgment is in fact final and appealable. This judgment expressly and unequivocally adjudicates **[*13]** all parties and claims. *See* Lehmann, 39 S.W.3d at 192-93. Accordingly, appellants' complaint that the judgment is not final is now moot.

Having concluded the judgment is final, we now address appellants' complaint concerning the validity of the judgment. In support of their contention that the order disposing of the various summary judgment motions is in fatal conflict with the docket sheet and the docket sheet controls, appellants cite Hardtke, Inc. v. Katz, 813 S.W.2d 548 (Tex. App.-Houston [1st Dist.] 1991, no writ). In *Hardtke*, the court considered the effect of a signed docket sheet entry which reinstated an improperly dismissed case. *Id. at 550*. The trial court had signed an order dismissing the case the previous day. *Id.* Apparently realizing the dismissal was in error, the trial court then signed the docket entry reinstating the case but did not sign a separate written order. *Id.* Although recognizing that a docket entry of what the judgment purports to be cannot override or cast doubt upon the written judgment where the two are different, *see* N-S-W Corp. v. Snell, 561 S.W.2d 798, 799, 21 Tex. Sup. Ct. J. 115 (Tex. 1977) **[*14]** (orig. proceeding), the *Hardtke* court nonetheless concluded, under the facts before it, the docket entry effectively reinstated the case. Hardtke, 813 S.W.2d at 551. In so concluding, the court noted the docket entry was unambiguous. *Id.* The court also noted it was not using the docket entry as evidence of what the dismissal judgment purported to be - each was "entirely separate, and the meaning of each [was] clear." *Id.*

We fail to find *Hardtke* binding. As the credit reporting agencies and Texaco point out, *Hardtke* is limited to its facts. *Id.*; Intercity Mgmt. Corp. v. Chambers, 820 S.W.2d 811, 812-13 (Tex. App.-Houston [1st Dist.] 1991, no writ). Additionally, unlike in *Hardtke*, appellants here rely on the docket entry to specifically override the written judgment, which is impermissible. N-S-W, 561 S.W.2d at 799. Because *Hardtke* is distinguishable from the case before us, we conclude the judgment is not defective on the basis alleged by appellants.

Having concluded the judgment is not defective, we now address appellants' final contention, under this point of error, that the credit reporting **[*15]** agencies are precluded from appealing those rulings unfavorable to them

---

[9] On the docket sheet, "Noerr-Pennington" is circled with an arrow pointing down towards the portion that states "ok as to boycott . . ."

because they drafted the order on the various summary judgment motions. It is well settled that a party cannot appeal from or attack a judgment to which he has consented or agreed absent an allegation of proof of fraud, collusion, or misrepresentation. *Gillum v. Rep. Hlth. Corp., 778 S.W.2d 558, 562* (Tex. App.-Dallas 1989, no writ). In this case, however, the credit reporting agencies did not consent to the judgment by the mere drafting of the order. The order recites it is based on the summary judgment hearing during which the court considered the arguments of all parties and then made its rulings. Nothing in the record even suggests the order was based on any agreement among the various parties. We conclude the credit reporting agencies are not precluded from challenging those rulings unfavorable to them. We overrule appellants' first point of error.

The Challenged Summary Judgment Motions

In their second and third points of error, appellants contend the court erred in granting the motion for summary judgment on all claims asserted in the third amended petition. In this motion, the credit **[*16]** reporting agencies and Texaco asserted they were entitled to summary judgment on both the antitrust and tortious interference claims because their alleged anti-competitive and tortious acts were justified. Additionally, the credit reporting agencies and Texaco asserted they were entitled to summary judgment on the antitrust claims because appellants (a) lacked standing to bring those claims; and (b) neither the credit reporting agencies nor Texaco participated in the relevant market or conspired together, which are elements necessary to prove the antitrust claims.

When, as here, the trial court does not specify the grounds for granting summary judgment in which more than one ground is alleged, we will affirm the judgment if any of the grounds advanced are meritorious. *Rogers v. Ricane Enterps., Inc., 772 S.W.2d 76, 79, 32 Tex. Sup. Ct. J. 458 (Tex. 1989)*; *Provencio v. Paradigm Media, Inc., 44 S.W.3d 677, 680* (Tex. App.-El Paso 2001, no pet.). Because we conclude the credit reporting agencies and Texaco's conduct was justified, we conclude summary judgment in their favor on all of appellants' claims was proper. In reaching this conclusion, we assume, without deciding, appellants **[*17]** have standing and produced evidence of each of the essential elements of their claims.

HN1[] Justification is an affirmative defense to both an antitrust claim and a claim for tortious interference. *TEX. BUS. & COM. CODE ANN. § 15.05(g)* (Vernon 2002) (antitrust claims); *Calvillo v. Gonzalez, 922 S.W.2d 928, 929, 39 Tex. Sup. Ct. J. 639 (Tex. 1996)* (tortious interference claims). Justification can be based on the exercise of either (1) the party's own legal rights or (2) the party's good faith claim to a colorable right, even though the claim ultimately proves to be mistaken. *Tex. Beef Cattle Co. v. Green, 921 S.W.2d 203, 211, 39 Tex. Sup. Ct. J. 523 (Tex. 1996)*. When the party conclusively establishes it had a legal right to engage in the complained-of conduct, the party's motive for engaging in that conduct is irrelevant. *Id.*

In this case, the credit reporting agencies and Texaco contend their conduct towards appellants was justified under *sections 1681b* and *1681e* of the Fair Credit Reporting Act ("FCRA"). *See* ***HN2***[] *15 U.S.C. §§ 1681b*, *1681e (1993 & Supp. 2002)*. *Section 1681b* specifies under what circumstances credit reporting agencies may release **[*18]** consumer reports. [10] *Id.* *§ 1681b*. *Section 1681e* mandates the credit reporting agencies limit the

---

[10] ***HN3***[] Those circumstances or "permissible purposes" are:

. in response to a court order issued in conjunction with proceedings before a federal grand jury;

. in accordance with the written instructions of the consumer to whom it relates;

. to a person which it has reason to believe intends to use the information in connection with a credit transaction involving the consumer, for employment purposes, in connection with the underwriting of insurance involving the consumer, in connection with a determination of the consumer's eligibility for a license or other benefit granted by a governmental instrumentality required by law to consider the applicant's financial responsibility or status, as a potential investor or servicer in connection with a valuation or assessment of the credit or repayment risks associated with an existing credit obligation, or otherwise has a legitimate business need to the information in connection with a business transaction initiated by the consumer, or to review an account to determine if the consumer continues to meet the terms of the account;

disclosure of consumer reports in accordance with *section 1681b*, and requires reporting agencies ensure the reports are as accurate as possible. *Id. § 1681e*.

[*19] In support of their defense, the credit reporting agencies and Texaco presented evidence showing the complained-of conduct resulted from appellants' obtaining credit reports to determine what negative but accurate information they could attempt to have deleted from their clients' reports, a purpose not listed in *section 1681b*. The credit reporting agencies and Texaco also presented evidence showing that, in their opinion, the deletion of negative but accurate information affects the integrity of the credit reporting process. Because *section 1681e* requires the credit reporting agencies to limit disclosure of reports in accordance with *section 1681b*, the credit reporting agencies and Texaco argued the complained-of conduct was necessary.

In response, appellants argued there are no restrictions under the FCRA in terms of a consumer's right "to dispute the 'completeness' or 'accuracy' of credit report items." *See id.* § 1681(a)(1)(A) (the consumer may dispute any item of information contained in a consumer's file). Moreover, appellants argued, the only remedy granted by FCRA to a credit reporting agency which determines a dispute is "frivolous or irrelevant" is to terminate a reinvestigation, **[*20]** *see id.* § 1681i(a)(3), but pursuant to *section 1681b*, the reporting agency must still provide the report "in accordance with the written instructions of the consumer to whom it relates." Because appellants were acting on behalf of consumers who had granted them powers of attorney, appellants maintained the credit reporting agencies were required to provide the reports. In the alternative, appellants maintained the credit reporting agencies could not avail themselves of the defense of justification because their actions constituted a group boycott which was illegal per se. *See* *Times Herald Printing v. A.H.Belo Corp., 820 S.W.2d 206, 211* (Tex. App-Houston [14th Dist.] 1991, no writ). Finally, with respect to their tortious interference claims, appellants also argued the reporting agencies could not avail themselves of the defense of justification because the "information sheets" the reporting agencies mailed to appellants' clients, informing them of their rights and advising them of some of the risks associated with working with credit clinics, were defamatory on their face.

Before addressing the parties' arguments, we pause to note that, in addressing the motion **[*21]** for summary judgment on all claims in the third amended petition, both at the trial court level and on appeal, appellants limited their arguments to the credit reporting agencies. Although appellants were entitled to present argument as to Texaco also, appellants failed to do so. *See* *Malooly Bros., Inc. v. Napier, 461 S.W.2d 119, 121, 14 Tex. Sup. Ct. J. 140 (Tex. 1970)*. Thus, they have waived any error with respect to Texaco. *See* *Morriss v. Enron Oil & Gas Co., 948 S.W.2d 858, 871* (Tex. App.-San Antonio 1997, no writ).

We now turn to appellants' argument that the justification defense does not apply with respect to the letters the credit reporting agencies sent to appellants' clients because the letters were defamatory on their face. We agree with appellants that ***HN4***[] the justification defense is not available where the plaintiff pleads and proves methods of interference that are tortious in themselves, such as defamation. *See* *Prudential Ins. Co. v. Fin'l Rev. Servs., Inc., 29 S.W.3d 74, 80, 43 Tex. Sup. Ct. J. 980 (Tex. 2000)*. However, we disagree that the complained-of letters in this case were defamatory. As the reporting agencies note, the letters do not specifically refer to appellants **[*22]** and are consistent with disclosures required under current state and federal law. *See, e.g.*, *15 U.S.C. § 1679c (2002)* (providing specifically that credit repair organizations inform consumers of their rights and stating what the organizations must say); *TEX. FIN. CODE § 393.105* (Vernon 1998) (same). We conclude appellants' contention lacks merit and the reporting agencies could avail themselves of the justification defense with respect to the letters.

We next address appellants' argument that the justification defense does not apply because the credit reporting agencies' conduct constituted a per se illegal group boycott. Appellants correctly argue that ***HN5***[] a party may

---

. in response to a request by the head of a state or local child support enforcement agency under specific circumstances; and

. to an agency administering a state plan under section 454 of the Social Security Act for use to set an initial or modified child support award.

See *15 U.S.C. § 1681b (Supp. 2002)*.

recover for tortious interference and antitrust claims by showing an illegal boycott. *See* *U.S. v. Realty Multi-List, Inc., 629 F.2d 1351, 1362-63 (5th Cir. 1980)* (the per se rule is the trump card of ***antitrust law***, and when an antitrust plaintiff successfully plays it, he need only tally his score); [11] *Wal-Mart Stores, Inc. v. Sturges, 52 S.W.3d 711, 726, 44 Tex. Sup. Ct. J. 486 (Tex. 2001)* (tortious interference). However, as the credit reporting agencies **[*23]** point out, to be subject to per se analysis, the complained-of conduct must be without "redeeming virtue." *Realty Multi-List, 629 F.2d at 1363*. Where conduct is expressly authorized by statute, it cannot be said to be without redeeming virtue. *Hatley v. Am. Quarter Horse Ass'n, 552 F.2d 646, 653 (5th Cir. 1977)*.

In this case, the credit reporting agencies presented evidence showing their actions were in accordance with *section 1681e*, because appellants' use of credit reports to attempt to delete negative but accurate information **[*24]** is not specifically authorized by *section 1681b* and reporting agencies must ensure "maximum possible accuracy of the information" in the report. Additionally, ***HN6***[] *section 1681b* is a permissive statute, specifically stating reporting agencies "may" furnish reports to third parties but only under the listed circumstances. *See* *15 U.S.C. § 1681b*. The credit reporting agencies were

under no statutory obligation to provide appellants with any reports. We conclude the reporting agencies' conduct was authorized by statute, and accordingly is not subject to a per se analysis.

Having concluded the credit reporting agencies could avail themselves of the justification defense, we also conclude the agencies conclusively established the elements of justification because they established their conduct was in accordance with a federal statute. When a defendant conclusively establishes each element of an affirmative defense, he is entitled to summary judgment, unless the plaintiff presents evidence creating a fact issue on one of the elements. *Sci. Spectrum, Inc. v. Martinez, 941 S.W.2d 910, 911, 40 Tex. Sup. Ct. J. 438 (Tex. 1997)*; *Provencio, 44 S.W.3d at 681*. Accordingly, **[*25]** the burden shifted to appellants to present evidence creating a fact issue.

As the credit reporting agencies point out, however, appellants failed to do so. To the extent appellants complain summary judgment on their antitrust and tortious interference claims on the basis of justification was improper, we overrule their second and third points of error.

Because we have concluded summary judgment was proper on the basis of justification, we need not address appellants' remaining points of error. *See* *Rogers, 772 S.W.2d at 79*. We also need not reach the credit reporting agencies' conditional cross-points. *See* *TEX. R. APP. P. 47.1*.

We affirm the trial court's judgment.

TOM JAMES

JUSTICE

End of Document

[11] Because the Texas Antitrust Act is modeled after the Sherman Antiturst Act and the Clayton Act, *see* *15 U.S.C. §§ 1-37a (1997 & Supp. 2002)*, we construe it in harmony with federal judicial interpretations of comparable federal antitrust statutes. *TEX. BUS. & COM. CODE ANN. § 15.04* (Vernon 1987); *Caller-Times Publ'g Co. v. Triad Communications, Inc., 826 S.W.2d 576, 580, 35 Tex. Sup. Ct. J. 509 (Tex. 1992)*.

LexisNexis® Headnotes

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN1[] **Injunctions, Preliminary & Temporary Injunctions**

The granting of a preliminary injunction is a matter which lies within the sound discretion of the district court.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN2[] **Injunctions, Preliminary & Temporary Injunctions**

The party seeking the preliminary injunction must show a substantial likelihood that it will prevail on the merits, that it will suffer irreparable injury without the preliminary injunction, that the threatened injury to the party seeking the injunction outweighs any damage which might be suffered by the opposing party, and that entry of the injunction would not be adverse to the public interest.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Likelihood of Success

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] **Grounds for Injunctions, Likelihood of Success**

The essential purpose of a preliminary injunction is to preserve the status quo. The party seeking the injunction need not show conclusively that it will prevail on the merits. It is only necessary that the movant establish a reasonable probability of success on the merits.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

HN4[] **Injunctions, Grounds for Injunctions**

Where the defendant is shown to have engaged in practices prohibited by a statute which provides for injunctive relief to prevent such violations, irreparable harm need not be shown.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > General Overview

Energy & Utilities Law > Oil & Petroleum Products > Gasoline Fuels > Gasoline Dealers & Distributors

HN5[] **Regulated Practices, Trade Practices & Unfair Competition**

The two major purposes of the Oklahoma Unfair Sales Act are to prevent "loss leader selling" and to protect small merchants from large competitors capable of driving them out of business by below-cost sales. Loss leader selling is defined as pricing featured items below cost to entice customers into a store where other merchandise prices are inflated. However, the statute does not require a showing of inflated prices.

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > General Overview

Energy & Utilities Law > Oil & Petroleum Products > Processing & Refining > General Overview

Governments > Legislation > Interpretation

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN6[] **Contracts, Sales of Goods**

In holding that the Oklahoma Unfair Sales Act does not apply where the defendant is the producer (i.e. manufacturer, or, with respect to gasoline, the refiner) as well as the seller of the goods, the Oklahoma Supreme

Court declares that, in determining the scope of the coverage of the Unfair Sales Act, the Act is to be strictly construed.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Business & Corporate Compliance > ... > Sales of Goods > Performance > General Overview

Tax Law > State & Local Taxes > Sales Taxes > General Overview

HN7[] **Regulated Practices, Trade Practices & Unfair Competition**

The beginning point for determining "cost to the retailer" within the meaning of the Oklahoma Unfair Sales Act is to determine the invoice cost of the goods and the replacement cost of the goods. *Okla. Stat. tit. 15, § 598.2(a)* (2001). The replacement cost is the cost per unit at which the goods in question could have been bought by the seller at any time within 30 days before the date of sale. *Okla. Stat. tit. 15, § 598.2(c)*. The beginning point is the lower of these two costs. To this cost, the statute requires that freight, taxes and markup be added, in order to determine the statutory minimum price. *Okla. Stat. tit. 15, § 598.2(a)*. The markup is intended to cover a proportionate part of the cost of doing business. *Okla. Stat. tit. 15, § 598.2(a)*. In the absence of proof of a lower cost of doing business, the statutory markup is six percent of the cost of the goods.

See *Okla. Stat. tit. 15, § 598.5(c)*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN10[] **Regulated Practices, Trade Practices & Unfair Competition**

In the context of *Okla. Stat. tit. 15, § 598.5(c)*, prima facie evidence is such evidence as in the judgment of law is sufficient to establish a fact, and if not rebutted, remains sufficient to establish that fact.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN11[] **Regulated Practices, Trade Practices & Unfair Competition**

A showing of "antitrust injury" is not required by the Oklahoma Unfair Sales Act.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > General Overview

HN12[] **Regulated Practices, Trade Practices & Unfair Competition**

The Oklahoma Unfair Sales Act prohibits, inter alia, the sale of merchandise at less than cost as defined in the Act with an intent and purpose prescribed by the Act where the result is one of the results specified in the Act. *Okla. Stat. tit. 15, § 598.3*. The proscribed intent and purpose is that of 1) inducing the purchase of other merchandise or 2) otherwise injuring a competitor; or 3) impairing or preventing fair competition; or 4) injuring public welfare. *Okla. Stat. tit. 15, § 598.3*. The prohibited result is 1) to tend to deceive any purchaser or prospective purchaser; or 2) to substantially lessen competition; 3) to unreasonably restrain trade; 4) to tend to create a monopoly. *Okla. Stat. tit. 15, § 598.3*. Thus, in order to establish a violation or threatened violation of the Unfair Sales Act, *Okla. Stat. tit. 15, § 598.5(a)*, a plaintiff must prove a below-cost sale, a prohibited intent and purpose and a prohibited result.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN13[] **Regulated Practices, Trade Practices & Unfair Competition**

The first part of *Okla. Stat. tit. 15, § 598.5* is clear. Evidence of below-cost sales is prima facie evidence of one of the prohibited intents (and purposes inasmuch as purposes is synonymous with intent) that of injuring one or more competitors. The second part of the statute is ambiguous. At first glance, it appears, that "intent" modifies the second phrase as well, i.e., evidence of below-cost sales is prima facie evidence of an intent to injure competitors and/or of an intent to destroy or substantially lessen competition. But "to substantially lessen competition" is one of the results that is prohibited by the Oklahoma Unfair Sales Act, not one of the prohibited intents (and purposes).

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN14[] **Regulated Practices, Trade Practices & Unfair Competition**

In the context of *Okla. Stat. tit. 15, § 598.5*, it seems most likely, on balance, that the Oklahoma Legislature intended that evidence of below-cost sales be prima facie evidence both of the intent to injure competitors and of the result of destroying or substantially lessening competition.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN15[] **Regulated Practices, Trade Practices & Unfair Competition**

Under *Okla. Stat. tit. 15, § 598.3*, the "intent and purpose" which must be shown is the intent and purpose (i) of inducing the purchase of other merchandise or (ii) of unfairly diverting trade from a competitor or otherwise injuring a competitor.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN16[] **Regulated Practices, Trade Practices & Unfair Competition**

In the context of *Okla. Stat. tit. 15, § 598.3*, regardless of what the four alternative provisions may mean when analyzed one by one (e.g. regardless of whether "antitrust injury" is required as to the second, third and fourth of the four alternative "result" provisions), it is clear that these provisions are enacted in the alternative and, accordingly, that a showing of only one of them is necessary. Thus, the "result" which must be shown is that the below cost sales: 1) Tend to deceive any purchaser or prospective purchaser, or 2) Substantially lessen competition, or 3) Unreasonably restrain trade, or 4) Tend to create a monopoly in any line of commerce.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN17[] **Regulated Practices, Trade Practices & Unfair Competition**

In the context of *Okla. Stat. tit. 15, § 598.3*, as to deception, inherent in the below cost sale of one commodity among hundreds or thousands sold at the same establishment is the implication that the pricing of the item which is sold below cost is indicative of pricing generally at the same establishment.

Opinion

MEMORANDUM OPINION

This matter comes before the court on the plaintiff's motion for a preliminary injunction.

I.

Introduction

The plaintiff and the defendant Sam's East, Inc. are competitors in the retail gasoline business in central Oklahoma. The plaintiff asserts that Sam's East, Inc. has violated the *Oklahoma Unfair Sales Act* by selling gasoline below cost at its three central Oklahoma stores. Following the briefing of plaintiffs motion for a preliminary injunction, an evidentiary hearing was held on the motion. Accordingly, the court has the benefit of the excellent briefs of counsel and of the very helpful presentations at the evidentiary hearing.

Having **[*2]** carefully considered the briefs, the evidence presented at the hearing and the arguments of counsel, the court has concluded that plaintiff has made the showing necessary for entry of a preliminary injunction on the basis on the findings of fact and conclusions of law set forth below.

II.

Findings of Fact

The plaintiff, Star Fuel Marts, LLC, is a limited liability company organized under the laws of the state of Kansas. Its members are residents of Oklahoma, Kansas and Nevada.

Sam's East, Inc., is an Arkansas corporation having its principal place of business in the State of Arkansas. Sam's is a subsidiary of Wal-Mart Stores, Inc. Sam's does business as Sam's Club. [1]

There is complete diversity of citizenship between the plaintiff and the defendant. The amount in controversy exceeds the jurisdictional amount.

Plaintiff operates **[*3]** 28 retail gasoline and convenience store outlets in the Oklahoma City area. These outlets now operate as Shell gas stations; they were previously operated as Texaco stations. Plaintiff began operating the stations on March 1, 2001. The stations purchased and operated by plaintiff had been Texaco's company-operated locations in the Oklahoma City area.

Defendant operates three Sam's Club stores in the Oklahoma City area. They are located at the intersection of Pennsylvania Avenue and Memorial Road (Store No. 8117), on South MacArthur Blvd. near Interstate 40 (Store No. 8289), and in Midwest City (Store No. 8241). Sam's describes its Sam's Club stores as membership wholesale stores. Consumers and businesses pay annual membership fees for the right to purchase goods at the Sam's Clubs. The membership fee ranges from $ 30 to $ 100 per year, depending upon the type of membership. Nationally, there are 517 Sam's Club stores and 187 Sam's gasoline sales operations.

In 2001, Sam's started selling gasoline at its three Sam's Club stores in central Oklahoma. The Sam's gasoline operations in central Oklahoma are all located on or directly adjacent to Sam's Club store premises. Gas sales started **[*4]** at the store at Pennsylvania Avenue and Memorial Road on June 5, 2001, slightly more than three months after plaintiff acquired and started operating its stations in the Oklahoma City area.

Plaintiff has a policy, consistent with the *Oklahoma Unfair Sales Act*, of marking its gasoline products up by at least six percent over laid-in cost. Laid-in cost is the cost of the product, plus freight and applicable taxes. After plaintiff started operating its stations in central Oklahoma, plaintiffs managers noticed that Sam's was becoming very aggressive in pricing its gasoline. This led plaintiff to investigate the possibility that Sam's was pricing its gasoline at a level below that permitted by the *Unfair Sales Act*.

Both parties agreed that the market for the sale of gasoline in the Oklahoma City metropolitan area is highly competitive and has been highly competitive for a number of years. It was competitive before Sam's entered the market with its gasoline operations at its three central Oklahoma stores, and the market continues to be highly competitive.

At the Memorial Road store, both members and non-members may purchase gasoline. Gasoline is sold to club members at the Memorial Road **[*5]** store at a five cent per gallon discount. At the other two stores, gasoline is sold to members only. At the Memorial Road store, purchases by members account for 90 percent of gasoline sales; non-members purchase only ten percent of the gasoline sold there.

The Sam's gasoline operations at its three central Oklahoma stores sell only unleaded and premium gasoline. Premium accounts for 15 percent, or less, of the gasoline sold. The balance is unleaded.

Notwithstanding Sam's assertions to the contrary, the evidence clearly establishes that the gasoline operations are integral to the operations of the store facilities where the gasoline facilities are located. More importantly for purposes of this case, it is equally clear that the gasoline selling operations at the three central Oklahoma stores play an important role in Sam's marketing strategy at those stores. As indicated by plaintiffs Exhibit 25, from Sam's Manager's Manual:

> GAS IS A GREAT BENEFIT TO THE CLUB
> . Gas increases membership. Our members recognize the value and convenience gas adds to the Club. Gas drives both new membership sign-ups and increases renewal rates.

---

[1] This memorandum opinion relates only to defendant Sam's East. It the court's understanding that an agreed resolution of this matter is pending as to defendant Murphy Oil USA, Inc.

. Gas increases frequency of shopping **[*6]** and total purchase by our Members. In addition to gas sales, the Members buying gas also shop in the Club more frequently and purchase more.

. Gas increases total box sales and profits in the Club. Sales and profits at the gas station go to Division 59, which rolls into total box results for the Club.

Plaintiff's Exhibit 25.

Significantly, the same exhibit also states that "our members understand gas prices. They will recognize the outstanding value we offer." This, in combination with the fact that "the Sam's Gas Station is a highly visible extension of the Club," *id.,* and viewed in light of the testimony of Sam's managers at the hearing, convinces the court that the gasoline operations at these stores are not only integral to the stores themselves, they make up an important component of Sam's strategy for projecting a low price image to the buying public.

Acting on its suspicion that Sam's might be pricing its gasoline below statutory costs, plaintiff undertook an investigation of Sam's gasoline pricing. It is relatively easy to ascertain, between very narrow upper and lower limits, the retail cost of premium and unleaded gasoline in the Oklahoma City market for **[*7]** any given day. This information is available in price information services to which gasoline retailers may subscribe. One such service is DTN FastRacks. Using the DTN FastRacks service, plaintiff compared the day to day wholesale cost of gasoline in the Oklahoma City market with Sam's day to day retail prices at the pump. Sam's retail prices at the pump were photographically documented.

Exhibit A to plaintiff's Exhibit 1 is a spreadsheet showing sales, cost and price information for the gasoline operation at Sam's Memorial Road store for the period beginning December 7, 2001 and ending July 31, 2002. During that period, there were 41 days on which the member price for unleaded gasoline at the Memorial Road store was below actual laid-in cost (i.e., the wholesale price of the product, plus applicable taxes and freight charges for getting the product delivered to the station).

For the month of December, 2001, Sam's had a negative gross profit (i.e., total sales minus cost of goods sold, ignoring operating expenses) on gasoline sold at the Memorial Road store. [2] For the year to date through December 2001, after deducting operating expenses, Sam's lost in excess of $ 100,000 in its **[*8]** gasoline operation at the Memorial Road store (ignoring, for the moment, any issues with respect to accounting for membership fees, which will be discussed below). For the year to date through January, 2002 (an accounting period which would have begun in mid-2001 when Sam's started selling gasoline at the Memorial Road location), Sam's made a gross profit on gasoline sales, before deduction of operating expenses, of less than $ 10,000. The gross margin (gross profit as a percentage of net sales) was less than six tenths of one percent (which should not be confused with the six percent markup required by the *Unfair Sales Act* in the absence of proof of lower costs of operation). For the six months ending July 31, 2002, Sam's made a gross profit on gasoline sales at the Memorial Road store of less than $ 10,000. This again amounted to a margin of approximately six tenths of one percent. For the same period, the gasoline segment of Sam's business at the Memorial Road store posted a net operating loss in excess of $ 100,000.

[*9] Turning to the Sam's Club on Interstate 40, for the year to date through January, 2002 (which, again, would have begun in mid-2001 when gasoline sales started), Sam's gross profit on gasoline sales amounted to less than $ 100,000 (a margin of slightly over two percent), and the gasoline sales operation resulted in a net operating loss, after deduction of operating expenses, in mid-five figures. Plaintiff's Exhibit 14. For the six months ended July 31, 2002 at the same store, the gross profit percentage (again, without allowing for operating expenses) was less than two percent. After deduction of operating costs, the gasoline operation at the Interstate 40 store lost more than $ 20,000 for the year to date through July, 2002.

One of the matters in contest at the hearing was the appropriate approach to allocating operational costs to the gasoline operations at the three Sam's stores which are involved here. Plaintiff, at least for the most part *(see,* e.g.,

---

[2] The court will, in the main, refer only generally to dollar amounts and other quantitative matters, because much of this information is commercially sensitive and has been treated by the parties as being confidential.

plaintiff's Exhibit 29), used Sam's internally reported operational costs. On the other hand, Sam's preferred to employ an approach to cost allocation which was adopted for the purpose of this litigation and which dramatically **[*10]** reduced the operational costs attributable to the gasoline business at the three stores. As is discussed in more detail below, the court, in most respects, rejects Sam's revisionist approach to allocation of operational costs.

Plaintiffs Exhibit 29 analyzes Sam's gasoline operation at the Memorial Road store for the period beginning December 7, 2001 and ending July 31, 2002, taking into account Sam's operational costs as internally reported, and not as revised by Sam's for litigation purposes. For that period, deducting Sam's cost of operations as internally reported, on a per gallon basis for unleaded gasoline, Sam's sold unleaded gasoline below statutory costs (i.e., laid-in costs plus actual cost of operation where that is less than six percent) 99 times, based on member prices, which accounted for approximately 90 percent of sales. Applying a six percent markup (rather than using actual internally reported operating costs), the product was sold below cost 149 times during the same period. *See* plaintiffs Exhibit 32.

Turning to the Midwest City store, and focusing on gasoline operations at that store for the fiscal year to date through January, 2002, Sam's gross profit **[*11]** on gasoline sales amounted to something in excess of $ 100,000, for a 2.2 percent markup, which resulted in a loss in excess of $ 10,000 after deduction of operating expenses and aside from issues as to allocation of membership fees.

Membership fees, which, of course, are an important aspect of Sam's approach to doing business, deserve special attention. Obviously, the fact that Sam's collects membership fees from consumers and businesses complicates the reckoning of the actual financial results of any aspect of store performance. For some purposes, Sam's has suggested that membership fees should be treated as a negative expense and attributed in part to the gasoline operation. However, as internally reported, the annual membership fees do not reduce Sam's cost of gasoline and do not reduce other costs such as the cost of electricity, rent, taxes and wages. Sam's members are not required to buy gasoline at Sam's, and Tom Skinner, Sam's director of operational finance support, acknowledged that it is very likely that some Sam's members buy none of their gas at Sam's. In those cases, none of the membership fee paid by the member should be allocated to gasoline sales. Tr. 277 - 78.

[*12] It is also certainly conceivable that a Sam's Club member could pay his or her thirty dollars and then do nothing with the membership other than purchase gasoline. This might have a significant effect on the member's per-gallon cost of gasoline and would logically, at least as to that member, suggest that Sam's should get the benefit of the membership fee in determining what it costs to sell gasoline to that member. However, as befits Sam's avowed purpose of operating the gasoline business as an extension of the store and for the purpose of conveying a pricing impression to the general public, it is clear to the court from the totality of the evidence that, on the whole, membership fees are paid for the privilege of shopping inside of the store as well as for the purpose of getting the five cent per gallon discount at the pump if the member so desires.

On the basis of the evidence before the court; the fairest conclusion to reach as to membership fees is that the fees certainly can, and, to some extent, should, make a difference in the court's evaluation of Sam's gasoline pricing practices. On the other hand, examination of the results of gasoline sales at the Memorial Road store **[*13]** makes it clear that even a generous allocation of membership fees to the gasoline operation will not make *enough* difference to avoid the conclusion that Sam's has repeatedly priced its gasoline below cost.

Analysis of the membership fees in the context of the overall results of operations at these three stores in late 2001 through July 2002 is facilitated by some of the income statements which were received in evidence at the hearing. Some of these statements (e.g., plaintiffs Exhibits 5, 12 and 19) cover the "total box" results of operations at these three stores for the six months ending July, 2002. Other exhibits isolate the results of the gasoline operations (Division 59) at these three stores. Plaintiffs Exhibit 6 shows the results of operations for December, 2001, plaintiff's Exhibit 7 shows the results of operations for January, 2002, and plaintiffs Exhibit 8 shows the results of operations for February through July, 2002, all as to the Memorial Road store. Plaintiffs Exhibits 13 through 15 and 20 through 22 contain the same information as to the Interstate 40 and Midwest City stores, respectively.

These exhibits show that, for the eight months ended July, 2002, gasoline **[*14]** operations at these three stores lost nearly $ 250,000. [3] Looking at the Memorial Road store alone, for February through July, 2002, the net operating loss on gasoline sales, before allocation of membership fees, was nearly $ 170,000. Allocation of 14% of membership fee income attributable to the Memorial Road store for that period (a percentage suggested by Sam's as a fair indication of the contribution to gross revenues made by the gasoline operation) still leaves the gasoline operation at the Memorial Road store in a net operating loss position as a result of Sam's consistent below-cost sales of gasoline. Obviously, the effect of allocation of membership fees will vary depending upon the store involved, depending upon the period of operations being scrutinized, and depending upon the theory by which the percentage allocation is effected. One thing remains clear, however. As the experience at the Memorial Road store indicates, no rational allocation of membership fees is sufficient, as a mathematical proposition, to keep Sam's from having repeatedly sold gasoline below statutory cost.

[*15] In attempting to justify their pricing behavior, Sam's managers referred during the hearing to rebates which are given to gasoline purchasers by some of Sam's competitors, either on a percent basis or on a cents-per-gallon basis. These competitors who have paid rebates include Citgo, Murphy Oil and Shell. This evidence is of limited relevance, because no cogent showing was made that would enable the court to find that the net (after rebate) prices charged by Sam's competitors provided a basis for a "meeting competition" defense. However, the Shell rebate perhaps deserves some additional attention. The Shell MasterCard rebate program does not reduce the price of the gasoline paid by the customer to the retailer. The customer pays the full posted pump price for gasoline. Under this program, the customer gets no discount from the retailer. Instead, the Shell MasterCard rebate program is a co-branded credit card program between Shell and a financial institution which gives the customer a five percent rebate on future purchases of Shell gasoline if he or she uses the card to purchase Shell gasoline. The purchaser also can receive a one percent rebate on any other product which he or she **[*16]** might purchase with the co-branded MasterCard. For instance, the consumer could use his Shell MasterCard to purchase gasoline at Sam's, and would receive a one percent rebate. None of the rebate goes to the fuel retailer. This rebate program is not relevant to the issues in this case.

When Sam's sets its gasoline prices, as it does on a daily or nearly daily basis, it does not perform any calculations to determine whether a competitor's price is legal or illegal, although Richard Ezell, the operations manager for the fuel division of Sam's, acknowledged that Sam's has a general idea of whether a price is legal or illegal. Mr. Ezehl also acknowledged that although he has no way to determine with certainty whether a competitor's price is legal, it is not difficult to get a general idea as to what a competitor's product cost would be. Sam's has not taken any steps to disclose to its members or to the general public that it has sold gasoline below cost. This was explained on the basis that Sam's does not feel that it has sold below cost. This proposition is persuasively contradicted by Sam's own evidence as well as the evidence presented by the plaintiff.

At the hearing, Sam's attempted **[*17]** to meet the plaintiff's evidence (which was largely based upon Sam's own internal financial reporting) as to Sam's below cost sales of gasoline by preparing some revised financial reports which, if found to be persuasive, would cast a substantially more favorable light upon Sam's gasoline pricing activity. Sam's main exhibits portraying its proposed calculation of operating expenses for the gasoline operation were defendant's Exhibits 8, 9 and 10, which related, respectively, to the Memorial Road store, the Midwest City store and the Interstate 40 store. At the hearing, the questions related principally to defendant's Exhibit 8, relating to the Memorial Road store, as an exemplar. The format of Exhibits 9 and 10 is identical. These exhibits do not reflect Sam's routine internal reporting of the costs incurred with respect to the gasoline operations at these three stores. To the contrary, defendant's Exhibits 8, 9 and 10 are made-for-litigation exhibits.

On the basis of the allocation of expenses for the Memorial Road gasoline operation set forth in Defendant's Exhibit 8, Sam's comes out with a 3.53 percent (on the basis of cost of goods sold) expense ratio before allocation, of membership **[*18]** income to the gasoline operation, and a 1.24 percent cost of operation after allocation of

[3] The transcript reflects (Tr. 271) that Mr. Skinner acknowledged on cross examination that the net operating loss for the gasoline operations for this period for the three stations exceeded $ 300,000. The court's review of the exhibits suggests that the correct amount is slightly less than $ 250,000.

membership income. Mr. Skinner, Sam's director of operational finance support, offered defendant's Exhibits 8 through 10 as a reflection of the true cost of operations for each location with the exception of the management fee (not to be confused with membership fees), which he suggested was potentially *overstated.* Tr. 284.

The beginning point for evaluation of Sam's proposed allocation of operating costs to the gasoline operations is to look at the big picture. At the Memorial Road store, gasoline operations generated 14 percent of the revenues, but Sam's proposes to allocate only three percent of operating expenses to that source of revenue. Tr. 258.

Comparing the expense categories shown on plaintiffs Exhibit 2 - generated by Sam's - with the expenses actually allocated, regardless of how small the allocation might be, on defendant's Exhibits 8, 9 and 10, it is evident that, in allocating expenses to the gasoline operation, Sam's attributed no costs in the categories of managers' salaries, assistant manager wages, advertising, accident costs, security service, contributions and maintenance, **[*19]** to name only some of the more prominent items which are entirely absent from Sam's proposed allocation of operating costs. It is abundantly clear from the evidence, however, that managers and assistant managers do devote more than negligible amounts of time to their gasoline operations. Sam's approach to allocation of costs to the gasoline operation is perhaps best exemplified by its explanation of the reason for which it allocates no advertising cost to the gasoline operation. Mr. Skinner testified tamely that the "gas station itself doesn't perform any advertising functions." Tr. 235. He went on to explain that the gas station relies simply on word of mouth advertising, apparently presupposing that Sam's advertising benefits only the specific items advertised in any specific instance. Likewise, with respect to charitable contributions, none of which are attributed to the gasoline operation; Mr. Skinner explained, in a non sequitur, that the "gas station doesn't participate in any charitable fund raising or anything by itself, most of that is done inside the club." Tr. 241.

For December 2001 through July 2002, Sam's attributed approximately $ 2,500 per month in occupancy cost to **[*20]** the gasoline operation for the Memorial Road store. To his credit, Mr. Skinner declined to proffer that as a fair amount. Tr. 267. Using Sam's internal rate of return guidelines, Mr. Skinner acknowledged that a fair occupancy cost would be more like $ 6,500 per month. Tr. 268. Likewise, for litigation purposes, Sam's attributes only seven tenths of one percent of its property insurance (actually self-insurance) cost to the gasoline operation. Tr. 274. No credible substantiation for this minuscule allocation was offered. The court finds that Sam's proposed cost allocation is obviously contrived and equally untenable. In fact, as Mr. Skinner acknowledged at the hearing, Sam's operating expenses, as allocated internally, exceed the gross profit on the gasoline operations at these three stores. Tr. 271. Plaintiffs Exhibits 8, 15 and 22.

As shown by Sam's own internal profit and loss statements, even after allocating membership income to the gasoline operations by way of reduction of costs, Sam's still loses money on gasoline sales. Tr. 272. Gasoline sales are, as a matter of fact as well as in Sam's business plan and in Sam's internal profit and loss statements, an integral part of a **[*21]** unitary operation. As is stated above, one of the predominant purposes of the gasoline operation, at least at these three central Oklahoma stores, is to project a pricing image to the public (as per Sam's management manual discussed above). Despite having been given two chances to do so in response to questions from the court, Dr. Joseph Jadlow, Sam's expert witness, was unable to articulate an economic rationale for consistent pricing of unleaded gasoline at a level that results in consistent losses on gasoline sales. Tr. 223. The answer, of course, is evident. There would be no rationale for this course of conduct if the gasoline operation were a free standing business. The purpose of the gasoline business at these three stores is to pull customers in and to do so if need be by operating the gasoline facilities at a loss. This is not intrinsically immoral, but is illegal if it violates the *Unfair Sales Act*.

As is discussed on pp. 18 - 23, below, plaintiff has the benefit of a showing which amounts, as a matter of law, to prima facie evidence of intent to injure competitors and to destroy or substantially lessen competition. The evidence also establishes this intent to injure as **[*22]** a factual matter. One of the very purposes of wholesome, lawful competition is to best (i.e. "injure") competitors in the marketplace. The intent to do that becomes intent to injure a competitor or competitors in the statutory sense when the means used are the means which are proscribed by statute. Given the volumes of gasoline sold by Sam's and the proximity of Sam's stations to plaintiff's stations in central Oklahoma, there is no room for doubt that plaintiff has in fact been "injured" by Sam's below-cost sales. As is discussed below, this analysis requires no consideration of Sam's overall market power, of whether Sam's has the power to drive plaintiff out of business, or of the extent to which competition has been lessened.

Sam's gasoline facilities at the three central Oklahoma stores are, by any standard, high volume operations. At the Memorial Road store, Sam's monthly volume of gasoline sold is several-fold the typical volume for a retail gasoline station in Oklahoma City. As has been noted, plaintiffs policy is to price its gasoline at or above the level required by the *Unfair Sales Act*. In fact, plaintiffs stations typically price their product toward the high end of the **[*23]** gasoline pricing spectrum in the Oklahoma City market. Customers have told plaintiff's personnel that, because of the pricing difference, they are going to buy their gasoline at Sam's rather than at plaintiff's stations. Given the very substantial volumes of gasoline sold by Sam's and the price gap between plaintiffs prices and Sam's prices, the court easily concludes that, as was suggested by Alan Wilkerson, plaintiff's chief operating officer, plaintiff has lost volume to Sam's. Obviously, the evidence does not disclose the extent of that loss of volume, much less what the loss of volume would have been if Sam's had always sold its product at a barely legal price. The most salient indicator provided by the evidence as to the impact of Sam's pricing is plaintiffs description of the difference in its volume before and after the inception of Sam's gasoline sales. Any effort at precise quantification is highly suspect. The evidence persuades the court, however, that Sam's entry into the market, with the approach to pricing which has been proven and is described above, has had a negative impact upon plaintiff's sales volume. The price gap leaves plaintiff's customers with the impression **[*24]** that plaintiff is gouging. As is discussed below, this pricing behavior is deceptive and, as such, is one of the alternative results of below-cost pricing which may be shown in order to establish a violation of the *Unfair Sales Act*. Sam's pricing behavior has, in turn, had a negative effect on the goodwill of plaintiff's customers. The loss in volume is not quantified by the evidence and may well be unquantifiable. Even more so, the impact of the loss of goodwill is not quantifiable.

III.

Conclusions of Law

HN1[] The granting of a preliminary injunction is a matter which lies within the sound discretion of the district court. *Lundgrin v. Claytor, 619 F.2d 61 (10th Cir. 1980)*. ***HN2***[] The party seeking the preliminary injunction must show a substantial likelihood that it will prevail on the merits, that it will suffer irreparable injury without the preliminary injunction, that the threatened injury to the party seeking the injunction outweighs any damage which might be suffered by the opposing party, and that entry of the injunction would not be adverse to the public interest. *Id.*

HN3[] The essential purpose of a preliminary injunction is to preserve the status quo. *Atchison, Topeka and Santa Fe Railway Co. v. Lennen, 640 F.2d 255, 261 (10th Cir. 1981).* ***[*25]*** The party seeking the injunction need not show conclusively that it will prevail on the merits. It is only necessary that the movant establish a reasonable probability of success on the merits. *Id.*

There is substantial authority for the proposition that, ***HN4***[] where the defendant is shown to have engaged in practices prohibited by a statute which provides for injunctive relief to prevent such violations, irreparable harm need not be shown. *Atchison, 640 F.2d at 259*. The court concludes that this rule is applicable in the case at bar and that irreparable injury need not be shown. However, the court also concludes that the harm which plaintiff has suffered as a result of Sam's approach to gasoline pricing is both irreparable and impossible to quantify with precision.

HN5[] The two major purposes of the *Unfair Sales Act* are to prevent "loss leader selling" and to protect small merchants from large competitors capable of driving them out of business by below-cost sales. *So-Lo Oil Co., Inc. v. Total Petroleum, Inc., 1992 OK 71, 832 P.2d 14 at 17 (Okla. 1992)*. The court, in So-Lo, defined loss leader selling as pricing featured items below cost to entice customers into a store where other **[*26]** merchandise prices are inflated. Although Sam's would not be in business long if the results of its operations inside the store were no better than the results of its gasoline operation, the evidence certainly does not establish - and plaintiff has not attempted to assert - that prices inside the store are inflated. However, the statute does not require a showing of inflated prices.

In a case directly involving the *Oklahoma Unfair Sales Act*, the United States Supreme Court has concluded that the selling of selected goods at a loss in order to lure customers is not only a destructive means of competition, it also plays on the gullibility of customers by leading them to expect what generally is not true, namely, that a store which offers such an amazing bargain is full of other such bargains. *Safeway Stores, Inc. v. Oklahoma Retail Grocers Assoc., 360 U.S. 334, 340, 3 L. Ed. 2d 1280, 79 S. Ct. 1196 (1959)*. ***HN6***[] In holding that the *Unfair Sales Act* does not apply where the defendant is the producer (i.e. manufacturer, or, with respect to gasoline, the refiner) as well as the seller of the goods, the Oklahoma Supreme Court has declared that, in determining the scope of the coverage of the *Unfair Sales Act* ***[*27]*** , the Act is to be strictly construed. *So-Lo, 832 P. 2d at 18-19*. The case at bar presents no issue as to coverage; that is uncontested here.

HN7[] The beginning point for determining "cost to the retailer" within the meaning of the Act is to determine the invoice cost of the goods and the replacement cost of the goods. 15 O.S. 2001 *§ 598.2(a)*. The replacement cost is the cost per unit at which the goods in question could have been bought by the seller at any time within 30 days before the date of sale. *§ 598.2(c)*. The beginning point is the lower of these two costs. To this cost, the statute requires that freight, taxes and markup be added, in order to determine the statutory minimum price. *§ 598.2(a)*. The markup is intended to "cover a proportionate part of the cost of doing business." *Id.* In the absence of proof of a lower cost of doing business, the statutory markup is six percent of the cost of the goods.

