Nutrition Distrib., LLC v. S. Sarms, Inc.

Court of Appeal of California, Second Appellate District, Division Seven

November 28, 2017, Opinion Filed

B278132

Reporter

2017 Cal. App. Unpub. LEXIS 8173 *; 2017 WL 5712760

NUTRITION DISTRIBUTION, LLC, Plaintiff and Appellant, v. SOUTHERN SARMS, INC., Defendant and Respondent.

Notice: NOT TO BE PUBLISHED IN OFFICIAL REPORTS. *CALIFORNIA RULES OF COURT, RULE 8.1115(a)*, PROHIBITS COURTS AND PARTIES FROM CITING OR RELYING ON OPINIONS NOT CERTIFIED FOR PUBLICATION OR ORDERED PUBLISHED, EXCEPT AS SPECIFIED BY *RULE 8.1115(b)*. THIS OPINION HAS NOT BEEN CERTIFIED FOR PUBLICATION OR ORDERED PUBLISHED FOR THE PURPOSES OF *RULE 8.1115*.

Prior History: [*1] APPEAL from a judgment of the Superior Court of Los Angeles County, No. BC616482, Michael L. Stern, Judge.

Disposition: Affirmed in part and dismissed in part.

Core Terms

Nutrition, preliminary injunction, restitution, disgorgement, demurrer, unfair, false advertising, misleading, trial court, injunctive relief, advertising, profits, unfair competition, cause of action, leave to amend, damages, first amended complaint, fluid recovery, marketing, modulators, consumers, androgen, receptor, class action, restitutionary, violations, practices, products, moot, deceptive

Counsel: Tauler Smith, Robert Tauler and Lisa Zepeda for Plaintiff and Appellant.

Lewis Brisbois Bisgaard & Smith, Arezoo Jamshidi, Daniel C. DeCarlo and Josephine Brosas for Defendant and Respondent.

Judges: PERLUSS, P. J.; ZELON, J., SEGAL, J. concurred.

Opinion by: PERLUSS, P. J.

Opinion

Nutrition Distribution, LLC, dba Athletic Xtreme, a manufacturer and marketer of nutritional supplements specifically for bodybuilders, sued Southern SARMs, Inc., a competing nutritional supplement company, for unfair competition (*Bus. & Prof. Code, § 17200 et seq.*)[1] and false advertising (*§ 17500 et seq.*), requesting injunctive relief and restitutionary disgorgement. Nutrition Distribution also moved for a preliminary injunction prohibiting Southern

[1] Statutory references are to the Business and Professions Code unless otherwise stated.

SARMs from manufacturing, marketing or selling any products containing the pharmaceutical ingredient Ostarine, a selective androgen receptor modulator. The trial court denied Nutrition Distribution's motion for a preliminary injunction, sustained without leave to amend Southern SARMs's demurrer to the first amended complaint and dismissed the action. We affirm the order of dismissal and dismiss the **[*2]** appeal from denial of the preliminary injunction as moot.

FACTUAL AND PROCEDURAL BACKGROUND

1. *Nutrition Distribution's First Amended Complaint*

On April 8, 2016 Nutrition Distribution filed a complaint, and on July 18, 2016 a first amended complaint,[2] against Southern SARMs for unfair competition and false advertising. Nutrition Distribution alleged Southern SARMs misbranded and unlawfully marketed its product (MK-2866) Ostarine, which contained as its active ingredient a selective androgen receptor modulator (SARM). According to Nutrition Distribution's pleading, "SARMs, like Defendant's Ostarine Product, are synthetic drugs with similar effects to illegal anabolic steroids."

Nutrition Distribution alleged, although Southern SARMs labeled its product as not intended to treat, cure or diagnose any condition or disease and not for human consumption, it simultaneously marketed the product on its website and otherwise as a new miracle dietary supplement to bodybuilders and other competitive athletes to enhance their physiques, promising, for example, lean mass increase and accelerated fat loss in an easy-to-dose oral form. According to Nutrition Distribution, Southern SARMs also misrepresented **[*3]** that its Ostarine product affords similar benefits to testosterone and other anabolic steroids without the negative side effects.

The first amended complaint asserted that medical experts have opined that products containing selective androgen receptor modulators have potential serious side effects including liver damage and increased risk for heart disease and that sale of those products is highly dangerous to public safety. In addition, selective androgen receptor modulators are specifically prohibited for use by participants in sporting events by the World Anti-Doping Agency (WADA) and the United States Anti-Doping Agency (USADA), facts that Southern SARMs did not disclose in its marketing materials.

Nutrition Distribution alleged it is a direct competitor of Southern SARMs in the nutritional supplement industry: In July 2009 Nutrition Distribution introduced "Advanced PCT," a natural product, for sale in the "muscle-gainer sub-market of the nutritional supplement world." However, as a result of Southern SARMs's misleading and deceptive marketing and sale of its Ostarine product, Southern SARMs caused Nutrition Distribution irreparable injury and wrongfully took Nutrition Distribution's **[*4]** profits and "the benefit of its creativity and investment of time, energy and money."

In its second cause of action for false and misleading advertising, Nutrition Distribution alleged that, by virtue of the conduct described in its pleading, Southern SARMs had disseminated advertising regarding its Ostarine product on its website and otherwise to the public and to consumers that it knew, or in the exercise of reasonable care should have known, was untrue and/or misleading and that was, in fact, likely to mislead or deceive a reasonable consumer. As a result, Nutrition Distribution suffered an ascertainable economic loss of money and reputational injury by the diversion of its business to Southern SARMs. In addition, Nutrition Distribution avers, Southern SARMs's conduct "is a black eye on the industry as a whole, and has the tendency to disparage [Nutrition Distribution's] products and goodwill."

Nutrition Distribution sought preliminary and permanent injunctive relief, prohibiting Southern SARMs from "producing, licensing, marketing, and selling its Ostarine Product, and any other product containing Ostarine and/or other Selective Androgen Receptor Modulators ('SARMs')." Nutrition **[*5]** Distribution also sought disgorgement of

---

[2] The first amended complaint was filed after the parties met and conferred to discuss Southern SARMs's contemplated motion to strike and demurrer to the original complaint.

all Southern SARMs's profits from its unlawful conduct and full restitution of all of Southern SARMs's "ill-gotten gains."

2. *Nutrition Distribution's Motion for a Preliminary Injunction*

One week after filing its first amended complaint Nutrition Distribution moved for a preliminary injunction to prohibit Southern SARMs from manufacturing, marketing and selling products containing Ostarine on its website. Southern SARMs opposed the motion, principally on the ground that the requested injunction, which would require a complete cessation of marketing and sales of Ostarine, was overbroad. Southern SARMs also argued that the federal Food and Drug Administration (FDA) had primary jurisdiction to determine whether Ostarine (or products containing selective androgen receptor modulators) was a "drug" or a "dietary supplement" and that such a determination was a condition precedent to any prohibition of the sale of Ostarine.

3. *Southern SARMs's Demurrer*

Prior to responding to Nutrition Distribution's motion for a preliminary injunction, Southern SARMs demurred to the first amended complaint, arguing Nutrition Distribution was not entitled to restitution **[*6]** or restitutionary disgorgement since it had failed to allege Southern SARMs had wrongfully acquired money or property in which Nutrition Distribution had a vested interest; rather, it was seeking standard tort damages, which are not recoverable in an action for unfair competition or false advertising. And, as in its subsequently filed opposition to the motion for a preliminary injunction, Southern SARMs asserted the injunctive relief sought by Nutrition Distribution was overly broad, seeking wholesale prohibition of marketing and sales of Ostarine rather than prohibiting the allegedly false or misleading advertising. In the absence of a right to the relief requested as a matter of law, Southern SARMs contended, Nutrition Distribution had failed to plead viable causes of action.[3]

4. *The Trial Court's Ruling*

After full briefing on Nutrition Distribution's motion and Southern SARMs's demurrer, the court heard oral argument on both matters on September 12, 2016.[4] The court denied the motion for a preliminary injunction and sustained Southern SARMs's demurrer without leave to amend.[5] A judgment of dismissal was entered on September 15, 2016.

DISCUSSION

1. *Standard of Review*

a. *Review of an order **[*7]** sustaining a demurrer*

A demurrer tests the legal sufficiency of the factual allegations in a complaint. We independently review the superior court's ruling on a demurrer and determine de novo whether the complaint alleges facts sufficient to state a cause of action or discloses a complete defense. (*Loeffler v. Target Corp. (2014) 58 Cal.4th 1081, 1100, 171 Cal. Rptr. 3d 189, 324 P.3d 50*; *Committee for Green Foothills v. Santa Clara County Bd. of Supervisors (2010) 48 Cal.4th 32, 42, 105 Cal. Rptr. 3d 181, 224 P.3d 920*.) We assume the truth of the properly pleaded factual allegations, facts that reasonably can be inferred from those expressly pleaded and matters of which judicial notice has been taken. (*Evans v. City of Berkeley (2006) 38 Cal.4th 1, 20, 40 Cal. Rptr. 3d 205, 129 P.3d 394*; *Schifando v. City of Los*

---

[3] Southern SARMs also filed a separate motion to strike those portions of the first amended complaint seeking restitution, including disgorgement of profits, and injunctive relief. Presenting the same arguments as contained in its demurrer, Southern SARMs argued those allegations constituted "irrelevant, false or improper matter inserted in any pleading" within the meaning of *Code of Civil Procedure section 436*.

[4] The record on appeal does not contain a reporter's transcript of the joint hearing on the motion for preliminary injunction and demurrer.

[5] In light of its order sustaining Southern SARMs's demurrer, the court deemed the motion to strike moot.

Angeles (2003) 31 Cal.4th 1074, 1081, 6 Cal. Rptr. 3d 457, 79 P.3d 569.) However, we are not required to accept the truth of the legal conclusions pleaded in the complaint. (Zelig v. County of Los Angeles (2002) 27 Cal.4th 1112, 1126, 119 Cal. Rptr. 2d 709, 45 P.3d 1171; Tepper v. Wilkins (2017) 10 Cal.App.5th 1198, 1203, 217 Cal. Rptr. 3d 111.) We liberally construe the pleading with a view to substantial justice between the parties. (Code Civ. Proc., § 452; Ivanoff v. Bank of America (2017) 9 Cal.App.5th 719, 726, 215 Cal. Rptr. 3d 442; see Schifando, at p. 1081 [complaint must be read in context and given a reasonable interpretation].)

"'Where the complaint is defective, "[i]n the furtherance of justice great liberality should be exercised in permitting a plaintiff to amend his [or her] complaint."'" (Aubry v. Tri-City Hospital Dist. (1992) 2 Cal.4th 962, 970-971, 9 Cal. Rptr. 2d 92, 831 P.2d 317.) We determine whether the plaintiff has shown "in what manner he [or she] can amend [the] complaint and how that amendment will change the legal effect of [the] pleading." (Goodman v. Kennedy (1976) 18 Cal.3d 335, 349, 134 Cal. Rptr. 375, 556 P.2d 737.) "[L]eave to amend should *not* be granted where . . . amendment would be futile." (Vaillette v. Fireman's Fund Ins. Co. (1993) 18 Cal.App.4th 680, 685, 22 Cal. Rptr. 2d 807; see **[*8]** generally Ivanoff v. Bank of America, supra, 9 Cal.App.5th at p. 726.)

b. *Review of the denial of a preliminary injunction*

In determining whether to issue a preliminary injunction a trial court weighs two interrelated factors: "[T]he likelihood the moving party ultimately will prevail on the merits, and the relative interim harm to the parties from the issuance or nonissuance of the injunction." (Hunt v. Superior Court (1999) 21 Cal.4th 984, 999, 90 Cal. Rptr. 2d 236, 987 P.2d 705; accord, White v. Davis (2003) 30 Cal.4th 528, 554, 133 Cal. Rptr. 2d 648, 68 P.3d 74; City of Corona v. AMG Outdoor Advertising, Inc. (2016) 244 Cal.App.4th 291, 298, 197 Cal. Rptr. 3d 563.) Generally, the trial court's ruling on an application for a preliminary injunction rests in its sound discretion and will not be disturbed on appeal absent an abuse of discretion. (City of Corona, at p. 298; SB Liberty, LLC v. Isla Verde Assn., Inc. (2013) 217 Cal.App.4th 272, 280-281, 158 Cal. Rptr. 3d 105.) An order denying an application for a preliminary injunction may be reversed only if the trial court abused its discretion with respect to both the question of success on the merits and the question of interim harm. (See Cohen v. Board of Supervisors (1985) 40 Cal.3d 277, 286-287, 219 Cal. Rptr. 467, 707 P.2d 840.)

Notwithstanding this general standard of review, the specific determinations underlying the superior court's decision are subject to appellate scrutiny under the standard of review appropriate to that type of determination. (People ex rel. Gallo v. Acuna (1997) 14 Cal.4th 1090, 1136-1137, 60 Cal. Rptr. 2d 277, 929 P.2d 596; accord, Smith v. Adventist Health System/West (2010) 182 Cal.App.4th 729, 739, 106 Cal. Rptr. 3d 318.) Thus, the superior court's express and implied findings of fact must be accepted by the appellate court if supported by substantial evidence, and its conclusions on issues of pure law are subject to independent **[*9]** review. (People ex rel. Feuer v. FXS Management, Inc. (2016) 2 Cal.App.5th 1154, 1158-1159, 206 Cal. Rptr. 3d 819; 420 Caregivers, LLC v. City of Los Angeles (2012) 219 Cal.App.4th 1316, 1331, 163 Cal. Rptr. 3d 17.)

2. *The Trial Court Properly Sustained the Demurrer to Nutrition Distribution's First Amended Complaint*

a. *Claims under the unfair competition and false advertising laws*

Unfair competition under section 17200, the unfair competition law (UCL), means "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising . . . ." Written in the disjunctive, section 17200 establishes "three varieties of unfair competition—acts or practices which are unlawful, unfair, or fraudulent." (Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (*Cel-Tech*); accord, Kasky v. Nike, Inc. (2002) 27 Cal.4th 939, 949, 119 Cal. Rptr. 2d 296, 45 P.3d 243.)

The "unlawful" prong of the UCL "'borrows' violations from other laws by making them independently actionable as unfair competitive practices." (Korea Supply Co. v. Lockheed Martin Corp. (2003) 29 Cal.4th 1134, 1143, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (*Korea Supply*); accord, Kasky v. Nike, supra, 27 Cal.4th at p. 949.) The "unfair" prong authorizes a cause of action under the UCL if the plaintiff can demonstrate the objectionable act, while not unlawful, is "unfair" within the meaning of the UCL. (Cel-Tech, supra, 20 Cal.4th at p. 182.) "When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes section 17200, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are **[*10]** comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." (*Id. at p. 187*.)

Under the "fraudulent" prong, a business practice violates the UCL if it "is likely to deceive the public. [Citations.] It may be based on representations to the public which are untrue, and '"also those which may be accurate on some level, but will nonetheless tend to mislead or deceive. . . . A perfectly true statement couched in such a manner that it is likely to mislead or deceive the consumer, such as by failure to disclose other relevant information, is actionable under"' the UCL. [Citations.] The determination as to whether a business practice is deceptive is based on the likely effect such practice would have on a reasonable consumer." (*McKell v. Washington Mutual, Inc. (2006) 142 Cal.App.4th 1457, 1471, 49 Cal. Rptr. 3d 227*; accord, *Klein v. Chevron U.S.A., Inc. (2012) 202 Cal.App.4th 1342, 1380, 137 Cal. Rptr. 3d 293*; see *Rubenstein v. The Gap, Inc. (2017) 14 Cal.App.5th 870, 876-877, 222 Cal. Rptr. 3d 397*; see also *Zhang v. Superior Court (2013) 57 Cal.4th 364, 370, 159 Cal. Rptr. 3d 672, 304 P.3d 163* ["[f]alse advertising is included in the 'fraudulent' category of prohibited practices"].)

In cases involving advertising or statements that are not literally false, '"[l]ikely to deceive' implies more than a mere possibility that the advertisement might conceivably be misunderstood by some few consumers viewing it in an unreasonable manner. Rather, the phrase indicates that the ad is such that it is probable that a **[*11]** significant portion of the general consuming public or of targeted consumers, acting reasonably in the circumstances, could be misled." (*Lavie v. Procter & Gamble Co. (2003) 105 Cal. App. 4th 496, 508, 129 Cal. Rptr. 2d 486*; accord, *Chapman v. Skype Inc. (2013) 220 Cal.App.4th 217, 226, 162 Cal. Rptr. 3d 864*; *People ex rel. Dept. of Motor Vehicles v. Cars 4 Causes (2006) 139 Cal.App.4th 1006, 1016, 43 Cal. Rptr. 3d 513*.)

Like *section 17200*, *section 17500*, the false advertising law, generally prohibits advertising that contains "any statement . . . which is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading . . . ." To prove a violation under *section 17500*, however, the plaintiff must also demonstrate the defendant knew, or in the exercise of reasonable care, should have known, that the advertisement was untrue or misleading. (See *Committee on Children's Television, Inc. v. General Foods Corp. (1983) 35 Cal.3d 197, 224, 197 Cal. Rptr. 783, 673 P.2d 660*.)

Notwithstanding its broad reach, an action under the UCL '"is not an all-purpose substitute for a tort or contract action.' [Citation.] Instead, the act provides an equitable means through which both public prosecutors and private individuals can bring suit to prevent unfair business practices and restore money or property to victims of these practices. . . . [T]he "overarching legislative concern [was] to provide a streamlined procedure for the prevention of ongoing or threatened acts of unfair competition.' [Citation.] Because of this objective, the remedies provided are limited." (*Korea Supply, supra, 29 Cal.4th at p. 1150*.)

"To **[*12]** achieve its goal of deterring unfair business practices in an expeditious manner, the Legislature limited the scope of the remedies available under the UCL. 'A UCL action is equitable in nature; damages cannot be recovered.'" (*In re Tobacco II Cases (2009) 46 Cal.4th 298, 312, 93 Cal. Rptr. 3d 559, 207 P.3d 20*; see *Korea Supply, supra, 29 Cal.4th at p. 1150* [damages are not available under the UCL].) "Injunctions are 'the primary form of relief available under the UCL to protect consumers from unfair business practices,' while restitution is a type of 'ancillary relief.'" (*Kwikset Corp. v. Superior Court (2011) 51 Cal.4th 310, 337, 120 Cal. Rptr. 3d 741, 246 P.3d 877*.) Restitution is available "to restore to any person in interest any money or property . . . which may have been acquired by means of such unfair competition." (*§ 17203*; see *Kraus v. Trinity Management Services, Inc. (2000) 23 Cal.4th 116, 126, 96 Cal. Rptr. 2d 485, 999 P.2d 718* (*Kraus*) ["[t]hrough the UCL a plaintiff may obtain restitution and/or injunctive relief against unfair or unlawful practices"]; see also *In re Tobacco Cases II (2015) 240 Cal.App.4th 779, 790, 192 Cal. Rptr. 3d 881*.)

Similarly, orders of restitution and injunctive relief, but not damages, are authorized for violations of *section 17500*. (*§ 17535*; see *Cortez v. Purolator Air Filtration Products Co. (2000) 23 Cal.4th 163, 177, fn. 10, 96 Cal. Rptr. 2d 518, 999 P.2d 706* ["[t]he restitutionary remedies of *section 17203* and *17535* . . . are identical and are construed in the same manner"]; *People ex rel Harris v. Sarpas (2014) 225 Cal.App.4th 1539, 1548, 172 Cal. Rptr. 3d 25*.)

b. *Nutrition Distribution failed to allege facts that would entitle it to restitution under the UCL or false advertising law*

Nutrition Distribution's first amended complaint sought recovery of Southern SARMs's profits from the sale of **[*13]** Ostarine through false and misleading advertising and "restitution of all Defendant's ill-gotten gains." Nutrition Distribution is not entitled to either remedy for violations of the UCL or false advertising law under the facts alleged in its pleading.

As discussed, damages are not available under the UCL or false advertising law. (*Cel-Tech, supra, 20 Cal.4th at p. 179*; *Korea Supply, supra, 29 Cal.4th at p. 1150*.) Recognizing this limitation, Nutrition Distribution argues "restitutionary disgorgement" is a recognized remedy and contends it has adequately pleaded its entitlement to such relief. However, restitution under the UCL must be restorative in nature: '"Restitution under [*Business and Professions Code] section 17203* is confined to restoration of any interest in "money or property, real or personal, which may have been *acquired* by means of such unfair competition." (Italics added.) A restitution order against a defendant thus requires both that money or property have been lost by a plaintiff, on the one hand, and that it have been acquired by a defendant, on the other.' [Citation.] '[C]ompensatory damages are not recoverable as restitution.'" (*Zhang v. Superior Court, supra, 57 Cal.4th at p. 371*; accord, *Korea Supply, at p. 1149* [the "object of restitution is to restore the status quo by returning to the plaintiff funds in which he or she has an ownership interest"]; see *Madrid v. Perot Systems Corp. (2005) 130 Cal.App.4th 440, 453, 30 Cal. Rptr. 3d 210* ["in the context **[*14]** of the Unfair Competition Law, 'restitution' is limited to the return of property or funds in which plaintiff has an ownership interest (or is claiming through someone with an ownership interest)"]; see also *Cortez v. Purolator Air Filtration Products Co., supra, 23 Cal.4th at pp. 173, 177-178*.)

Although Nutrition Distribution asserts it has a vested interest in any profits and business Southern SARMs wrongfully diverted from it, its characterization of its requested remedy as restitution does not make it so. To the contrary, compensation for lost business opportunities is a traditional measure of tort damages, not restitution, as the Supreme Court explained in rejecting a markedly similar argument in *Korea Supply*. In that case the plaintiff arms broker had sought to recover sums it allegedly would have received as a commission from its principal had the defendant-competitor not unfairly won an arms contract by bribing Korean officials. (*Korea Supply, supra, 29 Cal.4th at p. 1142*.) The Supreme Court held the relief sought was not available under the UCL, "This proposed recovery would be exactly the same amount that plaintiff is seeking to recover as damages for its traditional tort claim of interference with prospective economic advantage. The only difference between what plaintiff seeks to recover as 'disgorgement' **[*15]** and the damages it seeks under its traditional tort claim is that plaintiff would not recover its full commission under a 'disgorgement' remedy if, for some reason, the profits obtained by Lockheed Martin did not equal the amount of plaintiff's expected commission." (*Id. at p. 1151*; see *id. at p. 1149* ["[i]n an attempt to fit its claim within the statutory authorization for relief, and as an implicit acknowledgement that nonrestitutionary disgorgement is not an available remedy in an individual action under the UCL,[6] plaintiff describes its requested remedy as 'restitution.' This term does not accurately describe the relief sought by plaintiff"].)

Nutrition Distribution has not alleged any facts showing it had an "ownership interest" in the profits it seeks to recover from Southern SARMs, nor has it alleged it seeks to recover for some benefit it conferred on Southern

---

[6] "Disgorgement as a remedy is broader than restitution or restoration of what the plaintiff lost. [Citations.] There are two types of disgorgement: restitutionary disgorgement, which focuses on the plaintiff's loss, and nonrestitutionary disgorgement, which focuses on the defendant's unjust enrichment. [Citation.] 'Typically, the defendant's benefit and the plaintiff's loss are the same, and restitution requires the defendant to restore the plaintiff to his or her original position.' [Citation.] However, '[m]any instances of "liability based on unjust enrichment . . . do not involve the restoration of anything the claimant previously possessed . . . includ[ing] cases involving the disgorgement of profits . . . wrongfully obtained . . . ." [Citation.] "[T]he public policy of this state does not permit one to 'take advantage of his own wrong'" regardless of whether the other party suffers actual damage. [Citation.] Where "a benefit has been received by the defendant but the plaintiff has not suffered a corresponding loss or, in some cases, any loss, but nevertheless the enrichment of the defendant would be unjust . . . the defendant may be under a duty to give to the plaintiff the amount by which [the defendant] has been enriched."'" (*American Master Lease LLC v. Idanta Partners, Ltd. (2014) 225 Cal.App.4th 1451, 1482, 171 Cal. Rptr. 3d 548*.)

SARMs for which it has a legal right of recovery. Nutrition Distribution has thus failed to state a cause of action for restitution under the UCL.

In a final attempt to maintain its action to recover Southern SARMs's profits from its allegedly deceptive marketing of Ostarine, Nutrition Distribution contends, at a minimum, it may seek disgorgement of those **[*16]** profits into a fluid recovery fund, citing as support language from *Alch v. Superior Court (2004) 122 Cal.App.4th 339, 19 Cal. Rptr. 3d 29*. Nutrition Distribution fundamentally misapprehends the import of *Alch.*

In *Alch* our colleagues in Division Eight of this court first explained that the Supreme Court has held that "disgorgement of unfairly obtained profits into a fluid recovery fund" is not an available remedy in either a representative action brought under the UCL" (*Alch v. Superior Court, supra, 122 Cal.App.4th at p. 405*, citing *Kraus, supra, 23 Cal.4th at p. 121*) or an individual UCL action (*Alch, at p. 406*, citing *Korea Supply, supra, 29 Cal.4th at p. 1147*), but then observed, "It may well be that in a proper case a court may order disgorgement of profits into a fluid recovery fund in a UCL class action; at least one case has so held." (*Alch, at pp. 407-408*, citing *Corbett v. Superior Court (2002) 101 Cal.App.4th 649, 655, 125 Cal. Rptr. 2d 46* (*Corbett*).) In the next several sentences, however, which Nutrition Distribution omits from its brief discussion of the purported availability of a fluid fund recovery, the *Alch* court held, "Fluid recovery in class actions, however, is merely a method of paying out damages after they have been awarded. [Citation.] The question is not whether the court could order fluid class recovery of a damages award; it is whether the trial court has the authority to award nonrestitutionary backpay under the UCL in the first instance. It does not." (*Alch, at p. 408*.)

Indeed, **[*17]** the decision in *Corbett*, cited in *Alch* as the one case permitting a fluid recovery fund in a UCL class action, evaluated the availability of that remedy for purposes of restitutionary disgorgement, not nonrestitutionary disgorgement, as Nutrition Distribution seeks in this case. In *Corbett* the defendants were a bank and a car dealership that allegedly made car loans at interest rates lower than the rate disclosed and charged to the customer. The defendants then split the excess interest payments. Thus, the disgorgement was restitutionary—to return money to those who had paid it. (See *Corbett, supra, 101 Cal.App.4th at p. 668*.) As the court held in *Madrid v. Perot Systems Corp., supra, 130 Cal.App.4th 440*, neither *Corbett* nor any other authority supports nonrestitutionary disgorgement into a fluid recovery fund in a UCL class action, "[T]he use of the class action vehicle to litigate a UCL claim does not expand the substantive remedies available, and the availability of fluid recovery in a UCL class action (which we presume for purposes of this appeal) says nothing about availability of *non*restitutionary disgorgement of profits." (*Id. at p. 461*.)

c. *Nutrition Distribution failed to allege facts that would justify the broad injunctive relief it seeks prohibiting all production and sales of any product* ***[*18]*** *containing selective androgen receptor modulators*

Section 17203 authorizes the court to issue injunctive relief "as may be necessary to prevent the use or employment by any person of any practice which constitutes unfair competition" as defined by the UCL. Similarly, *section 17535* authorizes injunctive relief "as may be necessary to prevent the use or employment by any person . . . of any practices which violate" the false advertising law. Although this power is broad (see *People v. Toomey (1984) 157 Cal.App.3d 1, 20, 203 Cal. Rptr. 642)*, it is not unlimited. (See *Colgan v. Leatherman Tool Group, Inc. (2006) 135 Cal.App.4th 663, 702, 38 Cal. Rptr. 3d 36* ["A trial court has broad authority to enjoin conduct that violates *section 17200*. [Citation.] That authority is expansive but not unlimited."]; see also *In re Tobacco Cases II, supra, 240 Cal.App.4th at p. 802*; *People ex rel. Herrera v. Stender (2012) 212 Cal.App.4th 614, 631, 152 Cal. Rptr. 3d 16*.) In particular, an injunction must be directed to the unlawful or unfair acts or practices prohibited by the UCL or the false advertising law—here, the allegedly false, unfair, misleading and deceptive advertising used by Southern SARMs to sell Ostarine and related products. (*In re Tobacco Cases II, at p. 802*; *Madrid v. Perot Systems Corp., supra, 130 Cal.App.4th at p. 464*.)

The relief requested by Nutrition Distribution fails to satisfy this requirement. In its amended complaint Nutrition Distribution did not seek to enjoin Southern SARMs's allegedly misleading and deceptive advertising of Ostarine as identified in its pleading, but rather prayed for a complete and **[*19]** total prohibition of any production, marketing or sales of Ostarine and any other product containing selective androgen receptor modulators. As Southern SARMs has argued, the requested injunctive relief is vastly overbroad and in no way tethered to the wrongful conduct alleged.[7]

In its briefs and at oral argument in this court, Nutrition Distribution has continued to argue it is entitled under the UCL and the false advertising law to the broad injunctive relief it has requested. Neither in the trial court nor on appeal has it asked leave to amend to narrow the scope of the injunction sought to parallel the statutory violations it has alleged. Indeed, any such effort might well be futile. Although not properly considered in ruling on Southern SARMs's demurrer, in connection with its opposition to the motion for preliminary injunction, Southern SARMs introduced evidence, uncontradicted by Nutrition Distribution, it had stopped all marketing and sales of Ostarine (and had never manufactured it) and had no intention of resuming marketing or sales of the product. (See *In re Tobacco Cases II, supra, 240 Cal.App.4th at p. 802* ["'in order to grant injunctive relief under section 17204 or section 17535, there must be a threat that the wrongful conduct will continue"]; *Colgan v. Leatherman Tool Group, Inc., supra, 135 Cal.App.4th at p. 702* ["' **[*20]** [i]njunctive relief will be denied if, at the time of the order of judgment, there is no reasonable probability that the past acts complained of will recur, i.e., where the defendant voluntarily discontinues the wrongful conduct'"]; *Madrid v. Perot Systems Corp., supra, 130 Cal.App.4th at p. 463* ["[i]njunctive relief is appropriate only when there is a threat of continuing misconduct"].)[8]

In sum, because Nutritional Distribution did not allege facts that would entitle it under the UCL or false advertising law to the remedies it seeks, the demurrer to the first amended complaint was properly sustained.

3. *The Trial Court Did Not Abuse Its Discretion in Denying Leave To Amend*

"'If we see a reasonable possibility that the plaintiff could cure the defect by amendment, then we conclude that the trial court abused its discretion in denying leave to amend. If we determine otherwise, then we conclude it did not.' [Citation.] "'The burden of proving such reasonable possibility is squarely on the plaintiff."' [Citation.] To satisfy this burden, "'a plaintiff 'must show in what manner he can amend his complaint and how that amendment will change the legal effect of his pleading'"' by clearly stating not only the legal basis for the amendment, but also the factual allegations to sufficiently **[*21]** state a cause of action." (*Graham v. Bank of America, N.A. (2014) 226 Cal.App.4th 594, 618, 172 Cal. Rptr. 3d 218*.)

---

[7] Southern SARMs also argues the question whether sales of Ostarine or other products containing selective androgen receptor modulators should be banned raises issues that must be answered in the first instance by the FDA, including "[w]hether Ostarine is a 'drug,' 'new drug,' 'a prescription drug,' or a 'dietary supplement' proscribed or regulated by the FDA." Thus, it contends, Nutrition Distribution's request for injunctive relief is precluded by the primary jurisdiction doctrine. (See, e.g., *Farmers Ins. Exchange v. Superior Court (1992) 2 Cal.4th 377, 390, 6 Cal. Rptr. 2d 487, 826 P.2d 730* [primary jurisdiction "'applies where a claim is originally cognizable in the courts, and comes into play whenever enforcement of the claim requires the resolution of issues which, under a regulatory scheme, have been placed within the special competence of an administrative body; in such a case the judicial process is suspended pending referral of such issues to the administrative body for its views'"; italics omitted].)

In response, quoting extensively from *Nutrition Distribution, LLC v. Custom Nutraceuticals LLC (D.Ariz. 2016) 194 F.Supp.3d 952*, in which the defendants were alleged to have violated the federal Lanham Act by engaging in false advertising of Ostarine, Nutrition Distribution insists the trial court can decide whether Ostarine is as safe as Southern SARMs claims without expressing an opinion on any technical or policy questions committed to the FDA. (See *Custom Nutraceuticals, at p. 956* [the court does not "require FDA's expertise to determine whether it is false and misleading to market a product to competitive athletes while neglecting to mention that it has been banned by the World Anti-Doping Agency and the U.S. Anti-Doping Agency. It is not clear that this question even implicates the FDA's regulatory scheme . . ."].)

In light of our holding that the requested injunctive relief is impermissibly overbroad, we need not address the primary jurisdiction issue.

[8] In an appropriate situation a court may enter an injunction requiring corrective advertising to make up for past misleading statements. (See, e.g., *Consumers Union of U.S., Inc. v. Alta-Dena Certified Dairy (1992) 4 Cal.App.4th 963, 972-974, 6 Cal. Rptr. 2d 193* [upholding court order requiring defendant to place a warning on its product, which it continued to sell, to correct a misperception created by prior false advertising].) No analogous circumstance is present in the case at bar.

In connection with its argument that it should be permitted to seek disgorgement of Southern SARMs's unlawful profits into a fluid recovery fund, Nutrition Distribution contends, if class certification is required for this remedy, it should be granted leave to amend "to consider whether or not to proceed as a class action." Even were this otherwise a proper request for leave to amend, nonrestitutionary disgorgement, whether directly to an individual or into a fluid recovery fund, is not an available remedy under the UCL or the false advertising law. Accordingly, this proposed amendment (such as it is) would be futile. Because Nutrition Distribution has not suggested any other amendment to change the legal effect of its pleading, the trial court properly sustained the demurrer to the first amendment complaint without leave to amend.

4. *The Appeal from the Denial of the Preliminary Injunction Is Moot*

As this court explained *MaJor v. Miraverde Homeowners Assn. (1992) 7 Cal.App.4th 618, 623, 9 Cal. Rptr. 2d 237*, "A preliminary injunction is an interim remedy designed to maintain the status quo pending a decision on the merits. [Citation.] It is not, in itself, a cause of action. Thus, a cause of action must exist before injunctive relief may be granted. . . **[*22]** . [¶] . . . In the present case, the trial court having sustained a demurrer without leave to amend to the only cause of action which might have supported a preliminary injunction in favor of Ms. MaJor, her appeal from the denial of a preliminary injunction is moot." (Accord, *Korean American Legal Advocacy Foundation v. City of Los Angeles (1994) 23 Cal.App.4th 376, 399, 28 Cal. Rptr. 2d 530* ["in the case at bar, the trial court sustained the City's demurrer without leave to amend to those causes of action alleging the City's procedures were preempted by state constitutional and statutory law. Because these were the only causes of action which would have supported a preliminary injunction in plaintiffs' favor, their appeal from the denial of a preliminary injunction is dismissed as moot"]; see *Agnew v. Los Angeles (1958) 51 Cal. 2d 1, 2, 330 P.2d 385* [because the order denying plaintiff's motion for a temporary restraining order and for a preliminary injunction "dealt solely with the right to preventive relief pending final judgment," the entry of a judgment in favor of defendants after their demurrer to the complaint was sustained without leave to amend "rendered the right to interim relief moot"].)

Having concluded that Nutrition Distribution failed to state a cause of action under the UCL or the false advertising law and that the trial court properly **[*23]** sustained Southern SARMS's demurrer without leave to amend, we need not consider Nutrition Distribution's appeal from the denial of its motion for a preliminary injunction. That portion of Nutrition Distribution's appeal is dismissed as moot. (See *Agnew v. City of Los Angeles, supra, 51 Cal.2d at p. 2*.)

DISPOSITION

The judgment of dismissal is affirmed. The appeal from denial of the motion for preliminary injunction is dismissed as moot. Southern SARMs is to recover its costs on appeal.

PERLUSS, P. J.

We concur:

ZELON, J.

SEGAL, J.

LexisNexis® Headnotes

Business & Corporate Compliance > ... > US Patent & Trademark Office Proceedings > Patent Law > US Patent & Trademark Office Proceedings

HN1[] **Patent, US Patent & Trademark Office Proceedings**

A "patent troll" is an individual or company who acquires by purchase or application to the Patent and Trademark Office a patent that he or she uses not to protect an invention but to obtain a license fee from, or legal judgment against, an alleged infringer. Patent trolls are also known as patent assertion entities and non-practicing entities.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN2[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

Under the Noerr-Pennington doctrine, those who petition the government for redress, including by filing suit in court, are generally immune from antitrust liability.

Business & Corporate Compliance > ... > Infringement Actions > Patent Law > Infringement Actions

Business & Corporate Compliance > ... > Ownership > Patent Law > Ownership

HN3[] **Patent, Infringement Actions**

A patent, by its very nature, vests its owner with a type of legal monopoly, which it can enforce against anyone who infringes the patent. Enforcing a patent through litigation protects this monopoly, even though in other circumstances monopolies are viewed as harmful.

Antitrust & Trade Law > Business & Corporate Compliance > Antitrust

HN4[] **Antitrust & Trade Law**

To promote the benefits of robust competition, ***antitrust law*** aims to prevent a company from having the ability to control the price of its product or exclude competitors to the extent that it can charge sustained supracompetitive prices (prices substantially above what a competitive price would be if consumers could simply buy a close substitute product from a competitor at lower cost).

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

Business & Corporate Compliance > ... > Ownership > Patent Law > Ownership

HN5[] **Regulated Practices, Monopolies & Monopolization**

The exercise of monopoly power with regard to a single patent (or even a few patents) usually does not offend ***antitrust law***. But it is another matter to acquire a vast portfolio of patents that are essential to technology employed by an entire industry and then to compel its licensing at take-it-or-leave-it prices because it is not economically feasible to determine if alternative technologies, not covered by the accumulation of patents, are available. This acquisition and compelled licensing may amount to the ability to exercise monopoly power on an entirely different scale.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

HN6[] **Regulated Practices, Monopolies & Monopolization**

The power to control prices or exclude competitions is the essence of monopoly power. ***Antitrust law*** is designed to prevent the acquisition and exercise of monopoly power. *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN7[] **Market Definition, Relevant Market**

The essential first step in analyzing antitrust claims is to define the relevant market by product(s) and geography. Market definition is a deeply fact-intensive inquiry. In determining the relevant market, a court must consider the commercial realities faced by consumers. Where the facts are hotly disputed, defining relevant market is generally a question for a trier of fact. The burden of proof lies with the antitrust plaintiff to prove relevant market. When the parties proffer competing economic experts on the proper definition of relevant market, summary judgment is inappropriate as long as each expert's views could be found by the trier of fact to be reasonable.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Scintilla Rule

HN8[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is proper when the moving party demonstrates, through particular parts of materials in the record, including depositions, documents, electronically stored information, affidavits or declarations, stipulations, admissions, interrogatory answers, or other materials, that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*, *(c)(1)(A)*. If a party seeking summary judgment demonstrates that there is no evidence to support the nonmoving party's case, the burden shifts to the nonmoving party to identify evidence that shows that a genuine dispute exists as to material facts. The existence of only a scintilla of evidence is not enough to defeat a motion for summary judgment. Instead, the evidentiary materials submitted must show facts from which the finder of fact reasonably could find for the party opposing summary judgment.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

Business & Corporate Compliance > ... > Infringement Actions > Patent Law > Infringement Actions

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Business & Corporate Compliance > ... > Ownership > Patent Law > Ownership

HN9[] **Regulated Practices, Monopolies & Monopolization**

Antitrust law proscribes the willful acquisition or maintenance of monopoly power within a market, as well as attempts to monopolize. *15 U.S.C.S. § 2*. In contrast, a patent creates a legal monopoly. Additionally, those who petition the government for redress are generally immune from antitrust liability under what is known as Noerr-Pennington immunity. This holds true for parties who file suit in court. And, patent holders that believe that their patents have been infringed may seek to enforce their rights under the patent through patent litigation. *35 U.S.C.S. § 281*. Thus, when a party challenges a patent holder's efforts to enforce its patents through litigation, a court must determine whether the patent holder is exercising the lawful restraint on trade of the patent monopoly or the illegal restraint prohibited broadly by the *Sherman Act*. To do so, courts must balance the privileges of a patent holder under its patent grants with the prohibitions of the *Sherman Act* against combinations and attempts to monopolize.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

HN10[] Misuse of Rights, Patent Misuse Defense

Patent acquisition is actionable under the *Clayton Act* only where the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly. *15 U.S.C.S. § 18*.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN11[] Exemptions & Immunities, Noerr-Pennington Doctrine

A patentee who brings an infringement suit may lose its Noerr-Pennington immunity and be subject to antitrust liability for the anti-competitive effects of that suit if the alleged infringer (the antitrust plaintiff) proves (1) that the asserted patent was obtained through knowing and willful fraud within the meaning of Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp. or (2) that the infringement suit was a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN12[] Misuse of Rights, Patent Misuse Defense

The enforcement of a patent procured by fraud on the Patent Office may be violative of *15 U.S.C.S. § 2* provided the other elements necessary to a *15 U.S.C.S. § 2* case are present. Thus, to strip a patentee of its exemption from the antitrust laws because of its attempting to enforce its patent monopoly, an antitrust plaintiff is first required to prove that the patentee obtained the patent by knowingly and willfully misrepresenting facts to the Patent and Trademark Office and that the patent holder seeking to enforce its patent through litigation was aware of the fraud when bringing suit. For Walker Process purposes, fraud is a more serious offense than inequitable conduct. Where there is no evidence that the Patent Office was tricked by fraud or that the patentee (which later acquired the patents) was aware of any such fraud, Walker Process's holding has no application.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN13[] Misuse of Rights, Patent Misuse Defense

The U.S. Supreme Court has observed that there may be situations in which a publicity campaign, ostensibly directed toward influencing governmental action, is a mere sham to cover up what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor, and the application of the *Sherman Act* is justified. This sham litigation exception has been extended to patent litigation, in which a patentee's conduct in the prosecution of a patent is sufficient to strip the patentee of its immunity from the antitrust laws. But this exception to Noerr-Pennington immunity is narrow, given the presumption of patent validity and the burden on a patent challenger to prove invalidity by clear and convincing evidence. Consequently, rarely is a patentee's assertion of its patent in the face of a claim of invalidity so unreasonable as to support a claim that the patentee has engaged in sham litigation.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN14[] Noerr-Pennington Doctrine, Right to Petition Immunity

An antitrust claim cannot be based upon the approach of citizens or groups of them to administrative agencies or to courts.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN15[] Noerr-Pennington Doctrine, Sham Exception

Allegations that parties sought to bar their competitors from meaningful access to adjudicatory tribunals and so to usurp that decisionmaking process and instituted proceedings and actions with or without probable cause, and regardless of the merits of the cases, fall within the sham exception in the Noerr case, as adapted to the adjudicatory process. When a party's legal actions reflect a pattern of baseless, repetitive claims that leads a factfinder to conclude that the administrative and judicial processes have been abused, that party cannot acquire immunity by seeking refuge under the umbrella of political expression.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN16[] Noerr-Pennington Doctrine, Sham Exception

To qualify as sham litigation, for purposes of an exception to the Noerr-Pennington doctrine, a lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits, and the litigant's subjective motivation must be to interfere directly with the business relationships of a competitor.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN17[] Noerr-Pennington Doctrine, Sham Exception

A finding of an objectively reasonable effort to litigate is sufficient to show that litigation was not a sham, for purposes of the sham litigation exception to the Noerr-Pennington doctrine, regardless of subjective intent. Simply put, if a court concludes that an antitrust defendant had probable cause to file suit (which it can determine as a matter of law if there is no dispute over the predicate facts of the underlying legal proceeding), it cannot find that the defendant engaged in sham litigation, even if the litigant filed suit without any expectation of success.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN18[] Noerr-Pennington Doctrine, Sham Exception

When considering whether the sham litigation exception to the Noerr-Pennington doctrine applies, the notion of probable cause requires a plaintiff to prove that a defendant lacked probable cause to institute an unsuccessful civil lawsuit and that the defendant pressed the action for an improper, malicious purpose. Probable cause to institute civil proceedings requires no more than a reasonable belief that there is a chance that a claim may be held valid upon adjudication. Because the absence of probable cause is an essential element of the tort of wrongful civil proceedings, the existence of probable cause is an absolute defense. When a court has found that an antitrust defendant claiming Noerr immunity had probable cause to sue, that finding compels the conclusion that a reasonable litigant in the defendant's position could realistically expect success on the merits of the challenged lawsuit. Therefore, a proper probable cause determination irrefutably demonstrates that an antitrust plaintiff has not proved the objective prong of the sham exception and that the defendant is accordingly entitled to Noerr immunity.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN19[] **Noerr-Pennington Doctrine, Sham Exception**

When considering the sham litigation exception to Noerr-Pennington immunity under the California Motor standard, the focus is not on any single case. Rather a district court should conduct a holistic evaluation of whether the administrative and judicial processes have been abused. It is the pattern of the legal proceedings, not their individual merits, that the court considers to determine whether an antitrust defendant indiscriminately filed a series of legal proceedings without regard for the merits and for the purpose of violating federal law. The subjective motive of the litigant and the objective merits of the suits are relevant, but the California Motor standard is different because other signs of bad-faith litigation may also be probative of an abuse of the adjudicatory process.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN20[] **Noerr-Pennington Doctrine, Sham Exception**

When considering whether the sham litigation exception to Noerr-Pennington immunity applies, PREI and California Motor apply to different situations. PREI provides a strict two-step analysis to assess whether a single action constitutes sham petitioning. California Motor deals with a case where a defendant is accused of bringing a whole series of legal proceedings. The PREI standard is ill-fitted to test whether a series of legal proceedings is sham litigation, especially when a presiding tribunal for earlier cases had no occasion to measure the baselessness of the suit because (1) it had no inkling that the action comprised a possible campaign of sham litigation, and (2) the plaintiffs preempted an assessment of frivolity by prematurely withdrawing some of their suits. Thus, when purported sham litigation encompasses a series of legal proceedings rather than a singular legal action, the sham litigation standard of California Motor should govern.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN21[] **Misuse of Rights, Patent Misuse Defense**

It has been held that an antitrust claim premised on stripping a patentee of its immunity from the antitrust laws is typically raised as a counterclaim by a defendant in a patent infringement suit, and, because most cases involving these issues are appealed to United States Court of Appeals for the Federal Circuit (Federal Circuit), immunity from antitrust laws should be decided as a matter of Federal Circuit law, rather than by relying on various regional precedents. On that basis, the Federal Circuit has held that for all antitrust claims premised on the bringing of a patent infringement suit, the issue of whether conduct in procuring or enforcing a patent is sufficient to strip a patentee of its immunity from the antitrust laws is to be decided as a question of Federal Circuit law, although the law of the appropriate regional circuit applies to issues involving other elements of ***antitrust law*** such as relevant market, market power, damages, etc. This language is unambiguous in its application to instances of patent litigation.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN22[] **Noerr-Pennington Doctrine, Sham Exception**

When considering the sham litigation exception to Noerr-Pennington immunity, under PREI, what a court needs to determine is whether a reasonable litigant in the position of the party asserting immunity could realistically expect to succeed on the merits of its claims because, if it could, the litigation was not objectively baseless and therefore not sham litigation. This is an absolute defense that requires no more than a reasonable belief that there is a chance that a claim may be held valid upon adjudication.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN23[] **Estoppel, Collateral Estoppel**

Collateral estoppel, also known as issue preclusion, works to ensure that parties get one full and fair opportunity to litigate a particular issue, while preventing needless relitigation of that issue. Collateral estoppel bars relitigation of an issue or fact if (1) the issue or fact is identical to one previously litigated, (2) the issue or fact was actually resolved in the prior proceeding, (3) the issue or fact was critical and necessary to the judgment in the prior proceeding, (4) the judgment in the prior proceeding is final and valid, and (5) the party to be foreclosed by the prior resolution of the issue or fact had a full and fair opportunity to litigate the issue or fact in the prior proceeding.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN24[] **Estoppel, Collateral Estoppel**

Collateral estoppel may be offensive or defensive. Offensive collateral estoppel is when a plaintiff or counter claimant or third party plaintiff employs the doctrine of collateral estoppel or issue preclusion to foreclose a defendant or counter defendant or third party defendant from litigating an issue the defendant has previously litigated unsuccessfully in an action with another party. Defensive collateral estoppel is when a defendant or counter defendant or third party defendant employs the doctrine to prevent a plaintiff or counter claimant or third party plaintiff from asserting a claim the plaintiff or counter claimant or third party plaintiff has previously litigated and lost against another defendant. A defendant (or defending party) also can employ defensive collateral estoppel to bar claims the plaintiff (or claimant) already unsuccessfully made against it, rather than another defendant.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN25[] **Attempts to Monopolize, Sherman Act**

For an attempted monopolization claim under *15 U.S.C.S. § 2*, to determine whether there is a dangerous probability of monopolization, courts find it necessary to consider the relevant market and the defendant's ability to lessen or destroy competition in that market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

HN26[] **Actual Monopolization, Claims**

To prevail on a claim of monopolization under *15 U.S.C.S. § 2*, a plaintiff must prove (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Clayton Act > Scope

HN27[] Antitrust & Trade Law, Clayton Act

A merger which produces a firm controlling an undue percentage share of a relevant market, and results in a significant increase in the concentration of firms in that market, is so inherently likely to lessen competition substantially that it is a violation of *15 U.S.C.S. § 7* unless there is evidence clearly showing that the merger is not likely to have such anticompetitive effects.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN28[] Attempts to Monopolize, Elements

To prevail on a claim of attempted monopolization, a plaintiff must prove (1) a specific intent to monopolize a relevant market, (2) predatory or anticompetitive acts, and (3) a dangerous probability of successful monopolization.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN29[] Relevant Market, Product Market Definition

A relevant market is generally viewed as the field of meaningful competition. It is determined by commercial realities and consumer choice and, while it typically includes substitutes for a particular product, it may also consist of a single product or brand where there is no reasonable interchangeability with other comparable products, that is, where there are essentially no substitutes for a given product.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN30[] Estoppel, Collateral Estoppel

Even though the doctrine of collateral estoppel was designed to bar the relitigation of issues determined in a prior suit, it may apply to relitigation within the same suit because where the relitigation involves the same parties, the same issues arising out of the same set of facts, and the same court, the "sameness" or mutuality of parties in interests which serves as the basis for the development of collateral estoppel doctrines is present. Thus, the court can utilize the doctrine of collateral estoppel without fear of denying a litigant a right to argue his or her claims to the best of his or her ability before a competent court.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN31[] Estoppel, Collateral Estoppel

Where a court in a prior suit has determined two issues, either of which could independently support a result, then neither determination is considered essential to the judgment and collateral estoppel does not bar relitigation of either issue, unless one of the two determinations is upheld on appeal, in which case collateral estoppel bars relitigation as to that issue. The rationale underlying this corollary to the collateral estoppel doctrine is that it guards against the use of non-essential dicta and ancillary findings to estop later litigations. Non-essential findings should not serve as the basis for collateral estoppel because the litigants might not have concentrated their energies and resources upon the full development and presentation of these issues. Thus, this requirement ensures the integrity and competence of any particular finding before it is allowed to estop collateral relitigation.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN32[] **Estoppel, Collateral Estoppel**

Collateral estoppel is limited by the overriding principle that courts should protect a litigant's right to a full and fair opportunity to litigate his or her claims but is otherwise capable of flexible determination to serve the interests of judicial economy by preventing needless relitigation.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN33[] **Estoppel, Collateral Estoppel**

The United States Supreme Court grants courts broad discretion to determine when offensive collateral estoppel should be applied because of a greater possibility of unfairness from the use of offensive collateral estoppel.

Opinion

[*694] **MEMORANDUM OPINION**

The litigation history between the Intellectual Ventures companies (Plaintiffs, Counter-Defendants, Third-Party Defendants, and Joined Counter-Defendants to this action; collectively referred to as "IV") and the Capital One companies (Defendants, Counterclaimants, and Third-Party Plaintiffs in this action; collectively referred to as "Capital One") is protracted, beginning with a patent infringement action that Intellectual Ventures I, LLC and Intellectual Ventures II, LLC (together, "IV I and II") filed in the Eastern District of Virginia on June 19, **[**21]** 2013. In that case, as well as in this patent infringement action that IV I and II filed on January 15, 2014, Capital One brought antitrust counterclaims. The Virginia court dismissed Capital One's antitrust claims for failure to state a claim, and IV now seeks summary judgment on very similar claims. ECF No. 656. Because *Noerr—Pennington* immunity and collateral estoppel both bar Capital One's antitrust claims, I will grant IV's motion.

Procedural Background

IV I and II filed suit in this Court, alleging that Capital One infringed five of their patents. Compl., ECF No. 1. IV I and II ultimately voluntarily withdrew one patent infringement claim and proceeded with the others. ECF Nos. 80, 81. The parties engaged in extensive discovery and agreed to referral to a Special Master highly experienced in patent law, jointly selected by the parties and appointed pursuant to *Fed. R. Civ. P. 53*. ECF Nos. 134, 136, 143. He oversaw additional discovery, following which the parties extensively briefed the patent infringement claims. ECF Nos. 147, 147-1, 169, 169-1, 227, 246, 297, 300, 303. The Special Master issued two reports and recommendations, ECF **[*695]** Nos. 298 and 315, in which he ruled in favor of IV with respect **[**22]** to two of its patents, United States Patent Nos. 7,984,081 and 6,546,002 ("the '081 Patent" and "the '002 Patent"), and in favor of Capital One on the claims related to United States Patent Nos. 6,314,409 and 6,715,084 ("the '409 Patent" and "the '084 Patent"). Both parties challenged the Special Master's rulings adverse to them, and further briefing ensued. ECF Nos. 307, 311, 312, 313, 319, 324, 325, 330, 335, 336, 344.

After reviewing the Special Master's reports and recommendations and the parties' extensive briefs, I overruled the Special Master with respect to the '081 Patent and the '002 Patent, finding that they were unenforceable. ECF Nos. 377, 378. I also ruled that collateral estoppel applied regarding the '409 Patent and the '084 Patent, barring IV from bringing claims against Capital One for infringement of those patents. ECF No. 382. The net effect of my ruling was that each of the patents that IV claimed Capital One had infringed was unenforceable, two patents because I concluded that they were invalid pursuant to *35 U.S.C. § 101*, and two patents because the United States District Court for the Southern District of New York in *Intellectual Ventures v. JPMC, Case No. 13-3777-AKH, 2015 U.S. Dist. LEXIS 56092, 2015 WL 1941331 (S.D.N.Y. Apr. 28, 2015)*, concluded that they were invalid, and issue preclusion barred me from reaching a different conclusion. On those grounds, I entered summary judgment in

Capital One's favor on those four **[**23]** remaining patent infringement claims. ECF Nos. 378, 382. And, finding no just reason for delay, I entered a final judgment in favor of Capital One on the patent infringement claims, making that order immediately appealable. ECF No. 387. The Federal Circuit affirmed my rulings, *Intellectual Ventures I LLC v. Capital One Fin. Corp., 850 F.3d 1332 (Fed. Cir. 2017)*, thereby ending the patent infringement claims against Capital One.

Meanwhile, Capital One had sought leave to file three antitrust counterclaims, claiming monopolization and attempted monopolization, in violation of Section 2 of the Sherman Act, *15 U.S.C. § 2*, and unlawful asset acquisition, in violation of Section 7 of the Clayton Act, *15 U.S.C. § 18*, as part of its Third Amended Answer, Defenses, and Counterclaims. ECF No. 106. IV I and II opposed the motion. ECF No. 118. I granted Capital One leave to file its counterclaims, ECF Nos. 194, 195, which it did, ECF No. 196; *see also* Fourth Amended Answer, Defenses, and Counterclaims, ECF Nos. 438 (redacted), 439 (sealed). It also filed a Third Party Complaint against additional Intellectual Ventures companies: Invention Investment Fund II, LLC; Intellectual Ventures Management, LLC; Invention Investment Fund I, L.P. ECF Nos. 228 (sealed), 230 (redacted). Capital One alleges that IV has tried, without success, **[**24]** to license to Capital One its extensive patent portfolio, which includes the patents that IV has sued Capital One, in this suit and the Virginia suit, for infringing. Capital One believes that IV's repeated claims against it are actionable under ***antitrust law***.

I denied IV's motions to dismiss the counterclaims and Third Party Complaint, ECF Nos. 225, 296, finding that Capital One had pled them sufficiently to proceed to discovery. ECF No. 328. After another round of extensive (and expensive) discovery regarding liability on the antitrust counterclaims, I attended a tutorial involving the economic experts that the parties had identified. ECF No. 651. Also in attendance was the court technical advisor, Professor John M. de Figueiredo of Duke University Law and Business Schools, whose appointment the parties had confirmed on a status conference call, and who assisted the court in evaluating the economic **[*696]** evidence. ECF Nos. 606, 608.[1] At the close of discovery, IV filed the pending Motion for Summary Judgment, which the parties fully briefed.[2] In support of their positions, the parties jointly submitted a 13,344 page Joint Record, comprising 286 exhibits in sixteen, 3-inch binders. Having **[**25]** reviewed the parties' memoranda and exhibits, I now rule.

Parties' Arguments

---

[1] Unlike expert witnesses appointed under *Rule 706*, technical advisors are appointed under the court's inherent authority, and they do not testify at trial (and are not deposed or subject to cross examination). Joe S. Cecil & Thomas E. Willging, *Court-Appointed Experts in* Reference Manual on Scientific Evidence 527, 531 (Fed. Judicial Ctr. 1994). Accordingly, Professor de Figueiredo did not provide his independent opinion on the issues, but instead helped me understand the parties' experts' methodology, any assumptions underlying the experts' opinions, and how the methodology applies to the facts of this case. Thus, the purpose of the technical expert was to assist me in understanding the economic issues in this litigation and to enhance my ability to make an informed ruling on the pending motion. In this regard, Professor de Figueiredo's assistance was invaluable.

[2] The parties fully briefed the motion. ECF Nos. 657 (sealed opening brief), 668 (redacted opening brief), 662 (redacted opposition), 664 (sealed opposition), 669 (sealed reply), 671 (redacted reply). A hearing is not necessary. *See Loc. R. 105.6*.

Also pending are motions to seal the opening brief and opposition. ECF Nos. 658, 665. I have considered the motions and other filings in this case, included redacted versions of the sealed documents, and in the interest of protecting confidential, proprietary, trade secret, and/or commercially sensitive information, I will grant the motions to seal.

Intellectual Ventures also has filed objections to the Joint Record Exhibits, ECF No. 674 (redacted), 675 (sealed), as well as a motion to seal its objections, ECF No. 676. Its motion to seal is granted for the same reasons that the summary judgment briefings are sealed. However, the objections are overruled. And, although I relied on the sealed briefings for this Memorandum Opinion, its contents do not justify sealing it, because the public's interest in a public ruling outweighs the parties' interest in sealing information related to this case.

The essence of Capital One's antitrust claim is that IV is a "patent troll,"[3] and not just any patent troll, but a veritable Dovregubben.[4] Capital One asserts that IV's business practice is to acquire a vast portfolio of thousands of patents that purportedly deal with technology essential to the types of services offered by commercial banks (such as ATM transactions, mobile banking, on-line banking, and credit card transactions). It then employs an aggressive marketing scheme whereby it makes an "offer" for banks to license (Capital One really would prefer to say "extorts" banks to license) its entire portfolio for a period of years at a jaw-droppingly high price. But, Capital One insists, when the banks ask for details about the patents covered in the portfolio in order to determine whether their services infringe them, IV refuses to disclose sufficient information to enable them to make an intelligent decision about whether they should agree to the license. And, if the bank balks at licensing the entire portfolio at IV's take-it-or-leave-it price, IV then threatens to file a patent **[**26]** infringement claim against the bank regarding only a few of the patents in the portfolio. Adding insult to injury, IV then makes it clear that should it lose the **[*697]** patent infringement case, it will simply file another (and if needed, another, and so on) regarding a different set of its patents, until the prospect of endless high-cost litigation forces the bank to capitulate and license the entire portfolio.[5]

Capital One characterizes IV's business model as comprised of three components: *accumulate* a vast portfolio of patents purportedly relating to essential commercial banking services, *conceal* the details of those patents so that the banks cannot determine whether their products infringe any of IV's patents, and serially *litigate* to force the banks to capitulate and license the portfolio at exorbitant cost. This conduct, Capital One insists, constitutes monopolization under § 2 of the Sherman Act, *15 U.S.C. § 2*, attempted monopolization under § 2 of the Sherman Act, and unlawful asset acquisition under § 7 of the Clayton Act, *15 U.S.C. § 18*.

Nonsense, IV indignantly responds. It counters Capital One's charges by arguing that it legitimately purchased or otherwise acquired its large portfolio **[**27]** of patents that relate to multiple technology markets. It then offers to license its portfolio to banks (and other types of businesses), beginning its negotiation with an opening offer, and expecting the bank to counteroffer, thereby initiating a back-and-forth exchange that it hopes will result in a mutually-agreeable licensing fee. IV vehemently denies that it conceals the details of its individual patents or that Capital One could not determine what they relate to by reviewing publicly available information. As IV sees things, when Capital One declined to make a counter offer to its opening bid, it then selected a number of its patents and brought suit against Capital One, first in the Eastern District of Virginia, and then, when that suit was unsuccessful, in this Court, with respect to a different set of patents. Moreover, IV claims that Capital One is, in essence, an "efficient infringer"—an entity that engages in its business without care for whether it infringes on patents held by others, with the knowledge that a patent infringement case is expensive to bring, and many patent holders lack the funds to do so to protect their rights. As such, Capital One can play the odds, infringing **[**28]** patents with near impunity until the rare patent holder with the resources to sue does so, and then negotiate a favorable license fee.

IV points out that each of its patents is presumptively valid, and that it has an absolute right to file litigation to enforce them. And, in IV's view, if enforcing its patents through litigation has any monopoly effect (which IV denies it does), it has immunity under the *Noerr—Pennington* doctrine.[6] Moreover, IV argues that Capital One is barred by

---

[3] ***HN1***[] A "patent troll" is an individual or company "who acquires by purchase or application to the Patent and Trademark Office a patent that he uses not to protect an invention but to obtain a license fee from, or legal judgment against, an alleged infringer." *Carhart v. Carhart-Halaska Int'l, LLC, 788 F.3d 687, 691 (7th Cir. 2015)*. "Patent trolls are also known [as] 'patent assertion entities' (PAEs), [and] 'non-practicing entities' (NPEs)." *In re Packard, 751 F.3d 1307, 1325 (Fed. Cir. 2014)*.

[4] Dovregubben was the Troll King in Henrik Ibsen's 1867 play *Peer Gynt*.

[5] Capital One is not the first to make these claims about IV's business practices. *E.g.*, Robin Feldman & Tom Ewing, *The Giants Among Us*, 2012 Stan. Tech. L. Rev. 1, 2-15 (2012).

[6] ***HN2***[] Under the *Noerr—Pennington* doctrine, "[t]hose who petition government for redress," including by filing suit in court, "are generally immune from antitrust liability." *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 56, 57,*

both claim and issue preclusion from asserting its antitrust counterclaims because it brought virtually the exact claims in the Eastern District of Virginia suit, lost, and elected not to appeal. Further, IV challenges Capital One's definition of the relevant market for purposes of antitrust analysis, insisting that its portfolio consists of numerous distinct technology markets, not some monolithic **[*698]** "financial services portfolio" as claimed by Capital One.

IV also asserts that Capital One's antitrust theory is fundamentally flawed, because no liability can attach unless Capital One can prove that IV exercises monopoly power within a relevant market. "Monopoly power is the power to control prices **[**29]** or exclude competition." *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*; *see* *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (quoting *E.I. du Pont*); *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)* (same). IV insists that it does neither, because the correct market definition would recognize that what IV owns is a series of patents that relate to multiple, distinct technology markets. And IV could exercise monopoly power only if Capital One can show that its patents include those affecting alternative substitute technologies that Capital One otherwise could turn to in order to avoid having to license IV's patents. Capital One has not made this showing, IV contends, entitling it to summary judgment.

Antitrust Analysis and Economic Theory

Underlying the legal issues in this case are two important but competing policies. On one hand, we value innovation that leads to new inventions that advance science and technology, protecting that creative effort by issuing patents. ***HN3***[] A patent, by its very nature, vests its owner with a type of legal monopoly, which it can enforce against anyone who infringes the patent. Enforcing a patent through litigation protects this monopoly, even though in other circumstances we view monopolies as harmful.

The other important policy implicated by this case, of course, is the strong desire to ensure vigorous **[**30]** competition in the marketplace, so that consumers (whether businesses or individuals) can purchase at the lowest possible price. ***HN4***[] To promote the benefits of robust competition, ***antitrust law*** aims to prevent a company from having the ability to control the price of its product or exclude competitors to the extent that it can charge sustained supracompetitive prices (prices substantially above what a competitive price would be if consumers could simply buy a close substitute product from a competitor at lower cost).

HN5[] The exercise of monopoly power with regard to a single patent (or even a few patents) usually does not offend ***antitrust law***. But it is another matter to acquire a vast portfolio of patents that are essential to technology employed by an entire industry and then to compel its licensing at take-it-or-leave-it prices because it is not economically feasible to determine if alternative technologies, not covered by the accumulation of patents, are available. This acquisition and compelled licensing could amount to the ability to exercise monopoly power on an entirely different scale.

In a very real sense, ***antitrust law*** is founded on economic theory about how efficient markets should **[**31]** operate. In an ideally competitive market where there are no barriers to entry or exit by competing businesses, the availability of the same product (or a close substitute) from many sources will tend to drive the price downwards to a point slightly above the cost to make the product—the so-called "competitive price." Think of pizzerias. There are lots of them, and entry and exit from this business is relatively free and unrestricted. If one restaurant decides to charge too much for a slice of pizza, there are many others nearby where the consumer can buy at a lower cost. The ready supply of close substitutes keeps costs competitive—slightly above the cost of making the pizza.

[*699] But, if circumstances are such that one pizzeria can exclude competition or control prices by charging more than a competitive price because consumers are unable to avoid paying it by turning to lower-priced alternatives, then it has the ability to exercise market power. And ***HN6***[] the power to control prices or exclude competitions is

---

113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993) (citing *E. R.R. Presidents Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965))*.

the essence of monopoly power. *See Grinnell Corp., 384 U.S. at 571*. ***Antitrust law*** is designed to prevent the acquisition and exercise of monopoly power. *See id.*; *15 U.S.C. § 2*.

Each of the above important competing policies is at **[**32]** play in this case. Capital One argues, through its highly credentialed and impressive economic expert, Professor Fiona Scott Morton of Yale University, that IV possesses monopoly power in connection with its large financial services patent portfolio, which touches on essential technologies that commercial banks have heavily invested in and cannot realistically design around to avoid the reach of IV's patents. Because of the size of this portfolio (between 7,725 and 35,000 patents, depending on whether Capital One or IV's expert is correct),[7] IV is able to charge supracompetitive prices to license the portfolio. And IV's concealment of the details regarding the patents leaves Capital One unable (without incurring ruinous cost) to ferret out the particulars of each patent and assess whether it infringes any patents. Also at play is IV's aggressive policy of threatening (and bringing) expensive serial patent infringement suits. IV's aggregation of such a large portfolio, combined with its concealment and aggressive litigation strategies will, according to Capital One, eventually force it to capitulate and pay IV's supracompetitive price to license the entire portfolio.

As Professor Scott **[**33]** Morton sees it, antitrust analysis commonly used to determine whether a proposed merger will result in anticompetitive effects, simply does not work for the facts of this case. That is because merger analysis is *ex ante*, focusing on whether, if the merger is approved, the new entity will be able to charge a small but significant non-transitory increase in price (referred to as "SSNIP")[8] that it could maintain over time without competition from others making that price increase unsustainable. Put differently, SSNIP analysis is best done *before* the entity of interest has acquired monopoly power. Scott Morton reasons that this case requires *ex post* analysis because Capital One already had incurred significant costs to acquire the technology to compete with other commercial banks in essential services such as on-line banking, remote banking, and ATM and credit card transactions when IV began licensing its massive financial services patent portfolio. In other words, IV already had acquired monopoly power when it approached Capital One to license its patents. Because Capital One already had incurred substantial sunk costs in the technology in which it had invested, it was unable to design **[**34]** around IV's enormous portfolio to adopt non-infringing technologies the way it could have done if it knew of the breadth and scope of IV's patents before it incurred the cost of the technologies it adopted.

[*700] Under her proposed *ex post* analysis, it is IV's conduct after having acquired monopoly power that is critical to antitrust scrutiny. Through its trio of patent aggregation, concealment and litigation, IV has acquired insurmountable bargaining power enabling it to exercise "hold-up" power by demanding take-it-or-leave-it supracompetitive prices to license its financial services portfolio. And even though it has resisted doing so to date, eventually Capital One will be forced to capitulate to the threat of exorbitantly expensive patent litigation to purchase a license that it does not want, despite the fact that IV's singular lack of success in prosecuting any of its patent suits against IV (or other banks) suggests that its massive portfolio is in truth composed of nothing more than an amalgamation of weak patents. And, but for IV's practice of accumulation, concealment and litigation, it could never command a price to license its portfolio **[**35]** of weak patents at anything near the supracompetitive price it sought from Capital One.

Scott Morton analogizes IV's financial services patent portfolio to a "cluster market" that IV promotes as a single product (for which there are no close substitutes) at a supracompetitive price. And she asserts that IV exercises monopoly power, despite the fact that no bank (including Capital One) has agreed to purchase a license to the entire portfolio, and IV has yet to prevail in any of its patent suits against banks.

---

[7] According to Professor Scott Morton, IV has approximately 40,000 patents, 7,725 of which are financial services patents. Scott Morton Report ¶¶ 96 n.59, 170 n.136. Professor Gilbert asserts that "the portfolio that Intellectual Ventures initially offered to license to Capital One includes a much larger number of patents. Capital One's complaint characterizes Intellectual Ventures' offer as covering 35,000 patents." Gilbert Report ¶ 40 (citing Third-Party Compl. ¶ 40).

[8] *See* U.S. Dep't of Justice & Fed. Trade Comm'n, *Horizontal Merger Guidelines* § 4.1.1 (Aug. 19, 2010), *available at* https://www.justice.gov/atr/horizontal-merger-guidelines-08192010 (discussing SSNIP).

Pure humbug, counters IV, through its equally well-credentialed and impressive economic expert, Professor Richard Gilbert from the University of California, Berkley. He challenges Professor Scott Morton's market definition, arguing that the proper definition is not a "cluster" of financial services patents constituting a single product, but rather a collection of patents that relate to multiple distinct technology markets. Professor Gilbert relies on the Antitrust Guidelines for the Licensing of Intellectual Property issued jointly by the U.S. Department of Justice and the Federal Trade Commission ("Guidelines"). *See* U.S. Dep't of Justice & Fed. Trade Comm'n, *Antitrust Guidelines* ***[**36]*** *for the Licensing of Intellectual Property* (Jan. 12, 2017), *available at* https://www.justice.gov/atr/guidelines-and-policy-statements-0/2017-update-antitrust-guidelines-licensing-intellectual-property. The Guidelines state, relevantly, that "[a]lthough the intellectual property right confers the power to exclude with respect to the specific product, process, or work in question, there will often be sufficient actual or potential close substitutes for such product, process, or work to prevent the exercise of market power." *Id.* § 2.2, at 4. The flaw in Capital One's antitrust analysis, according to Professor Gilbert, is its failure to analyze the distinct technology markets for which IV does have patents to determine whether there are alternative close substitutes that Capital One could turn to in order to avoid having to license from IV.

As Professor Gilbert sees it, IV's patents touch on a large number of distinct technology markets, each of which must be analyzed using SSNIP analysis, which Professor Scott Morton failed to do. Thus, he strongly disagrees that IV's patent portfolio can be analyzed as a cluster market at all. And, even more fundamentally, he challenges Professor Scott Morton's **[**37]** conclusions, arguing that proper market definition and analysis requires looking at actual prices (competitive price, market price and monopoly price). Here, he insists, there are no prices at all because IV's licensing offer was only an opening bid in a negotiation, not a take-it-or-leave-it supracompetitive monopoly ultimatum. The negotiation did not progress to a point where a final demand was reached because Capital One refused to engage by making a **[*701]** counter-offer. Indeed, at least as of the time that discovery closed in this case, IV had not succeeded in selling a single license to its banking-related patents to Capital One or any other bank.

As IV and Capital One agree, ***HN7***[] the essential first step in analyzing the antitrust claims in this case is to define the relevant market by product(s) and geography. *See* *United States v. Marine Bancorporation, Inc., 418 U.S. 602, 618, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)*; *Brown Shoe Co. v. United States, 370 U.S. 294, 324, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*; *Buccaneer Energy (USA) Inc. v. Gunnison Energy Corp., 846 F.3d 1297, 1319-20 (10th Cir. 2017)*. "[M]arket definition is a deeply fact-intensive inquiry . . . ." *E.I. DuPont de Nemours & Co. v. Kolon Indus. Inc., 637 F.3d 435, 443 (4th Cir. 2011)* (quoting *Todd v. Exxon Corp., 275 F.3d 191, 199 (2d Cir. 2001))*. In determining the relevant market, the Court must consider "the 'commercial realities' faced by consumers." *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. Where the facts are hotly disputed, as here, defining relevant market is "generally a question for the trier of fact." ABA Section of ***Antitrust Law***, ***Antitrust Law*** *Developments* 627-30 (ABA 8th ed. 2017) **[**38]** , Ex. 127, Jt. Rec. 9557; *see also Fineman v. Armstrong World Indus., Inc., 980 F.2d 171, 199 (3d Cir. 1992)* ("[T]he determination of a relevant product market or submarket . . . is a highly factual one best allocated to the trier of fact."). The burden of proof lies with the antitrust plaintiff to prove relevant market. *Spectrum Sports, Inc. v. McQuillan 506 U.S. 447, 455-56, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*; *Berlyn Inc. v. The Gazette Newspapers, Inc., 73 F. App'x 576, 582 (4th Cir. 2003)*; *Satellite Television & Associated Res., Inc. v. Cont'l Cablevision of Va., Inc., 714 F.2d 351, 355 (4th Cir. 1983)*. When the parties proffer competing economic experts on the proper definition of relevant market, summary judgment is inappropriate as long as each expert's views could be found by the trier of fact to be reasonable. *Sprint Airlines, Inc. v. Nw. Airlines, Inc., 431 F.3d 917, 945 (6th Cir. 2006)* ("'[I]ntellectual disagreement' among the parties' experts creates material factual disputes on the relevant market . . . so as to preclude an award of summary judgment." (quoting record)); *Thompson v. Metro. Multi-List, Inc., 934 F.2d 1566, 1573-74 (11th Cir. 1991)* ("The parameters of a given market are questions of fact, and therefore summary judgment is inappropriate if there are material differences of fact." (internal citations omitted)).

IV does not dispute this authority, but contends that it is entitled to summary judgment despite the substantial disagreement between Professor Scott Morton and Professor Gilbert on the definition of relevant market (as well as other antitrust elements) because the methodology used by Professor Scott Morton is so far removed from commonly employed **[**39]** antitrust analysis that it must be rejected as unreasonable as a matter of law. It is true that Professor Gilbert's analysis of relevant market is firmly grounded in commonly used antitrust analysis, as evidenced by its reliance on the Department of Justice and Federal Trade Commission's Antitrust Guidelines for the Licensing of Intellectual Property. But, in support of their alternative analysis, Capital One and Professor Scott Morton have cited authority for the application of cluster market analysis to the definition of a relevant antitrust market. *See* United States v. Phila. Nat'l Bank, 374 U.S. 321, 355-56, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963) (citing *Brown Shoe*); United States v. Grinnell Corp., 384 U.S. 563, 572-73, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966) (citing *Brown Shoe*); Brown Shoe, 370 U.S. at 324-25; and Fed. Trade Comm'n v. Staples, **[*702]** Inc., 190 F. Supp. 3d 100, 116-17 (D.D.C. 2016) (citing *Brown Shoe*); *see also* Ian Ayres, *Rationalizing Antitrust Cluster Markets*, 95 Yale L. J. 109 (1985). And, Professor Scott Morton has noted that the Department of Justice Horizontal Merger Guidelines that Professor Gilbert referenced do recognize that "[e]vidence of competitive effects can inform market definition, just as market definition can be informative regarding competitive effects." *Horizontal Merger Guidelines* § 4.

With respect to cluster markets, Professor Ayres, one of the early scholars to study such markets in ***antitrust law***, was critical of the courts' failure to articulate "a sound justifying **[**40]** theory" of when cluster analysis is appropriate, opting instead for a series of "ad hoc" standards. He noted:

> The lack of a justifying theory apparent in *Philadelphia National Bank* and *Grinnell* has left lower courts virtually unconstrained to develop additional criteria for cluster definitions. Lower courts have based cluster definitions on the existence of trade associations; census classifications; functional complementarity; common technology, distribution or marketing; a unique product group; and other market characteristics. While courts have a plethora of standards from which to choose, they currently have no basis for distinguishing the good from the bad (and the ugly). In sum, while some cluster markets have been defined correctly, the lack of a sound justifying theory has led courts to adopt conflicting and ad hoc standards. In a world in which antitrust defendants are usually multiproduct firms, the problem of deciding when to cluster a group of products needs to be formally addressed.

Ayres, supra, at 112-14. He advocated using a standard he called "transactional complementarity," meaning:

> Goods are transactional complements if buying them from a single firm significantly reduces consumers' transaction **[**41]** costs. In other words, given equal prices, consumers prefer to buy transactional complements from a single firm. If consumers strongly prefer to purchase a group of goods from a single firm, firms selling only part of this group will not compete effectively with firms supplying the full line.

Id. at 114-15.

Applying Ayres's standard for using cluster markets to define a relevant antitrust market in this case would be problematic for Capital One, because Professor Scott Morton's analysis rests on the notion that Capital One (and other banks to which IV has pitched its portfolio) *does not want* the cluster of products that IV offers. In such circumstances, it would be difficult to argue that consumers (banks) "strongly prefer to purchase a group of goods" (IV's patent portfolio) from a single firm (IV). Nevertheless, the parties do not cite, nor have I located, any controlling legal authority that Professor Ayres's test for the use of cluster markets must be used instead of any others that courts that have employed cluster market analysis in antitrust cases have used. While factfinders ultimately might reject Scott Morton's reliance on cluster markets to justify her antitrust market analysis, I cannot **[**42]** conclude that as a matter of law it is unreasonable.

But, neither is Professor Gilbert's analysis immune from criticism. His contention that it would be economically feasible for Capital One to discern the particulars of each of IV's thousands of patents to determine whether there are close substitutes to which Capital One could turn in order to avoid IV's portfolio, even if all of the information needed to do so was readily available, stretches plausibility to the near breaking point.[9] Capital One has produced

---

[9] It is ironic that, to support its argument that it had a good faith basis to bring patent infringement claims against Capital One in this case, IV designated nine Ph.D.s who would support its infringement analysis. *See* ECF Nos. 616 (paperless order

[*703] evidence that IV does conceal a significant amount of information regarding its patent holdings, which has been confirmed by others. *See, e.g.*, Robin Feldman & Tom Ewing, *The Giants Among Us*, 2012 Stan. Tech. L. Rev. 1 (2012). Feldman and Ewing concluded:

> Much about Intellectual Ventures is shrouded in secrecy. Intellectual Ventures has acknowledged that it intentionally withholds the true scope and nature of its IP portfolio. Its licensing transactions and interactions are protected by strict nondisclosure agreements, and the structure of its business activities makes it difficult to get a handle on the full extent of its activities. For example, or research has identified more than a thousand shell companies **[**43]** that intellectual Ventures has used to conduct its intellectual property acquisitions, and it has taken considerable effort to identify these. The range and scope of its activities are so vast that it is difficult to conceptualize the reach of Intellectual Ventures.

Id. at 3.

The sheer scope of IV's patent holdings calls into question how it would be feasible to perform the analysis of available substitutes that Professor Gilbert calls for to determine whether there are close substitutes to which Capital One could turn to avoid the reach of IV's portfolio. And while the Antitrust Guidelines for the Licensing of Intellectual Property do apply the SSNIP analysis favored by Professor Gilbert, there is nothing in the Guidelines that seems to recognize the near impossibility of doing so with a collection of intellectual property as massive as IV's (despite the fact that it was revised and reissued on January 12, 2017).

After all, the phenomenon of applying antitrust doctrine to intellectual property rights on the scale presented by IV's holdings is a new challenge. As noted by Feldman and Ewing:

> The patent world is quietly undergoing a change of seismic proportions. In a few short **[**44]** years, a handful of entities have amassed vast treasuries of patents on an unprecedented scale. To give a sense of the magnitude of this change, our research shows that in little more than five years, the most massive of these has accumulated 30,000-60,000 patents worldwide, which would make it the 5th largest patent portfolio of any domestic US company and the 15th largest of any company in the world. . . .
>
> These entities, which we call mass aggregators, do not engage in the manufacturing of products nor do they conduct much research. Rather, they pursue other goals of interest to their founders and investors. Non-practicing entities have been around the paten world for some time, and in the past they have fallen into two broad categories. The first category includes universities and research laboratories, which tend to have scholars engaged in basic research and license out inventions rather than manufacturing products on their **[*704]** own. The second category includes individuals or small groups who purchase patents to assert them against existing, successful products. Those in the second category have been described colloquially as 'trolls,' which appears to be a reference to the children's **[**45]** tale of the three billy goats who must pay a toll to the troll waiting under the bridge if they wish to pass. Troll activity is generally reviled by operating companies as falling somewhere between extortion and drag on innovation. In particular, many believe that patent trolls often extract a disproportionate return, far beyond the value that their patented invention adds to the commercial product, if it adds at all.
>
> The new mass aggregator, however, is an entirely different beast. To begin with, funding sources for mass aggregators include some very successful and respectable organizations, including manufacturing companies such as Apple, eBay, Google, Intel, Microsoft, Nokia, and Sony, as well as some academic institutions such as the University of Pennsylvania and Notre Dame . . . .

Id. at 1.

---

acknowledging receipt of expert reports, on file in chambers), 619 (letter order addressing quantity of expert reports), 621 (correspondence from IV explaining purpose of multiple experts). If, *a fortiori*, it takes an assortment of Ph.D.s just to support the bringing of a patent infringement suit with respect to only *four* patents, imagine the scope of the analysis Capital One would have to conduct (and cost it would have to incur) in order to determine whether the technologies it had acquired before IV approached it with its licensing demands infringed the thousands of patents in IV's portfolio (assuming the information needed to do so was fully available to it, and not concealed as Capital One contends).

And even if cluster market analysis ultimately is not considered the appropriate framework for analyzing the relevant antitrust market in cases such as this one (despite the fact that Capital One has cited abundant facts that a jury reasonably could conclude supports its contention that IV does, in fact, market its patents as a portfolio, rather than a collection of individual patents relating to a number **[**46]** of discrete technology markets), it is hard to deny that there is something concerning from an antitrust perspective about the way in which IV engages in its licensing business. *See, e.g.*, Michelle Miller & Janusz Ordover, *Intellectual Ventures v. Capital One: Can* ***Antitrust Law*** *and Economics Get Us Past the Trolls*?, Competition Policy Int'l: Antitrust Chronicle (Jan. 19, 2015), *available at* https://www.competitionpolicyinternational.com/intellectual-ventures-v-capital-one-canantitrust-law-and-economics-get-us-past-the-trolls ("[M]any PAEs [Patent Assertion Entities] exploit the lack of transparency in patent ownership to amass huge portfolios of 'secret' patents that are then asserted against manufacturers. Manufacturers faced with a royalty demand based on a large number of unidentified patents cannot determine an appropriate royalty, or even whether any royalty is owed at all. That uncertainty may lead to manufactures paying supracompetitive royalties that can depress product innovation.").

If the only issue raised in IV's summary judgment motion was whether there are genuine disputes of material fact that would entitle it to judgment as a matter of law on the issues of possession **[**47]** of monopoly power in a relevant market and the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident, *see* *Eastman Kodak, 504 U.S. at 481*, I would deny the motion and allow the case to proceed to trial. This is because I have concluded from the record before me that Capital One has identified admissible evidence to establish a genuine dispute as to these issues, precluding summary judgment. But as next will be seen, there are further legal issues which, when resolved, require the granting of IV's motion.

Standard of Review

HN8[] Summary judgment is proper when the moving party demonstrates, through "particular parts of materials in the record, including depositions, documents, electronically stored information, affidavits or declarations, stipulations . . . , admissions, interrogatory answers, or other materials," that "there is no genuine dispute as to any **[*705]** material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*, *(c)(1)(A)*; *see* *Baldwin v. City of Greensboro, 714 F.3d 828, 833 (4th Cir. 2013)*. If the party seeking summary judgment demonstrates that there is no evidence to support the nonmoving party's case, the burden shifts to the nonmoving party to identify **[**48]** evidence that shows that a genuine dispute exists as to material facts. *See* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 585-87, 106 S. Ct. 1348, 89 L. Ed. 2d 538 & n.10 (1986)*. The existence of only a "scintilla of evidence" is not enough to defeat a motion for summary judgment. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 251-52, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. Instead, the evidentiary materials submitted must show facts from which the finder of fact reasonably could find for the party opposing summary judgment. *Id.*

Noerr-Pennington Immunity

HN9[] ***Antitrust law*** proscribes the willful acquisition or maintenance of monopoly power within a market, as well as attempts to monopolize. *See* *15 U.S.C. § 2*; *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*; *United States v. Grinnell Corp., 384 U.S. 563, 570-571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. In contrast, a patent creates a legal monopoly. *Fed. Trade Comm'n v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 2231, 186 L. Ed. 2d 343 (2013)*. Additionally, "[t]hose who petition government for redress are generally immune from antitrust liability" under what is known as *Noerr-Pennington* immunity. *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc. ("PREI"), 508 U.S. 49, 56, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* (citing *E. R.R. Presidents Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*). This holds true for parties who file suit in court. *See* *id. at 57* (noting that *California Motor Transport Co. v. Trucking Unlimited ("California Motor"), 404 U.S. 508, 510, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*, "extended *Noerr* to 'the approach of citizens . . . to courts'"). And, patent holders that believe that their patents have been infringed may seek to enforce their rights under the patent through patent litigation. *35 U.S.C. § 281* ("A patentee shall have remedy by **[**49]** civil action for infringement of his patent."). Thus, when a party challenges a patent holder's efforts to enforce its patents through litigation, the court must determine whether the patent holder is exercising "the lawful restraint on trade of the patent monopoly" or "the illegal restraint prohibited broadly by the *Sherman Act*." *United States v. Line Material Co., 333 U.S. 287, 310, 68 S. Ct. 550, 92 L. Ed. 701 (1948)*. To do so, courts must "balance the privileges of [a patent holder] under [its] patent grants with the prohibitions of the *Sherman Act* against combinations and attempts to monopolize." *United States v. U.S. Gypsum Co., 333 U.S. 364, 390-91, 68 S. Ct. 525, 92 L. Ed. 746 (1948)*.

IV contends that "[u]nder the *First Amendment* and the *Noerr-Pennington* doctrine, Intellectual Ventures I and Intellectual Ventures II, like other patent owners, . . . are entitled to petition a court for a redress of their grievances," that is, IV may sue corporations like Capital One for patent infringement without being sued under the antitrust laws for bringing suit. IV Mem. 12. On that basis, it argues that, for Capital One to proceed on its antitrust claims against IV based on IV's patent litigation activities, Capital One must establish that an exception to *Noerr-Pennington* exists such that IV was not entitled to exercise its right to sue. *Id.* According to IV, Capital One has failed **[**50]** to prove that IV's claims were "objectively baseless," as it had to do to **[*706]** prove that IV was not exempt from antitrust liability. *Id.* at 13. IV asserts that Capital One instead tried to prove that IV's claims were "unsuccessful," which IV insists is not enough. *Id.*

Applicability of Noerr-Pennington immunity

Capital One counters that *Noerr-Pennington* immunity simply does not apply because the "litigation conduct is part of a broader monopolistic scheme," and "*Noerr* does not insulate the entire scheme." Capital One Opp'n 19; *see also id.* at 21 ("IV's lawsuits against Capital One (and other banks) are part of its overall, multi-step scheme to force a portfolio license at a supracompetitive price."). Insofar as Capital One argues that "IV's aggregation of patents to create market power would support substantial Section 2 and Section 7 claims on its own," and that "the concealment and misdirection at the heart of IV's extortive licensing strategy would be anticompetitive even if IV had never filed a lawsuit," *id.*, this contention is contrary to Capital One's pleadings. Capital One alleges that "IV has eliminated banks' access to substitutes for IV's license, both in the form of other patent licenses and banking-product designs, **[**51]** through a carefully orchestrated campaign of patent aggregation, concealment, and sham litigation," Fourth Am. Countercl. (Redacted) ¶ 157, and that "IV's use of patent accumulations to cut off banks' design and license choices, as weapons in negotiation, and to provide fuel for repeated sham litigation, violates *Section 2* of the Sherman Act," *id. ¶ 125*. *See also id.* ¶ 171 ("IV's actions in secretly aggregating 3,500 financial-services patents through shell companies, subjecting Capital One to sham litigation, demanding nine-figure sums for a limited and temporary patent respite, and refusing to disclose many of the patents that IV demanded Capital One pay more than $100 million for are all part of a carefully orchestrated plan to achieve monopoly power in the relevant technology-licensing market and wield it against the banking industry."); *id. ¶ 177* ("Even though the patents in its portfolio are individually of little or no worth, IV can and does acquire monopoly power by amassing them as a source of serial sham litigation threats."); Third Party Compl. (Redacted) ¶¶ 17, 49, 63, 69 (same).

And, while patent acquisition and aggregation is the focus of the *Clayton Act* claim, ***HN10***[] acquisition is actionable **[**52]** under the *Clayton Act* only where "the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18*. To establish this effect, Capital One relies on IV's purported "campaign," which could not succeed absent the allegedly sham litigation. *See* Third Am. Countercl. (Sealed) ¶ 218 ("IV combines [its patent acquisitions] in a way that 'gives [IV] market power,' because, now that IV has eliminated alternative licensing sources by acquiring the patents, banks 'can not avoid' paying a hold-up demand (which IV styles as a 'license') if they want to avoid repeated meritless litigation and uncertainty."); *see also* Third Party Compl. (Sealed) ¶ 110 (same). Clearly, the allegation of sham litigation is an integral component of IV's alleged strategy underlying all of Capital One's claims. *See* Third Am. Countercl. ¶¶ 125, 157, 171, 177, 218; Third Party Compl. ¶¶ 17, 49, 63, 69, 110.

Moreover, even if the sham litigation allegations could be excised from its pleadings, Capital One does not cite any controlling authority in support of its position that *Noerr-Pennington* immunity does not apply because sham litigation is only one component of a larger scheme, **[**53]** and I am not persuaded by the authority it cites from other circuits. Capital One includes a quote from *California Motor* as indirect support for its argument: "*First Amendment* rights are not immunized from regulation when they are used as an integral **[*707]** part of conduct which violates a valid statute. . . . If the end result is unlawful, it matters not that the means used in violation may be lawful." Capital One Opp'n 19 (quoting *California Motor, 404 U.S. at 514-15*). These two sentences that Capital One pairs together (with the effect that it appears, from the quote, that *California Motor* provides that an exception exists to *Noerr-Pennington* immunity when the litigation is part of a broader scheme to violate the law) actually bookend a section of the opinion that has nothing to do with litigation as part of a broader scheme. Rather, on pages 514 and 515 of its *California Motor* opinion, the Supreme Court explained the principles underpinning *Noerr-Pennington* immunity and the sham litigation exception (which I discuss further, below). First, it observed that citizens are not always immune from legal consequences when exercising their *First Amendment* rights and that the *First Amendment* does not protect the press from antitrust laws. *California Motor, 404 U.S. at 514*. It then noted that "*First Amendment* rights may **[**54]** not be used as the means or the pretext for achieving 'substantial evils' which the legislature has the power to control." *Id. at 515* (internal citation omitted). And it concluded that when businesses combine efforts to "harass and deter their competitors," even when their actions are in litigation that otherwise would be protected under *Noerr-Pennington*, their actions violate the antitrust laws. *Id.*

Capital One also cites *Fed. Trade Comm'n v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, as stating that "anticompetitive effects [that] fall within the scope of the exclusionary potential of the patent" do not "immunize [conduct] from antitrust attack." Capital One Opp'n 19 (quoting *Actavis, 133 S. Ct. at 2230*). But, a holding that, when the validity and preclusive scope of a patent are in question, the patent holder can be sued under antitrust laws for activities that may be permissible under the patent (such as charging *supra*-competitive prices) does not mean that a patent holder can be sued under antitrust laws for *filing suit* to enforce the patent, and Capital One has not identified any binding authority extending the Supreme Court holding in this manner.

Exceptions to Noerr-Pennington immunity

Alternatively, Capital One argues that IV is not immune to suit under *Noerr-Pennington* because **[**55]** a party loses its immunity if it brings a series of "petitions . . . 'pursuant to a policy of starting legal proceedings without regard to the merits' and for the purpose of injuring competition," which is what, in Capital One's view, IV did when it "brought its ten patent claims against Capital One without regard to the merits and for the purpose of restraining trade." Capital One Opp'n 22-25 (quoting *USS-POSCO Indus. v. Contra Costa Cty. Bldg. & Constr. Trade Council, AFL-CIO, 31 F.3d 800, 811 (9th Cir. 1994))*.

> ***HN11***[] A patentee who brings an infringement suit may [lose its *Noerr-Pennington* immunity and] be subject to antitrust liability for the anti-competitive effects of that suit if the alleged infringer (the antitrust plaintiff) proves (1) that the asserted patent was obtained through knowing and willful fraud within the meaning of *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*, or (2) that the infringement suit was "a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor."

Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068 (Fed. Cir. 1998) (quoting *Noerr, 365 U.S. at 144*); **[*708]** *see also* *Actavis, 133 S. Ct. at 2239* (Roberts, C.J., dissenting) ("If its actions are within the scope of the patent, they are not subject to antitrust scrutiny, with two exceptions concededly not applicable here: (1) when the parties settle sham litigation, cf. [*PREI, 508 U.S. at 60-61*]; and (2) when the litigation involves **[**56]** a patent obtained through fraud on the Patent and Trademark Office. *Walker Process Equipment, supra, at 177, 86 S.Ct. 347*.").

1. Exception for litigation of patents procured by fraud

Walker Process held narrowly that ***HN12***[] "the enforcement of a patent procured by fraud on the Patent Office may be violative of *§ 2* of the Sherman Act provided the other elements necessary to a § 2 case are present." *382 U.S. at 174*. Thus, "'to strip [a patentee] of its exemption from the antitrust laws' because of its attempting to enforce its patent monopoly, an antitrust plaintiff is first required to prove that the patentee 'obtained the patent by knowingly and willfully misrepresenting facts to the [Patent and Trademark Office]'" and that the patent holder seeking to enforce its patent through litigation was "aware of the fraud when bringing suit." *Nobelpharma, 141 F.3d at 1068-69* (citing *Walker, 382 U.S. at 177* & n.6) (footnote omitted). For *Walker Process* purposes, "fraud is a more serious offense than inequitable conduct." *Id. at 1070*. Where, as here, there is no evidence that the Patent Office was tricked by fraud or that IV (which later acquired the patents) was aware of any such fraud, *Walker Process*'s holding has no application.

2. Sham litigation exception

Because *Walker Process* is inapplicable, to determine whether IV is immune from antitrust **[**57]** liability stemming from its patent litigation, I must determine whether the "sham litigation exception to *Noerr-Pennington* immunity" applies. *See Tyco Healthcare Grp. LP v. Mut. Pharm. Co., 762 F.3d 1338, 1343 (Fed. Cir. 2014)*. ***HN13***[] The Supreme Court first observed that "[t]here may be situations in which a publicity campaign, ostensibly directed toward influencing governmental action, is a mere sham to cover up what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor and the application of the *Sherman Act* would be justified" in *Noerr, 365 U.S. at 144*. The sham litigation exception has been extended to patent litigation, in which a patentee's "conduct in the prosecution of a patent" may be "sufficient to strip [the] patentee of its immunity from the antitrust laws." *Nobelpharma, 141 F.3d at 1067*. But this exception to *Noerr-Pennington* immunity is narrow, "[g]iven the presumption of patent validity and the burden on the patent challenger to prove invalidity by clear and convincing evidence." *Tyco Healthcare, 762 F.3d at 1343*. Consequently, rarely will "a patentee's assertion of its patent in the face of a claim of invalidity . . . be so unreasonable as to support a claim that the patentee has engaged in sham litigation." *Id.*

As for what qualifies as sham litigation, *PREI, 508 U.S. 49*, and *California Motor, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642*, provide guidance. **[**58]** In *California Motor*, a group of trucking companies brought antitrust claims against another group of trucking companies, alleging that the defendants "conspired to monopolize trade and commerce in the transportation of goods" through "a concerted action . . . to institute state and federal proceedings [including rehearings, reviews, and appeals from agency and court orders] to resist and defeat applications by [the plaintiffs] to acquire operating rights or to transfer or register those rights." *404 U.S. at 509*. **[*709]** As noted, the *California Motor* Court extended *Noerr-Pennington* immunity, holding that ***HN14***[] an antitrust claim cannot be based upon "the approach of citizens or groups of them to administrative agencies . . . [or] to courts." *Id. at 510*. But, the Court concluded that the ***HN15***[] allegations in the case before it, that the defendants "sought to bar their competitors from meaningful access to adjudicatory tribunals and so to usurp that decisionmaking process" and "'instituted the proceedings and actions . . . with or without probable cause, and regardless of the merits of the cases,'" fell "within the 'sham' exception in the Noerr case, as adapted to the adjudicatory process." *Id. at 512, 516*. It reasoned that, when a party's legal **[**59]** actions reflect "a pattern of baseless, repetitive claims" that "leads the factfinder to conclude that the administrative and judicial processes have been abused," that party "cannot acquire immunity by seeking refuge under the umbrella of 'political expression.'" *Id. at 513*.

In *PREI*, the operators of a resort hotel ("PRE") "sought to develop a market for the sale of videodisc players to other hotels wishing to offer in-room viewing of prerecorded material." Columbia Picture Industries, Inc. ("Columbia") "held copyrights to the motion pictures recorded on the videodiscs that PRE purchased" and, like PRE, "licensed the transmission of copyrighted motion pictures to hotel rooms." *508 U.S. at 51-52*. Columbia sued PRE for copyright infringement, and PRE counterclaimed in antitrust, claiming that "Columbia's copyright action was a mere sham that cloaked underlying acts of monopolization and conspiracy to restrain trade." *Id. at 52*. Notably, Columbia only initiated one suit against PRE, *id.*, unlike the "pattern of baseless, repetitive claims" that defeated the antitrust defendants' immunity claim in *California Motor, 404 U.S. at 513*. It is also significant that in *PREI*, the district court case was in the same posture as this case, with a summary judgment motion **[**60]** pending, and the court decided the case on summary judgment. *PREI, 508 U.S. at 53*.

The *PREI* Court held that, ***HN16***[] to qualify as "sham litigation," a lawsuit "must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits," and "the litigant's subjective motivation" must be "to interfere *directly* with the business relationships of a competitor." *PREI, 508 U.S. at 60-61*; *see Tyco Healthcare, 762 F.3d at 1343* (noting that a lawsuit qualifies as "sham litigation" under the *PREI* test when it "(1) is 'objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits' (the objective element), and (2) is motivated by a desire 'to interfere *directly* with the business relationships of a competitor' (the subjective element)" (quoting *PREI, 508 U.S. at 60-61*)). Because "the antitrust defendant admittedly had probable cause to institute [its copyright suit]," the Court concluded that its suit against PREI was not objectively baseless and therefore could not qualify as sham litigation to defeat Noerr-Pennington immunity. *PREI, 508 U.S. at 51*. Thus, although both factors must be present to establish that litigation is a sham, ***HN17***[] a finding of "an objectively reasonable effort to litigate" is sufficient to show that the litigation **[**61]** was not a sham, "regardless of subjective intent." *Id. at 51*. Simply put, if the court concludes that the antitrust defendant had probable cause to file suit (which it can determine as a matter of law if, as here, "there is no dispute over the predicate facts of the underlying legal proceeding"), it cannot find that the defendant engaged in sham litigation, even if the **[*710]** litigant filed suit without any expectation of success. *See id. at 62, 63*.

The *PREI* Court analogized to the common law tort of wrongful civil proceedings (often erroneously referred to as malicious prosecution, a tort that involves wrongful *criminal* proceedings) to define probable cause for purposes of determining whether litigation is objectively baseless. *Id. at 62*.

> ***HN18***[] The notion of probable cause . . . requires the plaintiff to prove that the defendant lacked probable cause to institute an unsuccessful civil lawsuit and that the defendant pressed the action for an improper, malicious purpose. *Stewart v. Sonneborn, 98 U.S. 187, 194, 25 L. Ed. 116 . . . (1879)*; *Wyatt v. Cole, 504 U.S. 158, 176, 112 S. Ct. 1827, 118 L. Ed. 2d 504 . . . (1992)* (REHNQUIST, C.J., dissenting); T. Cooley, Law of Torts. *Cf. Wheeler v. Nesbitt, 65 U.S. 544, 24 How. 544, 549-50, 16 L.Ed. 765 (1861)]* Probable cause to institute civil proceedings requires no more than a "reasonabl[e] belie[f] that there is a chance that [a] claim may be held valid upon adjudication" (internal quotation marks omitted). **[**62]** *Hubbard v. Beatty & Hyde, Inc., 343 Mass. 258, 262, 178 N.E.2d 485, 488 (1961)*; *Restatement (Second) of Torts § 675, Comment e*, pp. 454-455 (1977). Because the absence of probable cause is an essential element of the tort, the existence of probable cause is an absolute defense. *See Crescent City Live Stock Co. v. Butchers' Union Slaughter-House Co., 120 U.S. 141, 149, 7 S. Ct. 472, 30 L. Ed. 614 . . . (1887)*; *Wheeler, supra, 24 How. at 551*; *Liberty Loan Corp. of Gadsden v. Mizell, 410 So. 2d 45, 48 (Ala. 1982)*. . . . When a court has found that an antitrust defendant claiming *Noerr* immunity had probable cause to sue, that finding compels the conclusion that a reasonable litigant in the defendant's position could realistically expect success on the merits of the challenged lawsuit. . . . [T]herefore, a proper probable cause determination irrefutably demonstrates that an antitrust plaintiff has not proved the objective prong of the sham exception and that the defendant is accordingly entitled to *Noerr* immunity.

Id. at 62-63 (some internal citations omitted).

In his concurrence, Justice Stevens "agreed with the Court's disposition of [*PREI*] and with its holding that 'an objectively reasonable effort to litigate cannot be sham regardless of subjective intent,'" but he wrote separately because he believed that the majority's opinion included "unnecessarily broad dicta" that the Court "might regret when confronted with a more complicated case." *Id. at 67-68*. Justice Stevens distinguished cases like *PREI* in which a single lawsuit is alleged to be a sham, from **[**63]** cases like *California Motor* that involved "repetitive filings." *Id. at 67-73*. He noted that "[t]here might well be lawsuits" in which "'reasonable litigant[s] could realistically expect success on the merits,'" but the litigation could "be objectively *unreasonable*" nonetheless, "and thus shams." *Id. at 68*. Justice Stevens observed that "more complicated cases [previously before the Supreme Court], in which, for example, the alleged competitive injury has involved something more than the threat of an adverse outcome in a single lawsuit, have produced less definite rules." *Id. at 72-73*. Citing *California Motor*, he stated that "[r]epetitive filings, some of which are successful and some unsuccessful, may support an inference that the process is being misused." *Id. at 73*. Moreover, he said, "[i]n such a case, a rule that a single meritorious action can never constitute a sham cannot be dispositive," and "a simple rule may be hard to apply when there is evidence that the judicial process has been used as part of a larger program to control a market and to interfere **[*711]** with a potential competitor's financing without any interest in the outcome of the lawsuit itself . . . ." *Id. at 73*. But, notably, the majority did not modify its opinion to **[**64]** address the concerns Justice Stevens raised, and his views regarding how *Noerr-Pennington* immunity should apply do not limit the majority opinion.

Similarly, in *Waugh Chapel S., LLC v. United Food & Commercial Workers Union Local 27*, the Fourth Circuit, considering a series of proceedings in the labor context, observed that "[i]t is unclear whether *PREI* [and its two-step standard] distinguished or displaced the sham litigation test first propounded in *California Motor*" for analyzing the proceedings on the record before it. *728 F.3d 354, 363 (4th Cir. 2013)*. The Fourth Circuit noted that, ***HN19***[] under the *California Motor* standard, "the focus is not on any single case. Rather a district court should conduct a holistic evaluation of whether 'the administrative and judicial processes have been abused.'" *Id.* (quoting *Cal. Motor, 404 U.S. at 513*). It is "[t]he pattern of the legal proceedings, not their individual merits," that the court considers to determine "whether the [antitrust defendant] indiscriminately filed . . . a series of legal proceedings without regard for the merits and for the purpose of violating federal law." *Id.* As with the *PREI* standard, "the subjective motive of the litigant and the objective merits of the suits are relevant," but **[**65]** the *California Motor* standard is different because "other signs of bad-faith litigation . . . may also be probative of an abuse of the adjudicatory process." *Id.*

The Fourth Circuit adopted the Second and Ninth Circuits' approach[10] in reading ***HN20***[] *PREI* and *California Motor* "as applying to different situations. *Professional Real Estate Investors* provides a strict two-step analysis to assess whether a single action constitutes sham petitioning . . . . *California Motor Transport* deals with the case where the defendant is accused of bringing a whole series of legal proceedings." *Id.* (quoting *USS-POSCO Indus. v. Contra Costa Cty. Bldg. & Const. Trades Council, AFL-CIO ("POSCO"), 31 F.3d 800, 810-11 (9th Cir. 1994)*; citing *Primetime 24 Joint Vent. v. Nat'l Broad. Co., 219 F.3d 92, 101 (2d Cir. 2000))*. The Fourth Circuit noted that the *PREI* standard "is ill-fitted to test whether a series of legal proceedings is sham litigation," especially when "the presiding tribunal [for earlier] cases had no occasion to measure the baselessness of the suit because (1) it had no inkling that the action comprised a possible campaign of sham litigation, and (2) the plaintiffs preempted an assessment of frivolity by prematurely withdrawing some of their suits." *Id. at 364*. Thus, under Fourth Circuit law, in the labor context, "when purported **[**66]** sham litigation encompasses a series of legal proceedings rather than a singular legal action, . . . the sham litigation standard of *California Motor* should govern." *Id.*

The parties disagree about which standard I should apply in this case. IV insists that Federal Circuit law governs, and therefore I should apply the *PREI* standard. *See* IV Mem. 13. Indeed, ***HN21***[] "an antitrust claim premised on stripping a patentee of its immunity from the antitrust laws **[*712]** is typically raised as a counterclaim by a defendant in a patent infringement suit," and, "[b]ecause most cases involving these issues will therefore be appealed to [the Federal Circuit]," immunity from antitrust laws "should [be] decide[d] . as a matter of Federal Circuit law, rather than [by] rely[ing] on various regional precedents." *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1067-68 (Fed. Cir. 1998)*. On that basis, the Federal Circuit held that for "all antitrust claims premised on the bringing of a patent infringement suit," the issue of "whether conduct in procuring or enforcing a patent is sufficient to strip a patentee of its immunity from the antitrust laws is to be decided as a question of Federal Circuit law," although "the law of the appropriate **[**67]** regional circuit [applies] to issues involving other elements of ***antitrust law*** such as relevant market, market power, damages, etc." *Id. at 1068*. This language is unambiguous in its application to instances of patent litigation.

---

[10] Other circuits do not take this approach. *E.g., In re Wellbutrin XL Antitrust Litig. Indirect Purchaser Class, 868 F.3d 132, 148 (3d Cir. 2017)* (applying two-part test from *PREI* without considering *California Motor*'s standard), *judgment entered sub nom. In re Wellbutrin XL Antitrust Litig., 868 F.3d 132, 2017 WL 3529114 (3d Cir. 2017)*; *Content Extraction & Transmission LLC v. Wells Fargo Bank, Nat'l Ass'n, 776 F.3d 1343, 1350 (Fed. Cir. 2014)* (same); *Bryant v. Military Dep't of Mississippi, 597 F.3d 678, 690-91 (5th Cir. 2010)* (considering *PREI* standard as well as test stated in *Bill Johnson's Rest. v. NLRB, 461 U.S. 731, 733-35, 103 S. Ct. 2161, 76 L. Ed. 2d 277 (1983)*, in labor context).

Nonetheless, Capital One argues that Federal Circuit law does not apply in this instance because it is not necessary to resolve any issues under patent law to determine antitrust liability, and this Court should, under Fourth Circuit law, apply the *California Motor* standard instead because the facts of this case involve what Capital One characterizes as a series of legal proceedings. Capital One Opp'n 23 n.7. In its view, "Capital One's claims are based on IV's overall scheme, not solely on IV's 'conduct in . . . enforcing a patent." *Id.* Capital One contends in the alternative that, even under Federal Circuit law, *California Motor*, not *PREI*, "is still the correct standard because the Federal Circuit has not reached the question of whether [*California Motor*] applies to a series of petitions," as Capital One asserts is present in this case, and "every circuit that has addressed the issue [including the Fourth Circuit] holds that the [*California Motor*] standard, not *PREI* **[**68]** , applies where, as here, more than one lawsuit (or petition) is at issue." *Id.* at 23.

Federal Circuit law, under which *PREI* provides the standard for deciding whether *Noerr-Pennington* immunity exists or whether the sham-litigation exception is present, clearly applies in this case. Capital One's antitrust claims are counterclaims brought in the patent litigation that IV initiated. These are the circumstances that *Nobelpharma* describes.

In any event, even if Fourth Circuit law applied or the Federal Circuit applied the *California Motor* standard to cases involving a series of claims, the result would not change: *PREI* still would provide the standard. The facts before me are easily distinguished from the facts of *California Motor, Waugh Chapel*, and the cases on which the Fourth Circuit relied, *POSCO, 31 F.3d 800*, and *Primetime 24 Joint Vent., 219 F.3d 92*. In *California Motor, 404 U.S. at 509, 513*, there was a "pattern of baseless and repetitive claims" made in a number of administrative and court proceedings. In *Primetime 24 Joint Venture, 219 F.3d at 101*, there were "voluminous challenges," and in *POSCO, 31 F.3d at 804*, there were "numerous grievances, arbitrations and enforcement proceedings." *Waugh Chapel, 728 F.3d 354*, involved fourteen separate proceedings—a barrage of proceedings that was clearly **[**69]** a series. Here, there have been only two cases that IV has brought against Capital One. While it is true that IV has sued various other entities in other courts, that litigation does not make its two instances of litigation against Capital One a series.[11] Further, IV's suits against other defendants, alleging infringement of various **[*713]** patents based on those other defendants' independent actions, have no bearing on the merits of the litigation before me or Judge Trenga. *See Waugh Chapel, 728 F.3d at 366-67* (considering only claims against one development even though two different developments had been subject to suit, one named as a defendant three times and one named fourteen times). Accordingly, I only will consider the two suits against Capital One. Additionally, multiple claims brought in one case do not constitute a series. IV has not identified any controlling case law to the contrary.

Moreover, insofar as the *Waugh Chapel* Court identified *PREI* as the standard when there was only *one* lawsuit that could qualify as sham litigation and *California Motor* as the standard for when there was a *series* of prior proceedings, it left open the question of the standard to apply when there were *two* lawsuits that could have been **[**70]** sham litigation (a situation closer to the facts in *PREI* than in *California Motor*). After all, the sham litigation cases array along a continuum of instances of only one case filed to instances where many have been filed, and it seems overly rigid to limit the underlying analysis of *PREI* to situations involving only a single suit. Therefore, even if I applied Fourth Circuit law, I would have to consider the underlying rationale of *Waugh Chapel* to determine whether these allegations of two instances of sham litigation are analyzed best under *PREI* or *California Motor*. As the *Waugh Chapel* Court observed, the *PREI* standard is "ill-fitted" when "the presiding tribunal [for earlier] cases had no occasion to measure the baselessness of the suit," while the *California Motor* standard enables a court to assess potentially sham litigation when it cannot determine whether each legal proceeding was objectively baseless. *Waugh Chapel, 728 F.3d at 364*.

In *Waugh Chapel*, there was no way of knowing what the merits were of the various earlier proceedings. At least two petitions were withdrawn such that the tribunals never had the chance to consider them. Others were dismissed as moot or as conjecture without any decision on the **[**71]** merits with regard to whether the claims were objectively baseless.

---

[11] This is not to say that the lawsuits IV has filed against Capital One could not evolve into a series if IV continues to litigate its patents against Capital One.

Here, in contrast, in the sole earlier proceeding, Judge Trenga clearly had the opportunity to consider the bona fides because, as in this case, Capital One brought its antitrust counterclaims in response to IV's patent litigation. Indeed, Judge Trenga reached a decision on the merits with regard to four of the five patents IV originally identified. His conclusions are available to me in a published opinion that informed me of the court's rationale. Further, the issue of sham litigation arose in the Virginia court, and I have the benefit of Judge Trenga's cogent analysis.[12] And, **[*714]** the other instance of purportedly sham litigation is the patent litigation that IV brought before me—in which both a Special Master and I considered four claims on summary judgment. Thus, I need not resort to analyzing "[t]he pattern of the legal proceedings" in lieu of "their individual merits" to determine whether IV "indiscriminately filed . . . a series of legal proceedings without regard for the merits." *Waugh Chapel, 728 F.3d at 363*. Rather, it is quite feasible to apply the *PREI* standard to determine if these two instances of litigation were objectively baseless.

HN22[] Under *PREI*, what I need to determine is whether a reasonable litigant in IV's position could realistically expect to succeed on the merits of its claims in this Court because, if it could, the litigation was not objectively baseless and therefore not sham litigation. *PREI, 508 U.S. at 51, 62*. As noted, this is an "absolute defense" that "requires no more than a 'reasonabl[e] belie[f] that there is *a chance* that [a] claim may be held valid upon adjudication.'" *Id. at 62* (emphasis added) (citation omitted).

Fatally, Capital One cannot establish that IV's litigation against it was objectively baseless because there were too many indicia of probable cause. Most significantly, in this case, it is undisputed that the parties selected (ECF No. 134) and the Court appointed (ECF No. 143) an independent Special Master (with significant experience handling patent litigation), who wrote two comprehensive reports and recommendations (ECF Nos. 298, 315) regarding the merits of four of IV's patent claims after the parties submitted cross-motions for summary judgment on patent validity under *35 U.S.C. § 101*. Prior to issuing those reports and recommendations, the Special Master resolved **[**73]** multiple discovery disputes (ECF Nos. 170, 199, 203, 209, 223, 286, 290, 294); reviewed the parties' extensive formal briefing (ECF Nos. 147-1, 169-1, 227, 246), as well as supplemental letter briefing that the Special Master requested (ECF Nos. 298-1, 298-2) and twenty-seven exhibits; and heard argument (ECF No. 298-3). Under the Special Master's detailed and insightful analysis, IV did succeed on two of its patent claims: the Special Master recommended a judgment of patent eligibility for the '084 and '002 Patents. ECF No. 298. This fact alone is sufficient to show that a reasonable litigant could realistically expect to succeed on the merits, and it vitiates the notion that the loss before Judge Trenga meant that IV no longer could reasonably believe that it could prevail in this court. And, next to this fact, any other disputes are scintillae.

Moreover, various other undisputed facts also support the finding that IV's litigation in this Court was not objectively baseless. First, there is the presumptive validity of each of the nine patents that were the subjects of IV's claims against Capital One. *See* *35 U.S.C. § 282(a)* ("A patent shall be presumed valid."). Second, IV filed both suits before the Supreme Court decided **[**74]** *Alice Corp. Pty. v. CLS Bank Int'l, 134 S. Ct. 2347, 2351-52, 82 L. Ed. 2d 296, 189 L. Ed. 2d 296 (2014)* (holding that claims "disclos[ing] a computer-implemented scheme for mitigating 'settlement risk' . . . by using a third-party intermediary" were not patent eligible under *35 U.S.C. § 101* but rather were "drawn to the abstract idea of intermediated settlement, and that merely requiring generic computer implementation fails to transform that abstract idea into a patent-eligible invention"). I considered *Alice* and the parameters it set for eligibility in concluding that two of the patents before me were not actually patent-eligible. *See*

---

[12] The Eastern District of Virginia observed that "[c]entral to Capital One's theory of monopolization [was] that IV ha[d] engaged in or threaten[ed] to engage in 'sham litigation' to enforce a patent portfolio whose patents are, in fact, either unenforceable or so weak that, absent IV's 'hold-up,' they have limited commercial value." *Intellectual Ventures I LLC v. Capital One Fin. Corp., No. 13-740 AJT, 2013 U.S. Dist. LEXIS 177836, 2013 WL 6682981, at *7 (E.D. Va. Dec. 18, 2013)* **[**72]** . But, it rejected that theory because Capital One failed to "allege any specific litigation history to support that claim or identify any particular patents IV ha[d] attempted or threatened to enforce that have expired, been cancelled or adjudicated to be invalid." *Id.* The court also found that "IV and Capital One do not compete in any relevant market, so it cannot be said that IV's object is to use th[at] or any other litigation to interfere with the business relationships of a competitor." *Id.* Thus, it concluded that "Capital One ha[d] not alleged facts or circumstances that would plausibly place th[at] litigation within any recognized exception to the *Noerr—Pennington* doctrine, which protects private parties from antitrust liability based on even unsuccessful litigation attempts to enforce laws with potential anti-competitive effects." *Id.*

*Intellectual [*715] Ventures I LLC v. Capital One Fin. Corp., 127 F. Supp. 3d 506, 511-31 (D. Md. 2015)*, *aff'd*, *850 F.3d 1332 (Fed. Cir. 2017)*.[13] The Special Master did not consider post-*Alice* cases and found that the same patents *were* patent eligible. *See* *Intellectual Ventures, 127 F. Supp. 3d at 509* ("[The Special Master did not] address in any depth the increasing number of cases that have been decided by the Federal Circuit and District Courts around the country that have been decided since the Supreme Court's recent decisions in *Alice Corp. Pty. Ltd. v. CLS Bank Int'l, __ U.S. __, 134 S. Ct. 2347, 82 L. Ed. 2d 296, 189 L. Ed. 2d 296 (2014)*, and *Mayo Collaborative Servs. v. Prometheus Labs., Inc., 566 U.S. 66, [132 S. Ct. 1289, 182 L. Ed. 2d 321] (2012)*, that have found patents that are highly analogous to the '081 and '002 patents to be invalid for abstractness under *35 U.S.C. § 101*."). This shows that when IV filed suit, before *Alice* was decided, it was realistic to expect success on the merits, at least with regard to these two patents. *See also* *Content Extraction & Transmission LLC v. Wells Fargo Bank, Nat'l Ass'n, 776 F.3d 1343, 1350 (Fed. Cir. 2014)* ("CET's infringement suits, though **[**75]** unsuccessful, were not objectively baseless . . . . because the state of the law of *§ 101* was deeply uncertain at the time CET filed its complaints against Wells Fargo and PNC in 2012. Under these circumstances, we cannot conclude that as a matter of law, no reasonable litigant in 2012 could have expected success on at least one of CET's claims.").

Third, IV has not filed any additional suits against Capital One post-*Alice*. Fourth, IV withdrew specific claims when it was persuaded that it would not prevail, suggesting that it reasonably believed it could prevail on the others. Fifth, IV appealed my summary judgment rulings, an extra step that one who did not expect to succeed likely would not bother taking. Sixth, while Capital One incurred significant costs defending IV's patent claims, IV also incurred substantial litigation expenses. The litigation before me has involved nineteen attorneys for IV, as well as a Special Master and an economic consultant, the costs of whom the parties have shared. The docket includes almost 700 entries, and the documents in support of the parties' pending summary judgment briefing **[**76]** exceed 13,000 pages. Seventh, IV did not file for these patents with the Patent and Trademark Office; it acquired them and was entitled to rely on their presumptive validity. Eighth, Judge Trenga ruled that IV's patent infringement action was not an "exceptional case" marked by "unreasonable conduct" that would justify an award of attorneys' fees to Capital One pursuant to *35 U.S.C. § 285*. *Intellectual Ventures I LLC v. Capital One Fin. Corp., No. 13CV0740 (AJT/TCB), 2015 U.S. Dist. LEXIS 155525, 2015 WL 7283108, at *1, *4 (E.D. Va. Nov. 17, 2015)*. Ninth, IV incurred the significant expense of designating nine experts on objective reasonableness—in comparison to Capital One's failure to designate any—something IV hardly would have done had it thought its underlying patent claims were objectively baseless. Under these circumstances, no reasonable factfinder could conclude that IV lacked probable cause.

Further, if I were to reach the subjective inquiry of whether IV initiated litigation to interfere directly with its *competitor's* business, it is questionable whether Capital One, a bank, could qualify as a **[*716]** competitor of IV, a patent assertion entity. Indeed, Judge Trenga found that Capital One is not IV's competitor. *Intellectual Ventures I LLC v. Capital One Fin. Corp., No. 13-740 AJT, 2013 U.S. Dist. LEXIS 177836, 2013 WL 6682981, at *7 (E.D. Va. Dec. 18, 2013)*. Thus, even if this litigation **[**77]** were objectively baseless—which it clearly is not—Capital One cannot establish that IV intended to interfere "with the business relationships of a competitor." *See* *PREI, 508 U.S. at 60-61* (emphasis added).

In sum, not only is Capital One not a competitor of IV, but more significantly, a reasonable litigant in IV's position realistically could have expected to succeed on the merits of its claims in this Court. Therefore, the litigation was not objectively baseless. Consequently, it was not sham litigation, and IV is entitled to *Noerr—Pennington* immunity, as its patent litigation is integral to Capital One's antitrust claims. *PREI, 508 U.S. at 51, 62*.

Collateral Estoppel

---

[13] Judge Trenga granted summary judgment in Capital One's favor on April 16, 2014, before the Supreme Court decided *Alice* on June 19, 2014. *See* *Intellectual Ventures I LLC v. Capital One Fin. Corp., No. 13-CV-740 AJT, 2014 U.S. Dist. LEXIS 53001, 2014 WL 1513273, at *1 (E.D. Va. Apr. 16, 2014)*, *aff'd sub nom.* *Intellectual Ventures I LLC v. Capital One Bank (USA), 792 F.3d 1363 (Fed. Cir. 2015)*.

HN23[] Collateral estoppel, also known as issue preclusion, "works to ensure that parties get 'one full and fair opportunity to litigate a particular issue, while preventing needless relitigation of that issue.'" *Barna Conshipping, S.L. v. 2,000 Metric Tons, More or Less, of Abandoned Steel, 410 F. App'x 716, 720 (4th Cir. 2011)* (quoting *In re Cygnus Telecomms. Tech., LLC, Patent Litig., 536 F.3d 1343, 1350 (Fed. Cir. 2008))*. Collateral estoppel bars relitigation of an issue or fact if

> (1) the issue or fact is identical to the one previously litigated; (2) the issue or fact was actually resolved in the prior proceeding; (3) the issue or fact was critical and necessary to the judgment in the prior proceeding; (4) the judgment in the prior proceeding is final and valid; and (5) **[**78]** the party to be foreclosed by the prior resolution of the issue or fact had a full and fair opportunity to litigate the issue or fact in the prior proceeding.

In re Microsoft Corp. Antitrust Litig., 355 F.3d 322, 326 (4th Cir. 2004) (emphasis added).

HN24[] Collateral estoppel may be offensive or defensive. *Id.* Offensive collateral estoppel is "[w]hen a *plaintiff* [or counter claimant or third party plaintiff] employs the doctrine of collateral estoppel or issue preclusion 'to foreclose the defendant [or counter defendant or third party defendant] from litigating an issue the defendant has previously litigated unsuccessfully in an action with another party.'" *Id.* (quoting *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 326 n.4, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979))*. Defensive collateral estoppel is "when a *defendant* [or counter defendant or third party defendant] employs the doctrine 'to prevent a plaintiff [or counter claimant or third party plaintiff] from asserting a claim the plaintiff [or counter claimant or third party plaintiff] has previously litigated and lost against another defendant.'" *Id.* (quoting *Parklane Hosiery, 439 U.S. at 326 n.4*). A defendant (or defending party) also can employ defensive collateral estoppel to bar claims the plaintiff (or claimant) already unsuccessfully made against *it*, rather than another defendant. *See* *Zeno v. United States, No. DKC-09-544, 2009 U.S. Dist. LEXIS 115616, 2009 WL 4910050, at *8 (D. Md. Dec. 11, 2009)*, *aff'd*, *451 F. App'x 268 (4th Cir. 2011)*. **[**79]** Here, the Intellectual Ventures companies, which are Counter Defendants and Third Party Defendants, invoke the doctrine to prevent the Capital One companies, which are Counter Claimants and Third Party Plaintiffs, from asserting the claims they unsuccessfully alleged against IV in the Virginia litigation. This is an instance of defensive collateral estoppel. *See id.; Microsoft, 355 F.3d at 326*.

[*717] IV insists that collateral estoppel bars relitigation of whether the market that Capital One identifies is a "relevant market," because the Eastern District of Virginia already determined that the same market that Capital One describes here was not a relevant market for antitrust purposes, IV Mem. 7-8, and that issue was critical and necessary to Judge Trenga's judgment, which was a valid, final judgment, *id.* at 9, 12. IV contends that, although Capital One pleaded different facts in this case, the changes were "immaterial," and "[a]ltering the facts alleged cannot avoid issue preclusion" because "[i]ssue preclusion prevents a second attempt to relitigate with additional pleaded facts, or any other way." *Id.* at 8-9. Capital One counters that the pleadings define a different relevant market, Capital One Opp'n 15-17, that the changes are not **[**80]** immaterial, *id.* at 17, and that in any event, the market definition was not critical or necessary to the judgment, *id.* at 17-18, because "the Virginia court's decision rested on the independent grounds that Capital One's market definition and monopoly power allegations were both insufficient to state a claim." *Id.* at 18.

Notably, "relevant market" is a necessary element of all of Capital One's antitrust claims. *See* *Berlyn Inc. v. The Gazette Newspapers, Inc., 73 F. App'x 576, 582 (4th Cir. 2003)* (noting that, "to determine whether any antitrust violation [under the *Sherman Act* or the *Clayton Act*] has occurred, '[the court]must first define *the relevant market* because the concept of competition has no meaning outside its own arena, however broadly that arena is defined,'" and that the party bringing an antitrust claim "bears the burden of proof on the issue of the relevant product and geographic markets" (emphasis added) (citing *Satellite Television & Assoc. Res., Inc., v. Continental Cablevision of Va., Inc., 714 F.2d 351, 355 (4th Cir.1983)))*; *see also* *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)* (stating that, HN25[] for an attempted monopolization claim under *§ 2* of the Sherman Act, "to determine whether there is a dangerous probability of monopolization, courts have found it necessary to consider *the relevant market* and the defendant's ability to lessen or destroy competition in that market" (emphasis added)); *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)* (stating that, HN26[] to prevail on a claim of monopolization **[**81]** under *§ 2* of the Sherman Act, a plaintiff must prove: "(1) the possession of monopoly power in *the relevant market* and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident" (emphasis added)); *United States v. Phila. Nat'l Bank, 374 U.S. 321, 363, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)* (holding that ***HN27***[] "a merger which produces a firm controlling an undue percentage share of *the relevant market*, and results in a significant increase in the concentration of firms in that market is so inherently likely to lessen competition substantially that it [is a violation of *§ 7* of the Clayton Act unless there is] evidence clearly showing that the merger is not likely to have such anticompetitive effects" (emphasis added)); *It's My Party, Inc. v. Live Nat., Inc., 88 F. Supp. 3d 475, 503 (D. Md. 2015)* (stating that, ***HN28***[] to prevail on a claim of attempted monopolization, a plaintiff must prove "(1) a specific intent to monopolize *a relevant market*; (2) predatory or anticompetitive acts; and (3) a dangerous probability of successful monopolization") (emphasis added) (quoting *Kolon Indus. Inc. v. E.I. DuPont de Nemours & Co., 748 F.3d 160, 177 (4th Cir. 2014))*, *aff'd sub nom. It's My Party, Inc. v. Live Nation, Inc., 811 F.3d 676 (4th Cir. 2016)*. Therefore, if the relevant market that Capital One alleges has **[*718]** not changed in any material respect from the relevant market it defined in the Virginia litigation, then **[**82]** Judge Trenga's conclusion that Capital One's "relevant market" did not constitute a relevant market for antitrust purposes prevents relitigation of that issue, and IV is entitled to judgment as a matter of law on all counts. *See* *Berlyn, 73 F. App'x at 582*.

Capital One does not challenge whether it had a full and fair opportunity to litigate the sufficiency of its market definition before the Eastern District of Virginia, whether the sufficiency of the relevant market it alleged was actually resolved in that court, or whether Judge Trenga issued a valid, final judgment. *See* Capital One Opp'n 15-17. Rather, as noted, Capital One challenges the applicability of issue preclusion in two regards: (1) whether the relevant market is materially different in this litigation, and (2) whether Judge Trenga's conclusion that the proposed relevant market was not a relevant market for antitrust purposes was critical and necessary to the judgment he issued. *See id.* I will consider each challenge in turn.

Is the relevant market materially different in this litigation?

> ***HN29***[] A relevant market is generally viewed as the field of "meaningful competition." *IGT v. Alliance Gaming Corp., 702 F.3d 1338, 1344 (Fed. Cir. 2012)*. It is determined by "commercial realities" and "consumer choice" and, while it typically **[**83]** includes substitutes for a particular product, it may also consist of a single product or brand where there is no "reasonable interchangeability" with other comparable products, that is, where there are essentially no substitutes for a given product. *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481-82, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. at 404*).

*Intellectual Ventures I LLC v. Capital One Fin. Corp., No. 13-CV-00740 AJT, 2013 U.S. Dist. LEXIS 177836, 2013 WL 6682981, at *4 (E.D. Va. Dec. 18, 2013)*.

In the Virginia litigation, Capital One alleged that the relevant market was the "market for technology enabling business processes common throughout the commercial banking industry in the United States." *Intellectual Ventures, 2013 U.S. Dist. LEXIS 177836, 2013 WL 6682981, at *5* (quoting pleadings). The Virginia court reworded the relevant market definition as "IV's 'portfolio of 3,500 or more patents that [IV] alleges cover widely used financial and retail banking services' in the United States." *Intellectual Ventures, 2013 U.S. Dist. LEXIS 177836, 2013 WL 6682981, at *5*. Here, Capital One once again alleges that IV's 3,500 patents comprise the relevant market. Fourth Am. Countercl. ¶ 158; Third Party Compl. ¶ 50. Notably, the alleged market has not changed because IV has not acquired any new patents in the relevant investment funds since Capital One filed its antitrust counterclaim in the Virginia litigation. Detkin Decl. ¶ 4, Ex. 69, Jt. Rec. 3,415. And, Capital One acknowledges that, previously, I observed **[**84]** that the "[Virginia] court restated the relevant market as the Intellectual Ventures companies' 'portfolio of 3,500 or more patents,' the same market alleged here." *Intellectual Ventures I LLC v. Capital One Fin. Corp., No. PWG-14-111, 2016 U.S. Dist. LEXIS 4581, 2016 WL 160263, at *3 (D. Md. Jan. 14, 2016)* (quoting

*Intellectual Ventures, 2013 U.S. Dist. LEXIS 177836, 2013 WL 6682981, at *5)*; *see* Capital One Opp'n 16. Yet, in Capital One's view, the Virginia court's "restatement [of what the relevant market was] was dicta . . . based on comments made by Capital One's counsel during oral argument on IV's motion to dismiss," and the actual alleged market in the Virginia litigation was not the same as it is here. Capital One Opp'n 16. On the contrary, as IV asserts, IV Reply 5, the transcript from oral argument demonstrates that Judge Trenga **[*719]** paraphrased the relevant market to confirm his understanding of what Capital One alleged, and Capital One confirmed that his definition was accurate. Hr'g Tr., Ex. 3, Jt. Rec. 147 ("THE COURT: You're saying the 3,500 patents that are owned by Intellectual Ventures constitutes 100 percent of the patents involved in the *ex post* market for technology enabling — for patents pertaining to technology enabling business processes. [CAPITAL ONE'S COUNSEL]: And that's because of the ***antitrust law***. We're **[**85]** not saying they're the only patents that relate to commercial banking services. . . . We're saying they have effectively an inescapable threat [sic], which in ***antitrust law*** is what is controlling prices and eliminating competition. . . . The commercial reality faced by Capital One is you can't get around this market."). Thus, the alleged relevant market is the same.

But, in this case, Capital One sets forth different facts to support a finding that these patents qualify as a relevant market for antitrust purposes. In the Virginia litigation, Capital One alleged that IV's patent portfolio qualified because Capital One had a business need to avoid litigation, which it only could do by licensing the patents in the portfolio. Now, instead of relying solely on the need to avoid litigation, which Judge Trenga already found to be insufficient to define a relevant market, Capital One also contends that "continu[ing] to provide the online services they already offer without paying the cost-prohibitive licensing fees to the Intellectual Ventures companies—the only source of such licenses—," is a business necessity. *See* *Intellectual Ventures, 2016 U.S. Dist. LEXIS 4581, 2016 WL 160263, at *3* (quoting *Intellectual Ventures I LLC v. Capital One Fin. Corp., 99 F. Supp. 3d 610, 622-23 (D. Md. 2015))*. Based on this change in the factual allegations, I denied IV's **[**86]** motion to dismiss on claim preclusion grounds. *Intellectual Ventures, 2016 U.S. Dist. LEXIS 4581, 2016 WL 160263, at *3*. Thus, pre-discovery, I concluded that Capital One adequately alleged a plausible relevant market that was not identical to the one alleged in Virginia and therefore not barred by collateral estoppel. *Id.*

Capital One relies on this preliminary finding to argue that the relevant markets are not identical. Capital One Opp'n 15, 17. In its view, these changes are material because "the evidence confirms that, to compete, Capital One must provide the core banking services that IV's infringement claims targeted, including ATMs, payment cards, and online and mobile banking," and "the business necessity allegations (and evidence) raise different market definition issues than those present in Virginia." *Id.* at 17.

IV counters that there "is no evidence to support the argument that a license was a 'business necessity' for Capital One or any other bank, none of which licensed any patents." IV Reply 23 n.17. Indeed, discovery has concluded, and to date, IV's patent litigation has not led to Capital One (or any other company) licensing the portfolio of thousands of financial services patents that IV amassed, as none of IV's patent claims have resulted in a judgment **[**87]** in IV's favor. Nor is there any other evidence that Capital One has to license IV's patent portfolio or has been unable to do business because it has not licensed the patents. Certainly, Capital One may feel compelled to license the patents to avoid litigation, but Judge Trenga already concluded that avoiding litigation is not a sufficient business necessity to define a relevant market. Therefore, despite the new factual allegations before me, the alleged relevant market has not changed in a material way.

Was Judge Trenga's conclusion that the proposed relevant market was not a relevant market for antitrust purposes critical and necessary to the judgment he issued?

The crux of Capital One's argument is that the Fourth Circuit has stated that **[*720]** "when issue preclusion is considered in the context of two separate litigations," as it is here, "if a judgment in the prior case is supported by either of two findings, neither finding can be found essential to the judgment." *In re Microsoft Corp. Antitrust Litig., 355 F.3d 322, 328 (4th Cir. 2004)*. The parties agree that separate findings supported Judge Trenga's judgment, IV Mem. 10; Capital One Opp'n 17-18, but they disagree about the effects of those independent grounds. Capital One relies on the *Microsoft* holding **[**88]** to argue that Judge Trenga's conclusion regarding the relevant market was not critical and necessary to his judgment. Capital One Opp'n 17-18. IV relies on *Ritter v. Mount St. Mary's Coll., 814 F.2d 986, 994 (4th Cir. 1987)*, and insists, to the contrary, that "'alternative determinations' should each be held material, and thus a basis for issue preclusion," IV Mem. 10 (quoting Restatement (First) of Judgments § 68 cmt. n). Notably, in *Ritter*, the Fourth Circuit considered circumstances in which (as here) the defendant had raised collateral estoppel *defensively* to preclude relitigation of issues previously determined by the court, *814 F.2d at 989-90*, whereas in *Microsoft*, the Fourth Circuit considered whether *offensive* collateral estoppel should preclude relitigation of certain factual findings, *355 F.3d at 325*.

Because, as noted, the motion before me involves defensive collateral estoppel, I look first to *Ritter*. There, the district court had dismissed the plaintiff's legal claims of discrimination against her employer under the *Equal Pay Act* ("EPA") and *Age Discrimination in Employment Act ("ADEA")* and held a bench trial on her equitable claims under Title VII. *814 F.2d at 988*. At trial, the court found that Ritter "was not qualified for tenure" ("tenure issue") and that the only valid comparator she identified **[**89]** "was clearly more qualified" than she ("comparator issue"). *Id. at 989-90*. Ritter appealed the dismissal and the trial ruling. *Id. at 989*. The Fourth Circuit affirmed the results of trial based on the trial court's finding on the tenure issue, without reaching the comparator issue, but remanded for the trial court to hold a second trial, this time by jury, on the EPA and *ADEA* claims. *Id. at 988*.

On remand, the employer moved for summary judgment on the EPA and *ADEA* claims, arguing that, "because the *ADEA* and EPA claims had common elements with the Title VII claim, the issues determined by the court in the Title VII claim collaterally estopped the relitigation of those issues before a jury," and the district court granted the motion. *Id. at 988-90*. Ritter again appealed, and the Fourth Circuit considered "whether the findings of fact made by the trial judge in the Title VII equitable suit should collaterally estop the relitigation of those facts before the jury on the remanded EPA and *ADEA* legal actions." *Id. at 988*.[14]

The Fourth Circuit decided that, ***HN30***[] even though "the doctrine of collateral estoppel was designed to bar the relitigation of issues determined in a *prior* suit," it could apply to relitigation within the same suit (as in the **[**90]** case before it), because where the relitigation "involves the same parties, the same issues arising out of the same set of facts, and the same court," the "'sameness' or mutuality of parties in interests which serves as the basis for the development **[*721]** of collateral estoppel doctrines" is present. *Id. at 991-92*. Thus, the case before it was "the classic case in which the court can utilize the doctrine of collateral estoppel without fear of denying a litigant a right to argue his claims to the best of his ability before a competent court." *Id. at 992*.

The court then considered whether collateral estoppel should apply, given that the district court decided both the tenure issue and the comparator issue when resolving Ritter's Title VII claim, and the Fourth Circuit had affirmed based on only the tenure issue. *Id. at 993*. It observed the general rule that, ***HN31***[] "where the court in the prior suit has determined two issues, either of which could independently support the result, then neither determination is considered essential to the judgment" and collateral estoppel does not bar relitigation of either issue, unless "one of the two determinations is upheld on appeal," in which case "collateral estoppel [bars relitigation] as **[**91]** to that issue. *Id.* The Fourth Circuit noted:

> The rationale underlying this corollary to the collateral estoppel doctrine is that it guards against the use of non-essential dicta and ancillary findings to estop later litigations. . . . Non-essential findings should not serve as the basis for collateral estoppel because the litigants might not have concentrated their energies and resources upon the full development and presentation of these issues. Thus, . . . this requirement ensures the integrity and competence of any particular finding before it is allowed to estop collateral relitigation.

Id. at 993-94.

---

[14] As for the summary judgment ruling precluding trial *by jury*, because the issues had been decided by the judge at a bench trial, the Fourth Circuit observed that "an equitable determination can have collateral-estoppel effect in a subsequent legal action and . . . this estoppel does not violate the *Seventh Amendment*." *Ritter, 814 F.2d at 990-91* (quoting *Parklane Hosiery, 439 U.S. at 335*).

Despite this rule, the Fourth Circuit concluded that collateral estoppel barred relitigation of both issues in the case before it, reasoning that ***HN32***[] collateral estoppel is "limited by the overriding principle that the courts should protect a litigant's right to a full and fair opportunity to litigate his claims" but otherwise "capable of flexible determination to serve the interests of judicial economy by preventing needless relitigation." *Id. at 994*. It noted that Ritter "had a full and fair opportunity to litigate" the comparator issue as well as the tenure issue, given that she had "conducted extensive discovery" **[**92]** and "presented a vigorous argument to the trial court" on the comparator issue, and both rounds of litigation involved "the same parties, the same issues, the same facts, and even the same court." *Id.*

Zeno v. United States, No. DKC-09-544, 2009 U.S. Dist. LEXIS 115616, 2009 WL 4910050 (D. Md. Dec. 11, 2009), *aff'd*, *451 F. App'x 268 (4th Cir. 2011)*, in which this Court considered both *Ritter* and *Microsoft*, also provides guidance. In *Zeno*, the plaintiff, an attorney who had been subject to disciplinary proceedings in Puerto Rico, Massachusetts, and Texas, filed suit (with his wife) in this Court against several federal judges, the United States Attorney for the District of Puerto Rico, and several Assistant United States Attorneys, a Massachusetts state court judge, two clerks from the Massachusetts state court, and three Massachusetts attorneys. *2009 U.S. Dist. LEXIS 115616, [WL] at *1*. The defendants moved to dismiss, and this Court granted the motion on the bases of lack of personal jurisdiction, improper venue, and, with regard to the defendant judges, prosecutors, and clerks, absolute and qualified immunity. *Id.* The plaintiffs appealed but then voluntarily dismissed their appeal. *Id.*

Thereafter, they filed suit again in this Court, against the same federal defendants as in their earlier lawsuit, as well as the United **[**93]** States. *2009 U.S. Dist. LEXIS 115616, [WL] at *2*. They asserted that the Court had jurisdiction under the *Federal Tort Claims Act*. *Id.* The defendants moved to dismiss and the Court considered both claim and issue preclusion, concluding that claim preclusion barred **[*722]** the plaintiffs' claims in the second suit. *2009 U.S. Dist. LEXIS 115616, [WL] at *6*. As for issue preclusion, the Court observed:

> In *In re Microsoft, [355 F.3d 322,]* the plaintiffs attempted to use *offensive* collateral estoppel to preclude the defendant from relitigating factual findings that were made in a case brought against the defendant by different plaintiffs in a different court. In deciding the meaning of "critical and necessary," the court expressed the following concern regarding the use of *offensive* collateral estoppel: "If a trial court were to make an unnecessary or collateral finding in a case and the defendant appealed the judgment, the appellate court, in affirming the judgment, would generally not reach the unnecessary findings. Thus, such findings would evade appellate review." *Id. at 327*.[15] The court noted that ***HN33***[] the United States Supreme Court granted courts "broad discretion to determine when [offensive collateral estoppel] should be applied" because of a "greater possibility of unfairness from the use of offensive collateral **[**94]** estoppel." *Id. at 326*. The court decided that parties would have a greater opportunity for full litigation of issues if the "critical and necessary" requirement were interpreted strictly to mean that the issue or fact must be "essential to," instead of merely "supportive of" the judgment in the prior proceeding in order to be barred by collateral estoppel in a future proceeding. In other words, in the Fourth Circuit, issues are generally not barred by collateral estoppel when more than one issue could independently support the result of the prior judgment.

*Zeno, 2009 U.S. Dist. LEXIS 115616, 2009 WL 4910050, at *7* (emphasis added; original emphasis removed). Indeed, the Fourth Circuit noted that, in *Ritter*, it "essentially appl[ied] a law-of-the-case principle" while "call[ing] it collateral estoppel and appl[ying] it in the exceptional circumstances of that case, where the parties were the same,

---

[15] The *Microsoft* Court stated that, if the judgment went up on appeal, the court in which issue preclusion is raised "must take care to limit is application to facts that were necessary to the judgment actually affirmed by the [appellate court]." *Microsoft, 355 F.3d at 328*. Here, Capital One appealed the dismissal of its claims in the Virginia litigation but then abandoned the appeal. *See* IV Mem. 1; Mot. to Dismiss Cross-Appeal, Ex. 11, Jt. Rec. 349-55 (stating that the question it posed for the Federal Circuit, "whether Capital One's antitrust counterclaims, as pleaded before discovery, alleged enough facts about the relevant market and Intellectual Venture's [sic] . . . conduct to state a claim," was "effectively irrelevant because the District of Maryland . . . allowed Capital One to file new antitrust counterclaims against IV based on a more developed pleading," and if the Federal Circuit ruled in Capital One's favor, it "would move to transfer and consolidate these claims with the ongoing litigation in Maryland, and that consolidation would not meaningfully expand the relief that Capital One seeks in that litigation").

the issues were the same, the facts were the same, and even the court was the same." *355 F.3d at 328*. In *Microsoft*, the Fourth Circuit held, *in the context of offensive collateral estoppel*, that "when issue preclusion is considered in the context of two separate litigations, the restrictive principle recognized in *Ritter* remains viable—that if a judgment in the prior case **[**95]** is supported by either of two findings, neither finding can be found essential to the judgment." *Id.*

But, significantly, in *Zeno*, this Court then noted that, "[d]espite the Fourth Circuit's general rule regarding alternative rulings and collateral estoppel, the Fourth Circuit [in *Ritter]* applied *defensive* collateral estoppel to bar issues in a case where two issues were previously decided and where both of the issues could have independently supported the result." *Zeno, 2009 U.S. Dist. LEXIS 115616, 2009 WL 4910050, at *8* (citing *Ritter, 814 F.2d 986*). This Court concluded in *Zeno* **[*723]** that "defensive collateral estoppel . . . bar[red] the court's consideration of issues that involve[d] 'the same parties, the same issues, the same facts, and even the same court.'" *Id.* It reasoned:

> Though this case has been assigned to a different judge, Plaintiffs' allegations regarding the individual Defendants are exactly the same as in Plaintiffs' complaint in the prior case. Because the complaints are nearly identical, this case presents the same issues of personal jurisdiction, venue, and immunity as to the individual Defendants that were resolved by the court's judgment in the prior proceeding. Furthermore, Plaintiffs had a full and fair opportunity to litigate those **[**96]** issues in the prior proceeding. Plaintiffs filed a notice of appeal in the Fourth Circuit after their case was dismissed, and then asked the Fourth Circuit to dismiss their appeal, citing a change in their own legal strategy. In doing so, Plaintiffs conceded the issues of personal jurisdiction, venue, and immunity as to the individual Defendants. The court's prior decision became final when Plaintiffs' appeal was dismissed by the Fourth Circuit. Finally, despite the fact that the court's previous decision rested on three alternative grounds for dismissal—personal jurisdiction, venue, and immunity—all of the grounds apply in this case.

Id.

As noted, what IV seeks to invoke is defensive collateral estoppel. Thus, the "greater possibility of unfairness from the use of offensive collateral estoppel" is not present. *See* *Microsoft, 355 F.3d at 326*. And, the prior litigation in the Eastern District of Virginia involved "the same parties, the same issues, [and] the same facts." *Ritter, 814 F.2d at 994*. Although the prior litigation was not in this Court, Judge Trenga's reasoning and analysis in his comprehensive written opinions in the Virginia case is available to me. *See* *Intellectual Ventures I LLC v. Capital One Fin. Corp., No. 13CV0740 (AJT/TCB), 2015 U.S. Dist. LEXIS 155525, 2015 WL 7283108, at *1, *4 (E.D. Va. Nov. 17, 2015)*; **[**97]** *Intellectual Ventures I LLC v. Capital One Fin. Corp., No. 13-CV-740 AJT, 2013 U.S. Dist. LEXIS 177836, 2013 WL 6682981 (E.D. Va. Dec. 18, 2013)*. Certainly, the conclusion that Capital One's alleged relevant market was "not a 'relevant market' under any recognized antitrust jurisprudence," *Intellectual Ventures, 2013 U.S. Dist. LEXIS 177836, 2013 WL 6682981, at *5*, which provided a basis for dismissal of the monopolization and attempted monopolization claims, *see* *2013 U.S. Dist. LEXIS 177836, [WL] at *5, *8*, was only one of two alternative grounds for dismissal of these claims. *See* *2013 U.S. Dist. LEXIS 177836, [WL] at *6-7* (concluding that capital One failed to alleged unlawful monopoly power sufficiently); *see also* *2013 U.S. Dist. LEXIS 177836, [WL] at *8* ("Capital One's attempted monopolization claim alleges the same injury, and in the same fashion, as its monopolization claim . . . and fails to state a claim for the same reasons.").

But, as noted, Capital One does not challenge whether it had a full and fair opportunity to litigate the sufficiency of its market definition before the Eastern District of Virginia. *See* Capital One Opp'n 15-17. Indeed, Capital One filed an opposition to IV's motion to dismiss in that court and argued its position at a hearing, advocating for its alleged relevant market in both instances. Moreover, the court considered both the opposition brief and the oral argument in resolving the motion, *2013 U.S. Dist. LEXIS 177836, [WL] at *5* (citing hearing transcript and opposition). Also, as in *Zeno*, Capital One appealed the prior court's **[**98]** ruling to the Fourth Circuit and then withdrew its appeal. Thus, the sufficiency of the market definition was fully and fairly litigated. Under these circumstances, it is appropriate to apply defensive collateral estoppel in this case to estop Capital One from arguing that its relevant market, which has not changed materially from the relevant market alleged **[*724]** in the Virginia litigation, is not a relevant market for antitrust purposes.

Conclusion

In sum, IV's Motion for Summary Judgment, ECF No. 656, IS GRANTED because *Noerr—Pennington* immunity and collateral estoppel both bar Capital One's antitrust claims. The parties' Motions to Seal, ECF Nos. 658, 665, and 676, ARE GRANTED. IV's objections to the Joint Record Exhibits, ECF No. 674, ARE OVERRULED. A separate Order will issue.

Dated: November 30, 2017

/s/ Paul W. Grimm

United States District Judge

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F. Supp. 3d.]

[*none] ORDER

For the reasons stated in the Memorandum Opinion issued this same date, it is, this 30th day of November, 2017, hereby ORDERED that

1. The Motion for Summary Judgment that Intellectual Ventures I, LLC; Intellectual Ventures II, LLC; Intellectual Ventures Management, LLC; Invention Investment Fund I, L.P.; and Invention Investment Fund II, LLC **[**99]** (collectively, "IV") filed, ECF No. 656, IS GRANTED;
2. Judgment IS ENTERED in IV's favor on Counts One, Two, and Three of Capital One's Third-Party Complaint and Counts Twelve, Thirteen, and Fourteen of Capital One's Counterclaim;
3. The parties' Motions to Seal, ECF Nos. 658, 665, and 676, ARE GRANTED;
4. IV's objections to the Joint Record Exhibits, ECF No. 674, ARE OVERRULED; and
5. The Clerk SHALL CLOSE this case.

/s/ Paul W. Grimm

United States District Judge

Power Analytics Corp. v. Operation Tech., Inc.

CIVIL MINUTES — GENERAL

(IN CHAMBERS) ORDER RE DEFENDANTS' OPERATION TECHNOLOGY Proceedings: INC. AND OSISOFT, LLC'S MOTION TO DISMISS SECOND AMENDED COMPLAINT (DKT. 303); SCHNEIDER ELECTRIC USA, INC.'S MOTION TO DISMISS NON-PATENT CLAIMS IN SECOND AMENDED COMPLAINT (DKT. 304)

I. Introduction

Power Analytics Corporation ("Plaintiff") brought this action against Operation Technology, Inc. ("Etap"), OSIsoft LLC ("OSI") and Schneider Electric USA, Inc. ("Schneider") (collectively, "Defendants") asserting claims for patent infringement, federal antitrust violations under the Sherman Act, 15 U.S.C. §§ 1 and 2, violation of the North Carolina Unfair and Deceptive Trade Practices Act, N.C. Gen. Stat. §§ 75-1, 75-1.1, 75-2, and 75-2.1, conspiracy and several business torts. Dkt. 1. On June 21, 2016, Plaintiff filed a First Amended Complaint ("FAC"). Dkt. 38. On June 20, 2017, Plaintiff filed a Second Amended Complaint ("SAC"). Dkt. 285.

On July 17, 2017, Schneider brought a Motion to Dismiss the non-patent claims in the SAC ("Schneider Motion"). Dkt. 304. Plaintiff opposed the Schneider Motion **[*2]** (Dkt. 331), and Schneider replied. Dkt. 336. On the same day, Etap and OSI brought a Motion to Dismiss the non-patent claims in the SAC ("Etap Motion"). Dkt. 303. Plaintiff opposed the Etap Motion (Dkt. 330), and Etap and OSI replied. Dkt. 335.

On October 2, 2017, a hearing on the Schneider Motion and the Etap Motion was held and they were taken under submission. Dkt. 345. For the reasons stated in this Order, the Schneider Motion and the Etap Motion (collectively, "the Motions") are **GRANTED** and the non-patent claims in the SAC are dismissed with leave to amend*, i.e.*, without prejudice.[1]

II. Background

A. The Parties

Plaintiff is a Delaware corporation whose principal place of business is in North Carolina. SAC, Dkt. 285 ¶ 1. Plaintiff "is in the business of developing, selling and supporting software products which are used in the operation of electric power distribution systems." *Id.* "Power Analytics' line of products are employed in Power Grid design; control and safety management; the collection, storage and analysis of system data; and the modeling, simulation and visualization of grid operations." *Id.*

Etap is a California corporation whose principal place of business is here. *Id.* ¶ **[*3]** 2. Etap "develops and sells software products for use with Power Grids, many of which are similar in functionality to those developed and sold by Power Analytics." *Id.* OSI is a Delaware corporation whose principal place of business is also in California. *Id.* ¶ 4. OSI "develops and sells Power Grid data collection and archiving software products for use with Power Grids. OSI sells these products and related services to customers located throughout North America." *Id.* ¶ 5.

Schneider is a Delaware corporation whose principal place of business is in Massachusetts. *Id.* ¶ 6. "Among other things, Schneider makes and sells software products and a multitude of devices for use with Power Grids. Schneider sells these products and related services to customers "together with products and services provided by other suppliers as a bundled or 'Platform' product" to customers in North America. *Id.* ¶ 8.

B. Procedural History

This Order addresses the second round of motions to dismiss the operative complaint in this action. On July 22, 2016, Schneider moved to dismiss the non-patent claims in the FAC. Dkt. 42. On the same day, Etap and OSI moved to dismiss the non-patent claims in the FAC. Dkt. 44. On **[*4]** October 26, 2016, this action was transferred to this District from the District of Delaware. Dkt. 73. On January 30, 2017, a hearing on both motions to dismiss was held and they were taken under submission. Dkt. 158. On May 10, 2017, both motions to dismiss were granted without prejudice ("Prior Order"). Dkt. 227. The Prior Order identified several deficiencies in the Sherman Act claims as presented in the FAC, including that the FAC failed plausibly to allege any of the following: (i) the existence of de facto exclusive dealing arrangements between or among any of the Defendants; (ii) foreclosure from competition in a relevant market as a result of the alleged exclusive dealing arrangements among the Defendants; (iii) harm to competition; and (iv) antitrust injury. The Prior Order also identified deficiencies in the remaining causes of action.

C. Overview of Technology

1. Power Grids

"Power Grids are networks that move and distribute electric power between supply sources and electricity consuming devices." *Id.* ¶ 14. "Microgrids are smaller-scale Power Grids used for the distribution of electrical power in specific facilities, applications, or defined geographic areas" and may operate **[*5]** "while either connected to

---

[1] Plaintiff's motion for reconsideration of a prior order granting partial summary judgment as to the patent claims advanced in this action is addressed in a separate order. Dkt. 362. Etap's motion for review of Judge Mumm's July 31, 2007 discovery order is also addressed in a separate order. Dkt. 363.

other Microgrids, a larger Power Grid or in isolation." *Id.* ¶ 15. The SAC alleges that "Power Grids and Microgrids are often employed in power generation facilities, like nuclear power plants, data centers and other facilities that consume large volumes of electrical power." *Id.* ¶ 16. It also alleges that Power Grids and Microgrids are comprised of "Grid Elements, i.e., devices and operational components physically connected to the Grid." *Id.* ¶ 17. The SAC next alleges that one category of operational components for Power Grids, which Plaintiff produces, consists of "software and hardware used in the design of, and the safe, stable and efficient operation and management of, facilities that employ their own Power Grids and/or Microgrids." *Id.* ¶ 18. The SAC defines these components as "Grid D and M Products." *Id.* It alleges that these components are used in facilities including "nuclear power plants, oil refineries, manufacturing facilities, data centers, military installations, and air traffic control centers." *Id.*

2. Grid Design Products

The SAC alleges that Plaintiff makes and sells Grid Design Products, which "are software programs used in the engineering, **[*6]** design and subsequent management of Power Grids." *Id.* ¶ 21. It alleges that Grid Design Products "provide a functionality unique for use in Power Grids; thus, other software programs, are not reasonable substitutes for Grid Design Products." *Id.* Plaintiff's Grid Design Products are "NUPIC-certified Products." *Id.* ¶ 22. The SAC alleges that Etap makes Grid Design Products that compete with those of Plaintiff. *Id.* ¶ 17. Further, it alleges that, during the relevant time period, Plaintiff's Grid D and M Products "have been consistently priced at levels lower than ETAP's competing products, and are designed to deliver a lower total cost of ownership to customers as compared to ETAP's competing products." *Id.* ¶ 20.

3. Real Time Products

The SAC alleges that Plaintiff produces and sells Real Time Products, which "are software products that provide for additional functionality once the Power Grid is installed and deployed." *Id.* ¶¶ 25, 27. It also alleges that such functionality may include "the monitoring, modeling, simulation, and visualization, the current and future operation of the Power Grid by collecting and utilizing current data in near real time." *Id.* ¶ 25. It then alleges that Real **[*7]** Time Products enable "Power Grids to run securely, safely, efficiently and without significant interruption" by "evaluat[ing] and track[ing] system failures and avoid[ing] future damaging events by analyzing trends and predicting potentially damaging events." *Id.* Further, the SAC alleges that Real Time Products "include software applications with functionality that is unique for use in power grids; thus, other general system monitoring products are not reasonable substitutes for Real Time Products." *Id.* ¶ 26.

The SAC alleges that Plaintiff has obtained certain patents associated with its Real Time Products. *Id.* ¶ 27. It alleges that Etap and Schneider make and sell Real Time Products that compete with Plaintiff's Real Time Products. *Id.* ¶ 31. It also alleges that Defendants' Real Time Products do not offer the same level of functionality as those of Plaintiff. *Id.* ¶ 26. The SAC alleges that in November 2013, Plaintiff issued a press release announcing its patented Real Time Product. *Id.* ¶ 32. It alleges that, after Etap learned about the content of the press release, it "immediately recognized that [Plaintiff] posed a competitive threat that could not be tolerated." *Id.* ¶ 34. It alleges **[*8]** that an Etap employee emailed colleagues regarding the announcement and stated: "Great!!!!! All of our USP will be now for EDSA. We need to kill such competition from these companies. (EDSA, Cyme, DigSilent, PSSE in particular)." *Id.* ¶ 33.

4. Historian Software

The SAC alleges that, in order to function effectively, Real Time Products and Grid Design Products must interact with historian software. *Id.* ¶ 36. The SAC defines "Historian Software" as software products that "collect and retain certain categories of past information related to the operation of the Power Grid and . . . store such information for prescribed periods of time as 'records' of the Power Grid's past performance." *Id.* It alleges that historian software may be sold separately or together with Grid Design and Real Time Products. *Id.* Plaintiff sells historian software. *Id.* ¶ 40. Each of the Defendants sells unique historian software that competes with Plaintiff's product. *Id.* ¶¶ 37-41. The Real Time Products of Plaintiff and Etap both allegedly interface with third party historian software. *Id.*

D. Overview of the Alleged Relevant Product Markets

The SAC alleges that there are several relevant product markets: (i) the NUPIC **[*9]** Grid Design Market; (ii) the NUPIC Real Time Market and (iii) the EMS Platform Market. It alleges in the alternative to the EMS Platform Market the following four end-user EMS platform markets: (i) the Commercial Buildings EMS Platform Market; (ii) the Data Center EMS Platform Market; (iii) the Industrial EMS Platform Market and (iv) the Infrastructure/Grid EMS Platform Market.

1. <u>The Relevant NUPIC Markets</u>

a) In General

The SAC makes several allegations concerning the common elements of the NUPIC Grid Design Market and the NUPIC Real Time Market. It alleges that NUPIC stands for "the Nuclear Procurement Issues Committee." *Id.* ¶ 54. It alleges that NUPIC is "an industry partnership among nuclear power plants" and the "Nuclear Regulatory Commission (NRC) Licensees' preferred and cost-effective method of maintaining their Approved Suppliers List." *Id.* It alleges that customers in both alleged relevant markets "are primarily nuclear power generation facilities, other facilities that use or employ nuclear power, and entities who provide design and other services to such nuclear power facilities." *Id.* ¶ 53.

The SAC alleges that "[a]ll North American nuclear facilities are members of NUPIC." **[*10]** *Id.* It also alleges that all members of NUPIC are required to have "the current release of any installed software." *Id.* ¶ 64. It alleges that products used in nuclear facilities attain NUPIC certification through an audit by "at least five separate NUPIC members." *Id.* ¶ 54. It alleges that "[o]nce the required number of NUPIC members are satisfied with the audit results, one utility is selected as the lead utility for that supplier, and conducts an audit on behalf of the other NUPIC members every three years." *Id.* ¶ 55. Further, it alleges that the NUPIC audit process "imposes a significant burden on a company interested in selling its products to NUPIC members," including an up-front "seven figure capital expenditure, an initial commitment of several years" and additional expenditures for subsequent audits. *Id.* ¶ 56.

The FAC next alleges that the NUPIC market is a "low growth market in terms of new customers and new sites for existing customers." *Id.* ¶ 72. It alleges that because the NUPIC market is largely comprised of existing nuclear reactors, "competition within this market is substantially limited to switching out . . . existing grid design and management products or offering **[*11]** new applications and products with additional functionality." *Id.* ¶ 73.

b) NUPIC Grid Design Market

The SAC alleges that one relevant product market is the NUPIC Grid Design Market. *Id.* ¶ 52. The SAC defines that market as one for "the sale and servicing of Grid Design Products to customers who are, by law and or regulation, limited to purchasing only Grid Design Products that have successfully completed a NUPIC audit within the prior three years." *Id.* The geographic market for the NUPIC Grid Design market is North America. *Id.* ¶ 71.

The SAC alleges that Plaintiff and Etap are the only entities that compete within the NUPIC Grid Design Market. *Id.* ¶ 59. It alleges that Etap and Plaintiff are both authorized to sell their respective Grid Design Products to NUPIC customers. *Id.* ¶¶ 60-61. Further, it alleges that Plaintiff "has historically participated" in the NUPIC Grid Design Market. *Id.* ¶ 61. It alleges that Plaintiff's Grid Design Product "is lower priced than Etap's competing product and offers additional functionality attractive to NUPIC market customers, such as direct current system design management." *Id.* The SAC alleges that Etap "has stated publicly that its Grid Design Products **[*12]** are currently in use at 97% of the NUPIC facilities, with at least 60 of 64 U.S. nuclear power facilities as customers. Etap also has 5 of the 6 Canadian nuclear power facilities and all 3 of the nuclear power facilities in Mexico." *Id.* ¶ 74.

The SAC also alleges that the time and expense associated with the NUPIC certification and audit processes pose "a high entry barrier" into the NUPIC Grid Design Market. *Id.* ¶ 57. Further, it alleges that these processes distinguish the NUPIC Grid Design Market from the general market for the sale and servicing of Grid Design Products. *Id.* ¶ 58. Thus, it alleges that other companies that make and sell Grid Design Products do not compete in the NUPIC Grid Design Market because they have not completed a NUPIC audit for their respective Grid Design Products. *Id.* ¶ 62. The SAC also alleges that these Grid Design Products are "not reasonable substitutes" for the NUPIC-certified Grid Design Products offered by Plaintiff and Etap. It also alleges that these companies do not have an economic incentive to have a NUPIC audit performed for their Grid Design Products "absent a critical level of contestable sales opportunities for the sale of Grid Design Products **[*13]** to NUPIC customers." *Id.* ¶ 63.

c) NUPIC Real Time Market

The SAC alleges that a second relevant product market is the NUPIC Real Time Market. *Id.* ¶ 52. The SAC defines this market as one for "the sale and servicing of Real Time Products to customers who are, by law and or regulation, limited to purchasing only Real Time Products that have successfully completed a NUPIC audit within the past three years." *Id.* The geographic market for the NUPIC Grid Design Market is North America. *Id.* ¶ 71.

The SAC alleges that the time and expense associated with the NUPIC certification and audit processes pose "a high entry barrier" into the NUPIC Real Time Market. *Id.* ¶ 57. Further, it alleges that these processes distinguish the NUPIC Real Time Market from the general market for the sale and servicing of Real Time Products. *Id.* ¶ 58.

The SAC alleges that, based on Plaintiff's knowledge of the relevant markets, no Real Time Products have been subjected to a NUPIC audit that resulted in a positive report. *Id.* ¶ 65. It alleges that Plaintiff has not undertaken a NUPIC audit for its Real Time Product "because of foreclosure of sales opportunities within the NUPIC market, as a result of Etap's and OSI's **[*14]** anticompetitive agreement." *Id.* ¶¶ 65-66. It alleges that this agreement has resulted in Plaintiff having a market share of approximately 3% of all sales of Real Time Products. *Id.* ¶ 66. Plaintiff contends that its market share is "below the critical level needed to justify the investment required to obtain NUPIC certification." *Id.* ¶ 67.

The SAC alleges that Plaintiff is a potential participant in the NUPIC Real Time Market because "it stands ready to undergo a NUPIC audit for its Real Time Product . . . once the anticompetitive agreement between ETAP and OSI is nullified and enjoined." *Id.* ¶ 68. It alleges that Plaintiff's decision not to elect to have its operations subjected to a NUPIC audit "supports the reasonable inference that other potential competitors . . . have been similarly foreclosed from contesting ETAP in this market." *Id.* ¶ 69.

2. <u>The EMS Relevant Markets</u>

a) The EMS Platform Market

The SAC alleges that the market for the sale and servicing of Energy Management Systems platforms ("EMS Platform Market") is a separate, relevant product market. *Id.* ¶ 107. The SAC defines EMS as "the full bundle of automation, monitoring and control software, hardware and related equipment **[*15]** purchased by facility owner/operators for use as an 'EMS Platform.'" *Id.* EMS Platform software includes Grid Design Products and Real Time Products. *Id.* ¶ 135. The geographic market for the EMS Platform Market is North America. *Id.* ¶ 147.

The SAC alleges that customers in the EMS Platform Market share "common characteristics" including the following: (i) they operate in low or medium voltage environments and (ii) they place a premium on the reliability of their electrical power systems and employ "more sophisticated monitoring systems" and "redundant equipment" to prevent power outages. *Id.* ¶¶ 109-10. It alleges that in the EMS Platform Market, "the demand for bundled sales is sufficiently strong so as to restrict competition to sales among firms that are able to provide a complete or nearly complete bundle or Platform," and that such firms include Schneider and certain other competitors. *Id.* ¶ 128. It alleges that competition among EMS platform suppliers has "critical implications" for component suppliers like Plaintiff because they are "wholly reliant upon platform suppliers to include their component products in the platform in order for those products to be available to end use **[*16]** customers at all." *Id.* ¶ 129.

The SAC alleges that Schneider has a dominant share of the EMS Platform Market, which makes it a "critical bridge" to customers in that market. *Id.* ¶ 130. It alleges that if component suppliers like Plaintiff do not have access to this critical bridge, they "lack a viable method for selling their Grid D and M Products to the EMS Platform Market customers." *Id.* ¶ 131. It alleges that, as a result of an agreement between Schneider and Etap, Etap is the sole supplier of Grid Design Products and Real Time Products within the EMS Market. *Id.* ¶ 137.

The SAC alleges that Schneider holds more than 50% of the EMS Platform Market. *Id.* ¶ 140. It alleges that, because the remainder of the EMS Platform Market is fragmented, none of Schneider's competitors "represent[s] a viable alternative by which competitors to Etap, like Power Analytics and others, could reach a meaningful share of EMS platform customers with their Grid D and M Products." *Id.* ¶ 141. It alleges that Schneider has a dominant share of the EMS Platform Market because it "possesses the manufacturing capability for virtually all the equipment needed in EMS" and EMS platform suppliers that have worked with **[*17]** a customer in the past often work with that customer on new projects. *Id.* ¶¶ 144, 146. The SAC alleges in the alternative to the EMS Platform Market, the following four end-user EMS markets:

> (i) the sale and servicing of Energy Management Systems (EMS) platforms for Commercial Buildings (Commercial Buildings EMS Platform Market); (ii) the sale and servicing of Energy Management Systems (EMS) platforms for Data Centers (Data Center EMS Platform Market); (iii) the sale and servicing of Energy Management Systems (EMS) platforms for Industrial (Industrial EMS Platform Market); and (iv) the sale and servicing of Energy Management Systems (EMS) platforms for Infrastructure/Grid (Infrastructure/Grid EMS Platform Market).

Id. ¶ 150. North America is the alleged geographic market for the four end-user markets. *Id.* ¶ 161. The SAC alleges that these end-user markets are distinct "based on the configuration, integration and automation of select components" even though some components are used in more than one end-user platform. *Id.* ¶¶ 151, 154. It alleges that Schneider has publicly stated that it has a "dominant position" in each end-user market. *Id.* ¶ 153.

b) The End-User EMS Markets

(1) <u>The Commercial **[*18]** Buildings EMS Platform Market</u>

The SAC alleges that facilities in the Commercial Buildings EMS Platform Market include healthcare, hotel, office and "other similar low and medium voltage power system facilities where the prohibitive costs of power failure and/or power-related accidents require high levels of redundancy and more sophisticated monitoring and modeling software." *Id.* ¶ 162. It alleges that, with at least a 40% market share, Schneider is the largest EMS platform supplier in the Commercial Buildings EMS Platform Market. *Id.* ¶ 164.

(2) <u>The Data Center EMS Platform Market</u>

The SAC alleges that Data Centers are "low and medium voltage power system facilities where the prohibitive costs of power failure and/or power-related accidents require high levels of redundancy and more sophisticated monitoring and modeling software." *Id.* ¶ 166. It alleges that, with at least a 50% market share, Schneider is the largest supplier in the Data Center EMS Platform Market. *Id.* ¶ 168. It alleges that this market is concentrated. *Id.*

(3) <u>The Industrial EMS Platform Market and the Infrastructure/Grid EMS Platform Market</u>

The SAC alleges that the Industrial EMS Platform Market includes "discrete and continuous **[*19]** process facilities, including Packaging, Machine Building, Food and Beverage, Mining, Metals, Minerals, Oil & Gas facilities, among other similar low and medium voltage power system facilities where the prohibitive costs of power failure and/or power-related accidents require high levels of redundancy and more sophisticated monitoring and modeling software." *Id.* ¶ 170. It alleges that, with at least a 30% market share, Schneider is one of the two largest suppliers in the Data Center EMS Platform Market. *Id.* ¶ 172. It alleges that this market is concentrated. *Id.*

The SAC alleges that facilities in the Infrastructure/Grid EMS Platform Market include "Water & Wastewater plants, Transportation systems, Electric Generation and Transmission Utility facilities and other similar low and medium voltage power system facilities where the prohibitive costs of power failure and/or power-related accidents require high levels of redundancy and more sophisticated monitoring and modeling software." *Id.* ¶ 174. It alleges that, with at least a 33% market share, Schneider is the largest supplier in the Infrastructure/Grid EMS Platform Market. *Id.* ¶ 176. It alleges that this market is concentrated. *Id.* **[*20]** It alleges that because many of the components used in industrial EMS platforms are also used in infrastructure EMS platforms, the Industrial EMS Platform Market and the Infrastructure/Grid EMS Platform Market constitute a single product market. *Id.* ¶ 178.

E. The Alleged Anticompetitive Arrangement Between Etap and OSI

The SAC alleges that "OSI's Historian Software, PI Systems, has a dominant share of customers in the NUPIC Market." *Id.* ¶ 75. It also alleges that "100% of operating nuclear power generators in Canada and 76% of operating nuclear power generators in the U.S. use PI Systems." *Id.* Further, it alleges that it is expensive to switch historian software. *Id.* ¶ 76. It alleges that because of these high switching costs, OSI "does not face a viable competitive threat to installed historian software customer base, which amounts to over 80% of the customers in the NUPIC market." *Id.* The SAC alleges that this makes the vendor of historian software a "critical bridge" "that suppliers like Power Analytics must access . . . in order to sell their Grid D and M Products to those potential NUPIC Market customers." *Id.* ¶ 77. It alleges that OSI's dominant market share makes it a "critical **[*21]** bridge" to potential customers in the NUPIC market. *Id.* ¶ 93.

The SAC alleges that Etap and OSI have entered an anti-competitive agreement ("OSI—Etap Agreement") that is "not a vertical agreement between a buyer and a seller, or a manufacturer and a retailer" but instead an agreement between "two sellers of Grid D and M Products into the NUPIC Markets." *Id.* ¶¶ 78, 79. It alleges that the OSI—Etap Agreement has been in place since at least 2013. *Id.* ¶ 79.

The SAC alleges that in September 2014, Etap and OSI announced the OSI—Etap Agreement, "which they characterized as a 'strategic partnership,' but was intended and operated to 'ensure that the OSI products can only be used by end users in conjunction with the OEM [ETAP] products." *Id.* ¶ 80. It alleges that according to Etap, the OSI—Etap Agreement would result in a "joint sale of their respective products" and would allow for no substitutes. *Id.* ¶ 85. It alleges that a 2013 term sheet documenting key provisions in the agreement stated that customers who made purchases of OSI products under the OSI—Etap Agreement could only use those products in conjunction with Etap products. *Id.* ¶ 87. It also alleges that the OSI—Etap Agreement caused **[*22]** harm to potential and actual competitors, including Plaintiff. *Id.* ¶ 89. Further, it alleges that the memorandum of understanding entered by Etap and OSI requires that OSI exclusively "recommend and promote ETAP Products as a preferred power systems analysis and management platform to all prospective customers." *Id.* ¶ 90.

It is also alleged that in 2011, Plaintiff approached OSI and proposed the entry of a non-exclusive cooperative relationship through which OSI would serve as the critical bridge for Plaintiff's products. *Id.* ¶ 93. It alleges that OSI's CEO told Plaintiff's former CEO that Plaintiff's Real Time Products represented a growth opportunity in the NUPIC Market. *Id.* ¶ 97. Further, it alleges that Plaintiff's employees met with OSI's employees in 2012 to discuss the possibility of targeting existing OSI customers in the NUPIC

Market, which would have enabled Plaintiff "to seek and obtain NUPIC certification for its Real Time Products." *Id.* ¶ 98. It alleges that Plaintiff's employee who prepared the 2011 proposal joined Etap in 2013, and thereafter OSI terminated the foregoing discussions with Plaintiff. *Id.* ¶ 94. It also alleges that, following the announcement of the OSI—Etap **[*23]** Agreement, OSI ceased all marketing and joint sales efforts with Plaintiff in the NUPIC Market. *Id.* ¶¶ 91, 99. It alleges that before the announcement, Plaintiff paid OSI to obtain access to its historian software code to ensure that Plaintiff's Grid D and M Products "worked seamlessly with OSI's PI System Historian Software." *Id.* ¶ 95.

The SAC alleges that if component suppliers like Plaintiff do not have access to OSI's critical bridge, they "lack a viable method for selling their Grid D and M Products to the EMS Platform Market customers." *Id.* ¶¶ 101, 131. Further, it alleges that the OSI—Etap Agreement is exclusionary. *Id.* ¶ 103. The basis for this claim includes the following:

> ETAP's high market share in the NUPIC Grid Design Market supports a finding that ETAP had monopoly power in that Market. The other party to the arrangement, OSI, has a market share for Historian software used by NUPIC customers in excess of 80%. The arrangement has operated to stop OSI's interactions with ETAP's competitors with regard to NUPIC customers. OSI's high market share means that the Agreement excluded all competition facing ETAP in at least 80% of the NUPIC Grid Design Market. The loss of this actual **[*24]** and potential competition has reduced output, stifled innovation and customer choice, and has eliminated the source of price competition in the NUPIC Grid Design Market.

Id. ¶ 103.

The SAC then alleges that since the announcement of the OSI—Etap Agreement, Plaintiff has lost four NUPIC customers: Duke Energy, Enercon, Atomic Energy of Canada and Energy Northwest. *Id.* ¶ 106. It alleges that collectively these customers represented more than 35% of Plaintiff's pre-OSI—Etap Agreement business. *Id.* It alleges that Plaintiff believes that all four customers "switched over to ETAP." *Id.*

F. The Alleged Anticompetitive Arrangement Between Etap and Schneider

The SAC alleges that Schneider is an EMS platform supplier. *Id.* ¶ 123. It alleges that Schneider "exercises complete control over which other suppliers' products will be offered to customers and ultimately used in the EMS Platform sale." *Id.* ¶ 135 The SAC alleges that there is an anticompetitive agreement between Etap and Schneider ("Schneider—Etap Agreement") that is "not a vertical agreement between a buyer and a seller, or a manufacturer and a retailer" but an agreement "between two sellers of components in a bundle offered to EMS Platform **[*25]** customers, where one of the two suppliers controls the contents of the bundle and has substantial market power." *Id.* ¶ 184.

The SAC alleges that, on December 11, 2012, Schneider and Etap announced a cooperative agreement. *Id.* ¶ 186. Its terms included the launch of a module that combined Schneider's electrical power analysis and simulation solution software with Etap's Power Grid D and M Products. *Id.* ¶ 186. It alleges that the Schneider—Etap Agreement "became exclusive and sole-sourced with the announcement in 2015 that Schneider had 'standardized' all of its EMS Platform Grid D and M Products components on ETAP products." *Id.* ¶ 190. It then alleges that the agreement has harmed competition by "excluding lower cost, and more efficient and innovative Grid D and M products offered by competing component suppliers" like Plaintiff from the EMS Platform Market. *Id.* ¶ 193.

The SAC alleges that internal Etap correspondence from 2016 includes statements that "Both SEL and SE [Schneider Electric] will be only looking at ETAP for RT PSMS [Real Time Power System Monitoring Software] software and integration support of our software." *Id.* ¶ 199. The SAC also alleges that

> [s]ubsequent to the announcement **[*26]** of its agreement with Etap, and notwithstanding Power Analytics' previous business dealings with Schneider, Schneider has refused to recommend or use Power Analytics' Grid Design, Real Time and Arc Flash Products in any EMS Platform that Schneider has bid on, sold or managed, even though certain project specification requirements could only be satisfied by using Power Analytics' patented technology.

Id. ¶ 201.

The SAC alleges that before the Schneider—Etap Agreement was finalized, Schneider included Plaintiff's Grid D and M Products in multiple EMS platform bids. *Id.* ¶ 179. It alleges that in 2010, for example, Schneider included "Power Analytics' products in discussions regarding a potential, multiple location EMS Platform project for Citibank." *Id.* ¶ 183.

G. Additional Alleged Anti-Competitive Conduct

The SAC alleges that Defendants engaged in willful infringement of Plaintiff's patents. *Id.* ¶¶ 218-25.

H. Claims asserted in the SAC

1. <u>Federal Claims</u>

The SAC alleges that Defendants violated *Section 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*.

a) Sherman Act *Section 1*

The SAC alleges that Defendants violated *Section 1* through the OSI—Etap Agreement. It alleges that this agreement illegally restrains trade in the NUPIC Grid Design **[*27]** Market and the NUPIC Real Time Market. *Id.* ¶ 298. It alleges that the OSI—Etap Agreement "included unreasonable impediments and conditions upon customers who would wish to swap out OSI and/or ETAP's products for those of competitors." *Id.* ¶ 311. It alleges, for example, that the agreement includes a "contractually imposed penalty" because if a customer with a joint OSI/Etap product wants to purchase a competitor's product, "such customer would need to purchase a duplicative copy of the OSI or Etap software." *Id.* ¶ 312. It also alleges that the agreement has had "a direct, substantial adverse effect on competition including (i) foreclosing competition from lower cost, higher quality products and services in those markets; (ii) reducing customer choice within those markets; . . . (iii) foreclosing innovation in those markets, and (iv) reducing consumer welfare through the above adverse effects." *Id.* ¶ 315.

The SAC also alleges that Defendants violated *Section 1* through the Schneider—Etap Agreement. It alleges that this agreement illegally restrains trade in the EMS Platform Market, or, alternatively, in the Commercial Buildings EMS Platform Market, Data Center EMS Platform Market, Industrial EMS **[*28]** Platform Market and Infrastructure/Grid EMS Platform Market. *Id.* ¶¶ 328-29. It alleges that "Schneider offers only Etap's Grid Design and Real Time Products for EMS Platform projects which Schneider controls." *Id.* ¶ 335. It alleges that this agreement became "exclusive and sole-sourced" when Schneider announced in 2015 that it had standardized "all of its EMS Platform Grid Design components on ETAP products." *Id.* ¶ 340. Further, it alleges that the agreement has "harmed competition by denying end use[r] customers access to price competition and innovative products offered by Power Analytics and other competitors for the sale of Power Grid D and M Products to the EMS Platform Market." *Id.* ¶ 342.

The SAC alleges that both agreements have reduced Plaintiff's share of the relevant markets to levels "significantly lower" than they would be in the absence of these agreements. *Id.* ¶ 344. It also alleges that Defendants "have no *bona fide* pro-competitive justifications for their anticompetitive agreements, and any business justifications for these agreements are decidedly outweighed by the agreements' adverse effect on competition in the relevant markets." *Id.* ¶¶ 316, 343.

b) Sherman Act *Section 2*

The **[*29]** SAC also alleges violations of *Section 2* through Etap's monopolization and attempted monopolization of the NUPIC Grid Design Market. It alleges that this conduct constitutes predatory conduct that violates *Section 2*.

The SAC alleges that, because Etap has a 97% share in the NUPIC Grid Design Market, it has monopoly power there. *Id.* ¶¶ 353-54. It also alleges that Etap has the power to control prices and exclude actual and potential competitors in the NUPIC Grid Design Market and in the NUPIC Real Time Market. It is alleged that Etap can do so due to its ability to sell its lower quality, higher priced products and as the result of its exclusivity agreement with OSI. *Id.* ¶¶ 357-58. It alleges that the licensing terms Etap and OSI agreed to make it "economically irrational for a NUPIC customer to switch" to competing Grid Design Products and has allowed Etap to obtain monopoly power in the NUPIC Grid Products Market. *Id.* ¶¶ 359, 362. Further, it alleges that even if Etap does not possess monopoly power in the NUPIC Grid Design Market, "its anticompetitive conduct constitutes an attempt to monopolize." *Id.* ¶ 364. It alleges that because of Etap's high market share, there is a "dangerous likelihood" that **[*30]** it will achieve monopoly power in the NUPIC Grid Design Market. *Id.* ¶ 365.

The SAC alleges that the foregoing conduct has caused harm to Plaintiff and other competitors, as well as consumers and potential consumers, in the NUPIC Grid Design and NUPIC Real Time Markets. *Id.* ¶ 366.

2. State Law Claims

The SAC brings a Cartwright Act claim, *Cal. Bus. & Prof. Code §§ 16700 et seq.*, that parallels the ones brought under *Section 1* of the Sherman Act. *Id.* ¶¶ 350-51. It also alleges that the conduct giving rise to liability under the Sherman Act gives rise to a claim against Defendants under the North Carolina Unfair and Deceptive Trade Practices Act, *N.C. Gen. Stat. §§ 75-1*, *75-1.1*, *75-2*, and *75-2.1* (¶¶ 369-73), and

California's Unfair Competition Law, *Cal. Bus. & Prof Code §§ 17200 et seq.*, ¶¶ 374-75. The SAC also brings a claim for tortious interference with prospective economic advantage based on allegedly lost sales to four commercial entities with which Plaintiff had ongoing commercial relationships. *Id.* ¶¶ 376-80. Finally, the SAC advances a related claim for civil conspiracy. *Id.* ¶¶ 381-86.

III. Analysis

A. Legal Standards

Fed. R. Civ. P. 8(a) provides that a "pleading that states a claim for relief must contain . . . a short and plain statement of the claim showing that the pleader is entitled to relief . . . ." The complaint must **[*31]** state facts sufficient to show that a claim for relief is plausible on its face. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. The complaint need not include detailed factual allegations, but must provide more than a "formulaic recitation of the elements of a cause of action." *Id. at 555*. "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotation marks and citations omitted).

Pursuant to *Fed. R. Civ. P. 12(b)(6)*, a party may bring a motion to dismiss a cause of action that fails to state a claim. It is appropriate to grant such a motion only where the complaint lacks a cognizable legal theory or sufficient facts to support one. *Mendiondo v. Centinela Hosp. Med. Ctr., 521 F.3d 1097, 1104 (9th Cir. 2008)*. In considering a motion to dismiss, the allegations in the challenged complaint are deemed true and must be construed in the light most favorable to the non-moving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. However, a court need not "accept as true allegations that contradict matters properly subject to judicial notice or by exhibit. Nor is the court required to accept as true **[*32]** allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Sciences Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (citing *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001))*. "Moreover, the Supreme Court has cautioned against permitting antitrust cases to proceed to discovery without a plaintiff demonstrating 'plausibility' because of the high cost of discovery in antitrust cases in particular." *Pro Search Plus, LLC v. VFM Leonardo, Inc., No. SACV 12-2102-JST ANX, 2013 U.S. Dist. LEXIS 107895, 2013 WL 3936394, at *1 (C.D. Cal. July 30, 2013)*; *see also* *Twombly, 550 U.S. at 558* ("Thus, it is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive." (internal citation omitted)).

B. Application

1. Antitrust Claims

a) Sherman Act *Section 1*

(1) Statutory Standards and Relevant Allegations in the SAC

Section 1 of the Sherman Act, *15 U.S.C. § 1*, prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (quoting *15 U.S.C. § 1*). "Despite the breadth of the statutory language, the Supreme Court 'has long recognized that Congress intended to outlaw only unreasonable restraints.'" *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1178 (9th Cir. 2016)* (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*. "To establish liability under *§ 1*, a plaintiff must prove (1) the existence of an agreement, and (2) that the agreement **[*33]** was in unreasonable restraint of trade." *Id.* (citing *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 189-90, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010))*.

The SAC alleges that Etap entered separate agreements with OSI and Schneider, and that each unreasonably restrains trade. SAC ¶¶ 298, 328-29. With respect to the OSI—Etap Agreement, the SAC alleges that it "included unreasonable impediments and conditions upon customers who would wish to swap out OSI and/or ETAP's products for those of competitors." *Id.* ¶ 311. It further alleges that this agreement has had "a direct, substantial adverse effect on competition including (i) foreclosing competition from lower cost, higher quality products and services in th[e relevant] markets; (ii) reducing customer choice within those markets; . . . (iii) foreclosing innovation in those markets, and (iv) reducing consumer welfare through the above adverse effects." *Id.* ¶ 315. With respect to the Schneider—Etap Agreement, the SAC alleges that "Schneider offers only Etap's Grid Design and Real Time Products for EMS Platform projects which Schneider controls." *Id.* ¶ 335. It alleges that this agreement became "exclusive and sole-sourced" when Schneider announced in 2015 that it had standardized "all of its EMS Platform Grid Design components on ETAP **[*34]** products." *Id.* ¶ 340. Further, it alleges that the agreement has "harmed competition by denying end use[r] customers access to price competition and innovative products offered by Power Analytics and other competitors for the sale of Power Grid D and M Products to the EMS Platform Market." *Id.* ¶ 342.

Defendants contend that the SAC fails plausibly to allege the existence of an exclusive dealing arrangement, a relevant market, and harm to competition. OSI and Etap also argue that Plaintiff lacks antitrust standing.

(2) Exclusive Dealing Arrangements

"Exclusive dealing involves an agreement between a vendor and a buyer that prevents the buyer from purchasing a given good from any other vendor." *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 996 (9th Cir. 2010)*. "The main antitrust objection to exclusive dealing is its tendency to 'foreclose' existing competitors or new entrants from competition in the covered portion of the relevant market during the term of the agreement." *Omega Envtl., Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1162 (9th Cir. 1997)* (footnote omitted) (citing *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 393 (7th Cir. 1984)* (Posner, J.)).

There are "well-recognized economic benefits to exclusive dealing arrangements, including the enhancement of interbrand competition." *Id.* "[A]n exclusive-dealing arrangement does not constitute a per se violation of *section 1*." *Twin City Sportservice, Inc. v. Charles O. Finley & Co., Inc., 676 F.2d 1291, 1303-04 (9th Cir. 1982)*. This is because "virtually **[*35]** *every* contract to buy 'forecloses' or 'excludes' alternative sellers from *some* portion of the market, namely the portion consisting of what was bought." *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 236 (1st Cir. 1983)* (Breyer, J.); *see also* *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 270 (3d Cir. 2012)* ("Exclusive dealing agreements are often entered into for entirely procompetitive reasons, and generally pose little threat to competition."). Therefore, "the rule of reason rather than a per se analysis" is applied to exclusive dealing arrangements. *Aerotec Int'l, 836 F.3d at 1181 n.2*. "Under the antitrust rule of reason, an exclusive dealing arrangement violates *Section 1* only if its effect is to 'foreclose competition in a substantial share of the line of commerce affected.'" *Allied Orthopedic Appliances, 592 F.3d at 996* (quoting *Omega, 127 F.3d at 1162*); *see also* *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 45, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* (O'Connor, J., concurring) ("Exclusive dealing is an unreasonable restraint on trade only when a significant fraction of buyers or sellers are frozen out of a market by the exclusive deal.").

"[A] prerequisite to any exclusive dealing claim is an agreement to deal exclusively." *ZF Meritor, 696 F.3d at 270*. To establish a de facto exclusive dealing claim, "a plaintiff must still show that contracts that were induced were exclusive rather than run-of-the-mill contracts, which inevitably foreclose or exclude alternative sellers from *some* portion of the market, namely the portion consisting **[*36]** of what was bought." *Aerotec Int'l, 836 F.3d at 1181* (internal quotation marks and alterations omitted). Courts may focus on the terms of the agreement to determine if it is a de facto exclusive arrangement. *See id.* (exclusive arrangements include those with "requirements terms, . . . volume or market share targets, or long-term contracts that prevent meaningful competition by taking potential purchasers off the market" (citations omitted)); *see also* *id. at 1182* ("In certain limited situations, discounts and rebates conditioned on a promise of exclusivity or on purchase of a specified quantity or market share of the seller's goods or services may be understood as 'de facto' exclusive dealing contracts because they coerce buyers into purchasing a substantial amount of their needs from the seller.").

The Ninth Circuit has "not explicitly recognized a 'de facto' exclusive dealing theory," but has not rejected it. *Id.* The allegations of the SAC do not specify whether the alleged exclusive dealing arrangements between Defendants are express or de facto. However, the SAC does not plausibly allege the existence of either type of exclusive dealing agreement. Nor does it plausibly allege that the agreements have the effect of "foreclos[ing] **[*37]** competition in a substantial share of the line of commerce affected." *Omega, 127 F.3d at 1162*.

(a) Schneider—Etap Agreement

Plaintiff argues that the Schneider—Etap Agreement is not a vertical one, but an "agreement between two sellers of components in a bundle offered to EMS Platform Customers, where one of the two suppliers controls the contents of the bundle and has substantial market power." SAC ¶ 184. It alleges that this agreement "became exclusive and sole-sourced with the announcement in 2015 that Schneider had 'standardized' all of its EMS Platform Grid D and M Products components on ETAP products." *Id.* ¶ 190. In support of this allegation, the SAC includes an excerpt of a May 27, 2015 press release that states that "Schneider Electric decided to standardize the use of ETAP for its project in order to leverage the advanced, next generation technology of the integrated ETAP software suite to further increase its productivity through greater efficiencies." *Id.* ¶ 190. Further, the SAC alleges that the Schneider—Etap Agreement ultimately applied to "all EMS Platform Markets in addition to data centers." *Id.* ¶ 191.

The SAC also alleges that internal Etap correspondence from 2016 states that "Both SEL and **[*38]** SE [Schneider Electric] will be only looking at ETAP for RT PSMS [Real Time Power System Monitoring Software] software and integration support of our software." *Id.* ¶ 199. It alleges that this "'standardization' and sole-sourcing mechanism" has excluded "actual and potential competitors capable of offering Grid D and M products as components of Schneider's EMS Platforms, including Power Analytics." *Id.* ¶ 192. It also alleges that, since entering into this agreement, Schneider has "refused to recommend or use Power Analytics' Grid Design, Real Time and Arc Flash Products in any EMS Platform that Schneider has bid on, sold or managed, even though certain project specification requirements could only be satisfied by using Power Analytics' patented technology." *Id.* ¶ 201.

Defendants argue that the exclusive dealing claim fails because the SAC does not plausibly allege that the Schneider—Etap Agreement was more than a cooperative one or that it was exclusive. They argue that the new allegations included in the SAC do not cure the deficiencies identified in the Prior Order.

The SAC does not plausibly allege the existence of an express or de facto exclusive dealing arrangement between Schneider **[*39]** and Etap. The allegations that the Schneider—Etap Agreement became "exclusive and sole sourced with the announcement in 2015 that Schneider had 'standardized' all of its EMS Platform Grid D and M Products components on ETAP products," are conclusory. Plaintiff describes the Schneider—Etap Agreement as a "sole-sourcing mechanism," in what appears to be an effort to remedy the absence of allegations in the FAC as to any exclusionary mechanism. *See* Dkt. 227. The SAC does not, however, present any allegations that would support a claim of exclusivity, *e.g.*, "requirements terms, . . . volume or market share targets, or long-term contracts that prevent meaningful competition by taking potential purchasers off the market." *Aerotec Int'l, 836 F.3d at 1181* (citations omitted). Indeed, the press release that is cited in the SAC states that Schneider "'standardized' all of its EMS Platform Grid D and M Products components on ETAP products." SAC ¶ 190. There are no later allegations as to how this standardization prevented Schneider from bundling its products with those of Etap's competitors.

Plaintiff argues that the SAC plausibly states an exclusive dealing arrangement because it alleges that, through the Schneider—Etap Agreement, **[*40]** Schneider committed to use only Etap's Grid D and M Products in its EMS platform products. However, the SAC alleges that Schneider and Etap announced a cooperative agreement to bundle Etap's Grid D and M Products with Schneider's electrical power analysis and simulation solution software. *Id.* ¶¶ 186-201. It then alleges that, since the entry of this agreement, Schneider "has refused to recommend or use Power Analytics' Grid Design, Real Time and Arc Flash Products in any EMS Platform that Schneider has bid on, sold or managed, even though certain project specification requirements could only be satisfied by using Power Analytics' patented technology." *Id.* These allegations are not sufficient plausibly to state that the Schneider—Etap Agreement was more than a run-of-the-mill agreement to bundle two complementary products. *Aerotec Int'l, 836 F.3d at 1181*. For example, it does not plausibly allege why that agreement prevents Schneider from entering into a similar bundling agreement with Plaintiff or another EMS platform component provider. It also does not allege how Schneider's decision to "standardize the use of ETAP for its products" results in exclusivity.

The SAC does allege that, prior to entering the Schneider—Etap **[*41]** Agreement, Schneider had included Plaintiff's Grid D and M Products in multiple EMS platform bids and that in 2010 Plaintiff and Schneider were engaged in discussions regarding specific future potential business opportunities. SAC ¶¶ 179-183. However, the SAC does not include allegations as to how those dealings relate to the claimed exclusivity. *Id.* Indeed, all of the allegations in the SAC regarding the business negotiations between Plaintiff and Schneider refer to communications that occurred on or before December 2010. *Id.* ¶ 183. It was not until December 2012 that Schneider and Etap announced their agreement. *Id.* ¶ 186. In light of these omissions, as well as the period of approximately two years that elapsed between these negotiations and the entry of the challenged agreement, it is not plausible to infer from the SAC that Schneider has refused to do business with Plaintiff due to an exclusive dealing arrangement with Etap. *See, e.g.*, *Pro Search Plus, 2013 U.S. Dist. LEXIS 107895, 2013 WL 3936394, at *4* ("While the case law does support the general proposition that a de facto exclusive dealing arrangement can run afoul of the antitrust laws, Pro Search has not alleged anything beyond the existence of the contracts to support its apparently broader **[*42]** 'de facto arrangement' theory."). Without more, a refusal to deal is not an antitrust violation. *See* *Aerotec Int'l, 836 F.3d at 1184* ("As the Supreme Court has repeatedly emphasized, there is 'no duty to deal under the terms and conditions preferred by [a competitor's] rivals.'" (quoting *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 457, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009))*).

(b) OSI—Etap Agreement

The SAC next alleges that the OSI—Etap Agreement is "not a vertical agreement between a buyer and a seller, or a manufacturer and a retailer" but instead an agreement between "two sellers of Grid D and M Products into the NUPIC Markets." *Id.* ¶¶ 78, 79. It also alleges that "the sole purpose and effect of this agreement has been exclusionary." *Id.* ¶ 297.

The SAC alleges that in September 2014, Etap and OSI formed a strategic partnership that was "intended and operated to 'ensure that the OSI products can only be used by end users in conjunction with the OEM [ETAP] products'." *Id.* ¶ 80. It alleges that Etap has acknowledged that the OSI—Etap Agreement would result in a "joint sale of their respective products" and would allow for no substitutes. *Id.* ¶ 85. The SAC then alleges that the agreement is exclusive for the following reasons:

> ETAP's high market share in the NUPIC Grid Design Market supports a finding that **[*43]** ETAP had monopoly power in that Market. The other party to the arrangement, OSI, has a market share for Historian software used by NUPIC customers in excess of 80%. The arrangement has operated to stop OSI's interactions with ETAP's competitors with regard to NUPIC customers. OSI's high market share means that the Agreement excluded all competition facing ETAP in at least 80% of the NUPIC Grid Design Market. The loss of this actual and potential competition has reduced output, stifled innovation and customer choice, and has eliminated the source of price competition in the NUPIC Grid Design Market.

Id. ¶ 103.

Defendants argue that these allegations to do not plausibly allege de facto exclusivity because they are conclusory. That argument is persuasive. These allegations are not sufficient plausibly to allege an exclusive dealing arrangement between OSI and Etap for reasons that parallel those stated above with respect to the alleged agreement between Schneider and Etap. The allegations do not, for example, plausibly allege that the strategic partnership entered by OSI and Etap prevented OSI from entering into similar strategic partnerships with Plaintiff and other suppliers of Grid D **[*44]** and M Products. The SAC alleges that OSI is a critical bridge to the NUPIC market because more than 80% of existing NUPIC facilities use OSI's base historian software. This allegedly makes it very unlikely that they would switch to a different historian software due to the high cost of doing so. SAC ¶ 77. This is not sufficient to state this element of the claim. The SAC does not allege any specific terms of this agreement that make it de facto exclusive. Instead, the SAC alleges only that OSI has not partnered with Plaintiff. Given the absence of some specificity as to the challenged agreement and its effect, the SAC does not plausibly allege exclusivity. *Aerotec Int'l, 836 F.3d at 1183* ("Just as in any exclusive dealing claim, however, the court first had to be satisfied that specific features of the agreement required exclusivity.").

For the foregoing reasons, the SAC does not plausibly allege the existence of express or de facto exclusive dealing arrangements between or among any of the Defendants.

(3) Preclusion from a Relevant Market

Defendants argue that, even if the SAC plausibly alleged the existence of exclusive dealing arrangements, it does not allege that these arrangements foreclosed competition in a relevant **[*45]** market. "A restraint violates the rule of reason if the restraint's harm to competition outweighs its procompetitive effects. The plaintiff bears the initial burden of showing that the restraint produces significant anticompetitive effects within a relevant market." *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001)* (internal quotation marks and citations omitted). Defendants also argue that the *Section 1* claim fails because the SAC does not plausibly allege the existence of product markets that consist of distinct products. Defendants contend that the SAC continues to define the alleged relevant markets in terms of customers. Defendants also argue that the SAC has not plausibly alleged that the challenged agreements between Defendants create significant anticompetitive effects that preclude Plaintiff from selling in the relevant markets.

"The term relevant market encompasses notions of geography as well as product use, quality, and description. The geographic market extends to the area of effective competition . . . where buyers can turn for alternate sources of supply." *Oltz v. St. Peter's Cmty. Hosp., 861 F.2d 1440, 1446 (9th Cir. 1988)* (internal quotation marks omitted). "The product market includes the pool of goods or services that enjoy reasonable interchangeability of use and cross-elasticity of demand." **[*46]** *Id.* "The relevant market for this purpose includes the full range of selling opportunities reasonably open to rivals, namely, all the product and geographic sales they may readily compete for, using easily convertible plants and marketing organizations." *Omega, 127 F.3d at 1162* (quoting 2A Phillip E. Areeda et al., ***Antitrust Law*** ¶ 570b1 (1995)). Although "[d]efining the relevant market is a factual inquiry ordinarily reserved for the jury," *Oltz, 861 F.2d at 1446*, "[f]ailure to identify a relevant market is a proper ground for dismissing a Sherman Act claim." *Tanaka, 252 F.2d at 1063*.

(a) Schneider—Etap Agreement

Defendants argue that the SAC does not adequately allege a relevant market for purposes of the anti-completive effects of the Schneider—Etap Agreement. The SAC alleges that the Schneider—Etap Agreement has unreasonably restrained competition in the market for the sale and servicing of Energy Management Systems platforms ("EMS Platform Market").[2] *Id.* ¶ 107. The SAC defines EMS as "the full bundle of automation, monitoring and control software, hardware and related equipment purchased by facility owner/operators for use as an 'EMS Platform.'" *Id.* ¶ 123.

The SAC alleges that customers in the EMS Platform Market share "common characteristics," including: **[*47]**

(i) they operate in low or medium voltage environments, (ii) they place a premium on the reliability of their electrical power systems and (iii) they employ "more sophisticated monitoring systems" to prevent power outages. *Id.* ¶¶ 109-10; *see also id.* ¶ 111 ("The distinguishable demands of EMS Platform consumers is evidenced by the sophistication of the monitoring equipment and levels of redundancy included in their electric power grid systems.").

The SAC alleges in the alternative to the EMS Platform Market the following four end-user EMS platform markets:

> (i) the sale and servicing of Energy Management Systems (EMS) platforms for Commercial Buildings (Commercial Buildings EMS Platform Market); (ii) the sale and servicing of Energy Management Systems (EMS) platforms for Data Centers (Data Center EMS Platform Market); (iii) the sale and servicing of Energy Management Systems (EMS) platforms for Industrial (Industrial EMS Platform Market); and (iv) the sale and servicing of Energy Management Systems (EMS) platforms for Infrastructure/Grid (Infrastructure/Grid EMS Platform Market).

Id. ¶ 150.

---

[2] This is a different relevant market than the one that was alleged in the FAC. The FAC alleged that the Schneider—Etap Agreement had unlawfully restrained competition in the "HR Data Center Market," which it defined as "the market for the sale of Power Grid Design and Management Products and related services for the operation of Power Grids for use in Data Centers which require high levels of reliability." FAC ¶ 43.

The SAC alleges that "[a]lthough each end-user EMS Platform provides many of the same functions, the **[*48]** four end-user EMS Platforms are distinguishable from one another based on the configuration, integration and automation of select components." *Id.* ¶¶ 151; *see also id.* ¶ 154 ("While some EMS Platform components are used in more than one end-user platform, the platforms themselves are not substitutable across the four groups of end-users."). The SAC then distinguishes the four end-user EMS platform markets based on customer type and/or industry. *See id.* ¶¶ 162, 166, 170, 174. The SAC also alleges that because many of the components used in industrial EMS platforms are used in infrastructure EMS platforms, the Industrial EMS Platform Market and the Infrastructure/Grid EMS Platform Market should be considered a single antitrust market. *Id.* ¶ 178.

Defendants contend that the relevant markets alleged in the SAC are implausible. In support of this position they note than the SAC alleges that the products in the EMS Platform Market and the four end-user markets are sold to customers outside of those markets. Defendants also contend that the alleged relevant markets are deficient because Plaintiff is neither a buyer nor a seller in any of them. Schneider contends that because the SAC alleges **[*49]** that Plaintiff competes only in the upstream market for the sale of components used in EMS platforms, Plaintiff cannot demonstrate that it has suffered any antitrust injury. Plaintiff contends that the EMS Platform Market and the four end-user markets constitute relevant products markets because customers in these markets "demand a bundled offering of products, services and integration that cannot be replicated, and is not reasonably interchangeable with the purchase of individual component products."

Plaintiff's claims as to the alleged relevant markets are not adequately supported by the allegations in the SAC. "While a relevant product market can be limited to a portion of customers, such a limitation must be based on a distinction in the product sold to those customers." *T. Harris Young & Assocs., Inc. v. Marquette Elecs., Inc., 931 F.2d 816, 824 (11th Cir. 1991)*. Plaintiff has provided no plausible explanation for a distinction in the products it sells to customers in the EMS Platform Market or to customers in any of the four end-user markets as opposed to the identical products it sells to other customers who want a similar level of reliability in their power grid design and management software. *See* *Dominick v. Collectors Universe, Inc., 2012 U.S. Dist. LEXIS 179703, 2012 WL 6618616, at *5 (C.D. Cal. Dec. 18, 2012)* ("But Plaintiffs misunderstand that a market is defined by *products* **[*50]** , not by *users* of those products.").

The allegations that customers in the EMS Platform Market operate in low or medium voltage environments and require more sophisticated monitoring systems and redundant equipment to prevent power outages are not sufficient to establish that EMS platform customers comprise a submarket. SAC ¶ 48. The SAC does not allege that other customers do not also require sophisticated monitoring systems and/or redundant equipment. Nor does it allege that Plaintiff's software products are only sold to and used by customers in the EMS Platform Market. Moreover, although the SAC alleges that the four end-user markets are distinguishable from each other "based on the configuration, integration and automation of select components," it does not allege that such distinctions result in any differences in the products Plaintiff offers to customers in each end-user market.

For the foregoing reasons, the SAC does not plausibly allege that the Schneider—Etap Agreement operates to exclude Plaintiff from the entire market for its products. Indeed, the SAC alleges that Schneider competes in the EMS Platform Market with Eaton, Siemens, GE, ABB, Honeywell and other smaller competitors. **[*51]** *Id.* ¶ 141. The SAC does not allege that the Schneider—Etap Agreement has affected Plaintiff's ability to partner with those competitors. As noted, the SAC also does not include allegations about how the differences in the products sold to these customers plausibly show that the EMS Platform Market or any of the four end-user markets is a distinct submarket. Therefore, the allegations in the SAC are not sufficient as to Plaintiff's foreclosure from the relevant product market.

(b) OSI—Etap Agreement

Defendants also argue that the SAC does not adequately allege a relevant market for purposes of the OSI—Etap Agreement. The SAC alleges that the OSI—Etap Agreement unlawfully restrains trade in two distinct markets: the NUPIC Grid Design Market and the NUPIC Real Time Market. *Id.* ¶ 298. It defines the NUPIC Grid Design Market as one for "the sale and servicing of Grid Design Products to customers who are, by law and or regulation, limited to purchasing only Grid Design Products that have successfully completed a NUPIC audit within the prior three years." *Id.* ¶ 52. It defines the NUPIC Real Time Market as one for "the sale and servicing of Real Time Products to customers who are, by law and **[*52]** or regulation, limited to purchasing only Real Time Products that have successfully completed a NUPIC audit within the past three years." *Id.* Defendants contend that these allegations as to markets are implausible because they define each alleged market based solely on claimed distinctions among the needs of customers. Defendants also argue that the SAC does not plausibly allege a NUPIC Real Time Market because the SAC alleges that no Real Time Products have completed a NUPIC audit.

For similar reasons to those stated above, the allegations in the SAC do not plausibly allege a NUPIC Grid Design Market or that Plaintiff has been excluded from this market. As with the EMS Platform Market, the SAC does not plausibly allege that non-NUPIC certified facilities would not purchase the same grid design or real time products as those sold in these markets. *See* SAC ¶¶ 60-61. For example, the SAC alleges that Plaintiff makes and sells Grid Design Products, including DesignBase™ and DesignBase Xi™. *Id.* ¶ 22. It also alleges that Plaintiff's Grid Design Products are NUPIC-certified and that Plaintiff has sold its NUPIC-certified DesignBase™ to NUPIC customers. *Id.* ¶¶ 61-62. Further, it alleges that **[*53]** EMS platform suppliers purchase grid design products from software suppliers such as Plaintiff. *Id.* ¶ 135. However, the SAC does not allege that Plaintiff makes or sells any grid design products that are not NUPIC-certified. The SAC also does not allege that Plaintiff's NUPIC-certified grid design products cannot be used by different customers, *e.g.*, EMS platform suppliers. For these reasons, the SAC cannot reasonably be construed to allege that NUPIC-certified grid design products cannot be sold outside of the alleged NUPIC Grid Design Market. The SAC also does not plausibly allege a NUPIC Real Time Products Market. The SAC alleges that "[u]pon information and belief, there are no Real Time Products that have successfully completed a NUPIC audit." *Id.* ¶ 65. Accordingly, there are no market participants in the NUPIC Real Time Market. *Id.* ¶ 135.

Even if the SAC plausibly alleged a relevant product market as to the NUPIC Grid Design Market, the SAC does not adequately allege that Plaintiff has been foreclosed from this market. Plaintiff's exclusive dealing theory relies on the allegations that OSI serves as a "critical bridge" to customers, and without a partnership with OSI, Plaintiff **[*54]** cannot sell its products to customers that use OSI historian software. *Id.* ¶ 101. However, the allegations in the SAC suggest that Plaintiff is not foreclosed from selling its products to customers who use OSI historian software. The SAC alleges that Plaintiff previously worked with OSI to integrate its products with OSI's historian software. *See id.* ¶ 95 ("Prior to 2014, Power Analytics paid fees to OSI to gain access to its PI System code in order to assure that Power Analytics' Power Grid Design and Management Products worked seamlessly with OSI's PI System. Power Analytics achieved that objective."). Moreover, the SAC alleges that Plaintiff is "currently eligible" to sell its grid design products to customers in the NUPIC Grid Design Product Market, *id.* ¶ 61, and that Plaintiff has been able to negotiate directly with customers in this market. *See id.* ¶ 67 ("In 2012, OSI and Power Analytics personnel participated in meetings where they discussed strategies to target certain of OSI's existing nuclear customers in an effort to increase sales for OSI's Historian and Power Analytics' Grid D and M Products.").

The SAC alleges that the purpose of the OSI—Etap Agreement is to foreclose **[*55]** Plaintiff and other competitors from selling their Grid D and M Products in the NUPIC Markets. *Id.* ¶ 79. It also alleges that since the OSI—Etap Agreement was entered, Plaintiff has lost four NUPIC Market customers: Duke Energy, Enercon, Atomic Energy of Canada and Energy Northwest and that upon information and belief, these customers "switched over to ETAP." *Id.* ¶ 106. However, it does not specifically allege that the OSI—Etap Agreement was the reason that Plaintiff lost these four customers. Further, the SAC does not allege that the agreement prevented NUPIC market customers from switching to Plaintiff's products.

The SAC alleges that a 2013 term sheet documenting key provisions in the agreement required Etap's Standard License Agreement to include "specific wording . . . that OSI products that a customer purchased under the ETAP/OSI arrangement could be used by the customer solely in conjunction with the Etap products." *Id.* ¶ 87. It alleges that the OSI—Etap Agreement includes a "contractually imposed penalty" because if a customer with a product sold under this arrangement wanted to purchase a competitor's Grid D and M Product, "such customer would need to purchase a duplicative **[*56]** copy of the OSI or Etap software." *Id.* ¶ 312. However, there is no allegation that OSI would not provide access to OSI's historian software to customers who opted to use products other than those provided by Etap. Thus, even if the agreement prohibits customers that purchased OSI products under the Etap/OSI arrangement from using those products with non-Etap software, there is no allegation that OSI refused to meet customer demand for OSI historian software that interacts with non-Etap software.

* * *

For the foregoing reasons, the SAC fails plausibly to allege that Plaintiff is foreclosed from competition in a relevant market by any of the alleged exclusive dealing arrangements among the Defendants.

(4) Harm to Competition

Defendants next argue that the SAC fails plausibly to allege harm to competition. In general, "[e]xclusive dealing will generally only be unlawful where the market is highly concentrated, the defendant possesses significant market power, and there is some element of coercion present." *ZF Meritor, 696 F.3d at 284*. Defendants contend that, for several reasons, the SAC fails to present plausible allegations that are sufficient to meet this standard. *First*, it does not sufficiently allege that either **[*57]** Schneider or OSI was coerced to enter the alleged exclusive dealing arrangements. *Second*, it does not adequately allege that Etap, the rival supplier of power grid design and maintenance products, has significant market power. *Third*, there are no allegations that Schneider or OSI cannot readily terminate the agreements. *Fourth*, the SAC does not allege why Plaintiff cannot make sales to non-Schneider EMS platform distributors with its software products. *Finally*, the allegations that competition more generally has been harmed by the alleged exclusive agreements are conclusory.

(a) Coercion and Ease of Termination

"[C]ourts tend to be skeptical of [exclusive dealing] claims because it is not in the long-term interest of the company that grants the 'exclusive deal' to drive out of business competitors of the grantee." *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 66 (1st Cir. 2004)*. Courts generally require a showing of coercion, because "virtually *every* contract to buy 'forecloses' or 'excludes' alternative sellers from *some* portion of the market, namely the portion consisting of what was bought." *Barry Wright Corp., 724 F.2d at 236*. Without a showing that one of the parties was coerced to enter an agreement or that there was similar anticompetitive conduct, an exclusive dealing agreement **[*58]** may function simply as legal competition on the merits. *See PNY Techs., Inc. v. SanDisk Corp., 2014 U.S. Dist. LEXIS 90649, 2014 WL 2987322, at *6 (N.D. Cal. July 2, 2014)* ("PNY's assertion that SanDisk's agreements constitute exclusive dealing based on the fact that retailers have entered into and continually renew contracts with SanDisk is not plausible because PNY has not pleaded (beyond naked assertions) facts showing that it failed to win contracts despite offering better terms or that SanDisk somehow thwarted its efforts to secure business through conduct other than competition on the merits."). "That a manufacturer has a longstanding exclusive relationship with a retailer does not mean that their agreement constitutes actionable exclusive dealing." *Id.*; *see also id.* ("Absent allegations of predatory pricing or some other anticompetitive conduct, that is the essence of competition.").

Further, "the case law generally supports the contention that exclusive contracts of short duration that are readily terminable do not run afoul of the antitrust laws." *Pro Search Plus, 2013 U.S. Dist. LEXIS 107895, 2013 WL 3936394, at *2*. "[T]he short duration and easy terminability of . . . agreements negate substantially their potential to foreclose competition." *Omega, 127 F.3d at 1163* (footnote omitted). "If the contracts at issue are short-term or easily terminated, 'a competing manufacturer **[*59]** need only offer a better product or a better deal' to get contracts of its own." *PNY Techs., 2014 U.S. Dist. LEXIS 90649, 2014 WL 2987322, at *4* (quoting *Omega, 127 F.3d at 1164*).

The SAC does not allege any terms in the challenged agreements that make them expressly or de facto exclusive. Similarly, the SAC does not allege any conduct by Etap that compelled Schneider or OSI to enter into these agreements, or other allegations to support a claim that the agreements were entered as a result of coercion. Nor does the SAC allege that Schneider or OSI cannot terminate any of the agreements to which each is a party, if for example, Plaintiff offers Schneider or OSI a more attractive arrangement. The allegations do not plausibly show that these agreements were entered for reasons other than to advance the business interests of Schneider and OSI. Therefore, the allegations are not sufficient to support the inference that Etap engaged in anticompetitive conduct. Further, the allegations as to the absence of a valid business reason for not partnering with Plaintiff are conclusory.[3] For all of these reasons, the SAC does not plausibly allege coercion or inability to terminate as to the agreements.

(b) Antitrust Injury and Antitrust Standing

Antitrust injury requires "(1) **[*60]** unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co., 190 F.3d 1051, 1055 (9th Cir. 1999)*. "The antitrust laws, however, were enacted for 'the protection of competition not competitors.'" *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*; *see also* *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 340 n.8, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* ("The antitrust injury requirement cannot be met by broad allegations of harm to the 'market' as an abstract entity. Although all antitrust violations, under both the per se rule and rule-of-reason analysis, 'distort' the market, not every loss stemming from a violation counts as antitrust injury."). To state a claim for a violation of the Sherman Act, the SAC must plausibly allege that the Defendants' conduct caused harm to competition, not just to Plaintiff.

The SAC alleges that Plaintiff suffered harmed as a result of the two challenged agreements. It alleges that since the OSI—Etap Agreement was entered, Plaintiff has lost four NUPIC customers. *Id.* ¶¶ 106, 310. It further alleges that "Power Analytics has been damaged by loss of past and future sales and profits, the inability to develop economies of scale to permit it to compete in the market, and inability to offer new and **[*61]** innovative products." *Id.* ¶ 348.

The SAC also alleges that the two agreements have had the effect of "locking out" and harming competition in the alleged relevant markets. For example, it alleges that the Schneider—Etap Agreement has harmed competition by "excluding lower cost, and more efficient and innovative Grid D and M products offered by competing component suppliers" and "raising the total cost of ownership for EMS Platform purchasers, and blocking technological advancements that would improve efficiency and safety of end users' facility grids." SAC ¶¶ 193, 197. It alleges that the OSI—Etap Agreement has harmed competition in the NUPIC Grid Design Market because it has "deprived the market of the critical level of contestable sales opportunities leaving no incentive for firms to undertake the initial and recurring expense and effort" associated with NUPIC audits. *Id.* ¶¶ 360-61. It also alleges that Etap's conduct has harmed customers and potential customers in the NUPIC Grid Design Market and the NUPIC Real Time Market. *Id.* ¶ 366. Defendants contend that these allegations are conclusory. Plaintiff disagrees, and argues that these allegations plausibly plead injury to competition. **[*62]**

As an initial matter, it is the allegations concerning harm to competition that are material, not those concerning the claimed harm to Plaintiff from the alleged misconduct in violation of the Sherman Act. *PNY Techs., Inc., 2014 U.S. Dist. LEXIS 90649, 2014 WL 2987322, at *10* ("The crux of an exclusive-dealing case is the allegation that

---

[3] Plaintiff contends that allegations of coercion are not required to state a claim under *Section 1*. It argues that because Defendants realized "substantial financial gains" from their horizontal agreements with each other, this "negate[s] any need to allege coercion or that the illegal agreement was not easily terminable." This characterization of the agreements as horizontal is not persuasive. "Restraints imposed by agreement between competitors have traditionally been denominated horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints." *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*. The SAC alleges that the OSI—Etap Agreement is "not a vertical agreement" but instead an agreement between "two sellers of Grid D and M Products into the NUPIC Markets." *Id.* ¶ 79. This allegation is inconsistent with other allegations in the SAC, including that Plaintiff was a "supplier of Grid D and M Products [to OSI] before the implementation of the ETAP OSI agreement." *Id.* ¶ 92. Similarly, the SAC alleges that the Schneider—Etap Agreement is "not a vertical agreement," but instead an agreement "between two sellers of components in a bundle offered to EMS Platform customers, where one of the two suppliers controls the contents of the bundle and has substantial market power." *Id.* ¶ 184. This allegation is inconsistent with other allegations in the SAC, including that "component suppliers are wholly reliant upon platform suppliers [in the EMS Platform Market]" and "restricting or limiting the inclusion in or availability to the [EMS] platform forecloses competitive suppliers of individual components." *Id.* ¶ 129.

competitors are shut out of the market. It is not enough to point to supposed 'direct evidence of competitive harm' that cannot be attributed to the claimed exclusion."). The allegations in the SAC regarding harm to competition are conclusory. *See, e.g.* *Spanish Broad. Sys. of Fla., Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065, 1078-79 (11th Cir. 2004)* (allegations regarding harm to competition conclusory where the complaint alleged that the defendant's conduct "caused injury to competition by limiting alternatives available to advertisers, performers and the listening audience" and "will continue to affect prices for advertisements, the quality of programming, and the prices for advertisers' products").

The SAC does not allege that the Schneider—Etap Agreement has actually caused an increase in prices in the EMS Platform Market. Nor does it allege in non-conclusory terms that the OSI—Etap Agreement has caused any potential competitors not to seek NUIC certification of their grid design and real time products. It also **[*63]** does not plausibly allege that Etap's conduct has harmed customers and potential customers in the NUPIC Grid Design Market and the NUPIC Real Time Market. Moreover, it alleges that in the EMS Platform Market, "Schneider competes with other suppliers of turnkey EMS Platforms" such as Eaton, Siemens, GE, ABB, Honeywell and other smaller competitors. *Id.* ¶ 141. The SAC does allege that Eaton is not a "viable alternative" to Schneider from the perspective of component suppliers like Plaintiff. *Id.* The premise of this claim is that Eaton has "its own suite of grid design and monitoring and modeling software and would therefore have no incentive to offer its customers a competitive alternative." *Id.* Whether Eaton has an incentive to partner with Plaintiff does not address the lack of competition in the EMS Platform Market.

Defendants argue that because the SAC does not plausibly allege antitrust injury, Plaintiff has not shown that it has antitrust standing. Thus, they contend that Plaintiff does not have standing to recover for harms in markets in which it does not compete. They argue that even a competitor that alleges lost sales does not necessarily have antitrust standing because "[i]t **[*64]** is not enough that the plaintiff's claimed injury flows from the unlawful conduct. An antitrust injury must flow from that which makes defendants' acts unlawful." *Am. Ad Mgmt., 190 F.3d at 1056* (internal quotation marks and alterations omitted). For example, "[c]ompetitors who challenge a rival's price-fixing are often unable to show injury." *Id.*; *see also id.* (competitors suffer antitrust injury and have antitrust standing when price-fixing is predatory). This is because "[w]hen prices are not predatory, any losses flowing from them cannot be said to stem from an anticompetitive aspect of the defendant's conduct. It is in the interest of competition to permit dominant firms to engage in vigorous competition, including price competition." *Atl. Richfield Co., 495 U.S. at 340-41* (footnote and internal quotation marks omitted).

These principles apply to exclusive dealing claims. *Id. at 340* ("We have adhered to this principle regardless of the type of antitrust claim involved."). A party has antitrust standing when the challenged, anticompetitive conduct targeted the plaintiff in an attempt to limit or eliminate its participation in the relevant market. *See, e.g.*, *NicSand, Inc. v. 3M Co., 507 F.3d 442, 457 (6th Cir. 2007)* (en banc) (competitor does not have antitrust standing when challenging exclusive **[*65]** dealing, but, "[w]hat we have said here does not mean that a potential competitor may never bring an antitrust claim for exclusive dealing. Had the large retailers and [the defendant] conspired to eliminate [the plaintiff] from the market, that would be another matter. And should [the defendant] use these contracts and its current market dominance to establish unreasonable barriers to entry in the future, a potential competitor might have a legitimate antitrust claim"); *Angelico v. Lehigh Valley Hosp., Inc., 184 F.3d 268, 275 (3d Cir. 1999)* (antitrust standing when surgeon with a private practice alleged that hospital-defendants conspired to eliminate him from the market by entering into exclusive dealing with other surgeons as well as engaging in various predatory acts such as circulating defamatory remarks about his patient care skills and revoking his courtesy privileges at a hospital); *id.* ("In sum, we hold that Angelico has standing. This is not a case, however, in which we grant standing to a competitor who was simply harmed by strong competition. Rather, Angelico has asserted facts indicating that he was harmed by a conspiracy with an illegal anticompetitive intent."); *ZF Meritor, LLC, 696 F.3d at 288* (antitrust standing where long-term exclusive dealing agreements were made **[*66]** not in response to customer demand but a preemptive step to block potential competition from the plaintiff's new joint venture).

* * *

For the foregoing reasons, the SAC does not plausibly state a claim for violation of *Section 1* of the Sherman Act. Accordingly, the Motions are **GRANTED** as to the *Section 1* claim and it is **DISMISSED**, without prejudice.

b) Sherman Act *Section 2*

The SAC alleges that Etap violated *Section 2* of the Sherman Act through its acts of monopolization and attempted monopolization in the NUPIC Grid Design Market. SAC ¶¶ 352-68. *Section 2* applies to "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*. "There are three essential elements to a successful claim of *Section 2* monopolization: (a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury." *Allied Orthopedic Appliances, 592 F.3d at 998* (internal quotation marks omitted). "To demonstrate attempted monopolization a plaintiff must prove '(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and **[*67]** (3) a dangerous probability of achieving monopoly power.'" *John Doe 1 v. Abbott Labs., 571 F.3d 930, 933 n.3 (9th Cir. 2009)* (quoting *Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 893 (9th Cir. 2008))*.

Etap and OSI contend that the *Section 2* claim is deficient for the same reasons discussed above as to the *Section 1* claim. They also contend that Plaintiff has not sufficiently alleged that Etap had the intent to monopolize the NUPIC Grid Products Market. Plaintiff responds that the SAC plausibly alleges all elements of a *Section 2* claim because it alleges that Etap has a 97% share of the NUPIC market, and that it attained and maintained such market power by entering into an exclusionary agreement with OSI "with a purpose to kill competition." Plaintiff also contends that the SAC sufficiently alleges antitrust injury. Plaintiff further argues that the SAC plausibly alleges a claim for attempted monopolization because it alleges that Etap acted with the specific intent to achieve the aforementioned exclusion of Plaintiff, thereby harming competition.

For the same reasons discussed earlier with respect to the *Section 1* claim, the SAC fails plausibly to allege a relevant market or anticompetitive conduct that caused antitrust injury sufficient to state a claim under *Section 2*. Further, the attempted monopolization is deficient for another reason; it fails adequately **[*68]** to allege that Defendants' willfully acquired monopoly power or had the specific intent to do so. As part of its opposition to the Motions, Plaintiff relies on the allegation in the SAC that an Etap employee sent an email to colleagues in which the employee stated "We need to kill such competition from these companies. (EDSA, Cyme, DigSilent, PSSE in particular)" after learning about Plaintiff's patented real time product. SAC ¶¶ 32-35. However, "'[e]ven an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws.'" *Aerotec Int'l, 836 F.3d at 1184* (quoting *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993))*. "By its very terms, *§ 2* of the Sherman Act regulates anti-competitive conduct, not merely anticompetitive aspirations or an independent decision on terms of dealing with a competitor." *Id.* The SAC does not contain any allegations of willfulness or specific intent that, if established, would constitute more than "anticompetitive aspirations."

For the foregoing reasons, the SAC fails plausibly to allege a violation of *Section 2* of the Sherman Act. Therefore, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

2. State Law Claims

a) The Cartwright Act

The Cartwright Act "generally **[*69]** outlaws any combinations or agreements which restrain trade or competition or which fix or control prices . . . and declares that, with certain exceptions, every trust is unlawful, against public policy and void." *In re Cipro Cases I & II, 61 Cal. 4th 116, 136, 187 Cal. Rptr. 3d 632, 348 P.3d 845 (2015)* (quoting *Pacific Gas & Elec. Co. v. Cty. of Stanislaus, 16 Cal. 4th 1143, 1147, 69 Cal. Rptr. 2d 329, 947 P.2d 291 (1997)* (internal citations omitted)). "The analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act . . . was modeled after the Sherman Act." *Cty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*; *see also* *Nova Designs, Inc. v. Scuba Retailers Ass'n, 202 F.3d 1088, 1092 (9th Cir. 2000)* ("Our disposition of [the plaintiff's] Sherman Act claims disposes of its claims under the California Cartwright Act. The Cartwright Act is patterned after the Sherman Act, and 'federal cases interpreting the Sherman

Act are applicable to problems arising under the Cartwright Act.'" (quoting *Marin Cty. Bd. of Realtors, Inc. v. Palsson, 16 Cal. 3d 920, 925, 130 Cal. Rptr. 1, 549 P.2d 833 (1976)* (en banc)).

The parties agree that Plaintiff's Cartwright Act claim rises or falls with those it has brought under the Sherman Act. For the same reasons the SAC does not plausibly allege a claim against any Defendant under the Sherman Act, it does not plausibly allege a claim under the Cartwright Act.

Accordingly, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

b) North Carolina UDTPA Claim

The UDTPA claim is premised on Defendants' alleged violations **[*70]** of *Sections 1* and *2* of the Sherman Act. "In order to state a claim under the UDTPA, a plaintiff must show that (1) the defendant committed an unfair or deceptive act or practice; (2) the action in question was in or affecting commerce; and (3) the act proximately caused injury to the plaintiff. Whether conduct is unfair or deceptive is a legal issue for the court to decide." *Ellis v. Louisiana-Pacific Corp., 699 F.3d 778, 787 (4th Cir. 2012)* (citation and internal quotation marks omitted).

The SAC states that the UDTPA claim relies on the same allegations as the Sherman Act claims. As noted in the Prior Order, the reliance in the UDTPA claim on the antitrust claims is insufficient because those claims are not adequately pleaded.

Because no viable claims have been alleged that can form the basis for the UDTPA claim, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

c) California Unfair Competition Law

California's Unfair Competition Law ("UCL") prohibits unfair competition, which includes "any unlawful, unfair or fraudulent business act or practice . . . ." *Cal. Bus. & Prof. Code § 17200*. The purpose of the UCL "is to protect both consumers and competitors by promoting fair competition in commercial markets for goods and services." *McGill v. Citibank, NA, 2 Cal. 5th 945, 954, 216 Cal. Rptr. 3d 627, 393 P.3d 85 (2017)* (quoting *Kasky v. Nike, Inc., 27 Cal. 4th 939, 949, 119 Cal. Rptr. 2d 296, 45 P.3d 243 (2002)* (internal quotations **[*71]** omitted).

Defendants argue that the SAC fails to state a plausible claim under the UCL because this claim is derivative of Plaintiff's Sherman Act claims. Plaintiff does not disagree with this premise. For the same reasons the SAC does not plausibly allege a claim under the *Section 1* or *Section 2* of the Sherman Act, it does not plausibly allege a claim under the UCL.

Accordingly, the Motions are **GRANTED** as to this claim and it is **DISMISSED**, without prejudice.

d) Tortious Interference with Prospective Economic Advantage

"In order to maintain an action for tortious interference with prospective advantage, Plaintiff must show that Defendants induced a third party to refrain from entering into a contract with Plaintiff without justification. Additionally, Plaintiff must show that the contract would have ensued but for Defendants' interference." *DaimlerChrysler Corp. v. Kirkhart, 148 N.C. App. 572, 585, 561 S.E.2d 276, 286 (2002)*. "[E]ven where there is actual interference, a motion to dismiss should be granted where the interference is justified or privileged." *Cobra Capital, LLC v. RF Nitro Commc'ns, Inc., 266 F. Supp. 2d 432, 439 (M.D.N.C. 2003)*. Thus, to prevail on a tortious interference with prospective economic advantage claim, a plaintiff must demonstrate that the defendant "acted with malice and for a reason not reasonably related to the protection of a legitimate business **[*72]** interest . . . ." *Id.* (citations omitted).

Defendants argue that the SAC has not alleged facts that if established would show that Defendants acted with malice or without justification. Plaintiff responds that the SAC states a plausible tortious interference claim because it alleges that Plaintiff has lost specific customers to Etap as a result of Defendants' efforts to exclude Plaintiff from the NUPIC Grid Design Market, the NUPIC Real Time Market and the EMS Platform Market.

The SAC alleges that Plaintiff "had reasonable opportunity" to sell its products in the EMS Platform Market, the four end-user markets, the NUPIC Grid Design Market and the NUPIC Real Time Market. SAC ¶ 377. It alleges that Defendants "intentionally interfered" with Plaintiff's ability to sell and service its products in those markets. Further, it alleges that such interference caused Plaintiff "to lose sales to at least the following entities with whom Power Analytics had pre-existing commercial relations: Duke Energy, Enercon, Atomic Energy of Canada and Energy Northwest." It also alleges that Defendants' conduct harmed Plaintiff "in the form of lost contracts, lost sales and profits, and lost opportunities to **[*73]** expand its business with purchasers and operators of Power Grids." *Id.* ¶ 378-80.

An assessment of the aforementioned allegations in the SAC shows that it does not plausibly state a claim for tortious interference with economic advantage. The SAC does not identify any specific contract with which Defendants allegedly interfered. Although it alleges that Plaintiff has "lost sales" to four commercial entities with which it had ongoing commercial relations, the SAC does not allege how these losses were caused by Defendant's conduct. Moreover, the allegation that Defendants "intentionally interfered" with Plaintiff's ability to compete in the relevant markets is conclusory.

Thus, the SAC does not allege that Defendants acted with malice or for purposes unrelated to a legitimate business interest when they allegedly interfered with Plaintiff's pre-existing commercial relations with the four commercial entities. *See Cobra Capital, 266 F. Supp. 2d at 439* (dismissing the plaintiff's complaint because it contained "no factual allegations that would raise an inference of malice or an illegitimate business interest on the part of the [RF Micro]" in determining that a business opportunity with plaintiff was not in its economic interest). **[*74]**

For the foregoing reasons, the Motions are **GRANTED** as to this claim and this claim is **DISMISSED**, without prejudice.

e) Conspiracy Claim

The SAC does not plausibly allege a claim for civil conspiracy. The supporting allegations are conclusory and state little more than the legal elements of such a tort. *See* SAC ¶¶ 381-86. Further, to the extent that this claim is premised on the alleged violations of *Section 1* of the Sherman Act or the other claims addressed above, it fails for the same reasons identified as to those claims.

For the foregoing reasons, the Motions are **GRANTED** as to this claim and this claim is **DISMISSED**, without prejudice.

IV. <u>Conclusion</u>

For the reasons stated in this Order, the Motions are **GRANTED** without prejudice. Any amended complaint shall be filed no later than December 21, 2017.

IT IS SO ORDERED.

Opinion

MEMORANDUM OPINION

Plaintiff Association of American Physicians & Surgeons, Inc. ("AAPS") has sued Defendant American Board of Medical Specialties ("ABMS"), alleging restraint of trade in violation of *Section 1 of the Sherman Act* and negligent misrepresentation in connection with ABMS's program for recertification known as the ABMS Maintenance of Certification® program. Before the Court is ABMS's renewed motion to dismiss both claims pursuant to *Federal Rule of Civil Procedure 12(b)(6)* (the "Motion") (Dkt. No. 30). For the reasons stated below, the Court finds that AAPS has failed to state a claim with respect to either count and thus grants the Motion.

BACKGROUND

As set forth in the Complaint,[1] AAPS is a membership organization of thousands of practicing physicians **[*2]** in virtually all specialties. (Compl. ¶ 4, Dkt. No. 1.) ABMS is a nonprofit entity that serves as the umbrella organization for twenty-four medical specialty boards (the "Member Boards"). (*Id.* ¶¶ 5, 11.) Each of the Member Boards certifies physicians in a given medical specialty if the physician voluntarily seeks certification, completes an accredited medical residency program in the specialty, passes an examination administered by the Member Board, and otherwise complies with the Member Board's requirements for certification. (ABMS Br. at 1, Dkt. No. 31.) The Member Boards are to be distinguished from the official medical boards of the states, which determine the fitness of physicians to practice medicine. (Compl. ¶ 19, Dkt. No. 1.) Certification by a Member Board is a voluntary process and is not required to be licensed to practice medicine—a patient has the right to seek the medical care of any physician licensed to practice medicine (whether certified or not). (*Id.* ¶ 20.)

Although a physician certified by a Member Board was originally certified for life, ABMS and its Member Boards came to recognize the need for periodic recertification given that the state-of-the-art **[*3]** in each medical specialty evolved rapidly and a physician's knowledge of a particular specialty could deteriorate over time. (ABMS Br. at 2, Dkt. No. 31.) As such, in addition to initial certification, ABMS and its Member Boards offer a program for recertification known as the ABMS Maintenance of Certification® ("MOC") program. (*Id.*) Like certification, participation in the MOC program is not required in order to be licensed to practice. (*See* Compl. ¶ 20, Dkt. No. 1.) The MOC program has four basic components: (1) maintenance of a valid license to practice medicine and adherence to guidelines of the Member Board calling for professionalism and honorable personal conduct; (2) regular participation in educational and self-assessment activities that meet specialty-specific standards set by each Member Board; (3) successful completion of an examination; and (4) evaluation of the care provided to patients, and identification and application of strategies to improve that care. (ABMS Br. at 2-3, Dkt. No. 31; *see also* Compl. ¶ 34, Dkt. No. 1.)

In November 2009 and subsequently, ABMS and several Member Boards obtained the agreement of The Joint Commission, a private company that accredits more **[*4]** than 20,000 health care organizations and hospitals, that hospitals must enforce requirements against physicians for renewal of their medical staff privileges. (Compl. ¶¶ 13-14, Dkt. No. 1.) To comply with The Joint Commission's requirements, many hospitals impose parts or all of the MOC program against physicians as a condition of having hospital medical staff privileges. (*Id.* ¶ 15.)

The choice not to participate in the MOC program has affected physicians in the United States, including members of AAPS. (*Id.* ¶¶ 50-51.) For example, in 2011, an AAPS member identified as "J.E." was excluded from the medical staff of SMC, a hospital in New Jersey, because he chose not to participate in the MOC program. (*Id.* ¶¶ 29, 32, 43-44.) J.E. had been on the SMC medical staff for twenty-nine years and had been certified by a Member Board. (*Id.* ¶¶ 30-31.) He was told by SMC in 2011, however, that he would have to comply with recertification requirements under the MOC program to remain on its medical staff. (*Id.* ¶ 32.) Due to the expense and time required for recertification, J.E. chose not to comply. (*See id.* ¶¶ 34-43.) As a result, he was not allowed to remain on SMC's medical staff, and patients **[*5]** cannot be treated by J.E. when taken by emergency to SMC. (*Id.* ¶¶ 44-45.)

AAPS has filed a two-count Complaint alleging (1) restraint of trade in violation of *Section 1 of the Sherman Act*, and (2) negligent misrepresentation. With respect to Count I, AAPS alleges that ABMS has restrained trade in connection with the MOC program. (*Id.* ¶¶ 57-70.) In particular, AAPS claims that ABMS has restrained trade by: (a) seeking and obtaining agreements with the Member Boards to impose formal recertification requirements as part of the MOC program, (b) seeking and obtaining agreement by The Joint Commission to require enforcement by hospitals of formal recertification requirements, (c) inducing health insurance companies and plans to exclude physicians who do not purchase and comply with the MOC program, (d) requiring recertification by younger physicians while exempting older physicians, and (e) acting in concert with the Member Boards to seek an

---

[1] For purposes of deciding the Motion, the Court accepts the allegations of the Complaint as true and draws all permissible inferences in AAPS's favor. *See, e.g., Active Disposal, Inc. v. City of Darien, 635 F.3d 883, 886 (7th Cir. 2011)*.

endorsement by the Federation of State Medical Boards of "maintenance of licensure" to impose the MOC program as a requirement of licensure by state medical boards. (*Id.* ¶¶ 57-62.) AAPS argues that the relevant service market consists of medical care provided **[*6]** by physicians to hospitalized patients and that the relevant geographic market is nationwide. (*Id.* ¶¶ 27-28.) According to AAPS, ABMS's actions have no legitimate purpose, reduce the supply of physicians available to treat patients, and limit patients' access to their own physicians. (*Id.* ¶¶ 63-66.)

With respect to Count II, AAPS alleges that certain statements of ABMS are false and have deceived physicians and the public. (*Id.* ¶¶ 78-91.) The statements at issue consist of: (a) a statement on an ABMS website that doctors who participate in the MOC program "are voluntarily part of a rigorous process that continually assesses and enhances their medical knowledge, judgment, professionalism, clinical techniques, and communication skills;" (b) a statement on an ABMS website that "you can count on quality patient care" from doctors who are Board Certified; (c) ABMS's use of phrases such as "Not Meeting MOC Requirements" to describe physicians who do not participate in the MOC program, and (d) inviting patients to search on the names of individual physicians to see if they have complied with the MOC program. (*Id.* ¶¶ 78-81, 82.) AAPS argues that ABMS's statements "create the false impression **[*7]** that [the MOC program] is indicative of the medical skills of physicians, and that as a result physicians who decline to purchase [ABMS's] product are likely to be less competent" and "falsely imply[] that physicians who decline to participate or who do not fully complete the program are somehow less competent physicians." (*Id.* ¶¶ 81-82.)

DISCUSSION

Federal Rule of Civil Procedure 8(a) requires that a complaint contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*. To survive a *Rule 12(b)(6)* motion, a complaint must "state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 547, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. While the Complaint need not include detailed factual allegations, there "must be enough to raise a right to relief above the speculative level." *Id. at 555*. The plaintiff must "plead[] factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief." *McReynolds v. Merrill Lynch & Co., 694 F.3d 873, 885 (7th Cir. 2012)* (internal citations and quotation marks omitted) (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009))*. In addition, "although the complaint's factual allegations are accepted as true **[*8]** at the pleading stage, allegations in the form of legal conclusions are insufficient to survive a *Rule 12(b)(6)* motion." *Id.* Furthermore, "a party may plead itself out of court by either including factual allegations that establish an impenetrable defense to its claims or by attaching exhibits that establish the same." *Massey v. Merrill Lynch & Co., 464 F.3d 642, 650 (7th Cir. 2006)*.

I. Count I — Restraint of Trade in Violation of *Section 1* of the Sherman Act

Section 1 of the Sherman Act states, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. To state a claim for a *Section 1* violation, AAPS must plead facts plausibly suggesting: (1) a contract, combination, or conspiracy (*i.e.*, an agreement); (2) a resultant unreasonable restraint of trade in a relevant market; and (3) an accompanying injury. *Agnew v. Nat'l Collegiate Athletic Ass'n, 683 F.3d 328, 335 (7th Cir. 2012)*. The Court's analysis focuses on the second and third factors.

A. A Resultant Unreasonable Restraint of Trade in a Relevant Market

AAPS must sufficiently plead that ABMS's actions have caused an unreasonable restraint of trade in a relevant market. "[T]he determination of whether a restraint is unreasonable must focus on the competitive effects of challenged behavior **[*9]** relative to such alternatives as its abandonment or a less restrictive substitute." *Id.*

(internal quotation marks and citation omitted). There are three categories of analysis that are used to determine whether actions have anticompetitive effects—*per se*, quick-look, and Rule of Reason. *Id.* Here, AAPS has alleged that ABMS's actions constitute a *per se* violation of the Sherman Act and that, alternatively, ABMS's actions constitute a violation of the Sherman Act under the Rule of Reason by unreasonably restraining competition in the relevant market (which ABMS alleges is medical care provided by physicians to hospitalized patients nationwide). (Compl. ¶¶ 27-28, 69-70, Dkt. No. 1.)

The *per se* rule "is employed when a practice facially appears to be one that would always or almost always tend to restrict competition and decrease output. . . . Under the per se framework, a restraint is deemed unreasonable without any inquiry into the market context in which the restraint operates." *Agnew, 683 F.3d at 336* (internal quotation marks and citation omitted). By contrast, under the Rule of Reason framework,

> the plaintiff carries the burden of showing that an agreement or contract has an anticompetitive effect on a given **[*10]** market within a given geographic area. As a threshold matter, a plaintiff must show that the defendant has market power—that is, the ability to raise prices significantly without going out of business—without which the defendant could not cause anticompetitive effects on market pricing. If the plaintiff meets his burden, the defendant can show that the restraint in question actually has a procompetitive effect on balance, while the plaintiff can dispute this claim or show that the restraint in question is not reasonably necessary to achieve the procompetitive objective.

Id. at 335-36 (internal citations omitted).

1. ***Per Se*** Restraint of Trade

AAPS has alleged no facts supporting a *per se* restraint of trade, merely stating in a conclusory manner that ABMS's "agreements and concerted actions are a *per se* violation of *Section 1* of the Sherman Act because they are plainly anticompetitive, like a group boycott of a supplier; [ABMS's] foregoing actions tend to restrict competition and decrease output with respect to medical services in the relevant market." (Compl. ¶ 69, Dkt. No. 1.) AAPS has not alleged any type of agreement suggesting a *per se* unlawful restraint, such as a horizontal agreement among competitors **[*11]** to fix prices or to divide markets. *See* *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* ("Restraints that are *per se* unlawful include horizontal agreements among competitors to fix prices, or to divide markets. Resort to *per se* rules is confined to restraints, like those mentioned, that would always or almost always tend to restrict competition and decrease output. To justify a *per se* prohibition a restraint must have manifestly anticompetitive effects and lack ... any redeeming virtue") (internal citations and quotation marks omitted; omission in original). There is no basis to infer that the type of restraint AAPS alleges would be invalidated in all or almost all instances under the Rule of Reason and, as such, the *per se* rule is not appropriate in this case. *Id. at 886-87*; *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)* ("[P]recedent limits the *per se* rule in the boycott context to cases involving horizontal agreements among direct competitors."); *Phil Tolkan Datsun, Inc. v. Greater Milwaukee Datsun Dealers' Adver. Ass'n, Inc., 672 F.2d 1280, 1286 (7th Cir. 1982)* ("[W]here the 'group boycott' under challenge does not involve a direct effort to influence the supply of, or demand for, a competitor's product, per se treatment may not be appropriate. . . . In the instant case, plaintiff has made no showing that membership in the defendant Association is necessary (or even desirable) to compete effectively as a Datsun dealer."). **[*12]**

2. Rule of Reason

AAPS's claim also fails under the Rule of Reason analysis. "Substantial market power is an essential ingredient of every antitrust case under the Rule of Reason." *Sanjuan v. Am. Bd. of Psychiatry & Neurology, Inc., 40 F.3d 247, 251 (7th Cir. 1994)*, *as amended on denial of reh'g* (Jan. 11, 1995). AAPS has not alleged facts sufficient to suggest that ABMS has sufficient market power to cause a restraint of trade. There are no factual allegations that ABMS's activities have cut back output in the market or driven up prices to consumers—particularly as ABMS certification is a voluntary process, failure to be certified does not render a physician unable to practice medicine. *Id.* (explaining that it is "hard to see how the [defendant psychiatric board's] activities could amount to an exercise of market power, which entails cutting back output in the market and thus driving up prices to consumers" where "plaintiffs already are sellers in the market for psychiatric services [and] turning down their applications for certification does not remove their output from the market and therefore does not raise prices to consumers") (internal citation omitted).

AAPS's proffered definition of the market as medical care provided by physicians to ***hospitalized*** patients nationwide **[*13]** (as opposed to simply medical care nationwide) does not save its claim—AAPS has not alleged that the MOC program is required by all (or even a significant portion of) hospitals nationwide. Moreover, AAPS has alleged no facts showing that ABMS has the ability to control hospitals nationwide or coerce hospitals to force physicians to participate in the MOC program. In fact, AAPS's own words suggest the opposite—for example, according to AAPS, "[t]o comply with The Joint Commission's requirements, ***many*** hospitals impose ***parts or all*** of the MOC program against physicians as a condition of having hospital medical staff privileges." (Compl. ¶ 15, Dkt. No. 1 (emphasis added).) Likewise, AAPS asserts that "The Joint Commission ***does*** require that all hospital department chairs be board certified ***or otherwise complete the equivalence of the board certification***, and those department chairs can be ***expected*** to impose the same requirement on their staff." (AAPS Resp. at 12, Dkt. No. 36 (first emphasis in original).) Similarly, The Joint Commission document relied on by AAPS states that "[t]he hospital . . . establishes criteria that determine a practioner's ability to provide patient care, treatment, and services **[*14]** . . . [including] [c]urrent licensure ***and/or certification, as appropriate***." (*Id.*; Dec. of Jakob Halpern in support of ABMS Mot. to Dismiss or Transfer at MS-28, Dkt. No. 11-8 (emphasis added).) That is, hospitals may or may not impose parts or all of the MOC program as a requirement for medical staff privileges, hospital chairs may or may not be board certified, and hospital criteria for physicians may or may not include certification. Thus, according to AAPS's own words, even working in supposed concert with The Joint Commission, ABMS has failed to force hospitals to require certification of its physicians by ABMS or a Member Board.[2] Accordingly, AAPS has not sufficiently pleaded that ABMS has caused a restraint of trade. *Schachar v. Am. Acad. of Ophthalmology, Inc., 870 F.2d 397, 398 (7th Cir. 1989)* (finding no restraint of trade when the organization alleged to have violated ***antitrust law*** had "no authority over hospitals, insurers, state medical societies or licensing boards, and other persons who might be able to govern the performance of surgery").

Nor has AAPS sufficiently pleaded that the alleged restraint is unreasonable. "[I]t is commonplace, and often very useful, for organizations to recommend quality standards . . . or adopt them as part of a certification process **[*15]** . . . . Merely to say that the standards are disputable or have some market effects has not generally been enough to condemn them as 'unreasonable' under the Sherman Act." *DM Research, Inc. v. Coll. of Am. Pathologists, 170 F.3d 53, 57 (1st Cir. 1999)*. More would be needed to conclude that any restraint is unreasonable, such as the use of standards setting as a predatory device by some competitors to injure others (for example, by "showing that the standard was deliberately distorted by competitors of the injured party . . . through lies, bribes, or other improper forms of influence, in addition to a further showing of market foreclosure."). *Id. at 57-58*.

B. An Accompanying Injury

It is not sufficient for AAPS to allege any injury—AAPS must allege "injury of the type the antitrust laws were intended to prevent and that flows from that which makes [ABMS's] acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Because the purpose of the Sherman Act is to protect consumers from injury that results from diminished competition, AAPS "must allege, not only an injury to himself, but an injury to the market as well." *Agnew, 683 F.3d at 335* (quoting *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1107 (7th Cir.1984))*.

---

[2] AAPS's allegations regarding health insurers fare no better. According to AAPS, ABMS has worked "to induce health insurers to 'use Board Certification by an ABMS Member Board as an essential tool to assess physician credentials within a given medical specialty.'" (Compl. ¶ 16, Dkt. No. 1.) AAPS has not pleaded facts plausibly suggesting that ABMS has authority over any insurance companies sufficient to cause a restraint of trade.

AAPS claims that ABMS's "actions injured and continue to injure competition by causing anticompetitive effects within the relevant market for services provided by physicians, thereby limiting **[*16]** patients' access to ***their own physicians***." (Compl. ¶ 65, Dkt. No. 1 (emphasis added).) This is not the type of injury protected by the antitrust laws. *Int'l Bhd. of Teamsters, Local 734 Health & Welfare Trust Fund v. Philip Morris Inc., 196 F.3d 818, 825 (7th Cir. 1999)* ("To recover under the antitrust laws, the plaintiff must show that its injury flows from that which makes the conduct an antitrust problem: higher prices and lower output.") AAPS has not alleged any reduction in the output of medical care (*e.g.*, that patients have been denied treatment or were treated by unqualified doctors); nor has AAPS alleged that ABMS's actions have resulted in an increase in the cost of medical care. *Wagner v. Magellan Health Servs., Inc., 121 F. Supp. 2d 673, 681-82 (N.D. Ill. 2000)*.

AAPS also claims that a particular doctor, J.E.,[3] and other doctors have been harmed by being excluded from the medical staff of hospitals. (Compl. ¶¶ 29, 50, Dkt. No. 1.) However, "[t]he antitrust laws . . . were enacted for 'the protection of competition not competitors.'" *Brunswick, 429 U.S. at 488* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*. There is no antitrust injury when the harm alleged is harm to the business of one competitor (or a group of competitors)—the injury must be to the market. *Frantzides v. Northshore Univ. HealthSystem Faculty Practice Assocs., Inc., 787 F. Supp. 2d 725, 732 (N.D. Ill. 2011)*. This is particularly true here, as ABMS's actions do not impact whether physicians are licensed to practice—*i.e.*, whether their services are available **[*17]** in the market; the impact is solely on whether physicians can offer their services in certain hospitals. *Sanjuan, 40 F.3d at 251* (affirming district court's dismissal of antitrust claim, explaining that "[w]hen challenged, plaintiffs revealed that they want to show injury ***to producers***" and that "plaintiffs already are sellers in the market for psychiatric services; turning down their applications for certification does not remove their output from the market and therefore does not raise prices to consumers"). As AAPS admits, even for J.E., failure to comply with recertification requirements has not removed him from the market—he "continues to practice in good standing in New Jersey." (Compl. ¶ 48, Dkt. No. 1.)

***

For these reasons, AAPS has failed to state a claim for restraint of trade in violation of *Section 1 of the Sherman Act* and ABMS's Motion is granted with respect to Count I.[4]

II. Count II — Negligent Misrepresentation

As the Court finds that AAPS has failed to state a claim for restraint of trade in violation of *Section 1* of the Sherman Act, the Court need not reach the merits of AAPS's claim for negligent misrepresentation. *See* *28 U.S.C.A. § 1367(c)(3)* ("The district courts may decline to exercise supplemental jurisdiction over a claim . . . [if] the district court has dismissed **[*18]** all claims over which it has original jurisdiction."). The Court may exercise its discretion to consider the merits of the claim, however, and does so here in the interests of judicial economy and in light of the ease of resolution of the claim. *Hansen v. Bd. of Trustees of Hamilton Se. Sch. Corp., 551 F.3d 599, 607 (7th Cir. 2008)* ("[W]hile a district court may relinquish its supplemental jurisdiction if one of the conditions of *§ 1367(c)* is satisfied, it is not required to do so. Supplemental jurisdiction is a doctrine of discretion, and its 'justification lies in considerations of judicial economy, convenience and fairness to litigants.'") (internal citations omitted).

---

[3] J.E.'s exclusion from one particular hospital does not constitute an antitrust injury. *BCB Anesthesia Care, Ltd. v. Passavant Mem'l Area Hosp. Ass'n, 36 F.3d 664, 669 (7th Cir. 1994)* ("A staffing decision does not itself constitute an antitrust injury.").

[4] Because the Court finds that AAPS has failed to state a claim for restraint of trade in violation of *Section 1* of the Sherman Act, it need not address ABMS's argument that AAPS has failed to plead sufficient facts to establish a conspiracy.

To establish a claim for negligent misrepresentation,[5] AAPS must plead facts plausibly suggesting that: (1) ABMS made a false statement of material fact; (2) ABMS was careless or negligent in ascertaining the truth of the statement; (3) ABMS induced AAPS to act; (4) AAPS acted in reliance on the truth of ABMS's statement; (5) AAPS's reliance caused it to suffer damages; and (6) ABMS had a duty to communicate accurate information. *Tricontinental Indus., Ltd. v. PricewaterhouseCoopers, LLP, 475 F.3d 824, 833-34 (7th Cir. 2007)*. None of the statements identified in AAPS's Complaint comprise a "false statement of material fact." In fact, some of the statements—such as ABMS's use of phrases like "Not Meeting MOC Requirements" **[*19]** to describe physicians who do not participate in the MOC program and inviting patients to search the names of individual physicians to see if they have complied with the MOC program—are simply true statements.

The statements that are not simply true statements—such as a statement on an ABMS website that doctors who participate in the MOC program "are voluntarily part of a rigorous process that continually assesses and enhances their medical knowledge, judgment, professionalism, clinical techniques, and communication skills," and a statement on an ABMS website that "you can count on quality patient care" from doctors who are Board Certified —are expressions of opinion that cannot form the basis of a negligent misrepresentation claim. *Lagen v. Balcor Co., 274 Ill. App. 3d 11, 653 N.E.2d 968, 973, 210 Ill. Dec. 773 (Ill. App. Ct. 1995)* ("[T]he basis of a negligent misrepresentation claim must be a statement of fact; expressions of opinion are not actionable."); *cf.* *Neptuno Treuhand-Und Verwaltungsgesellschaft Mbh v. Arbor, 295 Ill. App. 3d 567, 692 N.E.2d 812, 816, 229 Ill. Dec. 823 (Ill. App. Ct. 1998)* ("We hold that Arbor's comments regarding Farrell's intelligence, innovativeness and industrious nature represent mere opinion and, therefore, cannot form the basis of an action for fraudulent misrepresentation.").[6]

For these reasons, AAPS has failed to state a claim for negligent misrepresentation and ABMS's Motion is **[*20]** granted with respect to Count II.

CONCLUSION

For the foregoing reasons, the Court grants the Motion pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. The dismissal is without prejudice, however, and AAPS will be permitted an opportunity to file an amended complaint that cures the deficiencies discussed in this Memorandum Opinion.

Dated: December 13, 2017

ENTERED:

/s/ Andrea R. Wood

Andrea R. Wood

United States District Judge

---

[5] The Complaint invokes the Court's supplemental jurisdiction as to AAPS's claim for negligent misrepresentation. (Compl. ¶ 7, Dkt. No. 1.) As this case was transferred to the Northern District of Illinois for improper venue pursuant to *28 U.S.C. § 1406(a)*, the choice of law rules of Illinois apply. *Koutsoubos v. Casanave, 816 F. Supp. 472, 474-75 (N.D. Ill. 1993)* ("[W]here an action was improperly filed in the transferor court, the transferee court should apply its own state's choice of law rules rather than those of the transferor's state.") In this case, however, the parties have not raised a conflict of laws issue, and the Court will apply Illinois law to the substantive aspects of AAPS's negligent misrepresentation claim. *McCoy v. Iberdrola Renewables, Inc., 760 F.3d 674, 684 (7th Cir.)* *reh'g denied*, *769 F.3d 535 (7th Cir. 2014)* ("When no party raises the choice of law issue, the federal court may simply apply the forum state's substantive law.").

[6] Because the Court finds that AAPS has failed to allege that ABMS made a false statement of material fact, it need not address AAPS's argument that ABMS has failed to allege reasonable reliance.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

HN1[] **Standards of Review, Abuse of Discretion**

Fed. R. Civ. P. 15(a) states that leave to amend a pleading should be freely given when justice so requires. While the moving party ought to be afforded an opportunity to test its claim on the merits, one or more of the following conditions may negate this directive: undue delay, bad faith, dilatory motive, repeated failure to cure deficiencies by previous amendments, undue prejudice to the opposing party, or futility of the proposed amendment. The determination as to whether justice requires permission to amend the pleading is within the district court's sound discretion.

Civil Procedure > Parties > Joinder of Parties > Permissive Joinder

HN2[] **Joinder of Parties, Permissive Joinder**

Fed. R. Civ. P. 20(a)(1)(A), *(B)* states that additional plaintiffs may be joined to a pending action if such plaintiffs assert any right to relief jointly, severally, or in the alternative with respect to or arising out of the same transaction, occurrence, or series of transactions or occurrences; and any question of law or fact common to all plaintiffs will arise in the action.

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Pleadings, Amendment of Pleadings**

The United States Court of Appeals for the Sixth Circuit has made clear that any analysis of the futility of proposed amendments is equivalent to the analysis undertaken as part of a *Fed. R. Civ. P. 12(b)(6)* motion. A proposed amendment is futile only if it could not withstand a *Rule 12(b)(6)* motion to dismiss.

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] **Pleadings, Amendment of Pleadings**

There is some conceptual difficulty presented when the primary basis for a party's opposition to the filing of an amended pleading is that the pleading is futile, i.e. that it fails to state a claim upon which relief can be granted. A magistrate judge cannot ordinarily rule on a motion to dismiss under *28 U.S.C.S. § 636(b)(1)(A)*, and denying a motion for leave to amend on grounds that the proposed new claim is legally insufficient is, at least indirectly, a ruling on the merits of that claim. Rather than determining the actual legal sufficiency of the new claim, in many cases it will suffice to determine if there is a substantial argument to be made on that question and, if so, to allow the amended pleading to be filed with the understanding that a motion to dismiss for failure to state a claim may follow.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

HN5[] **In Rem & Personal Jurisdiction, In Personam Actions**

There must be an affiliation between the forum and the underlying controversy for a court to exercise specific personal jurisdiction over a defendant.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Governments > Legislation > Statutory Remedies & Rights

Civil Procedure > Pleading & Practice > Pleadings > Service of Process

HN6[] **In Rem & Personal Jurisdiction, In Personam Actions**

Where a federal statute authorizes nationwide service of process, and the federal and state claims derive from a common nucleus of operative fact, the district court may assert personal jurisdiction over the parties to the related state law claims even if personal jurisdiction is not otherwise available.

Antitrust & Trade Law > Clayton Act > Jurisdiction

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

HN7[] **Clayton Act, Jurisdiction**

Section 12 of the Clayton Act, the antitrust statute, provides for nationwide personal jurisdiction in the case of corporate defendants.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

HN8[] **Supplemental Jurisdiction, Pendent Claims**

In providing jurisdiction over a cause of action involving enforcement of a federal right, Congress has granted the district courts power to consider state law claims provided they had a nucleus of pertinent facts in common with a substantial federal claim.

Antitrust & Trade Law > Clayton Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN9[] **Clayton Act, Defenses**

In an antitrust lawsuit, the cause of action accrues and the accompanying limitation period commences each time a defendant commits an act that injures the plaintiff's business. When a plaintiff alleges a continuing antitrust violation, the cause of action accrues each time a plaintiff is injured by an act of the defendants. However, even in the event of an alleged continuing violation, an overt act by the defendant is required to restart the statute of limitations and the statute runs from the last overt act. Such an overt act involves both a new and independent act that is not merely a reaffirmation of a previous act and that inflicts new and accumulating injury on the plaintiff.

Antitrust & Trade Law > Clayton Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN10[] **Clayton Act, Defenses**

Antitrust law provides that, in the case of a continuing violation, say, a price-fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, each overt act that is part of the violation and that injures the plaintiff, e.g., each sale to the plaintiff, starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times.

Governments > Legislation > Statute of Limitations > Tolling

HN11[] **Statute of Limitations, Tolling**

To establish fraudulent concealment, a party must plead and prove: (1) wrongful concealment of their actions by the defendants; (2) failure of the plaintiff to discover the operative facts that are the basis of his cause of action within the limitations period; and (3) plaintiff's due diligence until discovery of the facts.

Civil Procedure > Pleading & Practice > Pleadings > Amendment of Pleadings

HN12[] **Pleadings, Amendment of Pleadings**

Granting leave freely under *Fed. R. Civ. P. 15* reinforces the principle that cases should be tried on their merits rather than the technicalities of pleadings.

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN13[] **Class Members, Named Members**

A class representative must possess the same interest and suffer the same injury as the class members.

Opinion

MEMORANDUM AND ORDER

Presently pending is Plaintiff's motion for leave to file an amended complaint. *See* Docket Entry **[*2]** No. ("DE") 140. For the reasons that follow, Plaintiff's motion is GRANTED.[1]

---

[1] Although the Sixth Circuit has not addressed whether a motion to amend is a dispositive or non-dispositive motion, most of the district courts in the Sixth Circuit, including this court, consider an order on a motion to amend to be non-dispositive. *See, e.g., Gentry v. Tenn. Bd. of Judicial Conduct, 2017 U.S. Dist. LEXIS 83215, 2017 WL 2362494, at *1 (M.D. Tenn. May 31, 2017)* ("Courts have uniformly held that motions to amend complaints are non-dispositive matters that may be determined by the magistrate judge and reviewed under the clearly erroneous or contrary to law standard of review ...") (citations omitted); *Chinn v. Jenkins, 2017 U.S. Dist. LEXIS 48258, 2017 WL 1177610 (S.D. Ohio March 31, 2017)* (order denying motion to amend is not dispositive); *Young v. Jackson, 2014 U.S. Dist. LEXIS 120528, 2014 WL 4272768, at *1 (E.D. Mich. Aug. 29, 2014)* ("A denial of

I. PROCEDURAL BACKGROUND[2]

Plaintiff Nashville General Hospital ("Plaintiff" or "NGH") filed its initial complaint on October 14, 2015. *See* DE 1. The complaint involved four separate counts against Defendants Momenta Pharmaceuticals, Inc. ("Momenta") and Sandoz, Inc. ("Sandoz") (collectively referred to as "Defendants") under the *Sherman Act*, which included allegations of implementation of unreasonable restraints on trade, monopolization, a conspiracy to monopolize, and attempts to monopolize. DE 1 at P¶ 81-104. The alleged *Sherman Act* violations centered on the role of Momenta and Sandoz in producing and distributing enoxaparin, a generic version of the drug Lovenox®. *Id.* at ¶¶ 11-13, 19, 26. The complaint was filed on behalf of both Plaintiff and a nationwide class of persons and entities, pursuant to *Fed. R. Civ. P. 23(a)* and *(b)*, that purchased enoxaparin from Defendants or non-party Sanofi-Aventis ("Aventis"), who brought Lovenox® to market in the United States, beginning on September 21, 2011. *Id.* at ¶¶ 20, 75.

In response to the initial complaint, Defendants jointly filed a motion to transfer the case to the District **[*3]** of Massachusetts (DE 58) and a motion to dismiss (DE 65), and Momenta additionally filed a separate motion to dismiss or transfer for improper venue. DE 62. On September 29, 2016, a Report and Recommendation was entered in which the undersigned Magistrate Judge recommended that each motion be denied. DE 114. Defendants subsequently filed both joint and separate objections to the Report and Recommendation. DE 117, 119. On March 21, 2017, the District Judge issued a Memorandum Opinion that adopted in part and declined to adopt in part the Report and Recommendation. DE 134. As a result of the District Judge's holding, Plaintiff's claims for declaratory and injunctive relief were permitted to proceed but Plaintiff's claim for damages was dismissed. *Id.* at 16. This was based on a finding that Plaintiff did not have standing to seek damages under the so-called "indirect purchaser rule," derived from the Supreme Court's holding in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, which bars recovery of antitrust damages from Defendants based on Plaintiff's purchase of enoxaparin from a non-party drug wholesaler, McKesson Corporation ("McKesson"), and not directly from Defendants. *Id.* at 8-14. Plaintiff filed the instant motion for leave to amend thereafter. **[*4]** DE 140.

II. ANALYSIS

Plaintiff states that its proposed amended complaint makes three fundamental changes: (1) the addition of a new representative plaintiff identified as the American Federation of State, County and Municipal Employees District Council 37 Health & Security Plan ("DC 37"); (2) the amendment of the claims in the initial complaint to include claims filed under various state antitrust and consumer protection laws that permit indirect purchaser standing; and (3) the addition of substantive allegations pertaining to Defendants' conspiratorial conduct. DE 141 at 5.[3] The amended complaint asserts claims for damages under the statutes of 30 different states and the District of Columbia, referred to as the "Indirect Purchaser Jurisdictions,"[4] that allow indirect purchasers such as NGH, DC 37, and the proposed class of plaintiffs to recover damages, thus circumventing the federal bar of such claims. *Id.*

---

a motion to amend is a nondispositive order."); *Hira v. New York Life Ins. Co., 2014 U.S. Dist. LEXIS 70861, 2014 WL 2177799, at **1-2 (E.D. Tenn. May 23, 2014)* (magistrate judge's order on motion to amend was appropriate and within his authority because motion to amend is non-dispositive); *United States v. Hunter, 2013 U.S. Dist. LEXIS 155203, 2013 WL 5280251, at *1 (S.D. Ohio Oct. 29, 2013)* (stating that a magistrate judge's orders denying petitioner's motions to amend a petition pursuant to *28 U.S.C. § 2255* were non-dispositive).

[2] The factual background involved in this matter is discussed in detail in the undersigned's previous Report and Recommendation (DE 114) and the subsequent memorandum of the Chief District Judge (DE 134). This memorandum and order therefore discusses only those facts necessary to address the pending motion.

[3] Plaintiff filed a motion to file the amended complaint under seal, which was denied. *See* DE 152.

[4] Plaintiff identifies these 31 jurisdictions as the following: Alabama, Arizona, Arkansas, California, the District of Columbia, Florida, Hawaii, Illinois, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. DE 141 at 8, n.5.

Plaintiff asserts that the class it now seeks to represent is comprised of "those end-payers who could bring an indirect claim under their own state's [repealer] laws." *Id.*

A. Legal Standard

HN1[] *Rule 15 of the Federal Rules of Civil Procedure*, which governs the Court's consideration of the pending motion, states that leave to amend **[*5]** a pleading should be "freely given when justice so requires." *Fed. R. Civ. P. 15(a)*. The reason behind such policy is "to reinforce the principle that cases 'should be tried on their merits rather than the technicalities of pleadings.'" *Moore v. City of Paducah, 790 F.2d 557, 559 (6th Cir. 1986)* (quoting *Tefft v. Seward, 689 F.2d 637, 639 (6th Cir. 1982))*. However, the Supreme Court has indicated that while the moving party "ought to be afforded an opportunity to test [its] claim on the merits," one or more of the following conditions may negate this directive: undue delay, bad faith, dilatory motive, repeated failure to cure deficiencies by previous amendments, undue prejudice to the opposing party, or futility of the proposed amendment. *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 230, 9 L. Ed. 2d 222 (1962)*. Nevertheless, the determination as to whether justice requires permission to amend the pleading is within the district court's "sound discretion." *Moore, 790 F.2d at 559* (internal citations omitted).

HN2[] *Rule 20* is also implicated by Plaintiff's motion and states that additional plaintiffs may be joined to a pending action if such plaintiffs "assert any right to relief jointly, severally, or in the alternative with respect to or arising out of the same transaction, occurrence, or series of transactions or occurrences," and "any question of law or fact common to all plaintiffs will arise in the action." *Fed. R. Civ. P. 20(a)(1)(A)*, *(B)*. **[*6]** Such permissive joinder of claims is encouraged as "the impulse is toward entertaining the broadest possible scope of action consistent with fairness to the parties ...." *Thompson v. Janssen Pharms., Inc., No. 15-cv-2558, 2015 U.S. Dist. LEXIS 183578, 2015 WL 12844456, at *1 (W.D. Tenn. Dec. 21, 2015)* (quoting *United Mine Workers of Am. v. Gibbs, 383 U.S. 715, 724, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966))*.

B. Defendants' Opposition

The crux of Defendants' opposition focuses on the alleged futility of Plaintiff's proposed amendments.***HN3***[] The Sixth Circuit has made clear that any analysis of the futility of proposed amendments is equivalent to the analysis undertaken as part of a *Rule 12(b)(6)* motion. *See* *Rose v. Hartford Underwriters Ins. Co., 203 F.3d 417, 421 (6th Cir. 2000)* ("[A] proposed amendment is futile only if it could not withstand a *Rule 12(b)(6)* motion to dismiss."). The policy behind the futility argument is to prevent the expenditure of unnecessary effort and resources by both the parties and the court. *See, e.g.,* *Matlock v. Rose, 731 F.2d 1236, 1240-41 (6th Cir. 1984)* ("[T]he concern for judicial economy, under the circumstances of this case, is particularly advanced through the futility doctrine."). However, judicial economy is only served in this case if the undersigned concludes, and the District Judge concurs, that denial of Plaintiff's motion to amend is required, since, as made clear in their responsive brief, Defendants plan to file a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* if the current motion is granted. **[*7]** *See* DE 148 at 9, n.1. While the Court does not in any way view Defendants' candid statements regarding their planned course of litigation as deliberately coercive, this posture inevitably effectuates such an end.

Other courts in this circuit have commented on the inelegant nature of the futility argument in such a context:

> ***HN4***[] There is some conceptual difficulty presented when the primary basis for a party's opposition to the filing of an amended pleading is that the pleading is futile, *i.e.* that it fails to state a claim upon which relief can be granted. A Magistrate Judge cannot ordinarily rule on a motion to dismiss, *see* *28 U.S.C. § 636(b)(1)(A)*, and denying a motion for leave to amend on grounds that the proposed new claim is legally insufficient is, at least indirectly, a ruling on the merits of that claim .... Consequently, rather than determining the actual legal sufficiency of the new claim, in many cases it will suffice to determine if there is a substantial argument to be made on that question and, if so, to allow the amended pleading to be filed with the understanding that a motion to dismiss for failure to state a claim may follow.

*Durthaler v. Accounts Receivable Mgmt., Inc., No. 2:10-cv-1068, 2011 U.S. Dist. LEXIS 121573, 2011 WL 5008552, at *4 (S.D. Ohio Oct. 20, 2011)*. *See* **[*8]** *also* *Vanburen v. Ohio Dep't of Pub. Safety, No. 2:11-cv-1118, 2012 U.S. Dist. LEXIS 160907, 2012 WL 5467526, at *4 (S.D. Ohio Nov. 9, 2012)* (holding that due to this "procedural roadblock," the better course would be to allow amendment of the complaint with the understanding that a motion to dismiss may follow filing of the amended complaint); *Research Inst. at Nationwide Children's Hosp. v. Trellis Bioscience, LLC, No. 2:15-cv-3032, 2017 U.S. Dist. LEXIS 63108, 2017 WL 1487596, at *3 (S.D. Ohio Apr. 26, 2017)* (same). Indeed, "it is usually a sound exercise of discretion to permit the claim to be pleaded and to allow the merits of the claim to be tested before the District Judge by way of a motion to dismiss." *Durthaler, 2017 U.S. Dist. LEXIS 63108, 2011 WL 5008552, at *4*. *See also* *Greenwald v. Holstein, No. 2:15-cv-2451, 2016 U.S. Dist. LEXIS 192242, 2016 WL 9344297, at *5 (S.D. Ohio Feb. 3, 2016)* (same).[5] With such guidance in mind, the Court turns to the merits of Defendants' opposition to the motion.

(1) Personal Jurisdiction

Defendants contend that the addition of DC 37 as a plaintiff to the instant lawsuit would be futile because the Court lacks personal jurisdiction with respect to any claims that could be asserted by DC 37. DE 148 at 9. DC 37 is described as a "health and welfare benefit plan located in New York covering New York public sector employees, retirees, and their families wherever they reside, and is New York's largest public employee union." DE 141 at **[*9]** 7. Defendants emphasize, however, that the proposed amended complaint contains no allegation that DC 37 purchased enoxaparin in Tennessee, reimbursed its union members for enoxaparin in Tennessee, or was otherwise injured in Tennessee. DE 148 at 19. Defendants also rely on the recent decision in *Bristol-Myers Squibb Co. v. Superior Court of California, San Francisco Cty.*, in which the Supreme Court reaffirmed that ***HN5***[] "there must be an affiliation between the forum and the underlying controversy, principally" for a court to exercise specific personal jurisdiction over a defendant.[6] *137 S. Ct. 1773, 1780, 198 L. Ed. 2d 395 (2017)* (quoting *Goodyear Dunlop Tires Operations, S.A. v. Brown, 564 U.S. 915, 918, 131 S. Ct. 2846, 180 L. Ed. 2d 796 (2011))* (internal quotations omitted).

Plaintiff responds that DC 37's claims are appropriately before this Court based on the doctrine of pendent personal jurisdiction, which holds that ***HN6***[] "where a federal statute authorizes nationwide service of process, and the federal and state claims 'derive from a common nucleus of operative fact' ... the district court may assert personal jurisdiction over the parties to the related state law claims even if personal jurisdiction is not otherwise available." *Iron Workers Local Union No. 17 Ins. Fund v. Philip Morris Inc., 23 F. Supp. 2d 796, 805 (N.D. Ohio 1998)* (quoting *Gibbs, 383 U.S. at 725, 86 S. Ct. 1130*). The Court has previously determined that ***HN7***[] *Section 12 of the Clayton Act*, the antitrust statute at issue in the instant **[*10]** matter, provides for nationwide personal jurisdiction in the case of corporate defendants such as Sandoz and Momenta. *See* DE 114 at 38-39; DE 134 at 6. The issue, therefore, is whether the Court may exercise pendent personal jurisdiction with respect to the state law claims brought under the 31 "Indirect Purchaser Jurisdictions" named in the proposed amended complaint.[7]

---

[5] This approach is also the most conceptually and intellectually consistent with the view that motions to amend are non-dispositive proceedings.