In the case at bar, there is little controversy as to the application of the cost and markup formula in *§ 598.2*. The real controversy revolves around the construction and application of *§§ 598.3* and *598.5(c)*. *Section 598.3* provides, in its entirety, as follows:

> ***HN8***[] It is **[*28]** hereby declared that any advertising, offer to sell, or sale of any merchandise, either by retailers or wholesalers, at less than cost as defined in this act with the intent and purpose of inducing the purchase of other merchandise or of unfairly diverting trade from a competitor or otherwise injuring a competitor, impair and prevent fair competition, injure public welfare, are unfair competition and contrary to public policy and the policy of this act, *where the result of such advertising, offer or sale is to tend to deceive any purchaser or prospective purchaser, or to substantially lessen competition, or to unreasonably restrain trade, or to tend to create a monopoly in any line of commerce.*

15 O.S. 2001 *§ 598.3* (emphasis added).

> *Section 598.5(c)* of Title 15 states, in its entirety, as follows:
>
> ***HN9***[] (c) Evidence of advertisement, offer to sell, or sale of merchandise by any retailer or wholesaler at less than cost to him shall be prima facie evidence of intent to injure competitors and to destroy or substantially lessen competition.

Sam's has repeatedly sold unleaded gasoline below statutory costs, so plaintiff has the benefit of the statutory boost provided **[*29]** by *§ 598.3*. Specifically, the evidence of the sales of gasoline below cost is to be treated as "prima facie evidence of intent to injure competitors and to destroy or substantially lessen competition."

Surprisingly, the Oklahoma Supreme Court has not squarely specified the showing which must be made to satisfy the second, third and fourth of the four alternative "results" required by the final portion of *§ 598.3* (namely, substantial lessening of competition or unreasonable restraint of trade or tendency to create a monopoly in any line of commerce). Sam's has understandably urged that the relatively stringent concepts which are firmly embedded in federal ***antitrust law*** should be imported into *§ 598.3*, so as to require a showing of the relevant market, market power, and an overall lessening of competition within the relevant market. To the extent that the decisions of the Oklahoma Supreme Court shed any light on these issues, they suggest a more relaxed approach to resolution of the issues as to lessening of competition, restrain of trade and creation of a monopoly. For that reason, and because the reasoning of the Honorable David L. Russell on similar issues is quite persuasive, **[*30]** the court disagrees with Sam's on these points.

Turning first to the guidance available from the Oklahoma Supreme Court, *Diehl v. Magic Empire Grocers Ass'n, 399 P.2d 460 (Okla. 1964)* and *Glenn Smith Oil Co. v. Sheets, 1985 OK 56, 704 P.2d 474 (Okla. 1985)* are instructive.

In Diehl, the defendant grocer was clearly advertising (and presumably selling) popular grocery items below cost. *Diehl 399 P. 2d at 462*. The court quoted *§ 598.3* and *§ 598.5(c)*, both of which are quoted above. The court was thus cognizant of the requirements of those sections. After concluding that a pricing violation had occurred, at least by way of advertisement (and advertisement alone is sufficient under *§ 598.3*), the court appears to have concluded that that was the end of the matter. *Id. 399 P. 2d at 463*. This approach, if it indeed was the approach employed by the court in Diehl, gives sweeping effect to the prima facie evidence provision of *§ 598.5*.

Glenn Smith Oil v. Sheets arose from a "gas war" in Muskogee. *Glenn Smith Oil, at 475*. Plaintiffs gasoline station was located close to defendant's station. Defendant's station was clearly demonstrated to have been selling **[*31]** gasoline below cost. In granting an injunction, the trial judge stated that: "I have no trouble at all finding that Mr. Glenn Smith is financially damaged by his competitor selling gas eight cents cheaper, within a few blocks under similar sales circumstances." *Id. at 476*. Then, after quoting the prima facie evidence provision found in *§ 598.5(c)*, the Supreme Court stated that ***HN10***[] prima facie evidence "is such evidence as in the judgment of law is sufficient to establish a fact, and if not rebutted, remains sufficient to establish that fact." *Id at 478*. The court held that the defendant had failed to adequately rebut the prima facie evidence of intent to injure competition. *Id. at 478-79*. The court's opinion includes no discussion at all of any market-wide effect of the defendant's pricing practices. Moreover, the opinion includes no discussion as to destruction or lessening of competition other than the quotation of the trial judge's comments. Thus, with respect to the "result" requirement found in the final portion of *§ 598.3*, the Supreme Court's sole focus was on what might be called the *micro* economic effect of defendant's practices on plaintiff's business.

Entirely **[*32]** absent from Diehl, Glenn Smith or any other reported Oklahoma decision is any indication that the more complex and demanding requirements of federal ***antitrust law*** are to be imported into the court's construction and application of the final portion of *§ 598.3*. [4]

Judge Russell's reasoning, as expressed at length in Ranger Oil Company, Inc. v. Murphy Oil USA, Inc., case no. CIV-01-1297-R, USDC WD Okla. is entirely consistent with the Diehl and Glenn Smith decisions and fortifies the conclusion of the undersigned that ***HN11***[] a showing of "antitrust injury" as urged by Sam's is not required by the *Oklahoma Unfair Sales Act*. Reading *§ 598.3*, Judge Russell succinctly analyzed the statutory language, as a point **[*33]** of departure for construction of *§ 598.5*, as follows:

> ***HN12***[] The *Unfair Sales Act* prohibits, inter alia, the sale of merchandise at less than cost as defined in the Act with an intent and purpose prescribed by the Act where the result is one of the results specified in the Act. *Okla. Stat. tit. 15, § 598.3*. The proscribed intent and purpose is that of 1) inducing the purchase of other merchandise or 2) otherwise injuring a competitor; or 3) impairing or preventing fair competition; or 4) injuring public welfare. *Id.* The prohibited result is 1) to tend to deceive any purchaser or prospective purchaser; or 2) to substantially lessen competition; 3) to unreasonably restrain trade; 4) to tend to create a monopoly. *Id.* Thus, in order to establish a violation or threatened violation of the Unfair Sales Act, *see Okla. Stat. tit. 15 § 598.5(a)* a Plaintiff must prove a below-cost sale, a prohibited intent and purpose and a prohibited result.

Order of Russell, J. in Ranger Oil, September 17, 2002. [5]

---

[4] It is perhaps also noteworthy at this point that, in *Oklahoma Retail Grocers Ass'n v. Wal-Mart Stores, Inc., 605 F.2d 1155*, Wal-Mart stipulated that selling or offering to sell merchandise at less than cost "would destroy or lessen competition" *Id. at 1157*.

[5] It is arguable that the third and fourth items identified by Judge Russell as proscribed intents and purposes are actually legislative declarations of the *effects* of the first two proscribed intents and purposes. That possible variation in construction is immaterial on the facts of this case.

[*34] Having parsed *§ 598.3* as set forth above, Judge Russell then turned to *§ 598.5*, and specifically to the question of the statutory boost set forth in *§ 598.5*: Evidence of sales below cost "shall be prima facie evidence of intent to injure competitors and to destroy or substantially lessen competition." Because the court is entirely in agreement with Judge Russell's reasoning as to the effect of this provision, it is quoted at length:

> ***HN13***[] The first part of this statue is clear. Evidence of below-cost sales is prima facie evidence of one of the prohibited intents (and purposes inasmuch as purposes is synonymous with intent) that of injuring one or more competitors. The second part of the statue is ambiguous. At first glance, it appears, that "intent" modifies the second phrase as well, i.e., evidence of below-cost sales is prima facie evidence of an intent to injure competitors and/or of an intent to destroy or substantially lessen competition. But "to substantially lessen competition" is one of the results that is prohibited by the Act, not one of the prohibited intents (and purposes). One might question why, if the Oklahoma Legislature had intended that proof of **[*35]** below-cost sales be prima facie evidence of an intent to injure competitors and of a result of destroying or substantially lessening competition, they did not use that language or words to that effect. On the other hand, the Oklahoma Legislature did not say that evidence of below-cost sales shall be prima facie evidence of intent to injure competitors or destroy or substantially less competition. Instead, it used the conjunctive "and" and repeated the word "to" as part of a new infinitive which would have been unnecessary had it intended that evidence of below costs sales be prima facie evidence of disjunctive or alternative intents, only one of which matches in language one of the statutorily proscribed intents. Thus, ***HN14***[] it seems most likely, on balance, that the Oklahoma Legislature intended that evidence of below-cost sales be prima facie evidence both of the intent to injure competitors and of the result of destroying or substantially lessening competition, as Plaintiff argued in its response to Defendant's reply brief.

Id. at 4-5 (emphasis in original). Thus, Judge Russell rejected the assertion of the defendant in Ranger Oil to the effect **[*36]** that plaintiff must present evidence as to the relevant market, the competitors in that market, the defendant's market share, market power to drive out competitors, and related matters which may loosely and collectively be placed under the heading of "antitrust injury." *Id.* at 2.

The court accordingly concludes that, ***HN15***[] under *§ 598.3*, the "intent and purpose" which must be shown is the intent and purpose (i) of inducing the purchase of other merchandise or (ii) of unfairly diverting trade from a competitor or otherwise injuring a competitor. (It may well be, under Judge Russell's construction, that impairing or preventing fair competition or injuring public welfare may also, alternatively, be shown.) The evidence clearly establishes and the court accordingly finds and concludes that Sam's consistent practice of pricing gasoline below cost did have the intent and purpose of inducing the purchase of other merchandise. This much is shown, if by no other evidence, than by Sam's internal management manual as discussed above. The court also concludes that this conduct had the intent of unfairly diverting trade from a competitor and that it did impair fair competition. The first portion **[*37]** of *§ 598.3* is easily satisfied in this case.

This brings the court to the "result" language which is set forth in the final portion of *§ 598.3*. ***HN16***[] Regardless of what those four alternative provisions may mean when analyzed one by one (e.g. regardless of whether "antitrust injury" is required as to the second, third and fourth of the four alternative "result" provisions), it is clear that these provisions are enacted in the alternative and, accordingly, that a showing of only one of them is necessary. Thus, the "result" which must be shown is that the below cost sales:

1. Tend to deceive any purchaser or prospective purchaser, or
2. Substantially lessen competition, or
3. Unreasonably restrain trade, or
4. Tend to create a monopoly in any line of commerce.

As is discussed above, we do have in this case prima facie evidence of intent to injure competitors and to destroy or substantially lessen competition, within the contemplation of *§ 598.5*. The court has concluded, consistently with Judge Russell's conclusion, that the prima facie showing encompasses both intent to injure competitors and the result of destroying or substantially lessening competition, **[*38]** as discussed above. The complex and demanding requirements of federal ***antitrust law***, none of which are intimated by any Oklahoma cases under the *Unfair Sales Act*, are thus pretermitted.

It is not necessary for the court to address the third and fourth alternatives with respect to "result" (unreasonable restraint of trade or tendency to create a monopoly). The first two "result" alternatives (tendency to deceive any purchaser or prospective purchaser and tendency to substantially lessen competition) have been established; the first by the evidence presented at the hearing and the second by way of an unrebutted prima facie showing under *§ 598.5(c)*.

HN17[] As to deception, inherent in the below cost sale of one commodity among hundreds or thousands sold at the same establishment is the implication that the pricing of the item which is sold below cost is indicative of pricing generally at the same establishment. *Safeway Stores Inc. v. Oklahoma Retail Grocers Ass'n. Inc., 360 U.S. 334, at 340 (1959)*. That is the intent of Sam's in the case at bar, as shown by the totality of the evidence including particularly the manual which clearly demonstrates that the intent of the gasoline **[*39]** operation is to convey a pricing image to the general public. To the extent that this image is generated by below cost pricing of gasoline, that pricing practice does "tend to deceive any purchaser or prospective purchaser," and the court so concludes. 15 O.S. 2001 *§ 598.3*. *See also,* as to deceptive result, *Harolds Stores, Inc. v. Dillard Department Stores, Inc., 82 F.3d 1533 at 1552(10th Cir. 1996)*, cert. denied *519 U.S. 928, 136 L. Ed. 2d 216, 117 S. Ct. 297(1996)*.

The second of the four alternative statutory results, substantial lessening of competition, is, prima facie, established in this case. The prima facie showing stands unrebutted. That is the end of the matter on this point. *Glenn Smith Oil Co. v. Sheets, 704 P.2d 474, at 478-79 (Okla. 1985)*.

The court accordingly holds for purposes of plaintiffs motion for a preliminary injunction that plaintiff has satisfied the prerequisites of the *Oklahoma Unfair Sales Act*. A consistent course of below-cost sales has been demonstrated. The intent of the sales was as required by the first portion of *§ 598.3*, namely the intent to induce the purchase of other merchandise or to unfairly divert trade from a competitor **[*40]** or otherwise injure a competitor. The *result* requirement has likewise been satisfied, namely deception of any purchaser or prospective purchaser or substantial lessening of competition.

Returning to the *Lundgrin v. Claytor* formulation, the court concludes that plaintiff, as the party seeking the preliminary injunction, has demonstrated a substantial likelihood that it will prevail on the merits. Plaintiff has made a strong factual showing. To the extent that Sam's defenses are factual, they have been found wanting. For the most part, Sam's legal defenses amount to an attempt to engraft federal antitrust principles onto the *Oklahoma Unfair Sales Act*. This attempt is not supported by the statutory scheme and is without warrant in the Oklahoma cases. For that reason, as discussed above, the undersigned joins Judge Russell in rejecting-those contentions.

Although the court has concluded, as discussed above, that the plaintiff, in enforcing this statutory claim, need not show irreparable injury, the court also finds that irreparable injury has been demonstrated. Specifically, plaintiff has persuaded the court that Sam's below cost sales of gasoline have had an inherently difficult **[*41]** to measure effect both on plaintiff's sales volume and on the good will plaintiff enjoys with the consuming public. Plaintiff has not shown, and need not show, that its business is about to be destroyed by Sam's violations. Where, as here, the evidence amply establishes a violation of the clear command of the statute, it is certainly sufficient that plaintiff show, as it has, ongoing commercial injury of a kind and to an extent which is difficult to quantify.

Plaintiff has likewise demonstrated that the injury it will suffer if injunctive relief is not granted outweighs the "injury," if any, which might be suffered by Sam's as a result of the court's grant of preliminary injunctive relief. This is not a situation in which the grant of preliminary injunctive relief will preclude Sam's from undertaking a course of conduct which it would otherwise be free to pursue. To the contrary, the injunction will do no more than put the force of the court's processes behind the statutory command which Sam's is, in any event, bound to obey.

Finally, entry of the injunction will not be adverse to the public interest. To the contrary, for purposes of this diversity case, the Oklahoma legislature, **[*42]** by enacting the *Unfair Sales Act*, has *defined* the only relevant public interest.

The violation having been demonstrated, "the court shall enjoin and restrain or otherwise prohibit, such violation." 15 O.S. *§ 598.5(a)*.

CONCLUSION

Star Fuel Marts has clearly made its case, under the *Oklahoma Unfair Sales Act*, for entry of a preliminary injunction restraining Sam's from continuing to sell gasoline below cost at the three central Oklahoma Sam's Clubs. The parties are directed to collaborate upon the form of a preliminary injunction and to submit the form of an injunction, if one can be agreed upon, within 10 days from the date of this order. In the absence of agreement, the parties shall submit to the court, within 11 days from the date of this order, their respective proposed forms of preliminary injunction.

Plaintiffs Motion for Preliminary Injunction, docket entry no. 34, is accordingly **GRANTED.**

DATED January 29, 2003.

STEPHEN P. FRIOT

UNITED STATES DISTRICT JUDGE

ORDER

In light of the fact that the court has now ruled on plaintiffs motion for a preliminary injunction, plaintiffs request for a temporary restraining order (docket entry no. 34-2) is **[*43]** STRICKEN AS MOOT.

DATED January 29, 2003

STEPHEN P. FRIOT

UNITED STATES DISTRICT JUDGE

Spanish Broad. Sys. v. Clear Channel Communs., Inc.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

To survive a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, a complaint need only provide a short and plain statement of the claim and the grounds on which it rests. A *Rule 12(b)(6)* motion tests not whether the plaintiff will prevail on the merits, but instead, whether the plaintiff has properly stated a claim for which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. Thus, a court may dismiss a complaint for failure to state a claim only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations. In deciding such a motion, the court must accept all the complaint's well-pled factual allegations as true and draw all reasonable inferences in the nonmovant's favor. Moreover, the threshold of sufficiency that a complaint must meet to survive a motion to dismiss is exceedingly low. In an antitrust action, a plaintiff must plead sufficient facts so that each element of the alleged antitrust violation can be identified. In short, the complaint must allege enough facts, rather than conclusions, to show there is a legal claim for which relief can be granted.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Per Se Rule & Rule of Reason, Per Se Violations

An alleged violation of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act which does not fall within the category of per se antitrust violations is analyzed under the "rule of reason." The rule of reason looks beyond the structure of the agreement and requires a plaintiff to show that: (1) a relevant market existed that was affected by the challenged restraint; (2) the defendant possessed "market power" within the relevant market; (3) there was an anticompetitive effect in the intrabrand or interbrand market; and (4) the negative effects on competition are not outweighed by the positive effects on competition.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN5[] Relevant Market, Product Market Definition

A relevant market consists of a geographic and a product component. The relevant market is defined geographically as the area of effective competition. The relevant product market consists of: products that have reasonable interchangeability for the purposes for which they are produced-price, use and qualities considered. A relevant market is a market composed of products which compete with each other; that is, products that are reasonably interchangeable from a buyer's point of view. The question of a relevant market is a factual one.

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN8[] **Antitrust & Trade Law, Sherman Act**

The United States Court of Appeals for the Eleventh Circuit has defined market power narrowly as the ability to raise price significantly above the competitive level without losing all of one's business. Market share may be an alternative to analyzing market power to determine the potential for genuine adverse effects on competition because market power is often difficult to define and requires complex econometric analysis. Market share directly relates to the effectiveness of interbrand competition in minimizing the anticompetitive effects of a restraint on intrabrand competition.

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

Interbrand competition is defined as competition among suppliers or manufacturers of the same generic product, while intrabrand competition is the competition between distributors of the product of a particular supplier or manufacturer.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

To prove an anticompetitive effect a plaintiff must show an actual detrimental effect on competition, or that the behavior had the potential for genuine adverse effects on competition. In short, the plaintiff must show that the defendant's action harmed the consumer. Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws. The purpose of the Sherman Act is not to protect businesses from the working of the market; it is to protect the public from the failure of the market. The law directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

Even unfair means to substitute one competitor for another without more does not violate the antitrust laws. This injury to competition requirement ensures that otherwise routine business disputes between business competitors do not escalate to the status of an antitrust action.

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

A non-competitor in the relevant market normally cannot be liable for a violation of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act. A non-competitor violates *§ 1* of the Sherman Act if it enters a conspiracy already existing between two or more competitors.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN13[] **Monopolies & Monopolization, Actual Monopolization**

See *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN14[] **Monopolies & Monopolization, Attempts to Monopolize**

To prevail on a claim pursuant to *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, a plaintiff must establish: (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. In the Eleventh Circuit, to have a dangerous probability of successfully monopolizing a market, the defendant must be close to achieving monopoly power. Courts look at the relevant market under consideration and the defendant's power within that relevant market in determining whether there is a dangerous probability of monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN15[] **Monopolies & Monopolization, Attempts to Monopolize**

Although monopoly power under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act is similar to market power under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, it requires something greater than market power. Monopoly power involves the power to raise prices to supra-competitive levels or the power to exclude competition in the relevant market either by restricting entry of new competitors or by driving existing competitors out of the market. As with market power under *§ 1*, market share is a revealing guidepost in determining whether there is a dangerous probability of monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN16[] **Monopolies & Monopolization, Actual Monopolization**

A dangerous probability of achieving monopoly power may be established by a 50 percent share. When a plaintiff pleads less than a majority share of the relevant market, the plaintiff must show additional factors such as: the defendant's share compared to its competitors, the strength and capacity of current competitors, the potential for entry, the historic intensity of competition; and the impact of the legal or natural environment.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN17[] **Monopolies & Monopolization, Attempts to Monopolize**

Even if a plaintiff can allege a dangerous probability of monopolizing the relevant market, it must also show harm to competition under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Energy & Utilities Law > Electric Power Industry > State Regulation > General Overview

HN18[] **Monopolies & Monopolization, Attempts to Monopolize**

A claim pursuant to *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act against a non-competitor also is not viable against a non-competitor in the relevant market.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > General Overview

Torts > Vicarious Liability > Corporations > General Overview

HN19[] **Regulated Practices, Monopolies & Monopolization**

Before one corporate entity can be held liable for the alleged federal antitrust wrongs of another corporate entity, a plaintiff must satisfy the state law standard for piercing the corporate veil. Under Florida law, a court can pierce the corporate veil when there is a showing that a corporation was formed, or at least employed, for an unlawful or improper purpose--as a subterfuge to mislead or defraud creditors, to hide assets, to evade the requirements of a statute or some analogous betrayal of trust.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN20[] **Regulated Practices, Monopolies & Monopolization**

The United States Court of Appeals for the Eleventh Circuit has said that contract power under an exclusive dealing arrangement is distinguishable from market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN21[] **Monopolies & Monopolization, Conspiracy to Monopolize**

No authority exists holding a defendant can conspire to monopolize a market in which it does not compete.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN22[] **Monopolies & Monopolization, Attempts to Monopolize**

The United States Court of Appeals for the Eleventh Circuit does not recognize a monopoly leveraging claim against a party who is a non-competitor.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN23[] **Regulated Practices, Monopolies & Monopolization**

Fed. R. Civ. P. 12(b)(6) dismissals are particularly disfavored in fact-intensive antitrust cases.

Antitrust & Trade Law > Sherman Act > General Overview

HN24[] **Antitrust & Trade Law, Sherman Act**

The injury to competition element is a critical element of both § 1 (15 U.S.C.S. § 1) of the Sherman Act and § 2 (15 U.S.C.S. § 2) of the Sherman Act because it prevents heated business disputes between individual competitors from turning into federal antitrust actions.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN25[] **Antitrust & Trade Law, Sherman Act**

When the requisite elements are lacking, the costs of modern federal antitrust litigation and the increasing caseload of the federal courts counsel against sending the parties into discovery when there is no reasonable likelihood that the plaintiffs can construct a claim from the events related in the complaint.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN26[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

When all federal claims are eliminated in the early stages of litigation, the balance of factors generally favors declining to exercise pendent jurisdiction over remaining state law claims and dismissing them without prejudice.

Opinion

ORDER GRANTING DEFENDANTS' MOTIONS TO DISMISS WITH PREJUDICE

[*1352] THIS CAUSE is before the Court on the Motions of Defendant Clear Channel Communications, Inc. and Defendant Hispanic Broadcasting Corporation to Dismiss Plaintiff's Amended Complaint. **[D.E. 23, 24]**. Having considered the motions, the consolidated response, the replies, and after **[*1353]** extensive oral argument, [1] the Court grants both motions with prejudice.

[3]** Defendant Clear Channel Communications, Inc. ("CC"), cannot be liable for a Sherman Act Section Two ("Section Two") monopolization, attempted monopolization, or conspiracy to monopolize violation or a violation of Sherman Act Section One ("Section One") because it is a non-competitor in the "relevant market." [2] Although Defendant Hispanic Broadcasting Corporation, ("HBC"), is a competitor in the Plaintiff's definition of the relevant market, the Plaintiff fails to assert facts indicating injury to competition in general, and merely alleges injury to a specific competitor, itself. Such a defect is fatal to the Section One and Section Two claims against the Defendants. Because the Court has federal jurisdiction over this case only under the Sherman Act, the Court declines to exercise its supplemental jurisdiction over the remaining myriad of state law claims.

[4] Background**

Plaintiff, Spanish Broadcasting System, Inc. ("SBS"), is a Spanish-language radio company which owns fourteen stations in seven U.S. markets. Defendant, HBC, [3] operates fifty-five Spanish-language radio stations in the United States in fourteen different markets. Defendant, CC, is the largest English-language radio company in the country with 1,200 stations in over 300 markets. SBS and HBC are direct competitors in five of the top-ten U.S. markets for Spanish-language radio [4] and both companies have expanded rapidly in the past few years-paralleling the swift growth of the country's Hispanic population. [5] **[**6]** See Am. Compl. P 12. At oral argument, SBS supplemented

---

[1] At the January 9, 2003 oral argument, the Plaintiff had an extensive opportunity to bring forth any facts which would buttress its federal antitrust claims. The Seventh Circuit has questioned whether a district court should "'flesh out'" an antitrust complaint, and has noted that "it is axiomatic that the complaint may not be amended by the briefs in opposition to a motion to dismiss." *Car Carriers v. Ford Motor Co., 745 F.2d 1101, 1107 (7th Cir. 1984)*.

However, the Court allowed SBS to rectify orally the facial deficiencies in its Amended Complaint because at this procedural stage, the Court must draw all reasonable inferences in the Plaintiff's favor and consider, in the interests of justice and efficiency, the Plaintiff's best arguments. Moreover, the Eleventh Circuit has even permitted district courts to consider claims first raised at a motion to dismiss hearing so long as the court also considers the factual allegations offered orally to support that claim. See *Oxford Asset Mgmt., Ltd. v. Jaharis, 297 F.3d 1182, 1195(11th Cir. 2002)*; see also *Crowe v. Coleman, 113 F.3d 1536, 1541 n.4 (11th Cir. 1997)* ("when motions are orally argued [even when the pertinent hearing is for argument only and not one for the presentation of evidence], important things sometimes happen which impact on the factual record-for example, the judge while interrogating the lawyers obtains stipulations, concessions, and so on.").

[2] For purposes of the motion to dismiss, CC did not contest the Plaintiff's definition of the relevant market: the top-ten Spanish-language radio listening markets.

[3] HBC resulted from the 1997 merger of Clear Channel-owned Heftel Broadcasting Corporation and Tichenor Media Systems, Inc. CC owned 63% of Heftel Broadcasting before the merger, and after the merger, CC owned 26% of the new company, HBC.

[4] These ten largest markets in descending size order are: Los Angeles, Miami, New York, Houston, Chicago, San Francisco, San Antonio, Dallas, Brownsville and Phoenix. SBS competes with HBC in Los Angeles, Miami, New York, Chicago, and San Antonio.

[5] Hispanics are the fastest growing U.S. minority group. The Hispanic population increased 58% during the 1990s from 22.4 million in 1990 to 35.3 million in 2000; Hispanics are the largest racial minority at 12.5% of the total U.S. population. See Robert Suro, *Latino Growth in Metropolitan America: Changing Patterns, New Locations*, Center on Urban & Metropolitan Policy and the Pew Hispanic Center (July 2002) at *www.pewhispanic.org/index.jsp* (last visited January 29, 2003). By 2020 the Hispanic

[*1354] its Amended Complaint by adding that the relevant product was the sale of advertising allocated to Spanish-language radio in those ten markets. [6] In support of their definition of the relevant market, the Plaintiff pointed to the fact that advertisers and advertising companies have set aside separate budgets for Spanish-language radio and English-language radio. Oral Argument p.12, line 7-12. In addition, Spanish-language radio advertising is distinct from other media advertising such as Spanish-language **[**5]** television and print advertising because the advertisers designate a specific budget amount for Spanish-language radio. Oral Argument p. 12, line 13-21.

The essence of SBS's claims is that after SBS refused CC's 1996 acquisition offer, HBC and CC engaged in anticompetitive conduct which "prevented SBS from competing on a level playing field with HBC . . . ." Am. Compl. P 16. SBS contends that CC and/or HBC sought to frustrate SBS's plans to expand its operations [7] and limited SBS's ability to compete in the top-ten Spanish-language markets. Allegedly, CC and/or HBC: (1) hindered SBS's ability to raise capital; [8] **[**8]** (2) attempted to depress SBS's stock price; [9] (3) in June 2002, **[*1355]** forced HBC to be acquired by Univision rather than continue merger talks with SBS; (4) wrongfully prevented SBS from acquiring radio stations and **[**7]** bid up the prices of other stations; [10] **[**9]** (5) induced SBS employees to breach their contracts and work for HBC; (6) vandalized property at SBS stations; and (7) interfered with SBS's

---

population will double its 1995 size to 53 million and triple its 1995 size in 2040 to 80 million, and reach nearly 97 million in 2050. Jennifer Cheeseman Day, Population Projections of the United States by Age, Sex, and Hispanic Origin: 1995 to 2050, U.S. Bureau of the Census, Current Population Reports 15-17 (1996).

[6] See Transcript of Spanish Broadcasting System, Inc. v. Clear Channel Communications, Corp. et. al., Hearing on Motions to Dismiss, 02-21755-CIV-SEITZ (January 9, 2003) (hereinafter "Oral Argument") at p.8, line 15-17 ("and what we are talking about in terms of a product here is the sale of advertising by radio stations in each of those [ten] markets. We are not talking about the sale of radio stations . . .").

[7] To operate a radio station in the United States, a company must first obtain one of the limited number of licenses from the Federal Communications Commission ("FCC"). The FCC granted these licenses long ago, and they are infrequently sold. A radio company seeking to enter a market or expand its current market presence ordinarily must raise capital to acquire existing stations. Am. Compl. P 13.

[8] SBS alleges three particular actions. First, in December 1996, CC induced SBS's long-time sales representative, Katz Hispanic Media, to breach its contract with SBS and to become HBC's national sales representative. Second, in May 1999, SBS selected Lehman Brothers ("Lehman") as sole lead manager and selected Merrill Lynch and BT Alex Brown ("BTAB") and CIBC to be the co-managers of SBS's Initial Public Offering ("IPO"). Randall Mays (CC's Executive Vice-President and CFO) told Lehman's Managing Director that Raul Alarcon, Jr. (SBS's CEO) was a "drug user and/or drug trafficker" and thus not to proceed with the IPO. Am. Compl. P 21(b). The IPO proceeded nonetheless. Third, after BTAB was selected as a co-manager, CC called BTAB and stated that if BTAB participated in SBS's IPO, CC would take its business ($ 30 million in annual fees) elsewhere. Thus, BTAB was forced to withdraw from the underwriting syndicate.

[9] According to the Plaintiff, CC and HBC took steps to depress SBS's stock price by seeking to limit or eliminate coverage of SBS by leading securities analysts, specifically: (a) CC pressured a leading BTAB analyst not to cover SBS; (b) CC and HBC orchestrated the departure of a leading Lehman radio analyst who had prepared to cover SBS stock; and (c) HBC threatened to deny normal analyst access to another Lehman radio analyst if he continued to cover SBS.

HBC also attempted to get SBS's shareholders to sell their shares and thus depress SBS's stock price. HBC leaked confidential acquisition discussions between SBS and HBC and made disparaging remarks about SBS's future to SBS's leading institutional investors such as Putnam Investment Management and Janus Capital, Inc. Am. Compl. P 22(c)(i)-(ii).

[10] For example, SBS alleges that CC wrongfully appropriated a business opportunity SBS proposed to Golden West Broadcasters, operators of a Los Angeles radio station (KSCA-FM) in 1996. Am. Compl. P 23(a). CC purchased the option on KSCA-FM and then assigned it to HBC in Feb. of 1997. SBS alleges that CC or HBC interfered with SBS's acquisition of other radio stations by driving up the prices SBS paid for those stations. See Am. Compl. P 23(b)-(c).

relationships with its advertisers. [11] Moreover, the Plaintiff asserts that CC effectively controls HBC because CC owns 26% of HBC's stock and has veto power over critical HBC activities. [12]

The catalyst for this lawsuit began on March 25, 2000 when SBS proposed that HBC and SBS merge and integrate the "leading companies in the operation of Spanish-language radio stations" in the top-ten Spanish markets. Am. Compl. P 11. Negotiations continued through May of 2002 and SBS thought it would make a presentation to HBC's Board of Directors in early June, 2002. Oral Argument at p. 38, line 20-25 thru p. 39 line 1-7. However, on June 12, 2002, HBC announced it intended **[**10]** to merge with Univision, a major Spanish-language television company, instead of with SBS. On the same day, the Plaintiff filed an eleven-count complaint against Defendants, for violation of Sections One and Two of the Sherman Act, for violations of the Florida Antitrust Act, the California Unfair Competition Act and Cartwright Act, and for tortious interference with business relationships, defamation, injurious falsehood, trade libel, and breach of confidentiality. [13] Plaintiff alleges CC interfered with the Plaintiff's negotiations with HBC because CC wanted Univision to acquire HBC.

CC's motion to dismiss argues that SBS fails to state a claim under the Sherman Act because: (1) CC is not a competitor with SBS in the relevant market and CC does not effectively control HBC, and (2) while SBS alleges **[**11]** an economic injury to itself, it does not allege an anti-competitive effect to the relevant market. HBC argues that SBS: (1) fails to state a claim under Section One because it fails to plead the existence of a relevant market and harm to competition, and (2) fails to state a **[*1356]** claim under Section Two because it does not identify the facts indicating there is a dangerous probability that HBC could monopolize the relevant market.

For the purposes of this motion, the Court has accepted the Plaintiff's definition of the relevant market and HBC's alleged market share of that relevant market. However, the Court finds that SBS, as a matter of law, has not and cannot allege that HBC's and CC's actions have injured competition in general. This omission is fatal to both Plaintiff's Sherman One and Sherman Two claims against both Defendants. In addition, CC as a non-competitor in the relevant market cannot, as a matter of law, be liable under Section One or Two.

Discussion

HN1[] To survive a *Rule 12(b)(6)* motion to dismiss, a complaint need only provide a short and plain statement of the claim and the grounds on which it rests. *Conley v. Gibson, 355 U.S. 41, 47, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. **[**12]** A *Rule 12(b)(6)* motion tests not whether the plaintiff will prevail on the merits, but instead, whether the plaintiff has properly stated a claim for which relief can be granted. See *Fed. R. Civ. P. 12(b)(6)*; *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*. Thus, a court may dismiss a complaint for failure to state a claim only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations. See *Hishon v. King & Spalding, 467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984)*. In deciding such a motion, the court must accept all the complaint's well-pled factual allegations as true and draw all reasonable inferences in the nonmovant's favor. See *Scheuer, 416 U.S. at 236*. Moreover, the threshold of sufficiency that a complaint must meet to survive a motion to dismiss is exceedingly low. *Ancata v. Prison Health Svcs., Inc., 769 F.2d 700, 703 (11th Cir. 1985)* (citation omitted). In an antitrust action, "[a] plaintiff must plead sufficient facts so that each element of the alleged antitrust violation can be identified." *Mun. Util. Bd. of Albertville*

---

[11] SBS contends that HBC pressured Cardenas-Fernandez Associates (which is 50% owned by CC) to discontinue advertising on SBS stations. Am. Compl. at P 20.

[12] CC has veto power over any HBC plan to: sell or transfer substantially all of its assets; issue any shares of preferred stock; amend HBC's certificate of incorporation to adversely affect the shareholder rights of CC's class of stock; declare or pay any non-cash dividends or any non-cash distribution; and amend the articles of incorporation concerning HBC's capital stock. CC also appoints two of HBC's five-member Board of Directors. Am. Compl. P 26.

[13] SBS withdrew its Tenth Cause of Action for Trade Libel. Plaintiff's Memorandum of Law in Opposition to Defendants' Motions to Dismiss Plaintiff's Amended Complaint, ("Pl's Opp.") (filed Oct. 16, 2002) at 30.

v. Alabama Power Co., 934 F.2d 1493, 1501 (11th Cir. 1991). **[**13]** In short, the complaint must allege enough facts, rather than conclusions, to show there is a legal claim for which relief can be granted.

I. Sherman Act Section One

Section One of the Sherman Act prohibits ***HN2***[] "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . ." and penalizes "every person who shall make any contract or engage in any combination or conspiracy . . . declared to be illegal." *15 U.S.C. § 1 (West 2002)*. ***HN3***[] Under Section One, a plaintiff must show that the defendant: (1) entered into a contract, combination or conspiracy which was (2) in restraint of trade or commerce, and (3) that it was damaged by the violation. *Moecker v. Honeywell Int'l, Inc., 144 F. Supp. 2d 1291, 1300 (M.D. Fla. 2001)*.

HN4[] An alleged Section One violation which does not fall within the category of *per se* antitrust violations is analyzed under the "rule of reason." [14] *Id. at 1301-02*. The "rule of reason" looks beyond the **[*1357]** structure of the agreement and requires a plaintiff to show that: "(1) a relevant market existed that was affected by the challenged restraint; (2) **[**14]** the defendant possessed 'market power' within the relevant market; (3) there was an anticompetitive effect in the intrabrand or interbrand market; and (4) the negative effects on competition are not outweighed by the positive effects on competition." *Godix Equip. Exp. Corp. v. Caterpillar, Inc., 948 F. Supp. 1570, 1579 (S.D. Fla. 1996)*.

A. Hispanic Broadcasting Corporation

The Court will assume, as SBS alleges, that the Defendants agreed to frustrate SBS's efforts to expand its operations and limit SBS's ability to compete. However, even assuming that such an agreement existed, to prevail on its antitrust claims SBS must show a relevant **[**15]** market affected by the challenged restraint, the Defendants' market power in that relevant market, and the anticompetitive effect on competition in general. The Court will examine each of these critical elements.

1. Relevant Market

HN5[] A relevant market consists of a geographic and a product component. *Godix, 948 F. Supp. at 1579*. The relevant market is defined geographically as "'the area of effective competition.'" *L.A. Draper & Son v. Wheelabrator-Frye, Inc., 735 F.2d 414, 423 (11th Cir. 1984)* citing *Brown Shoe Co. v. United States, 370 U.S. 294, 324, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. The relevant product market consists of: "'products that have reasonable interchangeability for the purposes for which they are produced-price, use and qualities considered.'" Moecker, 144 F. Supp. at 1302. [15] A relevant market "is a market composed of products which compete with each other; that is, products that are reasonably interchangeable from a buyer's point of view." *Godix Equip., 948 F. Supp. at 1580-81* (finding relevant market to be a market for both "will fit" and genuine Caterpillar replacement **[**16]** parts). The question of a relevant market is a factual one. See, e.g., *Covad Communications Co. v. Bellsouth Corp., 299 F.3d 1272, 1279 (11th Cir. 2002)* (noting that antitrust cases are fact-intensive inquiries); *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 994* & 996 (11th Cir. 1993) (holding that the relevant market consisted of light weight generic and economy fluke anchors and a reasonable juror could not find

[14] The four categories of restraints subject to *per se* treatment are: (1) horizontal and vertical price fixing; (2) horizontal market divisions; (3) group boycotts or concerted refusals to deal; and (4) tying arrangements. ***Moecker, 144 F. Supp. 2d at 1302***. SBS does not allege that the Defendants engaged in any of these activities.

[15] Other ***HN6***[] factors include: "(1) whether the products and services have sufficiently distinctive uses and characteristics; (2) whether industry firms routinely monitor each other's actions and calculate and adjust their own prices on the basis of other firm's prices; (3) the extent to which consumers consider various categories of sellers as substitutes; and (4) whether a sizeable price disparity between different types of sellers persists over time for equivalent amounts of comparable goods and services." ***Moecker, 144 F. Supp. 2d at 1303-04***.

that the market also included branded higher quality boat anchors); *Godix Equip., 948 F. Supp. at 1580* ("The composition of the relevant product market is a question of fact usually resolved by the jury.").

[17]** The Second and Third Circuits require federal antitrust plaintiffs to allege sufficient facts to show that an alleged product market bears a "rational relation to the methodology courts prescribe to define a market for antitrust purposes-analysis of the interchangeability of use or the cross-elasticity **[*1358]** of demand [16] . . . ." *Todd v. Exxon Corp., 275 F.3d 191, 200 (2d Cir. 2001)*; see *Queen City Pizza, Inc. v. Domino's Pizza, 124 F.3d 430, 436* ("Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitutes . . . the relevant market is legally insufficient and a motion to dismiss may be granted."); see also, *B.V. Optische Industrie de Oude Delft v. Hologic, Inc., 909 F. Supp. 162, 172 (S.D.N.Y. 1995)* (finding that chest equalization radiography [the Plaintiff's defined relevant market] was not an independent product market but part of overall X-ray market). In Queen City Pizza, the Third Circuit found that the plaintiff defined its proposed **[**18]** relevant market too narrowly because the Domino's approved supplies and ingredients (which the franchisee must purchase from Domino-approved vendors) were fully interchangeable with other pizza supplies outside the relevant market. See *Queen City Pizza, 124 F.3d at 441*.

The parties have not cited any Eleventh Circuit decisions addressing whether plaintiffs must plead facts regarding the level of product interchangeability of use or cross-elasticity of demand. ***HN7***[] Courts in this District, however, have not required plaintiffs to allege such important facts at the complaint stage. See *Aventura Cable Corp. v. Rifkin/Narragansett S. Fla. CATV Ltd. P'ship, 941 F. Supp. 1189, 1193 (S.D. Fla. 1996)* (stating that "determining [the] 'reasonable interchangeability of use . . . between **[**19]** a product and its substitutes constitutes the outer boundaries of a product market'" is a factual question and "best left for a later stage of the proceedings."); In re American Online, Inc. Version 5.*0 Litig., 168 F. Supp. 2d 1359, 1375-76 (S.D. Fla. 2001)* (dismissing complaint for failing to allege relevant geographic and product market, not for failing to allege interchangeability). Furthermore, in defining the relevant market, courts in this District have found it sufficient if the plaintiff provides facts demonstrating a distinct market. *Gen. Cigar Holdings v. Altadis, S.A., 205 F. Supp. 2d 1335, 1349-50 (S.D. Fla. 2001)*. The General Cigar court found that the plaintiff defined a relevant market consisting of "cigars and non-Cuban premium cigars" because they sufficiently distinguished cigars from other tobacco products. Id. ("cigars are distinguished from other tobacco products based on their distinctive tastes, aromas, size, shape, and other characteristics" and "non-Cuban premium cigars have 'tastes, aromas, histories, reputations and other characteristics that differ from Cuban premium cigars.'").

At oral argument, SBS stated that the **[**20]** relevant product was the advertising allocated to Spanish-language radio in the top ten markets. The Plaintiff contends that Spanish-language radio is distinct because advertisers and advertising companies have set aside separate budgets for Spanish-language radio and English-language radio. Oral Argument p.12, line 7-12. The Spanish-language advertising budget is distinct from other media budgets such as Spanish-language television and print advertising because advertisers designate a specific amount and budget for Spanish-language radio. Oral Argument p. 12, line 13-21. Given these allegations **[*1359]** and the favorable deference the Court must give to the Plaintiff's factual allegations and the minimal pleading requirements, the Plaintiff has defined a relevant product and geographic market. SBS has also alleged facts to show that Spanish-language radio advertising is not interchangeable with English-language radio advertising or other Spanish-language media advertising such as in television and newspapers. While SBS has distinguished its defined relevant market from other language radio markets, SBS has not alleged any facts that show HBC advertising time is interchangeable with **[**21]** that of SBS. However, for the purposes of this motion, the Court assumes that they are interchangeable. Thus, the Court accepts that SBS has pled the relevant product and geographic market and now turns to the remaining elements under Section One: market power and anticompetitive effect.

2. Market Power

---

[16] "Cross-elasticity of demand exists if consumers would respond to a slight increase in the price of one product by switching to another product." *Todd, 275 F.3d at 201-02* (citation omitted).

HN8[] The Eleventh Circuit has defined market power narrowly as: "'the ability to raise price significantly above the competitive level without losing all of one's business.'" See *Graphic Prods. Distrib. v. Itek Corp., 717 F.2d 1560, 1570 (11th Cir. 1983)*. Market share may be an alternative to analyzing market power to determine the potential for genuine adverse effects on competition because market power is often difficult to define and requires complex econometric analysis. See id.; see also, *Retina Assocs. P.A. v. S. Baptist Hosp., 105 F.3d 1376, 1382 (11th Cir. 1997)* (finding that Defendants' control of fifteen percent of general ophthalmologists referrals to retina specialists in Jacksonville area was insufficient to constitute market power). "Market share directly relates to the effectiveness of interbrand competition [17] in minimizing the **[**22]** anticompetitive effects of a restraint on intrabrand competition." Moecker, *144 F. Supp. 2d at 1305* (citation omitted).

SBS alleged at oral argument that HBC held 51% of the ad revenues for Spanish-language radio in the top-ten markets. Oral Argument at 20, line 11-20. Moreover, SBS alleges that with HBC's market share, HBC can control prices and keep competition out. Id. at 35, line 5-11. Therefore, for the purposes of this motion as to HBC, the Court accepts that SBS has sufficiently alleged that HBC has market power. [18]

[23] 3. Anticompetitive Effect**

HN10[] To prove an anticompetitive effect the Plaintiff must show "an 'actual detrimental effect' on competition, or that the behavior had 'the potential for genuine adverse effects on competition . . . .'" *Levine v. Central Fla. Medical Affiliates, 72 F.3d 1538, 1551* (citations ommitted). In short, the plaintiff must show that the defendant's action harmed the consumer. "Even an act of pure malice by one business competitor against another does not, **[*1360]** without more, state a claim under the federal antitrust laws . . . ." *Brooke Group Ltd. v. Brown & Williamson Tobacco Co., 509 U.S. 209, 225, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*. "The purpose of the Act is not to protect businesses from the working of the market; it is to protect the public from the failure of the market. The law directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself." *Spectrum Sports Inc. v. McQuillan, 506 U.S. 447, 458, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*.

Thus, *HN11*[] even unfair means to substitute "one competitor for another without more does not violate the antitrust laws." **[**24]** *L.A. Draper, 735 F.2d at 421* (citations omitted); see also, *Weight-Rite Golf Corp. v. U.S. Golf Ass'n, 766 F. Supp. 1104, 1111 (M.D. Fla. 1991)* (noting that USGA's ability to decrease the marketability of a manufacturer's golf shoes by amending its rules of play did not constitute violation of the rule of reason). "This [injury to competition] requirement ensures that otherwise routine business disputes between business competitors do not escalate to the status of an antitrust action." *Tops Markets Inc. v. Quality Markets, Inc., 142 F.3d 90, 96 (2d Cir. 1998)* (citation omitted).