[6] Plaintiff does not assert that DC 37 is subject to general personal jurisdiction in the instant matter, as such an exercise involves a court's ability "to hear any and all claims against [foreign (sister-state or foreign-country) corporations] when their affiliations with the State are so 'continuous and systematic' as to render them essentially at home in the forum State.'" *Goodyear, 564 U.S. at 919, 131 S. Ct. 2846* (internal citation omitted).

[7] Counsel for Defendants suggested during oral arguments that pendent personal jurisdiction should not apply in the instant case because neither the Supreme Court nor the Sixth Circuit has formally adopted the use of such jurisdiction. This contention is unpersuasive in light of the use of pendent personal jurisdictions in numerous other courts in this circuit, as well as recognition of this principle by the Sixth Circuit. *See, e.g.,* *Beautytuft, Inc. v. Factory Ins. Ass'n, 431 F.2d 1122, 1128 (6th Cir. 1970)* (affirming the district court's exercise of pendent personal jurisdiction); *Capitol Specialty Ins. Corp. v. Splash Dogs, LLC, 801 F. Supp. 2d*

HN8[] In providing jurisdiction over a cause of action involving enforcement of a federal right, "Congress granted the district courts power also to consider state law claims provided they had a nucleus of pertinent facts in common with a substantial federal claim." *Iron Workers, 23 F. Supp. 2d at 805* (quoting *Hargrave v. Oki Nursery, Inc., 646 F.2d 716, 719 (2nd Cir. 1980))*. Here, despite Defendants' correct observation that the *Fifth Amendment* limits a court's ability to exercise jurisdiction over a non-resident defendant (DE 148 at 18), the Court takes its cue from the *Iron Workers* decision in finding that such a "nucleus of pertinent facts in common" with the pending federal claim exists in this matter:

> The Supreme Court has yet to address the scope of due process protection under the *Fifth Amendment* in the jurisdictional context. Since the Sixth Circuit also has yet to address this precise issue, the Court will follow the view that *Fifth Amendment* due **[*11]** process is satisfied when the defendant in question resides in the United States and a statute provides for nationwide service of process .... Because this Court has personal jurisdiction over the defendants under the [] antitrust claims, and because the state law claims alleging a conspiracy to sell and market tobacco derive from a common nucleus of operative facts with the federal claims, the Court need not reach the question of whether personal jurisdiction with respect to the state law claims is otherwise available .... Accordingly, the Court finds that it has jurisdiction over Defendants ... as to both the federal and state law claims contained in the Amended Complaint.

Iron Workers, 23 F. Supp. 2d at 805-06. There is at least a substantial argument to be made as to jurisdiction, and the Court therefore declines to find futility on this ground.

(2) Statute of Limitations

(a) Accrual of cause of action

Defendants additionally allege that the proposed amended complaint is futile because any potential claim asserted by DC 37 is barred by the relevant statute of limitations, which requires a plaintiff to file its antitrust action "within four years after the cause of action accrued." *15 U.S.C. § 15b*.[8] Defendant states that any claims asserted **[*12]** by NGH or DC 37 and all proposed state law claims began accruing in January of 2012, when non-party Amphastar was permitted to begin selling enoxaparin, thus rendering time-barred any claims brought after February of 2016. DE 148 at 22-23.[9] Plaintiff responds by first arguing that such claims did not begin accruing in January of 2012 because Plaintiff alleges damages "through the present," and that even if such claims had begun accruing in January of 2012, the statute of limitations was tolled by both Defendants' fraudulent concealment of their actions and the discovery rule, the latter of which holds that "accrual occurs when the plaintiff discovers that he has been injured and who caused the injury." *Med. Ctr. at Elizabeth Place v. Premier Health Partners, No. 3:12-cv-26, 2016 U.S. Dist. LEXIS 192269, 2016 WL 9460026, at *14 (S.D. Ohio Oct. 6, 2016)* (quoting *In re Copper Antitrust Litig., 436 F.3d 782, 789 (7th Cir. 2006))* (internal quotations omitted).

HN9[] In an antitrust lawsuit, the cause of action accrues and the accompanying limitation period commences "each time a defendant commits an act that injures the plaintiff's business." *In re Southeastern Milk Antitrust Litig., 555 F. Supp. 2d 934, 946-47 (E.D. Tenn. 2008)* (citing *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971))*. When a plaintiff alleges a continuing antitrust violation, the cause of action "accrues each time a plaintiff is injured by an act of the defendants." *Barnosky Oils, Inc. v. Union Oil Co. of*

657, 668 (S.D. Ohio 2011) ("The Court has little difficulty applying this concept here."); *Bennett v. Steiner-Liff Iron & Metal Co., 714 F. Supp. 895, 897 (M.D. Tenn. 1989)* (noting that pendent jurisdiction "is a matter for the discretion of the court").

[8] Defendants also note that most of the state law claims proffered in the amended complaint are similarly subject to four-year statutes of limitation. DE 148 at 22-23, n.9.

[9] Amphastar's role in the current case is discussed in detail in previous opinions from both the undersigned and the Chief District Judge. *See* DE 114, 134.

California, 665 F.2d 74, 81 (6th Cir. 1981). However, even in the event of **[*13]** an alleged continuing violation, "an overt act by the defendant is required to restart the statute of limitations and the statute runs from the last overt act." Peck v. Gen. Motors Corp., 894 F.2d 844, 849 (6th Cir. 1990) (internal citation omitted). Such an overt act involves both "a new and independent act that is not merely a reaffirmation of a previous act" and that "inflict[s] new and accumulating injury on the plaintiff." Southeastern Milk, 555 F. Supp. 2d at 947 (internal citation omitted).

Here, Plaintiff alleges ongoing harm in light of the "supracompetitive prices resulting from Defendants' conspiracy." DE 153 at 13 (citing to DE 143 at ¶¶ 71, 74, 76, 79, and 83). The fact that Amphastar was finally permitted to begin selling generic enoxaparin in January of 2012 does not necessarily mean that the instant cause of action began accruing at that time. The proposed amended complaint alleges, among other things, that the wholesale price of generic enoxaparin did not begin to decline until May of 2012 and subsequently "began plummeting" in 2014, until which time Plaintiff claims to have paid "hundreds of millions of dollars in overcharges." DE 143 at ¶¶ 74-75. As noted by the Supreme Court:

> **HN10**[] ***Antitrust law*** provides that, in the case of a "continuing violation," say, a price- fixing **[*14]** conspiracy that brings about a series of unlawfully high priced sales over a period of years, "each overt act that is part of the violation and that injures the plaintiff," *e.g.*, each sale to the plaintiff, "starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times."

Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 1990, 138 L. Ed. 2d 373 (1997) (internal citations omitted). Such a price-fixing conspiracy is alleged in the amended complaint, with overpayments occurring well past Amphastar's entry into the market in January of 2012. Indeed, Plaintiff seeks to represent specific individuals and entities that bought Lovenox® or generic enoxaparin "from September 21, 2011, *through the present* ...." DE 143 at ¶ 83 (emphasis added). The Court finds that there is substantial merit to Plaintiff's contention that the claims in the proposed amended complaint are timely, and such claims are therefore not futile for purposes of the pending motion to amend.

(b) Fraudulent concealment

With respect to alleged fraudulent concealment, Defendants argue that Plaintiff has failed to plead fraudulent concealment with the requisite level of particularity under Fed. R. Civ. P. 9(b).[10] **HN11**[] To establish fraudulent concealment, a party must **[*15]** plead and prove: (1) wrongful concealment of their actions by the defendants; (2) failure of the plaintiff to discover the operative facts that are the basis of his cause of action within the limitations period; and (3) plaintiff's due diligence until discovery of the facts. Dayco Corp. v. Goodyear Tire & Rubber Co., 523 F.2d 389, 394 (6th Cir. 1975). Although Plaintiff's allegations here of fraudulent concealment are not extensive, the Court declines to hold that the possibility of fraudulent concealment is futile at this early stage of litigation. *See* Jones v. TransOhio Sav. Ass'n, 747 F.2d 1037, 1043 (6th Cir. 1984) ("We are unprepared to hold, prior to any discovery on the issue, that Appellants can prove no set of facts consistent with these allegations sufficient to toll the statute of limitations. Appellants are entitled to have their cause tried on the merits if they can prove that the doctrine of fraudulent concealment should be applied to their case."). *Cf.* In re Packaged Ice Antitrust Litig., 723 F. Supp. 2d at 1018 ("[W]here there is a dispute as to the issue of fraudulent concealment, the question is one for the jury.") (quoting Dry Cleaning & Laundry Institute of Detroit, Inc. v. Flom's Corp., 841 F. Supp. 212, 216 (E.D. Mich. 1993)).

In numbered paragraphs 2 and 3 of the amended complaint (DE 143), Plaintiff alleges that Defendants secretly manipulated the generic drug approval process to further their monopolization scheme. Plaintiff's allegations of secrecy and concealment **[*16]** by Defendants continue throughout at least numbered allegations 36 through 55. These same allegations also describe the fraudulent concealment as the failure of Momenta's experts to self-disclose conflicts of interest as required by the USP, the scientific organization that sets (among other things) drug standards enforced by the FDA. Further, it is entirely plausible that the only required due diligence in discovery of

---

[10] This position was advanced by Defendants during oral arguments.

the facts of Defendants' conduct is reliance on the self-reporting rules of the USP, as alleged in Plaintiff's proposed modified numbered allegation 27 and new numbered allegation 71 (see DE 159).[11] The Court finds that there is a substantial argument that the amended complaint (with the proposed additional allegations) plausibly, and therefore sufficiently, alleges affirmative acts of fraudulent concealment. For that reason, the Court declines to deny the motion to amend as futile.[12]

(3) Standing

Defendants argue that Plaintiff's proposal to represent a "nationwide class" under the laws of 31 different jurisdictions is futile because NGH and DC 37, who reside for purposes of this motion in Tennessee and New York, respectively, lack standing to assert claims on behalf **[*17]** of individuals from the other 29 jurisdictions. DE 148 at 23. Defendants rely on a case from the Eastern District of Michigan in which the court noted that to establish standing in a class action suit, the "named plaintiffs who represent a class must allege and show that they personally have been injured, not that injury has been suffered by other, unidentified members of the class to which they belong and which they purport to represent." *In re Packaged Ice Antitrust Litig., 779 F. Supp. 2d 642, 657 (E.D. Mich. 2011)* ("*Packaged Ice II*") (quoting *Lewis v. Casey, 518 U.S. 343, 357, 116 S. Ct. 2174, 2183, 135 L. Ed. 2d 606 (1996)*). The court ultimately held that the named plaintiffs in that case, which consisted of indirect purchasers that resided in California, Florida, Indiana, Michigan, and New York, lacked standing to assert claims pursuant to the laws of 26 additional states in which none of them resided or suffered the injury in question. *Id. at 657-58*.

Plaintiff does not dispute the *Packaged Ice II* holding, instead arguing that the Court's analysis should be guided by an earlier decision in which the Sixth Circuit held that once standing has been established with respect to a named plaintiff, the issue of "whether a plaintiff will be able to represent the putative class, including absent class members, depends solely on whether he is able to meet the **[*18]** additional criteria encompassed in *Rule 23 of the Federal Rules of Civil Procedure*." *Fallick v. Nationwide Mut. Ins. Co., 162 F.3d 410, 423 (6th Cir. 1998)* (internal citation omitted).[13] Plaintiff contends that Defendants confuse the issue of standing with the adequacy of class representation and argues that, in accordance with *Fallick*, the ability of NGH and DC 37 to seek relief on behalf of the unnamed class members residing in the remaining 29 state jurisdictions should be determined as part of the class certification process and not a motion to dismiss (or a motion to amend). DE 153 at 14-15.[14] The Court agrees.

Weighing in favor of Plaintiff's argument is a case from the Northern District of Ohio, in which the district court, applying *Fallick*, discussed standing and class certification as part of a motion to dismiss in a similar scenario involving indirect purchaser plaintiffs seeking relief under the consumer protection statutes of twenty different state jurisdictions:

> This Court would similarly confuse Article III standing and *Federal Civil Rule 23*'s requirements if it would, at this stage, dismiss all state-law claims but those of the jurisdictions in which the named Indirect Purchaser Plaintiffs reside, or to which they are connected. Both the named Indirect Purchaser Plaintiffs and **[*19]** the absent members of the putative class identify the same general cause for their injuries: the alleged price-fixing

---

[11] An order directing that Plaintiff's notice of additional allegations (DE 159) be unsealed is entered separately. *See also* DE 158 and DE 162. The Court has considered Defendants' response to the supplemental allegations, and for the reasons herein, does not find that the arguments made by Defendants compel denial of the motion to amend.

[12] The Court further notes that the tolling argument based on fraudulent concealment may be academic to the extent that it is simply an alternative to Plaintiff's contention that the amended complaint is not untimely because of alleged ongoing antitrust violations, a contention with which the Court concurs as discussed herein.

[13] Plaintiff also notes that the district court in *Packaged Ice II* failed to consider the *Fallick* decision in its opinion. DE 153 at 16.

[14] As discussed *supra*, the futility analysis is the equivalent of a *Rule 12(b)(6)* analysis. *See* *Rose, 203 F.3d at 421 (6th Cir. 2000)* ("[A] proposed amendment is futile only if it could not withstand a *Rule 12(b)(6)* motion to dismiss.").

> and customer allocation conspiracy. The named Indirect Purchaser Plaintiffs merely seek relief for themselves under the statutes of the jurisdictions in which they reside, and seek similar relief for absent class members under the antitrust and consumer protection statutes of each such class member's state. Properly understood, neither plaintiff grouping seeks relief for themselves under the laws of a foreign state jurisdiction. The [amended complaint] contains a mixture of state-law claims *only* because the Indirect Purchaser Plaintiffs bring this suit as a proposed class action.

In re Polyurethane Foam Antitrust Litig., 799 F. Supp. 2d 777, 806 (N.D. Ohio 2011) (emphasis in original). Similarly, the Court follows the *Fallick* decision in concluding that the current standing dispute, which has been raised by Defendants in response to a motion for leave to amend a complaint, would be more appropriately addressed following a ruling on class certification. *See* *In re Cast Iron Soil Pipe & Fittings Antitrust Litig., No. 1:14-MD-2508, 2015 U.S. Dist. LEXIS 121620, 2015 WL 5166014, at *19 (E.D. Tenn. June 24, 2015)* ("If the Court were to decide the standing issue at this juncture on the basis that the named plaintiffs do not reside in some of **[*20]** the states under whose laws they bring claims on behalf of the class, it would not be giving due appreciation to the complex nature of Article III standing in class actions and the nuances of class certification."); *see also* *In re Auto. Parts Antitrust Litig., No. 12-MD-02311, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *11 (E.D. Mich. June 6, 2013)* ("[T]he Court finds the better path is to defer this issue until the class certification stage."). The Court therefore rejects Defendants' futility arguments as to standing for purposes of this motion to amend.

(4) The Purported Class

Defendants assert that Plaintiff's attempt to "rewrite its class definition" to include indirect purchasers of enoxaparin from 31 different jurisdictions is both futile and unduly prejudicial. DE 148 at 26-27.[15] Defendants argue that neither NGH nor DC 37 fit within their proposed class of plaintiffs because: (a) neither entity indirectly purchases enoxaparin "for their own use and not for resale" as described in the proposed class (DE 143 at ¶¶ 82-83), with NGH instead reselling enoxaparin through the NGH pharmacy and DC 37 reimbursing its members for their use of enoxaparin; and (b) the interests of the indirect purchasers, such as NGH, the end-payors, such as DC 37, and the actual **[*21]** consumers of enoxaparin all conflict, a scenario that Defendants contend "will plunge this case into chaos." DE 148 at 27-29.

Defendants' arguments again broach precisely the types of issues that are better suited for a class certification determination (or at the very least a *Rule 12(b)(6)* analysis). This point is perhaps best accentuated by the dearth of case law cited by Defendants involving a district court's denial of a motion to amend a complaint based on proposed changes to a class definition. The Court acknowledges that Defendants have cited one such decision from the Eastern District of New York, *Pierre v. JC Penney Co.*, in which a motion to amend was denied, to support their argument that futility has served as a basis for courts to deny motions seeking leave to amend a complaint to include a redefined class of proposed plaintiffs. DE 148 at 27. The facts in that case, however, are distinguishable from the instant matter, including the significant difference that the district court had already allowed the plaintiffs in *Pierre* to amend their complaint on two occasions. *Pierre, No. 03-4782, 2006 U.S. Dist. LEXIS 6471, 2006 WL 407553, at *1 (E.D.N.Y. Feb. 21, 2006)*.[16] The court ultimately held that the third amended complaint proposed by

---

[15] Defendants also argue (*see* DE 163) that Plaintiff is definitionally excluded from its own proposed new class (*see* DE 159) because the class excludes persons who transacted in generic enoxaparin or Lovenox® for purposes of resale, and the motion to amend must therefore be denied as futile. First, the Court agrees with Plaintiff that there is a reasonable construction of this class definition (*see* DE 166); namely, that Plaintiff is not excluded from the class, but can only claim damages for transactions where Plaintiff dispenses to patients at its own cost, which was previously alleged by Plaintiff (*see* DE 143 at ¶ 11). The Court further concurs that this is a semantics issue at best; nevertheless, to address Defendants' strained interpretation of the class definition, the Court will permit insertion of the word "only" in Plaintiff's class exclusion, as proposed by Plaintiff. *See* DE 166 at 2, n.1. Finally, for all of the reasons stated herein, the Court finds that Defendants' arguments about the propriety of the class do not compel a finding of futility for purposes of a motion to amend.

the *Pierre* plaintiffs, which sought **[*22]** to add new causes of action, utterly failed to state an actionable claim under *42 U.S.C. § 1981*, thus rendering the proposed amendments futile. *2006 U.S. Dist. LEXIS 6471, [WL] at *4*. Even then, the court denied the motion without prejudice to allow the plaintiff an opportunity to seek amendment of the proposed class. *2006 U.S. Dist. LEXIS 6471, [WL] at *6-7*. This is far from analogous to the facts at issue here.

Defendants claim that the proposed amended complaint's class definition fails to cover Plaintiff because it seeks to encompass all individuals and entities residing in the United States that indirectly purchased enoxaparin "for their own use and not for resale." DE 143 at ¶¶ 82-83. Defendants note that Plaintiff identified itself in the original complaint as an entity that buys enoxaparin and "dispenses the drugs to hospital patients or re-sells them through the NGH pharmacy." DE 1 at ¶ 11. However, even if the Court chose to hold Plaintiff to its original complaint, that initial definition does not definitively--and especially not at this stage of this proceeding--exclude Plaintiff from seeking damages based on its dispersal of enoxaparin to patients at NGH, sometimes at its own cost (DE 143 at ¶ 11), separate from its resale of enoxaparin through its pharmacy. Regardless, **[*23]** such parsing of definitions is not appropriate at this stage of litigation in light of the liberal pleading standard set forth by *Rule 15*. *See* *Broughton v. St. John Health Sys., 246 F. Supp. 2d 764, 775 (E.D. Mich. 2003)* ("***HN12***[] Granting leave freely under *Rule 15* 'reinforce[s] the principle that cases should be tried on their merits rather than the technicalities of pleadings.'") (quoting *Tefft, 689 F.2d at 639*).

Defendants' argument with respect to DC 37 is similarly unpersuasive. Defendants employ semantic dexterity to contend that DC 37 does not fit within the proposed class definition because DC 37, as a health and welfare benefit plan, does not "use" enoxaparin as described in the proposed class definition. DE 148 at 28. Yet the amended complaint defines DC 37 as an entity that "indirectly purchased, paid, and reimbursed for Lovenox® and/or generic enoxaparin intended for consumption by its members, retirees, and their families[.]" DE 143 at ¶ 12. The proposed class definition with respect to indirect purchasers includes "[a]ll persons and entities that ... indirectly purchased ... for their own use and not for resale Lovenox® or generic enoxaparin." *Id. at ¶ 83*. This appears to cover an entity that indirectly purchases the subject drugs and distributes them to its own members.

HN13[] A class representative **[*24]** must "possess the same interest and suffer the same injury as the class members." *Reid v. White Motor Corp., 886 F.2d 1462, 1471 (6th Cir. 1989)* (quoting *East Texas Motor Freight System, Inc. v. Rodriguez, 431 U.S. 395, 403, 97 S. Ct. 1891, 1896, 52 L. Ed. 2d 453 (1977))* (internal quotations omitted). The amended complaint makes clear the allegation that DC 37, as an indirect purchaser, paid overcharges for Lovenox® and enoxaparin as a result of Defendants' monopolization efforts. *See* DE 143 at ¶¶ 3, 81, 119. The fact that DC 37 did not physically ingest these drugs, which appears to be the primary component of Defendants' argument, does not negate DC 37's involvement in indirectly purchasing them for subsequent use by their members. The Court also finds support for its determination in the decision in *In re Nexium Antitrust Litigation*, cited in Plaintiff's brief (DE 153 at 20-21), in which the First Circuit affirmed a district court's certification of a similarly described class with named plaintiffs who were "union health and welfare funds that reimburse plan members for prescription drugs," which consisted of "[a]ll persons or entities in the United States and its territories who purchased or paid for some or all of the purchase price for Nexium or its ABrated generic equivalents ... for consumption by themselves, their families, or their members, employees, **[*25]** insureds, participants or beneficiaries[.]" *777 F.3d 9, 13-14 (1st Cir. 2015)*.

Defendants' additional assertion that Plaintiff's proposed class definition is untenable due to potential conflicts between putative class members is similarly unavailing. Citing *In re Warfarin Sodium Antitrust Litig., 391 F.3d 516 (3d Cir. 2004)*, Defendants seamlessly claim that DC 37, NGH, and consumers are "fundamentally different groups that, at a minimum, require separate counsel and representatives to ensure adequate representation." DE 148 at 28. This, however, is a shallow interpretation of the Third Circuit's ruling, which actually rejected the very argument regarding class member conflict that Defendants in the instant case have proffered:

---

[16] Notably, counsel for the plaintiffs failed to even appear for oral arguments on the motion for leave to amend the complaint. *Pierre, 2006 U.S. Dist. LEXIS 6471, 2006 WL 407553, at *1*.

> [W]e reject Appellants' contention that the interests of the class members were in conflict in such a way that the District Court abused its discretion in certifying a single class including several types of injured plaintiffs. As the District Court found, the named parties, who included consumers and [third party payors], as well as consumers from the indirect purchaser states, all shared the same goal of establishing the liability of DuPont, suffered the same injury resulting from the overpayment for warfarin sodium, and sought essentially the same damages **[*26]** by way of compensation for overpayment .... Although some courts have created subclasses of class action plaintiffs where there are conflicts of interest among class members ... we do not believe that this was required in this case. Appellants have only asserted, rather than established, an inherent conflict among consumers and between consumers and [third party payors].

Warfarin Sodium, 391 F.3d at 532-33. The fact that the Third Circuit viewed favorably the presence of separate counsel for the consumers and third party payors does not amount to a mandate that such separate representation exist in every class action suit. This alone is sufficient to overcome any assertion by Defendants that Plaintiff's proposed amendment in this regard is futile. *See* *id. at 533* ("Appellants have only asserted, rather than established, an inherent conflict among consumers and between consumers and [third party payors].").

Defendants further argue that NGH has abandoned its previous position as a direct purchaser and now seeks to improperly fundamentally change the nature of this case by shoehorning indirect purchaser claims into the lawsuit, thus causing undue prejudice to Defendants. DE 148 at 29-31. Defendants cite several cases in support of **[*27]** this position, although none support denial of a motion to amend in a case involving facts similar to those currently before the Court. *See* *Town of Lexington v. Pharmacia Corp. Solutia, No. 12-cv-11645, 2015 U.S. Dist. LEXIS 36814, 2015 WL 1321448, at *4 (D. Mass. Mar. 24, 2015)* (denying motion to file amended complaint that changed theory of case from defendants' failure to regulate levels of polychlorinated biphenyls in schools to defendants' negligence in using contaminated caulk that allegedly caused increased levels of polychlorinated biphenyls); *Acosta-Mestre v. Hilton Int'l of Puerto Rico, Inc., 156 F.3d 49, 51 (1st Cir. 1998)* (affirming district court's denial of motion to amend complaint that was filed near the close of discovery period, which had been extended on three previous occasions, and added a new defendant); *Davis v. Lenox Hill Hosp., No. 03-cv-3746 DLC, 2004 WL 1926086, at *4 (S.D.N.Y. Aug. 31, 2004)* (denying motion to amend that was filed after the close of class discovery); *Bissell Homecare, Inc. v. PRC Indus., No. 1:13-cv-1182, 2014 U.S. Dist. LEXIS 104294, 2014 WL 3756131, at *16 (W.D. Mich. July 31, 2014)* (finding that a motion to amend the complaint that was not filed until after the opposing party's motion to dismiss for lack of personal jurisdiction was pending, and several months "after the basis of the amendment was or should have been known to Plaintiff based on Defendant's Answer," should **[*28]** be denied); *National Union Fire Ins. Co. v. Continental Illinois Corp., 113 F.R.D. 527, 531 (N.D. Ill. 1986)* (denying defendant's motion to join excess insurers as counterclaim defendants under *Fed. R. Civ. P. 13(h)*); *Morongo Band of Mission Indians v. Rose, 893 F.2d 1074, 1079 (9th Cir. 1990)* (affirming district court's denial of motion to amend complaint that sought to change action from enforcement of an Indian tribe's sovereign power under federal common law to new federal claims involving the *Racketeer Influenced and Corrupt Organizations Act*, criminal depredation and trespass statutes, and claims brought pursuant to *42 U.S.C. § 1985*); *Mississippi Ass'n of Cooperatives v. Farmers Home Admin., 139 F.R.D. 542, 542-43 (D.D.C. 1991)* (denying motion to amend complaint in a case brought under the *Freedom of Information Act* in which "the bulk of the documents" sought by the subject plaintiffs had already been provided before plaintiffs moved to add new parties and claims involving alleged civil rights violations and the *Administrative Procedure Act*).

In contrast, the proposed amended complaint in the instant matter continues to assert antitrust violations committed by Defendants, but now focuses on statutes from 31 jurisdictions that permit "indirect purchaser" standing, thus purportedly curing the defect contained in the original complaint that precluded Plaintiff from seeking damages pursuant to *Illinois Brick*. This is a far cry from "plung[ing] this case into chaos," as Defendant **[*29]** claims. DE 148 at 29. Of note, Plaintiff reports that Defendants "have propounded no affirmative discovery and no expert work has occurred." DE 153 at 19. Defendants' assertion of undue prejudice at this stage of litigation rings hollow, and the Court therefore finds no compelling reason to deny the motion to amend as either futile or unduly prejudicial based on the class certification issues.

(5) Unjust Enrichment

Defendants finally argue that Plaintiff's unjust enrichment claim is futile and thus subject to dismissal solely because the amended complaint does not specify which of the unjust enrichment laws from the various states are being invoked. DE 148 at 31. Defendants again rely on the *Packaged Ice II* decision, in which the district court dismissed the "undifferentiated unjust enrichment claims" proffered by indirect purchasers because such claims "did not identify the states under whose laws they brought their claims." *779 F. Supp. at 667-68* (citing *In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d 538, 587 (M.D. Pa. 2009))*.

There is support for Defendants' argument that Plaintiff's failure to identify any of the laws under which its unjust enrichment claims might proceed warrants dismissal of such claims. *See* *Auto. Parts, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *31* (holding that the indirect purchaser plaintiffs' "failure to identify **[*30]** the unjust enrichment laws of any particular jurisdiction subjects the causes of action to dismissal"). However, given the liberal standard contained in *Fed. R. Civ. P. 15(a)*, the Court finds that dismissal is not appropriate based on the alleged futility of the proposed unjust enrichment claim. The Court finds persuasive the course taken in the *Chocolate Confectionary* decision, which is cited favorably in *Packaged Ice II*, and in which the district court provided the subject plaintiffs an opportunity to amend their complaint to identify the laws under which their proposed unjust enrichment claims would proceed. *See* *Chocolate Confectionary, 602 F. Supp. 2d at 587 (M.D. Pa. 2009)* ("The ... plaintiffs will be permitted to pursue these [unjust enrichment] claims in the form of a second amended complaint provided, however, that they clearly identify the state jurisdictions invoked therein."). The Court also relies on the district court's decision in *In re Static Random Access Memory (SRAM) Antitrust Litig., 580 F. Supp. 2d 896 (N.D. Cal. 2008)*, another case cited favorably in both the *Packaged Ice II* opinion and Defendants' brief (DE 148 at 31-32), which similarly permitted the subject indirect purchaser plaintiffs to cure this defect. *See* *SRAM, 580 F. Supp. 2d at 910* ("[T]he Court dismisses Plaintiffs' unjust enrichment claim with leave to amend. If Plaintiffs re-plead this claim, they must **[*31]** identify which State's or States' law they rely upon."). For all of these reasons, the Court finds that permitting Plaintiff to modify its proposed amended complaint to identify the unjust enrichment claims by state, rather than denying amendment at all, is the most consistent with *Fed. R. Civ. P. 15*.

III. CONCLUSION

Based on the foregoing, Plaintiff's motion for leave to file an amended complaint (DE 140) is GRANTED, with the additional allegations described in Plaintiff's notice filed on September 15, 2017 (DE 159), and the additional modification that Plaintiff specify the state laws under which it asserts its unjust enrichment claims. Plaintiff shall file this amended complaint within seven (7) days of the date of entry of this Order. Defendant shall have 28 days after the filing of the amended complaint to answer or otherwise respond.[17]

Any party objecting to this memorandum opinion and order may seek review by way of a "motion for review" in accordance with Local Rule 72.02(b), which must be filed within fourteen (14) days after service of this memorandum and order.

It is SO ORDERED.

/s/ Barbara D. Holmes

BARBARA D. HOLMES

---

[17] Although the Court previously entered an order (DE 139) allowing Defendants thirty days from entry of any order granting the motion to amend to file an answer or other response, that order did not necessarily contemplate that further modification of the amended complaint might be directed. Additionally, given that the Federal Rules of Civil Procedure generally compute time in increments of seven (7) days, the time for Defendants to respond is amended to allow for a 28-day (rather than a 30-day) response. *See also* *Fed. R. Civ. P. 15(a)(3)*.

United States Magistrate Judge

FTC v. Sanford Health

United States District Court for the District of North Dakota

December 15, 2017, Decided; December 15, 2017, Filed

Case No. 1:17-cv-133

Opinion

MEMORANDUM OF DECISION, FINDINGS OF FACT, CONCLUSIONS OF LAW, AND ORDER

INTRODUCTION

Alleging that a proposed transaction between two healthcare **[*3]** providers—Sanford Health/Sanford Bismarck and Mid Dakota Clinic, P.C.—would substantially lessen competition and cause significant harm to consumers, the Federal Trade Commission and the State of North Dakota brought this action to preliminarily enjoin consummation of the proposed transaction pending an FTC administrative hearing. The administrative hearing is currently scheduled to begin on January 17, 2018.[1]

The parties stipulated to entry of a temporary restraining order, under which the proposed transaction cannot be closed until five business days after the court rules on the plaintiffs' motion for a preliminary injunction. (See Doc. #7).

Pursuant to *28 U.S.C. § 636(c)*, all parties consented to jurisdiction of a magistrate judge. (Doc. #39). Beginning on October 30, 2017, the undersigned magistrate judge held a four-day evidentiary hearing on the motion for a preliminary injunction.[2] At that hearing, the court received over 1600 exhibits—all admitted pursuant to stipulation by all parties—and heard testimony from sixteen witnesses. Following conclusion of the hearing, the parties submitted proposed findings of fact and conclusions of law. The court's review of documents received into evidence has been **[*4]** limited to those portions of the documents addressed during hearing testimony or cited in the parties' proposed findings of facts and conclusions of law.

The plaintiffs contend that the pending transaction would unlawfully lessen competition among four physician service lines—adult primary care physician (PCP) services, pediatrician services, obstetrician/gynecologist (OB/GYN) physician services, and general surgeon services—in the Bismarck-Mandan, North Dakota, Metropolitan Statistical Area (Bismarck-Mandan area), which includes the counties of Burleigh, Morton, Oliver, and Sioux. The defendants argue that the plaintiffs' position does not adequately consider the impact of a powerful buyer—Blue Cross Blue Shield of North Dakota (BCBSND). The defendants assert that the presence of that powerful buyer would preclude any anticompetitive effects that might otherwise result from the proposed transaction and that the proposed transaction would benefit consumers in the Bismarck-Mandan area.

[1] At the time of the preliminary injunction hearing, the administrative hearing was scheduled to begin on November 28, 2017, within the five-month period provided by *16 C.F.R. § 3.11(b)(4)*. The administrative law judge has since granted an extension to January 17, 2018.

[2] Because some of the testimony concerned sensitive and confidential business information of the defendants and of third parties, portions of the hearing were not open to the public. For the same reason, certain of the exhibits have been sealed and are not available to the public. Portions of this decision have been redacted to preserve that confidentiality.

Having fully considered the hearing testimony, the exhibits as described above, and the briefs of the parties, the court makes the following findings of fact and conclusions of law. In doing so, however, **[*5]** the court notes that its determinations cannot all be "neatly categorized as either findings of fact or conclusions of law." *FTC v. Penn State Hershey Med. Ctr., 838 F.3d 327, 335 (3rd Cir. 2016)*.

FINDINGS OF FACT

I. Sanford, MDC, and Third-Party Medical Facilities

1. Sanford is a not-for-profit, vertically integrated healthcare system which operates in nine states and in three foreign countries. An integrated healthcare system is one comprised of both hospital services and physician services and which sometimes also includes insurance companies and research and education components. (Tr-3, p. 9). Most of Sanford's facilities are located in North Dakota, South Dakota, and Minnesota. As a result of its recent acquisitiveness, Sanford's system now includes 45 hospitals, 289 clinics, more than 1,300 physician employees, and approximately 26,700 non-physician employees. (PX 4198, p. 7; PX 4128, p. 12; PX 8139, p. 1). Kelby Krabbenhoft, Sanford CEO, described Sanford's strategies as based on a premise that larger integrated healthcare systems are more successful in providing quality care. Sanford describes itself as a physician-driven organization, which benchmarks itself against other nationally recognized healthcare systems that it considers its primary competitors. **[*6]** (JX 0028, pp. 21-22, 31; Tr-3, pp. 22-27).

2. Sanford entered the North Dakota healthcare market in 2009 when it acquired Meritcare—an integrated healthcare system—in Fargo. (PX 6000, p. 17). In 2012, Sanford entered the healthcare market in Bismarck through its acquisition of an integrated healthcare system—MedCenter One—now known as Sanford Bismarck. (DX 2011, p. 11). Sanford's Bismarck-Mandan operations now include a 217-bed acute care hospital, eight primary care clinics, and several specialty clinics. (Doc #11, pp. 7-8; Doc. #25, p. 5). In the Bismarck-Mandan area, Sanford employs approximately 160 physicians. Its Bismarck-Mandan physician employees include 37 adult PCPs, five pediatricians, eight OB/GYN physicians, and four general surgeons. Sanford is the largest non-government employer in the Bismarck-Mandan area, as well as the largest non-government employer in the state of North Dakota. (PX 6000, p. 18; PX 8143, p. 1; Tr-3, pp. 10-11). In 2016, Sanford generated approximately [TEXT REDACTED BY THE COURT] in total revenue in North Dakota, approximately [TEXT REDACTED BY THE COURT] of which it generated through its Bismarck-Mandan operations. (DX 6004, p. 4).

3. MDC is a multispecialty **[*7]** for-profit physician group owned by approximately 53 of the approximately 60 physicians who practice there. (Doc. #11, p. 8; Doc. #27, p. 5). MDC's physicians include 23 adult PCPs, six pediatricians, eight OB/GYN physicians, and six general surgeons. Id. MDC also employs nineteen nurse practitioners and physician assistants as advanced practice providers (APPs). MDC operates only in Bismarck, where it has nine clinics in five locations and an ambulatory surgery center. (DX 6002, pp. 1-2). During fiscal 2016, MDC generated in revenue. Id. at 2.

4. Catholic Health Initiatives (CHI) operates the only other acute care hospital in the Bismarck-Mandan area—CHI St. Alexius—which CHI acquired in 2014. CHI operates in eighteen states, in which it employs approximately 4,300 physicians and advanced practice clinicians.[3] In Bismarck-Mandan, CHI employs approximately 88 physicians; its physician employees include five adult PCPs but no OB/GYN physicians, pediatricians, or general surgeons. (PX 3009, pp. 1-2, 4-5). Apart from the five PCPs, CHI St. Alexius's physician employees primarily work as hospitalists and in other hospital-based specialities. Id. at 3. CHI's five PCPs practice at a clinic **[*8]** in Mandan, id. at 2, but [TEXT REDACTED BY THE COURT]. Physicians currently practicing in Mandan will [TEXT REDACTED BY THE COURT].

---

[3] See Catholic Health Initiatives, "Overview 2016," http://www.catholichealthinitiatives.org/documents_public/Overview%20Brochure/2 016%20Overview%20Brochure.pdf; Catholic Health Initiatives, "Financial Report 2016," http://chiannualreport.net/pdf/Financial-Report.pdf .

5. For a number of years, MDC and CHI St. Alexius have had a referral relationship. MDC is the largest source of referrals for inpatient admissions at CHI St. Alexius, with MDC referrals accounting for [TEXT REDACTED BY THE COURT] of the inpatient admissions. MDC's primary care physicians frequently refer their patients to CHI St. Alexius specialists. Id. MDC and CHI together own PrimeCare, a physician-hospital entity which negotiates and contracts with health insurance plans on behalf of its members, including MDC's physicians. (DX 6034; PX 3009, p. 7; Tr-1, p. 82). MDC and CHI have professional services agreements under which, for example, MDC general surgeons provide coverage for trauma cases at CHI St. Alexius. The president of CHI St. Alexius, Kurt Schley, described the services of MDC and CHI St. Alexius as complementing each other. (Tr-1, p. 81).

6. In the Bismarck-Mandan area, approximately ten primary care physicians practice with entities other than Sanford, MDC, or CHI. Of those ten, six are employed by the University of North Dakota Center **[*9]** for Family Medicine (UND-CFM). (PX 3009, p. 2). Apart from those employed by Sanford, MDC, or CHI, only one OB/GYN physician and one pediatrician practice in the Bismarck-Mandan area. There are no general surgeons in the Bismarck-Mandan area apart from those practicing at Sanford or MDC. (Tr-1, p. 92).

II. Health Insurance Plans

7. BCBSND is the largest health insurer operating in the Bismarck-Mandan area and is also the largest health insurer operating in the state of North Dakota as a whole. BCBSND is a not-for-profit mutual insurance company. It currently insures approximately [TEXT REDACTED BY THE COURT] persons in the state—approximately [TEXT REDACTED BY THE COURT] covered through employer group plans and approximately [TEXT REDACTED BY THE COURT] covered through individual plans or Medicare supplement plans. In the Bismarck-Mandan area, approximately [TEXT REDACTED BY THE COURT] persons are covered by BCBSND commercial health insurance plans. (PX 3014, p. 2).

8. BCBSND has participation agreements with every general acute care hospital in North Dakota and with 98% of the physicians practicing in the state. Id. In the Bismarck-Mandan area, BCBSND has participation agreements with **[*10]** both general acute care hospitals (Sanford and CHI) and with 99% of the practicing physicians. Id. at 3.

9. BCBSND offers both "fully insured" and "self-insured" plans. Under self-insured plans, employers collect premiums from their employees and pay the full cost of employees' healthcare, with employers bearing the risk that healthcare costs might exceed premiums. Under self-insured plans, an employer pays BCBSND for administration of its employees' claims. By contrast, under fully-insured plans, BCBSND collects premiums from employers and pays the cost of the employees' healthcare, with BCBSND bearing the risk that healthcare costs might exceed premiums. (Doc. #62-1, p. 4).

10. In the Bismarck-Mandan area, BCBSND markets "point of service plans" and "preferred provider plans." In its point of service plans, a subscriber must choose to affiliate with either Sanford or PrimeCare. Physicians practicing with the chosen entity are considered to be "in-network" for the subscriber. Absent a referral, subscribers have higher out-of-pocket costs for care received from non-network physicians than for care received from in-network physicians. (Tr-1, p. 259). Employers receive a [TEXT REDACTED **[*11]** BY THE COURT] by choosing point of service plans because the provider networks in those plans are more narrow. Approximately [TEXT REDACTED BY THE COURT] persons in the Bismarck-Mandan area, including [TEXT REDACTED BY THE COURT], are enrolled in one of the BCBSND point of service plans. Id. at 296.

11. BCBSND recently began offering a value-based program to primary care providers. Provider participation in the program is voluntary. Under the value-based program, BCBSND examines an insured's claims and "attributes" the insured to the provider considered most likely responsible for that insured's primary care. Providers receive a "care management fee" based on the number of insureds attributed to the provider. BCBSND then analyzes certain quality-based metrics of patient care. Dependent on results of that analysis, a provider may receive a "shared savings" payment from BCBSND. Both Sanford Bismarck and MDC currently participate in the value-based program. Sanford's Fargo region also participates in the value-based program. At Sanford's request, contracts for its participation in the two regions are separate, [TEXT REDACTED BY THE COURT]. (PX 3014, pp. 9-11; Tr-1, pp. 251-55; Tr-3, pp. **[*12]** 162-64).

12. Sanford also operates a health insurance plan—Sanford Health Plan (SHP)—which sells health insurance in four states, including North Dakota. SHP covers approximately [TEXT REDACTED BY THE COURT] insureds in North Dakota. (PX 4255, p. 1). In 2015, through a competitive bid process, Sanford was awarded a contract with the North Dakota Public Employees Retirement System (NDPERS). Sanford had bid on the NDPERS contract twice before. For many years prior to 2015, BCBSND held the NDPERS contract. The current Sanford/NDPERS contract runs through 2019 and covers approximately 66,000 members in North Dakota. (DX 6000, p. 11; DX 6005, p. 2; PX 4255, p. 1). In addition to state employees, NDPERS covers employees of some political subdivisions within the state. Recently, the City of Fargo entered into a contract under which the City's employees will be covered by BCBSND rather than through NDPERS as they are currently. (Tr-1, p. 298). In North Dakota, SHP has approximately [TEXT REDACTED BY THE COURT] members, including those covered under the NDPERS contract and North Dakota's Medicaid expansion program. (JX 0009, p. 12).

13. The parties dispute whether the NDPERS contract should be **[*13]** considered as commercial insurance or as a hybrid commercial/government program. Regardless of whether the NDPERS contract is considered a commercial plan, SHP is the second-largest commercial insurer in the state. (PX 6000, p. 120).

14. SHP markets "narrow network" products in the Bismarck-Mandan area—to individuals and employers, Medicare recipients, and Sanford employees—which do not include MDC as a network provider. Plans with narrower provider networks are typically priced lower than plans which include more provider options. (JX 0026, pp. 13-14; JX 0004, pp. 220-21; JX 0007, pp. 22-23, 27-78; JX 0009, pp. 25-26). **15**. Medica, a regional health insurance company, is the third-largest commercial health insurer in the Bismarck-Mandan area, with approximately [TEXT REDACTED BY THE COURT] members in that area. (Tr-1, p. 190). Medica currently has provider network agreements with both Sanford and PrimeCare. In July 2017, Medica and Sanford signed a [TEXT REDACTED BY THE COURT] contract, [TEXT REDACTED BY THE COURT]. (JX 0083; Tr-1, pp. 190-91).

III. Proposed Transaction

16. In 2015, MDC offered itself for sale by requesting purchase proposals from two entities—CHI and Sanford. Both CHI **[*14]** and Sanford submitted proposals, and MDC's shareholders initially voted to accept CHI's proposal. In February 2016, MDC and CHI signed a Letter of Intent (LOI) for CHI's purchase of MDC. (DX 4008). But, on March 28, 2016—three days before the LOI's deadline for doing so—CHI gave written notice of its termination of the LOI and discontinued negotiations for purchase of MDC. The decision to terminate the LOI was made at CHI's corporate level, not by local administrators. (JX 0016, p. 114).[4] In terminating the LOI, CHI stated it did so because of [TEXT REDACTED BY THE COURT]. (DX 4079).

17. After CHI terminated the LOI, MDC reinitiated discussions with Sanford. On August 22, 2016, Sanford and MDC signed a term sheet for Sanford's purchase of MDC. The term sheet provides for Sanford's purchase of all MDC practice assets, MDC's real estate and other tangible assets, and retention loans for MDC physicians who join Sanford after consummation of the transaction. It also provides for Sanford's acquisition of real estate and other assets owned by Mid Dakota Medical Building Partnership, an entity which leases a building to MDC. On approximately June 19, 2017, Sanford and MDC signed a stock **[*15]** purchase agreement. The total value of the proposed Sanford/MDC transaction is approximately [TEXT REDACTED BY THE COURT]. (JX 0042, p .1).

18. The FTC, together with the North Dakota Attorney General, investigated the proposed transaction for eight months. The FTC's work included taking testimony via investigational hearing. Three days after Sanford and MDC

---

[4] JX 0016, p. 114 refers to the conventionally filed exhibit; the document also appears in the electronic docket as JX 0016, p. 30. (See Doc. #131-7).

signed the stock purchase agreement, the FTC and the State initiated this action. On that same day, the FTC initiated an administrative proceeding on the antitrust merits. (Doc. #11, p. 10).

19. Subsequent to Sanford and MDC signing their term sheet in August 2016, there were discussions between MDC and CHI St. Alexius [TEXT REDACTED BY THE COURT]. After the FTC announced its challenge to the transaction, Schley sent an email to CHI St. Alexius staff members. That email—authored at least in part at CHI's corporate headquarters—expressed CHI's support of the FTC's action and referred to the proposed transaction as harming the community by increasing physician fees, reducing quality, and eliminating choice. (DX 3010).

20. MDC physicians were angered and offended by Schley's email. [TEXT REDACTED BY THE COURT] testified that, during **[*16]** a July 5, 2017 meeting with [TEXT REDACTED BY THE COURT], [TEXT REDACTED BY THE COURT] told him that the [TEXT REDACTED BY THE COURT]. [TEXT REDACTED BY THE COURT] testified that he responded that he would testify truthfully. [TEXT REDACTED BY THE COURT] denied telling that [TEXT REDACTED BY THE COURT], and [TEXT REDACTED BY THE COURT] considers it to be [TEXT REDACTED BY THE COURT]. Handwritten notes which [TEXT REDACTED BY THE COURT] made during the July 5th meeting were received into evidence, as was an email he sent to his superiors at [TEXT REDACTED BY THE COURT] and to [TEXT REDACTED BY THE COURT] counsel later that day. The email summarizes [TEXT REDACTED BY THE COURT] perspectives on the meeting. (PX 7040; PX 7099).

21. Schley testified that CHI [TEXT REDACTED BY THE COURT]. But, MDC representatives testified that MDC would no longer have an interest in merging with CHI because of CHI's termination of the LOI and because the Schley email had deteriorated the relationship between MDC and CHI.

IV. Two Stage Healthcare Competition

22. This case is focused on patients covered by commercial health insurance, i.e., those patients not covered by government programs such as Medicare and **[*17]** Medicaid. Most patients covered by commercial health insurance obtain their coverage through their employer or through a family member's employer. Commercial health insurers—rather than patients who receive the services—are typically the direct purchasers of healthcare services. Commercial insurers and healthcare providers enter into contracts which set rates and other terms under which the insurers reimburse the providers for services provided to patients. (PX 6000, pp. 22-23; Tr-2, pp. 50-52, 60-61). In analyzing potential anticompetitive effects of a merger involving healthcare entities, it is therefore necessary to consider the merger's likely impact on commercial health insurers.

23. Healthcare providers compete for commercially insured patients in two stages. In the first stage, healthcare providers compete to be included as "in-network" providers in the plans which commercial insurers offer to their customers. Commercial insurance plans typically incentivize their insureds to use in-network providers by providing less coverage for care that insureds receive from out-of-network providers. In the second stage, healthcare providers compete with other in-network providers to attract **[*18]** patients. (Tr-2, pp. 51-52; PX 6000, pp. 22-23).

A. First-Stage Competition

24. At the first stage of competition, healthcare providers and commercial insurers negotiate reimbursement rates and non-monetary reimbursement terms. Non-monetary terms include, e.g., length of an agreement or time frames for reimbursement. Reimbursement rates are the most significant negotiated terms, but non-monetary terms are also important to the healthcare providers. (Tr-1, pp. 172-73; JX 0007, p. 35; PX 6000, p. 23).

25. The parties' experts testified about both "bargaining leverage" and "bargaining power," though their use of the terms was not completely congruent. The plaintiffs' economic expert, Dr. Seth Sacher, refers to the strength of a parties' position in a negotiation as that party's bargaining leverage. (Tr-2, p. 54). He distinguishes bargaining leverage from bargaining power, which he also refers to as bargaining skill. He considers bargaining power/skill to include factors that make one a good negotiator, such as patience, preparation, experience, and risk aversion. Id. at

55. Dr. Sacher testified that a merger of healthcare entities increases the bargaining leverage of the merged entity and **[*19]** decreases the bargaining leverage of the payer but does not impact bargaining power of either party. Id. at 57.

26. The defense expert, Dr. Robert Town, states that, though often used interchangeably in common parlance, bargaining leverage and bargaining power have distinct meanings in the "standard provider-payer bargaining model." (DX 6000, p. 23). Dr. Town refers to bargaining leverage as the degree of difficulty a commercial payer would have in marketing a network without the provider and bargaining power as determining whether providers can exploit their bargaining leverage into higher reimbursement rates. Id.

27. Experts for both sides agreed that each side's bargaining leverage determines the reimbursement and non-monetary terms to which the commercial insurers and healthcare providers agree. Each side's bargaining leverage is dependent on that party's "walk-away point," i.e., how well off each party would be if the healthcare provider were not included in the commercial insurer's network. The better off a party would be without an agreement, the better its walk-away point, and the greater its bargaining leverage. (Tr-2, p. 54; Tr-4, p. 110; PX 6000, pp. 25-27; PX 6003, p. 8). **[*20]**

28. A merged provider has increased bargaining leverage, dependent on (1) the market share of the merging providers in an area, (2) the extent to which health-plan subscribers regard the merging parties as close substitutes, and (3) the subscribers' perceptions of non-merging providers as ineffective substitutes. Experts for both sides agreed that the proposed transaction would give a post-merger Sanford increased bargaining leverage. (Tr-2, pp. 99-100, 103-04; Tr-4, p. 112; PX 6000, pp. 25-28).

29. When negotiating inclusion in a commercial insurer's network, a healthcare provider's walk-away point is determined by whether the insurer's subscribers would continue to seek care from that provider if the provider were not included in the commercial insurer's network. An insurer's walk-away point is determined by the value of the insurer's network to its insureds if the provider were not included in the insurer's network. (PX 6003, pp. 8-9; Tr-4, pp. 110-11; Tr-2, p. 53).

30. From a commercial insurer's perspective, the marketability of a health insurance plan depends largely on the insureds' ability to access a variety of quality in-network healthcare services that are geographically convenient. **[*21]** All else being equal, the more geographically convenient and high quality providers included in a health insurance plan, the more marketable that plan is to potential purchasers. (Tr-1, pp. 169-70, 230-31; PX 3014, p. 3). Currently, a network including either Sanford or MDC physicians in the four physician service lines at issue can support a marketable health insurance product in the Bismarck-Mandan area. (See JX 0009, p. 26; JX 0003, p. 12). BCBSND considers Sanford and MDC as alternatives to each other for insurance plan networks in the Bismarck-Mandan area for each of the four physician service lines at issue. (Tr-1, p. 243). Consequently, during contract negotiations, a commercial insurer can currently credibly threaten to exclude either Sanford or MDC from its Bismarck-Mandan provider network. (PX 3014, p. 7; PX 3016, p. 3).

31. One factor influencing a commercial insurer's bargaining leverage is the number of alternative healthcare providers in a geographic area. The fewer the number of alternative providers in the area, the greater the bargaining leverage of a large provider over a commercial insurer. If a large provider is no longer included in a commercial insurer's network **[*22]** in a geographic area with few alternatives, subscribers may choose to purchase insurance from another insurer. (Tr-1, pp. 174-77, 255-56; Tr-3, p. 173; PX 3014, pp. 5-6).

B. Second-Stage Competition

32. In the second stage of healthcare competition, in-network providers compete with each other to attract patients. Within a health insurance plan, there is little variance in out-of-pocket costs to patients receiving care from in-network providers, i.e., one insured receiving services from one network provider will have out-of-pocket costs equivalent to those of another insured receiving the same services from a competing network provider if both patients are insured by the same plan. Consequently, second-stage competition generally focuses on non-monetary factors which include, e.g., clinic hours, convenience of location, available services, technology, and quality. (Tr-2, pp. 58-59; Tr-3, pp. 80, 82; Tr-4, p. 141).

33. Witnesses testifying for both sides agreed that competition among providers improves the quality of services that patients receive and results in better patient outcomes. (JX 0014, p. 25; JX 0021, pp. 60-61; JX 0028, pp. 46, 187-88). More convenient access to providers is **[*23]** of benefit to patients. More convenient access helps providers attract and retain patients. One provider's improvements in convenient patient access may prompt a competing provider to also make its services more conveniently accessible to patients. (JX 0022, p. 35).

V. Physician Service Markets

34. Adult PCPs provide healthcare services to patients age 18 and over. Adult PCPs include board-certified family medicine physicians, internal medicine physicians, and general practice physicians. Adult PCPs are typically adult patients' first point of contact for healthcare, and they typically see patients in a clinic setting. Services provided by adult PCPs include physical exams, wellness visits, basic medical procedures, treatment of common illnesses and injuries, and long-term management of chronic conditions. Adult PCP services typically do not include invasive surgical procedures; rather, adult PCPs typically refer their patients to other healthcare specialists for those procedures. (Tr-1, pp. 83, 233; JX 0021, p. 8; JX 0011, p. 33).

35. Hearing testimony addressed whether physicians in other service lines could be substituted for adult PCPs in developing a marketable health insurance plan. **[*24]** Hospitalists—physicians whose training is focused on treating hospitalized patients—do not examine or treat patients in an out-patient setting. In constructing a marketable health insurance plan, hospitalists could therefore not be substituted for adult PCPs. Although some women utilize OB/GYN physicians as their primary provider, OB/GYN physicians are generally seen as complementary to adult PCPs and not as substitutes for adult PCPs. OB/GYN physicians do not see male patients. OB/GYN physicians could not be substituted for adult PCPs in constructing a marketable health insurance plan. Neither could pediatricians be substituted for adult PCPs in a marketable health insurance plan since pediatricians typically treat patients under age 18 and adult PCPs typically treat patients over age 18. (JX 0004, p. 34; Tr-1, pp. 86-87; JX 0014, p. 9).

36. While APPs provide some of the same services as adult PCPs, a health insurance plan that included APPs but excluded adult PCPs would not be marketable in the Bismarck-Mandan area. APPs are not trained to provide all of the services that adult PCPs provide. Though patients in more rural areas might accept APPs as their primary providers, Bismarck-Mandan **[*25]** residents often prefer an adult PCP over an APP for their primary care. (Tr-1, pp. 85, 181-82, 235-36).

37. Plaintiffs' expert economist, Dr. Sacher, analyzed the percentage of spending for "evaluation and management" visits in the Bismarck-Mandan area. His analysis demonstrates that approximately 74% of spending for adult PCP services, but only 26% of spending for specialists, falls into that category. Dr. Sacher also analyzed data which shows that approximately 6% of patients in the Bismarck-Mandan area received primary care services from an APP, while approximately 80% exclusively saw adult PCPs for "evaluation and management" visits. (PX 6000, pp. 32, 35-36, 49, 52-53, 214; Tr-2, pp. 69-70). Dr. Sacher's analysis confirms that neither specialist physicians nor APPs can be considered substitutes for adult PCPs in constructing a marketable health insurance plan network in the Bismarck-Mandan area.

38. Representatives of each of the three primary commercial insurers—BCBSND, SHP, and Medica—all agreed that an insurance plan's network must include adult PCPs in order to be marketable in the Bismarck-Mandan area. (PX 3014, p. 8; Tr-1, p. 179; Tr-3, pp. 185-86). Hearing testimony confirmed **[*26]** that a health insurance plan that did not include adult PCPs would not be valuable to an employer who provides health insurance coverage to its employees. (Tr-2, p. 162).

39. Currently, both Sanford and MDC offer adult PCP services. In the Bismarck-Mandan area, Sanford's adult PCPs provide 34.4% of the adult PCP services and MDC's adult PCPs provide 51.3% of the adult PCP services.

Post-merger, Sanford would provide 85.7% of the adult PCP services in the Bismarck-Mandan area, CHI would provide 7.9%, and the other providers would each provide 2% or less of the adult PCP services. (PX 6000, p. 164).

40. Pediatricians typically treat patients younger than age 18. Some family medicine physicians also treat patients in that age group, but many families prefer that their children receive medical care from a pediatrician. Families who choose family medicine physicians as their children's primary physician expect to have access to in-network pediatricians for more complex problems. (Tr-1, pp. 88-89, 234; JX 0002, pp. 19-20). Dr. Sacher's analysis demonstrates that nearly 80% of well-child visits for children age 14 and under in the Bismarck-Mandan area are performed by pediatricians. That data **[*27]** confirms a strong consumer preference for in-network access to services of pediatricians. (PX 6000, pp. 41, 216).

41. In constructing a marketable health insurance plan network, pediatric hospitalists could not be substituted for pediatricians since pediatric hospitalists do not treat patients in a clinic setting. There was no evidence that physicians in any other service line could be substituted for pediatricians in constructing a marketable health insurance plan network in the Bismarck-Mandan area. (Tr-1, pp. 89-90).

42. Representatives of each of the three primary commercial insurers—BCBSND, SHP, and Medica—all agreed that an insurance plan's network must include pediatricians in order to be marketable in the Bismarck-Mandan area. (Tr-1, pp. 179-80, 234; JX 0028, p. 50). Hearing testimony confirmed that an employer purchasing health insurance coverage for its employees in the Bismarck-Mandan area expects a plan's network to include pediatricians. (Tr-2, p. 163).

43. Currently, both Sanford and MDC offer pediatrician services in the Bismarck-Mandan area, with respective market shares of 34% and 64.6%. Post-merger, Sanford would provide 98.6% of the pediatrician services in the Bismarck-Mandan **[*28]** area. The only other provider of pediatrician services, UND-CFM, would have the remaining market share. (PX 6000, p. 170).

44. OB/GYN physicians provide services focused on prenatal care, management of labor and delivery, well-woman visits, contraception, management of menopause, diagnosis of gynecological cancers, and evaluation and treatment of various other diseases of female patients. Although adult PCPs and APPs provide some of the same services as OB/GYN physicians, OB/GYN physicians perform gynecological and obstetrical surgeries and provide complex obstetrical care that adult PCPs and APPs are not trained to perform. (JX 0014, p. 7; Tr-2, pp. 10-13; JX 0004, pp. 38-39).

45. There was no evidence that physicians in any other service line could be substituted for OB/GYN physicians in developing a marketable health insurance plan network. While general surgeons may perform some of the same procedures as OB/GYN physicians, they are not trained to provide the specialized care to female patients that OB/GYN physicians provide. Nor do laborists provide services of the same scope as OB/GYN physicians; laborists' services are only hospital based.

46. Representatives of each of the three **[*29]** primary commercial insurers—BCBSND, SHP, and Medica—all agreed that an insurance plan's network must include OB/GYN physicians in order to be marketable in the Bismarck-Mandan area. (Tr-1, pp. 180-81, 234-35; JX 0028, p. 51). Hearing testimony confirmed that an employer purchasing health insurance coverage for its employees in the Bismarck-Mandan area expects that a plan's network would include OB/GYN physicians. (Tr-2, p. 163). Female employees—and female family members of employees—who are of child-bearing age expect in-network access to OB/GYN physicians.

47. Dr. Sacher's analysis compared claims for services of adult PCPs in the Bismarck-Mandan area to those of OB/GYN physicians and demonstrated that OB/GYN physicians perform significantly more surgeries than adult PCPs and that OB/GYN physicians perform almost 98% of gynecological surgeries.

48. Currently, both Sanford and MDC offer OB/GYN physician services. Their respective market shares are 23.9% and 75.1%. The only other OB/GYN physician services available in Bismarck-Mandan are at UND-CFM. Dr. Jan Bury, one of the OB/GYN physicians currently practicing at MDC, will not practice at Sanford if the merger is consummated; she will **[*30]** either retire or practice at CHI St. Alexius. Assuming Dr. Bury would not practice at

Sanford and would not retire, a post-merger Sanford would control 84.6% of the OB/GYN physician services in the Bismarck-Mandan area. (PX 6000, pp. 78 n.4, 173; Tr-2, p. 23).

49. General surgeons typically perform surgeries involving organ systems from the sternum to the abdomen, including hernia repairs, gallbladder removals, colonoscopies, bowel resections, and appendectomies. General surgeons receive referrals from adult PCPs, pediatricians, and OB/GYN physicians for services that the referring physician is not able to provide. The services provided by general surgeons are distinct from the services provided by gastroenterologists, orthopedic surgeons, vascular surgeons, and cardiothoracic surgeons. (Tr-1, pp. 92, 236; JX 0021, p. 6; JX 0010, pp. 67-68). There is no evidence that any other physicians would be viable substitutes for general surgeons in developing a marketable health insurance plan network in the Bismarck-Mandan area.

50. Dr. Sacher's analysis of claims data shows that less than 5% of spending in the Bismarck-Mandan area for adult PCP services involves surgical procedures while 80% **[*31]** of spending for general surgeon services involves surgical procedures. His analysis also demonstrates that, although gastroenterologists and general surgeons perform some of the same procedures on organs of the digestive system, the services performed by gastroenterologists are primarily diagnostic in nature, and the services performed by general surgeons are more invasive and more diverse. (Doc. #6000, pp. 46-49, 219).

51. Representatives of each of the three primary commercial insurers—BCBSND, SHP, and Medica—all agreed that an insurance plan's network must include general surgeons in order to be marketable in the Bismarck-Mandan area. (Tr-1, pp. 180-81, 236; JX 0028, p. 51). Hearing evidence confirmed that an employer purchasing health insurance coverage for its employees in the Bismarck-Mandan area would consider in-network general surgeons an important component of a health insurance plan. (PX 3008, p. 6).

52. Of the general surgeon services in the Bismarck-Mandan area, Sanford currently provides 36.1% and MDC provides 63.7%. Post-merger, Sanford would be the only entity providing general surgeon services in the Bismarck-Mandan area. (PX 6000, p. 175).

VI. Definition of Relevant [*32] Market

53. In antitrust analysis, a relevant market identifies a set of products or services and a geographic area of competition in which to analyze the potential effects of a proposed transaction. The purpose of market definition is to identify options available to consumers.

54. The parties' principal dispute is the proper definition of a relevant market, specifically whether BCBSND's dominance should be considered in defining that market or whether it should instead be considered only as a defense.

55. For reasons discussed below,[5] this court finds it appropriate to consider BCBSND's dominance as a defense rather than as part of the market definition process.

56. The plaintiffs' proposed relevant market definition is derived from application of a hypothetical monopolist test (HMT). The HMT is an iterative process that begins by identifying a candidate market and then asking whether a hypothetical monopolist of that candidate market could profitably impose at least a "small but significant nontransitory increase in price" (SSNIP) over particular products or services. A SSNIP is typically considered to be five percent. If a hypothetical monopolist would find it profitable to **[*33]** impose at least a SSNIP in that candidate market, the conditions of the HMT are satisfied and the candidate market is considered the relevant market for purposes of antitrust analysis. If conditions of the HMT are not satisfied, the candidate market is expanded and the same analysis is applied to the expanded market. The process continues until conditions of the HMT are satisfied. (PX 6000, pp. 29-30; Tr-2, pp. 61-65; Tr-4, p. 91).

---

[5] See infra, Conclusions of Law, Section III, Definition of Relevant Market.

57. Courts often use the HMT in defining relevant markets for purposes of antitrust analysis. *United States v. H & R Block, Inc., 833 F. Supp. 2d 36, 51 (D.D.C. 2011)*. The Merger Guidelines issued by the FTC and the United States Department of Justice endorse use of the HMT. U.S. Dep't of Justice & Federal Trade Comm'n, Horizontal Merger Guidelines §§ 4.1.1-4.1.3 (2010).

58. It is appropriate to use the HMT to define the relevant market in this case.

59. In healthcare merger cases, other courts have defined relevant markets in terms of specific types of physician services. See *Saint Alphonsus Med. Cent.-Nampa Inc. v. St. Luke's Health Sys., Ltd., 778 F.3d 775, 784 (9th Cir. 2015)*; *Woman's Clinic, Inc. v. St. John's Health Sys., Inc., 252 F. Supp. 2d 857, 867 (W.D. Mo. 2002)*. That approach is appropriate for this case.

60. A relevant product market definition may be based on a distinct category of customers. *FTC v. Advocate Health Care Network, 841 F.3d 460, 468 (7th Cir. 2016)*. The plaintiffs' proposed market definition includes only commercial insurers, to the exclusion of government payers—Medicare **[*34]** and Medicaid. There is no evidence that contracting with government payers involves the two-stage competition described above. The process of providers reaching agreements with BCBSND is not so similar to that involved in contracting with government providers that government providers should be included as customers in the relevant market. This court finds it appropriate to consider a relevant market limited to a distinct category of customers—commercial health insurance plans.

61. Since the purpose of market definition is to identify options available to consumers, the definition focuses on consumers' ability to substitute products or sellers in areas outside the geographic area in order to defeat a price increase—an inquiry referred to as "demand-side" substitution. In analyzing a healthcare merger, the demand-side substitution inquiry must be done in the context of the two-stage competition model, where the immediate purchasers of physician services are commercial insurers. Because they are the immediate purchasers of physician services, it is logical to consider the process by which commercial insurers build provider networks.

62. Since commercial insurers market their products to **[*35]** health insurance plan purchasers, the insurers must consider the needs and preferences of their insureds—employers, employees, and employees' families. (PX 6000, pp. 25-26; Tr-2, pp. 60-61; Tr-4, p. 112). When the HMT is employed in analyzing a healthcare merger, the inquiry is whether a hypothetical monopolist of a candidate physician services market (or a candidate geographic market) could negotiate a SSNIP from commercial insurers. (Tr-2, pp. 61-62; PX 6000, p. 31).

63. The geographic market definition considers "where, within the area of competitive overlap, the effect of the merger on competition will be direct and immediate." *United States v. Phila. Nat'l Bank, 374 U.S. 321, 357, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*.

64. The Merger Guidelines support use of the HMT to define a geographic market, and other courts have endorsed that approach. See Horizontal Merger Guidelines § 4.2; *Advocate Health, 841 F.3d at 468-73*. Dr. Town agreed that, if one were going to define a geographic market in this situation, use of the HMT—or SSNIP—test would be an appropriate method for doing so. (Tr-4, p. 112). It is appropriate to use the HMT to define the geographic market for this case.

65. The Bismarck-Mandan area includes the cities of Bismarck and Mandan and smaller communities within the surrounding 40 to 50 mile radius. **[*36]** The population of the Bismarck-Mandan area is approximately 130,000, with approximately 93,000 of those people living within either Bismarck or Mandan. The cities closest to Bismarck and Mandan (Minot, Dickinson, and Jamestown) are each between 90 and 110 miles away. Clinics within the Bismarck-Mandan area are almost all within an eight-mile radius of central Bismarck. (PX 3002, p. 2; PX 6000, pp. 55, 235).

66. Both MDC and Sanford Bismarck consider their primary geographic market to be the area encompassing the four counties that the plaintiffs include in their proposed definition of the relevant market. (JX 0012, pp. 202-03; JX 0007, p. 31). Dr. Sacher's quantitative analysis confirms that patients residing within the Bismarck-Mandan area prefer to receive healthcare services within that area, (PX 6000, pp. 62, 64, 70, 155), and the defendants do not question that fact. A health insurance plan that did not include Bismarck-Mandan area adult PCP services, pediatrician services, OB/GYN physician services, and general surgeon services would not be marketable in the Bismarck-Mandan area. The relevant geographic market is the Bismarck-Mandan area—Burleigh, Morton, Oliver, and Sioux Counties. **[*37]**

67. The plaintiffs established that commercial health insurers would accept a hypothetical monopolist's SSNIP rather than market a health insurance plan in the Bismarck-Mandan area that did not include Bismarck-Mandan area adult PCP services, pediatrician services, OB/GYN physician services, and general surgeon services.

68. The relevant market is adult PCP services, pediatrician services, OB/GYN physician services, and general surgeon services sold to or provided to commercial insurers and their members in the Bismarck-Mandan area.

VII. Market Shares, Market Concentration, and Presumptive Competitive Harm

69. A merger that significantly increases market shares and market concentration is presumed to be unlawful under *Section 7* of the *Clayton Act*. *Phila. Nat'l Bank, 374 U.S. at 363*. Market concentration, in the antitrust context, can be measured through the Herfindahl-Hirschman Index (HHI). "The HHI is calculated by summing the squares of the individual firms' market shares, and thus gives proportionately greater weight to the larger market shares." Horizontal Merger Guidelines § 5.3 (footnote omitted). The Guidelines provide for consideration of both the post-merger HHI and the increase in HHI (defined as twice the product of **[*38]** the market shares of the merging firms) which results from the merger. Under the Guidelines, an HHI above 2500 demonstrates a highly concentrated market, and a merger resulting in an HHI increase of over 200 is presumed likely to enhance market power. Id.

70. Dr. Sacher calculated the following HHIs and changes in HHIs:

Service Line	Pre-merger HHI	Post-merger HHI	Change in HHI
Adult PCPs	3,891	7,422	3,531
Pediatricians	5,333	9,726	4,393
OB/GYN	6,211	7,363	1,152
General Surgery	5,362	9,964	4,602

(PX 6000, p. 150). The defendants did not challenge the HHI calculations. In each of the four physician service lines, existing services in the Bismarck-Mandan area are currently highly concentrated and would be even more highly concentrated if the proposed transaction were consummated.

71. The defendants presented no evidence countering Dr. Sacher's conclusion that the proposed transaction would significantly increase market concentration in each of the four physician service lines. The post-merger HHIs demonstrate a highly concentrated market in each of the four physician service lines. The change in HHI in each of the four service lines exceeds the Merger Guidelines' threshold for presumption that the proposed **[*39]** transaction is likely to enhance market power.

72. Based on the HHI evidence of market concentration, the proposed transaction is presumptively unlawful in each of the four physician service lines. See *Penn State Hershey, 838 F.3d at 346-47*; *ProMedica Health Sys., Inc. v. FTC, 749 F.3d 559, 568 (7th Cir. 2014)*.

VIII. Competitive Effects

A. Interfirm Diversion, Upward Pricing Pressure, and Willingness to Pay

73. In addition to the HHI evidence that leads to a presumption of illegality, the plaintiffs presented evidence that the proposed transaction would substantially lessen competition in each of the four physician service lines included in the relevant market. That evidence included analysis of interfirm diversion ratios, "upward pricing pressure" or UPP, and "willingness to pay" or WTP.

74. Both qualitative and quantitative analyses demonstrate that Sanford and MDC are close competitors in the Bismarck-Mandan area. Hearing testimony and exhibits show that each of the two entities views the other as its primary competitor. (See PX 4150, p. 4; Tr-2, p. 21; Tr-3, p. 81; PX 5174, p. 2; PX 5162, pp. 6-7; PX 5238, p.1). Sanford and MDC follow each other's changes in patient services, such as clinic locations, weight loss programming, and sports physicals. (JX 0011, p. 37; PX 4084, p. 23; PX 5157).Further, **[*40]** Sanford and MDC track each other's marketing and advertising and have responded to each other's advertising with advertising of their own. (PX 5168, p. 2; PX 4020, pp. 3-4; PX 5145, p. 1; PX 4099, p. 3; PX 5177, p. 3).

75. The plaintiffs' expert performed quantitative analyses which confirmed that Sanford and MDC are close competitors in the Bismarck-Mandan area in each of the four relevant physician service lines. He analyzed "interfirm diversion ratios" between the two entities—the percentage of a provider's patients that, if their provider were no longer available, would switch to the other provider. Dr. Sacher's interfirm diversion ratio analysis confirmed that Sanford patients in the Bismarck-Mandan area regard MDC as their "next best option," and vice versa. Dr. Sacher's analysis further showed that Sanford and MDC compete with each other more closely than either competes with any other entity. (PX 6000, pp. 87, 198-202; Tr-2, pp. 90-93). The defendants' expert agreed that patients view Sanford and MDC as substitutes for each other. (Tr-4, p. 113). The diversion ratios that Dr. Sacher calculated—which the defendants did not contest—are significantly higher than those in other **[*41]** cases in which a healthcare merger was enjoined. See *Saint Alphonsus, 778 F.3d 775*.

76. Dr. Sacher also considered UPP. His UPP analysis assessed the incentive of a post-merger Sanford to increase prices due to "internalization of substitution." (Tr-2, p. 94). Currently, if an MDC patient switches to Sanford because MDC is no longer in the network of the patient's health insurance plan, MDC would lose the profits it would otherwise have derived from serving that patient. Post-merger, if a patient switches from a former MDC physician to a Sanford physician, there would be no lost profits because the substitution would have been "internalized." The greater the value of the internalized substitution, the greater the incentive to increase price. (Tr-2, pp. 93-96).

77. Dr. Sacher's UPP analysis considered the interfirm diversion ratios between Sanford and MDC together with their incremental profit margins. He used financial information provided by Sanford and MDC to determine their incremental profit margins, together with his estimates of interfirm diversion ratios, and concluded that the proposed transaction is likely to result in a UPP of 6% to 22%. Those percentages equate to $16 million to $27 million annually. **[*42]** (PX 6000, p. 91; Tr-2, pp. 93-97).

78. Dr. Sacher also employed a WTP analysis, which measures the value patients place on having a particular provider in their insurer's network. He concluded that the proposed transaction would significantly increase WTP in each of the four physician service lines included in the relevant market. (Tr-2, pp. 98-102). The greater the value of the internalized substitution, the greater the incentive to increase price. Id. at 93-96. The WTP increases confirm the closeness of competition between Sanford and MDC and confirm that no other providers are close substitutes in any of the four relevant physician service lines.

B. Impacts on Second-Stage Competition

79. The plaintiffs contend that, in addition to anticompetitive price effects, the proposed transaction will negatively impact non-price competition. Sanford and MDC currently compete with each other to attract patients through changes in services. (Tr-3, pp. 80-83; PX 5206, pp. 1-2). Sanford and MDC currently compete to attract patients by investments in new technologies. (JX 0002, p. 57; Tr-2, pp. 18-19; PX 4283, pp. 2-3; JX 0048, p. 1; PX 4067, p. 2). Sanford and MDC currently compete with each other **[*43]** by making changes to improve patient access and patient convenience. (Tr-4, pp. 193-95; PX 4028, p. 3; PX 5181, p. 1; PX 5190, p. 5; JX 0010, p. 46; PX 5249, p. 2; PX 5181, p. 2).

80. There is no evidence that the quality of patient care provided by any MDC physician or by any Sanford physician would decline as a result of the proposed transaction.

81. As Krabbenhoft acknowledged, "[C]ompetition . . . . keeps you always ascribing and aspiring to provide a better product at a more competitive price[,] . . . . [and] adds another level of intensity . . . and focus to that effort." (Tr-3, p. 38). The proposed transaction would eliminate the second-stage competition that currently exists between Sanford and MDC to provide better services at a more competitive price.

IX. Efficiencies and Synergies

82. The defendants contend that the proposed transaction will generate efficiencies and synergies which will improve services to consumers in the Bismarck-Mandan area and that those efficiencies and synergies will counteract any anticompetitive effects of the proposed transaction.

83. In late 2016 and early 2017, the defendants prepared a document titled "Stronger Together: Synergy," which they describe **[*44]** as "a summary of merger-specific synergies identified through a collaborative process between Sanford and MDC clinical and administrative personnel." (Doc. #132, p. 69; Tr-3, pp. 218-219, 232; DX 2061). A group of Sanford and MDC employees participated in the collaborative process, but "Stronger Together" was written primarily by counsel. (Tr-3, p. 231).

84. The plaintiffs characterize "Stronger Together" as a "high-level discussion of theoretical gains . . . created after the parties decided to merge." (Doc. #131, p. 68). They argue that Sanford and MDC have not presented verifiable, merger-specific efficiencies.

85. Sanford witnesses described the organization's ethical philosophy of "promises made, promises kept." (Tr-3, pp. 16, 84). Following its acquisitions of healthcare facilities in Bismarck, Fargo, and other communities, Sanford made significant financial investments in those facilities, as it had said it would when the acquisitions were finalized. Sanford advances its "proven track record of achieving efficiencies." (Doc. #132, p. 8).

86. Sanford's counsel engaged Deloitte to analyze and quantify the efficiencies and synergies identified in "Stronger Together," and Deloitte **[*45]** presented its work in a document titled "Efficiency Summary." (DX 4018). In performing its analysis, Deloitte had access to competitively sensitive information of both Sanford and MDC, which the parties cannot share with each other prior to consummation of the transaction.

87. Deloitte's report identified annual efficiencies of [TEXT REDACTED BY THE COURT] over the first three years after consummation of the proposed transaction and [TEXT REDACTED BY THE COURT] in one-time expenditures needed to achieve those efficiencies, resulting in estimated net efficiency savings of [TEXT REDACTED BY THE COURT] over the first three years and [TEXT REDACTED BY THE COURT] in annual savings after the first three years. (DX 4018, pp. 4, 6). The Deloitte report groups claimed efficiencies into three categories: clinical care, ancillary services, and non-clinical areas.

88. Most of the net savings which Deloitte predicted in clinical care fall under the federal "340B" program-a program which allows qualifying providers to purchase certain prescription drugs at lower prices. Deloitte predicted annual net savings of nearly [TEXT REDACTED BY THE COURT] under the 340B program, beginning in the third year **[*46]** after the transaction is consummated. Id. at 9. Deloitte recognized a delay in the savings to allow for consolidation of Sanford and MDC facilities necessary to administer outpatient drug infusion services. In calculating net savings, Deloitte used tentative estimates of the costs of consolidation of the infusion facilities. (Tr-2, pp. 203-04; Tr-4, pp. 21-26, 32-34; DX 4018, p. 9).

89. Currently, Sanford Bismarck qualifies for the 340B program, and MDC does not. The parties dispute whether the proposed transaction could result in Sanford Bismarck losing its current 340B qualification. As a Disproportionate Share Hospital (DSH), Sanford Bismarck's 340B qualification is based on the percentage of its patients who are of low income or who are Medicare beneficiaries. (Tr-3, pp. 128-29). The plaintiffs' expert testified that a shift of MDC patients from CHI St. Alexius to Sanford Bismarck could cause Sanford Bismarck to move from

DSH status to Rural Referral Center (RRC) status under the 340B program and that Sanford's status moving from DSH to RRC status could result in an approximate [TEXT REDACTED BY THE COURT] in its 340B savings. (PX 6001, pp. 17-18; Tr-2, pp. 197-200).

90. Deloitte's **[*47]** report did not analyze how the proposed transaction might impact Sanford Bismarck's DSH status. (Tr-2, pp. 200-01; Tr-4, p. 33). At the hearing, Martha Leclerc, Sanford's vice president of corporate contracting, testified about calculations she had made to challenge the plaintiffs' allegations that a shift in MDC patients to Sanford Bismarck could impact Sanford Bismarck's DSH status. She calculated that the DSH status would be at risk only if there were a 17.4% increase in patient volume and if none of that increase were attributable to admission of low-income or Medicare patients. (Tr-3, pp. 135-36). Sanford Bismarck does not have the physical facilities to absorb an increase in patient volume that large.

91. Leclerc performed her calculations between the date of her deposition and the date of her hearing testimony, and Sanford provided no documentation supporting the calculations. On rebuttal, a plaintiffs' expert testified that Leclerc's calculations had not described the DSH calculation formula correctly. (Tr-4, pp. 234-37; see also PDX 005-001). In response, the defendants cite the DSH formula that is available from the Centers for Medicare and Medicaid Services (CMS) website. **[*48]** (Doc. #132, p. 72). The formula set out on the CMS website appears consistent with testimony of the plaintiffs' expert witness. Given the lack of confirming documentation and the disputed application of the CMS formula, Sanford's calculations regarding potential for loss of its DSH status are not persuasive.

92. The expert whom plaintiffs retained to analyze the defendants' claimed efficiencies, Dr. Thomas Respess, testified about a change in a federal rule governing 340B reimbursements. Respess testified that the change, which became effective November 1, 2017, reduced reimbursements to 340B providers. (PX 6001, pp. 19-20; Tr-2, p. 202). Deloitte's analysis did not consider the rule change. The Deloitte consultant testified she had not done so because the rule change is not related to pricing of the purchasing of oncology drugs. (Tr-4, p. 34). The rule change affects the reimbursements for 340B drugs that hospitals receive, not the purchase price of those drugs. The Deloitte Report analyzed only the savings from drug purchasing, but did not analyze reduced reimbursements. Id. at 32-34. Hearing evidence does not establish whether the rule change would impact net 340B savings to a post-merger **[*49]** Sanford.

93. The defendants assert the recent 340B rule change will facilitate pass-through of 340B discounts to Medicare and to Medicare beneficiaries. Medicare and its beneficiaries are not within the relevant market.

94. Because any 340B savings resulting from the proposed transaction would not arise in any of the physician service lines at issue, because the impact of the recent rule modification is not well defined, because Deloitte did not consider possible impact of the merger on Sanford's 340B status, and because they have not sufficiently shown that any 340B savings would be passed through to healthcare consumers, the defendants have not met their burden as to the claimed 340B efficiencies.

95. Deloitte's projected net savings also included approximately [TEXT REDACTED BY THE COURT] in laboratory costs. But, that projection did not consider that MDC recently entered into a contract for reference laboratory services with a third party or that MDC had estimated approximately [TEXT REDACTED BY THE COURT] in annual savings as a result of that contract. (PX 5263, p. 1; DX 4018, p. 18; PX 5276, p. 2; Tr-4, pp. 28-29, 36). Deloitte's consultant testified at the hearing that, after learning **[*50]** of that contract, Deloitte "prepared an analysis that overlays those new prices on top of what we had calculated, and the figures would be reduced by about [TEXT REDACTED BY THE COURT]," (Tr-4, p. 37), but did not explain why savings would be less than MDC had estimated.

96. In the non-clinical areas, Deloitte projected the proposed transaction would lead to costs savings related to physician recruiting, revenue cycle services, information technology, electronic medical records, and infrastructure. But, the magnitude of those projections is small in relation to the defendants' estimated 340B savings, and implementation of any savings in those non-clinical areas would require significant expenditures. Deloitte's projections in these areas are based only on defendants' estimates-Deloitte did not independently verify those estimates. (JX 0007, p. 2; JX 0069, p. 2; JX 0070, p. 2; JX 0013, pp. 73-74; DX 4018, pp. 5, 22-34).

97. The defendants have not demonstrated monetary efficiencies in non-clinical areas sufficient to overcome the anticompetitive effects of the proposed transaction.

98. Even if all of the claimed monetary efficiencies were considered merger-specific and verifiable, they **[*51]** would be insufficient to offset the price increase predicted by Dr. Sacher's UPP analysis. (PX 6000, pp. 96-98; Tr-2, pp. 112-114).

99. In addition to the 340B program, Sanford and MDC asserted a number of quality efficiencies. Their asserted quality efficiencies include (1) Imagenetics, a program integrating genetic medicine into primary care; (2) embedding behavioral health therapists into primary care clinics; (3) cancer care trials and cancer care outreach to communities outside the Bismarck-Mandan area; (4) a combined and customized electronic medical record (EMR) system; and (5) recruitment of subspecialists to the Bismarck-Mandan area. The plaintiffs contend that some of the claimed efficiencies are already available at both Sanford and MDC and that others could be attained independent of the proposed transaction. (PX 6002, pp. 4-5; Tr-2, pp. 252-64).

100. The plaintiffs do not contest that the claimed quality efficiencies, if implemented, would in fact result in increased quality of care for patients in the Bismarck-Mandan area.

101. This court finds the claimed quality efficiency in the Imagenetics program to be merger-specific, but the defendants have not demonstrated that the **[*52]** other claimed quality efficiencies are merger specific.

102. The claimed quality efficiencies must be considered in light of the Merger Guidelines and case law interpreting those guidelines. Under the guidelines, the lesser the adverse competitive effects, the greater the weight ascribed to efficiencies. "Efficiencies almost never justify a merger to monopoly or near-monopoly." Horizontal Merger Guidelines § 10; see also *Saint Alphonsus, 778 F.3d at 790*; *FTC v. ProMedica Health Sys., Inc., No. 3:11-cv-47, 2011 U.S. Dist. LEXIS 33434, 2011 WL 1219281, at *57 (N.D. Ohio Mar. 29, 2011)*. Given that the proposed transaction would result in near-monopoly, the claimed quality efficiencies are insufficient to overcome the presumption of illegality.

X. BCBSND as a Powerful Buyer

103. There is no question that BCBSND is a powerful buyer in the Bismarck-Mandan area and throughout the state. Various documents in the record show its statewide share of the commercial health insurance market is between 55% and 65%.[6] (PX 4318, p. 9; PX 4308, p. 4; DX 6000, p. 17).

104. Over the last several years, BCBSND's market share has declined. In the Bismarck-Mandan area, BCBSND currently has approximately [TEXT REDACTED BY THE COURT] insureds, down from approximately in [TEXT REDACTED BY THE COURT] 2014. Statewide, since 2014, BCBSND has experienced a [TEXT REDACTED BY THE **[*53]** COURT] decline in numbers of insureds under commercial health plans. (DX 6000, p. 17). In the Bismarck-Mandan area, since 2014, BCBSND has experienced a [TEXT REDACTED BY THE COURT] decline in numbers of insured under its commercial health plans. (Tr-1, p. 257). A significant portion of the decline is attributable to BCBSND having lost the NDPERS contract to SHP, but BCBSND recently lost other large employer groups to other commercial insurers. (DX 6000, pp. 17-18; Tr-1, p. 258). The defendants acknowledge that BCBSND's market share has declined as a result of SHP's entry into the commercial health insurance market. (PX 4308, p. 4; DX 6000, pp. 17-18).

---

[6] Inconsistencies in the evidence of BCBSND's commercial insurance market share is due, at least in part, to differing views of whether NDPERS should be considered commercial insurance.

105. If a provider serves patients in more than one geographic region in North Dakota, BCBSND enters into a [TEXT REDACTED BY THE COURT] participation agreement with that provider. BCBSND and Sanford have a [TEXT REDACTED BY THE COURT] participation agreement. (PX 3014, p. 5) Sanford prefers to enter into payer agreements that cover all facilities within its entire system. (Tr-3, pp. 145-46).

106. Generally, BCBSND uses a statewide uniform base fee schedule, though its reimbursement rates are higher for some of the more rural facilities **[*54]** with which it contracts. BCBSND has deviated from the statewide fee schedule in response to "provider-specific" requests and providers' demonstrated need. [TEXT REDACTED BY THE COURT] (Tr-1, p. 287).

107. Chelsey Matter, BCBSND's Director of Provider Partnerships and Analytics, testified about the process BCBSND uses for contracting with network providers. BCBSND endeavors to set reimbursement rates adequate to "make sure the providers can continue to offer services in North Dakota." Id. at 255, 280. [TEXT REDACTED BY THE COURT] Id. at 262-65, 256, 281, 292.

108. In its interactions with providers, BCBSND [TEXT REDACTED BY THE COURT] Id. at 291. But, a provider offering "a whole lot of services to a lot of [BCBSND] members" or a provider offering the only "super specialist that many [BCBSND] members need" has greater leverage in establishment of the fee schedule. Id. at 255-56.

109. With Sanford as the largest provider in the state, BCBSND consults with Sanford "on a very regular basis." (Tr-3, p. 178). Sanford is [TEXT REDACTED BY THE COURT]. (See Tr-1, p. 256).

110. Though the defendants contend that BCBSND does not truly negotiate with providers, in various documents in the record, **[*55]** defendants have characterized their interactions with BCBSND as "negotiation." Those documents demonstrate several recent instances in which BCBSND [TEXT REDACTED BY THE COURT]. (See PX 4081, pp. 1, 3, 5; PX 4075, pp. 1-2; PX 4156, p. 1; PX 4080, p. 1). When BCBSND moved to a different methodology for inpatient reimbursement, there was [TEXT REDACTED BY THE COURT] which resulted in BCBSND making adjustments to create a "buffer to transition into the new methodology." (Tr-1, pp. 256-57). In May 2016—after CHI terminated the LOI and before Sanford and MDC signed the term sheet—Leclerc sent an email discussing Sanford's acquisition of Great Plains Clinic in Dickinson, North Dakota, which had been a part of PrimeCare. The email referenced the clinic's transition from PrimeCare and stated, [TEXT REDACTED BY THE COURT] (PX 4227, p. 1).

111. When contracting for its provider networks in the Bismarck-Mandan area, BCBSND does not consider CHI a viable alternative to either Sanford or MDC since CHI does not offer services sufficient to meet the needs of BCBSND's insureds in that area. BCBSND could not construct a marketable health plan in the Bismarck-Mandan area if it did not include a post-merger **[*56]** Sanford. (Tr-1, pp. 244, 246-47).

112. BCBSND is concerned about the proposed transaction because a post-merger Sanford would control a large portion of the four physician service lines in the Bismarck-Mandan area so that Sanford "could really present [BCBSND] with an ultimatum" if it chose to. Id. at 261. Matter testified that, if Sanford were to request a rate increase and threaten to terminate its network agreement with BCBSND if the increase were not granted, BCBSND would have to choose between agreeing to the increase or no longer offering health plans in the Bismarck-Mandan area.

113. BCBSND expects an immediate increase in Sanford's bargaining leverage if the proposed transaction is consummated, including leverage to seek favorable terms in its value plan agreement with BCBSND. Id. at 260-62, 274.

114. If BCBSND were to agree to a rate increase in response to a post-merger demand from Sanford, that would result in increased premiums for BCBSND customers. An increase in Sanford's reimbursement rates would also [TEXT REDACTED BY THE COURT]. Self-insured employer groups would see an immediate increase in their costs if BCBSND acceded to a post-merger Sanford demand for a reimbursement **[*57]** rate increase. Id. at 261-63, 299.

115. Additionally, BCBSND is concerned that, if Sanford were to terminate its network agreement with BCBSND, patients in the Bismarck-Mandan area would have an option of coverage under SHP, and if BCBSND increased reimbursements to Sanford in response to an ultimatum, SHP could offer lower premiums than BCBSND. Id. at 263.

116. Leclerc testified that Sanford would not present an ultimatum to BCBSND because Sanford cannot afford to terminate its statewide agreement with BCBSND, which accounts for a large percentage of Sanford's revenue in North Dakota and is the largest payer to the Sanford system as a whole. As Leclerc described, BCBSND is important to Sanford and Sanford is important to BCBSND. (Tr-3, pp. 32, 183). Krabbenhoft testified that Sanford would not, and credibly could not, present an ultimatum that threatened Sanford's termination of its provider agreement with BCBSND. Id. at 160-61.

117. Sanford has not indicated it would demand higher reimbursements from BCBSND if the proposed transaction is consummated. (Tr-1, p. 273).

118. In forming his opinions about the proposed transaction, Dr. Sacher considered BCBSND's share of the commercial health **[*58]** insurance market, but that did not "assuage[] [his] competitive concerns." (Tr-2, p. 103). In Dr. Sacher's opinion, because there would be no good alternatives to a post-merger Sanford in the Bismarck-Mandan area, BCBSND would have no choice but to negotiate higher prices and "other unfavorable terms" with Sanford. Id. at 104.

119. The defendants' economic expert, Dr. Town, opines that, in North Dakota, there is no relationship between provider concentration and BCBSND reimbursement rates. Dr. Town analyzed statewide BCBSND claims data and found "no statistically significant positive relationship between market concentration and BCBS-ND's rates." (DX 6000, p. 32). Dr. Town also opines that there is no relationship between bargaining leverage—or WTP—and BCBSND reimbursement rates in North Dakota. Id.

120. Dr. Town's analysis focused on data from two other areas of North Dakota—Minot and Grand Forks—where there is one dominant—near monopoly—healthcare provider in each area. Dr. Town considered the Minot and Grand Forks areas as "natural experiment[s]," opining that, [TEXT REDACTED BY THE COURT], there is no reason to believe that the proposed transaction would result in BCBSND increasing **[*59]** reimbursement rates to a post-merger Sanford in the Bismarck-Mandan area. (Tr-4, pp. 92-98).

121. Altru has a near monopoly on healthcare services in the Grand Forks area. [TEXT REDACTED BY THE COURT]

122. BCBSND's response [TEXT REDACTED BY THE COURT] shows that a near-monopoly provider has leverage in negotiations with BCBSND.

XI. Proposed Transaction's Impact on Medica and Self-Insured Employer

123. Michael Lenz, who until August 2017 was Medica's vice president of strategic initiatives, testified that the proposed transaction "would substantially increase Sanford's leverage" in negotiations with Medica, likely resulting in Sanford's post-merger ability to demand more favorable reimbursement rates and reimbursement terms. (Tr-1, p. 223). Medica has a system-wide contract with Sanford, covering all of Sanford's providers in each of the states in which Medica offers commercial health insurance plans. Id. at 174. Lenz testified that increased reimbursement rates paid to a post-merger Sanford would result in higher costs to Medica and in consequent higher costs to its employer groups. Id. at 185.

124. Because Medica cannot construct a marketable provider network in the Bismarck-Mandan area **[*60]** without the current Sanford system, Medica could not now credibly threaten to walk away from negotiations with Sanford. See id. at 183-84.

125. If the proposed transaction is consummated, Medica would not be able to offer a marketable health insurance plan in the Bismarck-Mandan area that did not include a post-merger Sanford. See id. at 178. Lenz testified that, because of its additional leverage in the Bismarck-Mandan area, a post-merger Sanford would be able to secure higher reimbursement rates from Medica "for the broader agreement." Id. at 184.

126. Lenz testified about impacts of healthcare facility mergers he had observed in other markets and that he had seen changes in referral patterns resulting from those mergers. In his experience with healthcare facility mergers in other locations, Lenz has never seen any cost savings passed along to consumers through lower reimbursement rates. Id. at 187.

127. The defendants contend that the proposed transaction would cause no adverse effects to Medica during the [TEXT REDACTED BY THE COURT] of the Sanford/Medica agreement and that impacts on Medica after [TEXT REDACTED BY THE COURT] will be negligible and offset by efficiencies and by CHI's **[*61]** expansion in the Bismarck-Mandan area.

128. Lenz testified about the [TEXT REDACTED BY THE COURT] rate agreement between Sanford and Medica, which sets parameters of reimbursement rates. He testified that the agreement [TEXT REDACTED BY THE COURT]. Id. at 190.

129. Lenz testified that the agreement [TEXT REDACTED BY THE COURT]. Id. One of the plaintiffs' experts, Dr. Ashish Jha, testified that physician concentration leads to more referrals for invasive and costlier procedures. (Tr-4, p. 238).

130. There is no evidence that, post-merger, any MDC physician or any Sanford physician would make decisions about patient referrals based on a patient's insurance coverage.

131. A Medica document captioned [TEXT REDACTED BY THE COURT] The defendants contend that document demonstrates that Medica's costs would decrease as a result of the proposed transaction. (Doc. #132, p. 42). Because that document did not account for post-merger practice pattern changes or differences in the charge master, and given the small number of Medica's insureds in the Bismarck-Mandan area and limited time period analyzed, the document is not useful in analyzing impacts of the proposed transaction. (See Tr-1, pp. 202, **[*62]** 220).

132. Leclerc, who was involved in negotiating the [TEXT REDACTED BY THE COURT] rate agreement, testified that the agreement's [TEXT REDACTED BY THE COURT]

133. The defendants contend that, after the agreement ends in [TEXT REDACTED BY THE COURT], Medica's relatively small share of the Bismarck-Mandan commercial health insurance market would preclude Sanford from obtaining higher reimbursement rates from Medica. Leclerc testified that Sanford [TEXT REDACTED BY THE COURT] Id. at 149-51.

134. Dr. Town's analysis estimated an [TEXT REDACTED BY THE COURT] increase in Medica's spending in the Bismarck-Mandan area after the current agreement ends. (DX 6001, pp. 63-64).

135. The Sanford/Medica [TEXT REDACTED BY THE COURT] agreement does not protect against post-merger rate increases after [TEXT REDACTED BY THE COURT].

136. The plaintiffs also presented testimony of Kari Reichert, vice president of people services at National Information Solutions Cooperative (NISC). NISC is a member-owned technology provider with approximately 1200 employees, 475 of whom are located in Mandan. NISC provides a self-insured health plan to its employees, contracted through United Healthcare. United Healthcare, **[*63]** in turn, contracts with Medica, so NISC employees have access to providers in Medica's provider network.

137. [TEXT REDACTED BY THE COURT] (See Tr-2, pp. 166-67).

138. NISC is concerned that [TEXT REDACTED BY THE COURT]. Further, NISC is concerned that [TEXT REDACTED BY THE COURT]. Id. at 158-59, 169-70, 172, 182-84.

XII. New Entry or Expansion

139. Entry or expansion of competitors into a market may be sufficient to counteract anticompetitive effects of a proposed merger. Horizontal Merger Guidelines § 9; *FTC v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 54-58 (D.D.C. 1998)*. But, to ameliorate the lost competition, entry or expansion must be timely, likely, and sufficient.

140. The defendants contend that, if the merger is consummated, there would nonetheless be strong healthcare competition in the Bismarck-Mandan area. They assert that CHI St. Alexius has the "incentive, ability, and intent" to compete with a postmerger Sanford in each of the four physician service lines at issue. (Doc. #83-2, p. 38). Further, the defendants assert that CHI, as the fourth-largest healthcare system nationwide, will be a "much stronger competitor" to Sanford than MDC is currently. Id. The plaintiffs respond that CHI St. Alexius's expansion would not be timely, likely, or **[*64]** sufficient to counter competitive harm.

141. At the hearing, Krabbenhoft testified that, in a community the size of Bismarck-Mandan, a healthcare monopoly would be "a bad thing." (Tr-3, p. 38). He acknowledged that, if CHI St. Alexius did not have physicians in each of the four service lines at issue, there would be no real viable competition for a post-merger Sanford in the Bismarck-Mandan area. Id. at 42-43. Krabbenhoft opined that the CHI organization would be capable of recruiting and realigning physicians to timely increase its presence in the Bismarck-Mandan area. Id. at 30.

142. Data presented at the hearing described recent physician recruitment of Sanford, MDC, and CHI in the Bismarck-Mandan area. Challenges to physician recruitment include the area's geographic location, its perceived adverse weather conditions, and lack of OB/GYN and pediatrics residency programs in North Dakota. (JX 0022, pp. 37-38). It is more difficult to recruit physicians who do not have prior connections to the area. (Tr-1, pp. 106-07). Because of call coverage requirements for OB/GYN physicians, pediatricians, and general surgeons, it is difficult to recruit to groups of fewer than four physicians in **[*65]** each of those specialties. (JX 0028, pp. 54-55; Tr-2, pp. 24-25).

143. At the hearing, Schley estimated that it would take [TEXT REDACTED BY THE COURT] for CHI St. Alexius to recruit enough adult PCPs to replace those who would be lost to a Sanford/MDC merger and that it might take up to [TEXT REDACTED BY THE COURT] to establish the recruited adult PCPs' reputations, to open sufficient clinic space, and to establish a patient base large enough to replace the adult PCP services currently provided at CHI St. Alexius by MDC physicians. (Tr-1, p. 108). As to pediatrician services, Schley estimated a similar timeframe to recruit and establish a practice sufficient to compete with a post-merger Sanford. Id. at 114-16, 148. Further, a general surgery practice is dependent on a referral base of adult PCPs, making it difficult for an independent general surgeon to establish a practice in the Bismarck-Mandan area. (JX 0011, p. 39; JX 0027, pp. 23, 49).

144. As to OB/GYN services, Schley testified about Dr. Bury possibly joining CHI St. Alexius, though that is not a definite plan. CHI St. Alexius has provided a stipend to Dr. Bury's daughter for completion of her medical education, and Dr. Bury **[*66]** testified that she would love to have her daughter join her in practice at CHI St. Alexius. Both Schley and Dr. Bury testified about the difficulty of recruiting an OB/GYN physician to a group of fewer that four physicians because of call coverage concerns, and both estimated it would take at [TEXT REDACTED BY THE COURT] years to recruit enough OB/GYN physicians and another [TEXT REDACTED BY THE COURT] to build a patient base sufficient to compete with a post-merger Sanford. (Tr-1, pp. 116-118; Tr-2, pp. 23-25, 35-36, 40; JX 0014, pp. 31-33, 39).

145. Schley testified that [TEXT REDACTED BY THE COURT]. (Tr-1, pp. 109-110; JX 0027, pp. 26, 42).

146. Other than adult PCPs, CHI St. Alexius would need to establish new physician service groups to compete with a post-merger Sanford in the physician service lines at issue, making it difficult to recruit physicians for those services. (JX 0027, pp. 41-42; JX 0030, pp. 32-33).

147. Because of the differences in their training and practice, the hospitalists currently employed by CHI St. Alexius [TEXT REDACTED BY THE COURT]. (See Tr-1, pp. 109-11). Further, locum tenens physicians are not good substitutes for employed physicians because of their **[*67]** cost and because patients prefer employed physicians with a local reputation. See id. at 120-21.

148. [TEXT REDACTED BY THE COURT]

149. Post-merger, physicians currently practicing at MDC would likely refer more patients to Sanford rather than to CHI St. Alexius. The anticipated decline in referrals to CHI St. Alexius would indeed incentivize and motivate CHI to add physicians in the four service areas. But, hearing evidence did not establish that the Bismarck-Mandan area's population is sufficient to support a significant increase in total numbers of physicians in each of the four service lines.

150. Hearing evidence does not demonstrate that CHI would be able to recruit enough physicians to replace the MDC physicians currently referring to CHI St. Alexius. CHI's potential expansion therefore cannot be considered timely, likely, or sufficient to counter the anticompetitive effects of the proposed transaction.

151. To establish a new independent practice in any of the four physician service lines in the Bismarck-Mandan area would require large start-up expenditures. And, significant time would be required to build a patient base large enough to be competitive with a post-merger Sanford. **[*68]** No evidence suggests that any new provider has the ability or resources to enter the Bismarck-Mandan area market in any of the four relevant physician service lines. (PX 3018, p. 7; PX 3006, pp. 9-10).

152. The defendants have not established that any new entry or expansion would be timely, likely, or sufficient to counteract the near-monopoly that would result from the proposed transaction.

XIII. MDC's Viability

153. MDC asserts that sale of its practice, so as to align itself with an integrated healthcare system, is necessary to maintain financial viability. Although its recent financial performance has been strong, MDC's strategic review has projected declining revenues, specifically in ancillary services. Ancillary services are those not provided by physicians, including things such as MDC's ambulatory surgery center and laboratory. MDC's ancillary service revenue dropped 7% from 2014 to 2016, and MDC projects another 20% decline by 2020. (JX 0011, p. 18; Tr-4, pp. 164, 166-67). MDC has experienced a decrease in physician productivity, which its president attributes to some more experienced physicians nearing retirement and newer physicians preferring fewer work hours. But, MDC's **[*69]** president testified that there are "plenty of patients" for MDC physicians who desire to increase their productivity. (Tr-4, pp. 165-66, 200-02).

154. In connection with its attempts to sell, MDC engaged two consultants—HDH Advisors and Wipfli. Wipfli provided a valuation opinion of MDC's facilities, and HDH Advisors assessed the value of MDC's goodwill. Sanford and MDC used the HDH and Wipfli opinions in determining the financial terms of the proposed transaction. HDH and Wipfli both projected a positive future for MDC with an increasing demand for its services and an outlook for better reimbursements. (PX 5244, p. 17; JX 0045, p. 28; Tr-3, pp. 55-60; Tr-4, pp. 168-69, 189-90).

155. MDC's revenues increased during each of the last three years, and its 2016 financial performance showed increases in billed and collected revenues over the prior year. MDC physicians have historically earned more than the national average; in 2016, their compensation was about [TEXT REDACTED BY THE COURT]. (JX 0012, p. 16; PX 4192, p. 29; Tr-4, p. 164).

156. Various quality metrics show that MDC provides high quality patient care. (Tr-4, pp. 243-45; PX 6002, pp. 35-42; Tr-1, pp. 301-02).

157. MDC has strategies **[*70]** for moving forward if the proposed transaction is not consummated. (PX 5167).

158. The record includes statements of MDC shareholders demonstrating a desire to sell motivated by current high share value rather than because of concerns over MDC's viability. (PX 5224, p. 1; PX 5284, p. 1; JX 0029, pp. 33-35; JX 0012, p. 47).

159. Dr. Seifert testified that MDC has a limited physician recruitment budget and that MDC anticipates difficulty recruiting physicians to replace those nearing retirement. (Tr-4, pp. 165-66). The plaintiffs countered with evidence that MDC hired eighteen physicians over 5 1/2 years to replace seventeen physicians who left MDC, recruited three physicians in 2017, recently signed a general surgeon to an employment contract, and hired three physicians away from Sanford in the last four years. (JX 0024, pp. 48-49; JX 0010 pp. 30-31, 33-34, 37). The Deloitte consultant assumed, based on MDC's history, that it would recruit seven physicians per year absent the proposed transaction. (Tr-4, p. 38). The defendants did not establish that MDC's viability is endangered by physician recruitment difficulties.

160. Courts have, in rare cases, recognized a "weakened competitor" defense **[*71]** to a merger challenge, but the defendants have not made sufficient showing to consider it here. See *ProMedica, 749 F.3d at 572*; *FTC v. Nat'l Tea Co., 603 F.2d 694, 700 (8th Cir. 1979)*. MDC's current financial status is strong. There is no evidence that it would "imminently depart" from the market if the merger were not consummated, as was apparent in the National Tea case on which the defendants rely. See *603 F.2d at 701*.

161. Evidence questioning MDC's long term viability is not sufficient to counteract anticompetitive effects of the proposed transaction.

XIV. Defendants' Acknowledgment of Antitrust Risk and Alleged Admission of Weakness

162. Various MDC personnel expressed concern that the proposed transaction would be bad for the community because of elimination of competition and patient choice. Physicians formerly associated with Sanford and MDC made similar statements. Statements of [TEXT REDACTED BY THE COURT] questioned whether a sale to Sanford would violate antitrust laws, more so than a sale to CHI. (PX 5180; PX 5179; PX 5183, p. 2; PX 5205; PX 5221, p. 2; JX 0029, p. 41; JX 0014, p. 30; PX 5119, p. 6; JX 0030, p. 27; PX 3019, pp. 1-2; PX 3017, pp. 2-3). In its proposed term sheet to Sanford, MDC [TEXT REDACTED BY THE COURT]. (DX 2013, p. 5).

163. The statements by MDC **[*72]** personnel referenced above show that some MDC personnel recognized that the proposed transaction would have anticompetitive effects. Further, the defendants entered into the proposed transaction knowing that it raised significant concerns under antitrust laws. See *ProMedica, 2011 U.S. Dist. LEXIS 33434, 2011 WL 1219281, at *50* (finding that defendants entered into that transaction "with full knowledge of the applicable antitrust laws").

164. The plaintiffs contend that [TEXT REDACTED BY THE COURT] July 5, 2017 statements to [TEXT REDACTED BY THE COURT]—[TEXT REDACTED BY THE COURT]—constitutes witness tampering that should be considered an admission of weakness of defendants' case. [TEXT REDACTED BY THE COURT] denies any attempt to influence [TEXT REDACTED BY THE COURT] testimony, and the defendants suggest it may be that both [TEXT REDACTED BY THE COURT] (Doc. #132, p. 20).

165. The court finds [TEXT REDACTED BY THE COURT] description of the conversation more credible than [TEXT REDACTED BY THE COURT]. [TEXT REDACTED BY THE COURT] account of the conversation is confirmed by his contemporaneously written notes and by the email that he sent to counsel and his superiors later the same day. And, the statements which [TEXT REDACTED BY THE COURT] attributes **[*73]** to [TEXT REDACTED BY THE COURT] are consistent with what others described about [TEXT REDACTED BY THE COURT] communication style. (PX 5315, p. 1; PX 5318, p. 4; PX 5219, p. 2; PX 5307, p. 1; Tr-2, pp. 31-34).

CONCLUSIONS OF LAW

I. Jurisdiction and Venue

1. The FTC is authorized by law to bring this action. *15 U.S.C. § 18*. The Attorney General of North Dakota has authority to bring this action on behalf of the State of North Dakota. *15 U.S.C. § 26*; *N.D. Cent. Code §§ 32-06-02*, *51-08.1-07 to -08*, and *51-15-07*. This court has subject matter jurisdiction under *15 U.S.C. §§ 53(b)* and *26*; *28 U.S.C. §§ 1331*, *1337*, and *1345*.

2. The defendants are engaged in—and at all relevant times have been engaged in—activities in or affecting commerce as that term is defined by *15 U.S.C. §§ 12* and *44*. Defendants transact business in this district and are subject to personal jurisdiction in this district. Venue is proper. *28 U.S.C. § 1391(b)-(c)*; *15 U.S.C. § 53(b)*. The parties having consented to jurisdiction of a magistrate judge, this court has jurisdiction to issue a preliminary injunction under *15 U.S.C. § 53(b)*.

II. Preliminary Injunction Standard

3. The plaintiffs allege violation of the Clayton Act, *Section 7*, which provides:

> No person engaged in commerce or in any activity affecting commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no person subject **[*74]** to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of another person engaged also in commerce or in any activity affecting commerce, where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly.

15 U.S.C. § 18 (emphasis added). Determination of a *Section 7* violation is an adjudicatory function vested in the FTC. But, *Section 13(b)* of the *FTC Act* authorizes a district court to grant a preliminary injunction if, "weighing the equities and considering the Commission's likelihood of ultimate success," an injunction would be in the public interest. *15 U.S.C. § 53(b)*. The only question addressed to this court is whether the status quo is to be preserved until the FTC completes its adjudicatory function. *FTC v. Food Town Stores, Inc., 539 F.2d 1339, 1342 (4th Cir. 1976)*. It is not the function of this court to determine whether the antitrust laws are "about to be violated." FTC v. Whole Foods Mkt., Inc. *548 F.3d 1028, 1035, 383 U.S. App. D.C. 341 (D.C. Cir. 2008)* (quoting *Food Town Stores, 539 F.2d at 1342*). That determination is left to the FTC. Id.

4. *Section 13(b)* sets forth two factors to determine whether a preliminary injunction should be issued: (1) the likelihood that the FTC will ultimately succeed on the merits and (2) a balance of the equities. **[*75]** *ProMedica, 2011 U.S. Dist. LEXIS 33434, 2011 WL 1219281, at *53*.

5. In considering the likelihood that the FTC will succeed on the merits, a court weighs the probability that the FTC will prove that the effect of the proposed transaction may be to substantially lessen competition. The Eighth Circuit has stated that, to prevail on a motion for a preliminary injunction, the FTC "must raise questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation, and determination by the FTC in the first instance and ultimately by the Court of Appeals." *FTC v. Tenet Health Care Corp., 186 F.3d 1045, 1051 (8th Cir. 1999)*. A showing of "fair or tenable chance of success on the merits" is not sufficient. Id.

6. *Section 7*'s inclusion of the phrase "may be substantially to lessen competition" demonstrates a legislative concern with probabilities rather than certainties. *Brown Shoe Co. v. United States, 370 U.S. 294, 323, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. To establish a *Section 7* violation, a plaintiff need not demonstrate actual anticompetitive practices, though it must show more than "ephemeral possibilities." *ProMedica, 2011 U.S. Dist. LEXIS 33434, 2011 WL 1219281, at *52* (quoting *United States v. Marine Bancorporation, Inc., 418 U.S. 602, 623, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974))*. It is the FTC's burden to show that loss of competition is a "sufficiently probable and imminent result of a merger or acquisition," but the FTC is not required to show that the challenged transaction will lessen competition. **[*76]** *FTC v. CCC Holdings, Inc., 605 F. Supp. 2d 26, 35 (D.D.C. 2009)* (internal quotation marks and citation omitted). *Section 7* is intended to prevent anticompetitive mergers before they create anticompetitive harm. *Phila. Nat'l Bank, 374 U.S. at 362*.

7. Courts commonly employ a burden-shifting analysis in evaluating the FTC's likelihood of success on the merits. The first step is to determine whether the plaintiffs have made a prima facie showing that the transaction would lead to undue concentration in the relevant product and geographic markets. If the plaintiffs make that prima facie showing, the transaction is presumed illegal and the burden then shifts to the defendants to show that the prima facie case "inaccurately predicts the relevant transaction's probable effect on future competition." *United States v. Baker Hughes Inc., 908 F.2d 981, 991, 285 U.S. App. D.C. 222 (D.C. Cir. 1990)*. If the defendants sufficiently rebut the presumption of illegality, the burden of producing additional evidence of anticompetitive effects shifts back to the FTC. *H & R Block, 833 F. Supp. 2d at 72*. The FTC has the burden of persuasion at all times.

8. In weighing the equities under *Section 13(b)*, the court considers whether a preliminary injunction is in the public interest. "The principal public equity weighing in favor of issuance of preliminary injunctive relief is the public interest in effective enforcement of the antitrust laws." *FTC v. H.J. Heinz Co., 246 F.3d 708, 726, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)* (citation **[*77]** omitted). Courts recognize that, if the FTC shows a likelihood of success on the merits, the equities favor issuance of a preliminary injunction. If a merger proceeds and the FTC later finds it to be unlawful, it is difficult to restore competition to its pre-merger state. *FTC v. Weyerhaeuser Co., 665 F.2d 1072, 1085-86, 214 U.S. App. D.C. 254 and n.31 (D.C. Cir. 1981)*. As to private equities, they "do not outweigh effective enforcement of the antitrust laws. When the [FTC] demonstrates a likelihood of ultimate success, a counter showing of private equities alone would not suffice to justify denial of a preliminary injunction barring the merger." *Id. at 1083*.

III. Definition of Relevant Market

9. The parties' principal dispute is the proper definition of a relevant market, specifically whether the dominance of BCBSND should be considered in defining that market or whether BCBSND's dominance should instead be considered only as a defense.

10. The defendants have not propounded an alternative relevant market definition and have no obligation to do so. Rather, the defendants contend that the plaintiffs' proposed market definition is erroneous in not accounting for BCBSND having "all the bargaining power" by virtue of its dominance in the commercial insurance market and its practice of using statewide **[*78]** reimbursement rates. In the plaintiffs' view, the dominance of BCBSND should be considered only after the plaintiffs have established that the proposed transaction is presumptively illegal.

11. The plaintiffs' proposed relevant market definition is derived from application of the HMT. The defendants contend the plaintiffs' model is inadequate for this case and propound a "merger simulation model," asserting it more appropriately accounts for the dominance of BCBSND in the commercial insurance market in North Dakota.

12. As described above,[7] the HMT is an iterative process that courts often use in defining relevant markets for purposes of antitrust analysis, and the Horizontal Merger Guidelines endorse its use. See *H & R Block, 833 F. Supp. 2d at 51*; Horizontal Merger Guidelines §§ 4.1.1-4.1.3.

13. The merger simulation model, as described by the defendants, involves two steps. The first step is to "determine if a measure for bargaining leverage (willingness to pay) has any relationship to price in the market." (Doc. #132, p. 26). The second step is to "calculate how much the merger will increase bargaining leverage and then use the relationship calculated in the first step to simulate how much price will increase **[*79]** post transaction." Id. at 27. According to Dr. Town, if there is a relationship between bargaining leverage and price, the merger simulation model will predict a price increase. (Tr-4, pp. 74-76). The defendants assert that framework has

---

[7] See supra, Findings of Fact, Section VI, Definition of Relevant Market.

been widely adopted, including its use in ProMedica, 2011 U.S. Dist. LEXIS 33434, 2011 WL 1219281, at *24, in which Dr. Town—the defendants' expert in this case—served as an expert for the FTC.

14. The defendants contend the plaintiffs' model does not adequately consider realities of North Dakota's health insurance market and that the plaintiffs' position elevates theory over reality. In support of their position, the defendants quote the FTC's acting chair, Maureen Ohlhausen, who at a recent symposium stated, "We frequently need to go beyond market shares and structural presumptions and really understand the dynamics of the markets we're evaluating." (Tr-1, p. 44). But, as the plaintiffs counter, Chair Ohlhausen supported the FTC's initiation of an enforcement action in this case. (Tr-4, pp. 259-60).

15. There exists no universal method for defining a relevant market. Rather, the defined market must be "relevant to the particular legal issue at hand." H & R Block, 833 F. Supp. 2d at 51 n.8. In a merger case, a relevant product market is the line of **[*80]** commerce in which competition may be substantially lessened because of the merger. Phila. Nat'l Bank, 374 U.S. at 355-56; Brown Shoe, 370 U.S. at 324-25. Interchangeability between a product—or service—and possible substitutes for it determine the outer boundaries of a relevant market. "Determining the limits of a relevant product market requires identifying the choices available to customers." Se. Mo. Hosp. v. C.R. Bard, Inc., 642 F.3d 608, 613 (8th Cir. 2011).

16. The defendants cite language of the FTC's decision in In re ProMedica Health System, Inc., No. 9346, 2012 FTC LEXIS 293, 2012 WL 1155392, at *13 (FTC June 25, 2012), where the Commission stated that "evidence of competitive effects can often inform market definition." The quoted language followed the FTC's discussion of the traditional burden-shifting framework and recognized burden-shifting as "a flexible analytical framework rather than an airtight rule." Id. In the end, however, the FTC used the traditional burden-shifting framework in that case and found a Section 7 violation. The defendants also cite Little Rock Cardiology Clinic PA v. Baptist Health, 591 F.3d 591, 596-98 (8th Cir. 2009) and describe that case as having rejected a market narrowed to commercial payers for hospital services. (Doc. #83-2, p. 15). But, Little Rock Cardiology was not a Section 7 enforcement matter; it was a restraint-of-trade claim brought by a "shut-out supplier" under the Sherman Act, and the court specifically distinguished it from prior cases involving Section 7 claims. Id. at 598.

17. In support **[*81]** of their argument that BCBSND's dominance should be considered when defining the relevant market, the defendants cite an FTC decision which adjudicated a consummated merger to be in violation of Section 7. In re Evanston Nw. Healthcare Corp., No. 9315, 2007 FTC LEXIS 210, 2007 WL 2286195 (FTC Aug. 6, 2007). Specifically, they note the FTC's language regarding a "fundamental relationship between market definition and competitive effects analysis in unilateral effects cases involving differentiated product markets." 2007 FTC LEXIS 210, [WL] at *49. The defendants argue that the Commission's Evanston decision shows that actual price impact on commercial payers is pertinent to market definition.

18. In his "initial decision," the Evanston administrative law judge discussed the consummated merger's impact on an insurer which had a significant market share and a "very strong bargaining position." In re Evanston Nw. Healthcare Corp., No. 9315, 2005 FTC LEXIS 146, 2005 WL 2845790, at *138 (FTC Oct. 20, 2005), vacated in part, 2007 FTC LEXIS 95, 2007 WL 2286196. The ALJ considered post-merger evidence that price increases had not been imposed on that insurer but nonetheless found that the merged entity had "gained market power though the merger." Id. The Commission's decision characterized the insurer's market power as a possible reason that there had not been post-merger price increases. Evanston, 2007 FTC LEXIS 210, 2007 WL 2286195, at *52. Since Evanston involved a consummated merger and did not consider a powerful buyer's **[*82]** market share at the market definition stage, it does not lead the court to conclude that BCBSND's dominance should be considered in defining a relevant market.

19. In the absence of case law supporting the defendants' position that BCBSND's dominance should be considered in defining a relevant market, application of a traditional burden-shifting framework—considering BCBSND's dominance as a defense rather than as part of the market definition process—is appropriate. See Chi. Bridge & Iron Co. N.V. v. FTC, 534 F.3d 410, 423-24, 439-40 (5th Cir. 2008); Cardinal Health, 12 F. Supp. 2d at 52-61. This is consistent with a powerful buyer's position being analyzed in rebuttal of the government's prima facie case since market definition is an element of a prima facie case. **IV. Application of HMT**

20. The plaintiffs base an exclusion of government payers from the market definition on government payers not negotiating reimbursement rates with providers. (Doc. #71-2, p. 12, n.8). The defendants contend that BCBSND does not truly negotiate reimbursement rates and that there is, therefore, no logical basis for excluding government payers from the definition of the relevant market. (Doc. #83-2, p. 15 n.5).

21. The plaintiffs cite to several cases in which the relevant market focused on commercial health insurers to the **[*83]** exclusion of government payers. *FTC v. OSF Healthcare Sys., 852 F. Supp. 2d 1069, 1075 (N.D. Ill 2012)*; *Advocate Health, 841 F.3d at 468*; *ProMedica, 2011 U.S. Dist. LEXIS 33434, 2011 WL 1219281, at *8-9*. It does not appear exclusion of government payers was disputed in any of those cases, and the defendants have not cited any healthcare merger cases in which government payers were included in the relevant market. Commercial health insurance plans effectively channel consumer preferences and are therefore an appropriate subject of the HMT. See *Penn State Hershey, 838 F.3d at 342*. This court concludes it is appropriate to consider a relevant market limited to a distinct category of customers—commercial health insurance plans.

22. The relevant service markets in which to analyze competitive effects of the proposed transaction are adult PCP services, pediatrician services, OB/GYN physician services, and general surgeon services which are sold or provided to commercial insurers and their members in the Bismarck-Mandan area.

23. The plaintiffs established that commercial health insurers would accept a hypothetical monopolist's SSNIP rather than market a health insurance plan in the Bismarck-Mandan area that did not include Bismarck-Mandan area physicians providing adult PCP services, pediatrician services, OB/GYN services, and general surgeon services.

24. The relevant geographic market **[*84]** is "the area in which consumers can practically turn for alternative sources of the product [or service] and in which the antitrust defendants face competition." *OSF Healthcare, 852 F. Supp. 2d at 1076* (quoting *Tenet Health, 186 F.3d at 1052*). The Bismarck-Mandan area satisfies the HMT and constitutes a relevant geographic market for each of the four physician service lines.

V. Market Shares and Market Concentration

25. A merger that significantly increases market shares and market concentration is presumed to be unlawful under *Section 7*. *Phila. Nat'l Bank, 374 U.S. at 363*.

26. In each of the four physician service lines, as measured by the HHI, existing services in the Bismarck-Mandan area are currently highly concentrated and would be even more highly concentrated if the merger were consummated. The changes in HHI in each of the four physician service lines are well above the Merger Guidelines' threshold for presumption that the proposed transaction is likely to enhance market power.

27. Based on the HHI evidence of market concentration, the proposed transaction is presumptively unlawful in each of the four physician service lines. See *Penn State Hershey, 838 F.3d at 346-47*; *ProMedica, 749 F.3d at 568*.

VI. Competitive Effects

28. Transactions that eliminate direct competition between two entities are likely to result in anticompetitive effects. *FTC v. Sysco Corp., 113 F. Supp. 3d 1, 61 (D.D.C. 2015)*; Horizontal **[*85]** Merger Guidelines § 6. If a merger "eliminates a supplier whose presence contributed significantly to a buyer's negotiating leverage," the merger is likely to cause competitive harm. Horizontal Merger Guidelines § 8.

29. The proposed transaction will eliminate current competition between Sanford and MDC for adult PCP services, pediatrician services, OB/GYN physician services, and general surgeon services in the Bismarck-Mandan area and, so, is likely to harm competition in each of those distinct service markets. See *Whole Foods, 548 F.3d at 1043*. **VII. Rebutting the Presumption of Illegality**

30. Since the plaintiffs have established that the proposed transaction is presumptively illegal, the burden shifts to the defendants to produce evidence that clearly shows that no anticompetitive effects are likely in order to overcome the plaintiffs' prima facie case. See *Phila. Nat'l Bank, 374 U.S. at 363*.

A. Efficiencies and Synergies

31. In analyzing a proposed transaction under *Section 7*, the Eighth Circuit has directed that evidence of enhanced efficiency be considered in the context of the competitive effects of the merger. *Tenet Health, 186 F.3d at 1054-55*. Efficiencies resulting from a merger can rebut a presumption of illegality if they are demonstrated to be merger-specific and are independently **[*86]** verifiable. *Sysco, 113 F. Supp. 3d at 82*. The Merger Guidelines consider "whether cognizable efficiencies likely would be sufficient to reverse the merger's potential to harm customers." Horizontal Merger Guidelines § 10. Additionally, claimed efficiencies must be passed through to consumers. *Saint Alphusnus, 778 F.3d at 790*; *FTC v. Univ. Health, Inc., 938 F.2d 1206, 1223 (11th Cir. 1991)*.

32. In support of their assertion that 340B savings should not be considered because cancer care services are not within the relevant market, the plaintiffs cite to the Merger Guidelines statement that efficiencies justifying a transaction must be "of a character and magnitude such that the merger is not likely to be anticompetitive in any relevant market." Horizontal Merger Guidelines § 10 (emphasis added). In Tenet Health, the Eighth Circuit found the government had not sufficiently established a well-defined market but also stated that the district court may have properly rejected the efficiencies defense but should "nonetheless have considered evidence of enhanced efficiency in the context of the competitive effects of the merger." *186 F.3d at 1054*. Tenet Health did not, however, involve a challenge to alleged efficiencies as being outside the defined relevant market.

33. The defendants counter that to apply a market specificity requirement **[*87]** "makes no sense in a merger involving an integrated healthcare system acquiring a multi-specialty clinic, both of which enable patients to obtain services in multiple areas based on their needs." (Doc. #83-2, p. 45). They assert any 340B savings should be considered fungible benefits to the patient population as a whole.

34. The Supreme Court has not specifically recognized an efficiencies defense in a *Section 7* case. Recent opinions of other circuit courts appear to limit that defense, including by closely analyzing the relationship between the claimed efficiencies and the relevant market. "It is not enough to show that the merger would allow [the merged entity] to better serve patients. [*Section 7*] focuses on competition, and the claimed efficiencies therefore must show that the prediction of anticompetitive effects from the prima facie case is inaccurate." *Saint Alphonsus, 778 F.3d at 791* (citing *Univ. Health, 938 F.2d at 1222*). See also *Miss. River Corp. v. FTC, 454 F.2d 1083, 1089 (8th Cir. 1972)*.

35. When an efficiencies defense is recognized, a defendant has the burden to show that the claimed efficiencies are merger-specific and to demonstrate that they are independently verifiable. *H.J. Heinz, 246 F.3d at 721-22*.

36. Under the guidelines, the lesser the adverse competitive effects, the greater the weight ascribed to efficiencies. "Efficiencies **[*88]** almost never justify a merger to monopoly or near-monopoly." Horizontal Merger Guidelines § 10; see also *Saint Alphonsus, 778 F.3d at 790*; *ProMedica, 2011 U.S. Dist. LEXIS 33434, 2011 WL 1219281, at *57*. Given that the proposed transaction would result in near-monopoly, the claimed monetary and quality efficiencies are insufficient to overcome the presumption of illegality.

B. Powerful Buyer Defense

37. Evidence of BCBSND's bargaining leverage is properly considered when analyzing competitive effects and not as part of the definition of a relevant market. See *Chi. Bridge & Iron, 534 F.3d at 423-24*; *Cardinal Health, 12 F. Supp. 2d at 45-52*.

38. Sanford and MDC contend that BCBSND is such a powerful buyer that a post-merger Sanford could not negotiate higher reimbursement rates from BCBSND. The plaintiffs assert that a "powerful buyer defense" is limited to two situations not present here—(1) where a buyer is able to use its leverage to sponsor entry or vertically integrate and (2) where there are alternative suppliers post-merger, and a buyer is able to obtain lower prices from suppliers. (Doc. # 71-2, p. 26). The agency guidelines address powerful buyers:

> The Agencies consider the possibility that powerful buyers may constrain the ability of the merging parties to raise prices. . . . However, the Agencies do not presume that the presence of powerful buyers **[*89]** alone forestalls adverse competitive effects flowing from the merger. Even buyers that can negotiate favorable terms may be harmed by an increase in market power. The Agencies examine the choices available to powerful buyers and how those choices likely would change due to the merger. Normally, a merger that eliminates a supplier whose presence contributed significantly to a buyer's negotiating leverage will harm that buyer. . . . Furthermore, even if some powerful buyers could protect themselves, the Agencies also consider whether market power can be exercised against other buyers.

Horizontal Merger Guidelines § 8.

39. The defendants have not met either of the common applications of a "powerful buyer defense"—(1) a buyer's ability to use its leverage to sponsor entry or vertically integrate or (2) where there are alternative suppliers post-merger, a buyer is able to obtain lower prices from suppliers. See id.

40. Although Sanford advances its ethical precept of "promises made, promises kept," the defendants cite no case in which similar statements were considered as part of an antitrust analysis. To the extent the defendants urge that principle shows that Sanford does not intend to demand **[*90]** higher reimbursement rates from BCBSND if the proposed transaction is consummated, the court notes that the plaintiffs are not required to prove an intent to do so. See *United States v. Bazaarvoice, Inc., No. 13-CV-00133, 2014 U.S. Dist. LEXIS 3284, 2014 WL 203966, at *11 (N.D. Cal. Jan. 8, 2014)* (stating that "intent is not an element of a *Section 7* violation"); *Cardinal Health, 12 F. Supp. 2d at 67* (pledge to maintain current prices for three years could not rebut likelihood of anticompetitive effects).

41. In light of BCBSND testimony that it would be forced to agree to increase reimbursements to a post-merger Sanford and evidence that BCBSND has agreed to modify contract terms [TEXT REDACTED BY THE COURT], the powerful buyer defense is insufficient to overcome the plaintiffs' prima facie case.

C. Impact on Medica

42. Private agreements, such as the [TEXT REDACTED BY THE COURT] contract between Sanford and Medica, are rarely considered in antitrust analysis. In Penn State Hershey, the appellate court rejected use of a private contract to define the geographic market, noting that such private agreements could hamper effective enforcement of antitrust laws. *838 F.3d at 343-44*. Commonwealth v. Partners Healthcare System, Inc. held that a time limited price cap was inadequate in the context of a consent judgment because it did not directly address loss of competition. *No. SUCV2014-02033-BLS2, 2015 Mass. Super. LEXIS 4, 2015 WL 500995, at *22-24 (Mass. Super. Ct. Jan. 30, 2015)*. The **[*91]** Sanford/Medica [TEXT REDACTED BY THE COURT] agreement is insufficient to ameliorate the competitive harm that would result from the proposed transaction.

43. The defendants acknowledge that, after the [TEXT REDACTED BY THE COURT] contract expires, Medica's spending in the Bismarck-Mandan area would increase as a result of the proposed transaction. ***Antitrust law*** does not recognize a de minimus exception.

D. Entry or Expansion into the Market

44. Entry or expansion of competitors into a market may ameliorate anticompetitive effects of a proposed merger if entry or expansion is timely, likely, and sufficient. Horizontal Merger Guidelines § 9; *Cardinal Health, 12 F. Supp. 2d at 54-58*.

45. Hearing evidence does not demonstrate that CHI would be able to recruit enough physicians to timely replace the MDC physicians currently referring to CHI St Alexius. Physician recruitment challenges constitute a high entry barrier, reducing the possibility that market expansion would ameliorate the reduced competition resulting from the proposed transaction. *Saint Alphonsus, 778 F.3d at 788*. CHI's potential expansion therefore cannot be considered timely, likely, or sufficient to counter the anticompetitive effects of the proposed transaction.

46. The defendants have not established **[*92]** that any new entry or expansion is timely, likely, or sufficient to counteract anticompetitive effects of the proposed transaction.

E. MDC Viability and Alleged Admission of Weakness

47. Courts have, in rare cases, recognized a "weakened competitor" defense to a merger challenge, but the defendants have not made sufficient showing to consider it here. See *ProMedica, 749 F.3d at 572*; *Nat'l Tea Co., 603 F.2d 694, 700 (8th Cir. 1979)*. MDC's current financial status is strong. There is no evidence that it would "imminently depart" from the market if the merger were not consummated as was apparent in the National Tea case on which the defendants rely. See *603 F.2d at 701*.

48. The plaintiffs argue that [TEXT REDACTED BY THE COURT] July 5, 2017 statements should be considered an admission by MDC of the weakness of its case. In support of their position, the plaintiffs cite *Great American Insurance Co. v. Horab, 309 F.2d 262 (8th Cir. 1962)*. Great American Insurance, a case tried to a jury, presented a question of admission of evidence that a party had attempted to interfere with service of process. The plaintiff argued that the attempted interference was an admission of the "false and fraudulent nature" of the defendant's insurance claims. *Id. at 264*. The trial court excluded the evidence, and the appellate court found that exclusion was not an abuse of **[*93]** discretion. Though affirming exclusion of the evidence, the Eighth Circuit stated that generally, in a civil case, "evidence that a litigant, or [the litigant's] agent, has attempted to influence or suppress a witness is receivable as an admission or as an indication of the litigant's consciousness that [the litigant's] case is weak or unfounded." Id. Great American Insurance appears to be the only Eighth Circuit decision addressing evidence of alleged witness tampering in a civil case. Catipovic v. Turley, a recent opinion of a district court in this circuit, discussed the issue extensively, though in the context of a pretrial motion seeking to keep the evidence from the jury. *68 F. Supp. 3d 983, 1003-08 (N.D. Iowa 2014)*.

49. While [TEXT REDACTED BY THE COURT] statements can be seen as an admission of his perception that the defendants' case was weak, that admission adds little to the court's analysis. There is no suggestion that [TEXT REDACTED BY THE COURT] statements were prompted by the MDC board or by any Sanford representative. The court instead considers [TEXT REDACTED BY THE COURT] denial of the statements as impacting credibility of his testimony.

VIII. Equities

50. The defendants argue that public equities weigh against **[*94]** an injunction because, if an injunction is granted and upheld on appeal, the defendants intend to abandon the proposed transaction. Thus, from the defendants' perspective, an injunction would "permanently deprive the public of the benefits of the transaction." (Doc. #83-2, p. 55). The defendants further argue that, even assuming harm from consummation of the transaction, no harm could "realistically materialize prior to the administrative resolution of this case." Id. at 56.[8]

51. Where the FTC has demonstrated a likelihood of success on the merits, no court has denied a *Section 13(b)* motion for a preliminary injunction based on weight of the equities. There is a strong public interest in effective enforcement of the antitrust laws and in the FTC having the ability to order effective relief if it succeeds in an

[8] Though not addressed at the hearing, in their proposed conclusions of law, the defendants describe their intent that Sanford and MDC maintain their own facilities, with MDC remaining a separate corporate subsidiary of Sanford. Id.

administrative proceeding. See *H.J. Heinz, 246 F.3d at 726-27*; *Sysco, 113 F. Supp. 3d at 86*; *ProMedica, 2011 U.S. Dist. LEXIS 33434, 2011 WL 1219281, at *60*. The court cannot conclude that what the defendants describe as public benefits are sufficient reason to deny the motion.

Conclusion

The court has fully considered the hearing testimony and those portions of exhibits referenced during the hearing or in the parties' proposed findings of fact and conclusions of law. Though mindful that it is not this court's **[*95]** task to determine the merits of the matter, the court concludes there are questions going to the merits that are so serious, substantial, difficult, and doubtful as to make them fair ground for thorough investigation and determination by the FTC.

The court concludes that the FTC is likely to succeed in proving that the proposed transaction may substantially lessen competition in each of the four relevant physician service lines sold to commercial insurers in the Bismarck-Mandan area. Additionally, the public equities favor preliminarily enjoining the proposed transaction. The plaintiffs' motion for a preliminary injunction is therefore **GRANTED**.

JUDGMENT SHALL BE ENTERED ACCORDINGLY.

Dated this 15th day of December, 2017.

Opinion

ORDER GRANTING IN PART DEFENDANTS NEXTERA ENERGY, INC.'S AND HAMAKUA ENERGY PARTNERS, L.P.'S MOTIONS TO DISMISS, ECF NOS. 73 & 95, WITH LEAVE TO AMEND

I. INTRODUCTION

Plaintiff Hu Honua Bioenergy, LLC ("Hu Honua") contracted with Defendant Hawaii Electric Light Company, Inc. ("HELCO") to build an independent power plant run on biomass to supply energy to HELCO on the Big Island of Hawaii. Given problems with the construction contractor and other labor issues, Hu Honua was unable to complete the facility on time. After unsuccessful negotiations to extend deadlines, HELCO cancelled the contract.

Hu Honua filed this suit contending that HELCO's cancellation was, among other things, the result of an illegal conspiracy in violation of antitrust laws. The suit alleges federal antitrust and related state-law claims **[*3]** against HELCO; Hawaiian Electric Company, Inc. ("HECO"); Hawaiian Electric Industries, Inc. ("HEI"); NextEra Energy, Inc. ("NextEra"); and Hamakua Energy Partners, L.P. ("HEP"). It also alleges that HELCO breached the contract by refusing to extend deadlines under the contract's terms.