SBS alleges injury to itself such as the depression of its stock price, paying more for stations than it might have had to, and the misappropriation of business opportunities, but it has not alleged actual or potential detrimental effect on competition. [19] The Court has extensively culled through the allegations in both the Amended Complaint and

---

[17] *HN9*[] "Interbrand competition is defined as competition among suppliers or manufacturers of the same generic product, while intrabrand competition is the competition between distributors of the product of a particular supplier or manufacturer." Moecker, 144 F. Supp. at 1305.

[18] The U.S. Anchor court noted that the quantity of actual goods or services sold to consumers, as compared to revenues, is the appropriate determinant of market power; "actual unit sales must be used whenever a price spread between various products would make the revenue figure an inaccurate estimator of units sales." *7 F.3d at 999*. At this procedural stage, the Plaintiff's measure of market share is assumed to be correct.

[19] HBC cites *Caribbean Broadcasting System., Ltd. v. Cable & Wireless PLC, 331 U.S. App. D.C. 226, 148 F.3d 1080 (D.C. Cir. 1998)*, as an example of where a court found that a plaintiff had given sufficient notice of injury to the relevant market to survive a motion to dismiss on its Sherman Act claim. There, however, the plaintiff alleged facts that the defendant's conduct injured the consumer in the relevant market and that U.S. customers in the relevant market suffered antitrust injury. *148 F.3d at 1086-87*.

Plaintiff's oral argument. While SBS alleges numerous examples of injury to itself, it does not allege--beyond its one conclusionary statement--"the person hurt is the advertiser who has less opportunity to reach **[**25]** an audience, has to pay a higher price, those kind of things"--how the advertiser has or will be injured. See Oral Argument at 51, line 8-10. In fact, SBS contends that CC and HBC allegedly used their market power to keep advertising rates down in the Spanish-language market so that CC could benefit by keeping English rates up. See Oral Argument, p.35, line 5-11. How the advertiser in the top-ten Spanish language radio markets is injured by radio stations keeping advertising rates low is not clear. Moreover, even SBS's claim that it was **[*1361]** injured is suspect because SBS states that it has "expanded rapidly in the past few years." Am. Compl. P 12.

[26]** Finally, it is puzzling how the alleged actions of CC and HBC in the 1990s, in federal antitrust terms, have injured or have the potential to genuinely and adversely injure the advertisers in the Plaintiff's defined market. As recently as the Spring of 2002, the Plaintiff proposed the merger of the "two leading companies [HBC and SBS] in the operation of Spanish-language radio stations." Am. Compl., P 11. It is curious that Plaintiff saw no federal anticompetitive problem there, yet it complains the actions of HBC and CC would injure the advertiser in the relevant market. Oral Argument, pps. 24 line 19-25 thru p. 25 line 1-13. The Plaintiff has not and apparently cannot allege facts showing general anticompetitive effects to support its Section One claim against the Defendants.

B. Clear Channel as Non-Competitor in Relevant Market

CC also argues that it is free from Sherman Act liability because it is a non-competitor in the relevant market. ***HN12***[ ] A non-competitor in the relevant market normally cannot be liable for a Section One violation. See *United States v. MMR Corp., 907 F.2d 489, 498 (5th Cir. 1990)*; *United States v. Sargent Elec. Co., 785 F.2d 1123, 1127 (3d Cir. 1986)* **[**27]** (concluding that "an agreement among persons who are not actual or potential competitors in the relevant market is for Sherman Act purposes *brutum fulmen*."); *United States v. Reicher, 777 F. Supp. 901, 904 (D.N.M. 1991)* (finding that defendant's agreement to have a non-competitor submit sham bid for laboratory project did not violate Section One because sham bidder was not a current or potential competitor in relevant market). A non-competitor violates Section One if it enters a conspiracy *already existing between two or more competitors*. [20] See *MMR Corp., 907 F.2d at 498* (emphasis added) ("a noncompetitor can join a Sherman Act bid-rigging conspiracy among competitors."); see also, *Smithkline Beecham Corp. v. E. Applicators, Inc., 2002 U.S. Dist. LEXIS 10061*, * 25 (E.D. Pa. May 24, 2002) (concluding that non-competitor defendant who entered an already existing conspiracy to fix bids could be liable for a Section One violation).

[28]** In fact, SBS does not contend that CC and SBS compete in the proposed relevant market. CC does not even own any radio stations in the Plaintiff's relevant market. Thus, as a non-competitor who has no present potential to compete with SBS, CC cannot, as a matter of law, conspire with HBC to violate Section One. Nor, under the facts Plaintiff alleges, does CC further an already existing conspiracy between two competitors. Therefore, for this additional reason, SBS also fails to state a Sherman Act One claim against CC.

II. Sherman Act Section Two

Nowhere in the Amended Complaint or during oral argument does SBS argue facts, rather than present a conclusionary statement on this element. Moreover, SBS cites *Full Draw Productions v. Easton Sports, Inc., 182 F.3d 745, 754 (10th Cir. 1999)*, for the proposition that "eliminating or diminishing a competitor's ability to vie for business is precisely the type of injury that the antitrust laws were intended to protect against." Pl's Opp., at 15. However, in Full Draw, the Tenth Circuit noted that the plaintiff in that case had alleged that the elimination of the plaintiff as a competitor would "directly and substantially reduce 'output' of exhibitor space and directly and substantially reduce the ability of the consumers of such space to purchase exhibitor space." *182 F.3d at 753-54*. Plaintiff's complaint continued: "because FDP [an archery show promoter] produced one of only two archery business trade shows in the United States, the purposeful and wrongful destruction of FDP's business by Defendants directly *injured competition as well as injuring FDP*." *Id. at 754* (emphasis added).

[20] The Plaintiff has not alleged that there was an already existing agreement between two or more competitors in the relevant market. Since there is no legal basis for CC's liability under Section One, it follows that there can be no conspiracy liability against HBC. HBC cannot conspire with itself.

The Sherman Antitrust Act makes it is a crime for any ***HN13***[] "person [to] monopolize, or attempt to monopolize, or combine with any other person or persons, to monopolize any part of the trade or commerce among the Several States . . . ." *15 U.S.C. § 2 (West 2002)* ("Section Two"). ***HN14***[] To prevail **[*1362]** on a Section Two claim, the Plaintiff must establish: "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. . . ." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*. **[**29]** In the Eleventh Circuit, "to have a dangerous probability of successfully monopolizing a market, the defendant must be close to achieving monopoly power." *U.S. Anchor, 7 F.3d at 994*. Courts look at the relevant market under consideration and the defendant's power within that relevant market in determining whether there is a dangerous probability of monopolization. Id.

A. Hispanic Broadcasting Corporation

The Court must conduct an analysis of SBS's Section Two claims similar to its anaylsis of SBS's Section One claims. Having accepted for the purposes of this motion the Plaintiff's definition of the relevant market, see infra pp. 7-10, the Court considers the allegations of the Defendants' possession of or dangerous probability of possessing monopoly power and the effect to competition in general.

1. Monopoly Power

HN15[] Although monopoly power under Section Two is similar to market power under Section One, it requires something greater than market power. *Moecker, 144 F. Supp. 2d at 1308, n.13* (citation omitted). Monopoly power involves "the power to raise prices to supra-competitive levels . . . or the power to exclude competition **[**30]** in the relevant market either by restricting entry of new competitors or by driving existing competitors out of the market." *U.S. Anchor, 7 F.3d at 994*. As with Section One market power, market share is a revealing guidepost in determining whether there is a dangerous probability of monopolization. *7 F.3d 986, 999* ("the primary measure of the probability of acquiring monopoly power is the defendant's proximity to acquiring a monopoly share of the market.").

HN16[] "A dangerous probability of achieving monopoly power may be established by a 50% share . . . ." Id. When the plaintiff pleads less than a majority share of the relevant market, the plaintiff must show additional factors such as: the defendant's share compared to its competitors, "the strength and capacity of current competitors, the potential for entry, the historic intensity of competition; and the impact of the legal or natural environment." General Cigar, 205 F. Supp. 2d 1350-51 (concluding that defendant's 39% share of relevant market without more could not, as a matter of law, constitute dangerous probability of monopolization of relevant market).

SBS's Amended Complaint alleges nothing about **[**31]** market share. Only at oral argument did the Plaintiff contend that HBC held 51% of the advertising revenues in the top-ten markets for Spanish-language radio. However, considering the low-threshold of the Plaintiff's pleading burden and the fact that SBS has alleged that HBC holds a majority share of the relevant market, for the purposes of HBC's motion, the Court accepts that SBS has sufficiently asserted facts indicating a dangerous probability of HBC monopolizing the relevant market.

2. Injury to Competition

However, ***HN17***[] even if the plaintiff can allege a dangerous probability of monopolizing **[*1363]** the relevant market, it must also show harm to competition under Section Two. See *American Key Corp. v. Cole Nat. Corp., 762 F.2d 1569, 1579 n.8 (11th Cir. 1985)* (citation omitted). As described above, [21] SBS's omission of any facts alleging injury to competition in the relevant market is likewise fatal to its Section Two claim. Plaintiff is represented by respected and knowledgeable counsel in these proceedings. Notwithstanding the Plaintiff's two attempts at formal pleading and the Court's specific request to address this issue at oral argument, the Plaintiff has **[**32]** not

[21] See infra p.11-13.

provided any facts to allege this element. At this point, the Court must conclude there are none. Plaintiff's failure necessitates dismissal of its Sherman Act claims against both Defendants.

B. Clear Channel as Non-Competitor in Relevant Market

HN18[] A Section Two claim against a non-competitor also is not viable against a non-competitor in the relevant market. See *Aquatherm v. Flordia Power & Light, 145 F.3d 1258, 1261 (11th Cir. 1998)* (affirming district court's dismissal of Section Two claim because electric power company did not compete in the relevant market--pool heaters); *Ad-Vantage Tel. Directory Consultants, Inc. v. GTE Directories Corp., 849 F.2d 1336, 1348 (11th Cir. 1987)* (concluding defendant did not compete in the same market--the sale of national advertising); *Moecker, 144 F. Supp. 2d at 1309* (finding manufacturer of conversion van seat belts did not compete with a distributor of seatbelts in the distribution **[**33]** market).

As noted above, SBS does not allege nor can it allege that CC competes in the Plaintiff's proposed relevant market of advertising in the top-ten Spanish-language radio markets. Seeking to circumvent this legal impediment to its Section Two claim, SBS contends that CC effectively controls HBC and thus can attempt to monopolize the relevant market--i.e., HBC is really CC's stealth vehicle to monopolize the market. Thus, SBS alleges that CC owns 26% of HBC and appoints two members of HBC's five-person board of directors. [22] However, ***HN19***[] before one corporate entity can be held liable for the alleged federal antitrust wrongs of another corporate entity, the plaintiff must satisfy the state law standard for piercing the corporate veil. See *United Nat'l Records v. MCA, Inc., 616 F. Supp. 1429, 1432 (N.D. Ill. 1985)* (holding that corporate parent could not be held liable for antitrust violations of its subsidiary because both companies maintained separate corporate identities). Under Florida law, a court can pierce the corporate veil when there is "a showing that a corporation was formed, or at least employed, for an unlawful or improper purpose--as a subterfuge to **[**34]** mislead or defraud creditors, to hide assets, to evade the requirements of a statute or some analogous betrayal of trust . . . ." *Lipsig v. Ramlawi, 760 So. 2d 170, 187 (Fla. 2000)*. SBS has not alleged that HBC was a sham or mere instrumentality for CC to engage in illegal or improper activities. In fact, at oral argument, SBS did not dispute CC and HBC's representations that the FCC *requires* that CC play a passive role in the operations of HBC, and CC has an agreement that it will not have any control over HBC. Oral Argument p.60, line 17-20.

Furthermore, ***HN20***[] the Eleventh Circuit has said that contract power under an exclusive **[*1364]** dealing arrangement is distinguishable from market power. See *Maris Distr. Co. v. Anheuser-Busch Inc., 302 F.3d 1207, 1224 (11th Cir. 2002)* (holding that beer manufacturer's restriction on distributors from being owned in whole or in part by the public was a valid **[**35]** exercise of contract power and not violation of Sherman Act). Similarly, any purported "control" that CC has over HBC is an exercise of a valid contract agreement between the parties, and under these facts, not a violation of the Sherman Act. Therefore, the conclusionary allegation of "control" is insufficient to state a Section Two claim against CC for attempted monopolization. The immutable fact is that CC is a non-competitor in Plaintiff's defined relevant market, and SBS cannot avoid that fact's legal effect.

In its response, Plaintiff asks that if the Court dismisses its Section Two claims against CC, it be allowed to amend its Amended Complaint to add a claim of conspiracy to monopolize against CC. However, the Eleventh Circuit in Aquatherm stated that "equally fatal to Aquatherm's conspiracy allegation is the fact that ***HN21***[] no authority exists holding a defendant can conspire to monopolize a market in which it does not compete." *145 F.3d at 1262 n.4*. Thus, leave to amend to add a conspiracy to monopolize claim against CC would be futile and therefore is denied.

Although not explicitly referenced in its Section Two cause of action, the Plaintiff articulated a monopoly **[**36]** leveraging claim at oral argument. See, e.g., Oral Argument, pps. 27-28 (arguing that CC, through its alleged monopoly of major concert venues, leverages its power to prevent performers from appearing on SBS stations). ***HN22***[] The Eleventh Circuit does not recognize a monopoly leveraging claim against a party who is a non-competitor. *Aquatherm, 145 F.3d at 1262*.

[22] See supra p.4 n. 12 (describing CC's decision-making authority over HBC policy).

III. Dismissal with Prejudice

Having considered the parties' papers and extensive oral argument, the Court must dismiss this action with prejudice. Although the Eleventh Circuit has stated recently that ***HN23***[] "*Rule 12(b)(6)* dismissals are particularly disfavored in fact-intensive antitrust cases," *Covad, 299 F.3d at 1279*, the facts of this case warrant dismissal with prejudice. Unlike Covad where the defendant telephone company denied a high-speed internet digital subscriber line company an essential facility to function, this case is really about the fallout from a failed merger. SBS expected to merge with HBC and create the largest Spanish-language radio station in the top-ten markets, but HBC decided to accept Univision's offer instead. On the same day as the merger was announced, **[**37]** SBS sued CC and HBC for alleged predatory conduct which is purpoted to have started approximately six years ago.

SBS argues that its deal with HBC would have been different from the Univision/HBC merger because it called for the combined company to sell off many of its radio stations to keep competition healthy. Assuming the SBS/HBC merger would have had no detrimental effect on competition, would not the Univision/HBC deal, if anticompetitive problems arise, also require a sell off of the necessary number of stations similar to the SBS/HBC deal? Moreover, based on SBS's statements, it appears that consumers may benefit from HBC and CC's actions because those actions will keep the prices for the advertiser--the buyer in this antitrust analysis--low.

HN24[] The injury to competition element is a critical element of both Sections One and **[*1365]** Two because it prevents heated business disputes between individual competitors from turning into federal antitrust actions. The Sherman Act was enacted as an aegis to protect the consumer and competition, not as a sword to redress grievances against competitors. It appears that in its haste to assert a federal antitrust claim against CC and HBC, SBS has **[**38]** lost sight of the most important player in this case--the consumer.

The Plaintiff has amended its complaint once already. The Court gave the Plaintiff extensive time to address the injury to competition element at oral argument. Still, SBS could only provide one vague and conclusionary allegation of injury to general competition. As Judge Conway noted in Aquatherm:

> ***HN25***[] when the requisite elements are lacking, the costs of modern federal antitrust litigation and the increasing caseload of the federal courts counsel against sending the parties into discovery when there is no reasonable likelihood that the plaintiffs can construct a claim from the events related in the complaint.
>
> *971 F. Supp. 1419, 1424 (M.D. Fla. 1997)* (quotation omitted).

Based on the events SBS has related, SBS may or may not have a state law claim against HBC and CC. However, its remedy is not founded in federal ***antitrust law***. Therefore, dismissal of the federal antitrust claim with prejudice is proper.

IV. State Law Claims

Having dismissed the federal claims, the Court will dismiss the remaining state law claims without prejudice. [23] ***HN26***[] "When all federal claims are eliminated **[**39]** in the early stages of litigation, the balance of factors generally favors declining to exercise pendent jurisdiction over remaining state law claims and dismissing them *without* prejudice." *Tops Markets, 142 F.3d at 103* (emphasis in original) (citation omitted); see, e.g., *General Cigar, 205 F. Supp. 2d at 1357-58* (declining to exercise supplemental jurisdiction after dismissing federal antitrust claims that were the only basis for federal jurisdiction).

---

[23] There is no diversity of citizenship under *28 U.S.C. § 1332* because all the parties were Delaware corporations.

Therefore it is

ORDERED that Defendant Clear Channel Communications Inc.'s and Hispanic Broadcasting Corporation's Motions to Dismiss Counts I and II are GRANTED WITH PREJUDICE.

IT IS FURTHER ORDERED that Spanish Broadcasting System's state law causes of action (Counts III-XI) are DISMISSED WITHOUT PREJUDICE.

IT IS FURTHER ORDERED that this CASE is CLOSED and all pending motions are **[**40]** DENIED as MOOT.

ORDERED in Miami, Florida, this 31st day of January, 2003.

HN1[] **Defenses, Demurrers & Objections, Motions to Strike**

The purpose of a motion to strike is to contest the legal sufficiency of the allegations of any complaints to state a claim upon which relief can be granted. Conn. Gen. Prac. Book, R. Super. Ct. § 10-39. In ruling on a motion to strike, the court is limited to the facts alleged in the complaint. The court must construe the facts in the complaint most favorably to the plaintiff. The court must accept as true the facts alleged in the complaint. However, a motion to strike does not admit legal conclusions or the truth or accuracy of opinions stated in the pleadings. If facts provable in the complaint would support a cause of action, the motion to strike must be denied.

Opinion by: Taggart D. Adams

Opinion

MEMORANDUM OF DECISION RE MOTION TO STRIKE (282.00)

The defendant Cornerstone Family Services, Inc. (Cornerstone) has moved to strike the fifth count of the Amended Complaint, dated April 4, 2002, in which the pro se plaintiff David Royce asserts a claim against Cornerstone pursuant to the Connecticut Unfair Trade Practices Act, *General Statutes § 42-110a et seq.* (CUTPA).

The fifth count alleges:

> Cornerstone, motivated by a wish to intimidate plaintiff and prevent his prosecution of this action, filed suit against him claiming defamation, based solely on statements attempting to influence a forthcoming WCA board election. This S.L.A.P.P. suit violated C.U.T.P.A. by attacking a consumer's attempted protection of interests purchased from defendants.

Standard of Review

HN1[] "The purpose of a motion to strike is to contest . . . the legal sufficiency of the allegations of **[*2]** any complaints . . . to state a claim upon which relief can be granted." (Citation and internal quotation marks omitted.) *Peter-Michael, Inc. v. Sea Shell Associates, 244 Conn. 269, 270, 709 A.2d 558 (1998)*; *Practice Book § 10-39*. "In ruling on a motion to strike, the court is limited to the facts alleged in the complaint. The court must construe the facts in the complaint most favorably to the plaintiff." (Internal quotation marks omitted.) *Waters v. Autuori, 236 Conn. 820, 825, 676 A.2d 357 (1996)*. "The court must accept as true the facts alleged in the complaint." *Pamela B. v. Ment, 244 Conn. 296, 325, 709 A.2d 1089 (1998)*. However, a motion to strike "does not admit legal conclusions or the truth or accuracy of opinions stated in the pleadings." (Internal quotation marks omitted.) *Faulkner v. United Technologies Corp., 240 Conn. 576, 693 A.2d 293 (1997)*. If facts provable in the complaint would support a cause of action, the motion to strike must be denied. *Id. at 580*.

Discussion

Cornerstone contends that the allegations of the fifth count are insufficient to state a claim for relief as a matter **[*3]** of law. It claims that Royce has not alleged sufficient facts on which to base a CUTPA claim and that, since there is evidence to show that the defamation lawsuit commenced by Cornerstone against Royce is not a sham, it has a constitutionally protected right to prosecute the suit.

Resolution of this matter requires the court to consider what is known as the *Noerr-Pennington* doctrine which arises from three United States Supreme Court cases. [1] In essence, ***HN2***[] the doctrine, which was initially developed in the context of federal ***antitrust law*** and now applies in many contexts, shields individuals and groups from liability for petitioning a government agency for redress. *Zeller v. Consolini, 59 Conn.App. 545, 758 A.2d 376 (2000)*. The doctrine has limits in that it does not protect petitioning activity which is a sham or pretense, i.e. that which is intended to interfere with someone's rights, and has no reasonable expectation of success. *Id. at 552*.

[*4] ***HN3***[] The Connecticut Appellate Court recently adopted the *Noerr-Pennington* doctrine and its sham exception in the context of determining liability of parties filing appeals to the courts. *Zeller v. Consolini, supra.* In that case the Appellate Court noted that the United States Court of Appeals for the Second Circuit, in *Suburban Restoration Co. v. ACMAT, 700 F.2d 98 (1983)*, had predicted that Connecticut courts would provide *Noerr-Pennington* protection to a single non-sham lawsuit and held that such a suit was not a violation of CUTPA. The *Keller* court stated it was fulfilling "the Second Circuit's prophecy." *Zeller v. Consolini, supra 59 Conn.App. at 554*.

Even before, and certainly after *Keller* was decided by the Appellate Court, the law in Connecticut was quite clear that ***HN4***[] the filing of a single, non-sham lawsuit was not a basis for a CUTPA claim. *Ancona v. Manafort Bros., Inc., 56 Conn. App. 701, 715, 746 A.2d 184*, cert. denied *252 Conn. 954, 749 A.2d 1144, 749 A.2d 1202 (2000)* (citing *Suburban Restoration supra*); *Roncari Dev. Co. v. GMG Enters., 45 Conn. Supp. 408, 718 A.2d 1025, 19 Conn. L. Rptr. 237 (1997)*; **[*5]** *New Milford Savings Bank v. Jajer, Superior Court, judicial district of Litchfield at Litchfield, CV92-0061073 (January 2, 2001, Frazzini, J.) (28 Conn. L. Rptr. 490)*.

In *Professional Real Estate Investors, Inc. v. Columbia Pictures Industries, Inc., 508 U.S. 49, 123 L. Ed. 2d 611, 113 S. Ct. 1920 (1993)*, the United States Supreme Court defined ***HN5***[] sham litigation as one which is objectively baseless in that no reasonable litigant could realistically expect success on the merits and which lawsuit conceals an effort to interfere improperly with the defendant's rights. *Id. at 60-61*. This definition has been followed by Connecticut courts. See e.g. *Zeller v. Consolini, supra*; *Roncari Development Co. v. GMC Enterprises, Inc., supra.*

---

[1] *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)*; *United Mineworkers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*; *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*.

Cornerstone contends that Royce's fifth count fails to state a viable claim because the evidence shows that its defamation suit is not baseless. That evidence includes several fruitless efforts by Royce to have the suit dismissed or stricken. The defamation suit, *Cornerstone Family Services, Inc., David Royce*, Superior Court, Complex Litigation Docket X08 CV01-0184443, is presently before this **[*6]** court on the complex litigation docket, and Cornerstone argues that this court should take judicial notice of the denials of Royce's motions and find that the defamation case is not an objectively baseless litigation. [2] As tempting as this approach might be, it is not consistent with Connecticut law and procedures.

As stated above, a court, in ruling on a motion to strike, is limited to the facts alleged in the complaint. While a small handful of Superior Court decisions have determined it is appropriate in some circumstances to rule on a motion to strike based on judicially noticed facts, this court decides the better course of action is to decline that approach. See *The Cadle Co. v. Gable*, Superior Court, judicial district of Middlesex at Middletown, CV00-0091155 (July 31, 2001, Gilardi, J.); **[*7]** *Sand Dollar Development Group v. Michael*, Superior Court, judicial district of New Haven, SPNH 961048736 (February 18, 1997, Levin, J.) (19 Conn. L. Rptr. 453).

However, Cornerstone also contends that Royce's allegations alone do not state a cause of action because no where is it alleged that the defamation suit is objectively without merit or baseless. The allegations of the fifth count state that Cornerstone filed the suit with improper motives and that it was a classic S.L.A.P.P. suit [which the court understands is the acronym for strategic litigation against public participation, see *Field v. Kearns, 43 Conn.App. 265, 275-76, 682 A.2d 148 (1996)]*. These allegations are insufficient. The motivation of Cornerstone is not relevant unless the suit is objectively baseless, and calling the defamation case a S.L.A.P.P. suit is a conclusion or opinion without supporting factual allegations. Royce argues that the court should imply from the allegations that the defamation suit is baseless. While a court must draw all reasonable inferences in favor of the pleader, the inferences must be drawn from pleaded facts. The fifth count is bereft of any factual allegation that states or infers the defamation **[*8]** suit is without legal or factual merit. See *New Milford Savings Bank v. Jajer*, *supra*; compare *Roncari Development Co. v. GMG Enterprises, Inc., 45 Conn.Sup. 408, 416, 718 A.2d 1025, 19 Conn. L. Rptr. 237 (1997)* (allegations that defendants commenced and participated in an appeal without a reasonable basis in fact and in law for the claim found sufficient to withstand a motion to strike). For the foregoing reasons, the fifth count of the amended complaint is stricken.

Taggart D. Adams, J.

Superior Court Judge

End of Document

[2] It should be noted that while the defamation suit is now on this judge's docket the earlier motions to dismiss and strike were heard and decided by other Superior Court judges.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN1[] **Standards of Review, Abuse of Discretion**

On review of an order denying or granting a motion to maintain a class, the lower court may be reversed only for an abuse of discretion.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Criminal Law & Procedure > ... > Standards of Review > Abuse of Discretion > Evidence

HN2[] **Standards of Review, Abuse of Discretion**

An abuse of discretion refers to a discretion exercised to an end or purpose not justified by, and clearly against reason and evidence. In applying the abuse of discretion standard, the reviewing court does not determine whether it would have made a like decision, only whether a judicial mind, considering the law and the facts, could have reached a similar decision. Under such a standard of review, the reviewing court must be careful not to substitute its reasoning for that of the trial court.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Governments > Legislation > Expiration, Repeal & Suspension

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN3[] **Purchasers, Indirect Purchasers**

Indirect purchaser suits for overcharge damages are barred under federal ***antitrust law***. However, South Dakota, like many other states, has enacted a repealer statute, *S.D. Codified Laws § 37-1-33*, that allows for indirect purchaser lawsuits to be maintained at the state level.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN4[] **Public Enforcement, State Civil Actions**

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN5[] **Class Actions, Certification of Classes**

In order to obtain certification of a class, the plaintiffs must satisfy all the requirements of *S.D. Codified Laws § 15-6-23(a)* and at least one of the provisions of *S.D. Codified Laws § 15-6-23(b)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN6[] **Class Actions, Prerequisites for Class Action**

See *S.D. Codified Laws § 15-6-23(b)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN7[] **Class Actions, Prerequisites for Class Action**

A court is required to conduct a rigorous analysis to determine if the elements of *Fed. R. Civ. P. 23* have been met.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN8[] **Class Actions, Certification of Classes**

A party seeking certification must show "actual, not presumed," conformance with class certification requirements. However, any doubts as to whether the class should be granted certification should be resolved in favor of certification.

Governments > Legislation > Interpretation

HN9[] **Legislation, Interpretation**

S.D. Codified Laws § 2-14-13 mandates that when a South Dakota statute has as its source a uniform law, it shall be so interpreted and construed as to effectuate its general purposes to make uniform the law of those states which enact it. The South Dakota Supreme Court has determined the federal rules of civil procedure to be similar to uniform laws.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN10[] **Public Enforcement, State Civil Actions**

S.D. Codified Laws § 37-1-33 directs that a trial court, in any subsequent action arising from the same conduct, may take any steps necessary to avoid duplicative recovery against a defendant. One method of insuring against this threat is to try all claims in a single proceeding.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > Remedies > Damages > General Overview

HN11[] **Purchasers, Indirect Purchasers**

In an indirect-purchaser antitrust action, the plaintiffs are not required to prove their case on the merits at the class certification stage. They must make a "threshold showing" that the antitrust activity, if proven, had a common impact on the class members. The plaintiffs must advance a method for determining generalized damages on a class-wide basis.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN12[] Class Actions, Prerequisites for Class Action

A reviewing court must conduct a "rigorous analysis" in determining whether the elements of *Fed. R. Civ. P. 23* have been met.

Civil Procedure > Remedies > Damages > General Overview

HN13[] Remedies, Damages

Difficulty in computing damages ought not to be confused with the requirement of proving damages as an essential element for recovery. Once the existence of damage has been shown by a preponderance of the evidence, a claimant must produce only the best evidence available to allow a jury a reasonable basis for calculating the loss. While jurors cannot speculate, they have some leeway in figuring damages. Any doubt persisting on the certainty of damages should be resolved against the contract breaker. Breaching parties may not complain when the task is made difficult by their own acts. All courts require, therefore, is a reasonable basis for measuring the loss.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN14[] Expert Witnesses, Daubert Standard

Under Daubert, the circuit court's rigorous certification analysis may be guided by whether an expert's testimony rests on both a reliable foundation and is relevant to the task at hand.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > ... > Testimony > Expert Witnesses > General Overview

Governments > Legislation > Interpretation

HN15[] Class Actions, Prerequisites for Class Action

S.D. Codified Laws § 15-6-1 is a guide to S.D. Codified Laws § 15-6-23 certification questions. It states in part that South Dakota's civil procedure code is to be construed to secure the just, speedy, and inexpensive determination of every action.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN16[] Expert Witnesses, Daubert Standard

Before expert scientific testimony may be received, it must be shown that: (1) it has been tested; (2) it has been subjected to peer review and publication; (3) the known or potential rate of error must be known; and (4) to what extent it has received general acceptance. The adjective "scientific" implies a grounding in the methods and procedures of science. Similarly, the word "knowledge" connotes more than subjective belief or unsupported speculation. The term applies to any body of known facts or to any body of ideas inferred from such facts or accepted as truths on good grounds. Of course, it would be unreasonable to conclude that the subject of scientific testimony must be "known" to a certainty; arguably, there are no certainties in science.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Remedies > Damages > General Overview

HN17[] Class Actions, Certification of Classes

In order to be granted class certification, the class members must show that damages can be calculated on a class-wide basis.

Civil Procedure > ... > Class Actions > Class Members > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Remedies > Damages > General Overview

HN18[] Class Actions, Class Members

The judicial inquiry regarding calculation of damages in a class action does not involve a determination as to the likely success of the class members' proposed methods. However, the class members must present at least one viable method for computing damages on a class-wide basis, one which a reasonable factfinder could accept.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Remedies > Damages > General Overview

HN19[] Class Actions, Certification of Classes

A disagreement on impact and damages should be adjudicated at trial by the factfinder, not by a court on a motion for class certification. Avoiding a "battle of the experts" at the class certification stage is consistent with United States Supreme Court authority.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN20[] Standards of Review, Abuse of Discretion

An abuse of discretion occurs only where a judicial mind, in view of the law and circumstances, could not have reasonably reached the same conclusion. Abuse of discretion is the most deferential standard of review available with the exception of no review at all.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN21[] **Jury Trials, Province of Court & Jury**

When opposing experts give contradictory opinions on the reliability or validity of a conclusion, the issue of reliability becomes a question for the jury. The trial process is well equipped to deal with contradictory opinions. Vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Admissibility > Expert Witnesses > Ultimate Issue

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN22[] **Class Actions, Prerequisites for Class Action**

Production of a self-professed expert is simply not enough to meet the certification requirements under South Dakota's rigorous analysis standard. However, the South Dakota Supreme Court has consistently refused to extend any gate-keeping function to usurp the factual determination role of the ultimate trier of fact.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Evidence > Admissibility > Expert Witnesses > Helpfulness

Evidence > Types of Evidence > Testimony > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN23[] **Jury Trials, Province of Court & Jury**

The purpose of expert testimony is to assist the jury as the trier of fact and not to supplant it. South Dakota is not a trial-by-expert jurisdiction. The value of the opinion of an expert witness is no better than the facts upon which it is based. It cannot rise above its foundation and proves nothing if its factual basis is not true. It may prove little if only partially true. The credibility of witnesses and the evidentiary value of their testimony falls solely within the province of the jury.

TUCKER, Circuit Judge, sitting for ZINTER, Justice, disqualified.

Opinion by: GILBERTSON

Opinion

[670]** GILBERTSON, Chief Justice

[*P1] The Sixth **[***2]** Judicial Circuit Court granted class certification in this indirect- purchaser antitrust action to members of a certified class of South Dakota end-users (Class Members). This Court granted a discretionary appeal brought by Microsoft Corporation (Microsoft). We affirm the circuit court's certification order.

FACTS AND PROCEDURE

[*P2] The Class Members, who are indirect purchasers of Microsoft Windows or MS- DOS operating systems software (OSS), are residents of the State of South Dakota. The Class Members allege that Microsoft has maintained a monopoly in the marketplace since the late 1980's or early 1990's. They contend that this monopoly was established through various anti- competitive acts such as stifling innovation in the market place and overcharging customers. The Class Members claim that Microsoft's actions "eliminated competition in the market for similar OSS, deprived purchasers of the benefits of a free market and injured consumers by forcing them to purchase Microsoft OSS at artificially high and supra-competitive prices in violation of South Dakota antitrust laws."

[*P3] The Class Members sought and after extensive proceedings before the circuit **[***3]** court, obtained certification of a class in the Sixth Judicial Circuit. [1] Microsoft was granted this discretionary appeal, raising the following issue for our review:

Whether the circuit court abused its discretion when it granted class certification in this indirect-purchaser antitrust action.

[*4] [**671] STANDARD OF REVIEW**

[*P4] ***HN1***[] "On review of an order denying or granting a motion to maintain a class, the lower court may be reversed only for an abuse of discretion." *Trapp v. Madera Pacific, Inc., 390 N.W.2d 558, 560-61 (SD 1986)*; *see also* *Swanson v. Sioux Valley Empire Elec. Ass'n Inc., 535 N.W.2d 755, 759* [2] ***[***8]*** *(SD 1995)*.

---

[1] The Class Members sought certification of the following class pursuant to SDCL 15-6-23 (Rule 23):

All persons and entities who acquired for use, and not for further selling, leasing or licensing, a license in South Dakota from Microsoft, an agent of Microsoft, or an entity under Microsoft's control, for an Intel-compatible PC version of MS-DOS, Windows 95, upgrades to higher MS-DOS versions, upgrades to or of Windows 95, Windows 98, upgrades to or of Windows 98, or other software products in which MS-DOS or Windows have been incorporated in full or in part at any time during the class period or after March 21, 1996. Excluded from the class are government entities, Microsoft, its officers, directors, employees, subsidiaries and affiliates and any judges and justices who preside over this case or any portion thereof.

[2] Rule 23(a) provides:

[*P5] ***HN2***[] "'An abuse of discretion refers to a discretion exercised to an end or purpose not justified by, and clearly against reason and evidence.'" *Black v. Class, 1997 SD 22, P27, 560 N.W.2d 544*. In applying the abuse of discretion standard, "'we do not determine whether we would have made a like decision, only whether a judicial mind, considering the law and the facts, could have reached a similar decision.'" *State v. Wilkins, 536 N.W.2d 97, 99 (SD 1995)* (citations omitted). Under such a standard of review "we must be careful not to substitute our reasoning for that of the trial court." *State v. Larson, 512 N.W.2d 732, 736 (SD 1994)*.

ANALYSIS AND DECISION

[*P6] *The United States Supreme Court in Illinois Brick Co. v. Illinois, 431 U.S. 720, 729, 97 S. Ct. 2061, 2066, 52 L. Ed. 2d 707 (1977),* **[***5]** held that ***HN3***[] indirect purchaser suits for overcharge damages are barred under federal ***antitrust law***. However, South Dakota, like many other states, has enacted a repealer statute that allows for indirect purchaser lawsuits to be maintained at the state level. Our state's repealer statute, *SDCL 37-1-33*, provides:

HN4[] No provision of this chapter may deny any person who is injured directly or *indirectly* in his business or property by a violation of this chapter the right to sue for and obtain any relief afforded under § 37-1-14.3. In any subsequent action arising from the same conduct, the court may take any steps necessary to avoid duplicative recovery against a defendant.

(emphasis added).

[*P7] ***HN5***[] In order to obtain certification of a class, the plaintiffs must satisfy all the requirements of *SDCL 15-6-23(a)* (*FRCP 23(a)*) [2] (hereinafter Rule 23(a)) and at least one of the provisions of *SDCL 15-6-23(b)* (*FRCP 23(b)*) (hereinafter Rule 23(b)). *Trapp, 390 N.W.2d at 560*; *Shangreaux v. Westby, 281 N.W.2d 590, 592- 93 (SD 1979)*. Microsoft does not **[***6]** dispute that the requirements of Rule 23(a) are met on this appeal; [3] therefore, we will only address the requirements of Rule 23(b). In its entirety, this statute reads:

HN6[] An action may be maintained as a class action if the prerequisites of § 15- 6-23(a) are satisfied, and in addition:

(1) the prosecution of separate actions by or against individual members of the class would create a risk of

(A) inconsistent or varying adjudications with respect to individual members of **[**672]** the class which would establish incompatible standards of conduct for the party opposing the class, or

(B) adjudications with respect to individual members of the class which would as a practical matter be dispositive of the interests of the other members not parties to the adjudications or substantially impair or impede their ability to protect their interests; or

---

One or more members of a class may sue or be sued as representative parties on behalf of all only if

(1) the class is so numerous that joinder of all members is impracticable,

(2) there are questions of law or fact common to the class,

(3) the claims or defenses of the representative parties are typical of the claims or defenses of the class,

(4) the representative parties will fairly and adequately protect the interests of the class, and

(5) the suit is not against this state for the recovery of a tax imposed by chapter 10-39, 10- 39A, 10-40, 10-41, 10-43, 10-44, 10-45, 10-46, 10-46A, 10-46B, or 10-52.

[3] The Circuit Court nevertheless made an independent review of rule 23(a) and concluded that the plaintiffs satisfied all the requirements of that rule.

(2) the party opposing the class has acted or refused to act on grounds generally applicable to the class, thereby making appropriate permanent injunctive relief or corresponding declaratory relief with respect to the class as a whole; or

(3) the court finds that the questions of law or fact common to the members of the class predominate **[***7]** over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. The matters pertinent to the findings include:

(A) the interest of members of the class in individually controlling the prosecution or defense of separate actions;

(B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class;

(C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum;

(D) the difficulties likely to be encountered in the management of a class action.

[*P8] Plaintiffs assert that questions of law or fact common to all members of the proposed class predominate, including:

a. Whether Microsoft is a monopolist in the market for operating system software;

b. Whether Microsoft engaged in anti-competitive conduct in order to unlawfully maintain its monopoly powers;

c. Whether Microsoft's conduct violated South Dakota's antitrust laws;

d. The impact of Microsoft's activity in the relevant marketplace;

e. Whether Microsoft's conduct caused harm; and f. Whether Plaintiffs and putative class are entitled to damages and appropriate measure of such damages.

According to General Tel. Co. v. Falcon, 457 U.S. 147, 161, 102 S. Ct. 2364, 2372, 72 L. Ed. 2d 740 (1982), ***HN7***[] a court is required to conduct a rigorous analysis to determine if the elements of Rule 23 have been met.

[4] Furthermore, in applying the federal version of Rule 23, the United States Supreme Court has held that **[***9]** ***HN8***[] a party seeking certification must show "actual, not presumed," conformance with class certification requirements. *Id*. However, any doubts as to whether the class should be granted certification should be resolved in favor of certification. Bellinder v. Microsoft Corp., No. 99- CV-17089, 2001 WL 1397995, at *8 (KanDistCt Sep 7, 2001) (citing *Arch v. American Tobacco Co., 175 F.R.D. 469, 476 (EDPa 1997)*.

[*P9] The question we are faced with here is whether this case is suitable for **[**673]** resolution on a class-wide **[***10]** basis. We stated in *Trapp, 390 N.W.2d at 560*:

Class actions serve an important function in our judicial system. By establishing a technique whereby the claims of many individuals can be resolved at the same time, the class suit both eliminates the possibility of repetitious litigation and provides small claimants with a method of obtaining redress for claims which would otherwise be too small to warrant individual litigation.

---

[4] *SDCL 2-14-13* ***HN9***[] mandates that when a South Dakota statute has as its source a uniform law, "it shall be so interpreted and construed as to effectuate its general purposes to make uniform the law of those states which enact it." We have determined the federal rules of civil procedure to be similar to uniform laws. *State v. Wright, 1999 SD 50, P13 n.4, 593 N.W.2d 792, 798 n.4*; *Miller v. Hernandez, 520 N.W.2d 266, 269 (SD 1994)*.

[*P10] This is consistent with the last sentence of *SDCL 37-1-33* ***HN10***[] which directs a trial court: "in any subsequent action arising from the same conduct, the court may take any steps necessary to avoid duplicative recovery against a defendant." One method of insuring against this threat is to try all claims in a single proceeding.

[*P11] We are aware that denial of class certification may be the death knell of claims due to the de minimus amounts of each individual claim which may economically preclude attempted redress by plaintiffs in separate law suits. c*.f.* *Lick v. Dahl, 285 N.W.2d 594 (SD 1979)*. Herein the circuit court held that there were "a very large number of claimants with relatively **[***11]** small amounts at stake. Most consumers have little incentive to file suit independently because the high cost of litigation would far exceed their potential recovery." At oral argument before this Court, Microsoft conceded that should the class not be certified, individual consumers could not in all likelihood, economically pursue separate legal actions against it.

[*P12] Moreover, ***HN11***[] the Plaintiffs are not required to prove their case on the merits at the class certification stage. *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 177-78, 40 L. Ed. 2d 732, 94 S. Ct. 2140, 2152- 53, 417 U.S. 156, 40 L. Ed. 2d 732, 94 S. Ct. 2140 (1974)*; *Bellinder*, 2001 WL 1397995, at *7. They must make a "threshold showing" that the antitrust activity, if proven, had a common impact on the class members. *Bellinder*, 2001 WL 1397995, at *7; *In re Catfish Antitrust Litig., 826 F. Supp. 1019, 1041-42 (ND Miss 1993)*. The Plaintiffs must advance a method for determining generalized damages on a class-wide basis. *Bellinder*, 2001 WL 1397995, at *7; *Catfish, 826 F. Supp. at 1042-43*.

[*P13] Microsoft first argues that the trial court abused its discretion **[***12]** because it evaluated Plaintiff's showing under Rule 23(b) under an improper relaxed standard of proof. In so doing, Microsoft seeks to avoid the effect of this deferential standard of review by arguing the circuit court committed an error of law in its improper application of a lower standard of proof. It relies upon our holding in *State v. Vento, 1999 SD 158 P5, 604 N.W.2d 468, 469* that "by definition, a decision based on an error of law is an abuse of discretion." [5] Microsoft argues that the circuit court improperly applied a standard of proof of "not so insubstantial or illusory as to amount to no method at all." We agree with Microsoft that such a standard is little better than no standard. It would invite procedural abuses of the legal system never intended for proper use of class actions. While the circuit court did acknowledge that such a standard has been applied by other courts, [6] it did not rest its **[**674]** decision on that standard. Instead it plainly stated in its findings of fact and conclusions of law

In applying the federal version of Rule 23, the United States Supreme Court has held that a party seeking certification must show "actual, not presumed," conformance **[***13]** with class certification requirements, and that ***HN12***[] a reviewing court must conduct a "rigorous analysis" in determining whether the elements of Rule 23 have been met. *See* , General Telephone Company v. Falcon, 457 U.S. [at 160-61, *102 S. Ct. at 2372, 72 L. Ed. 2d 740]*; . . . *This Court has applied that standard.*

(emphasis added).:

[*P14] **[***14]** Having determined the circuit court identified the proper legal standard, we now proceed to Microsoft's second contention that that circuit court abused its discretion by improperly applying that standard when the court considered the evidence submitted to it on the certification question. Microsoft asserts that under Rule 23(b)(3), the Plaintiffs must demonstrate at the time class certification is sought that the "impact" on each class member can be established by common proof. Rule 23(b)(3) requires that either common questions of law or fact predominate. The circuit court found that "Plaintiffs need not calculate each class member's damages individually. Instead damages can be calculated in the aggregate for the class. A summing of all individual claims is not

---

[5] As an example, in *Lick* class certification of a group of taxpayers was denied by the circuit court on the basis that sovereign immunity barred a class action against the Defendant County. Had the circuit court granted certification sovereign immunity notwithstanding, this would have been an error of law and thus by definition, an abuse of discretion.

[6] *Catfish, 826 F. Supp. at 1042-43*, In *Re Potash Litig., 159 F.R.D. 682, 697 (D Minn 1995)*; ***In re Domestic Air Transportation Antitrust Litigation, 137 F.R.D. 677, 692 (ND Ga 1991)***; ***In re Indus. Gas Antitrust Litig., 100 F.R.D. 280, 306 (ND Ill. 1983)***.

required." For support, the circuit court points to Coordination Proceedings Special Title (Rule 1550(b)) Microsoft I-V Cases, NO.JCCP.NO. 4106 (CalSuperCt, San Francisco Co., Aug. 29, 2000) and *Catfish, 826 F. Supp. at 1043*.

[*P15] Microsoft specifically challenges the proposed methodology Plaintiffs advance to determine damages. *Recently in McKie v. Huntley, 2000 SD 160, P20, 620 N.W.2d 599, 604,* **[***15]** we set forth the general doctrine of proof of damages by a plaintiff, especially when the claimed difficulty in its determination was purportedly caused by the acts of the defendant who now is complaining about the lack of accuracy of such proof: [7]

HN13[] Difficulty in computing damages ought not to be confused with the requirement of proving damages as an essential element for recovery. Once the existence of damage has been shown by a preponderance of the evidence, a claimant must produce only the best evidence available to allow a jury a reasonable basis for calculating the loss. While jurors cannot speculate, they have some leeway in figuring damages. "Any doubt persisting on the certainty of damages should be resolved against the contract breaker." **[**675]** "Breaching parties may not complain when the task is made difficult by their own acts." All we require, therefore, is a reasonable basis for measuring the loss.

[*16]** ***HN14***[] *Id.* (internal citations omitted). From a review of the record which is more fully discussed hereinafter, along with the detailed 86 findings of fact and conclusions of law entered by the circuit court, we are satisfied the circuit court accomplished what it set for itself as an appropriate standard, conducting a "rigorous analysis" of the entire certification question.