The court now addresses Motions to Dismiss brought by NextEra and HEP under *Federal Rule of Civil Procedure 12(b)(6)*. ECF Nos. 73, 95. Based on the following, the Motions are GRANTED in part. The federal antitrust claims are DISMISSED as to NextEra and HEP, with leave to amend. The Motions are DENIED without prejudice as to the state-law claims against NextEra and HEP. Hu Honua may file a Second Amended Complaint by January 29, 2018.

II. BACKGROUND

A. Factual Background

Hu Honua's 96-page First Amended Complaint ("FAC"), ECF No. 27, describes the structure of the electric utility market in Hawaii — in particular, on the island of Hawaii (the Big Island)—and alleges in detail a scheme (although ultimately deficiently, at least as to its antitrust claims) whereby HELCO's cancellation of the contract not only breached certain of its terms but was also part of a conspiracy or conspiracies among NextEra, HEP and the other Hawaiian Electric Defendants **[*4]** [1] to monopolize or restrain trade in violation of antitrust laws.

After suit was filed, Hu Honua and the Hawaiian Electric Defendants reached a settlement in conjunction with a renegotiated contract for Hu Honua to complete its biomass power plant. ECF No. 122. Consummation of that settlement is awaiting final completion of the approval process involving the Hawaii Public Utilities Commission ("PUC").[2] Perhaps because of that settlement, the Hawaiian Electric Defendants have not moved to dismiss the FAC. (Earlier, they filed a motion seeking to compel arbitration, but asked the court to hold that motion in abeyance, pending consummation of the settlement, ECF No. 126). Because only NextEra and HEP have moved to dismiss, the court focuses on setting forth the essential factual allegations against them. That is, the court need not (and does not) reiterate all the details alleged in the lengthy FAC as to the Hawaiian Electric Defendants, but describes

[1] The court sometimes refers to HELCO, HECO, and HEI collectively as the "Hawaiian Electric Defendants."

[2] The PUC has approved the renegotiated contract, and construction of the facility is ongoing, although the final settlement with the Hawaiian Electric Defendants is awaiting disposition of a related state-court appeal of the PUC-approval. *See* ECF No. 122.

those facts necessary to put the claims against NextEra and HEP into proper context. And some of the relevant factual allegations are set forth later, in the appropriate discussion sections analyzing particular claims. For present purposes, **[*5]** the court assumes as true any well-pleaded factual allegations set forth in the FAC.

1. The Basic Structure of the Electric Utility Market in Hawaii

Unlike on the continental United States—where states and utilities may utilize large interconnected, interstate power grids comprised of high-voltage transmission lines—each island in the State of Hawaii has its own isolated grid and power supplies. FAC ¶¶ 14-16. HECO is such an electric utility providing electricity to consumers on the island of Oahu; likewise, HELCO is the electric utility providing electricity to the Big Island. *Id.* ¶ 17. (Although not a defendant, Maui Electric Company ("MECO") powers the islands of Maui, Lanai, and Molokai. *Id.*[3]) HEI is a holding company, with HECO as one of its subsidiaries. In turn, HELCO and MECO are subsidiaries of HECO. *Id.* ¶¶ 3-5.

Power supplied to electric utilities (which utilities then provide to retail consumers) is divided into two basic categories: "firm power" and "intermittent power." *Id.* ¶ 18. "Firm power" (generated by fossil fuels, geothermal, biomass, and similar sources) is power that is intended always to be available during "the period covered by a guaranteed commitment to deliver." **[*6]** *Id.* In contrast, "intermittent" power consists of sources such as wind or solar that are not always available, "with output controlled by the natural variability of the energy resource rather than power dispatched based on system requirements." *Id.*

Much of Hawaii's power currently comes from fossil fuels. "77% of Hawaii's electricity is generated by petroleum, making the State's utility the most oil dependent in the country. All of the petroleum consumed in the State is generated from crude oil imported from South East Asia and other off-shore locations." *Id.* ¶ 11. And so, "[t]o mitigate the risk of dependence on foreign fuel sources, the Hawaii state government policies and legislation have sought to place greater emphasis on the development of renewable energy resources[.]" *Id.* ¶ 13. "[I]n June 2015, the Hawaii Legislature amended Hawaii's Renewable Portfolio Standard statute to require Hawaii to move towards achievement of 100% renewable energy by 2045." *Id.*

HELCO serves approximately 85,000 customers on the Big Island. *Id.* ¶ 21. "HELCO currently owns fossil fuel plants that generate in excess of 65% of the [Big] Island's dispatchable firm electrical capacity." *Id.* Specifically, it **[*7]** "owns and operates six oil-fired power generation plants, accounting for 184 MW [(megawatts)] of firm power capacity[.]" *Id.* ¶ 28. "In addition to its own fossil fuel plants, HELCO purchases firm power generation capacity [and electrical energy] from HEP, which owns a 60 MW fossil-fuel combined cycle power plant, pursuant to a 1997 Power Purchase Agreement." *Id.* ¶ 22. "HEP is one of only two independent power producers ('IPPs') on the Island of Hawaii that provides firm power generating capacity." *Id.* ¶ 23. The other is Puna Geothermal Venture "whose power capacity is 34.6 MW, only part of which is firm." *Id.*

"HELCO is compensated differently for the power that it generates itself through the power plants that it owns versus the power that it purchases from IPPs." *Id.* ¶ 32. "In fact, as a result of HELCO's ability to recover its capital costs, and an annual fixed rate of return on those costs, HELCO receives more revenue through the rates paid by its customers for the sale of power that HELCO generates from running its own units than from the power it purchases from IPPs." *Id.*

"In Hawaii, IPPs must sell power to a public utility because Hawaii's utilities have not permitted the use of **[*8]** their grids for the 'wheeling' or transmission of power to power purchasers, and because it would be economically impractical for IPPs to build their own transmission and distribution system." *Id.* ¶ 24. "As a result, HELCO is not only the monopoly retail seller of electricity on the Island of Hawaii, but also the monopoly owner of electricity transmission and distribution infrastructure and monopoly purchaser of wholesale electricity." *Id.*

---

[3] The island of Kauai is served by Kauai Island Utility Cooperative, which is an entity not related to any of the Defendants.

2. The Hu Honua Power Purchase Agreement

In May 2012, Hu Honua entered into a Power Purchase Agreement for Renewable Dispatchable Firm Energy and Capacity ("the Hu Honua PPA" or "the Contract") with HELCO under which Hu Honua would develop an independent power plant on the Hamakua Coast of the Big Island, with a renewable biomass fuel source (e.g., eucalyptus trees) of firm power. *Id.* ¶¶ 1, 34, 38. "The trees were to be 100% locally grown and harvested on a sustainable rotational basis and would have provided an important means to reduce Hawaii's dependence on imported fossil fuels." *Id.* ¶ 34.

Hu Honua's power plant would supply HELCO with "no less than 10 MW of electricity capacity at all times," with the facility having a "maximum 'Available Capacity' **[*9]** of approximately 30 net MW." *Id.* ¶ 46. Hu Honua began construction in late October 2012, but was unable to complete the facility by the end of 2015, as contemplated by the Hu Honua PPA, because of disputes with its construction contractor, labor union issues, and related litigation. *Id.* ¶ 51, 58.[4] After unsuccessful negotiations between Hu Honua and HELCO to extend milestone dates as provided in the Hu Honua PPA (where milestone-date extension requests "shall not be unreasonably withheld," *id.* ¶ 42), HELCO cancelled the Contract on March 1, 2016. *Id.* ¶ 60.

3. NextEra's Proposed Merger with HEI, and HELCO's Proposed Purchase of HEP's Power Plant

Meanwhile, two other relevant things happened: First, "the proposed merger" — on December 3, 2014, NextEra, which is a large Florida-based utility holding company, and HEI entered into an Agreement and Plan of Merger (the "NextEra/HEI Merger Agreement" or "Merger Agreement") under which HEI subsidiaries HELCO and HECO would become wholly-owned subsidiaries of NextEra. *Id.* ¶¶ 6, 52.[5] And second, "the proposed purchase" — on December 23, 2015, HECO and HELCO publicly disclosed that HELCO would purchase HEP's 60 MW fossil-fuel power plant for over **[*10]** $88 million. *Id.* ¶¶ 22, 91.[6]

"Article V of the Merger Agreement addresses certain issues relating to HECO's conduct of its and its subsidiaries' business during the pendency of the merger. Among other things, Article V prohibited HECO from engaging in

---

[4] HEP provides a listing from Hawaii state court records of "28 different legal actions against Hu Honua during this time period, including one that resulted in Hu Honua losing control of the facility until it paid a stipulated judgment." ECF No. 95-1, Mem. at 8-9 (citing Egesdal Decl., Ex. D, ECF No. 95-6). Although the court has not reviewed the substance of these actions, the court takes judicial notice of the existence and number of state court actions. *Lee v. City of L.A., 250 F.3d 668, 689 (9th Cir. 2001)*. And, according to the FAC, "Hu Honua's disputes with its former construction contractor and the labor union jurisdiction dispute caused an irretrievable loss of time . . . [such that] Hu Honua realized that it would not be able to achieve two milestone[] dates set forth in the PPA[.]" FAC ¶ 58.

[5] The Merger Agreement required approval by the PUC. But after several months of hearings, the PUC rejected the Merger Agreement on July 15, 2016. *See, e.g.*, Kathryn Mykleseth, *PUC Rejects NextEra's Purchase of Hawaiian Electric, Honolulu Star-Advertiser*, July 15, 2016 (*available at* http://www.staradvertiser.com/2016/07/15/business/businessbreaking/puc-rejects-nexteras-purchase-of-hawaiian-electric/(last visited Dec. 15, 2017).

[6] On May 4, 2017, the PUC rejected HELCO and HECO's application to approve the purchase of HEP's facility. *See* Egesdal Decl., Ex. B., ECF No. 95-4 (*In re Hawaiian Electric Co. (Hawaii P.U.C. May 4, 2017) (Decision and Order No. 34536, 2017 Haw. PUC LEXIS 236)*). The court takes judicial notice of publicly-available decisions of the PUC. *See, e.g., Bartolotti v. Maui Mem'l Med. Ctr., 2015 U.S. Dist. LEXIS 98121, 2015 WL 4545818, at *3 (D. Haw. July 28, 2015)* ("The court may 'take judicial notice of 'matters of public record[,]' 'as long as the facts noticed are not 'subject to reasonable dispute.'"') (quoting *Intri—Plex Techs., Inc. v. Crest Grp., Inc., 499 F.3d 1048, 1052 (9th Cir. 2007))*; *id.* ("'Matters of public record that may be judicially noticed include records and reports of administrative bodies,' and documents filed with courts, 'both within and without the federal judicial system, if those proceedings have a direct relation to the matters at issue.'") (quoting *Barron v. Reich, 13 F.3d 1370, 1377 (9th Cir. 1994)* & *United States v. Borneo, Inc., 971 F.2d 244, 248 (9th Cir. 1992))*.

several activities without NextEra's prior consent." *Id.* ¶ 56. Specifically, "§ 5.01(a)(xii) provides that HECO/HELCO shall not:

> (1) enter into, terminate or amend in any material respect any material Contract,
> (2) consent to any extension or continuation of any material Contract . . . or
> (3) waive any material right on any material Contract[.]"

FAC ¶ 56.[7] Based on this consent provision, Hu Honua alleges that NextEra "exercised total control over HECO's/HELCO's conduct of their important business actions and material agreements, including the fate of Hu Honua's PPA." *Id.*

As for HELCO's proposed purchase of the HEP power plant, Hu Honua alleges that its biomass facility "would have been a direct competitor to the HEP Power Plant in the supply of wholesale electricity capacity to HELCO." *Id.* ¶ 90. Hu Honua alleged "[o]n information and belief, HELCO planned to acquire the HEP Power Plant in order to further HELCO's strategy to increase its monopoly over power generation on the Island of Hawaii." *Id.* ¶ 92. "On information and belief, HELCO favors its own power generation instead of purchasing power from Hu Honua, because HELCO generates more profit by owning its own power generation." *Id.* And, as for HEP's motivation, it alleges that

> HEP had its own reasons for wanting the Hu Honua PPA terminated. As early as 2012, HEP recognized that the proposed Hu Honua Facility was a direct competitive threat. On September 19, 2012, it filed a motion to intervene in the Commission's docket for HELCO's Application for Approval of the **[*12]** Hu Honua PPA, which it vigorously opposed on the grounds that "[t]he introduction of the proposed Hu Honua plant would, according to [the] HELCO plan outlined in its application, reduce the HEP Plant's dispatch." In sum, HEP, as the operator of the largest power plant on the Island, attempted unsuccessfully to exclude Hu Honua as a competitor in the power generation market. It was presented with another opportunity three years later to accomplish that objective. Hu Honua is informed and believes, and on that basis alleges, that HEP participated in and supported the termination of Hu Honua's PPA, as alleged [in the FAC].

Id. ¶ 99.[8]

4. Hu Honua Files This Action

After HELCO cancelled the Hu Honua PPA in March of 2016 (and after the PUC rejected the proposed NextEra/HEI Merger Agreement in July 2016), Hu Honua filed the original Complaint in this action on November 30, 2016, ECF No. 1. It filed the FAC on January 27, 2017, ECF No. 27, alleging the following counts:

- Count One — Violation of Section Two of the Sherman Act, *15 U.S.C. § 2* (attempted monopolization, conspiracy to monopolize, and monopolization) against the Hawaiian Electric Defendants and NextEra;

---

[7] Paragraph 5.01(a) of the Merger Agreement also provides that such consent "shall not be unreasonably withheld, conditioned or delayed." ECF No. 73-3 at 5, Merger Agreement at 38. And Paragraph 5.01(c) reads in part:

> No Control of [HEI's] Business. [NextEra] acknowledges and agrees that (i) nothing contained in this Agreement is intended to give [NextEra], directly or indirectly, the right to control or direct the operations of [HEI] or an [HEI] Subsidiary **[*11]** prior to the Effective Time and . . . prior to the Effective Time, [HEI] shall exercise, consistent with the terms and conditions of this Agreement, complete control and supervision over its and [HEI's] Subsidiaries' respective operations.

ECF No. 73-3 at 10, Merger Agreement at 43.

[8] HEP challenges the FAC's allegation that it "vigorously opposed" Hu Honua's application, pointing to a public document (a 2012 "Statement of Position" before the Hawaii PUC) stating in part: "HEP does not take a position as to the prudence of approving the power purchase agreement. . . . Rather, HEP's position is that if the Commission *does* approve the Hu Honua PPA, it should not do so without requiring that HELCO adequate[ly] consider and plan to deal with the excess generating capacity that the Hu Honua asset would add[.]" Egesdal Decl. Ex. D at 2, ECF No. 95-3 at 3.

• Count Two — Violation of Section One **[*13]** of the Sherman Act, *15 U.S.C. § 1* (conspiracy to restrain trade) against all Defendants;
• Count Three — Breach of Contract against HELCO;
• Count Four — Promissory Estoppel against HELCO;
• Count Five — Breach of the Covenant of Good Faith and Fair Dealing against HELCO;
• Count Six — Breach of Fiduciary Duty against HELCO;
• Count Seven — Tortious Interference with Contract against NextEra;
• Count Eight — Unfair Competition in Violation of HRS Chapter 480 against All Defendants;
• Count Nine — Declaratory Relief against HELCO; and
• Count Ten — Conversion against HELCO.

FAC at 69-93. Hu Honua claims it was damaged "in the amount of its investment of $120 million in the plant, plus lost profits of $435 million." *Id.* ¶ 1. It seeks treble damages and attorney fees, among other injunctive relief. *Id.* at 94-95.

Hu Honua alleges that HELCO's cancellation of the Hu Honua PPA was illegal under the Sherman Act in two ways. First, it alleges that, in conjunction with the proposed Merger Agreement, NextEra conspired with Hawaiian Electric Defendants to monopolize the market for wholesale firm power on the Island of Hawaii, in violation of *15 U.S.C. § 2*. FAC ¶¶ 135-55. Second, it alleges that HEP (with the proposed purchase by HELCO of HEP's power plant), **[*14]** NextEra and the Hawaiian Electric Defendants conspired to restrain trade in the market for wholesale firm power on the Big Island, in violation of *15 U.S.C. § 1*. *Id.* ¶¶ 156-65.

B. Procedural History

On February 16, 2017, the Hawaiian Electric Defendants filed a Motion to Compel Arbitration, ECF No. 33, which was set for hearing on May 22, 2017. But on May 12, 2017, the Hawaiian Electric Defendants notified the court of the preliminary settlement between them and Hu Honua, and the hearing was continued until August 7, 2017, to allow the Hawaii PUC to consider the renegotiated Hu Honua PPA. ECF No. 76, 77.

NextEra filed its Motion to Dismiss on May 3, 2017, ECF No. 73, and HEP filed its Motion on June 2, 2017, ECF No. 95. The Motions were also set for hearing on August 7, 2017. (Discovery has been stayed pending a ruling on these Motions. ECF Nos. 59, 105.) Hu Honua filed its Oppositions on July 17, 2017, ECF Nos. 108-09, and Replies were filed on July 24, 2017, ECF Nos. 112-13. On July 17, 2017, the Hawaiian Electric Defendants filed short joinders in both Motions to Dismiss. ECF Nos. 106-07.

The August 7, 2017 hearing was continued to allow further time for PUC approval of the renegotiated Hu Honua/HELCO **[*15]** PPA, ECF Nos. 115, 117, and was later rescheduled for November 6, 2017, upon request by the parties. ECF No. 119. The court then granted a request to hold the Hawaiian Electric Defendants' Motion to Compel Arbitration in abeyance, pending finalization of the settlement, ECF No. 126.[9] The court, however, proceeded to hear the Motions to Dismiss on November 6, 2017.

III. STANDARD OF REVIEW

A. *Rule 12(b)(6)*'s Plausibility Standard

---

[9] Given the pending settlement between Hu Honua and the Hawaiian Electric Defendants, the court is likewise deferring ruling on the joinders by Hawaiian Electric Defendants. For administrative purposes, as discussed at the November 6, 2017 hearing, the joinders are DENIED as MOOT without prejudice. ECF No. 127.

Federal Rule of Civil Procedure 12(b)(6) allows a court to dismiss a complaint for "failure to state a claim upon which relief can be granted." Such a dismissal is proper "'based on the lack of a cognizable legal theory or the absence of sufficient facts alleged.'" UMG Recordings, Inc. v. Shelter Capital Partners, LLC, 718 F.3d 1006, 1014 (9th Cir. 2013) (quoting Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1988)).

In resolving a Rule 12(b)(6) motion, the court "accept[s] as true all well-pleaded allegations of material fact, and construe[s] them in the light most favorable to the non-moving party." *Sateriale v. R.J. Reynolds Tobacco Co., 697 F.3d 777, 784 (9th Cir. 2012)* (quoting Daniels-Hall v. Nat'l Educ. Ass'n, 629 F.3d 992, 998 (9th Cir. 2010)). But a "formulaic recitation of the elements of a cause of action" will not defeat a motion to dismiss. Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007). The complaint "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Twombly, 550 U.S. at 570). This tenet—that the court must accept as true all of the allegations contained in the complaint—"is inapplicable **[*16]** to legal conclusions." *Id.* Accordingly, "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.* (citing Twombly, 550 U.S. at 555).

B. The Antitrust Context

"The plausibility standard . . . asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* "Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility of entitlement to relief.'" *Id.* (quoting Twombly, 550 U.S. at 557). Determining plausibility is "a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." Id. at 679 (citation omitted). And in analyzing these principles in the *antitrust* context, *Twombly* recognized that "proceeding to antitrust discovery can be expensive," 550 U.S. at 558, and reiterated that "a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed." *Id.* (quoting Associated Gen. Contractors of Cal., Inc. v. Carpenters, 459 U.S. 519, 528 n.17, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)).

Thus, although *Twombly* did not impose a heightened pleading standard for antitrust conspiracy cases, 550 U.S. at 569 n.14, in this context "[a]llegations of facts that could just as easily suggest rational, legal business **[*17]** behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws." Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1049 (9th Cir. 2008) (citing Twombly, 550 U.S. at 553-58 & n.5); *see also* Name.Space, Inc. v. Internet Corp. for Assigned Names & Numbers, 795 F.3d 1124, 1130 (9th Cir. 2015) ("We cannot, however, infer an anticompetitive agreement when factual allegations 'just as easily suggest rational, legal business behavior.'" (quoting Kendall, 518 F.3d at 1049)). "[C]onduct that is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy." Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 597 n.21, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986) (citations omitted). And so, "[w]hen considering plausibility, courts must also consider an 'obvious alternative explanation,' for defendant's behavior." Eclectic Props. E., LLC v. Marcus & Millichap Co., 751 F.3d 990, 996 (9th Cir. 2014) (quoting Iqbal, 556 U.S. at 682).

C. General Principles

Rule 12(b)(6) review is generally limited to the contents of the complaint. *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)*. Nevertheless, courts may "consider certain materials—documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial notice—without converting the motion to dismiss into a motion for summary judgment." United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003). Courts may also "take into account 'documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the plaintiff's pleading.'" Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1160 (9th Cir. 2012) (quoting Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005) (brackets **[*18]** omitted)).

When a complaint is dismissed, the court "'should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not be cured by the allegation of other facts.'" *Lopez v. Smith, 203 F.3d 1122, 1130 (9th Cir. 2000)* (en banc) (quoting *Doe v. United States, 58 F.3d 494, 497 (9th Cir. 1995))*. Leave to amend "is properly denied, however, if amendment would be futile." *Carrico v. City & Cty. of S.F., 656 F.3d 1002, 1008 (9th Cir. 2011)*.

IV. DISCUSSION

A. Count One (Monopolization) Fails to State a Plausible Claim Against NextEra

Section 4 of the Clayton Act allows "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws" to sue for treble damages and costs of suit. *15 U.S.C. § 15(a)*. Count One asserts such a claim against each of the Hawaiian Electric Defendants and NextEra based upon alleged violations of *§ 2* of the Sherman Act, which makes it illegal for a person to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States[.]" *15 U.S.C. § 2*. Hu Honua claims that "HELCO's, along with HECO's and HEI's, conduct and practices as described [in the FAC], and as controlled by NextEra, were undertaken for the purpose and have had the effect of monopolizing the market for firm generation **[*19]** of electricity on the Island of Hawaii." FAC ¶ 137. It alleges that "NextEra entered into a contract, combination, or conspiracy with HELCO in furtherance of HELCO's unlawful monopolizing and attempting to monopolize the relevant market in violation of *Section 2*," FAC ¶ 138, where "the relevant market" is "the market for wholesale firm baseload power generation on the Island of Hawaii." FAC ¶ 139.[10]

A *§ 2* monopolization claim has three essential elements: "'(a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury.'" *Name.Space, Inc., 795 F.3d at 1131* (quoting *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 998 (9th Cir. 2010))*. "Similarly, to state a claim for attempted monopolization, the plaintiff must allege facts that, if true, will prove: '(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.'" *Coalition for ICANN Transparency, Inc. v. VeriSign, Inc., 611 F.3d 495, 506 (9th Cir. 2010)* (quoting *Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 893 (9th Cir. 2008))*. And "[t]o prove a conspiracy to monopolize in violation of *§ 2*, [a plaintiff] must show four elements: (1) the existence of a combination or conspiracy to monopolize; (2) an overt act in furtherance of the conspiracy; (3) the specific intent to monopolize; and (4) causal antitrust **[*20]** injury." *Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1158 (9th Cir. 2003)* (citation omitted).

1. The FAC Fails to State a Claim for Monopolization and Attempted Monopolization Against NextEra

NextEra argues that any monopolization and attempted monopolization claims against it fail at the outset because — as a power producer in *Florida*—it was never a competitor with Hu Honua in the wholesale firm baseload power generation market on the *island of Hawaii. See, e.g., Name.Space, Inc., 795 F.3d at 1131* ("Because [defendant] is not a competitor in any of the three markets, they cannot serve as the basis for a *§ 2* monopoly claim.") (citing *Mercy-Peninsula Ambulance, Inc. v. San Mateo Cty., 791 F.2d 755, 759 (9th Cir. 1986)* ("The gravamen of a *section 2* claim is the deliberate use of market power by a competitor[.]") (other citation omitted)); *Glen Holly Entm't, Inc. v. Tektronix, Inc., 352 F.3d 367, 372 (9th Cir. 2003)* ("'[T]he party alleging the injury must be either a consumer

---

[10] As set forth previously, the Hawaiian Electric Defendants did not file a motion to dismiss (having instead filed joinders in NextEra's and HEP's Motions). Again — because the court has held any motions by the Hawaiian Electric Defendants in abeyance pending the settlement between Hu Honua and the Hawaiian Electric Defendants — this Order focuses on the FAC's allegations against NextEra and HEP. That is, the court is not specifically ruling on whether any claims (antitrust or otherwise) are stated (or not) as to the Hawaiian Electric Defendants.

of the alleged violator's goods or services or a competitor of the alleged violator[.]'") (quoting *Eagle v. Star-Kist Foods, Inc., 812 F.2d 538 (9th Cir. 1987))*; *Spanish Broad. Sys. of Fla., Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065, 1075 (11th Cir. 2004)* ("There is no question that [defendant] does not participate in the Spanish-language radio market. Thus, [defendant] cannot *attempt* to monopolize that market.") (emphasis added) (cited with approval in *Name.Space, Inc., 795 F.3d at 1131*).

In response, Hu Honua clarifies that it "only asserts a claim for *conspiracy* to monopolize against NextEra." ECF No. 109, Opp'n at 34-35 n.8 (emphasis added). In any event, the FAC **[*21]** fails to allege a prerequisite (competitor in the same market) to a *§ 2* monopolization or attempted monopolization claim against NextEra. Accordingly, Count One, to the extent it alleges *§ 2* claims for monopolization or attempted monopolization against NextEra, is DISMISSED with prejudice. The court thus focuses on whether the FAC adequately alleges a conspiracy to monopolize as to NextEra.

2. Allegations of Conspiracy to Monopolize Against NextEra Also Fail

a. No specific intent to monopolize

NextEra initially challenges the conspiracy to monopolize claim by focusing on the third element of a *§ 2* conspiracy — "the specific intent to monopolize." *Paladin Assocs., Inc., 328 F.3d at 1158*. NextEra argues that, just because it agreed to merge with HEI and then approved HELCO's termination of Hu Honua's PPA, the conspiracy claim fails because the FAC lacks any facts that, even if true, would plausibly establish that NextEra specifically intended to monopolize the wholesale firm power generation market on the Island of Hawaii. *See* *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1437 n.8 (9th Cir. 1995)* ("To prove a conspiracy to monopolize, Rebel must show that the independent dealers had the specific intent to conspire to monopolize; it is not enough to show that the dealers merely agreed to go along with ARCO's **[*22]** pricing."); *see also, e.g., Syufy Enters. v. Am. Multicinema, Inc., 793 F.2d 990, 1000 (9th Cir. 1986)* ("Nor is there any showing that any of the distributors shared with Syufy a common purpose in monopolizing the hardtop theater market in the San Jose area.").

In response, Hu Honua contends that NextEra's specific intent to monopolize can be inferred from the FAC's allegations that HELCO "has an incentive to favor its own generation over that of competitor power generation," FAC ¶ 142, and that incentive is shared by NextEra as part of its own business strategy. ECF No. 109, Opp'n at 33. Hu Honua emphasizes the FAC's allegations that, during the same time-frame as the proposed NextEra/HEI Merger Agreement, HECO (1) terminated three pending solar power purchase agreements on Oahu (similarly to HELCO's cancellation of Hu Honua's PPA), and (2) submitted plans to the Hawaii PUC to convert some power plants on Oahu to liquefied natural gas, FAC ¶¶ 128, 131, where NextEra also has natural gas assets, and planned to "help HECO execute on plans to bring liquid natural gas to Hawaii" with the merger. FAC ¶ 55 (citation omitted).

But even assuming the FAC adequately alleges that the *Hawaiian Electric Defendants* possessed or sought a monopoly in the relevant power production **[*23]** market, there are no facts pled that would suggest *NextEra* specifically intended to monopolize that market, merely by consenting to HELCO's termination of the Hu Honua PPA. *See* *Rebel Oil Co., 51 F.3d at 1438 n.8* ("[I]t is not enough to show that [a defendant] merely agreed to go along."); *Syufy Enters., 793 F.2d at 1000* ("[A] supplier who licenses a product to another does not join the licensee in a conspiracy to monopolize merely because the licensee turns around and exploits the license for its own monopolistic purposes.").

In this regard, it is not enough to suggest—as Hu Honua does—that NextEra shared a motive to increase prices or profits with a similar strategy. *See, e.g.,* *In re Baby Food Antitrust Litig., 166 F.3d 112, 133 (3d Cir. 1999)* (rejecting argument, in a price-fixing context, that a motive to achieve higher prices could demonstrate conspiracy because if that were true "every company in every industry would have such a 'motive.'"). "Motivation to enter a conspiracy is never enough to establish a traditional conspiracy." VI Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 1411 (4th ed. 2017).[11]

b. No antitrust injury

More important, even if the FAC alleged enough factual content to support an inference that NextEra specifically intended to **[*24]** monopolize the market for wholesale firm power on the Big Island, the *§ 2* conspiracy claim nevertheless fails for lack of the fourth element — "causal antitrust injury." *Paladin Assocs., Inc., 328 F.3d at 1158*. To establish such injury, Hu Honua must allege facts that show "(1) unlawful conduct, (2) causing an injury to [Hu Honua], (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)* (quoting *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999))*. The inquiry focuses on injury to "competition not competitors." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*; *see also Paladin Assocs., Inc., 328 F.3d at 1158* ("Where the defendant's conduct harms the plaintiff without adversely affecting competition generally, there is no antitrust injury."). This requirement stems from "the principle that the antitrust laws' prohibitions focus on protecting the competitive process and not on the success or failure of individual competitors." *Cascade Health Sols., 515 F.3d at 902* (citations omitted).

Applying these principles, the FAC's allegations of harm to the "competitive process" in the market for wholesale firm power on the Big Island are implausible. Notably, as alleged in the FAC, Hu Honua's biomass power plant was a "Qualifying Facility under the federal Public Utility Regulatory Policies Act ("PURPA")[.]" FAC ¶ 45. As **[*25]** such a facility, "Hu Honua was entitled to receive special rate and regulatory treatment." *Id.* (Indeed, the Hu Honua PPA was negotiated under a *waiver* by the PUC from its competitive bidding framework. FAC ¶ 49).

PURPA was enacted in 1978, among other reasons, to "ensure sustained long-term economic growth by shifting the nation's reliance on oil and gas to more abundant domestically produced fuels." *Greensboro Lumber Co. v. Georgia Power Co., 643 F. Supp. 1345, 1371 (N.D. Ga. 1986)* (citation omitted). To support development of non-traditional generating facilities, PURPA and its implementing regulations

> require electric utilities (a) to sell electric energy and capacity to qualifying facilities upon request, (b) to purchase electric energy and capacity from qualifying facilities and (c) to make all necessary interconnections with any qualifying facility in order to accomplish the aforementioned purchases and sales provided that each qualifying facility pay its share of the interconnection costs.

Id. at 1372 (footnotes omitted). PURPA's "regulations mandate that an electric utility offer a qualifying facility built after the enactment of PURPA a purchase rate equal to, but no more than, the utility's 'full avoided costs.'" *Id.* (citations and footnote omitted); *see also Schuylkill Energy Res., Inc. v. Penn. Power & Light Co., 113 F.3d 405, 411 (3d Cir. 1997)* ("Pursuant **[*26]** to regulations promulgated . . . under the authority of PURPA, PP&L is required to purchase electric energy from SER."). The Hu Honua PPA contained such power-purchase provisions. *See* FAC ¶ 46.

Effectively, then, Hu Honua does not (or would not) "compete" in the power production market with its qualifying facility, and thus competition could not be harmed by termination of its PPA (even if the FAC otherwise states a claim for breach of contract against HELCO). As *Greensboro Lumber Co.* explained

> In establishing PURPA . . . Congress did not intend to place qualifying facilities in competition with public utilities. To the contrary, Congress has sought to encourage the development of qualifying facilities by insulating them from competition. Qualifying facilities are not authorized under PURPA to sell at retail.

---

[11] Furthermore, as analyzed in detail when the court considers Count Two to follow in discussion section B.2.a, the FAC's allegations that NextEra totally controlled HELCO's decisions after the Merger Agreement lack plausibility and thus cannot form the basis of NextEra's specific intent to monopolize.

643 F. Supp. at 1373 (citation omitted); *see also* *Schuylkill Energy Res., 113 F.3d at 415* (finding no antitrust injury for PURPA power-producer, primarily because "state and federal laws prohibit [plaintiff] from competing in the relevant market"); *Kamine/Besicorp Allegany L.P. v. Rochester Gas & Elec. Corp., 908 F. Supp. 1194, 1207 (W.D.N.Y. 1995)* (finding no likelihood of an antitrust injury at a preliminary injunction stage, reasoning in part that "[t]he PPA, which [PURPA-producer] Kamine is attempting to enforce, was not created as **[*27]** a result of market forces or a competitive process; it is a creature of a statutory scheme [(PURPA)] set up for reasons that have nothing to do with competition *per se*"); *Crossroads Cogeneration Corp. v. Orange & Rockland Utils., Inc., 969 F. Supp. 907, 915 (D.N.J. 1997)* (finding no antitrust injury in action brought by PURPA-producer, reasoning that "Defendant's actions may have caused injury to plaintiff, but they did not cause injury to competition in a defined market [and was] not the sort of injury the antitrust laws were meant to prevent"), *rev'd on other grounds*, *159 F.3d 129 (3d Cir. 1998))*. "PURPA was created as a vehicle to reduce the nation's dependency on foreign oil and to conserve energy, not to foster competition." *Kamine/Besicorp Allegany L.P., 908 F. Supp. at 1204*.[12]

Hu Honua attempts to distinguish this authority by arguing that it is not claiming harm to competition in the *retail* market (i.e., energy to consumers who pay HELCO for electricity), but rather harm to competition in the wholesale market for firm power to HELCO.[13] But Hu Honua is largely not a competitor with HELCO in that market either—Hu Honua would have been HELCO's *supplier*, with HELCO in turn providing electricity to retail rate-paying consumers. *See* *Schuylkill Energy Res., 113 F.3d at 415* (rejecting argument that defendant's policy of favoring its owned-power producers over an independent producer could **[*28]** harm competition because "[plaintiff] is not [defendant's] *competitor*—it is [defendant's] *supplier*").

The court also recognizes that HELCO is also a supplier to itself (through HELCO-owned power plants). But it is difficult to find plausible harm to competition from Hu Honua in that limited "market," even considering that HEP also provides wholesale power with its independent fossil-fuel **[*29]** power plant. Indeed, the cases cited previously also found no antitrust injury where independent power producers also claimed harm in wholesale markets. *Greensboro Lumber Co.* reasoned that,

> [I]n the wholesale market, PURPA establishes a guaranteed price which is equal to, or greater than, the price that would be received in a competitive market. In addition to providing a guaranteed price to qualifying

---

[12] The court is not suggesting that, just because Hu Honua's facility was a qualifying facility under PURPA, the antitrust laws can never apply. *See* *16 U.S.C. § 2603(1)* ("Nothing in this Act or in any amendment made by this Act affects — (1) the applicability of the antitrust laws to any electric utility[.]"). Rather, "while PURPA was not intended to *protect* utilities from the reach of the antitrust laws, neither was it meant to *create* antitrust liability where none existed previously. In short, PURPA was designed to be antitrust-neutral." *Kamine/Besicorp Allegany L.P., 908 F. Supp. at 1204*. And, in this instance, "[h]owever consonant with PURPA's aims it may be to shield a [qualifying facility] like [plaintiff's] from price competition, that end is not something that the antitrust laws were designed to protect." *Id. at 1205*.

[13] Nevertheless, the FAC's allegations of antitrust injury rely in significant part on harm to retail consumers. Specifically, the FAC alleges that:

> HELCO's anticompetitive acts have caused substantial economic injury to Hu Honua and have also injured competition in the relevant markets by, inter alia, foreclosing, lessening, and eliminating potential competition *and depriving consumers from securing lower rates paid for power*.

FAC ¶ 151 (emphasis added).

> The aforesaid conduct of HELCO has produced antitrust injury to Hu Honua, competition, and consumers, and unless enjoined by this Court, will continue to produce at least the following anticompetitive, exclusionary and injurious effects upon competition in interstate commerce:
>
> (a) competition for the wholesale generation of power on the Island of Hawaii has been substantially and unreasonably restricted, lessened, foreclosed, and eliminated, *and consumers will be forced to pay supra-competitive prices for power as a result*;

FAC ¶ 152 (emphasis added).

> facilities, PURPA also provides a guaranteed market for the power generated by qualifying facilities by making it a requirement that utilities purchase available energy and capacity from qualifying facilities before buying power from anywhere else; *no amount of price cutting or other competition can change this result*.

643 F. Supp. at 1373 (emphasis added). "In general, qualifying facilities produce a component which is used by public utilities and consume utility service; but, they are not competitors of public utilities." *Id.; see also* *Schuylkill Energy Res., 113 F.3d at 416-17*; *Kamine/Besicorp Allegany, 908 F. Supp. at 1203-05*. *But cf.* *Long Lake Energy Corp. v. Niagara Mohawk Power Corp., 700 F. Supp. 186, 188 (S.D.N.Y. 1988)*.

Additionally, the primary "antitrust injury" that Hu Honua alleges from the purported loss of competition for wholesale generation of power — "consumers will be forced to pay supra-competitive prices for power as a result," FAC ¶ 152(a) — is not only speculative **[*30]** (depending upon an assumption, for example, that "fossil fuel costs on the Island of Hawaii could exceed $250 per barrel by 2037 and over $300 per barrel by 2045," FAC ¶ 122) but is also largely controlled by the Hawaii PUC. *See* *HRS § 269-16(a)* ("All rates, fares, charges, classifications, schedules, rules, and practices made, charged, or observed by any public utility or by two or more public utilities jointly shall be just and reasonable and shall be filed with the public utilities commission."); *HRS § 269-16.22* ("All power purchase costs, including costs related to capacity, operations and maintenance, and other costs that are incurred by an electric utility company, arising out of power purchase agreements that have been approved by the public utilities commission and are binding obligations on the electric utility company, shall be allowed to be recovered by the utility from the customer base of the electric utility company through one or more adjustable surcharges, which shall be established by the public utilities commission."). This alleged injury "is simply too speculative to permit relief under the antitrust laws." *City of Pittsburgh v. W. Penn Power Co., 147 F.3d 256, 269 (3d Cir. 1998)*; *see also* *Schuylkill Energy Res., 113 F.3d at 414* ("[W]hether and to what extent [the utility] maintains an artificially high **[*31]** rate base [by favoring its own facilities] is not within the purview of the antitrust laws," and "[d]epriving consumers of 'energy sources' is not, however, cognizable antitrust injury.").

"[T]he Sherman Act does not attack every monopoly." *Alaska Airlines, Inc. v. United Airlines, Inc., 948 F.2d 536, 547 (9th Cir. 1991)* (citations omitted). That is, "[t]he antitrust laws tolerate both efficient monopolies and natural monopolies." *Id. at 548* (citation omitted). "Government regulation, as opposed to treble damages and criminal liability under the Sherman Act, is generally thought to be the appropriate remedy for difficulties posed by natural monopolies." *Id.* (citations omitted). And here, Hu Honua has alleged anticompetitive behavior in a highly regulated industry. This context is important.

The court is not suggesting that PUC involvement *necessarily* immunizes any of the Defendants from antitrust laws, but "the structure of [a] regulated industry" may create a "lack of antitrust standing." *West Penn Power Co., 147 F.3d at 269* (acknowledging that regulated industries such as utilities are not exempt from antitrust laws under *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*, but finding no antitrust injury in a suit challenging aspects of a merger between two electric utilities controlled by the Pennsylvania Public Utility Commission). *West Penn Power Co.* reasoned **[*32]** in part that "the comprehensive regulatory framework significantly restricts the nature of the competition which is permitted." *Id. at 263*.

In actuality, then—as most of the FAC alleges, *see, e.g.*, FAC ¶¶ 38-51, 58-89, 101-126, 166-184—this is little if anything more than a breach of contract action between Hu Honua and HELCO. The fundamental dispute revolves around HELCO's alleged breach of the Hu Honua PPA by unreasonably withholding milestone-date extensions, or otherwise wrongfully terminating that contract. FAC ¶¶ 60, 65, 110-11, 168-71. "As the First Circuit has observed, '[s]ome antitrust cases are intrinsically hopeless because . . . they merely dress up in antitrust garb what is, at best, a business tort or contract violation.'" *Procaps S.A. v. Patheon, Inc., 845 F.3d 1072, 1087 (11th Cir. 2016)* (quoting *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 69 (1st Cir. 2004))*. And this is such a case.

Like *Schuylkill Energy Resources*, "[t]he fundamental dispute between [Hu Honua] and [HELCO] concerns the interpretation of the Power Purchase Agreement . . . and should be resolved pursuant to common-law contract principles," not through the antitrust laws. *113 F.3d at 418*. Like *Kamine/Besicorp Allegany L.P.*, "whether [HELCO] has breached the PPA or not, [Hu Honua] has not sufficiently demonstrated an *antitrust* injury[.]" *908 F. Supp. at 1208*. And like *Crossroads* ***[*33]*** *Cogeneration*, "[HELCO's] actions may have caused injury to plaintiff, but they did not cause injury to competition in a defined market. This is not the sort of injury the antitrust laws were meant to prevent." *969 F. Supp. at 915*.

Moreover, outside the utility context, Ninth Circuit authority is also on point — Hu Honua "has [at best] suffered a breach of contract, not an antitrust injury." *Orion Pictures Distrib. Corp. v. Syufy Enters., 829 F.2d 946, 949 (9th Cir. 1987)* (reasoning that, where duties were fixed by "contractual commitment" prior to the alleged anticompetitive behavior, "competition was no longer a factor in determining [defendant's] obligation," such that "[plaintiff's] injury does not reflect the anticompetitive effect of [defendant's] alleged monopolization.") (internal quotation marks omitted). As NextEra points out, ECF No. 73-1, Mot. at 24, the "antitrust" damages Hu Honua seeks ("the loss of revenue and profits that would otherwise have been earned from wholesale power generation on the Island of Hawaii," "the loss of market share," loss of "invested capital in its 50% completed Facility," FAC ¶¶ 154-55) appear to be the same damages it seeks in Count Three for breach of contract. *See* FAC ¶ 172.

In short, the claim fails for lack of antitrust injury. Count One **[*34]** is dismissed as to NextEra.

B. Count Two (Restraint of Trade) Fails to State a Plausible Claim Under *15 U.S.C. § 1* Against Either NextEra or HEP

Count Two seeks treble damages under *15 U.S.C. § 15(a)* against all Defendants based on alleged violations of *§ 1* of Sherman Act, *15 U.S.C. § 1*, which prohibits conspiracies "in restraint of trade or commerce." To state such a claim, "[a plaintiff] must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition." *Kendall, 518 F.3d at 1047* (citation omitted). And, to reiterate, "[a]llegations of facts that could just as easily suggest rational, legal business behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws." *Id. at 1049*.

Count Two alleges, in pertinent part, that "the coordinated and collective actions of Defendants HELCO, HECO, HEI, NextEra, and HEP have had the purpose and effect of eliminating or substantially restricting competition **[*35]** in the market for wholesale firm power generation and raising the price of power above competitive levels by eliminating sources of less expensive power where HELCO is required to dispatch lower cost sources." FAC ¶ 159. "These arrangements have had, and continue to have, the effect of unreasonably restraining competition in the market for wholesale firm power generation on the Island of Hawaii." *Id.* ¶ 160.

1. No Antitrust Injury

Count Two fails (against both NextEra and HEP) for the same primary reason that Count One fails — lack of antitrust injury (the third element reiterated in *Kendall*, a conspiracy that "actually injures competition"). *See, e.g., Am. Ad Mgmt., Inc., 190 F.3d at 1055* (requiring antitrust injury in a *§ 1* action). That is, antitrust injury is required for both a *§ 1* claim and a *§ 2* claim. *See, e.g., Glen Holly Entm't, Inc., 343 F.3d at 1007-08*. Stated differently, "causal antitrust injury . . . is an element of all antitrust suits brought by private parties seeking damages under *Section 4* of the Clayton Act." *Rebel Oil, 51 F.3d at 1433* (citation omitted). The previous analysis explaining the lack of such injury for a *§ 2* claim applies equally to the *§ 1* claim here, which alleges the same "antitrust injury" as Count One, FAC ¶ 162, including "inflated prices for power, and consumers [being] forced **[*36]** to pay supra-competitive prices for power."

In this regard, HEP adds another persuasive reason for lack of the requisite harmful effect on competition. The FAC alleges facts indicating that the Hu Honua PPA offered *higher* prices than other "competition," and was terminated by HELCO after Hu Honua failed to meet HELCO's demand for sufficient price reductions when seeking contract-deadline extensions. FAC ¶¶ 64, 67-71. Termination of a higher priced supplier, without more, is not antitrust injury.

According to the FAC, because Hu Honua's PPA was cancelled, Hu Honua stands to lose profits of $435 million over a 20-year PPA term. FAC ¶ 165. But "the threat of loss of profits due to possible price competition following a merger does not constitute a threat of antitrust injury." *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 117, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. And if Hu Honua did not present a "lower-cost alternative," damage from cancellation of its contract for nonperformance is not antitrust injury. *See, e.g.,* *Indeck Energy Servs., Inc. v. Consumers Energy Co., 250 F.3d 972, 977 (6th Cir. 2000)* (finding no antitrust injury, reasoning in part that marketplace competitors "must at least allege that exclusion of the competitor from the marketplace results in the elimination of a superior product or a lower-cost alternative").

2. A Lack of Plausibility

[*37] Count Two is deficient for another reason as well—fundamentally, it fails to allege a plausible illegal "contract, combination, or conspiracy" to restrain trade.

a. The § 1 claim against NextEra

As to NextEra, Hu Honua bases its conspiracy theory on allegations that NextEra controlled the HEI Defendants after the NextEra/HEI Merger Agreement. Specifically, the FAC alleges that, after the Merger Agreement was signed, NextEra controlled HELCO's decision regarding termination of the Hu Honua PPA, and HECO's termination of three solar power projects on Oahu. *See, e.g.*, FAC ¶¶ 63, 132-34.

These allegations of control, however, are insufficient to establish a *§ 1* conspiracy claim as to NextEra. Hu Honua relies on the Merger Agreement itself. FAC ¶ 56; *See* Pl.'s NextEra Opp'n at 26-27; ECF No. 109 at 35-36 (arguing that "Hu Honua unquestionably connects NextEra to Defendants' scheme. . . . The Merger Agreement alone connects NextEra"). In particular, it bases the control allegation on express language in the Merger Agreement that required NextEra's "prior written consent" before HEI, HECO, or HELCO could, among other things, "(1) enter into, terminate or amend in any material respect any material Contract, **[*38]** [or] (2) consent to any extension or continuation or any material Contract[.]" FAC ¶ 56; NextEra Mot., Ex.A, ECF No. 73-3 at 5, 9. But that Merger Agreement also specifically *precludes* such control by NextEra. *See* ECF No. 73-3 at 10 (paragraph 5.01(c) ("No Control of [HEI's] Business. [NextEra] acknowledges and agrees that (i) nothing contained in this Agreement is intended to give [NextEra], directly or indirectly, the right to control or direct the operations of [HEI] or an [HEI] Subsidiary prior to the Effective Time and . . . prior to the Effective Time, [HEI] shall exercise, consistent with the terms and conditions of this Agreement, complete control and supervision over its and [HEI's] Subsidiaries' respective operations."). And the FAC fails to allege *facts* indicating that NextEra violated that preclusive language.[14]

Moreover, NextEra could not have withheld consent to HELCO's actions without good reason because, under § 5.01(a), NextEra's prior written consent "shall not be unreasonably withheld, conditioned or delayed." ECF No. 73-3 at 5. Rather than establishing unbridled control by NextEra (and its joinder in an illegal conspiracy), the contract itself establishes no more than NextEra's **[*39]** routine consent in *HELCO's* decision. That is, the FAC "just as easily suggests rational, legal business behavior" by NextEra, rather than an illegal conspiracy to restrain trade. *See* *Kendall, 518 F.3d at 1049* ("Allegations of facts that could just as easily suggest rational, legal business behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws.").

The FAC's allegations of control by NextEra also lack plausibility given the "obvious alternative explanation" in the FAC that HELCO cancelled the Hu Honua PPA because of Hu Honua's own nonperformance. *See* *Eclectic Props.*

[14] NextEra explains that these types of material-change provisions (which prevent a company from making significant changes to material contracts during the pendency of a merger) are standard terms which protect the parties' legitimate interests in a pre-merger context. *See* NextEra Mot. at 16-17, ECF No. 73-1.

E., LLC, 751 F.3d at 996 (requiring a court to consider an "obvious alternative explanation," when assessing plausibility). The FAC itself details such obvious reasons for HELCO's termination. FAC ¶ 51. Specifically, "[d]uring the construction [of its facility], disputes arose with the Facility construction contractor that became insoluble." *Id.* Hu Honua became involved in extensive litigation with its contractor and vendors, and a separate labor union dispute. *Id.* "[T]he construction contract and labor disputes, together with corresponding financing interruptions, caused an extended loss of time and delayed the **[*40]** completion of construction of the Hu Honua facility[.]" *Id.* "Hu Honua's disputes with its former construction contractor and the labor union jurisdiction dispute caused an irretrievable loss of time in the construction of the Hu Honua Facility. As a result, Hu Honua realized that it would not be able to achieve two milestone[] dates set forth in the PPA[.]" FAC ¶ 58.

Also unavailing is Hu Honua's argument that the FAC's allegations are sufficient under *Starr v. Baca, 652 F.3d 1202 (9th Cir. 2011)*. *Starr* held that "[i]f there are two alternative explanations, one advanced by defendant and the other advanced by plaintiff, *both of which are plausible*, plaintiff's complaint survives a motion to dismiss under *Rule 12(b)(6)*." *Id. at 1216* (emphasis added). Although Hu Honua's theories are not impossible (at least at this stage of the litigation), they are not *plausible*, which is what *Twombly/Iqbal* requires. *See, e.g., In re Century Aluminum Co. Secs. Litig., 729 F.3d 1104, 1108 (9th Cir. 2013)* (distinguishing *Starr* because "[h]ere, [unlike in *Starr*,] plaintiffs' explanation is merely *possible* rather than plausible. To render their explanation plausible, plaintiffs must do more than allege facts that are merely consistent with both their explanation and defendants' competing explanation.") (citing *Iqbal, 556 U.S. at 678*); *Eclectic Props E., LLC, 751 F.3d at 997* ("Applying *Twombly, Iqbal, Starr* ***[*41]*** , and *Century* . . . Plaintiffs have not made the kind of factual allegations that 'nudg[e] their claims across the line from conceivable to plausible.'") (citing *Twombly, 550 U.S. at 570*)).

b. The § 1 claim against HEP

Similarly, the FAC lacks a plausible conspiracy theory as to HEP. The FAC alleges that "[a]s early as 2012, HEP recognized that the proposed Hu Honua facility was a direct competitive threat" and that "as the operator of the largest power plant on [Hawaii] Island . . . [HEP] attempted unsuccessfully to exclude Hu Honua as a competitor in the power generation market [when HELCO applied to the PUC for the approval of the original Hu Honua PPA in 2012]." FAC ¶ 99. "Hu Honua is informed and believes, and on that basis alleges, that HEP participated in and supported the termination of Hu Honua's PPA [in 2015.]" *Id.* But this allegation is deficient as it offers no facts indicating what HEP might have done to "participate[] in and support[] the termination." *See Kendall, 518 F.3d at 1047* ("[T]o allege an agreement between antitrust co-conspirators, the complaint must allege facts such as a 'specific time, place, or person involved in the alleged conspiracies' to give a defendant seeking to respond to allegations of a conspiracy **[*42]** an idea of where to begin.") (quoting *Twombly, 550 U.S. at 565 n.10*).

What's more, the FAC also alleges—in support of its monopolization claim against HELCO—that in 2015 HELCO and HEP agreed for HELCO to acquire HEP's fossil fuel plant for some $88 million. FAC ¶¶ 91-97. That is, HEP was *exiting* the very wholesale power market from which it allegedly sought to eliminate Hu Honua. Whatever these allegations might mean as to HELCO, they are inconsistent as to *HEP's* participation in a conspiracy to restrain trade as to Hu Honua. As HEP argues, "HEP's decision to sell [its] Hamakua Facility in 2015 and exit the relevant market removes any economic incentive for HEP to conspire to terminate the Hu Honua PPA [in 2016.]" HEP Opp'n at 20, ECF No. 95-1 at 27. That is, the FAC's conspiracy theory as to HEP makes no "economic sense." *Adaptive Power Sols., LLC v. Hughes Missile Sys. Co., 141 F.3d 947, 952 (9th Cir. 1998)* ("Antitrust claims must make economic sense") (citing *Eastman Kodak Co. v. Image Tech. Servs. Inc., 504 U.S. 451, 468, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*).

In response, Hu Honua offers an implausible explanation that is not pled in the FAC. It claims that HEP wanted to remove Hu Honua from the wholesale firm power market so that HEP's power plant would become more valuable when selling it. Opp'n at 12-13, ECF No. 108 at 20-21. But nothing in the FAC indicates HEP knew, when it entered into **[*43]** the agreement for HELCO to acquire HEP's facility (in 2015), that HELCO would later (in 2016) terminate the Hu Honua PPA. And, even assuming HEP would want to increase its facility's selling price, why would HELCO be part of that conspiracy to pay more for HEP's facility? Again, the theory makes no economic sense. *See* *Adaptive Power Sols., LLC, 141 F.3d at 952*.

And, as with the *§ 1* claim as to NextEra, the claim as to HEP lacks plausibility when considering the "obvious alternative explanation" pled in the FAC that HELCO terminated the Hu Honua PPA for lack of performance by Hu Honua, and Hu Honua's subsequent refusal to meet HELCO's terms in renegotiating the PPA. *See* *Eclectic Props. E., LLC, 751 F.3d at 996*. Whether or not the FAC adequately alleges that HELCO breached the PPA in unreasonably refusing to approve Hu Honua's requests to extend milestones, there is no plausible antitrust conspiracy theory pled as to NextEra. There are no facts in the FAC suggesting that HEP's decision to sell to HELCO was anything but a rational business decision. *See* *Kendall, 518 F.3d at 1049*.[15]

C. State Law Counts Against NextEra and HEP

Count Seven asserts state-law antitrust or unfair competition claims against all Defendants under HRS chapter 480. Similarly, Count Eight asserts a state-law claim **[*44]** for Tortious Interference with Contract against NextEra. But because the court has dismissed the federal antitrust claims as to NextEra and HEP (and the suit was not based on diversity jurisdiction), the court intends to dismiss both of the state-law claims without prejudice under *28 U.S.C. § 1367(c)(3)* ("The district courts may decline to exercise supplemental jurisdiction over a claim under *subsection (a)* [regarding Article III jurisdiction] if — . . . the district court has dismissed all claims over which it has original jurisdiction[.]"). *See* *Acri v. Varian Assocs., Inc., 114 F.3d 999, 1001 (9th Cir. 1997)* (en banc) ("[I]n the usual case in which all federal-law claims are eliminated before trial, the balance of factors . . . will point toward declining to exercise jurisdiction over the remaining state-law claims.").[16]

But it is premature to dismiss these state-law claims because, under the present procedural posture (where all claims as to the Hawaiian Electric Defendants have been held in abeyance), the Hawaiian Electric Defendants still remain in the action with federal claims against them. That is, the court cannot exercise its discretion under *§ 1367(c)* until it "has dismissed all claims over which it has original jurisdiction." Accordingly, the court DEFERS ruling on Counts Seven **[*45]** and Eight until the conditional settlement as to the Hawaiian Electric Defendants is completely finalized. For administrative purposes, the court DENIES — without prejudice — NextEra's and HEP's Motions to Dismiss as to Counts Seven and Eight.

V. CONCLUSION

Hu Honua's federal antitrust claims lack plausibility as to both NextEra and HEP. The Motions to Dismiss are GRANTED as to Counts One and Two, and those claims are DISMISSED without prejudice. Because the court DEFERS ruling on the state-law claims, the Motions as to Counts Seven and Eight are DENIED without prejudice. The court will allow Hu Honua an opportunity to file a Second Amended Complaint that cures the FAC's deficiencies, if it believes it can do so. *See* *Lopez, 203 F.3d at 1130*. A Second Amended Complaint (or a statement indicating that a Second Amended Complaint will not be filed) is due by **January 29, 2018**.

---

[15] Given that Count Two fails as to HEP for lack of antitrust injury and lack of a plausible conspiracy theory, the court need not reach HEP's alternative argument that its acts are shielded from antitrust scrutiny by the *Noerr-Pennington* or State Action Doctrines.

[16] It is unlikely that the chapter 480 antitrust claims could otherwise survive. *See* *HRS § 480-3* ("This chapter shall be construed in accordance with judicial interpretations of similar federal antitrust statutes[.]"); *Int'l Healthcare Mgmt. v. Haw. Coalition for Health, 332 F.3d 600, 609 (9th Cir. 2003)* ("[Plaintiff's] state antitrust claims fail for the same reasons as their federal claims because Hawaii antitrust statutes are interpreted 'in accordance with judicial interpretations of similar federal antitrust statutes.'") (quoting *HRS § 480-3*). Nevertheless, the court has not fully analyzed the state-law allegations to determine whether the FAC states a claim under chapter 480.

IT IS SO ORDERED.

DATED: Honolulu, Hawaii, December 19, 2017.

Judges: Daniel D. Crabtree, United States District Judge.

Opinion by: Daniel D. Crabtree

Opinion

MEMORANDUM AND ORDER

On September 14, 2017, the court ordered that this MDL proceed on two separate tracks. Doc. 42. This Order affects just one of those tracks—the *Sanofi* case. Plaintiff Sanofi-Aventis U.S. LLC ("Sanofi") is a pharmaceutical company who purportedly competes with defendant Mylan, Inc. Sanofi filed a lawsuit against defendants Mylan, Inc. and Mylan Specialty, L.P. (collectively "Mylan") in the District of New Jersey on April 24, 2017. *Sanofi-Aventis U.S. LLC v. Mylan Inc., et al.*, Case No. 3:17-cv-02763-FLWTJB (D.N.J. Apr. 24, 2017), ECF 1 ("*Sanofi* Complaint"). The *Sanofi* Complaint alleges that Mylan engaged in a variety of anticompetitive conduct designed to prevent Auvi-Q®—a rival product once sold by Sanofi—from gaining access to the epinephrine autoinjector market, and designed to prevent consumers from acquiring Auvi-Q®. Sanofi asserts three claims against Mylan under *Section 2 of the Sherman Antitrust Act*. These claims assert: (1) monopolization through exclusive dealing; (2) deceptive conduct to further monopolization; and (3) an overall scheme to monopolize. Sanofi brings this **[*20]** action only for itself, and not on behalf of any other plaintiffs or putative class members.

On August 3, 2017, the Judicial Panel on Multidistrict Litigation transferred the *Sanofi* case and five others to our court for coordinated and consolidated proceedings. Doc. 1. Before transfer, while the case still was pending in New Jersey, Mylan had filed a Motion to Dismiss the *Sanofi* Complaint. Doc. 43. The motion seeks dismissal under *Federal Rule of Civil Procedure 12(b)(6)* for failing to state a claim. *Id.* After transfer, Sanofi filed in our court its Memorandum in Opposition to the Motion to Dismiss. Doc. 44. And, at the court's Initial Scheduling Conference on September 7, 2017, Sanofi asked the court to place its case on a separate track and decide the pending Motion to Dismiss the *Sanofi* Complaint. The court granted that request, designating the *Sanofi* case on a separate track and ordering Mylan to file any Reply to the pending Motion to Dismiss by October 6, 2017. *See* Doc. 42. Mylan filed its Reply consistent with the court's order. Doc. 57. Thus, the Motion to Dismiss is now fully briefed, and after carefully considering the arguments presented by the parties' filings, the court is prepared to rule. For the reasons explained **[*21]** below, the court grants Mylan's Motion to Dismiss the *Sanofi* Complaint in part and denies it in part.

I. Factual Background

The following facts are taken from the *Sanofi* Complaint. The court accepts the facts asserted in the *Sanofi* Complaint as true and views them in the light most favorable to plaintiff. *Burnett v. Mortg. Elec. Registration Sys., Inc., 706 F.3d 1231, 1235 (10th Cir. 2013)* (citing *Smith v. United States, 561 F.3d 1090, 1098 (10th Cir. 2009))*.

Anaphylaxis is a serious allergic reaction that has a rapid onset and may cause death. Anaphylaxis can result from allergic reactions to foods, pets, insects, or exposure to other allergens. Epinephrine is the recognized first-line treatment for anaphylaxis. One can administer a controlled dose of epinephrine during an anaphylactic episode using an epinephrine auto-injector ("EAI") drug device. Doctors thus recommend that patients at risk for anaphylaxis always carry a portable EAI drug device and have training about its use.

Since 2007, Mylan has marketed and distributed in the United States an EAI drug device known as the EpiPen®. The EpiPen® has been the number-one prescribed EAI drug device in the United States for over 25 years. Indeed, in December 2012, Mylan touted that EpiPen® "has been the number one prescribed epinephrine auto-injector for more than 20 years and constitutes **[*22]** more than 99% of the epinephrine auto-injector market." *Sanofi* Complaint ¶ 3. And, on August 1, 2013, Mylan reported to investors that the EpiPen® had a "93.3% market share." *Id.* ¶ 39.

An EAI drug device gains access to the market almost entirely through contracts with third-party payors—such as commercial insurance companies, pharmaceutical benefit managers, and state-based Medicaid agencies—because a significant majority of patients with prescription drug insurance coverage receive their benefits through third-party payors. From 2013 to 2015, commercial third-party payors accounted for about 71% of the EAI drug device market in the United States. During this same period, state-based Medicaid plans made up another 16% of the EAI drug market. So, from 2013 to 2015, almost 90% of the EAI drug device market in the United States consisted of commercial third-party payors and Medicaid plans.

For a competitor to enter and compete vigorously in the EAI drug device market, it is crucial that it have access to these third-party payors' drug formularies. Third-party payors use formularies to govern a drug's coverage. Commercial third-party payors commonly use tiered formularies, placing drugs **[*23]** on different tiers that establish the enrollee patient's co-pay and create incentives for the enrollee to prefer the lowest cost yet clinically effective drug. Most state-based Medicaid plans use a formulary that distinguishes only between drugs that are covered or not covered. If a drug is not covered under a third-party payor's formulary, the patient probably cannot access the product. Historically, third-party payors covered all available EAI drug devices at difference coverage tiers but, typically, they never excluded EAI drug devices from coverage altogether.

Also, it is common for pharmaceutical companies to provide rebates to third-party payors. In some circumstances, rebates can create a form of price competition that ultimately helps lower prices for end consumers, both for the costs that they pay for prescription drugs and what they pay for health insurance premiums. In some cases, a pharmaceutical company may offer rebates for exclusive coverage on a given third-party payor's drug formulary.

In 2013, Sanofi launched a competing EAI drug device in the United States known as Auvi-Q®. Auvi-Q®'s creators developed the product for patients who were not satisfied with the EpiPen®'s **[*24]** design and wanted something better. After its launch, Auvi-Q® garnered praise for its smaller size and shape that made it more likely that at-risk children and adults would carry their EAI drug device and have it available to treat anaphylaxis. As a result, Auvi-Q® gained traction quickly in the marketplace in the first few months after its launch.

Sanofi launched Auvi-Q® at price parity with EpiPen®. One of the reasons Sanofi chose this pricing point was to ensure that patients would have equal access to Auvi-Q® as they had for EpiPen®. Sanofi wanted to avoid giving formularies an incentive to provide preferential treatment to a lower-priced drug. Thus, Sanofi chose to offer Auvi-Q® at a price competitive with EpiPen®. In response to the competitive threat posed by Auvi-Q®, Mylan began erecting artificial barriers to consumers' access to and use of Auvi-Q® in the United States. Mylan did so in several ways.

First, shortly after Sanofi launched Auvi-Q®, Mylan began to offer large rebates (30% or higher) to third-party payors. But, Mylan expressly conditioned the rebates on exclusivity. That is, Mylan required the third-party payors to exclude Auvi-Q® from the formularies and only offer **[*25]** EpiPen® to their enrollees.[1] Using its monopoly market share and these large rebates, Mylan successfully coerced third-party payors to accept huge rebates in exchange for offering EpiPen® exclusively instead of foregoing those rebates and allowing Auvi-Q® to compete in the market.

According to Sanofi, Mylan subsidized its large exclusionary rebates by misclassifying the EpiPen® to the federal and state governments. By misclassifying the EpiPen®, Mylan paid substantially less in required rebates for

[1] Sanofi alleges that Mylan blocked Auvi-Q® from all third-party payor formularies. But on at least some formularies, Mylan allowed other EAI drug devices to remain, just not Auvi-Q®.

patients covered by Medicaid. And, with those savings, Mylan, in turn, was able to offer the large rebates to third-party payors conditioned on their excluding Auvi-Q®. Mylan also drove up EpiPen®'s price in the years leading up to Sanofi's launch of Auvi-Q®. Since 2007, EpiPen®'s price has increased by more than 500%. According to Sanofi, one purpose for the price increase was to help Mylan absorb the large conditional discounts it offered to third-party payors who excluded Auvi-Q®.

Sanofi could not match Mylan's large rebates unless it offered rebates in excess of its revenues from Auvi-Q®. That is, Sanofi would lose money on its sales of Auvi-Q® if it tried to compete against EpiPen® in **[*26]** the market. With its rebate program, Mylan successfully blocked Auvi-Q® from accessing almost 50% of the United States EAI drug device market. In some states, where the number of third-party payors who did not cover Auvi-Q® was over-represented, Auvi-Q® was blocked from an even higher percentage of the market.

Second, Mylan imposed contractual exclusivity provisions in its schools programs. Both Mylan and Sanofi had programs designed to provide free or discounted EAI drug devices to schools. But, unlike Sanofi, Mylan required schools taking part in its discounted EpiPen® program to certify in writing that the school would not purchase any products that compete with the EpiPen® within the next year. According to Sanofi, Mylan's contractual exclusivity term had one purpose: to prevent schools from having access to Auvi-Q®. Mylan later eliminated its school programs' exclusivity policy after the New York Attorney General and other legal commentators questioned whether it violated the antitrust laws.

Third, after the Auvi-Q® launch, Mylan started offering consumers $0 co-pay coupons for the EpiPen®. Sanofi also offered $0 co-pay coupons for Auvi-Q®. But, because of Mylan's rebate offers **[*27]** to third-party payors, most of Auvi-Q®'s coverage—even when it was on the same drug formulary with the EpiPen®—was at a less preferential tier. This typically meant the copay for an EpiPen® was $25 and the co-pay for Auvi-Q® was $50 to $75. As a result, Sanofi was forced to absorb two to three times the cost Mylan absorbed when offering the $0 co-pay to consumers. In this way, Mylan drove up Sanofi's costs to cover patients' co-pays.

Finally, Mylan created and spread misinformation about Auvi-Q® and its bioequivalence to EpiPen®, even though the United States Food & Drug Administration had determined that the epinephrine used in Auvi-Q® was bioequivalent to the EpiPen®'s epinephrine. Mylan also marketed physicians, contending that Auvi-Q® was not covered under third-party payors' formularies and suggesting that the decision to exclude Auvi-Q® from the formularies was based on clinical recommendation—and not Mylan's huge, conditional rebate offers.

In the first six months after Sanofi launched Auvi-Q®, Sanofi's market shares tracked its projected market shares. And, Auvi-Q®'s market share was poised to continue to grow. But, as a result of Mylan's conduct, Auvi-Q®'s market share decreased **[*28]** dramatically. By the end of 2013 and into 2014, Auvi-Q®'s market share was about half of its projected market share. And, by October 2015, Auvi-Q®'s national market share was less than half of what Sanofi had projected. But, in Canada, Auvi-Q® (known there as Allerject®) had a stronger performance, even though EpiPen® similarly dominated the Canadian EAI drug device market before Sanofi had launched the Allerject® there. In Canada, provincial authorities control drug formularies, the Allerject® was treated at parity with the EpiPen®, and the two devices were equally available for physicians to prescribe to consumers. By the end of 2013—its first year on the Canadian market—Allerject® exceeded its projections, growing to 21% market share. In 2014 and 2015, Allerject® continued to gain market share. It reached 25% market share by the end of 2014, and it peaked at 32% market share in 2015.

In October 2015, Sanofi undertook a voluntary recall of Auvi-Q® following reports of manufacturing issues with some devices. Sanofi never relaunched Auvi-Q®. Instead, in February 2016, Sanofi returned the rights in the drug to kaléo, inc. Sanofi asserts, though, that Mylan's conduct contributed to Sanofi's **[*29]** decision to forego its investment in Auvi-Q® and return its rights to kaléo, inc. Sanofi also alleges that Mylan's conduct cost it hundreds of millions of dollars in lost sales within the United States EAI drug device market.

II. Legal Standard

Fed. R. Civ. P. 8(a)(2) provides that a complaint must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." Although this Rule "does not require 'detailed factual allegations,'" it demands more than "[a] pleading that offers 'labels and conclusions' or 'a formulaic recitation of the elements of a cause of action'" which, as the Supreme Court explained, "will not do." Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)).

When considering a motion to dismiss under Federal Rule of Civil Procedure 12(b)(6), the court must assume that the factual allegations in the complaint are true. *Id.* (citing Twombly, 550 U.S. at 555). But, the court is "'not bound to accept as true a legal conclusion couched as a factual allegation.'" *Id.* (quoting Twombly, 550 U.S. at 555). "'Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice'" to state a claim for relief. Bixler v. Foster, 596 F.3d 751, 756 (10th Cir. 2010) (quoting Iqbal, 556 U.S. at 678). Also, the complaint's "[f]actual allegations must be enough to raise a right to relief above the speculative level." Twombly, 550 U.S. at 555 (citations omitted). **[*30]**

For a complaint to survive a motion to dismiss under Rule 12(b)(6), the pleading "must contain sufficient factual matter, accepted as true, to 'state a claim for relief that is plausible on its face.'" Iqbal, 556 U.S. at 679 (quoting Twombly, 550 U.S. at 570). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id. at 678 (citing Twombly, 550 U.S. at 556). "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (quoting Twombly, 550 U.S. at 556); *see also* Christy Sports, LLC v. Deer Valley Resort Co., Ltd., 555 F.3d 1188, 1192 (10th Cir. 2009) ("The question is whether, if the allegations are true, it is plausible and not merely possible that the plaintiff is entitled to relief under the relevant law." (citation omitted)).

In the antitrust context, the Supreme Court observed in *Twombly* that "proceeding to antitrust discovery can be expensive." Twombly, 550 U.S. at 558 (applying the plausibility pleading standard to Sherman Act claims). So, courts must "'insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed.'" *Id.* (quoting Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 528 n.17, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)). But, still, antitrust cases are not subject to a standard requiring "heightened fact pleading of **[*31]** specifics." Id. at 570. Instead, an antitrust Complaint must allege "only enough facts to state a claim to relief that is plausible on its face" sufficient to "nudge[] the[] claims across the line from conceivable to plausible." *Id.; see also* In re Urethane Antitrust Litig., 663 F. Supp. 2d 1067, 1074 (D. Kan. 2009) (explaining on a Rule 12(b)(6) motion to dismiss antitrust claims that "the Court must ensure that plaintiffs have alleged facts to support those elements sufficient to provide the 'heft' to show an entitlement to relief and to 'nudge' plaintiffs' claims over the line from mere[] possibility or speculation to plausibility" (quoting Twombly, 550 U.S. at 557, 570)).

The court's analysis, below, applies this governing standard to Mylan's Rule 12(b)(6) dismissal arguments.

III. Analysis

Mylan asserts that Sanofi's three claims under Section 2 of the Sherman Antitrust Act fail to state plausible claims for relief. "Section 2 of the Sherman Act prohibits actions by 'person[s] who shall monopolize, [or] attempt to monopolize . . . any part of the trade or commerce.'" Cohlmia v. St. John Med. Ctr., 693 F.3d 1269, 1280 (10th Cir. 2012) (quoting 15 U.S.C. § 2). To state a claim under Section 2, a plaintiff must plead facts that, if true, make two elements plausible. They are: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or **[*32]** development as a consequence of a superior product, business acumen, or historic accident." United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966).

Mylan's papers never assert that Sanofi has failed to allege the first element of a Sherman *§ 2* claim—*i.e.*, monopoly power in the relevant market. Indeed, the *Sanofi* Complaint alleges that the relevant product market is EAI drug devices, that this market has high barriers to entry, and that Mylan has monopoly power in that market with a share market exceeding 90%. *Sanofi* Complaint ¶¶ 39, 116, 123, 126-34. So, Sanofi has alleged facts sufficient to establish that Mylan possessed monopoly power in the relevant market, thus satisfying the first element of its Sherman *§ 2* claims.

Instead, Mylan asserts that Sanofi has not satisfied the second element of a Sherman *§ 2* claim. Specifically, Mylan argues that the Complaint fails to allege facts sufficient to make a plausible showing of Mylan's willful acquisition or maintenance of its monopoly power. Mylan thus asks the court to dismiss the *Sanofi* Complaint under *Federal Rule of Civil Procedure 12(b)(6)* for failing to state a claim. Mylan asserts five principal arguments in support of its request. The court addresses each argument, in turn, in subsections A through E, below.

A. Does the *Sanofi* Complaint [*33] State a Claim for Unlawful Exclusive Dealing Based on Mylan's Rebate Offers?

First, Mylan contends that the *Sanofi* Complaint fails to state a plausible Sherman Act claim based on Mylan's rebate offers. Mylan asserts two arguments to support its contention. First, Mylan contends that Sanofi's exclusive dealing claim fails as a matter of law because the Complaint never alleges that Mylan's rebates priced the EpiPen® below its costs to produce it. Second, Mylan argues that the *Noerr-Pennington* doctrine bars Sanofi's exclusive dealing claim to the extent Sanofi bases it on discounts or rebates offered to state or state agencies. The court addresses each argument separately. As explained below, the court finds Mylan's first argument unpersuasive. But the court agrees with Mylan's second argument.

1. The *Sanofi* Complaint alleges facts about Mylan's rebate offers to non-governmental third-party payors that plausibly state a claim for exclusive dealing in violation of the Sherman Antitrust Act.

Mylan asserts that Sanofi fails to state a claim for relief based on Mylan's rebate offers because the Complaint never alleges that Mylan's offers resulted in prices below the cost of production. Indeed, **[*34]** the Supreme Court has recognized that "[l]ow prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition." *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 223, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (citation and internal quotation marks omitted). The Supreme Court has explained that "the exclusionary effect of prices above a relevant measure of cost . . . reflects the lower cost structure of the alleged predator, and so represents competition on the merits . . . ." *Id.* The Supreme Court thus has refused "[t]o hold that the antitrust laws protect competitors from the loss of profits due to such price competition" because such a ruling "would, in effect, render illegal any decision by a firm to cut prices in order to increase market share." *Id.* And, "[t]he antitrust laws require no such perverse result." *Id.*

So, the Supreme Court requires a plaintiff in a predatory pricing case to allege two things: (1) that "the prices complained of are below an appropriate measure of its rival's costs;" and (2) that "the competitor had a reasonable prospect, or, under *§ 2 of the Sherman Act*, a dangerous probability, of recouping its investment in below-cost prices." *Id. at 222, 224* (citations omitted). Mylan argues that **[*35]** Sanofi's claim here fails as a matter of law because the Complaint never alleges facts capable of supporting the first requirement of this test—that Mylan's rebate offers resulted in prices that were below its costs to produce the EpiPen®.

Sanofi responds to Mylan's argument, asserting that this is not a predatory pricing case. Instead, Sanofi explains that its rebate claim is based on Mylan's allegedly unlawful exclusive dealing arrangements that, Sanofi contends, violate the Sherman Antitrust Act. Thus, Sanofi argues, the price-cost test does not apply here.

The Third Circuit addressed the question whether the price-cost test applies to an alleged anticompetitive rebate program in *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254 (3d Cir. 2012)*.[2] *ZF Meritor* recognized that "a plaintiff's characterization of its claim as an exclusive dealing claim does not take the price-cost test off the table." *Id. at 275*. Instead, the price-cost test still may apply because "contracts in which discounts are linked to purchase (volume or market share) targets are frequently challenged as *de facto* exclusive dealing arrangements on the grounds that the discounts induce customers to deal exclusively with the firm offering the rebates." *Id.* So, "when price is the clearly predominant **[*36]** mechanism of exclusion, the price-cost test tells us that, so long as the price is above-cost, the procompetitive justifications for, and the benefits of, lowering prices far outweigh any potential anticompetitive effects." *Id.*

But the Third Circuit refused to apply the price-cost test in *ZF Meritor* because plaintiffs "did not rely solely on the exclusionary effect of [defendant's] prices" to support their exclusive dealing claim. *Id. at 277*. Instead, plaintiffs "highlighted a number of anticompetitive provisions" in the exclusive dealing agreements, including plaintiffs' allegation that defendant "used its position as a supplier of necessary products to persuade [customers] to enter into agreements imposing de facto purchase requirements of roughly 90% for at least five years, and that [defendant] worked in concert with [customers] to block customer access to Plaintiffs' products, thereby ensuring that Plaintiffs would be unable to build enough market share to pose any threat to [defendant's] monopoly." *Id.* The Third Circuit thus concluded that "price itself was not the clearly predominant mechanism **[*37]** of exclusion," and so the price-cost test did not apply to preclude plaintiffs' exclusive dealing claim. *Id.*

Applying *ZF Meritor*, other courts also have refused to apply the price-cost test to exclusive dealing claims when price itself was not the clearly predominant mechanism of exclusion. *See, e.g.*, *Dial Corp. v. News Corp., 165 F. Supp. 3d 25, 32 (S.D.N.Y. 2016)* (denying summary judgment against plaintiffs' exclusive dealing claim and holding that the price-cost test did not apply because price was not the "clearly predominant method of exclusion" but, instead, "the length of the exclusive contracts and their staggered terms may also foreclose competition"); *see also* *UniStrip Techs., LLC v. LifeScan, Inc., 153 F. Supp. 3d 728, 737 (E.D. Pa. 2015)* (holding that the price-cost test did not apply to plaintiff's exclusive dealing claim because plaintiff's Complaint never alleged that price was defendant's means of exclusion; instead, plaintiff based its exclusive dealing claim on defendant's allegedly anticompetitive predatory conduct through use of exclusive dealing arrangements preventing competitors from entering the market).

Here, viewing its allegations in the light most favorable to Sanofi, the court concludes that the Complaint does not rely "solely on the exclusionary effect of [Mylan's] prices" to support its exclusive **[*38]** dealing claim based on Mylan's rebate program. *ZF Meritor, 696 F.3d at 277*. The *Sanofi* Complaint alleges that Mylan leveraged its greater than 90% market share by offering unprecedented rebates to third-party payors (30% or higher) but expressly conditioned those rebates on excluding Auvi-Q®. *Sanofi* Complaint ¶¶ 6, 57. That is, in exchange for the large rebates, Mylan required the third-party payors to exclude Auvi-Q® from the drug formularies and offer only EpiPen® to enrollees. *Id.* ¶¶ 6, 59. The Complaint also alleges that Mylan specifically targeted Auvi-Q®, allowing some other EAI drug devices to remain on at least some third-party payors' formularies but requiring exclusion of Auvi-Q®. *Id.* ¶ 59. Sanofi alleges that no legitimate business reason existed for Mylan's deep conditional rebates other than its desire to block Auvi-Q® from the market. *Id.*

Sanofi alleges that Mylan's exclusive dealing agreements effectively blocked Auvi-Q® from nearly 50% of the EAI drug device market nationwide. *Id.* ¶¶ 6, 68. This percentage was even greater in some larger states. *Id.* ¶¶ 6, 68.

---

[2] The parties do not cite, and the court has not found, any Tenth Circuit case law addressing when the price-cost test applies to an exclusive dealing claim based on a discount or rebate program. Our court has held that "an MDL transferee court applies the law of the circuit in which it sits." *In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 135658, 2016 WL 5481997, at *1 n.1 (D. Kan. Sept. 29, 2016)* (first citing *Murphy v. FDIC, 208 F.3d 959, 965-66 (11th Cir. 2000)* (citing cases from the D.C., Second, Eighth, and Ninth Circuits); then citing *Murray Energy Corp. v. United States DOD (In re United States DOD), 817 F.3d 261, 272 (6th Cir. 2016)* (citing *Murphy* and following the other circuits)). And, although the transferor court's law is not binding precedent, it "merits close consideration" by the transferee court. *In re Korean Air Lines Disaster, 829 F.2d 1171, 1176, 265 U.S. App. D.C. 39 (D.C. Cir. 1987)*. The court thus closely considers the law of the Third Circuit (where the *Sanofi* case originated) when deciding this Motion to Dismiss.

Sanofi also alleges that Mylan's rebate program unlawfully raised Sanofi's costs of entry into the market. *Id.* ¶¶ 108-09. And, after Mylan **[*39]** successfully used its rebate program to block Auvi-Q® from the market, Sanofi contends Mylan "poisoned the well" with physicians by sending them misleading marketing materials that described EpiPen® as the "preferred" EAI device for 99% of patients while Auvi-Q® was "preferred" for just 2%. *Id.* ¶¶ 7, 98-99. But, in reality, these percentages were driven by Mylan's exclusionary rebates—not patient preferences. *Id.* ¶ 98.

The court thus concludes that the *Sanofi* Complaint alleges that Mylan's rebate program involved anticompetitive conduct—beyond pricing itself—that was designed to block customer access to Auvi-Q® and protect Mylan's monopoly in the EAI drug market. The price-cost test thus does not apply to Sanofi's exclusive dealing claim. *See* *Eisai Inc. v. Sanofi-Aventis U.S., LLC, No. 08-4168(MLC), 2014 U.S. Dist. LEXIS 46791, 2014 WL 1343254, at *23 (D.N.J. Mar. 28, 2014)* (explaining that *ZF Meritor* held that above-cost pricing does not preclude antitrust liability when the defendant "engaged in an otherwise unlawful exclusive dealing arrangement" because while "[p]rices are unlikely to exclude equally efficient rivals unless they are below cost, . . . exclusive-dealing arrangements can exclude equally efficient rivals because those rivals are never given the opportunity to compete" (citing *ZF Meritor, 696 F.3d at 278, 281)*);[3] *see also* *UniStrip Techs., 153 F. Supp. 3d at 737* (holding **[*40]** that the price-cost test does not apply when plaintiff's Complaint pleads "anticompetitive behavior rather than merely competitive pricing").

The court thus turns to consider a second question, *i.e.*, whether Sanofi has alleged a plausible Sherman Act claim based on Mylan's exclusive dealing arrangements. An exclusive dealing arrangement is "a contract between a manufacturer and a buyer that forbids the buyer from purchasing the contracted good from any other seller or that requires the buyer to take all of its needs in the contract good from that manufacturer." XI Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1800a, at 3 (3d ed. 2011); *see also* *Perington Wholesale, Inc. v. Burger King Corp., 631 F.2d 1369, 1374 (10th Cir. 1979)* (describing an exclusive dealing arrangement as one that "entails a commitment by a buyer to deal only with a particular seller."). Such an agreement "need not specifically require the buyer to forgo other supply sources if the practical effect is the same." *Perington Wholesale, 631 F.2d at 1374*; *see also* *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 326, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)* ("[E]ven though a contract does 'not contain specific agreements not to use the (goods) of a competitor' if 'the practical effect . . . is to prevent such use,' it comes within" the prohibition against exclusivity).

Our Circuit has explained that "[t]he **[*41]** antitrust vice of these arrangements is the foreclosure part of the market in which the seller competes by taking away the freedom of the buyer to choose from the products of competing traders in the seller's market." *Perington Wholesale, 631 F.2d at 1374*; *see also* *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 270 (3d Cir. 2012)* ("The primary antitrust concern with exclusive dealing arrangements is that they may be used by a monopolist to strengthen its position, which may ultimately harm competition." (citation omitted)).

But, "[e]xclusive dealing agreements are often entered into for entirely procompetitive reasons, and generally pose little threat to competition." *ZF Meritor, 696 F.3d at 270* (citing *Race Tires Am., Inc. v. Hoosier Racing Tire Corp., 614 F.3d 57, 76 (3d Cir. 2010)* ("'[I]t is widely recognized that in many circumstances, [exclusive dealing arrangements] may be highly efficient—to assure supply, price stability, outlets, investment, best efforts or the like—and pose no competitive threat at all.'") (quoting *E. Food Servs., Inc. v. Pontifical Catholic Univ. Servs. Ass'n, Inc., 357 F.3d 1, 8 (1st Cir. 2004))*). On the other hand, "'[e]xclusive dealing can have adverse economic consequences by allowing one supplier of goods or services unreasonably to deprive other suppliers of a market for their goods[.]'" *Id.* (quoting *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 45, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* (O'Connor, J., concurring), *abrogated on other grounds by* *Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)* (further citation omitted)). Also, "[e]xclusive dealing arrangements are of special concern when **[*42]** imposed by a monopolist." *Id. at 271* (quoting *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 187 (3d Cir. 2005)* ("Behavior that otherwise might comply with ***antitrust law*** may be impermissibly exclusionary when practiced by a monopolist.")).

[3] Mylan contends that Sanofi has taken positions that are inconsistent with the ones it asserted in *Eisai*—a case where Sanofi was accused of violating the antitrust laws through its own use of loyalty-discount contracts. But, *Eisai* involved different facts and a different procedural posture than the ones presented here. Thus, Sanofi's arguments in *Eisai* are of no moment to the motion to dismiss in this case.

So, because exclusive dealing arrangements "may actually enhance competition, . . . they are not deemed per se illegal." *Perington Wholesale, 631 F.2d at 1374* (citing *Tampa Elec., 365 U.S. at 333*). Instead, courts apply the rule of reason to determine the legality of exclusive dealing arrangements. *ZF Meritor, 696 F.3d at 271* (citing *Tampa Elec., 365 U.S. at 327*); *see also* *McWane, Inc. v. F.T.C., 783 F.3d 814, 835 (11th Cir. 2015)* (explaining that the Eleventh Circuit has joined "the consensus that exclusive dealing arrangements are reviewed under the rule of reason." (citation and internal quotation marks omitted)).

Thus, to assert an exclusive dealing claim, a plaintiff must plead facts capable of supporting a finding or inference that the "probable effect" of "performance of the contract will foreclose competition in a substantial share of the line of commerce affected." *Tampa Elec., 365 U.S. at 327, 329*;[4] *see also* *Perington Wholesale, 631 F.2d at 1374* ("Thus, a complaining trader must allege and prove that a particular arrangement unreasonably restricts the opportunities of the seller's competitors to market their product.").

The Supreme Court has instructed lower courts "[t]o determine substantiality in a given case" by "weigh[ing] **[*43]** the probable effect of the contract on the relevant area of effective competition, taking into account the relative strength of the parties, the proportionate volume of commerce involved in relation to the total volume of commerce in the relevant market area, and the probable immediate and future effects which pre-emption of that share of the market might have on effective competition therein." *Tampa Elec., 365 U.S. at 329*. When considering whether the contract at issue in *Tampa Electric* tended to foreclose a substantial volume of competition, the Supreme Court considered several factors. *Id. at 334-35*. They included whether a seller with a dominant position exists in the market, whether the market has "myriad outlets with substantial sales volume," the prevalence in the industry of using exclusive contracts, the duration of the contract, and the existence of any pro-competitive justifications for the contract. *Id.*

Here, Mylan argues that Sanofi cannot proceed with an exclusive dealing claim based on a single product rebate (that is priced above cost) without alleging other exclusionary conduct that would impede a customer's ability to decline the rebate if a competitor—such as Sanofi—made a better offer. To state a viable **[*44]** exclusive dealing claim based on a rebate program, Mylan asserts, courts require a plaintiff to allege other exclusionary conduct that produces a substantial foreclosure of competition such as bundling or tying the rebates to the sale of other products,[5] or threatening to terminate supply,[6] or imposing long-term exclusivity agreements.[7] Mylan contends that

---

[4] Although *Tampa Electric* involved a Clayton Act claim, courts also apply its analysis to exclusive dealing claims asserted under the *Sherman Act*. *See* *ZF Meritor, 696 F.3d at 327 n.26* ("In substance, the *Tampa Electric* standard for *Clayton Act Section 3* claims differs very marginally, if at all, from the fact-intensive rule-of-reason analysis that applies to this case under *Section 1 of the Sherman Act*."); *see also* *Tampa Elec., 365 U.S. at 335* ("We need not discuss the respondents' further contention that the contract also violates *§ 1* and *§ 2 of the Sherman Act*, for if it does not fall within the broader prescriptions of *§ 3 of the Clayton Act* it follows that it is not forbidden by those of the former.").

[5] *See, e.g.,* *United States v. Microsoft, Corp., 253 F.3d 34, 60, 70, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (affirming district court's decision holding that Microsoft's exclusive dealing contracts violated *§ 2 of the Sherman Act* where the government alleged "that Microsoft attempted to monopolize the browser market and unlawfully tied its browser to its operating system so as to foreclose competition in the browser market"); *UniStrip Techs., LLC v. LifeScan, Inc., 153 F. Supp. 3d 728, 740-41 (E.D. Pa. 2015)* (denying motion to dismiss where plaintiff alleged that defendant "engaged in exclusive dealing, in violation of several antitrust laws, and that this exclusive dealing consists of bundling schemes by which rebates are offered on the condition that multiple products from [defendant] are purchased"); *Suture Express, Inc. v. Cardinal Health 200, LLC, 963 F. Supp. 2d 1212, 1217, 1227-29 (D. Kan. 2013)* (denying motion to dismiss plaintiff's exclusive dealing claim based on contracts "which unlawfully tied the sale of sutures and endo products to the sale of other products in the med-surg basket").

[6] *See, e.g.,* *McWane, Inc. v. FTC, 783 F.3d 814, 819, 834-38 (11th Cir. 2015)* (finding a dominant producer of domestic pipe fittings engaged in unlawful exclusive dealing arrangements when it threatened to take away rebates and cut off supply for 12 weeks unless customers purchased all domestic pipe fittings exclusively from the producer); *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 277, 289 (3d Cir. 2012)* (concluding that sufficient evidence existed for a jury to find that defendant engaged in unlawful exclusive dealing when its contracts conditioned rebates, as well as continued product supply, on the customer's purchase of a specific percentage of defendant's product).

Sanofi never asserts any such exclusionary conduct here. Thus, Mylan argues, Sanofi fails to state a plausible exclusive dealing claim.

The court disagrees. As the court already has concluded above, the *Sanofi* Complaint sufficiently alleges exclusionary conduct in addition to Mylan's pricing to state a plausible exclusive dealing claim. Sanofi has alleged that Mylan leveraged its greater than 90% market share by offering unprecedented rebates to third-party payors (30% or higher) and specifically targeted Auvi-Q® for exclusion from the market by expressly conditioning the large rebates on excluding Auvi-Q® from third-party payors' drug formularies. Also, Sanofi alleges that Mylan had no legitimate business purpose for offering these large rebates but used the program, instead, to block a new entrant—Auvi-Q®—from **[*45]** the market and to protect its 90%-plus market share.

In *Dial Corp. v. News Corp.*, the Southern District of New York denied summary judgment against an exclusive dealing claim because the evidence showed that the length of the defendant's exclusive dealing contracts and their staggered terms may have foreclosed competition in the relevant market. *165 F. Supp. 3d 25, 32 (S.D.N.Y. 2016)*. The court also found that the defendant had "intentionally staggered the end dates of key contracts to prevent competitors from acquiring a 'critical mass' of retail distribution." *Id. at 31*. The court recognizes that *Dial Corp.'s* facts differ from the ones asserted by the *Sanofi* Complaint. Here, the Complaint alleges that third-party payors' coverage decisions "typically" last for only "one or two years." *Sanofi* Complaint ¶ 67. Also, the Complaint makes no allegations that Mylan staggered the terms of its rebate program in a way to foreclose competition. But, like *Dial Corp.*, Sanofi alleges that Mylan's rebate program blocked a competitor from entering and getting traction in the market. Here, Sanofi alleges that Mylan specifically targeted Auvi-Q®, blocking it from nearly 50% of the EAI drug device market nationwide and an even higher percentage **[*46]** in some larger states. One plausibly could infer from the facts alleged that Mylan intentionally and successfully prevented Auvi-Q® from developing a "critical mass" of customers that would allow them to compete against Mylan—the dominant player in the market with a market share that exceeded 90%.

Also, recognizing that *Tampa Electric* provides a "number of other factors which may be relevant to a rule of reason analysis in an exclusive dealing claim," our court has refused to "decide at the pleading stage that plaintiff had failed to plead adequate foreclosure levels" to state an exclusive dealing claim. *Suture Express, Inc. v. Cardinal Health 200, LLC, 963 F. Supp. 2d 1212, 1229 (D. Kan. 2013)*. The court reaches the same conclusion here. The question whether the alleged exclusive dealing arrangements foreclosed a substantial share of the market requires the court to weigh various factors, and that is not a proper function for the pleading stage. Instead, the court views the Complaint's allegations in the light most favorable to Sanofi. And, it concludes that Sanofi has alleged that Mylan's rebate program involved exclusionary conduct capable of supporting a finding or inference that the probable effect of Mylan's rebate program—conditioned on exclusivity—substantially foreclosed **[*47]** competition. Sanofi thus states a plausible exclusive dealing claim under the Sherman Act.

2. The *Noerr-Pennington* doctrine bars Sanofi's exclusive dealing claim premised on rebates offered to states or state agencies.

Mylan also asserts that Sanofi cannot allege an exclusive dealing claim based on discounts or rebates offered to state-based Medicaid agencies because the *Noerr-Pennington* doctrine bars those claims. "The *Noerr-Pennington* doctrine is drawn from the Supreme Court's opinions in *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)* and *United Mine Workers of America v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*." *Tal v. Hogan, 453 F.3d 1244, 1257 n.13 (10th*

---

[7] *See, e.g., E.I. du Pont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 452-53 (4th Cir. 2011)* (reversing a district court's dismissal of a *Sherman Act § 2* claim because plaintiff sufficiently alleged that defendant's use of multi-year exclusive contracts constituted anticompetitive conduct and foreclosed competition in the market); *Dial Corp. v. News Corp., 165 F. Supp. 3d 25, 31-32 (S.D.N.Y. 2016)* (denying summary judgment against plaintiffs' exclusive dealing claim because "the length of the exclusive contracts and their staggered terms may also foreclose competition" and the evidence showed that defendant "intentionally staggered the end dates of key contracts to prevent competitors from acquiring a 'critical mass' of retail distribution").

Cir. 2006). The *Noerr-Pennington* doctrine "'exempts from antitrust liability any legitimate use of the political process by private individuals, even if their intent is to eliminate competition.'" Id. at 1259 (quoting Zimomra v. Alamo Rent-A-Car, Inc., 111 F.3d 1495, 1503 (10th Cir. 1997)). "The doctrine arises from the [Supreme] Court's conclusion that the Sherman Act was not intended to derogate the First Amendment right of citizens to petition the government for a redress of grievances." GF Gaming Corp. v. City of Black Hawk, 405 F.3d 876, 883 (10th Cir. 2005) (citing Noerr, 365 U.S. at 136-39).

The scope of the *Noerr-Pennington* doctrine depends "on the source, context, and nature of the anticompetitive restraint at issue." Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 499, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988). "*Noerr-Pennington* immunity does not apply if the purported effort to influence or obtain government action is in fact only an attempt to interfere with the business relationships **[*48]** of a competitor." Classic Commc'ns, Inc. v. Rural Tel. Serv. Co., Inc., 956 F. Supp. 910, 917 (D. Kan. 1997) (first citing Noerr, 365 U.S. at 144; then citing Cal. Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 511, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)). "This is the so-called 'sham' exception to the *Noerr-Pennington* doctrine." *Id.* The sham exception applies "when 'persons use the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon.'" GF Gaming Corp., 405 F.3d at 884 (quoting City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 380, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)). "The exception thus 'involves a defendant whose activities are not genuinely aimed at procuring favorable government action at all,' such as a defendant who files 'frivolous objections to the license application of a competitor, with no expectation of achieving denial of the license but simply in order to impose expense and delay.'" *Id.* (quoting City of Columbia, 499 U.S. at 380).

In *GF Gaming*, the Tenth Circuit held that plaintiff had failed to state Sherman Antitrust Act claims because it alleged antitrust injuries based on the outcome of defendants' lobbying activities—and not on the process of that lobbying activity. *Id.* Thus, the Tenth Circuit held, the *Noerr-Pennington* doctrine immunized the non-governmental defendants from liability based on their lobbying activities. Id.

The same reasoning applies here. Sanofi asserts that it has stated a plausible antitrust claim based on rebates offered to government agencies because Mylan—a private **[*49]** actor with no legislative or quasi-legislative authority—engaged in "anticompetitive efforts . . . to unlawfully maintain its EpiPen® monopoly." Doc. 41 at 26 (citing the *Sanofi* Complaint ¶¶ 7-8); *see also Sanofi* Complaint ¶ 67 (asserting that Mylan's "illegal conditional rebate scheme to exclude Auvi-Q® was successful" because "in most of [the states that manage their Medicaid drug formularies] Auvi-Q® was excluded."). These allegations accuse Mylan of using the *outcome* of a government process—*i.e.*, exclusion of Auvi-Q® from the drug formularies—*not the process itself* to harm a competitor. The *Noerr-Pennington* doctrine shields this very type of conduct from antitrust liability, even if Mylan, as a private actor, intended to eliminate competition. *See* GF Gaming, 405 F.3d at 884 (holding that conduct that "amounts to nothing more than lobbying of government officials . . . is immune from Sherman Act liability under the *Noerr-Pennington* doctrine" and "[e]ven if defendants' sole motive for petitioning the [government] officials was to injure competition, the conduct would still be protected by the *Noerr-Pennington* doctrine"); *see also* Tal, 453 F.3d at 1260 (holding that *Noerr-Pennington* immunity applied to preclude antitrust claims **[*50]** based on defendant's vigorous petitioning of government officials and rejecting plaintiff's argument that the doctrine does not apply to private entities as "clearly wrong" because "that is precisely for whom the immunity was created").

Sanofi argues, alternatively, that Mylan cannot invoke *Noerr-Pennington* immunity because Sanofi asserts that Mylan provided false and misleading information to federal and state governments misclassifying the EpiPen® as a non-innovator drug under Medicaid, allowing Mylan to pay substantially less in required rebates to Medicaid and enjoy savings that it then used to provide additional rebates conditioned on exclusivity. Sanofi contends that *Noerr-Pennington* does not provide immunity for these types of misrepresentations. Doc. 41 at 27 (first quoting Cal. Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 513, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1986) ("Misrepresentations, condoned in the political arena, are not immunized when used in the adjudicatory process."); then quoting Allied Tube, 486 U.S. at 499-500 ("unethical and deceptive practices can constitute abuses of administrative or judicial processes that may result in antitrust violations")).

But Sanofi's antitrust claims are not based on Mylan's alleged misrepresentations about the EpiPen®'s drug classification. Instead, Sanofi **[*51]** premises its rebate claims on Mylan's conduct offering rebates to federal and state governments in exchange for exclusivity. Sanofi never asserts that Mylan's alleged misclassification of the EpiPen® influenced a government agency's decision to agree to exclude Auvi-Q® in exchange for the rebates, or that the alleged misclassification otherwise affected a governmental agency's decision to participate in the exclusive rebate program. Instead, the conduct that Sanofi alleges to have violated the antitrust laws was Mylan's petitioning of federal and state governments to exclude Auvi-Q® from the drug formularies in exchange for rebates. As already noted, the *Noerr-Pennington* doctrine immunizes such conduct. The court thus dismisses Sanofi's exclusive dealing claims based on discounts or rebates provided to state-based Medicaid agencies because they are barred by the *Noerr*-*Pennington* doctrine. These claims fail to state a plausible claim for relief.

B. Does the *Sanofi* Complaint State a Claim for Relief Based on Mylan's Supposedly Deceptive Speech?

Mylan next asserts that Sanofi fails to state a plausible Sherman Act claim based on Mylan's allegedly deceptive speech. Mylan asserts that our **[*52]** Circuit has explained that the Sherman Act is concerned only with "'protection of competition or prevention of monopoly,'" but "not the vindication of general 'notions of fair dealing,' which are the subject of many other laws at both the federal and state level." *Four Corners Nephrology Assocs., P.C. v. Mercy Med. Ctr. of Durango, 582 F.3d 1216, 1225 (10th Cir. 2009)* (quoting IIIB Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 770, at 190 (3d ed. 2008)). Thus, Mylan asserts, the antitrust laws afford no protection to Sanofi's claims based on purportedly deceptive speech.

But, *Four Corners* was a case involving a refusal to deal—not deceptive speech, like Sanofi's allegations here. *See* *Four Corners, 582 F.3d at 1222-25* (affirming summary judgment against plaintiffs' antitrust claims based on a hospital's refusal to deal with a physician). In contrast, other courts have recognized that deceptive speech can support Sherman Act claims because "in some cases, such defamation, which plainly is not competition on the merits, can give rise to antitrust liability, especially when it is combined with other anticompetitive acts." *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 109 n.14 (3d Cir. 2010)*. *See also* *Caribbean Broad. Sys., Ltd. v. Cable & Wireless PLC, 148 F.3d 1080, 1087, 331 U.S. App. D.C. 226 (D.C. Cir. 1998)* (holding that plaintiff's allegations, "namely, that the defendants made fraudulent misrepresentations to advertisers and sham objections to a government licensing agency in order to **[*53]** protect their monopoly" constituted sufficiently anticompetitive conduct to support a Sherman Act claim); *National Asso. of Pharmaceutical Mfrs., Inc. v. Ayerst Laboratories, Div. of/and American Home Products Corp., 850 F.2d 904, 916 (2d Cir. 1988)* (reversing a district court's dismissal of a *Sherman Act § 2* claim based on defendant's publication of an allegedly false and misleading letter touting its product's superiority and told pharmacists never to dispense a generic drug because plaintiff's allegations were sufficient "to go forward with the discovery process to substantiate its claim"); *Caldera, Inc. v. Microsoft Corp., 87 F. Supp. 2d 1244, 1249 (D. Utah 1999)* (holding that alleged misleading statements about the plaintiff's product viewed with other anticompetitive behavior supported a *Sherman Act § 2* claim sufficient to survive summary judgment).

In *West Penn Allegheny*, the Third Circuit recognized that "[a]nticompetitive conduct can come in too many different forms, and is too dependent upon context, for any court or commentator ever to have enumerated all the varieties." *627 F.3d at 109* (citations and internal quotation marks omitted). And, "[f]or present purposes," the court held "anticompetitive conduct can include . . . making false statements about a rival to potential investors and customers." *Id.* (first citing *LePage's Inc. v. 3M, 324 F.3d 141, 153 (3d Cir. 2003)*; then citing *Caribbean Broad. Sys., Ltd. v. Cable & Wireless PLC, 148 F.3d 1080, 1087, 331 U.S. App. D.C. 226 (D.C. Cir. 1998)* (further citations omitted)). The Third Circuit listed **[*54]** several types of anticompetitive conduct that the *West Penn Allegheny* Complaint alleged, including that "on several occasions, [defendant] made false statements about [plaintiff's] financial health to potential investors, which caused [plaintiff] to pay artificially inflated financing costs on its debt." *Id. at 110*. Viewing the Complaint's allegations as a whole, the Third Circuit held that plaintiff plausibly had alleged anticompetitive conduct sufficient to state a *Sherman Act § 2* claim. *Id.*

Likewise, the *Sanofi* Complaint alleges that Mylan engaged in various anticompetitive conduct designed to block Auvi-Q® from the market, including making allegedly false and deceptive statements. These allegations include: (1) Mylan funded and promoted a misleading study entitled "Auvi-Q® versus EpiPen® Auto-Injectors: Failure to Demonstrate Bioequivalence of Epinephrine Delivery Based on Partial Area Under the Curve" intended to undermine the FDA's conclusion that Auvi-Q® demonstrated bioequivalence to the epinephrine in the EpiPen®; and (2) Mylan made misleading statements to physicians about Auvi-Q®'s exclusion from the marketplace and touted EpiPen® as the "preferred" brand, promoted Auvi-Q®'s status as **[*55]** "Not Covered" or "Excluded from Benefit" from third-party payors' drug formularies, and suggested that the decision to exclude Auvi-Q® from the formularies was based on clinical recommendation and not Mylan's huge, conditional rebate offers. *Sanofi* Complaint ¶¶ 93-98, 139. Sanofi alleges that it sustained harm from this allegedly deceptive speech. Sanofi asserts that Mylan's deceptive speech successfully blocked Auvi-Q® from the market. *Id.* ¶ 99. Sanofi also asserts that it incurred increased marketing costs to correct Mylan's misleading statements. *Id.* ¶ 140. And, Sanofi alleges that Mylan engaged in this deceptive conduct unlawfully to maintain its monopoly power in the EAI drug device market. *Id.* ¶ 139.

Mylan contends that these allegations fall short of pleading a plausible claim because a plaintiff asserting a monopolization claim based on misleading advertising must "'overcome a presumption that the effect on competition of such a practice was *de minimis*.'" *Ayerst Labs., 850 F.2d at 916* (quoting *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 288 n.41 (2d Cir. 1979))*. *Cf.* *Eisai Inc. v. Sanofi-Aventis U.S., LLC, No. 08-4168(MLC), 2014 U.S. Dist. LEXIS 46791, 2014 WL 1343254, at *36 (D.N.J. Mar. 28, 2014)* (describing defendant's argument as one asserting that a plaintiff generally cannot state a claim for deceptive sales practices under the antitrust laws because "such advertising is believed to have a *de minimis* ***[*56]*** effect on competition."). And, Mylan contends, Sanofi's allegations fail to overcome this presumption here. The court disagrees.

The *de minimis* presumption "is based on the perception that, while '[t]here is no redeeming virtue in deception, . . . there is a social cost in litigation over it,'" because "'the likelihood of a significant impact upon the opportunities of rivals is so small in most observed instances—and because the prevalence of arguably improper utterance is so great . . . .'" *Ayerst Labs, 850 F.2d at 916* (quoting III P. Areeda & D. Turner, ***Antitrust Law*** ¶ 738a, at 278-79 (1978)). A plaintiff may overcome the *de minimis* presumption "'by cumulative proof that the representations were (1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to buyers without knowledge of the subject matter, (5) continued for prolonged periods, and (6) not readily susceptible of neutralization or other offset by rivals.'" *Id.* (quoting Areeda & Turner, ***Antitrust Law*** ¶ 738a, at 279).

In *Ayerst*, the Second Circuit held that a district court had erred by dismissing a *Sherman Act § 2* claim. Plaintiff based its claim on an allegedly false and deceptive letter that defendant had sent **[*57]** to customers. The court found that plaintiff's Complaint alleged several of the factors required to overtake the *de minimis* presumption—including that the letter was clearly false, clearly material, and clearly likely to induce reasonable reliance. *Id.* But the court also agreed with defendant that plaintiff had not alleged other certain factors because the Complaint asserted that defendant sent the letter to pharmacists—persons likely to have knowledge about the subject matter—and that defendant only could have made the misrepresentations for a short time period. *Id. at 917*. Nevertheless, the court concluded that "several factors . . . cannot be adequately evaluated until the discovery process has moved forward to a greater extent than it has thus far." *Id.* The court thus held that the Complaint pleaded a *Sherman Act § 2* claim sufficient to survive *Rule 12(b)(6)* dismissal.

Viewing the facts alleged here in the light most favorable to Sanofi, the Complaint alleges several of the factors required to overcome the presumption that deceptive statements have a *de minimis* effect on competition. Sanofi alleges that Mylan circulated marketing materials containing false and misleading statements that caused customers **[*58]** to refrain from purchasing Auvi-Q®, produced hundreds of millions of dollars in lost sales for Sanofi, and erected artificial barriers preventing Auvi-Q® from entering the market. *Sanofi* Complaint ¶¶ 139-40. Like the *Ayerst* plaintiff, the court finds that Sanofi "should be allowed to go forward with the discovery process to substantiate its claim" that Mylan's allegedly deceptive speech violated *§ 2 of the Sherman Act*. The court recognizes that, like *Ayerst*, the Complaint does not allege facts capable of supporting all of the factors required to overtake the *de minimis* presumption. But, the court finds persuasive *Ayerst*'s conclusion that these factors require factual development through the discovery process. And, because the court cannot evaluate several of the factors adequately without the facts that discovery will manifest—or not—the court refuses to dismiss Sanofi's claim at the pleading stage. *See* Ayerst Labs., 850 F.2d at 917.

Mylan also asserts that Sanofi alleges that it "was able to successfully combat" Mylan's allegedly deceptive conduct in two ways. Doc. 57 at 27. First, Sanofi spoke with key thought leaders and key allergy advocacy groups to dispel any doubts about Auvi-Q®. *Id.* (citing *Sanofi* Complaint **[*59]** ¶ 94). Second, Sanofi secured support from physicians who preferred Auvi-Q® to the EpiPen® and wrote articles or letters to third-party payors supporting Auvi-Q®'s coverage on the drug formularies. *Id.* (citing *Sanofi* Complaint ¶ 100). Thus, Mylan contends, Sanofi's allegations differ from ones asserted by "nascent firm[s]" that have "no established customer base and typically lack[] the resources to answer the dominant firm's deception effectively." IIIB Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 782b, at 353 (4th ed. 2015).

Mylan's interpretation of the *Sanofi* Complaint stretches it beyond the point of reason. Sanofi never alleges that it "successfully" responded to Mylan's deceptive conduct with its outreach efforts. To the contrary, Sanofi alleges that Mylan's conduct blocked it from the market and resulted in significant sales losses. Sanofi also alleges that Mylan—a monopolist with a market share exceeding 90%—engaged in this deceptive conduct to block a new entrant to the market (Auvi-Q®) and thereby preserve its monopoly power. Considering these allegations along with the other anticompetitive conduct alleged in the Complaint as a whole, the court concludes that Sanofi **[*60]** has stated a plausible Sherman Act § 2 claim based on Mylan's alleged deceptive speech.

C. Does the *Sanofi* Complaint State a Claim for an "Overall Scheme" to Monopolize Violating Section 2 of the Sherman Antitrust Act?

Next, Mylan asserts that the *Sanofi* Complaint fails to allege facts sufficient to state a claim for an overall scheme to monopolize violating Sherman Act § 2.

A plaintiff may assert a plausible Sherman Act claim based on "one overarching claim of a § 2 violation." Caldera, Inc. v. Microsoft Corp., 72 F. Supp. 2d 1295, 1309 (D. Utah 1999). *See also* In re: Lipitor Antitrust Litig., 868 F.3d 231, 274 (3d Cir. 2017), *petition for cert. filed* (U.S. Nov. 20, 2017) (Nos. 17-752, 17-771) (holding the district court erred by dismissing plaintiffs' allegations that defendant "participated in an overall scheme of monopolistic conduct" because plaintiff had asserted plausible allegations of various anticompetitive conduct); Kobe, Inc. v. Dempsey Pump Co., 198 F.2d 416, 425 (10th Cir. 1952) (affirming judgment against a patent holder for violating the Sherman Act because the patent holder's "infringement action and the related activities, of course, in themselves were not unlawful, and standing alone would not be sufficient to sustain a claim for damages which they may have caused, but when considered with the entire monopolistic scheme which preceded them . . . they may be considered as having been done **[*61]** to give effect to the unlawful scheme."); In re Neurontin Antitrust Litig., MDL No. 1479, 2009 U.S. Dist. LEXIS 77475, 2009 WL 2751029, at *15-17 (D.N.J. Aug. 28, 2009) (explaining that "[i]f an antitrust plaintiff can allege that a series of actions, when viewed together, were taken in furtherance and as an integral part of a plan to violate the antitrust laws, that series of actions may trigger antitrust liability as an overall scheme," and holding that plaintiffs "adequately stated a claim for monopolization and attempted monopolization on the basis of allegations that defendant [had] engaged in an overall scheme to monopolize").

Our Circuit instructs courts to view purported conduct supporting a Sherman Act § 2 violation based on an intent to create or maintain a monopoly "as a whole." Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509, 1522 n.18 (10th Cir. 1984), *aff'd* 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985). The Circuit reasoned that each type of alleged anticompetitive conduct "need not be supported by sufficient evidence to amount to a § 2 violation. It is enough that taken together they are sufficient to prove the monopolization claim." *Id. See also* LePage's, Inc. v. 3M, 324 F.3d 141, 162 (3d Cir. 2003) (explaining that "courts must look to the monopolist's conduct taken as a whole rather than considering each aspect in isolation" when determining whether a Sherman Act § 2 violation has occurred); Nobody in Particular Presents, Inc. v. Clear Channel Commc'ns, Inc., 311 F. Supp. 2d 1048, 1109 (D. Colo. 2004) (explaining that "the individual aspects or events of a **[*62]** defendant's conduct viewed in isolation need not be supported by sufficient evidence to amount to a *section 2* violation for liability to exist. Rather, it is enough that the incidents taken together as a whole create sufficient evidence of attempted monopolization." (first citing *Aspen Highlands, 738 F.2d at 1522 n.18*; then citing II Phillip E. Areeda, Roger D. Blair, & Herbert Hovenkamp, ***Antitrust Law*** ¶ 310, at 147 (2d ed. 2000)).

Here, the *Sanofi* Complaint asserts that Mylan engaged in an overall scheme to monopolize the EAI drug device market. *Sanofi* Complaint ¶¶ 141-43. This alleged scheme included unlawful exclusive dealing and deceptive marketing—alleged anticompetitive conduct that the court already has concluded sufficiently states a plausible claim under the Sherman Act *§ 2*. *See supra* Parts III.A.1 & III.B. This Complaint also alleges that Mylan engaged in other anticompetitive conduct as part of an overall scheme designed to maintain its monopoly power in the relevant market. *Sanofi* Complaint ¶ 142. This alleged conduct includes Mylan's requirement that schools agree to stock EpiPens® exclusively in exchange for the opportunity to participate in Mylan's discounted EpiPen® program. *Id.* ¶¶ 7-8, 80-85, 142. It also includes **[*63]** Mylan's sharp increase of the EpiPen®'s price that—Sanofi contends—enabled Mylan later to offer larger rebates to payors conditioned on excluding Auvi-Q®. *Id.* ¶ 142. The alleged anticompetitive conduct also includes Mylan's touting of EpiPen®'s "preferred" formulary positions even when it didn't exclude Auvi-Q® entirely from third-party payors' coverage tiers. *Id.* ¶¶ 7, 109, 137, 142. In these circumstances, Sanofi contends, Auvi-Q®'s coverage was at less preferential tiers, which produced higher co-pay costs for consumers and increased Sanofi's costs for co-pay coupons. *Id.* The Complaint's allegations, viewed in Sanofi's favor and taken as a whole, allege anticompetitive conduct sufficient to state a plausible claim against Mylan for an overall scheme to monopolize violating Sherman Act *§ 2*.

D. Does the *Sanofi* Complaint Allege Harm to Competition?

Mylan next asserts that Sanofi fails to state plausible Sherman Act claims as a matter of law because the *Sanofi* Complaint fails to allege harm to competition. A plaintiff asserting an antitrust claim must allege an antitrust injury, as the Sherman Act defines this term. *Cohlmia v. St. John Med. Ctr., 693 F.3d 1269, 1280 (10th Cir. 2012)* (quoting *Tal v. Hogan, 453 F.3d 1244, 1253 (10th Cir. 2006))*. "'The primary concern of the antitrust laws is the corruption **[*64]** of the competitive process, not the success or failure of a particular firm' or individual." *Id.* (quoting *Tal, 453 F.3d at 1258*). *See also* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (stating that the "antitrust laws . . . were enacted for the protection of competition not competitors" (citation and internal quotation marks omitted)); *Reazin v. Blue Cross & Blue Shield of Kan., Inc., 899 F.2d 951, 960 (10th Cir. 1990)* (explaining that a challenged practice must adversely affect competition, not just the business of the plaintiff or another competitor). The antitrust laws thus require a plaintiff to allege "'an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Cohlmia, 693 F.3d at 1281* (quoting *Tal, 453 F.3d at 1253*).

So, to state a plausible Sherman Act claim, Sanofi must allege harm to competition, not just harm to its own business. *Id.; see also* *SCFC ILC, Inc. v. Visa USA, Inc., 36 F.3d 958, 965 (10th Cir. 1994)* (requiring that an antitrust violation "must actually or potentially harm consumers"). This standard, on a motion to dismiss, requires an antitrust plaintiff to allege facts capable of supporting a finding or inference that the purported anticompetitive conduct produced increased prices, reduced output, or otherwise affected the quantity or quality of the product. *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 113, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* (describing raised prices and reduced output as the "hallmarks of anticompetitive behavior"); **[*65]** *see also* *Cohlmia, 693 F.3d at 1281* (explaining that an antitrust plaintiff must show that the "'challenged conduct affected the prices, quantity or quality of goods or services, not just his own welfare.'" (quoting *Mathews v. Lancaster Gen. Hosp., 87 F.3d 624, 641 (3d Cir. 1996))*.

Here, the *Sanofi* Complaint sufficiently alleges that Mylan's anticompetitive conduct resulted in increased prices to consumers. Since 2007, Sanofi alleges, Mylan—an entrenched monopolist with a market share exceeding 90%—has raised the price of the EpiPen® more than 500%, without losing its extraordinarily high market share. *Sanofi* Complaint ¶¶ 40, 91, 92. Sanofi asserts that Mylan's purpose for raising prices so sharply was to allow it to absorb the deep conditional discounts that it had given to third-party payors to exclude Auvi-Q® from the market. *Id.* ¶¶ 92, 142.

Mylan contends that Sanofi's allegations only assert that prices increased *before* any alleged exclusionary conduct. Indeed, the Complaint alleges that prices increased significantly from 2009 to 2013, but these increases occurred before Auvi-Q®'s launch in 2013. *Id.* ¶ 92. Mylan asserts that price increases can affect competition adversely only when they *result from* exclusionary conduct. Doc. 57 at 31 (citing *Blue Shield of Va. v. McCready, 457 U.S. 465, 482-83, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* (explaining that "an increase **[*66]** in price *resulting from* a dampening of competitive market forces is assuredly one type of injury" that the antitrust laws redress (emphasis added) (further citations omitted)).

The court disagrees with Mylan's view of the law. The court's independent research has revealed no case holding that harm to competition must occur after—and not before—a defendant has completed its anticompetitive conduct. And Mylan has cited no such case. Sanofi alleges that Mylan engaged in a scheme to exclude Auvi-Q®—a new entrant to the EAI drug device market. This scheme involved Mylan imposing significant price increases in the years leading up to Auvi-Q®'s launch so that it later could absorb the deep conditional rebates offered to third-party payors to exclude Auvi-Q®. *Sanofi* Complaint ¶ 7 (alleging that Mylan engaged in a "scheme to deprive customers of access to Auvi-Q®" that included hiking the price of EpiPen® so that it later could offer large, conditional rebates: "With knowledge of when Sanofi could begin marketing Auvi-Q®, Mylan ran up the price of the EpiPen® substantially before the launch of Auvi-Q®. The significantly higher prices ensured that, once Mylan began to offer its new, large conditional **[*67]** rebates from the higher price level, third-party payors would (and did) find it practically impossible to refuse these rebates that Mylan leveraged across its virtual 100% share of the EAI drug device market."). Sanofi's allegations about Mylan's significant price increases allege harm to consumers sufficiently to state an antitrust injury.

Also, Mylan asserts that these allegations cannot assert a plausible antitrust injury because the "charging of monopoly prices, is not only not unlawful; it is an important element of the free-market system." *Verizon Commc'ns, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. It is true. "Simply possessing monopoly power and charging monopoly prices does not violate *§ 2*." *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 447-48, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*. Instead, the Sherman Act "targets 'the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'" *Id.* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*. The *Sanofi* Complaint alleges conduct that could support such a *§ 2* violation. It asserts that Mylan implemented its steep price hikes to absorb the costs of providing deep, conditional rebates as part of a scheme to maintain its monopoly in the EAI drug market. *Sanofi* Complaint ¶ 7.

Sanofi also alleges that Mylan's conduct harmed **[*68]** innovation and reduced the quality of EAI drug devices available to consumers in the market. *See Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 318 (3d Cir. 2007)* (reversing a district court's dismissal of a *Sherman Act § 2* claim because the Complaint alleged specific anticompetitive conduct that "harmed competition and undermined innovation" in the market sufficient to state an attempted monopolization claim); *United States v. Visa U.S.A., Inc., 344 F.3d 229, 241 (2d Cir. 2003)* (affirming district court decision that defendants' exclusionary policies had harmed "product innovation and output"). The Complaint alleges that Mylan's anticompetitive conduct prevented customers from accessing Auvi-Q®—a new entrant to the market that "represented a novel and advanced EAI drug device." *Sanofi* Complaint ¶ 4. The Complaint describes Auvi-Q® as a new product "designed for the smartphone generation to be smaller and easier to carry than the EpiPen®." *Id.* It also "included voice instructions to help patients or caregivers to administer epinephrine during a highly stressful anaphylactic episode, when they may otherwise not have been trained to use the device or might be too panicked to read the written instructions on the device." *Id.* These allegations allege harm to competition sufficiently because, as Sanofi contends, Mylan's **[*69]** conduct prevented consumers from accessing a new and innovative product with allegedly better qualities than EpiPen®, the market's dominant product.[8]

Mylan also contends that Sanofi cannot allege harm to competition when the Complaint asserts that the exclusive dealing arrangements lasted no more than one or two years. *Sanofi* Complaint ¶ 67. For example, the Seventh Circuit recently affirmed summary judgment against an exclusive dealing claim, finding no evidence that the contracts at issue had an exclusionary effect "since most of the contracts expire every year or two, giving other [competitors, such as the plaintiff] a shot at obtaining the next contract . . . ." *Methodist Health Servs. Corp. v. OSF Healthcare Sys., 859 F.3d 408, 410 (7th Cir. 2017)*. But the Seventh Circuit also recognized that exclusive dealing arrangements can have "dire consequences" if they drive competitors into bankruptcy and thus out of the market. *Id.* And, duration is just one factor that courts consider when determining whether an exclusive dealing agreement harms competition. *See, e.g., McWane, Inc. v. FTC, 783 F.3d 814, 819, 834-38 (11th Cir. 2015)* (rejecting argument that an exclusive dealing arrangement could not harm competition because it was "short-term and voluntary" and, instead, the Circuit considered the "market realities" to determine **[*70]** whether the practical effect of the arrangement harmed competition); *Nilavar v. Mercy Health Sys. W. Ohio, 142 F. Supp. 2d 859, 878-88 (S.D. Ohio 2000)* (explaining that courts "have considered the duration of a contract to be one of many factors considered in determining whether a given exclusive contract is anti-competitive," and concluding that plaintiff's Complaint sufficiently had alleged an antitrust injury even though the contract's duration was short because "the term of the exclusive contract does not render the contract reasonable, when considered in light of the extent that the relevant market is foreclosed"). Here, although Sanofi alleges that the length of third-party payors' coverage decisions typically lasted one to two years, the court already has noted other facts that the *Sanofi* Complaint alleges and how they assert harm to competition sufficiently. These factual allegations include Mylan's targeting of Auvi-Q®, specifically, as part of an effort to block a new entrant from the EAI drug market, prevent it from developing a customer base, and maintain unlawfully its market share exceeding 90%.

At the pleading stage of this action, the allegations are sufficient to allege harm to competition in the EAI drug device market. These allegations of antitrust **[*71]** injury are sufficiently plausible to support Sanofi's Sherman Act *§ 2* claims.

E. Does the *Sanofi* Complaint Allege Causation?

Last, Mylan argues that Sanofi has failed to state a claim for relief because the Complaint never alleges that Mylan caused Sanofi's purported injuries. The Sherman Act requires an antitrust plaintiff to show that its injury was caused "by reason of" the defendant's anticompetitive conduct. *15 U.S.C. § 15(a)*. *See also Aspen Highlands, 738 F.2d at 1519 n.12* ("Of course, the fact of injury and damages suffered *by reason of a violation of the antitrust laws* must also be shown for a private litigant to recover on a claim of monopolization." (emphasis added)). Thus, an antitrust plaintiff must "establish that defendant's unlawful conduct caused plaintiff injury in its business or property . . . to recover under the antitrust laws." *Id. at 1522-23*. *See also Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 126-27, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)* (explaining that an antitrust plaintiff cannot shoulder its burden to prove an antitrust violation if the injury is "attributable to its lack of desire, its limited production capabilities, or to other factors independent of [the alleged] unlawful conduct").

---

[8] Mylan asserts that Sanofi's cited cases differ from the facts alleged here because, in those cases, defendants prevented the product from reaching the market. The *Sanofi* Complaint alleges similar conduct. Although the Complaint never alleges that Mylan prevented Sanofi from soliciting third-party payors to purchase Auvi-Q®, the Complaint alleges that Mylan's exclusive dealing arrangements denied consumers access to Auvi-Q® because Mylan required third-party payors to exclude Auvi-Q® from the drug formularies, thus blocking Auvi-Q® from reaching a significant portion of the market. These allegations suffice to allege harm to competition. *See Visa U.S.A., 344 F.3d at 241* ("By excluding Amex and Discover [the third and fifth largest issuers of payment cards in the United States] from the market for outside card issuers, [defendants] effectively deny consumers access to products that could be offered only by a network in partnership with individual banks" and thus the district court did not err in "finding that competition has been harmed by the defendants' exclusionary rules.").

An antitrust plaintiff need not show that defendant's conduct was the exclusive cause of plaintiff's injury. [*Zenith Radio Corp., 395 U.S. at 114 n.9*] ("It is enough that **[*72]** the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury."). Instead, the "'causal connection [must be] sufficient to establish the violation as a substantial factor in the occurrence of damage.'" [*Motive Parts Warehouse v. Facet Enters., 774 F.2d 380, 389 (10th Cir. 1985)*] (quoting [*Reibert v. Atl. Richfield Co., 471 F.2d 727, 731 (10th Cir. 1973))*].

Mylan's contention that Sanofi has failed to allege facts capable—if true—of establishing causation consists of two primary theories.

First, Mylan asserts, Sanofi made a unilateral and independent decision—not based on any of Mylan's conduct—to stop competing with Mylan for exclusive or preferred formulary status. But the plain language of the Complaint belies this characterization. Sanofi specifically alleges that it "ultimately decided to return the marketing rights for Auvi-Q® back to the creators of the device in part because of the artificial barriers to entry Mylan's conduct [had] erected." *Sanofi* Complaint ¶¶ 137, 140, 143. Sanofi also alleges that Mylan's conduct raised its costs of entry to the market. *Id.* ¶¶ 131, 134. And the Complaint asserts that Mylan's anticompetitive conduct caused Sanofi to lose hundreds of millions of dollars in sales **[*73]** in the $1 billion-plus U.S. EAI drug device market. Sanofi contends it would not have sustained these losses but for Mylan's unlawful acts. *Id.* ¶¶ 137, 140, 143.

The *Sanofi* Complaint also alleges facts about Auvi-Q®'s sales in Canada that could support a finding or inference that Mylan caused Sanofi's purported injuries. Sanofi alleges that Auvi-Q® (known in Canada as Allerject®) achieved a stronger performance in Canada, where Mylan did not market the EpiPen® and where the playing field was level with open access to drug formularies. *Sanofi* Complaint ¶¶ 9, 106, 107. Sanofi alleges that EpiPen® similarly dominated the Canadian EAI drug device market before Sanofi launched the Allerject® there. *Id.* ¶ 106. But, by the end of 2013 (its first year on the Canadian market), Allerject® exceeded its projections, growing to a 21% market share. *Id.* In 2014 and 2015, Allerject® continued to gain market share. *Id.* It reached a 25% market share by the end of 2014, and it peaked at a 32% market share in 2015. *Id.* Mylan alleges "that growth of Allerject® in Canada, and physician and patient enthusiasm for the device in Canada, illustrates Auvi-Q®'s sales potential where an entrenched competitor is **[*74]** not able to manipulate the market and tip the scales in its own favor." *Id.*

Mylan asserts that these allegations cannot plausibly support a finding or inference that Mylan caused Sanofi's purported injuries. Mylan contends that one cannot compare Auvi-Q®'s sales performance in Canada to those in the United States because the Complaint concedes that Mylan "does not market the EpiPen®" in Canada. *Id.* ¶ 9. The court does not understand this allegation to mean that Mylan does not sell the EpiPen® in Canada. Indeed, the Complaint alleges just the opposite. It alleges that "EpiPen® similarly dominated the Canadian EAI drug device market before Sanofi launched the Allerject®." *Id.* ¶ 106. Instead, the Complaint alleges that Mylan did not engage in the same anticompetitive conduct in Canada (*i.e.*, offering highly discounted rebates conditioned on exclusivity). *Id.* And Sanofi explains why Mylan could not offer such rebate programs in Canada: In Canada, provincial authorities control drug formularies. *Id.* So, Sanofi alleges, the Allerject® was treated at parity with the EpiPen® in Canada. *Id.* And the two devices were equally available for physicians to prescribe to consumers. *Id.*

The court recognizes **[*75]** that Sanofi's allegations are just that. In time, discovery may reveal that the Canadian market differed significantly from the U.S. market, and so it does not provide a proper comparison to infer causation. But accepting the allegations as true—as the court must at the pleading stage—Sanofi's comparison of Auvi-Q®'s sales in Canada to those in the United States plausibly asserts that Mylan's conduct caused Sanofi's alleged antitrust injuries. *See, e.g.,* [*United States v. Visa U.S.A., Inc., 344 F.3d 229, 241 (2d Cir. 2003)*] (holding the district court did not err by finding that competition was harmed by defendants' conduct because, among other things, the evidence showed total exclusion of two major competitors (Amex and Discover) from a segment of the market in the United States but, in the foreign markets (where no exclusivity rules applied) Amex successfully convinced banks that issued Visa cards also to issue Amex cards).

Mylan also takes issue with Sanofi's decisions about the way it marketed Auvi-Q®. Mylan contends that Sanofi could have competed with Mylan for exclusivity on the drug formularies but that it chose to refrain from demanding exclusivity and it never offered pricing to match Mylan's rebates. *Sanofi* Complaint ¶¶ 61, 66, 76. Mylan argues **[*76]** that Sanofi's decisions caused Sanofi's injuries—not Mylan's conduct. But, as Professors Areeda and Hovenkamp instruct, "dispositive weight should not be given to lists of possible alternative causes, which virtually any defendant can generate." IIA Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 338a, at 123 (4th ed. 2014). Instead, "[i]f the plaintiff's claim of causation is plausible, it should not be dismissed summarily merely because alternative causation stories are plausible as well." *Id.* The court thus refuses to dismiss Sanofi's claims at the pleading stage based on Mylan's arguments that alternative reasons caused the alleged injuries.

Second, Mylan argues that Sanofi was forced to exit the EAI drug device market—not because of Mylan's conduct—but because Sanofi recalled all of its Auvi-Q® devices from the market due to manufacturing issues. Indeed, the Complaint asserts that Sanofi undertook a "voluntary recall of Auvi-Q®" in October 2015, following reports of manufacturing issues. *Sanofi* Complaint ¶ 110. The Complaint also asserts, however, that recalls are not uncommon for pharmaceuticals. *Id.* ¶ 110 n.53. And, it alleges that Mylan likewise undertook a recall of **[*77]** EpiPens® in March and April 2017. *Id.*

Mylan disagrees that the Auvi-Q® recall was one common in the industry. Mylan argues that the Auvi-Q® recall was significant, citing press reports that, it contends, show the seriousness and unusual dimension of the recall. Mylan contends that this recall drove Sanofi to leave the market and not any alleged anticompetitive conduct by Mylan. Doc. 57 at 36. And, it asserts that the press reports contain Sanofi's real-time accounts of its reasons for leaving the market that conflict with its allegations in the Complaint that Mylan forced it to exit the market. *Id.*

These arguments merely foreshadow factual disputes that the court cannot resolve on a motion to dismiss. *See* *Iqbal, 556 U.S. at 679* (explaining, on a motion to dismiss, a court must "assume [the] veracity" of well-pleaded factual allegations "and then determine whether they plausibly give rise to an entitlement to relief"). At the pleading stage, Sanofi plausibly has alleged that Mylan caused its injuries, and that is all a plaintiff must do to survive a motion to dismiss.

IV. Conclusion

For reasons explained, the court grants Mylan's Motion to Dismiss in part. The court dismisses Sanofi's exclusive dealing claims **[*78]** based on discounts or rebates that Mylan offered to state or state agencies because the *Noerr-Pennington* doctrine bars them. The court denies Mylan's Motion to Dismiss in all other respects.

IT IS THEREFORE ORDERED BY THE COURT that defendants Mylan, Inc. and Mylan Specialty, L.P.'s Motion to Dismiss the *Sanofi* Complaint (Doc. 43) is granted in part and denied in part.

IT IS SO ORDERED.

Dated this 21st day of December, 2017, at Topeka, Kansas.

Opinion

MEMORANDUM DECISION AND ORDER

COGAN, District Judge.

IQ Dental Supply, Inc. ("IQ") brings this suit against Henry Schein, Inc. ("Schein"), Patterson Companies, **[*2]** Inc. ("Patterson"), and Benco Dental Supply Company ("Benco"). IQ alleges that defendants — dental supply distributors — have engaged in an ongoing antitrust conspiracy by boycotting and attempting to destroy an online distribution platform run by a non-party, SourceOne Dental ("SourceOne") through which IQ sells dental products to dentists. IQ alleges unreasonable restraint of trade under the Sherman Act and corresponding state laws, as well as state common law claims for tortious interference with prospective business relations, civil conspiracy, and aiding and abetting.

The case is before me on defendants' motion to dismiss. For the reasons explained below, the motion is granted.

BACKGROUND

The facts described below are taken from plaintiff's pleadings and are presumed to be true for purposes of this motion.

IQ is a nation-wide distributor of dental supplies and equipment. IQ buys products from manufacturers and stores them in warehouses prior to their resale. Defendants are major distributors of dental supplies that together account for 80-90% of the relevant market (Schein 41%, Patterson 34%, Benco 10%). Defendants sell directly to dentists. Defendants do so primarily through on-the-ground **[*3]** regional sales representatives. In the United States, dental supplies and equipment are a $10 billion market. On average, dental practices use 100 or more different types of dental supplies on a monthly basis. Because consumer dentists can "one-stop-shop" with distributors, the vast majority of dental supplies and equipment are sold by manufacturers to wholesale distributors for reasons of efficiency, which in turn resell those supplies and equipment to dental professionals.

SourceOne, not a party to this suit, operates an "online distribution platform" through a series of e-commerce websites. Suppliers, such as IQ, sell dental supplies to dentists through those platforms. In addition to its own branded site, SourceOne operates state-specific websites in conjunction with state dental associations ("SDAs"). SourceOne does not supply or sell the products on its platforms; instead, it provides a mechanism for suppliers and dentists to interface. Suppliers who sell through SourceOne conduct transactions, fill orders, and ship the sold products directly to consumers. The suppliers then pay SourceOne a commission on each sale made through SourceOne's websites, and remit a commission to the **[*4]** SDAs for sales made on the state-specific sites. IQ claims that SourceOne offered dentists lower prices than those available through the traditional sales model employed by defendants.

The first SDA SourceOne site launched was sponsored by the Texas Dental Association (the "TDA") in October 2013, and was branded as "TDA Perks Supplies." It was followed shortly thereafter by websites sponsored by the Arizona Dental Association (the "AZDA") and the Nevada Dental Association.

IQ alleges that defendants saw SourceOne as a threat to their long-standing market position. In response, IQ claims that defendants engaged in coordinated anticompetitive conduct to drive SourceOne from the market. This conduct allegedly took three forms: first, IQ alleges that defendants pressured dental product manufacturers not to sell to IQ or through the SourceOne websites. Second, IQ alleges that defendants coordinated and agreed to threaten and implement boycotts of SDAs that worked with SourceOne. Third, IQ alleges that defendants boycotted dentists who purchased dental supplies through SourceOne websites.

As to the first prong of the conspiracy, IQ claims that defendants pressured manufacturers supplying distributors **[*5]** who sold through the SourceOne sites, with the ultimate aim of depriving SourceOne of products to list on its sites and consequently driving it out of business. Defendants, IQ alleges, could pressure the manufacturers by threatening them with the loss of their business if the manufacturers continued to sell to distributors who worked with SourceOne.

Initially, two suppliers, DDS and Arnold, provided the bulk of the products available on the TDA and AZDA SourceOne websites. IQ alleges that because of the success of defendants' alleged anticompetitive efforts, by April

2014, manufacturers had stopped selling to DDS and Arnold, and SourceOne's websites had lost access to thousands of supplies, including at least 75% of their formerly top-selling products.

For example, IQ alleges that DMG America, a dental manufacturer, withdrew permission for its products to be sold through SourceOne sites under pressure from Schein and Patterson. As a result of manufacturer withdrawals, and as defendants' allegedly intended, DDS and Arnold yielded to defendants' pressure and ended their relationships with SourceOne. IQ claims that a prospective replacement supplier, DHP Dental, told SourceOne that it was **[*6]** deterred from selling through SourceOne's websites after hearing about defendants' alleged boycott from dental manufacturers. In May 2014, after DDS and Arnold terminated their relationships with SourceOne, IQ signed a contract with SourceOne to offer dental supplies for sale to dentists through SourceOne's websites.