[*P16] The term "threshold showing" based upon a "rigorous analysis" is probably not subject to a more specific legal definition than its generic understanding because of the various types of potential evidence that could be submitted to the court in the certification controversy. We are mindful that if the standard is set too low, it invites non-meritorious claims to be filed as class actions, which may force a potential defendant to evaluate the case more on economic costs of defending a class action rather than the case on the merits. On the other hand, should too high a standard be set, potential plaintiffs with valid claims, but limited means, are economically precluded from redress to the courts because they cannot each financially maintain individual actions. *See* *Lick, 285 N.W.2d 594* **[***17]** . ***HN15***[] *SDCL 15-6-1* is a guide to 15-6-23 certification questions. It states in part that our civil procedure code is to "be construed to secure the just, speedy and inexpensive determination of every action."

[*P17] In the case now before us, the evidence appears to be limited to a battle of experts. In such instances, the circuit court may be assisted by borrowing concepts from the standard which this Court routinely uses for determining the admissibility of purported expert evidence; that being the standard set forth in *Daubert v. Merrell Dow Pharmaceuticals Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. This is not to suggest that the certification issue be combined with a full blown *Daubert* hearing, but rather has been described as a "lower *Daubert* standard." *Howe v. Microsoft Corp, 2003 ND 12 P26, 656 N.W.2d 285* (citing *Thomas & Thomas Rodmakers, Inc. v. Newport Adhesives and Composites, Inc., 209 F.R.D. 159, 162-3 (CD Cal 2002))*. [8] Under

---

[7] This type of analysis has also been adopted by the United States Supreme Court concerning the quantum of proof required for antitrust plaintiffs to recover. In *Truett v. Chrysler Motors, 451 U.S. 557, 566-67, 101 S. Ct. 1923, 1929, 68 L. Ed. 2d 442 (1981)*, the Court reasoned:

"Any other rule would enable the wrongdoer to profit by [its] wrongdoing at the expenses of [its] victim. . . .Failure to apply it would mean that the more grievous the wrong done, the less likelihood there would be of a recovery."

Our willingness to accept a degree of uncertainty in these cases rests in part on the difficulty of ascertaining business damages . . . The vagaries of the marketplace usually deny us sure knowledge of what [the] plaintiff's situation would have been in the absence of the defendant's antitrust violation. But it does not "'come with very good grace'" for the wrongdoer to insist upon specific and certain proof of the injury which it has itself inflicted.

(internal citations omitted).

Daubert, the circuit court's rigorous certification analysis may be guided by whether "an expert's testimony rests on both 'a reliable foundation **[***18]** and is relevant to the task at hand.'" *Rogen v. Monson, 2000 SD 51, P13, 609 N.W.2d 456, 459* (citing *State v. Hofer, 512 N.W.2d 482, 484 (SD 1994))*.

[*19] [**676]** In *Daubert* . . . the United States Supreme Court held that ***HN16***[] before expert scientific testimony may be received, it must be shown that: (1) it has been tested; (2) it has been subjected to peer review and publication; (3) the known or potential rate of error must be known; and (4) to what extent it has received general acceptance. The *Daubert* Court explained:

The adjective "scientific" implies a grounding in the methods and procedures of science. Similarly, the word "knowledge" connotes more than subjective belief or unsupported speculation. The term "applies to any body of known facts or to any body of ideas inferred from such facts or accepted as truths on good grounds." *Webster's Third New International Dictionary* 1252 (1986). Of course, it would be unreasonable to conclude that the subject of scientific testimony must be "known" to a certainty; arguably, there are no certainties in science.

Kuper v. Lincoln-Union Elec, 1996 SD 145, P39, 557 N.W.2d 748, 759-60 (citing *Daubert, 509 U.S. at 590, 113 S. Ct. at 2795, 125 L. Ed. 2d at 481*). Admission of expert witnesses is also governed by an abuse of discretion standard. *State v. Guthrie, 2001 SD 61, 30, 627 N.W.2d 401, 414-15*.

[*P18] [*20]** The Class Members allege that they were harmed because Microsoft's antitrust violations forced direct purchasers to pay non-competitive prices for Microsoft OSS, and that a portion of the overcharged amount was passed on to them as indirect purchasers. As proof of the impact, Plaintiffs intend to use common evidence and economic methodologies.

[*P19] In seeking certification as a class, the Class Members presented an affidavit by Dr. Leffler, an Associate Professor of Economics at the University of Washington. [9] He presented three theories in which to show that Microsoft harmed the class by monopolistic conduct. Dr. Leffler opined in his affidavit that "the monopolization activity and overcharges at issue here substantially predate the class period. As a consequence, any Microsoft overcharge would have been embedded in the prices at all levels of distribution at the beginning of the class period." The Class Members argue, therefore, that Dr. Leffler's testimony "plainly establishes that the fact of injury can be shown with some certainty."

[*P20] [*21]** Moreover, the Class Members assert that the amount of antitrust injury can be calculated using "standard, yardstick methodologies." Dr. Leffler proposes that this can be determined by measuring the difference

---

[8] The actual *Daubert* hearing with full evidentiary and legal arguments comes later in the judicial proceeding than the class certification issue. However, the two may still be connected as a *Daubert* hearing may convince the circuit court that its initial certification of the class can no longer be justified, thus resulting in a decertification of the class.

Under NDRCiv P 23(b), a trial court generally considers issues about certification of a class action "as soon as practicable after the commencement of a class action," and at that stage of the proceeding, issues regarding a joint or common interest may not be fully crystallized. A trial court may amend a certification order at any time before entry of judgment on the merits. NDRCivP 23(b)(3). Under similar language in FedR CivP 23(c)(1), federal trial courts are free to decertify, subclassify, or modify a class certification previously granted. In *Richardson v. Byrd, 709 F.2d 1016, 1019 (5thCir 1983)*, the court aptly explained a federal trial court "must define, redefine, subclass, and decertify as appropriate in response to the progression of the case from assertion to facts."

Howe, 2003 ND 12, P29, 656 N.W.2d 285 (citing *Rose v. United Equitable Ins. Co., 2002 ND 148, P18, 651 N.W.2d 683*).

[9] Dr. Leffler's specialty is antitrust economics including the study of monopolies and the impact of monopolies on consumers. In addition to teaching classes and conducting research for over 25 years in industrial organizations and antitrust economics, he has preformed complex economic analysis in antitrust cases for many years. Dr. Leffler has been qualified as an expert in proceedings before both federal and state courts. He has assisted the Federal Trade Commission and the Justice Department in their investigation of Microsoft's activities in the early 1980's and 1990's.

between the price a South Dakota end-user paid for Microsoft's OSS and the price the user would have paid in the absence of Microsoft's alleged illegal conduct. Three methods are offered.

[*P21] The first method is the "comparative margin method." This method compares the prices of Microsoft OSS with the prices of products from a comparable market not affected by anticompetitive activity. The second method is termed the "competitive margin method" in which the margins earned by sellers in a comparable market free from antitrust violations are **[**677]** compared to the margins earned by sellers in the anticompetitive market. The third method is the "violation-free-period method." This method compares the price of Microsoft's OSS being charged during the anticompetitive time period with the price of OSS being charged during the period free of anticompetitive conduct.

[*P22] In addition to Dr. Leffler's expert testimony, the Class Members submitted several published **[***22]** works from other economists. These works were based on the economists' empirical studies and analyses showing how Microsoft's alleged illegal activities have affected consumers.

[*P23] ***HN17***[] In order to be granted class certification, the Class Members must also show that damages can be calculated on a class-wide basis. *Bellinder*, 2001 WL 1397995, at *7. Again, the Class Members use the testimony of Dr. Leffler. He opines that "the amount of Microsoft's overcharge can be estimated using a class-wide statistical determination of the relationship between costs faced by Microsoft's customers and the prices paid by end-users." Dr. Leffler proposes to calculate this amount by statistical estimation, using data available from public sources and third-party discovery.

[*P24] As the circuit court correctly concluded, ***HN18***[] this judicial inquiry does not involve a determination as to the likely success of the Class Members' proposed methods. However, the Class Members must present at least one viable method for computing damages on a class-wide basis, one which a reasonable factfinder could accept. *Microsoft I-V Cases*, slip op. at 17-18; Gordon v. Microsoft Corp., 2001 WL 366432, **[***23]** at **11-12 (MinnDistCt Mar 30, 2001).

[*P25] Microsoft puts forth numerous arguments refuting Dr. Leffler's opinions. For example, one such expert, Dr. Hausman, submitted affidavits and provided testimony for Microsoft. [10] The essence of Microsoft's argument is that there are a multitude of complexities and variances in the marketplace and distribution chain that will affect the Class Members' ability to analyze whether, and the extent to which, overcharges were passed on to consumers. Additionally, Microsoft claims that the Class Members have failed to make a "threshold showing" of impact because of problems relating to the nature and extent of the overcharges being passed-on to consumers.

[*P26] **[***24]** ***HN19***[] We find that the circuit court did not abuse its discretion when it did not completely accept Microsoft's arguments at this stage of the proceedings. The disagreement on impact and damages should be adjudicated at trial by the factfinder, not by a court on a motion for class certification. Avoiding a "battle of the experts" at the class certification stage is consistent with Supreme Court authority. *See* *Eisen, 417 U.S. at 178, 94 S. Ct. at 2153* (concluding that on a motion for class certification, the determination is whether the Plaintiffs have satisfied the requirements of Rule 23, not whether they will prevail on the merits). The court in *Microsoft I-V Cases* stated:

The question at this stage is not whether plaintiffs will be able to carry their burden **[**678]** of proving that their experts' analyses are reliable, but whether it appears that the differences between the experts can be intelligently presented and evaluated within the framework of the class action. On a motion for class certification, it is inappropriate to resolve a battle of the experts. Whether or not [plaintiffs' experts] is correct in his assessment of common/impact injury is for the **[***25]** trier of fact to decide at the proper time.

---

[10] Dr. Hausman is the MacDonald Professor of Economics at the Massachusetts Institute of Technology. His academic and research specialties are econometrics (the use of statistical models and techniques on economic data) and microeconomics (the study of consumer behavior and behavior of firms). He has substantial experience in computer programming. He has testified in nine antitrust trials in the United States and has given seminars to the American Bar Association, the Justice Department and the Federal Trade Commission on topics in anti-trust economics.

Slip op. at 15. (internal quotations and citations omitted).

[*P27] At oral argument, Microsoft relied heavily upon the recent case of *A & M Supply v. Microsoft Corp, 252 Mich. App. 580, 654 N.W.2d 572 (Mich 2002)*. Therein the Court reversed a previous class certification by a trial court. We do not find *A & M* persuasive. Initially, Michigan applies a "clear error" standard of appellate review while South Dakota uses the "abuse of discretion" standard that grants a trial court more appellate deference. *A & M*, 252 Mich. App. at 588, 654 N.W.2d at 577. ***HN20***[] An abuse of discretion occurs only where "a judicial mind, in view of the law and circumstances, could [not] have reasonably reached the same conclusion." *State v. Barber, 1996 SD 96, P14, 552 N.W.2d 817, 820* (citations omitted). "'Abuse of discretion is the most deferential standard of review available with the exception of no review at all.'" *Guthrie, 2001 SD 61, P89, 627 N.W.2d at 431* (Gilbertson, J., concurring in result) (citing *State v. Chamley, 1997 SD 107, P51, 568 N.W.2d 607, 620* (Gilbertson, J., **[***26]** dissenting) (citing Martha S. Davis, *Basic Guide to Standards of Judicial Review,* 33 SD Law Rev, 468, 480 (1988)).

[*P28] The *A & M* Court proceeded to review what it determined to be the "battle of the experts." It was once again Dr. Leffler for the plaintiffs and Dr. Hausman for Microsoft. The *A & M* court reversed certification after a very extensive examination of each expert's methodology. *A & M Supply, 252 Mich. App. at 584, 654 N.W.2d at 575*. It concluded Leffler's theories insufficient to support certification, as they were "slogans, not methods of proof." *A & M Supply, 252 Mich. App. at 638-39, 654 N.W.2d at 602*. Beyond the differing standards of appellate review between our two courts, it further appears from our analysis that under South Dakota case law, the *A & M* court would have entered into an examination of the case on the evidentiary merits rather than the threshold issue of class certification. There appears to be little left to ultimately try in front of a jury after it settled the "Battle of the Experts" at the certification stage.

[*P29] In South Dakota the admissibility question awaits **[***27]** a *Daubert* hearing. Thereafter, other procedural devices such as a motion for summary judgment may be invoked. Assuming the "Battle of the Experts" raises questions of fact which are not settled by these pre-trial proceedings, such matters are best left for a jury determination with the experts subject to cross- examination in front of a jury rather than reliance upon numerous salvos of pre-trial affidavits by opposing experts in a certification hearing.

HN21[] When opposing experts give contradictory opinions on the reliability or validity of a conclusion, the issue of reliability becomes a question for the jury. *See* *State v. Hofer, 512 N.W.2d 482, 484 (SD 1994)*. The trial process is well equipped to deal with contradictory opinions. "Vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence." *Daubert 509 U.S. at 596, 113 **[**679]** S. Ct. at 2798, 125 L. Ed. 2d at 484* (citations omitted).

Guthrie, 2001 SD 61, P38, 627 N.W.2d at 417.

[*P30] Microsoft cites us to authority from other jurisdictions, which **[***28]** it interprets to conclude that a mere clash between "experts" is not enough by itself to support class certification. That is correct to a point. ***HN22***[] Production of a self-professed expert is simply not enough to meet the certification requirements under our rigorous analysis standard. [11] However, this Court has consistently refused to extend any gate-keeping function to usurp the factual determination role of the ultimate trier of fact.

We begin analysis of this issue from the long-accepted premise that ***HN23***[] the purpose of expert testimony is to assist the jury as the trier of fact and not to supplant it. This state is not a trial-by-expert jurisdiction. The value of the opinion of an expert witness is no better than the facts upon which **[***29]** it is based. It cannot rise above its foundation and proves nothing if its factual basis is not true. It may prove little if only partially true. The credibility of witnesses and the evidentiary value of their testimony falls solely within the province of the jury.

---

[11] In so doing, we respectfully decline to adopt the standard adopted by the Court in *Howe*, that being: "as long as the basis of the expert's opinion is not so blatantly flawed that, on its face, it would be inadmissible as a matter of law. . ." *2003 ND 12, P27, 656 N.W.2d 285*.

Lien v. Class, 1998 SD 7, P23, 574 N.W.2d 601 [12], 1998 SD 7, 574 N.W.2d 601, 610 (citing Bridge v. Karl's Inc, 538 N.W.2d 521, 525 (SD 1995)).

[*P31] Our decision here is in line with other jurisdictions that have faced the same certification issue. Every state, with the exception of Maine and Michigan, [13] that has a repealer statute has granted class certification to indirect purchasers seeking redress against Microsoft for antitrust violations. The very same pass-through and overcharge arguments that Microsoft **[***30]** makes here, have been rejected by a large majority of courts considering the issue. In re New Mexico Indirect Purchaser Microsoft Corp. Antitrust Litig., NO. D-0101-CV-2000-1697 (NMDistCt., Santa Fe Co., Sept. 30, 2002); In re Florida Antitrust Litig., No. 99-27340 CA 11 (FlaCirCt, Dade Co., Aug. 26, 2002); Howe, 2003 ND 12, 656 N.W.2d 285; *Bellinder*, 2001 WL 1397995; Capp v. Microsoft Corp., No. 00-CV-0637 (Wis CirCt, Dane Co., June 28, 2001); Friedman v. Microsoft Corp., CV-2000-000722 (Consol.) (ArizSuperCt, Maricopa Co., Nov. 15, 2000 & July 13, 2001; Gordon v. Microsoft Corp., No. 00-5994, 2001 WL 366432 (MinnDistCt, Mar. 30, 2001), *aff'd*, 645 N.W.2d 393 (Minn 2002); Microsoft I-V Cases, supra.

[*P32] For the foregoing reasons, we find that the trial court did not abuse its discretion in granting class certification **[***31]** to the Class Members. We find that the Class Members have met their "threshold showing" of harm to end-users/consumers. Its decision in certifying this case as a class action is sufficiently supported by the evidence and applicable law and satisfies all of the requirements of Rule 23.

[*P33] We remand to the circuit court for further proceedings consistent with this opinion.

[*P34] **[**680]** MEIERHENRY, Justice, and TUCKER, Circuit Judge, concur.

[*P35] KONENKAMP, Justice, and AMUNDSON, Retired Justice, concurs with a writing.

[*P36] MEIERHENRY, Justice, not having been a member of the Court at the time this action was submitted to the Court, was appointed as a Circuit Judge to sit for SABERS, Justice, disqualified.

[*P37] TUCKER, Circuit Judge, sitting for ZINTER, Justice, disqualified.

Concur by: KONENKAMP

Concur

KONENKAMP, Justice (concurring).

[*P38] I concur in this decision, but with reservations. I express these reservations in view of the prospect that we may be reviewing this case again before any final resolution. At some point, the plaintiffs' expert, Professor Leffler, must verify his untested economic theories, just as all scientists must establish **[***32]** the reliability of their methods. By his own admission, Dr. Leffler offers only a prediction, a hypothesis that given enough time and data, he can adequately calculate damages for the class members. In an indirect purchaser action, the plaintiffs must prove the actual damages to each class member. *See generally* SDCL 37-1-33. To date, the Professor's theories have not proven effective in accomplishing this task.

A. Daubert Standards and Class Certification

[*P39] While my concerns with the plaintiffs' theories on damages are not so serious as to discommend class certification, the question remains whether those theories will survive the *Daubert* hearing. Daubert v. Merrell Dow

[12] The obvious exception to this would be where the evidence is undisputed such as occurred in *Lick.* In such instances all that is left for the circuit court to do is correctly apply the law to those undisputed facts.

[13] *See* Melnick v. Microsoft Corp., Nos. CV 99-709-752, 2001 WL 1012261 (Me SuperCt, Aug. 24, 2001) and *A&M Supply Co*.

Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469(1993); Kumho Tire Co., Ltd. v. Carmichael, 526 U.S. 137, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999). This Court's opinion acknowledges that the full *Daubert* criteria have yet to be applied here. These standards cannot be satisfied by simply establishing the threshold tests for achieving class action status. Each expert's theories must pass the rigors of **[***33]** scientific methodology.

[*P40] Though the substantive arguments may be similar, evaluating expert evidence in accord with *Daubert* entails an inquiry "distinct from" the appraisal of expert evidence in support of a motion for class certification. In re Visa Check/Mastermoney Antitrust Litigation, 280 F.3d 124, 132 n4 (2dCir 2001). Trial courts should not "postpone consideration of a motion for class certification for the sake of waiting until a *Daubert* examination is appropriate." *Id*.; *see* SDCL 15-6-23(c)(1) ("As soon as practicable after commencement of an action brought as a class action, the court shall determine by order whether it is to be so maintained."). In applying discretion to grant or deny a motion for class certification, the court's inquiry "is not whether the plaintiff or plaintiffs have stated a cause of action or will prevail on the merits, but rather whether the requirements of Rule 23 are met." Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 178, 94 S. Ct. 2140, 2153, 40 L. Ed. 2d 732 (1974).

[*P41] On the other hand, SDCL 19-15-2 (Rule 702) governs the admissibility **[***34]** of expert testimony. The test for admissibility, the *Daubert* standard, was adopted in South Dakota in State v. Hofer, 512 N.W.2d 482, 484 (SD 1994). *See also* Estate of Dokken, 2000 SD 9, P51, 604 N.W.2d 487, 500 (Amundson, J., concurring specially) (explaining that *Kumho* expands the *Daubert* gate-keeping function). To abide by *Daubert-Kumho*, the proponent offering expert testimony must show that the expert's theory or method qualifies as scientific, technical, or specialized knowledge under SDCL 19-15-2 (Rule 702). **[**681]** State v. Guthrie, 2001 SD 61, P34, 627 N.W.2d 401, 415-16. This burden is met by establishing that there has been adequate empirical proof of the validity of the theory or method. Edward J. Imwinkelried, Evidentiary Foundations 287 (4th ed 1998). Under this standard, a court considers admissibility based on technical methodology, not the scientific correctness of an opinion because "it is not the trial court's role to decide whether an expert's opinion is correct." *See* Smith v. Ford Motor Co., 215 F.3d 713 (7thCir 2000). In deciding whether to admit expert testimony, a court **[***35]** must ensure that the opinion rests on a reliable foundation. Daubert, 509 U.S. at 597, 113 S. Ct. at 2799, 125 L. Ed. 2d at 485. The standards set forth in *Daubert* are not limited to what has traditionally been perceived as scientific evidence. These standards must be satisfied whenever scientific, technical, or other specialized knowledge is offered. Kumho, 526 U.S. at 141, 119 S. Ct. at 1171, 143 L. Ed. 2d at 246.

[*P42] When "faced with a proffer of expert [testimony on scientific, technical, or other specialized knowledge]," the trial judge must determine at a preliminary hearing "whether the expert is proposing to testify to (1) scientific knowledge that (2) will assist the trier of fact to understand or determine a fact in issue." Daubert, 509 U.S. at 592, 113 S. Ct. at 2796, 125 L. Ed. 2d at 482. *See also* SDCL 19-9-7 (Rule 104(a)) (preliminary questions determined by court). Thus the trial court, not the jury, must make a preliminary assessment whether the reasoning or methodology underlying the testimony is scientifically valid and whether that reasoning or methodology can be applied **[***36]** to the facts in issue. *Id.* That has yet to be established here.

[*P43] In the *Daubert* hearing, the trial judge may consider the following nonexclusive guidelines for assessing an expert's methodology: (1) whether the method is testable or falsifiable; (2) whether the method was subjected to peer review; (3) the known or potential error rate; (4) whether standards exist to control procedures for the method; (5) whether the method is generally accepted; (6) the relationship of the technique to methods that have been established as reliable; (7) the qualifications of the expert; and (8) the non-judicial uses to which the method has been put. *See* Guthrie, 2001 SD 61 at P35, 627 N.W.2d at 416 (citations omitted). *Daubert's* list of factors may not each apply to all experts in every case. Rogen v. Monson, 2000 SD 51, P28, 609 N.W.2d 456, 462-63 (Konenkamp, J. concurring) (citing Kumho, 526 U.S. at 141, 119 S. Ct. at 1171, 143 L. Ed. 2d 238). With these and perhaps other relevant considerations, a judge must ensure that the testifying experts provide a proven scientific basis for a jury to find with reasonable scientific, technical, **[***37]** or, as here, econometric probability that it is more likely than not that defendant's conduct proximately caused the claimed loss to each class member.

B. Decertification

[*P44] Considering the provisional nature of the plaintiffs' expert opinions, a *Daubert* hearing could result in decertification. The Supreme Court labels class actions a "nontraditional" type of litigation. *United States Parole Comm'n v. Geraghty, 445 U.S. 388, 402 100 S. Ct. 1202, 1212, 63 L. Ed. 2d 479 (1980)*. The action has requirements peculiar to its nature. To secure class certification, the plaintiffs must satisfy all the requirements in *SDCL 15-6-23(a)* and at least one of the criteria set out in *SDCL 15-6-23(b)*. *Eisen, 417 U.S. at 163*. Here, the circuit court found that the plaintiffs satisfied all the requirements of § 15-6-23(a) and one requirement of § 15-6-23(b), namely, subsection (3). **[**682]** *SDCL 15-6-23(b)(3)* provides in part that an action may be maintained as a class action if the prerequisites of subdivision (a) are satisfied, and in addition:

***

[*38]** (3) The court finds that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy.

In my view, the plaintiffs maintain a thin hold under this provision.

[*P45] To meet the predominance requirement of *SDCL 15-6-23(b)(3)*, the plaintiffs must establish that "the issues in the class action that are subject to generalized proof, and thus applicable to the class as a whole . . . predominate over those issues that are subject only to individualized proof." *Rutstein v. Avis Rent-A-Car Sys., Inc., 211 F.3d 1228, 1233 (11thCir 2000)* (internal quotation marks omitted). As the Michigan Court of Appeals points out in a parallel case, "Dr. Leffler's methodologies, even if they were to work with respect to small, well- defined subclasses that group class members by a very few strongly unifying characteristics, will essentially require separate trials to determine the different pass-on rates affecting the class as a whole." *A & M Supply Co. v. Microsoft Corporation, 252 Mich. App. 580, 654 N.W.2d 572, 603 (MichCtApp 2002)*.

[*P46] **[***39]** Despite this conclusion in A & M, I agree with the Court that this case should not guide our decision on class certification because Michigan has a different standard of review at the motion to certify stage. However, a reason justifying decertification here may be that the requirements of *SDCL 15-6-23(b)(3)* are no longer satisfied. *Commonwealth of Pennsylvania v. Local Union 542, Int'l Union of Operating Eng'rs, 90 F.R.D. 589, 593 (EDPa 1981)*; Edward F. Sherman, *Aggregate Disposition of Related Cases: the Policy Issues,* 10 Rev Litig 231, 272 (1991). The Daubert hearing may reveal that Professor Leffler's theories cannot achieve a practical answer to satisfy the plaintiffs' burden of proof on damages.

[*P47] Under *SDCL 15-6-23(c)(1)*, a court may alter or amend a decision on class certification "before the decision on the merits." Indeed, a court is obligated to monitor class certification and correct the decision as needed in light of evidentiary developments. *Richardson v. Byrd, 709 F.2d 1016, 1019 (5thCir 1983)*; *Reynolds v. Sheet Metal Workers, Local 102, 226 U.S. App. D.C. 242, 702 F.2d 221, 225-26 (DCCir1981)*; **[***40]** *Link v. Mercedes-Benz of N. Am., Inc., 550 F.2d 860, 864 (3dCir 1977)*; *Reed v. Town of Babylon, 914 F. Supp. 843, 848-49 (EDNY 1996)*.

[*P48] Professor Leffler's economic theories have not reached methodological maturity. It remains to be seen whether they will. His "aggregate" damages proposal fails to meet the requirement that each individual member of the class in an indirect purchaser action was injured by the defendant's alleged conduct. *Alabama v. Blue Bird Body Co., 573 F.2d 309, 316-17 (5thCir 1978)*. Both the Court and the plaintiffs cite *McKie v. Huntley, 2000 SD 160, 620 N.W.2d 599*, to permit proof of "aggregate" damages. But that case was not a class action. To allow aggregate damages here means that some members of the class who suffered no loss may be unjustly enriched while others may be under compensated. The Professor's theories must accommodate the requirement that damages be shown for each class member.

[*P49] In certifying this class action, the circuit judge gave Dr. Leffler an opportunity **[**683]** to prove that his theories are workable. If he fails, decertification should follow.

[*P50] AMUNDSON, Retired **[***41]** Justice, joins this special writing.

Coatings Res. Corp. v. Akzo Nobel Coatings, Inc.

Prior History: Appeal from the United States District Court for the Central District of California. D.C. No. CV-00-00704-AHS. Alicemarie H. Stotler, District Judge, Presiding.

Disposition: Affirmed.

Core Terms

pricing, bid, injurious effect, intent to injure, cause of action, competitor, threatens, destroy, fails

LexisNexis® Headnotes

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN1[] **Regulated Practices, Trade Practices & Unfair Competition**

A court reads *Cal. Bus. & Prof. Code § 17043* to require an injurious intent (a specific intent to injure or destroy) and not just an intent to divert customers from a competitor.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN2[] **Regulated Practices, Trade Practices & Unfair Competition**

"Unfair" competition is defined as conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Counsel: For COATINGS RESOURCE CORPORATION, Plaintiff-Appellant: James R. Jones, Jr., Esq., Newport Beach, CA.

For AKZO NOBEL COATINGS, INC., Defendant-Appellee: Jeffrey T. Thomas, Esq., Jeffrey Alan Ogar, Esq., GIBSON, DUNN & CRUTCHER, Irvine, CA.

Judges: Before: D.W. NELSON, WARDLAW and FISHER, Circuit Judges.

Opinion

[*753] MEMORANDUM *

Before: D.W. NELSON, WARDLAW and FISHER, Circuit Judges.

Coatings Resources Corporation appeals from the grant of summary judgment in favor of Akzo Nobel Coatings, Inc. The district court **[**2]** ruled that Akzo did not violate California statutory and common law when it successfully bid for an account with Travis Industries Inc. We have jurisdiction pursuant to *28 U.S.C. § 1291* and we affirm.

Regardless whether Akzo priced its product below cost as calculated in accordance with *Cal. Bus. & Prof. Code §§ 17026*, *17029*, Coatings's cause of action under *Cal. Bus. & Prof. Code § 17043* fails for lack of a triable issue of fact as to whether Akzo bid with the required purpose of injuring competitors or destroying competition. *See W. Union Fin. Servs. v. First Data Corp., 20 Cal. App. 4th 1530, 25 Cal. Rptr. 2d 341, 346 n.10 (Ct. App. 1993)* ***HN1***[] ("We read *[§ 17043]* to require an injurious intent (a specific intent to injure or destroy) and not just an intent to divert customers from a competitor."). Nor can Coatings invoke the presumption of unlawful intent provided by *Cal. Bus. & Prof. Code § 17071*, because even if Akzo sold below cost, the evidence was undisputed that there was no injurious effect because any harm Coatings suffered was not the result of Akzo's pricing. Had Akzo not entered the bidding contest at all, Coatings would have **[**3]** lost the Travis account to Lilly Industries, Inc., which consistently underbid Coatings with prices that Coatings never challenged as below cost.

Coatings's second cause of action under *Cal. Bus. & Prof. Code § 17200* fails because Coatings did not show that Akzo's **[*754]** bidding had any injurious effect on competition as required by *Cel-Tech v. L.A. Cellular Communications, 20 Cal. 4th 163, 973 P.2d 527, 544, 83 Cal. Rptr. 2d 548 (Cal. 1999)* (predatory pricing case defining ***HN2***[] "unfair" competition as "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition").

Coatings's common law causes of action for interference with contractual relations and prospective economic advantage fail because Coatings did not present any evidence of the existence of a contract, *see Pacific Gas & Elec. Co. v. Bear Stearns & Co., 50 Cal. 3d 1118, 791 P.2d 587, 589-90, 270 Cal. Rptr. 1 (Cal. 1990)*, or of wrongful conduct "other than the fact of the interference itself," *Della Penna v. Toyota Motor Sales, 11 Cal. 4th 376, 902 P.2d 740, 751, 45 Cal. Rptr. 2d 436 (Cal. 1995)*. **[**4]**

Akzo's request for sanctions is denied as improperly made to this Court. *See Fed. R. App. P. 38*; *28 U.S.C. § 1927*.

AFFIRMED.

End of Document

* This disposition is not appropriate for publication and may not be cited to or by the courts of this circuit except as provided by *Ninth Circuit Rule 36-3*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[ ] **Entitlement as Matter of Law, Appropriateness**

A motion for summary judgment will be granted only if there exists no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. In other words, if there clearly exist factual issues that properly can be resolved only by a finder of fact because they may reasonably be resolved in favor of either party, then summary judgment is inappropriate. The moving party bears the burden of showing that there is no genuine issue as to any material fact.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

HN2[] **Summary Judgment, Opposing Materials**

When ruling on a motion for summary judgment, the court must construe the facts alleged in the light most favorable to the party opposing the motion. A party who bears the burden of proof on a particular claim must factually support each element of his or her claim. A complete failure of proof concerning an essential element necessarily renders all other facts immaterial. Thus, on those issues on which the nonmoving party will have the burden of proof, it is his or her responsibility to confront the motion for summary judgment with an affidavit or other similar evidence.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Affidavits

Civil Procedure > ... > Discovery > Methods of Discovery > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN3[] **Supporting Materials, Affidavits**

Where the nonmoving party will bear the burden of proof at trial on a dispositive issue, a summary judgment motion may properly be made in reliance solely on the pleadings, depositions, answers to interrogatories, and admissions on file. Such a motion, whether or not accompanied by affidavits, will be made and supported as provided in this rule, and *Fed. R. Civ. P. 56(e)* therefore requires the nonmoving party to go beyond the pleadings and by her own affidavits, or by the depositions, answers to interrogatories, and admissions on file, designate specific facts showing that there is a genuine issue for trial.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Scintilla Rule

HN4[] **Summary Judgment, Evidentiary Considerations**

A mere scintilla of evidence is not enough to create a fact issue. There must be sufficient evidence favoring the nonmoving party for a jury to return a verdict for that party. If the evidence is merely colorable, or is not significantly probative, summary judgment may be granted.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN5[] **Types of Contracts, Covenants**

The covenant of good faith and fair dealing merely obligates the parties to exercise good faith in performing their contractual obligations; it cannot be invoked to require a party to take an action contrary to the express terms of a contract.

Business & Corporate Law > Distributorships & Franchises > Assignments & Transfers

Contracts Law > Types of Contracts > Lease Agreements > General Overview

Energy & Utilities Law > Oil & Petroleum Products > Franchising & Marketing

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

HN6[] **Distributorships & Franchises, Assignments & Transfers**

Under *Md. Code Ann., Com. Law II § 11-304*, a gasoline supplier may not unreasonably withhold his consent to any assignment, transfer, sale, or renewal of a service station business. The statute does not define the term "unreasonable." However, in a decision relying on the decisional law on the general assignment of leases, the United States District Court for the District of Maryland has determined that a franchiser's disapproval must be based on reasonable commercial standards.

Business & Corporate Law > Distributorships & Franchises > Assignments & Transfers

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Business & Corporate Law > Distributorships & Franchises > General Overview

HN7[] **Distributorships & Franchises, Assignments & Transfers**

It is not unreasonable for a franchiser to disapprove the sale of one of its franchises to a financially unstable transferee. Similarly, it is not unreasonable for a franchiser to reject a transferee, who it deems to lack the requisite business experience or acumen.

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN8[] **Testimony, Expert Witnesses**

If an "expert" witness is relying solely or primarily on experience, he must explain how that experience leads to the conclusion reached, why that experience is a sufficient basis for the opinion, and how that experience is reliably applied to the facts. *Fed. R. Evid. 702* advisory committee's note.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN9[] **Summary Judgment, Burdens of Proof**

A mere scintilla of evidence is not enough to create a fact issue.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Evidence > ... > Statements as Evidence > Hearsay > Hearsay Within Hearsay

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Evidence > ... > Statements as Evidence > Hearsay > General Overview

HN10[] **Summary Judgment, Evidentiary Considerations**

Hearsay evidence does not provide sufficient support to defeat a summary judgment motion.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Energy & Utilities Law > Oil & Petroleum Products > Gasoline Fuels > Gasoline Dealers & Distributors

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

HN11[] **Robinson-Patman Act, Claims**

In order to establish a violation of the Robinson-Patman Act, *15 U.S.C.S. § 13*, a plaintiff must prove: (1) sales of commodities in interstate commerce; (2) that the gasoline and other goods sold to plaintiff were of the same grade and quality as those sold to other similarly situated dealers; (3) that defendant discriminated in price between plaintiff and other dealers; and (4) that the discrimination had a prohibited effect on competition.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Affidavits

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN12[] **Supporting Materials, Affidavits**

Fed. R. Civ. P. 56(f) requires that a party alleging inadequate discovery must file an affidavit setting forth the specific discovery that needs to be taken and the reasons for the needed discovery.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Labor & Employment Law > ... > Racial Discrimination > Employment Practices > Compensation

HN13[] **Price Discrimination, Competitive Injuries**

Possible injury to competition so obviously follows from differential pricing that it is established prima facie by proof of a substantial price discrimination between competing purchasers over time.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN14[] Robinson-Patman Act, Claims

The Maryland legislature has stated that the purpose of the Maryland Antitrust Act is to complement the body of federal law governing restraints of trade, unfair competition, and unfair, deceptive, and fraudulent acts or practices and has directed that courts construing Maryland's state ***antitrust law*** should be guided by the interpretation given by the federal courts to the various federal statutes dealing with the same or similar matters. *Md. Code Ann., Com. Law II § 11-202(a)(2)*. The court has specifically noted that it is appropriate to look to Robinson-Patman Act decisions in construing *Md. Code Ann., Com. Law II § 11-204*.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN15[] Robinson-Patman Act, Claims

State claims under *Md. Code Ann., Com. Law II § 11-204(a)* and *(b)* must fail where those same claims would also fail under similar federal law.

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

Energy & Utilities Law > Oil & Petroleum Products > Franchising & Marketing > Franchise Nonrenewal & Termination

Energy & Utilities Law > ... > Gasoline Fuels > Petroleum Marketing Practices Act > General Overview

HN16[] Distributorships & Franchises, Termination

Under the Petroleum Marketing Practices Act (PMPA), *15 U.S.C.S. §§ 2801-2806*, a franchiser may terminate or refuse to renew a franchise only if one of the grounds set forth in *15 U.S.C.S. § 2802(b)* exists. *15 U.S.C.S. § 2802(a)*. *Section 2802(b)(2)(A)* authorizes termination where there has been a failure by the franchisee to comply with a provision of the franchise, which provision is both reasonable and of material significance to the franchise relationship. *15 U.S.C.S. § 2802(b)(2)(A)*. 15 U.S.C.S. § 2808(b)(2)(C) allows termination upon the occurrence of an event which is relevant to the franchise relationship and as a result of which termination of the franchise or nonrenewal of the franchise relationship is reasonable. 15 U.S.C.S. § 2808(b)(2)(C).

Opinion by: DEBORAH K. CHASANOW

Opinion

[*270] MEMORANDUM OPINION

Presently pending and ready for resolution in this case is the motion for summary judgment of Defendant Exxon Mobil Corporation (sued as "Exxon Company, U.S.A." and referred to herein as "ExxonMobil" or "Defendant"). The issues have been fully briefed and no hearing is deemed necessary. Local Rule 105.6. For the reasons that follow, the court will grant the motion for summary judgment in its entirety.

I. Background

The following facts are uncontroverted or set forth in the light most favorable to Plaintiff. On or about September 25, 1996, Plaintiff Mikeron, Inc. ("Mikeron" or "Plaintiff") and Defendant entered into a Retail Motor Fuel Store Lease ("Lease") **[**2]** and a Retail Motor Fuel Store Sales Agreement ("Sales Agreement"). Under these agreements, Plaintiff leased from Defendant and operated two Exxon service stations, one in Fort Washington, Maryland and the other in Woodbridge, Virginia, and purchased Exxon-branded motor fuel to be resold at those service stations. The two agreements constituted a franchise pursuant to the Petroleum Marketing Practices Act ("PMPA"), *15 U.S.C. §§ 2801-2806*, which governs the relationship between suppliers and re-sellers of branded petroleum products. The Lease and Sales Agreement covered the period from October 1, 1996 through October 1, 1999.

In the fall of 1997, Plaintiff proposed to Defendant the idea that Plaintiff would transfer its interests in the two service stations to two separate individuals. Plaintiff retained the services of Corporate Investments, a commercial brokerage firm that engages in the sale of service stations, to screen and approve two potential purchasers. Plaintiff then proposed as transferees Hamid Aziz ("Aziz") for the Woodbridge station and Shamsher Singh ("Singh") for the Fort Washington station. However, Defendant refused to consent to the transfer **[**3]** of Plaintiff's interests in either service station to the proposed transferees even though, Plaintiff alleges, both were qualified to operate the businesses. Defendant contends that it rejected Aziz and Singh pursuant to the ExxonMobil Dealer Selection Guidelines ("Guidelines") because Aziz failed a credit review and Singh did **[*271]** not score enough points under the Guideline's six screens. [1]

[4]** In addition, Plaintiff alleges that Defendant charged other, independently-owned Exxon stations within close proximity to those operated by Plaintiff a substantially lower price-per-gallon of gasoline and other goods. Plaintiff further alleges that Defendant gave other stations greater voluntary concessions, such as rent adjustments and rebates, than it gave to Plaintiff. On April 8, 1998, Plaintiff filed suit charging Defendant with improperly withholding

---

[1] The Guidelines contain six tests or "screens" by which Defendant evaluates dealer applicants. The six screens include: (a) the written application (50 points); (2) a math and reading comprehension test (50 points); (3) a Hogan Personal Inventory (50 points); (4) an initial interview (50 points); (5) a credit review (50 points); and (6) a panel interview (100 points). If an applicant receives a score of at least 300 points, the applicant is approved unless he has failed the credit review. *See* Paper no. 79, App. A, Tab 2, Ex. B. Singh scored only 259.8 points and had the most difficulty in the initial and panel interviews, where he allegedly failed to demonstrate sufficient business acumen.

consent to the transfer of the service stations. Plaintiff amended the complaint on October 28, 1998, and then again on November 10, 1998, adding counts pertaining to the allegations of price discrimination against Defendant.

On January 18, 1999, Plaintiff sent a letter requesting an accounting from Defendant and disputing charges for the sale and delivery of certain Exxon products to Plaintiff. The letter also notified Defendant of Plaintiff's intention to sell non-Exxon branded fuel and to begin the de-branding and de-identification process as specified in the Sales Agreement. Approximately one week later, on January 25, 1999, Defendant terminated Plaintiff's Lease, Sales Agreement and franchise. The termination letter stated **[**5]** that the grounds for the termination were that Plaintiff (a) breached its Lease with Defendant by using Defendant's motor fuel storage tanks and dispensing equipment for the storage, dispensing and sale of non-Exxon-branded motor fuel and (b) breached its Sales Agreement with Defendant by failing to provide a representative offering of Exxon-branded motor fuel at the two service stations it leased and operated. *See* Paper no. 79, App. A, Tab 2, Ex. N.

On January 27, 1999, Defendant filed a motion for a temporary restraining order and preliminary injunction, seeking to enjoin Plaintiff from using the Exxon trademark and to prevent Plaintiff from using Defendant's storage tanks, lines, dispensers and other equipment in connection with the dispensing and/or sale of non-Exxon motor fuel. The court granted the temporary restraining order by consent as to the trademark issue, but denied the remainder. Plaintiff then filed a motion to preliminarily enjoin Defendant's termination of the franchise pending litigation. At a hearing on February 19, 1999, the court denied that motion and ordered Plaintiff to vacate both service stations. On February 24, 1999, Plaintiff filed a Third Amended **[**6]** Complaint adding a count for violation of the PMPA to its existing counts. Defendant now moves for summary judgment on all counts.

II. Standard of Review

It is well established that ***HN1***[] a motion for summary judgment will be granted only if there exists no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law. *FED. R. CIV. P. 56(c)*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 250, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. In other words, if there clearly exist factual issues "that **[*272]** properly can be resolved only by a finder of fact because they may reasonably be resolved in favor of either party," then summary judgment is inappropriate. *Anderson, 477 U.S. at 250*; *see also* *Pulliam Inv. Co. v. Cameo Properties, 810 F.2d 1282, 1286 (4th Cir. 1987)*; *Morrison v. Nissan Motor Co., 601 F.2d 139, 141 (4th Cir. 1979)*; *Stevens v. Howard D. Johnson Co., 181 F.2d 390, 394 (4th Cir. 1950)*. The moving party bears the burden of showing that there is no genuine **[**7]** issue as to any material fact. *FED. R. CIV. P. 56(c)*; *Pulliam Inv. Co., 810 F.2d at 128* (citing *Charbonnages de France v. Smith, 597 F.2d 406, 414 (4th Cir. 1979))*.

HN2[] When ruling on a motion for summary judgment, the court must construe the facts alleged in the light most favorable to the party opposing the motion. *United States v. Diebold, Inc., 369 U.S. 654, 655, 8 L. Ed. 2d 176, 82 S. Ct. 993 (1962)*; *Gill v. Rollins Protective Servs. Co., 773 F.2d 592, 595 (4th Cir. 1985)*. A party who bears the burden of proof on a particular claim must factually support each element of his or her claim. "[A] complete failure of proof concerning an essential element . . . necessarily renders all other facts immaterial." *Celotex Corp., 477 U.S. at 323*. Thus, on those issues on which the nonmoving party will have the burden of proof, it is his or her responsibility to confront the motion for summary judgment with an affidavit or other similar evidence. *Anderson, 477 U.S. at 256*.

In *Celotex Corp.*, the Supreme Court stated:

> In cases like the instant one, ***HN3***[] where the nonmoving party will **[**8]** bear the burden of proof at trial on a dispositive issue, a summary judgment motion may properly be made in reliance solely on the "pleadings, depositions, answers to interrogatories, and admissions on file." Such a motion, whether or not accompanied by affidavits, will be "made and supported as provided in this rule," and *Rule 56(e)* therefore requires the nonmoving party to go beyond the pleadings and by her own affidavits, or by the "depositions, answers to interrogatories, and admissions on file," designate "specific facts showing that there is a genuine issue for trial."

Celotex Corp., 477 U.S. at 324. However, ***HN4***[] "'a mere scintilla of evidence is not enough to create a fact issue.'" *Barwick v. Celotex Corp., 736 F.2d 946, 958-59 (4th Cir. 1984)* (quoting *Seago v. North Carolina Theatres, Inc., 42 F.R.D. 627, 632 (E.D.N.C. 1966)*, *aff'd*, *388 F.2d 987 (4th Cir. 1967))*. There must be "sufficient evidence favoring the nonmoving party for a jury to return a verdict for that party. If the evidence is merely colorable, or is not significantly probative, summary judgment may be granted." *Anderson, 477 U.S. at 249-50* **[**9]** (citations omitted).

III. Analysis

A. Disapproval of Assignment Claims

1. Breach of Contract Claim (Count I)

Plaintiff claims that Defendant breached the Franchise Agreement with Plaintiff, including its obligation of good faith and fair dealing, by arbitrarily and unreasonably refusing to approve Plaintiff's prospective transferees. However, both the Lease Agreement and Sales Agreement (which together constitute the Franchise Agreement) contain provisions explicitly *prohibiting* Plaintiff from transferring or assigning its franchises to a third party. *See* Paper no. 79, App. A, Tab 2, Ex. A. The Assignability Rider to the Lease provides that "TENANT shall make no assignment of this Lease . . . in whole or in part, directly or indirectly." **[*273]** *Id.* The Assignability Rider to the Sales Agreement provides that "DEALER shall make no assignment of this Sales Agreement . . . in whole or in part, directly or indirectly." *Id.* Thus, Defendant's refusal to approve the transfer of the two stations, whether reasonable or not, does not violate any contractual provision, and Defendant is entitled to summary judgment. [2] *See, e.g., Bill Call Ford v. Ford Motor Co., 830 F. Supp. 1053, 1056-57 (N.D.Ohio 1993)* **[**10]** (finding that where contract prohibited assignment or transfer of franchise, franchisee's claim that franchisor unreasonably withheld consent to transfer was "without contractual predicate").