In its complaint, IQ provides four examples of defendants' alleged direct pressure on manufacturers to boycott IQ:

- In 2011, representatives from a Danaher Corporation subsidiary manufacturer called IQ about an incident when IQ sold a product to a buyer, who then attempted to sell the product overseas. IQ suspected that Danaher was looking for a reason to pull out of doing business with IQ — which it eventually did — and that this happened due to pressure from Schein.
- In March 2015, a representative from Tuttnauer, a dental manufacturer, advised IQ that if IQ continued selling Tuttnauer products through the TDA Perks website, it would pull its product line from IQ. IQ alleges that this threat was made under pressure from Schein.

- At a November 2015 New York dental association trade show, IQ displayed products manufactured by Air Technique Imaging ("ATI"). A representative **[*7]** from ATI directed IQ to remove the display, because he was "getting grief" from representatives from two different companies, which IQ later identified as Schein and Patterson, who were unhappy that ATI had permitted IQ to distribute its products. As a result, IQ claims that it had to stop promoting ATI's products at its booth.
- In 2016, a manager from KaVo Kerr, a major dental products manufacturer, told IQ that a Patterson representative had asked him to pull his products from IQ because of IQ's sale of products through TDA Perks Supplies.

IQ also alleges four occasions when manufacturers declined IQ's request to be a dealer for their product lines. One occurred in 2013; the rest in 2016. The complaint makes clear that at least three of these manufacturers had pre-existing distribution relationships. IQ alleges that each of these manufacturers declined IQ's proposals under pressure from one or more of defendants.

Turning to IQ's allegations of defendants' boycotts of SDAs, IQ claims that defendants coordinated and agreed to threaten and implement boycotts of SDAs that worked with SourceOne by skipping those SDAs' respective trade shows. The aim of these alleged boycotts was to punish **[*8]** SDAs that had partnered with SourceOne and simultaneously dissuade other SDAs from doing so. Trade shows contribute a substantial portion of SDAs' income. Historically, all three defendants had attended such shows. IQ claims that the alleged boycotts deterred many SDAs from sponsoring their own SourceOne websites, which limited the platform's growth, and, in turn, stifled IQ's profits.

IQ alleges that defendants specifically targeted trade shows in Texas and Arizona. IQ claims, for instance, that in October 2013, regional managers from Schein and Benco had a phone call, memorialized in an email, in which they discussed their shared interest in not attending the TDA trade show after the TDA launched its SourceOne affiliated site. The managers discussed reaching out to their counterpart at Patterson to get his support.

As to the AZDA trade show, IQ points to a July 2014 email from a Benco to a Patterson employee, stating, "[w]e are of the same mindset. It would be gratifying to see every distributor with a local presence make a unified statement on the AZDA's ill-conceived idea" to work with SourceOne. In another email that same month, a Benco employee wrote to a manufacturer, "I have communicated **[*9]** with our competition at Schein and Patterson and we are all of the same mind that we will not be supporting a competitor's [AZDA's] meeting next year."

IQ also alleges that defendants pressured manufacturers to boycott the trade shows. IQ claims, for instance, that in March 2014 dental vendors reported that they were told by both Patterson and Schein to avoid TDA Perks, or risk

Patterson and Schein "shelv[ing] their products nationwide." IQ also points to a November 2013 email in which a Schein employee wrote to a colleague about speaking with Patterson and Benco, and not giving the TDA "a dime." The other Schein employee responded writing, "I refuse to work with any manufacturer rep that sells through [SourceOne]. That's what every distributor should say. The manufacturers will get scared and pull out." IQ alleges that Schein, Patterson, and Benco together "pressured dozens of manufacturers to pull out of the AZDA show."

IQ claims that as a result of this alleged conduct, other SDAs were deterred from working with SourceOne. For example, IQ states that at a July 2014 dental meeting in Chicago, the Ohio Dental Association's representative was enthusiastic about partnering with SourceOne. However, **[*10]** the representative subsequently informed SourceOne that Schein and Patterson had threatened to "take action against the Ohio Dental Association if it proceeded with a SourceOne website." The partnership fizzled. According to IQ, the Virginia Dental Association, Colorado Dental Association, and Louisiana Dental Association all decided not to partner with SourceOne after considering the risk that doing so would jeopardize their relationships with defendants.

On the other hand, the Nevada Dental Association did launch a SourceOne website, and IQ argues that it did so because it does not put on a trade show, and thus had less exposure to defendants' retaliatory pressure. IQ concedes that recently, SDAs in Florida and Georgia have launched SourceOne sites, but claims that defendants have already inflicted their intended damage.

As the final prong of the conspiracy, IQ also alleges that defendants boycotted dentists who purchased dental supplies through SourceOne websites and from IQ by withholding essential maintenance services for those dentists' equipment.

In addition to defendants' three alleged anticompetitive attacks on SourceOne described above, IQ also describes an allegedly long-standing **[*11]** campaign (since at least as early as 2005) among defendants to fix the prices in the dental products market, with the aim of maintaining supracompetitive margins. IQ alleges that defendants' margins — purportedly at 35% or higher — are well above what would obtain in a competitive market, and that defendants worked to exclude from the market distributors willing to sell manufacturers' products at a lower margin.

To that end, IQ claims that when distributors willing to work at lower margins approached manufacturers to sell their products, the manufacturers reported that they had to decline to sell to them in the face of pressure from defendants. IQ alleges that absent coordinated conduct by all defendants, the price fixing would not have worked, as the manufacturers could simply have shifted their sales to another distributor.

IQ's allegations on this point are based in large part on a June 2008 meeting between sales representatives of distributors Archer & White and Dynamic Dental, which were attempting to sell products at a lower margin but which were allegedly stymied by a defendant-driven manufacturer boycott, led by Schein and Burkhart Dental Supply Company. At that meeting, the **[*12]** Schein and Burkhart representatives allegedly "offered to end the group boycott of Archer & White and Dynamic Dental" if both "agreed to maintain margins on the sales of their dental products between 32% and 34%, the then-prevailing margin" allegedly maintained by defendants.

In addition to this alleged anticompetitive conduct, IQ also claims that defendants engaged in a campaign to falsely disparage SourceOne and IQ and their products and services. IQ claims that defendants have misrepresented products sold by IQ as expired, counterfeit, altered, sold through unauthorized distribution channels, or otherwise unfit for their intended purpose. IQ claims that defendants made these comments to discourage dentists from buying from IQ.

As discussed above, IQ describes that its relationship with SourceOne entails it conducting its transactions, filling received orders, and shipping sold products directly to the dentists, without SourceOne's involvement beyond listing the goods on its sites. IQ pays SourceOne a commission on each sale. Since May 2014, IQ has sold approximately 90% of products sold on SourceOne's sites. IQ claims that but for defendants' conduct, the SourceOne platform would **[*13]** have spread nationwide, and, in turn, IQ's sales through the platform's various sites would have increased exponentially.

In 2015, SourceOne filed suit in this Court against Schein, Patterson, and Benco, alleging, *inter alia*, unlawful restraint of trade under the Sherman Act. SourceOne claimed that the three entered into a conspiracy to prevent its emergence as an effective competitor in the distribution and sale of dental supplies. Specifically, SourceOne alleged that Schein, Patterson, and Benco conspired to:

• boycott the TDA and AZDA after each association named SourceOne as an endorsed vendor of dental supplies;
• pressure other SDAs from entering similar agreements with SourceOne;
• pressure manufactures not to attend SDA conventions;
• pressure manufactures and other distributors not to provide products to SourceOne; and
• deny services to dentists who did business with SourceOne.

SourceOne alleged injury to itself and to competition and consumers. SourceOne has settled with Schein; Patterson and Benco currently have motions for summary judgment before this Court.

DISCUSSION

IQ argues that defendants' alleged group boycott constitutes unreasonable restraint of trade in violation of *Section 1* **[*14]** of the Sherman Act, *15 U.S.C. § 1*, the *Donnelly Act, N.Y. Gen. Bus. Law §§ 340 et seq.*; and the New Jersey Antitrust Act, *N.J.S.A. §§ 56:9-1 et seq* ("NJAA"). IQ also alleges state law tort claims.

A. Antitrust Standing

An antitrust plaintiff has to meet not only the familiar requirements of constitutional standing, but must also demonstrate at the pleading stage that it satisfies "antitrust standing." See *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 436-37 (2d Cir. 2005)*. "This standing requirement originates in the Supreme Court's recognition that, although *Section 4* of the Clayton Act appears to confer a broad private right of action for antitrust damages, Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." Id. Instead, the antitrust laws are intended to provide a remedy for "injuries reflecting an anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *In re London Silver Fixing, Ltd., Antitrust Litig., 213 F. Supp. 3d 530, 550 (S.D.N.Y. 2016)* (internal quotations omitted).

Accordingly, the Supreme Court has identified several factors to determine whether a plaintiff has antitrust standing. See *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters 459 U.S. 519, 529, 103 S. Ct. 897, 904, 74 L. Ed. 2d 723 (1983)*. The Second Circuit "has distilled these factors into two imperatives: we require a private antitrust plaintiff plausibly to allege (a) that it suffered a special kind of 'antitrust injury,' and (b) that it is a suitable plaintiff **[*15]** to pursue the alleged antitrust violations and thus is an 'efficient enforcer' of the antitrust laws." *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 76 (2d Cir. 2013)* (internal quotations omitted). IQ does not satisfy either imperative.

1. Antitrust Injury

An "antitrust injury" is "an injury attributable to the anticompetitive aspect of the practice under scrutiny." *Port Dock & Stone Corp. v. Oldcastle Ne., Inc., 507 F.3d 117, 122 (2d Cir. 2007)*. Courts in the Second Circuit use a three-step test to determine if a plaintiff has sufficiently alleged antitrust injury. *Gatt Commc'ns, 711 F.3d at 76*.

At the first step, the party asserting that it has been injured by an illegal anticompetitive practice must "identify the practice complained of and the reasons such a practice is or might be anticompetitive." Id. (internal quotations and alterations omitted). At this stage, the Court evaluates if the plaintiff generally alleges anticompetitive conduct.

IQ alleges that defendants engaged in anticompetitive conduct in the market for dental supplies. That conduct allegedly included threatening manufacturers who sold through SourceOne via IQ with a boycott, threatening to boycott and allegedly boycotting various SDAs, and (although not developed in IQ's pleadings) boycotting dentists. IQ also alleges a years-long price-fixing campaign. The goal of this vast anticompetitive **[*16]** campaign was, allegedly, to force SourceOne out of business. IQ argues that with SourceOne, a "disruptive," low-cost innovator limited in its growth or forced out of business, altogether, consumers (dentists) would be forced to purchase through defendants, and would therefore be deprived of the choice of "high-quality" dental products at a lower cost through SourceOne.

The first step of the antitrust injury test does not require IQ to allege that it was the target or do more than it has here. Instead, IQ only has to allege that the conduct it describes is prohibited by the antitrust laws. It has met that threshold by alleging a series of boycotts designed to force a low-cost competitor out of the market, and by describing a price-fixing campaign.

At the second step, a court evaluating if an antitrust plaintiff has adequately alleged antitrust injury must identify "the actual injury the plaintiff alleges," by "look[ing] to the ways in which the plaintiff claims it is in a 'worse position' as a consequence of the defendant's conduct." Id. (internal quotations and alterations omitted).

First, as to the price fixing scheme, IQ cannot assert injury. It is black letter law that IQ cannot claim to be **[*17]** a competitor of defendants and also claim to have been injured by their imposition of supercompetitive prices on the market. See *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 582-83, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* ("Nor can respondents recover damages for any conspiracy by petitioners to charge higher than competitive prices in the American market. Such conduct would indeed violate the Sherman Act, but it could not injure respondents: as petitioners' competitors, respondents stand to gain from any conspiracy to raise the market price.") (internal citations omitted); *Yong Ki Hong v. KBS Am., Inc., 951 F. Supp. 2d 402, 417-18 (E.D.N.Y. 2013)* ("[H]orizontal price-fixing schemes are illegal under the antitrust laws only because of the harm they may cause—increased prices—to *purchasers* of the product for which prices have been fixed." (internal quotations and alterations omitted)). As a competitor in the same market, IQ stood only to benefit from any price increase imposed by defendants.

Second, IQ cannot claim injury arising out of defendants' alleged boycott schemes. IQ's own complaint is fatal to it at this step. IQ alleges that by April 2014, "[d]efendants' tactics achieved their objectives," and DDS and Arnold "terminated their relationships with SourceOne." Thereafter, "SourceOne sought a replacement supplier." In May 2014, SourceOne approached IQ to work as its **[*18]** distributor, and "[a]fter brief negotiations, IQ signed a contract with SourceOne, "becom[ing] the predominant seller on the Websites." Step two of the injury analysis requires IQ to claim that it was put in a "worse position" as a consequence of defendants' conduct. But IQ admits that it only secured a potentially lucrative contract with SourceOne *because of defendants' alleged anticompetitive conduct*. The moment IQ made *a single sale* through SourceOne, it was in a better position than it otherwise would have been.

IQ, therefore, cannot plausibly assert that defendants' conduct prevented it from making as many sales through SourceOne as it otherwise might have; but for defendants' conduct, IQ would have made *no* sales through SourceOne, as DDS and Arnold would presumably still be SourceOne's distributors. Ironically, IQ benefited from defendants' allegedly anticompetitive conduct.

Accordingly, IQ has not alleged an antitrust injury, and the Court need not reach the third step of analysis, which would require determining if IQ's alleged injury flowed from the alleged anticompetitive scheme.[1]

---

[1] IQ claims that antitrust standing by virtue of being a competitor of defendants and having suffered an antitrust injury. As a threshold matter, because IQ has not adequately alleged that it suffered an antitrust injury, this argument fails. However, even if IQ had alleged an antitrust injury, the case law does not stand for the proposition that antitrust standing follows antitrust injury as a matter of course. "[T]he Second Circuit has made clear [that] the notion that competitors have antitrust standing is 'oversimplified.'" *IBM v. Platform Solutions, Inc., 658 F. Supp. 2d 603, 610 (S.D.N.Y. 2009)*. Indeed, "a private antitrust plaintiff's

2. Efficient Enforcer

Even if IQ had alleged an antitrust injury, it could not demonstrate that it meets the second **[*19]** requirement for antitrust standing by showing that it would be an "efficient enforcer" of the antitrust laws. See *Paycom Billing Servs., Inc. v. Mastercard Int'l, Inc., 467 F.3d 283, 290 (2d Cir. 2006)* ("Even if a plaintiff adequately alleges an antitrust injury, it may still be held to lack standing."); *Balaklaw v. Lovell, 14 F.3d 793, 798 n.9 (2d Cir. 1994)* ("[A]n antitrust injury, while necessary to establish standing under *section 4* of the Clayton Act, may not always be sufficient to confer standing, because a party may have suffered antitrust injury but may not be a proper plaintiff under *§ 4* for other reasons." (internal quotations omitted)). On this basis alone, IQ lacks antitrust standing.

To determine if a plaintiff is an "efficient enforcer," courts look to:

> (1) the directness or indirectness of the asserted injury; (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Id.

The weight given to each factor is case-specific. See *Daniel, 428 F.3d at 443* ("Similarly, the weight to be given the various factors will necessarily vary with the circumstances of particular **[*20]** cases."). However, the first factor (the directness or indirectness of the asserted injury), "must be met in every case." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 134 S. Ct. 1377, 1392, 188 L. Ed. 2d 392 (2014)*. "The purpose [of the efficient enforcer analysis] is to ensure that the statute is not read so broadly that any person who has been harmed by anti-competitive conduct, however remotely or indirectly, is granted a right to sue." *Daniel, 428 F.3d at 450*.

As discussed below, IQ only satisfies the first factor, and even there, only with respect to a subset of its allegations. Therefore, each of the efficient enforcer factors weigh against it.

The first efficient enforcer factor examines whether a plaintiff would be an efficient enforcer because it suffered a direct, rather than a remote, injury. "Evaluating the directness of an injury is essentially a proximate cause analysis that hinges upon whether the harm alleged has a sufficiently close connection to the conduct the statute prohibits." *London Silver, 213 F. Supp. 3d at 552* (internal quotations omitted). Accordingly, in evaluating proximate cause, Courts look to

> whether the injury that resulted was within the scope of the risk created by the defendant's wrongful act; whether the injury was a natural or probable consequence of the conduct; whether there was a superseding or **[*21]** intervening cause; whether the conduct was anything more than an antecedent event without which the harm would not have occurred.

Lotes Co. v. Hon Hai Precision Indus. Co., 753 F.3d 395, 412 (2d Cir. 2014) (internal alterations omitted).

IQ alleges that it was "denied access to numerous State markets and countless new customers, and as a result lost millions of dollars of profits that it otherwise would have made," because of defendants' successful efforts to stymie SourceOne's growth. As discussed above, defendants allegedly boycotted dentists, SDAs, and manufacturers. Only IQ's claims about defendants' pressure on manufacturers describe anticompetitive conduct that is sufficiently direct.

The pressure that IQ describes defendants exerting on dentists and SDAs, on the other hand, directly targeted SourceOne. There was no intermediate link in the causal chain between the anticompetitive conduct and effect.

---

status as a competitor is not dispositive." *Dentsply Int'l Inc. v. Dental Brands for Less, LLC, No. 15 CIV. 8775, 2016 U.S. Dist. LEXIS 149139, 2016 WL 6310777, at *3 (S.D.N.Y. Oct. 27, 2016)* (internal quotations omitted). Courts in the Second Circuit "can ascertain antitrust injury only by identifying the anticipated anticompetitive effect of the specific practice at issue and comparing it to the actual injury the plaintiff alleges." *Port Dock, 507 F.3d at 122*.

Instead, defendants allegedly pressured dentists and SDAs to not buy from and partner with SourceOne, respectively. When dentists and SDAs yielded to defendants' alleged pressure, SourceOne lost business (some actual and some prospective).

However, the injury that IQ allegedly suffered from this conduct was conceptually different from that suffered by SourceOne. **[*22]** First, IQ's harm is at least one causal step removed from SourceOne's harm: IQ was only injured when SourceOne's sales declined, so its loss was, by definition, derivative of SourceOne's and therefore remote. Second, any harm suffered by IQ is best understood as incidental to that suffered by SourceOne. IQ was (presumably in proportion to its sales) no more impacted by defendants' conduct than was any other distributor that sold through SourceOne.

IQ describes, like in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 746, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, a category of injury that is an improper basis for an antitrust suit. There, the Supreme Court held that indirect purchasers of price-fixed goods, sold at an inflated price because of anticompetitive conduct, lacked standing to bring suit against the price-fixer. Here, IQ is analogously remotely situated as to the party allegedly engaging in anticompetitive conduct, and just as in Illinois Brick, its claimed injury necessarily passes through a middle-party.

On the other hand, IQ's allegations of direct pressure on dental manufacturers gives rise to IQ's only direct injury that is not impermissibly remote. IQ identifies itself as the "fulcrum" on which defendants levered anticompetitive force against SourceOne by pressuring **[*23]** manufacturers. In other words, by threatening manufacturers with the loss of their business if the manufacturers continued to sell to IQ, defendants allegedly used IQ as a necessary means to harm SourceOne. Boycott pressure always involves a target; here the target was IQ. IQ's injury was, as described, "a necessary step in effecting the ends of the alleged illegal conspiracy and the very means by which it is alleged that [defendants] sought to achieve [their] illegal ends." *In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 159 (2d Cir. 2016)* (internal quotations omitted). With the manufacturer aspect of defendants' alleged anticompetitive scheme — and this aspect alone — IQ has alleged conduct that does not situate IQ at too far a remove from defendants' conduct.

As to the second efficient enforcer factor, there is not just one class of other parties whose self-interest would be expected to lead them to sue, but many. Implicit in the second factor "is recognition that not every victim of an antitrust violation needs to be compensated under the antitrust laws in order for the antitrust laws to be efficiently enforced" when other, better situated parties can be expected to bring suit against the same defendants. *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 779 (2d Cir. 2016)*.

Taking IQ's allegations to be true, it **[*24]** is clear that SourceOne — the obvious, express target of defendants' alleged conspiracy — is the party that would be most motivated and best situated to pursue an antitrust claim against defendants. In fact, SourceOne has done exactly that, by filing a suit that is currently pending in this Court. Indeed, as defendants noted, some of the paragraphs in IQ's complaint are strikingly similar to portions of SourceOne's earlier-filed complaint. Therefore, denying IQ standing in this suit is unlikely to leave defendants' alleged antitrust violations undetected, and, if found to have occurred, unremedied.

But SourceOne is hardly the only party that would be rationally motivated by self-interest to sue defendants for exactly the same conduct alleged here. Fatally for IQ, several of these other parties are more incentivized and better situated than IQ to pursue antitrust remedies.

First, certain of the SDAs impacted by defendants' alleged conspiracy are presumably well-motivated to sue. IQ claims that trade shows are a central part of the SDA business model. Given that defendants allegedly control 80-90% of the relevant market, boycotting certain SDA shows would likely have an outsized impact **[*25]** on the hosting SDAs that would incentivize them to pursue legal recourse.

Second, the manufacturers that defendants allegedly directly threatened are presumably highly motivated to bring suit. As to them, IQ's allegations present a textbook case of anticompetitive pressure.

Third, the dentists who allegedly suffer the consequences of a monopolized market, with resultant higher prices (as claimed by IQ's price-fixing allegations) and less choice, would also likely be highly incentivized to bring suit.

Finally, even if they were to encounter the same difficulty with other elements of the standing inquiry as does IQ, DDS and Arnold were the distributors who sold through SourceOne who actually suffered such anticompetitive pressure that they abandoned their relationship with SourceOne. If any party in IQ's specific situation were to be well-positioned to bring a suit, it would one that actually lost a valuable contract, as opposed to the party that gained one.

The existence of each of these more directly injured groups diminishes the justification for granting IQ — a much more remote party — antitrust standing.

As to the third efficient enforcer factor, IQ alleges highly speculative injuries. **[*26]** Although a degree of uncertainty is expected in calculating antitrust damages, highly speculative damages are not recoverable. See *Gelboim, 823 F.3d at 780*; see also *J. Truett Payne Co., Inc. v. Chrysler Motors Corp., 451 U.S. 557, 566, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981)* ("Our willingness to accept a degree of uncertainty in these cases rests in part on the difficulty of ascertaining business damages as compared, for example, to damages resulting from a personal injury or from condemnation of a parcel of land.").

IQ's damages turn on lost business opportunities. IQ argues that thanks to defendants' conduct, it lost the profit from potential future sales that might have been made through presently nonexistent websites that SourceOne might have launched across the country in coordination with various SDAs. This theory is far too attenuated, resting on a series of tenuous and conjectural decisions that would have to be made by SourceOne, manufacturers, SDAs, dentists, and entities selling through SourceOne.

Because IQ's prospective damages are derived from "conjectural theories of injury and attenuated economic causality," any attempt at calculating IQ's damages "would mire [this Court] in intricate efforts to recreate the possible permutations in the causes and effects" of each alleged lost sale in each state and **[*27]** the predicate factual developments for each. *Reading Indus., Inc. v. Kennecott Copper Corp., 631 F.2d 10, 14 (2d Cir. 1980)*. Given the layers of necessary factual inferences that IQ's damages claims require, the Court cannot simply set aside the damages determination for a later day without first addressing the question of whether they could ever be calculated at all.

IQ would ask this Court to construct an alternate universe, in which a myriad of discrete players with their own complex motivations and decision-making calculations would have aligned to create profitable opportunities for SourceOne and IQ. It would then ask the Court to calculate how much profit it lost. Notably, the remoteness of most of IQ's injuries from defendants' alleged conduct compounds their speculative nature. The number of variables that would need to be resolved to approximate any damages calculation highlights the challenge. Any award would, at a minimum, have to take into account: 1) the number of SDAs that would have partnered with SourceOne, and when they would have done so; 2) the commission rate that each would have demanded of SourceOne; 3) the commission rate that SourceOne would charge IQ if it expanded and increased its overhead costs; 4) the number of additional orders that **[*28]** would be placed in each state through SourceOne's websites, rather than from IQ's own website; and 5) the price that each manufacturer would charge IQ for its products in the future.

As it must, IQ acknowledges that its claim would require complex damage calculations. This conclusion is inescapable in light of the above analysis. IQ, however, argues that experts can later be left to resolve the issue. The Court is not convinced. The speculativeness of IQ's claimed damages militates strongly against the Court holding it to be an efficient enforcer.

Turning to the fourth efficient enforcer factor, the risk that other plaintiffs would be entitled to recover duplicative damages is significant — especially because SourceOne is already engaged in litigation against defendants, and has indeed settled with one. As the above discussion shows, SourceOne, SourceOne's distributors, manufacturers, SDAs, and dentists could all "be in a position to assert conflicting claims to a common fund." *AGC, 459 U.S. at 544*. Calculation of which entity is entitled to what would be rendered all the more difficult by the hypothetical nature of

IQ's claimed injuries (detailed above), and by the number of variables at play. Indeed, **[*29]** "[i]t is wholly unclear on this record how issues of duplicate recovery and damage apportionment can be assessed." *Gelboim, 823 F.3d at 780*.

The balance of the efficient enforcer factors weighs decidedly against IQ. Therefore, IQ has satisfied neither prong of the antitrust standing inquiry.

B. State ***Antitrust Law***

IQ's allegations of defendants' violations of New York and New Jersey state antitrust laws are also dismissed because of the failure of its federal claims.

"The Donnelly Act is patterned after the *Sherman Anti-Trust Act* [] and is generally construed in light of federal precedent." *Great Atl. & Pac. Tea Co. v. Town of E. Hampton, 997 F. Supp. 340, 352 (E.D.N.Y. 1998)*. The Second Circuit has held that there is "no reason...to interpret the Donnelly Act differently than the Sherman Act with regard to antitrust standing." *Gatt. Commc'ns, 711 F.3d at 81-82*.

Likewise,

> Substantively, the NJAA is "virtually identical" to the Sherman Act, and the New Jersey legislature "intended the [NJAA] as consistent with federal ***antitrust law***, and expressly provided that it 'be construed in harmony with ruling judicial interpretations of comparable Federal antitrust statutes and to effectuate, insofar as practicable, a uniformity in the laws.'

Bocobo v. Radiology Consultants of S. Jersey, P.A., 477 F. App'x 890, 896 (3d Cir. 2012).

C. State Law Claims

1. Choice of Law

Defendants have also moved to dismiss IQ's state law claims for tortious **[*30]** interference with prospective business relations, civil conspiracy, and aiding and abetting. The Court has dismissed IQ's federal question claims, but it retains jurisdiction over IQ's state law claims through its exercise of diversity jurisdiction under *28 U.S.C. § 1332*.

As a preliminary manner, the Court has to determine what state law applies. "Because this Court is sitting in diversity jurisdiction . . . New York choice of law principles govern." *Crescent Oil & Shipping Servs., Ltd. v. Phibro Energy, Inc., 929 F.2d 49, 52 (2d Cir. 1991)*. Under New York law, "the first question to resolve in determining whether to undertake a choice of law analysis is whether there is an actual conflict of laws." *Curley v. AMR Corp., 153 F.3d 5, 12 (2d Cir. 1998)*.

The parties acknowledge that there is no conflict between New York and New Jersey law as to tortious interference. See *Treppel v. Biovail Corp., No. 03 CIV. 3002, 2004 U.S. Dist. LEXIS 20714, 2004 WL 2339759, at *8 (S.D.N.Y. Oct. 15, 2004)*, on reconsideration, *No. 03CIV3002, 2005 U.S. Dist. LEXIS 2737, 2005 WL 427538 (S.D.N.Y. Feb. 22, 2005)* ("With respect to tortious interference with prospective economic advantage, the laws of New York and New Jersey are nearly indistinguishable.").

Likewise, neither party claims a conflict between New York and New Jersey law as to aiding and abetting. The parties are correct; there is no difference between the standard as applied in both states. See *Ryan v. Hunton & Williams, No. 99-CV-5938, 2000 U.S. Dist. LEXIS 13750, 2000 WL 1375265, at *8 (E.D.N.Y. Sept. 20, 2000)* ("To establish a claim of aiding and abetting fraud under New York law, a plaintiff must establish (i) the **[*31]** existence of a violation by the primary wrongdoer; (ii) knowledge of this violation by the aider and abettor; and (iii) proof that the aider and abettor substantially assisted in the primary wrong."); *Morganroth & Morganroth v. Norris, McLaughlin & Marcus, P.C., 331 F.3d 406, 415 (3d Cir. 2003)* ("The elements of aiding and abetting are: (1) the commission of a wrongful act; (2) knowledge of the act by the alleged aider-abettor; and (3) the aider-abettor knowingly and substantially participated in the wrongdoing."). "Both jurisdictions look to the Restatement (Second) of Torts, which does not require wrongful intent by the third party, but only "that the third party knew of the breach of duty and participated in it." *Johnson v. Nextel Commc'ns, Inc., 660 F.3d 131, 142 (2d Cir. 2011)*; See *Pittman ex rel. Pittman v. Grayson, 149 F.3d 111, 122 (2d Cir. 1998)*; *Miller v. P.G. Lewis & Assoc., No. CIV 05-5641, 2007 U.S. Dist. LEXIS 6433, 2007 WL 316446, at *6 (D.N.J. Jan. 30, 2007)* ("New Jersey courts have recognized the Restatement of Torts as setting the standard for civil aiding and abetting liability."). Therefore, it is undisputed that New York law applies to each of those claims.

IQ, however, claims that New Jersey recognizes a tort of civil conspiracy, which New York does not, and that the Court should therefore conduct interest analysis and apply New Jersey law. IQ is mistaken. When confronted with this question, other courts in this Circuit have found that New York law applies.[2]

First, New York and New **[*32]** Jersey both treat civil conspiracy as a derivative claim: "[i]t is well settled that New York does not recognize an independent civil tort of conspiracy. While a plaintiff may allege, in a claim of fraud or other tort, that parties conspired, the conspiracy to commit a fraud...is not, of itself, a cause of action." *Gorbaty v. Wells Fargo Bank, N.A., No. 10-CV-3291, 2012 U.S. Dist. LEXIS 55284, 2012 WL 1372260, at *23 (E.D.N.Y. Apr. 18, 2012)*. As to New Jersey: "[t]he same is true of New Jersey." Id.; see also *Brown ex rel. Estate of Brown v. Philip Morris Inc., 228 F. Supp. 2d 506, 517, fn. 10 (D.N.J. 2002)* ("Civil conspiracy is not an independent cause of action, and conspiracy liability depends on the presence of an underlying finding of tort liability."); *Morganroth, 331 F.3d at 414-15* ("Mere agreement to do a wrongful act can never alone amount to a tort, whether or not it may be a crime. Some act that is itself a tort must be committed by one of the parties in pursuance of the agreement." (internal citations omitted)); *Eli Lilly & Co. v. Roussel Corp., 23 F. Supp. 2d 460, 497 (D.N.J. 1998)* ("Thus, the conspiracy is not the gravamen of the charge, but merely a matter of aggravation, enabling the plaintiff to recover against all the defendants as joint tortfeasors. The actionable element is the tort which the defendants agreed to perpetrate and which they actually committed.").

Second, once a plaintiff adequately pleads an underlying tort, New York and New Jersey analyze that plaintiff's secondary civil conspiracy **[*33]** claim in a substantially similar manner. In New York, "[t]o establish [a] claim of civil conspiracy, [a plaintiff] must demonstrate the primary tort, plus the following four elements: (1) an agreement between two or more parties; (2) an overt act in furtherance of the agreement; (3) the parties' intentional participation in the furtherance of a plan or purpose; and (4) resulting damage or injury." *World Wrestling Fed'n Entm't, Inc. v. Bozell, 142 F. Supp. 2d 514, 532 (S.D.N.Y. 2001)*. New Jersey requires "substantially the same elements." *Treppel, 2004 U.S. Dist. LEXIS 20714, 2004 WL 2339759, at *8-9*; see *Morgan v. Union Cty. Bd. of Chosen Freeholders, 268 N.J. Super. 337, 364, 633 A.2d 985, 998 (App. Div. 1993)* ("A civil conspiracy is "a combination of two or more persons acting in concert to commit an unlawful act, or to commit a lawful act by unlawful means, the principal element of which is an agreement between the parties 'to inflict a wrong against or injury upon another,' and 'an overt act that results in damage."). "New York and New Jersey do not conflict in that each requires plaintiff to establish four elements in addition to the underlying tort." Id.

Accordingly, New York state law applies to all three of IQ's state law claims.

2. Tortious Interference

---

[2] See *Treppel v. Biovail Corp., No. 03 CIV. 3002, 2004 U.S. Dist. LEXIS 20714, 2004 WL 2339759, at *8 (S.D.N.Y. Oct. 15, 2004)*, on reconsideration, *No. 03CIV3002, 2005 U.S. Dist. LEXIS 2737, 2005 WL 427538 (S.D.N.Y. Feb. 22, 2005)* ("Consequently, New Jersey's jurisprudence [regarding civil conspiracy] is not sufficiently developed to create a conflict with the law of another jurisdiction.").

Under New York law, "[t]o state a claim for tortious interference with prospective business relations, [a] plaintiff must allege that defendants interfered with business or economic relations **[*34]** between the plaintiff and a third party, either (1) with the sole purpose of harming the plaintiff; or (2) by dishonest, unfair or improper means." *S.O. Textiles Co. v. A & E Prod. Grp., a Div. of Carlisle Plastics, Inc., 18 F. Supp. 2d 232, 240 (E.D.N.Y. 1998)*. Such wrongful means "include physical violence, fraud or misrepresentation, civil suits and criminal prosecutions, and some degrees of economic pressure..." *Guard-Life Corp. v. S. Parker Hardware Mfg. Corp., 50 N.Y.2d 183, 191, 406 N.E.2d 445, 428 N.Y.S.2d 628 (1980)*.

A tortious interference claim requires that "the defendant . . . interfere with the business relationship directly; that is, the defendant must direct some activities towards the third party and convince the third party not to enter into a business relationship with the plaintiff." *Piccoli A/S v. Calvin Klein Jeanswear Co., 19 F. Supp. 2d 157, 167 (S.D.N.Y. 1998)*. Furthermore, "[w]here there has been no breach of an existing contract, but only interference with prospective contract rights...plaintiff must show more culpable conduct on the part of the defendant." *NBT Bancorp Inc. v. Fleet/Norstar Fin. Grp., Inc., 87 N.Y.2d 614, 621, 664 N.E.2d 492, 641 N.Y.S.2d 581 (1996)*. "Conduct that is not criminal or tortious will generally be lawful and thus insufficiently culpable to create liability for interference with prospective contracts or other nonbinding economic relations." *Carvel Corp. v. Noonan, 3 N.Y.3d 182, 190, 818 N.E.2d 1100, 785 N.Y.S.2d 359 (2004)* (internal quotations omitted).

Additionally, "[i]f the defendant's interference is intended, at least in part, to advance its own competing interests, the claim will fail unless the means employed include criminal **[*35]** or fraudulent conduct." *PPX Enters. v. Audiofidelity Enters., 818 F.2d 266, 269 (2d Cir. 1987)*. However, courts in this Circuit have held "that alleging violations of federal ***antitrust law*** and state statutory law should satisfy the pleading requirements for wrongful conduct." *Reading Int'l, Inc. v. Oaktree Capital Mgmt. LLC, 317 F. Supp. 2d 301, 334-35 (S.D.N.Y. 2003)*; see also *Cinema Vill. Cinemart, Inc. v. Regal Entm't Grp., No. 15-CV-05488, 2016 U.S. Dist. LEXIS 135941, 2016 WL 5719790, at *7 (S.D.N.Y. Sept. 29, 2016)*, aff'd, *No. 16-3484, 708 Fed. Appx. 29, 2017 U.S. App. LEXIS 18241, 2017 WL 4176223 (2d Cir. Sept. 21, 2017)*. The New York Court of Appeals has also held that where "unlawful restraint of trade is effected," a competitor can be held liable for interference with prospective contractual relations. *Guard-Life Corp., 50 N.Y.2d at 191, 428 N.Y.S.2d 628*. "[E]ven absent a finding of antitrust violations, certain degrees of economic pressure may be sufficiently wrongful to compel a finding of liability based on this cause of action." Id.; see also *Tech. Consortium, Inc. v. Digital Commc'ns Assocs., Inc., 757 F. Supp. 197, 200 (E.D.N.Y. 1991)*.

IQ alleges that defendants interfered with its prospective business relations. Because defendants' alleged conduct targeted prospective relations and was undoubtedly intended to at least in part benefit them, IQ must plead that defendants engaged in criminal or tortious behavior.

IQ's tortious interference claim fails for several reasons. First, although anticompetitive conduct may satisfy the requirement that IQ have suffered criminal or tortious behavior, IQ has not alleged a viable antitrust claim. Accordingly, it has not stated underlying criminal or tortious conduct on which to base **[*36]** its tortious interference claim. Second, just as antitrust standing analysis is intended, in part, to determine if a plaintiff claims injury too remote from the alleged anticompetitive conduct, a tort claim requires a similar proximate cause analysis. For the reasons discussed above (specifically, with regard to why IQ fails the first element of the efficient enforcer analysis), IQ cannot claim that defendants proximately caused its described injuries. To state a claim for tortious interference, IQ must allege instances of *direct* interference with its business relations, and apart from its claims regarding pressure on manufacturers, IQ does not describe any instances of direct interference. Furthermore, IQ's claims regarding manufacturer pressure can charitably be described as threadbare, at best. Third, allowing IQ's tortious interference claim to survive defendants' motion to dismiss would undermine well-developed antitrust jurisprudence. Courts conducting antitrust standing analysis do so to evaluate if an antitrust plaintiff is a proper plaintiff. They must dismiss those who are not. A significant judicial gatekeeping function is impaired if antitrust plaintiffs found to lack antitrust **[*37]** standing can circumvent this threshold pleading requirement by simply bringing a parallel state tort claim. IQ, which does not meet the antitrust standing requirements, should not be permitted to allege its antitrust claims under the guise of bringing a distinct state claim.

3. Civil Conspiracy and Aiding and Abetting

Under New York law, IQ's civil conspiracy and aiding and abetting claims are derivative of its claim for tortious interference. Because IQ's tortious interference claim is dismissed, so are these two tag-along claims.

CONCLUSION

IQ's antitrust claims are dismissed because it lacks antitrust standing. IQ's state law claims for tortious interference, civil conspiracy, and aiding and abetting are dismissed for failure to state a claim. The Clerk is directed to enter judgment accordingly.

SO ORDERED.

Opinion

OPINION AND ORDER

This matter comes before the court on the Motion of Defendant Schlumberger Technology Corporation to Dismiss Counts 3 and 4 of the First Amended **[*2]** Complaint [Doc. #66]. For the reasons discussed below, the motion is granted.

I. Background

This matter relates to a License Agreement between H&P and Omron Oilfield & Marine, Inc., concerning certain software developed for use in the oil industry. The License Agreement granted H&P a right to use and modify the software in the conduct of H&P's customary rig leasing service and business. *See generally* [Doc. #64-1]. Additionally, section 3 of the License Agreement included a non-solicitation provision, which stated:

> [H&P] and its Affiliates will not actively solicit any former (i.e., within two (2) years of their departure from [Omron] or its Affiliates) or current employee or individual contractor of [Omron] or its Affiliates or their predecessors for purposes of assisting [H&P] or its Affiliates in any manner in connection with developing hardware or software that competes with the Software or Licensor Hardware. Notwithstanding the foregoing, [H&P] and its Affiliates shall not be precluded from (i) hiring an employee who independently approaches them, or (ii) conducting general recruiting activities, such as participation in job fairs or publishing advertisements in publications or on Web sites **[*3]** for general circulation.

[Doc. #64-1, p. 5] ("Non-Solicitation Provision"). Omron was acquired by Schlumberger in June 2016.

H&P claims that, on June 16, 2017, Schlumberger wrongfully revoked the License Agreement based on H&P's alleged active solicitation of Schlumberger employees Fergus Hopwood and Philip Martin to develop competitive software. [Doc #64, ¶ 20]. As a result, on June 22, 2017, H&P initiated litigation in this court asserting four counts: (1) breach of contract; (2) declaratory judgment that the Non-Solicitation Provision, as interpreted by Schlumberger, violates Oklahoma's restraint of trade statute (*15 O.S. § 217*), the *Sherman Act* (specifically, *15 U.S.C. § 1*), and the Oklahoma Antitrust Reform Act (specifically *79 O.S. § 203(A)*); (3) violation of *§ 1* of the Sherman Act; and (4) violation of *§ 203(A) of the Oklahoma Antitrust Reform Act*. Schlumberger moved to dismiss H&P's Complaint and, on September 8, 2017, this court granted Schlumberger's motion to dismiss in part, denied the motion in part, and granted H&P the opportunity to amend. [Doc. #60].

On September 22, 2017, H&P filed the Amended Complaint, which asserts four counts: (1) breach of contract; (2) declaratory judgment that H&P has not violated **[*4]** the Non-Solicitation Provision, and that Schlumberger's attempted revocation of the License Agreement is invalid; (3) declaratory judgment that Schlumberger's interpretation of the Non-Solicitation Provision violates *§ 203(A)* of the Oklahoma Antitrust Reform Act; and (4) declaratory judgment that the Non-Solicitation Provision violates Oklahoma's restraint of trade statute. [Doc. #64]. Schlumberger moves to dismiss count three and count four of the First Amended Complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*.

II. Motion to Dismiss Standard

Federal Rule of Civil Procedure 12(b)(6) permits a court to dismiss a claim that "fail[s] to state a claim upon which relief can be granted." "To survive a motion to dismiss under *Rule 12(b)(6)*, a plaintiff must plead sufficient factual allegations 'to state a claim to relief that is plausible on its face.'" *Brokers' Choice of Am., Inc. v. NBC Universal, Inc., 861 F.3d 1081, 1104 (10th Cir. 2017)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "A claim is facially plausible 'when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.'" *Id.* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009))*. "Mere 'labels and conclusions' and 'a formulaic recitation of the elements of a cause of action' are insufficient." *Estate of Lockett ex rel. Lockett v. Fallin, 841 F.3d 1098, 1107 (10th Cir. 2016)* (quoting *Twombly, 550 U.S. at 555*). "Dismissal is appropriate if the law simply affords no relief." *Commonwealth Prop. Advocates, LLC v. Mortg. Elec. Registration Sys., Inc., 680 F.3d 1194, 1202 (10th Cir. 2011)*.

When considering a *Rule 12(b)(6)* motion **[*5]** to dismiss, the court may consider "not only the complaint, but also the attached exhibits and documents incorporated into the complaint by reference." *Id. at 1201*.

III. Analysis

Schlumberger moves to dismiss count 3 and count 4 of the Amended Complaint. The court will separately consider each count.

A. Count 3 — Declaratory Judgment that Schlumberger's Interpretation of the Non- Solicitation Provision of the License Agreement and Revocation Violates *79 O.S. § 203(A)*

Section 203(A), title 79 of the Oklahoma statutes, part of the Oklahoma Antitrust Reform Act, declares "[e]very act, agreement, contract, or combination in the form of a trust, or otherwise, or conspiracy in restraint of trade or commerce within [Oklahoma] . . . to be against public policy and illegal." *79 O.S. § 203(A)*. The Oklahoma Supreme Court has interpreted *section 203(A)* to prohibit "only those acts that *unreasonably* restrain trade or commerce."[1] *Fine Airport Parking, Inc. v. City of Tulsa, 2003 OK 27, 71 P.3d 5, 10 (Okla. 2003)* (emphasis added).

"There are 'two main analytical approaches for determining whether a defendant's conduct unreasonably restrains trade: the per se rule and the rule of reason.'" *Buccaneer Energy (USA), Inc. v. Gunnison Energy Corp., 846 F.3d 1297, 1306 (10th Cir. 2017)* (quoting *Gregory v. Fort Bridger Rendezvous Ass'n, 448 F.3d 1195, 1203 (10th Cir. 2006))*.[2] Courts apply a presumption in favor of the rule of reason. *Id.*

Pursuant to the rule of reason analysis, "only those acts, contracts, **[*6]** agreements or combinations which prejudice the public interest by unduly restricting competition, or unduly obstructing the due course of trade, or which injuriously restrain trade, are unlawful." *Beville, 39 P.3d at 759*. *See also* *Fine Airport Parking, Inc., 71 P.3d at 10* ("'The fundamental test of the reasonableness of an action, which, by its nature, restrains trade, is its effect on the public.'") (quoting *Krebsbach v. Henley, 1986 OK 58, 725 P.2d 852, 858 (Okla. 1986))*. Thus, the court must inquire as to "the extent to which challenged conduct harms competition and . . . then determine whether any such harm is nonetheless justified by countervailing procompetitive benefits." *Buccaneer Energy (USA), Inc., 846 F.3d at 1306*.

The *per se* analysis, on the other hand, applies only to those "'agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.'" *Id.* (quoting *Nw. Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 289, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985))*. *See also* *Fine Airport Parking, Inc., 71 P.3d at 10* ("Restraint of trade that has a pernicious effect on competition is conclusively presumed unreasonable and a per se violation of the antitrust statutes."). That is, "[p]er se violations are restricted to those restraints 'that would *always or almost always* tend to **[*7]** restrict competition and decrease output,'" *Campfield v. State Farm Mut. Auto. Ins. Co., 532 F.3d 1111, 1119 (10th Cir. 2008)* (quoting *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* (emphasis added) (internal citations omitted)), and, then, "only if courts can predict with confidence that it would be invalidated in all or almost all instances under the rule of reason." *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886-87, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. Thus, courts have applied the *per se* analysis only to "recognized types of behavior with which the courts have substantial experience, including horizontal and vertical price-fixing agreements, group boycotts, market allocation, and certain

---

[1] Unlike the Sherman Act, the federal anti-trust statute, which requires evidence of a conspiracy, the Oklahoma Antitrust Reform Act prohibits unilateral acts that unreasonably restrain trade. *See* *Champagne Metals v. Ken-Mac Metals, Inc., 458 F.3d 1073, 1091 (10th Cir. 2006)* (explaining distinction).

[2] The Oklahoma Supreme Court looked to the interpretation of federal anti-trust statutes to determine what constitutes an unreasonable restraint of trade under *79 O.S. § 203*. *See* *Fine Airport Parking, Inc., 71 P.3d at 10*; *Beville v. Curry, 2001 OK 1, 39 P.3d 754, 759 (Okla. 2001)* ("The provisions of this state's antitrust statutes are similar to federal legislation, and interpretation of federal antitrust legislation provides assistance in interpreting the provisions of the Oklahoma statutes.").

types of tying agreements." *Mayfield SWD, L.L.C. v. Blevins, No. CIV-10-0467-HE, 2011 U.S. Dist. LEXIS 5617, 2011 WL 195656, at *5 (W.D. Okla. Jan. 19, 2011)*.

1. Appropriate Level of Analysis

The parties disagree as to the appropriate level of analysis. Schlumberger argues that the claim must be subject to the rule of reason analysis, [Doc. #66, pp. 6-7], while H&P asserts that the *per se* rule applies to its claim for declaratory judgment as to *79 O.S. § 203(A)*.[3] [Doc. #68, pp. 8-13]. The court concludes that the rule of reason, rather than the *per se* approach, is applicable to H&P's claim for declaratory relief as to *79 O.S. § 203(A)* for three reasons.

First, the conduct alleged in the Amended Complaint does not fall within the categories of behavior to which the *per se* rule has previously been applied **[*8]** because the Amended Complaint does not allege a horizontal or vertical price-fixing agreement in the traditional sense, a group boycott, common market allocation, or tying agreement.

Second, the court is not persuaded that unilateral conduct of the type alleged in this matter—specifically, a single entity's interpretation of a non-solicitation provision included in a broader license agreement—would be invalidated in all or almost all instances under the rule of reason. In *Champagne Metals*, the Tenth Circuit declined to apply the *per se* rule to unilateral conduct, stating that it "[was] not prepared to determine that the Oklahoma Supreme Court would hold this unilateral conduct to be a per se violation absent some guidance from that Court." *See* *Champagne Metals, 458 F.3d at 1092*. H&P has not directed this court to subsequent guidance from the Oklahoma Supreme Court to the contrary. The absence of precedential case law strongly indicates that the conduct alleged in the Amended Complaint is not of the recognized types of behavior with which the courts have substantial experience that would always or almost always tend to restrict competition and decrease output.[4]

Third, the court is not persuaded by the Ninth **[*9]** Circuit cases cited by H&P. H&P primarily relies upon a decision by the United States District Court for the Northern District of California—*United States v. eBay, Inc*.—in support of application of the *per se* rule. [Doc. #68, pp. 8-10 (citing *United States v. eBay, Inc., 968 F. Supp. 2d 1030 (N.D. Cal. 2013)]*. In *e-Bay, Inc.*, the court considered whether allegations that e-Bay and Intuit, Inc. executed a non-solicitation/no hire agreement pursuant to which both companies agreed that they would not hire from the other company "period" were subject to the *per se* rule or rule of reason. *Id. at 1038-40*. Although the complaint alleged that the non-solicitation agreement was subject to the *per se* rule as a naked restraint on trade, e-Bay argued that the agreement was ancillary to founder and Chairman of the Executive Committee of Intuit Scott Cook's service on the e-Bay board such that the rule of reason applied. *Id. at 1039* (noting "[w]hen a defendant advances plausible arguments that a practice enhances overall efficiency and makes markets more competitive, per se treatment is inappropriate, and the rule of reason applies" (alteration in original) (quoting *Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1155 (9th Cir. 2003))*. Thus, the rule determination required the court to decide whether the non-solicitation agreement **[*10]** was ancillary to a legitimate business purpose. *Id.* However, in that case, the court was unable to make that determination on a motion to dismiss, and deferred that decision until the parties provided the court sufficient factual evidence to support their contentions. *Id. at 1039-40*.[5]

---

[3] Although H&P argues that either the per se analysis or quick look analysis applies, [Doc. #68, p. 8], H&P's briefing conflates the two analyses. [Doc. #68, pp. 8-12]. However, because the court concludes that the Anti-Solicitation Provision is not a "naked" restraint, the quick look analysis is inapplicable. *See* *Buccaneer Energy (USA), Inc., 846 F.3d at 1311* (indicating that a "quick look" analysis was appropriate "where the conduct at issue amounts to a 'naked' and effective restraint on price or output that carries 'obvious' anticompetitive consequence").

[4] Rather, courts that have considered no-hire agreements entered into upon the sale of a business have applied the rule of reason. *See, e.g.,* *Eichorn v. AT&T Corp., 248 F.3d 131, 143-44 (3d Cir. 2001)* (collecting cases).

[5] H&P also cites Philip Areeda and Herbert Hovenkamp's ***Antitrust Law*** for the proposition that "agreements 'among employers that they will not compete against each other for the services of a particular employee or prospective employee . . . are generally unlawful per se"). *See* [Doc. #68, p. 8 (citing Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 2013b (2013)]. However,

Here, H&P attached the License Agreement to its Complaint and, therefore, the License Agreement may be considered by the court. *See* *Commonwealth Prop. Advocates, LLC, 680 F.3d at 1202*. Based on the court's review, it is clear that the License Agreement is intended to grant H&P license to use, copy, modify and create derivate works of Omron's software, and define the rights and obligations of each party with respect to such grant. Pursuant to the Non-Solicitation Provision, the parties are precluded from actively soliciting employees of the other "for purposes of assisting Licensee or its Affiliates in any manner in connection with developing hardware or software that competes with the Software or Licensor Hardware." However, the Non-Solicitation Provision does not preclude the parties from hiring employees of the other who independently approach the hiring party or from conducting general recruiting activities. [Doc. #64-1, p. 5 ¶ 3]. Unlike **[*11]** in *e-Bay* where the pleadings included no indication that the non-solicitation agreement was ancillary to anything, the pleadings in this case make clear that the Non-Solicitation Provision is just one part of a larger business transaction between two independent parties.

Further, the Amended Complaint specifically alleges that Omron and H&P *do not compete* in the drilling rig power and control systems market. [Doc. #64, p. 4 ¶ 13]. The Amended Complaint alleges that H&P and Omron (now Schlumberger) are competitors only in the limited market for specialized engineers and, even then, based solely on Schlumberger's alleged unilateral interpretation of the Non-Solicitation Provision. However, pursuant to the terms of the License Agreement, the Non-Solicitation Provision applies only to those employees solicited for the purpose of developing hardware or software that competes with the software that was the subject of the License Agreement, not all specialized engineers. Accordingly, based on the License Agreement before it, the court concludes that the Non-Solicitation Provision is ancillary to Omron's legitimate grant of a license to use its business asset and, as such, subject to the rule **[*12]** of reason.[6]

2. Application of the Rule of Reason

"Rule of reason analysis first asks whether the offending competitor . . . possesses market power in the relevant market where the alleged anticompetitive activity occurs." *SCFC ILC, Inc. v. Visa USA, Inc., 36 F.3d 958, 965 (10th Cir. 1994)*. *See also* *Beville, 39 P.3d at 760* ("Market power is the preliminary threshold inquiry and is often dispositive of antitrust cases."). "The market power query begins with the determination of the relevant market." *SCFC ILC, Inc., 36 F.3d at 966*. For purposes of the antitrust analysis, the relevant product market "'is composed of products that have reasonable interchangeability for the purposes for which they are produced.'" *Auraria Student Hous. at the Regency, LLC v. Campus Vills. Apartments, LLC, 843 F.3d 1225, 1244-45 (10th Cir. 2016)* (quoting *SCFC ILC, Inc., 36 F.3d at 966*). "'[T]he geographic market is the narrowest market which is wide enough so that products from adjacent areas cannot compete on substantial parity with those included in the market.'" *Id. at 1245* (quoting *Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1222 (10th Cir. 1986))*. A similar analysis applies to employment markets. *See* *Nat'l Hockey League Players Ass'n v. Plymouth Whalers Hockey Club, 419 F.3d 462, 472 (6th Cir. 2005)*; *Todd v. Exxon Corp., 275 F.3d 191, 201 (2d Cir. 2001)*. "Failure to allege a legally sufficient market is cause for dismissal of the claim." *Campfield., 532 F.3d at 1118*. *See also id*. ("'Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand . . . even when all factual inferences are granted in plaintiff's favor, the relevant **[*13]** market is legally insufficient and a motion to dismiss may be granted.'") (quoting *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436-37 (3d Cir. 1997))*.

H&P argues that it has sufficiently alleged the relevant market—the labor market for specialized engineers. [Doc. #68, p. 12]. The court is not persuaded. Plaintiff makes no reference, either directly or by implication, to the interchangeability of specialized engineering positions with H&P and specialized engineering positions with Omron (now Schlumberger). Nor does the Amended Complaint include any allegations as to cross-elasticity. Further, the Amended Complaint is silent as to the geographic market, and includes no facts upon which an inference of the

---

the cited proposition relates to reserve clauses in professional sports contracts, a scenario clearly not implicated in the present matter. Thus, the court is not persuaded by H&P's citation to Areeda.

[6] Because the court concludes that the Non-Solicitation Provision is ancillary to the broader License Agreement, the court is not persuaded by H&P's reference to the United States Justice Department's Antitrust Guidance for Human Resources Professionals. *See* [Doc. #68, p. 9].

relevant geographic market may be based. Even taking the well-pleaded factual allegations of the Amended Complaint as true, H&P does not identify the relevant market with sufficient specificity to state a plausible claim pursuant to *79 O.S. § 203(A)*. Accordingly, dismissal of Count 3 of the Amended Complaint—declaratory judgment that Schlumberger's interpretation of section 3 of the License Agreement violates *79 O.S. § 203(A)*—is warranted.[7]

B. Count 4 — Declaratory Judgment that the Non-Solicitation Provision violates *15 O.S. § 217*

Title 15, section 217 provides: "Every contract by **[*14]** which any one is restrained from exercising a lawful profession, trade or business of any kind, otherwise than as provided by *Sections 218* and *219* of this title, or otherwise than as provided by *section 2* of this act, is to that extent void." *15 O.S. § 217* (internal footnote omitted). *Section 217* was "adopted for the protection of individuals engaged in lawful professions, trades, and business, and for the benefit of the public." *Neil v. Pa. Life Ins. Co., 1970 OK 172, 474 P.2d 961, 963 (Okla. 1970)*. Although *§ 217* does not prohibit reasonable restraints on trade, unreasonable restraints will not be enforced. *See* Bayly, Martin & Fay, Inc. v. Pickard, 1989 OK 122, 780 P.2d 1168, 1170-71 (Okla. 1989). Pursuant to the statute, contracts in unreasonable restraint of trade are void unless the contract falls within a statutory exception. *Id. at 1171*. Whether a non-solicitation provision violates Oklahoma public policy as articulated by *section 217* is a question of law for the court to decide. *Scanline Med., L.L.C. v. Brooks, 2011 OK CIV APP 88, 259 P.3d 911, 913 (Okla. Civ. App. 2011)*.

1. Plausible Claim Pursuant to *15 O.S. § 217*

Schlumberger argues that the Amended Complaint fails to sufficiently plead that any person or entity, including H&P, is restrained from engaging in any lawful trade, profession, or business in violation of *15 O.S. § 217*. [Doc. #66, pp. 14-15]. The court agrees.

The Amended Complaint does not allege that the Non-Solicitation provision restrains H&P from engaging in its trade, profession, **[*15]** or business—drilling. Nor does the Amended Complaint allege that the Non-Solicitation Provision prohibits the employment of an individual as a specialized engineer with any other company in the oil and gas labor market in the field of engineering as a whole. Further, the Amended Complaint does not allege that Schlumberger's interpretation of the License Agreement would result in reduced compensation, business or working conditions in the overall "trade, business or profession," or at any other employer for that matter. Rather, the Amended Complaint's averments relate only to competition to attract employees amongst two companies—H&P and Schlumberger. *See* [Doc. #68, p. 18 (citing Doc. #64, ¶ 53)]. The court is not persuaded that the Amended Complaint's lone averment, without any factual support, that the non-solicitation provisions limits employees' abilities to secure better compensation, benefits, and working conditions states a plausible claim for restraint in the exercise of a "trade, business, or profession."

Nor does the License Agreement bear out H&P's argument. The Non-Solicitation Provision relates only to solicitation by H&P of former or current employees of Omron (now Schlumberger) **[*16]** for purposes of assisting H&P "in any manner in connection with" the development of competing software, and specifically excepts from the prohibition employees who independently approach H&P. Oklahoma statutes include an exception from *section 217*'s prohibition for non-solicitation agreements pursuant to which an employee is prohibited from soliciting employees of one business to becomes employees of another. *15 O.S. § 219B*. *See also Pre-Paid Legal Servs. v. Cahill, 924 F. Supp. 2d 1281, 1289 (E.D. Okla. 2013)* (agreement that did not prevent person from exercising lawful profession was not a restraint of trade). *Compare* *Cardiovascular Surgical Specialists, Corp. v. Mammana, 2002 OK 27, 61 P.3d 210, 213 (Okla. 2002)* ("[P]rovisions by which an employer sought to go beyond a prohibition on active solicitation and thus prevent fair competition have been declared void."). In light of the clear Oklahoma public policy

---

[7] In opposition to the motion to dismiss, H&P alleges that the motion is premature and urges the court to decline to dismiss counts 3 and 4 because Schlumberger's motion to dismiss is premised on disputed facts which will require determination only if Schlumberger prevails on counts 1 and 2. *See* [Doc. #68, pp. 6-7 (citing *Topps Chewing Gum, Inc. v. Fleer Corp., 799 F.2d 851 (2d Cir. 1985)]*. However, the court concludes that the Amended Complaint does not allege a plausible claim for declaratory relief as to violation of *79 O.S. § 203(A)*, *as pled*, regardless of Schlumberger's interpretation of the Non-Solicitation Provision.

expressed in the statutory exception, the court is not persuaded that the Amended Complaint's allegations state a plausible claim for violation of *§ 217*.

2. Application of the Rule of Reason

Even if H&P alleged a plausible restraint of trade in violation of *§ 217*, count 4 would fail by reason of application of the rule of reason. As previously mentioned, *§ 217* prohibits only unreasonable restraints of trade. The Oklahoma Supreme Court has held that the rule of reason applies to **[*17]** test the reasonableness of restraints under *§ 217*. *Bayly, Martin & Fay, Inc., 780 P.2d at 1171*. *See also* *Inergy Propane, LLC v. Lundy, 2009 OK CIV APP 8, 219 P.3d 547, 557 (Okla. Civ. App. 2008)* (concluding that enactment of *§ 219A* statutory exception to *§ 217* "does not . . . require abandonment of the rule of reason analysis required by previously established case law").[8]

As previously discussed, the rule of reason begins with identification of the relevant market, and "[f]ailure to allege a legally sufficient market is cause for dismissal of the claim." *Campfield, 532 F.3d at 1118*. As discussed above with regard to count 3, H&P does not identify the relevant market with sufficient specificity to state a plausible claim pursuant to *79 O.S. § 203(A)*. Thus, count 4 is dismissed.[9]

IV. Conclusion

WHEREFORE, the Motion to Dismiss Counts 3 and 4 of the First Amended Complaint is granted.

DATED this 26th day of December, 2017.

/s/ Gregory K. Frizzell

---

[8] H&P argues that a full rule of reason analysis is not required by Oklahoma law. *See* [Doc. #68, pp. 14-16]. The court is not persuaded. As recognized in *Bayley*, the Oklahoma Supreme Court expressly adopted the rule of reason with regard to *§ 217*. H&P does not cite to, nor has the court identified, any subsequent decision by that court renouncing the rule of reason. Rather, H&P cites to the Oklahoma Supreme Court's decision in *Howard v. Nitro-Lift Techs., L.L.C.*, in which the court voided a contract provision as a matter of law without performing a complete rule of reason analysis. *See* [Doc. #68, p. 14 (citing *Howard v. Nitro-Lift Techs., L.L.C., 2011 OK 98, 273 P.3d 20 (Okla. 2012)*, *vacated on other grounds,* *Nitro-Lift Techs., L.L.C. v. Howard, 568 U.S. 17, 133 S. Ct. 500, 184 L. Ed. 2d 328 (2012))]*. In *Howard*, the court did conclude that a contractual provision was void as a matter of law based on application of *§ 219A*. However, *Howard* does not compel this court to conclude that the Oklahoma Supreme Court has renounced the rule of reason. Although not binding on this court, the court is persuaded by the analysis of the Oklahoma Court of Civil Appeals in *Inergy Propane*, which reasoned:

> Clearly, *section 219A* is intended to create a third statutory exception to the general prohibition against contracts in restraint of trade set forth in *section 217*. That does not, however, require abandonment of the rule of reason analysis required by previously established case law. *Section 219A* was not enacted in a vacuum. Nor does the language of the statute evidence any legislative intent to supplant the existing and extensive case law interpreting *section 217*. Those cases and the analytical approach developed therein provide the context within which to resolve the issues not specifically addressed by the language of *section 219A*. What the statute does eliminate is the need for part of the rule of reason analysis. In *section 219A* the Legislature has determined that the pro-competitive benefits of an agreement between an employer and an employee preventing the employee from "directly solicit[ing] the sale of goods, services or a **[*18]** combination of goods and services from the established customers of the former employer" after termination of the employment outweigh the anti-competitive effects of that agreement. Beyond that, the Legislature left the parties free to negotiate the terms of post-employment restraints within the constraints of established legal principles.

Inergy Propane, LLC, 219 P.3d at 557 (alterations in original). Thus, *Howard* is properly construed as a determination that the pro-competitive benefits of the provision in that case did not outweigh the anti-competitive effects by operation of statute, rendering the remainder of the rule of reason analysis moot.

[9] Because the court concludes that neither count 3 nor count 4 states a viable claim for relief for the reasons discussed herein, the court does not reach Schlumberger's argument regarding whether H&P sufficiently alleged "antitrust injury."

IN RE KOREAN RAMEN ANTITRUST LITIGATION

Prior History: *Fenerjian v. Nong Shim Co., 2013 U.S. Dist. LEXIS 190435 (N.D. Cal., Dec. 16, 2013)*

Core Terms

prices, increased price, conspiracy, products, plaintiffs', documents, employees, email, Declaration, competitors, defendants', export, sales, discovery rule, Deposition, Ramen, confirmed, hearsay, summary judgment, price support, raw material, disputes, argues, authenticity, antitrust, exchanged, imported, subsidiaries, domestic, comity

Counsel: **[**1]** For Rockman Company (USA), Inc., Plaintiff: Alan R. Plutzik, Daniel Edward Birkhaeuser, Bramson, Plutzik, Mahler & Birkhaeuser LLP, Walnut Creek, CA; Bruce J. Wecker, Seth R. Gassman, Stephanie Yunjin Cho, Christopher L. Lebsock, Hausfeld LLP, San Francisco, CA; Gregory Bradley Linkh, Glancy Prongay & Murray LLP, New York, NY; Jennifer Susan Rosenberg, Bramson, Plutzik, Mahler & Birkhaeuser, Walnut Creek, CA; Manuel Juan Dominguez, PRO HAC VICE, Cohen Milstein Sellers & Toll, Palm Beach Gardens, FL; Mark P. Kindall, Robert A. Izard, Izard, Kindall & Raabe, LLP, West Hartford, CT; Thomas C. Bright, Cera LLP, San Francisco, CA.

For M.T. Trading Corporation, Plaintiff: Thomas C. Bright, LEAD ATTORNEY, Cera LLP, San Francisco, CA; Alan R. Plutzik, Daniel Edward Birkhaeuser, Bramson, Plutzik, Mahler & Birkhaeuser LLP, Walnut Creek, CA; Jennifer Susan Rosenberg, Bramson, Plutzik, Mahler & Birkhaeuser, Walnut Creek, CA; Manuel Juan Dominguez, PRO HAC VICE, Cohen Milstein Sellers & Toll, Palm Beach Gardens, FL; Mark P. Kindall, Robert A. Izard, Izard, Kindall & Raabe, LLP, West Hartford, CT.

For The Plaza Company, Plaintiff: Christopher L. Lebsock, Michael P. Lehmann, LEAD ATTORNEYS, Bonny E. **[**2]** Sweeney, Seth R. Gassman, Stephanie Yunjin Cho, Hausfeld LLP, San Francisco, CA; Gregory Bradley Linkh, Lee Albert, LEAD ATTORNEYS, Brian P. Murray, Glancy Prongay & Murray LLP, New York, NY; Alan R. Plutzik, Daniel Edward Birkhaeuser, Bramson, Plutzik, Mahler & Birkhaeuser LLP, Walnut Creek, CA; Jennifer Susan Rosenberg, Bramson, Plutzik, Mahler & Birkhaeuser, Walnut Creek, CA; Joshua L Crowell, Kevin Francis Ruf, Lionel Z. Glancy, Glancy Prongay & Murray LLP, Los Angeles, CA; Mark P. Kindall, Robert A. Izard, Izard, Kindall & Raabe, LLP, West Hartford, CT; Michael M. Goldberg, Goldberg Law PC, Manhattan Beach, CA; Susan Gilah Kupfer, Glancy Prongay & Murray LLP, Berkeley, CA.

For Eleanor Pelobello, Plaintiff: Sydney J. Hall, LEAD ATTORNEY, Law Offices of Sydney Jay Hall, Oakland, CA; Alan R. Plutzik, Daniel Edward Birkhaeuser, Bramson, Plutzik, Mahler & Birkhaeuser LLP, Walnut Creek, CA; Gregory Bradley Linkh, Glancy Prongay & Murray LLP, New York, NY; Jennifer Susan Rosenberg, Bramson, Plutzik, Mahler & Birkhaeuser, Walnut Creek, CA; Mark P. Kindall, Robert A. Izard, Izard, Kindall & Raabe, LLP, West Hartford, CT.

For Anthony An, Kenny Kang, Plaintiffs: Daniel Edward Birkhaeuser, **[**3]** Alan R. Plutzik, Bramson Plutzik Mahler & Birkhaeuser, LLP, Walnut Creek, CA; Gerald S. Ohn, Law Offices of Gerald S. Ohn, Valencia, CA; Gregory Bradley Linkh, Glancy Prongay & Murray LLP, New York, NY; Jennifer Susan Rosenberg, Bramson, Plutzik, Mahler

& Birkhaeuser, Walnut Creek, CA; Mark P. Kindall, Robert A. Izard, Izard, Kindall & Raabe, LLP, West Hartford, CT; Young Wook Ryu, Law Office of Young W. Ryu APC, Beverly Hills, CA.

For Charles Chung, Ji Choi, Joyce Beamer, Yim Ha Noble, Kendal Martin, Thu-Thuy Nguyen, Plaintiffs: Daniel Edward Birkhaeuser, Alan R. Plutzik, Bramson Plutzik Mahler & Birkhaeuser, LLP, Walnut Creek, CA; Gregory Bradley Linkh, Glancy Prongay & Murray LLP, New York, NY; Jennifer Susan Rosenberg, Bramson, Plutzik, Mahler & Birkhaeuser, Walnut Creek, CA; Mark P. Kindall, Robert A. Izard, Izard, Kindall & Raabe, LLP, West Hartford, CT.

For Pitco Foods, Summit Import Corp., Plaintiffs: Christopher L. Lebsock, LEAD ATTORNEY, Bruce J. Wecker, Seth R. Gassman, Stephanie Yunjin Cho, Hausfeld LLP, San Francisco, CA; Daniel Edward Birkhaeuser, Alan R. Plutzik, Bramson Plutzik Mahler & Birkhaeuser, LLP, Walnut Creek, CA; Gregory Bradley Linkh, Glancy Prongay & Murray **[**4]** LLP, New York, NY; Jennifer Susan Rosenberg, Bramson, Plutzik, Mahler & Birkhaeuser, Walnut Creek, CA; Mark P. Kindall, Robert A. Izard, Izard, Kindall & Raabe, LLP, West Hartford, CT.

For The Plaza Market, Plaintiff: Brian P. Murray, Lee Albert, LEAD ATTORNEYS, Gregory Bradley Linkh, Glancy Prongay & Murray LLP, New York, NY; Christopher L. Lebsock, LEAD ATTORNEY, Bruce J. Wecker, Seth R. Gassman, Stephanie Yunjin Cho, Hausfeld LLP, San Francisco, CA; Daniel Edward Birkhaeuser, Alan R. Plutzik, Bramson Plutzik Mahler & Birkhaeuser, LLP, Walnut Creek, CA; Jennifer Susan Rosenberg, Bramson, Plutzik, Mahler & Birkhaeuser, Walnut Creek, CA; Mark P. Kindall, Robert A. Izard, Izard, Kindall & Raabe, LLP, West Hartford, CT; Susan Gilah Kupfer, Glancy Prongay & Murray LLP, Berkeley, CA.

For Nong Shim Company, Ltd, Defendant: Edward Ghiyun Kim, PRO HAC VICE, Squire Patton Boggs; J. Brady Dugan, PRO HAC VICE, Squire Patton Boggs (US) LLP, San Francisco, CA; Joseph Patrick Grasser, Squire Patton Boggs (US) LLP, Palo Alto, CA; Maria Anne Nugent, Mark C. Dosker, Squire Patton Boggs (US) LLP, San Francisco, CA.

For Nongshim America, Inc., Defendant: Mark C. Dosker, LEAD ATTORNEY, Maria Anne Nugent, **[**5]** Squire Patton Boggs (US) LLP, San Francisco, CA; J. Brady Dugan, PRO HAC VICE, Squire Patton Boggs (US) LLP, San Francisco, CA; Joseph Patrick Grasser, Squire Patton Boggs (US) LLP, Palo Alto, CA.

For Ottogi Company, Ltd., Ottogi America, Inc., Defendants: Julian Wolfe Kleinbrodt, Gibson Dunn and Crutcher, LLP, San Francisco, CA; Minae Yu, Gibson Dunn and Crutcher, Los Angeles, CA; Rachel S. Brass, Gibson Dunn & Crutcher LLP, San Francisco, CA.

For SamYang Foods Company, Ltd., Defendant: Elizabeth Dianne Mann, LEAD ATTORNEY, Mayer Brown LLP, Los Angeles, CA.

For Sam Yang (U.S.A.), Inc., Defendant: Edward W. Suh, LEAD ATTORNEY, Michael Kwonchun Suh, Law Offices of Michael K. Suh and Associates, Los Angeles, CA.

For Korea Yakult, doing business as Paldo America, Defendant: Matthew David Taggart, LEAD ATTORNEY, Attorney at Law, Steptoe & Johnson LLP, Los Angeles, CA.

For Paldo Company, Ltd., Defendant: Seong H. Kim, LEAD ATTORNEY, Sheppard Mullin Richter & Hampton LLP, Los Angeles, CA; Edward B. Schwartz, PRO HAC VICE, DLA Piper US LLP, Washington, DC; Matthew David Taggart, Attorney at Law, Steptoe & Johnson LLP, Los Angeles, CA.

Judges: William H. Orrick, United States District Judge.

Opinion by: William H. Orrick **[**6]**

Opinion

[*898] ORDER ON PENDING MOTIONS

Dkt. Nos. 541, 548, 564, 581, 602

There is ample (although hotly disputed) evidence of a conspiracy by the defendants[1] to fix the price of Korean ramen in Korea that was fraudulently concealed from consumers. Defenses of the statute of limitations and international comity are not well taken. The much closer question is whether there is sufficient evidence that the conspiracy impacted ramen prices in the United States, in particular for ramen manufactured in the United States. On defendants' motions for summary judgment, I conclude that plaintiffs have established that material disputes of fact exist that a jury must resolve, and DENY defendants' motions.

The general background and history of this litigation is well known and laid out in my prior orders. Dkt. Nos. 501, 502. The facts material to the determination of these motions, both undisputed and disputed, will be addressed below.

LEGAL STANDARD

Summary judgment on a claim or defense is appropriate "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. In order to prevail, a party moving for summary judgment must show the absence **[**7]** of a genuine issue of material fact with respect to an essential element of the non-moving party's claim, or to a defense on which the non-moving party will bear the burden of persuasion at **[*899]** trial. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. Once the movant has made this showing, the burden then shifts to the party opposing summary judgment to identify "specific facts showing there is a genuine issue for trial." *Id.* The party opposing summary judgment must then present affirmative evidence from which a jury could return a verdict in that party's favor. *Anderson v. Liberty Lobby, 477 U.S. 242, 257, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*.

On summary judgment, the court draws all reasonable factual inferences in favor of the non-movant. *Id. at 255*. In deciding a motion for summary judgment, "[c]redibility determinations, the weighing of the evidence, and the drawing of legitimate inferences from the facts are jury functions, not those of a judge." *Id.* Conclusory and speculative testimony does not raise genuine issues of fact and is insufficient to defeat summary judgment. *See* *Thornhill Publ'g Co., Inc. v. GTE Corp., 594 F.2d 730, 738 (9th Cir. 1979)*.

The permissible inferences to be drawn from evidence in an antitrust case at summary judgment are further qualified. As the Supreme Court explained in *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, "***antitrust law*** limits the range of permissible inferences from ambiguous evidence. . . ." *Id. at 588*. As a result, **[**8]** "conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. *Id.* "To survive a motion for summary judgment or for a directed verdict, a plaintiff seeking damages for a violation of *§ 1* must present evidence 'that tends to exclude the possibility" that the alleged conspirators acted independently. . . . Respondents [ ], in other words, must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed respondents." *Id.*; *see also* *In re Citric Acid Litig., 191 F.3d 1090, 1094 (9th Cir. 1999)* ("permitting the inference of conspiratorial behavior from evidence consistent with both lawful and unlawful conduct would deter pro-competitive conduct—an especially pernicious danger in light of the fact that the very purpose of the antitrust laws is to promote competition.").

In this context, "the defendant can 'rebut an allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice' . . . The burden then shifts back to the plaintiff to provide specific evidence tending to show that the defendant was not **[**9]** engaging in permissible competitive behavior." *In re Citric Acid Litig., 191 F.3d at 1094* (quoting *Richards v. Neilson Freight Lines, 810 F.2d 898, 902 (9th Cir.1987))*.

---

[1] Defendants are Nongshim Co., Ltd., Nongshim America, Inc. (collectively Nongshim), Ottogi Co, Ltd., and Ottogi America, Inc. (collectively Ottogi). The Nongshim and Ottogi entities separately move for summary judgment. Dkt. Nos. 540-4, 544-5.

DISCUSSION

I. STATUTE OF LIMITATIONS

Both defendants move for summary judgment because plaintiffs' antitrust claims are barred by the Sherman Act's four year statute of limitations. In ruling on the motions to dismiss earlier in this case, I determined that the "discovery rule" could toll the otherwise applicable four year statute of limitations. *Fenerjian v. Nongshim Co., Ltd, 72 F. Supp. 3d 1058, 1078 (N.D. Cal. 2014)*. I also concluded that plaintiffs pleaded sufficient facts showing that defendants took affirmative steps to fraudulently conceal the alleged conspiracy to raise prices. *Id. at 1078-79*.

The issue is significant because only a small fraction of the sales at issue **[*900]** fell within the four year statute running from the 2013 filing of the first related action in this litigation. As to those sales — *i.e.*, sales between July 22, 2009 and the end of the class period January 31, 2010 — those claims cannot be knocked out because under Ninth Circuit authority, "each time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act." *Oliver v. SD-3C LLC, 751 F.3d 1081, 1086 (9th Cir. 2014)*. Therefore, conspiracy-inflated sales from July 22, 2009 **[**10]** through January 31, 2010 are within the express four year limitations period and not barred. The significant question is whether sales occurring prior to the four year period are timely under other applicable theories.

A. Discovery Rule

Plaintiffs argue that my conclusion that the discovery rule can toll *Sherman Act* claims is "law of the case," and as defendants failed to move for reconsideration or otherwise show that reconsideration of that determination is appropriate, I should not revisit the issue. Defendants, on the other hand, rely on language from the Order on the motions to dismiss that the discovery rule "tolled the otherwise applicable statutes of limitations, at least at this pleading stage." Nongshim MSJ 10 n.14. The question of *whether* plaintiffs pleaded sufficient facts to show that the discovery rule applied to their claims (*e.g.*, whether plaintiffs were on notice of their injuries) is fact dependent. The determination that the discovery rule applies under the Sherman Act was a legal determination that was not fact dependent. What defendants seek to challenge here is the legal question, not the factually dependent one.

Defendants point out that following my November 2014 **[**11]** Order, the Hon. Lucy Koh expressly disagreed and followed what she deemed to be "clear U.S. Supreme Court authority and the overwhelming majority of Circuits [that] have explicitly held that antitrust claims are subject to a pure injury rule, not a discovery rule." *In re Animation Workers Antitrust Litig., 87 F. Supp. 3d 1195, 1210 (N.D. Cal. 2015)* (*Animation I*). While the Ninth Circuit has not directly addressed the question, plaintiffs do not dispute that only one circuit has applied the discovery rule to Sherman Act claims. *See* *In re Copper Antitrust Litigation, 436 F.3d 782, 789 (7th Cir. 2006)*.

In their Opposition, plaintiffs spend much time dissecting the authorities Judge Koh relied on in support of her conclusion in *Animation I*. They argue that those authorities do not clearly reject application of the discovery rule under the Sherman Act, but simply apply the "pure injury rule" to situations where the plaintiff's injury is immediately known or question the application of the discovery rule to antitrust claims in *dicta*. Oppo. 7, n.2. Plaintiffs also rely on civil RICO cases, whose statute of limitations are likewise governed by *15 U.S.C. § 15b*, that apply the discovery rule. *See, e.g., Pincay v. Andrews, 238 F.3d 1106, 1109 (9th Cir. 2001)* ("[w]e have continuously followed the 'injury discovery' statute of limitations rule for civil RICO claims"). Judge Koh rejected that line of argument by noting **[**12]** that the Supreme Court in *Klehr v. A.O. Smith Corp., 521 U.S. 179, 188, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* distinguished the "pure injury accrual rule . . . [as] it applies in traditional antitrust cases[,]" from the discovery accrual rule in the civil RICO context where many claims sound in fraud. *See* *Animation I, 87 F. Supp. 3d at 1209*. Finally, plaintiffs contend that no circuit has rejected the discovery rule as applied to antitrust injuries where plaintiffs were unaware of their injuries at the time they occurred, **[*901]** and note the only circuit to have directly addressed those facts applied the discovery rule. *See In re Copper Antitrust Litigation*.

I need not choose a side on this split in authority. As discussed below, I conclude the fraudulent concealment exception to the four year statute of limitations applies.

B. Fraudulent Concealment and Affirmative Acts

In their motions, defendants do not directly contest my prior conclusion that fraudulent concealment would toll the statute based on the allegations in plaintiffs' complaints. Nor do they attempt to undermine those allegations, based on the evidence that was adduced after that initial ruling. Instead, in their reply briefs, they attack plaintiffs' showing of affirmative acts in support of fraudulent concealment.

As I noted in my November 2014 **[**13]** Order, "[fraudulent concealment tolls otherwise applicable statutes of limitation where (i) affirmative acts by defendants conceal their wrongful conduct from plaintiffs, (ii) plaintiffs are actually ignorant of the wrongful conduct, and (iii) there was reasonable diligence by the plaintiff to discover the misconduct in response to any information it may have about that conduct." *Fenerjian v. Nongshim Co., Ltd, 72 F. Supp. 3d at 1078*.

Plaintiffs' evidence of affirmative acts that defendants took to keep their conspiracy secret requires close analysis. On the next several pages, I indent the asserted facts one by one and discuss what the evidence actually shows:

> • Defendants staggered their price increases to minimize the chance that their anticompetitive agreement would be detected. *See* Decl. of Russell W. Mangum III, Ph.D. in Support of DPPs' Mot. for Class Certification ¶ 40 ("Mangum Decl.") (Dkt. 363-6);

While Mangum analyzed in depth the price changes, and felt the pattern of price changes supported a conclusion of collusion - based in part on the fact that all defendants raised their prices following Nongshim's actions - the portion of the Mangum Declaration cited by plaintiffs says nothing about staggered prices or the intent behind **[**14]** that staggering. *See* Mangum Decl., ¶ 40.

> • Defendants communicated by phone, rather than by email or fax, to conceal the frequency and content of their communications. Yu Decl., Ex. 37 at 34 (Kyung Ju Kim Tr., noting that price increase period information was exchanged over the phone or in person, but not by fax or email because "[t]here is a chance that someone may see it."); Decl. of Stephanie Cho ("Cho Decl."), Ex. 1, Dong Hee Kang Tr. at 54:21-55:25.

Kyung Ju Kim is a former Samyang Market Survey Team department head. Cho Decl. Ex. 15 (Kyung Ju Kim Confirmation Statement). He initially testified that he communicated about sales and promotions with Ottogi and Nongshim employees by fax, phone, and in person. Yu Decl., Ex. 37 at 31, 34 (Dkt. No. 547-41) (Kyung Ju Kim Examination Report). He later indicated that information about "price increase period" was "done over the phone" and "in person" if there was time, but "not at all" by fax or email because "[t]here is a chance that someone may see it, so we didn't do it like that." *Id.* at 34. Defendants point out that Kim also appeared to testify that he did *not* exchange non-public "price information" with competitors, and that he only asked his contacts for **[**15]** more details after he heard generally about competitor price increase "in the market." *Id.* at 5, 6.

[*902] Kim's testimony as a whole is somewhat confusing and the parties have different glosses on it. It suggests that while Kim may not have disclosed to competitors exactly when price increases were going to be imposed or what the specific price increases would be, he disclosed non-public information about the "price support period" through methods that would not leave a trail and sought more general information (if not the exact specifics) about otherwise non-public timing and price increase information from competitors.[2]

Dong Hee Kang, another Samyang employee, confirmed in his deposition that he had the cell phone numbers of at least one similarly situated employee from Nongshim (Yoon) and another from Ottogi (Seok Ho Hong) so he could

---

[2] Another Samyang employee testified that he didn't ask for "specific" information as to exact dates and levels of price increases, but more generally asked and "about general period or degree of increase." Yu Decl., Ex. 36, Jong-Moon Yui Examination Report at 9-11.(Dkt. No. 547-40)

call them "because it was easier," and that in 2005 Kang had phone calls with both Nongshim and Ottogi about ramen price increases. Cho Decl., Ex. 1, Dong Hee Kang, Depo. Tr. at 21:6-22:15; 26:9-17, 36:3-25, 54:21-55:25. At most, Kang's testimony establishes that phone calls were made to discuss pricing in 2005, not that employees were instructed to or otherwise avoided **[**16]** using email or faxes.

• Ottogi destroyed various pricing memos referring to competitor contacts after the Korea Fair Trade Commission ("KFTC") commenced its investigation and Ottogi altered other price memos to delete any reference to competitor information after the KFTC commenced its investigation. Mot. to Sanction Ottogi For Spoliation 4-12 (Dkt. 420); Decl. of Stephanie Cho In Support of Motion to Sanction Ottogi for Spoliation ¶¶ 11-62 ("Ottogi Sanctions Cho Decl."), and corresponding Exs. (Dkt. 420-1);

Although I concluded that there was an insufficient connection between the alleged conduct in Korea and this litigation to support imposing sanctions in this action, the reasonable inferences drawn in plaintiffs' favor from the evidence presented on the sanctions motion support that Ottogi altered documents (specifically, a January 2004 memorandum and a 2005 memorandum) for production to the KFTC. Having reviewed in-depth the evidence presented by both sides on the sanctions motions and construing the evidence in plaintiffs' favor, there is a significant inference of intentional document alteration to remove evidence of conspiracy and attempt to convince KTFC of other justifications **[**17]** (raw material price increases) to hide the conspiracy.

For example, plaintiffs presented significant evidence regarding the "altered" 2004 and 2005 memoranda that Ottogi: (i) removed information evidencing the relationship between Nongshim and Ottogi's prices (*e.g.*, Ottogi following Nongshim's lead); (ii) removed a chart comparing Nongshim's to Ottogi's prices; (iii) deleted references to Samyang and Yakult; and (iv) "falsely" represented that the purpose of the price increases were to capture escalation in raw material prices. While Ottogi has explanations for the discrepancies between the older versions and the "recreated" versions of these documents (*e.g.*, they recreated at the request of the KFTC or the initial versions were merely drafts), it is a jury question to decide what the more credible explanations are.

• Nongshim and Ottogi destroyed competitor communications concerning price and other sensitive information. **[*903]** *See* Mot. to Sanction Ottogi For Spoliation8-14 (Dkt. 420); Ottogi Sanctions Cho Decl. ¶¶ 11-62, and corresponding Exs. (Dkt. 420-1); Mot. to Sanction Nongshim for Spoliation 8-13 (Dkt. 416); Decl. of Stephanie Cho In Support of Mot. to Sanction Nongshim for Spoliation **[**18]** ¶¶ 92-106 ("Nongshim Sanctions Cho Decl.") (Dkt. 416-1), and corresponding Exs. As a result of this destruction, few or no documents from key witnesses were produced. Ottogi Sanctions Cho Decl. ¶¶ 47, 54; Nongshim Sanctions Cho Decl.¶¶ 80-105; and

• Ottogi implemented a rigorous "auto-delete" protocol on its email servers after the KFTC commenced its investigation that destroyed substantial quantities of relevant documents. Cho Decl., Ex. 5 (Se-Chang Lee Tr. (4-5-2016) at 13:5-16:2, 19:17-21:5; 28:10-19; 40:11-41-18); Ottogi Sanctions Cho Decl. ¶¶ 47, 54;

The evidence from the sanctions motions showed that both Nongshim and Ottogi had limited document preservation policies (more aptly described as "destruction" policies) in place both before and during the KFTC investigation. Again, I did not find a sufficient connection between the defendants' failures to preserve documents and duties that might have run to the KFTC and this jurisdiction that would support sanctions. However, construing the evidence in plaintiffs' favor, there is an inference that defendants intended or otherwise benefitted from the destruction of adverse evidence under their existing or newly implemented document destruction **[**19]** policies.

• Nine days after the KFTC's onsite investigation, Nongshim employee Sung Soo Park began communicating with competitors via his personal email address, "pss0998@naver.com ", to avoid detection. *See* Cho Decl., Ex. 2 (Nongshim's Supplemental Response to IPPs' Interrogatory No. 15); Cho Decl., Ex. 3 (Sung Soo Park Depo. Tr. at 41: 11-18); Cho Decl., Ex. 4 (SHD00003117-59T at 57-58); Vaughn Decl. ¶ 18;

The testimony and documents, according to plaintiffs' expert James Vaughn, shows Park communicating from a personal email account with employees at Ottogi, Yakult, Samyang, and other Nongshim employees (to their Nongshim email accounts) of pricing and sales information. Cho Decl., Ex. 4; Declaration of James Vaughn [Dkt. No. 567-2], ¶ 18. Defendants' forensic expert, Samuel Rubin, disputes whether the documents at issue are emails from Park, given the formatting issues. Declaration of Samuel S. Rubin [Dkt. No. 585-3] ¶¶ 21-23. Assuming that

Vaughn is correct, the persuasiveness of this evidence as an affirmative act is still very limited, given that some of the emails were also apparently sent to other Nongshim employees at their work email accounts, presumably defeating any inference **[**20]** that the private email was used to hide the trail at Nongshim. Vaughn Decl. ¶ 18.

- The conspirators met each other away from their places of business to exchange information and used legitimate meetings of the Ramen Assembly as a cover for anticompetitive conduct. *See* Cho Decl., Ex. 6 (Soo Chang Ahn Depo. Tr. at 42:2-43:17; 67:10-18);

Soo Chang Ahn, a Samyang executive, testified that he attended the yearly Ramen Transaction Order Association (RTOA) meetings, and that at the March 2001 meeting pricing information was discussed between employees of Nongshim, Ottogi, and the other alleged conspirators. Cho Decl., Ex. 6, Soo Chang Ahn Deposition Tr. at 70:5-23, 73:4-74:2, 77:16 — 79:25 **[*904]** (Dkt. No. 567-4 at ECF 90). The cites relied on by plaintiffs, however, do not show Ahn admitting that these meeting took place "away" from places of business *other* than at the RTOA meetings. Ahn also testified that his reports at Samyang would report to him information regarding price increases and timing from competitors, as well as the duration of old price support. Ex. 6 Ahn Dep. Tr. 90, 93, 94.

- Nongshim justified its price increases by giving false and pretextual reasons that were materially misleading. **[**21]** *See:* (1) Cho. Decl., Ex. 7 (ROK000011-14, 16-18, 21, 23) (letters to customers stating that increase costs of goods were the reasons for prices); (2) Cho Decl., Ex. 8 (Krith Roth Depo. Tr. at 29:8-30:12) (when conveying price increases to certain customers, NSA employee did not provide the customers with Nongshim's actual COGS, but merely provided them with articles suggesting the ingredient costs went up); (3) Cho Decl. Ex. 9 (Sunny Kim Depo. Tr. at 45:23-46:3 and 46:20-21) ("when we get a price increase, we would generally say raw material costs went up in general. So then that's kind of the explanation to the customer, just try to- you know, say it in a nice way . . . We will try to say that to our customer. That's just kind of how it's been."); (4) Ottogi noted in an internal memo "Nongshim stated to the media regarding background of price increase that the main factors for prices increases were increases in the production costs. . . . However, the main reason for Nongshim's ramen price increases is that . . . sales growth can be achieved only by increasing prices, by launching new high priced products, and so on." Cho Decl., Ex. 10 (OTGKR-0018659T); (5) Cho Decl., Ex. 11 (RNA0001409T-1414T, **[**22]** 1416T-1422T and RNA0001402T-1404T) (newspaper articles in the U.S. stating that prices are going up due to increased costs); (6) Cho Decl., Ex. 96 at OTGAM-0040904T (Ottogi price lists to customers claiming it must raise prices due to increased material costs); and (7) prices of Korean Ramen increased substantially during the class period and that the delta between the cost of manufacture and the sales price doubled when compared to the pre-conspiracy benchmark period. *See* Decl. of Alan Cox ("Errata Cox Decl."), Ex. 12.2 (Dkt. 441-6, 441-8); Mangum Reply Decl. In Support of Class Certification ("Mangum Reply") (Dkt. 466-8), Ex. 29.1-R.

There is evidence that Nongshim America, Inc. ("NSA") publicly (at least to the Direct Purchasers) attributed its increased prices in imported products to increased raw materials (including oil, petroleum, and other costs), as well as currency exchange rates. *See, e.g.*, Cho Decl., Ex. 7 (May 8, 2005 customer letter; May 19, 2006 customer letter; April 2007 customer letter). Ottogi, in a price list provided to Direct Purchasers, ascribed the 2008 price increases to a rise in global grain prices and exchange rates. Cho Decl., Ex. 96.

If asked about price **[**23]** increases, NSA employees Krith Roth and Sunny Kim would respond by blaming increased raw material and fuel costs. Cho Decl., Ex. 8, Krith Roth Depo. Tr. at 29:8-30:12; Cho Decl., Ex. 9, Sunny Kim Depo. Tr. at 45:23-46:21. The explanations given by Nongshim for price rises (and the decrease in 2010) to the media from 2003 through 2010 (contained in an Ottogi memo and in news reports from Korean-American media outlets) **[*905]** are raw material costs and demand fluctuations.[3]

Generally, the sorts of affirmative acts described in the preceding pages— public pretextual statements, alteration or destruction of documents, and evidence that employees used methods to communication sensitive information

---

[3] Nongshim objects to consideration of the media reports as conveyed in the Ottogi memo and the separate news articles as inadmissible hearsay. Those objections will be addressed below.

that would not leave a "trail" — are sufficient to support fraudulent concealment tolling statutes of limitations. *See, e.g., In re Animation Workers Antitrust Litig., 123 F. Supp. 3d 1175, 1200-01 (N.D. Cal. 2015)* (*Animation II*) ("the Court finds that Plaintiffs have sufficiently alleged that both defendants made misleading, pretextual statements and took affirmative steps to keep the alleged conspiracy a secret" with affirmative clandestine steps including those made to "eliminate paper trail" of conspiracy)(internal quotations omitted); *In re TFT—LCD (Flat Panel) Antitrust Litig., 586 F.Supp.2d 1109, 1119-20 (N.D. Cal. 2008)* (finding sufficient allegations of pretextual **[**24]** explanations for price increase and affirmative efforts to ensure secrecy of conspiracy). Plaintiffs do not need to show at trial that raw materials prices were totally irrelevant to the price increases to demonstrate pretext,[4] but rather that the level of price increases were in excess of what was necessary because of the collusive conduct. *See In re Lithium Ion Batteries Antitrust Litig., No. 13-MD-2420 YGR, 2014 U.S. Dist. LEXIS 7516, 2014 WL 309192, at *4, *16 (N.D. Cal. Jan. 21, 2014)* (where price increases were blamed on increases in raw materials, which was in part true, pretext was still alleged where increase in raw materials was used a pretext for "unwarranted" price increases by defendants).

In addition to contending that this evidence does not show what plaintiffs assert it does, Ottogi makes a number of additional arguments. First, Ottogi argues there is little to no evidence of *its* affirmative acts. Acts by Ottogi include, at the very least, document alteration in response to KFTC investigation as well as the 2008 price list conveying to DPPs allegedly false or substantially incomplete reasons for those price increases. More fundamentally, necessary "affirmative acts" may be established through the acts of Ottogi's alleged co-conspirators. *See Animation II, 123 F. Supp. 3d at 1206* (citing cases). **[**25]**

Ottogi also argues that the affirmative acts to conceal the conspiracy must have been directed at these plaintiffs or intended to deflect litigation. Ottogi Mot. 25. I disagree. To the first argument, as Judge Koh explained: "[d]efendants cite no Ninth Circuit authority, or any authority for that matter, that requires Plaintiffs to show that Defendants' affirmative acts were for the purpose of misleading Plaintiffs. To the contrary, one court in this circuit has specifically held that '[t]he proper focus . . . is not whether the intent was to conceal the information from plaintiffs, but whether the 'concealment ... prevented [plaintiff] from being alerted.'" *Animation II, 123 F. Supp. 3d at 1202* (quoting *In re Coordinated Pretrial Proceedings **[*906]** in Petroleum Prods. Antitrust Litig., 782 F.Supp. 487, 490 (C.D. Cal. 1991))*.

With respect to the second argument, Ottogi notes that in denying plaintiffs' motion for sanctions, I concluded that there was no evidence that Ottogi destroyed or altered documents to "impede this litigation." Ottogi Reply 15. Ottogi's argument is unpersuasive for two reasons. First, my point in the Order denying sanctions was that there was not sufficient evidence that Ottogi sought to frustrate litigation in this country in order for me to have jurisdiction or otherwise impose discovery-type sanctions based on conduct that at the time **[**26]** was possibly intended to impact the KFTC investigation and keep evidence regarding coordinated price setting hidden. Second, the Ninth Circuit has not adopted the "deflecting litigation" qualification to affirmative acts sufficient to show fraudulent concealment. Ottogi's source is merely a passing reference to a parenthetical cite in *Grimmett v. Brown, 75 F.3d 506, 515 (9th Cir. 1996)*. In that parenthetically referenced case, *Pocahontas Supreme Coal Co. v. Bethlehem Steel Corp.*, the Fourth Circuit found that defendant's failure to disclose its price fixing in response to a customer's question about pricing was insufficient to show fraudulent concealment. It explained that "'[f]raudulent concealment' implies conduct more affirmatively directed at deflecting litigation than that alleged here." *828 F.2d 211, 219 (4th Cir. 1987)*.

The evidence of affirmative acts identified above, when considered in its totality, is sufficient to toll the Sherman Act claims under a fraudulent concealment theory.[5]

---

[4] The evidence submitted by Ottogi that flour prices increased from 2006 through 2008 is, therefore, relevant but not by itself determinative. *See* Supplemental Decl. from Kyung Ho Yoo ¶¶ 3-5 (Dkt. No. 585-4). As noted in ruling on the motions for class certification, plaintiffs' experts show that in the same time frame the delta between costs and profits almost tripled. Ottogi points to no evidence that would demonstrate that all of the allegedly collusive price increases were in fact due solely to the increases in the price of flour during the relevant time frame.

C. State Law Claims

Defendants argue that the state law claims — based on California, Massachusetts, Michigan, Florida, and New York law — should likewise be dismissed because they too are governed by four year (or three year) statutes. Nongshim Mot. 11; Ottogi Mot. 23-24. **[**27]** In their opening motions, defendants do not address whether the discovery rule or fraudulent concealment would apply to toll those statutes. Instead, they argue in their Replies that the actual injury rule (instead of the discovery rule) applies at least to plaintiffs' claims under the Cartwright Act. Ottogi Reply 13-14.

With respect to the Cartwright Act claims, plaintiffs place heavy weight on *Aryeh v. Canon Bus. Sols., Inc., 55 Cal. 4th 1185, 151 Cal. Rptr. 3d 827, 292 P.3d 871 (2013)*, where the California Supreme Court held in a case involving California's Unfair Competition Law ("UCL") that when a statute fails to define accrual, the presumption of common law equitable tolling rules (like the discovery rule) will normally apply. Although *Aryeh* was not a Cartwright Act claim, the court based its holding in part on the lower court's erroneous application of *federal antitrust laws* to the tolling question, noting that while the Cartwright Act is often interpreted consistently with the Sherman and Clayton Acts, that is not conclusive with respect to the reach of the *Cartwright Act*. *Id. at **[*907]** 1195*. In addition, as plaintiffs point out, both the UCL and Cartwright Act are silent on accrual and use virtually identical wording as to the statute of limitations.

Defendants respond that following **[**28]** *Aryeh*, Judge Koh has applied the actual injury rule and rejected the discovery rule for Cartwright Act claims. That is not quite accurate. Defendants are correct that in *Ryan v. Microsoft Corp., No. 14-CV-04634-LHK, 2015 U.S. Dist. LEXIS 47753, 2015 WL 1738352, at *16 (N.D. Cal. Apr. 10, 2015)*, Judge Koh did not apply the discovery rule to the Cartwright claims in an antitrust case dealing with agreements to restrict employee solicitations. She concluded that *Aryeh* did not definitively answer the question of whether the discovery rule or fraudulent concealment would apply to either Cartwright or UCL claims, but rejected the application of any equitable tolling in the case before her because plaintiffs failed "to adequately allege an equitable exception or tolling doctrine that would render Plaintiffs' state law claims timely." Her decision was based on a failure of facts that would support equitable tolling, not a bright line rejection of it under California law.[6] For the reasons discussed above, fraudulent concealment applies to the Cartwright Act claims.

Defendants do not separately address in their briefs whether the discovery rule or fraudulent concealment apply under the other state laws at issue.[7] I have no basis to grant summary judgment on any of the state law **[**29]** claims as time-barred.

II. KOREAN SUPREME COURT DECISION AND INTERNATIONAL COMITY

Nongshim argues that principles of comity require that I defer to the Korean Supreme Court's decision in overturning the KFTC's conspiracy findings and fines. Nongshim also argues that the same principles counsel

---

[5] Plaintiffs also point out that their injunctive relief claim under the Sherman Act is not subject to a statute of limitations defense, because "there is no statute of limitations for injunctive relief claims under *section 16*." *Oliver v. SD-3C LLC, 751 F.3d 1081, 1085 (9th Cir. 2014)*. Oppo. 13-14. However, the only stated basis for plaintiffs' injunctive relief claim is that because Nongshim and Ottogi are still oligarchs, they still have the power to fix prices. That may be. But, given that plaintiffs admit the conspiracy ended in 2010 and there is no evidence that these oligarchs conspired after 2010 or are *likely* to conspire together in the future, plaintiffs' injunctive relief claim is questionable.

[6] In *Animation I, 87 F. Supp. 3d at 1217*, the parties did not dispute "that resolution of Plaintiffs' Sherman Act claim would also resolve Plaintiffs' Cartwright Act claim." Therefore, Judge Koh applied the accrual rule and rejected the discovery rule on both sets of claims; she did not separately analyze the Cartwright Act claims.

[7] Plaintiffs argue that the discovery rule applies to claims under Massachusetts and New York law, while fraudulent concealment applies under Florida, Massachusetts, Michigan, and New York law. Oppo. 16.

against finding a conspiracy in light of the Korean government's role in setting prices, a role explained and relied upon by the Korean Supreme Court in overturning the KFTC findings and fines.

International comity "is the recognition which one nation allows within its territory to the legislative, executive or judicial acts of another nation, having due regard both to international duty and convenience, and to the rights of its own citizens or of other persons who are under the protection of its laws." *In re Simon, 153 F.3d 991, 998 (9th Cir.1998)* (internal quotation omitted). "International comity is a doctrine of prudential abstention, one that 'counsels voluntary forbearance when a sovereign which has a legitimate claim to jurisdiction concludes that a second sovereign also has a legitimate claim to jurisdiction under principles of international law.'" *Mujica v. AirScan Inc., 771 F.3d 580, 598 (9th Cir. 2014)* (quoting *United States v. Nippon Paper Indus. Co., 109 F.3d 1, 8 (1st Cir.1997))*.

There are two doctrines recognized under "international comity." The first **[**30]** is "legislative or prescriptive comity," which "guides domestic courts as they decide **[*908]** the extraterritorial reach of federal statutes." *Mujica, 771 F.3d at 598*. The second "is referred to as 'comity among courts' or adjudicatory comity, which 'may be viewed as a discretionary act of deference by a national court to decline to exercise jurisdiction in a case properly adjudicated in a foreign state.'" *Id. at 599* (*quoting* *In re Maxwell Commc'n Corp. plc by Homan, 93 F.3d 1036, 1047 (2d Cir.1996))*. Considerations in determining whether to abstain for comity to an international tribunal include the strength of the various governments' interests, the adequacy of the foreign forum, any conflicts between the laws of the jurisdictions, and the extraterritorial reach of the laws at issue. *Id. at 600-604*. In looking to the various governmental interests, the critical factor is where the conduct in question took place, "conduct" including not only the actions of the defendants but the injury suffered by plaintiffs. *Id. at 605* (citing *Torres v. S. Peru Copper Corp., 965 F.Supp. 899, 909 (S.D.Tex.1996)*, dismissing action under comity where the "activity *and the alleged harm* occurred entirely in Peru [and] Plaintiffs are all residents of Peru.") (emphasis added).

Nongshim argues that I should abstain under the adjudicatory comity doctrine and defer to the Korean **[**31]** Supreme Court decision that overturned the findings of the KFTC. The Korean Supreme Court concluded that the evidence of an express agreement being reached at the Representative's Meeting[8] was hearsay (the second-hand Samyang statements and inconsistent and not fully credible Ahn statements about whether he attended), and therefore the court could not "rule out a possibility that it was merely ambience of resonance for a desire for [Nongshim] to take an initiative and lead the price increase" given that the companies had been prevented by economic circumstances from increasing their prices in the past years. Korean Supreme Court decision (January 2016), Ex. 24 to Yu Decl. [Dkt. No. 547-27] at 7. The court noted that the degrees of difference in price increases made it "hardly possible" to specify any specific substance of agreement "beyond the point" that ramen prices should be increased in 2001. *Id.* The court concluded that it was "unclear" if "a definitive agreement that can impact competition in the long run" was agreed to at the Representative's Meeting, and as a result declined to find that subsequent exchanges of information were in furtherance of an agreement reached at the Representative's **[**32]** Meeting. *Id.*

As to whether there was a "tacit agreement" regarding the price increases following the initial 2001 increases, the court noted that some of the evidence was not consistent with an agreement and did not support an "inference" of "mutual connectivity of intention." *Id.* at 8. That evidence included the use of different percentage increases in price, a history in the industry of "follow the leader" pricing, the role of the Korean government in establishing *de facto* pricing for the leader, the product variations offered by the defendants, and use of the "old price" support system (which could be used either to support a collusive agreement or an "instrument to engage in aggressive mutual competition"). *Id.* at 8-9.[9]

---

[8] As discussed below, according to plaintiffs' theory, in late 2000 or early 2001 the initial agreement was formed at this Representatives' Meeting. That agreement was confirmed at the March 2001 RTOA meeting.

[9] The "old price support system" was how long the Ramen companies would continue to sell either products labelled with the "old" price, after the new prices increases were announced, or in some instances sold new, newly labelled products at the old prices so as to minimize disruption to the market. Declaration of Bangwan Ku [Dkt. No. 545] ¶ 9.

[*909] The Korean Supreme Court weighed evidence (presumably consistent with principles of Korean law regarding admissibility and sufficiency), made credibility determinations, and determined what the inferences supported on a matter that was within its jurisdiction — whether the KFTC's order concluding there was a conspiracy and as a result imposing fines on defendants was adequately supported under Korean law. There is a different question before this Court: did defendants' conduct as it **[**33]** impacted sales of products *in the United States* violate federal and state antitrust and unfair competition laws? This is not a situation where, for example, Korean plaintiffs are trying to recover for injuries suffered in Korea at the hands of United States or Korean corporations. *See* *Mujica, 771 F.3d at 609*. The allegations (the evidence of which will be weighed below) are that a conspiracy hatched in Korea was exported and impacted the prices of goods defendants sold in the United States. The injuries for which recovery is sought here occurred in the United States.

None of the cases cited by Nongshim in support of its comity argument address similar facts or connections to American plaintiffs injured by sales that occurred in the United States. Instead, the more apposite case is *F. Hoffmann-La Roche Ltd. v. Empagran S.A., 542 U.S. 155, 165, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)*, where the Supreme Court recognized that:

> No one denies that America's antitrust laws, when applied to foreign conduct, can interfere with a foreign nation's ability independently to regulate its own commercial affairs. But our courts have long held that application of our antitrust laws to foreign anticompetitive conduct is nonetheless reasonable, and hence consistent with principles of prescriptive comity, insofar as they reflect **[**34]** a legislative effort to redress domestic antitrust injury that foreign anticompetitive conduct has caused.

While what the Korean Supreme Court did is similar to what a jury will be called upon to do here — weigh the evidence, make credibility determinations, determine which inferences are supported by the evidence — the jury may weigh the evidence and inferences differently, applying the law of the United States as instructed. The evidence may well exceed the amount and type of evidence that was before the Korean Supreme Court, such as the document alteration and destruction as well as expert economic analyses.

Also underlying this issue are the parties' different views of the role the Korean government played during the relevant time period in approving prices for some subset of the ramen market. Nongshim, generally, contends that the Korean government exercised tight control and made Nongshim seek approval prior to increasing prices on its leading products. Plaintiffs dispute whether Nongshim's prices were "controlled" by the Korean government, and point to evidence that at most Nongshim voluntarily included the Korean government on its contemplated price increases for some of the **[**35]** price increases at issue. Oppo. 54-55. According to plaintiffs, this voluntary and non-binding process cannot absolve Nongshim from its responsibility for price-fixing. Moreover, even if not technically or practically mandatory for Nongshim, at most the Korean government's role limited the top price Nongshim could charge and does not absolve Nongshim from the consequences of agreeing with the conspirators that they should follow suit and raise prices within a reasonable **[*910]** time to protect everyone's market share. *See, e.g.*, Ahn Depo. Tr. [567-4 at ECF 90] at 165:6-166:4 (describing his understanding of the process as a "discussion or negotiation" with the government and that Ramen companies are free to compete below the government approved price); Cho Decl., Ex. 12, Deposition Transcript of Jung Soo Kim [Dkt. No. 567-4] at 31:5-10.

Again, the jury will be tasked with determining disputes of fact, considering the admissible evidence and expert opinions. The principles of international comity do not require that I defer to the findings of the Korean Supreme Court on the question of whether defendants' sales in the United States harmed consumers in the United States as the result of an agreement **[**36]** to fix prices.

III. EVIDENCE OF CONSPIRACY IN KOREA

A. Direct Evidence: Witness Testimony

Plaintiffs rely on the testimony of three individuals who were Samyang executives or employees as direct evidence of the conspiracy: Jung Soo Kim, Soo Chang Ahn, and Jong Min Kim. I discuss the materiality of that testimony below.

1. Jung Soo Kim

Jung Soo Kim, Samyang's "Consultant Advisor" and President, testified that she was aware of a meeting of Ramen company executives that occurred in late 2000 or early 2001. Deposition Transcript of Jung Soo Kim [Dkt. No. 567-4] at 27:17-20. Kim recalls that Samyang executive Choi Don Joong attended. *Id.* at 37: 6-14. Joong reported back to Kim that at the meeting (hereafter "Representatives' Meeting"),[10] there was a conversation that because ramen prices could not be raised for two to three prior years, "if Nongshim raised the price, then we would follow Nongshim's act." *Id.* at 38:6-15. It was Kim's understanding that representatives from Nongshim, Ottogi, and Paldo were at that meeting, but she was "not certain." *Id.* at 39:18-25, 40:3-20. Kim testified, "I don't know if I can characterize it as they reached some kind of consensus," but Joong expressly confirmed that the **[**37]** discussion included that if Nongshim raised prices, then the others would follow. *Id.* at 42:22-25.

Later in Kim's testimony, after her recollection was refreshed with a prior written statement, she agreed that her understanding of what happened at the meeting was that the representatives "agreed to increase Ramen price by collaborating with one another." *Id.* at 56:2-57:4. She also testified that "information concerning sales or marketing or marketing research among Ramen companies were exchanged either in person or via email, and I would receive a report from my subordinates as to such information." *Id.* at 65:5-10. She stated that she saw "advance price information" collected by her employees for Nongshim prices, but not for Ottogi prices. *Id.* at 67:19-24. Kim also understood that her employees exchanged "advance price information" with both. *Id.* at 69:10 — 70:9. Even more specifically, it was her understanding that Samyang shared non-public price information with Nongshim, Ottogi, and Paldo before Samyang had publicly announced what its prices would be. *Id.* at 76:12-17. When Samyang initiated a price decrease in January 2010, it did so to eliminate the perception of price-fixing. Kim **[**38]** said, "[T]his indicates our determination or reflects our determination that we **[*911]** will not participate in any type of price-fixing activities, and we do not want to be investigated by Fair Trade Commission." *Id.* at 93:7021. Finally, she confirmed that she would receive information from Soo Chang Ahn (who was the head of sales at the time) and Kim Bong Hoon (who was in charge of marketing) about Nongshim's planned price increases and then Samyang would prepare for its price increases. *Id.* at 176:16-177:24.

Defendants attack Kim's testimony as hearsay, speculative, and lacking in personal knowledge. They point out that the Korean Supreme Court disregarded her testimony regarding the initial Representatives' Meeting in March 2001 because it was hearsay — she did not attend the meeting. Ottogi also notes that she offers essentially no testimony that Samyang received non-public price information *from* Ottogi, a point with which I agree. But her testimony does support a conclusion that Nongshim, Samyang, and Yakult were actively part of the conspiracy as she understood it; to effectuate that conspiracy, Samyang provided non-public price information *to* Ottogi.[11]

2. Soo Chang Ahn

Soo Chang Ahn was the Deputy **[**39]** Division Head of Sales at Samyang during the relevant time. Ahn attended the March 2001 RTOA meeting on behalf of Samyang, and testified that representatives from Ottogi, Nongshim, and Paldo were there to the best of his recollection. Cho Decl., Ex. 6, Soo Chang Ahn Deposition Transcript [Dkt. No. 567-4 at 90] at 64:20-24, 67:2-9. The issue of price increases was discussed at that meeting, although there were no specifics at to exact prices given the vast number of products at issue. Ahn admitted that it "was possible

---

[10] According the plaintiffs' theory, this "Representatives' Meeting" meeting took place in late 2000 or early 2001, and the representatives' agreement was solidified at the March 2001 RTOA meeting.

[11] Objections to the Kim testimony based on speculation and lacking in personal knowledge are OVERULED. Objections based on hearsay, as discussed in more detail below, are OVERRULED.

that question concerning the increase of — percentage of price increase — something like that might have been asked." 69:5-70:7. While Ahn proposed a double-digit percentage increase and Ottogi concurred, Nongshim recommended exercising caution given "negotiations" underway, presumably with the Korean government. *Id.* at 70:20-72:13. According to Ahn, Nongshim's representative — Dong Gyun Yoon — suggested the end price increase to be initiated by Nongshim would be sufficient "so that we can have a profit." *Id.* at 73:20-74:2; 78:24-79:6.

Ahn confirmed that the employees of Samyang, Ottogi, and Yakult exchanged "advance information about price increase" and that the information **[**40]** came into Samyang's "market research department." *Id.* 80:11-81:19. Those exchanges included timing of price increases and periods of "old price support." *Id.* at 90:11-15; 91-93. Using that information from its competitors, Samyang would determine what its plan would be. *Id.* at 94:9-14.

Defendants attack Ahn's testimony as hearsay, lacking in personal knowledge, and contradictory. They note that the Korean Supreme Court disregarded Ahn's testimony because records of the March 2001 RTOA meetings did not show Ahn in attendance, and argue that plaintiffs have failed to adequately rebut that point. Yu Decl., Ex. 33 (March 2001 RTOA Minutes, not showing Ahn in attendance). But plaintiffs rely on Ahn's deposition testimony, where he testified that he personally attended that meeting.[12] Deposition of Soo **[*912]** Chang Ahn [Dkt. No. 567-4 at ECF 90] at 43-44. Ottogi argues that Ahn's testimony is also undercut by the Witness Examination of Guen Ho Choi,a representative of Ottogi who attended the March 2001 conference and testified that price was not discussed by the attendees. Yu Decl., Ex. 35 [Dkt. No. 547-39] at 2. However, Choi's testimony,[13] even if admissible, does not definitively undercut Ahn's but **[**41]** instead raises a question of fact.

3. Jong Min Kim

Plaintiffs also rely on the testimony of Jong Min Kim, a Samyang employee who testified about meetings that occurred in March 2008. At the first meeting, an "administrator's meeting" on March 19, 2008, participants discussed that Nongshim and Samyang had already raised their prices and what the status of Ottogi's and Yakult's expected price increases was. Cho Decl., Ex. 13, Deposition Transcript of Jong Min Kim [Dkt. No. 567-4 at ECF 179] at 30:8-31:16. A week later, at the 2008 RTOA meeting, prices were again discussed, including that once prices had been increased (which had occurred for all but Yakult), they were unable to lower them. *Id.* at 71:16-72:14. All of the alleged conspirators — Nongshim, Ottogi, Samyang, and Yakult — were at this meeting. *Id.* at 43:4-44:5.

B. Corroborating Evidence

Plaintiffs characterize the "follow the leader" pattern — where market leader Nongshim would raise its prices first and the other companies would follow — as being established following the March 2001 RTOA meeting. Oppo. at 18. Defendants counter, relying in part on the Korean Supreme Court decision, that the follow the leader pattern

---

[12] Defendants point to a portion of Ahn's deposition testimony where Ahn supposedly admitted to never having heard of the "Representatives Meeting" until preparing for the KFTC leniency petition. The testimony is: "Q: Is it true that you had never known about the alleged representative meeting that supposedly occurred at the end of 2000 or early 2001 until you heard about it from someone else while preparing one of your statements to the KFTC? A: Yes. That is correct. And that's how I testified earlier." Yu Decl., Ex. 18, Ahn Depo. Tr. at 45:21-46:6. But Ahn goes onto explain that "representative meeting" was also referred to as the "presidents meeting." Ahn thereafter testified he attended the March 28, 2001 RTOA meeting. It appears Ahn thought some *other* meeting was meant by the "representatives meeting." The testimony plaintiffs rely on from Ahn is with respect to the March 28, 2001 RTOA meeting. That Ahn allegedly signed over his voting rights for the March 28, 2001 RTOA meeting to a subordinate, Changwoon Kim, was significant to the KFTC in discrediting Ahn's testimony. That issue is not directly addressed by plaintiffs, but again merely presents a dispute of fact.

[13] Plaintiffs object to Ottogi's reliance on this testimony as hearsay, and move to exclude the Choi Examination Statement because Choi was not disclosed by Ottogi as a witness. *See infra*.

existed **[**42]** well before then (since the 1980s and including the time when Samyang was the market leader), and was a function of the *de facto* price controls imposed by the Korean government. Nongshim MSJ at 5-6; Ottogi MSJ at 5. Given the role the Korean government and the long-standing *de facto* follow the leader pricing, defendants contend that collusion *cannot* be inferred. Nongshim MSJ at 28; Ottogi MSJ at 7. Plaintiffs bolster their "express or tacit" agreement argument by relying on the information exchanges discussed below. But in the end, whether or not there was an express or implicit agreement, or whether defendants were simply following old, established pricing patterns raises a dispute of fact.

1. Monitoring and Exchange of Information by Alleged Conspirators

As noted above, Jung Soo Kim and Ahn from Samyang testified regarding how their employees, particularly those in **[*913]** "market research," would exchange advance price information (including prices, timing, and length of old price support) with their competitors. Plaintiffs rely also on testimony from other Samyang employees on the Market Research Team who explained how the "lower level" sales and marketing employees were generally friendly and would gather for drinks or meals. These employees were trained **[**43]** by Samyang to exchange information with their competitors. Yu Decl., Ex. 36, Jong Moon Yui Witness Examination [Dkt. No. 547-40] at 5-6, 15 (Samyang head of Market Research was expected to and trained to "keep[] in communication with the competitor companies and mutually request[] needed materials, and so on," and confirmed that Kyung Joo Kim at Samyang was in charge of "external" duties including exchanging price increase information with competitors).[14] Jong Moon Yui confirmed that the Samyang email address marektone@hanmail.net email was used to exchange emails with competitor companies, including information about price increases but he was not personally aware of whether the competitors' price increase information was otherwise publicly known to others or had been disclosed at that time he received it and passed it along to his superiors. *Id.* at 13, 15-16.[15]

Plaintiffs also rely on Jong Moon Yui's 2010 affidavit to the KFTC. Yui stated that his boss, Kyung Ju Kim, would mostly handle the price information exchange "around the time" of price increases, but that he "exchanged the information at the time of the 2005 price increase," under Kim's direction. Cho Decl., Ex. 14, Jong Moon Yui KFTC Statement **[**44]** [Dkt. No. 567-4 at ECF 189] at ¶ 7. While defendants were successful in getting Yui to testify in his witness examination that as of 2016, he did not have an independent recollection of the facts in his KFTC statement (and he refused to confirm the "opinions" in that statement drafted by "lawyers" that collusion occurred), at most the testimony from the witness examination raises issues of fact about Yui's role and his understanding of Kim's role in securing, collecting, and passing up the chain of authority information regarding competitors' price changes and old price support.

Plaintiffs also rely on the Confirmation Statement of Kyung Ju Kim, a former Samyang Market Survey Team department head. Cho Decl. Ex. 15, Kyung Ju Kim KFTC Confirmation Statement [Dkt. No. 567-4 at ECF 213]. In his Confirmation Statement, Kyung Ju Kim testified that the most urgent information that needed to be exchanged with the competitors was about the price, the timing of the price increase and the duration of old price support system. *Id.* at 4, 6. As with Jong Moon Yui, the parties have differing views about the import and meaning of Kyung Ju Kim's *subsequent* testimony in his Witness Examination. Plaintiffs contend **[**45]** his subsequent testimony confirmed that *non-public* **[*914]** "price period" information was exchanged over the phone or in person (and not by fax or email because of the trail). Defendants contend that his testimony confirmed that only *public* "price

---

[14] In his Witness Examination, Jong Moon Yui confirmed that he asked his competitors about price information, such as about when prices might be increased and about "the general period or degree of increase," but not about specific prices. *Id.* at 10-11.

[15] Jong Moon Yui could not clearly recall about the use of an external hard drive to save information received from competitors. *Id.* at 17. He also recalled that there was a plan to buy an external hard drive to back up data in case of computer malfunctions and "I remember that the work materials for the entire department were backed up along with the data for the person in charge of market research. We didn't just back up the data only specially for market research. I remember that materials for advertisement, BM, and more were all backed up." *Id.* at 17. But, he also admitted that he does not know who controlled or managed the external hard drive. *Id.* at 50-51.

increase" information was exchanged among the competitors. Drawing appropriate inferences in plaintiffs' favor, Kim seems to admit to exchanging non-public information regarding the "price period" or old price support system in his witness examination although he does seem to deny circulating non-public "price information."

Stepping back to put this testimony (and the dueling interpretations offered by plaintiffs and defendants) in context, plaintiffs' theory is that Nongshim started the price-fixing process by spreading verbal rumors about price increases. Then its competitors' market research employees would reach out to Nongshim and figure out more about when the price increase might occur, the general parameters of the increase, and how long price support would last.[16] Kyung Joo Kim Witness Examination (Yu Decl. Ex. 37) [Dkt. No. 547-41] at 5, 6, 32; Cho Decl., Ex. 10 at OTGKR-0018660T (Ottogi price reaction memo from 2005) [Dkt. No. 567-4 at ECF **[**46]** 133]; *see also* Cho Decl., Ex. 19, Deposition Transcript of Bong Hoon Kim (Samyang's Marketing Team Leader) [Dkt. No. 567-4 at ECF 252] at 128:5-7 (noting that Samyang had information about Nongshim's December 2004 price increase "beforehand.").[17]

Defendants argue that the testimony of these low-level Samyang employees about conversations and information exchanges with their own low-level employees cannot prove an agreement to raise prices, especially when price setting is indisputably out of the control of these employees. But defendants misstate the point. These employees, according to some of the direct testimony, were tasked with gathering up price and price support system information (much of which had not yet been publicly disclosed) and passing it up the chain to those — at least at Samyang — who did have the power to set the prices.[18] **[*915]** While defendants — through witness examinations — were successful in "walking back" and calling into question some of the testimony by some of these witnesses, those efforts do not fully undermine the testimony given to the KFTC. There are issues of fact regarding whether the information exchanged between lower-level **[**47]** employees was non-public and collected and passed up to managers who did have the power to set prices.

---

[16] Nongshim argues that all that plaintiffs have established is what they admit; that the companies' representatives would readily find out competitors' planned price increases before the public became aware of them but *after* they were announced to distributors (who often sold more than one company's products) by contacting those distributors. *See, e.g.*, Nongshim MSJ at 24 n.28, 25 n.30; Nongshim Reply at 10-11. But plaintiffs have at least *some* evidence that price and price support information that was not public even to distributors was exchanged amongst the conspirators.

[17] Ottogi says that Samyang's witnesses confirmed that Ottogi was not involved in this exchange of information. Ottogi Reply 11. However, Samyang's Jong Moon Yui testified that he spoke with a specific Ottogi employee "occasionally" and that they exchanged a "few emails." Yu Decl., Ex. 36 at 12, 63 (admitted exchange information with Ottogi, just not as frequently as with Nongshim and Yakult). Yui also confirmed that he exchanged price information with Ottogi, although he could not say whether it was otherwise "undisclosed" at the relevant time, and that emails from Ottogi were sent to the marketone@hanmail.com account managed by Yui. *Id.* at 16, 20-21, 70. *See also* Yu Ex. 37, Kyung Joo Kim Witness Examination at 4 ("I was responsible for mutual and close exchange of information with competitors such as Nongshim, Paldo, and Ottogi, even including most sensitive pieces of information such as competitors' price increases, new product launching, sales strategies, organizational and personnel changes, and various market trends, and so on."); *see also id.* at 5-6 (rejecting the idea that specific price increase information was exchanged, but rather more general information was exchanged).

[18] Similarly, Ottogi relies on testimony from Ottogi's own witnesses who were high enough up in the structure that they were responsible for setting prices and point out that these employees all denied exchanging confidential or otherwise sensitive information with competitors. Ottogi Reply 11. For example, Bangwan Ku testified that from what he was able to learn, he did not know about meetings or emails between Ottogi and Nongshim or Samyang employees because "[b]ased upon what I was able to find out, I haven't seen anything like that with my own eyes." Yu Decl., Ex. 3 at 138:17 — 140:8. The people he asked at Ottogi confirmed that there was "there was no contact made with any of the competition." *Id.* at 144; Ex. 4 at 19:17-20. Similarly, Young Hyun Doh testified that he was "not aware of Ottogi Korea ever having possession, during the timeframe of 2000 to 2010, of nonpublic information regarding pricing plans of your competitors." Yu Decl., Ex. 5 at 84:21 — 85:3. Dae Gyo Suh testified that he did not believe that anyone on Ottogi's marketing team would have communicated with competitors about pricing and production, in part because he instructed them not to do so. Yu Decl., Ex. 6 at 85:7 — 86:9, 90:10-14, 128:6-14. These assertions, however, appear to be undermined by documents produced by Ottogi that were prepared for the higher-up decision makers and produced by the departments of these lower-level employees that allegedly contain non-public information about Ottogi's competitors. Although some of the Ottogi witnesses who were questioned about these documents denied having seen them, there are material disputes of fact.

2. 2001-2004 Price Increases

Plaintiffs rely on the KFTC Supplement Confirmation Statement of Kyung Ju Kim, whose role was to be the point of contact with competitors for the Marketing Department, the department involved in sharing "information regarding the price increase" of Samyang and its competitors, including the "most sensitive information." Kim testified that he held that role from 2001 (upon the creation of the market survey team in 2001) until he resigned in 2006. Cho Decl., Ex. 15, Kyung Ju Kim May 2011 Supplement Confirmation Statement at 3. Kim's boss, Bong Hoon Kim testified that in May 2001, he received Nongshim price information from Kim. Cho Decl., Ex. 17, Deposition Transcript of Bong Hoon Kim at 88:17-92:15. He also testified that in late 2003, Kim passed along information about Nongshim's price increases ("he told me that prices will go up"). Bong Hoon Kim Depo. Tr. at 73:17-74:11. Also, a "draft" of Nongshim's 2003 price increases was located in the SHD as well as in the custodial files of a Nongshim employee. *Compare* Cho Decl., Ex. 20 *with* Ex. 21. Another Samyang **[**48]** employee met with a Yakult employee in 2003 and learned when the price of Yakult products would be raised and how long old price support would last. Cho Decl., Ex. 22, Deposition Transcript of Eui Ryul Kim at 17:25-18:7.

Regarding Ottogi, plaintiffs rely on a January 2004 memo, where Ottogi's Kang Hoon Lee indicated that Ottogi would raise prices in response to Nongshim's increase and mentioned information from Samyang and Yakult about when those companies might increase price — showing that the companies were communicating on the subject in advance of their price increases — and commented on Nongshim's concern about critical reaction but determination to go ahead with its price increase anyway. Cho Decl., Ex. 23.[19] Ottogi contends that the only significant line in **[*916]** this January 2004 memo shows that Ottogi was determined to raise its prices because Nongshim did but in ways that would be efficient and facilitate sales. Ottogi Reply at 5-6. Ottogi, however, does not address the alleged non-pubic information in that memo from Samyang and Yakult.

3. 2004/2005 Price Increases

Plaintiffs allege that Nongshim circulated non-public price increase information to its competitors on December 10, 2004. **[**49]** *See* Bong Hoon Kim Depo. Tr. at 128:5-7 (Samyang had Nongshim December 2004 price increases "beforehand"). Nongshim received internal approval on December 20, 2004. Cho Decl., Ex. 25. It emailed its approved prices to Samyang on December 22, 2014 and implemented the price increase in December 24, 2014. Cho Decl., Ex. 14 (Jong Moon Yui April 1, 2010 KFTC Affidavit) at ¶ 28; Cho Decl., Ex. 25.

Plaintiffs note that when Samyang did not raise its prices within a month after Nongshim did in December 2004, *i.e.*, during the typical month-long Nongshim old price support period, Nongshim contacted Samyang to complain and demanded to know the date Samyang would increase its prices. Cho Decl., Ex. 19, Deposition Transcript of Bong Hoon Kim (Samyang's Marketing Team Leader) at 121:3 — 124:12; 128:5-23; Cho Decl., Ex. 1, Dong Hee Kang Depo. Tr. at 20:20-22:16. Nongshim was forced to extend its normal one month old price support system through February and then through March (Cho Decl., Ex. 10; Cho Decl., Ex. 27 at OTGRM-0209-T), until Samyang and Ottogi "backed down" and announced price raises at the end of February.

According to Samyang employee Jong Moon Yui's April 1, 2010 KFTC Affidavit, Yakult emailed its price increase plan to Samyang on January 11, 2005 (and raised prices **[**50]** on January 15), and Ottogi emailed the date of its price increase plan to Samyang on February 25, 2005. Jong Moon Yui April 1, 2010 KFTC Affidavit at ¶ 28; Cho Decl., Ex. 30 (document from SHD authored by "Ottogi" with last modified date of February 25, 2005 "February 25 document"). Samyang delayed (until it succumbed to Nongshim's pressure) in order to expand sales in conjunction with its then lower-price and an ad campaign. *Id.*

---

[19] This January 2004 memo is one of the memos that plaintiffs contend Ottogi intentionally edited and removed the information about its competitors before the memo was produced to the KFTC.

Ottogi disputes the authenticity of the February 25 document found in the SHD, arguing that Samyang could have created it based on "guesswork." Ottogi Reply 13. However, not only does the February 25 document have document-level metadata indicating that it was created by Ottogi,[20] it also shows Ottogi's proposed before and after increased factory and retail prices for a leading product. Those price increases were actually implemented thereafter. Samyang would have had to have remarkable prescient abilities to get both of those data points correct.

Ottogi also attempts to reduce the impact of the February 25 document by relying on a declaration from Bangwan Ku that sometimes Ottogi sent to customers its "near final" price lists before they were finalized. Declaration **[**51]** of Bangwan Ku [Dkt. No. 545], ¶ 8. Plaintiffs argue that this testimony contradicts Ku's deposition testimony where he answered "no" when asked whether price lists were circulated prior to final approval. Cho Decl., Ex. 32, Deposition Transcript of Bangwan Ku at 23:6-24:4. The disputes over the interpretation and significance of Ku's deposition and declaration testimony, as well as the significance and genesis of the February 25 document, show that material disputes **[*917]** of fact have been raised by plaintiffs whether the documents regarding the 2004/2005 price increase support their theory of conspiracy.

4. 2007 Price Increases

Plaintiffs argue that in 2007, Samyang used the private marketone@hanmail.net email address to circulate competitor information, and that by this time Nongshim employee Yeo Won Yoon was likewise using a private email address to email Samyang employees price information at their own private email accounts. Cho Decl., Exs. 34 (emails from NSK) & 38 (SHD screenshots).[21] Samyang's marketing team leader (Jin Woo Seo) testified that he was confident that from July 2006 through September 2008, Samyang was receiving advance information about Nongshim's price intentions before **[**52]** it was public through Yui. Cho Decl., Ex. 18, Deposition Transcript of Jin-Woo Seo at 66:2-25.

As for documentary support, plaintiffs contend that Nongshim notified its distributors of the prospect of price increases on February 23, 2007. On March 1, Nongshim set its increases in prices and emailed its competitors a document detailing shipping dates and old price support periods. Cho Decl., Ex. 38 (from SHD).[22] According to a February 28, 2007 Ottogi memo, Ottogi had already been in touch with Samyang and Yakult to inquire about their plans for raising prices. Cho Decl., Ex. 39. According to the Ottogi memo, Samyang and Yakult informed Ottogi of the dates and scope of *their* contemplated price increases. Samyang disclosed its price increase plan to Nongshim and Ottogi on April 11, 2007, and raised its prices on April 16, 2007. Cho Decl., Ex. 40 (SHD email).

Plaintiffs allege that this time Ottogi was the company that attempted to delay its price increases. Around July 18, 2007, Samyang's Jong Moon Yui had a conversation with Ottogi to discuss the market's reaction to the price increases, according to an Ottogi memo of the same date. Cho Decl., Ex. 42. Ottogi sent a draft of its price increases to its competitors in second **[**53]** half of July (Cho Decl., Ex. 43 (SHD document)) and finalized its proposed price increases on July 23, 2007. Cho Decl., Ex. 44 (an Ottogi document that lists products in the same order as the SHD document in Ex. 43). The effective date of Ottogi's increases was September 1, 2007. Cho Decl., Ex. 45.

During this timeframe, plaintiffs allege that the competitors continued to share market and sales information, including information about promotions, so that they could monitor the impact of Nongshim and then Samyang's

---

[20] As discussed below, the significance of the different types of metadata associated with documents found in the SHD is a point of dispute between the experts.

[21] Defendants' computer forensic expert argues that none of the SHD emails are "authentic" emails because none of them were natively produced. *See infra*. As discussed below, given the other information provided about the creation and storage of "emails" on the SHD (through screen shots, compilations, etc.), this goes to their weight but not their admissibility.

[22] This SHD document's metadata shows that it was created by Nongshim with a "last author" who was a Yakult employee.

price increases on the market. Cho Decl., Exs. 14, 34.[23] Ottogi also shared its quarterly sales performance. Cho Decl., Exs. 47, 48 (SHD documents, with Ottogi document-level metadata).

Defendants respond with the same objections to the evidence — primarily that the documents on the SHD are not authenticated or otherwise admissible — and that at most plaintiffs show that the information exchanged could have already been **[*918]** known by distributors. *See, e.g.*, Ottogi Reply at 8. However, as above, the testimony and documents create disputes of material fact.

5. 2008 Price Increase and Competitor Meetings

According to plaintiffs, the pattern of information sharing continued into 2008. **[**54]** Nongshim sent Ottogi its before and after factory and retail price increases on February 17, 2008, and informed them of the date when those increases would be implemented. Cho Decl., Ex. 50. Nongshim raised its prices on February 20, 2008, and sent its old price support information to Samyang and Ottogi. Cho Decl., Exs. 54 (Ottogi), 55 (SHD). Samyang used this information to draft its own report for the period covering February 22 — 28th. Cho Decl., Ex. 56. It then circulated its price increase details to its competitors on February 27 and 28th (Cho Decl., Exs. 33), raised its prices on March 1, 2008, and shared its price support information on March 3, 2008. Cho Decl., Ex. 33 (SHD). Ottogi sent its information to Samyang on February 29, 2008. Cho Decl., Exs. 14 (Ottogi), 57 (SHD).[24]

In sum, considering the testimony from Samyang witnesses and their KFTC statements (which, as acknowledged above, were somewhat "walked back" in subsequent examinations) and the documents, plaintiffs have some evidence — although on close inspection, not as overwhelming as plaintiffs contend — to corroborate their "direct evidence" of conspiracy.

C. Confirmatory Economic Analysis

Finally, plaintiffs rely on **[**55]** their experts' analyses that price collusion was in play. Oppo. 36. The conclusions of those experts were discussed extensively in my Order granting the motions for class certification. The defendants, at this juncture, do not make a concerted attempt to persuade me that my conclusions on the prior Orders missed key points, facts, or contrary expert positions that should turn the summary judgment motions in their favor.

In Opposition, plaintiffs rely on their experts' conclusions that the delta between costs of goods sold and profit nearly tripled during the Conspiracy Period (when they moved in tandem in the Benchmark period).[25] Plaintiffs also point out that during the Conspiracy Period, the market shares of the conspirators remained consistent, and only changed (with Ottogi surpassing Samyang) after the conspiracy ended in 2010.[26] Their expert support strengthens (but is not the sole support of) the conclusion that plaintiffs have presented enough evidence of a conspiracy in Korea to survive summary judgment on this issue.[27]

---

[23] Plaintiffs note that many of the Nongshim Korea ("NSK") documents produced from this time frame mirror ones found on the SHD. Oppo. 29.

[24] Ottogi in Reply does not discuss the February 29, 2008 date that plaintiffs contend Ottogi sent its non-public price information to Samyang, but instead argues over the date (and method) of the delivery of information from Nongshim to Ottogi. Ottogi Reply. at 8-9.

[25] As acknowledged before, defendants contend that plaintiffs' experts unreasonably removed certain overhead costs that, in their view and as discussed extensively on the class certification motion, should be included and if included result in slim to negative profit margins for defendants during the conspiracy.

[26] Ottogi attributes this increased market share and overtaking Samyang to Ottogi's improvement of taste in its Jin Ramen product and the development of a new higher priced premium product. Declaration of Bangwan Ku [Dkt. No. 545] ¶ 15.

[27] The evidence in this case is markedly unlike that in *In re Chocolate Confectionary Antitrust Litigation, 801 F.3d 383, 397 (3rd Cir. 2015)*, where the plaintiffs relied primarily on economic analysis and failed to offer testimony or documentary evidence to

[*919] D. Summary

Reviewing all of the evidence — and considering defendants' objections to much of it and their contrary characterizations of some of it — I find that **[**56]** plaintiffs have shown "sufficiently unambiguous" evidence of a conspiracy; in other words that the inference of conspiratorial behavior reasonably drawn from the evidence is *more consistent* with unlawful conduct than lawful conduct.

Nongshim attempts to dismiss the evidence as hearsay (for Samyang testimony generally), as subsequently contradicted (as a few of the Samyang witnesses in 2016 could not recall the bases for some of the statements made in their KFTC statements in 2010 and 2011), and as unreliable (for the SHD documents). It blames "lazy low-level" employees for exchanging information. These lines of defense may be persuasive to a jury, but do not get them to summary judgment on the issue of a conspiracy in the Korean market.

Ottogi's attacks on the evidence of a conspiracy are similar. But Ottogi also ignores the import of their memos, which support a reasonable inference that it had advance access to its competitors' price and old price support information and used that information in shaping its own plans. Moreover, plaintiffs have evidence that Ottogi omitted information from some of the "recreated" memos it submitted to the KFTC — which Ottogi contends it was asked to **[**57]** do by the KFTC — that supports plaintiffs' conspiracy and collusion theory. Ottogi also points to its separate testimony and documents showing that the prices it ultimately selected "differed" from its competitors. Ottogi Reply 16. That, however, was plausibly explained in plaintiffs' favor by the experts on class certification (*i.e.*, the exact prices did not and do not have to match, but the percentage moves and timing does line up with a conspiracy). Ottogi also points to evidence that it engaged in extensive analysis and strategizing before any price changes. Ku Decl. ¶ 16 & Exs. A-Q (attaching pricing memos considering market dynamics and options for price increases and old product support). That may be so, but plaintiffs have likewise shown evidence that there was analysis in *that process* of at least some allegedly non-public competitor price and price support information.

IV. IMPACT OF CONSPIRACY IN THE UNITED STATES

That plaintiffs have come forward with sufficient evidence to raise a dispute of material fact regarding the existence of a conspiracy to raise prices in a coordinated fashion in Korea does not mean plaintiffs have cleared the hurdle of defendants' motions for summary **[**58]** judgment. Defendants argue that there is insufficient evidence that the Korean conspiracy (if it existed) impacted purchasers in the United States.

Defendants are correct that the existence of a conspiracy overseas does not, by itself, evidence a conspiracy impacting the United States. There must be "some linkage" between the conduct overseas and sales (or other injury) in the United States. *See, e.g.,* *In re Elevator Antitrust Litig., 502 F.3d 47, 52 (2d Cir. 2007)* ("Allegations of anticompetitive wrongdoing in Europe-absent any evidence of linkage between such foreign conduct **[*920]** and conduct here-is merely to suggest (in defendants' words) that 'if it happened there, it could have happened here.'"); *Williamson Oil Co. v. Philip Morris USA, 346 F.3d 1287, 1317 (11th Cir. 2003)* (requiring evidence of "some palpable tie between [] overseas activities and [] pricing actions in the United States.").

As an initial matter, there is no direct evidence that the conspirators *expressly aimed* the alleged collusive conduct towards products destined for export to the United States or products manufactured in the United States.[28] Plaintiffs

---

undermine the notion that in an oligopolistic market, prices will tend to move in tandem resulting in supra-competitive prices that *are not* the product of an anticompetitive agreement. Here, plaintiffs do not rely alone on evidence of "conscious parallelism" to create a reasonable inference of a conspiracy; there is some direct evidence and additional corroborating evidence (but subject to dueling interpretations of significance and reliability) sufficient for plaintiffs to survive summary judgment on an issue of a conspiracy in Korea. *Id. at 398*.

[28] Defendants rely on "public statements" from the KFTC that the alleged conspiracy did not involve products for the United States. Ottogi MSJ at 20, citing Dkt. No. 85-1 (a KFTC request for clarification to a news article); Dkt. No. 95-2 (communication

argue they have supplied the necessary linkage through indirect evidence: namely, the connections between and the control exercised by the Korean parent companies over their wholly-owned subsidiaries, Ottogi **[**59]** American and NSA. The linkage depends in part on the nature of NSK and Ottogi Korea. Plaintiffs' expert, Dr. Stephen Haggard, describes them as "chaebols," diversified family business entities that (even if publicly traded and separately organized under corporate law) are dominated by one family or extended family. *See* Declaration of Professor Stephan Haggard [Dkt. No. 567-1] ¶¶ 12-13.[29] According to Haggard, the family domination and control extends to subsidiaries and affiliated companies. *Id.* ¶ 17. Subsidiaries of Korean chaebols generally are run as "integrated business units" to service the interests of the founding families and the flagship organization. *Id.* ¶¶ 36, 47.

Standing alone, however, opinions regarding the integrated operations of chaebols generally, including overlap between and "sharing" of executives between parent and subsidiary corporations, would be insufficient to demonstrate linkage in *this* case. Haggard goes slightly further and relies on information about the specific operations of NSK and Ottogi Korea and their American subsidiaries NSA and Ottogi America — including organizational charts, lists of employees and executives, and other documents produced in this **[**60]** case — as bases for his opinions about integrated control over subsidiaries exercised by NSK and Ottogi Korea. Haggard Decl. ¶¶ 38-39, 49-62 (Nongshim), ¶¶ 63-68 (Ottogi).[30]

In addition to this overarching, somewhat generalized theory of chaebols operation from Haggard, plaintiffs rely on evidence showing that directors and upper-level management were shared between the Korean parents and American subsidiaries. Plaintiffs also offer evidence showing that Ottogi America and NSA sold products produced in Korea by the parent corporations engaged in the conspiracy and that the pricing of those export products were based on Korean domestic prices. Even for NSA products produced in the U.S., plaintiffs claim that documents show that their pricing was also controlled by NSK and impacted by the conspiracy. Defendants counter that plaintiffs' generalizations and a few mischaracterized documents cannot carry plaintiffs' weight to **[*921]** show a dispute of material fact that the Korean conspiracy had any impact on the pricing decisions made by NSA and Ottogi America.[31]

A. Ottogi

It is undisputed that Ottogi's products were manufactured by Ottogi Ramen and exported to the United States by Ottogi Korea, initially **[**61]** through sales to DPPs and Korea-based exporters and then after Ottogi America was formed in 2005, through sales to Ottogi America.

Ottogi argues that plaintiffs' alleged evidence of impact in the United States is insufficient - at least for its products - because:

---

from KFTC to law firm clarifying that "the export item (ramen) was not the target of price-fixing"). However, these statements by the KFTC do not bind my determination or resolution of that issue.

[29] As discussed below, defendants object to and move to exclude the Declaration and testimony of Haggard.

[30] As one specific example, Haggard points out that Jun (or Joon) Park simultaneously acted as Chairman of the Board and President of NSA and as NSK's overseas sales team. Haggard Decl. ¶ 52.

[31] Following the hearing on these motions, Nongshim submitted a request to file an "appendix" of supplemental citations regarding lack of causation and impact in the United States. Dkt. No. 599. That appendix did not simply include supplemental citations, but also excerpts of expert testimony and Nongshim's characterization of the competing testimony. *Id.* Not surprisingly, plaintiffs then filed their response to Nongshim and their own supplemental memorandum re causation, supported by a supplemental declaration. Dkt. Nos. 602, 603. Ottogi and Nongshim then filed briefs opposing plaintiffs' filings, but also addressing (really readdressing) the evidence and arguments made by plaintiffs. Dkt. Nos. 605, 606. The parties' attempts to submit further evidence and briefing on these issues - after having been provided excess pages to make their arguments initially - contravenes this District's Local Rules. Nonetheless, because all parties have now had the opportunity to respond to each other, the motions to supplement are GRANTED and I will consider the evidence and arguments raised therein. Dkt. Nos. 599, 602.

• Ottogi manufactured different products for the U. S. market. Prior to creation of Ottogi American in 2005, the U.S. products were sold to U.S.-based DPPs or exporters in Korea (and both those entities were responsible for importing the product to the U.S.) at the "export price." The export price was not increased, and was below the Korean-domestic price, through 2003.

As to the differences in the domestic and export products, plaintiffs argue that there is no evidence that minor differences in packing or ingredients - which are the only differences - had any impact on pricing. Plaintiffs note that Ottogi conceded there were no differences in the manufacturing process, although there could be differences in ingredients. Cho Decl., Ex. 59, Deposition Transcript of Kyu Tae Kim [Dkt. No. 567-4 at ECF 472] at 28:23-29:24. As to the pre-2003 period, plaintiffs do not dispute from that 1999 - 2003, Ottogi's Overseas Business division **[**62]** did not raise its export price, and the export price remained much lower than its domestic price. Declaration of Heung Duck Seo [Dkt. No. 548-3] ¶ 4. However, as the class period does not start until 2003, this fact is of limited relevance (other than a piece of evidence Ottogi can use to argue that the Korean prices didn't impact the U.S. prices).[32]

The significant issue here is the determination of the "export price" (the price Ottogi Korea set for products destined for the United States); how it was determined and who determined it. If the export price was inflated due to the conspiracy, then products with an inflated price were sent into the U.S. market and sold by Ottogi America. Ottogi contends that extensive evidence shows that different entities were **[*922]** involved in setting their own prices, including:

• Ottogi Ramen (which manufactured the products and sold them to the separate-but-related Ottogi Korea entity at the "procurement price"); Ottogi Korea Overseas Business Division (which set the export price);[33] the Ottogi Korea Product Planning Team, Marketing Team 3, and Sales Planning Teams (which set domestic prices, *see* Bangwan Ku Decl. [Dkt. No. 545] ¶ 6); and then Ottogi America **[**63]** (formed in 2005). Yu Decl., Appx A [Dkt. No. 547 at ECF pg. 8].

As an initial matter, that Ottogi America (from 2005 on) or the exporters (who prior to the formation of Ottogi America imported the products into the U.S.) may have "discounted" their prices to attempt to gain a stronger foothold in the States or in discrete regions and therefore charged different end-prices to each DPP depending on base price, shipping distance, and discounts, at most provides an argument as to the amount of damage suffered by plaintiffs. It does not mean that the conspiracy did not reach or impact consumers in the United States.

Ottogi relies heavily on the testimony of Bangwan Ku[34] that the Overseas Business Division set the export prices and argues there was no overlap between the narrow-category of individuals who were "responsible" for setting the different divisions' prices. Yu Decl., Appx A. Plaintiffs, in response, point out that Ottogi America's board of directors and upper-level management were "filled" with Ottogi Korea board members and high-level executives. Haggard Decl., ¶¶ 67, 68 (identifying family members of Ottogi Korea's founder who held positions at Ottogi America and other individuals **[**64]** who held concurrent Board or employment positions at Ottogi Korea and Ottogi America from February 2008 through March 2011). They also emphasize that many Ottogi Korea employees were "dispatched" to oversee the day-to-day operations for Ottogi America. Oppo. at 38 n.54. According to plaintiffs and

[32] Plaintiffs will, presumably, argue that Ottogi intentionally kept the U.S. price low during this period to help it "break into" the U.S. market. Plaintiffs also rely on their expert, Mangum, who ascribed the lag in part to the initial focus of at least Nongshim on the Korean conspiracy which, following that success, was then exported to the U.S. and other markets. Mangum Decl. [Dkt. No. 363-6] ¶ 98.

[33] Ottogi's witnesses testified that the export price was determined based on procurement price only plus export factors (margin, exchange rate) and was not set with respect to the domestic price. Yu Decl., Ex. 10, Deposition Tr. Min Hwan Choi [Dkt. No. 547-12] 10:9 - 11:17:17.

[34] Bangwan Ku is currently Ottogi's Deputy Senior Sales Manager for Ottogi Korea. From 2000 through 2015, he was an associate in the Sales Planning Office, which set prices for products produced for the Korean domestic market. Bangwan Ku Decl. ¶¶ 1, 2.

their expert (Haggard), this allowed Ottogi Korea to oversee and participate in Ottogi America's operations with the ultimate goal of protecting the profits and carrying out the aims of the parent corporation.

As additional support, plaintiffs point to documents evidencing that export prices and Ottogi America's sales prices were influenced by Korean domestic prices. That evidence to show that Ottogi Korea was exercising control over the export prices includes a 2002 price approval document, circulated to both the Korean domestic division and the "Overseas Sales — Export Office" along with deposition testimony from Bangwan Ku that these sorts of price adjustment notifications were sent to departments who needed to know. Cho Decl. Ex. 81 (price approval form), 82 (Bangwan Ku Depo. Tr. [Dkt. No. 566-24] at 117:15-23). Plaintiffs also rely on evidence from 2008 that after Ottogi Korea increased factory and retail prices, the **[**65]** head of the Overseas Sales Team emailed that document to the Overseas business department to notify them that price increases for exports "would be" 10%. Cho **[*923]** Decl., Exs. 85-86; *see also* Supp. Cho Decl. [Dkt. No. 603-5], Ex. 8 ("Ottogi American Export Price Computation" from November 2007).[35]

Weighed together, plaintiffs have some (albeit slim) evidence that the Ottogi America prices were impacted by the prices set by Ottogi Korea that were inflated because of the conspiracy. The domestic-Korean and U.S. products were *produced* in Korea by a related-company, Ottogi Ramen, purchased by Ottogi Korea, and then sold by Ottogi Korea to Ottogi America (after Ottogi America's creation). Construing the evidence in plaintiffs' favor, the linkage between the Korean market and the products produced in Korea and sold in the U.S. market has been established.

B. NSA Arguments

Nongshim argues that partial summary judgment must be entered for NSA because there is no evidence that NSA was part of the conspiracy.[36] Relatedly, Nongshim also moves for partial summary judgment seeking a "bar" order under *Rule 56(g)* carving out the U.S.-produced products from the scope of the case.

Nongshim argues that it declarants uniformly **[**66]** testified that NSA's pricing decisions for products sold in the U.S. — both those produced in the U.S. and those imported from Korea — were "wholly independent" of NSK. Declaration of Young Lee [Dkt. No. 540-6], ¶ 6; Declaration of Won Joon Lee [Dkt. No. 541-30] ¶ 9. It is undisputed that prior to the opening of NSA's Rancho Cucamonga factory in 2005, NSA's products sold in the U.S. were manufactured by and purchased from NSK in Korea. After the NSA factory started domestic U.S. production in 2005, the majority of product sold by NSA was domestically produced by NSA. Over the class period, 65% of the relevant product was manufactured in the U.S. Y. Lee Decl., ¶ 5.

1. NSK-Produced Products

As to the NSK-produced products sold by NSA, Nongshim admits that the products were priced in part by reference to what NSK charged NSA for them (plus freight, duty, customs and other import-related costs as well as profit margin, and depended in part on the exchange rate). Young Lee Decl. ¶ 8; Declaration of Won Joon Lee [Dkt. No. 541-30] ¶ 7. However, Nongshim contends, because the prices were ultimately the result of negotiations between NSA and NSK (Y. Lee Decl. ¶ 8), there is no evidence the alleged-conspiracy **[**67]** led to higher prices for the

---

[35] Plaintiffs also rely on documents showing that after Ottogi Korea decreased its prices in 2010 based on directions from the KFTC, the Overseas Sales Team informed Ottogi America of that, and Ottogi America reduced its prices accordingly just nine days later. Cho Decl., Exs. 84, 87, 88.

[36] Plaintiffs identify one instance of an NSK employee emailing a "dispatched" NSK employee on assignment at NSA an NSK "weekly report," detailing information about Samyang, Ottogi, and Yakult's market share. Cho Decl., Ex. 49 (NSK emails). Plaintiffs also argue that because NSA destroyed their copy of the Factbook (that had been available from NSA's website but was taken down after the inception of the litigation), there is an inference that other documents showing NSA's role in the conspiracy were likewise destroyed. Oppo. 51. This "evidence" is mere speculation and not sufficient to show that NSA played a direct role in the conspiracy emanating from Korea.

products NSA sold. NSK's Won Joon Lee likewise states the NSK employees involved in the negotiations with NSA operated "entirely separately" from the NSK employees in the "different unit" of NSK who set the Korean-domestic price. Won Joon Lee Decl. **[*924]** ¶ 7. And NSK had no role in determining the ultimate price NSA charged DPPs. *Id.*

As with Ottogi, that NSA had some flexibility to negotiate its purchase price from related-NSK and then could discount and set its *own* prices for DPPs does not mean that the price NSA paid for *imported* NSK products were not inflated by the conspiracy or that the conspiracy did not impact the prices ultimately charged by NSA. Plaintiffs have significant evidence that the export price of NSK-produced products was directly set in conjunction with Korean "factory price" levels. Cho Decl. [Dkt. No. 566, 567], Ex. 60 (Sales System Setup for US subsidiary); Ex. 65 (as maintained by Jae Chan Lee, a manager of American exports, Ex. 66); Ex. 72 (import price set off of factory price and selling price set off of domestic-Korea price); Ex. 67 (describing formula in April 2007); Ex. 68 (2003 export price increase); Ex. 73 (2008 price increase); **[**68]** *see also* Supp. Cho Decl. [Dkt. No. 603-5], Exs. 5-6.[37] There are also emails between NSK and NSA indicating that prices NSA charged in the United States for at least Korean-export products should be increased *in light of* the increased prices in Korea. *Id.*, Exs. 72, 75.[38]

There is sufficient, albeit disputed, evidence that for the NSK-produced products, the alleged-conspiracy-inflated prices in Korea *impacted* the export-priced products sold by NSA. This direct evidence, combined with the evidence of shared directors and employees and Haggard's opinions about control by NSK over NSA, raises at least a question of fact as to NSA's participation in and liability for the alleged conspiracy. In other words, NSA may have not only paid conspiracy-inflated prices for the NSK-produced products, but also allowed input if not control by NSK for the prices it charged on those products, knowingly furthering the goals of the conspiracy.[39]

2. U.S.-Produced Products and *Rule 56(g)* Order

In the alternative, NSK and NSA seek a *Rule 56(g)* partial judgment excluding **[*925]** from plaintiffs' case any products produced and sold by NSA in the United States. Nongshim MSJ at 18.[40] As to the U.S.-produced products, NSA's Young Lee declares that the prices were set **[**69]** by considering NSA's costs plus sales/administrative expenses plus a gross profit, and without any role from NSK. Y. Lee Decl. ¶¶ 6, 11.

---

[37] Nongshim argues that these documents discuss export pricing to areas *other* than the United States, because products for the United States had to be "localized" to comply, for example, with FDA requirements. *See, e.g.*, Nongshim Reply [Dkt. No. 607-1]. But that is not clear from the face of the documents or the limited testimony regarding the documents and simply demonstrates there are disputes of material fact.

[38] Plaintiffs rely on two "Approval Request" forms and attached documents from 2003 and 2008 which they contend contradict Young Lee's position that NSA independently set prices without any input from NSK. Plaintiffs point out that those requests, proposing changes to "transfer" pricing between NSK and NSA, include attachments regarding NSK export and factory prices, as well as NSA's market supply prices. Cho Decl. Exs. 69, 73. The forms required sign offs by both NSA and NSK executives. One of the signatories, Joon Park, was the director and President of NSA at the same time he was a director and President of the International Business Division of NSK. Cho Decl., Ex. 95; Pls. Oppo. 50. The signoffs, according to plaintiffs, further contradict Lee's statements, and add support to Haggard's conclusions that NSA did not operate independently of NSK given the shared control. Haggard Decl. ¶¶ 16-21, 72.

[39] Plaintiffs contend that even if I grant defendants' motions as to NSA and Ottogi America based on insufficient evidence of NSA and Ottogi America's participation in the conspiracy, the DPPs would still have standing to assert their Sherman Act damages claims — presumably against NSK and Ottogi Korea — because of the "control exception." *See, e.g., Costco Wholesale Corp. v. AU Optronics Corp., 2015 U.S. Dist. LEXIS 180580, 2015 WL 11529919, at *1 (W.D. Wash., June 4, 2015)* (standing to seek damages for purchases whose prices were inflated by conspiracy, even if not purchased from a conspirator as long as the seller was "controlled" by a conspirator). Given that I have found a question of fact as to the subsidiaries' participation in the conspiracy, I need not address it now.

[40] Nongshim argues the exact amount of damages at issue does not need to be resolved; those sales can simply be excluded from the case. Nongshim MSJ at 18 n.25.

As to overlap between NSA and NSK — to rebut plaintiffs' argument that NSK exercised some degree of control over its wholly-owned subsidiary NSA — Young Lee declares that at all times during the class period and since, NSA "was a wholly independently operated and managed entity: there is little overlap between the employees, managers, and offices of NSA and NSK," and there was no overlapping personnel between NSK and NSA "in charge of pricing decisions." Young Lee Decl. ¶¶ 12-13. Won Joon Lee declares that there was no overlap between personnel in NSK's domestic pricing and export pricing decision-makers. Won Joon Lee Decl. ¶ 8.

In response, plaintiffs rely heavily again on evidence that while the discrete individuals in charge "of pricing" at NSK and NSA did not overlap, there was concurrent overlap between directors and high-level managers of both organizations during the relevant timeframe and high—level employees worked for one company and then the other (in other words, were "seconded" to NSA from NSK) during the relevant timeframe. Haggard Decl. **[**70]** ¶¶ 56-60. The overlap of these directors and employees, according to plaintiffs, is evidence of the "control" NSK asserted over the prices that NSA charged, even for its U.S.-produced products. Haggard Decl. ¶¶ 53-55.

To show that NSK's domestic prices — allegedly inflated as a result of the conspiracy — played a role in the price of NSA U.S.-produced products, plaintiffs rely on an email exchange between Young Lee ("USA Resident Nongshim Co. Officer") and Krith Roth (at NSA), to the effect that because prices had been increased in Korea in March 2007, the prices at NSA would have to be increased "as soon as possible," Cho Decl., Ex. 74,. That document does not address whether the price increase would be for imported (Korean-produced) or U.S.-produced products. Plaintiffs also identify an October 2010 "Overseas Business Strategy Meeting," where NSA planned to "increase the prices of all imported products and the prices of all the products that are produced in America." *Id.*, Ex. 76. But that document does not indicate on what basis any of the prices are being increased (*e.g.*, because of direction from NSK or increase in Korean-domestic prices) and in 2010, as all parties agree, the conspiracy **[**71]** ended with a *decrease* in prices.

Plaintiffs then rely on one undated NSA price list allegedly showing that the prices NSA charged for U.S.-produced products were identical to the prices NSK charged for equivalent products in Korea. Cho Decl., Ex. 97. They also cite to deposition testimony from the director of NSA sales that products sold by NSA that were the same type, even if not the same flavor, and were priced similarly because they were the "same product" despite one being produced in the U.S. and the other being produced in Korea. Cho Decl., Ex. 9, Deposition Tr. Kim at 66:23-67:25. The Kim testimony is not clear or persuasive on the point of matched pricing between products imported from Korea and the U.S., but plaintiffs expert Mangum bolsters that point by testifying that it "made sense" for NSA to price U.S. and Korean imported product similarly, to keep the same "value **[*926]** proposition" between the products. Mangum Decl. [Dkt. No. 363-6] ¶ 131.[41] Finally, plaintiffs rely on evidence that the 2007 and 2008 price increases implemented by NSK for Korean domestic products were, mere months later, followed by price increases by NSA for *both* imported and U.S.-produced products. Mangum **[**72]** Decl. ¶ 47.[42]

Unlike the documentary evidence regarding NSK-produced product, the documentary evidence regarding the impact of the Korean-based conspiracy on U.S.-produced product is extremely thin.[43] Plaintiffs attempt to shore it

---

[41] *See* Mangum Decl. ¶ 131 ("That is, if NSK increases the price of cup Shin Ramyun, but NSA does not similarly begin selling bag Shin Ramyun at higher prices, the relative value proposition between these two products is muddled, which weakens the company's ability to price discriminate and attract different types of purchasers.").

[42] Plaintiffs also rely on an email from NSK to NSA that in light of "domestic" price increases there will increases in export products. Pls. Oppo. at 53; Cho Decl., Ex. 75. Yet Ex. 75 is characterized first by plaintiffs as a document explaining that Korean-export prices will be set off of "'domestic' (*i.e.*, Korean)" increased prices. Then plaintiffs attempt to redefine "domestic" as used in that document to mean U.S. manufactured product. *Compare* Pls. Oppo. at 40 *with id.* at 53. Plaintiffs cannot rely on the same document for two different propositions.

[43] Perhaps intentionally, plaintiffs do not separately identify the documentary evidence supporting their argument that NSA set the prices for U.S.-produced products with reference to NSK prices or under NSK control, and instead cite evidence generally for that proposition *and* the separate proposition that NSK influenced the price of the products NSA sold that were exported from Korea.

up with testimony from Mangum and, almost as an aside, argue that NSA employees gave "false" information to the U.S. market about the cause of the NSA price increases (blaming it on raw material costs) when plaintiffs' experts have shown (according to plaintiffs and based on disputes of fact) that rising costs do not adequately account for the price increases. Cho Decl., Ex. 8 Deposition Tr. of Krith Roth [Dkt. No. 566-2] 29:8-30:12 (stating that he provides customers with articles from the internet discussing cost increase for raw material); Ex. 9, Deposition Tr. of Sunny Kim [Dkt. No. 566-3], 45:23-46:21 (Kim would explain to customers generally that price increases were due to raw material cost increases). But, as with the documents, it is unclear how far this testimony extends and whether it was given to justify cost increases in imported (from Korea) products *as well as* U.S.-produced products.

In sum, other than the very weak documentary **[**73]** showing, the evidence regarding whether prices for the U.S.-produced products were impacted by the Korean-based conspiracy is the somewhat generalized chaebol argument as supported by the opinions of Haggard that NSK exercised control over the pricing decisions of NSA generally. There is also the testimony from Mangum that keeping prices of similar products the same (despite the fact one was imported from Korea and one was manufactured in the United States) makes sense and identifying price increases that were implemented by NSA for both the imported and U.S.-produced product.

Plaintiffs also seek to avoid the fact that the U.S.-produced product evidence is not fulsome by arguing that because NSK's conduct artificially raised prices across all markets for its products (including the United States), damages can still be recovered for those sales.[44] Plaintiffs rely on *In **[*927]** re Cathode Ray Tube (CRT) Antitrust Litig., 2016 U.S. Dist. LEXIS 189474, 2016 WL 6246736, at *1 (N.D. Cal., Oct. 26, 2016)*. There, the plaintiffs alleged a conspiracy to fix prices on "smaller-sized" cathode ray tubes but sought damages for products containing "larger-sized" CRTs, arguing that the conspiracy to fix the smaller CRTs distorted the price of the larger CRTs as well. This "price ladder" theory of recovery was allowed to proceed. Plaintiffs **[**74]** argue here that even if there is not sufficient evidence that NSA itself participated in the conspiracy, the U.S.-produced products should remain because their prices were matched off of and impacted by the Korean-price conspiracy, as shown by their experts' hedonic regression analyses.

C. Economic Analyses

Defendants argue that plaintiffs' experts' analyses showing that prices in the United States correlated with the increase prices imposed in Korea (allegedly inflated due to the conspiracy) is not sufficient in and of itself to show that the alleged conspiracy had an impact in the United States. Nongshim MSJ 34; Ottogi MSJ 22-23. Defendants point out that in the Ninth Circuit (in considering the *opposite* situation; whether a U.S.-based conspiracy could provide standing for claims arising overseas), the court cut out foreign injuries from the scope of a case under the FTAIA, because of insufficient evidence that "higher U.S. prices proximately caused its foreign injury of having to pay higher prices abroad. Other actors or forces may have affected the foreign prices." *In re Dynamic Random Access Memory Antitrust Litig. v. Micron Technology, Inc., 546 F.3d 981, 988 (9th Cir. 2008)*.

Defendants contend that prices in the United States, even if correlated, could have been caused by the increased costs **[**75]** of raw materials. I rejected the same argument in granting the motions for class certification, finding that the plaintiffs' experts had controlled for raw material price fluctuations in conducting their regression and correlation analyses. Dkt. No. 501 at 5. Defendants again argue that the correlation analyses by plaintiffs' experts were deficient. Nongshim MSJ at 34; Ottogi MSJ at 23. I found the admittedly limited correlation analyses performed by plaintiffs' experts generally sufficient at class certification. Dkt. No. 501 at 22-24.

Defendants also argue that plaintiffs' experts correlation analyses are faulty concerning the issue of impact in the United States because: (1) they fail to examine whether NSA and Ottogi America's prices were raised "in unison" to

---

[44] Plaintiffs, somewhat relatedly, oppose any grant of judgment as to NSA because NSA did not own the U.S. factory until 2009. They assert the factory was initially owned by a separate NSK subsidiary (Nongshim Foods, Inc.) and NSA didn't own any portion of the factory until Nongshim Foods and NSA merged in 2009. Cho Decl., Ex. 100, Deposition Transcript of Young Hoon Lee at 47:20-48:13. It is unclear how this cuts in favor or against plaintiffs. However, NSA remains in this case given the evidence, discussed above, that NSA played some role in passing on NSK-influenced conspiracy-inflated prices.

show an active conspiracy in the U.S.; and (2) in order to avoid data that would contradict their theories, plaintiffs' experts failed to include all of the necessary transactional data in their analyses by excluding Samyang's data that (when considered by defendants' expert Cox) confirmed there was no correlation between the price movements in the U.S. Defendants' Supplemental Citations [Dkt. No. 599].

Plaintiffs' experts say that they did not use the Samyang **[**76]** sales data in their regression models or in their confirmatory correlation analyses (despite the fact that Samyang was an alleged coconspirator) because of: (1) incomplete Samyang sales data from the benchmark period; (2) the "family relationship" between Samyang **[*928]** Korea and Samyang USA and the "potential implications for pricing"; (3) the existence of a "most-favored nation" clause in the exclusive agreement between Samyang Korea and Samyang USA; and (4) highly irregular and unexplained price series found in the Samyang sales data. Reply Declaration of Mangum [Dkt. No. 466-8] ¶ 150; *see also* Rebuttal Declaration of Daniel A. Ackerberg [Dkt. No. 473-2] at 25.[45] As plaintiffs point out, while Cox indicates that inclusion of the Samyang data shows no "correlation" as to price changes in the U.S., there is no evidence that Cox separately analyzed the Samyang data as part of his attempts to undermine plaintiffs' experts' regression analyses, which is what the plaintiffs' rely on to show impact of the conspiracy on prices in the United States.

Plaintiffs do not dispute that they did not conduct any correlation between NSA and Ottogi America's prices.[46] Instead, they argue that their experts' hedonic **[**77]** regression analyses (discussed extensively on class certification) are more robust and reliable than a correlation analysis of defendants' U.S. prices. *See* Declaration of Daniel A. Ackerberg [Dkt. No. 362-4] at 27[47]; Declaration of Russell W. Mangum [Dkt. No. 363-6] ¶ 18.[48]

Perhaps if plaintiffs had no affirmative evidence of a conspiracy (which as discussed above, there is), if they had no affirmative evidence that the prices of the products exported to the U.S. were influenced or based off of the Korean prices (which as discussed above, there is), if there was no evidence of control or input from Korea in the activities of the American subsidiaries (which as discussed above, there is), and if there was no evidence from plaintiffs' experts' regression models showing artificially high prices in the U.S. (which there is, even though the assumptions in those models provide ripe grounds for dispute), then the failure of plaintiffs' experts to conduct a correlation analysis between prices charged by NSA and Ottogi America might be more problematic. On this record, and for purposes of summary judgment, it is not.

D. Standing/Proximate Causation

Related to the argument that plaintiffs have failed **[**78]** to show impact of the alleged conspiracy in the U.S., Nongshim relies on the established proposition that an antitrust plaintiff must show her or his alleged injuries were proximately caused by defendants' conduct. Nongshim MSJ at 31-34. Nongshim cites the Ninth Circuit's decision in *In re DRAM* where (as noted above) the court concluded that it could **[*929]** not stretch liability for a price fixing conspiracy in the United States to injuries occurring outside the United States under the FTAIA. *In re DRAM, 546 F.3d at 988*. In reaching that conclusion, the court applied well-settled requirements for standing under antitrust

---

[45] In their Response to Plaintiffs' Sur-Reply, the Nongshim defendants argue that there was sufficient benchmark Samyang data for plaintiffs' experts to consider and cite a particular spreadsheet that was reviewed by Cox. Dkt. No. 607-1 at 10. However, there is no explanation in Cox's declaration or in Appendix C itself to substantiate that argument.

[46] Plaintiffs point out only that their experts found correlations between the Korean defendants' domestic prices and their subsidiaries' U.S. prices.

[47] "[T]here is statistical evidence of the collusive agreement resulting in higher prices in each of the six subperiods, controlling for demand and cost factors that might be changing over time. In summary, econometric tests of price fixing conduct using Defendants' sales data indicate that the collusive agreement caused higher prices across all (or most) product groups." *Id.*

[48] At class certification I recognized that the sufficiency of the experts' measures to control for raw material cost increases and the plaintiffs' experts' assumptions about the delays (and time periods used to show correlation) were contested by defendants' experts. Those disputes, however, should be presented to the jury and resolved at trial.

precedent and concluded that foreign plaintiffs had not shown that higher U.S. prices had proximately caused their injuries abroad. *Id.* The DRAM court concluded that evidence of the U.S.-based conspiracy plus evidence of price correlation between the markets at issue was insufficient to establish proximate cause. *Id. at 989*.

As further support for their argument that causation has not been shown here, Nongshim notes that in *Pierson v. Walmart.com USA LLC (In re: Online DVD Rental Antitrust Litig.), No. M 09-2029 PJH), 2011 U.S. Dist. LEXIS 49090, 2011 WL 1629663, at *1 (N.D. Cal., Apr. 29, 2011)*, the Hon. Phyllis Hamilton concluded that plaintiffs could not establish separate antitrust standing against non-conspirator Blockbuster even though Blockbuster **[**79]** and Netflix's movie rentals were in a closely connected market and Blockbuster matched Netflix's pricing following Netflix's alleged antitrust agreement with Walmart. Nongshim seeks to export that conclusion to the different posture here: arguing that even though NSK and NSA's markets are "linked," plaintiffs cannot rely on the fact that NSA matched its prices with any conspiracy-driven NSK prices to have standing against NSA. Under Nongshim's argument, simply because NSA linked its prices to NSK to some degree, without separate proof that NSA's prices were actually constrained by NSK (as opposed to simply voluntarily followed), NSA cannot be liable. Nongshim Mot. 33. However, as noted above with respect to products exported from Korea, plaintiffs have significant evidence showing direct impact and linkage between the pricing of domestic Korean product and Korean-produced exported product.[49] That there may have been minor differences (according to plaintiffs) between the products destined for the U.S. market and destined elsewhere does not, on this record, make the products so fundamentally different that the differences undermine plaintiffs' ability to sue over alleged impacts suffered **[**80]** in the U.S. market.

Nongshim's final argument is that the weaknesses in plaintiffs' theory of why NSA sales should be included are shown by plaintiffs' limitation of the class to sales from 2003 onward. Plaintiffs allege the Korean conspiracy, which NSK allegedly directed and intended to be carried out worldwide, started in 2001. Plaintiffs admit (as they must) that NSA did not raise its prices from 2001 through part of 2003, showing (according to defendants) the logical weakness in plaintiffs "all price increases in Korea were mandated and followed by price increases in the United States" theory. But plaintiffs' explanations for this — obviously disputed by defendants — are that NSA and Ottogi America were trying gain bigger footholds in the U.S. (and therefore kept U.S. prices lower for a period of time) and that there was lag in implementation of the conspiracy from Korea to the U.S. *See, e.g.*, Oppo. at 43.

The resolution of these issues rests on disputes of material fact. For example, a jury may well find it significant that U.S. prices did not increase prior to 2003 to **[*930]** discount plaintiffs' theories that a conspiracy existed and that the conspiracy impacted the U.S. market. Or it might not. **[**81]** These disputes preclude summary judgment.

V. STATE LAW CLAIMS

Defendants argue that because the Sherman Act claims fail, so too do the state law antitrust and unfair competition claims. However, as noted above, the Sherman Act claims survive summary judgment.

VI. DEFENDANTS' MOTION TO EXCLUDE HAGGARD DECLARATION

Separately, defendants move to exclude the declaration of Professor Stephan Haggard. Dkt. No. 581; Dkt. No. 584-2. Professor Haggard has been retained by plaintiffs to offer "testimony on the corporate structure and organizational features of Korean business groups known as *chaebol*, the corporate governance setting in which they operate, and to provide expert analysis and opinions with respect to whether and to what extent these factors

---

[49] As plaintiffs note, this case is closer to (albeit still significantly different from) the one presented in *In re Cathode Ray Tube (CRT) Antitrust Litig., 2016 U.S. Dist. LEXIS 189474, 2016 WL 6246736, at *1 (N.D. Cal., Oct. 26, 2016)*. There, the market linkage was based on allegations and corroborating evidence that a conspiracy to fix prices on "smaller-sized" cathode ray tubes impacted the prices charged by conspirators on "larger-sized" CRTs. This "price ladder" theory of recovery was allowed to proceed.

are germane to understanding the organization and operations of the Ottogi and Nongshim groups in particular." Declaration of Stephan Haggard [Dkt. No. 567-1] ¶ 8 (emphasis in original).

Defendants argue that Haggard's testimony: (1) lacks critical foundation to extrapolate academic literature about Korean chaebols to U.S. pricing decisions by Nongshim America and Ottogi America; (2) relies on irrelevant allegations that have nothing to do with how **[**82]** prices were set by these companies in the U.S.; and (3) crosses the line into impermissible legal opinion on Korean law and the strength of the parties' arguments. Plaintiffs oppose. Dkt. No. 593.

A. Legal Standard

Federal Rule of Evidence 702 allows a qualified expert to testify "in the form of an opinion or otherwise" where:

> (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue;
> (b) the testimony is based on sufficient facts or data;
> (c) the testimony is the product of reliable principles and methods; and
> (d) the expert has reliably applied the principles and methods to the facts of the case.
>
> *Fed. R. Evid. 702*.

Expert testimony is admissible under *Rule 702* if it is both relevant and reliable. *See Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 589, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. "[R]elevance means that the evidence will assist the trier of fact to understand or determine a fact in issue." *Cooper v. Brown, 510 F.3d 870, 942 (9th Cir. 2007)*; *see also Primiano v. Cook, 598 F.3d 558, 564 (9th Cir. 2010)* ("The requirement that the opinion testimony assist the trier of fact goes primarily to relevance.") (internal quotation marks omitted).

Under the reliability requirement, the expert testimony must "ha[ve] a reliable basis in the knowledge and experience of the relevant discipline." *Primiano, 598 F.3d at 565*. To ensure reliability, the court must "assess the [expert's] **[**83]** reasoning or methodology, using as appropriate such criteria as testability, publication in peer reviewed literature, and general acceptance." *Id. at 564*. These factors are "helpful, not definitive," and a court has discretion to decide how to test reliability "based on the particular circumstances of the particular case." *Id.* (internal quotation marks **[*931]** and footnotes omitted). "When evaluating specialized or technical expert opinion testimony, the relevant reliability concerns may focus upon personal knowledge or experience." *United States v. Sandoval-Mendoza, 472 F.3d 645, 655 (9th Cir. 2006)*.

The inquiry into the admissibility of expert testimony is "a flexible one" where "[s]haky but admissible evidence is to be attacked by cross examination, contrary evidence, and attention to the burden of proof, not exclusion." *Primiano, 598 F.3d at 564*. "When the methodology is sound, and the evidence relied upon sufficiently related to the case at hand, disputes about the degree of relevance or accuracy (above this minimum threshold) may go to the testimony's weight, but not its admissibility." *i4i Ltd. P'ship v. Microsoft Corp., 598 F.3d 831, 852 (Fed. Cir. 2010)*. The burden is on the proponent of the expert testimony to show, by a preponderance of the evidence, that the admissibility requirements are satisfied. *Lust by & Through Lust v. Merrell Dow Pharms., 89 F.3d 594, 598 (9th Cir. 1996)*; *see also Fed. R. Evid. 702* Advisory Cttee. Notes.

B. Reliability and [**84] Methodology

Defendants' first challenge to Haggard's testimony — regarding how pricing decisions were made by Nongshim American and Ottogi America and how those decisions were controlled and/or influenced by the parent Korean corporations — is that Haggard's methodology is unreliable. That is because (according to defendants) Haggard: (1) reviewed only documents on subjects selected by him (to support his theory) and found by his Korean-speaking assistant; (2) ignored deposition testimony that was contradictory to his opinions; (3) relied on several incorrect assumptions and guesses (about the setting and impact of "export prices" and the timeframes when the Korean parent and domestic subsidiaries had relatives employed); and (4) relied on counter-factual and *ipse dixit* assumptions (*e.g.*, assumed subsidiaries are "controlled" by the parent corporations).

However, as disclosed in his declaration, Haggard based his opinions on his extensive personal study of Korean chaebols and academic and business publications regarding the same as well as numerous documents produced in this case. Dkt. No. 567-1 ECF Pg. 49-51. That Haggard did not address (or review) deposition testimony where defendants' **[**85]** employees testified to matters that purportedly undermine some of his opinions or assumptions does not make his testimony excludable. Those are grounds for cross-examination.

As a separate reason to exclude Haggard's testimony, defendants contend that it is based on nothing more than impermissible national-origin based stereotypes; *i.e.*, that Korean employees and executives follow "deeply rooted" notions of hierarchy and have a culture of "obeisance to elders," implying that lower-level employees would lie under oath to protect the company. Defendants rely on *Jinro America Inc. v. Secure Investments, Inc., 266 F.3d 993 (9th Cir. 2001)*, where the Ninth Circuit concluded that the district court abused its discretion by admitting expert testimony "about Korean law and the business practices of Korean companies—particularly their alleged propensity to engage in fraudulent activity, including the avoidance of Korean currency laws." *Id. at 1001*. The Ninth Circuit concluded that the testimony at issue (given by a private investigator based in Korea) was not reliable because it was based on "impressionistic generalizations." *Id. at 1006*. The same cannot be said of Haggard, whose academic qualifications **[*932]** and reliance on extensive literature go unchallenged by defendants.

The Ninth Circuit **[**86]** also held the testimony was unduly prejudicial under *Rule 403* because it was so tinged with ethnic bias and stereotyping and "generalize[d] that most Korean businesses are corrupt, are not to be trusted and will engage in complicated business transactions to evade Korean currency laws" and that testimony was "tantamount to ethnic or cultural stereotyping, inviting the jury to assume the Korean litigant fits the stereotype." *Id. at 1007*. Reviewing the portions of the Haggard Declaration objected-to by defendants on this point — paragraphs 47, 69-72, Haggard Mot. at 9-10 —Haggard does not similarly use racial or ethnic stereotyping to generalize that Korean businesses are corrupt or willing to violate laws. In his own words, Haggard relies on the "cultural dimension" of Korean culture and corporate culture to support his conclusions that the "twin cultural dimensions of hierarchy and familism thus play an important role in supporting chaebol cohesion, hierarchy and centralized control across all of the chaebol subsidiaries." *Id.* ¶ 71.

Haggard does not, contrary to defendants' characterization, accuse lower-level employees of being so obedient that they would lie. While Haggard does state that "it would not be surprising **[**87]** that lower level managers would deny participating in price-fixing, or any other managerial decision-making," he explains that is because "[i]t is likely that they would conceive of their task as simply gathering information and passing it up the chain of command for the top management — usually family leadership — to make." Haggard Decl. ¶ 69. His testimony here is similar to that which he gave in *Electrograph Sys. v. Hitachi, Ltd. (In re Cathode Ray Tube (CRT) Antitrust Litig.), 2017 U.S. Dist. LEXIS 65917, 2017 WL 2616916 (N.D. Cal., Apr. 5, 2017)*, where his testimony was admitted to provide background on chaebols and "some of the mechanisms that chaebol use to control intra-group corporate entities" because intragroup corporate control was directly at issue. *2017 U.S. Dist. LEXIS 65917, [WL] at *1*.

However, plaintiffs should be careful when eliciting testimony on Korean business "culture" from Haggard at trial. Attempts to suggest that Korean corporate culture tolerates or encourages illegal activity (on behalf of its executives or lower-level employees) will not be permitted.

C. Materiality

Relatedly, defendants argue that paragraphs 61-62 of the Haggard Declaration discussing procurement of raw materials, must be excluded because Haggard makes clear that he was taking no position on the effect of raw material prices on pricing decisions. Those paragraphs comment on evidence **[**88]** of the interconnectedness of the Nongshim-related firms and the connection in decision-making between NSK and NSA. These paragraphs are material.

Defendants also object to paragraphs 55-56 and 66-68 because those paragraphs suggest only that chaebols use a top-down, market-free approach to pricing but are not connected to any specific evidence regarding the defendants here, and his opinions about overlapping appointments (between Korean parent and subsidiary companies) and secondments of employees uninvolved in pricing are irrelevant when this case is about pricing. However, these paragraphs too are material to his testimony.

Finally defendants criticize Haggard's opinions about the form, organization, and characteristics of NSA and Ottogi America as "besides the point" when under U.S. law parent corporations and subsidiaries are presumed to operate independently. However, the "piercing the corporate veil" cases cited by defendants go to a different issue and one that does not make immaterial Haggard's points. While Haggard does opine on generalizations regarding chaebols, **[*933]** he then reviews specifics regarding the defendants to support the relevance of those generalizations to this case. **[**89]**

D. Inadmissible Legal Conclusions

Finally, defendants object that Haggard crosses the line into impermissible legal conclusions in paragraphs 25 and 34 when discussing the strength of Korean corporate-governance laws and the scope of a 2015 law. The discrete references to Korean law, however, are not material legal conclusions or outside the scope of Haggard's expertise.

Objections are also made to paragraphs 50 and 63-64 as impermissible legal conclusions about U.S. law. Haggard's characterizations of the claims made in defendants' summary judgment motions are not impermissible legal conclusions (nor are they particularly helpful). He is simply articulating his opinion on why some of the arguments made by defendants are not persuasive. He is not impermissibly opining on ultimate legal questions and will not be able to do so at trial if he attempts it.

The motion to exclude Haggard's testimony is DENIED.

VII. EVIDENTIARY OBJECTIONS

A. Defendants' Objections

Defendants object to numerous pieces of evidence that plaintiffs rely on in support of their Opposition. *See generally* Nongshim Evid. Objs. [Dkt. No. 584]; Ottogi Evid. Objs. [Dkt. No. 585-5]. I will not rule on every objection made in **[**90]** the over 200 pages of objections submitted by defendants, but will address objections to the evidence I have relied on above and explain my rulings on certain categorical objections below.[50]

1. Co-Conspirators and Hearsay

---

[50] Defendants reiterate (to preserve) and make additional objections to the declarations of plaintiffs' experts Dr. Russell Mangum III and Danial A. Ackerberg, that were submitted by plaintiffs in support of their motions for class certification. Ottogi Evid. Obj. [Dkt. No. 585-5] 3-6. In my prior Order, I addressed defendants' apposite and timely raised objections to these experts' declarations. *See generally* Class Certification Order [Dkt. No. 501]. I will not reconsider the same objections, or new objections that should have been raised before, in conjunction with the motions for summary judgment. Defendants' objections to plaintiffs' experts are OVERRULED. Similarly, defendants object to plaintiffs' reliance on evidence they submitted in conjunction with plaintiffs' motions for sanctions. Ottogi Evid. Obj. 6-7. The fact that these materials were not resubmitted in connection with the motions for summary judgment is not a problem and defendants' objections to those materials on this basis is OVERRULED.

Defendants also make repeated objections to documentary and declaration evidence as lacking in personal knowledge, incomplete, and unreliable. Those objections are OVERRULED. Holes in the documentary or declaration evidence can be exposed and challenged at trial.

Defendants assert that numerous documents relied on by plaintiffs, including all of the Samyang Hard Drive (SHD) documents (discussed below) and the statements by Samyang's Kim and Ahn, contain inadmissible hearsay. *See* Nongshim Evid. Objs. 3-10; Ottogi Evid. Objs. 11-13. Plaintiffs respond, generally, that statements from Samyang are admissible under *Fed. R. Evid. 801(d)(2)(E)*, as co-conspirator statements when offered against Nongshim and Ottogi.

Defendants' main argument against the applicability of the co-conspirator hearsay exception is that plaintiffs cannot rely it because they have failed to show other proof (*i.e.*, proof besides the alleged co-conspirator statements) that substantiates the existence of a conspiracy. *See* Nongshim Evid. Objs. 4-10; Ottogi Evid. Objs. 11-12; *see also In re Coordinated **[*934]** Pretrial Proceedings in Petroleum Products Antitrust Litigation, 906 F.2d 432, 459 (9th Cir. 1990)* (recognizing that the offering party must present "some evidence" aside from the "proffered co-conspirator's statements" to show the non-offering party knowingly participated in the alleged conspiracy). **[**91]** However, as recognized above, the evidence of the conspiracy is not derived solely from the objected-to Samyang documents and statements, but also defendants' own conduct and the economic analyses provided by the experts.[51] The documents allegedly exchanged between the conspirators and the statements regarding the same are admissible at this juncture because a basic showing has been made that "the declarants were all employees acting within the scope of their employment, the evidence that their employer participated in the conspiracy is strong independent evidence of their own participation." *United States v. AU Optronics Corp., 2012 U.S. Dist. LEXIS 3967, 2012 WL 12036080, at *2 (N.D. Cal., Jan. 11, 2012)*.

2. Samyang Hard Drive and Vaughn Declaration

Defendants challenge the admissibility of any of the Samyang Hard drive (SHD) documents. Ottogi Evid. Obj. 7-9; Nongshim Evid. Obj. Nos.94-96, 98, 100, 103, 106, 108, 111, 112, 113, 116, 117, 120-123. The hard drive was, during the KFTC leniency petition phase, kept by an auditor at Samyang (who admitted deleting pornographic and foreign movie files to keep the storage device from failing) and then by Samyang's attorneys. Yu Decl., Ex. 7, Deposition Transcript of Sung Chul Yoon [Dkt. No. 547-7] at 17, 23-27.

Defendants' primary argument (aside from **[**92]** hearsay, addressed above) is that plaintiffs cannot authenticate any of the documents contained on the SHD, or show that any of the documents originated with Nongshim and Ottogi. Generally, the proponent of evidence need "only make a prima facie showing of authenticity 'so that a reasonable juror could find in favor of authenticity or identification.' [] Once the prima facie case for authenticity is met, the probative value of the evidence is a matter for the jury." *United States v. Workinger, 90 F.3d 1409, 1415 (9th Cir. 1996)* (quoting *United States v. Chu Kong Yin, 935 F.2d 990, 996 (9th Cir.1991))*; *see also Norse v. City of Santa Cruz, 629 F.3d 966, 973 (9th Cir. 2010)* ("[w]hile the evidence presented at the summary judgment stage does not yet need to be in a form that would be admissible at trial, the proponent must set out facts that it will be able to prove through admissible evidence.").

Plaintiffs rely primarily on their expert — James Vaughn [Dkt. No. 567-2] — who points out that for a number of the documents at issue, the document metadata indicates that they were authored or last edited by Nongshim or Ottogi employees (as well as the dates the documents were allegedly created or edited by those employees.). Vaughn Decl. ¶¶ 4-16.[52] Nongshim's expert, Rubin, argues that nothing can be assumed from this "document **[*935]** level" metadata because the "author" and "last author" **[**93]** metadata can be manipulated by the person creating the

---

[51] Of course, defendants have different reads on the import or significance of the non-Samyang evidence of conspiracy plaintiffs rely on. *See* Nongshim Evid. Objs. at 7-10

[52] Vaughn's declaration and explanations as to document creation information undermine Nongshim's argument that because the documents at issue may have been "saved" to the Samyang HD in 2009, they were not "created" at or near the time of the conspiratorial events and, therefore, cannot fall within the business records hearsay exception. Plaintiffs' testimony from Jeong Eun Park and Jong Moon Yui explain how (and why) the records were kept in the form in which they were kept as part of a regularly conducted business practice by Samyang.

document. Rubin Decl. ¶¶ 18-19. Rubin does not address that the "author" and "last author" document-level metadata is created at the same time the document is created and, therefore, whoever purported to create these documents would have had to know the individuals in 2005, 2006, 2007, and 2008 to attribute them to Nongshim and Ottogi employees; *i.e.*, prior to Samyang becoming a leniency petitioner with the KFTC and prior to the KFTC investigation.

Relatedly, Rubin argues that none of the SHD documents that plaintiffs purport to be emails are "authentic emails," because while "native emails" typically contain embedded metadata (IP addresses and dates) that can help establish their authenticity, none of the "emails" on the SHD have that sort of metadata. Rubin Decl. ¶¶ 22, 24. Similarly, Ottogi's contractor at Deloitte Korea testified that the SHD contains no emails because none of the file extensions on the SHD documents purporting to be emails contain any typical email extensions. Declaration of Tae Hoon Yeo [Dkt. No. 548-6] ¶ 5.

Plaintiffs characterize defendants' objections as objections to the way emails were captured and stored **[**94]** on the SHD, issues that go to the weight of the evidence, not their admissibility. Oppo. 33 n. 49. They also point to Samyang employee Jong Moon Yui's testimony that he recognized some "screen captures" in the SHD production as ones he made of emails on orders from superiors, although he had trouble recollecting which screen shots he might have taken himself. Yu Decl., Ex. 36 [Dkt. No. 547-40], Witness Examination of Jong Moon Yui at 17, 49 — 52. And they show how various documents found on the SHD and allegedly authored by Nongshim or Ottogi match documents produced by Nongshim and Ottogi in this litigation, supporting the testimony from Samyang's witnesses that the SHD contained documents and information received from its competitors. Oppo. 29 (comparing Cho Decl., Ex. 34 [NSK0001383] with Cho Decl., Ex. 47 [SHD00002538]).

Defendants' motion is DENIED with respect to the SHD documents plaintiffs rely on in these motions. Plaintiffs have brought forth sufficient testimony about the creation and maintenance of the SHD and explanations about why some of the "emails" were captured in the way they were (without native metadata).[53]

Relatedly but separately, Ottogi objects to the Vaughn Declaration on the grounds of relevance (generally **[**95]** and to Ottogi specifically), reliability, and speculation. Ottogi Evid. Obj. [Dkt. No. 585-5] 1-3. Nongshim also objects to portions of the Vaughn Declaration on the basis of relevance, improper expert testimony, and improper opinion testimony. Nongshim Evid. Obj., Appendix A [Dkt. No. 584-1], Nos. 165-168. Defendants' objections are OVERRULED. The strength of Vaughn's opinions that documents on the SHD were either authored by employees of Nongshim or Ottogi or represent "emails" can be tested on cross-examination.

As a separate challenge to the SHD documents (in addition to hearsay and lack of authentication), Nongshim argues that documents from the SHD violate the "rule of completeness" encompassed by *Federal Rule of Evidence 106* and the Best Evidence Rule of *Rule 1002*, *1003*. Nongshim **[*936]** Evid. Obj. 22-26. Nongshim admits its *Rule 106* argument is not the typical rule of completeness argument (seeking introduction of *additional* testimony to cure any incomplete statements), but argues that allowing plaintiffs to present "cut and pasted" emails from the SHD which on their face are incomplete violates the purpose of the rule, to prevent taking statements out of context or making misrepresentations to the jury. Absent apposite case law, **[**96]** these SHD documents (purported emails or others) will not be excluded under *Rule 106*. Defendants may, of course, attack plaintiffs' (and their experts') characterization of the documents as emails. The Best Evidence Rule hinges on well-founded challenges to the authenticity of documents, which I address below.

3. Authentication

In addition to the challenged to the SHD documents, Nongshim challenges the authentication of a number of documents that were produced from their or from Ottogi's own files. *See, e.g.*, Nongshim Evid. Objs. 33, 35. To the

[53] Authenticity objections regarding *specific* SHD documents that plaintiff intend to rely on at trial that have unique characteristics that raise questions about their authenticity may be challenged pretrial after the parties have identified their proposed exhibits.

extent the documents were produced by Nongshim or Ottogi in discovery in this action, and are offered by plaintiffs, their authenticity is established for purposes of these motions. *See, e.g., Orr v. Bank of America, NT &SA, 285 F.3d 764, 777 n.20 (9th Cir. 2002)* (recognizing case law holding that documents produced by a party in discovery were deemed authentic when offered by a party opponent).

4. Hearsay

In addition to the hearsay objections address above, defendants also object separately to plaintiffs' submission of newspaper articles, particularly those attached as Exhibits 11, 29, 90 and 94 to the Cho Declaration. Nongshim Evid. Objs. 26-30; Ottogi Evid. Objs. 12. Defendants object to plaintiffs' attempt to rely on **[**97]** any of the articles for the truth of the matters asserted (as any statements in the articles by defendants would constitute double hearsay), only one of the many reporters for the many different articles has been made available to testify, three of the four articles have not been authenticated as business records, and for the one article authenticated by a reporter (Jae Hee Lee), the reporter did not provide sufficient foundation for how she recorded the defendants' statements.

As to at least one level of hearsay (the statements by the defendants, as opposed to the publication of them in a newspaper and the accuracy of how they were reported), plaintiffs point out that the statements by defendants fall within the co-conspirator hearsay exception, as offered against defendants and made to further the conspiracy. Plaintiffs' Responses to Evidentiary Objections [Dkt. No. 591-1], *see, e,g.*, Response to Nongshim No. 37. As to the second level of hearsay, plaintiffs point out that defendants have not disputed the accuracy of the reporters' characterization of the statements. Plaintiffs also do not rely on the defendants' alleged admissions in the articles for the truth of the matters asserted **[**98]** (for example that costs were in fact raised due to raw material cost increases). Instead, they rely on those statements to show that defendants were making public statements that other evidence will demonstrate were pre-textual, to hide or cover up their conspiracy. *See, e.g.*, Plaintiffs' Responses to Evidentiary Objections [Dkt. No. 591-1], Nongshim Nos. 37, 154. And finally, at least with respect to the articles authored by Jae Hae Lee, the defendants who were questioned about the statements included by Ms. Lee in her articles did not deny their accuracy. At this juncture, plaintiffs can rely on the newspaper articles for the limited purpose of showing defendants' steps to conceal the alleged conspiracy.

[*937] B. Plaintiffs' Objections

Plaintiffs' objections to the evidence relied on by defendants are much more limited. Plaintiffs object and move to exclude Ottogi's declarations from Young Joon Ham and Shin Gook Kang, as well as the witness examination protocol from Guen Ho Choi, because (1) these individuals were not disclosed as potential witnesses on defendants' initial disclosures or in any supplement thereto and (2) plaintiffs' requests to include these individuals as custodians were **[**99]** rejected. Dkt. No. 564 at 1. Plaintiffs separately move to strike the Choi examination as hearsay when offered by defendants. Ottogi responds that they did not need to disclose these individuals because their testimony is solely for impeachment and any failure to disclose was harmless. Ottogi Opp. To Strike [Dkt. No. 582].

1. Legal Standard

Rule 26(a) requires a party to provide "the name . . . of each individual likely to have discoverable information . . . that the party may use to support its claims or defenses . . . ." *Rule 37(c)(1)* provides that "[if] a party fails to provide information or identify a witness as required by *Rule 26(a)* or *(e)*, the party is not allowed to use that information or witness to supply evidence on a motion, at a hearing, or at trial, unless the failure was substantially justified or is harmless." Courts have applied this sanction even when a litigant's entire cause of action or defense has been precluded and courts have wide latitude to exclude even in absence of bad faith or willfulness. *Yeti by Molly, Ltd. v. Deckers Outdoor Corp., 259 F.3d 1101, 1106 (9th Cir. 2001)*.

Under *Rule 37(c)(1)*, the party whose evidence may be excluded has the burden of proving that its failure to disclose was substantially justified or is harmless. *R & R Sails, Inc. v. Ins. Co. of Pennsylvania, 673 F.3d 1240, 1246 (9th Cir. 2012)*. "The determination of whether a failure to disclose **[**100]** is justified or harmless is entrusted to the broad discretion of the district court." *San Francisco Bay Area Rapid Transit Dist. v. Spencer, No. 04-04632-SI, 2007 U.S. Dist. LEXIS 11693, 2007 WL 421336, at *4 (N.D. Cal. Feb. 5, 2007)*. Nondisclosure is harmless if it does not prejudice the other party. *Yeti, 259 F.3d at 1106*. In assessing harmlessness, I may consider a number of factors, including "(1) the surprise to the party against whom the evidence would be offered; (2) the ability of that party to cure the surprise; (3) the extent to which allowing the evidence would disrupt the trial; (4) the importance of the evidence; and (5) the nondisclosing party's explanation for its failure to disclose the evidence." *Unionamerica Ins. Co. v. Fort Miller Group, Inc., No. 05-01912-BZ, 2009 U.S. Dist. LEXIS 12332, 2009 WL 275104, at *1 (N.D. Cal. Feb. 4, 2009)*.

2. Ham and Kang

Young Joon Ham is a current member of Ottogi Korea's board of directors and from March 2000 through March 2010 was one of two Ottogi Korea CEOs. Declaration of Young Joon Ham [Dkt. No. 548-5], ¶ 1. Shin Gook Kang was the other CEO, who served alongside Young Joon Ham from March 2000 through March 2008. Declaration of Shin Good Kang [Dkt. No. 548-7] ¶ 1. The declarations of the two former executives are submitted to dispute plaintiffs' position that a "Representative's Meeting" occurred in **[**101]** 2000 or 2001, as well as to dispute the existence of any price fixing agreement. Ham and Kang each testify that neither of them attended a meeting with other ramen company executives in 2000 or 2001, neither of them met Don Jong Choi from Samyang, and neither of **[*938]** them entered into a price fixing agreement or authorized any employee to do so.

Plaintiffs move to exclude the declarations from Ham and Kang because they were not disclosed as witnesses by Ottogi and were not included as custodians based on Ottogi's misrepresentations or destruction of evidence. Declaration of Stephanie Cho in Support of Motion To Exclude [Dkt. No. 564-1] ¶ 2, Ex. 1. Plaintiffs knew of these individuals' existence and roles at Ottogi and sought to include them as "custodians" whose files would be searched. Ham's files, however, were not included because Ottogi represented that Ham had no relevant information or documents (the truth of which is now belied by Ham's declaration). Cho Decl. to Exclude, ¶ 4, Ex. 2. With respect to Kang, Ottogi responded that he had left Ottogi and "no documents" existed. *Id.* ¶¶ 4-5. In light of these representations and Ottogi's failure to identify these two in their disclosures, **[**102]** plaintiffs did not pursue discovery (documents or depositions) from them. Plaintiffs' Mot. to Exclude 5. Plaintiffs argue that given Ottogi's now-central reliance on this testimony — in an attempt to undermine the Samyang executives' statements — inclusion of this untested testimony prejudices them and should be excluded.

Ottogi responds, first, that they did not need to disclose Ham and Kang under *Rule 26(a)* because their testimony is merely impeachment evidence, introduced to show that the Samyang executives' testimony was wrong. Ottogi Opp. to Strike at 1-2. This argument is not well taken. The testimony at issue goes to the heart of Ottogi's defense (no conspiracy) and includes factual assertions that go far *beyond* the Samyang executives' testimony. *See, e.g.*, Ham Decl. ¶ 3 & Kang Decl. ¶ 3 (discussing when they first heard of the alleged 2000 or 2001 meeting, what they did with respect to the KFTC questionnaire, what they did in response to the KFTC investigation, and whether they personally authorized any collusive agreement).

Ottogi also argues that the non-disclosure of these two individuals was substantially justified and harmless because these individuals, and their roles at Ottogi, were made known to plaintiffs **[**103]** during discovery by (1) interrogatory responses identifying them as Ottogi executives, (2) in the KFTC Report (released in 2015), and (3) disclosed in Ottogi's response to the KFTC (that was produced in discovery).[54] These disclosures, however, did not

---

[54] Ottogi argues that Ham and Kang were identified in deposition testimony by other witnesses, but the three instances Ottogi relies on simply identified Ham as a relative of a deponent (ECF 437-7 at 54:9-17), mention Kang and Ham in passing as executives involved in approving price increases (Yu Decl., Ex. B), and identified that another deponent confirmed that Kang had no knowledge of a meeting in 2000 - 2001. Yu Decl., Ex. C.

indicate that Ham and Kang had access to the specific information now disclosed in their declarations filed in support of Ottogi's motion for summary judgment.

Ottogi's failure to disclose Kang and Ham as witnesses and its rejection of plaintiffs' request to include them as custodians precludes it from calling them as witnesses on such a central part of this case. Their testimony is STRUCK.

3. Choi

Plaintiffs also move to exclude the Witness Examination Protocol of Geun Ho Choi [Dkt. No. 549-35], another former Ottogi executive who claims he attended the 2001 RTOA meeting but did not discuss pricing there. Ottogi relies on this testimony to contradict the Samyang executives' testimony that pricing was discussed at that conference. Plaintiffs object **[*939]** to this testimony as inadmissible hearsay. They also note that Choi was not disclosed as a witness in Ottogi's initial disclosures and when plaintiffs attempted to identify him as a custodian, **[**104]** plaintiffs were told by Ottogi that he had likewise left the company and had no documents. *See* Cho Decl. to Exclude ¶¶ 4, 5.[55]

As with respect to Ham and Kang, Ottogi argues that Choi's testimony was submitted to rebut plaintiffs' claim that prices were discussed at the 2001 Ramen Conference. The Choi testimony was filed with but not cited in Ottogi's opening brief, which disputed plaintiffs' evidence regarding the "confirmation" of the price fixing agreement at the 2001 RTOA meeting. Choi's testimony was only cited in Ottogi's Reply. Dkt. No. 585 at 3 n.3. As to substantial justification and harmlessness, Ottogi argues that Choi's existence and knowledge were adequately disclosed in the KFTC Report (disclosing that Choi was Ottogi's representative at the 2001 RTOA meeting), and his position and leave date were disclosed in interrogatory responses. Ottogi Opp. to Strike 2-3.

Ottogi knew that plaintiffs' theory was that the price fixing agreement was confirmed at the 2001 RTOA meeting, yet failed to disclose as a witness their representative at that conference on whom they now rely. This testimony is not simply rebuttal, but central to a point in dispute between the parties. **[**105]** Ottogi's failure to disclose Choi as a person with information that would be used to support Ottogi's defense of this action was neither substantially justified nor harmless. Choi's testimony (as contained in the Witness Examination Protocol) is STRUCK.[56]

CONCLUSION

Defendants' motions for summary judgment are DENIED. Defendants' motion to exclude the Haggard testimony is DENIED. Plaintiffs' motions to strike the testimony of Ham, Kang and Choi are GRANTED.

IT IS SO ORDERED.

Dated: December 28, 2017

/s/ William H. Orrick

---

[55] The hearsay objection is not well-taken to the extent of Choi's recollection that prices were not discussed at the 2001 RTOA meeting because the Witness Examination Protocol of Choi is sworn and given under penalty of perjury. *See, e.g., Gulf USA Corp. v. Federal Ins. Co., 259 F.3d 1049, 1056 (9th Cir. 2001)* (finding that "sworn deposition testimony" from another matter may be used on summary judgment as an affidavit pursuant to *Federal Rule of Civil Procedure 56(c)*).

[56] In Reply, plaintiffs note another new Ottogi witness that was not disclosed but is relied upon by Ottogi in its Reply; Kyung Ho Yoo [Dkt. No. 585-4]. Plaintiffs' Mot. Exclude Reply at 4 n.2. Because plaintiffs do not present the same evidentiary showing as to Yoo that they did with respect to Ham, Kang and Choi, I will not strike evidence from Yoo at this time, but plaintiffs may raise this issue again in a motion *in limine* prior to trial.

William H. Orrick

United States District Judge

Judges: Nathaniel M. Gorton, United States District Judge.

Opinion by: Nathaniel M. Gorton

Opinion

[*268] MEMORANDUM & [18] ORDER**

GORTON, J.

This case involves seven consolidated actions by various taxi medallion holders in the Greater Boston area ("plaintiffs") who allege that Uber Technologies, Inc. ("Uber" or "defendant") and two of its founders, Travis Kalanick and Garrett Camp (the "individual defendants") competed unlawfully in the on-demand, ride-hail ground transportation market in and around Boston, Massachusetts. Plaintiffs in all seven actions allege that Uber competed unfairly in violation of the common law and the *Massachusetts Consumer Protection Act*. Certain plaintiffs also allege that Uber violated state and federal ***antitrust law***, interfered with advantageous business relationships, engaged in a civil conspiracy and aided and abetted unfair competition.

Before the Court are 1) a motion to dismiss of individual defendants Travis Kalanick and Garrett Camp (Docket No. 70) and 2) defendants' consolidated motion to dismiss plaintiffs' complaints (Docket No. 72).

I. Background

The City of Boston has traditionally regulated taxis under a set of municipal rules, ordinances and regulations collectively **[*269]** known as "Taxi Rules". The Police Commissioner for the City of Boston ("the Commissioner") is authorized **[**19]** by statute to regulate all vehicles that fall under those rules. Boston Police Department Rule 403 ("Rule 403") requires that

> [i]n the City of Boston, no person, firm, or corporation driving or having charge of a taxicab or other private vehicle shall offer the vehicle for hire for the purpose of transporting, soliciting and/or picking up a passenger or passengers unless said person is licensed as a hackney driver and said vehicle is licensed as a hackney carriage by the Police Commissioner.

City of Boston Code 16-15.05: Vehicle for Hire Ordinance (Appendix I to Rule 403).

Rule 403 applies to all vehicles "used or designed to be used for the conveyance of persons for hire from place to place" within the city of Boston.[1] The Taxi Rules impose certain regulations on taxi cabs, such as requiring possession of a taxi medallion, maintaining a properly equipped taxicab and belonging to an approved dispatch service or radio association.

Uber entered the Boston market for private transportation services in 2011 and launched its UberX service in 2013. The company provides a digital tool for requesting private vehicles-for-hire by users who download Uber's free "smart phone application" ("the Uber app"). Users who open the Uber **[**20]** app on their mobile phones are shown a map of their location or designated pick-up point and the available Uber-affiliated vehicles in that vicinity.

In August, 2016, Massachusetts enacted the *Transportation Network Companies Act* ("the TNC Act"). See M.G.L. c. 159A 1/2. The statute defines a TNC as an "entity that uses a digital network to connect riders to drivers to pre-arrange and provide transportation." *M.G.L. c. 159A 1/2 § 1*. The law preempts municipalities from regulating TNCs through local Taxi Rules. *M.G.L. c. 159A 1/2 § 10* ("[N]o municipality or other local or state entity, . . . may subject a [TNC]" to requirements besides the Massachusetts Department of Public Utilities and the Massachusetts Port Authority.).

In the "Taxi Maintenance" action plaintiffs assert claims against Travis Kalanick, Uber's co-founder and former CEO, and Garrett Camp, an Uber co-founder and a current director. The complaint names both individuals as defendants.

The present litigation involves seven different groups of plaintiffs that represent over 700 holders of taxi medallions in the Greater Boston area. The various complaints were filed in this district between December, 2016, and April, 2017. The Court consolidated the cases pursuant to *Fed. R. Civ. P. 42(a)(2)* on October 5, 2017. **[**21]** On November 13, 2017, this Court entered an order explaining in detail how the cases were to proceed consistent with judicial economy and due process for all parties.

Before the Court are two omnibus motions to dismiss filed by defendants: one with respect to Uber and the other with respect to the individual defendants.

II. Analysis

A. The Motion to Dismiss of Defendants Travis Kalanick and Garrett Camp

[1] Plaintiffs note that Taxi Rules vary among municipalities but do not identify any specific differences.

Only the Taxi Maintenance plaintiffs pursue a claim against the individual defendants. Accordingly, defendants' motion to dismiss is directed only at the Taxi **[*270]** Maintenance Corrected Amended Complaint.

Personal Jurisdiction

On a motion to dismiss for want of personal jurisdiction, plaintiff bears the burden of showing that the Court has authority to exercise jurisdiction over defendants. See *Mass. Sch. of Law at Andover, Inc. v. ABA, 142 F.3d 26, 33-34 (1st Cir. 1998)*. The Court must take facts alleged by plaintiff as true and construe disputed facts favorably toward plaintiff. See *Ticketmaster-New York, Inc. v. Alioto, 26 F.3d 201, 203 (1st Cir. 1994)*.

In a diversity suit, this Court acts as "the functional equivalent of a state court sitting in the forum state." See *Astro-Med, Inc. v. Nihon Kohden America, Inc., 591 F.3d 1, 8 (1st Cir. 2009)*. As such, this Court must determine whether (1) jurisdiction is permitted by the Massachusetts long-arm statute and (2) the exercise of jurisdiction coheres with the *Due Process Clause of the United States Constitution*. Id. **[**22]**

The Massachusetts long-arm statute, *M.G.L. c. 223A, § 3*, extends jurisdiction to the limits of the United States Constitution. See *Tatro v. Manor Care, Inc., 416 Mass. 763, 771, 625 N.E.2d 549 (1994)*. Accordingly, this Court need not further consider the statute's applicability and may proceed to the due process question. See *Daynard v. Ness, Motley, Loadholt, Richardson & Poole, P.A., 290 F.3d 42, 52 (1st Cir. 2002)*.

Due process demands a showing of general or specific personal jurisdiction by plaintiff. See *Negron-Torres v. Verizon Commc'n, Inc., 478 F.3d 19, 24 (1st Cir. 2007)*. Plaintiffs must demonstrate that defendants have made sufficient contacts with the forum state to justify the exercise of that jurisdiction. Id.

1. General Jurisdiction

This Court may assert general jurisdiction over a defendant who maintains continuous and systematic activity in the forum state. See *United Elec., Radio and Mach. Workers of Am. v. 163 Pleasant St., 960 F.2d 1080, 1088 (1st Cir. 1992)*. General jurisdiction is only appropriate where the defendant's activity renders him "essentially at home in the forum state". *Goodyear Dunlop Tires Operations, S.A. v. Brown, 564 U.S. 915, 919, 131 S. Ct. 2846, 180 L. Ed. 2d 796 (2011)*.

The Taxi Maintenance complaint states, in conclusory fashion, that the individual defendants are subject to general personal jurisdiction within the Commonwealth of Massachusetts by "regularly engaging in persistent courses of conduct in the Commonwealth of Massachusetts" through the Uber ride-hailing service. Plaintiffs fail, however, to allege specific facts demonstrating that the individual defendants, as opposed to the corporate **[**23]** defendant with which they are associated, should be considered "at home" in Massachusetts. See id. The plaintiffs' threadbare statement is insufficient to establish this Court's general jurisdiction.

2. Specific Jurisdiction

The *Due Process Clause of the Fourteenth Amendment* requires that a defendant have "minimum contacts" with the forum state such that the "maintenance of the suit does not offend traditional notions of fair play and substantial justice." *Int'l Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945)*. The plaintiff must allege that (1) the claim underlying the litigation arises directly out of, or relates to the defendant's forum-state activities, (2) the defendant's in-state contacts represent a purposeful availment of the privilege of **[*271]** conducting activities in the forum state and (3) the exercise of jurisdiction is reasonable. *Sawtelle v. Farrell, 70 F.3d 1381, 1389 (1st Cir. 1995)* (citing *United Electrical Workers v. 163 Pleasant St. Corp., 960 F.2d 1080, 1089 (1st Cir. 1992))*.

"The relatedness requirement focuses on the nexus between the defendant's contacts and the plaintiff's cause of action." *Nowak v. Tak How Investments, Ltd., 94 F.3d 708, 714 (1st Cir. 1996)* (citing *Ticketmaster-New York, Inc. v. Alioto, 26 F.3d 201, 206 (1st Cir. 1994))* (internal quotation omitted). Personal jurisdiction over an employee does not follow from the fact jurisdiction over the employer exists. *Keeton v. Hustler Magazine, Inc., 465 U.S. 770, 781 n. 13, 104 S. Ct. 1473, 79 L. Ed. 2d 790 (1984)*. Instead, there must be "an independent basis for jurisdiction based on an individual's actions." *Rissman Hendricks & Oliverio, LLP v. MIV Therapeutics Inc., 901 F. Supp. 2d 255, 263 (D. Mass. 2012)* (citations omitted).

Plaintiffs fail to allege facts that demonstrate a nexus **[**24]** between the individual defendants' contacts and the plaintiff's cause of action.

No specific facts with regard to Camp are alleged beyond the claim that he founded (and is a director of) Uber and that he resides in California. Plaintiffs attempt to attribute the acts of Uber to Camp through principles of agency law. They fail to allege, however, a single fact indicating that Camp made decisions about Uber's operations in Massachusetts or even traveled to the Commonwealth. Accordingly, plaintiffs have failed to allege that this Court has specific personal jurisdiction over Garrett Camp. Cf. *Galletly v. Coventry Healthcare, Inc., 956 F. Supp. 2d 310, 314 (D. Mass. 2013)* (finding that court lacked jurisdiction over individual defendant because plaintiff's allegations "[did] not suggest that [defendant] played any specific role" in the underlying cause of action).

The handful of statements that plaintiffs attribute to Kalanick do not create a nexus to their cause of action. Plaintiffs provide a smattering of irrelevant comments made by Kalanick, such as that he is a fan of Ayn Rand's novel "Fountainhead" (sic). They do not, however, point to a single decision Kalanick made about Uber's operations in Massachusetts. They do not allege that Kalanick traveled to the Commonwealth **[**25]** regularly, or even at all. Plaintiffs have failed to allege that this Court has specific personal jurisdiction over Travis Kalanick. Cf. *Interface Grp.-Massachusetts, LLC v. Rosen, 256 F. Supp. 2d 103, 107 (D. Mass. 2003)* (determining that Court lacked specific personal jurisdiction because there was "too tenuous a nexus" between the defendant's specific Massachusetts contacts and the injuries suffered by the plaintiff).

Because plaintiffs have failed to establish the relatedness requirement of specific personal jurisdiction, the Court declines to address the foreseeability and reasonableness requirements.

3. Piercing the corporate veil

As an alternative, plaintiffs contend that they have established specific personal jurisdiction over the individual defendants on the basis of an alter ego theory. That theory is inapposite. Under Massachusetts law, courts consider a multitude of factors when deciding whether to pierce a corporate veil:

> (1) common ownership; (2) pervasive control; (3) confused intermingling of business assets; (4) thin capitalization; (5) nonobservance of corporate formalities; (6) absence of corporate records; (7) no payment of dividends; (8) insolvency at the time of the litigated transaction; **[*272]** (9) siphoning away of corporation's funds by dominant shareholder; **[**26]** (10) nonfunctioning of officers and directors; (11) use of the corporation for transactions of the dominant shareholders; and (12) use of the corporation in promoting fraud.

Attorney Gen. v. M.C.K., Inc., 432 Mass. 546, 555 n. 19, 736 N.E.2d 373 (2000) (citing *Pepsi-Cola Metro. Bottling Co. v. Checkers, Inc., 754 F.2d 10, 14-16 (1st Cir. 1985))*.

The complaint does not allege facts in support of a single factor relevant to piercing the corporate veil. Accordingly, plaintiffs have not justified the application of such a theory. See *Newman v. European Aeronautic Defence & Space Co. Eads N.V., 700 F. Supp. 2d 156, 168 (D. Mass. 2010)*.

Plaintiffs have failed to establish that this Court has personal jurisdiction over either of the individual defendants. Therefore, the motions to dismiss of defendants Travis Kalanick and Garrett Camp will be allowed.

B. The Consolidated Motion to Dismiss of Defendants Uber, Travis Kalanick and Garrett Camp

Defendants contend that plaintiffs fail to state a claim upon which relief can be granted. In summary, Uber avers that it has not been shown: 1) to compete "unfairly" because it was never subject to the Taxi Rules, 2) to present a dangerous probability of monopolizing a market, 3) to interfere with advantageous business relationships or with the market-at-large, or 4) to have been part of a conspiracy or to have aided and abetted the violation of any legal canon. The Court will address these contentions seriatim.

To survive **[**27]** a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In considering the merits of a motion to dismiss, the Court may look only to the facts alleged in the pleadings, documents attached as exhibits or incorporated by reference in the complaint and matters of which judicial notice can be taken. *Nollet v. Justices of Trial Court of Mass., 83 F.Supp.2d 204, 208 (D. Mass. 2000)*, aff'd, *248 F.3d 1127 (1st Cir. 2000)*. Furthermore, the Court must accept all factual allegations in the complaint as true and draw all reasonable inferences in the plaintiff's favor. *Langadinos v. Am. Airlines, Inc., 199 F.3d 68, 69 (1st Cir. 2000)*. If the facts in the complaint are sufficient to state a cause of action, a motion to dismiss the complaint must be denied. See *Nollet, 83 F.Supp.2d at 208*.

Although a court must accept as true all of the factual allegations contained in a complaint, that doctrine is not applicable to legal conclusions. *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Threadbare recitals of the legal elements which are supported by mere conclusory statements do not suffice to state a cause of action. Id. Accordingly, a complaint does not state a claim for relief where the well-pled facts fail to warrant an inference of any more than the mere possibility of misconduct. *Id. at 1950*.

1. Unfair competition under the common law and the Massachusetts [28] Consumer Protection Act, *M.G.L. c. 93A § 11***

All seven groups of plaintiffs bring claims of unfair competition under the common law and Massachusetts statutory **[*273]** law.[2]

Plaintiffs theory, in its simplest form, is that the taxi industry in Greater Boston area is a heavily regulated business. Taxi cabs must, for instance, obtain a license, known as a "taxi medallion", to operate lawfully. Uber, the plaintiffs insist, did not comply with the Taxi Rules, did not incur the concomitant costs, and thereby gained an unfair advantage and caused economic injury to taxi medallion holders and duly licensed fleet owners.

Uber responds that it is not and has never been subject to the Taxi Rules. Uber submits that the rules have never been enforced against it and furthermore that the Commonwealth of Massachusetts has recently enacted a statute that preempts municipalities from regulating Uber (referring to *M.G.L. c. 159A 1/2, § 10*). According to defendants, the TNC Act thus reaffirms that the Taxi Rules do not apply (and never have applied) to Uber.

Chapter 93A makes it unlawful for a party to engage in an "unfair method of competition" or an "unfair or deceptive act or practice." *M.G.L. c. 93A, § 11*. Proponents of such claims must prove they have suffered a tangible **[**29]** loss as a result of the unfair or deceptive conduct. *Arthur D. Little, Inc. v. Dooyang Corp., 147 F.3d 47, 56 (1st Cir. 1998)*.

To determine whether a particular practice is unfair, courts examine

> Whether the practice . . . is within at least the penumbra of some common-law, statutory or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; [and] (3) whether it causes substantial injury to consumers . . . .

[2] The plaintiffs do not distinguish between the legal standard for their common law and statutory claims.

Mass. Eye & Ear Infirmary v. QLT Phototherapeutics, Inc., 552 F.3d 47, 69 (1st Cir. 2009).

The lodestar of Chapter 93A claims is whether the defendant's actions "would raise an eyebrow of someone inured to the rough and tumble of the world of commerce." *Levings v. Forbes & Wallace, Inc., 8 Mass. App. Ct. 498, 504, 396 N.E.2d 149 (1979)* (Kass, J.).

Although claims under Chapter 93A are uniformly included with allegations of statutory and common law violations, "[v]iolation of a statutory regime is not a necessary basis" for them to proceed. *Morris v. BAC Home Loans Servicing, L.P., 775 F.Supp.2d 255, 259 (D. Mass. 2011)*; see also *Mass. Eye & Ear Infirmary, 552 F.3d at 66* ("To prove [a Chapter 93A] claim, it is neither necessary nor sufficient that a particular act or practice violate common or statutory law."); cf. *Madan v. Royal Indem. Co., 26 Mass. App. Ct. 756, 763, 532 N.E.2d 1214 (1989)* (explaining that a plaintiff must show unfair or deceptive acts over and above a breach of contract to demonstrate a violation of Chapter 93A).

As noted above, the TNC Act authorizes the operations of Uber and preempts municipalities from regulating TNCs. Indeed, plaintiffs concede **[**30]** that, after enactment of the statute in August, 2016, Uber can not, as a matter of law, violate the Taxi Rules. Accordingly, the activity in dispute in this action is limited to that which took place prior to August 5, 2016.

i. Competing as an unlicensed participant in a licensed market can constitute an unfair trade practice

Determining the boundaries of actionable conduct under Chapter 93A is a **[*274]** question of law. *Incase Inc. v. Timex Corp., 488 F.3d 46, 56 (1st Cir. 2007)* (citation omitted). Whether a particular set of acts is unfair or deceptive is a question of fact. Id.

Taking the plaintiffs' plausibly alleged facts as true and construing disputed acts in their favor, plaintiffs have stated a claim that Uber engaged in an unfair method of competition by operating its services outside of the purview of Massachusetts and local law. Massachusetts courts have consistently allowed "a licensed carrier of passengers [to] restrain competition by an unlicensed carrier." *A. B. & C. Motor Transp. Co. v. Dep't of Pub. Utilities, 327 Mass. 550, 551, 100 N.E.2d 560 (1951)* (collecting cases). This Court has already allowed claims similar to plaintiffs' to survive a motion to dismiss against this same defendant. See *Boston Cab Dispatch, Inc. v. Uber Techs., Inc., 2014 U.S. Dist. LEXIS 42063, 2014 WL 1338148, at *6-7 (D. Mass. Mar. 27, 2014)* (holding that plaintiffs stated a claim for unfair competition pursuant to Chapter 93A and the common law where defendant allegedly operated **[**31]** service without incurring expense of local and state regulation).

Whether Uber's conduct in this particular instance was sufficiently egregious will require "an individualized, fact-specific inquiry". *Woods v. Wells Fargo Bank, N.A., 733 F.3d 349, 358 (1st Cir. 2013)* (citing *Arthur D. Little, 147 F.3d at 55*) (internal quotation omitted). At this stage, however, plaintiffs have plausibly stated a claim that Uber's conduct amounted to more than a statutory violation or tort. See *Juárez v. Select Portfolio Servicing, Inc., 708 F.3d 269, 281 (1st Cir. 2013)*.

ii. The Regulatory Framework

Uber vigorously rejoins that it "is not, and was not, subject to Taxi Rules." Accordingly, it submits, it cannot be said to compete unfairly for failure to follow inapplicable rules. The Court disagrees.

The Massachusetts legislature authorized the Commissioner to regulate the taxi business in Boston. *Town Taxi Inc. v. Police Com'r of Boston, 377 Mass. 576, 578, 387 N.E.2d 129 (1979)*. The Commonwealth has issued regulations regarding vehicle registration requirements. Those regulations define a "Taxicab" as

> any vehicle which carries passengers for hire, and which is licensed by a municipality pursuant to *M.G.L. c. 40, § 22* as a taxicab.

540 Code Mass. Regs. 2.05(3) (Dec. 7, 2012).

A "Livery Vehicle" is defined as

> any limousine or other vehicle which is designed to carry fifteen or fewer passengers, including the driver, and carries passengers for hire, business courtesy, employee shuttle, customer shuttle, charter **[**32]** or other pre-arranged transportation, and which vehicle is not required to obtain a taxicab license pursuant to M.G.L. c. 40, §22.

Id.[3]

In turn, the City of Boston defines a "Taxi" as

> [a] vehicle used, or designed to be used, for the conveyance of persons for hire, from place to place, and licensed by the Hackney Carriage Division of the Boston Police Department.

Traffic Rules and Regulations, City of Boston (November 1, 2012).

It defines a "Livery Vehicle" as

> **[*275]** A vehicle used, or designated to be used, for the conveyance of less than sixteen (16) persons for hire, from place to place, except a bus, streetcar, taxi or commercial vehicle.

Id.

Finally, in January, 2016, the Massachusetts Department of Transportation revised 540 Code Mass. Regs. § 2.05 to include a "Personal Transportation Network Vehicle" which is defined as

> a private passenger motor vehicle that is used by a Transportation Network Company Driver to provide Transportation Services for a Transportation Network Company.

540 Code Mass. Regs. 2.05(3) (Jan. 16, 2015).

The regulations impose state-level requirements and standards for entities and their drivers.

The Commissioner has imposed additional requirements on taxis operating in Boston, over and above the state regulations. The primary ordinance at issue **[**33]** is the City of Boston's Vehicle for Hire Ordinance ("Rule 403"), which requires that

> [i]n the City of Boston, no person, firm, or corporation driving or having charge of a taxicab or other private vehicle shall offer the vehicle for hire for the purpose of transporting, soliciting and/or picking up a passenger or passengers unless said person is licensed as a hackney driver and said vehicle is licensed as a hackney carriage by the Police Commissioner.

City of Boston Code 16-15.05: Vehicle for Hire Ordinance (Appendix I to Rule 403).

Uber relies heavily on the fact that Rule 403 was not enforced against it between 2013 and 2016. Nor was the Rule enforced against livery vehicles, Uber contends, even though it seems to apply to livery vehicles as well. The statutory and regulatory framework does, however, distinguish between Uber and livery vehicles. State regulations explicitly state that livery vehicles are "not required to obtain a taxicab license" pursuant to state regulation. 540 Code Mass. Regs. 2.05(3) (Dec. 7, 2012). Uber can point to no such regulation or ordinance with respect to TNCs during the complained of period.

iii. Analogous caselaw does not preclude plaintiffs' claim

---

[3] The definitions of "taxicab" and "livery vehicle" were not changed by the January, 2015, revision.

Neither Massachusetts courts nor the United States Circuit **[**34]** Court of Appeals for the First Circuit ("First Circuit") has determined whether Uber's conduct was permissible under the Taxi Rules during the relevant period. Accordingly, Uber maintains, this Court should not interpret Rule 403 pursuant to the doctrine propounded in *Dial A Car, Inc. v. Transportation, Inc., 82 F.3d 484, 489, 317 U.S. App. D.C. 240 (D.C. Cir. 1996)*, which it contends is "the leading case" on the issue at hand and dispositive.

The Dial a Car doctrine is a prudential principle that a federal court should not interpret an ambiguous local regulation until the local regulator has addressed the issue. See id. In Dial a Car, a licensed, on-call taxi service alleged that two defendant taxi companies were illegally providing unlicensed taxi services within the District of Columbia. *Id. at 484*. The plaintiff brought a Lanham Act claim alleging that defendants misled customers by holding themselves out as an authorized business. *Id. at 488*. The Circuit Court of Appeals for the District of Columbia affirmed dismissal of plaintiff's claim, explaining that it saw "no reason to reach out and apply federal law to this quintessentially local dispute." *Id. at 488-89*. Accordingly, the court held that

> there must be a clear and unambiguous statement from the Taxicab Commission **[*276]** regarding [defendants'] status before a Lanham **[**35]** Act claim can be entertained.

Id. at 489.

The reasoning in the *Dial a Car* decision is not controlling with respect to the issue before this Court if for no other reason than that the First Circuit has neither adopted nor cited the case.

Furthermore, the Dial a Car court's justification for abstention, grounded in principles of federalism, does not apply to the unfair competition claims of these plaintiffs. The D.C. Circuit Court took particular issue with the fact that the claim in that case was brought under the Lanham Act in an effort to transform a federal statute "into a handy device to reach and decide all sorts of local law questions." *Id. at 491*. In the present case, by contrast, plaintiffs rely on state regulations, statutes and common law that is designed to hold a business to a "standard of lawfulness." See *J.E. Pierce Apothecary, Inc. v. Harvard Pilgrim Health Care, Inc., 365 F. Supp. 2d 119, 145 (D. Mass. 2005)* (emphasis in original). Under the regulations of the Attorney General of Massachusetts, an act or practice violates Chapter 93A, § 2 if it "fails to comply with existing statutes, rules, regulations or laws" meant for the protection of the public's health, safety or welfare. *940 Code Mass. Regs. 3.16(3)*. Uber does not dispute that the Taxi Rules are designed for the public's health, safety or welfare and there is

> no reason **[**36]** to assume that [section 3.16(3)] ought not apply to claims brought pursuant to *section 11 [of Chapter 93A*].

J.E. Pierce Apothecary, 365 F. Supp. 2d at 145.

Even if the Dial a Car doctrine applied to this case, Uber's application of it is inapposite. The D.C. Circuit Court acknowledged that a regulation might "be so clear on its face that no good faith doubt concerning its interpretation would be possible." *Dial A Car, 82 F.3d at 489 n. 3*. In such a case, the Court explained, no explicit statement from the municipal regulator would be necessary. Because the Court found that the regulatory scheme in the Dial a Car case was, "at the very least, ambiguous with regard to the legality" of the defendants' conduct, the regulation was found insufficiently clear for *Lanham Act* purposes. Id.

In sharp distinction, the regulatory scheme in this case is "so clear on its face that no good faith doubt concerning its interpretation" is possible. Under the rubric of Rule 403, Uber is a

> corporation . . . having charge of a . . . private vehicle [that] offer[s] the vehicle for hire for the purpose of transporting . . . a passenger or passengers.

Those vehicles were not, at the operative time, licensed as hackney carriages by the Police Commissioner. A response from Uber that it did not "hav[e] charge" of the vehicles **[**37]** is underwhelming. If this Court were to find that Uber did not have control over its drivers, then its business model would consist of aiding and abetting the "private vehicle[s]" of those drivers, none of which was licensed as a hackney carriage by the Police Commissioner.

Under either reading, there is "no good faith doubt" that Uber was (during the subject interlude and if the facts alleged are proved) engaged in unlawful behavior. See *id. at 489 n. 3*.

For all of these reasons, the Dial a Car doctrine does not compel this Court to dismiss plaintiffs' unfair competition claims.

iv. Uber is not exempt from Chapter 93A liability

Chapter 93A exempts from liability

> **[*277]** transactions or actions otherwise permitted under laws as administered by any regulatory board or officer acting under statutory authority of the Commonwealth.

M.G.L. c. 93A, § 3.

Uber contends that it was exempt from Chapter 93A because the Commonwealth authorized its conduct. It has failed, however, to satisfy the rigorous requirements for application of that statutory safe haven.

"Defendants have the burden of proving the exemption" and that burden is a "heavy one". See *Fleming v. National Union Fire Ins. Co., 445 Mass. 381, 389, 837 N.E.2d 1113 (2005)*. A defendant must show that the Commonwealth's regulatory scheme "affirmatively permits the **[**38]** practice which is alleged to be unfair or deceptive." *Id. at 390* (quotation omitted).

Uber relies on three arguments. First, it repeats its contention that Rule 403 never applied to it or to its drivers. That argument fails for the reasons articulated above.

Second, it emphasizes that Rule 403 was not enforced against it. Drawing all inferences in favor of the plaintiffs, as the Court must do at this stage, they have plausibly alleged that Rule 403 or its equivalent in other municipalities was, at least occasionally, enforced against Uber drivers. Even if that were not the case, regulatory forbearance is insufficient to prompt exemption under *§ 3*. A defendant must show that the regulatory scheme "affirmatively permits the practice which is alleged to be unfair or deceptive." Id. (emphasis added). Failure to enforce a regulation is insufficient.

Finally, Uber submits that the TNC Act codified the fact that the Taxi Rules did not apply to it. The Court disagrees. Massachusetts courts interpret statutes with a presumption against retroactivity. See generally *Fed. Nat. Mortg. Ass'n v. Nunez, 460 Mass. 511, 952 N.E.2d 923 (2011)*. Accordingly, a statute only applies retroactively if it is "unequivocally clear . . . from the words, context or objects" of the statute that the legislature intended **[**39]** it to be retroactive in operation. *Smith v. Massachusetts Bay Transp. Auth., 462 Mass. 370, 377, 968 N.E.2d 884 (2012)*. No such "unequivocally clear" intention is evident from the TNC Act.

Uber's conduct is not exempted from liability under *Chapter 93A, section 3*.

v. Other litigation involving Uber does not compel dismissal

Uber cites a number of cases in which taxi companies have brought actions involving unfair competition and regulation of TNCs. The Court agrees with defendant that, since the TNC Act was enacted, Uber has not been required to comply with local taxi ordinances. Accord *Boston Taxi Owners Ass'n, Inc. v. City of Boston, 223 F. Supp. 3d 119, 122 (D. Mass. 2016)*. On the other hand, no case that Uber cites justifies dismissal of plaintiffs' unfair competition claims given the relevant law, alleged facts and regulatory framework.

Some of the cases Uber cites are simply beside the point. For instance, plaintiffs do not challenge the legality of the Taxi Rules or the TNC Act. Contra, e.g., *Boston Taxi Owners Ass'n, Inc. v. Baker, 2017 U.S. Dist. LEXIS 9628, 2017 WL 354010 (D. Mass. Jan. 24, 2017)*, appeal dismissed, *2017 U.S. App. LEXIS 17032, 2017 WL 3758297*

(1st Cir. Mar. 27, 2017); *Illinois Transportation Trade Ass'n v. City of Chicago, 839 F.3d 594, 599 (7th Cir. 2016)*, cert. denied sub nom. Illinois Transp. Trade Ass'n v. City of Chicago, *Ill., 137 S. Ct. 1829, 197 L. Ed. 2d 761 (2017)* (dismissing equal protection and takings challenges to the City of Chicago's TNC ordinance).

[*278] Other cases upon which Uber relies depend on different operative law. The California Public Utilities Code, for example, forbids courts, except the California Supreme Court and Court of Appeal, from hindering or interfering with the **[**40]** California Public Utilities Commission's exercise of regulatory authority. See *A White & Yellow Cab, Inc. v. Uber Techs., Inc., 2017 U.S. Dist. LEXIS 171795, 2017 WL 4642346, at *3-4 (N.D. Cal. Oct. 17, 2017)* (dismissing plaintiff's unfair competition and unfair practices claims because a ruling in plaintiff's favor would "hinder or interfere with a broad and continuing CPUC program") (citing *California Public Utilities Code § 1759(a)*) (additional citation omitted).

Massachusetts state law has a more expansive understanding of unfair competition than do other states. Cf. *Checker Cab Philadelphia, Inc. v. Uber Techs., Inc., 689 F. App'x 707, 709 (3d Cir. 2017)* (explaining that, under Pennsylvania law, unfair competition is limited to an entity passing off its product as another, dishonest statements, tortious interference with contract or intellectual property theft) (citations omitted); *Greenwich Taxi, Inc. v. Uber Techs., Inc., 123 F. Supp. 3d 327, 340 (D. Conn. 2015)* (stating that, under Connecticut law, unfair competition is guided by the Federal Trade Commission's "cigarette rule"). Chapter 93A, by contrast, renders violations of public safety regulations actionable. See *940 Code Mass. Regs. 3.16(3)*.

Finally, Uber cites a handful of cases where courts have relied on Dial a Car to find that plaintiffs could not state a claim for unfair competition based on regulatory violations. Those cases, too, are of no consequence. For instance, in *Manzo v. Uber Techs., Inc., 2014 U.S. Dist. LEXIS 95106, 2014 WL 3495401, at *4 (N.D. Ill. July 14, 2014)*, the court maintained that the ordinance at issue was ambiguous. Id. (explaining that whether a smartphone equipped **[**41]** with Uber constituted a "taximeter" as that term was defined by the city ordinance was ambiguous). This Court has explained why the regulatory framework at issue here is unambiguous.

Uber fails to distinguish cases where courts have allowed unfair competition claims based on Uber's non-compliance with local regulation. See, e.g., *The Yellow Cab Co. v. Uber Techs., Inc., 2015 U.S. Dist. LEXIS 109417, 2015 WL 4987653, at *5-6 (D. Md. Aug. 19, 2015)* (finding that plaintiffs demonstrated a possibility of success on their common law unfair competition claim because the "expansive scope" of Maryland's unfair competition law does not impose a fraud or deceit requirement). Most importantly, Uber fails to distinguish the similar claims with which it has already been confronted in this Court.

Although the facts and legal arguments vary somewhat, this Court held that plaintiffs had sufficiently stated a claim that

> Uber unfairly competes with plaintiffs, in violation of Chapter 93A, [] by operating its service without incurring the expense of compliance with Massachusetts law and Boston ordinances.

*Boston Cab Dispatch, Inc. v. Uber Techs., Inc., 2014 U.S. Dist. LEXIS 42063, 2014 WL 1338148, at *6-7 (D. Mass. Mar. 27, 2014)*.

The Court also found that plaintiffs had stated a common law unfair competition claim based upon the same conduct. *Id. at *7*. Defendant does not distinguish Boston Cab from the present action. Indeed, it does not cite that case **[**42]** anywhere nor explain why this Court should rule differently than it did before.[4] The Court finds no **[*279]** reason to do so. Plaintiffs have state a claim for unfair competition.

Accordingly, defendant's motion to dismiss will, with respect to the statutory and common law unfair competition claims, be denied.

---

[4] In its proposed reply memorandum Uber proffers an unconvincing distinction. It contrasts the magistrate judge's analysis of the plaintiffs' Lanham Act claim with the unfair competition claim before this Court but it fails to distinguish the unfair competition claim in the earlier case with the unfair competition claim here.

2. Attempt to monopolize under the Sherman Antitrust Act, *15 U.S.C. § 2* and the Massachusetts Antitrust Act, *M.G.L. c. 93 § 5*

The Malden, Dot Ave, Max Luc and Taxi Maintenance plaintiffs all bring actions for attempt to monopolize in violation of the *Sherman Antitrust Act* and the *Massachusetts Antitrust Act*, *M.G.L. c. 93 § 5*.[5]

Plaintiffs argue that Uber has attempted to drive taxi companies out of business through the use of its allegedly predatorily priced UberX service. Defendants respond that plaintiffs have not met the high burden of alleging a predatory pricing claim.

Section 2 of the Sherman Act makes it illegal to

> monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations.

15 U.S.C. § 2.

To state a monopolization claim under *§ 2*, a plaintiff must adequately allege that defendant (1) has monopoly power in the relevant market **[**43]** and (2) has engaged in illicit "exclusionary practices" with "the design or effect of protecting or enhancing its monopoly position." *Sterling Merch., Inc. v. Nestlé, S.A., 656 F.3d 112, 125 (1st Cir. 2011)* (quoting *Coastal Fuels of P.R., Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 195 (1st Cir. 1996)* (internal citation omitted)).

One kind of exclusionary practice is the practice of "predatory pricing". In this scheme, a company reduces the price of its product to below cost, hoping to drive competitors out of business and then raise prices once it has achieved a monopoly position. See *Matsushita Elec. Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 584-585, n. 8, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. To succeed on a predatory pricing claim a plaintiff must demonstrate that

> the prices complained of are below an appropriate measure of its rival's costs . . . [and that the competitor had] a dangerous probability of recouping its investment in below-cost prices.

Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (U.S. 1993).

Because an economically unsound approach by a competitor could actually benefit consumers, plaintiffs must explain with particularity "just what the arrangements were and why they plausibly constituted antitrust violations." See *Am. Steel Erectors v. Local Union No. 7, Int'l Ass'n of Bridge, Structural, Ornamental & Reinforcing Iron Workers, 815 F.3d 43, 71 (1st Cir. 2016)* (quoting *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 65 (1st Cir. 2004))*.

Plaintiffs fail to allege facts supporting a predatory pricing claim.

Plaintiffs do not allege that Uber's services were priced below Uber's costs. Accordingly, they have failed to "explain in detail" why Uber's conduct constituted an antitrust violation. See id. **[**44]** No complaint alleges any facts with respect to Uber's costs. Instead, the Malden complaint repeatedly states that Uber employs a "below-cost pricing scheme". **[*280]** Such "threadbare recitals of a cause of action's elements, supported by mere conclusory statements, do not suffice" survive the motion to dismiss stage. *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 555*).

Plaintiffs repeatedly allege that UberX was priced below the cost of a taxi. But to state a claim for antitrust injury from a rival's low prices, a plaintiff must allege that "the prices complained of are below an appropriate measure of its rival's costs." See *Brooke Group, 509 U.S. at 222* (emphasis added).

---

[5] Neither party contends that the legal standard varies for the state law claim.

Plaintiffs attempt to bolster their predatory pricing claims by noting that Uber has lost "billions of dollars". That allegation lacks the particularity required from an antitrust plaintiff. If Uber's "unconventional approach is economically unsound," then it may just be "a boon to consumers." *Am. Steel Erectors, 815 F.3d at 71* (quoting *Brooke Group, 509 U.S. at 224*). Without specific factual allegations as to Uber's costs, plaintiffs' invocation of Uber's annual deficits is unavailing.

Because plaintiffs have failed adequately to allege a claim for predatory pricing, the defendants' motion to dismiss will, with respect to plaintiffs' antitrust claims, be **[**45]** allowed.

3. Aiding and abetting and civil conspiracy to engage in unfair competition in violation of the common law and the Massachusetts Consumer Protection Act, M.G.L. c. 93A

The Anoush and Taxi Maintenance plaintiffs each allege a different theory of civil conspiracy to engage in unfair competition in violation of the common law and Massachusetts statutory law. The Anoush plaintiffs allege that Uber conspired with its independent contractor, third-party drivers. The Taxi maintenance plaintiffs allege that the individual defendants, Uber and Uber's employees entered into a common conspiracy. Both conspiracy claims include allegations that Uber had a common plan, design and agreement to operate in violation of the Taxi Rules.

Under Massachusetts law, a defendant may be liable for aiding and abetting a tort where

> (1) a third-party committed the relevant tort; (2) the defendant knew the third-party was committing the tort; and (3) the defendant actively participated in or substantially assisted in the commission of the tort.

Doe v. Brandeis Univ., 177 F. Supp. 3d 561, 616 (D. Mass. 2016) (citing *Go-Best Assets Ltd. v. Citizens Bank of Mass., 463 Mass. 50, 64, 972 N.E.2d 426 (2012)*; *Restatement (Second) of Torts § 876(b)* (1977)).

Massachusetts courts recognize a tort of civil conspiracy that is a form of vicarious liability for the tortious conduct of others. *Snyder v. Collura, 812 F.3d 46, 52 (1st Cir.)*, cert. denied, **[**46]** *136 S. Ct. 2517, 195 L. Ed. 2d 843 (2016)* (citing *Taylor v. Am. Chemistry Council, 576 F.3d 16, 34 (1st Cir. 2009))*. To state a claim for civil conspiracy, a plaintiff must allege that the conspiring parties agreed to or assisted in committing the underlying tort. *Taylor, 576 F.3d at 35* (citations omitted).

First, the Court notes that (as it has already found) it lacks personal jurisdiction over the individual defendants. With respect to the Taxi Maintenance plaintiffs' contention that Uber conspired with its employees, the claim is legally untenable. No civil conspiracy can exist under plaintiffs' theory because "an entity cannot conspire with itself." *Platten v. HG Bermuda Exempted Ltd., 437 F.3d 118, 131 (1st Cir. 2006)*.

[*281] The Anoush plaintiffs' theory represents a more belt-and-suspenders approach to pleading. In Count I of their complaint they allege that Uber controls and manages its drivers, such that Uber is directly liable for violating Chapter 93A. Their claims of civil conspiracy and aiding and abetting, (Counts III and IV), however, resort to Plan B. They allege that if Uber did not violate the Taxi Rules, they facilitated the violation of those rules by assisting Uber drivers in an unlawful business.

Plaintiffs have pled facts sufficient to establish that Uber gave substantial assistance to its drivers to violate the Taxi Rules. Both Uber and the plaintiffs agree that **[**47]** Uber classifies its drivers as "independent third-party drivers". Both parties agree that Uber connects the drivers to passengers through its smart phone application and that Uber collects the fares for its drivers. The parties disagree on the issue of whether Uber's drivers were subject to the Taxi Rules.

This Court finds that the text of Rule 403 clearly applies to Uber drivers. If Uber denies that it "controls" the drivers (such that it is not subject to direct liability), it cannot dispute that its drivers drove

> other private vehicle[s] [that were] offer[ed] for hire for the purpose of transporting . . . passengers [and that those vehicles were not] licensed as a hackney carriage by the Police Commissioner.

Finally, plaintiffs have pled facts sufficient to indicate, if proved, that Uber had knowledge that its drivers were committing torts. See also *Boston Cab Dispatch, Inc. v. Uber Techs., Inc., 2015 U.S. Dist. LEXIS 8508, 2015 WL 314131, at *6-7 (D. Mass. Mar. 27, 2014)* (denying defendant's motion to dismiss where plaintiffs alleged that Uber competed unfairly in violation of the common law and *M.G.L. c. 93A, § 11*).

Uber claims that it does not control its drivers but rather that the drivers are independent contractors. The courts in which it has proffered such claims have not necessarily seen it that way. See, e.g., *O'Connor v. Uber Techs., Inc., 82 F. Supp. 3d 1133, 1135 (N.D. Cal. 2015)* (denying Uber's **[**48]** motion for summary judgment that Uber drivers are independent contractors as a matter of law); *Mumin v. Uber Techs., Inc., 239 F. Supp. 3d 507, 532 (E.D.N.Y. 2017)* (holding that plaintiff stated a plausible overtime claim under New York labor law under theory that Uber misclassified its drivers as independent contractors); *Razak v. Uber Techs., Inc., 2016 U.S. Dist. LEXIS 139668, 2016 WL 5874822, at *5 (E.D. Pa. Oct. 7, 2016)* (holding that Uber driver stated a plausible claim under state and federal labor law that they were employees of Uber). Based on the litigated position of Uber, then, plaintiffs have stated a plausible claim.

Defendants' motion to dismiss the conspiracy and aiding and abetting claims will, with respect to the claim of the Taxi Maintenance plaintiffs, be allowed but, with respect to the claim of the Anoush plaintiffs, be denied.

4. Interference with advantageous business relationships

The Taxi Maintenance plaintiffs bring a count of interference with advantageous business relationships. They allege that Uber interfered with identifiable business relationships through improper means with improper motives. Uber responds that the complaint alleges that it interfered with the "market-at-large", which is insufficiently precise to state a claim.

According to Massachusetts law, a claim for tortious interference with advantageous business relationships **[**49]** requires four elements: (1) the plaintiff was **[*282]** involved in a business relationship or anticipated involvement in one, (2) the defendant knew about the relationship, (3) the defendant intentionally interfered with the relationship for an improper purpose or by an improper means and (4) the plaintiff suffered damages as a result. *Pembroke Country Club, Inc. v. Regency Sav. Bank, F.S.B., 62 Mass. App. Ct. 34, 815 N.E.2d 241 (2004)* (citing *United Truck Leasing Corp. v. Geltman, 406 Mass. 811, 812, 815-17, 551 N.E.2d 20 (1990))*. To demonstrate an anticipated business relationship, a plaintiff must show that it "had a probable future business relationship anticipating a reasonable expectancy of financial benefit." *Brown v. Armstrong, 957 F. Supp. 1293, 1305 (D. Mass. 1997)*, aff'd, *129 F.3d 1252 (1st Cir. 1997)* (citation omitted). A plaintiff cannot rely on speculative future relationships but must allege that a specific business relationship existed between itself and the potential customer. See *Sherman v. Clear Channel Outdoor, Inc., 889 F. Supp. 2d 168, 177 (D. Mass. 2012)*.

Plaintiffs claim that they had a prospective business relationship with every person seeking ride-hailing services in the City of Boston. They explain that, before Uber began operating in Boston, "every individual seeking for-hire services in Boston was a de facto customer" of the regulated taxi companies. That evanescent, hypothetical relationship lacks the specificity required to survive a motion to dismiss.

A plaintiff "may not speculate about future business relationships **[**50]** when alleging this tort." *Singh v. Blue Cross/Blue Shield of Massachusetts, Inc., 308 F.3d 25, 48 (1st Cir. 2002)*. Instead, they must allege "a specific business relationship that was interfered with by [defendant]." See id. The "mere possibility that [their] proposal would be accepted by [the customers] is not sufficient." *Sherman, 889 F. Supp. 2d at 177*.

Because plaintiffs have failed to allege that they were involved in a specific anticipated business relationship, defendants' motion to dismiss for failure to state a claim upon which relief can be granted will be allowed. Cf. *Moving & Storage, Inc. v. Panayotov, 2014 U.S. Dist. LEXIS 31546, 2014 WL 949830, at *3 (D. Mass. Mar. 12, 2014)* (allowing motion to dismiss because the class of alleged customers included "any individual who may need moving services in the future").

ORDER

For the foregoing reasons, the motion to dismiss of defendants Travis Kalanick and Garrett Camp (Docket No. 70), is **ALLOWED** and the consolidated motion to dismiss of defendants Uber, Travis Kalanick and Garrett Camp (Docket No. 72) is, with respect to the claims of antitrust violation and interference with advantageous business relationships and the Taxi Maintenance claim of civil conspiracy, **ALLOWED**, but is otherwise **DENIED**.

The following claims of the named plaintiffs remain pending:

1) the claims of all plaintiffs for unfair competition under the common law and *M.G.L. c. 93A § 11*.

2) the claims of the **[**51]** Anoush plaintiffs for:
  a) aiding and abetting unfair competition in violation of the common law and M.G.L. c. 93A, and
  b) civil conspiracy to commit unfair competition in violation of the common law and M.G.L. c. 93A.

So ordered.

Opinion by: Mark E. Walker

Opinion

AMENDED[1] ORDER GRANTING MOTION TO DISMISS

This is an antitrust case. Plaintiff is a physician who wanted to start her own private practice specializing in infectious disease in Gainesville, Florida. For this plan to work, Plaintiff needed patients. The primary way Plaintiff could get patients referred to her practice was to obtain privileges at Gainesville's only private hospital, North

[1] This Amended Order is identical to this Court's prior Order, ECF No. 43, except that it has been amended to correct a scrivener's error to reflect that Count I is dismissed without prejudice. *See* Fed. R. Civ. P. 60(a) ("The court may correct a clerical mistake or a mistake arising from oversight or omission whenever one is found in a judgment, order, or other part of the record. The court may do so on motion or on its own, with or without notice.").

Florida Regional Medical Center ("NFRMC").[2] But Defendants' refusals to sign off as Plaintiff's alternate provider during the application process effectively blocked Plaintiff from obtaining privileges. Plaintiff claims Defendants violated federal ***antitrust law*** because they conspired to keep Plaintiff **[*2]** from competing against them in Gainesville's market for private infectious disease services. Defendants assert there was no conspiracy—they simply made individual decisions not to be Plaintiff's alternate provider primarily due to quality of care concerns. Defendants have moved to dismiss for lack of subject matter jurisdiction, and alternatively, for failure to state a claim. This Court has considered, without hearing, Defendants' Motion to Dismiss, ECF No. 32. For the reasons set out below, the motion to dismiss is **GRANTED**.

I

Plaintiff has some history with Defendants. In 2012, she started working for Defendant Kima's private practice in Gainesville. ECF No. 41-10 at 157. Dr. Kima and the other Defendants coordinated their on-call schedules at NFRMC to have cross-coverage at all times for patients needing infectious disease care. *Id.* at 166; *see also* ECF No. 41-7 at 28.While working for Defendant Kima, Plaintiff obtained privileges at NFRMC and split Defendant Kima's on-call days. ECF No. 41-10 at 67, 166-67.

In 2013, Plaintiff left Defendant Kima's practice after working there for about a year. *Id.* at 75. Plaintiff's employment agreement included a one-year noncompete provision, so in compliance **[*3]** with that provision, Plaintiff practiced outside of Gainesville for the duration of the year after she left Defendant Kima's practice. *Id.* And Plaintiff eventually resigned her privileges at NFRMC. *Id.* at 68.

Infectious disease physicians with privileges at NFRMC periodically serve on call at the hospital to provide NFRMC with 24/7 coverage in infectious disease services every day of the year. ECF No. 41-5 at 4. These physicians get a majority of their patients by first contacting them through their work at NFRMC. *Id.* at 3. Thus, Plaintiff claims, a private infectious disease practice in Gainesville is economically viable only if she can obtain privileges (and, therefore, patients) at NFRMC. ECF No. 41-10 at 231.

Without privileges at NFRMC, Plaintiff lacks the same access to patients as other private infectious disease physicians in Gainesville. This is true, even though Gainesville is home to two other hospitals (Shands and the Veterans Affairs Medical Center ("VA")), because those *public* hospitals generally don't refer infectious disease patients to private practices in Gainesville. *See* ECF No. 41-11 at 62 ("Shands will not allow any of their employees to work outside of the confines of Shands Hospital **[*4]** . . . ."); *see also* ECF No. 41-4 at 43-44.

Part of the application process for infectious disease privileges at NFRMC required Plaintiff to name another physician to be her "alternate provider" to "attend [her] patients in an emergency when the staff member is not available or until the staff member can be present." ECF No. 41-1 at 26 (D.18 Alternate Physician Coverage). And NFRMC's bylaws require a physician seeking privileges to "delegate in his/her absence . . . the responsibility for diagnosis and/or care of his/her patients only to a Practitioner who is a member in good standing of the Medical Staff and who is qualified and approved by the Hospital to undertake this responsibility by the granting of appropriate clinical privileges." ECF No. 41-8 at 21 (NFRMC Bylaw 3.5.2). The alternate provider must have privileges in the same specialty as Plaintiff's chosen specialty. At NFRMC, "[i]nfectious disease has a different set of privileges . . . and . . . is deemed to be separate from internal medicine." ECF No. 41-3 at 28.

As a solo practitioner, Plaintiff's application for privileges must include a signed letter from her alternate provider that sets out the physician's pledge to act **[*5]** as such. ECF No. 41-2 at 41. The only other physicians in

---

[2] The parties apparently agree that NFRMC is the only private hospital in Gainesville, Florida. But Plaintiff's deposition testimony includes some discussion of another hospital in Gainesville that also provides infectious disease services but isn't affiliated with Shands or the VA. *See* ECF No. 41-10 at 241. The existence of a second private hospital at which Plaintiff could have obtained privileges to kick start her private practice would probably be fatal to her federal antitrust claim. *See* *Pierson v. Orlando Reg'l Healthcare Sys., Inc., 619 F. Supp. 2d 1260, 1277 (M.D. Fla. 2009)* (no antitrust injury when Plaintiff was not prevented from practicing medicine at other private hospitals in the vicinity). This Court is left wondering why Defendants fail to make the argument.

Gainesville with infectious disease privileges at NFRMC are Defendants and a fourth individual, Dr. Mauceri, who was originally a Defendant but was dropped before this case reached this Court. None of these physicians agreed to be Plaintiff's alternate provider, which Plaintiff asserts blocked her from obtaining privileges at NFRMC.

Plaintiff alleges a conspiracy to block her from obtaining privileges arose in February 2014 when Defendants met and discussed the issue of Plaintiff's requests for an "alternate provider." Defendant Kima testified that Defendants discussed the "call schedule" at this time, because "[Plaintiff] wanted to be included, and there was an unwillingness to give up any additional calls." ECF No. 41-7 at 224. By affidavit, Dr. Mauceri also asserts that the February 2014 discussion occurred and that all the Defendants agreed that they didn't want to give up on-call days or be Plaintiff's "alternate physician." ECF No. 41-5 at 7-8. Though Defendant Yancey did not recall any discussion in February 2014, he did send Plaintiff an email stating that he alone couldn't make the decision about providing backup coverage **[*6]** to Plaintiff. ECF No. 41-6 at 100-02.

Plaintiff pursued several other avenues to secure an "alternate provider," but none succeeded. For example, she contacted individuals at the University of Florida and Wake Forest residency programs to inquire if any infectious disease residents would like to join her practice and concurrently apply for privileges at NFRMC. ECF No. 41-10 at 132-33. She contacted other infectious disease physicians across the map to see if any would relocate to Gainesville to join her practice and apply for privileges. *Id.* at 15, 172. And she pursued an exception to the bylaws requirement that staff members reside within 30 miles of the hospital by naming an infectious disease practitioner in Vero Beach, Florida as her alternate provider. *Id.* at 216-17. Ultimately, Plaintiff's application for privileges was denied for nonconformance with the bylaws. *Id.*

According to NFRMC's CEO Bryan Cook, he wasn't "aware of any shortages of infectious disease [services or care] at [NFRMC]." ECF No. 41-3 at 41-42. Nor, according to Mr. Cook, has a "community needs assessment" ever identified any "community need" for additional infectious disease physicians while he's been with NFRMC. *Id.* at 46. But Plaintiff testified **[*7]** that members of the Gainesville community have approached her about their desire for more doctors to choose from for private infectious disease services. *See* ECF No. 41-10 at 220-21 ("I have also had a couple of neighbors that have asked if I was practicing in Gainesville, because either themselves or family members had an [infectious disease] issue, and they had seen the two practitioners that had outpatient offices, and were not satisfied with the care that they received and they were seeking alternate providers.").

Plaintiff continues to reside in Gainesville, but now works as an infectious disease physician in Ocala with privileges at three area hospitals. *Id.* at 133-34. She currently makes about $30,000 a year more than when she previously worked for Defendant Kima. *Id.* at 136-37.

II

Plaintiff claims Defendants violated the Sherman Act, *15 U.S.C. § 1*, and Florida law because they conspired to deny Plaintiff's request to be her alternate provider to keep her from obtaining privileges at NFRMC. She claims Defendants' conduct essentially caused her exclusion from Gainesville's market of private infectious disease physicians because they wanted to prevent her from competing in the market for private infectious **[*8]** disease services. Defendants have moved to dismiss based on lack of subject matter jurisdiction, and, in the alternative, for failure to state a claim for a violation of *§ 1* of the Sherman Act. They assert that Plaintiff lacks antitrust standing to proceed with the federal antitrust claim serving as the basis for federal jurisdiction in this case.

Defendants present a factual attack on subject matter jurisdiction, asserting (1) that each Defendant made a *unilateral* decision to refuse Plaintiff's request to act as her alternate provider, based in large part on their concerns about her quality of care; (2) that Defendants did not prevent Plaintiff from practicing infectious disease in Gainesville because she could have gotten privileges from Shands or the VA; (3) that Plaintiff suffered no injury at all because she's earning more money now in Ocala than she ever did when she practiced infectious disease in Gainesville prior to her attempt to reapply for privileges and she can only speculate as to how successful her private practice would be in Gainesville had she obtained privileges at NFRMC; and (4) Defendants' actions had no "anticompetitive effect," as Plaintiff is the only individual **[*9]** affected by Defendants' actions (i.e., no evidence suggests that patient costs have increased at NFRMC or that patients have lost services at NFRMC based on Plaintiff's inability to obtain privileges and open her own private practice).

The parties agree that a factual attack on subject matter jurisdiction allows this Court to consider matters outside the pleadings without converting the motion into a summary-judgment motion. And Plaintiff correctly notes that in cases where the dispute concerning subject matter jurisdiction implicates the merits of the underlying claim, this Court should apply the summary-judgment standard when evaluating Defendants' factual attacks. In this case, Defendants' attack on subject matter jurisdiction implicates the merits of Plaintiff's federal antitrust claim, because it goes to the heart of whether Plaintiff suffered an antitrust injury at all.

Section 1 of the Sherman Act is actionable by private individuals only through *section 4* of the Clayton Act. *See* *15 U.S.C. § 15*. *Section 4* of the Clayton Act authorizes suits for treble damages by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." *Id.* at *§ 15(a)*. But "private individuals who do **[*10]** not qualify for Clayton Act standing may not bring a damage action for antitrust violations." *Feldman v. Palmetto Gen. Hosp., Inc., 980 F. Supp. 467, 468-69 (S.D. Fla. 1997)*.

"Standing to sue under the Sherman and Clayton Acts is a question of law." *Id.* (citing *Austin v. Blue Cross and Blue Shield of Alabama, 903 F.2d 1385, 1387 (11th Cir. 1990))*. A plaintiff has antitrust standing when she alleges facts showing that she (1) has suffered an "antitrust injury," and (2) that she is "an efficient enforcer of the antitrust laws." *See* *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1449 (11th Cir. 1991)*.

An "antitrust injury" is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. "[A]n antitrust plaintiff must allege and show that his own injury coincides with the public detriment from the alleged violation thereby increasing the likelihood that public and private enforcement will further the same goal of increased competition." *Feldman, 980 F. Supp. at 469* (citing *Todorov, 921 F.2d at 1450*). But "[a]ntitrust law does not require that the defendant be the exclusive cause of plaintiff's injury but only a 'material' one." *Gulf States Reorg. Grp., Inc. v. Nucor Corp., 466 F.3d 961, 965 (11th Cir. 2006)* (quoting *Cable Holdings of Georgia, Inc. v. Home Video, Inc., 825 F.2d 1559, 1561-62 (11th Cir. 1987))*. At its core, "the standing inquiry . . . ensures that the plaintiff's demand for relief ultimately serves the purpose of ***antitrust law*** to increase consumer choice, lower prices and assist competition, not competitors." *Doctor's Hosp. of Jefferson, Inc. v. Se. Med. Alliance, Inc., 123 F.3d 301, 306 (5th Cir. 1997)*.

Plaintiff asserts her injury was exclusion **[*11]** from "the market of private practitioners of [infectious disease] medicine in Gainesville," due to Defendants' collective decision not to be her alternate provider when she reapplied for privileges at NFRMC. ECF No. 41 at 9. In other cases, the Eleventh Circuit has held that an antitrust plaintiff's alleged exclusion from the relevant market "is inseparable from the alleged harm to competition." *Nucor, 466 F.3d at 967*. Indeed, the Eleventh Circuit "has recognized . . . that an attempt to enter a market coupled with a showing of preparedness is sufficient to establish an injury in fact." *Thompson v. Metro. Multi-List, Inc., 934 F.2d 1566, 1572 (11th Cir. 1991)*.

Plaintiff testified that members in the community wanted more choices for outpatient care for infectious disease services in Gainesville. And this record presents a factual dispute as to whether Defendants' refusals to be Plaintiff's alternative provider were coordinated instead of unilateral. Both Defendant Kima and Dr. Mauceri admit that some discussion occurred between the four private infectious disease physicians in Gainesville about their shared desire not to give up on-call days or serve as Plaintiff's alternate provider. Finally, based on this record, there's a clear dispute as to whether Plaintiff would have been **[*12]** able to open her own private practice in infectious disease had she obtained privileges at Shands or the VA (or simply attempted to open up shop without first obtaining privileges at NFRMC). *See* ECF No. 41-11 at 62 ("Shands will not allow any of their employees to work outside of the confines of Shands Hospital . . . ."); ECF No. 41-4 at 43-44. In short, these disputed issues of fact prevent this Court from determining as a matter of law that Plaintiff hasn't established an antitrust injury.

Assuming Plaintiff has suffered some antitrust injury, she must also be an "efficient enforcer" of the antitrust laws to have antitrust standing in this case. To determine whether an antitrust plaintiff is an "efficient enforcer," courts generally consider several factors including: (1) the directness or indirectness of the asserted injury; (2) the remoteness of the injury; (3) whether other potential plaintiffs were better suited to vindicate the harm; (4) whether the damages were highly speculative; (5) the extent to which the apportionment of damages was highly complex and would risk duplicative recoveries; and (6) whether the plaintiff would be able to efficiently and effectively enforce the **[*13]** judgment. *Sunbeam Television Corp. v. Nielsen Media Research, Inc., 711 F.3d 1264, 1271 (11th Cir. 2013)*.

Other courts addressing similar claims within the medical services and credentialing context have found that patients, third-party payors, and the government are often better suited to pursue antitrust claims based on competitors' anticompetitive conduct. For example, in *Ginzburg v. Mem'l Healthcare Sys., Inc., 993 F. Supp. 998 (S.D. Texas 1997)*, a neonatologist sued other neonatologists at the hospital where she practiced for antitrust violations due to, among other things, her competitors' alleged refusals to provide coverage for her patients and to refer patients to her. The neonatologist claimed her competitors refused to deal with her to drive her from the market for neonatal services, which allegedly decreased both patient choice options and the quality of care.

Assuming such an antitrust injury occurred, the district court held that it would be the hospital's "patients and third party payors, not Ginzburg, who are actually injured by Defendants' allegedly unlawful conduct." *Id. at 1020*. "[The hospital's] patients and third party payors have a strong, nonconflicted interest in assuring that neither quality of care nor patient choice options at [the hospital] are diminished by anticompetitive conduct." *Id.* The neonatologist, on the other hand, "has an **[*14]** indisputable business interest at stake—that of retaining her privileges to see patients at [the hospital] and in gaining a greater percentage of referrals currently directed towards her competitors." *Id.*

Similarly, in *Robles v. Humana Hosp. Cartersville, 785 F. Supp. 989 (N.D. Ga. 1992)*, the district court held that an obstetrician was not an "efficient enforcer" to pursue antitrust claims against the hospital and doctors involved in the revocation of his hospital privileges. The court identified two other groups with "a stronger interest [than the obstetrician's] in ensuring that prices and services remain at competitive levels"—obstetric patients and the government. *Id. at 999*. On the other hand, the court noted, the obstetrician's "only interest is that *he* be allowed to compete in Bartow County, not that patients receive quality services at competitive prices." *Id.* (emphasis in original); *see also* *Pierson, 619 F. Supp. 2d at 1277* (physician not an efficient enforcer because his interests didn't coincide with patients' interests); *Feldman, 980 F. Supp. at 470* (same).

Defendants' alleged conduct—conspiracy to exclude Plaintiff from the market of private infectious disease physicians in Gainesville—harms competition by decreasing consumer choice. Defendants and Dr. Maurceri operated the only private practices specializing **[*15]** in infectious disease in Gainesville at the time Plaintiff applied for privileges at NFRMC. Dr. Maurceri has since retired. Gainesville's market for private infectious disease services has therefore shrunk since Plaintiff was allegedly blocked from entering the market. And Plaintiff's testimony identifies consumers who are looking for more choices than what the market currently has to offer. The question, then, is whether Plaintiff is the appropriate party to pursue the interests of ***antitrust law***; namely, "to increase consumer choice, lower prices and assist competition, not competitors." *Doctor's Hosp., 123 F.3d at 306*. Defendants argue that Plaintiff is not an "efficient enforcer."

This Court agrees. Those potential patients seeking more choices in Gainesville for quality infectious disease care at competitive prices are better suited than Plaintiff to pursue an antitrust claim against Defendants.

Moreover, Plaintiff's damages are speculative. She admits that she's not entitled to or guaranteed any patient referrals, even if she obtains privileges at NFRMC. *See* ECF No. 41-10 at 240. And she testified that she has "no idea whether [she'd] make more or less" than she currently makes practicing infectious disease in **[*16]** Ocala. *Id.* at 137. All things considered, Plaintiff is not an "efficient enforcer" to bring this sort of antitrust claim.

III

Alternatively, Defendants move to dismiss for failure to state a claim upon which relief can be granted because (1) Plaintiff hasn't alleged sufficient facts to show Defendants' alleged conduct affected interstate commerce, and (2) Plaintiff's allegations only show that Defendants acted unilaterally. Neither argument carries much weight.

"[T]he essence of any violation of § 1 [of the Sherman Act] is the illegal agreement itself[,] rather than the overt acts performed in furtherance of it." *Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 330, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991)* (citation omitted). "[P]roper analysis focuses, not upon actual consequences, but rather upon the potential harm that would ensue if the conspiracy were successful." *Id.* Plaintiff "need not allege, or prove, an *actual effect* on interstate commerce to support federal jurisdiction." *Id.* (emphasis added). Rather, factual allegations that "demonstrate a substantial effect on interstate commerce generated" by Defendants' provision of medical services are sufficient. *McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 242, 100 S. Ct. 502, 62 L. Ed. 2d 441 (1980)* ("Petitioners need not make the more particularized showing of an effect on interstate commerce caused by the alleged conspiracy **[*17]** to fix commission rates, or by those other aspects of respondents' activity [that are] alleged to be unlawful."); *see also* *Shahawy v. Harrison, 778 F.2d 636, 641 (11th Cir. 1985)* ("We hold, therefore, that pleading Sherman Act jurisdiction requires allegations that defendant's business activities have a substantial impact on interstate commerce.").

Plaintiff's allegations in this case satisfy *McLain*'s pleading standard. The complaint alleges that Defendants each provide medical care to out-of-state patients, that they accept Medicare and Medicaid payments for their services in addition to out-of-state private insurance payments, and that they accept credit card payments involving out-of-state financial institutions. ECF No. 1 at 2-3. Plaintiff further alleges that Defendants Kima and Thomas purchase out-of-state supplies for their private practices. *Id.* at 2. And all three Defendants provide their services at a hospital that is undoubtedly involved in interstate commerce. Considered together, these allegations "demonstrate a substantial effect on interstate commerce" generated by Defendants' business activities.

"An antitrust complaint must include allegations plausibly suggesting (not merely consistent with) an illegal agreement among the defendants." **[*18]** *Quality Auto Painting Ctr. of Roselle, Inc. v. State Farm Indem. Co., 870 F.3d 1262, 1270 (11th Cir. 2017)* (citation and quotation marks omitted). This Court has already noted that the record presents a factual dispute as to whether an agreement or conspiracy existed between the Defendants. But even limiting this Court's review to the four corners of the complaint, Plaintiff's factual allegations plausibly suggest an illegal, anticompetitive agreement among Defendants to exclude her from entering Gainesville's market for private infectious disease physicians.

The complaint sets out allegations describing the unique circumstances governing the market for private infectious disease services in Gainesville. A small group of doctors operate the only private practices specializing in infectious disease in town, and all of them have privileges at NFRMC. These same doctors refused to act as Plaintiff's "alternate provider" when she attempted to reapply for privileges at NFRMC. Defendants allegedly came to this decision together after meeting in February 2014 and discussing Plaintiff's plan to open a new private infectious disease practice in Gainesville and agreeing that none of them would give up any on-call days or agree to be Plaintiff's alternate provider. Defendants allegedly "entered into **[*19]** [this agreement] in order to exclude [Plaintiff] from the market of NFRMC [infectious disease] referrals and thereby reserve the associated profits for themselves." ECF No. 1 at 16.

IV

Despite pleading sufficient facts to state a plausible claim for relief, Plaintiff still lacks standing to pursue her antitrust claim. Plaintiff is not an "efficient enforcer." Accordingly, Defendants' motion to dismiss, ECF No. 32, is **GRANTED**. Plaintiff's federal antitrust claim, Count I, is dismissed. This Court declines to exercise jurisdiction over the remaining state-law claims. *See* *28 U.S.C. § 1367(c)(3)*. The parties are not diverse, nor has Plaintiff made any argument as to why her remaining state-law claims should not also be dismissed. The remaining claims are dismissed without prejudice, and the Clerk shall close the file.

SO ORDERED on January 3, 2018.

For Core-Mark International Inc, Defendant: Bambo Obaro, David R Singh, LEAD ATTORNEYS, PRO HAC VICE, WEIL GOTSHAL AND MANGES LLP, Redwood Shores, CA; Khale J Lenhart, LEAD ATTORNEY, HIRST APPLEGATE LLP, Cheyenne, WY; Travis W Koch, OVERSTREET HOMAR & KUKER, Cheyenne, WY.

Judges: NANCY D. FREUDENTHAL, CHIEF UNITED STATES DISTRICT JUDGE.

Opinion by: NANCY D. FREUDENTHAL

Opinion

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANT'S MOTION TO DISMISS

This matter is before the Court on Defendant's Motion to Dismiss Plaintiffs' Amended Complaint (Doc. 24). The Court has considered the motion, response, and reply, and is fully informed in the premises. For the following reasons, Defendant's Motion to Dismiss is GRANTED IN PART AND DENIED IN PART.

BACKGROUND

Plaintiffs Wyoming Beverages, Inc. ("Wyoming Beverages") and Birrell Bottling **[*2]** Company, Inc. ("Birrell Bottling") are bottlers and distributors of PepsiCo, Inc. ("PepsiCo") branded soft drinks.[1] Admiral Beverage Corporation is a corporation owned by seven independent bottling companies, including Wyoming Beverage. Birrell Bottling is a subsidiary of Admiral Beverage. Plaintiffs claim Admiral Beverage and its subsidiaries are the exclusive licensed manufacturers, sellers, and distributors of PepsiCo brands for a large portion of the Rocky Mountain region. Plaintiff Torrington Beverage, Inc. ("Torrington Beverage") is Wyoming Beverages' authorized sub-distributor of PepsiCo products in a portion of Wyoming Beverages' exclusive market. Wyoming Beverage is a licensed PepsiCo bottler that operates in several counties in eastern Wyoming. Birrell Bottling is a licensed PepsiCo bottler operating in the Provo, Utah and Springville, Utah markets.

Plaintiffs allege Wyoming Beverages and Birrell Bottling are parties to hundreds of trademark licensing agreements, known as Exclusive Bottling Agreements ("EBAs") with PepsiCo. Plaintiffs assert through the EBAs, PepsiCo granted them a license authorizing them to serve as the exclusive manufacturer, distributor, and seller of PepsiCo **[*3]** soft drink products in their defined geographic territories in Wyoming and Utah.

Core-Mark International, Inc. ("Coremark") has a nationwide broad-line distribution business in the food and beverage industry. On March 26, 2015, PepsiCo sent a letter to Core-Mark demanding Core-Mark stop engaging in unauthorized sales of PepsiCo bottle and can products in the exclusive territory of another bottler. Plaintiffs allege Core-Mark is "transshipping", which is the manufacture, distribution, or sale of PepsiCo products in a bottler's territory by anyone other than the licensed bottler. Plaintiffs allege that Core-Mark began transshipping PepsiCo products to customers in Plaintiffs' exclusive territories in early 2017. Specifically, Plaintiffs allege Core-Mark transshipped PepsiCo products in the Casper and Cheyenne markets, which are Wyoming Beverages' exclusive markets and are serviced by Torrington Beverage, and the Provo and Springville, Utah markets, which are Birrell Bottling's exclusive territory.

Core-Mark seeks to dismiss Plaintiffs' Amended Complaint.