Plaintiff cannot rescue this claim by relying on ***HN5***[] the covenant of good faith and fair dealing. That obligation merely obligates the parties to exercise good faith in performing their contractual obligations; it cannot be invoked to require a party to take an action contrary to the express terms of a contract. *See, e.g., Parker* ***[**11]*** *v. Columbia Bank, et al., 91 Md.App.346, 366, 604 A.2d 521, 531 (Md.Ct.Spec.App. 1992)*. Because the Franchise Agreement expressly prohibits transfer or assignment of the franchise, Plaintiff cannot use the obligation of good faith and fair dealing to penalize Defendant for disapproving the proposed transfers.

2. Maryland Gasohol and Gasoline Products Marketing Act Claim (Count II)

Plaintiff next alleges that Defendant violated *MD. CODE ANN., COM. LAW II § 11-304* (part of the Gasohol and Gasoline Products Marketing Act), which states that ***HN6***[] a gasoline supplier "may not unreasonably withhold his consent to any assignment, transfer, sale, or renewal" of a service station business. *Id. § 11-304(g)*. Defendant argues that this claim must fail because its decisions to disapprove Plaintiff's proposed transferees, Aziz and Singh, were made in accordance with its Dealer Selection Guidelines. The statute does not define the term "unreasonable." However, in a recent decision relying on the decisional law on the general assignment of leases, this court determined that a franchisor's disapproval must be based on "reasonable commercial standards." *See Hannon v. Exxon Co., U.S.A., 54 F. Supp.2d 485, 494 (D.Md. 1999).* **[**12]** Then, the court turned specifically to Defendant's Guidelines and ruled that they "embod[]y 'reasonable commercial standards,'" and that a defendant's adherence to them in disapproving an applicant "shields [that] decision from accurately being regarded as unreasonable, even if it was not wise or even 'correct' in some sense." *Id. at 495* (quoting *The Maxima Corp. v.*

---

[2] The Assignability Riders also provide that if a "valid state statute specifically applicable to the transfer of branded motor fuel contracts or retail motor fuel store leases requires Exxon [Mobil] to consider giving consent" to a proposed assignment, then the franchisee must give ExxonMobil a right of first refusal with regard to any proposed assignment. *See* Paper no. 79, App. A, Tab 2, Ex. A. These riders, however, do not establish a contractual right for Plaintiff to assign its franchises.

Cystic Fibrosis Found., 81 Md.App. 602, 568 A.2d 1170, 1176 (1990)). In the instant case, neither applicant scored the requisite number of points under the Guidelines' scoring system.

Even independent of the Guidelines and the court's decision in *Hannon*, Defendant arguably acted in a reasonable manner in rejecting Aziz and Singh. With regard to Aziz, who failed the credit review, **HN7**[] it is not unreasonable for a franchisor to disapprove the sale of one of its franchises to a financially unstable transferee. *See, e.g.,* *In re Pioneer Ford Sales, Inc., 729 F.2d 27, 31 (1st Cir. 1984)*; *Simonds* **[*274]** *Chevrolet, Inc. v. General Motors Corp., 564 F. Supp. 151, 153 (D.Mass. 1983)*. Similarly, it is not unreasonable for a franchisor to reject a transferee, such as **[**13]** Singh, who it deems to lack the requisite business experience or acumen. *See, e.g.,* *Simonds Chevrolet, 564 F. Supp. at 153*.

Plaintiff does not come forward with any substantial evidence that Defendant acted unreasonably in disapproving the assignments to Aziz and Singh. Plaintiff does not challenge the Guidelines on their face, nor does Plaintiff provide any evidence that Defendant applied the Guidelines incorrectly in evaluating Aziz and Singh as transferees. Plaintiff also does not challenge the applicability of the *Hannon* ruling to this case. In defense of its claim, Plaintiff merely offers the deposition testimony of Arnold Heckman ("Heckman") of Corporate Investments. [3] *See* Heckman Dep. at 168 (Paper no. 79, App. A, Tab 7). However, Heckman's testimony that the rejections of Aziz and Singh were unreasonable is only a subjective, unsubstantiated opinion, which is insufficient to raise a genuine issue of material fact. Heckman did not contend that the Guidelines were unreasonable, had no evidence that Defendant misapplied the Guidelines in the case of Aziz or Singh, and, in fact, had never seen the Guidelines before. *See id.* at 126, 131-32, 144-47. Further, **[**14]** Heckman appears to have formed his opinion without knowing about Aziz's financial woes, or how Singh had performed in his interviews. *See id.* at 337-38, 199-200, 203. He failed to provide any basis for his conclusory statement that Defendant acted unreasonably. **HN8**[] If an "expert" witness is relying solely or primarily on experience, as Heckman appears to be, he must explain how that experience leads to the conclusion reached, why that experience is a sufficient basis for the opinion, and how that experience is reliably applied to the facts. *See* FED.R.EVID. 702 advisory committee's note. Because Heckman provided no basis for his opinion, his deposition is not reliable evidence and does nothing to cast into doubt the "reasonableness" of Defendant's decision to disapprove the proposed transferees. **HN9**[] "'[A] mere scintilla of evidence is not enough to create a fact issue.'" *Barwick, 736 F.2d at 958-59* (internal citation omitted). Therefore, there is no genuine dispute of material fact here that Defendant's disapproval of the proposed transferees was reasonable. Accordingly, summary judgment shall be granted in Defendant's favor as to the Maryland Gasohol and Gasoline **[**15]** Products Marketing Act claim.

[16] B. Pricing Claims**

1. Robinson-Patman Act Claim (Count III)

Plaintiff argues that Defendant violated the Robinson-Patman Act, *15 U.S.C. § 13*, by acting in a discriminatory manner toward Plaintiff with respect to the prices **[*275]** of gasoline and "other goods," rents charged to lessee-dealers, and voluntary concessions. Plaintiff alleges that Defendant discriminated against it in this manner with the intent to substantially lessen competition or to create a monopoly. **HN11**[] In order to establish a violation of the Robinson-Patman Act, Plaintiff must prove: (1) sales of commodities in interstate commerce; (2) that the gasoline and other goods sold to Plaintiff were of the same grade and quality as those sold to other similarly situated

---

[3] Plaintiff also makes an unsubstantiated assertion that Defendant purposefully withheld the transfer of the service stations as part of a personal vendetta against Mangum, without any consideration of the qualifications of the proposed transferees. Plaintiff offers no evidence, other than Mangum's own deposition, to support this theory. The assertion in his deposition that Defendant's representative John Greco told Corporate Investment's broker Bryan Smyth who then told Mangum that Defendant was "not going to approve any purchaser" is multiple hearsay. **HN10**[] Hearsay evidence does not provide sufficient support to defeat a summary judgment motion. *See* *Evans v. Tech. Applications & Serv. Co., 80 F.3d 954, 962 (4th Cir. 1996)*. Moreover, it makes no sense that if Defendant had a vendetta against Mangum that it would withhold consent to transfer his franchises; if Defendant truly did not like Mangum, it would make more sense to approve the transfer and no longer have to do business with him.

dealers; (3) that Defendant discriminated in price between Plaintiff and other dealers; and (4) that the discrimination had a prohibited effect on competition. *See* Texaco, Inc. v. Hasbrouck, 496 U.S. 543, 556, 110 L. Ed. 2d 492, 110 S. Ct. 2535 (1990); Berlyn, Inc. v. The Gazette Newspapers, Inc., 157 F. Supp.2d 609, 621 (D.Md. 2001). The first two elements are not subjects of dispute in the instant **[**17]** case, but Defendant contends that the third and fourth elements have not been met. The court agrees.

Plaintiff has failed to provide sufficient evidence to establish that Defendant engaged in discriminatory pricing between Plaintiff and similarly situated dealers. Plaintiff's answers to Defendant's interrogatories about the pricing claims were vague and provided no concrete information. The record is devoid of any details of allegedly discriminatory price transactions, such as dates of sale, identities of purchasers, or actual prices charged. The only evidence of discriminatory pricing offered is the deposition of Plaintiff's president Mangum, which contains general assertions that some other ExxonMobil dealers were charged lower wholesale gasoline prices than Plaintiff. *See* Paper no. 79, App. A, Tab 1. Although Mangum claimed to have seen other ExxonMobil dealers' invoices showing lower gas prices, he neither provided any copies of them nor any specific information regarding allegedly discriminatory transactions. [4] Plaintiff has similarly failed to provide any evidence regarding discrimination in "other goods" and "voluntary concessions."

[18]** Plaintiff has also failed to establish any injury to competition. ***HN13***[] Possible injury to competition "so obviously follows from [differential pricing] that it 'is established prima facie by proof of a substantial price discrimination between competing purchasers over time.'" *Hoover Color Corp. v. Bayer Corp., 199 F.3d 160, 163 (4th* ***[*276]*** *Cir. 1999)* (quoting *Falls City Indus. v. Vanco Beverage, Inc., 460 U.S. 428, 435, 75 L. Ed. 2d 174, 103 S. Ct. 1282 (1983))*. Plaintiff has not offered any such proof. Because Plaintiff has not established the elements necessary for a violation of the Robinson-Patman Act, Defendant is entitled to summary judgment on this count.

2. Maryland Antitrust Act Claim (Count IV)

Plaintiff makes the same arguments about discriminatory pricing under *MD. CODE ANN., COM. LAW II § 11-204*, which is nearly identical to the Robinson-Patman Act. ***HN14***[] The Maryland legislature has stated that the purpose of the Maryland Antitrust Act is to "complement the body of federal law governing restraints of trade, unfair competition, and unfair, deceptive, and fraudulent acts or practices" and has directed that courts construing Maryland's state **[**19]** ***antitrust law*** should be "guided by the interpretation given by the federal courts to the various federal statutes dealing with the same or similar matters." *MD. CODE ANN., COM. LAW II § 11-202(a)(2)*. This court has specifically noted that it is appropriate to look to Robinson-Patman Act decisions in construing *Section 11-204*. *See* *Soth v. Baltimore Sun Co., 4 F. Supp. 2d 417, 420 (D.Md. 1996)* ("Federal ***antitrust law*** is used to interpret . . . *[Section 11-204*], which mirror[s] . . . section 13(a) of the Robinson-Patman Act . . .").

---

[4] Plaintiff concedes in its opposition that it has "little physical documentation to support" these claims, but suggests that its lack of evidence is due to Defendant's obstruction of the discovery process. *See* Paper no. 82 at 4, 8. Specifically, Plaintiff claims that Defendant refused to schedule the depositions of Exxon executives John Allred and Jim Carter, and inhibited Plaintiff's efforts to obtain documents from competitor Exxon stations. *See id.*

Plaintiff's complaints about discovery at this time are inappropriate and insufficient. Plaintiff had more than enough time to conduct discovery on its claims; in fact, excluding the time the case was stayed due to Plaintiff's bankruptcy, Plaintiff had close to two years to take discovery. Moreover, during the years this case has been pending, Plaintiff never filed a motion to compel discovery. Plaintiff never moved to compel the depositions of Carter or Allred or responses to interrogatories or document requests. Plaintiff may not do so for the first time at summary judgment.

Finally, even if it were appropriate at this stage to express discovery-related complaints, Plaintiff has not complied with *FED.R.CIV.P. 56(f)*, which ***HN12***[] requires that a party alleging inadequate discovery must file an affidavit setting forth the specific discovery that needs to be taken and the reasons for the needed discovery. *See* *Nguyen v. CNA Corp., 44 F.3d 234, 242 (4th Cir. 1995)*. Plaintiff neither filed an affidavit nor described with specificity the materials he seeks to uncover. For all of these reasons, Plaintiff's complaints about discovery are irrelevant.

Therefore, just as Plaintiff's Robinson-Patman Act claim failed because Plaintiff did not establish two of the essential elements, it also fails under Section 11-204 for the same reasons. **HN15**[] "State claims under section 11-204(a)and (b) must fail where those same claims would also fail under similar federal law." Hinkleman v. Shell Oil Co., 962 F.2d 372, 379 (4th Cir. 1992); Neugebauer v. The A.S. Asbell Co., 474 F. Supp. 1053, 1071 (D.Md. 1979) (granting summary judgment on Section 11-204 claim because summary judgment was granted on similar Robinson-Patman Act claim). *See also* Baltimore Scrap Corp. v. The David J. Joseph Co., 81 F. Supp.2d 602, 620 (D.Md. 2000) **[**20]** (granting summary judgment on state law antitrust claim because claim under similar federal ***antitrust law*** failed on summary judgment). Because Plaintiff's state antitrust claim is based on the same factual record as the Robinson-Patman claim for which the court has already granted summary judgment, Defendant is also entitled to summary judgment on the state law claim.

3. Good Faith Pricing Claim (Count V)

Plaintiff argues that Defendant violated MD. CODE ANN., COM. LAW II § 2-305, which requires that the price of the gasoline and other goods sold by Defendant to Plaintiff be established in good faith and in accordance with reasonable commercial standards. *See id.* cmt. 3. Plaintiff contends that by acting in a discriminatory manner toward Plaintiff with respect to the price of gasoline and other goods, Defendant has not acted in good faith and in accordance with such standards. However, as discussed in the subsections above, Plaintiff has not provided any substantial evidence that Defendant charged higher prices to Plaintiff than to Plaintiff's competitors for gasoline or any other product, or that Defendant set any of its prices in bad faith. Because Plaintiff has forecast **[**21]** no evidence whatsoever to support its Section 2-305 claim, Defendant is entitled to summary judgment.

C. PMPA Claim - Wrongful Termination of Franchise *(Count VI)*

Plaintiff has claimed that Defendant violated the PMPA when it terminated the franchise agreement between the parties on January 25, 1999. **HN16**[] Under the PMPA, a franchisor may terminate or refuse to renew a franchise only if one of the **[*277]** grounds set forth in § 2802(b) exists. *See* 15 U.S.C. § 2802(a). Defendant asserts that it was justified in terminating the franchise with Plaintiff based on the exceptions in § 2802(b)(2)(A)and 2802(b)(2)(C). Section 2802(b)(2)(A) authorizes termination where there has been a "failure by the franchisee to comply with a provision of the franchise, which provision is both reasonable and of material significance to the franchise relationship." *Id.* § 2802(b)(2)(A). Section 2802(b)(2)(C) allows termination upon "the occurrence of an event which is relevant to the franchise relationship and as a result of which termination of the franchise or nonrenewal of the franchise relationship is reasonable . . . ." *Id.* § 2802(b)(2)(C).

Defendant's justification **[**22]** for the termination is that Plaintiff failed to comply with at least two provisions of the franchise agreement: (1) the specification in Article 3(L) of the Lease that Plaintiff could use Defendant's equipment "only for the storage, dispensing, and sale of EXXON-branded gasolines and diesel fuels purchased directly from EXXON"; and (2) Section 10.1(F) of the Sales Agreement, which required Plaintiff to promote, preserve and increase the public's confidence in Exxon-branded products, to maintain and enhance the sale of such products, and to sell a "representative offering" of Exxon-branded fuels, defined as at least two Exxon-branded fuels. *See* Paper no. 79, App. A, Tab 2, Ex. A.

Defendant has provided considerable evidence that Plaintiff breached both of these provisions. Plaintiff's own president, Mangum, testified in his deposition that Mikeron sold unbranded gasoline at the two service stations using Defendant's tanks, lines, and dispensers. *See id.*, Tab 1. Mangum also admitted having sold non-Exxon branded gasoline at both stations in an affidavit filed with this court. *See id.*, Tab 5. Defendant has also provided receipts generated by the fuel dispensers at both stations **[**23]** stating that the fuel dispensed was not Exxon fuel. *See id.*, Tab 2, Ex. M. In addition, Mangum admitted in his deposition that Mikeron ceased purchasing fuel from Defendant for either station in late 1998 and that during that period, Mikeron sold only non-Exxon branded fuels. *See id.*, Tab 1.

Defendant argues that Plaintiff's demonstrated breaches of Article 3(L) of the Lease and Section 10.1(F) of the Sales Agreement constitute proper grounds for termination of the franchise under 2802(b)(2)(A) and (C) of the PMPA. With respect to the requirement in Article 3(L) of the Lease that Plaintiff use Defendant's tanks, lines and pumps only to store and dispense Exxon-branded gasoline, it is well-settled that such a provision is an acceptable means of protecting a franchisor's goodwill and ensuring safe distribution of a hazardous product. *See, e.g., FTC v. Sinclair Refining Co., 261 U.S. 463, 474-75, 67 L. Ed. 746, 43 S. Ct. 450, 6 F.T.C. 587 (1923)*. In *Pugh v. Mobil Oil Corp., 533 F. Supp.169, 175 (S.D.Tex. 1982)*, a case very similar to this one, the court held that the franchisor's "need to protect goodwill and reputation" justified a contract provision requiring the franchisee **[**24]** to use pumps and other service station equipment solely for the franchisor's products. The law is also well-settled regarding provisions like Section 10.1(F) of the Sales Agreement, which requires Plaintiff to offer a representative sampling of Defendant's branded motor fuels. Courts have repeatedly held that contract provisions requiring a gas station franchisee to purchase and sell a minimum amount of the franchisor's products are reasonable and significant to the franchise agreement. *See, e.g., Shell Oil Co. v. A.Z. Services, Inc., 990 F. Supp. 1406, 1413-14 (S.D.Fla. 1997)*; *Smoot v. Mobil Oil Corp., 722 F. Supp.849, 855* ***[*278]*** *(D.Mass. 1989)* (finding that a provision of the franchise agreement requiring the franchisee to sell the franchisor's fuel was fundamental to the franchise relationship); *Mobil Oil Corp. v. Shah, 671 F. Supp.503, 506 (N.D.Ill. 1987)*.

Thus, the court agrees that both contract provisions breached by Plaintiff are reasonable and of material significance to the franchise relationship, and their breach is sufficient grounds for termination of the franchise, pursuant to *§ 2802(b)(2)(A)*. [5] Accordingly, because Defendant's termination of the **[**25]** franchise was justified, Defendant has not violated the PMPA and is entitled to summary judgment on this count. [6]

IV. Conclusion

For the **[**26]** foregoing reasons, Defendant ExxonMobil's motion for summary judgment will be granted. A separate Order will be entered.

DEBORAH K. CHASANOW

United States District Judge

February 14, 2003.

ORDER

For the reasons stated in the foregoing Memorandum Opinion, it is this 14th day of February, 2003, by the United States District Court for the District of Maryland, ORDERED that:

1. Defendant's motion for summary judgment BE, and the same hereby IS, GRANTED;

2. JUDGMENT BE, and the same hereby IS, ENTERED in favor of Defendant Exxon Mobil Corporation and against Plaintiff Mikeron, Inc.; and

3. The Clerk will transmit copies of the Memorandum Opinion and this Order to counsel for the parties and CLOSE this case.

---

[5] Because the court finds that Defendant's termination of the franchise was justified under *§ 2802(b)(2)(A)*, it is unnecessary to consider whether the termination was also justified under *§ 2802(b)(2)(C)*.

[6] To the extent that Plaintiff has argued for the first time in its reply that Defendant somehow forced it to breach the Franchise Agreement by charging Plaintiff discriminatory prices and unreasonably disapproving assignment to Aziz and Singh, that argument is without merit. As discussed earlier in this opinion, Plaintiff has not provided evidence that Defendant charged discriminatory prices or that Defendant's disapproval was unreasonable. Moreover, the lengthy record in this case indicates that Mangum made the decision on his own for Plaintiff to breach the Franchise Agreement. *See, e.g.*, Mangum Dep. at 217-18, 220-22 (Paper no. 79, App. A, Tab 1).

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss should be granted only if it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. At the motion to dismiss stage, the issue is not whether a plaintiff is likely to prevail ultimately, but whether the claimant is entitled to offer evidence to support the claims. Indeed it may appear on the face of the pleading that a recovery is very remote and unlikely but that is not the test. A complaint need not state the legal theory, facts, or elements underlying the claim, except in certain instances.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN2[] **Heightened Pleading Requirements, Fraud Claims**

Pursuant to the simplified pleading standard of *Fed. R. Civ. P. 8(a)*, a complaint must only include a short and plain statement of the claim showing that the pleader is entitled to relief. In contrast, the heightened pleading standard of *Fed. R. Civ. P. 9(b)* requires that in claims of fraud or mistake the circumstances constituting fraud or mistake shall be stated with particularity.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

The task of the court in ruling on a *Fed. R. Civ. P. 12(b)(6)* motion is merely to assess the legal feasibility of the complaint, not to assay the weight of the evidence which might be offered in support thereof. When deciding a motion to dismiss, courts must accept all factual allegations in the complaint as true, and draw all reasonable inferences in plaintiff's favor. Courts may not consider matters outside the pleadings but may consider documents attached to the pleadings, documents referenced in the pleadings, or documents that are integral to the pleadings.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN4[] **Private Actions, Standing**

Dismissals in antitrust cases prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly. Nonetheless, it is not proper to assume that the plaintiff can prove facts that it has not alleged or that the defendants have violated the antitrust laws in ways that have not been alleged.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Private Actions, Standing**

To plead an antitrust action, a plaintiff must first allege standing to bring suit. A plaintiff only has standing if he suffered an antitrust injury. An antitrust injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of the anticompetitive acts made possible by the violation. The fact that defendants' behavior is alleged to be illegal per se under *§ 1* of the Sherman Act does not in any way diminish the requirement that plaintiffs show an antitrust injury.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN6[] **Private Actions, Standing**

The purpose of the antitrust laws is to protect competition, not competitors. Therefore, a plaintiff must allege an injury beyond harm to an individual competitor. The plaintiff must allege that the challenged action has had an actual adverse effect on competition as a whole in the relevant market. To survive a motion to dismiss, a plaintiff must plead an antitrust injury, even if the chances of proving such an injury are small.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN12[] **Racketeer Influenced & Corrupt Organizations, Claims**

The Racketeer Influenced and Corrupt Organization Act civil liability provision confers standing on any person injured in his business or property by reason of a violation of *18 U.S.C.S. § 1962*. A plaintiff only has standing if, and can only recover to the extent that, he has been injured in his business or property by the conduct constituting the violation.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN13[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

18 U.S.C.S. § 1962(a) prohibits any person who derived income from a pattern of racketeering activity from investing that income in an "enterprise" as defined by the statute. *18 U.S.C.S. §§ 1961(4)*, *1962(a)*. The essence of a violation of *§ 1962(a)* is not the commission of predicate acts but the investment of racketeering income. Thus, to have standing to bring a claim for civil damages under *§ 1962(a)*, a plaintiff must allege injury from defendants' investment of racketeering income in an enterprise.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN15[] Private Actions, Racketeer Influenced & Corrupt Organizations

Pursuant to 18 U.S.C.S. § 1962(b), it is unlawful for any person through a pattern of racketeering activity to acquire or maintain any interest in or control of any enterprise. The purpose of this statute is to prohibit the takeover of a legitimate business through racketeering, typically extortion or loan sharking. Similar to the investment injury requirement of 18 U.S.C.S. § 1962(a), a plaintiff must suffer an acquisition or maintenance injury to have standing to sue under 18 U.S.C.S. § 1962(b). Therefore, to have standing under § 1962(b), a plaintiff must allege injury arising from the acquisition or maintenance of any interest in or control of an enterprise. These injuries must be distinct from those resulting from the commission of the predicate acts.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN16[] Private Actions, Racketeer Influenced & Corrupt Organizations

Without a distinct "acquisition injury," a plaintiff cannot state a cause of action under 18 U.S.C.S. § 1962(b).

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN17[] Private Actions, Racketeer Influenced & Corrupt Organizations

Pursuant to 18 U.S.C.S. § 1962(c), it is unlawful for any person employed by or associated with any Racketeer Influenced and Corrupt Organization Act enterprise to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity. A plaintiff has standing to bring a § 1962(c) claim if he has been injured in his business or property by a defendant conducting the affairs of an enterprise through a pattern of racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN18[] Private Actions, Racketeer Influenced & Corrupt Organizations

If a plaintiff has standing, an *18 U.S.C.S. § 1962(c)* claim must also allege the existence of two distinct entities: a "person" and an "enterprise." The enterprise cannot simply be the "person" referred to by a different name. A corporate entity may be held liable as a Racketeer Influenced and Corrupt Organization Act person where it associates with others to form an enterprise that is sufficiently distinct from itself.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN19[] Private Actions, Racketeer Influenced & Corrupt Organizations

18 U.S.C.S. § 1962(d) makes it unlawful for any person to conspire to violate any provision of *18 U.S.C.S. § 1962*.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN20[] Heightened Pleading Requirements, Fraud Claims

Under *Fed. R. Civ. P. 9(b)*, in all averments of fraud or mistake, the circumstances constituting fraud or mistake shall be stated with particularity. The plaintiff must allege facts supporting the essential elements of a fraud claim.

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

Torts > ... > Fraud & Misrepresentation > Nondisclosure > General Overview

HN21[] Nondisclosure, Elements

Aa common law fraudulent concealment claim requires the plaintiff to allege facts showing: (1) that the defendant failed to disclose material information that it had a duty to disclose, (2) the defendant intended to defraud the plaintiff thereby, (3) the plaintiff reasonably relied upon the representation, and (4) the plaintiff suffered damage as a result of the reliance.

Governments > Fiduciaries

Torts > ... > Fraud & Misrepresentation > Nondisclosure > General Overview

HN22[] Governments, Fiduciaries

A duty to disclose generally arises in one of three ways: (1) when one party makes a partial or incomplete statement that requires clarification; (2) when the parties are in a fiduciary or confidential relationship; or (3) where one party possesses superior knowledge, not readily available to the other, and knows that the other is acting on the basis of mistaken knowledge.

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Torts > ... > Fraud & Misrepresentation > Nondisclosure > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

HN23[] **Consideration, Enforcement of Promises**

A plaintiff alleging a common law fraudulent concealment claim must allege that he actually relied on the purported fraudulent statements or omissions. Reasonable, detrimental reliance upon a misrepresentation is an essential element of a cause of action for fraud, and such reliance must be pleaded with particularity. A party's reliance on false statements or omissions is not reasonable or justifiable if the party has reason to believe that the representations may be false but fails to inquire into their accuracy.

Contracts Law > Contract Interpretation > Fiduciary Responsibilities

Torts > ... > Fraud & Misrepresentation > Nondisclosure > General Overview

HN24[] **Contract Interpretation, Fiduciary Responsibilities**

A duty to disclose based on superior knowledge ordinarily arises only in the context of business negotiations where parties are entering a contract.

Business & Corporate Law > Corporations > Articles of Incorporation & Bylaws > General Overview

Civil Procedure > ... > Justiciability > Standing > Third Party Standing

Business & Corporate Law > Corporations > Corporate Governance > General Overview

Business & Corporate Law > Unincorporated Associations

Civil Procedure > ... > Justiciability > Standing > General Overview

HN25[] **Corporations, Articles of Incorporation & Bylaws**

The bylaws of a corporation constitute a contract between a corporation and its members. Similarly, the bylaws of an unincorporated association express the terms of a contract which define privileges secured and the duties assumed by those who have become members. A third-party, who is not a member of the association or corporation nor a party to the bylaws, lacks standing to bring suit against an organization for violation of its bylaws. Were it otherwise, bylaws would subject organizations to unlimited liability resulting from duties owed to third-parties who have no relationship to the organization.

Criminal Law & Procedure > Accessories > Aiding & Abetting

HN26[] Accessories, Aiding & Abetting

To allege aiding and abetting, a plaintiff must claim: (1) a violation of law by the primary party; (2) knowledge of the violation by the aider and abettor; and (3) "substantial assistance" by the aider and abettor in achieving the primary violation.

Criminal Law & Procedure > Accessories > Aiding & Abetting

Governments > Fiduciaries

HN27[] Accessories, Aiding & Abetting

Inaction by a party is not typically considered substantial assistance. Inaction is actionable participation only when the defendant owes a fiduciary duty directly to the plaintiff.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN28[] Entitlement as Matter of Law, Genuine Disputes

Fed. R. Civ. P. 56 provides for summary judgment if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. An issue of fact is "material" for these purposes if it might affect the outcome of the suit under the governing law, while an issue of fact is "genuine" if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. Where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN29[] Summary Judgment, Opposing Materials

In assessing the record to determine whether genuine issues of material fact are in dispute for the purposes of summary judgment, a court must resolve all ambiguities and draw all reasonable factual inferences in favor of the non-moving party. Although the moving party bears the initial burden of establishing that there are no genuine issues of material fact, once such a showing is made, the nonmovant must set forth specific facts showing that there is a genuine issue for trial. The non-moving party may not, however, rest upon mere allegations or denials. Statements that are devoid of any specifics, but replete with conclusions, are insufficient to defeat a properly supported motion for summary judgment. Mere conclusory statements, conjecture, or speculation cannot by themselves create a genuine issue of material fact.

Antitrust & Trade Law > Clayton Act > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Statute of Limitations > General Overview

HN30[] Antitrust & Trade Law, Clayton Act

Pursuant to § 4B (*15 U.S.C. § 15b*) of the Clayton Act and *N.Y. Gen. Bus. Law § 340(5)*, private antitrust suits are governed by a four-year statute of limitations.

Antitrust & Trade Law > Clayton Act > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Statute of Limitations > General Overview

HN31[] Antitrust & Trade Law, Clayton Act

Antitrust actions accrue when a defendant commits an act that injures plaintiff's business in violation of the antitrust statutes. When there is an alleged continuing antitrust conspiracy, the statute of limitations has usually been understood to mean that each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of that act. However, the commission of a separate and new overt act will not permit the plaintiff to recover for the injury caused by the old overt acts that do not fall within the limitations period.

Antitrust & Trade Law > Clayton Act > Penalties

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraud

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > Tolling

HN32[] **Clayton Act, Penalties**

The statute of limitations in a private antitrust suit is tolled whenever any civil or criminal proceeding is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws. *15 U.S.C.S. § 16(i)*. Also, the statute of limitations may be tolled under the doctrine of fraudulent concealment. A plaintiff may prove fraudulent concealment sufficient to toll the running of the statute of limitations if he establishes (1) that the defendant concealed from him the existence of his cause of action, (2) that he remained in ignorance of that cause of action until some point within four years of the commencement of his action, and (3) that his continuing ignorance was not attributable to lack of diligence on his part.

Antitrust & Trade Law > Clayton Act > General Overview

Governments > Legislation > Statute of Limitations > Tolling

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Statute of Limitations > General Overview

HN33[] **Antitrust & Trade Law, Clayton Act**

The statute of limitations is not tolled by state actions brought under the Clayton Act. Additionally, private actions brought under the Donnelly Act are not tolled by New York Attorney General proceedings. *N.Y. Gen. Bus. Law § 342-c* (2002).

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Statute of Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN35[] **Antitrust & Trade Law, Clayton Act**

Civil Racketeer Influenced and Corrupt Organization Act (RICO) actions are subject to the four-year limitations period contained in § 4B (*15 U.S.C.S. § 15b*) of the Clayton Act. The limitations period begins to run when the plaintiff discovers or should have discovered the RICO injury. There is a "separate accrual" rule under which a new claim accrues and the four-year limitation period begins anew each time a plaintiff discovers or should have discovered a new and independent injury. Under the separate accrual rule, when a plaintiff is continuously injured by an underlying RICO violation, he may only recover for injuries discovered or discoverable within four years of the time suit is brought.

Opinion by: SHIRA A. SCHEINDLIN

Opinion

[*240] OPINION AND ORDER

SHIRA A. SCHEINDLIN, U.S.D.J.:

On April 4, 2002, Gregory Stolow brought this action in his individual capacity and trading as Gold Medal Auctions (collectively "Stolow"). The suit arises from defendants' alleged bid-rigging scheme. Stolow seeks damages under: the Sherman Act, the New York State Donnelly Act, **[**2]** the Federal Racketeer Influenced and Corrupt Organization Act ("RICO"), common law fraud, conspiracy, and aiding and abetting. Defendants now move for dismissal of Stolow's First Amended Complaint ("Am. Compl.") pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, and in the alternative, summary judgment under *Rule 56 of the Federal Rules of Civil Procedure*.

I. BACKGROUND

A. The Parties

Stolow is a citizen of New York and worked as an auctioneer and stamp dealer, occasionally trading as Gold Medal Auctions. Am. Compl. P 1. Defendants include John D. Apfelbaum, Davitt Felder, Davitt Felder, Inc., Anthony Feldman, Dana Okey, Stephen Osborne, Edward Younger, and Ahmed Hegazi [1] (collectively "Stamp Dealers"). *Id.* PP 20-25, 30-31. The Stamp Dealers placed bids and purchased stamp lots at auctions held in New York **[*241]** and other states. [2] *Id.* Defendants also include Greg Manning Auctions Inc., Ivy & Mader Philatelic Auctions, Inc., Robert A. Siegel Auction Galleries, Inc., Shreves Philatelic Galleries Inc., HR Harmer Inc., Earl P.L. Apfelbaum, Inc., Matthew Bennett Inc., and Daniel F. Kelleher Co. Inc. (collectively "Auction Houses"). **[**3]** *Id.* PP 17-19, 26-29, 49. The Auction Houses conducted general stamp auctions. *Id.* The remaining defendants are the American Stamp Dealers Association, Inc. ("ASDA") and the American Philatelic Society ("APS") (collectively "Trade Associations"). *Id.* PP 32-33. The Trade Associations are trade organizations in the stamp industry whose members include stamp auctioneers and stamp dealers.

B. The Complaint

Stolow alleges that in 1970, the Stamp Dealers began rigging bids at public postage stamp auctions. **[**4]** *Id.* P 40. The Stamp Dealers, who referred to themselves as the "Ring", agreed to share bidding information prior to auctions. *Id.* P 41. The Ring reviewed stamp lots and submitted secret bids among themselves for particular lots. The Ring member who submitted the highest bid for a specific lot "won" the privilege of being the only member who would bid on that lot at the actual auction. *Id.* P 54. Under this arrangement, the "winning" Ring member would submit a very high bid at the actual auction. As a result, "any non Ring member dealer would be forced to bid at a [level] where a profit on that lot was minimal or actually resulted in a loss when resold." *Id.* In exchange for the exclusive right to bid on a lot, the "winning" Ring member made payments to the other members. *Id.* P 44.

The Auction Houses were aware of the Ring's activities and assisted in the bid-rigging scheme. The Auction Houses extended favorable credit terms to Ring members. The Ring was also given special private viewing access to the stamp lots prior to auctions. *Id.* P 43. In addition, the Auction Houses reduced the Ring's competition by deliberately mis-describing the stamp collections in **[**5]** their catalogs in a manner that discouraged other bidders. These catalogs were sent worldwide to mail bidders who represented the majority of potential bidders at the sales. *Id.* P 55. The Auction Houses benefitted from this arrangement because floor attendance was reduced, drastically decreasing overhead and increasing the Auction Houses' profits. *Id.* This bid-rigging scheme continued until 1999. *Id.* P 40.

Because of the scheme, Stolow and other bidders refrained from participating in auctions whenever they learned that a Ring member was bidding. *Id.* P 54. Competition at the auctions was significantly reduced and sellers earned less as a result of the bid-rigging scheme. [3] Stolow prohibited the Ring from participating in **[*242]** auctions that he conducted. *Id.* P 13 Consequently, the Ring boycotted Stolow's auctions and he was forced to relocate outside of Manhattan and was eventually driven out of business. *Id.* P 56.

---

[1] Although Ahmed Hegazi did not actually place bids and purchase stamps, he is considered a "Stamp Dealer" here because he allegedly compiled the secret bids for the dealers prior to the auctions. *See id.* P 30.

[2] On January 28, 2002, John D. Apfelbaum and Earl P.L. Apfelbaum pled guilty to criminal charges of violating section 1 of the Sherman Act. *See* Am. Compl. P 34. On April 16, 2002, Davitt Felder and Davitt Felder, Inc. pled guilty to the same charges. *See id.* P 35.

[3] The Amended Complaint includes contradictory allegations that the Ring drove stamp prices above competitive levels and that it brought stamp prices below competitive levels. *Compare* Am. Compl. P 54 ("Any non Ring member dealer would be forced to bid at a level, where a profit on that lot was minimal or actually resulted in loss when resold.") *with id.* P 58 (Defendants' actions restrained trade by "reducing the prices paid by Ring members to sellers below their competitive levels."). For the purpose of the Rule 12(b)(6) motion, all inferences must be drawn in Stolow's favor. Accordingly, it is fair to infer that the Ring would bid both above and below competitive prices.

[6]** Based on these events, Stolow advances seven claims for relief. [4] **[**7]** Defendants submitted two separate motions to dismiss Stolow's claims. *First*, the Stamp Dealers and Auction Houses move to dismiss Claims I - VI. *See* Defendants Greg Manning Auctions Inc., Ivy & Mader Philatelic Auctions, Inc., Robert A. Siegel Auction Galleries, Inc., Shreves Philatelic Galleries Inc., HR Harmer Inc., and Daniel F. Kelleher Co. Inc.'s Memorandum in Support of Motion to Dismiss ("Auction Houses Mem.") at 1. (Defendants John D. Apfelbaum, Earl P.L. Apfelbaum, Inc., Davitt Felder, and Davitt Felder, Inc. join in the arguments made in the Auction Houses Mem. [5]). *Second*, the Trade Associations move to dismiss Claims III and VII, the only two claims against them. *See* American Stamp Dealers Association, Inc., and American Philatelic Society's Memorandum in Support of Motion to Dismiss ("Trade Assocs. Mem.") at 1, 5. In the alternative, the Stamp Dealers and Auction Houses move for summary judgment on Claims I, II, III, and V, pursuant to *Rule 56*. *See* Auction Houses Mem. at 1.

II. MOTION TO DISMISS

A. Legal Standard

HN1[] A motion to dismiss should be granted only if "' appears beyond doubt that the plaintiff can prove no set of facts in support of [his] claim which would entitle [him] to relief.'" *Weixel v. Board of Educ. of New York, 287 F.3d 138, 145 (2d Cir. 2002)* (quoting *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)* (alterations omitted)). At the motion to dismiss stage, the issue "'is not whether a plaintiff is likely to prevail ultimately, but whether the claimant is entitled to offer evidence to support the claims. Indeed it may appear on the face of the pleading that a recovery is very remote and unlikely but that is not the test.'" *Phelps v. Kapnolas, 308 F.3d 180, 184-85 (2d Cir. 2002)* (quoting *Chance v. Armstrong, 143 F.3d 698, 701 (2d Cir. 1998))*. **[**8]** A complaint need not state the legal theory, facts, or elements underlying the claim, except in certain instances. *Compare Fed. R. Civ. P. 8 with Fed. R. Civ. P. 9*. ***HN2***[] Pursuant to the simplified pleading standard of *Rule 8(a)*, a complaint must only include "a short and plain statement of the claim showing that the pleader is entitled to relief." *Swierkiewicz v. Sorema N.A., 534 U.S. 506, 512, 152 L. Ed. 2d 1, 122 S. Ct. 992 (2002)* (quoting *Rule 8(a)(2)*). In contrast, the heightened pleading standard of *Rule 9(b)* requires that in claims of fraud or mistake "the circumstances constituting fraud or mistake shall be stated with particularity." *Fed. R. Civ. P. 9(b)*.

HN3[] The task of the court in ruling on a *Rule 12(b)(6)* motion is "merely to assess the legal feasibility of the complaint, not to assay the weight of the evidence which might be offered in support thereof." *Pierce v. Marano, 2002 U.S. Dist. LEXIS 14870*, *No. 01 Civ. 3410, 2002 WL 1858772*, at *3 (S.D.N.Y. Aug. 13, 2002) (internal quotation marks and citations omitted). When deciding a motion to dismiss, courts must accept all factual allegations in the complaint as true, and draw all reasonable inferences in plaintiff's **[**9]** favor. *See Chambers v. Time Warner, Inc., 282 F.3d 147, 152 (2d Cir. 2002)*. Courts **[*243]** may not consider matters outside the pleadings but may consider documents attached to the pleadings, documents referenced in the pleadings, or documents that are integral to the pleadings. *See id. at 152-53*.

B. Claims I and II: Sherman Act and Donnelly Act Violations

1. Standing

HN4[] Dismissals in antitrust cases "prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly." *Hospital Bldg. Co. v. Trustees of Rex Hosp., 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)*. "Nonetheless, 'it is not . . . proper to assume that the [plaintiff] can prove facts that it has not alleged or that the defendants have violated the antitrust laws in ways that have not been alleged.'" *George Haug Co. v. Rolls Royce Motor Cars Inc., 148 F.3d 136, 139 (2d Cir. 1998)* (quoting *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 526, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983))*.

---

[4] The Amended Complaint mistakenly labels two separate claims as Claim VI.

[5] The following Stamp Dealers have not appeared in this action: Anthony Feldman, Dana Okey, Stephen Osborne, Edward Younger, and Ahmed Hegazi. There has also been no appearance by the Auction House of Matthew Bennett Inc.

HN5[] To plead an antitrust action, a plaintiff must first **[**10]** allege standing to bring suit. A plaintiff only has standing if he suffered an antitrust injury. *See* G.K.A. Beverage Corp. v. Honickman, 55 F.3d 762, 766 (2d Cir. 1994); Eastway Constr. Corp. v. City of New York, 762 F.2d 243, 250 (2d Cir. 1985)(citing Associated Gen. Contractors, 459 U.S. at 538-40). An antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990). "The injury should reflect the anticompetitive effect either of the violation or of the anticompetitive acts made possible by the violation." Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977). "The fact that defendants' behavior is alleged to be illegal per se under § 1 of the Sherman Act does not in any way diminish the requirement that plaintiffs show an *antitrust* injury." Volmar Distribs., Inc. v. New York Post Co., 825 F. Supp. 1153, 1159 (S.D.N.Y. 1993)(emphasis in **[**11]** original).

HN6[] The purpose of the antitrust laws is to protect competition, not competitors. *See* George Haug, 148 F.3d at 139. Therefore, a plaintiff must allege an injury beyond harm to an individual competitor. *See* Todd v. Exxon Corp., 275 F.3d 191, 213 (2d Cir. 2001) ("An antitrust plaintiff must allege not only cognizable harm to [himself], but an adverse effect on competition market-wide."); Electronics Communications Corp. v. Toshiba America Consumer Prods., 129 F.3d 240, 242 (2d Cir. 1997). The plaintiff must allege "that the challenged action has had an *actual* adverse effect on competition as a whole in the relevant market." *Id.* (emphasis in original). To survive a motion to dismiss, Stolow must *plead* an antitrust injury, even if the chances of proving such an injury are small. *See* George Haug, 148 F.3d at 139.

2. Stolow Has Standing to Bring Sherman Act and Donnelly Act Claims

Claims I and II of the Amended Complaint allege that the Stamp Dealers and Auction Houses unreasonably restrained interstate trade in violation of the Clayton Act [6], the Sherman Act [7] and the **[*244]** Donnelly Act [8]. **[**12]** The issue is whether Stolow has alleged that the bid-rigging scheme described in the Amended Complaint harmed competition as a whole. He first alleges that he was personally injured by the Ring's bid-rigging scheme, claiming that he lost his source of business "because of the difficulty of buying stamps at [public auctions] against Ring members who could drive up the prices to force him to be unable to buy stamps and eliminated him as a buyer at the sales." Am. Compl. P 56.

[13]** But Stolow goes on to allege injury to competition within the stamp trading industry as a whole in the following ways: *First*, competition among bidders at auctions decreased because competitors refrained from participating when they learned that Ring members were bidding. Id. PP 54, 56. *Second*, competition among bidders decreased because the Auction Houses purposely discouraged non-Ring members from bidding by misdescribing stamp lots in their catalogs. Id. P 55. *Third*, the Stamp Dealers and Auction Houses reduced "the prices paid by Ring members to sellers below their competitive levels." Id. P 58. According to Stolow, because bidders throughout the industry were intimidated by the bid-rigging, the Ring was practically the exclusive bidder at

---

[6] Stolow is seeking treble damages for the antitrust violations pursuant to 15 U.S.C. § 15.

[7] Section 1 of the Sherman Act provides that HN7[] "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." 15 U.S.C. § 1 (2002).

[8] The Donnelly Act provides: HN8[] "Every contract, agreement, arrangement or combination whereby . . . competition or the free exercise of any activity in the conduct of any business, trade or commerce or in the furnishing of any service in this state is or may be restrained . . . is hereby declared to be against public policy, illegal and void." N.Y. Gen. Bus. § 340 (2002).

The Sherman Act and Donnelly Act claims are discussed as if one claim because HN9[] "New York's ***antitrust law*** . . . is 'modeled on the Sherman Act and should be construed in light of federal precedent.'" Granite Partners, L.P. v. Bear Stearns & Co., 17 F. Supp. 2d 275, 298 (S.D.N.Y. 1998)(quoting Kramer v. Pollock-Krasner Found., 890 F. Supp. 250, 254 (S.D.N.Y. 1995)).

many auctions. Thus, sellers did not receive competitive prices for their stamps. Stolow has standing because he has sufficiently alleged that the bid-rigging scheme resulted in antitrust injuries.

C. Claim III: Conspiracy

Defendants next challenge Stolow's claim that the Auction Houses "conspired together and maliciously and wilfully entered into a scheme to rig and manipulate" stamp auctions. Am. Compl. P **[**14]** 70. Stolow also claims that the Trade Associations "aided and supported the wrongful conspiracy by failing to police and rectify the legal practices of the stamp industry." *Id. P 72*. Finally, Stolow claims that Greg Manning aided and abetted the conspiracy.

HN10[] Although there is no substantive tort of conspiracy under New York law, a plaintiff may allege conspiracy to connect the actions of separate defendants with an otherwise actionable tort. *See* *Hi Pockets, Inc. v. Music Conservatory of Westchester, Inc., 192 F. Supp. 2d 143, 157 (S.D.N.Y. 2002)*; *Alexander & Alexander of New York, Inc. v. Fritzen, 68 N.Y.2d 968, 510 N.Y.S.2d 546, 547, 503 N.E.2d 102 (1986)*. If a conspiracy claim does not have an underlying actionable tort, it must be dismissed. *See* *Hi Pockets, 192 F. Supp. 2d at 157*.

The Amended Complaint does not allege an underlying actionable tort to support the conspiracy claim. Claim VI, which alleges fraud, is Stolow's only tort claim. However, because the fraud claim is dismissed, *see infra* Part II.F, the conspiracy claim against the Auction Houses and the Trade Associations is also dismissed. For the same reason, the **[**15]** aiding and abetting claim against Greg Manning is also dismissed.

[*245] D. Claim IV: Greg Manning Auctions Inc.

Claim IV is brought solely against defendant Greg Manning Auctions Inc. It alleges "that Greg Manning participated directly in the Ring by financing the purchase of stamps by defendant Davitt Felder." Am. Compl. P 76. In addition, "Felder transferred or turned over the stamps he purchased as part of the Ring to Greg Manning for resale in Greg Manning's auctions, Manning, Ivy & Mader or in private sales to the damage of plaintiff . . . ." *Id. P 77*. This claim does not specify any law that was violated nor the grounds on which Stolow is entitled to relief. To the extent that this claim alleges antitrust, fraud, RICO, or conspiracy violations, it is duplicative of the other claims. As a result, this claim must be dismissed. *See* *Lewis v. Rosenfeld, 138 F. Supp. 2d 466, 479 (S.D.N.Y. 2001)* (dismissing ***HN11***[] civil conspiracy claim where "conspiracy claim is duplicative of the breach of fiduciary duty and the common law fraud claims").

E. Claim V: RICO Violations

1. *Sections 1962(a)* and *(b)*

a. Standing

HN12[] "The RICO civil liability provision **[**16]** confers standing on 'any person injured in his business or property by reason of a violation of *section 1962*.'" *Hecht v. Commerce Clearing House, Inc., 897 F.2d 21, 23 (2d Cir. 1990)* (quoting *18 U.S.C. § 1964(c)*). A "'plaintiff only has standing if, and can only recover to the extent that, he has been injured in his business or property *by the conduct constituting the violation*.'" *Ouaknine v. MacFarlane, 897 F.2d 75, 83 (2d Cir. 1990)* (emphasis in original) (quoting *Sedima v. Imrex Co., Inc., 473 U.S. 479, 497, 87 L. Ed. 2d 346, 105 S. Ct. 3275 (1985))*.

HN13[] *Section 1962(a)* prohibits any person who derived income from a pattern of racketeering activity from investing that income in an "enterprise", as defined by the statute. *See* *18 U.S.C. §§ 1961(4)*, *1962(a) (2002)*; *Ouaknine, 897 F.2d at 83*; *Allen v. New World Coffee, Inc., 2002 U.S. Dist. LEXIS 4624*, No. 00 Civ. 2610, 2002 WL 432685, at *2 (S.D.N.Y. Mar. 19, 2002). "The essence of a violation of *§ 1962(a)* is not [the] commission of predicate acts but [the] investment of racketeering income." *Ouaknine, 897 F.2d at 83*. **[**17]** [9] Thus, to have standing to bring "a claim for civil damages under section 1962(a), a plaintiff must allege injury from defendants' investment of racketeering income in an enterprise." *Id. See also* *Fogie v. Thorn Americans, Inc., 190 F.3d 889, 895 (8th Cir. 1999)* ("RICO gives only individuals who have suffered injury from the use or investment of racketeering income standing to bring a civil suit under §§ 1962(a) and 1964(c)."); *Vemco, Inc. v. Camardella, 23 F.3d 129, 132 (6th Cir. 1994)*; *Nugget Hydroelectric, L.P. v. Pacific Gas & Elec. Co., 981 F.2d 429, 437 (9th Cir. 1992)*; *Parker & Parsley Petroleum v. Dresser Indus., 972 F.2d 580, 584 (5th Cir. 1992)*; *Danielsen v. Burnside-Ott Aviation Training Ctr., Inc., 291 U.S. App. D.C. 303, 941 F.2d 1220, 1229-30 (D.C. Cir. 1991)*; *Grider v. Texas Oil & Gas Corp., 868 F.2d 1147, 1149-51 (10th Cir. 1989)*.

[18]** ***HN15***[] Pursuant to section 1962(b), it is unlawful for "any person through a pattern of racketeering activity . . . to acquire or maintain . . . any interest in or control **[*246]** of any enterprise . . . ." 18 U.S.C. § 1962(b). The purpose of this statute is "to prohibit the takeover of a legitimate business through racketeering, typically extortion or loansharking." *Allen, 2002 U.S. Dist. LEXIS 4624, 2002 WL 432685*, at *5. Similar to the investment injury requirement of section 1962(a), a plaintiff must suffer an acquisition or maintenance injury to have standing to sue under section 1962(b). *See* *Discon, Inc. v. NYNEX Corp., 93 F.3d 1055, 1063 (2d Cir. 1996)* (dismissing section 1962(b) claim where plaintiff did not allege injury from defendants' acquisition or maintenance of a telephone company enterprise), *rev'd on other grounds*, *525 U.S. 128, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1998)*. Therefore, to have standing under section 1962(b), a plaintiff must allege injury arising from the acquisition or maintenance of any interest in or control of an enterprise. These injuries must be distinct from those resulting from the commission of the predicate acts. *See id.*; *Kaczmarek v. International Bus. Machs., Corp., 30 F. Supp. 2d 626, 629 (S.D.N.Y. 1998)* **[**19]** (finding no maintenance or acquisition injury where plaintiff only alleges injury resulting from the existence of the enterprise and the commission of predicate acts).

b. Stolow Lacks Standing to Bring Claims Under *Sections 1962(a)* and *(b)*

Stolow does not allege an injury from the Stamp Dealers' and Auction Houses' investment of racketeering income in the alleged enterprise. [10] **[**20]** The Amended Complaint only alleges that "as a result of the pattern of racketeering activity, plaintiff suffered damages to business and property." Am. Compl. P 83. Stolow's RICO Statement explicitly states that he does not know how any income derived from the enterprise was used or invested. *See* RICO Statement, Ex. C to Trade Associations' Notice of Motion, P 11. [11] As a result, the section 1962(a) claim must be dismissed for lack of standing. *See* *Ouaknine, 897 F.2d at 83*.

Similarly, Stolow fails to allege an acquisition or maintenance injury distinct from injury caused by commission of the predicate acts. As alleged, Stolow's injury resulted from defendants' bid-rigging scheme, which is based on the predicate acts of mail and wire fraud. *See* Am. Compl. PP 78-85. This injury is not a separate and distinct injury

---

[9] *18 U.S.C. § 1962(a)* provides:

> ***HN14***[] It shall be unlawful for any person who has received any income derived, directly or indirectly, from a pattern of racketeering activity . . . to use or invest, directly or indirectly, any part of such income, or the proceeds of such income, in acquisition of any interest in, or the establishment or operation of, any enterprise which is engaged in, or the activities of which affect, interstate or foreign commerce.

[10] Stolow adequately alleges that defendants constitute an enterprise. *See* 18 U.S.C. § 1961(4); *United States v. Turkette, 452 U.S. 576, 583, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981)*; *Feinberg v. Katz, 2002 U.S. Dist. LEXIS 13771*, No. 99 Civ. 45, 2002 WL 1751135, at *12 (S.D.N.Y. July 26, 2002)(citing *Procter & Gamble Co. v. Big Apple Indus. Bldgs., Inc., 879 F.2d 10, 18 (2d Cir. 1987))*. He asserts that the Stamp Dealers were a group of individuals who formed the Ring for the purpose of bid-rigging. *See* Am. Compl. P 13. The Auction Houses are described as a group of corporations that worked together to assist the Ring in the bid-rigging scheme. *See* *id.* P 14. Together these individuals and corporations were an association-in-fact operating as an enterprise engaged in the predicate acts of mail and wire fraud. *See* *id.* P 80.

[11] Paragraph 11(b) of the RICO Statement asks Stolow to "describe the use or investment of [the racketeering] income." Stolow's response states "Not known."

caused by the acquisition or maintenance of an alleged enterprise. ***HN16***[] "Without a distinct 'acquisition injury,' [a plaintiff] cannot state a cause of action under subsection 1962(b)." *Allen, 2002 U.S. Dist. LEXIS 4624, 2002 WL 432685*, at *5 (quoting *Discon, 93 F.3d at 1063*). As a result, Stolow lacks standing to bring the *section 1962(b)* claim, which is therefore dismissed.

2. *Section 1962(c)*

a. Standing

HN17[] Pursuant to *section 1962(c)*, it is unlawful for "any person employed by or associated **[*247]** with any [RICO] enterprise . . . to conduct or participate, directly or indirectly, **[**21]** in the conduct of such enterprise's affairs through a pattern of racketeering activity . . . ." *18 U.S.C. § 1962(c)*. A plaintiff has standing to bring a *section 1962(c)* claim if he has been injured in his business or property by a defendant conducting the affairs of an enterprise through a pattern of racketeering activity. *See* *Sedima, 473 U.S. at 496-97*; *Ouaknine, 897 F.2d at 83*.

HN18[] If a plaintiff has standing, a *section 1962(c)* claim must also allege the existence of two distinct entities: a "person" and an "enterprise." The enterprise cannot simply be the "person" referred to by a different name. *See* *Cedric Kushner Promotions, Ltd. v. King, 533 U.S. 158, 150 L. Ed. 2d 198, 121 S. Ct. 2087 (2001)*. A corporate entity may be held liable as a RICO person "where it associates with others to form an enterprise that is sufficiently distinct from itself." *Riverwoods Chappaqua Corp. v. Marine Midland Bank, N.A., 30 F.3d 339, 344 (2d Cir. 1994)*.

b. Stolow Has Standing to Bring a Claim Under *Section 1962(c)*

Stolow has alleged facts showing that he has standing to bring the *section 1962(a)* **[**22]** claim against the Stamp Dealers and Auction Houses. He sufficiently alleges a RICO violation where "the pattern of racketeering engaged in by defendants [that] involved fraudulent acts in support of the [bid-rigging] scheme constituting mail fraud . . . and wire fraud. . . ." RICO Statement P 2. In addition, Stolow alleges that "as a result of the illegal activities in violation of the RICO statute . . . plaintiff was driven out of business." *Id. P 15*. This is an adequate allegation of injury to Stolow's business caused by the Stamp Dealers and Auction Houses conducting the affairs of an enterprise through a pattern of racketeering actitivy.

Also, Stolow has sufficiently alleged that the bidrigging enterprise is distinct from each defendant. Unlike enterprises that only consist of a corporation and its employees, here the bid-rigging enterprise is an amalgam of unrelated individual defendants and corporations. *See* *Kushner, 533 U.S. at 166* (determining whether sole shareholder of corporation was a "person" distinct from the enterprise); *Riverwoods, 30 F.3d at 345* (determining whether distinctness requirement satisfied where enterprise consisted **[**23]** of corporation and its officers). The enterprise consists of nine corporations and seven individuals, all of whom committed the predicate acts of mail and wire fraud. *See* RICO Statement P 2. Neither Stolow nor defendants have alleged that all of the individuals are merely employees or agents of the corporations. Instead, Stolow claims that "all of the defendants acted individually and in consort [sic] to support the illegal enterprise and are members of the enterprise." *Id. P 6*. Stolow has standing and has properly pled his *section 1962(c)* claim. Accordingly, the motion to dismiss this claim is denied. [12]

F. Claim VI: Fraud

1. Pleading Fraud

[24]** ***HN20***[] Under *Rule 9(b)*, in "all averments of fraud or mistake, the circumstances constituting fraud or mistake shall be stated with particularity." *Fed. R. Civ. P. 9(b)*. The plaintiff must allege facts supporting the essential elements of the fraud claim. *See* *Jose Armando Bermudez & Co. v. **[*248]** Bermudez Int'l, Inc., 2001*

---

[12] Stolow also brings a claim under ***HN19***[] *section 1962(d)*, which makes it unlawful for any person to conspire to violate any provision of *section 1962*. *See* Am. Compl. PP 78-85; RICO Statement P 14. Because Stolow has alleged that two or more persons agreed together to violate *section 1962(c)*, the motion to dismiss the *section 1962(d)* claim is denied.

U.S. Dist. LEXIS 18121, No. 99 Civ. 9346, 2001 WL 1382582, at *3 (S.D.N.Y. Nov. 6, 2001) (citing Learning Works, Inc. v. Learning Annex, Inc., 830 F.2d 541, 546 (4th Cir. 1987)).

Stolow brings a common law fraudulent concealment claim against the Stamp Dealers and the Auction Houses, which **HN21**[] requires him to allege facts showing: "(1) that the defendant failed to disclose material information that [it] had a duty to disclose, '(2) the defendant intended to defraud the plaintiff thereby, (3) the plaintiff reasonably relied upon the representation, and (4) the plaintiff suffered damage as a result of the reliance.'" *Bermuda Container Line Ltd. v. International Longshoremen's Assoc., AFL-CIO, 192 F.3d 250, 258 (2d Cir. 1999)* (quoting *Banque Arabe et Internationale D'Investissement v. Maryland Nat'l* Bank, 57 F.3d 146, 153 (2d Cir. 1995)). **[**25]**

HN22[] "A duty to disclose generally arises in one of three ways: (1) when one party makes a partial or incomplete statement that requires clarification; (2) when the parties are in a fiduciary or confidential relationship; or (3) where one party possesses superior knowledge, not readily available to the other, and knows that the other is acting on the basis of mistaken knowledge." *All American Adjusters, Inc. v. Acceleration Nat'l* Ins. Co., 1997 U.S. Dist. LEXIS 18685, No. 96 Civ. 9344, 1997 WL 732445, at *7 (S.D.N.Y. Nov. 25, 1997) (internal quotation marks omitted); *see also* Brass v. Am. Film Techns., 987 F.2d 142, 150 (2d Cir. 1993).

Next, **HN23**[] a plaintiff must allege that he actually relied on the purported fraudulent statements or omissions. *See Banque*, 57 F.3d at 156. "'Reasonable, detrimental reliance upon a misrepresentation is an essential element of a cause of action for fraud, and such reliance must be pleaded with particularity.'" Bermudez, 2001 U.S. Dist. LEXIS 18121, 2001 WL 1382582, at *3 (quoting Learning Works, 830 F.2d at 546). "A party's reliance on false statements or omissions is not reasonable or justifiable if the party has reason to **[**26]** believe that the representations may be false but fails to inquire into their accuracy." Schlaifer Nance & Co. v. Estate of Warhol, 927 F. Supp. 650, 660 (S.D.N.Y. 1996).

2. Stolow Has Not Alleged a Duty to Disclose or Reasonable Reliance

Stolow does not allege facts suggesting that defendants made a partial or incomplete statement nor does he allege facts indicating that he was in a fiduciary or confidential relationship with the Stamp Dealers or Auction Houses. In addition, Stolow does not allege facts supporting a claim that defendants possessed superior knowledge not readily known to others. [13]

[27]** The Amended Complaint does not include any allegations from which a duty to disclose can be inferred. According to Stolow, the Stamp Dealers were his competitors. There are no factual allegations of a special relationship among Stolow and his competitors. Similarly, Stolow attended auctions conducted by the Auction Houses, but there are no allegations suggesting any special duty owed to bidders by the Auction Houses. Consequently, the Amended Complaint fails to allege an essential element of fraud, a result of which is that the claim must be dismissed. There is, however, another ground for dismissing this claim.

[*249] Stolow has not pled reasonable reliance because he acknowledges that he was aware of the bid-rigging. *See* Am. Compl. P 54. Essentially, Stolow alleges that he was injured because he could not bid on stamp lots "when aware [that] the Ring was bidding, or even aware that a Ring member viewed the lot." *Id.* Indeed, he states that competition as a whole was affected because it was widely known when Ring members rigged bids. *See id.* Furthermore, Stolow was aware of the Ring's bidrigging activities, as a result of which, *he* prohibited Ring members from bidding **[**28]** at *his* auctions. *See* id. P 13 (Defendants' actions included "boycotting plaintiff's own auctions, because of *his* refusal to permit the Ring to bid at his sales.") (emphasis added). After devoting numerous pages of the Amended Complaint to alleging that he was aware of the bid-rigging scheme, Stolow attempts to satisfy the

[13] **HN24**[] A duty to disclose based on superior knowledge "ordinarily arises only in the context of business negotiations where parties are entering a contract." Ray Larsen Assocs., Inc. v. Nikko America, Inc., 1996 U.S. Dist. LEXIS 11163, No. 89 Civ. 2809, 1996 WL 442799, at *5 (S.D.N.Y. Aug. 6, 1996). *See also Banque Arabe*, 57 F.3d at 155; Aaron Ferer & Sons Ltd. v. Chase Manhattan Bank, N.A., 731 F.2d 112, 123 (2d Cir. 1984); Williams v. Bank Leumi Trust Co., 1998 U.S. Dist. LEXIS 10636, No. 96 Civ. 6695, 1998 WL 397887, at *4 (S.D.N.Y. July 15, 1998).

fraud pleading requirement by suddenly inserting one sentence denying any knowledge of the scheme. *See* id. P 89 ("Plaintiff was not aware that . . . the Ring members in consort [sic] and aided and abetted by the auction house did not permit him to purchase stamps at public auctions for resale in his own sales . . . ."). This awkward and inconsistent denial does not negate Stolow's admission that he was aware of the Ring's activities. This portion of the Amended Complaint is a perfect example of a plaintiff pleading himself out of court by alleging information that defeats his claim. *See* Conn v. GATX Terminals Corp., 18 F.3d 417, 419 (7th Cir. 1994).

G. Claim VII: Aiding and Abetting

Finally, the Amended Complaint alleges that the ASDA and APS aided and abetted the illegal activities of the Stamp Dealers and Auction Houses **[**29]** by failing to investigate the matter, in violation of the Trade Associations' bylaws. It is unclear whether Stolow is seeking damages for the Trade Associations' violation of their own bylaws or simply for the Associations' role as aiders and abettors. In any event, the claim is dismissed on both grounds.

1. Bylaws Violation

HN25[] The bylaws of a corporation constitute a contract between a corporation and its members. *See ALH Props. Ten, Inc. v. 306-100th* Street Owners Corp., 191 A.D.2d 1, 600 N.Y.S.2d 443, 452 (1st Dep't 1993); Procopio v. Fisher, 83 A.D.2d 757, 443 N.Y.S.2d 492, 495 (4th Dep't 1981). Similarly, the "bylaws of an unincorporated association express the terms of a contract which define privileges secured and the duties assumed by those who have become members." Desir v. Spano, 259 A.D.2d 749, 687 N.Y.S.2d 411, 411 (2d Dep't 1999). A third-party, who is not a member of the association or corporation nor a party to the bylaws, lacks standing to bring suit against an organization for violation of its bylaws. *See Local 1-2,* Util. Workers of America v. Helmer, 734 F. Supp. 652, 653 (S.D.N.Y. 1990) (The **[**30]** "By-Laws violation [is] dismissed for lack of standing because [counter-claim plaintiff] is not a member of the Union and not a party to the By-Laws contract."). Were it otherwise, bylaws would subject organizations to unlimited liability resulting from duties owed to third-parties who have no relationship to the organization.

Stolow alleges that pursuant to the bylaws of the Trade Associations, each organization agreed to "assist governmental agencies in the prosecution of violations of laws relating to philatelic materials." Am. Compl. PP 92, 94. According to Stolow, he notified the ASDA in writing of the illegal activities of the Ring, but the ASDA refused to act because one or more of its board members were involved in the illegal activity. *See* id. P 97. Similarly, the APS was aware or should have been aware of the Ring's activities, but also failed to investigate. **[*250]** *See* id. P 9. Nonetheless, this claim must be dismissed because Stolow does not allege that he is a member of either of these associations. He is owed no duty under their bylaws and therefore lacks standing to bring an action for bylaws violation.

2. "**Substantial Assistance**"

HN26[] To allege aiding **[**31]** and abetting, a plaintiff must claim: (1) a violation of law by the primary party; (2) knowledge of the violation by the aider and abettor; and (3) "substantial assistance" by the aider and abettor in achieving the primary violation. *See, e.g.*, Armstrong v. McAlpin, 699 F.2d 79, 91 (2d Cir. 1983); *ITT, an Int'l* Inv. Trust v. Cornfeld, 619 F.2d 909, 923 (2d Cir. 1980); Cromer Fin. Ltd. v. Berger, 137 F. Supp. 2d 452, 470 (S.D.N.Y. 2001). Because the Amended Complaint excludes the Trade Associations from the RICO claim and because Claims III, IV, and VI are dismissed, the only remaining violations that the Trade Associations could have aided and abetted are the antitrust claims. However, Stolow does not allege any facts supporting the claim that the Trade Associations provided substantial assistance to the Stamp Dealers and Auction Houses with respect to these violations.

HN27[] Inaction by a party is not typically considered substantial assistance. *See* Armstrong, 699 F.2d at 91. "Inaction is 'actionable participation only when the defendant owes a fiduciary duty directly to the plaintiff.'" Cromer, 137 F. Supp. 2d at 470 **[**32]** (discussing inaction in the fraud context)(quoting Kolbeck v. LIT Am. Inc., 939 F. Supp. 240, 247 (S.D.N.Y. 1996)). As already discussed, the Trade Associations did not owe Stolow any duty to investigate the Stamp Dealers and Auction Houses. The Trade Associations' failure to investigate is not sufficient affirmative assistance to qualify them as aiders and abettors. Consequently, this claim is dismissed.

III. SUMMARY JUDGMENT

The Stamp Dealers and Auction Houses move for summary judgment on the remaining antitrust and RICO claims (Claims I and II and part of V). Defendants contend that based on the undisputed facts, Stolow's claims are time-barred. *See* Auction Houses Mem. at 4-7.

A. Legal Standard

HN28[] *Rule 56 of the Federal Rules of Civil Procedure* provides for summary judgment "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. "An issue of fact is 'material' for these purposes if it might affect the outcome of the suit under **[**33]** the governing law [while] an issue of fact is 'genuine' if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Shade v. Housing Auth. of City of New Haven, 251 F.3d 307, 314 (2d Cir. 2001)* (internal quotation marks and citations omitted). "Where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* (internal quotation marks and citations omitted).

HN29[] In assessing the record to determine whether genuine issues of material fact are in dispute, a court must resolve all ambiguities and draw all reasonable factual inferences in favor of the non-moving party. *See* *Parkinson v. Cozzolino, 238 F.3d 145, 150 (2d Cir. 2001)*. "Although the moving party bears the initial burden of establishing **[*251]** that there are no genuine issues of material fact, once such a showing is made, the nonmovant must 'set forth specific facts showing that there is a genuine issue for trial.'" *Weinstock v. Columbia Univ., 224 F.3d 33, 41 (2d Cir. 2000)* **[**34]** (quoting *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 256, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986))*.

The non-moving party may not, however, "rest upon . . . mere allegations or denials." *St. Pierre v. Dyer, 208 F.3d 394, 404 (2d Cir. 2000)*. "Statements that are devoid of any specifics, but replete with conclusions, are insufficient to defeat a properly supported motion for summary judgment." *Bickerstaff v. Vassar Coll., 196 F.3d 435, 452 (2d Cir. 1999)*; *see also* *Scotto v. Almenas, 143 F.3d 105, 114 (2d Cir. 1998)* ("If the evidence presented by the non-moving party is merely colorable, or is not significantly probative, summary judgment may be granted.") (quotation marks, citations, and alterations omitted). Mere conclusory statements, conjecture or speculation cannot by themselves create a genuine issue of material fact. *See* *Kulak v. City of New York, 88 F.3d 63, 71 (2d Cir. 1996)*.

B. Antitrust Claims

1. Applicable Statute of Limitations

HN30[] Pursuant to section 4B of the Clayton Act and *section 340(5) of the New York General Business Law*, private antitrust suits are governed by a **[**35]** four-year statute of limitations. *See 15 U.S.C. § 15b*; *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 138 L. Ed. 2d 373, 117 S. Ct. 1984 (1997)*. ***HN31***[] Antitrust actions accrue when a defendant commits an act that injures plaintiff's business in violation of the antitrust statutes. *See* *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 28 L. Ed. 2d 77, 91 S. Ct. 795 (1971)*. When there is an alleged continuing antitrust conspiracy, the statute of limitations "has usually been understood to mean that each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of that act." *Higgins v. New York Stock Exch. Inc., 942 F.2d 829, 832 (2d Cir. 1991)*. However, "the commission of a 'separate and new overt act' will not permit the plaintiff to recover for the injury caused by the old overt acts that do not fall within the limitations period." *Nine West Shoes Antitrust Litigation, 80 F. Supp. 2d 181, 192 (S.D.N.Y. 2000)* (quoting *Klehr, 521 U.S. at 189*). **[**36]**

HN32[] The statute of limitations in a private antitrust suit is tolled "whenever any civil or criminal proceeding is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws." *15 U.S.C. § 16(i)*. [14] Also, the statute of limitations may be tolled under the doctrine of fraudulent concealment. A "plaintiff may prove fraudulent concealment sufficient to toll the running of the statute of limitations if he establishes (1) that the defendant concealed from him the existence of his cause of action, (2) that he remained in ignorance of that cause of action until some point within four years of the commencement of his action, and (3) that his continuing ignorance was not attributable to lack of diligence on his part." *New York v. Hendrickson Bros., Inc., 840 F.2d 1065, 1083 (2d Cir. 1988)*.

[37] [*252] 2. Stolow's Antitrust Claims Are Time-Barred**

Stolow's Sherman Act and Donnelly Act claims are time-barred because they were not brought within the four-year statute of limitations period. Stolow "had finally been driven out of business" by August 14, 1997. 6/9/00 Deposition of Gregory Stolow ("Stolow Dep."), Ex. F to 7/24/02 Declaration of Carol Meltzer, General Counsel of Greg Manning Auctions Inc. and Ivy & Mader Philatelic Auctions, Inc. ("Meltzer Decl."), at 86. *See also* 8/14/97 Letter to John Apfelbaum from Peter T. Goodrich ("Goodrich Letter"), Ex. E to Meltzer Decl., at 1. Therefore, August 14, 1997 is the latest possible date that he could have suffered a business injury, and the latest date that an antitrust cause of action accrued. *See* *Zenith, 401 U.S. at 338*. As a result, the statute of limitations had run by August 14, 2001. Stolow did not file his Complaint until April 4, 2002.

Despite Stolow's new contention that he was never driven out of business, there is no genuine issue of material fact as to the date of his injury. Stolow has repeatedly admitted that he was driven out of business by defendants' conduct. In a letter dated August 14, 1997, Stolow's **[**38]** attorney, Peter Goodrich, wrote to defendant John Apfelbaum, stating that Stolow had been driven out of business. *See* Goodrich Letter at 1; *Fed. R. Evid. 801(d)(2)*. The letter further advises Apfelbaum that Stolow will pursue legal action to recoup $ 5 million for damages caused over ten years, unless Apfelbaum negotiates a settlement. *See id.* The parties did not negotiate a settlement and Stolow did not pursue legal action at that time.

Stolow again admitted that he was driven out of business by 1997 during a deposition related to the New York Attorney General's investigation of the Ring in 2000. When the Assistant Attorney General asked Stolow why he initially decided to contact Goodrich, Stolow responded: "Well, I had finally been driven out of business by the ring by not being able to buy any products and I no longer felt pressured or afraid of retribution because I was out of the business so I went to the attorney and tried to see if I could sue them." Stolow Dep. at 86. He explained further that his family-owned businesses, J & H Stolow and Gold Medal Auctions, ended in 1989 and 1996, respectively. *See id. at 34-35*.

Most importantly, Stolow admits that he was driven **[**39]** out of business to support his overall theory of damages. In the Amended Complaint, he alleges how he was injured by defendants' misconduct, stating that "in summary [defendants'] activities drove plaintiff out of business." Am. Compl. P 56. Similarly, in his RICO statement, he claims that "as a result of [defendants'] illegal activities . . . plaintiff was driven out of business." RICO Statement P 16.

In response to the Stamp Dealers' and Auction Houses' summary judgment motion, Stolow now argues for the first time that he "is a stamp dealer uninterruptedly since the 1960's currently selling stamps out of his residence." Gregory Stolow's Statement of Material Facts Pursuant to Local Rule 56.1(b) ("Rule 56.1 Statement") P 1. The only support he cites for the contention that he was never driven out of business is his deposition testimony, where he describes himself as being a selfemployed stamp dealer operating out of his home. *See* Stolow Dep. at 28-29.

---

[14] ***HN33***[] The statute of limitations is not tolled by State actions brought under the Clayton Act. Additionally, private actions brought under the Donnelly Act are not tolled by New York Attorney General proceedings. *See* *N.Y. Gen. Bus. Law § 342-c* (2002) (providing for the "tolling of the period of limitations by proceedings of the *United States*") (emphasis added).

However, during the same deposition he explains that he decided to consider legal action after he was finally driven out of business. *See* *id. at 86*.

Stolow's frequent admissions that he was driven out of business cannot **[**40]** be genuinely **[*253]** disputed by his unsupported, selfserving Rule 56.1 Statement conclusory statement that he remains in business. His new allegation does not create a genuine issue of material fact. *See Tadros v. Coleman, 717 F. Supp. 996, 1006 (S.D.N.Y. 1989)* ***HN34***[] ("Self-serving, conclusory allegations cannot defeat [a summary judgment motion]."). Moreover, this unsupported argument is "insufficient to defeat a properly supported motion for summary judgment." *Bickerstaff, 196 F.3d at 452*.

Stolow contends that the statute of limitations for any injury suffered before 1998 was tolled by the commencement of the Department of Justice's ("DOJ") criminal action and by the doctrine of fraudulent concealment. *See* Memorandum of Law in Opposition to Auction Houses Mem. at 12. Both parties acknowledge that the DOJ did not begin its proceedings until 2002. *See* Affidavit of Gregory Stolow ("Stolow Aff."), Ex. A; Defendants Greg Manning Auctions, Inc., Ivy & Mader Philatelic Auctions, Inc., et al. Reply Memorandum at 4. Therefore, any injury that occurred before 1998 was already time-barred before the DOJ began its proceedings.

The doctrine of fraudulent concealment **[**41]** also fails to toll the statute of limitations. It is undisputed that Stolow was fully aware of the bid-rigging scheme no later than 1997. The Goodrich Letter informed Apfelbaum that Stolow knew that the Ring has rigged bids since "at least 1987." *See* Goodrich Letter at 1. In addition, on November 29, 1997, Stolow sent a letter to Greg Manning, detailing the bid-rigging and his intent to bring suit against the Ring and the Auction Houses. *See* 11/29/97 Letter to Greg Manning from Gregory Stolow, Ex. D to Stolow Aff., at 1. Because Stolow was aware of the scheme as early as 1997, the doctrine of fraudulent concealment cannot toll the statute of limitations.

C. RICO Claims

1. Applicable Statute of Limitations Although no statute of limitations is explicitly set forth in the RICO statute, the Supreme Court has held that ***HN35***[] civil RICO actions are subject to the four-year limitations period contained in section 4B of the Clayton Act. *See* *Klehr, 521 U.S. at 188-89*; *Agency Holding Corp. v. Malley-Duff & Assocs., Inc., 483 U.S. 143, 156, 97 L. Ed. 2d 121, 107 S. Ct. 2759 (1987)*. "The limitations period begins to run when the plaintiff discovers **[**42]** or should have discovered the RICO injury." *In re Merrill Lynch Ltd. P'ships.* *Litig., 154 F.3d 56, 60 (2d Cir. 1998)*. "This Court recognizes a 'separate accrual' rule under which a new claim accrues and the four-year limitation period begins anew each time a plaintiff discovers or should have discovered a new and independent injury." *Id. at 59*. Under the separate accrual rule, when a plaintiff is continuously injured by an underlying RICO violation, he may only recover for injuries discovered or discoverable within four years of the time suit is brought. *See* *Bingham v. Zolt, 66 F.3d 553, 560 (2d Cir. 1995)*.

2. Stolow's RICO Claims Are Time-Barred

As discussed in detail in Part III.B.2, there is no genuine issue of material fact concerning the date when Stolow's business was last injured by the alleged RICO violations. As a result, his claims under *sections 1962(c)* and *(d)* are not within the four-year statute of limitations and are dismissed. Furthermore, the doctrine of fraudulent concealment does not toll the statute of limitations for the reasons previously stated in Part III.B.2. [15]

[43] [*254] IV. CONCLUSION**

For the foregoing reasons, pursuant to *Rule 12(b)(6)*, the Trade Associations' motion to dismiss is granted and all claims against the Associations are hereby dismissed. The Stamp Dealers' and Auction Houses' *Rule 12(b)(6)*

---

[15] Although Stolow's claims under *sections 1962(a)* and *(b)* have been dismissed for lack of standing, they are also dismissed as time-barred.

motion to dismiss is partially granted and their *Rule 56* motion for summary judgment is granted in full. Therefore, all claims against all defendants are dismissed. The Clerk of the Court is directed to close these motions and this case.

SO ORDERED:

***HN6*[]** **Private Actions, Costs & Attorney Fees**

An award of attorney fees under *Or. Rev. Stat. § 646.780(3)(a)* must also meet the requirements of *Or. Rev. Stat. § 20.075(1)*, which lists several factors the court must consider in determining whether to award attorney fees in any case in which an award of attorney fees is authorized by statute and in which the court has discretion to decide whether to award attorney fees. The factors include such other factors as the court may consider appropriate under the circumstances of the case.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

Civil Procedure > Appeals > Standards of Review > General Overview

***HN7*[]** **Standards of Review, Abuse of Discretion**

The appellate court reviews an award of attorney fees under *Or. Rev. Stat. § 20.075* for abuse of discretion. *Or. Rev. Stat. § 20.075(3)*. However, a court exercising that discretion must identify the facts and legal criteria that the circumstances of the particular case require the court to address in making its decision to award or deny attorney fees. Those findings need not be complex or lengthy; they need not include criteria immaterial to the decision and not used by the trial court. The purpose of requiring this specification of facts and legal standards is to permit "meaningful appellate review."

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Civil Procedure > Appeals > Standards of Review > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

***HN8*[]** **Private Actions, Costs & Attorney Fees**

Regarding an award of attorney fees, costs, and disbursements, to review the court's decision meaningfully, the appellate court must know both the facts and the legal criteria on which the decision was based.

Counsel: Milo Petranovich argued the cause for appellant. With him on the brief was Lane Powell Spears Lubersky LLP.

I. Franklin Hunsaker argued the cause for respondent. With him on the brief were Joel Wilson and Bullivant Houser Bailey, A Professional Corporation.

Judges: Before Edmonds, Presiding Judge, and Kistler and Schuman, Judges.

Opinion by: SCHUMAN

Opinion

[1198]** **[*547]** SCHUMAN, J.

Jefferson County denied plaintiff's application for a permit to operate his real estate business out of his residence in a development called Crooked River Ranch. Alleging collusion between the county and the development's homeowner association, plaintiff sued the association for "Combination in Restraint of Trade" and "Interference with Business Relationship." The trial court granted the association's motion for summary judgment and, in a supplemental judgment, awarded costs, disbursements, and attorney fees. On appeal, we affirm the judgment, vacate the supplemental judgment, and remand.

HN1[] Because the association prevailed on its motion for summary judgment, we view the facts and **[***2]** inferences drawn from them in the light most favorable to plaintiff; we then uphold the judgment if there is no genuine issue of material fact and the association is entitled to judgment as a matter of law. *ORCP 47 C*; *Jones v. General Motors Corp., 325 Ore. 404, 408, 939 P.2d 608 (1997)*.

Crooked River Ranch (Ranch), a residential development in Jefferson

County, operates under covenants, conditions, and restrictions. Those "CC&Rs" establish a homeowner association called the Crooked River Ranch Club and Maintenance Association (defendant). On February 13, 1995, plaintiff, a licensed real estate agent, submitted to defendant's architectural committee a request to use part of his rented house on Ranch property as an office for his business. He also submitted the request to the Jefferson County Planning Department. At the time, two other real estate businesses operated on Ranch property, one out of a home.

Plaintiff submitted his request to the architectural committee not because it had authority to deny or grant conditional use permits (the committee's authority was limited to design features), but pursuant to an apparent agreement between the county and defendant. **[***3]** As described by the architectural committee in an article in defendant's newsletter, the "agreement is that **everything** that happens with Crooked River Ranch property must first go through the **[*548]** Architectural Committee for approval." (Emphasis in original.)

Defendant's committee considered the request and, on April 13, 1995, wrote a letter to a member of the county's planning department stating, "the Architectural Committee agreed to REJECT this application. The reasons for this rejection are for 1) safety; 2) non-compliance of County Zone and the CC&Rs * * *; and 3) discrepancies in the application submitted." (Underscoring in original.) Five single-spaced pages of "discrepancies" **[**1199]** followed. Defendant's board of directors sent its own letter to the county's planning department, declaring its support of the architectural committee's letter. Fifty-five other interested citizens also submitted letters, most of which supported plaintiff's application.

The county's planning department then prepared a nine-page "Staff Report" to the Jefferson County Planning Commission (the commission), recommending that the commissioners approve the application subject to several conditions. **[***4]** On April 27, following public notice, the commission held a hearing. A planning department staff member presented the department's report. Nine citizens, including plaintiff, testified in favor of the application and 11 testified against. One of the opponents was a member of defendant's board of directors, who presented the architectural committee's letter and read it into the record. After further discussion, including a review of the criteria plaintiff would have to meet in order to receive approval, the commission voted four to one to deny the application. The stated reasons for the denial were that plaintiff's requested conditional use was "not * * * consistent with the Comprehensive Plan and the objectives of the Zoning Ordinance and other applicable policies of the County," that the use would not "preserve assets of a particular interest to the community," and that plaintiff did not establish that he had "a bona fide intent and financial capability to use and develop the land as proposed to insure that the Conditional Use Permit will be acted on in an appropriate manner."

Plaintiff appealed the denial to the Jefferson County Board of Commissioners (board). The board, after public **[***5]** notice, held a hearing on July 26, 1995. After testimony from **[*549]** opponents and proponents and review of written testimony as well as staff recommendations, the board deliberated and voted to deny the application based on the following findings:

> "1. Public Safety, ingress and egress at the location site was determined to be a hazard.
>
> "2. On the face of the application, that the applicant did not satisfy the definition of a Home Occupation because he was not going to reside in the dwelling as a full time occupant.
>
> "3. That the applicant failed to meet Criteria # 4, the proposal will preserve assets of particular interest to the community."

The board mailed notice of its decision to plaintiff on October 18, 1995. In addition to informing him of the denial, the notice also stated, "If you feel that not all the facts have been presented or the information is incorrect, this decision may be appealed to the Land Use Board of Appeals (LUBA)." Plaintiff did not appeal to LUBA. Instead, he filed the present action against defendant in circuit court.

Plaintiff first assigns error to the trial court's grant of summary judgment on the antitrust claim. That claim rested on plaintiff's **[***6]** three-part theory alleging, first, that the evidence raises a question of fact regarding whether defendant and the county had an agreement under which the county delegated land use decisions on the Ranch to defendant; second, that such an agreement amounted to a violation of ***HN2***[] Oregon's "little Sherman Act," *ORS 646.725*, which prohibits "every contract, combination * * * or conspiracy in restraint of trade"; and third, that defendant's anticompetitive conduct was not immune from antitrust liability under the so-called ***HN3***[] *Noerr-Pennington* doctrine, which immunizes, on First Amendment grounds, attempts to persuade government to make policy decisions even when those decisions might have an anticompetitive intent and effect. *See* *Eastern R. Conf. v. Noerr Motor, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *see also* *ORS 646.715(2)* (federal court decisions are persuasive authority in construing Oregon ***antitrust law***). The trial court rejected that theory, holding that defendant's injury, if any, "was a result of the **[***7]** **[*550]** denial both by the Jefferson County Planning Commission and by the Jefferson County Commission. The Court believes that the Defendant's Motion for Summary Judgment, based on the *Noerr-Pennington* doctrine is correct."

[1200]** We agree. We need not reach plaintiff's contentions that an agreement to delegate governmental standard-setting authority to a private entity violates Oregon's antitrust statute and does not qualify for *Noerr-Pennington* immunity. *See* *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)* (so holding where legislature adopted trade group's standards as law). Nor need we reach defendant's counter-argument that such a holding in the present case "would allow plaintiffs to look behind the actions of state sovereigns to base their claims on 'perceived conspiracies to restrain trade.'" *Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 379, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)* (citation omitted). Rather, plaintiff's theory suffers from a more basic flaw. It depends on the existence of an agreement between county officials and defendant under which the county abdicated its **[***8]** own authority to render a decision on plaintiff's application and gave that authority to defendant. [1] On the evidence in the summary judgment record and the inferences flowing from it, no rational factfinder could believe that such an agreement existed.

Plaintiff identifies several items as evidence of the alleged anticompetitive agreement. The first is the article in defendant's newsletter quoted above referring to "an agreement that **everything** that happens with Crooked River Ranch property must first go through the Architectural Committee for approval" and that "**ALL** businesses located within homes of Crooked River Ranch residents must come through the Architectural Committee **[***9]** for

[1] Plaintiff expressly disavows any challenge based on an agreement among members of defendant association, stating, "Plaintiff does not claim that a group of Ranch residents conspired or agreed to restrain trade * * *. The antitrust violation here is the anticompetitive agreement between the County and the Ranch."

approval." (Emphasis in original.) The plain meaning of those statements is that Ranch rules require residents to submit building and land use proposals to the committee, presumably **[*551]** before submission to any governmental entities that also need to act on them, in what might be analogized to an "exhaustion of remedies" requirement. Because defendant's CC&Rs may be more stringent than county or state regulations, such an agreement is an efficient way to ensure that the county does not spend time and resources evaluating applications that defendant will subsequently deny. Nothing in either statement declares, hints, or even smacks of an agreement that the governmental entities have relinquished their independent and superseding decisional authority.

The second item of evidence is defendant's letter to the county planning commission stating that "the Architectural Committee agreed to REJECT this application." (Underscoring in original.) Again, that statement appears in a letter that is manifestly defendant's input to the county's decision-making process, informing official decision-makers of defendant's opinion and explaining defendant's reasons. It carries no implication that **[***10]** the county has agreed to rubber-stamp defendant's rejection.

The third item of evidence is a sentence contained in a 1992 report from the county planning commission recommending a change in the county's comprehensive land use plan. The sentence states, "It appears that, over time, the County and Crooked River Ranch Maintenance Association, through an informal agreement, allowed recreational use of lots and parcels on the Ranch." That statement occurred three years before the events in the present case, refers to a different issue, and, in any event, does not state or imply a delegation of governmental decision-making authority to defendant, but, at most, implies that the county was remiss in enforcement of its land use plan.

In short, a factfinder could not read that evidence to establish an agreement under which the county committed itself to follow defendant's recommendation unless the factfinder also could conclude that the exhaustive and thorough processes that the planning commission and the county commissioners went through were an elaborate sham and a conspiratorial farce. On this summary judgment record, no rational factfinder could so conclude. Defendant's actions amounted **[***11]** to **[**1201]** nothing more than constitutionally protected **[*552]** participation in the political process and were therefore immune from antitrust liability under the *Noerr-Pennington* doctrine. [2]

Plaintiff also assigns error to the trial court's grant of summary judgment on the "Interference with Business Advantage" claim. The trial court's letter opinion indicates that dismissal of the tort claim followed inevitably from dismissal of the antitrust claim. Again, we agree. The same rationale that underlies antitrust immunity in this case--concern for the free speech implications of penalizing political advocacy--applies with equal force with respect to the tort claim. Defendant's activities consist only of efforts to persuade the county to deny plaintiff's **[***12]** application for a conditional use permit. There are no allegations of defamation, solicitation, fraud, or any other form of speech activity the regulation of which could survive challenge under *Article I, section 8, of the Oregon Constitution* as "some historical exception that was well established when the first American guarantees of freedom of expression were adopted," nor is there an argument that "interference with business relationship" is such an exception. *State v. Robertson, 293 Ore. 402, 412, 649 P.2d 569 (1982)*. Further, as this court held in *Willamette Dental Group v. Oregon Dental Service, 130 Ore. App. 487, 499, 882 P.2d 637 (1994)*, *rev den*, *320 Ore. 508, 888 P.2d 569 (1995)*, ***HN4***[] conduct that is permitted under antitrust laws may not be punished as tortious interference; "such common law 'back-dooring' would subvert the function of ***antitrust law*** in defining, and regulating, the boundary between permissible and impermissible competitive conduct." The court did not err in granting summary judgment against plaintiff on its "Interference with Business Advantage" claim.

Finally, plaintiff assigns error to the supplemental judgment **[***13]** awarding attorney fees to defendant. Defendant argued for an award of $ 48,000 ***HN5***[] pursuant to *ORS 646.780(3)(a)*: "The court may award reasonable attorney **[*553]** fees, expert witness fees and investigative costs to the prevailing party [in an antitrust case]."

---

[2] Defendant also contends that plaintiff cannot prevail under *ORS 646.725* because he claimed only damages personal to himself and did not claim "antitrust damages," that is, damages to competition. The trial court did not reach that issue, nor do we.

Defendant also sought fees under *ORS 20.105* on the ground that "there was no objectively reasonable basis for asserting the claim," but the trial court did not address that ground in its opinion. The court wrote:

> "Under *ORS 646.780(3)(a)*, in actions under the State's ***Antitrust law***, the Court may award reasonable attorneys fees, expert witness fees and investigative costs to the prevailing party. * * * The Plaintiff in this case elected, after losing an appeal to the Jefferson County [Board of Commissioners], not to appeal the matter to LUBA, but rather to file this action on an Antitrust basis. In reviewing the information that has been previously provided to the Court, it's the Court's opinion that if this matter was appealed to LUBA, that the Plaintiff had a better than average chance of prevailing before that body * * *."

The court subsequently **[***14]** entered a supplemental money judgment awarding $ 14,000 in attorney fees and $ 6,108 in costs and disbursements. On appeal, plaintiff maintains that no award of attorney fees is justified. Defendant does not contest the trial court's decision to award only $ 14,000 in fees instead of the $ 48,000 requested.