LEGAL STANDARD

It is well-settled that "a judge ruling on a defendant's motion to dismiss a complaint, 'must accept as true all factual **[*4]** allegations contained in the complaint.'" *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 572, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citations omitted). The Court must also view the allegations in the light most favorable to the nonmoving party. *See* *Sutton v. Utah State Sch. for Deaf & Blind, 173 F.3d 1226, 1236 (10th Cir. 1999)*.

When ruling on a motion to dismiss for failure to state a claim, it is not the Court's function "to weigh [the] potential evidence that the parties might present at trial, but to assess whether the plaintiff's complaint alone is legally sufficient to state a claim for which relief may be granted." *Miller v. Glanz, 948 F.2d 1562, 1565 (10th Cir. 1991)*. To survive a motion to dismiss, the plaintiffs "complaint must contain sufficient factual matter . . . to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). Plausibility requires the plaintiff to plead "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. This standard "is not akin to a 'probability requirement,' but asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (citation omitted). Thus, although the plaintiff does not need to provide detailed factual allegations, the complaint must contain more than mere "labels," "conclusions," and "formulaic recitations of the elements of a cause of action." **[*5]** *Twombly, 550 U.S. at 555*.

---

[1] In Plaintiffs' Amended Complaint and in their Response to Defendant's Motion to Dismiss, Plaintiffs Wyoming Beverages and Birrell Bottling bring claims under the name "Admiral Beverages." Admiral Beverages is not a party to this lawsuit. Plaintiffs clarify that they collectively refer to Wyoming Beverages and Birrell Bottling as "Admiral Beverage," while the term "Plaintiffs" refers to Wyoming Beverages, Birrell Bottling, and Torrington Beverage. (Doc. 21 at 2; Doc. 33 at 2).

DISCUSSION

In their Amended Complaint, Plaintiffs assert several claims. Plaintiffs assert claims under the *Soft Drink Interbrand Competition Act* ("the Soft Drink Act"), tortious interference with contract, tortious interference with a business expectancy, the *Declaratory Judgment Act*, and a false advertising claim under the *Lanham Act*. Core-Mark argues Plaintiffs' claims should be dismissed for failure to state a claim upon which relief can be granted.

Soft Drink Interbrand Competition Act

Plaintiffs assert a claim for relief under the Soft Drink Act. Core-Mark argues that the Soft Drink Act does not create a private right of action and Congress did not intend to create a private right of action under the Act. Thus, the question for the Court is whether the Soft Drink Act creates a private right of action.

"The question of the existence of a statutory cause of action is, of course, one of statutory construction." *Touche Ross & Co. v. Redington, 442 U.S. 560, 568, 99 S. Ct. 2479, 61 L. Ed. 2d 82 (1979)*. "[The fact that a federal statute has been violated and some person harmed does not automatically give rise to a private cause of action in favor of that person." *Id.* (quoting *Cannon v. University of Chicago, 441 U.S. 677, 688, 99 S. Ct. 1946, 60 L. Ed. 2d 560 (1979)*). The Court's task is "limited solely to determining whether Congress intended to create the private **[*6]** right of action asserted." *Id.* "The question whether a statute creates a cause of action, either expressly or by implication, is basically a matter of statutory construction, such that what must ultimately be determined is whether Congress intended to create the private remedy asserted." *Southwest Air Ambulance, Inc. v. City of Las Cruces, 268 F.3d 1162, 1169 (10th Cir. 2001)* (quoting *Transamerica Mortgage Advisors, Inc. v. Lewis, 444 U.S. 11, 16, 100 S. Ct. 242, 62 L. Ed. 2d 146 (1979)* (quotation marks omitted)). The analysis begins with the text and structure of the statute to discern Congress's intent. *Alexander v. Sandoval, 532 U.S. 275, 288, 121 S. Ct. 1511, 149 L. Ed. 2d 517 (2001)*.

Section 3501 of the Soft Drink Act states:

> Nothing contained in any ***antitrust law*** shall render unlawful the inclusion and enforcement in any trademark licensing contract or agreement, pursuant to which the licensee engages in manufacture (including manufacture by a sublicensee, agent, or subcontractor), distribution, and sale of a trademarked soft drink product, of provisions granting the licensee the sole and exclusive right to manufacture, distribute, and sell such product in a defined geographic area or limiting the licensee, directly or indirectly, to the manufacture, distribution, and sale of such product only for ultimate resale to consumers within a defined geographic area: *Provided*, That such product is in substantial and effective competition with other products of the same **[*7]** general class in the relevant market or markets.

15 U.S.C. § 3501.

First, *§ 3501* states, "Nothing contained in any ***antitrust law*** shall render unlawful the inclusion and enforcement[,] in any trademark licensing contract or agreement[,] . . . of provisions granting the licensee the sole and exclusive right to manufacture, distribute, and sell such product in a defined geographic area . . . ." *Section 3501* also states, "Nothing contained in any ***antitrust law*** shall render unlawful the inclusion and enforcement[,] in any trademark licensing contract or agreement, . . . of provisions . . . limiting the licensee, directly or indirectly, to the manufacture, distribution, and sale of such product only for ultimate resale to consumers within a defined geographic area . . . ." On its face, *§ 3501* permits enforcement of provisions in EBAs that grant or limit a licensee's right to manufacture, distribute, and sell the products in a defined geographic area.

Finally, *§ 3501* provides a limitation on the inclusion and enforcement of provisions granting and/or limiting a licensee's right to manufacture, distribute, and sell products in a defined geographic area. It states these provisions are lawful and enforceable "[p]rovided, [t]hat such product **[*8]** is in substantial and effective competition with other products of the same general class in the relevant market or markets."

Plaintiffs assert the language of § 3501 creates a private right of action because it "authorizes the 'enforcement' of 'provisions' in 'trademark licensing' agreements 'granting the licensee the sole and exclusive right to manufacture, distribute, and sell such products in a defined geographic area." (Doc. 33 at 2 [Resp. Mot. Dismiss]). Plaintiffs claim the language of § 3501 clearly creates a private right of action. The Third Circuit found, "[t]he Act explicitly provides for the 'enforcement' of agreements limiting extraterritorial sales both 'directly and indirectly,' and is aimed at combatting both bottler and third parties who transship." Com. of Pa. ex rel. Zimmerman v. PepsiCo, Inc., 836 F.2d 173, 177 (3rd Cir. 1988). Plaintiffs argue the *Zimmerman* Court found a private right of action under § 3501. However, in *Zimmerman*, the State of Pennsylvania brought an action against PepsiCo for violations of antitrust laws after PepsiCo took actions against a bottler to prevent transshipping. The *Zimmerman* Court found § 3501 permits PepsiCo to enforce its EBAs with bottlers by taking actions against bottlers who are involved in transshipping in violation of the EBAs. Thus, in *Zimmerman*, PepsiCo's enforcement **[*9]** of a bottler's exclusive territory did not violate antitrust laws.

Here, Plaintiffs argue the Act provides a cause of action to enforce EBAs against third parties. While the language of § 3501 appears to permit enforcement of provisions granting a bottler the exclusive right to manufacture and distribute PepsiCo products, the language of the Act does not clearly indicate against whom the agreements may be enforced.

Turning to the structure of the Act, § 3502 clarifies that § 3501 does not legalize provisions in trademark licensing agreements that would otherwise be unlawful under antitrust laws. Section 3502 states, "[n]othing in this chapter shall be construed to legalize the enforcement of provisions described in section 3501 . . . in trademark licensing contracts or agreements . . . by means of price fixing agreements, horizontal restraints of trade, or group boycotts, if such agreements, restraints, or boycotts would otherwise be unlawful." 15 U.S.C. § 3502. Thus, § 3502 acknowledges that certain licensing agreement provisions are enforceable under § 3501, by clarifying that certain provisions are not enforceable if they are otherwise unlawful. Thus, while the structure of the Act reiterates the enforceability of exclusive territorial provisions, it **[*10]** does not clearly state the context of their enforcement or against whom they may be enforced. As such, the structure of the Act does not clearly create a private right of action.

Plaintiffs argue the legislative history of the Soft Drink Act clearly indicates Congress's intent to create a private right of action. Congress enacted the Act in the wake of several Supreme Court decisions and a Federal Trade Commission investigation into the soft drink industry.

> In 1967, the Supreme Court, in the now overruled *Schwinn* decision, held that, under certain circumstances, manufacturer-imposed territorial restraints are *per se* illegal under section 1 of the Sherman Act. United States v. Arnold, Schwinn & Co., 388 U.S. 365, 382, 87 S.Ct. 1856, 1867, 18 L.Ed.2d 1249 (1967). The *Schwinn* decision helped launch a Federal Trade Commission investigation into soft drink industry distribution practices. In 1971, that investigation culminated in the filing of complaints against seven soft drink syrup companies.
>
> During the pendency of those actions, the Supreme Court overruled the *Schwinn* decision in Continental T.V. Inc. v. GTE Sylvania Inc., 433 U.S. 36, 97 S.Ct. 2549, 53 L.Ed.2d 568 (1977). In *Sylvania*, the Court held that the law should "return to the rule of reason that governed vertical restrictions prior to *Schwinn*." Id. at 59, 97 S.Ct. at 2562. In 1978, relying in part on *Sylvania*, the FTC ruled that certain territorial restrictions **[*11]** existing in the soft drink industry were unlawful. Coca Cola Co., 91 F.T.C. 517 (1978), 642 F.2d 1387, 207 U.S. App. D.C. 1 (D.C.Cir.1981) (remanding for dismissal); PepsiCo, Inc., 91 F.T.C. 680 (1978), 642 F.2d 1387, 207 U.S. App. D.C. 1 (D.C.Cir.1981) (same). Those decisions were the primary stimuli to the enactment of the Soft Drink Act in 1980.
>
> The Soft Drink Act was adopted after Congress conducted an intensive investigation into the soft drink industry. In passing the Act, Congress determined that the exclusive territorial distribution agreements common to the soft drink industry warranted protection because that industry was a prototype of industries in which territorial restraints foster interbrand competition. *See* H.REP. NO. 1118, *reprinted in* 1980 U.S. Code Cong. & Admin. News at 2377. Such restraints encourage each bottler to invest and promote in his own territory, and prevent "free riding" by sellers from outside the territory on the bottler's investment and effort.

Zimmerman, 836 F.2d at 175-76.

The legislative history also discusses the enforcement of territorial provisions. The House Report states, "[i]t is the intent and purpose of the Committee that the territorial agreements used in the soft drink industry shall be lawful and may be judicially enforced . . . ." H.R. REP. NO. 96-1118, at 5 (1980). The Senate Report explained **[*12]** the two purposes of the Act: 1. Permit exclusive territorial agreements in the soft drink industry, which would otherwise be illegal under antitrust laws; 2. "if the requirements of the bill are met, the relevant territorial provisions are not only lawful, but also enforceable through judicial proceedings." S. REP. NO. 96-645 at 10 (1980). The Senate Report further states, "[T]he exclusive territorial rights of one licensee are protected from the direct or indirect sales by the licensor or any of its other licensees into his defined geographic area . . . ." *Id.* The House Report recognizes the soft drink industry should be permitted to continue to use the exclusive territorial agreements and "to enforce them in accordance with their contractual rights." H.R. REP. NO. 96-1118 at 20 (1980).

In support of the Act, Representative Robert McClory stated the bill provided that the antitrust laws should not upset EBAs between bottlers and syrup manufacturers and those EBAs could be enforced. *Id.* at 23. "But it is well-established law that a contract—no matter what it claims to accomplish—can be enforced only against those who are parties to, and bound by, the contract. But since this bill does not itself **[*13]** establish territories, there can be no general enforcement." *Id.* "In sum, a contract between A and B is not enforceable against C and is enforceable against A or B only if certain competitive requirements of [the bill] have been met." *Id.* Thus, the legislative history indicates that Congress enacted the Act to permit soft drink syrup companies and bottlers to enter into exclusive territorial agreements without violating antitrust laws. The statements about enforcement do not provide general enforcement of territorial rights beyond the contracts between the syrup companies and bottling companies.

Here, the language and structure of the statute, as well as the legislative history, indicate Congress intended to permit the enforcement of exclusive territorial agreements in EBAs. However, the legislative history indicates Congress did not intend the Act to create a private right of action to enforce EBAs. Instead, the legislative history, the language of the statute and the structure of the Act indicate Congress intended to permit syrup companies and bottlers to enter into exclusive territorial agreements, without violating antitrust laws.

For all these reasons, the Court finds the Soft Drink **[*14]** Act does not provide for a private right of action. As such, Plaintiffs' claim under the Soft Drink Act in Count I is DISMISSED WITH PREJUDICE.

Tortious Interference Claims (Counts III, IV, V, VI)

Plaintiffs allege several tortious interference claims against Core-Mark. In Count III, Plaintiffs allege Core-Mark tortiously interfered with contracts between PepsiCo and Wyoming Beverages and interfered with Birrell Bottling's contracts. In Count IV, Plaintiffs claim Core-Mark tortuously interfered with Wyoming Beverages' and Birrell Bottling's business expectancies. In Count V, Plaintiffs allege Core-Mark tortiously interfered with Torrington Beverage's contract with Wyoming Beverages. In Count VI, Plaintiffs also assert Core-Mark interfered with Torrington Beverage's business expectancy.

Wyoming Beverages' and Torrington Beverage's claims for tortious interference occurred in Wyoming, while Birrell Bottling's claim arose in Utah. The Court has diversity jurisdiction over these claims pursuant to *28 U.S.C. § 1332*. As such, the substantive law of the forum state applies, including the forum state's choice of law rules. *Pepsi-Cola Bottling Co. of Pittsburg v. PepsiCo, Inc., 431 F.3d 1241, 1255 (10th Cir. 2015)* (citing *Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 495-97, 61 S. Ct. 1020, 85 L. Ed. 1477 (1941)*; *New York Life Ins. Co. v. K.N. Energy, Inc., 80 F.3d 405, 409 (10th Cir. 1996))*. In this case, Wyoming is the forum state. The Wyoming Supreme Court has held, **[*15]** "as a general rule . . . the law of the place where the tort or wrong has been committed[] is the law that governs and is to be applied with respect to the substantive phases of torts . . . ." *Boutelle v. Boutelle, 2014 WY 147, ¶ 12, 337 P.3d 1148, 1153 (Wyo. 2014)*.

Plaintiffs Wyoming Beverages and Torrington Beverage allege Core-Mark tortiously interfered with their contracts and business expectancies in Wyoming. Plaintiff Birrell Bottling alleges Core-Mark tortiously interfered with its contracts and business expectancies in Utah. As such, Wyoming law applies to Wyoming Beverages' and Torrington Beverage's claims, and Utah law applies to Birrell Bottling's tortious interference claims.[2]

A. Wyoming Beverages

Wyoming Beverages claims Core-Mark tortiously interfered with its contracts and tortiously interfered with its business expectancy.

1. Tortious *Interference* with Contract (Count III)

In Wyoming, to sustain a cause of action for tortious interference with contract the following elements must be shown:

> (1) The existence of a valid contractual relationship or business expectancy; (2) knowledge of the relationship or expectancy on the part of the interferer; (3) intentional and improper interference inducing or causing a breach or termination of the relationship **[*16]** or expectancy; and (4) resultant damage to the party whose relationship or expectancy has been disputed.

Gore v. Sherard, 2002 WY 114, ¶ 13, 50 P.3d 705 (2002).

The Wyoming Supreme Court adopted the definition of the tort of intentional interference with a contract as found in *Restatement (Second) of Torts § 766*. *First Wyoming Bank, Casper v. Mudge, 748 P.2d 713, 715 (1988)*; *Davenport v. Epperly, Wyo. 744 P.2d 1110, 1111 (1987)*. *Section 766* provides:

> One who intentionally and improperly interferes with the performance of a contract (except a contract to marry) between another and a third person by inducing or otherwise causing the third person not to perform the contract, is subject to liability to the other for the pecuniary loss resulting to the other from the failure of the third person to perform the contract.

Mudge, 748 P.2d at 715 (citing *Restatement (Second) of Torts, § 766* (1979)). Thus, *§ 766* permits claims for tortious interference of contract when the plaintiff alleges the defendant's interference is causing a third party to breach its contract with the plaintiff.

Wyoming Beverages claim Core-Mark is causing Wyoming Beverages to breach provisions of its own EBAs with PepsiCo. However, Wyoming Beverages fails to claim Core-Mark is causing a third party to breach its contracts with Wyoming Beverages, as is actionable under *§ 766*. Instead, Core-Mark argues Wyoming Beverages' claim must be dismissed because Wyoming Beverages' claim is in-line with *Restatement (Second) of Torts § 766A*, which **[*17]** Wyoming has declined to adopt. Therefore, Core-Mark argues, Wyoming Beverages' claim for tortious interference with a contract should be dismissed because a tortious interference claim based on Wyoming Beverages' own failure to perform its contracts is not actionable under Wyoming law.

The Wyoming Supreme Court has rejected *Restatement (Second) of Torts § 766A* which recognizes tortious interference claims based on Defendant's interference with Plaintiffs' contracts with a third party causing Plaintiff to breach its own contracts. *Birt v. Wells Fargo Home Mortg., Inc, 2003 WY 102, ¶¶ 71-73, 75 P.3d 640*; *Price v. Sorrell, 784 P.2d 614, 615 (Wyo. 1989)*. "*[Section] 766A* deals with the situation where A may be liable to B for preventing B from performing a contract between B and C." *Birt*, 2003 WY at ¶ 72. Instead, the Wyoming Supreme Court has only adopted *Restatement (Second) of Torts § 766* which recognizes tortious interference with contract

[2] Core-Mark moves to dismiss Birrell Bottling's claims under Wyoming law. Core-Mark stated it "will assume that Wyoming law applies to Plaintiffs' tortious interference claims solely for the purposes of this motion, but reserves the right to challenge Plaintiffs' choice of Wyoming law at a later time." (Doc. 25 at 9 n. 5 [Memo. in supp. mot. to dismiss]). While the Court has applied Utah law to Birrell's claims, it appears the same result would occur under either application of the law.

claims when Defendant interferes with a contract between Plaintiff and third party and Defendant's interference causes third party to breach its contract with Plaintiff. *Birt*, 2003 WY at ¶ 72.

Here, Wyoming Beverages allege Core-Mark's interference with their contracts caused Wyoming Beverages to breach its own contracts with third parties, including its own EBAs with PepsiCo. Wyoming Beverages' tortious interference with contract claim is premised **[*18]** on the same factual scenario as *§ 766A*, which the Wyoming Supreme Court declined to adopt. Therefore, Wyoming Beverages' claim is not sufficient to establish a claim for tortious interference with contract.

While Wyoming Beverages has failed to allege that Core-Mark caused a third party to breach its contracts with Wyoming Beverages, the Court will dismiss this claim without prejudice, in the event Wyoming Beverages can plead facts to support its claim for tortious interference with contract. As such, Plaintiff Wyoming Beverages' tortious interference with contract claim in Count III is DISMISSED WITHOUT PREJUDICE.

2. Tortious Interference with Business Expectancy (Count IV)

In Wyoming, to state a claim for tortious interference with a business expectancy, Plaintiff must allege the following elements: "(1) the existence of a valid contractual relationship or business expectancy; (2) knowledge of the relationship or expectancy on the part of the interferor; (3) intentional and improper interference inducing or otherwise causing a breach or termination of the relationship or expectancy; and (4) resultant damage to the party whose expectancy has been disrupted." *Gore, 2002 WY 114, 50 P.3d 705, 710 (Wyo. 2002)*.

Core-Mark argues Wyoming Beverages **[*19]** fails to allege the existence of a valid business expectancy because Wyoming Beverages failed to identify specific customers with whom it had a business expectancy. However, both parties acknowledge that in order to allege a claim for tortious interference with a business expectancy, no Wyoming court has required the plaintiff to identify specific third parties with whom they claim to have a business expectancy. (Doc. 25 at 16 [Memo. in supp. mot. Dismiss]; Doc. 33 at 28 [Resp. to mot. dismiss]).

Wyoming Beverages alleges through the EBAs, PepsiCo granted Admiral Beverage the exclusive right to distribute PepsiCo products in its exclusive territory. Pursuant to an EBA with PepsiCo, Wyoming Beverages alleges it is a licensed bottler operating within its exclusive territory in several counties in southeastern Wyoming. (Doc. 21 at 9 [Am. Compl.]). Wyoming Beverages asserts Core-Mark sells PepsiCo products to Wyoming Beverages' customers located in Wyoming Beverages' exclusive territory without authorization, thereby transshipping PepsiCo products in Wyoming Beverages' exclusive territory. According to the EBAs, only PepsiCo or Admiral Beverage can permit an entity to manufacture or distribute PepsiCo products within Admiral's exclusive territory and **[*20]** Wyoming Beverages' alleges Core-Mark has not been authorized to distribute PepsiCo products in its exclusive territory. (Doc. 21 at 84 [Ex. 4]). Wyoming Beverages asserts it expects to be the sole source of PepsiCo products in its exclusive territory, pursuant to the EBAs with PepsiCo; therefore, Wyoming Beverages' expected to be its customers' sole source of its PepsiCo products. (Doc. 33 at 27-28 [Resp. mot. dismiss]).

Wyoming Beverages asserts Core-Mark had knowledge of the EBAs and its exclusive territory. Wyoming Beverages claims PepsiCo has sent Core-Mark multiple letters demanding that Core-Mark stop reselling PepsiCo products in the exclusive territory of any licensed bottler. On March 26, 2015, PepsiCo sent a letter to Core-Mark which stated:

> Our management has notified Core-Mark on numerous prior occasions, both at you headquarters and at the division level, that Core-Mark's sales of our Pepsi-Cola, Mountain Dew, and other bottle and can soft drinks are interfering with our relationship with our independent Pepsi-Cola bottlers and PepsiCo has asked Core-Mark to stop these sales. Our independent Pepsi-Cola bottlers have exclusive bottling appointments for their respective geographic territories and have spent decades developing relationships **[*21]** with their customers and growing sales of PepsiCo beverages.

(Doc. 21 at 84). PepsiCo also said this was the second time in six months that PepsiCo addressed an unauthorized sales issue with Core-Mark. (*Id.*). PepsiCo stated, "in my prior letter dated November 7, 2014, we have not authorized Core-Mark to act as our distributor of any bottler and can products, including Pepsi-Cola and Mountain Dew, anywhere in the US .... In addition, any reselling of products to another distributor is also not permitted." (*Id.*), PepsiCo's letter informed Core-Mark that unless the exclusive bottler in the territory grants Core-Mark the explicit authority to distribute PepsiCo products in the territory, then Core-Mark's "unauthorized sales will be viewed as tortious interference with the bottler's relationship with accounts in its bottling territory." (*Id.*), Additionally, Wyoming Beverages asserts Core-Mark was in the food and beverage distribution industry for many years and its distribution often overlapped with Admiral Beverage's. (Doc. 21 at 42 [Am. Compl.]). Thus, Wyoming Beverages asserts Core-Mark had knowledge of the EBAs and how its actions interfered with the EBAs and nonetheless, Core-Mark continued to distribute in Wyoming **[*22]** Beverages' exclusive territory.

In order to state a claim of tortious interference with a business expectancy, Wyoming Beverages must allege Core-Mark's conduct was improper. To determine if a defendant's intentional conduct was improper, the Wyoming Supreme Court has adopted the following factors:

(a) The nature of the actor's conduct,
(b) The actor's motive,
(c) The interests of the other with which the actor's conduct interferes,
(d) The interests sought to be advanced by the actor,
(e) The social interests in protecting the freedom of action of the actor and the contractual interests of the others,
(f) The proximity or remoteness of the actor's conduct to the interference, and
(g) The relations between the parties.

Toltec Watershed Impr. Dist. v. Johnston, 717 P.2d 808, 814 (Wyo. 1986) (quoting *Restatement (Second) of Torts § 766* (1979)).

In support of their argument that Core-Mark's conduct was improper, Wyoming Beverages claims the nature of Core-Mark's conduct is "indefensible under the Soft Drink Interbrand Competition Act" with which Core-Mark must comply. (Doc. 21 at 48 [Am. Compl.]). Wyoming Beverages also alleges Core-Mark continued to transship in Wyoming Beverages' territory after receiving multiple communications from PepsiCo demanding that Core-Mark stop transshipping because it violated PepsiCo's EBAs with **[*23]** bottlers. Wyoming Beverages asserts Core-Mark is "reselling expired and outdated product to customers and consumers," which is "diminishing interbrand competition," and is "harming the integrity of PepsiCo Brands." (*Id.* at 49). Wyoming Beverages claims Core-Mark's motives are improper because Core-Mark is "free-riding" off of Wyoming Beverages' "70-plus years of capital investments and brand development" to make short-term profits and steal Wyoming Beverages' exclusive customers. (*Id.*).

Wyoming Beverages claims their interests in its exclusive territories are both statutory, under the Soft Drink Act, and contractual under the EBAs. Wyoming Beverages also asserts it has an interest in "reaping the benefits of its massive capital investments, maintaining its customer relationships, engaging in effective marketing and promotional activities, and maximizing the sale of PepsiCo products in its territories." (*Id.*). Wyoming Beverages asserts Core-Mark does not have a legitimate interest in selling PepsiCo products in Wyoming Beverages' exclusive territory because Core-Mark does not have a right to sell PepsiCo products in Wyoming Beverages' exclusive territory.

Wyoming Beverages asserts when enacting **[*24]** the Soft Drink Act, Congress determined that "preserving exclusive territories benefits consumers and that transshipping hinders interbrand competition." (*Id.*). Additionally, bottlers' EBAs with PepsiCo are important because the EBAs "stimulate interbrand competition, encourage further bottler investment, promote customer service, and limit the volume of outdated product that reaches consumers." (*Id.* at 50).

Wyoming Beverages alleges Core-Mark's conduct is the direct cause of the interference preventing bottlers from performing their obligations under the EBAs which require bottlers to prevent transshipping. Finally, Wyoming

Beverages claims it does not have a professional relationship with Core-Mark, and PepsiCo has not granted Core-Mark a license to sell PepsiCo products in Plaintiffs' exclusive territories. For all these reasons, Wyoming Beverages has alleged Core-Mark's conduct was improper.

Wyoming Beverages must allege Core-Mark's intentional and improper interference caused a breach or termination of a business expectancy. Wyoming Beverages claims Core-Mark stole its customers by selling PepsiCo products in Wyoming Beverages' exclusive territories. Wyoming Beverages alleges Core-Mark "caused **[*25]** a termination of Admiral Beverage's relationships and business expectancies with any and all customer accounts and consumers located in its exclusive territories." (*Id.* at 51). Wyoming Beverages alleges Core-Mark's sales have caused them to suffer damage including lost profits, damage to the PepsiCo brand, damaged customer relationships, lost fountain soda contracts, injury to Admiral Beverage's businesses and goodwill. (*Id.* at 51).

For all of these reasons, Wyoming Beverages has stated a claim for tortious interference with a business expectancy. As such, Core-Mark's motion to dismiss Wyoming Beverages' tortious interference with a business expectancy claim in Count IV is DENIED.

B. Torrington Bottling

Torrington Bottling alleges Core-Mark tortiously interfered with its contract with Wyoming Beverages. Additionally, Torrington Beverage asserts Core-Mark tortiously interfered with its business expectancy. Torrington Beverage's tortious interference claims are identical to Wyoming Beverages' claims.

1. Tortious Interference with Contract (Count V)

Torrington Beverage alleges Core-Mark tortiously interfered with Torrington Beverage's contractual relationship with Wyoming Beverages. Specifically, Torrington **[*26]** Beverage alleges Core-Mark has caused it to breach its contract with Wyoming Beverages. This claim contains the same fatal argument as Wyoming Beverages' tortious interference with contract claim. Here, Torrington Beverage claims Core-Mark caused it to breach its own contracts with Wyoming Beverages. The Wyoming Supreme Court has declined to adopt *§ 766A* which permits these claims. Thus, Torrington Beverage has failed to allege Core-Mark caused a third party to breach its contracts with Torrington Beverage. While Torrington Beverage fails to allege a claim for tortious interference with contract, the Court will dismiss this claim without prejudice in the event Torrington Beverage can plead facts to support its claim for tortious interference with contract. As such, Plaintiff Torrington Beverage's claim for tortious interference with contract in Count V is DISMISSED WITHOUT PREJUDICE.

2. Tortious Interference with Business Expectancy (Count VI)

Torrington Beverage also asserts Core-Mark tortiously interfered with its business expectancy. Torrington Beverage has a contract with Wyoming Beverages, which grants Torrington Beverage the right to "resell and distribute PepsiCo products to any and **[*27]** all customers and accounts located in [Torrington Beverage's] designated segment of Wyoming Beverages' territory." (Doc. 21 at 55 [Am. Compl.]). Torrington Beverage's tortious interference with business expectancy is identical to Wyoming Beverages' claim. The Court found Wyoming Beverages asserted a claim for tortious interference with a business expectancy. For the same reasons, Torrington Beverage has also asserted a claim for tortious interference with business expectancy. As such, Core-Mark's motion to dismiss Torrington Beverage's tortious interference with a business expectancy claim in Count VI is DENIED.

C. Birrell Bottling

Plaintiff Birrell Bottling claims Core-Mark tortiously interfered with its contract and tortiously interfered with its business expectancy. Birrell Bottling's exclusive territories in Provo and Springville, Utah, and Birrell Bottling's tortious interference claims arise out of Core-Mark's actions in Utah. As such, the Court applies Utah law to Birrell Bottling's tortious interference claims.

To assert a claim for tortious interference in Utah, Birrell Bottling must allege: "(1) the defendant intentionally interfered with the plaintiff's existing or potential economic relations, (2) . **[*28]** . . by improper means, (3) causing injury to the plaintiff. *Eldridge v. Johndrow, 2015 UT 21, 345 P.3d 553, 565 (Utah 2015)*.

1. Tortious Interference with Contract (Count III)

Birrell Bottling alleges that Core-Mark caused it to breach its own contract with Wyoming Beverages. "A party is subject to liability for an intentional interference with *present* contractual relations if he intentionally and improperly causes one of the parties not to perform the contract." *St. Benedict's Development Co. v. St. Benedict's Hosp., 811 P.2d 194, 201 (Utah 1991)*.

Similar to Wyoming, the Utah Supreme Court has adopted *Restatement (Second) of Torts § 766*, stating, intentional interference with present contractual relations requires the plaintiff to allege the defendant, "intentionally and improperly interfered] with the performance of a contract . . . between another and a third person by inducing or otherwise causing the third person not to perform the contract." *Leigh Furniture and Carpet Co. v. Isom, 657 P.2d 293, 301 (Utah 1982)* (quoting citing *Restatement (Second) of Torts § 766* (1979)), *overruled on other grounds by Eldridge, 2015 UT 21, 345 P.3d 553*; *St. Benedict's Development Co. 811 P.2d at 201*.

While the Utah Supreme Court recognizes tortious interference claims pursuant to *§ 766*, the Utah Supreme Court has not expressly adopted or declined to adopt *Restatement (Second) of Torts § 766A*. *Section 766A* was first published in 1979. Since the Utah Supreme Court has only adopted *§ 766*, not *§ 766A*, this Court will not presume the Utah Supreme Court intended to adopt tortious interference of contract claims pursuant to *§ 766A*. Again, **[*29]** *§ 766* only recognizes tortious interference claims wherein the plaintiff alleges the defendant caused a third party to breach its contract with the plaintiff, Here, Birrell Bottling fails to allege that Core-Mark's tortious interference caused a third party to breach its contract with Birrell Bottling. Rather, Birrell Bottling claims Core-Mark caused it to breach its own contract with Wyoming Beverages. While Birrell Bottling fails to allege a claim for tortious interference in accordance with *Restatement (Second) of Torts § 766*, the Court will dismiss this claim without prejudice in the event Birrell Bottling can plead facts to support its claim for tortious interference with contract.

For these reasons, Plaintiff Birrell Bottling's claim for tortious interference with contract in Count III is DISMISSED WITHOUT PREJUDICE.

2. Tortious Interference with Business Expectancy (Count IV)

Birrell Bottling also alleges Core-Mark interfered with its business expectancy by delivering and selling PepsiCo products to customers within Birrell Bottling's exclusive territory. Birrell alleges Core-Mark had express knowledge that selling PepsiCo products to Plaintiffs' customers interfered with Plaintiffs' business relationships with its customers. **[*30]**

First, Birrell points to a cease and desist letter PepsiCo sent Core-Mark stating PepsiCo has "not authorized Core-Mark to act as [PepsiCo's] distributor of any bottle and can products, including Pepsi-Cola and Mountain Dew, anywhere in the US . . . . In addition, any reselling of products to another distributor is also not permitted." (Doc. 21 at 84 [Ex. 4]). PepsiCo also informed Core-Mark that PepsiCo's "independent Pepsi-Cola bottlers have exclusive bottling appointments for their respective territories . . . ." (*Id.*) Finally, PepsiCo stated:

> We must demand that you cease and desist any further sales of Pepsi-Cola, Mountain Dew or any other PepsiCo soft drinks in bottle or can packages. Unless Core-Mark obtains explicit authority to distribute these

> products from the Pepsi-Cola bottler in the Territory, any further unauthorized sales will be viewed as tortious interference with the bottler's relationship with the accounts in its bottling territory.

(*Id.*). Additionally, Birrell Bottling alleges Core-Mark's operations in the beverage industry have overlapped with Wyoming Beverages' and Birrell Bottling's direct store delivery system for years, so "Core-Mark knows the geographic boundaries and customers" **[*31]** within Plaintiffs' exclusive territories. (Doc. 21 at 42 [Am. Compl.]). Despite the cease and desist letter sent in 2015, Birrell alleges Core-Mark continued to distribute PepsiCo products in its exclusive territory. Thus, Birrell alleges Core-Mark intentionally interfered with its business expectancy.

Under Utah law, "Improper means are present where the means used to interfere with a party's economic relations are contrary to law . . . . Improper means include . . . deceit or misrepresentations . . . . Means may also be improper or wrongful because they violate an established standard of a trade or profession." *Overstock.com v. Smartbargains, Inc., 2008 UT 55, 192 P.3d 858, 864 (Utah 2008)* (quoting *St.Benedict's Dev. Ca., 811 P.2d at 201*).

Birrell Bottling alleges Core-Mark misrepresented to Birrell Bottling's customers that it was authorized to distribute PepsiCo products. Birrell Bottling alleges Core-Mark distributed promotional material to Birrell Bottling's customers which advertised PepsiCo products at low prices. Bin-ell Bottling alleges Core-Mark mispresented that it was authorized to distribute PepsiCo products through Core-Mark's promotional materials and verbal statements. Birrell Bottling alleges Core-Mark led its customers to believe that Core-Mark was associated with PepsiCo and/or Admiral Beverage. Additionally, **[*32]** Birrell asserts Congress enacted the Soft Drink Act to prevent transshipping. As a result of Core-Mark's interference, Bin-ell Bottling claims its injuries include lost profits, damage to the PepsiCo brands, undermined territorial rights, damaged and confused customer relations, lost fountain soda contracts, and "injury to Admiral Beverage's businesses and goodwill in its own territories." (Doc. 21 at 51 [Am. Compl.]).

For these reasons, Bin-ell Bottling has stated a claim for tortious interference with a business expectancy. As such, Defendant's Motion to Dismiss Birrell Bottling's claim for tortious interference with a business expectancy in Count IV is DENIED.

False Advertising under the Lanham Act (Count VII)

Plaintiffs also assert Core-Mark made false and misleading statements in violation of *§ 1125(a)(1)* of the Lanham Act. *Section 1125(a)(1)* of the Lanham Act states:

> Any person who, on or in connection with any goods or services, or any container for goods, uses in commerce any word, term, name, symbol, or device, or any combination thereof, or any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which—
>
>> (A) Is likely to cause confusion, or to cause mistake, or to deceive **[*33]** as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person, or
>> (B) In commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities,
>
> shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

15 U.S.C. § 1125(a). To state a claim under *§ 1125(a)*, "a plaintiff must allege: (1) that defendant made material false or misleading representations of fact in connection with the commercial advertising or promotion of its product . . .; (2) in commerce; (3) that are either likely to cause confusion or mistake as to (a) the origin, association or approval of the product with or by another, or (b) the characteristics of the goods or services; and (4) injure the plaintiff." *Cottrell, Ltd. V. Biotrol Intern., Inc., 191 F.3d 1248, 1252 (10th Cir. 1999)* (citations omitted). *Section 1125(a)* "creates two distinct bases of liability: false association, *§ 1125(a)(1)(A)*, and false advertising, *§ 1125(a)(1)(B)*." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 134 S.Ct. 1377, 1384, 188 L. Ed. 2d 392 (2014)*.

A. False Association Claim under 1125(a)(1)(A)

Plaintiffs allege two types of false or misleading representations by **[*34]** Core-Mark. First, Plaintiffs allege a false association claim under *§ 1125(a)(1)(A)*, asserting Core-Mark misrepresented to Plaintiffs' customers that Core-Mark "was authorized to sell PepsiCo Brands." (Doc. 21 at 58 [Am. Compl.]). Plaintiffs allege Core-Mark made these misrepresentations both verbally and in writing. Core-Mark distributed promotional brochures to Plaintiffs' customers which "listed PepsiCo Brands as New Offerings' and pitched "month-long 'Introductory Pricing' programs to [Plaintiffs'] customers" that "offered to sell PepsiCo products at artificially low prices." (*Id.* at 59). Plaintiffs claim "Core-Mark's misrepresentations caused confusion and mistake among [Plaintiffs'] customers, leading them to believe that Core-Mark's sale of [PepsiCo brands] were conducted in association with, or with the approval of, PepsiCo and/or Admiral Beverage." (*Id.*). Thus, Plaintiffs have alleged a cause of action under *§ 1125(a)(1)(A)* of the Lanham Act.

Core-Mark argues Plaintiffs failed to sufficiently plead that Core-Mark's actions confused Plaintiffs' customers. Plaintiffs allege that Core-Mark's promotional materials caused its customers confusion about Core-Mark's affiliation or association with PepsiCo and Admiral Beverages, as Core-Mark is not **[*35]** authorized to distribute PepsiCo products in Plaintiffs' exclusive territories. (Doc. 21 at 59 [Am. Compl.]). In addition, Plaintiffs claim Core-Mark's promotional brochures and verbal statements offering to sell PepsiCo products in Plaintiffs' exclusive territory confused and deceived Plaintiffs' customers about the services provided in connection to the sale of PepsiCo products. (*Id.* at 60). Plaintiffs assert Core-Mark's misrepresentations deceived and confused Plaintiffs' customers because Core-Mark sold outdated PepsiCo products, rather than the fresh products provided by Plaintiffs. (Doc. 21 at 59-60 [Am. Compl.]). Plaintiffs allege as a result of Core-Mark's promotional materials and misleading representations, Plaintiffs lost sales with customers in their exclusive territories and lost goodwill and enterprise value. (*Id.* at 61). As such, Plaintiffs have alleged enough facts to state a false association claim under *§ 1125(a)(1)(A)*.

B. False Advertising Claim under *§ 1125(a)(1)(B)*

Plaintiffs also allege a claim for false advertising under *§ 1125(a)(1)(B)*. *Section 1125(a)(1)(B)* requires the plaintiff to allege the false or misleading statements were made in commercial advertising or promotion. The Tenth Circuit has held:

> In order for representations to constitute "commercial advertising or promotion" under **[*36]** [*§ 1125(a)(1)(B)*, they must be: (1) commercial speech; (2) by a defendant who is in commercial competition with plaintiff; (3) for the purpose of influencing consumers to buy defendant's goods or services. While the representations need not be made in a "classic advertising campaign," but may consist instead of more informal types of "promotion," the representations (4) must be disseminated sufficiently to the relevant purchasing public to constitute "advertising" or "promotion" within that industry.

Proctor & Gamble Co. v. Haugen, 222 F.3d 1262, 1273-74 (10th Cir. 2000) (citations omitted).

Plaintiffs assert that Core-Mark made false misrepresentations "by distributing promotional brochures to Admiral Beverage's customers that listed PepsiCo Brands as 'New Offerings' and by pitching month-long 'Introductory Pricing' programs to Admiral Beverage's customers which offered to sell PepsiCo Brands at artificially low prices." (Doc. 21 at 59 [Am. Compl.]). Plaintiffs claim Core-Mark's brochures lead Plaintiffs' convenience store customers to believe that PepsiCo authorized Core-Mark to sell their products and Core-Mark's representations about pricing influenced Plaintiffs' customers' purchasing decisions. Specifically, Core-Mark's artificially low prices influenced Plaintiffs' customers **[*37]** to purchase PepsiCo products from Core-Mark, rather than from Plaintiffs who had exclusive rights to distribute PepsiCo products to the customers in the respective territories. Plaintiffs allege Core-Mark's promotional brochures caused confusion for Plaintiffs customers and consumers who, Plaintiffs allege, "believed they were purchasing the same high-quality product associated with Admiral Beverage" but, those customers actually purchased "outdated product manufactured hundreds of miles away from Admiral Beverage's manufacturing centers." (*Id.*). Additionally, Plaintiffs allege Core-Mark's promotional brochures and sales of PepsiCo products lead Plaintiffs' customers to believe Core-Mark was associated with PepsiCo or Admiral Beverage, or that Core-Mark sold PepsiCo products with the approval of PepsiCo or Admiral Beverage, causing Plaintiffs' customers confusion and deception about the characteristics, quality control, and freshness of the products Core-Mark sold. (*Id.* at 59-60). As a result, Plaintiffs' allege Core-Mark's false representations have caused Plaintiffs' lost sales and lost goodwill and enterprise value. (*Id.* at 61).

Core-Mark asserts the Court should dismiss Plaintiffs' false advertising **[*38]** claim under the Lanham Act because the heightened pleading requirement of *Fed. R. Civ. P. 9(b)* applies to the claim. Specifically, Core-Mark argues Plaintiffs failed to plead that Core-Mark made a false representation of fact in "commercial advertising" with the specificity required by *Rule 9(b)*. (Doc. 25 at 20 [Mot. To Dismiss]). "*Rule 9(b)* states that 'in all averments of fraud or mistake, the circumstances constituting the fraud or mistake shall be stated with particularity." *U.S. ex rel Sikkenga v. Regence Bluecross Blueshield of Utah, 472 F.3d 702, 726-27 (10th Cir. 2006)* (quoting *Fed. R. Civ. P. 9(b)*). "At a minimum, *Rule 9(b)* requires that a plaintiff set forth the who, what, when, where and how of the alleged fraud . . . and must set forth the time, place, and contents of the false representation, the identity of the party making the false statements and the consequences thereof." *U.S. ex rel Sikkenga v. Regence Bluecross Blueshield of Utah, 472 F.3d 702, 726-27 (10th Cir. 2006)* (citations and quotation marks omitted). The Tenth Circuit has not ruled on whether *Rule 9(b)* applies to false advertising claims under the Lanham Act. However, even if *Rule 9(b)* applies, Plaintiffs have alleged a claim for false advertising with enough particularity to meet the heightened pleading requirements of *Rule 9(b)*.

Core-Mark also argues Plaintiffs' claim under *§ 1125(a)(1)* is barred by the First Sale Doctrine. Generally, "the right of a producer to control distribution of its trademarked product does not extend beyond the **[*39]** first sale of the product " *Australian Gold, Inc. v. Hatfield, 436 F.3d 1228, 1240-41 (10th Cir. 2006)* (citation and internal markings omitted). "It is the essence of the 'first sale' doctrine that a purchaser who does no more than stock, display, and resell a producer's product under the producer's trademark violates no right conferred upon the producer by the Lanham Act." *Id. at 1241* (citation omitted). "However, the first sale doctrine does not protect resellers who use other entities' trademarks to give the impression that they are favored or authorized dealers for a product when they are not." *Id.* (citation omitted).

Plaintiffs claim that Core-Mark used PepsiCo's trademark in their promotional brochures. Core-Mark distributed the brochures to Plaintiffs' customers in Plaintiffs' exclusive territories. Through the EBAs between PepsiCo and Admiral Beverage, PepsiCo granted Admiral Beverage the exclusive right to manufacture and distribute PepsiCo products within its defined territory. Admiral Beverage also had the right to grant other entities the exclusive right to sell PepsiCo products within its exclusive territory. Plaintiffs allege Core-Mark resold PepsiCo products within Plaintiffs' exclusive territory which gave Plaintiffs' customers the impression that it **[*40]** was authorized to sell PepsiCo products when neither PepsiCo nor Admiral Beverage authorized Core-Mark to sell PepsiCo within Admiral Beverage's territory. As such, the First Sale Doctrine does not bar Plaintiffs' claim under the Lanham Act.

Additionally, "the first sale doctrine is not applicable 'when an alleged infringer sells trademarked goods that are materially different than those sold by the trademark owner.'" *Beltronics USA, Inc. v. Midwest Inventory Distribution, LLC, 562 F.3d 1067, 1072 (10th Cir. 2009)* (quoting *Davidoff, 263 F.3d at 1302*). "A materially different product is not genuine and may generate customer confusion about the source and quality of the trademarked product." *Id.* (citations omitted). However, not all differences are material and the determining question in "evaluating whether a difference between two products bearing the same trademark is material is whether the difference 'confuses consumers and impinges on the . . . trademark holder's goodwill." *Id. at 1073* (quoting *Nestle, 982 F.2d at 638*). "[A] difference is material if 'consumers [would] consider [it] relevant to a decision about whether to purchase a product." *Id.* (quoting *Davidoff, 263 F.3d at 1302*). "Because many factors influence such considerations, the threshold must be kept low to include even subtle differences between products." *Id.* (citation and quotation omitted). Material **[*41]** differences are not limited to physical differences, but may also include differences in service commitments. *Id.*

Plaintiffs allege Core-Mark transships PepsiCo products that are materially different than Plaintiffs' products. Plaintiff alleges Core-Mark sells outdated PepsiCo products. Additionally, Plaintiffs allege Core-Mark causes its customers confusion by selling PepsiCo products in Plaintiffs' exclusive territories, therefore, Plaintiffs' customers believe Core-Mark is authorized by Plaintiffs' or PepsiCo to sell PepsiCo products. As a result, Plaintiffs' allege its customers believe they are receiving the same high-quality, fresh product and service commitment as Plaintiffs provide, however, Core-Mark does not provide the same service commitment, including replacing expired products with fresh products.

As such, Plaintiffs' have alleged a claim for false advertising under the Lanham Act and Plaintiffs' claim is not barred by the First Sale Doctrine. Defendant's motion to dismiss Plaintiffs' false advertising claim in Count VII is DENIED.

Declaratory Judgment Act (Count II)

Plaintiffs seek declaratory relief under the Declaratory Judgment Act. (Doc. 21 at 40 [Am. Compl.]). Core-Mark argues Plaintiffs' Declaratory **[*42]** Judgment Act claim should be dismissed because Plaintiffs' request for declaratory judgment relates to issues that will be resolved through litigating or their claim does not relate to the instant dispute. "[T]he Declaratory Judgment Act 'gave the federal courts competence to make a declaration of rights; it did not impose a duty to do so.'" *State Farm Fire & Cas. Co. v. Mhoon, 31 F.3d 979, 982 (10th Cir. 1994)* (quoting *Public Affairs Associates, Inc. v. Rickover, 369 U.S. 111, 112, 82 S. Ct. 580, 7 L. Ed. 2d 604 (1962)*). At this early stage, the Court does not see a reason to dismiss this claim. As such, Core-Mark's Motion to Dismiss Plaintiffs' claim under the Declaratory Judgment Act in Count II of Plaintiffs' Amended Complaint is DENIED.

CONCLUSION

For the reasons stated above, the Court finds Plaintiffs provide sufficient facts to state claims for Declaratory Judgment Act (Count II), False Advertising under the Lanham Act (Count VII), and tortious interference with a business expectancy (Counts IV and VI). Plaintiffs fail to state a claim for tortious interference with contract (Counts III and V) and do not have a right of action under the Soft Drink Interbrand Competition Act (Count I). As such, Defendant's Motion to Dismiss is GRANTED IN PART and DENIED IN PART.

IT IS ORDERED Plaintiffs' **[*43]** claim under the Soft Drink Interbrand Competition Act in Count I (Doc. 21) is DISMISSED WITH PREJUDICE.

IT IS FURTHER ORDERED Plaintiff Wyoming Beverages' tortious interference with contract claim in Count III (Doc. 21) is DISMISSED WITHOUT PREJUDICE.

IT IS FURTHER ORDERED Plaintiff Birrell Bottling's tortious interference with contract claim in Count III (Doc. 21) is DISMISSED WITHOUT PREJUDICE.

IT IS FURTHER ORDERED Plaintiff Torrington Beverage's tortious interference with contract claim in Count V (Doc. 21) is DISMISSED WITHOUT PREJUDICE.

IT IS FINALLY ORDERED Plaintiffs shall have until January 24, 2018 to amend their complaint to allege facts to support a claim for tortious interference with contract. Failure to file an Amended Complaint within this time will result in the Court dismissing these claims with prejudice.

Dated this 4th day of January, 2018.

Opinion

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS

Re: Dkt. No. 26

I. INTRODUCTION

Plaintiffs Ronald Meyer ("Meyer") and Luz Betzabeth Bedoya-Apolo ("Apolo") initiated this nationwide putative class action suit against Defendants Aabaco Small Business, LLC ("Aabaco") and Yahoo! Inc. ("Yahoo!") seeking redress for Defendants' alleged failure to provide web hosting services to customers, failure to provide notice of termination, cancellation or suspension, and failure to cancel services in accordance with Defendants' Terms of Service. Federal subject matter jurisdiction is predicated on the *Class Action Fairness Act of 2005*. Presently before the Court is Defendants' motion to dismiss the First Amended Complaint pursuant to *Fed.R.Civ.P.12(b)(6)*. Defendants contend that the alleged internet service disruptions **[*2]** with the website hosting services ("Web Hosting") they were providing to Plaintiffs do not amount to a violation of California's Unfair Competition Law ("UCL") or the False Advertising Law ("FAL"), nor constitute a breach of the Terms of Service contract governing the Web Hosting. Defendants further contend that the unjust enrichment claim fails because the parties' relationship is governed by the Terms of Service. For the reasons set forth below, Defendants' motion is granted in part and denied in part.

II. BACKGROUND[1]

Defendant Yahoo! is a technology company that offers online services to millions of people. First Amended Complaint ("FAC") at ¶2. Yahoo!'s wholly-owned subsidiary, Aabaco, offers a range of small business services, including Web Hosting. Id. Customers pay monthly or annual fees to Defendants to receive Web Hosting services. Id. at ¶3. Defendants' Web Hosting includes website building tools and storage space, business emails attached to the website and the ability to market or advertise through websites. Id. at ¶22. Defendants promised 24-hour phone and email support. Id. Plaintiffs acknowledge that Defendants' Terms of Service govern the relationships between Defendants **[*3]** and customers who pay for Web Hosting. Id. at ¶4.

Plaintiff Meyer, a resident and citizen of Michigan, signed up for Defendants' Web Hosting sometime between 1998 and 2000 to have and maintain a photography related website. Id. at ¶¶8, 26. Within his website, Meyer also paid for and maintained two separate URLs for two children's books he wrote and illustrated. Id. at ¶26. Meyer paid $9.95 a month for Defendants to host his website and to provide him with email accounts tied to his website. Id.

Meyer received and used Web Hosting until October of 2016 when Defendants "abruptly and without reason or notice stopped providing the Web Hosting, although Defendants continued to charge him monthly through March of 2017. Id. at ¶8. Meyer alleges that as a result of the Web Hosting disruption, potential buyers of his books and photography could no longer visit his URLs or email him. Id. at ¶27. Meyer alleges on information and belief that Defendants only stopped charging him because he filed the instant action on April 14, 2017. Id.

After Meyer became aware that his services were "cancelled," he called and emailed Defendants multiple times, asking them to reactivate his Web Hosting or in the alternative, **[*4]** to return all data that made up the site, including the domain name, and to cancel Web Hosting. Id. at ¶9. According to Meyer, "[n]ot a single live customer service representative could help him in either reactivating his website and email accounts, or cancelling his services according to the Terms of Service." Id. at ¶32. Meyer asked for a refund and was told he would have to talk to the accounting department; however, he was not given the accounting department phone number. Id. at ¶9.

Meyer was never informed that Defendants may suspend or terminate the Web Hosting services with no notice or reason while continuing to bill and collect payment. Id. at ¶28. Meyer also asserts that Defendants never asked him to verify his domain name information as part of compliance with the Internet Corporation for Assigned Names and Numbers ("ICANN") or Internet Names Worldwide ("INWW"). Id. at ¶29.

Plaintiff Apolo, a resident and citizen of California, started paying for Defendants' Web Hosting services in approximately 2011 when she became the owner and operator of the Apolo Driving & Traffic School in Van Nuys, California. Id. at ¶¶11, 35. Apolo used Defendants' services to maintain a website to facilitate **[*5]** and advertise her business. Id. The annual fee for Defendants' services was approximately $140.00. Id. at ¶35. In approximately March of 2017, Defendants "abruptly and without reason or notice stopped providing Plaintiff Apolo with the Web Hosting that was paid in full through August of 2017." Id. at ¶11. Apolo was never informed that Defendants may terminate the Web Hosting services without notice or reason. Id. at ¶40. Apolo alleges on information and belief that Defendants suspended her Web Hosting for approximately one week, possibly longer. Id. at ¶11.

When Apolo's employee contacted Defendants regarding the disruption in service, Defendants' customer representative allegedly said "it was done with all accounts to make sure the billing address was correct." Id. at ¶12. Apolo contends that the stated reason for the disruption in service was suspicious because nothing had changed with her business or billing information, and moreover she had paid for a full year of service in advance. Id. Apolo alleges that the disruption in service damaged her business and jeopardized her license to operate a driving school with the Department of Motor Vehicles. Id.

---

[1] The Background is a summary of the allegations in the First Amended Complaint. All well-pleaded facts are accepted as true for purposes of the instant motion.

Plaintiffs seek to represent a **[*6]** class consisting of: "Any person or entity in the United States with a Web Hosting Account with Defendant and who (1) was charged for, but [ ] was not provided, with Web Hosting services; or (2) asked for cancellation of Web Hosting services pursuant to the Terms of Service but [was] continued to be billed by Defendants." Id. at ¶51. Plaintiffs assert claims for (1) unfair business practices in violation of the UCL; (2) fraudulent business practices in violation of the UCL; (3) unlawful business practices in violation of the UCL; (4) violation of the FAL; (5) breach of contract; and (6) unjust enrichment.

III. STANDARDS

A motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* tests the legal sufficiency of claims alleged in the complaint. *Parks Sch. of Bus., Inc. v. Symington, 51 F.3d 1480, 1484 (9th Cir. 1995)*. When deciding whether to grant a motion to dismiss, the court must generally accept as true all "well-pleaded factual allegations." *Ashcroft v. Iqbal, 556 U.S. 662, 664, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. The court must also construe the alleged facts in the light most favorable to the plaintiff. See *Retail Prop. Trust v. United Bhd. of Carpenters & Joiners of Am., 768 F.3d 938, 945 (9th Cir. 2014)* (providing the court must "draw all reasonable inferences in favor of the nonmoving party" for a *Rule 12(b)(6)* motion). Dismissal "is proper only where there is no cognizable legal theory or an absence of sufficient facts alleged to support a cognizable legal theory." **[*7]** *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*.

Consumer-protection claims that sound in fraud, as Plaintiffs' claims do, are subject to the heightened pleading requirements of *Fed.R.Civ.P. 9(b)*. *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1102 (9th Cir. 2003)*; see also *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)*; *In re Apple and AT&T iPad Unlimited Data Plan Litigation, 802 F. Supp. 2d 1070, 1075 (N.D. Cal. 2011)* (*Rule 9(b)* applies to claims under the UCL and FAL). *Rule 9(b)* requires that "a party must state with particularity the circumstances constituting fraud. . . ." *Fed.R.Civ.P. 9(b)*. The circumstances constituting the fraud must be "specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985)*. Therefore, a party alleging fraud must set forth "the who, what, when, where, and how" of the misconduct. *Vess, 317 F.3d at 1106* (quoting *Cooper v. Pickett, 137 F.3d 616, 627 (9th Cir. 1997))*.

IV. DISCUSSION

A. UCL and FAL Claims

Defendants seek dismissal of the UCL and FAL claims, asserting that Plaintiffs have failed to plead fraud with the requisite particularity.

California Business & Professions Code §17200 defines unfair competition as any "unlawful, unfair or fraudulent business act or practice." "Unlawful" practices are forbidden by law. *Saunders v. Super. Ct., 27 Cal.App.4th 832, 838, 33 Cal. Rptr. 2d 438 (1994)*. "Unfair" practices constitute "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable **[*8]** to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal.4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. The "fraudulent" prong requires a showing of actual or potential deception to some members of the public, or harm to the public interest. See *Id. at 180*. A plaintiff may base a UCL claim on an alleged omission, "[but] to be actionable the omission must be contrary to a representation actually made by the defendant, or an omission of a fact that the defendant was obliged to disclose." *Sud v. Costco Wholesale Corp., 229 F.Supp.3d 1075, 1085 (N.D. Cal. 2017)* (quoting *Daugherty v. Am. Honda Motor Co., 144 Cal.App.4th 824, 835, 51 Cal. Rptr. 3d 118 (2006))*.

The FAL proscribes the making or disseminating of any statement which is untrue or misleading. *Cal. Bus. & Prof. Code §17500*. By its terms, the FAL does not encompass omissions without an alleged misstatement. See *Dana v. Hershey Company, 180 F.Supp.3d 652, 668 (N.D. Cal. 2016)*; *Norcia v. Samsung Telecommunications America, LLC, No. 14-582 JD, 2015 U.S. Dist. LEXIS 110454, 2015 WL 4967247, at *8 (N.D. Cal. Aug. 20, 2015)*. Therefore, to state a FAL claim premised on an omission, the plaintiff must plead that the alleged omission was contrary to a statement made by the defendant. See *Hodsdon v. Mars, Inc., 162 F. Supp. 3d 1016, 1023 (N.D. Cal. 2016)* ("a plaintiff may state a claim under the FAL if the defendant actually made a statement, but omitted information that undercuts the veracity of the statement"). For both a UCL and FAL fraud claim, the plaintiff must plead particularized facts **[*9]** demonstrating a causal connection or reliance on the alleged misrepresentation. *Kwikset Corp. v. Superior Court, 51 Cal.4th 310, 326, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)*.

1. UCL and FAL Fraud Theory

Meyer alleges that he was never informed that Defendants may suspend or terminate the Web Hosting services with no notice or reason while continuing to bill and collect payment. Apolo similarly alleges that she was never informed that Defendants may terminate the Web Hosting services without notice or reason. Plaintiffs' claims are deficient insofar as Plaintiffs fail to identify any statement by Defendants that would have caused them or other consumers to reasonably believe that charges would not be assessed during periods of service interruption. Instead, the Terms of Service state clearly and unambiguously in pertinent part: "The Company reserves the right at any time and from time to time to modify or discontinue, temporarily or permanently, the Services (or any part thereof) with or without notice." FAC, Ex. A at p. 25, §1(e). The Terms of Service also state: "You agree that the Company shall not be liable to You or to any third party for any modification, suspension, or discontinuance of any Service." Id. Further, the Terms of Service provide that: "The Company does not warrant **[*10]** that (i) the services will meet your requirements or be uninterrupted, timely, secure or error-free, (ii) the quality of the services will meet your expectations, and [iii] any error in the services will be corrected[.]" Id. at p.36, §12(d). The Terms of Service thus expressly disclose the possibility that services may be interrupted without notice, that services would not be error-free, and that Defendants will not be liable for service interruptions. Accordingly, Plaintiffs' alleged fraud claim is not actionable as a matter of law. See *In re Sony Gaming Networks & Customer Data Sec. Breach Litig., 996 F.Supp.2d 942, 989-990 (S.D. Cal. 2014)* ("[n]o reasonable consumer would believe that Sony's representations regarding the network were meant to promise continued and uninterrupted access to Sony Only Services and/or that Sony was providing uninterrupted access to the" Play Station Network); see also *Porras v. StubHub, Inc., No. 12-1225 MMC, 2012 U.S. Dist. LEXIS 126111, 2012 WL 3835073, at *5-6 (N.D. Cal. Sept. 4, 2012)* (StubHub's use of "guarantee," "100% confidence," "authentic," and "valid" did not support UCL and FAL claims where StubHub discloses possibility of invalid tickets). In light of the disclosures made in the Terms of Service, Plaintiffs cannot establish the requisite causal connection between Defendants' alleged fraudulent **[*11]** conduct and Plaintiffs' injuries. Plaintiffs' UCL fraud claim and FAL claim are dismissed with prejudice.

2. "Unlawful" Conduct

Plaintiffs' UCL claim under the "unlawful" prong is based upon an alleged violation of the FAL and breach of contract. For the reasons discussed above, Plaintiffs' FAL claim fails as a matter of law. It follows that Plaintiffs' "unlawful" prong claim fails to the extent it is based upon a violation of the FAL. Further, Plaintiffs' breach of contract claim cannot support a UCL claim. See *Shroyer v. New Cingular Wireless Services, Inc., 622 F.3d 1035, 1043-44 (9th Cir. 2010)* ("a common law violation such as breach of contract is insufficient" unless conduct is independently unlawful, unfair or fraudulent). Plaintiffs' UCL claim under the "unlawful" prong fails as a matter of law and is accordingly dismissed with prejudice.

3. "Unfair" Conduct

Plaintiffs allege that Defendant's business practices with respect to cancellation are unfair in three respects. FAC, ¶66.[2] First, Plaintiffs allege that Defendants do not disclose, or inadequately disclose, a customer service phone number on their website that can be used to cancel an existing customer's Web Hosting. Id. Second, Plaintiffs allege that Defendants have an outdated verification process requiring **[*12]** old information that makes it difficult for customers to verify their identity. Id. Third, Plaintiffs allege that Defendants "do not timely process cancellation requests for a whole host of reasons, including by failing to provide an adequate number of properly trained customer service representatives." Id.

The UCL does not define the term "unfair" and the California Supreme Court has not established a definitive test to determine whether a business practices is unfair. *Wahl v. Yahoo! Inc., No. 17-2745 BLF, 2017 U.S. Dist. LEXIS 150403, 2017 WL 4098884, at *2 (N.D. Cal. Sept. 15, 2017)*. Nevertheless, three separate tests have emerged from the California Courts of Appeal that provide guidance on the issue. The first test requires that the public policy underlying the claim "must be tethered to specific constitutional, statutory or regulatory provisions." Drum, supra, at 257. Under the second test, courts analyze whether the alleged business practice is "immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers" and "weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim." *Wahl, supra, at *2* (quoting *Drum, supra, at 257*). The third test requires that "(1) the consumer injury must be substantial; (2) **[*13]** the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided." *Drum, supra, at 257*.

Plaintiffs' UCL claim under the "unfair" prong is inadequately pled. Plaintiffs have not pled the who, what, when, where, and how of the alleged misconduct. For example, Meyer alleges that he was unable to cancel his Web Hosting, but does not plead with particularity facts describing his interaction(s) with Defendants' customer service representative(s). As another example, Plaintiffs allege that Defendants have an outdated verification process, but do not include particularized facts regarding the outdated verification process. In response to the motion to dismiss, Plaintiffs argue that existing customers are unable to confirm their identity with Defendants even if they offer to provide current banking information to establish their identity and the payments being made for the Web Hosting services. This allegation, however, is not included in the operative complaint.

Nor are Plaintiffs' allegations sufficient to satisfy any of the three tests for an "unfair" business practice. Plaintiffs do not tether **[*14]** their claim to any specific constitutional, statutory or regulatory provision. Instead, Plaintiffs allege in conclusory language that Defendants' practices "violate the legislative policies of the underlying statutes alleged herein: namely, protecting customers from unfair business practices and preventing persons from being injured by misleading advertising." FAC at ¶ 67. With respect to the second test, Plaintiffs' allegations suggest that their interactions with Defendants' customer service agents and Defendants' verification process may have been inconvenient, frustrating and time consuming. There are insufficient facts, however, to establish that Defendants' business practices rise to the level of immoral, unethical, oppressive, unscrupulous, or substantially injurious practices. Plaintiffs' allegations are also insufficient to satisfy the third test. Among other things, Plaintiffs' allegations fail to establish that Defendants' customer service representatives and the outdated verification process caused Plaintiffs "substantial" injuries. The UCL claim under the "unfair" prong is dismissed with leave to amend.

B. Breach of Contract

Plaintiffs allege that pursuant to the Terms of **[*15]** Service, Defendants had a contractual duty to provide Web Hosting in exchange for payment (§4(c)), and that Defendants breached that duty by terminating Plaintiffs' Web Hosting without notice (§5(c)). FAC at ¶97. Plaintiffs allege that they have been injured and harmed by Defendants' failure to provide Web Hosting to paying customers without notice while continuing to charge for services. Id. at ¶99.

---

[2] The "unfair" business practice claim is also based upon the alleged failure to disclose that Defendants could terminate, suspend, cancel or otherwise not provide Web services without notice and continue to charge for services. FAC at ¶65. The allegation is insufficient to state a claim for the reasons discussed in the context of Plaintiffs' UCL fraud claim and FAL claim.

Defendants seek dismissal of the breach of contract claim, arguing that the Terms of Service do not require reimbursement during temporary interruptions of service or notification prior to a disruption in service. With respect to reimbursement, Defendants argue that section 4(c) states only that "You will be charged the applicable fees for the Service(s) You select," and makes no representations regarding reimbursement. With respect to notice prior to termination, Defendants argue that section 5(c) of the Terms of Service applies only when there is a "Termination by the Company," and Plaintiffs have not alleged that their accounts were permanently terminated by Defendants.

Defendants' arguments are persuasive. Section 4(c) of the Terms of Service does not impose a contractual duty to reimburse fees incurred during temporary disruptions **[*16]** in service. The notice provision in Section 5(c) is also clear. Section 5(c), entitled "Termination by the Company," provides that Defendants "may terminate this Agreement or any of the Services at any time, for any reason, upon notice to You." See FAC, Exhibit A, p. 27. Plaintiffs do not allege that Defendants permanently terminated the Agreement or services. Rather, Plaintiffs allege that they experienced disruptions in service, which they repeatedly contend should be characterized as terminations. Although the disruptions in service may have been prolonged, especially for Meyer (six months), the disruptions were nevertheless disruptions, and cannot reasonably be characterized as terminations in service. Plaintiffs' breach of contract claim is accordingly dismissed.

C. Unjust Enrichment

Defendants contend that the unjust enrichment claim fails as a matter of law because an enforceable written contract exists between the parties. The Court agrees. See *Mosier v. Stonefield Josephson, Inc., 815 F.3d 1161, 1172 (9th Cir. 2016)* (quasi-contract action for unjust enrichment does not lie where express binding agreements exist and define the parties' rights); *Paracor Fin., Inc. v. GE Capital Corp., 96 F.3d 1151, 1167 (9th Cir. 1996)* (unjust enrichment "does not lie when an enforceable, binding agreement exists defining the rights of the parties."); *Durell v. Sharp Healthcare, 183 Cal.App.4th 1350, 1370, 108 Cal. Rptr. 3d 682 (2010)* ("An unjust **[*17]** enrichment theory is inapplicable because Durell alleges the parties entered into express contracts."). Nevertheless, Plaintiffs are entitled to plead claims in the alternative. *Clear Channel Outdoor, Inc. v. Bently Holdings Cal. L.P., No. 11-2573 EMC, 2011 U.S. Dist. LEXIS 140764, 2011 WL 6099394, at *9 (N.D. Cal. Dec. 7, 2011)* ("[E]ven though a plaintiff may not ultimately prevail under both unjust enrichment and breach of contract, it may plead both in the alternative.")

V. CONCLUSION

For the reasons set forth above, Defendants' motion to dismiss is GRANTED as to Count I ("unfair" business practices) with leave to amend, and GRANTED with prejudice as to Counts II ("fraudulent" business practices), III ("unlawful" business practices), IV (FAL), and VI (breach of contract), and DENIED as to Count VII (unjust enrichment).[3] Plaintiff shall file and serve an amended complaint consistent with this Order no later than January 19, 2018.

IT IS SO ORDERED.

Dated: January 5, 2018

Judges: WILLIAM J. MARTINI, United States District Judge.

Opinion by: WILLIAM J. MARTINI

Opinion

[*461] **WILLIAM J. MARTINI, U.S.D.J.**:

Plaintiff Brian Baar brings this class action against Jaguar Land Rover North America, LLC ("JLRNA") and Jaguar Land Rover Limited ("JLRL") (collectively "Defendants"), alleging violations of the *Sherman Act, 15 U.S.C. § 1*, various state antitrust and consumer protection laws and unjust enrichment, in connection with the imposition of Defendants' no-export policy at the point of sale of Defendants' products. This matter comes before the Court on Defendants' motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. There was no oral argument. *Fed. R. Civ. P. 78(b)*. For the reasons set forth below, Defendants' motion to dismiss is **GRANTED** and Plaintiff's claims are **DISMISSED WITH PREJUDICE**.

I. BACKGROUND

Plaintiff is a California resident who purchased one of Defendants' **[**2]** products, a 2015 Range Rover, from a dealership in Carlsbad, California on April 1, 2015. First Am. Compl. ("Compl.") ¶ 25, ECF No. 25. JLRNA is a Delaware company with its principal place of business in Mahwah, New Jersey. *Id.* ¶ 26. JLRL is the parent company of JLRNA and is incorporated under the laws of England and Wales, with its principal place of business in the United Kingdom. *Id.* ¶¶ 26-27. JLRL designs, develops and manufactures luxury cars and **[*462]** sport utility vehicles ("SUVs"), which it sells in the United States through JLRNA. JLRL also sells its products all over the world. *Id.* This dispute centers on a significant price differential of Defendants' products in foreign countries such as China. The following facts alleged in the Complaint are not in dispute.

Apparently, demand for luxury vehicles in certain foreign countries commands a sale price of Defendants' products three or four times greater than the price in the United States. *Id.* ¶ 2. "[T]his price differential creates an arbitrage opportunity for Purchasers of JLR Vehicles in the United States who wish to have the ability to export them to foreign markets for resale at higher resale prices than in the United States." *Id.* ¶ **[**3]** 3. To protect their profit margins in these foreign markets, Defendants implemented a "No-Export Policy" (the "Policy") in April 2013. *Id.* The Policy requires that a purchaser agree to the following at the time of sale: "(i) [he or she has] no intention of exporting the JLR Vehicle outside the United States for up to one year from the date of delivery; (ii) if the JLR Vehicle is exported (even by subsequent purchasers), the Purchaser is subject to liquidated damages ranging from $25,000 to $40,000, losses and expenses; and (iii) the warranty will be voided if the JLR Vehicle is exported." *Id.* ¶ 5.

Defendants required Plaintiff to sign "the No-Export Agreement" (the "Agreement") when he purchased his Range Rover. *Id.* ¶ 25. Plaintiff maintains that he "would have freely re-sold [*sic*] the JLR Vehicle for export within one year of delivery absent the No-Export Agreement." *Id.* Plaintiff alleges that the Agreement is non-negotiable and that every purchaser must sign it "at the end of the transaction process, after agreeing upon all financial terms of the transaction." *Id.* ¶ 46. Plaintiff also alleges that Defendants require their United States dealers to undertake certain actions of due diligence **[**4]** to enforce the Policy. Such actions include searching the vehicle purchase history of prospective purchasers, validating their addresses, searching for publicly available information on the internet, and determining the source of funds used to make the purchases. *Id.* ¶ 38.

Plaintiff alleges a conspiracy among Defendants, their dealers, and a third-party consulting company to violate the Sherman Act and unreasonably restrain trade through the enforcement of the Policy. *See id.* ¶¶ 48-58. Plaintiff claims, and Defendants do not deny, that the purpose and effect of the Policy "is to prevent Purchasers from taking advantage of an arbitrage opportunity that exists in foreign countries, such as China, to obtain and maintain higher profits abroad." *Id.* ¶ 59. Plaintiff submits that the relevant market affected by the Policy "is the market for exporting JLR Vehicles for resale." *Id.* ¶ 87. Plaintiff's Amended Complaint asserts five causes of action:

(1) Count 1: declaratory relief under *15 U.S.C. § 1*, *id.* ¶¶ 118-25;

(2) Count 2: injunctive relief under *15 U.S.C. § 1*, *id.* ¶¶ 126-32;

(3) Count 3: violation of 24 state antitrust laws, *id.* ¶¶ 133-37;

(4) Count 4: violation of 26 state consumer protection laws, *id.* ¶¶ 138-47; and **[**5]**

(5) Count 5: unjust enrichment under 48 States' common law, *id.* ¶¶ 148-50.

Defendants now move for dismissal of all claims. Defendants first argue that Plaintiff has failed to allege any concerted action to restrain trade between Defendants and other independent entities. *See* Defs.' Mem. in Supp. of Mot. to Dismiss ("Defs.' Mem.") 9-14, ECF No. 30. Defendants next argue Plaintiff's claims fail under a rule of reason analysis because Plaintiff **[*463]** fails to identify a cognizable relevant market and does not allege an antitrust injury incurred in the United States. *See id.* at 15-29. Defendants also argue that Plaintiff lacks standing to pursue all state law claims other than his California claims and that his California antitrust claims fail for the same reasons as his federal antitrust claims. *See id.* at 29-31. Defendants further argue that Plaintiff's claim under the California Unfair Competition Law ("UCL") fails because he failed to allege fraudulent, unlawful or unfair conduct. *See id.* at 31-35. Finally, Defendants argue that Plaintiff's unjust enrichment claim fails because this Court previously determined that California does not recognize such claims. *See id.* 35-36.

Plaintiff counters, arguing first that the Court should reject **[**6]** Defendants' arguments on the merits because such arguments require the development of a factual record and are inappropriate at the dismissal phase of litigation.

See Pl.'s Mem. of Law in Opp'n to Defs.' Mot. ("Pl.'s Opp'n) 8-10, ECF No. 31. Plaintiff next submits that he properly pleaded the existence of concerted action between Defendants, their dealers and the consulting company, as required by the Sherman Act. *See id.* at 11-16. Plaintiff contends that the Policy unreasonably restrains trade under both the *per se* and rule of reason analyses. Plaintiff argues that the Policy "reduces output by restraining U.S. sales of JLR Vehicles" and the relevant market is "the U.S. market for exporting JLR Vehicles for resale," in which Defendants "have market power." *See id.* at 17-26. Plaintiff submits that he properly alleged an antitrust injury through the restriction of Plaintiff's ability to export Defendants' products for resale. *See id.* at 26-28. Plaintiff further submits that a determination as to his standing to bring non-California based state law claims should be deferred until class certification. *See id.* 31-32. Finally, Plaintiff contends that he plausibly alleges his California claims for the same reasons as his federal claims **[**7]** and that unjust enrichment is a viable claim under California law. *See id.* at 32-40. Defendants filed a reply, in which they largely reiterate their prior arguments. *See* Defs.' Reply Mem. in Supp. of Mot. to Dismiss ("Defs.' Reply"), ECF No. 35.

II. LEGAL STANDARD

Federal Rule of Civil Procedure 12(b)(6) provides for the dismissal of a complaint, in whole or in part, if the plaintiff fails to state a claim upon which relief can be granted. The moving party bears the burden of showing that no claim has been stated. *Hedges v. United States, 404 F.3d 744, 750 (3d Cir. 2005)*. In deciding a motion to dismiss under *Rule 12(b)(6)*, a court must take all allegations in the complaint as true and view them in the light most favorable to the plaintiff. *See* *Warth v. Seldin, 422 U.S. 490, 501, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)*; *Trump Hotels & Casino Resorts, Inc. v. Mirage Resorts Inc., 140 F.3d 478, 483 (3d Cir. 1998)*.

Although a complaint need not contain detailed factual allegations, "a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Thus, the factual allegations must be sufficient to raise a plaintiff's right to relief above a speculative level, such that it is "plausible on its face." *See* *id. at 570*; *see also* *Umland v. PLANCO Fin. Servs., 542 F.3d 59, 64 (3d Cir. 2008)*. A claim has "facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable **[**8]** inference that the defendant is liable for the misconduct alleged." **[*464]** *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*). While "[t]he plausibility standard is not akin to a 'probability requirement' . . . it asks for more than a sheer possibility." *Id.*

III. DISCUSSION

As an initial matter, the Court finds that the alleged facts of the instant case are not in dispute. Defendants do not deny that they maintain a no-export policy or that they make prospective purchasers agree to it at the time of sale. The only real dispute before the Court is whether the Policy violates federal and state antitrust laws by unreasonably restraining the resale of Defendants' products in foreign markets. Plaintiff's other state law and unjust enrichment claims are tethered to the alleged illegal antitrust conduct. The Court, therefore, rejects Plaintiff's contention that merits-based determinations as to his pleadings are untimely and inappropriate at the instant stage of litigation. *See* *Twombly, 550 U.S. at 558* ("a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed") (internal quotation omitted). To the contrary, the Court finds that the undisputed facts lead to a straightforward **[**9]** conclusion: Plaintiff's antitrust claims fail because he fails to allege an illegal concerted action and to identify a cognizable relevant market under the rule of reason. Plaintiff's other claims suffer from the same fatal flaw and Defendant's motion, therefore, is granted.

A. Plaintiff's Sherman Act Claims (Counts 1 & 2)

"*Section 1 of the Sherman Act* prohibits '[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce.'" *Mylan Pharms. Inc. v. Warner Chilcott Pub. Ltd. Co., 838 F.3d 421, 441 (3d Cir. 2016)* (quoting *15 U.S.C. § 1*). "To establish a *[§] 1* violation, a plaintiff must prove: (1) concerted action by the defendants; (2) that produced anticompetitive effects within the relevant product and geographic markets; (3) that the objects of the conduct pursuant to the concerted action were illegal; and (4) that it was injured as a proximate result of the concerted action." *Id.* (internal quotation and citation omitted).

1. The Rule of Reason Governs the Alleged Scheme.

Plaintiff makes a half-hearted argument that Defendants' alleged conduct is *per se* anticompetitive but falls short. *Per se* liability is reserved for conduct that is manifestly anticompetitive, such as a horizontal cartel among competing manufacturers or retailers to reduce output or **[**10]** fix a price. *See Toledo Mack Sales & Serv., Inc. v. Mack Trucks, Inc., 530 F.3d 204, 225* (citing *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 893, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007))*. "[T]he legality of a vertical agreement that imposes a restriction on the dealer's ability to sell the manufacturer's product is governed by the rule of reason." *Id.* (citing *Leegin, 551 U.S. at 907*). The agreement at issue here is unquestionably vertical in nature between the manufacturer Defendants and their dealers. The rule of reason, therefore, governs and Plaintiff's Complaint must properly allege the four factors described above. *See id.*

2. Plaintiff Fails to Allege a Concerted Action

Plaintiff alleges an antitrust conspiracy between Defendants, their dealers and a third-party consultant. First, with **[*465]** respect to the dealers, Plaintiff alleges that they "agree to comply with and enforce" the Policy by requiring purchasers of Defendants' vehicles to sign the no-export Agreement at the point of sale.[1] The dealers also perform various due diligence tasks at Defendants' direction. *See* Compl. ¶¶ 6-11. If they fail to comply adequately with the Policy, the dealers face substantial penalties and "even potential termination." *See id.* ¶ 12.

Plaintiff only alleges that the dealers comply with the Policy; he does not allege anywhere that the dealers actually conspired with Defendants to develop **[**11]** and implement the Policy. The Complaint makes clear that Defendants unilaterally implemented the Policy and required their dealers to enforce it. "Independent action is not proscribed. A manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 760, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. Furthermore, "Department of Justice guidelines addressing vertical restraints have approved the argument that it is inappropriate to consider intrabrand restraints as 'agreements' to conspire and manufacturers are permitted to *unilaterally* impose appropriate restraints without giving rise to a cognizable antitrust violation[.]" *Int'l Logistics Grp., Ltd. v. Chrysler Corp., 884 F.2d 904, 907 (6th Cir. 1989)* (quoting DOJ Vertical Restraint Guidelines § 2.1 at 6265) (emphasis original). Plaintiff, therefore, fails to allege concerted action between Defendants and their dealers.

Second, with respect to the consulting company, Wolf Consulting ("Wolf"), the Court does not agree that the hiring of a consultant to aid in the drafting of the Policy amounts to a concerted action under *§ 1*. Defendants unilaterally decided to implement the Policy to preserve their prices in foreign markets. *After they made that decision*, Defendants then hired Wolf to draft a revised Policy. Wolf also allegedly conferred **[**12]** with one dealer as to the meaning of the Policy on one occasion. *See* Compl. ¶ 49. Wolf is not in the business of selling luxury SUVs; it is in the business of consulting. The fact that Defendants hired Wolf to assist in executing their business decision does not make that decision less one-sided and it certainly does not transform Wolf into a coconspirator to restrain trade. *See White v. R.M. Packer Co., Inc., 635 F.3d 571, 583 (1st Cir. 2011)* (defendant's employment of a consultant "was entirely economically rational behavior" and such conduct "which the Supreme Court sought to protect from

---

[1] Plaintiff's argument that further consideration be given to purchasers in exchange for their consent not to export Defendants' vehicles is meritless. The simple fact is that either a purchaser agrees not to export his vehicle within twelve months of purchase or he leaves the dealership without a vehicle. Clearly, a purchaser's consent to the Agreement is a condition of sale regardless of whether the financial terms are agreed to before consent is given.

chilling effects") (citing *Monsanto, 465 U.S. at 763*). Plaintiff, therefore, fails to allege concerted action between Defendants and Wolf.

3. Plaintiff Fails to Identify a Cognizable Relevant Market.

Plaintiff also fails to satisfy the second factor under the rule of reason. "Plaintiffs have the burden of defining the relevant market." *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)* (citation omitted). "'The outer boundaries of a product market are determined by the reasonable interchangeability **[*466]** of use or the cross-elasticity of demand between the product itself and substitutes for it.'" *Id.* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*. "The term [i]nterchangeability implies that one product is roughly equivalent to another for the use to which it is put." *Mylan Pharms., 838 F.3d at 436* (internal quotations omitted). **[**13]** "It also means that while there might be some degree of preference for . . . one [product] over the other, either would work effectively." *Id.* (internal quotation omitted). "Moreover, products need not be perfectly fungible to be considered reasonably interchangeable for market-definition purposes." *Id.* "Cross-elasticity of demand is a measure of the substitutability of products from the point of view of buyers. More technically, it measures the responsiveness of the demand for one product [X] to changes in the price of a different product [Y]." *Id. at 437*. "Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted." *Queen City Pizza, 124 F.3d at 436* (citation omitted).

Plaintiff identifies the relevant market for Defendants' products as a resale market of one: "the U.S. market for exporting JLR Vehicles for resale." *See* Pl.'s Opp'n at 21. Plaintiff argues that the export **[**14]** market is a "unique" market because Defendants' SUVs "have particular, historically recognized characteristics which make them unique to consumers." *See id.* at 22-23. "Consumers recognize JLR Vehicles' long-standing reputation as dependable, rugged, all-terrain, expeditionary vehicles." *Id.* at 23. For their part, Defendants argue that Plaintiff's market definition is insufficient because it fails to account for the fact that they "face stiff competition for sales from other manufacturers of cars and sports utility vehicles." *See* Def.'s Mem. at 19-20. Furthermore, Plaintiff "does not account for other vehicles that he or others might want to export from the United States." *Id.* at 20.

The Court agrees with Defendants. With all due respect to the quality of Defendants' vehicles, they are not so "unique" as to be impervious to the greater luxury SUV primary and export markets in the United States. One need not think long or hard to arrive at other competing luxury SUV brands—*e.g.*, Lexus, BMW, Mercedes, Audi, Bentley, Porsche, Maserati, to name a few. While the Court finds it entirely possible that consumers prefer Defendants' products for a variety of reasons, consumer preference does not transform an otherwise dynamic **[**15]** market with dozens of interchangeable and cross-elastic products into a singular market. *See Mylan Pharms., 838 F.3d at 436*. As the Third Circuit has previously recognized, "[b]y defining the market so narrowly that it only includes defendants, plaintiffs' proffered geographic and product markets are unrealistic." *See Eichorn v. AT&T Corp., 248 F.3d 131, 147 (3d Cir. 2001)*. The same holds true here.

Accordingly, Plaintiff fails to allege a concerted action between Defendants, their dealers and Wolf. Plaintiff further fails to identify a cognizable relevant market. The Court also finds that any further attempt by Plaintiff to amend his pleadings would be futile, absent a dramatic shift in the alleged facts that would substantially alter the content of the Complaint. *See Banks v. Rozum, 639 F. App'x 778, 784 (3d Cir. 2016)* ("Finally, the District Court was within its discretion to **[*467]** dismiss the complaint with prejudice on the ground that granting leave to amend would have been futile."). Counts 1 and 2 of the Complaint, therefore, are **DISMISSED WITH PREJUDICE**.

B. Plaintiff's Remaining State Law and Unjust Enrichment Claims

Count 3 of the Complaint alleges, "Defendants' unlawful anticompetitive conduct . . . constitutes a violation of federal antitrust laws and, therefore, constitutes violation of the state antitrust laws set forth **[**16]** herein." Compl. ¶ 134. Count 4 similarly alleges violations of various state consumer protection laws, citing Defendants' federal

antitrust law violations as the underlying illegal conduct. *Id.* ¶ 139. It follows then that Plaintiff's state antitrust and consumer protection claims fail for the same reasons that his federal antitrust claims fail. Accordingly, Counts 3 and 4 are **DISMISSED WITH PREJUDICE**.

Finally, Count 5 alleges that Defendants were unjustly enriched "from their unlawful acts by the imposition of the JLR No-Export Policy." As set forth above, however, Plaintiff failed to allege that Defendants' actions were in fact unlawful under the Sherman Act. Plaintiff's unjust enrichment claim, therefore, must also fail. Accordingly, Count 5 is **DISMISSED WITH PREJUDICE**.

IV. CONCLUSION

For the reasons stated above, Defendants' motion to dismiss is **GRANTED** and all counts are **DISMISSED WITH PREJUDICE**. An appropriate order follows.

Date: January 9, 2018

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F. Supp. 3d.]

[*none] ORDER

THIS MATTER comes before the Court on Defendants' motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* (ECF No. 29); for the reasons set forth in the accompanying opinion;

IT IS on this 9th day of January 2018, **[**17]** hereby,

ORDERED that Defendants' motion to dismiss is **GRANTED**; and it is further

ORDERED that all counts are **DISMISSED WITH PREJUDICE**.

ORDER DENYING MOTIONS FOR RELEASE ON BAIL PENDING APPEAL

Re: Dkt. Nos. 391, 392

Before the court are defendant Javier Sanchez's joinder in codefendant Michael Marr's motion for release on bail pending appeal and Gregory Casorso's motion for bail pending appeal, which incorporates the authorities and arguments made in Marr's motion. **[*2]** Doc. nos. 391, 392. Marr's motion for release pending appeal was filed prematurely, before sentence or judgment of conviction has been entered, and therefore remains pending. Doc. no. 390. Having held a hearing on Sanchez and Casorso's motions for release on bail pending appeal, and having considered the relevant authority, the parties' briefs, the record, and the argument of counsel, the court DENIES the motions for the reasons stated on the record and set forth below.

For purposes of these motions, the government does not raise a dispute, under *18 U.S.C. § 3143(b)(1)*, whether Sanchez or Casorso presents a flight risk or poses a danger to the community, or whether the appeal is for the purpose of delay. The parties only dispute whether defendants have raised a "substantial question of law or fact likely to result in reversal [or] a new trial." *18 U.S.C. § 3143(b)(1)(B)*. Defendants contend that they raise three substantial questions on appeal: (I) Whether "unreasonable restraint" is a necessary element of a criminal violation of the *Sherman Act*; (II) If so, can a defendant, consistent with the *due process clause*, be convicted of a Sherman Act violation without this necessary element being found by the jury; and (III) Whether "controlling precedent" **[*3]** bars the Ninth Circuit from deciding Questions I and II.

On appeal, defendants will necessarily ask the Ninth Circuit to revisit its ruling in *United States v. Manufacturers' Ass'n of Relocatable Bldg. Industry, 462 F.2d 49, 50 (9th Cir. 1972)*. There, the Ninth Circuit rejected the argument, challenging a conviction under the Sherman Act, that "the per se rule as to price-fixing, i.e., that price-fixing is per se a violation of the antitrust laws and that the test of reasonableness has no application, is in substance the creation of a conclusive presumption and denies them due process in a criminal trial." *Id.* The court in *Manufacturers' Ass'n*. applied well-settled authority recognizing that price fixing has long been held to be "a per se violation of the Sherman Act without consideration of the rule of reasonableness." *Id. at 51* (citing *United States v. Socony-Vacuum Oil Co., Inc., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*; *United States v. Trenton Potteries Co., 273 U.S. 392, 47 S. Ct. 377, 71 L. Ed. 700 (1927)* (sustaining criminal conviction for violation of the Sherman Act by price fixing where the district court "refused various requests to charge that both the agreement to fix prices and the agreement to limit sales to a particular group, if found, did not in themselves constitute violations of law, unless it was also found that they unreasonably restrained interstate commerce"); *United States v. American Tobacco Co., 221 U.S. 106, 31 S. Ct. 632, 55 L. Ed. 663 (1911)*; *Standard Oil Co. v. United States, 221 U.S. 1, 60-68, 31 S. Ct. 502, 55 L. Ed. 619 (1911))*. Defendants revive their argument, initially raised in pretrial motions, that **[*4]** the holding of *Manufacturers' Assn*. has been undermined by intervening cases deciding antitrust and due process issues. Doc. no. 390 at 6-10.

Defendants suggest that there is an open question whether unreasonable restraint is an element of a criminal Sherman Act offense by arguing that the Supreme Court "has never expressly held that 'unreasonable restraint' is not a necessary element of a criminal violation." Doc. no. 403 at 3. But in *Trenton Potteries*, the Supreme Court was presented with the question "whether the trial judge correctly withdrew from the jury the consideration of the reasonableness of the particular restraints charged," and held that "[w]hether the prices actually agreed upon were reasonable or unreasonable was immaterial in the circumstances charged in the indictment and necessarily found by the verdict." *273 U.S. at 396, 401*. The Court recognized that *Standard Oil* and *American Tobacco* did not overrule earlier cases holding that "uniform pricefixing by those controlling in any substantial manner a trade or business in interstate commerce is prohibited by the Sherman Law, despite the reasonableness of the particular prices agreed upon." *Trenton Potteries Co., 273 U.S. at 398* (citations omitted). "That only those restraints upon interstate **[*5]** commerce which are unreasonable are prohibited by the Sherman Law was the rule laid down by the opinions of this court in the Standard Oil and Tobacco Cases. But it does not follow that agreements to fix or maintain prices are reasonable restraints and therefore permitted by the statute, merely because the prices themselves are reasonable." *Id. at 396*.

Defendants contend that even in light of this long line of antitrust jurisprudence, they will present a fairly debatable question whether "unreasonable restraint" is a necessary element of a criminal violation of the Sherman Act. Doc. no. 403 at 2-3. This issue was squarely decided by the Ninth Circuit in *Manufacturers' Ass'n*. "The per se rule does not operate to deny a jury decision as to an element of the crime charged, since "unreasonableness" is an element of the crime only when no per se violation has occurred." *462 F.2d at 52*. In light of this binding circuit authority, this court does not find a fairly debatable question whether bid rigging, a form of price fixing, is a per se violation of the Sherman Act, without inquiry as to reasonableness, as a matter of substantive law:

> Thus the Court has interpreted a broad and inclusive statute, and since the earliest **[*6]** days of the Act, has enunciated two distinct rules of substantive law: (1) certain classes of conduct, such as price-fixing, are, without more, prohibited by the Act; (2) restraints upon trade or commerce which do not fit into any of these classes are prohibited only when unreasonable. The first rule, in light of the second, defines certain classes of pernicious conduct as unreasonable. Roughly restated, the per se rule establishes a conclusive presumption that certain types of conduct are unreasonable.

Manufacturers' Ass'n, 462 F.2d at 52 (citing *Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958))*. *See* *Harkins Amusement Enterprises, Inc. v. Gen. Cinema Corp., 850 F.2d 477, 487 (9th Cir. 1988)* ("Concerted action to eliminate competitive bidding violates the Sherman Act.") (citing *United States v. Champion Int'l Corp., 557 F.2d 1270, 1272-73 (9th Cir. 1977)*; *United States v. Brighton Bldg. & Maintenance Co., 598 F.2d 1101, 1106 (7th Cir. 1979))*.

Defendants challenge the dichotomous approach under ***antitrust law*** requiring per se treatment for bid rigging, but analyzing other forms of anticompetitive conduct under the rule of reason. Doc. no. 403 at 2-3. Defendants complain that the government should not be able to remove the question of reasonableness from the jury merely by charging anticompetitive conduct as bid rigging. However, long-standing authority, followed by the court in *Manufacturers' Ass'n*, recognizes that price fixing is "conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry **[*7]** as to the precise harm they have caused or the business excuse for their use." *Northern Pac. Ry. Co., 356 U.S. at 5*. As the government pointed out in response to defendants' motions, the circuit courts that have been presented with this issue have similarly held that the per se rule is a substantive rule of law and does not create an evidentiary presumption or withhold an element from the jury. Doc. no. 402 at 4 (citing *United States v. Giordano, 261 F.3d 1134, 1144 (11th Cir. 2001)*; *United States v. Cargo Serv. Stations, Inc., 657 F.2d 676, 683 (5th Cir. 1981)*; *United States v. Koppers Co., 652 F.2d 290, 293 (2d Cir.1981)*; *United States v. Gillen, 599 F.2d 541, 545 (3d Cir. 1979)*; *Brighton Bldg. & Maint. Co., 598 F.2d at 1106 (7th Cir. 1979))*.

Defendants suggest that *Manufacturers' Ass'n* is stale because it was decided over 45 years ago and is irreconcilable with more recent authority requiring a jury to decide whether each element of the offense had been proven beyond a reasonable doubt. Doc. no. 403 at 6-7. As the court noted in its pretrial rulings, the due process principle that the jury must decide every element of the crime is not a novel issue that has arisen since *Manufacturers' Ass'n* was decided. "The due process principles that defendants contend contravene the per se rule were considered by the court in *Manufacturers' Ass'n*, which cited *Morissette* as authority on the right to have every element of the crime submitted to the jury." Doc. no. 247 (Pretrial Order No. 5) at 7 (citing *Morissette v. United States, 342 U.S. 246, 276, 72 S. Ct. 240, 96 L. Ed. 288 (1952)* ("Whether that intent existed, the jury must **[*8]** determine, not only from the act of taking, but from that together with defendant's testimony and all of the surrounding circumstances.")).

The court considered defendants' challenges to per se treatment of the bid rigging counts, and addressed their arguments in Pretrial Order No. 2 denying their motion to adjudicate the Sherman Act allegations pursuant to the rule of reason (doc. no. 66) and Pretrial Order No. 5 denying their motion in limine to admit evidence of auction sale price analyses. Doc. nos. 135, 247. Having been found guilty by a jury, based on a theory of criminal liability fully supported by Ninth Circuit authority, defendants now ask the court to find a fairly debatable issue as to whether the Ninth Circuit should overrule itself. This court, being bound by existing authority, does not find that defendants raise a substantial question of law. Defendants' challenge to the per se rule, in light of long-standing authority recognizing per se treatment of horizontal price fixing as a substantive rule of law and rejecting pleas to require a jury finding of unreasonableness, does not present "an appeal to precedent or to reason commanding respect that might possibly prevail" **[*9]** or an otherwise fairly debatable issue. *United States v. Handy, 761 F.2d 1279, 1281 (9th Cir. 1985)* (citation omitted).

Accordingly, Sanchez and Casorso's motions for release on bail pending appeal are DENIED.

IT IS SO ORDERED.

Opinion

ORDER TENTATIVELY CERTIFYING CLASS

I. BACKGROUND

Plaintiff Margaret Imhoff ("Plaintiff") commenced this class action on September 1, 2015, against Defendants Suzanne Goin, Carolyn Stein, Lucques Catering, Inc., David Lentz, Dirty Chicken, Inc., Jon Shook, Vinny Dotolo, O&A Hospitality, LLC, 1104 Wilshire, LLC, Josiah Citrin, Rustic Canyon Food and Wine, Inc., Josh Loeb, and Zoe Nathan (collectively, "Defendants") for violation of: (1) the Cartwright Act (*Bus. & Profs Code, §16720 et seq.*); and (2) the Unfair Competition Law (*Bus. & Profs. Code, §17200 et seq.*).

Defendants are competitors and owners/operators of restaurants in Los Angeles who allegedly met and agreed to levy a 3% to 3.5% employee benefit surcharge on their customers' bill beginning in September 1, 2014 in order to start health care coverage October 1, 2014. (Compl., ¶¶39, 41; Sterrett Decl., Exs. B [Newsletter], C [Press Release].) Plaintiff alleges this was advantageous for Defendants because an individual restaurant implementing the surcharge would be placed at a competitive disadvantage. (Compl., ¶¶40, 42.) Plaintiff argues this conduct constitutes horizontal price fixing, harms consumers, and is illegal per se in California **[*2]** under the Cartwright Act and Unfair Competition Law.

There are 17 restaurants at issue. Lucques, A.O.C., The Hungry Cat, Tavern, and The Larder are owned and operated by Defendants Suzanne Goin, Carolyn Stein, Lucques Catering, Inc., and David Lentz. (Compl., ¶¶17-20.) Animal, Son of a Gun, Trois Mec, Petit Trois, and Jon & Vinny's are owned and operated by Defendants Dirty Chicken, Inc., Jon Shook, and Vinny Dotolo. (*Id.*, ¶¶21-23.) Melisse and Lemon Moon are owned and operated by Defendants O&A Hospitality, LLC, 1104 Wilshire, LLC, and Josiah Citrin. (*Id.*, ¶¶24-26.) Rustic Canyon, Huckleberry Cafe & Bakery, and Milo & Olive are owned and operated by Rustic Canyon Food and Wine, Inc., Josh Loeb, and Zoe Nathan. (*Id.*, ¶¶27-29.) Defendants identify two more restaurants: Lucques Catering, Inc. and the Larder at Burton Way. (Patrick Decl., Ex. A [Chart].)

Defendants demurred to the Complaint. The demurrer was overruled. This motion for class certification followed.

Plaintiff seeks to certify a class of:

“All natural persons who were customers at one or more of Defendants' California restaurants on or after September 1, 2014.

Excluded from the class are: retail employees; corporate officers, **[*3]** members of the board of directors, and senior executives of Defendants; and any and all judges and justices, and chambers' staff, assigned to hear or adjudicate any aspect of this litigation.“

(Mot. at p.3.)

Extensive pleadings and evidentiary objections thereto were filed.[1] The Court heard oral argument on October 27, 2017. For the reasons that follow, the Court now issues its ruling, tentatively concluding that the class, as proposed, may not be certified but that a more limited class may be certified. However, given that much of what Plaintiff argues regarding class certification was contained only in her Reply, and given that the Court relies on authorities published after oral argument, the parties will be afforded thirty (30) days after entry of this (Tentative) Order to assert any objections thereto.

II. LEGAL STANDARD

A class action is authorized “when the question is one of a common or general interest, of many persons, or when the parties are numerous, and it is impracticable to bring them all before the court . . . .” (*Cal. Code Civ. Proc. § 382*.)

“The party advocating class treatment must demonstrate the existence of an ascertainable and sufficiently numerous class, a well-defined community of interest, **[*4]** and substantial benefits from certification that render proceeding as a class superior to the alternatives.” (*Brinker Restaurant Corp. v. Superior Court (2012) 53 Cal.4th 1004, 1021, 139 Cal. Rptr. 3d 315, 273 P.3d 513* (“*Brinker*”); *Dailey v. Sears, Roebuck and Co. (2013) 214 Cal.App.4th 974, 988, 154 Cal. Rptr. 3d 480*.)

These requirements are commonly articulated in terms of four primary requirements:

---

[1] Defendants submit evidentiary objections to the declarations of Dan Montrenes and Dr. Charles J. Cicchetti, Ph.D.

The evidentiary objections to Montrenes' declaration are sustained (Nos. 1-9). Montrenes states his qualifications as to his ability to opine on the general practices of credit card processing companies and his experience in the field, from which he bases his opinions as to how to ascertain class members. However, he shows no knowledge as to Defendants' payment processing systems or what data they maintain (See Dec. Para. 7). His opinions are thus irrelevant and speculative.

The evidentiary objections to Dr. Cicchetti's declaration are sustained as to Nos. 1, 3 and 8 as they constitute inadmissible legal conclusions. No. 2 is overruled as his statement is based on his economic opinion of whether the 3% surcharge is a harm to Defendants' consumers. Nos. 4-7 regarding his methodology for calculating damages are overruled as the objections are not proper evidentiary objections but are disagreements on the merits of the opinion.

"Numerosity" — The proposed class is numerous in size (see *Rose v. City of Hayward (1981) 126 Cal.App.3d 926, 934, 179 Cal. Rptr. 287*);

"Ascertainability" — It is possible to ascertain who is a member of the class by resort to common, objective characteristics (*Hicks v. Kaufman & Broad Home Corp. (2001) 89 Cal.App.4th 908, 915, 107 Cal. Rptr. 2d 761*) because "the right of each individual to recover [is] not [] based on a separate set of facts applicable only to him" (*Vasquez v. Superior Court (1971) 4 Cal.3d 800, 809, 94 Cal. Rptr. 796, 484 P.2d 964*);

"Community of Common Interest" — Common questions of law or fact predominate and class representatives have claims or defenses typical of the class and can adequately represent the class (*Richmond v. Dart Industries, Inc. (1981) 29 Cal.3d 462, 470, 174 Cal. Rptr. 515, 629 P.2d 23*); and

"Superiority" — Proceeding with the case as a class action is superior to other methods of adjudication (*Fireside Bank v. Superior Court (2007) 40 Cal. 4th 1069, 1089, 56 Cal. Rptr. 3d 861, 155 P.3d 268*).

III. ANALYSIS

A. Ascertainability

The primary purpose of the ascertainability requirement is to provide notice to all potential class members. (*Hicks v. Kaufman & Broad Home Corp. (2001) 89 Cal.App.4th 908, 914, 107 Cal. Rptr. 2d 761*.) In this regard it is important to note that judgments in class actions have preclusive res judicata effects that bind absent class members. (*Id.*) If class members are to receive individualized monetary damages, due process requires notice and **[*5]** an opportunity to opt out. (*Carter v. City of Los Angeles (2014) 224 Cal.App.4th 808, 823, 169 Cal. Rptr. 3d 131* [quoting *Wal-Mart Stores, Inc. v. Dukes (2011) 564 U.S. 338, 360], 824* ["[T]he takeaway from *Wal-Mart* is that the *due process clause* requires notice and opt-out rights to class members unless 'the relief sought must perforce affect the entire class at once ....'"].) "A class representative has the burden to define an ascertainable class." (*Sevidal v. Target Corp. (2010) 189 Cal.App.4th 905, 918, 117 Cal. Rptr. 3d 66*.)

What constitutes an ascertainable class has been the subject of considerable recent case law. Plaintiff relies on *Aguirre v. Amscan Holdings, Inc. (2015) 234 Cal. App. 4th 1290, 184 Cal. Rptr. 3d 415*, arguing that at this stage of the proceedings she need identify neither a method for giving notice to the proposed class nor the names of individual class members but need only put forth a class definition that is precise, objective and presently ascertainable. Based thereon, Plaintiff asserts that individual class members can then "self-identify."

Under the "self-identification" theory a class is ascertainable for purposes of class certification "if it identifies a group of unnamed plaintiffs by describing a set of common characteristics sufficient to allow a member of that group to identify himself or herself as having a right to recover based on the description." (*Sevidal, 189 Cal.App.4th 905, 920, 117 Cal. Rptr. 3d 66*.) Although not entirely free from doubt, it appears that it is also required that the parties and the Court be able to **[*6]** confirm that those who self-identify as members of the class are in fact class members by way of some form of objective evidence. (*Sotelo v Medianews Group Inc. (2012) 207 Cal. App. 4th 639, 650, 143 Cal. Rptr. 3d 293*; *Estrada v FedExGround Package System Inc. (2007) 154 Cal. App. 4th 1, 64 Cal. Rptr. 3d 327*.)

Plaintiff further argues, for the first time in her Reply, that she need not establish a means of giving personal notice to class members and argues that under the notice provisions contained in *California Rules of Court, Rule 3.766(f)* notice in this case may be given by placing notice in newspapers, on defendants' websites, and by placing signage in the restaurants at issue. (Reply at page 5, lines 10-16.) In. this regard Plaintiff relies on *Aguirre*, which held that a "representative plaintiff need not identify, much less locate, individual class members to establish the existence of an ascertainable class." (*Aguirre, supra, 234 Cal.App.4th at p. 1301*.) *Aguirre* further held that the representative plaintiff need not establish a means for providing personal notice of the action to individual class members.

Aguirre's holdings were discussed in *Noel v. Thrifty Payless, Inc. 17 Cal. App. 5th 1315, 226 Cal. Rptr. 3d 465 (2017)*:

We do not endorse the view that individual members of the class must be *identified by name* at the time of a class certification motion, but we do not think it violates class action doctrine or public policy to require some showing of a *means of identifying* them and a description of how notice **[*7]** might be given. The court may require personal notice in a specific case, depending in part on the amount of loss at stake for each individual class member and the size of the class.

Aguirre acknowledged, as have other cases, that the purpose of the ascertainability requirement is the due process concern of facilitating notice to the class. (*Aguirre, supra, 234 Cal.App.4th at pp. 1300-1301*.) That being so, we do not think a trial court should be precluded from inquiring into the means of giving notice at the class certification stage. Yet, the only inquiry into identity of class members allowed under *Aguirre* is to determine whether the class will be ascertainable "at the remedial stage" based on self-identification. (*Id. at p. 1300*.) To ignore the issue of identifying class members for notice purposes gives short shrift to the due process considerations in play at the certification stage, a consequence of the holding of *Aguirre* in which we do not concur."

(*Noel v. Thrifty Payless, Inc. (2017) 17 Cal.App.5th 1315, 1332, 226 Cal. Rptr. 3d 465*.)

The Court concurs with the analysis in *Noel* and, to the extent it rejects *Aguirre*, adopts the reasoning of *Noel* pursuant to *Auto Equity Sales v Superior Court (1962) 57 Cal. 2d 450, 456, 20 Cal. Rptr. 321, 369 P.2d 937* (Where there is more than one appellate court decision, and such appellate decisions are in conflict, the court exercising inferior jurisdiction can and must make a choice **[*8]** between the conflicting decisions). Specifically, the Court finds that it is not sufficient for Plaintiff to merely put forth a class definition under which members can self-identify at the remedial stage of the proceedings. Because absent class members are bound by findings in a class of which they are a member it is a due process imperative that they be given the best possible notice under the circumstances and an opportunity to opt out *prior to* a liability finding if they do not desire to be bound by the Court's findings. Thus, as *Noel* recognized, in determining whether a class is ascertainable, Plaintiff bears the burden to show a *means* of identifying class members and a description of how notice might be given. As was aptly noted by the Court in *Sotelo v. Medianews Group, Inc., 207 Cal. App. 4th at 649*: "[W]here the proposed class contains an unknown number of members who have no recorded relationship with respondents, a serious notice issue results. The theoretical ability to self-identify as a member of the class is useless if one never receives notice of the action."

The Court further concurs that, as recognized in *Sotelo* and *Estrada*, where class members self-identify they must be able to objectively show that they are, in fact, members **[*9]** of the class.

Given these considerations this case has two ascertainability issues. First, the class definition is overly broad, as it includes both those who did and those who did not pay the surcharge at issue. Further, it contains no cut off period. Plaintiff concedes that if an individual did not pay the 3% surcharge he or she should not be included in the class. This includes those individuals who patronized restaurants that did not impose the surcharge (Reply ISO Motion for Class Certification at page 2:27- 3: 2).

Plaintiff asks that the Court modify the class definition to include only those that actually paid the surcharge. The Court may undoubtedly modify Plaintiff's proposal to define a narrower class. (*Hicks v. Kaufman & Broad Home Corp., supra, 89 Cal.App.4th at 916*.) However, there remains the fact that Plaintiff fails to show that there are objective records from which the class can be given personal notice of the action prior to establishing liability nor does she show that membership in the class can be confirmed at the remedial stage by defendants' records.

Plaintiff initially argued that this information could be derived from the defendants' credit card records, relying upon the opinion of her expert, Dan Montrenes. Mr. Montrenes **[*10]** opined in his Declaration in support of this motion that customers who dined at the restaurants in question could be identified from either the daily receipts issued to the merchants from their respective point of sale systems or the monthly merchant processing statements. It was asserted that from these records the credit card numbers of the purchasers could be obtained and that from that data the card issuers could then identify the customers at issue.

The difficulty with this testimony is that in deposition it became clear that Mr. Montrenes had no familiarity with any credit card processing system of any defendant nor did he review any of defendants' business records to determine whether the daily or monthly records he identifies exist, or, if they do, whether the data therein can then be used by the card issuer to identify class members or what time and expense might be involved in such an exercise.[2] (See Ex. B to Patrick Dec. at page 77, lines 5-7; page 118: 1-12.) Further, Montrenes testified that the data identifying specific persons using a credit card is maintained only by the card issuer, and that the first 5 digits of a patron's credit card are required for the issuer to **[*11]** identify the customer, but that Defendants' point of sale systems may not retain information to obtain a complete credit card number. (*Id.* at 34:19-35:10, 49:5-13, 130:3-10.) Further, the deposition showed that not all class members would be identified by Montrenes' proposed methodology even if the data were available. Class members who paid in cash, by gift card, and the like, would be excluded. Finally, the methodology would not determine who paid the credit card bill in question. (Id. at page 106, lines 8-15; 107:12-110:3; 110:8-112:25.) This would need to be determined by examination of individual diners' credit card receipts (See Exhibit B to Styne Dec), as there is no evidence that the amount that appears on the restaurants' daily or monthly records or the customers' monthly statements includes anything other than a gross amount charged. In short, it does not appear that there is a feasible way to give personal notice to class members.

This does not entirely foreclose the possibility of an ascertainable class. In her Reply, Plaintiff proposed that such notice may be dispensed with in favor of publication notice, either in newspapers or on defendants' websites, or by the placing of signage in **[*12]** defendants' restaurants. It is established that "where members of a class have a substantial claim, individual notice is required because it is essential for them to decide whether to remain as members of the class and become bound by the rule of res judicata; whether to intervene with their own counsel; or whether to "opt out" and pursue their independent remedies [W]hen the membership of the class is huge, the damages are minimal, and res judicata and the other problems listed in the first group are insignificant, notice by publication is adequate." (*Cooper v. American Sav. & Loan Assn. (1976) 55 Cal. App. 3d 274, 127 Cal. Rptr. 579*.)

From the limited evidence presented it would appear that the publication form of notice suggested may be appropriate. There is, however, no information available to Defendants to confirm the class' membership. Thus, once the notice is given, self-identifying class members' status as class members could only be confirmed by presentation of their individual receipt showing that they paid the surcharge.

Because the form of notice was first suggested in the Reply Defendants were given no opportunity to respond thereto. Further, no party has addressed the propriety of confirming class membership by reference to individual receipts. Accordingly, **[*13]** the Court tentatively finds that publication notice (i.e. on defendants' websites, in their newsletters, and with signage in their restaurants) would be adequate and that a class is ascertainable only to the extent it consists of:

"All natural persons who were customers at one or more of Defendants' California restaurants between September 1, 2014 and the date of certification who paid an employee benefit surcharge and who maintain a receipt showing such payment. Excluded from the class are: defendants' employees, corporate officers, members of the board of directors, and senior executives of Defendants; and any and all judges and justices, and chambers' staff, assigned to hear or adjudicate any aspect of this litigation."

The parties shall have until February 20, 2018 to file any objection to this proposed definition or the proposed form of notice.

B. Numerosity

There is "[n]o set number ... required as a matter of law for the maintenance of a class action." (See *Rose v. City of Hayward (1981) 126 Cal.App.3d 926, 934, 179 Cal. Rptr. 287* [citing examples wherein classes of as little as 10

---

[2] Insofar as the Court can ascertain, Plaintiff did not obtain any discovery from Defendants as to the type of records they or their card processers maintain.

[*Bowles v. Superior Court (1955) 44 Cal.2d 574, 283 P.2d 704]* and 28 [*Hebbard v. Colgrove (1972) 28 Cal.App.3d 1017, 105 Cal. Rptr. 172]* were upheld].)

Plaintiff states that "the precise number and specific identity of each class member is presently unknown to Plaintiff," but estimates that it can be inferred **[*14]** there are thousands of class members. (Mot. at p.8.) Plaintiff presents evidence that Lucques Catering, Inc. collected $177,106 in revenue as of August 5, 2016, and Rustic Canyon Food and Wine collected $149,755.84 in 2014 and 2015 from the surcharge (see Sterrett Decl., Exs. D [Lucques Form Interrogatory No. 17.1 Response] and F [Publication]).

This element is not disputed by Defendants and is established as to the proposed revised class defined above.

C. Commonality

"[T]he 'ultimate question' for predominance is whether 'the issues which may be jointly tried, when compared with those requiring separate adjudication, are so numerous or substantial that the maintenance of a class action would be advantageous to the judicial process and to the litigants.' [Citations.]" (*Duran v. U.S. Bank Nat. Assn. (2014) 59 Cal.4th 1, 28, 172 Cal. Rptr. 3d 371, 325 P.3d 916* ("*Duran*"), quoting *Collins v. Rocha (1972) 7 Cal.3d 232, 238, 102 Cal. Rptr. 1, 497 P.2d 225*.) "'As a general rule if the defendant's liability can be determined by facts common to all members of the class, a class will be certified even if the members must individually prove their damages.'" (*Brinker at 1022*.) "However . . . class treatment is not appropriate 'if every member of the alleged class would be required to litigate numerous and substantial questions determining his individual right to recover following **[*15]** the 'class judgment" on common issues." (*Duran at 28*, quoting *City of San Jose v. Superior Court (1974) 12 Cal.3d 447, 459, 115 Cal. Rptr. 797, 525 P.2d 701*.) At the certification stage, the Court need not reach the merits of a case. (*Brinker at 1023*.)

Courts are required to carefully weigh respective benefits and burdens and to allow maintenance of the class action only where substantial benefits accrue both to litigants and the courts. (*See* *Under v. Thrifty Oil Co. (2000) 23 Cal.4th 429, 435, 97 Cal. Rptr. 2d 179, 2 P.3d 27*.) As the Supreme Court stated in *Duran*: "trial courts deciding whether to certify a class must consider not just whether common questions exist, but also whether it will be feasible to try the case as a class action." (*Duran at 27*.) Plaintiff must establish by a "preponderance of the evidence that the class action proceeding is superior to alternate means for a fair and efficient adjudication of the litigation." (*Sav-on Drug Stores, Inc. v. Superior Court (2004) 34 Cal.4th 319, 332, 17 Cal. Rptr. 3d 906, 96 P.3d 194*.) Thus, it is not sufficient to show that there are some common issues of law or fact. "Defenses that raise individual questions about the calculation of *damages* generally do not defeat certification. [Citation.] However, a defense in which *liability itself* is predicated on factual questions specific to individual claimants poses a much greater challenge to manageability. This distinction is important." (*Duran* 30, emphasis in original.)

(i) Common Issues Predominate [*16] With Respect to the Cartwright Act Claim

Plaintiff identifies several common questions of law and fact, including: (1) whether Defendants' conduct violated the Cartwright Act; (2) whether Defendants' conspiracy and associated agreements, or any one of them, constitute a per se violation of the Cartwright Act; (3) whether Defendants fraudulently concealed their conduct; (4) whether Defendants' conspiracy and associated agreements restrained trade, commerce, or competition in the Los Angeles restaurant industry; (5) whether, under principles of California ***antitrust law***, Plaintiff and the class suffered injury as a "but for" cause of Defendants' conduct; (6) the effect of Defendants' conduct upon, and the injury caused to, the business or property of Plaintiff and the class; (7) the type and measure of damages suffered by Plaintiff and the class; and (8) whether Defendants should be enjoined to prevent future harm to the class and other California residents. (Compl., ¶35; Mot. at p.11.)

With regard to a Cartwright Act claim, "[t]he basic considerations applicable to class certification have been summarized: Liability in an antitrust action requires proof of two sets of facts: (1) an antitrust **[*17]** violation and (2) a resultant injury to plaintiffs. This latter requirement is also known as 'impact,' 'causation,' 'fact of damage,' and 'fact of injury.' If plaintiffs have stated claims of illegality and impact which can be proved predominantly with facts applicable to the class as a whole, rather than by a series of facts relevant to only individual or small groups of plaintiffs, then prosecution of this case as a class action is appropriate and desirable. [Citation.] If classwide proof of illegality and impact is not possible, the class must be decertified." (*Rosack v. Volvo of America Corp. (1982) 131 Cal.App.3d 741, 752, 182 Cal. Rptr. 800* ("*Rosack*") [quoting *Presidio Golf Club v. National Linen Supply Corp.* (N.D. Cal. 1976) 1976-2 Trade Cases ¶61, 221, pp. 70, 627, 70, 629] [internal quotations omitted].) Proof of injury (impact) is more troublesome than proof of violation, but may be inferred, such that each class member must prove he/she absorbed some portion of the overcharges, when a conspiracy to fix prices has been established and plaintiffs have established that they purchased the affected goods or services. (*Rosack at 753*; *B.W.I Custom Kitchens v. Owens-Illinois, Inc. (1987) 191 Cal. App. 3d 1341, 1348-50, 235 Cal. Rptr. 228* ("*B.W.I.*").)

In this case whether a conspiracy existed is susceptible to common proof. The question applicable across the class is: was there a conspiratorial agreement? **[*18]** (*Id.* at 1349; *In re Cipro Cases I and II (2004) 121 Cal.App.4th 402, 410, 17 Cal. Rptr. 3d 1*.) Plaintiff provides various newsletters from several of the restaurants at issue showing that they agreed to include a 3% healthcare surcharge. For example, Rustic Canyon Wine Bar and Seasonal Kitchen's newsletter volume 45 provides a section entitled "3% Health Care Surcharge," wherein it states, "We've recently sat down with other like-minded local chefs and restaurant owners like Suzanne Goin, Carolyn Stein & David Lentz, John Shook & Vinny Dotolo, and Josiah Citrin to come up with a plan to offer coverage and have decided to implement a 3% employee benefit surcharge added to all of our checks beginning September 1st to pay the October 1 premium." (Sterrett Decl, Ex. B; see also Ex. C [The Hungry Cat restaurant's press release].) Defendant does not deny the existence of such newsletters or that some of the restaurants did in fact add 3% healthcare surcharges to the bills. They note, however, that the fact of the meeting and the discussion was not hidden but well publicized; some restaurants did not adopt the surcharge; others adopted a higher surcharge; some made clear that the charge was optional; others indicate their staffs were trained to explain the charge and removed **[*19]** it upon request. All of those facts make clear that whether an antitrust violation or conspiracy exists is a common question of law and fact that is susceptible to common proof.

Proof of injury (or impact/causation) is somewhat more nuanced. Under California law impact may be inferred when a conspiracy to fix prices has been proven and plaintiffs have established they purchased the price-fixed goods or services. (*B.W.I. at 1350*.) "Once a price-fixing conspiracy has been established, it follows that the class has been injured to some extent." (*Rosack at 760*.) Thus, "impact can be treated as a common question for certification purposes." (*Id. at 753*.) Plaintiff provides Defendant Lucques Catering, Inc.'s discovery responses showing aggregate $177,106 it collected from the 3% surcharge and Rustic Canyon's publication indicating it collected $149,755.84. (Sterrett Decl., Exs. D, F. See *Bruno v. Superior Court (1981) 127 Cal.App.3d 120, 129, 179 Cal. Rptr. 342* FN4 [stating that due process does not prevent calculation of damages on a class-wide basis and that an aggregate calculation is more accurate than summing all individual claims].) Defendants also admit that Rustic Canyon, Huckleberry, Milo & Olive, A.O.C., The Larder at Burton Way, Lucques, Melisse, and The Hungry Cat added a 3% charge, while **[*20]** The Larder at Maple Drive and Tavern added a 3.5% charge. (Patrick Decl., Ex. A [Chart]; Loeb Decl, ¶3, Exs. 1-11; Styne Decl, ¶¶3-5, 10, Exs. A-D; Imhoff Decl, Ex. 1.)

Accordingly, proof of injury is also susceptible to common proof and may be determined on a class wide basis.[3]

In opposition, Defendants argue that various defenses they plan to assert raise individual issues. Specifically, they argue that loss mitigation mechanisms were available to putative class members (i.e., they could agree to pay the surcharge, ask to remove it, or lower their tip to negate it), making this an individualized, restaurant-by-restaurant and meal-by-meal question. As an initial matter it is doubtful that loss mitigation defenses are permitted with respect to a Cartwright Act claim. (See *Clayworth v. Pfizer, Inc. (2010) 49 Cal.4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066* ["Passing on" defense rejected.]) The very issue of whether a mitigation defense is permissible is, of itself, a common question.

---

[3] The unrefuted evidence is that Animal, Son of a Gun, Trois Mec, Petit Trois, John & Vinny's, and Sweet Rose Creamery did not impose the surcharge. (See Dec. of Josh Loeb, Vincent Dotolo, Jon Shook.)

Nor is Defendants' “but for” argument persuasive. The gist of this argument is that there is no showing that “but for” the alleged agreement prices would not have been raised. In this regard, defendants' expert notes that an increase in minimum wage as of July 1, 2014 and the adoption of **[*21]** the Affordable Care Act suggest that market forces would have caused the surcharge in any event. This too is a common factual question. See *Catalano, Inc. v. Target Sales, Inc. (1980) 446 U.S. 643, 649, 100 S. Ct. 1925, 64 L. Ed. 2d 580* [where Sherman Act violation based on competitors' agreement of horizontal price fixing of credit terms found although other “but for” causes such as other reasons to increase prices may arguably be relevant, “the fact that a practice may turn out to be harmless in a particular set of circumstances will not prevent its being declared unlawful *per se*.”)

Defendants also take issue with Plaintiff's retained economist, Dr. Charles J. Cicchetti, Ph.D., and his opinion that damages can be established on a classwide basis. As an initial matter, and as noted *supra*, there is a presumption of impact (damages) when a horizontal market-wide restraint of trade is shown. (*In re Cipro Cases, supra, 121 Cal. App. 4th at 413*; *B.W.I. at 1350*.) Further, that there may be a difference of expert opinion as to how to calculate damages on a classwide basis does not counsel against class certification. Some of the defendants admitted in discovery that they have exact figures in their own records to show the amount they received as a result of imposition of the surcharge (see Sterrett Decl., Exs. D [Lucques Form Interrogatory No. 17.1 **[*22]** Response] and F [Publication]). Further, given that the class is to be limited to those that have receipts that show that they paid the surcharge, the calculation of damages either as a whole or individually amounts to a math exercise only.

In short, the Cartwright Act claim is susceptible to common proof and common questions of law and fact predominate. If the Court determines that Defendants' proposed defenses are legally viable and that individual inquiry will be need to establish liability as to class members, decertification can be requested at that time.

(ii) Common issues predominate with the UCL claim

The parties do not discuss the UCL claim in detail, and Plaintiff only attempts to do so in reply (at pp. 12-13). However, as evidenced by the complaint, the UCL claim is derivative of Plaintiff's first cause of action for violation of the Cartwright Act. (See Compl., ¶¶53-54.) Plaintiff seeks equitable class-wide relief for, among other things, restitution. (*Id.*, ¶57(c).) As this claim is derivative of the first cause of action, common issues predominate here as well. “[R]estitution under the UCL may be ordered without individualized proof of harm....” (*People ex rel. Bill Lockyer v. Fremont Life Ins. Co. (2002) 104 Cal.App.4th 508, 532, 128 Cal. Rptr. 2d 463*.)

D. Superiority/Manageability

Closely **[*23]** related to the issue of commonality is that of manageability and superiority. Courts are required to carefully weigh the respective benefits and burdens and to allow maintenance of the class action only where substantial benefits accrue both to litigants and the courts. (*See* *Under v. Thrifty Oil Co. (2000) 23 Cal.4th 429, 435, 97 Cal. Rptr. 2d 179, 2 P.3d 27*.) As the Supreme Court stated in *Duron*, “trial courts deciding whether to certify a class must consider not just whether common questions exist, but also whether it will be feasible to try the case as a class action.” (*Duran at 27*.)

“Manageability of the class with regard to proof of the amount of each class member's damages may present an independent ground for failure to certify the class.” (*Rosack at 754*.)

Here, a class action mechanism is a superior method to adjudicate the claims. Plaintiff states that individually, class members would not have the resources to pursue this action on their own and it would be inefficient for the Court to try as the injuries alleged are relatively small in amount, and thus a class action is a superior method. “Cartwright Act defendants should not be ‘permitted to retain ill gotten gains simply because their conduct harmed large numbers of people in small amounts instead of small numbers of people in **[*24]** large amounts.’” (*Clayworth v. Pfizer, Inc. (2010) 49 Cal.4th 758, 784, 111 Cal. Rptr. 3d 666, 233 P.3d 1066* FN21.)

As for manageability, Plaintiff provides not trial plan. Nonetheless, in limiting the class as described above the Court does not foresee any significant manageability issues.

E. Adequacy and Typicality

"'The adequacy inquiry ... serves to uncover conflicts of interest between named parties and the class they seek to represent.' [Citation.] '... To assure "adequate" representation, the class representative's personal claim must not be inconsistent with the claims of other members of the class.' [Citations.] Similarly, the purpose of the typicality requirement 'is to assure that the interest of the named representative aligns with the interests of the class.' [Citation.] 'Typicality refers to the nature of the claim or defense of the class representative, and not to the specific facts from which it arose or the relief sought.' [Citations.] The test of typicality 'is whether other members have the same or similar injury, whether the action is based on conduct which is not unique to the named plaintiffs, and whether other class members have been injured by the same course of conduct.' [Citation.]" (*Johnson v. GlaxoSmithKline, Inc. (2008) 166 Cal.App.4th 1497, 1509, 83 Cal. Rptr. 3d 607*.)

Furthermore, "[a]dequacy of representation depends on whether the plaintiff's **[*25]** attorney is qualified to conduct the proposed litigation and the plaintiff's interests are not antagonistic to the interests of the class." (*See* McGhee v. *Bank of America (1976) 60 Cal. App. 3d 442, 450, 131 Cal. Rptr. 482*.)

(i) Adequacy and Typicality of Plaintiff

Plaintiff states she has been actively involved in this action since its inception, understands the risk of pursuing this case, and is committed to pursue the case to completion to the best interest of the putative class members. (Imhoff Decl., ¶¶3-5.) In opposition, Defendant provides evidence of putative class members to show that Plaintiff's interests are antagonistic to their views—namely, that while she views the surcharge as a negative impact, various putative class members have indicated their support for such coverage. (See Lucques' Guest Declarations, Rustic Canyon's Customer Declarations.) Absent a widespread showing of antagonism in the class suit where the conflict goes to the very subject matter of the litigation, adequacy of representation will not be called into question. (*Richmond v. Dart Industs., Inc. (1981) 29 Cal. 3d 462, 470, 174 Cal. Rptr. 515, 629 P.2d 23*.) Here, Defendants have not upheld their burden in showing such widespread antagonism. Patrons who are opposed to the action can elect not to participate in it.

Defendants also argue that Plaintiff was a patron of **[*26]** only 1 of 17 restaurants at issue in this action on only one occasion and thus is not typical of other diners at other restaurants. Plaintiff alleges that on April 24, 2015 (during the class period), she dined at Rustic Canyon Restaurant and was charged a 3% health surcharge of $3.60, which she viewed as mandatory. (Imhoff Decl., ¶2, Ex. 1 [Receipt].) Plaintiff has identified 17 restaurants in her complaint. As the chart attached to the Patrick Decl., Ex. A, shows, the defendants were not entirely uniform in imposing the surcharge. Some did not impose it at all. Some imposed 3%. Some imposed 3.5%. Some indicated it was optional. For example, The Huckleberry Brunch Menu states, "*A 3% charge is added to all checks to cover the costs of offering fully covered healthcare to our employees. Feel free to ask us if you have any questions about the charge. Thank you for supporting a healthier and happier staff." (Loeb Decl., Ex. 2 [Huckleberry Menu].) In contrast, the Rustic Canyon receipt states, "A 3% charge is added to the restaurant to all checks to help offer fully covered healthcare to all of our employees. Please let us know if you have questions *or if you'd like the charge removed* **[*27]** . Thanks for supporting a healthier staff!" (Loeb Decl., Ex. 9 [Rustic Canyon Receipt] [emphasis added].) Similarly, Melisse's receipts and menu state. "A 3% Charge is added for Health Insurance Benefits for our employees. (This can be removed upon request)." (1104 Wilshire, LLC's Staff Declarations at Eric Szymanski Decl., Exs. A-B.)

The fact that Imhoff viewed the charge as "mandatory" when her receipt indicated the charge could be removed, does not render her inadequate. This fact is not shown to be unique to her nor necessarily show a defense unique to her given the current state of the law. Further, how Plaintiff is inadequate to represent those who dined at other establishments is not shown. While different diners may have had different experiences and some may have not been subject to the charge, either because the restaurant did not charge it at all or it was removed, there is no showing that Plaintiff's experience was unique or subjects her to unique defenses.

Adequacy is thus shown.

(ii) Adequacy of Counsel

Plaintiff's counsel, Sterrett Law and the Law Office of Ara Jabagchourian, are qualified to litigate this action as they have shown their experience in class actions, including **[*28]** antitrust actions. (Sterrett Decl., ¶¶4-9; Jabagchourian Decl., ¶¶5, 7-14, Exs. A-C.) This is not disputed by Defendants. Adequacy of counsel has been established.

IV. CONCLUSION

The Court tentatively finds that a class is certifiable to the extent it consists of:

“All natural persons who were customers at one or more of Defendants' California restaurants between September 1, 2014 and the date of certification who paid an employee benefit surcharge and who maintain a receipt showing such payment. Excluded from the class are: defendants' employees; corporate officers, members of the board of directors, and senior executives of Defendants; and any and all judges and justices, and chambers' staff, assigned to hear or adjudicate any aspect of this litigation.”

The parties shall have until February 20, 2018 to file any objection to this definition or to argue any further points regarding certification based upon the proposed definition and method of giving notice. A further hearing shall be held 3/21, 2018 at 11:00am Prior thereto counsel shall meet and confer and discuss the language of a proposed notice in the event the Court proceeds as indicated herein. Proposals for notice language shall **[*29]** be filed 5 court days in advance of 3/21, 2018.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Upon a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court must determine whether a complaint makes allegations that, if proven, would entitle a plaintiff to relief. In order to survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. *Fed. R. Civ. P. 8* does not require detailed factual allegations, but a pleading that offers labels and conclusions or formulaic recitation of the elements of a cause of action will not do. A complaint may plausibly entitle a plaintiff to relief when there is factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

[HN2](#)[] **Motions to Dismiss, Failure to State Claim**

There are two working principles that guide analysis under *Fed. R. Civ. P. 12(b)(6)*: First, the court must accept all factual allegations as true and draw all reasonable inferences in favor of the non-moving party, and second, only a complaint that states a plausible claim for relief survives a motion to dismiss, and this determination is a context-specific task that requires the reviewing court to draw on its judicial experience and common sense.

Business & Corporate Compliance > ... > Trademark Law > Causes of Action Involving Trademarks > Infringement Actions

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Business & Corporate Compliance > ... > Unfair Competition > Federal Unfair Competition Law > Lanham Act

[HN3](#)[] **Causes of Action Involving Trademarks, Infringement Actions**

Section 43(a) of the Lanham Act, *15 U.S.C.S. § 1125(a)*, is a broad federal unfair competition provision which protects unregistered trademarks similar to the way that *§ 32(1) of the Lanham Act*, *15 U.S.C.S. § 1114(1)*, protects registered marks. Courts have interpreted that section as granting celebrities a trademark-like interest in their name, likeness, and persona that may be vindicated through a false endorsement claim.

Torts > ... > Invasion of Privacy > Appropriation > Elements

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 2nd Circuit Court

[HN4](#)[] **Appropriation, Elements**

The protection against misappropriation of the right of publicity under *N.Y. Civ. Rights Law § 51* is meaningfully distinct from the right against trademark infringement. Whereas trademarks seek to simultaneously protect consumers from deceptive practices and trademark owners from the plundering of their brand's goodwill, the right of publicity only protects the right to control the commercial use of identity. This is a meaningful distinction. Because the *Lanham Act* is in part a consumer protection statute, a plaintiff must prove a likelihood of consumer confusion, whereas in a right of publicity claim the plaintiff need only prove misappropriation.

Trademark Law > Subject Matter of Trademarks > Particular Subject Matter > Right of Publicity

[HN5](#)[] **Particular Subject Matter, Right of Publicity**

To prove a claim of false endorsement, a plaintiff must show that the defendant, (1) in commerce, (2) made a false or misleading representation of fact (3) in connection with goods or services (4) that is likely to cause consumer confusion as to the origin, sponsorship, or approval of the goods or services.

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 2nd Circuit Court

Trademark Law > Subject Matter of Trademarks > Particular Subject Matter > Right of Publicity

[HN6](#)[] **Circuit Court Factors, 2nd Circuit Court**

In assessing the fourth element of a false endorsement claim—the likelihood of confusion—courts in the Second Circuit apply the eight-factor Polaroid test. Those factors are: (1) strength of the trademark; (2) similarity of the marks; (3) proximity of the products and their competitiveness with one another; (4) evidence that the senior user may bridge the gap by developing a product for sale in the market of the alleged infringer's product; (5) evidence of actual consumer confusion; (6) evidence that the imitative mark was adopted in bad faith; (7) respective quality of the products; and (8) sophistication of consumers in the relevant market.

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 2nd Circuit Court

Trademark Law > Subject Matter of Trademarks > Particular Subject Matter > Right of Publicity

HN7[] **Circuit Court Factors, 2nd Circuit Court**

Application of the Polaroid factors is not rote, and the factors are neither exhaustive nor dispositive; rather, a court should keep in mind that the ultimate question is whether the use in its totality would likely confuse consumers. For that reason, courts often adjust the Polaroid factors for false endorsement claims, as they are tailored for more run-of-the-mill trademark infringement actions. For example, the quality of the products and bridging the gap are often not considered. Furthermore, the "mark" is the plaintiff's persona and the "strength of the mark" refers to the level of recognition that the plaintiff has among the consumers to whom the advertisements are directed.

Trademark Law > Likelihood of Confusion > Consumer Confusion

Trademark Law > Subject Matter of Trademarks > Particular Subject Matter > Right of Publicity

HN8[] **Likelihood of Confusion, Consumer Confusion**

The use of a person's persona cannot cause confusion unless the public recognizes the plaintiff to some degree. Thus, there is no bright line level of celebrity necessary to sustain a claim for false endorsement; rather, all that is necessary is that the plaintiff's identity carries some level of consumer recognition.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 2nd Circuit Court

Trademark Law > Subject Matter of Trademarks > Particular Subject Matter > Right of Publicity

HN9[] **Motions to Dismiss, Failure to State Claim**

The standard of the Polaroid test for the likelihood of confusion imposes a high bar on a motion to dismiss, as normally the likelihood of confusion is a factual question, centering on the probable reactions of prospective purchasers. To prevail, defendants in a false endorsement action must show that, assuming the facts stated in the complaint are true, the court cannot conclude that plaintiff's identity carries enough recognition capable of causing confusion.

Trademark Law > Likelihood of Confusion > Consumer Confusion

Trademark Law > Subject Matter of Trademarks > Particular Subject Matter > Right of Publicity

HN10[] Likelihood of Confusion, Consumer Confusion

It is plain that the Lanham Act's protection against infringement is not limited to any particular type of consumer confusion. Rather, Section 43(a) protects against all representations likely to cause confusion as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities. 15 U.S.C.S. § 1125(a)(1)(A). Thus, confusion related to any type of association is sufficient in a false endorsement claim.

Trademark Law > Subject Matter of Trademarks > Particular Subject Matter > Right of Publicity

HN11[] Particular Subject Matter, Right of Publicity

Even if endorsement were the sole type of confusion capable of satisfying a false endorsement claim, the mere use of a celebrity's image can be sufficient.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN12[] Deceptive & Unfair Trade Practices, State Regulation

To state a claim under N.Y. Gen. Bus. Law § 349, a plaintiff need only allege three elements: (1) the act or practice was consumer-oriented; (2) the act or practice was misleading in a material respect; and (3) the plaintiff was injured as a result.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Business & Corporate Compliance > ... > Trademark Law > Causes of Action Involving Trademarks > Infringement Actions

HN13[] Deceptive & Unfair Trade Practices, State Regulation

The minority of New York Federal District Courts have allowed non-consumer's trademark infringement claims to proceed under N.Y. Gen. Bus. Law § 349 when the alleged public harm was nothing more than consumer confusion.