HN6[] An award of attorney fees under *ORS 646.780(3)(a)* must also meet the requirements of *ORS 20.075(1)*, which lists several factors the court must consider "in determining whether to award attorney fees in any case in which an award of attorney fees is authorized by statute and in which the court has discretion to decide whether to award attorney fees." The factors include "such other factors as the court may consider appropriate under the circumstances of the case." ***HN7***[] We review an award of attorney fees under *ORS 20.075* for abuse of discretion. *ORS 20.075(3)*. However, in *McCarthy v. Oregon Freeze Dry, Inc., 327 Ore. 185, 188, 957 P.2d 1200 (1998)*, the Supreme Court held that a court exercising that discretion must identify the "facts and legal criteria **[**1202]** that the circumstances **[***15]** of the particular case require the court to address in making its decision to award or deny attorney fees." Those findings need not be complex or lengthy; they need not include criteria immaterial to the decision and not used by the trial court. *Id.*; *Wright v. Jones, 155 Ore. App. 249, 252-53,* ***[*554]*** *964 P.2d 1048 (1998)*. The purpose of requiring this specification of facts and legal standards is to permit "meaningful appellate review." *McCarthy, 327 Ore. at 188*.

Under the foregoing precepts, we must remand this case. Although the court's letter opinion clearly states the fact on which it based its decision to award fees--plaintiff's decision to bring this action in circuit court instead of appealing to LUBA--the opinion does not specify the legal criteria to which that fact is relevant, nor does it provide a reviewable explanation of the connection between the fact and the criteria. ***HN8***[] To review the court's decision meaningfully, we must know both. *Kusyk v. Water Resources Dept., 164 Ore. App. 738, 746, 994 P.2d 798 (2000)* ("We cannot ascertain from the record on which statutory ground the trial court awarded fees nor the basis for making **[***16]** an award under that provision.").

Supplemental judgment vacated and remanded; otherwise affirmed.

HN2[] Types of Price Discrimination, Brokerage, Commissions & Compensation

Section 2(c) (15 U.S.C.S. § 13(c)) of the Robinson-Patman Act prohibits brokerage or similar payments in the absence of services rendered for those payments. Section 2(c) is phrased broadly, not only to cover the other methods then in existence but all other means by which brokerage could be used to effect price discrimination. Indeed, § 2(c) is intended to proscribe other practices such as the "bribing" of a seller's broker by the buyer. Thus, § 2(c) reaches commercial bribery as well as the use of dummy brokers to obtain indirect price discrimination.

HN3[] Clayton Act, Claims

The private cause of action for antitrust violations is provided in § 4 of the Clayton Act, which states that any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States. 15 U.S.C.S. § 15(a). This means that not every private party who is somehow injured as a result of conduct forbidden by the antitrust laws has standing to bring a private antitrust suit. Rather, an antitrust plaintiff must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Accordingly, even when a plaintiff properly alleges a clear antitrust violation, the plaintiff will nonetheless suffer dismissal if it does not allege that it suffered an antitrust injury.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN4[] **Price Fixing & Restraints of Trade, Horizontal Market Allocation**

It is important to clearly distinguish between the elements of the substantive antitrust violation and the antitrust injury requirement. In certain cases an antitrust plaintiff must prove, as part of the substantive antitrust claim, that the conduct in question injured competition as a whole. For example, a plaintiff seeking to prove a unilateral monopoly under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act must prove that the defendant's conduct actually poses a danger of monopolization. In contrast, certain agreements, such as horizontal price fixing and market allocation, are thought so inherently anticompetitive that each is illegal per se under § 1 of the Sherman Act without inquiry into the harm it has actually caused. Violations of this sort, where injury to competition is presumed, are referred to as per se antitrust violations.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN5[] **Robinson-Patman Act, Claims**

Depending on the conduct in question and the antitrust provision involved, an antitrust plaintiff may or may not be required to prove injury to competition in order to state an antitrust claim. *Section 2(c)* (*15 U.S.C.S. § 13(c)*) of the Robinson-Patman Act violations are per se antitrust violations, meaning that the plaintiff need not prove injury to competition in order to prove that the defendant has violated *§ 2(c)*.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN6[] **Robinson-Patman Act, Claims**

Even in the case of per se antitrust violations, where the plaintiff need not prove actual harm to competition as an element of the substantive violation, the plaintiff still must prove that its injury was of the type the antitrust laws were intended to prevent. All private antitrust plaintiffs must allege an antitrust injury, regardless of the type of antitrust claim involved. When the purpose of an antitrust provision is to prevent injury to competition, a plaintiff must always prove that it was injured as a result of injury to competition in order to show antitrust injury. Even when the defendant's conduct is presumed to injure competition, the question remains whether this particular plaintiff's injury was caused by the competition-reducing aspect of the defendant's conduct. Thus, the fact that injury to competition is not an element of a *§ 2(c)* (*15 U.S.C.S. § 13(c)*) of the Robinson-Patman Act offense does not mean, as some might assume, that a *§ 2(c)* plaintiff need not show that its injury resulted from harm to competition.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN7[] **Private Actions, Standing**

The court must ensure that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN8[] **Private Actions, Remedies**

Antitrust injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Criminal Law & Procedure > ... > Bribery > Commercial Bribery > General Overview

Criminal Law & Procedure > ... > Crimes Against Persons > Bribery > General Overview

HN9[] **Antitrust & Trade Law, Robinson-Patman Act**

Section 2(c) (*15 U.S.C.S. § 13(c)*) of the Robinson-Patman Act only reaches bribery that crosses the seller-buyer line -- for example, when the seller makes a payment to an agent of the buyer.

Antitrust & Trade Law > ... > Price Discrimination > Types of Price Discrimination > Brokerage, Commissions & Compensation

HN18[] **Contract Interpretation, Fiduciary Responsibilities**

Fed. R. Civ. P. 9(b) extends to averments of fraud or mistake, whatever may be the theory of legal duty -- statutory, tort, contractual, or fiduciary.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN19[] **Heightened Pleading Requirements, Fraud Claims**

Under *Fed. R. Civ. P. 9(b)*, in all averments of fraud or mistake, the circumstances constituting fraud or mistake shall be stated with particularity. The "circumstances" required to be pled with particularity under *Rule 9(b)* are the time, place, and contents of the false representations, as well as the identity of the person making the misrepresentation and what he obtained thereby. Even so, a court should hesitate to dismiss a complaint under *Rule 9(b)* if the court is satisfied (1) that the defendant has been made aware of the particular circumstances for which she will have to prepare a defense at trial, and (2) that plaintiff has substantial prediscovery evidence of those facts.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN20[] **Pleadings, Heightened Pleading Requirements**

When the allegation of fraud relates to an omission rather than an affirmative misrepresentation, less particularity is required.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN21[] **Defenses, Demurrers & Objections, Motions to Dismiss**

When the plaintiff relies on a contract in its complaint, and indeed includes a copy of that contract as an attachment to the complaint, it is proper for the district court to consider it in ruling on a motion to dismiss.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN22[] **Business Torts, Fraud & Misrepresentation**

The elements of common law fraud are: (1) that the act claimed to be fraudulent was the act of the defendant or induced by him; (2) that it was material and false; that plaintiff relied upon it and was justified under the circumstances in relying upon it; and (3) that he was damaged because he relied upon it.

Opinion

[*471]

[2] MEMORANDUM OPINION AND ORDER**

Pending is defendant Marriott International, Inc.'s motion to dismiss Counts IV and XIV [Docket 15] and defendant Avendra, LLC's motion to dismiss all counts [Docket 18]. For the following reasons, **[*472]** the court **DENIES** Marriott's motion to dismiss Counts IV and XIV. The court **GRANTS in part and DENIES in part** Avendra's motion to dismiss all counts. Specifically, the court **DISMISSES** count VI (fraud) as against Avendra for failure to plead fraud with specificity.

I. Background

The plaintiffs, In Town Hotels Limited Partnership and In Town Hotels, Inc. (collectively, "In Town Hotels"), brought suit against Marriott International, Inc. (Marriott) and Avendra, LLC (Avendra), alleging breach of contract, breach of fiduciary duty, negligence, and fraud arising out of Marriott's management of the plaintiffs' hotel, known as the Charleston Town Center Marriott (the Hotel). In an amended complaint, the plaintiffs further alleged that Marriott and Avendra violated the West Virginia Unfair Practices Act (WVUPA), *W. Va. Code § 47-11A-3*, as well as *§ 2(c)* of the Robinson-Patman Act, *15 U.S.C. § 13(c)*, a federal **[**3]** antitrust provision which prohibits the payment and acceptance of commissions that are not in exchange for services rendered.

Because the court is considering motions to dismiss, the following facts are set out as alleged by the plaintiffs in the complaint. For approximately twenty years the plaintiffs have contracted with Marriott to manage the plaintiffs' Hotel. Under the terms of the contract, Marriott is granted unfettered authority to manage and control the Hotel. The contract purports to create an agency relationship between Marriott and In Town Hotels whereby Marriott has a fiduciary duty to operate the Hotel solely for the benefit of the plaintiffs. The contract provides that Marriott's compensation for its services would consist solely of management fees as set forth in the agreement. For the purpose of their antitrust claim, the plaintiffs allege that Marriott, acting in conjunction with Avendra, entered into exclusive or preferred contracts with vendors to provide goods to the Hotel. In so doing, Marriott and Avendra solicited and received "sponsorship funds," which were payments and rebates by vendors made in the course of selling, or in exchange for the opportunity to **[**4]** sell, goods to the Hotel. Marriott and Avendra retained these payments and rebates for themselves and did not disclose them to the plaintiffs. As a consequence, the plaintiffs allege, the Hotel has been restricted in its choice of vendors, has paid a higher price for goods than it would otherwise have paid, and has suffered vis-a-vis rival hotels (some of which are owned or managed by Marriott) that are not paying these higher prices.

According to the plaintiffs, this scheme violates, among other things, *section 2(c)* of the Robinson-Patman Act as well as the WVUPA, and entitles them to treble damages. Marriott moved to dismiss both of these claims. Marriott argues that the plaintiffs have failed to allege that they have suffered an antitrust injury and that without such an allegation they lack standing to bring a *section 2(c)* claim. In addition, Marriott argues that the plaintiffs have failed to allege an injury to a competitor, a requirement of *§ 47-11A-3* of the WVUPA. The plaintiffs respond that they have adequately plead the necessary injuries for both statutes.

Avendra filed a separate motion to dismiss all claims against it. It joins in Marriott's arguments regarding the **[**5]** Robinson-Patman Act and the WVUPA. It also claims that the contract specifically authorizes all of the alleged conduct, and thus that all counts should be dismissed. Finally, it argues that the bulk of the plaintiffs' claims are fraud-based and that these claims must be dismissed because the plaintiffs have failed to plead fraud with **[*473]** particularity. The plaintiffs respond that the contract does not authorize the conduct in question, and that they have plead all counts with adequate specificity.

The court will first address Marriott's motion regarding the Robinson-Patman Act and the WVUPA. The court will then turn to Avendra's additional grounds for dismissal.

II. Marriott's Motion to Dismiss

A. Robinson-Patman Act *section 2(c)* Claim

The plaintiffs allege that Marriott's receipt of undisclosed payments and rebates in the course of purchasing goods for the Hotel violates *section 2(c)* of the Robinson-Patman Act. *Section 2(c)* provides, in pertinent part, that:

> ***HN1***[] It shall be unlawful for any person engaged in commerce, in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, … except for services **[**6]** rendered in connection with the sale or purchase of goods, wares, or merchandise ….

15 U.S.C. § 13(c) (West 2003). This provision has been described as a "prolix and obscure statute [which] is a model of bad drafting." XIV Herbert Hovenkamp, ***Antitrust Law*** P 2362, at 219 (1999) [hereinafter Hovenkamp]. Thankfully, the Supreme Court has provided a useful explanation of the intent and function of *section 2(c)*. In *FTC v. Henry Broch & Co., 363 U.S. 166, 4 L. Ed. 2d 1124, 80 S. Ct. 1158 (1960)*, the Court explained that "the Robinson-Patman Act was enacted in 1936 to curb and prohibit all devices by which large buyers gained discriminatory preferences over smaller ones by virtue of their greater purchasing power." *Id. at 168*. Prior to the Act, large buyers were obtaining indirect price concessions while evading the Clayton Act's prohibitions on direct price discrimination. *Id. at 168-69*. They did this by "setting up 'dummy' brokers who were employed by the buyer and who, in many cases, rendered no services. The large buyers demanded that the seller pay 'brokerage' to these fictitious brokers who then **[**7]** turned it over to their employer." *Id. at 169*.

In response to this practice, Congress passed ***HN2***[] *section 2(c)* of the Robinson-Patman Act, which prohibits brokerage or similar payments in the absence of services rendered for those payments. "Congress in its wisdom phrased *section 2(c)* broadly, not only to cover the other methods then in existence but all other means by which brokerage could be used to effect price discrimination." *Id.* Indeed, the Court noted that "the [Congressional] debates on the bill show clearly that *section 2(c)* was intended to proscribe other practices such as the 'bribing' of a seller's broker by the buyer." *Id. at 169 n.6* (citing 80 Cong. Rec. 7759-60, 8111-12). Thus, the Court indicated in *Henry Broch & Co.* that *section 2(c)* reaches commercial bribery as well as the use of dummy brokers to obtain indirect price discrimination. This statement from *Henry Broch & Co.* has been characterized as dicta, but most courts interpreting *section 2(c)* have concluded that it does prohibit commercial bribery. *See* *Stephen Jay Photography, Ltd. v. Olan Mills, Inc., 903 F.2d 988, 992 & n.6 (4th Cir. 1990)* ("commercial **[**8]** bribery" language is dicta, but noting cases recognizing *section 2(c)*'s application to commercial bribery).

In this case, the plaintiffs allege that Marriott, acting in conjunction with Avendra, received rebates and payments-so-called "sponsorship funds"-from vendors **[*474]** in the course of or in exchange for the opportunity to do business with the Hotel. These payments and rebates were not related to services rendered by Marriott, the plaintiffs allege, but were essentially commercial bribes of Marriott, which was supposed to be acting solely in the interest of In Town Hotels, not in its own conflicting self-interest. Marriott has not asserted that *section 2(c)* does not reach commercial bribery, nor has it attacked the merits of the plaintiff's claim under *section 2(c)*. Rather, Marriott argues that even if the plaintiffs have adequately stated a *section 2(c)* claim, they lack standing to pursue that claim because they have not alleged an antitrust injury.

HN3[] The private cause of action for antitrust violations is provided in section 4 of the Clayton Act, which states that "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may **[**9]** sue therefor in any district court of the United States." *15 U.S.C. § 15(a) (West 2003)*. According to the Supreme Court, this means that not every private party who is somehow injured as a result of conduct forbidden by the antitrust laws has standing to bring a private antitrust suit. Rather, an antitrust plaintiff "must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. Accordingly, even when a plaintiff properly alleges a clear antitrust violation, the plaintiff will nonetheless suffer dismissal if it does not allege that it suffered an antitrust injury. *See* *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334-35, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*.

HN4[] It is important to clearly distinguish between the elements of the substantive antitrust violation and the antitrust injury requirement. In certain cases an antitrust plaintiff must prove, as part of the substantive antitrust claim, that the conduct **[**10]** in question injured competition as a whole. For example, a plaintiff seeking to prove a unilateral monopoly under *section 2* of the Sherman Act, *15 U.S.C. § 2*, must prove that the defendant's conduct actually "poses a danger of monopolization." *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 768, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*. In contrast, "certain agreements, such as horizontal price fixing and market allocation, are thought so inherently anticompetitive that each is illegal per se [under section 1 of the Sherman Act] without inquiry into the harm it has actually caused." *Id.* Violations of this sort, where injury to competition is presumed, are referred to as *per se* antitrust violations. Thus, ***HN5***[] depending on the conduct in question and the antitrust provision involved, an antitrust plaintiff may or may not be required to prove injury to competition in order to state an antitrust claim. The Fourth Circuit has held that *section 2(c)* violations are *per se* antitrust violations, meaning that the plaintiff need not prove injury to competition in order to prove that the defendant has violated *section 2(c)*. *Metrix Warehouse, Inc. v. Daimler-Benz Aktiengesellschaft, 716 F.2d 245, 247 (4th Cir. 1983)* **[**11]** ("Nothing in the language of *section 2(c)* … requires proof of an adverse effect on competition before a violation may be found where there is an admitted payment of a commission or other compensation to an agent of the purchaser.").

Regardless of whether the defendant has violated *section 2(c)*, however, the question remains whether the plaintiff has standing to bring suit for that violation. **[*475]** The Supreme Court has made clear that ***HN6***[] even in the case of *per se* antitrust violations, where the plaintiff need not prove actual harm to competition as an element of the substantive violation, the plaintiff still must prove that its injury was of the type the antitrust laws were intended to prevent. *Atlantic Richfield, 495 U.S. at 339-40*. All private antitrust plaintiffs must allege an antitrust injury, "regardless of the type of antitrust claim involved." *Id. at 340*. When the purpose of an antitrust provision is to prevent injury to competition, a plaintiff must always prove that it was injured as a result of injury to competition in order to show antitrust injury. Even when the defendant's conduct is presumed to injure competition, the question remains **[**12]** whether this particular plaintiff's injury was caused by the competition-reducing aspect of the defendant's conduct. Thus, the fact that injury to competition is not an element of a *section 2(c)* offense does not mean, as some might assume, that a *section 2(c)* plaintiff need not show that its injury resulted from harm to competition. [1] If the purpose of *section 2(c)*, in all cases, were to protect competition, then the plaintiffs would be required to allege and prove "competitive injury," meaning an injury flowing from the competition-reducing aspect of the defendant's conduct, even if the defendant's conduct was inherently harmful to competition. But if the purpose of *section 2(c)* is not always to protect competition, then it is at least an open question whether the plaintiffs must prove competitive injury to satisfy the antitrust injury requirement.

---

[1] If it did, then the Fourth Circuit's decision in *Metrix Warehouse* would provide a quick resolution to the antitrust injury requirement in this case.

The focus **[**13]** point of the disagreement between the plaintiffs and the defendant lies in their understandings of what constitutes antitrust injury in the context of a claim under section 2(c). Marriott contends that antitrust injury requires proof that the plaintiffs' injury resulted from "a competition-*reducing* aspect or effect of the defendant's behavior." Id. at 344. In contrast, the plaintiffs contend that antitrust injury is simply "injury of the type the antitrust laws were intended to prevent." Brunswick Corp., 429 U.S. at 489. In some cases, the plaintiffs acknowledge, the type of injury the antitrust laws were intended to prevent is a reduction in competition. This is true, for example, in claims brought under section 1 of the Sherman Act, the provision at issue in *Atlantic Richfield.* Section 2(c), the plaintiffs argue, is different: unlike most provisions of the federal antitrust laws, section 2(c) is intended to protect an individual firm from losses caused by commercial bribery (among other things), not to protect the competitive process as a whole. Accordingly, the plaintiffs say that in the context of section 2(c), an "injury of the type the **[**14]** antitrust laws were intended to prevent" is a firm's loss resulting from commercial bribery, not a loss resulting from a competition-reducing aspect of that bribery.

There is force to both parties' positions, and the caselaw does not provide a clear resolution of the issue. The Supreme Court cases discussing the antitrust injury requirement illustrate the ambiguity in the caselaw on this point. For example, in *Brunswick,* the Court first defines antitrust injury as "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." 429 U.S. at 489. Under this definition, it seems that the court should inquire as to the type of injury that the antitrust provision in question was intended to prevent. **[*476]** Courts have explained that the particular antitrust provision at issue here -- section 2(c) -- was designed to "protect[] *those who compete* with a favored seller, not just the overall competitive process." Monahan's Marine, Inc. v. Boston Whaler, Inc., 866 F.2d 525, 529 (1st Cir. 1989) (Breyer, Circuit Judge). Thus section 2(c) of the Robinson-Patman Act is unlike other provisions of ***antitrust* [**15] *law***, such as the Sherman Act, which is only "concerned with the protection of competition, not competitors." Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962).

The defendants argue that regardless of any additional purposes of the specific antitrust provision at issue, the Supreme Court has made clear that injury to competition is always a necessary part of antitrust injury. For example, in *Brunswick,* after describing an antitrust injury as "injury of the type the antitrust laws were intended to prevent," the Court immediately went on to say that "the injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." 429 U.S. at 489. According to the defendants, this second statement clarifies the first -- it means that the type of injury that the antitrust laws were intended to prevent *always* results from the anticompetitive nature of the antitrust violation, regardless of whether one is dealing with section 1 of the Sherman Act -- which is designed to protect the competitive process -- or section 2(c) of the Robinson-Patman Act -- which **[**16]** is designed to protect individual competitors. If any ambiguity exists in *Brunswick,* the defendants argue, it was resolved by *Atlantic Richfield,* where the Court seems to equate antitrust injury with injury to competition. *See, e.g.,* Atlantic Richfield, 495 U.S. at 339 ("Antitrust injury does not arise for purposes of section 4 of the Clayton Act … until a private party is adversely affected by an anticompetitive aspect of the defendant's conduct."); id. at 340 ("Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury.").

The court does not agree that these statements from *Brunswick* and *Atlantic Richfield* resolve the matter. While the Court in *Brunswick* and *Atlantic Richfield* seems to assume that preventing injury to competition is always the purpose of the antitrust provision in question, both cases involve the Sherman Act, not the Robinson-Patman Act. In this case, which involves an antitrust provision that was not designed to protect competition, but rather to protect individual **[**17]** competitors, this court concludes that the above statements from *Brunswick* and *Atlantic Richfield* are not relevant. Instead, the fundamental rule from both cases is that ***HN7***[] the court must "ensure[] that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place." Id. at 342. The court therefore turns to consider the rationale behind the particular antitrust provision at issue here, namely section 2(c).

Cases directly addressing the issue of antitrust injury in the context of section 2(c) claims have reached different conclusions about the meaning of antitrust injury. Some cases hold that a competitive injury must be proven to satisfy the antitrust injury requirement. *See, e.g., Hansel ' N Gretel Brand, Inc. v. Savitsky, 1997 U.S. Dist. LEXIS 17615*, No. 94 Civ. 4027, 1997 WL 543088, at *8 (S.D.N.Y. Sept. 3, 1997); *Miyano Mach. USA, Inc. v. Zonar, 1993 U.S. Dist. LEXIS 963*, No. 92 C 2385, 1993 WL 23758, at *8 (N.D. Ill. Jan. 29, 1993); *NL Indus., Inc. v. Gulf & Western Indus., **[*477]** Inc., 650 F. Supp. 1115, 1124 (D. Kan. 1989)*; *Fed. Paper Bd. Co. v. Amata, 693 F. Supp. 1376, 1388 (D. Conn. 1988)*; **[**18]** *Bunker Ramo Corp. v. Cywan, 511 F. Supp. 531, 533 (N.D.Ill.1981)*. [2] **[**19]** Other cases hold that the antitrust injury requirement can be met in the context of a *section 2(c)* claim without any proof of any sort of competitive injury. *See, e.g., Philip Morris, Inc. v. Grinnell Lithographic Co., 67 F. Supp. 2d 126, 134 (E.D.N.Y. 1999)*; *Edison Elec. Inst. v. Henwood, 832 F. Supp. 413, 418-19 (D.D.C. 1993)*; *Municipality of Anchorage v. Hitachi Cable, Ltd., 547 F. Supp. 633 (D. Alaska 1982)*. [3] The courts adopting the two approaches **[*478]** primarily disagree about the purpose of *section 2(c)* in relation to the antitrust laws generally.

[20]** On the one hand, the court in *Bunker Ramo* explained that "as envisioned by Congress and interpreted by the courts, *section 2(c)* is designed to protect and promote competition among businesses competing at the same functional level in the marketing chain." *Bunker Ramo Corp.* 511F. Supp. at 533. Similarly, the court in *Federal Paper Board Co.* stated that "even though there is evidence in the legislative history that Congress may have additionally intended for *section 2(c)* to prohibit commercial bribery, it appears that the main purpose of *section 2(c)* was to close the 'brokerage' loophole in the laws regulating price discrimination." *Federal Paper Bd. Co. 693 F.*

---

[2] The only circuit court decision arguably adopting this approach is *Larry R. George Sales Co. v. Cool Attic Corp., 587 F.2d 266 (5th Cir. 1979)*. In this court's opinion, however, the *Cool Attic* opinion leaves it unclear whether injury to a competitor or injury to competition is necessary for antitrust injury. The plaintiff in *Cool Attic* was an independent broker hired on commission by an attic fan manufacturer to arrange sales to attic fan distributors. *Id. at 269*. Eventually, however, the purchasing agent for the attic fan distributor began dealing directly with the manufacturer and began demanding and receiving commissions from the manufacturer. *Id.* The independent broker brought a *section 2(c)* commercial bribery claim, but the court dismissed the claim for lack of antitrust injury. The independent broker's only injury, the court explained, arose from the breach (if any) of the brokerage agreement, not from the fact that the purchasing agent was now allegedly receiving illegal commissions from the manufacturer. *Id. at 272*. Thus, the independent broker had not suffered an antitrust injury.

Certain aspects of the court's reasoning appear to support the defendant's position. For example, the court stated that "recovery and damages under the ***antitrust law*** is available to those who have been directly injured by the lessening of competition." *Id. at 271*. At another point, however, the court stated that "only if Plaintiff was in the same business and in competition with [either the manufacturer or the distributor] … would he have standing." *Id. at 272*. This implies that injury to an individual competitor, regardless of injury to competition as a whole, would suffice for antitrust injury standing. The lack of clarity on this point is understandable, as the plaintiff in *Cool Attic* lacked standing under either theory of antitrust injury. Because of the ambiguities in *Cool Attic* regarding the precise contours of antitrust injury, this court does not rely on that case.

[3] Several other cases are sometimes cited by courts as holding that injury to competition need not be alleged to satisfy antitrust injury for a *section 2(c)* claim, but these cases do not address the antitrust injury standing requirement directly and thus are not reliable precedent on point. For example, in *Fitch v. Kentucky-Tennessee Light & Power Co., 136 F.2d 12, 15 (6th Cir. 1943)*, the court affirmed a judgment for a *section 2(c)* plaintiff whose employee had been bribed, stating that "the buyer is suing for damages … because, on account of the fraud, it was obliged to pay more for its coal than it would otherwise have paid in a competitive market." Thus the court permitted a claim, very similar to the one alleged here, based on injury to a competitor without also requiring proof of injury to competition. However, it seems that the parties did not raise the issue of standing and antitrust injury, and the court never mentioned the antitrust injury requirement. The plaintiffs also cite *2660 Woodley Rd. Joint Venture v. ITT Sheraton Corp., 2002 U.S. Dist. LEXIS 439*, No. Civ. A. 97-450, 2002 WL 53913 (D. Del. Jan 10, 2002), where the court held that the plaintiff had produced sufficient evidence to prove antitrust injury based on evidence that the hotel had suffered higher purchasing costs vis-a-vis its rivals as a result of the commercial bribery. *2002 U.S. Dist. LEXIS 439*, [WL] at *9. But the defendant in *2660 Woodley Road* only argued that the evidence was insufficient to prove that the hotel had in fact paid higher prices than other hotels, not that such an injury, even if proven, would not constitute an antitrust injury. *2002 U.S. Dist. LEXIS 439*, [WL] at *8. Therefore, the court did not address the issue of whether an antitrust injury must result from an injury to competition. *See also Calnetics Corp. v. Volkswagen of Am., 532 F.2d 674, 696 (9th Cir. 1976)* (holding, without acknowledging the antitrust injury requirement, that "if [Volkswagen Pacific] is able on remand to prove that [Calnetics] indeed committed acts of commercial bribery in violation of *section 2(c)*, then the defendants ought to be allowed any damages proximately caused by that violation.").

Supp. at 1388 (citations omitted). The court then concluded that "in light of the primary purpose of section 2(c), this court believes that the antitrust injury requirement … requires a plaintiff suing for treble damages for violations of section 2(c) to show that the probable affect of the discrimination would be to allow the favored competitor to draw sales or profits from him, the unfavored competitor." *Id.* (quotations omitted). Generally speaking, then, these courts reason that because section 2(c) was "primarily" intended to protect competitors against price **[**21]** discrimination resulting from dummy brokers, the antitrust injury requirement in the context of section 2(c) requires a showing of an injury flowing from this practice.

Other courts have not interpreted the goals of section 2(c) so narrowly. In contrast to the above-cited cases, the court in *Edison Electric Institute* claimed that "in enacting section 2(c), Congress had at least *two* objectives to prevent large buyers from extracting hidden price discounts from suppliers in the form of 'dummy brokerage' payments; and to prohibit commercial bribery that tended to undermine the fiduciary relationship between a buyer and its agent." 832 F. Supp. at 418 (emphasis added) (citing Stephen Jay Photography, Ltd. v. Olan Mills, Inc., 903 F.2d 988, 991-93 (4th Cir.1990); S. Rep. No. 1502, 74th Cong., 2d Sess. 7 (1936)). The court criticized the reasoning of *Federal Paper Board Co.,* stating that it "rested solely on the price discrimination/ dummy brokerage rationale of section 2(c) and ignored the commercial bribery rationale." Edison Elec. Inst. 832 F. Supp. at 419. Similarly, in *Municipality of Anchorage* the court acknowledged that "the prime concern of Congress was to **[**22]** curtail price discriminations accomplished by pseudo-brokerage arrangements," but noted that this was not the only purpose behind the statute. Municipality of Anchorage 547 F. Supp. at 640. Another "major concern of Congress in promulgating section 2(c) was protection of the fiduciary relationship between a broker and his client." *Id.* Accordingly, the court concluded that a plaintiff alleging an injury stemming from a violation of the broker-client fiduciary relationship satisfied the antitrust injury requirement just as much as a plaintiff alleging injury from price discrimination flowing from dummy brokers. Municipality of Anchorage 547 F. Supp. at 641. *See also* Philip Morris, Inc., 67 F. Supp. 2d at 133-34 (holding that plaintiff had alleged antitrust injury because injury "was the direct result of commercial bribery, an activity outlawed by section 2(c)"). [4]

[23]** **[*479]** All of the cases discussed above acknowledge the instructions from *Brunswick* that ***HN8***[] antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." Brunswick Corp., 429 U.S. at 489. As explained, they differ in their interpretations of what type of injury section 2(c) was intended to prevent. The Fourth Circuit has not addressed the antitrust injury requirement in the context of section 2(c). [5] Nonetheless, the Fourth Circuit has addressed the purposes behind section 2(c), and this discussion sheds light on how that court might interpret the antitrust injury requirement in the context of section 2(c) claims. In Stephen Jay Photography, Ltd. v. Olan Mills, Inc., 903 F.2d 988 (4th Cir. 1990), the Fourth Circuit considered whether payments by a photographer to a school district for the privilege of taking student photos constituted commercial bribery under section 2(c). The Fourth Circuit, noting that most courts recognize claims for commercial bribery under section 2(c), assumed without deciding that section 2(c) applies to certain types of commercial bribery. 903 F.2d at 993. **[**24]** Even so, the court concluded, ***HN9***[] section 2(c)

[4] The plaintiffs quote at length from the court's decision in *Philip Morris.* This court has not discussed that case extensively, in part because the court does not fully endorse the reasoning in *Philip Morris.* For example, the court in *Philip Morris* declined to impose a "competitive injury" requirement on section 2(c) plaintiffs because, among other things, it concluded that commercial bribery always injures competition. *See* *Philip Morris,* 67 F. Supp. 2d 134-36. As the defendant points out, this analysis confuses the elements of a section 2(c) claim -- which does not require proof of injury to competition -- with the antitrust injury standing requirement of section 4 of the Clayton Act -- which limits private party standing to those injured in the manner the antitrust laws were designed to prevent. Whether the defendant's conduct is inherently harmful to competition is a different question from whether the plaintiff was injured as a result of the competition-reducing aspect of that behavior. *See* Atlantic Richfield, 495 U.S. at 335 (even for *per se* Sherman Act claim, in which injury to competition is presumed, the plaintiff must still prove competitive injury to have standing under section 4). This is not to say that this court disagrees with the *Philip Morris* court at all points in the analysis. The court simply wishes to emphasize, particularly in light of the plaintiffs' heavy reliance on *Philip Morris,* that it does not fully adopt the reasoning of *Philip Morris* (or any other decision cited), except to the extent that the court does so expressly in this opinion.

[5] Indeed, as indicated in footnotes 2 and 3, no circuit court has directly addressed this issue.

only reaches bribery that crosses the seller-buyer line -- for example, when the seller makes a payment to an agent of the buyer. *Id.* In *Stephen Jay,* the court concluded that the school was not acting as the students' agent when it arranged for the photographer. *Id.* Thus, the payment from the photographer to the school district did not cross a buyer seller line and did not violate *section 2(c)*.

In the course of reaching this conclusion, the court discussed the purposes behind *section 2(c)*. The court noted that ***HN10***[] while one main purpose behind *section 2(c)* was to prevent large buyers from using dummy brokers to circumvent discriminatory price prohibitions, Congress also intended *section 2(c)* to protect the fiduciary relationship between a broker and his client. *903 F.2d at 991-92*. The court noted several passages from the legislative history to **[**25]** *section 2(c)* that the Supreme Court had cited in *Henry Broch & Co., 363 U.S. at 169-70 n.6*, as examples of the type of commercial bribery that Congress targeted in *section 2(c)*. For example, the court quoted a statement from Senator Patman:

> There is a merchant in Virginia representing potato growers. He sells thousands of cars of potatoes a year, and our investigation has disclosed that he had a secret contract with a large mass corporate chain buyer by which he obligated himself to sell every car of those potatoes of those farmers to this large buyer .... This man representing the farmers sold those potatoes to that mass buyer, fixing the price himself, and what did he get out of it? He got a secret rebate of **[*480]** $ 2.50 to $ 5 on every car that the farmers knew nothing about .... That is the kind of dummy-brokerage arrangement we are trying to prohibit in this bill.

Stephen Jay, 903 F.2d at 993 (quoting 74 Cong. Rec. 8111-12 (1936) (statement of Sen. Patman)). The court explained that statements such as Senator Patman's "refer to the corruption of an agency relationship." *903 F.2d at 993*. Thus, the court in *Stephen Jay* inferred, **[**26]** although did not hold, that allegations of commercial bribery involving corruption of the agency relationship state a claim under *section 2(c)*. [6] The court's reasoning in *Stephen Jay* suggests that ***HN11***[] corruption of the agency relationship is the type of injury that *section 2(c)* was intended to prohibit.

This court concludes that it is a mistake to focus solely on the dummy brokerage/ price discrimination purpose behind *section 2(c)*. It may be the case that the dummy brokerage/ price discrimination purpose fits more easily with the pro-competition purposes of ***antitrust law*** generally. [7] But this court's job is to apply the law as written, not to second-guess the wisdom or efficacy of the statutes passed by Congress. Looking at the text and legislative history of *section 2(c)*, ***HN12***[] there is no justification for implying that *section 2(c)* has only **[**27]** pro-competition purposes. As explained in *Stephen Jay,* one of the purposes of *section 2(c)* was to protect against "the corruption of an agency relationship." *903 F.2d at 988*. It is certainly debatable whether concern over the corruption of the agency relationship is a matter that appropriately belongs in the antitrust laws, *see* Keller W. Allen & Meriwether D. Williams, *Commercial Bribery, Antitrust Injury and Section 2(c) of the Robinson-Patman Anti-Discrimination Act,* 27 Gonz. L. Rev. 153, 177-78 (1990-91), but to date Congress has neither repealed nor rewritten *section 2(c)*. *See* Hovenkamp P 2340a, at 118 (noting that "very few statutes have survived such long-lived and unrelenting criticism as has been directed against the Robinson-Patman Act"). Accordingly, the court concludes that ***HN13***[] in the context of a claim under *section 2(c)*, the antitrust injury standing requirement is met when a plaintiff alleges an injury flowing from "the corruption of an agency relationship." *Stephen Jay, 903 F.2d 988*

---

[6] *Stephen Jay* simply holds the converse -- that alleged commercial bribery that does not involve corruption of the agency relationship does not violate *section 2(c)*.

[7] Although for that matter, it is not clear whether even this aspect of *section 2(c)* fits within the broader goals of the antitrust laws. Even as to its dummy brokerage/ price discrimination function, *section 2(c)*, like the Robinson-Patman Act as a whole, has been roundly criticized for being out of step with, and in some cases in direct conflict with, the general pro-competition aims of the antitrust laws. *See* Hovenkamp P 2301 (explaining that price discrimination by a supplier among various dealers is not, absent market power, harmful to competition); *id.* 2362, at 234 (results under *section 2(c)* "can be quite at odds with general antitrust goals").

[28]** In this case, the plaintiffs allege that Marriott served as the agent for In Town Hotels in procuring and purchasing goods and supplies for the hotel. In its capacity as the agent of In Town Hotels, Marriott received undisclosed payments and rebates from vendors for the opportunity to sell goods to In Town Hotels. These allegations fit the terms of *section 2(c)*, which renders it unlawful "for any person engaged in commerce, in the course of such commerce, … to receive or accept, anything of value as a commission, brokerage, or other compensation, … except for services rendered in connection with the sale or purchase of goods, wares, or merchandise." *15 U.S.C. § 13(c)*. It is also useful to compare the plaintiffs' allegations **[*481]** to the case of Senator Patman's potato farmer. There, the potato farmer's selling agent "'sold the potatoes to [a] mass buyer, fixing the price himself, and [the agent] … got a secret rebate.'" *Stephen Jay, 903 F.2d at 993* (quoting 74 Cong. Rec. 8111-12 (1936)). Similarly in this case, the plaintiffs allege that their agent purchased hotel goods from vendors and received secret payments and rebates from those vendors **[**29]** that it did not pass along to In Town Hotels. Contrary to the facts in *Stephen Jay,* where the court dismissed the plaintiffs' claim, the alleged payment in this case crosses the seller-buyer line. The plaintiffs allege that Marriott, an agent for the buyer (In Town Hotels), received payments from the seller-vendors. Thus, the plaintiffs here have alleged a corruption of the agency relationship which crosses the seller-buyer line.

The plaintiffs allege that they were injured by this conduct in two ways: (1) they were deprived of the rebates and payments to which they were entitled, and (2) they lost business vis-a-vis their competitors, because they paid higher prices for their hotel supplies. [8] **[**30]** These injuries are typical harms caused by commercial bribery in the form of corruption of the agency relationship, and thus are injuries of the type that *section 2(c)* was intended to prevent. Accordingly, the plaintiffs have adequately alleged an antitrust injury, which gives them standing under section 4 of the Clayton Act to bring this private action. [9] Marriott's motion to dismiss Count XIV is **DENIED.**

B. West Virginia Unfair Practices Act Claim

The plaintiffs also bring suit under a provision of the WVUPA, which states in pertinent part:

> ***HN14***[] The secret payment or allowance of rebates, refunds, commissions, or unearned discounts, whether in the form of money or otherwise, or secretly extending to certain purchasers, special services, or privileges not extended to all purchasers purchasing upon like terms and conditions, to the injury of a competitor and where such payment or allowance tends to destroy competition, is an unfair trade practice ….

[8] This second injury-the loss of business vis-a-vis competitors-sounds something like a "competitive injury." Of course, this court has concluded that competitive injury need not be plead as part of the antitrust injury requirement in a *section 2(c)* claim. Accordingly, the court need not, and does not, evaluate whether this second allegation would satisfy that requirement. Some courts imposing a competitive injury standing requirement in *section 2(c)* claims have held that similar allegations are sufficient; others have held that such allegations are insufficient. *Compare Hansel ' N Gretel Brand, Inc., 1997 U.S. Dist. LEXIS 17615, 1997 WL 543088*, at * 10 (allegations that the defendant "sold its products to HNG's competitors at a lower price than it charged to HNG, or charged HNG more than HNG's competitors were paying for the same kind of merchandise," were sufficient to state antitrust injury); *with Fed. Paper Bd. Co., 693 F. Supp. at 1388* (even though complaint alleged that the plaintiff had paid above-market rates for wastepaper because its purchasing agent had taken bribes from certain suppliers, "without allegations of additional facts that demonstrate how [other] suppliers were precluded from taking competitive actions in order to secure sales with Federal, the amended complaint does not sufficiently allege anticompetitive effect").

[9] Marriott also argues that the plaintiffs fail to adequately allege antitrust injury because they do not allege facts sufficient to define the relevant market in which competition was impaired. Because the court has concluded that an injury flowing from a reduction in competition need not be alleged to satisfy the antitrust injury requirement in the context of *section 2(c)*, the plaintiffs of course need not define the relevant market in which competition has been reduced.

[*482] *W. Va. Code § 47-11A-3* (West 2002). [10] Marriott argues **[**31]** that under this statute, proof to injury of a competitor of the party granting the rebate or paying the commission is a necessary element. Thus, Marriott argues, the plaintiffs must prove that competitors of the vendors who allegedly paid the sponsorship fees were injured. For example, a towel vendor might allege that it lost sales that it could have made to In Town Hotels because one of its competitors paid a secret fee to Marriott in exchange for the exclusive opportunity to sell towels (presumably at above-market prices) to the Hotel. In this type of scenario, Marriott argues, the towel vendor might fit the terms of the statute. The towel vendor would have alleged "injury of a competitor" to the party making a "secret payment," and also that "such payment … tends to destroy competition," insofar as the payment by the competitor destroyed the competitive process of bidding for towel sales to the Hotel.

[32]** The plaintiffs respond that in this case, they are a competitor of the defendant Marriott and thus they fit within the plain terms of the statute. The plaintiffs allege that Marriott owns or operates other hotels in the same market and thus competes with In Town Hotels directly. By accepting the sponsorship payments, the plaintiffs allege, Marriott caused injury to In Town Hotels, one of its competitors in the hotel market. Thus, the plaintiffs claim, they have alleged "injury of a competitor" of the party receiving the payments, here Marriott.

There are no West Virginia decisions interpreting this statute, but similar or identical Unfair Practice Acts exist in other jurisdictions. The court will therefore refer to caselaw in these jurisdictions for assistance in interpreting West Virginia's UPA. ***HN16***[] Courts interpreting UPAs have generally held that a payment or rebate "to the injury of a competitor" includes injuries to the competitors of the party receiving the payment or rebate as well as the competitors of the party providing the payment or rebate. *See, e.g., ABC Int'l Traders, Inc. v. Matsushita Elec. Corp. of Am., 14 Cal. 4th 1247, 931 P.2d 290, 292, 61 Cal. Rptr. 2d 112 (Cal. 1997)* **[**33]** ("We conclude that a cause of action may be pled by alleging competitive injury among buyers" as well as among sellers); *Diesel Elec. Sales & Serv. v. Marco Marine San Diego, Inc., 16 Cal. App. 4th 202, 214-15, 20 Cal. Rptr. 2d 62 (Cal. App. Ct. 1993)* ("Both sellers and buyers should generally be held liable in the event of such discounts."). [11] Here, the parties providing **[*483]** the payment or rebate are the vendors. Their competitors -- in the example above, other towel vendors -- are one group covered by the phrase "injury to a competitor." The party receiving the payment or rebate here is Marriott. Marriott's competitors -- including In Town Hotels -- are also a group covered by the phrase "injury to a competitor."

[34]** It is true that the factual scenario presented by the plaintiffs' allegations is atypical for a claim under Unfair Practices Acts such as West Virginia's. UPAs typically protect competitors of the seller from injury due to secret rebates given to buyers by that seller, or protect competitors of a buyer from injury due to secret rebates given that buyer by a seller. Courts have characterized Unfair Practices Acts as "prohibiting sellers from giving secret discounts to certain purchasers when the discount 'injures a competitor and tends to destroy competition.'" *Am. Booksellers Ass'n v. Barnes & Noble, Inc., 135 F. Supp. 2d 1031, 1043 (N.D. Cal. 2001)* (quoting *ABC Int'l Traders,*

---

[10] *Section 47-11A-3* is actually a criminal statute that makes this conduct a misdemeanor. The plaintiffs may pursue a private cause of action based on this statute because ***HN15***[] West Virginia law creates a private right of action for unfair trade practices. *See W. Va. Code § 47-11A-9*.

[11] Marriott cites *Marco Marine* for the contrary proposition that UPAs only cover injury to a competitor of the party granting the rebate, not the party receiving the rebate. But *Marco Marine* holds to the contrary. The court specifically rejected the defendant's contention that the Act "does not apply to buyers who receive secret allowances of unearned discounts, but only to the sellers who provide them." *Marco Marine 16 Cal. App. 4th at 214*. Instead, the court held that "both sellers and buyers should generally be held liable in the event of such discounts." *Marco Marine 16 Cal. App. 4th at 214-15*. Marriott also cites *Burge v. Pulaski County Special Sch. Dist., 272 Ark. 67, 612 S.W.2d 108 (Ark. 1981)*, for support of its position. It is true that the *Burge* court held that "the Act provides a remedy only in favor of one seller against another seller, not in favor of a seller against a buyer or vice versa." *Burge 612 S.W.2d at 110*. But this does not mean that the Act covers sellers but not buyers, only that sellers are only covered vis-a-vis other sellers. (The court does not address whether buyers are covered vis-a-vis other buyers.) Moreover, the *Burge* court did not provide much explanation for its limitation of the right to recovery under the Acts, and it also justified dismissing the case on the alternative ground that the payments were not secret. *Id.* To the extent that *Burge* does stand for the plaintiffs' proposition that the Acts cover only injuries to competitors of the party granting the rebate, not the party receiving the rebate, this court declines to follow *Burge.*

Inc., 931 P.2d at 294). For example, the California Court of Appeals held that a distributor of hydraulic fittings and hoses stated a claim for injury under California's UPA by alleging that a competitor-distributor received secret rebates from the manufacturer. Diesel Elec. Sales & Service, Inc., 16 Cal. App. 4th at 212-14. The distributor alleged that it went out of business in part because its competitor was routinely given volume discounts by the manufacturer **[**35]** even though the competitor did not purchase enough hoses to qualify for the discount under the manufacturer's standard terms of sale. *Id.*

This case is different, as it involves allegations of a secret *premium,* not a secret *rebate.* In Town Hotels does not allege, of course, that it received a secret rebate (nobody complains about unknowingly saving money), nor does it allege that its competitors received a secret rebate in their purchase of goods. Rather, In Town Hotels in essence alleges that it incurred a secret premium on the goods it purchased. Specifically, In Town Hotels alleges that "it is restricted in its choice of and access to independent vendors and consequently has paid prices for goods, wares and merchandise that were higher than it would have paid in the absence of Defendants' kickback scheme." (Compl. P 176.) The idea here is that Marriott paid a premium for the goods it purchased from vendors on behalf of In Town Hotels, and that this premium was the benefit received by the vendors in exchange for their payments or rebates to Marriott. In other words, In Town Hotels paid above-market rates for goods, and Marriott and the vendors profited by splitting the **[**36]** difference.

Of course, the fact that this case is not like most UPA cases does not mean that the plaintiffs have failed to state a claim -- they may have struck upon a novel application of the law. The question is whether their claim meets the terms of the statutory language. The statute prohibits "the secret payment or allowance of rebates, refunds, commissions, or unearned discounts … to the injury of a competitor and where such payment or allowance tends to destroy competition." W. Va. Code § 47-11A-3. Here, the plaintiffs do allege a secret payment and allowance of commissions and rebates, namely payments and rebates paid to Marriott by **[*484]** vendors. The question is whether this commission was "to the injury of a competitor" and whether the commission "tended to destroy competition." *Id.*

As explained above, the plaintiffs allege that they are in competition with Marriott, because Marriott owns, operates, or franchises other hotels. (Compl. P 178.) The plaintiffs further allege that as a result of the secret payments received by Marriott, In Town Hotels paid a higher price for goods than did its competitor hotels, some of which are owned or operated by Marriott. Accepting these **[**37]** allegations as true, the court agrees with the plaintiffs that the secret commissions operated "to the injury of a competitor" (In Town Hotels) of the party receiving the payment (Marriott). Furthermore, the commissions tended to destroy competition. The alleged secret commissions removed In Town Hotels' purchase of goods from the competitive process and thereby eliminated competition in the provision of goods to the Hotel. Accepting the allegations as true, In Town Hotels' purchase of goods was not based on the best price for the goods in question, but rather on which vendor was willing to pay Marriott the sponsorship fee.

In fact, the court has discovered one case holding (albeit indirectly) that a UPA covers the type of conduct alleged here. The case involved a prosecution for making a false statement on a tax return. United States v. Di Girolamo, 808 F. Supp. 1445 (N.D. Cal. 1992). The defendant, the owner of a painting business, had taken business deductions for bribe payments to an employee of First Nationwide Savings to secure the award of painting contracts from First Nationwide. Id. at 1447. To prove its case, the government had to establish, **[**38]** among other things, that the payments were illegal under state or federal law. Id. at 1448. The government argued that the California UPA "proscribes certain forms of bribery and bid-rigging." Id. at 1451. The court agreed, holding that the alleged bribe payment "falls within the scope of the Unfair Practices Act" and "destroyed all competition in the letting of painting contracts for First Nationwide Savings." Id. at 1452.

In sum, the court concludes that the plaintiffs have adequately alleged a violation of W. Va. Code § 47-11A-3. Marriott's motion to dismiss this count is therefore **DENIED.**

III. Avendra's Motion to Dismiss

The other defendant, Avendra, filed a motion to dismiss all of the counts against it. For the reasons discussed below, the court concludes that Avendra is only entitled to dismissal of Count VI (fraud).

A. Dismissal based on the terms of the Contract

Avendra first argues that all claims must be dismissed because the contract between In Town Hotels and Marriott specifically permits Marriott to (1) purchase inventories and supplies from itself or from Marriott affiliates such as Avendra, and **[**39]** (2) make a reasonable profit on such transactions. Accordingly, Avendra argues, the profits obtained by Marriott and Avendra from purchasing hotel supplies are specifically permitted by the contract. According to Avendra, Marriott's and Avendra's receipt of these profits cannot possibly constitute a breach of contract, breach of fiduciary duty, commercial bribery in violation of the Robinson-Patman Act, or any of the other claims alleged. Avendra bases this argument on language from section 1.02 of the Management Agreement between Marriott and In Town Hotels. That section provides, under the heading "Delegation of Authority," that Marriott "shall have discretion and control … in all matters relating to the management **[*485]** and operation of the Hotel, including … procurement of inventories, supplies and services (purchases from [Marriott] and its affiliates shall be at competitive prices) …." (Compl. App. A, at 2.) This provision, Avendra agues, clearly contemplates that Marriott and its affiliates, such as Avendra, may profit from purchasing hotel supplies.

The plaintiffs respond by pointing to other sections of the Management Agreement that; they contend, prohibit Marriott from **[**40]** retaining profits related to their management of the Hotel except as provided in the management fee provision of the Agreement. Specifically, section 5.01.A of the Agreement provides that Marriott "will retain, as a management fee for services performed hereunder, an amount … equal to twenty percent (20%) of Operating Profit." (Compl. App. A, at 13.) Later, in section 5.01.D, the Agreement provides that "no charges or fees are to be paid by [In Town Hotels] to [Marriott] except as provided in the Agreement …." (Compl. App. A, at 15.)

Considering only the face of the Agreement, the court cannot conclusively determine whether the Agreement expressly permits the payments alleged to be wrongful in this case. There is some force to Avendra's argument that the phrase "purchases from [Marriott] and its affiliates shall be at competitive prices" contemplates that Marriott and its affiliates are permitted to profit from sales of supplies to the Hotel. The language of section 5.01.D of the Agreement, however, appears to restrict Marriott's compensation to the management fee set out in the Agreement. This suggests that Marriott's and Avendra's receipt of these payments and rebates **[**41]** may not be permitted. Without some factual development in the case regarding specific details of the relationship between Marriott and In Town Hotels, the context and nature of the alleged rebates and payments received by Marriott and Avendra, the course of dealing of the parties, and the standard practice in the industry, the court cannot resolve the tension between these two parts of the Agreement. The contract does not unambiguously authorize the allegedly wrongful rebates and payments to Marriott and Avendra. At this stage of the proceedings, Avendra is not entitled to dismissal of the counts against it based on the language of the contract. [12]

[42] B. Pleading Fraud with Particularity**

Second, Avendra argues that the claims for fraud, violations of the WVUPA, and aiding and abetting a breach of fiduciary duty must be dismissed because (1) all of these are fraud-based claims and (2) the plaintiffs have not plead fraud with particularity as required by *Rule 9(b)*. [13] The court will first dispose of **[*486]** Avendra's argument

---

[12] In addition to this general argument that the contract explicitly permits the alleged wrongful conduct, Avendra presents several arguments that depend necessarily on the court accepting this conclusion. For example, Avendra argues that the claim for aiding and abetting a breach of fiduciary duty must be dismissed because there can be no breach of fiduciary duty in the first place when the contract explicitly permits the conduct alleged. As the court has rejected the premise upon which all of these arguments rely, they are likewise without merit and do not warrant further discussion.

related to the WVUPA and aiding and abetting a breach of fiduciary duty. ***HN17***[] To state a claim under the WVUPA, the plaintiffs need only allege facts indicating "the secret payment or allowance of rebates … to the injury of a competitor and where such payment or allowance tends to destroy competition." *W. Va. Code § 47-11A-3*. There is no element of fraud in this provision -- the plaintiff need not allege or prove a misrepresentation, reliance, or any of the other elements of common law fraud. Because the plaintiffs' WVUPA claim is not fraud-based, the plaintiffs need not plead that claim with particularity. Avendra also assumes, without supporting argument, that the plaintiffs' claim for aiding and abetting a breach of fiduciary duty claim is fraud-based. It may be the case that certain breach of fiduciary duty **[**43]** claims are fraud-based and that those claims must be plead in compliance with *Rule 9(b)*. *See* *Shapiro v. Miami Oil Producers, Inc., 84 F.R.D. 234, 236 (D. Mass. 1979)* ***HN18***[] ("[*Rule 9(b)*] extends to averments of fraud or mistake, whatever may be the theory of legal duty -- statutory, tort, contractual, or fiduciary."). But the main thrust of the plaintiffs' allegations here is that Marriott had a duty, as an agent of In Town Hotels, not to secretly profit on the side from the performance of its duties on behalf of In Town Hotels. This theory of breach of fiduciary duty does not depend on misrepresentations relied on by In Town Hotels, but simply on the receipt of illicit payments. This type of breach of fiduciary duty claim is not fraud-based and therefore need not meet the mandates of *Rule 9(b)*.

[44]** The only claim that Avendra has identified which *is* clearly subject to *Rule 9(b)* requirements is the claim for fraud itself. Avendra is entitled to dismissal of this claim, as the plaintiffs have failed to plead this claim with particularity as against Avendra. ***HN19***[] Under *Rule 9(b)*, "in all averments of fraud or mistake, the circumstances constituting fraud or mistake shall be stated with particularity." The Fourth Circuit has explained that "the 'circumstances' required to be pled with particularity under *Rule 9(b)* are 'the time, place, and contents of the false representations, as well as the identity of the person making the misrepresentation and what he obtained thereby.'" *Harrison v. Westinghouse Savannah River Co., 176 F.3d 776, 784 (4th Cir. 1999)* (quoting 5 Charles A. Wright & Arthur R. Miller, *Federal Practice and Procedure: Civil* § 1297, at 590 (2d ed. 1990)). Even so, the court cautioned that "[a] court should hesitate to dismiss a complaint under *Rule 9(b)* if the court is satisfied (1) that the defendant has been made aware of the particular circumstances for which she will have to prepare a defense at trial, and (2) that plaintiff has substantial **[**45]** prediscovery evidence of those facts." *Id.*

In its count for fraud, the plaintiffs allege that the defendants, including Avendra, made false and misleading material statements and omissions, knowing that the statements were untrue, misleading, or lacking in material facts. Additionally, the plaintiffs allege that the defendants committed fraud by obtaining and retaining undisclosed kickbacks though their purchasing activities. The fraud **[*487]** claim can thus be grouped into three main categories: (1) fraud by way of affirmative misrepresentation; (2) fraud by way of omission of material facts; and (3) fraud by way of obtaining and retaining undisclosed payments related to purchasing activities. The court will address these three categories in turn.

As to affirmative misrepresentations, Avendra argues that the plaintiffs have failed to allege any such misrepresentation with particularity, as required by *Rule 9(b)*. Avendra correctly points out that while the complaint alleges generally that the defendants made false representations, the complaint does not specifically identify a single false representation made by Avendra to In Town Hotels. The complaint alleges, for example, that "defendants **[**46]** have committed fraud … by giving false information … regarding related party transactions." (Compl. P 119.) But the plaintiffs do not provide any specific examples of such information provided by Avendra to In Town Hotels. This would leave Avendra without knowledge of what information, if any, that it provided to In Town Hotels the plaintiffs believe to be false. The other allegations of affirmative misrepresentations fare no better. These

---

[13] In its memorandum in support of its motion to dismiss, Avendra initially states that the plaintiffs must comply with *Rule 9(b)* in their claims for "fraud, violations of the West Virginia Unfair Practices Act, and breaches of fiduciary duties …." (Avendra Memo. at 4.) At the conclusion of this argument, however, Avendra states that "because all of the claims against Avendra allege intentional, fraudulent conduct, Plaintiff's failure to satisfy *Rule 9(b)* mandates reversal." *2002 U.S. Dist. LEXIS 439*, [WL] at 6. It is thus unclear which counts Avendra believes must satisfy *Rule 9(b)*. To the extent that Avendra implies that all of the claims must do so, it is incorrect. For example, a claim for commercial bribery under *section 2(c)* of the Robinson-Patman contains no fraud element and therefore need not be plead with particularity. The court will limit its discussion of *Rule 9(b)* to the three counts specifically identified by Avendra: fraud, WVUPA violations, and breach of fiduciary duty.

allegations of affirmative misrepresentations by Avendra to In Town Hotels lack the specificity necessary to provide Avendra with "the particular circumstances for which [it] will have to prepare a defense at trial," *Harrison, 176 F.3d at 784*, and are stated with insufficient particularity to meet the requirements of *Rule 9(b)*.

As for the allegations of material omissions, the plaintiffs correctly point out that ***HN20***[] when the allegation of fraud relates to an omission rather than an affirmative misrepresentation, less particularity is required. *See, e.g., Shaw v. Brown & Williamson Tobacco Corp., 973 F. Supp. 539, 552 (D. Md. 1997)*. As to the allegations of omission, however, the plaintiffs' claim depends necessarily **[**47]** on the existence of some legal duty on the part of Avendra to In Town Hotels to share the undisclosed information. In their complaint, the plaintiffs allege that "pursuant to section 11.03 [of the Management Agreement] … Marriot *and its affiliates and/ or related parties* agreed that they would not profit from the provision of Chain Services." (Compl. P 56) (emphasis added). To the extent that this allegation suggests that Avendra (or any other Marriott affiliates) agreed in the Management Agreement not to profit from the provision of Chain Services, that allegation is flatly contradicted by the terms of the Management Agreement itself. [14] **[**48]** Looking at the Management Agreement, it is clear that the agreement is between only In Town Hotels and Marriott. Avendra was not a party to and is not bound by that Agreement. The plaintiffs cannot claim that Avendra owes In Town Hotels any contractual duties as a result. [15]

Finally, the plaintiffs allege fraud based on Avendra's obtaining and retaining undisclosed payments related to purchasing activities. The court is unsure how this allegation fits in any way within ***HN22***[] the elements of common law fraud, which, generally speaking, are: "'(1) that the act claimed to be fraudulent was the act of the defendant or induced by him; (2) that it was material and false; that plaintiff relied **[*488]** upon it and was justified under the circumstances in relying upon it; and (3) that he was damaged because he relied upon it.'" *Legg v. Johnson, Simmerman & Broughton, L.C., 576 S.E.2d 532, 2002 W. Va. LEXIS 217*, No. 30591, 2002 WL 31730862 (W. Va. Dec. 3, 2002) (quoting *Horton v. Tyree, 104 W. Va. 238, 139 S.E. 737, 738 (W. Va. 1927))*. Avendra's receipt of payments itself does not constitute fraud, as no representation (false or otherwise) is involved.

In sum, the plaintiffs have failed to plead fraud with particularity as required by *Rule 9(b)*, warranting the dismissal of Count VI **[**49]** (fraud). The plaintiffs' other claims are not necessarily fraud-based and thus need not be plead with particularity. Finally, the contract does not unambiguously authorize the conduct alleged here. Accordingly, Avendra is not entitled to dismissal of any of the remaining claims at this time.

IV. Conclusion

For the foregoing reasons, the court concludes that the plaintiffs have adequately alleged antitrust injury for their claim under *section 2(c)* of the Robinson-Patman Act and have adequately alleged the elements of a violation of the West Virginia Unfair Practices Act. In addition, Avedra's arguments for dismissal of the claims against it are without merit, with the exception that the plaintiffs' fraud claim against Avendra is not plead with particularity as required by *Rule 9(b)*. Accordingly, the court **DENIES** Marriott's motion to dismiss Counts IV and **XIV, GRANTS** Avendra's motion to dismiss as to Count VI (fraud) and **DENIES** that motion as to all other counts.

The court **DIRECTS** the Clerk to send a copy of this Order to counsel of record and any unrepresented party, and **DIRECTS** the Clerk to post this published opinion at http://www.wvsd. **[**50]** uscourts.gov.

ENTER: February 25, 2003

JOSEPH R. GOODWIN

---

[14] ***HN21***[] When, as here, the plaintiff relies on a contract in its complaint, and indeed includes a copy of that contract as an attachment to the complaint, "it [is] proper for the district court to consider if in ruling on [a] motion to dismiss." *Darcangelo v. Verizon Comms., Inc., 292 F.3d 181, 195 (4th Cir. 2002)*.

[15] Indeed, Avendra was not created until years after the Agreement was signed.

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion for judgment on the pleadings pursuant to *Fed. R. Civ. P. 12(c)* is governed by the same standards as a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss for failure to state a claim upon which relief can be granted. A court will dismiss a cause of action for failure to state a claim only when it appears beyond a doubt that a plaintiff can prove no set of facts in support of the theory of recovery that would entitle him or her to relief, or when an issue of law is dispositive. a court accepts as true all well-pleaded factual allegations in a complaint, as distinguished from conclusory allegations, and all reasonable inferences from those facts are viewed in favor of a plaintiff. The issue in resolving a motion such as this is not whether a plaintiff will ultimately prevail, but whether he or she is entitled to offer evidence to support the claims.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Forum & Place

HN2[] **Federal & State Interrelationships, Erie Doctrine**

A federal court sitting in diversity must apply the substantive law of the forum state. Accordingly, in a diversity action presenting issues of Kansas statutory law, a federal court's role is to apply Kansas state law as it exists, or if state law is silent, rule as it believes the state supreme court would rule. Where no state cases exist on a point, the federal court must turn to other state court decisions, federal decisions, and the general weight and trend of authority for guidance.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN5[] **Purchasers, Indirect Purchasers**

Where a state supreme court has not addressed a question before a federal district court the district court must determine what decision the state court would make if faced with the same facts and issue by considering state court decisions, decisions of other states, federal decisions, and the general weight and trend of authority.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN6[] **Private Actions, Standing**

A court has held that indirect purchasers have "standing" to sue for full consideration of a product purchased that is artificially increased in price due to unlawful antitrust activity.

Governments > Legislation > Interpretation

HN7[] Legislation, Interpretation

When construing a statute, the fundamental rule is that the intent of the legislature governs. In determining legislative intent, courts may consider the background of the enactment, the circumstances attending its passage, and the effect the statute may have under the suggested constructions.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Business & Corporate Compliance > ... > Types of Damages > Consequential Damages > Actions for Price

Business & Corporate Compliance > ... > Sales of Goods > Remedies > General Overview

Business & Corporate Compliance > ... > Remedies > Buyer's Damages & Remedies > General Overview

HN8[] Private Actions, Remedies

Kan. Stat. Ann. § 50-115 specifically contemplates full consideration recovery for indirect purchasers when it specifies that any person injured or damaged may sue for and recover the full consideration or sum paid by such person for any goods, wares, merchandise and articles included in or advanced or controlled in price by such combination. Arguably, under the plain language of the statute, when a product is advanced in price by an unlawful combination, a person damaged by the unlawful combination may recover the full consideration paid for the product.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN9[] Private Actions, Purchasers

It is clear from the plain language of *Kan. Stat. Ann. § 50-161(b)* that indirect purchasers are eligible for treble damages. Significant to a court, no distinction is made between the "person" allowed to recover treble damages under *§ 50-161(b)* and the "person" allowed to recover full consideration damages under *Kan. Stat. Ann. § 50-115*. The only distinction made between eligible persons in the statute is the addition of the state as an additional "person" eligible for recovery under *§ 50-161(b)*.

Governments > Legislation > Interpretation

HN10[] Legislation, Interpretation

It is a venerable principle that a law will not be interpreted to produce absurd results, and Kansas courts have recognized that statutes should be construed to avoid unreasonable results.

Constitutional Law > Substantive Due Process > Scope

HN11[] **Constitutional Law, Substantive Due Process**

State law damages provisions are unconstitutional when in their actual operation such statutes work an arbitrary, unequal, and oppressive result which shocks the sense of fairness the *Fourteenth Amendment* was intended to satisfy in respect of state legislation.

Constitutional Law > Substantive Due Process > Scope

Governments > Legislation > Interpretation

HN12[] **Constitutional Law, Substantive Due Process**

One of the cardinal rules governing federal courts is never anticipate a question of constitutional law in advance of necessity of deciding it. Moreover, with respect to federal statutes, the United States Supreme Court has noted that the delicate power of pronouncing an Act of Congress unconstitutional is not to be exercised with reference to hypothetical cases thus imagined.

Constitutional Law > Substantive Due Process > Scope

Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution

Governments > Legislation > Interpretation

HN13[] **Constitutional Law, Substantive Due Process**

A party questioning a statute bears the burden of proof to establish its unconstitutionality.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN14[] **Statute of Limitations, Time Limitations**

A claim which arises from a statute does not automatically constitute a "penalty" or "forfeiture" so as to trigger a one-year statute of limitations period, even if a plaintiff is entitled to recover more than his actual damages.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN15[] **Statute of Limitations, Time Limitations**

Determination of whether *Kan. Stat. Ann. § 60-514*'s one year limitation period applies to an action requires an examination of the nature of the right which has been injured, rather than the remedy therefor.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN16[] **Regulated Practices, Private Actions**

The Kansas Supreme Court has indicated that an action based upon a claimed violation of the anti-trust laws of Kansas, *Kan. Stat. Ann. § 50-101, et seq*, is governed by the three year limitations period set out in *Kan. Stat. Ann. § 60-512*, as an action upon a liability created by statute.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN17[] **Statute of Limitations, Time Limitations**

Similar to *Kan. Stat. Ann. § 60-512*, *Kan. Stat. Ann. § 60-306* sets a three-year limitations period for an action upon a liability created by statute, other than a forfeiture or penalty.

Governments > Legislation > Effect & Operation > General Overview

Governments > Legislation > Interpretation

HN18[] **Legislation, Effect & Operation**

As set out by Kansas courts, the appropriate inquiry to determine whether a liability is created by a statute (thus making *Kan. Stat. Ann. § 60-512(2)* applicable) is whether liability for resultant damages would not arise but for the statute. A statute that merely provides a procedure for obtaining relief does not trigger *Kan. Stat. Ann. § 60-512(2)*; it must provide a new substantive right that does not otherwise exist at common law.

Opinion

[*1149] **MEMORANDUM AND ORDER**

This purported class action arises out of an alleged international conspiracy to fix the prices of sorbates, including potassium sorbate and sorbic acid, which are chemical preservatives used in food products. Plaintiffs are "indirect purchasers" of sorbates, who allegedly purchased **[**3]** products containing sorbates that were manufactured and sold by defendants. Plaintiffs allege that defendants engaged in the manufacture and sale of sorbates throughout the world and specifically in Kansas. Plaintiffs further allege that defendants' conspiracy to control the prices of sorbates affected over $ 1 billion in U.S. commerce and that they sustained damages due to defendants' actions. Plaintiffs contend that defendants' actions in fixing the prices of sorbates were in violation of Kansas ***antitrust law***, *Kan. Stat. Ann. § 50-101, et seq.* Pending before the court is defendants Daicel Chemical Industries, Ltd., Daicel (U.S.A.), Inc., The Nippon Synthetic Chemical Industry Co., Ltd., a/k/a Nippon Gohsei, Hoechst Aktiengesellschaft, a/k/a Hoechst AG, CNA Holdings f/k/a HNA Holdings, Inc. and Hoecsht Celanese, Nutrinova Nutrition Specialties & Food Ingredients GmbH, Nutrinova, Inc. and Eastman Chemical Company's Motion for Judgment on the Pleadings Pursuant to *Fed. R. Civ. P. 12(c)*. (Doc. 103). [1] All moving defendants (referenced collectively herein as "defendants") move the court to grant judgment in their favor on each of plaintiffs' claims. As set forth herein, defendants' **[**4]** motion is denied.

. Judgment on the Pleadings Standard

HN1[] A motion for judgment on the pleadings pursuant to

Fed. R. Civ. P. 12(c) is governed by the same standards as a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss for failure to state a claim upon which relief can be granted. *See* *Mock v. T.G. & Y. Stores Co., 971 F.2d 522, 528 (10th Cir. 1992)*. The court will dismiss a cause of action for failure to state a claim only when it appears beyond a doubt that the plaintiff can prove no set of facts in support of the theory of recovery that would entitle him or her to relief, *see* *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*; *Maher v. Durango Metals, Inc., 144 F.3d 1302, 1304 (10th Cir. 1998)*, **[**5]** or when an issue of law is dispositive. *See* *Neitzke v. Williams, 490 U.S. 319, 326, 104 L. Ed. 2d 338, 109 S. Ct. 1827 (1989)*. The court accepts as true all well-pleaded factual allegations in the complaint, as distinguished from conclusory allegations, *see* *Maher, 144 F.3d at 1304*, and all reasonable inferences from those facts are viewed in favor of the plaintiff. *See* *Witt v. Roadway Express, 136 F.3d 1424, 1428*

---

[1] Although defendant Ueno Fine Chemicals Industry, Ltd. and defendant Chisso Corporation joined in the pending motion (Docs. 113 & 114), on January 8, 2003, the court dismissed these defendants from the lawsuit for lack of personal jurisdiction.

(10th Cir. 1998). The issue in resolving a motion such as this is not whether the plaintiff will **[*1150]** ultimately prevail, but whether he or she is entitled to offer evidence to support the claims. *See* Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974), *overruled on other grounds,* Davis v. Scherer, 468 U.S. 183, 82 L. Ed. 2d 139, 104 S. Ct. 3012 (1984).

. Discussion

Plaintiffs allege defendants violated provisions of the Kansas Restraint of Trade Act (the Kansas Act or Act) by engaging in price fixing of sorbates. Plaintiffs further allege that defendants' actions caused plaintiffs to incur damages. Defendants seek judgment on the pleadings on each of **[**6]** plaintiffs' claims. In support, defendants argue that plaintiffs' theory of recovery contradicts the plain language of Kansas ***antitrust law***, that plaintiffs' suggested application of Kansas ***antitrust law*** would render it unconstitutional, and that plaintiffs' claims are untimely under the applicable statute of limitations period. As set forth below, defendants' motion is denied.

Whether Theory of Recovery Contradicts Kansas Antitrust LawDefendants first contend that the monetary remedy sought by plaintiffs is not authorized by Kansas ***antitrust law***. Specifically, defendants assert that plaintiffs, as indirect purchasers of sorbates, "do not have standing" to pursue the full consideration remedy set out in Kan. Stat. Ann. § 50-115. (Defs.' Mem. at 6). In addition, defendants contend that the Kansas legislature could not have intended the result of allowing plaintiffs here to recover both under the full consideration provision and the treble damages provision of the Kansas Act.

HN2[] A federal court sitting in diversity must apply the substantive law of the forum state. Commerce Bank, N.A. v. Chrysler Realty Corp., 244 F.3d 777, 780 (10th Cir. 2001). **[**7]** Accordingly, in this diversity action presenting issues of Kansas statutory law, this court's role is to apply Kansas state law as it exists, or if state law is silent, rule as it believes the state supreme court would rule. Coletti v. Cudd Pressure Control, 165 F.3d 767, 775 (10th Cir. 1999). Where "no state cases exist on a point," the federal court must "turn to other 'state court decisions, federal decisions, and the general weight and trend of authority'" for guidance. Barnard v. Fireman's Fund Ins. Co., 996 F.2d 246, 248 (10th Cir. 1993) (quoting Armijo v. Ex Cam, Inc., 843 F.2d 406, 407 (10th Cir. 1988)).

As relevant here, ***HN3***[] the Kansas Act provides for two remedies--the full consideration paid and treble the damages sustained. Specifically, with respect to violations of sections 112and 113 of the Act, which declare unlawful trusts, combinations and agreements in restraint of trade and free competition, the Act provides that: any person injured or damaged by any such arrangement, contract, agreement, trust or combination, described inK.S.A. 50-112 and 50-113, and amendments thereto, may sue for and recover in any court **[**8]** of competent jurisdiction in this state, of any person, the full consideration or sum paid by such person for any goods, wares, merchandise and articles included in or advanced or controlled in price by such combination, or the full amount of money borrowed.

Kan. Stat. Ann. § 50-115 (Supp. 2000) (emphasis added). In addition, ***HN4***[] with respect to violations of any provision of the Kansas Act, the Act provides, as an "alternative and in addition to any other remedies now provided by law," that: any person who may be damaged or injured by any agreement, monopoly, trust, conspiracy or combination which is declared unlawful by any of the acts contained in chapter 50 of the Kansas Statutes Annotated, relating to unlawful acts, agreements, monopolies, trusts, **[*1151]** conspiracies or combinations in restraint of trade, shall have a cause of action against any person causing such damage or injury. Such action may be brought by any person who is injured in such person's business or property by reason of anything forbidden or declared unlawful by this act, regardless of whether such injured person dealt directly or indirectly with the defendant. The plaintiff in any action commenced hereunder **[**9]** in the district court of the county wherein such plaintiff resides, or the district court of the county of the defendant's principal place of business, may sue for and recover treble the damages sustained.

Id. § 161(b)&(c) (emphasis added).

The Supreme Court of Kansas has not addressed the question presented to this court, i.e., whether the full consideration remedy provided for in § 50-115 is available to indirect purchasers such as plaintiffs in this action. Stated another way, the issue presented is whether plaintiffs, as indirect purchasers, have "standing" in this antitrust case to pursue full consideration damages. [2] Accordingly, **HN5**[] this court "must determine what decision the state court would make if faced with the same facts and issue . . . [by] considering state court decisions, decisions of other states, federal decisions, and the general weight and trend of authority." Armijo, 843 F.2d at 407 (internal citations omitted).

[10]** Significant here, although the highest court in Kansas has not examined the issue presented, one lower court has issued an unpublished journal entry opinion that is arguably on point. In *Smith v. Philip Morris Companies*, the District Court of Seward County, Kansas examined whether indirect purchasers were eligible for full consideration damages under the Kansas Act. Examining arguments similar to those raised by defendants here, the *Smith* court found that indirect purchasers are eligible to receive full consideration damages under § 50-115. The *Smith* court first recognized that the Kansas legislature amended the Kansas Act in 1985 to reflect the State's intent to allow indirect purchaser actions despite the Supreme Court's finding in 1977 that such actions were disallowed under the federal antitrust statutes. Next, the *Smith* court recognized that although the 1985 amendments placed a specific reference to indirect purchasers only in the treble damages provision of the Kansas Act (§ 50-161(b)), [3] this did not reflect the Kansas legislature's intent to preclude an indirect purchaser's recovery of full consideration damages under § 50-115 of the Act. Interpreting **[**11]** the **Kansas Act**, the *Smith* court found that the Kansas legislature "recognized its statute of K.S.A. 50-115 as being fully sufficient for an indirect purchaser to sue for the full consideration of the product." Accordingly, **HN6**[] the *Smith* court held that indirect purchasers have "standing" to sue for full consideration of a product purchased that is artificially increased in price due to unlawful antitrust activity. Defendants assert that the *Smith* decision is not dispositive here because the factual direct purchaser scenario presented in *Smith* is separate and distinct from the factual direct **[*1152]** purchaser situation presented here. The court acknowledges that the *Smith* case may involve a different factual situation, but finds the difference does not detract from the *Smith* court's reasoning and persuasiveness in this case.

[12]**

This court must now determine whether the Kansas Supreme Court would adopt the finding and reasoning of the *Smith* court. **HN7**[] When construing a statute, the fundamental rule is that the intent of the legislature governs. City of Wichita v. 200 S. Broadway Ltd. P'ship, 253 Kan. 434, 436, 855 P.2d 956, 958 (1993). "In determining legislative intent, courts may consider the background of the enactment, the circumstances attending its passage, and the effect the statute may have under the suggested constructions." Lee v. Boeing Co.-Wichita, 21 Kan. App. 2d 365, 368, 899 P.2d 516, 518 (1995) (citing West v. Collins, 251 Kan. 657, 840 P.2d 435, Syl. P 4 (1992)).

Defendants argue that the plain language of § 50-115 makes clear that full consideration damages are not available to plaintiffs because plaintiffs did not purchase "any goods, wares, merchandise and articles included in or advanced or controlled in price by" defendants' alleged antitrust behavior. (Defs.' Mem. at 6). Instead, defendants argue that plaintiffs purchased products that contained defendants' sorbates and that these indirect purchases **[**13]** preclude recovery under § 50-115. The court disagrees that, on its face, § 50-115's statutory language should be so narrowly construed. Section 50-115 **HN8**[] specifically contemplates full consideration recovery for indirect purchasers when it specifies that "any person injured or damaged . . . may sue for and recover . . . the full consideration or sum paid by such person for any goods, wares, merchandise and articles included in or advanced

[2] *See generally* Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540, (1982) (examining the concept of "standing" in the antitrust context); Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 535 n.31, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983) (noting "the focus of the doctrine of 'antitrust standing' is somewhat different from that of standing as a constitutional doctrine).

[3] Although the *Smith* court cites the treble damages provision as § 50-801, an examination of the historical statutes of Kansas shows that § 50-801 is a predecessor of § 50-161.

or controlled in price by such combination." *Kan. Stat. Ann. § 50-115* (emphasis added). Arguably, under the plain language of the statute, when a product is "advanced . . . in price" by an unlawful combination, a person damaged by the unlawful combination may recover the full consideration paid for the product.

In addition, ***HN9***[] it is clear from the plain language of *§ 50-161(b)* that indirect purchasers are eligible for treble damages. Significant to the court, no distinction is made between the "person" allowed to recover treble damages under *§ 50-161(b)* and the "person" allowed to recover full consideration damages under *§ 50-115*. *Kan. Stat. Ann. §§ 50-115& 50-161(b)*. The only distinction made between eligible persons in the *Kansas Act* **[**14]** is the addition of the state as an additional "person" eligible for recovery under *§ 50-161(b)*. *Id.* Therefore, based on these considerations and in light of the Kansas Supreme Court's reference that the *Kansas Act* provides for "broad remedies," the court finds the plain language of *§ 50-115* allows for the full consideration damages sought by plaintiffs. *See* *Bergstrom v. Noah, 266 Kan. 847, 879, 974 P.2d 531, 556 (1999)*.

Defendants next argue that if plaintiffs here were allowed full consideration damages, an "absurd result" would be produced. (Defs.' Mem. at 7). Plaintiffs assert in their Complaint that the purchase of food products containing sorbates during the relevant period in Kansas amounted to over $ 100 million. (Compl. at P 4). Plaintiffs seek entitlement to this sum under the full consideration provision of the *Kansas Act and* entitlement to treble the full consideration amount under the treble damages provision of the Act. It is this potential "$ 450 million" award that defendants contend would be an absurd result under plaintiffs' reading of the *Kansas Act*'s damages provisions. (Defs.' Mem. at 7).

[*1153] In support of this argument, **[**15]** defendants contend that the appropriate estimation of the dollar value of the sorbates contained in the food products purchased by plaintiffs should be determined by reference to the settlement amount--approximately $ 50,000--agreed to by sorbate manufacturers and indirect purchasers in the *Williams* class action, a class action from which plaintiffs in this lawsuit opted out. [4] **[**17]** Defendants appear to contend that when using this "actual" value of the sorbates indirectly purchased by plaintiffs, allowing plaintiffs to recover the full consideration paid for the products--as plead, an amount in excess of $ 100 million--would produce absurd results. However, without specific information about the amount and value of the sorbates contained in the products at issue, or access to the reasoning of the parties in reaching the settlement amount, this court is unwilling to rely on the parties' determination as to the proper value of the sorbates purchased by the plaintiffs here who opted out of the *Williams* class. [5] Accordingly, the court finds that without evidence of the percentage of overcharge created by the inclusion of defendants' price fixed sorbates in the products purchased **[**16]** by plaintiffs, the court cannot assume that an "absurd result" would result from the allowance of full consideration and treble damages to plaintiffs here. Therefore, although ***HN10***[] "it is a venerable principle that a law will not be interpreted to produce absurd results," *K Mart Corp. v. Cartier, Inc., 486 U.S. 281, 325 n.2, 100 L. Ed. 2d 313, 108 S. Ct. 1811 (1988)*, and the Kansas courts have recognized that "statutes should be construed to avoid unreasonable results," *Wells v. Anderson, 8 Kan. App. 2d 431, 433, 659 P.2d 833, 835 (1983)*, given the record before it at this stage of the proceeding, the court cannot determine that plaintiffs' suggested interpretation of the *Kansas Act*'s damages provision would produce absurd or unreasonable results.

---

[4] The *Williams* action refers to *Williams Foods, Inc. v. Eastman Chemical Co.*, Case No. 99C 16680, brought on behalf of Williams Foods, Inc. and similar individuals and entities that indirectly purchased sorbates in the State of Kansas from certain named defendants from January 1, 1979, through December 31, 1996. The state court approved a settlement in *Williams* on July 25, 2001.

[5] The court recognizes that the Kansas District Court in Johnson County, Kansas gave final approval to the *Williams* settlement and noted that "based on the difficulty in calculating class-wide damages for end consumers and business entities who purchased products containing sorbates solely for resale (such as grocery stores and restaurants)," and "considering the hundreds of grocery stores who have not chosen to opt-out or file objections" to this amount, and based on the facts presented to support the award, that the *cy pres* award of $ 50,000 agreed to by the parties was reasonable. However, this court must base its decision on the record before it on this Motion for Judgment on the Pleadings.

Accordingly, considering the Kansas state court decision in *Smith*, the plain language of *§ 50-115*, and considering the sparse record at this stage of the proceedings, the court finds, based on the record before it, that *§ 50-115 of the Kansas Act* allows for the full consideration damages sought by plaintiffs here. Defendants' motion is denied on this basis.

.Whether **[**18]** Proposed Application of ***Antitrust Law*** Renders it Unconstitutional

Defendants next contend that plaintiffs' proposed application of the remedial provisions of the *Kansas Act* would render it unconstitutional. Specifically, defendants contend that allowing the indirect purchaser plaintiffs to recover full consideration damages would produce an unconstitutional disproportionate recovery in violation of the *Fourteenth Amendment. See* *Chicago & N.W. Ry. Co. v. Nye-Schneider-Fowler Co., 260 U.S. 35, 44-45, 67 L. Ed. 115, 43 S. Ct. 55 (1922)* (finding ***HN11***[] state law damages provisions are unconstitutional "when **[*1154]** in their actual operation . . . such statutes work an arbitrary, unequal, and oppressive result . . . which shocks the sense of fairness the *Fourteenth Amendment* was intended to satisfy in respect of state legislation . . . ."). Defendants contend that allowing the indirect purchaser plaintiffs here to recover full consideration would produce absurd results not only in the circumstances of this case, but also in other economic situations.

The court finds that this issue is prematurely raised, as there has been no finding of actual damages to plaintiffs from which a constitutional **[**19]** proportionality analysis can be made. As noted above, the court is unwilling to assume that the *Williams* settlement amount is the proper valuation of plaintiffs' claims. Therefore, the court cannot say that the overcharge created by defendants' allegedly unlawful antitrust behavior is disproportionate to the full consideration amount of over $ 100 million that plaintiffs allege was paid for the products containing the sorbates. That is, given the record before it, the court cannot say that there would be a disproportionate recovery that would "shock[] the sense of fairness" under the *Fourteenth Amendment.* *Chicago & Northwestern Ry. Co., 260 U.S. at 44-45*.

HN12[] One of the cardinal rules governing federal courts is "never anticipate [a] question of constitutional law in advance of necessity of deciding it." *Brockett v. Spokane Arcades, Inc., 472 U.S. 491, 501, 86 L. Ed. 2d 394, 105 S. Ct. 2794 (1985)* (internal quotations omitted). Moreover, with respect to federal statutes, the Supreme Court has noted that "the delicate power of pronouncing an Act of Congress unconstitutional is not to be exercised with reference to hypothetical cases thus **[**20]** imagined." *United States v. Raines, 362 U.S. 17, 22, 4 L. Ed. 2d 524, 80 S. Ct. 519 (1960)*.

Therefore, keeping in mind that a statute is presumed constitutional, the court finds that at this stage of the proceeding, defendants have not met their burden to establish the unconstitutionality of the*Kansas Act*. *State v. Perez, 269 Kan. 340, 342, 11 P.3d 52, 54 (2000)* (noting ***HN13***[] the party questioning the statute bears the burden of proof to establish its unconstitutionality). Defendants' motion on this basis is denied at this time.

. Applicable Statute of Limitations

Finally, defendants contend that the one-year statute of limitations set forth in *Kan. Stat. Ann. § 60-514(c)* applies to each of plaintiffs' claims. Defendants further contend that the limitations period began to accrue, at the latest, on September 30, 1998--the date defendant Eastman agreed to enter a guilty plea on sorbates price fixing charges brought by the U.S. Department of Justice. Therefore, defendants assert plaintiffs' antitrust claims related to sorbates price fixing are untimely filed. In response, plaintiffs contend that it is the three-year limitations **[**21]** period set forth in *Kan. Stat. Ann. § 60-512(2)* that governs their claims. Accordingly, plaintiffs contend their action has been timely filed. As set forth below, the court finds plaintiffs' antitrust claims were timely filed.

. *Section 60-514(c)* Not Applicable

Plaintiffs' Complaint asserts that defendants' actions in fixing the prices of sorbates were in violation of Kansas ***antitrust law***, *Kan. Stat. Ann. § 50-101, et seq.* Kansas state law governs the statute of limitations applicable to plaintiffs' state statutory claims in this diversity action. Defendants contend that *§ 60-514(c)*'s one year limitation period applies because plaintiffs seek treble damages, in excess of their actual damages and, therefore, plaintiffs' claims are claims "upon statutory penalty or forfeiture." *Kan. Stat. Ann. § 60-514(c)*. The court disagrees.

HN14[] A claim which arises from a statute does not automatically constitute a "penalty" or **[*1155]** "forfeiture" so as to trigger a one-year statute of limitations period, even if a plaintiff is entitled to recover more than his actual damages. *See* *Alexander v. Certified Master Builders Corp., 268 Kan. 812, 820, 1 P.3d 899, 905-06 (2000)* **[**22]** (finding one year limitation period under *§ 60-514(c)* inapplicable to statutory *Kansas Consumer Protection Act* claim, even where plaintiff sought to recover both actual damages and civil penalties).

HN15[] Determination of whether *§ 60-514*'s one year limitation period applies to an action requires an examination of the "*nature* of the right which has been injured," rather than "the *remedy* therefor." *Haag v. Dry Basement, Inc., 11 Kan. App. 2d 649, 651, 732 P.2d 392, 394 (1987)* (citing *Holley v. Coggin Pontiac, Inc., 43 N.C. App. 229, 259 S.E.2d 1, 6-7 (N.C. App. 1979)* (noting that although state antitrust legislation had punitive elements, it was not considered a penal statute where it had "multiple objectives of which some are not penal in nature" and claims raised addressed individual, rather than public, harms)). "To let the limitations be determined by the remedy would be to have the tail wag the dog." *Id.*

Here, the plaintiffs' action seeks to recover upon an antitrust liability created by the *Kansas Restraint of Trade Act*. Although the remedial statutory scheme in that Act provides for recovery of treble damages, the **[**23]** court must focus on the nature of the right alleged-- the right to be free from antitrust behavior-- rather than the remedy sought--treble damages. Here, considering the guidance of the Kansas courts, this court finds that plaintiffs' statutory antitrust claims are not claims "upon statutory penalty or forfeiture." Therefore, *§ 60-514(c)*'s limitation period is not applicable to plaintiffs' claims. Defendants' motion is denied on this basis.

o Section *§ 60-512(2)* Applicable

Significantly, the highest court in Kansas has addressed the limitations period applicable to antitrust claims brought under its state antitrust statute. In *McCue v. Franklin*, ***HN16***[] the Kansas Supreme Court indicated that an action "based upon a claimed violation of the anti-trust laws of Kansas, . . . *[§] 50-101, et seq*," is governed by the three year limitations period set out in *Kan. Stat. Ann. § 60-512*, [6] as an "action[] upon a liability created by statute." *156 Kan. 1, 7, 131 P.2d 704, 707-08 (1942)*.

[24]** ***HN18***[] As set out by Kansas courts, the "appropriate inquiry to determine whether a liability is created by a statute (thus making *K.S.A. 60-512[2]* applicable) is whether liability for resultant damages would not arise but for the statute." *Haag, 11 Kan. App. 2d at 650, 732 P.2d at 393*. A statute "that merely provides a procedure for

---

[6] At the time *McCue* was decided, a predecessor provision of *§ 60-512* was in effect. The statutory provision referenced in *McCue*--*Kan. Stat. Ann. § 60-306--is* identical in relevant part to *Kan. Stat. Ann. § 60-512*. ***HN17***[] Similar to *§ 60-512*, *§ 60-306* set a three-year limitations period for "an action upon a liability created by statute, other than a forfeiture or penalty." *See* Notes to *Kan. Stat. Ann. § 60-512(2)*; *Bd. of Comm'rs of Montgomery County v. McKittrick, 141 Kan. 283, 285-86, 40 P.2d 352, 354 (Kan. 1935)* (citing *Kan. Stat. Ann. § 60-306*).

obtaining relief does not trigger *K.S.A. 60-512(2)*; it must provide a new substantive right that does not otherwise exist at common law." *Wright v. Kan. Water Office, 255 Kan. 990, 996, 881 P.2d 567, 572 (1994)*.

Here, the basis for plaintiffs' claims rest on provisions of the *Kansas Restraint of Trade Act, § 50-101, et seq.* There is no indication that plaintiffs' claims alleging liability for antitrust behavior under Kansas law would arise outside the provisions of the Kansas statute. Accordingly, the **[*1156]** court finds that liability for the antitrust behavior alleged here arises out of the Kansas antitrust statute, rather than state common law.

Accordingly, considering the ruling in *McCue* and the statutory basis for the antitrust liability alleged by plaintiffs, the court finds the applicable statute **[**25]** of limitations is three years, as set out in *§ 60-512(2)*.

. Application of *§ 60-512(2)* Three Year Limitation Period

Defendants contend that the discovery rule applies to determine the date on which plaintiffs' antitrust claims began to accrue. Specifically, defendants assert that the statute of limitations "began to run, at the latest, when Plaintiffs acquired constructive knowledge of the facts underlying the misconduct Plaintiffs now allege - i.e., 'when, through reasonable diligence, [they] could have learned of the acts or conduct giving rise to [their] injuries.'" (Defs.' Reply at 12 (citing *In re Vitamins Antitrust Litig., 2000 U.S. Dist. LEXIS 11351, No. Misc. 99-197, 2000 WL 1524912, at *5 (D.D.C. July 14, 2000)* (examining limitations period applicable to Kansas antitrust claim)).

Even if the court were to find that plaintiffs' claims began to accrue on the date asserted by defendants--no later than September 30, 1998-- the court finds that plaintiffs' claims were timely filed. Plaintiffs filed their claims herein in Kansas state court on July 9, 2001--well within the three-year limitation period. Therefore, upon application of *§ 60-512(2)*'s three-year **[**26]** limitation period, the court finds that plaintiffs' claims were timely filed. Defendants' motion is denied on this basis.

. Order

IT IS THEREFORE ORDERED that defendants' Motion for Judgment on the Pleadings Pursuant to *Fed. R. Civ. P. 12(c)* (Doc. 103) is hereby denied.

IT IS SO ORDERED. Dated this 26th day of February 2003, at Kansas City, Kansas.

CARLOS MURGUIA

United States District Judge