Civil Procedure > Appeals > Appellate Jurisdiction > Certified Questions

HN14[] Appellate Jurisdiction, Certified Questions

If New York's highest court has not addressed a question, then a New York Federal District Court must either (1) predict how the New York Court of Appeals would resolve the state law question, or, if state law is so uncertain that the court can make no reasonable prediction, (2) certify the question to the New York Court of Appeals for a definitive resolution.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN15[] Deceptive & Unfair Trade Practices, State Regulation

New York Courts have recognized that the purpose of *N.Y. Gen. Bus. Law § 349* is to protect consumers from whatever form deception may take, and have accordingly interpreted the remedial statute broadly. The law prohibits those acts or practices which undermine a consumer's ability to evaluate his or her market options and to make a free and intelligent choice. In this sense, the deception itself is the harm that the statute seeks to remedy.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Governments > Legislation > Statute of Limitations > Time Limitations

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Continuing Tort Theory

Governments > Legislation > Statute of Limitations > Tolling

HN16[] **Deceptive & Unfair Trade Practices, State Regulation**

Private rights of action under *N.Y. Gen. Bus. Law § 349* are governed by a three-year statute of limitations. *N.Y. C.P.L.R. § 214(2)*. The private right of action accrues under *§ 349* when plaintiff has been injured by a deceptive act or practice violating *§ 349*. If there is a series of continuing violations, the continuing wrong doctrine tolls the limitation period until the date of the commission of the last wrongful act.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Statute of Limitations

HN17[] **Motions to Dismiss, Failure to State Claim**

Ordinarily, a statute of limitations defense is inappropriate on a *Fed. R. Civ. P. 12(b)(6)* motion as that defense tends to rely on a factual dispute. But a statute of limitations defense may be decided on a *Rule 12(b)(6)* motion if the defense appears on the face of the complaint.

Business & Corporate Compliance > ... > Parties > Defendants > Personal Liability of Corporate Directors, Employees & Shareholders

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN18[] **Infringement Actions, Personal Liability of Corporate Directors, Employees & Shareholders**

On a motion to dismiss, it is sufficient to simply state that the individual defendant is in control of the operations of the business that has infringed on the trademark.

Trademark Law > ... > Damages > Types of Damages > Punitive Damages

HN19[] **Types of Damages, Punitive Damages**

Punitive damages are unavailable under the *Lanham Act*.

Trademark Law > ... > Damages > Types of Damages > Punitive Damages

Trademark Law > ... > Damages > Types of Damages > Treble Damages

HN20[] **Types of Damages, Punitive Damages**

There is a reason treble damages and punitive damages have different names; they are different measures of damages. Both may attempt to deter conduct by enhancing damage awards for conduct that regularly evades detection. But when a statute provides for a specific multiplier—such as treble damages—federal courts usually interpret that as a Congressional command not to exceed that multiplier.

Opinion

REPORT AND RECOMMENDATION

TISCIONE, United States Magistrate Judge:

Plaintiffs allege that the Defendants—owners and operators of a strip club on Long Island—have unlawfully used Plaintiffs' images in social media advertisements. Plaintiffs claim this violated the *Lanham Act, 15 U.S.C. § 1051 et seq.*, and *New York's Deceptive Practices Act, New York General Business Law § 349*.

Pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, the Defendants now move to dismiss. This Court recommends that the entirety of Defendants' motion be denied with two exceptions: the Deceptive Practices Act claims brought by Plaintiffs Guerra, Koren, and Toth are time-barred and must be dismissed, and the prayer for punitive damages under the *Lanham Act* must be dismissed **[*2]** as punitive damages are unavailable under that law.

BACKGROUND

Plaintiffs are eight professional models and actresses. Am. Compl. ¶¶ 19-16, 24-63 (Dkt. No. 10).[1] They have a variety of public credits to their name. *See* Am. Compl. ¶ 24 (Plaintiff Mayes), ¶ 29 (Plaintiff Pepaj), ¶ 35 (Plaintiff Middleton), ¶ 40 (Plaintiff Edmondson), ¶ 45 (Plaintiff Guerra), ¶ 49 (Plaintiff Koren), ¶ 55 (Plaintiff Toth), ¶ 59 (Plaintiff Archuletta). Some of their more notable credits include:

---

[1] As this is a motion to dismiss, this Court must accept all of the allegations made in Plaintiffs' operative complaint to be true. *Giambrone v. Meritplan Ins. Co., 2017 U.S. Dist. LEXIS 29128, 2017 WL 2303980, at *3 (E.D.N.Y. Feb. 28, 2017)* (citation omitted), *adopted* by, *2017 U.S. Dist. LEXIS 80062, 2017 WL 2303507 (E.D.N.Y. May 24, 2017)*.

• Appearances in national magazines such as Maxim, Vogue, and Cosmopolitan for Plaintiff Mayes (Am. Compl. ¶ 24), Playboy for Plaintiff Edmondson (*id.* ¶ 40), and Esquire for Plaintiff Koren (*id.* ¶ 49);

• Appearances on national television shows such as The Tonight Show and The Jay Leno Show for Plaintiff Mayes (*id.* ¶ 24), True Detective for Plaintiff Pepaj (Am. Compl. ¶ 29), Chappelle's Show for Plaintiff Guerra (*id.* ¶ 45), and Shark Tank for Plaintiff Koren (*id.* ¶ 49);

• Appearances in commercials for major products such as Diet Coke for Plaintiff Pepaj (*id.* ¶ 29), Burger King for Plaintiff Guerra (*id.* ¶ 45), and Nike for Plaintiff Koren (*id.* ¶ 49);

• Appearances alongside celebrities such as Kim Kardashian for Plaintiff **[*3]** Koren (*id.* ¶ 49) and Justin Timberlake for Plaintiff Archuletta (*id.* ¶ 59).

Plaintiffs also have significant social media followings. *See* Am. Compl. ¶ 35 (Plaintiff Middleton has "over 2 million social media followers"); *id.* ¶ 55 (same for Plaintiff Toth).

Defendants Summit Entertainment Corp. and Phillip Tricolla own and operate Gentlemen's Quarters, a strip club in Baldwin, New York. *Id.* ¶¶ 17-18. Plaintiffs allege that Defendants misappropriated Plaintiffs' images by altering photographs of Plaintiffs and using them in social media advertisements. *Id.* ¶¶ 19-86. These advertisements were primarily holiday or event themed, such as an advertisement featuring Plaintiff Mayes in a Native American costume before Thanksgiving (*id.* ¶¶ 24-25) or an advertisement featuring Plaintiff Middleton dressed as a cheerleader in advance of the Super Bowl (*id.* ¶ 30); *see also* Am. Compl. Exs. A-H (Dkt. No. 10-1) (selection of the advertisements at issue). According to Plaintiffs, they never gave consent or received remuneration for the advertisements (*id.* ¶¶ 24-63) and Defendants left some of these advertisements on their social media pages for months after they were put on notice of the misappropriations **[*4]** by the filing of this lawsuit (*see id.* ¶ 3, Exs. A-D, H). Plaintiffs do not allege that their names appeared in the advertisements, and the images they have attached to their complaint do not indicate otherwise. *See id.* ¶¶ 19-63, Exs. A-H.

Plaintiffs filed this action in December 2016 alleging eight causes of action, including claims for false endorsement under *§ 43 of the Lanham Act*, *15 U.S.C. § 1125*, and Deceptive Trade Practices under *New York's Deceptive Trade Practices Act, NYGBL § 349*. *See* Compl. ¶¶ 71-136 (Dkt. No. 1). Plaintiffs later removed their six other causes of action when they filed their amended complaint in March 2017. *Compare* Compl. ¶¶ 71-136 *with* Am. Compl. ¶¶ 87-103. In the operative complaint, they request actual damages, an injunction preventing Defendants from using Plaintiffs' images to promote Gentleman's Quarters, punitive damages, and costs and attorney's fees. *Id.* at 20.

Defendants moved to dismiss the amended complaint in April 2017 (*see* Dkt. No. 13), and the Honorable Nicholas G. Garaufis referred the motion to this Court for a report and recommendation.

DISCUSSION

HN1[] Upon a motion to dismiss under *Rule 12(b)(6)*, a court must determine whether a complaint makes allegations that, if proven, would entitle a plaintiff to relief. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In order to "survive a **[*5]** motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*); *accord Sarmiento v. United States, 678 F.3d 147, 152 (2d Cir. 2012)*. *Rule 8 of the Federal Rules of Civil Procedure* does not require detailed factual allegations, but "[a] pleading that offers 'labels and conclusions' or 'formulaic recitation of the elements of a cause of action will not do.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 555, 557)*. A complaint may plausibly entitle a plaintiff to relief when there is "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* (citing *Twombly, 550 U.S. at 556*); *see also Swanson v. Citibank, N.A., 614 F.3d 400, 404-05 (7th Cir. 2010)* ("[T]he plaintiff must give enough details about the subject-matter of the case to present a story that holds together. In other words, the court will ask itself could these things have happened, not did they happen.").

HN2[] There are "'[t]wo working principles'" that guide this analysis: "First, the court must accept all factual allegations as true and draw all reasonable inferences in favor of the non-moving party," and "'[s]econd, only a complaint that states a plausible claim for relief survives a motion to dismiss,' and this determination is a 'context-specific task that requires the reviewing court to draw **[*6]** on its judicial experience and common sense.'" *Giambrone v. Meritplan Ins. Co., 2017 U.S. Dist. LEXIS 29128, 2017 WL 2303980, at *3 (E.D.N.Y. Feb. 28, 2017)* (quoting *Iqbal, 556 U.S. at 678, 679)*, *adopted by*, *2017 U.S. Dist. LEXIS 80062, 2017 WL 2303507 (E.D.N.Y. May 24, 2017)*.

Defendants have raised arguments for dismissing Plaintiffs' *Lanham Act* and *Section 349* claims in their entirety. *See* Mem. of Law in Supp. of Def.'s Mot. to Dismiss at 4-13 (Dkt. No. 13-1) ("Mem. ISO"); Reply in Supp. of Def.'s Mot. to Dismiss at 1-7 (Dkt. No. 14) ("Reply ISO"). They also argue that Plaintiffs' claims against the individual Defendant, Mr. Tricolla, should be dismissed, as well as the prayer for punitive damages. Mem. ISO at 11-18. Plaintiffs have responded to almost all of Defendants' arguments. *See* Opposition to Def.'s Mot. to Dismiss (Dkt. No. 13-2) ("Opp.").

This Court addresses each argument in turn below.

I. Plaintiffs' Claims for of False Endorsement under the *Lanham Act*.

Plaintiffs' first claim is for false endorsement under *Section 43(a)* of the Lanham Act, *15 U.S.C. § 1125(a)*. Am. Compl. ¶¶ 87-95. HN3[] *Section 43(a)* "is a broad federal unfair competition provision which protects unregistered trademarks similar to the way that *section 32(1)* of the Lanham Act . . . protects registered marks." *Chambers v. Time Warner, Inc., 282 F.3d 147, 155 (2d Cir. 2002)* (citing *Wal—Mart Stores, Inc. v. Samara Bros., Inc., 529 U.S. 205, 209-10, 120 S. Ct. 1339, 146 L. Ed. 2d 182 (2000))*. Courts have interpreted that section as granting celebrities "a trademark-like interest in their name, likeness, and persona that may be vindicated through a false **[*7]** endorsement claim." *Bondar v. LASplash Cosmetics, 2012 U.S. Dist. LEXIS 175873, at *17-18 (S.D.N.Y. Dec. 11, 2012)* (collecting cases), *recons. den*. *2013 U.S. Dist. LEXIS 352 (S.D.N.Y. Jan. 2, 2013)*.[2]

HN5[] To prove that claim, Plaintiffs must show "that the defendant, (1) in commerce, (2) made a false or misleading representation of fact (3) in connection with goods or services (4) that is likely to cause consumer

[2] Defendants contend that this is not the appropriate remedy for Plaintiffs' alleged harms, which Defendants believe is more appropriately defined as a claim for the misappropriation of Plaintiffs' right of publicity under *New York Civil Rights Law § 51*. *See* Mem. ISO at 14. HN4[] The protection against misappropriation of the right of publicity is indeed meaningfully distinct from the right against trademark infringement. *See* Barbara A. Solomon, *Can the Lanham Act Protect Tiger Woods? An Analysis of Whether the Lanham Act Is A Proper Substitute for A Federal Right of Publicity*, 94 Trademark Rep. 1202, 1206-07 (2004). Whereas trademarks seek to simultaneously protect consumers from deceptive practices and trademark owners from the plundering of their brand's goodwill, the right of publicity only protects the right to control the commercial use of identity. *Id.* This is a meaningful distinction. Because the *Lanham Act* is in part a consumer protection statute, a plaintiff must prove a likelihood of consumer confusion, whereas in a right of publicity claim the plaintiff need only prove misappropriation. *Id.*

Defendants are correct that the true gravamen of Plaintiffs' claim is infringement on their right of publicity. *See, e.g.*, Am. Compl. ¶ 23 ("Defendants' misappropriation occurred without the Plaintiff's knowledge, consent or authorization, at no point did any Plaintiff ever receive any remuneration for Defendants' improper and illegal use of their Images."). But that observation has no legal traction. The cause of action for false endorsement under the *Lanham Act* is well-accepted in this and other circuits. *See* ***Jackson v. Odenat, 9 F. Supp. 3d 342, 355 (S.D.N.Y. 2014)*** (collecting cases). Plaintiffs' alleged harms, therefore, fall squarely within the protections of the *Lanham Act*. *See* *Doe v. Friendfinder Network, Inc., 540 F. Supp. 2d 288, 306 (D.N.H. 2008)* (denying motion to dismiss claims under *§ 43(a)* for the unauthorized use of plaintiff's identity on adult dating website because the use "falls directly" within [the *Lanham Act's*] language").

confusion as to the origin, sponsorship, or approval of the goods or services." *Burck v. Mars, Inc., 571 F. Supp. 2d 446, 455 (S.D.N.Y. 2008)* (citations omitted).

Defendants assert that Plaintiffs have failed to state a claim for false endorsement in two respects: (1) Plaintiffs have failed to allege that they are sufficiently well known such that the misappropriation of their images would likely cause confusion (Mem. ISO at 5-8); and (2) Plaintiffs have failed to allege that the use of their images qualified as an endorsement capable of causing consumer confusion (Mem. ISO at 8-10). Neither argument is persuasive.

A. Whether Plaintiffs have Sufficiently Alleged Public Recognition Sufficient to Cause Consumer Confusion.

HN6[] In assessing the fourth element of a false endorsement claim—the likelihood of confusion—"courts in the Second **[*8]** Circuit apply the eight-factor test laid out in *Polaroid Corp. v. Polarad Elecs. Corp., 287 F.2d 492 (2d Cir.1961)*." *Jackson v. Odenat, 9 F. Supp. 3d 342, 355 (S.D.N.Y. 2014)* (citing *Kelly—Brown v. Winfrey, 717 F.3d 295, 307 (2d Cir. 2013))*, *recons. den*. *9 F. Supp. 3d 342, 368 (S.D.N.Y. 2014)*. Those factors are:

> (1) strength of the trademark; (2) similarity of the marks; (3) proximity of the products and their competitiveness with one another; (4) evidence that the senior user may "bridge the gap" by developing a product for sale in the market of the alleged infringer's product; (5) evidence of actual consumer confusion; (6) evidence that the imitative mark was adopted in bad faith; (7) respective quality of the products; and (8) sophistication of consumers in the relevant market.

Id. at 355-56. ***HN7***[] Application of these factors is not rote, and the factors are neither exhaustive nor dispositive; rather, "a court should keep in mind that the ultimate question is whether the use in its totality would likely confuse consumers." *Id. at 356*.[3] For that reason, courts often adjust the *Polaroid* factors for false endorsement claims, as they are tailored for more run-of-the-mill trademark infringement actions. *Id.* For example, the "quality of the products and 'bridging the gap' are often not considered." *Id.* (citing *Standard & Poor's Corp. v. Commodity Exch., Inc., 683 F.2d 704, 708 (2d Cir.1982))*. Furthermore, "the 'mark' is the plaintiff's persona and the 'strength of the mark' refers to the level of recognition **[*9]** that the plaintiff has among the consumers to whom the advertisements are directed." *Id.* (citing *Bruce Lee Enters. LLC v. A.V.E.L.A., Inc., 2011 U.S. Dist. LEXIS 36406, 2011 WL 1327137, at *20) (S.D.N.Y. Mar. 31, 2011)*.

HN9[] This standard imposes a high bar on Defendants' motion to dismiss, as normally "the likelihood of confusion is a factual question, centering on the probable reactions of prospective purchasers." *Pirone v. MacMillan, Inc., 894 F.2d 579, 584 (2d Cir. 1990)*. To prevail, Defendants must show that, assuming the facts stated in the complaint are true, this Court cannot conclude that Plaintiffs' identity carries enough recognition capable of causing confusion. *See* *Rubio v. Barnes & Noble, Inc., 2014 U.S. Dist. LEXIS 169147, 2014 WL 6769150, at *3 (S.D.N.Y. Nov. 12, 2014)*.

Defendants do not clear that bar, as the complaint's allegations are more than sufficient to support a likelihood of consumer confusion. Plaintiffs allege that they are all "well known professional models." Am. Compl. ¶¶ 9-16. And contrary to Defendants' claim that this is a bald allegation supported only with "a handful of modeling credits," Mem. ISO at 12, Plaintiffs have provided a thorough list including appearances in national magazines and television programs, as well as associations with other celebrities, *see* Am. Compl. ¶¶ 24, 29, 35, 40, 45, 49, 55, 59. It is borderline facetious to suggest that Plaintiffs who purportedly have appeared on the Jay Leno Show,

---

[3] The parties dispute whether the question is consumer confusion or celebrity status. *Compare* Mem. ISO at 5-8 *with* Opp. at 7-10. But those two questions are obverse; ***HN8***[] the use of a person's persona cannot cause confusion unless the public recognizes the plaintiff to some degree. *See* *Rubio, 2014 U.S. Dist. LEXIS 169147, 2014 WL 6769150, at *3 (S.D.N.Y. Nov. 12, 2014)*. Thus, there is no bright line level of "celebrity" necessary to sustain a claim for false endorsement; rather, all that is necessary is that the plaintiff's "identity carries some 'level of consumer recognition.'" *Id.* (quoting *Bondar, 2012 U.S. Dist. LEXIS 175873, at *27*).

Chapelle's **[*10]** Show, and Shark Tank (*id.* ¶¶ 24, 45, 49), or who have appeared in magazines such as Vogue and Esquire (*id.* ¶¶ 24, 49), or who have publicly appeared with Kim Kardashian (*id.* ¶ 49) have failed to make plausible allegations of public recognition. *See* *Bondar, 2012 U.S. Dist. LEXIS 175873, at *28-29* (denying motion to dismiss because the plaintiff had "alleged that she is [a] 'well known' fashion model, who has appeared on catwalks for prestigious designers and been featured in a number of popular fashion magazines"). And the purported extent of Plaintiffs' social media following—as many as two million Facebook followers, seven-hundred thousand Instagram followers, and one-hundred thousand Twitter followers (*id.* ¶¶ 35, 55)—further corroborates those allegations with factual specifics. *See* *Lancaster v. Bottle Club, LLC, 2017 U.S. Dist. LEXIS 109230, at *18 (M.D. Fla. July 14, 2017)* ("The Court finds that Plaintiffs have alleged sufficient facts to state a plausible claim for relief. Plaintiffs . . . allege their extensive work history in the modeling industry and their numbers of followers on social media.").

The decisions upon which Defendants rely do not suggest otherwise. For example, in *Pelton v. Rexall Sundown, Inc., 2001 U.S. Dist. LEXIS 3825 (S.D.N.Y. Apr. 2, 2001)* the court granted summary judgment, finding that there was no issue of material fact because there was "simply no evidence that a consumer **[*11]** who sees this photograph is likely to recognize Plaintiff." *Id. at *10*. While that type of conclusion is appropriate at the summary judgment stage, it is premature on a 12(b)(6) motion. *See, e.g.,* *Bondar, 2012 U.S. Dist. LEXIS 175873, at *29* ("It is unlikely that the public at large is familiar with Bondar. However, it is possible that discovery will indicate that her mark is strong enough to cause a likelihood of consumer confusion."). In the other cases, the plaintiffs either failed to plead that they were well known (*see* *Rubio, 2014 U.S. Dist. LEXIS 169147, 2014 WL 6769150, at *3* ("[Plaintiff] fails to allege that her name carries any commercial value analogous to a trademark, or that it is recognized by consumers in the relevant market."); *Albert v. Apex Fitness, Inc., 1997 U.S. Dist. LEXIS 8535, at *3-4 (S.D.N.Y. June 12, 1997)* ("Plaintiff is a professional model who does not claim that he is well known or a celebrity.")) or the alleged infringement was clearly a parody protected by the *First Amendment* (*see* *Roberts v. Bliss, 229 F. Supp. 3d 240, 252 (S.D.N.Y. 2017)* ("Plaintiff here has not plausibly alleged that the advertisement creates consumer confusion because any viewer would understand the ad to be engaged in a parody.")).

Thus, Plaintiffs' allegations are more than sufficient to support the conclusion that their images carry some level of public recognition. *Accord* *Lancaster v. Bottle Club, LLC, 2017 U.S. Dist. LEXIS 109230, at *18 (M.D. Fla. July 14, 2017)*; *Bondar v. LASplash Cosmetics, 2012 U.S. Dist. LEXIS 175873, at *25-29 (S.D.N.Y. Dec. 11, 2012)*; *Doe v. Friendfinder Network, Inc., 540 F. Supp. 2d 288, 306 (D.N.H. 2008)*.

B. Whether Plaintiffs have Sufficiently Alleged an Endorsement Causing Confusion [*12] .

Defendants next argue that there is no suggestion of endorsement in the advertisements in question because neither "their names or other identifying information . . . appeared in the advertisements." Mem. ISO at 9. They are, in effect, arguing that the mere use of a celebrity's image in an advertisement is legally insufficient to support a claim for false endorsement under the *Lanham Act*.

That argument rests on two mistakes. First, Defendants take the name of this type of action—false endorsement—much too literally. The name is just that, a name and nothing more; it distinguishes actions like these from more traditional claims of trademark infringement. That skin-deep analysis is shallow, as ***HN10***[] it "is plain from this statutory text . . . [that] the Act's protection against infringement is not limited to any particular type of consumer confusion." *Int'l Info. Sys. Sec. Certification Consortium, Inc. v. Sec. Univ., LLC, 823 F.3d 153, 161-62 (2d Cir. 2016)*. Rather, *Section 43(a)* protects against all representations likely to cause confusion "as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities." *15 U.S.C. § 1125(a)(1)(A)*. Thus, confusion related to any type of association is sufficient in a false endorsement **[*13]** claim. *E.g.* *Allen v. Nat'l Video, Inc., 610 F. Supp. 612, 627 (S.D.N.Y. 1985)* ("The court must . . . decide whether defendant's advertisement creates the likelihood of consumer confusion over whether plaintiff endorsed or was otherwise involved with National Video's goods and services.").

Second,*HN11*[] even if "endorsement" were the sole type of confusion capable of satisfying a false endorsement claim, the mere use of a celebrity's image can be sufficient. *Allen, 610 F. Supp. at 627 n.8* (citing *Negri v. Schering Corp., 333 F. Supp. 101, 102, 105 (S.D.N.Y. 1971))* ("When a public figure of Woody Allen's stature appears in an advertisement, his mere presence is inescapably to be interpreted as an endorsement."). Indeed, in *Allen*, the advertisements at issue did not even use Woody Allen's image; they used a lookalike. *Id. at 617-18*.

Defendants rely on two decisions—*Pirone* and *Pelton*—to support their position (Mem. ISO at 8-9), but neither is persuasive. First, *Pirone* appears to stand for, at most, a circuit split over factual questions not at issue here. In that case, the defendant used Babe Ruth's image in a calendar of baseball players and Babe Ruth's estate brought a false endorsement claim. *See Pirone v. MacMillan, Inc., 894 F.2d 579, 581 (2d Cir. 1990)*. The district court granted summary judgment against the estate and the Second Circuit affirmed because it believed that Ruth's image was the *content* of the product, not **[*14]** an indication of *sponsorship*:

> While these pictures of Ruth are in a sense symbols, they in no way indicate origin or represent sponsorship. Photographs of baseball, its players and assorted memorabilia, are the subject matter of the calendar. The pictures of Ruth no more indicate origin than does the back cover's picture of Jackie Robinson stealing home plate. Both covers are merely descriptive of the calendar's subject matter. In neither case would any consumer reasonably believe that Ruth or Robinson sponsored the calendar. Instead, the photographs identify great ballplayers and by so doing indicate the contents of the calendar, not its source.

Id. at 584.

Thus, *Pirone* stands at most for the proposition that the Second Circuit—unlike other circuits—believes that false endorsement claims only extend to uses related to advertisement and not to uses related to the content of products. *Compare Pirone, 894 F.2d 579 at 584 with Fifty-Six Hope Road Music, Ltd. v. A.V.E.L.A., Inc., 778 F.3d 1059, 1072 (9th Cir. 2015)* ("Here, the fact that Marley's image appears directly on Defendants' merchandise does not preclude relief under *§ 1125(a)*."); *but see Bruce Lee Enters., LLC v. A.V.E.L.A., Inc., 2013 U.S. Dist. LEXIS 31155, at *13-16 (S.D.N.Y. Mar. 6, 2013)* (denying summary judgment for false endorsement dispute arising from unlicensed use of Bruce Lee's image on t-shirts). Because Defendants used Plaintiffs' identity in advertisements, **[*15]** not merchandise, *Prione*'s holding has no impact here.[4]

Pelton is similarly unpersuasive. In that case, the court granted summary judgment on the plaintiff's false endorsement claim because the plaintiff did not appear in the same frame as the product:

> There is nothing about the use of Plaintiff's photograph that implies her endorsement of the CitraLean and Ultra CitraLean products. Her name does not appear anywhere on the label, and the product does not appear in the photograph with her. Rather, she appears sitting on the beach and shielding her face from the sun. Such an image in no way suggests that Defendants attempted to trade on her recognizability in selling CitraLean or Ultra CitraLean.

*Pelton, 2001 U.S. Dist. LEXIS 3825, at *9 (S.D.N.Y. Apr. 2, 2001)*. That holding appears to be an outlier, as other cases have found infringement without finding that the celebrity's image was juxtaposed with the product. *See, e.g., Bruce Lee Enters., LLC, 2013 U.S. Dist. LEXIS 31155, at *61-62*. Furthermore, it simply cannot be the case that

---

[4] Even if the holding in *Pirone* were broader, there are innumerable ways of distinguishing that case. Some courts have distinguished it on the grounds that the case dealt with an infringement claim brought under *Section 32(1)*, not *43(a)*, as is the case here. *See Jackson, 9 F. Supp. 3d at 355* ("[Pirone] reject[s] a celebrity's persona as a trademark for purposes of *section 32(1)*, not *section 43(a)*."). Others have distinguished it on the grounds that the calendar in *Pirone* featured many baseball players, not just Ruth. *Bruce Lee Enters., LLC, 2013 U.S. Dist. LEXIS 31155, at *61-62* ("However, *Pirone* is distinguishable from this case: while Babe Ruth's likeness appeared as one of many photographs of baseball players, AVELA's t-shirts feature only an image of Bruce Lee."). Still others have noted that *Pirone* had the unique posture of affirming a grant of summary judgment after the realm of admissible evidence was fixed, rather than the more lenient standard in a motion to dismiss. *See A.V.E.L.A., Inc. v. Estate of Marilyn Monroe, LLC, 131 F. Supp. 3d 196, 209 (S.D.N.Y. 2015)* (denying motion to dismiss false endorsement claim for infringing uses of Marilyn Monroe's image on merchandise in part because "as noted, *Pirone* occurred at the summary judgment stage"). Any and all of these distinctions apply here.

false endorsement claims require visual juxtaposition in the same frame; an advertisement for Muscle Milk® featuring Dwayne "The Rock" Johnson implies sponsorship, even if he never appears in the same frame as the drink.

Regardless, *Pelton* is inapposite. **[*16]** First of all, the opinion was an order granting summary judgment. *2001 U.S. Dist. LEXIS 3825 at *13*. Second of all, the plaintiff in that case failed to offer sufficient evidence that she was well known to the public, which was an independent reason for granting summary judgment. *Id. at * 10*. ("There is simply no evidence that a consumer who sees this photograph is likely to recognize Plaintiff.").

Thus, neither *Pirone* nor *Pelton* suggests that the alleged use of Plaintiffs' images falls outside of uses cognizable under the *Lanham Act*. To avoid dismissal, Plaintiffs must allege that consumers were likely confused to believe that Plaintiffs were associated with Gentlemen's Quarters in some fashion—whether it be endorsement or employment at the club—and they have done so more than adequately.

II. Plaintiffs' Claims of Deceptive Practices under General Business Law *Section 349*.

Defendants advance two arguments for dismissing Plaintiffs' claims under *New York General Business Law § 349*. First, they argue that Plaintiffs have failed to allege a public harm recognized by the statute. Mem. ISO at 11-12. Second, they argue that some claims are time-barred. Mem. ISO at 12-13.

This Court recommends that Plaintiffs' claims should not be dismissed in their entirety because consumer confusion—the **[*17]** harm alleged by Plaintiffs—is a sufficiently consumer-directed harm under the Act. This Court does recommend, however, that the *Section 349* claims of Plaintiffs Guerra, Koren, and Toth be dismissed, as the entirety of their allegations pertain to conduct that occurred outside the limitations period.

A. Whether Plaintiffs have Alleged a Cognizable Harm.

HN12[] To state a claim under *New York's General Business Law § 349*, a plaintiff need only allege three elements: "(1) the act or practice was consumer-oriented; (2) the act or practice was misleading in a material respect; and (3) the plaintiff was injured as a result." *Spagnola v. Chubb Corp., 574 F.3d 64, 74 (2d Cir. 2009)* (citing *Maurizio v. Goldsmith, 230 F.3d 518, 521 (2d Cir. 2000))*.

Nonetheless, Defendants argue that *Section 349*, as a consumer protection statute, only grants a cause of action to non-consumers for harms that have significant ramifications for the public at large, and that courts routinely dismiss trademark infringement actions alleging mere consumer confusion. Mem. ISO at 11-12. Plaintiffs respond that they have alleged consumer-oriented behavior sufficient to state a claim. Opp. at 12.

Defendants are correct that courts routinely dismiss trademark actions brought under *Section 349*. But they have not done so uniformly. There is a split in authority, as a minority of courts have allowed trademark actions to proceed **[*18]** under *Section 349*. *See* *Pulse Creations, Inc. v. Vesture Grp., Inc., 154 F. Supp. 3d 48, 58 (S.D.N.Y. 2015)*; *see also* Hugh C. Hansen, *Consumer Protection Provisions Prohibiting "Deceptive Practices" and "False Advertising": Proper Vehicles for the Protection of Intellectual Property*, 2 Fordham Intell. Prop. Media & Ent. L.J. 31 (1991) (discussing the budding split in authority).[5]

The majority of courts have found that "trademark infringement claims are not cognizable under . . . *§ 349* unless there is specific and substantial injury to the public interest over and above the ordinary trademark infringement." *Pulse Creations, Inc., 154 F. Supp. 3d at 58*.[6] A non-consumer may bring an action for trademark infringement, but

[5] Mr. Hansen's article is available at http://ir.lawnet.fordham.edu/iplj/vol2/iss1/3 .

"the injury to consumers or the public interest must be more than 'the general variety of consumer confusion that is the gravamen' of such a claim." *Ivy Mar Co. v. C.R. Seasons, Ltd., 1998 U.S. Dist. LEXIS 15902, at *22 (E.D.N.Y. Oct. 7, 1998)* (quoting *Mastercard Int'l Inc. v. Arbel Corp., 1989 U.S. Dist. LEXIS 12433, at *30 (S.D.N.Y. 1989))*. ***HN13***[] The minority, however, have allowed non-consumer's claims to proceed when the alleged public harm was nothing more than consumer confusion. *See, e.g., GTFM, Inc. v. Solid Clothing, Inc., 215 F. Supp. 2d 273, 302 (S.D.N.Y. 2002)* (Cote, J.) ("By intentionally using the '05' designation in a manner confusingly similar to GTFM's use of the '05' trademark, and causing actual confusion, Solid engaged in a consumer-oriented act that was misleading in a material way.").[7]

The only public-oriented harm that Plaintiffs allege is consumer confusion. *See* Am. Compl. ¶ 94 ("Defendants **[*19]** use of Plaintiffs' Images did in fact cause consumer confusion as to Plaintiffs['] employment at and/or endorsement of the Clubs, and the goods and services provided by the Clubs."), ¶ 101 ("Defendants' publication of Plaintiffs' Images . . . was misleading in a material respect because it created the impression that Plaintiffs were strippers working at the Clubs, or endorsed the Clubs."). Thus, this Court must consider whether mere confusion is sufficient under *Section 349* to grant a non-consumer a viable cause of action.[8]

To do so, this Court must first look to whether the New York Court of Appeals has addressed the question. *DiBella v. Hopkins, 403 F.3d 102, 111 (2d Cir. 2005)* (citing *Blue Cross & Blue Shield of N.J., Inc. v. Philip Morris USA Inc., 344 F.3d 211, 220-21 (2d Cir.2003))*. ***HN14***[] If New York's highest court has not addressed the question, then this Court "must either (1) predict how the New York Court of Appeals would resolve the state law question, or, if state law is so uncertain that we can make no reasonable prediction, (2) certify the question to the New York Court of Appeals for a definitive resolution." *Id.*

This Court has not found, nor have the parties cited, any case from the New York Court of Appeals addressing this question. Thus, this Court will attempt to predict how the New York Court of Appeals would rule.

1. The Legislative [*20] History of *NYGBL 349* and Origin of the Split in Authority.

This issue is similar to one that has played out throughout the country as states enacted their own versions of the *Federal Trade Commission Act* ("FTCA"). Congress created the FTC in 1914 and later expanded its powers in 1938, thereby outlawing all "deceptive acts or practices" that harmed consumers. *See Holloway v. Bristol-Myers Corp., 485 F.2d 986, 990-91, 158 U.S. App. D.C. 207 (D.C. Cir. 1973)* (detailing the legislative history of the *FTCA*). Congress paired that capacious prohibition with significant safeguards against over-enforcement, only empowering the FTC to bring enforcement actions and limiting such actions to instances that would be in "the interest of the public." *See 15 U.S.C. § 45(b)*.

---

[6] *E.g., Jenny Yoo Collection, Inc. v. Watters Design Inc., 2017 U.S. Dist. LEXIS 175399, at *35-36 (S.D.N.Y. Oct. 20, 2017)* (Broderick, J.); *Sara Designs, Inc. v. A Classic Time Watch Co., 234 F. Supp. 3d 548, 557-58 (S.D.N.Y. 2017)* (Swain, J.); *Pulse Creations, Inc., 154 F. Supp. 3d at 58 (S.D.N.Y. 2015)* (Failla, J.); *Romeo & Juliette Laser Hair Removal, Inc., 2014 U.S. Dist. LEXIS 133839, at *10-12 (S.D.N.Y. Sep. 23, 2014)* (Griesa, J.); *Seat Sack, Inc. v. Childcraft Educ. Corp., 2010 U.S. Dist. LEXIS 142577, at *39 (S.D.N.Y. Jan. 22, 2010)* (Eaton, J.); *Hi-Tech Pharmacal Co. v. Hi-Tech Pharm., 2007 U.S. Dist. LEXIS 48644, at *38-39 (E.D.N.Y. July 5, 2007)* (Gold, M.J.); *Sports Traveler, Inc. v. Advance Magazine Publrs., Inc., 1997 U.S. Dist. LEXIS 3403, at *7 (S.D.N.Y. Mar. 24, 1997)* (Keenan, J.).

[7] *E.g., Casper Sleep, Inc. v. Hales, 2016 U.S. Dist. LEXIS 150706, at *22-23 (S.D.N.Y. Oct. 20, 2016)* (McMahon, J.); *Casper Sleep, Inc. v. Mitcham, 204 F. Supp. 3d 632, 643 (S.D.N.Y. 2016)* (Rakoff, J.); *Burberry Ltd. & Burberry USA v. Designers Imports, Inc., 2010 U.S. Dist. LEXIS 3605, 2010 WL 199906, at *8 (S.D.N.Y. Jan. 19, 2010)* (Crotty, J.).

[8] Plaintiffs attempt to evade this question by arguing that they have not brought an ordinary trademark dispute but rather a claim for false endorsement. Opp at 12. Even if that were a legally meaningful distinction, the simple fact is that the only consumer-oriented harm they allege is consumer confusion. *See* Am. Compl. ¶¶ 92-93.

Over time, however, the perception developed that the FTC was unable or unwilling to adequately police deceptive practices. *See* Staci Zaretsky, *Trademark Law and Consumer Protection Law-Deception Is A Cruel Act: "Uniform" State Deceptive Trade Practices Acts and Their Deceptive Effects on the Trademark Claims of Corporate Competitors*, *32 W. New Eng. L. Rev. 549, 567-68 (2010)*. In response, consumer rights activists pushed for states to adopt "Little FTC Acts," and by the early 1980s all fifty states and the District of Columbia had enacted some form of a Little FTC Act. *Id.*

Although **[*21]** many of the Little FTC Acts initially limited enforcement authority to some government agency, many were amended to add a private right of action. *Id. at 549-50*. Those amendments greatly expanded the pool of potential plaintiffs, thereby stripping away the safeguards against over-enforcement in the *FTCA* such as political accountability, finite resources, and a statutory public interest requirement. *See* Kevin M. Lemley, *Resolving the Circuit Split on Standing in False Advertising Claims and Incorporation of Prudential Standing in State Deceptive Trade Practices Law: the Quest for Optimal Levels of Accurate Information in the Marketplace*, *29 U. Ark. Little Rock L. Rev. 283, 320 (2007)*.

Many courts were troubled by the pairing of broad prohibitions with a private right of action. *See* Jeff Sovern, *Private Actions Under the Deceptive Trade Practices Acts: Reconsidering the FTC Act As Rule Model*, *52 Ohio St. L.J. 437, 457-62 (1991)* (surveying judicial responses to private actions brought under the Little FTC Acts). In response, they invented limiting principles to restrict the scope of litigation. *See* *Haroco, Inc. v. Am. Nat. Bank & Tr. Co. of Chicago, 647 F. Supp. 1026, 1034 (N.D. Ill. 1986)* ("Courts, aghast at the apparent breadth of these statutes, have searched for means to limit their reach."). Unfortunately, "these judges have generally, in the words of Justice Cardozo, **[*22]** 'fumble[d] about, feeling in a vague way that some . . . problem is involved, but missing the universal element which would have quickened . . . decision with the inspiration of a principle.'" Sovern, *52 Ohio St. L.J. at 459* (quoting B. Cardozo, Growth of the Law 99-103 (1924)).

This is what happened in New York. The Legislature first enacted *Section 349* in 1970, but that law only allowed the Attorney General to bring actions in instances when he or she "shall believe from evidence satisfactory to him [or her] that any person, firm, corporation or association or agent or employee thereof has engaged in or is about to engage in any of the acts or practices stated to be unlawful." *NYGBL § 349(b)*. Later, in 1980, the Legislature extended a cause of action to "any person who has been injured by reason of any violation of this section," thereby allowing such a person to bring an action for the greater of actual damages or fifty dollars, along with treble damages and attorney's fees. *See* *NYGBL § 349(h)*.

That broad language invited the inevitable question: is a non-consumer—such as a business—a "person" who may bring suit for deceptive actions, or is the cause of action limited to consumers? Courts definitively answered that question, deciding that non-consumers **[*23]** may bring actions under *Section 349* (*e.g.,* *Securitron Magnalock Corp. v. Schnabolk, 65 F.3d 256, 264 (2d Cir. 1995))*, which is sensible as the statute refers to a "party" rather than a "consumer," as some Little FTC Acts do (*e.g.*, *Vt. Stat. Ann. tit. 9, § 2461(b)*).

Courts grew concerned, however, as some businesses tacked *Section 349* claims onto ordinary commercial disputes. *See, e.g.*, *Genesco Entm't, Div. of Lymutt Indus., Inc. v. Koch, 593 F. Supp. 743, 750-1 (S.D.N.Y. 1984)*. Allowing such claims to proceed would clearly exceed the statute's purpose and "would alter completely the legal duties governing commercial relationships in New York," *id.*, as the statute does not require proof of intent to deceive—like fraud—and it provides for treble damages in addition to one-way fee shifting. Thus, to stay true to the statute's purpose, Courts have limited standing to conduct that is "consumer-oriented." *See* *Spagnola v. Chubb Corp., 574 F.3d 64, 74 (2d Cir. 2009)* (citing*Maurizio v. Goldsmith, 230 F.3d 518, 521 (2d Cir. 2000))*.

Again, this is a sensible rule. It strikes an appropriate balance by preventing businesses from tacking deceptive practices claims onto their purely commercial disputes (*e.g.,* *Genesco, 593 F. Supp. at 751*) while also allowing affected businesses to act as vicarious defenders of consumers (*e.g.,* *N. State Autobahn, Inc. v. Progressive Ins. Grp. Co., 102 A.D.3d 5, 953 N.Y.S.2d 96, 100-07 (N.Y. App. Div. 2012))*.

That limitation was not enough for some, however. In 1988, McKinney's published a practice commentary by Richard A. Givens, a former regional director of the FTC.[9] In that commentary, Mr. Givens invented the principle that trademark **[*24]** infringement actions fall outside of the scope of Section 349. *See* Hansen, 2 Fordham Intell. Prop. Media & Ent. L.J. at 39. Before the commentary, "[m]any courts . . . simply assumed that these sections are applicable" to trademark disputes. *Id.* (collecting cases). Afterwards, "two courts, without independent analysis . . . followed the McKinney's Practice Commentary and refused to apply these sections." *Id.* Since then, Givens' opinion has propagated into the majority view.[10]

Under that view, consumer confusion is a *de minimis* harm insufficient to satisfy the "consumer-oriented" element for non-consumers. *See* Mastercard Int'l, Inc., 1989 U.S. Dist. LEXIS 12433, at *30 ("Arbel . . . asserts no injury to consumers or to the public interest, other than the general variety of consumer confusion that is the gravamen of its trademark claim."). With this heightened standard, a non-consumer's claims may proceed so long as "there is specific and substantial injury to the public interest over and above the ordinary trademark infringement." Romeo & Juliette Laser Hair Removal, Inc. v. Assara I LLC, 2014 U.S. Dist. LEXIS 133839, at *10-11 (S.D.N.Y. Sep. 23, 2014) (quoting Perfect Pearl Co. v. Majestic Pearl & Stone, Inc., 887 F. Supp. 2d 519, 543 (S.D.N.Y. 2012)); *see also* Fischer v. Forrest, 2015 U.S. Dist. LEXIS 4395, at *35 (S.D.N.Y. Jan. 13, 2015) (denying motion to dismiss trademark infringement action because confusion over the origin of a honey harvesting aid allegedly could have caused health problems, ruined harvests, and loss of certifications).[11]

The minority of courts **[*25]** believe that "the elevated requirements that some district courts have apparently engrafted onto the 'consumer-oriented' element of § 349 claims lack a basis in governing New York law." Casper Sleep, Inc. v. Mitcham, 204 F. Supp. 3d 632, 643 (S.D.N.Y. 2016), *recons. denied*, 2016 U.S. Dist. LEXIS 165508 , 2016 WL 7188788 (S.D.N.Y. Nov. 17, 2016); *accord* Hansen, 2 Fordham Intell. Prop. Media & Ent. L.J. at 39 (arguing that the text and the purpose of Section 349 support recognizing trademark claims as cognizable harms). Without that heightened standard, mere confusion, such as the placing "into the stream of commerce goods likely to confuse consumers as to their true source of origin . . . . is sufficient to demonstrate an injury under the statute." Burberry Ltd. v. Euro Moda, Inc., 2009 U.S. Dist. LEXIS 53250, at *44-47 (S.D.N.Y. June 10, 2009).

This split in authority has led courts to divergent opinions on identical questions. *Compare id.* ("Burberry has demonstrated that Defendants . . . engaged in a 'consumer oriented act' meant to deceive consumers that the products they sold were authentic Burberry merchandise.") *with DePinto v. Ashley Scott, Inc., 222 A.D.2d 288, 289,*

---

[9] McKinney's no longer includes Mr. Given's commentary in its published compilations. The most recent edition to include his commentary was the 2004 edition. *See* Richard. A Givens, Practice Commentary, N.Y. Gen. Bus. Law. § 349 (McKinney 2004).

[10] Indeed, each of the cases relied upon by Defendants in their motion papers appear to stem from the uncritical acceptance of Givens' position. For example, they rely on RCA Trademark Mgmt. S.A.S. v. VOXX Int'l Corp., 2015 U.S. Dist. LEXIS 111823, at *10 (S.D.N.Y. Aug. 24, 2015). That case cites Gucci Am., Inc. v. Duty Free Apparel, Ltd., 277 F. Supp. 2d 269, 273-74 (S.D.N.Y. 2003), which cites Sports Traveler, Inc. v. Advance Magazine Publrs., Inc., 1997 U.S. Dist. LEXIS 3403, at *7-8 (S.D.N.Y. Mar. 24, 1997), which cites EFS Mktg. v. Russ Berrie & Co., 836 F. Supp. 128, 136-37 (S.D.N.Y. 1993), which cites Jaret Int'l, Inc. v. Promotion in Motion, Inc., 826 F. Supp. 69, 78 (E.D.N.Y. 1993), which cites Givens' commentary.

[11] A non-consumer is a party who was not the direct victim of the deceptive conduct but nevertheless suffered harms that the deceptive conduct caused. For example, in *Fischer*, the plaintiff was the inventor and producer of a honey harvesting aid for beekeepers who brought an action against a mailorder business that sold a knock-off version of the product. 2015 U.S. Dist. LEXIS 4395, at *3. The beekeepers who purchased the knockoff were the victims of the deceptive conduct while the plaintiff was an affected non-consumer.

Under the majority's rule, a non-consumer like the plaintiff in *Fischer* must allege that the direct victims of the deception suffered or were likely to suffer harms more significant than mere confusion. Id. at *35. Plaintiffs who were the target market for the deception, however, need not allege that the deception posed any risk to health, safety, or a significant public interest. *See, e.g.*, Koch v. Greenberg, 626 F. App'x 335, 340 (2d Cir. 2015) ("[G]iven that the defendant provided wine to be sold at auction to other consumers similarly situated to [plaintiff], the consumer-oriented conduct requirement has been met.").

635 N.Y.S.2d 215 (NY App. Div. 1995) ("Ashley Scott's claims . . . are based on . . . the alleged use of confusing labels in the manufacture of women's coats which does not pose a significant risk of harm to the public health or interest."). Nevertheless, like other state laws that parallel federal actions, this issue has persisted in federal court without resolution from New York's Court of Appeals. **[*26]** *E.g. Yong Kui Chen v. Wai Yin Chan, 615 F. App'x 10, 14 (2d Cir. 2015)* (surveying split of federal authority over the availability of tip-credit under NYLL).

Thus, this Court must decide whether consumer confusion is too *de minimis* a harm to provide non-consumers with standing under *Section 349*.

2. The Majority's View is Unpersuasive.

After a careful review, this Court respectfully recommends that the District Court follow the lead of the minority. The text, legislative history, and purpose of the statute all weigh against imposing a heightened standard on non-consumers. Though several courts have held otherwise, those courts do not point to, nor has this Court found, any independent basis for the rule in New York State's law.

The text of the statute outlaws all deceptive conduct, *see NYGBL § 349(a)*, which would appear to include trademark infringement claims, *see* Hansen, 2 Fordham Intell. Prop. Media & Ent. L.J. at 38 ("[I]t takes no stretch of the imagination to conclude that deceiving consumers as to the source of the goods that they are buying is a 'deceptive practice.'"). The text may not be dispositive, but there must at least be a reason to depart from such clear language. None of the theories discussed below comes close.

First, the majority has assumed that the Legislature's intent was not to include trademark infringement **[*27]** in its consumer protection statute. Mr. Givens, for example, offers that allowing trademark disputes to arise under *Section 349* would be "contrary to the history of the statutes." *See* Richard. A Givens, Practice Commentary, *N.Y. Gen. Bus. Law. § 349* (McKinney 2004). In support, Givens offers no evidence, and this Court has been unable to find any. *Id.*

The motivating concern behind *Section 349* was the perceived inadequacy of the existing set of consumer protection laws targeted at specific conduct. *See* 1968 Report of the Committee on New York State ***Antitrust Law*** of the ***Antitrust Law*** Section of the New York State Bar Association at 117 (1968), *reprinted in* L. 1970, ch. 43 at 22-30.[12] After a review of existing statutes, the drafters issued a report concluding that the "laws do not fully protect the consumer from all the varied forms which fraud and deception may take, since these laws are limited to specific types of deceptive conduct." *Id.* To ameliorate this patchwork protection, they drafted *Section 349* to be an umbrella covering *all* forms of deceptive conduct. *See id.* ("Its broad language provides public enforcement officials with the flexibility needed to protect both consumers and honest businessmen from the many varied forms of deception, present and future, whether committed intentionally or not."). So significant was this concern that the drafters intentionally chose not to **[*28]** reject other proposed legislation that included enumerated prohibitions so as to avoid the possibility that courts would limit it to acts of a similar nature. *See id.* at 128 ("The Council's . . . . proposed statute with its twelve categories of prohibited conduct does not have the flexibility of . . . the statute proposed herein dealing with the new and varied forms which consumer deception may take."). Included among those specific prohibitions that the drafters deemed to be too narrow were practices likely to cause "confusion or of misunderstanding as to affiliation, connection, or association with, or certification by, another." Richard F. Dole, Jr.,

[12] The Governor's Bill Jacket is an authoritative public record that collects documents that bear on the legislative history of New York's laws. *See Spiro v. Healthport Techs., LLC, 73 F. Supp. 3d 259, 264 n.1 (S.D.N.Y. 2014)*. It consists of "material gathered by the Governor's Counsel to assist the Governor in deciding whether to sign a bill passed by the legislature." *City of N.Y. v. A-1 Jewelry & Pawn, Inc., 501 F. Supp. 2d 369, 412 (E.D.N.Y. 2007)*. The Bill Jacket for *Section 349* contains a report and study from the Committee on New York State ***Antitrust Law*** of the ***Antitrust Law*** Section of the New York State Bar Association because that committee drafted the law that was introduced in the legislature. *See* Letter from Seymour D. Lewis to Nelson A. Rockefeller (Feb. 10, 1970), *reprinted in* L. 1970, ch. 43 at 10-11.

Merchant and Consumer Protection: The Uniform Deceptive Trade Practices Act, 51 Minn. L.Rev. 1005, 1016 (1967).[13]

Given this background, the logical conclusion is that the legislature intended to include trademark infringement in the ambit of *Section 349*. After all, despite Mr. Given's view, trademark protections are a form of consumer protection. *See* *Two Pesos, Inc. v. Taco Cabana, Inc., 505 U.S. 763, 782, 112 S. Ct. 2753, 120 L. Ed. 2d 615 (1992)* (Stevens, J. concurring) (quoting S.Rep. No. 1333, 79th Cong., 2d Sess., 3 (1946)) ("By protecting trademarks, Congress hoped [in part] 'to protect the public from deceit.'"). And there is no reason to **[*29]** think the New York Legislature, the Governor, or anyone else involved in the law's drafting thought otherwise. Indeed, the drafters included trademark protections in their survey of existing consumer protection laws that they hoped to encompass and expand upon. *See* Study by the Committee on New York State ***Antitrust Law*** at 80 n.3, *reprinted in* L. 1970, ch. 43 at 31-73 (surveying laws including those "prohibiting a wide range of offenses against trademarks"). And the Governor's signing memorandum reflects that understanding. *See* L. 1970 ch. 43 at 21 (*Section 349* "adds an important new assurance to the people of this State that the goods and services they purchase are as represented."). Other than explicitly including trademark infringement within the ambit of the law—which, ironically, the drafters specifically chose not to do so as to prevent courts from limiting the law with *ejusdem generis*—it is difficult to imagine what more the drafters could have done to make their intentions clear.

Second, the policy concerns for heightened scrutiny of non-consumer standing crumble under modest inspection. For example, Mr. Givens focuses on the inappropriate nature of one-way attorney's fee shifting in trademark disputes, but that concern is unfounded as awards of attorneys' **[*30]** fees under the statute are discretionary. *See* *Riordan v. Nationwide Mut. Fire Ins. Co., 977 F.2d 47, 54 (2d Cir. 1992)*. Likewise, the concern that actions for mere confusion will open the floodgates to actions unrelated to consumer protection is baseless as the "requirement that the consumer-oriented conduct be materially misleading limits the availability of *section 349 (a)* to cases where the deception pertains to an issue that may bear on a consumer's decision to participate in a particular transaction." *N. State Autobahn, Inc., 953 N.Y.S.2d at 102 (N.Y. App. Div. 2012)*. Thus, a plaintiff by definition cannot prevail without proving that deception is likely to misdirect consumers' purchases, which is precisely the harm that the statute seeks to prevent. *Id.*

Third, although courts in the majority have justified their position by arguing that non-consumers must allege consumer-oriented harm "which would trigger FTC intervention under *15 U.S.C.A. § 45*," *Horn's, Inc. v. Sanofi Beaute, Inc., 963 F. Supp. 318, 328 (S.D.N.Y. 1997)* (citation omitted), that analogy to federal law supports the opposite conclusion.

There are several problems with this analysis,[14] but the most glaring is that the Supreme Court itself has found that mere confusion is sufficiently within the public interest to warrant FTC intervention:

> If consumers or dealers prefer to purchase a given article because it was made by a particular manufacturer or class of **[*31]** manufacturers, they have a right to do so, and this right cannot be satisfied by imposing upon them an exactly similar article, or one equally as good, but having a different origin. . . . The result of respondents' acts is that such purchasers are deceived into purchasing an article which they do not wish or

[13] The National Conference of Commissioners on Uniform State Laws has since removed the Uniform Deceptive Trade Practices Act from its proposed legislation, but Mr. Dole's article includes the act in full as proposed in 1967. *See* 51 Minn. L.Rev. at 1015-16.

[14] As an initial matter, it is unclear that importing the *FTCA's* public interest requirement into *Section 349* is appropriate. The *FTCA* may limit the FTC's enforcement authority to actions that are "in the interest of the public," *15 U.S.C. 45(b)*, but *Section 349* imposes no such limitation on the Attorney General or on private parties. *See* *NYGBL § 349(b)*, *(h)*. Analogizing to the *FTCA* cases therefore appears to be inappropriate, as the choice to omit that requirement in a statute modeled after the *FTCA* suggests an intentional choice to omit that barrier. *Accord* Sovern, *52 Ohio St. L.J. at 460* ("[T]he states which borrowed the wording of the FTC Act did not copy the public interest requirement . . . . [therefore the] rather clear implication is that the limitation does not apply to actions under the state statutes, at least not in the way it has been construed by the courts and the FTC.").

> intend to buy, and which they might or might not buy if correctly informed as to its origin. We are of opinion that the purchasing public is entitled to be protected against that species of deception, and that its interest in such protection is specific and substantial.

FTC v. Royal Milling Co., 288 U.S. 212, 216-217, 53 S. Ct. 335, 77 L. Ed. 706, 17 F.T.C. 664 (1933). In accordance with that view, the Court has found FTC actions for deceptive conduct related to mundane goods and commodities such as the provenance of wheat flour (*id.*), the amount of wool in underwear (*FTC v. Winsted Hosiery Co., 258 U.S. 483, 493, 42 S. Ct. 384, 66 L. Ed. 729, 4 F.T.C. 610 (1922)*), or the appropriate name for a species of pine tree (*FTC v. Algoma Lumber Co., 291 U.S. 67, 81, 54 S. Ct. 315, 78 L. Ed. 655, 18 F.T.C. 669 (1934)*) to be in the interest of the public. Furthermore, the FTC itself has expressed an interest in the deceptive use of endorsements—the conduct at issue here—regardless of the subject matter. *See, e.g.*, *16 C.F.R. §§ 255.0 et seq.* Thus, the "suggestion that the allegedly deceptive practice must pose some danger to the public health or safety, or have 'significant ramifications' for the public, **[*32]** is simply wrong." *Mitcham, 204 F. Supp. 3d at 643 (S.D.N.Y. 2016)* (Rakoff, J.).

Fourth, and finally, this Court agrees with Judge Rakoff that "the elevated requirements that some district courts have apparently engrafted onto the 'consumer-oriented' element of *§ 349* claims lack a basis in governing New York law." *Id.* (citations omitted). Some New York decisions may have sided with the majority, but they are not persuasive and thus are not strong evidence of how the New York Court of Appeals would rule. *See In re Rezulin Products Liability Litigation, 178 F. Supp. 2d 412, 414 (S.D.N.Y. 2001)* (refusing to follow the precedent set by an unpersuasive intermediate appellate court decision).

To this Court's knowledge, the only New York Courts to address this question are one intermediate appellate court, which has sided with the majority (*see DePinto, 635 N.Y.S.2d at 217 (N.Y. App. Div. 1995)*) along with two trial courts (*see Ivy League Sch., Inc. v. Danick Indus., Inc., 44 Misc. 3d 1223(A), 999 N.Y.S.2d 797, 2014 NY Slip Op 51284[U] (N.Y. Sup. Ct. 2014)*; *The Gameologist Grp., LLC v. N.Y. Div. of Lottery, 2009 N.Y. Misc. LEXIS 4403, at * 13, 2009 NY Slip Op 32914[U] (N.Y. Sup. Ct. 2009)*). None are persuasive. Each summarily adopted the majority view of federal decisions that themselves wholesale lifted the Givens commentary. Take, for instance, the sum total of the *DePinto* decision's reasoning:

> The IAS Court also properly dismissed the sixth and seventh counterclaims, which purport to allege violations of the New York Consumer Protection Act. Ashley Scott's claims under *sections 349* and *350* of the General Business Law are based on theories **[*33]** of trademark infringement and unfair competition, involving the alleged use of confusing labels in the manufacture of women's coats which does not pose a significant risk of harm to the public health or interest. (*EFS Mktg. v Berrie & Co., 836 F. Supp. 128, 136*, citing *Bristol-Myers Squibb Co. v McNeil-P.P.C., Inc., 786 F. Supp. 182, 215*, *affd in part and revd in part on other grounds 973 F.2d 1033*).

DePinto, 635 N.Y.S.2d at 217. Those federal decisions rest on the same flawed foundations discussed above: a belief that general consumer confusion "would not trigger FTC intervention under *15 U.S.C.A. § 45*" and that such confusion "is not within the ambit of 'harm to the public interest' contemplated by the statute." *Bristol-Myers Squibb Co. v. McNeil-P.P.C., Inc., 786 F. Supp. 182, 216 (E.D.N.Y. 1992)*; *see also EFS Mktg. v. Russ Berrie & Co., 836 F. Supp. 128, 136-7 (S.D.N.Y. 1993)* (same). Nothing about these decisions suggests to this Court that the New York Court of Appeals would agree.

Indeed, as Judge Rakoff illustrated in a well-reasoned opinion, New York Law outside of those three decisions strongly favors the minority view. *Mitcham, 204 F. Supp. 3d at 643-4*. For instance, in contexts uninfluenced by federal decisions, ***HN15***[] New York Courts have recognized that the purpose of the law is to protect consumers from whatever form deception may take, and have accordingly interpreted the remedial statute broadly. *Id.* (reviewing state decisions). In one decision, a New York intermediate appellate court found that a non-consumer plaintiff had alleged **[*34]** sufficiently consumer-oriented conduct when the deception at issue merely affected the choice of auto repair shop. *N. State Autobahn, Inc., 953 N.Y.S.2d at 102 (N.Y. App. Div. 2012)* ("[T]he complaint alleges that the Progressive defendants . . . misled customers of the plaintiffs and other independent shops into believing that they must have their vehicles repaired at repair shops that were members of the [Progressive affiliate program]."). The appellate court went on to say that the law prohibits "those acts or practices which undermine a consumer's ability to evaluate his or her market options and to make a free and intelligent choice. In this sense, the deception itself is the harm that the statute seeks to remedy." *Id.* (citing Mem. of Governor Rockefeller, 1970 N.Y. Legis. Ann., at 472).

This Court, therefore, agrees with Judge Rakoff. Cases such as *N. State Autobahn, Inc.* more accurately reflect how the New York Court of Appeals would rule than the other federal and state decisions. The imposition of a heightened standing requirement on non-consumer actions lacks a firm foundation in New York's law. Rather, the weight of evidence and logic favors a conclusion that the New York Court of Appeals would disagree with Mr. Givens and the *DePinto* court's **[*35]** summary decision. Consequently, this Court recommends rejecting Defendants' argument that Plaintiffs have pled unviable harms under *Section 349* and recommends against dismissing the entirety of Plaintiffs' claims under the law.

C. Whether the Statute of Limitations Bars Plaintiffs' Claims.

Defendants also argue that the statute of limitations bars the claims of Plaintiffs Guerra, Koren, and Toth. Mem. ISO at 12-13. Their argument is correct, and Plaintiffs have not offered any response to suggest otherwise. *See* Opp. at 1-16.

HN16[] Private "rights of action under *section 349* are governed by a three-year statute of limitations." *Schandler v. N.Y. Life Ins. Co., 2011 U.S. Dist. LEXIS 46322, at *12 (S.D.N.Y. Apr. 26, 2011)* (citing *C.P.L.R. § 214(2)*); *see also* *Gaidon v. Guardian Life Ins. Co., 96 N.Y.2d 201, 209-10, 750 N.E.2d 1078, 727 N.Y.S.2d 30 (N.Y. 2001)* (Gaidon II) (holding that the six-year statute of limitations for common law fraud does not apply to a claim under *Section 349* because it is a statutory cause of action); *Gristede's Foods, Inc. v. Unkechauge Nation, 532 F. Supp. 2d 439, 452 (E.D.N.Y. 2007)* ("Since Gaidon II, New York courts have uniformly applied a three-year statute of limitations to *section 349* and *section 350* cases."). The private right of action accrues under *Section 349* "when plaintiff has been injured by a deceptive act or practice violating *section 349*." *Schandler v. N.Y. Life Ins. Co., 2011 U.S. Dist. LEXIS 46322, at *12 (S.D.N.Y. Apr. 26, 2011)* (quoting *Gaidon II, 96 N.Y.2d at 210*). If there is a series of continuing violations, "the continuing wrong doctrine tolls the limitation period until the date of the commission of the last wrongful act." *Palmeri v. Wilkie Farr & Gallagher LLP, 156 A.D.3d 564, 69 N.Y.S.3d 267, 2017 N.Y. App. Div. LEXIS 9320, at *8 (N.Y. App. Div. Dec. 28, 2017)* (citations omitted). **[*36]**

Plaintiffs filed their action on November 23, 2016, meaning that Plaintiffs must allege conduct that occurred no earlier than November 24, 2013. The exhibits containing screenshots of advertisements featuring Plaintiffs Guerra, Koren and Toth, however, exhibit older dates. *See* Dkt. Nos. 1-1 at 18-20, 10-1 at 23-25 (advertisement featuring Plaintiff Guerra was published on November 11, 2013); Dkt. No. 10-1 at 26-28 (advertisements featuring Plaintiff Koren were published on January 17, 2012 and December 3, 2012); *id.* at 29-32 (advertisements featuring Plaintiff Toth were published on February 26, 2012 and December 19, 2012). The complaint does not help them, as it contains no allegations of continuing conduct that occurred more recently. *See* Am. Compl. ¶ 46 (alleging that advertisement featuring Plaintiff Guerra was published on November 11, 2013); *id. ¶¶ 49-54* (failing to allege any dates of conduct for Plaintiff Koren); *id. ¶¶ 55-58* (same for Plaintiff Toth).

HN17[] Ordinarily, a statute of limitations defense is inappropriate on a *Rule 12(b)(6)* motion as that defense tends to rely on a factual dispute. *See* *Luv N' Care, Ltd. v. Shiboleth LLP, 2017 U.S. Dist. LEXIS 128060, at *14-15 (S.D.N.Y. Aug. 8, 2017)* (citing *Ellul v. Congregation of Christian Bros., 774 F.3d 791, 798 n.12 (2d Cir. 2014))*. But "a statute of limitations defense may be decided on a *Rule 12(b)(6)* motion if the defense appears on the face **[*37]** of the complaint." *Id.* That is the case here. The entirety of the allegations contained in the complaint for these three plaintiffs predate the limitations period. This Court, therefore, must recommend dismissal of the *Section 349* claims of Plaintiffs Guerra, Koren, and Toth.

III. Individual Claims.

Plaintiffs have also named the owner of Summit, Mr. Tricolla, as a defendant. Defendants argue that Plaintiffs have failed to plead that Mr. Tricolla was involved with the alleged conduct and have instead relied on his ownership of Summit Entertainment Corp. to support their claims. *See* Mem. ISO at 13-14.

Defendants correctly point out that an individual is not automatically liable for the violations of the company whose stock he or she owns. *See* *Alki Partners, L.P. v. Vatas Holding GmbH, 769 F. Supp. 2d 478, 490-91 (S.D.N.Y. 2011)* (citing *United States v. Bestfoods, 524 U.S. 51, 61, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998))*. But Plaintiffs do not rely on such a flimsy theory; they allege that Mr. Tricolla, "in his capacity as principal of Summit, maintains operational control over Gentlemen's Quarters, including all advertising relating thereto." *See* Am. Compl. ¶ 18.

Nevertheless, Defendants argue that these allegations are insufficient. On the one hand, they are correct that an action against an individual defendant must include allegations of individual involvement in **[*38]** some capacity. *See* *Martal Cosmetics, Ltd. v. Int'l Beauty Exch. Inc., 2011 U.S. Dist. LEXIS 95021, at *60-1 (E.D.N.Y. Aug. 23, 2011)* (citations omitted). But their argument here mistakes the standard on a motion to dismiss for the standard at other steps in litigation; the cases they rely upon assess the sufficiency of evidence after trial (*see* *id. at *3*) or the sufficiency of evidence after a motion for default judgment (*see* *Eu YNo, 2010 U.S. Dist. LEXIS 99836, at *1-2 (E.D.N.Y. Sep. 8, 2010))*. ***HN18***[] On a motion to dismiss, it is sufficient to simply state that the individual defendant is in control of the operations of the business that has infringed on the trademark. *See* *Int'l Diamond Imps., Inc. v. Oriental Gemco Ny, Inc., 64 F. Supp. 3d 494, 525-26 (S.D.N.Y. 2014)* (denying motion to dismiss claims against individual defendant because the plaintiff alleged that the defendant "'is responsible for the control, management, operation, and maintenance of the affairs of Oriental NY,' and '[t]he acts and wrongful conduct complained of were done with [his] active assistance, cooperation, acquiescence, and procurement, and he derives financial benefit therefrom."). That is what Plaintiffs have alleged. *See* Am. Compl. ¶ 18.

This Court, therefore, does not recommend dismissing Plaintiffs' *Lanham Act* claim against the individual defendant, Mr. Tricolla.[15]

IV. Plaintiffs' Prayer for Punitive Damages.

Defendants also move to dismiss Plaintiffs' request for punitive damages. Mem. **[*39]** ISO at 14-18. They argue that punitive damages are unavailable under the *Lanham Act* and that Plaintiffs have not alleged conduct sufficient to support punitive damages under *Section 349*. *Id.*

Regarding the *Lanham Act* prayer for damages, Defendants are correct. ***HN19***[] Punitive damages are unavailable under the act. *See* *Alzheimer's Disease Res. Ctr., Inc. v. Alzheimer's Disease & Related Disorders Ass'n., 981 F. Supp. 2d 153, 165 (E.D.N.Y. 2013)* (quoting *H & R Indus., Inc. v. Kirshner, 899 F. Supp. 995, 1011-12 (E.D.N.Y. 1995))*.

Plaintiffs try to side step the issue, pointing out that the *Lanham Act* allows for treble damages. *See* Opp. at 14. But ***HN20***[] there is a reason treble damages and punitive damages have different names; they are different measures of damages. *See* *MQDC, Inc. v. Steadfast Ins. Co., 2013 U.S. Dist. LEXIS 172444, at *13-15 (E.D.N.Y. Dec. 6, 2013)*. Both may attempt to deter conduct by enhancing damage awards for conduct that regularly evades detection. *See* *Perez v. Z Frank Oldsmobile, Inc., 223 F.3d 617, 621-4 (7th Cir. 2000)* (Easterbrook, J.). But when a

[15] Although Defendants do not specifically aim their arguments at Plaintiffs' *Lanham Act* or *Section 349* claims, they only cite to decisions pertaining to the *Lanham Act*. *See* Mem. ISO at 13-14. Thus, Defendants have not raised an argument about Plaintiffs' *Section 349* claim against the individual defendant that may be granted by this Court. *See* *Tylena M. v. Heartshare Human Servs., 2004 U.S. Dist. LEXIS 10398, 2004 WL 1252945, at *3 (S.D.N.Y. June 7, 2004)* (denying motion because the moving party failed to cite any legal authority in support of its application).

statute provides for a specific multiplier—such as treble damages—federal courts usually interpret that as a Congressional command not to exceed that multiplier. *Id. at 621-2*. Consequently, this Court recommends that Plaintiffs' prayer for punitive damages under the *Lanham Act* be dismissed.

Regarding *Section 349*, Plaintiffs have alleged conduct sufficient to support a claim for punitive damages.[16] Taking the operative complaint's allegations as true, Defendants have engaged in a regular policy for years of misappropriating the images of **[*40]** models who are unaffiliated with their strip club. *See* Am. Compl. ¶¶ 19-86. Furthermore, Defendants were on notice of the misappropriation of Plaintiffs' images no later than December 2016 and yet they allowed Plaintiffs' images to remain on their social media pages until at least March 2017. *Id. ¶ 3*. Those allegations support the inference that Defendants acted willfully, which is sufficient for their prayer for punitive damages to survive a motion to dismiss. *See* *Roy Exp. Co. Establishment of Vaduz v. CBS, 672 F.2d 1095, 1106 (2d Cir. 1982)* (citing *Le Mistral, Inc. v. Columbia Broadcasting System, 61 A.D.2d 491, 402 N.Y.S.2d 815, 817 (N.Y. App. Div. 1978))* (affirming award of punitive damages for common-law unfair competition and copyright infringement claims because "New York law clearly permits punitive damages where a wrong is aggravated by recklessness or willfulness"). This Court therefore recommends that Plaintiffs' prayer for punitive damages arising under *Section 349* not be dismissed.

CONCLUSION

For the reasons detailed above, this Court recommends: (1) denying Defendants' motion to dismiss Plaintiffs' First Cause of Action for violations of the *Lanham Act*; (2) denying Defendants' motion to dismiss the Second Cause of Action for violations of *New York's General Business Law § 349* for Plaintiffs Mayes, Pepaj, Edmondson, Middleton, and Archuletta; (3) granting Defendants' motion to dismiss the Second **[*41]** Cause of Action for Plaintiffs Guerra, Koren, and Toth; (4) denying Defendants' motion to dismiss the claims against Defendant Tricolla; (5) granting Defendants' motion to strike Plaintiffs' punitive damages request under the *Lanham Act*; and (6) denying Defendants' motion to strike Plaintiffs' punitive damages request under *New York's General Business Law § 349*.

OBJECTIONS TO THIS REPORT AND RECOMMENDATION

Pursuant to *28 U.S.C. § 636(b)(1)* and *Rule 72(b)(2) of the Federal Rules of Civil Procedure*, the parties shall have fourteen (14) days from service of this Report and Recommendation to file written objections. Failure to file timely objections shall constitute a waiver of those objections both in the District Court and on later appeal to the United States Court of Appeals. *See* *Marcella v. Capital Dist. Physicians' Health Plan, Inc., 293 F.3d 42, 46 (2d Cir. 2002)*; *Small v. Sec'y of Health & Human Servs., 892 F.2d 15, 16 (2d Cir. 1989)*; *see also* *Thomas v. Arn, 474 U.S. 140, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)*.

SO ORDERED.

Opinion

REPORT AND RECOMMENDATION OF UNITED STATES MAGISTRATE JUDGE

To the Honorable United States District Judge Fred Biery:

This Report and Recommendation concerns Defendants' Motion to Dismiss Plaintiffs' Complaint and Brief in Support [#5], Victory's Response to Defendant's **[*2]** Motion to Dismiss [#14], and Defendants' Reply in Support of Motion to Dismiss Plaintiffs' Complaint [#15]. All pretrial matters in this case have been referred to the undersigned for disposition pursuant to Rules CV-72 and 1(c) of Appendix C of the Local Rules of the United States District Court for the Western District of Texas [#18]. In reviewing the motion to dismiss, the undersigned has also reviewed Defendant's Notice of New Authority [#21] and Victory's Response to Defendants' Notice of New Authority [#22]. The undersigned has authority to enter this recommendation pursuant to *28 U.S.C. § 636(b)(1)(B)*. For the reasons set forth below, it is recommended that Defendants' motion be granted in part and denied in part.

I. Procedural Background

Plaintiff Neil Gilmour, III filed this action in his capacity as Trustee for the Grantor Trusts of seven former orthopedic hospitals and their parent company—Victory Parent Company, LLC; Victory Medical Center Beaumont, LP; Victory Medical Center Craig Ranch, LP; Victory Medical Center Landmark, LP; Victory Medical Center Mid-Cities, LP; Victory Medical Center Plano, LP; Victory Medical Center Southcross, LP; and Victory Surgical Hospital East Houston, LP (collectively **[*3]** "Victory")—against Defendants Aetna Health, Inc., Aetna Health Insurance Company, and Aetna Life Insurance Company (collectively "Aetna"). (Compl. [#1] at 1.) According to Victory's Complaint, Victory's medical centers and hospitals provided medical procedures, including high-cost orthopedic surgeries, to thousands of Aetna's plan members. (*Id.* at ¶ 1.) The Complaint alleges a number of claims under various provisions of the *Employment Retirement Income Security Act ("ERISA")*, *29 U.S.C. §§ 1001 et seq.*, the Texas Insurance Code, and Texas common law. (*Id.* at ¶¶ 64-103.)

The basic thrust of Victory's Complaint is that Aetna failed to pay or underpaid certain out-of-network claims for covered services that Victory provided to Aetna plan members in operating its hospitals and other medical facilities throughout Texas. (*Id.* at ¶ 1.) Victory was not a participating provider in Aetna's network at the time period at issue, and is therefore considered an out-of-network provider for purposes of this litigation. (*Id.*) Victory alleges that Aetna delayed processing, then incorrectly denied or underpaid many of Victory's claims, and accused Victory of engaging in "highly suspicious billing patterns" without any substantiating **[*4]** evidence. (*Id.*) As a result of this accusation, Aetna allegedly placed a flag on every single one of Victory's tax ID numbers, which resulted in Victory's claims being handled by Aetna's Special Investigative Unit rather than its ordinary claims department. (*Id.*) This Special Investigative Unit allegedly failed to adjudicate Victory's claims within the statutory time frame or denied the claims altogether, failing to pay the rate provided in the patient's health benefit plan or the rates promised to Victory in verifying benefits pre-surgery. (*Id.*) Victory also alleges that Aetna intentionally withheld the plan documents and plan language that formed the basis for payment of each of Victory's claims in an attempt to mislead Victory about the level of benefits covered. (*Id.* at ¶ 4.)

Victory alleges that there are two types of plans at issue in this case: plans that Victory funded but Aetna administered (self-funded plans) and plans that Aetna both funded and insured (fully-funded plans). (*Id.* at ¶ 26.) Aetna alleges that Victory acts as an ERISA fiduciary with respect to the fully-funded plans it insures, as well as those self-funded plans which over which it has discretionary authority **[*5]** or control. (*Id.*) Victory alleges that some of the plans at issue in this suit are not governed by ERISA. (*Id.* at ¶ 92.)

Altogether, Victory claims that Aetna underpaid 2,943 medically-appropriate claims and denied 45 medically-appropriate procedures for which Victory billed approximately $1.6 million. (*Id.* at ¶ 2.) Victory contends all of these actions were taken by Aetna with the express intent to force Victory into an in-network contract with Aetna or force Victory out of business. (*Id.* at ¶ 5.) Victory ultimately filed for bankruptcy in June or July 2015 due to cash-flow issues it alleges resulted from Aetna's actions. (*Id.* at ¶¶ 5, 54.) The last patient to receive medical services from a Victory hospital was in January 2016. (*Id.* at ¶ 54.)

Victory asserts seven separate counts against Aetna: (Count 1) failure to comply with applicable plans in violation of ERISA; (Count 2) breach of fiduciary duties under ERISA; (Count 3) failure to provide full and fair review under ERISA; (Count 4) violations of claims procedures under ERISA; (Count 5) violations of the Texas Insurance Code; (Count 6) breach of contract; and (Count 7) promissory estoppel and negligent misrepresentation. For all **[*6]** the claims at issue in this lawsuit, Victory alleges that the patient irrevocably assigned to the Victory facilities the right for Victory to step into the shoes of the patients and both be paid by and seek payment from Aetna for the services Victory rendered, as well as the right to receive all relevant plan documents as a beneficiary of the applicable plans. (*Id.* at ¶ 58.)

By its claims, Victory seeks as damages the amounts it should have been paid for those surgeries under either ERISA—for those patients whose plans are governed by ERISA—or under Texas common law for breach of contract—for those patients whose benefit plans are not. (*Id.*) For those instances in which Aetna misrepresented the terms of a patient's plan during the verification process, Victory seeks to recover under Texas law the payment level that Aetna promised to pay. (*Id.* at ¶ 3.) For those instances in which Aetna actively misled Victory about the level of benefits available, Victory seeks exemplary damages. (*Id.* at ¶ 4.)

Aetna filed its motion to dismiss on September 8, 2017, arguing that each of these causes of action must be dismissed under *Rule 12(b)(1)* for lack of standing and/or under *Rule 12(b)(6)* for failure to state a claim.

II. [*7] Analysis

Aetna moves this Court to dismiss all of Victory's claims on the basis that they are either barred for lack of standing or fail to state a claim upon which relief can be granted. The Court should deny Aetna's 12(b)(1) motion because Victory has standing. It should only grant Aetna's 12(b)(6) motion with regard to Victory's claims under *ERISA Section 502(a)(3)* (Counts 2, 3, and 4) and Victory's claim for statutory penalties under ERISA insofar as Victory relies on the *de facto* administrator theory. Victory has met its pleading burden with regard to its other claims, and Aetna has failed to satisfy its burden to demonstrate that these claims fail as a matter of law at this preliminary stage of the proceedings.

A. Aetna's motion to dismiss for lack of jurisdiction should be denied.

In the Fifth Circuit, there are two avenues for a defendant to challenge standing in regard to subject matter jurisdiction—facial and factual attacks. *Lewis v. Knutson, 699 F.2d 230, 237 (5th Cir. 1983)* (citing *Williamson v. Tucker, 645 F.2d 404, 412-14 (5th Cir. 1981))*. If a defendant files an unsupported *Rule 12(b)(1)* motion, the challenge is a facial attack, and the trial court is only required to look at the sufficiency of the allegations in the complaint and assume them as true. *Paterson v. Weinberger, 644 F.2d 521, 523 (5th Cir. 1981)*. If the allegations are sufficient to allege jurisdiction, the **[*8]** court must deny the motion. *Id.* If the defendant provides affidavits, testimony, or other evidence challenging the court's jurisdiction with its 12(b)(1) motion, it is a factual attack, and the plaintiff is required to submit facts in support of jurisdiction. *Id.* In a factual attack, the plaintiff has the burden of proving by a preponderance of the credible evidence that the trial court has subject matter jurisdiction over the claims. [*Doe v. Tangipahoa Parish Sch. Bd., 494 F.3d 494, 496-97 (5th Cir. 2007)*] (en banc) ("Standing to sue must be proven, not merely asserted").

i. Victory has derivative standing to pursue ERISA claims on behalf of plan participants and beneficiaries.

Victory asserts its ERISA claims against Aetna as the assignee of certain rights held by Aetna plan members. (Compl. [#1] at ¶ 26.) Victory alleges that Aetna plan members assigned these rights and benefits to Victory when they received services at Victory facilities, and that these assignments confer standing on Victory to bring the ERISA claims at issue in this lawsuit. (*Id.* at ¶¶ 26, 31.) Victory's Complaint states that for each claim that Victory brings in this action, it has an assignment of benefits and rights from the patient, who in each case is an insured under an Aetna-administered **[*9]** benefit plan. (*Id.* at ¶¶ 31, 58.)

Aetna argues that these assignments do not confer standing on Victory to pursue its ERISA claims for breach of fiduciary duty or claims for alleged procedural violations or statutory penalties under *29 U.S.C. § 1132(c)(1)* (Counts 2, 3, and 4). By these counts, Victory alleges that Aetna breached its fiduciary duties as plan and claims administrator by underpaying claims for covered services; failing to provide a full and fair review of claims; and failing to make necessary statutory disclosures so as to maximize benefits to Aetna rather than making determinations based on the actual terms of the plan. (*Id.* at ¶¶ 70-81.) Victory also seeks statutory penalties against Aetna for its failure to comply with ERISA's requirements. (*Id.* at ¶¶ 82-86.) Aetna seeks dismissal of these claims for lack of standing under ERISA. Having considered the arguments of the parties, the undersigned finds that Victory has derivative standing to bring its claims for breach of fiduciary duty, ERISA procedural violations, and statutory penalties as alleged in Counts 2, 3, and 4 of its Complaint.

ERISA authorizes claims for breach of fiduciary duty under both *Sections 502(a)(2)* and *502(a)(3)*. *29 U.S.C. § 1132(a)(2)*, *(3)*. Claims under *Section 502(a)(2)* must be brought **[*10]** against the plan itself. *See* *Mass. Mut. Life Ins. Co. v. Russell, 473 U.S. 134, 142, 105 S. Ct. 3085, 87 L. Ed. 2d 96 (1985)* (holding that *Section 502(a)(2)* is "primarily concerned with the possible misuse of plan assets, and with remedies that would protect the entire plan, rather than with the rights of an individual beneficiary"). Victory does not present a claim under *Section 502(a)(2)*. Rather, it asserts a right to relief for an alleged breach of fiduciary duty under *Section 502(a)(3)*. (Compl. [#1] at ¶¶ 70-77.)

The list of parties permitted to bring an action under *Section 502(a)(3)* is limited to participants, beneficiaries, or fiduciaries of plans. *29 U.S.C. § 1132(a)(3)*. A valid assignment of rights, however, gives rise to derivative standing to individuals and entities beyond those enumerated by statute. *See* *Tex. Life, Acc. Health & Hosp. Serv. Ins. Guar. Ass'n v. Gaylord Entm't Co., 105 F.3d 210, 214-15 (5th Cir. 1997)*; *see also* *Harris Methodist Fort Worth v. Sales Support Servs. Inc. Emp. Health Care Plan, 426 F.3d 330, 333-334 (5th Cir. 2005)* ("It is well established that a healthcare provider, though not a statutorily designated ERISA beneficiary, may obtain standing to sue derivatively to enforce an ERISA plan beneficiary's claim."). The Fifth Circuit has expressly held that assignees of breach of fiduciary duty claims may assert derivative standing under ERISA as to both welfare and pension plans. *Id.*; *Hermann Hosp. v. MEBA Med. & Benefits Plan, 845 F.2d 1286, 1289 (5th Cir. 1988)*, *overruled on other grounds by* *Access Mediquip, L.L.C. v. UnitedHealthcare Ins. Co., 698 F.3d 229 (5th Cir. 2012))*. For a third-party to obtain standing to assert an ERISA claim for the breach of a fiduciary duty under *Section 502(a)(3)*, however, the claim must be expressly **[*11]** assigned to that party. *See* *Tex. Life, Accident, Health & Hosp. Serv. Ins. Guar. Ass'n, 105 F.3d at 218* ("[O]nly an express and knowing assignment of an ERISA fiduciary breach claim is valid.").

Victory attaches to its response to Aetna's motion to dismiss two examples of the assignments executed by Aetna plan members. (*See* Assignments [#14-1] at 2-3.) This Court is permitted to consider documents outside of a complaint in the limited circumstance where the documents are both referred to in the complaint and are central to the claims at issue. *Scanlan v. Tex. A&M Univ., 343 F.3d 533, 536 (5th Cir. 2003)*. Because Victory both refers to the assignments in its Complaint and these assignments are central to the predicate question of whether Victory even has standing to bring its claims, the undersigned considers the assignments in ruling on Aetna's motion to dismiss. These assignments state that the assignor

> does hereby sell, transfer, convey, grant and irrevocably and forever assign to [Victory] all known and unknown, past, present, and future rights, title and interest in all claims, *causes of action* (i.e., pursuant to common law, statute, or in equity and whether based upon tort, breach of contract, *breach of fiduciary duty*, or otherwise), insurance benefits, health care benefits and all other legal rights or recovery **[*12]** from/against . . . (ii) any and all health plans pursuant to which Assignor and/or Patient are entitled to receive health benefits an/or money to pay for medical care, hospital care, medical devices or treatment . . . .

(Assignments [#14-1] at 2-3 (emphasis added).) These assignments expressly assigned to Victory any claim for breach of fiduciary duty held by the Aetna plan member executing the assignment. Accordingly, the assignment is valid, and Victory has derivative standing to assert a claim for breach of fiduciary duty under ERISA. *See Tex. Life, Accident, Health & Hosp. Serv. Ins. Guar. Ass'n, 105 F.3d at 218*.

It is less well settled, however, whether Victory has standing to assert its claim for procedural violations and statutory penalties under *29 U.S.C. § 1132(c)(1)*. Aetna argues that an assignment of this category of claim is impermissible, and even if it were permissible, the assignments are insufficient as to these claims because the assignments do not specifically reference *Section 502(c)*, the right to request plan documents, assert procedural violations based on the failure of Aetna to respond, or seek statutory penalties under this section. (Def.'s Reply [#15] at 4-5.) The undersigned disagrees.

Despite the lack of explicit guidance from any Fifth Circuit decision regarding the **[*13]** availability of derivative standing for claims arising under *Section 502(c)*, the undersigned is persuaded by the case law finding that plan participants and beneficiaries can indeed assign these rights, so long as the assignment is sufficiently broad so as to cover the claims. *See, e.g., Total Sleep Diagnostics, Inc. v. United Healthcare Ins. Co., No. CIV A 06-4153, 2009 U.S. Dist. LEXIS 6808, 2009 WL 152537, at *2 (E.D. La. Jan. 21, 2009)*, *reconsideration denied in part by Total Sleep Diagnostics, Inc. v. United Healthcare Ins. Co., No. CIV.A. 06-4153, 2009 U.S. Dist. LEXIS 27572, 2009 WL 928646, at *4 (E.D. La. Mar. 31, 2009)* (holding that an assignee may seek penalties for failure to produce plan documents when specifically assigned such right). ERISA contains no anti-assignment provision with regard to health care benefits of ERISA-governed medical plans, and the same references to "participant" and "beneficiary" appear in both *Section 502(a)*—which the Fifth Circuit has held is subject to assignment—and *Section 502(c)*. *See Hermann Hosp., 845 F.2d at 1289* (holding that derivative actions under *Section 502(a)* are allowable for health care benefits).

Both parties in this case agree that "the mere fact that a participant or beneficiary assigns payment for unpaid charges directly to the provider . . . does not constitute an assignment of every right or cause of action the participant or beneficiary may have under ERISA." *Total Sleep Diagnostics, Inc., 2009 U.S. Dist. LEXIS 6808, 2009 WL 152537, at *3*. To be valid, the assignment must expressly include the right to sue and pursue claims that the insured would have against the insurance company. *2009 U.S. Dist. LEXIS 6808, [WL] at *4* ("This **[*14]** assignment includes the assignment of the right to sue the undersigned's medical insurance company in the undersigned's/insured's name and assert all claims that the undersigned/insured will have against the insurance company resulting from, or in any way pertaining to, the [sic] medial insurance coverage that the undersigned is alleged to have had with his or her insurance company . . . ."). The assignment here does precisely that, as it assigns not only the right to pursue payment for unpaid benefits to Victory but also "all claims, causes of action, . . . and all other legal rights or recovery from/against . . . any and all health plans." Additionally, the assignment specifies that the causes of action include actions arising under common law or by statute. The assignments at issue in this case are therefore sufficiently broad to confer Victory with derivative standing to pursue statutory penalties under *29 U.S.C. § 1132(c)*.

ii. The Victory Debtors have standing to pursue claims under ERISA and state law based on a reservation of these claims in the Chapter 11 proceedings.

Aetna also asserts that Victory lacks standing under bankruptcy law to bring its claims due to the voluntary Chapter 11 bankruptcy **[*15]** proceedings filed by Victory Parent Company, LLC ("Victory Parent") and five Victory hospitals (collectively "Victory Debtors"). Aetna claims that Victory Parent lacks standing under bankruptcy law to assert its claims under the Texas Insurance Code (Count 5), its claim of promissory estoppel (Count 7), and its claim for exemplary damages. Aetna contends the Victory hospitals lack standing to assert these claims, as well as Counts 2, 3, and 4 under ERISA. The question before the Court is whether the Victory Debtors, as reorganized debtors, have standing to pursue these claims after the confirmation of a plan of reorganization in bankruptcy court. The Court finds that the Victory Debtors have such standing.

Victory's Complaint alleges that Victory Parent and certain Victory hospitals filed a petition for relief under Chapter 11 of the Bankruptcy Code on June 12, 2015. (Compl. [#1] at ¶ 7-11, 13.) The First Amended Plan of Reorganization was confirmed on March 28, 2016 in Case No. 15-42373 in the United States Bankruptcy Court for the Northern District of Texas, Fort Worth Division. (*Id.* at ¶ 14.) Aetna attaches to its motion to dismiss a copy of the First Amended Plan of Reorganization **[*16]** [#5-2].

In some cases the Bankruptcy Code allows a reorganized debtor to bring a post-confirmation action on a "claim or interest belonging to the debtor or to the estate." *In re United Operating, LLC, 540 F.3d 351, 355 (5th Cir. 2008)* (citing *11 U.S.C. § 1123(b)(3)*). A debtor may preserve its standing to bring such a claim (e.g., for fraud or breach of fiduciary duty), but only if the plan of reorganization expressly provides for the claim's "retention and enforcement by the debtor." *Id.* (citing *11 U.S.C. § 1123(b)(3)(B)*). Such reservation must be "specific and unequivocal" to be valid, such that a debtor's creditors are on notice of any claim the debtor wishes to pursue after confirmation. *Id.* (internal quotation and citation omitted). With such notice of their potential liabilities, creditors are able to make an informed decision as to whether they want to vote for or against a plan. *Id.* It is well settled that a generic blanket reservation of "any and all claims" is not "specific and unequivocal" and therefore insufficient to give notice to creditors and to preserve the right to pursue claims of the estate by a reorganized debtor. *In re Texas Wyoming Drilling, Inc., 422 B.R. 612, 625 (Bankr. N.D. Tex. 2010)* (citing *United Operating, 540 F.3d at 355*). "After confirmation of a plan, the ability of the [debtor] to enforce a claim once held by the estate is limited to that which has been retained **[*17]** in the plan." *United Operating, 540 F.3d at 355* (internal citations omitted).

The First Amended Plan of Reorganization here ("the Plan") reserves the "[c]ollection of accounts receivable and any and all related claims cognizable under applicable law" against Aetna and each of its affiliates. (Ex. 1 to Plan of Reorganization [#5-2] at 45.) Aetna argues this reservation is insufficient to reserve any claims under Fifth Circuit authority. According to Aetna, the only specific reference in the Plan to any causes of action against Aetna is contained in section XI of the First Amended Disclosure Statement, which is also attached to Aetna's motion [#5-3]. The Disclosure Statement references a separate petition filed on February 25, 2014 by Victory Parent against Aetna in Harris County, Texas in state court, prior to the Chapter 11 proceeding, asserting claims of negligent misrepresentation and certain ERISA claims. (Disclosure Statement [#5-3] at 47-48.) Aetna argues only these pre-petition claims could have been preserved under the Plan.

Aetna neglects to mention that, in addition to specifically reserving the "collection of accounts receivable and any and all related claims cognizable under applicable law" against Aetna, **[*18]** the Plan also reserves "[a]ll claims and litigation mentioned, described, or discussed in [Section XI of the Disclosure Statement]." (Ex. 1 to Plan of Reorganization [#5-2] at 45.) Section XI is entitled "Pending and Potential Litigation" and is not limited to the reservation of litigation already in process at the time of plan confirmation; rather, the Disclosure Statement expressly reserves the right to future suit against insurance companies such as Aetna. (*Id.*) Section XI.F of the Disclosure Statement is entitled "Potential Non-Chapter 5 Litigation that Victory Debtors May Pursue" and states the following:

> [T]he Debtors reserve all rights to sue all insurance companies, former patients, any third-party payor, or any other person or entity who is liable—under any contract, agreement, regulation, procedure, statute, or any other applicable law, including without limitation ERISA—for accounts receivables or any other indebtedness owed whatsoever to one or more Debtor as a result of the provision of healthcare provided by one or more Debtor.

(Disclosure Statement [#5-3] at § XI.F, at 53.) The Fifth Circuit has expressly held that a court may consider the disclosure statement in addition to the **[*19]** plan itself to determine whether a post-confirmation debtor has standing to pursue a specific claim. *In re Texas Wyoming Drilling, Inc., 647 F.3d 547, 551 (5th Cir. 2011)*.

Having considered the language in both the Plan and the Disclosure Statement, the undersigned finds it to be sufficiently specific and unequivocal so as to put Aetna on notice that the Victory Debtors anticipated pursuing claims against Aetna after confirmation. *See* *In re Crescent Res., LLC, 463 B.R. 423, 437 (Bankr. W.D. Tex. 2011)* (citing *In re Texas Wyoming Drilling, Inc., 422 B.R. at 626*). As the lower courts in this Circuit have recognized, there is no Fifth Circuit opinion requiring a plan to identify specific individuals or entities as prospective defendants in order to preserve the claims, and a categorical reservation of a specific type of claim is sufficient to preserve standing. *Brickley for CryptoMetrics, Inc. Creditors' Tr. v. ScanTech Identification Beams Sys., LLC, 566 B.R. 815, 834 (W.D. Tex. 2017)*. *See also* *United Operating, 540 F.3d at 355* (citing *In re Ice Cream Liquidation, Inc., 319 B.R. 324, 337-38 (Bankr. D. Conn. 2005)* (language generally reserving debtor's right to pursue "preference claims" without specifically identifying alleged preferential transfers or recipients thereof was sufficient to preserve debtor's standing)).

Here, the Plan and the Disclosure Statement do not contain a mere generic reservation of all claims. Rather, the Plan and Disclosure Statement, when read in conjunction with one another as directed by the Plan, identify both the categories of causes of action and the potential Defendants **[*20]** in future litigation reserved under the Plan, identifying Aetna by name and insurance companies generally. The categories of identified claims include any claims for the "collection of accounts receivable" and "any and all related claims cognizable under applicable law" against Aetna specifically, as well as all any claim against insurance companies pertaining to accounts receivable or other indebtedness arising "under any contract, agreement, regulation, procedure, statute, or any other applicable law, including without limitation ERISA." (Ex. 1 to Plan of Reorganization [#5-2] at 45; Disclosure Statement [#5-3] at § XI.F, at 53.)

Aetna attempts to limit the reservation of claims to "accounts receivables," arguing that the Plan and Disclosure Statement do not contain any reference to claims "related to" such accounts, and thus the Victory Debtors only have standing to pursue claims to recover unpaid benefits, i.e., claims of breach of contract and under *Section 502(a) of ERISA*. This argument misrepresents the language of the Plan, which expressly reserves both "accounts receivables" and "any and all *related* claims" against Aetna and its affiliates. (Ex. 1 to Plan of Reorganization [#5-2] at 45.) Additionally, the Plan **[*21]** reserves "all claims and litigation" described in the Disclosure Statement, which in turn reserves "all rights to sue all insurance companies . . . for accounts receivables or any other indebtedness . . . as a result of the provision of healthcare," naming specifically claims arising "under any contract, agreement, regulation, procedure, statute, or any other applicable law, including without limitation ERISA." (Ex. 1 to Plan of Reorganization [#5-2] at 45; Disclosure Statement [#5-3] at § XI.F, at 53.) Again, this language places Aetna on notice that the Victory Debtors intended to later pursue claims to recover unpaid health benefits as well as claims related to Aetna's denial of benefits as have been asserted here, whether these claims encompass statutory procedural violations arising under ERISA or state-law claims arising under the Texas Insurance Code.

Finally, the undersigned is not persuaded by Aetna's argument that Victory Parent only has standing to assert those claims brought against Aetna by Victory Parent in the federal district court litigation that was pending prior to Chapter 11 proceedings. (*See* Disclosure Statement [#5-3] at § XI.B, at 47.) Section XI.F of the Disclosure Statement addresses **[*22]** future litigation that the Victory Debtors generally may pursue. This Section does not exclude Victory Parent from the reservation of claims such that Victory Parent is barred from pursuing future litigation. Victory Parent and the Victory hospitals involved in the Chapter 11 proceedings are all Debtors for purposes of the bankruptcy and reservation of claims.

In summary, the Victory Debtors have standing to pursue all the claims arising under ERISA that are challenged by Aetna (Counts 2, 3, and 4), as ERISA is categorically identified in the Amended Disclosure Statement. (Disclosure Statement [#5-3] at § XI.F, at 53.) The Victory Debtors also have standing to pursue their claims arising under the Texas Insurance Code (Count 5) and promissory estoppel and negligent misrepresentation (Count 7), as the Amended Disclosure Statement categorically refers to any statute or any other applicable law pertaining to liability for accounts receivables or any other indebtedness owed to an insurance company as a result of the provision of healthcare. (*Id.*) Both of these counts concern the failure to reimburse Victory for healthcare benefits: Count 5 seeks payment and prompt-pay penalties for the failure to **[*23]** reimburse Victory as an out-of-network provider of emergency services at the usual and customary rate (Compl. [#1] at ¶¶ 88-90), and Count 7 seeks damages based on Aetna's misrepresentation in confirming coverage—making a promise to pay Victory and subsequently denying or underpaying benefits (Compl. [#1] at ¶¶ 94-103). As to Victory's claim for exemplary damages, Aetna has not directed the Court to any authority demonstrating that a post-confirmation debtor is not entitled to the full available damages under governing law in a subsequent lawsuit on properly reserved claims.

B. Aetna's motion to dismiss for failure to state a claim should be granted in part and denied in part.

Aetna has also moved to dismiss Victory's claims under *Rule 12(b)(6)*. "A motion to dismiss for failure to state a claim is viewed with disfavor and is rarely granted." *Kaiser Aluminum & Chem. Sales v. Avondale Shipyards, Inc., 677 F.2d 1045, 1050 (5th Cir. 1982)*, *cert. denied*, *459 U.S. 1105, 103 S. Ct. 729, 74 L. Ed. 2d 953 (1983)* (quoting Wright & Miller, Federal Practice and Procedure § 1357 (1969)). "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw **[*24]** the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* "Although a complaint "does not need detailed factual allegations," the "allegations must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*. The allegations pleaded must show "more than a sheer possibility that a defendant has acted unlawfully." *Iqbal, 556 U.S. at 678*.

In reviewing a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*, a court "accepts all well-pleaded facts as true, viewing them in the light most favorable to the plaintiff." *Martin K. Eby Const. Co. v. Dallas Area Rapid Transit, 369 F.3d 464, 467 (5th Cir. 2004)* (internal quotation omitted). However, a Court need not credit conclusory allegations or allegations that merely restate the legal elements of a claim. *Chhim v. Univ. of Tex. at Austin, 836 F.3d 467, 469 (5th Cir. 2016)* (citing *Iqbal, 556 U.S. at 678*). In short, a claim should not be dismissed unless the court determines that it is beyond doubt that the plaintiff cannot prove a plausible set of facts that support the claim and would justify relief. *See Twombly, 550 U.S. at 570*. Applying these standards, the only claims that fail to survive Aetna's *Rule 12(b)(6)* challenge are Victory's claims under *Section 502(a)(3)* (Counts 2, 3, and 4) and Victory's claim for statutory penalties under ERISA, which should be dismissed in part insofar as Victory relies on a theory of Aetna as *de facto* administrator of fully-funded plans. As to all **[*25]** other claims, Aetna has failed to establish Victory cannot prove a plausible set of facts that would support the claim and justify relief.

i. Victory states a plausible claim to recover unpaid plan benefits under ERISA (Count 1) and for breach of contract (Count 5) as to non-ERISA plans.

Section 502(a)(1)(B) of ERISA authorizes a suit by a plan participant or beneficiary "to recover benefits due to him under the terms of his plan, to enforce his rights under the terms of the plan, or to clarify his rights to future benefits under the terms of the plan." *29 U.S.C. § 1132(a)(1)(B)*. The existence of an employee welfare benefit plan is thus an essential element of a claim for benefits under *Section 502(a)(1)(B)* and must be sufficiently pleaded to survive a *Rule 12(b)(6)* challenge. *Elite Ctr. for Minimally Invasive Surgery, LLC v. Health Care Serv. Corp., 221 F. Supp. 3d 853, 856 (S.D. Tex. 2016)*. Aetna does not argue that Victory has not pleaded the existence of an employee welfare benefit plan. Rather, Aetna argues that Victory's claim for unpaid plan benefits should be dismissed for failure to state a claim because "Plaintiffs make only conclusory allegations that Aetna underpaid under [the alleged plan] terms" and fails to "specifically allege how Aetna violated specific terms of any plans references." (Mot. to Dismiss [#5] at 9-10.) The undersigned disagrees with Aetna's position.

Victory's **[*26]** Complaint contains extensive factual allegations in support of its claim that Aetna failed to adjudicate and pay patient claims in accordance with the terms of the benefits plans at issue. Victory alleges that Aetna failed to reimburse Victory at the usual and customary rate for out-of-network providers and failed to pay for covered services under the proper payment methodology and gives numerous examples of the undercompensation of specific patients whose claims were allegedly improperly adjudicated. (Compl. [#1] at ¶¶ 30, 35, 37, 50-53, 66). Victory's Complaint also quotes the relevant plan terms and language from ten different benefits plans obtained by Victory during the bankruptcy process as to the methodology for determining the allowable amount of a given claim. (*Id.* at ¶ 59.) Victory alleges that none of these methodologies were used correctly by Aetna in determining the allowable amount for the claims at issue in this case, when Aetna made payments to Victory by applying 140% of the Medicare allowable instead of the reasonable and customary rate applicable, as well as miscalculating the value of the Medicare allowable itself. (*Id.* at ¶ 60.) These allegations are sufficient **[*27]** to state a plausible claim under *Section 502(a) of ERISA*, and the cases cited by Aetna in their motion do not dictate otherwise. *Cf. e.g., Slater v. Sw. Research Inst., No. SA-12-CV-01205-XR, 2013 U.S. Dist. LEXIS 82231, 2013 WL 2896848, at *4 (W.D. Tex. June 11, 2013)* (granting motion to dismiss for failure to state a claim where complaint failed to mention any provision of ERISA or explain how any of factual allegations supported an ERISA claim).

For those plans not governed by ERISA, Victory alleges a claim for breach of contract. Aetna argues that this claim should be dismissed for the same reason Aetna argues for dismissal of Victory's claim to recover plan benefits under ERISA *Section 502(a)(1)(B) of ERISA*—insufficient factual allegations of wrongful denial or underpayment of benefits. For the same reasons the undersigned recommends denying dismissal of Victory's ERISA claim for unpaid benefits, the undersigned will also recommend denying dismissal of Victory's breach of contract claim. There are sufficient factual allegations in Victory's Complaint to state a plausible claim that Aetna failed to process or pay claims under the terms of the applicable plans and under the payment methodology contained therein as to those plans that are not governed by ERISA.

ii. Victory's other ERISA claims for breach of fiduciary **[*28]** duty (Count 2) and for procedural violations of ERISA (Counts 3 and 4) should be dismissed as duplicative of Victory's ERISA claim for unpaid benefits.

Aetna contends that Victory's ERISA claims for breach of fiduciary duty and procedural violations pursuant to *Section 502(a)(3)* must be dismissed because they are duplicative of Victory's ERISA claim for unpaid benefits. The undersigned agrees. *ERISA Section 502(a)(3)* permits a party to bring a civil action "(A) to enjoin any act or practice which violates any provision of this subchapter or the terms of the plan, or (B) to obtain other appropriate equitable relief (i) to redress such violations or (ii) to enforce any provisions of this subchapter or the terms of the plan." *29 U.S.C. § 1132(a)(3)*. The Supreme Court has held that *Section 502(a)(3)* authorizes ERISA plan beneficiaries to bring a suit for individual relief based on an administrator's breach of fiduciary duty. *Varity Corp. v. Howe, 516 U.S. 489, 512, 116 S. Ct. 1065, 134 L. Ed. 2d 130 (1996)*.

Victory's Complaint alleges in Count 2 that Aetna breached its fiduciary duties to plan participants, and in turn to Victory as assignee, by not paying and by underpaying claims for covered services and by maximizing benefits to Aetna rather than making determinations based on the terms of the applicable plans. (Compl. [#3] at ¶¶ 70-77.) By this **[*29]** claim, Victory seeks restitution, injunctive and declaratory relief, and Aetna's removal as breaching fiduciary. (*Id.* at ¶ 76.)

Lower courts in the Fifth Circuit have diverged on the question of whether the simultaneous pleading of both a claim for unpaid benefits under *Section 502(a)(1)(B)* and a claim for breach of fiduciary duty under *Section 502(a)(3)* is permissible, despite a well-developed rule in the Circuit that alternative pleading of these two types of claims is impermissible. In *Varity Corp. v. Howe*, the Supreme Court considered the viability of a plaintiff's *Section 502(a)(3)* claims against a plan administrator where plaintiffs alleged they relied on the administrator's false assurances in agreeing to change to a different benefits plan that ultimately reduced their coverage. *516 U.S. at 507-515*. In its discussion regarding the proper scope of *Section 502(a)(3)* claims, the Supreme Court observed that *Section 502(a)(3)* serves as a "catchall" provision that "act[s] as a safety net, offering appropriate equitable relief for injuries caused by violations that *[Section] 502* does not elsewhere adequately remedy." *Id. at 512*. The Court further explained that "we should expect that where Congress elsewhere provided adequate relief for a beneficiary's injury, there will likely be no need for further equitable **[*30]** relief, in which case such relief normally would not be appropriate." *Id. at 515* (internal quotations omitted).

Fifth Circuit decisions interpreting *Varity* created a rule that plaintiffs may only assert a claim pursuant to Section 502(a)(3) for breach of fiduciary duty where "no other appropriate equitable relief is available." Tolson v. Avondale Indus., Inc., 141 F.3d 604, 610 (5th Cir. 1998) (affirming district court's grant of summary judgment against plaintiff on Section 502(a)(3) claim because plaintiff had redress that was theoretically available pursuant to Section 502(a)(1)(B), even though plaintiff did not ultimately prevail on this claim). The rule in this Circuit has become that "[w]hen a beneficiary wants what was supposed to have been distributed under a plan, the appropriate remedy is a claim for denial of benefits under [Section] 502(a)(1)(B) of ERISA rather than a fiduciary duty claim brought pursuant to [Section] 502(a)(3)." McCall v. Burlington N./Santa Fe Co., 237 F.3d 506, 512 (5th Cir. 2000). *See also* Rhorer v. Raytheon Eng'rs & Constructors, Inc., 181 F.3d 634, 639 (5th Cir. 1999), *abrogated on other grounds by grounds by* CIGNA Corp. v. Amara, 563 U.S. 421, 131 S. Ct. 1866, 179 L. Ed. 2d 843 (2011) ("[A]n ERISA plaintiff may bring a private action for breach of fiduciary duty only when no other remedy is available under 29 U.S.C. § 1132.").

This has led the majority of lower courts in this Circuit to dismiss claims for breach of fiduciary duty as a matter of law where a claim to recover plan benefits was the predominant action in the suit and afforded the plaintiff of avenue for **[*31]** legal redress against the plan administrator. Constantine v. Am. Airlines Pension Benefit, 162 F. Supp. 2d 552, 557 (N.D. Tex. 2001) ("Because Plaintiff has resorted to the principal remedy for ERISA claimants [Section 1132(a)(1)(B)], she has also failed to state a claim under § 1132(a)(3) as described by the Supreme Court in *Varity.*"*);* Hager v. NationsBank Corp. Pension, No. 3:97-CV-1726G, 1999 U.S. Dist. LEXIS 17931, 1999 WL 1044498, *3 (N.D. Tex. 1999) (dismissing breach of fiduciary duty claim where plaintiff also sued plan administrator for unpaid benefits). Despite this authority, some courts in this Circuit have still taken a more expansive approach—at least at the pleading stage—and have allowed plaintiffs to plead claims under several subsections of Section 502(a) simultaneously. *See e.g.,* N. Cypress Med. Ctr. Operating Co. v. CIGNA Healthcare, 782 F. Supp. 2d 294, 309 (S.D. Tex. 2011), *aff'd sub nom.* N. Cypress Med. Ctr. Operating Co. v. Cigna Healthcare, 781 F.3d 182 (5th Cir. 2015). The Court in *N. Cypress Med Ctr.*, for example, reasoned that *Varity* and its Fifth Circuit progeny merely prohibit a plaintiff from ultimately *recovering* on both a claim for unpaid benefits and a claim for breach of fiduciary duty but do not prevent the pleading of both claims to "preserve alternative grounds for relief until a later stage in the litigation." *Id.*

The court's holding in *N. Cypress Med Ctr.* was more or less an outlier at the time it was written, but in the wake of the Supreme Court's 2011 decision in CIGNA Corp. v. Amara, 563 U.S. 421, 131 S. Ct. 1866, 179 L. Ed. 2d 843 (2011), a few other lower courts have followed suit. In ***[*32]*** *Amara*, the Supreme Court considered a district court's ruling in favor of pension plan beneficiaries who alleged that CIGNA had failed to give them proper notice of changes to their benefits through the summary plan documents that were provided, and the change resulted in their receiving less generous coverage. 563 U.S. 421, 424-25, 131 S. Ct. 1866, 179 L. Ed. 2d 843. The district court agreed with plaintiffs that the disclosures made by CIGNA violated its obligations under ERISA, and the court attempted to provide relief under Section 502(a)(1)(B) by reforming the benefits plan and ordering CIGNA to pay benefits accordingly. Id. at 425. Although the plaintiffs had also asserted a Section 502(a)(3) claim, the district court declined to decide whether that claim was sustainable, finding it unnecessary in light of its holding that Section 502(a)(1)(B) provided an appropriate remedy. Id. at 434.

Upon review, the Supreme Court vacated the lower court judgment and held that reformation of the plan was an equitable remedy not available under Section 502(a)(1)(B). Id. at 435-38. The Court reasoned that Section 502(a)(1)(B) only empowers courts to award beneficiaries the benefits they are due "under the terms of the plan" and that summary documents only provide communication about the plan and do not constitute terms of the plan that are enforceable via Section 502(a)(1)(B). Id. at 438. Accordingly, the **[*33]** Supreme Court held that reformation of the plan to match the terms of the summary documents was an equitable remedy only available under Section 502(a)(3) and remanded the case for a determination of whether such relief was appropriate under that Section. Id. at 439-442, 445.

Some lower courts in this Circuit have interpreted *Amara* as implicitly sanctioning the pleading of alternative means of relief under ERISA and have adopted the more expansive approach allowing the simultaneous pleading of claims under Sections 502(a)(1)(B) and 502(a)(3).[1] *E.g.,* Peterson v. Liberty Life Assurance Co. of Boston, No. 1:15-CV-00204-SADAS, 2016 U.S. Dist. LEXIS 91021, 2016 WL 3849693, at *3 (N.D. Miss. July 13, 2016) (denying motion to dismiss and allowing plaintiff to plead both claim for denial of benefits and claim for breach of fiduciary duty); Currier v. Entergy Corp. Employee Benefits Comm., No. CV 16-2793, 2016 U.S. Dist. LEXIS 142471, 2016 WL 6024531, at *3-4 (E.D. La. Oct. 14, 2016) (same). As the *Peterson* court observed, "[h]ad the district court in *Amara* dismissed the breach of fiduciary duty claim at the pleading stage based on the mere presence of the legal claim for benefits, the equitable relief sanctioned by the Supreme Court would not have been available." Peterson, 2016 U.S. Dist. LEXIS 91021, 2016 WL 3849693, at *3. This position is also more in keeping with general federal pleading practice, which allows a party to plead alternative claims and defenses, even if ultimately **[*34]** inconsistent. *See also* Fed. R. Civ. P. 8(d)(3) (providing that "a party may state as many separate claims or defenses as it has, regardless of consistency").

However, the majority of district court cases in this Circuit continue to dismiss claims under Section 502(a)(3) where a claim for unpaid benefits is also pleaded, particularly where the two claims are "substantively indistinct" and both stem from the same underlying conduct—the alleged improper denial of benefits. *E.g.,* Horne v. J.C. Penney Corp., No. 14CV2383, 2014 U.S. Dist. LEXIS 159366, 2014 WL 6060434, at *5 (W.D. La. Nov. 12, 2014) (dismissing breach of fiduciary duty claim as duplicative of claim for unpaid benefits under pre-*Amara* Fifth Circuit authority); Lopez v. Liberty Life Assur. Co. of Boston, No. CIV.A. H-13-2460, 2013 U.S. Dist. LEXIS 152755, 2013 WL 5774878, at *4 (S.D. Tex. Oct. 24, 2013) (rejecting argument that *Amara* changed general rule that if relief is available under Section 502(a)(1)(B), equitable relief is not available under Section 502(a)(3), and dismissing breach of fiduciary duty claim in light of potential remedy for unpaid benefits).

Additionally, the few Fifth Circuit cases addressing breach of fiduciary duty claims post-*Amara* have not directly addressed the impact the decision might have on Circuit precedent. Rather, the Fifth Circuit has continued to follow pre-*Amara* case law without discussion **[*35]** and enforce a blanket prohibition on the simultaneous pleading of claims for unpaid benefits and breach of fiduciary duty. *See, e.g.,* Swenson v. United of Omaha Life Ins. Co., 876 F.3d 809, 812 (5th Cir. 2017) (reciting the standard set forth in *Tolson* and affirming dismissal of equitable claims in a case that involved a widow seeking benefits from an individual life insurance policy); Hollingshead v. Aetna Health Inc., 589 F. App'x 732, 737 (5th Cir. 2014) (affirming denial of leave to amend on basis that claim for fiduciary duty was futile in light of claim for unpaid benefits).

Although the undersigned is persuaded that the better reading of *Varity* is that it bars duplicative recovery as opposed to alternative pleading, the undersigned is bound by Fifth Circuit precedent insofar as it has held that an ERISA plaintiff may not simultaneously pursue both a claim for unpaid benefits and for breach of fiduciary duty, at least where the claims are both premised on the denial of plan benefits, as opposed to some other wrongful act. The undersigned also agrees with Victory that *Amara* lends further support to a more expansive interpretation of *Varity*, but until the Fifth Circuit directly addresses the question of whether *Amara* implicitly overrules its prior precedent, this Court must dismiss any claim for breach of fiduciary duty that **[*36]** is based on a denial of benefits and pleaded alongside a claim under Section 502(a)(1)(B) complaining of the same. Victory's claim for breach of fiduciary duty, as stated in Count 2, is premised exclusively on Aetna's alleged failure to properly adjudicate the claims of its members by denying or underpaying such claims. (*Id.* at ¶ 75.) Because Victory has already alleged this claim for benefits denied as a cause of action under Section 502(a)(1)(B), the undersigned will recommend that

---

[1] Multiple circuit courts have also recently interpreted the *Amara* decision as clarifying that a Section 502(a)(3) claim is not automatically undermined by the presence of a Section 502(a)(1)(B) claim. *See* N.Y. State Psychiatric Ass'n, Inc. v. UnitedHealth Group, 798 F.3d 125, 134 (2d Cir. 2015) ("[I]t is not clear at the motion-to-dismiss stage of the litigation that monetary benefits under § 502(a)(1)(B) alone will provide him a sufficient remedy. In other words, it is too early to tell if his claims under § 502(a)(3) are in effect repackaged claims under § 502(a)(1)(B)."); Silva v. Metro. Life Ins. Co., 762 F.3d 711, 727 (8th Cir. 2014) (holding, in light of *Amara*, that "*Varity* only bars duplicate recovery and does not address pleading alternate theories of liability"); Moyle v. Liberty Mut. Ret. Ben. Plan, 823 F.3d 948, 961 (9th Cir. 2016), *as amended on denial of reh'g and reh'g en banc* (Aug. 18, 2016) (interpreting *Amara* as allowing the pursuit of simultaneous claims under both Section 502(a)(1)(B) and Section 502(a)(3), so long as there is ultimately no double recovery prohibited by *Varity*).

the Court dismiss his claim for breach of fiduciary duty pursuant to *Section 502(a)(3)*. *See* *Tolson, 141 F.3d at 610*; *Rhorer, 181 F.3d at 639*.

Aetna focuses its arguments in its motion to dismiss on Varity's *Section 502(a)(3)* claim for breach of fiduciary duty, but Aetna also seeks dismissal of Varity's other two claims arising under *Section 502(a)(3)*—Counts 3 and 4. These claims allege Aetna's failure to provide a full and fair review of claims and for other procedural violations of ERISA. (*See* Compl. ¶¶ 78-86.) These claims do raise factual allegations beyond the mere act of denying a claim for benefits, such as the failure to follow claims procedures, but the ultimate harm complained of is part and parcel to the claims denial itself. Accordingly, the same Fifth Circuit precedent that bars the simultaneous pleading of *Section 502(a)(1)(B)* and a breach of fiduciary **[*37]** duty claim under *Section 502(a)(3)*, also compels the undersigned to recommend dismissal of Victory's other two claims arising under *Section 502(a)(3)*.

iii. Victory's state-law claims (Counts 5 and 7) should not be dismissed—yet—as preempted by ERISA.

Aetna seeks dismissal of Victory's claims under the Texas Insurance Code (Count 5) and claims of promissory estoppel and negligent misrepresentation (Count 7) as preempted by ERISA. ERISA provides a uniform regulatory regime over employee benefit plans and includes expansive preemption provisions, preempting any state law that relates to an ERISA plan or conflicts with ERISA's regulatory scheme. *29 U.S.C. § 1144(a)*; *Aetna Health Inc. v. Davila, 542 U.S. 200, 208-09, 124 S. Ct. 2488, 159 L. Ed. 2d 312 (2004)*. "Conflict preemption, also known as ordinary preemption, arises when a federal law conflicts with state law, thus providing a federal defense to a state law claim, but does not completely preempt the field of state law so as to transform a state law claim into a federal claim." *Arana v. Ochsner Health Plan, 338 F.3d 433, 439 (5th Cir. 2003)*. A defendant arguing for conflict or ordinary preemption based on ERISA's preemption clause must prove that: (1) the claim addresses an area of exclusive federal concern, such as the right to receive benefits under the terms of the ERISA Plan; and (2) the claim directly affects the relationship among **[*38]** traditional ERISA entities—the employer, the plan and its fiduciaries, and the participants and beneficiaries. *Mayeaux v. La. Health Serv. and Indem. Co., 376 F.3d 420, 432 (5th Cir. 2004)*. Because ERISA conflict preemption is an affirmative defense, Aetna bears the burden of proof on both elements. *See* *Bank of La. v. Aetna U.S. Healthcare Inc., 468 F.3d 237, 242 (5th Cir. 2006)*.

According to Aetna, Victory's Texas Insurance Code claims are preempted under ERISA's preemption clause, *29 U.S.C. § 1144*, because they are all based upon an alleged failure to pay plan benefits and are necessarily derivative of and dependent upon the right to recover benefits under various ERISA plans. It is true that Victory's claims under the Texas Insurance Code implicate the alleged failure to Aetna to reimburse Victory in accordance with the terms of various plans. (Compl. [#1] at ¶ 88.) It is also true that claims processing and payment are areas that both the Fifth Circuit and the Supreme Court have characterized as areas of exclusive federal concern governed by ERISA. *See* *Bank of La., 468 F.3d at 242*. However, ERISA preemption is more nuanced than Aetna's arguments for preemption would suggest, especially in a case involving both self-funded and fully-funded plans, as well as plans allegedly not governed by ERISA, and allegations of both a failure to pay claims and underpayment of claims.

Again, **[*39]** Aetna bears the burden of proof on both elements of the preemption doctrine. *See id.* Aetna has failed to satisfy this burden, as it is unclear to the Court at this preliminary stage of the proceedings whether Victory's claims under the Texas Insurance Code all directly affect the relationship among traditional ERISA entities or concern other plans not governed by ERISA that are also at issue in this lawsuit. Additionally, the Fifth Circuit has distinguished between a claim that implicates the *rate* of payment as set out in a Provider Agreement, rather than the *right* to payment under the terms of the benefit plan. *Lone Star OB/GYN Assocs. v. Aetna Health Inc., 579 F.3d 525, 530 (5th Cir. 2009)*; *see also* *Electrostim v. Health Care Serv. Corp., 614 Fed App'x 731, 737 (5th Cir. 2015)* (finding plaintiff's state law claims based on a failure to pay were preempted but state-law underpayment claims were not). Victory's Texas Insurance Code claim alleges the underpayment of claims "at an amount less than the usual and customary rate." (Compl. [#1] at ¶ 88.) Aetna has not briefed the Court as to whether this distinction is relevant for purposes of Victory's claims. Nor has Aetna briefed the Court on the impact, if any, of the *ERISA Savings Clause, 29 USC § 1144(b)(2)(A)*, or the exception to it found in the *"Deemer Clause," 29 U.S.C.*

§1144(b)(2)(B). "The Supreme Court had held that only insured plans are exempted from ERISA preemption **[*40]** by the Savings Clause, and that the Deemer Clause preserves ERISA preemption for self-funded plans." *Emergency Health Ctr. at Willowbrook, L.L.C. v. UnitedHealthcare of Texas, Inc., 892 F. Supp. 2d 847, 859 (S.D. Tex. 2012)* (citing *FMC Corp. v. Holliday, 498 U.S. 52, 111 S. Ct. 403, 112 L. Ed. 2d 356 (1990))*. Victory has alleged that both types of plans are at issue here.

Aetna's arguments for the preemption of Victory's promissory estoppel and negligent misrepresentation claims (Count 7) are even less adequate. In a mere footnote in Aetna's motion to dismiss, Aetna argues that Victory's promissory estoppel and negligent misrepresentation claims are "likely also preempted by ERISA." (Mot. to Dismiss [#5] at 19 n.32.) These claims are based on allegations that Aetna made promises to pay for plan participants' medical bills and then subsequently denied or underpaid claims. The Fifth Circuit has held that similar claims are not preempted by ERISA, as these claims—though concerning statements about the extent of coverage available under an ERISA plan—do not require consultation of a given plan's terms and instead focus on the representations made by an insurer about the extent to which it would pay for services. *See Access Mediquip L.L.C. v. UnitedHealthcare Ins. Co., 662 F.3d 376, 384-85 (5th Cir. 2011)*. *See also Mid-Town Surgical Ctr., L.L.P. v. Humana Health Plan of Texas, Inc., 16 F. Supp. 3d 767, 780-81 (S.D. Tex. 2014)* (claims of promissory estoppel and negligent misrepresentation based on insured's promises of payment for services were not preempted by ERISA). Moreover, even if this argument had merit, **[*41]** the undersigned finds that arguing in one sentence in a footnote that a claim "is likely" preempted does not sufficiently brief the Court on this issue so as to satisfy Defendant's burden to establish preemption.

In summary, Aetna has not carried its burden to demonstrate that Victory's Texas Insurance Code claims are preempted by ERISA as to all of the plans at issue in this case or, more accurately, Aetna has failed to distinguish the various plans at issue in this case and to adequately identify which plans are preempted by ERISA. Aetna has also failed to satisfy its burden to establish preemption as to Victory's negligent misrepresentation and promissory estoppel claims. Certainly some of Victory's claims are preempted, namely those that involve claims regarding the alleged inappropriate denial of benefits and traditional ERISA entities. But the Court cannot ascertain without a more robust record and more detailed briefing what subset of these claims must be dismissed as preempted and which can proceed. Accordingly, the preemption issue should be revisited at the summary judgment stage after the parties have engaged in some discovery as to the plans at issue in this lawsuit. Aetna's **[*42]** motion to dismiss Victory's Texas Insurance Code and negligent misrepresentation and promissory estoppel claims based on preemption should be denied without prejudice to raising this issue on a properly briefed motion for summary judgment.

iv. Victory states plausible claims under the Texas Insurance Code.

Victory's Complaint alleges various violations of the Texas Insurance Code with respect to emergency services, claiming that Texas law requires the reimbursement of an out-of-network provider at the usual and customary rate, regardless of the terms of the plan, *Tex. Ins. Code § 1271.155*; *28 Tex. Admin. Code § 3.3725*. (Compl. [#1] at ¶ 88.) Victory also alleges violations of Texas's Prompt Pay Statute for Aetna's alleged failure to timely pay claims under *Tex. Ins. Code § 542.058*; seeks prompt pay penalties under 28 Tex. Admin. Code § 21.283, *Tex. Ins. Code §§ 843.338*, *1301.103*; and alleges unfair competition under *Tex. Ins. Code § 541.003*. (Compl. [#1] at ¶ 89.) Aetna argues that even if Victory's Texas Insurance Code claims are not preempted, these claims should still be dismissed for failure to state a claim. The undersigned disagrees.

a) Tex. Ins. Code § 1271.155 and 28 Tex. Admin. Code § 3.3725

Section 1271.155(a) of the Texas Insurance Code provides that a health maintenance organization "shall pay for emergency care performed by non-network physicians or providers at the usual and customary rate or **[*43]** at an agreed rate." *Section 3.3725(a) of Chapter 28* of the Texas Administrative Code similarly provides that "the insurer must fully reimburse a nonpreferred provider for [certain] emergency care services at the usual and customary rate or at a rate agreed to by the insurer and the nonpreferred provider until the insured can reasonably be expected to transfer to a preferred provider." Aetna contends these provisions do not provide a private right of action and therefore must be dismissed as a matter of law. The Court agrees with respect to the administrative code provision. The administrative code provision cited by Victory in its Complaint is located in Subchapter X of the Code, which in separate section provides that "[t]hese sections do not create a private cause of action for damages or create a standard of care, obligation, or duty that provides a basis for a private cause of action." *28 Tex. Admin. Code § 3.3701(d)*.

However, the Court is not persuaded based on the current briefing that *Section 1271.155(a) of the Texas Insurance Code* does not give rise to a private right of action, either on its own or in conjunction with other provisions of the Texas Insurance Code. Aetna cites no authority for this position, and the undersigned did identify at least two federal court cases **[*44]** reviewing state-law claims that were based in least in part on alleged violations of this provision. *See Emergency Health Ctr. at Willowbrook, L.L.C. v. UnitedHealthcare of Tex., Inc., 892 F. Supp. 2d 847, 857 (S.D. Tex. 2012)* (denying summary judgment on claim brought pursuant to Chapter 541 of the Texas Insurance Code, which relied on *Section 1271.155*'s requirement to pay a fee for emergency services provided); *St. Michael's Emergency Ctr., LLC v. Aetna Health Mgmt., LLC., CV H-08-2336, 2011 U.S. Dist. LEXIS 155623, 2011 WL 12896736, at *10 (S.D. Tex. Aug. 22, 2011)* (denying summary judgment on claim seeking facility fees under *Section 1271.155* due to question as to whether plaintiff was a "hospital emergent facility or comparable facility" as defined by Texas law). The undersigned finds that Aetna has failed to demonstrate that as a matter of law that there is no private right of action available under *Section 1271.155(a) of the Texas Insurance Code*.

b) Tex. Ins. Code § 542.058

Section 542.058 of the Texas Insurance Code requires an insurer to promptly pay claims or pay damages as provided in *Section 542.060*. *Tex. Ins. Code. § 542.058(a)*. Aetna seeks dismissal of this claim on the basis that Victory is not a proper party to bring this claim. Aetna bases its argument for dismissal on the definition of "claim" set forth in *Section 542.051*, which provides that "claim" for purposes of the statute means "a first-party claim that (A) is made by an insured or policyholder under an insurance policy or contract or by a beneficiary named in the policy or contract; and (B) must be paid by the insurer directly to the insured or beneficiary." *Tex. Ins. Code § 542.051(2)*. Because Victory is not **[*45]** an insured, policyholder, or beneficiary, Aetna argues it cannot maintain a claim under *Section 542.058*. The undersigned disagrees.

The undersigned has already engaged in a thorough discussion of the assignments at issue in this case, which assigned to Victory all claims and causes of action against "any and all health plans" and specifically references the assignment of claims pursuant to common law or statute. (*See* Section III.A.i *supra*; Assignments [#14-1] at 2-3.) Aetna provides the Court with no additional authority not previously addressed in this report and recommendation as to why these assignments would not confer the right of Victory to pursue the statutory claims under the Texas Insurance Code previously belonging to plan participants. Finding that these assignments cover Victory's claim pursuant to *Section 542.058*, the undersigned recommends denying dismissal of this claim.

c) Tex. Ins. Code §§ 843.338, 1301.103

The *Texas Prompt Payment of Physicians and Providers Act* sets time standards for claim determinations, specifying how long health maintenance organizations and preferred provider benefit plans have to pay providers. *See Tex. Ins. Code § 843.338* (rules for HMOs) and *Tex. Ins. Code § 1301.103* (rules for preferred provider plan benefits). Aetna seeks dismissal of these claims on **[*46]** the basis that these claims fail as a matter of law because they do not apply to out-ofnetwork providers like Victory. Victory's Complaint states that its hospitals are "considered non-participating or out-of-network providers for purposes of this litigation," Compl. [#1] at ¶ 1, and Victory concedes the same in its response to Aetna's motion.

However, *Section 843.351* clarifies that the prompt payment provisions in this Chapter do apply to out-of-network providers in instances where those providers provide "care related to an emergency or its attendant episode." *Tex. Ins. Code § 843.351*; *N. Cypress Med. Ctr. Operating Co., Ltd., 781 F.3d at 198 n.76*. Victory argues that it only seeks prompt payment penalties for its emergency services. Aetna contends that Victory's Complaint fails to sufficiently allege that it maintains any emergency health facility or provides emergency care such that Victory would fall under this exception.

Victory argues that it provided a list of claims to Aetna which were incorporated by reference into its Complaint and that more than 470 of these claims are labeled "EMERGENCY ROOM" and represent a claim for emergency services. (Resp. [#14] at 11-12.) This list of claims has not been presented to the Court for its review, and the Court agrees with Aetna that Victory's **[*47]** Complaint does not contain any explicit factual allegations that Victory rendered emergency services or that Victory is an emergency facility, only that it is a group of medical centers and hospitals providing high-cost orthopedic surgeries. (Compl. [#1] at ¶1.) Nonetheless, Count 5 of Victory's Complaint does refer to the provision of emergency services in conjunction with its claims under the Texas Insurance Code, and the undersigned finds that it is plausible at the pleading stage that the Victory hospitals at issue had emergency departments and provided emergency services as part of their health care. (Compl. [#1] at ¶¶ 88-89.)

d) Tex. Ins. Code § 541.003

Finally, *Section 541.003 of the Texas Insurance Code* provides that "[a] person may not engage in this state in a trade practice that is defined in this chapter as or determined under this chapter to be an unfair method of competition or an unfair or deceptive act or practice in the business of insurance." The Texas Insurance Code "defines one such practice as a concerted or agreed-upon 'act of boycott, coercion, or intimidation that results in or tends to result in the unreasonable restraint of or a monopoly in the business of insurance.'" *Sanger Ins. Agency v. HUB Int'l, Ltd., 802 F.3d 732, 749 (5th Cir. 2015)* (citing *Tex. Ins. Code § 541.054*). Aetna seeks dismissal of this claim on the **[*48]** basis that Victory cannot rely on this provision as a means to complain about the mishandling of insurance claims. Victory responds that it has alleged that Aetna engaged in premeditated and calculated conduct to restrain trade by either forcing Victory into an in-network contract or out of business and that this conduct was consistent with Aetna's nationwide strategy regarding out-of-network providers. (Compl. [#1] at ¶¶ 4-5, 45-46). The undersigned agrees with Victory that these allegations could theoretically state a claim regarding an act of coercion with the potential to result in a monopoly in the business of insurance.[2]

v. Victory states plausible claims for promissory estoppel and negligent misrepresentation (Count 7).

---

[2] The undersigned notes, however, that the Fifth Circuit has recognized that the language of *Section 541.054* tracks the language of the "boycott, coercion, or intimidation" exemption contained in the McCarran—Ferguson Act, and has held that the two laws "should be interpreted in harmony." *Sanger Ins. Agency, 802 F.3d at 749*. The *McCarran-Ferguson Act* is a reverse preemption clause, aimed at restoring the primacy of the states in regulating insurance by providing that general federal laws not directed at insurance do not invalidate or supersede state law governing insurance. *15 U.S.C. § 1012(b)*; *Sanger, 802 F.3d at 741*. The Act contains an exemption for federal ***antitrust law***, which remains applicable to any "act of boycott, coercion, or intimidation." *15 U.S.C. § 1013(b)*.

A boycott for purposes of the McCarran—Ferguson Act exemption occurs where, in order to coerce a target into certain terms on one transaction, parties refuse to engage in other unrelated transactions with the target. *See* *Hartford Fire Ins. v. California, 509 U.S. 764, 803-04, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993)*. It is not a boycott within the meaning of the exemption where the challenged conduct is not concerted activity, i.e., it is only undertaken by individual actors. *Sanger Ins. Agency, 802 F.3d at 746* (citing *St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 555, 98 S. Ct. 2923, 57 L. Ed. 2d 932 (1978))*. Although the parties have not addressed this case law in their brief, it appears Victory's claim may be barred because it does not involve an allegation that Aetna acted in concert with another entity.

Victory's claims for promissory estoppel and negligent misrepresentation allege that before scheduling any non-emergent procedure for Aetna members, Victory contacted Aetna to confirm whether coverage was available and to obtain specific coverage details. (Compl. [#1] at ¶¶ 94-103.) According to Victory, Aetna's representatives falsely confirmed coverage and then denied or underpaid claims to Victory's detriment. To succeed on a promissory estoppel cause of **[*49]** action, a plaintiff must show: (1) a promise, (2) foreseeability of reliance thereon by the promisor, and (3) substantial reliance by the promisee to his detriment. *English v. Fischer, 660 S.W.2d 521, 524 (Tex. 1983)*.

Aetna seeks dismissal of Victory's claims of promissory estoppel on the basis that these claims are barred due to the existence of an express contract that covers the parties' dispute, i.e., the health benefit plans issued by Aetna to its members, and that Victory fails to allege any promise made outside of the contract. Aetna is correct that a claim of promissory estoppel is "utterly displaced" in light of a valid contract between the parties covering the alleged promise. *Gil Ramirez Grp., L.L.C. v. Houston Indep. Sch. Dist., 786 F.3d 400, 414 (5th Cir. 2015)*. However, the contract identified by Aetna here is between the plan members and Aetna, not Victory, and Victory's Complaint plainly states that it brings this claim not as assignee of the plan members but as a third-party provider in its own right. (Compl. [#1] at ¶ 95.) Victory, as an out-of-network provider, alleges it did not have access to the health plan contracts between its patients and Aetna and was not a party to any other contract with Aetna. Victory's promissory estoppel claims concern promises made directly to Victory by Aetna representatives **[*50]** and alleges that Aetna supplied misinformation regarding coverage confirmation and that Victory relief on this information to its detriment. The undersigned finds that these allegations state a plausible claim for promissory estoppel separate and apart from any claim that plan members would have had based on a failure to pay under the contract. *See* *Mid-Town Surgical Ctr., L.L.P., 16 F. Supp. 3d at 781-82* (denying motion to dismiss promissory estoppel claim seeking to enforce alleged oral promise by Humana to pay healthcare provider for medical procedures at a certain rate); *but see* *Fustok v. UnitedHealth Grp., Inc., No. 12-cv-787, 2012 U.S. Dist. LEXIS 200455, 2012 WL 12937486, at *5 (S.D. Tex. Sept. 6, 2012)* (dismissing promissory estoppel claim because "preapprovals" did not waive United's right to evaluate the claim when it was later submitted for reimbursement and it was unreasonable for plaintiff to assume payment was guaranteed).

To succeed on a claim for negligent misrepresentation the plaintiff must prove that: (1) the defendant in the course of his business or a transaction in which he had an interest; (2) supplied false information for the guidance of others; (3) without exercising reasonable care or competence in communicating the information; (4) the plaintiff justifiably relied on the information; (5) **[*51]** proximately causing the plaintiff's injury. *Kastner v. Jenkens & Gilchrist, P.C., 231 S.W.3d 571, 577 (Tex. App.—Dallas 2007, no pet.)*. Victory also sufficiently pleads this claim. Victory alleges that Aetna falsely confirmed coverage; that based on these representations, Victory provided services to Aetna members; and that Victory's reliance upon Aetna's coverage promises was detrimental to Victory's business operations and cash flow. (Compl. [#1] at ¶¶ 98-101.) These allegations are also sufficient to satisfy *Rule 8*'s notice pleading standard. *See* *Mid-Town Surgical Ctr., L.L.P., 16 F. Supp. 3d at 782-83* (denying motion to dismiss negligent misrepresentation claim where healthcare provider alleged reliance on false verification from Humana as to preauthorization and coverage); *but see* *Innova Hosp. San Antonio, L.P. v. Cross & Blue Shield of Ga., Inc., 995 F. Supp. 2d 587, 605 (N.D. Tex. 2014)* (dismissing negligent misrepresentation claim on basis that pleadings were not sufficient to infer that the information supplied was false and that Defendant did not exercise reasonable care or competence in communicating the information)

vi. Victory sufficiently alleges exemplary damages, but its claim for statutory penalties under ERISA should be dismissed in part insofar as Victory relies on a theory of Aetna as *de facto* administrator of fully-funded plans.

Aetna seeks dismissal of Victory's claim for exemplary damages on the basis that the only claim **[*52]** that supports the recovery of exemplary damages is Victory's claim of negligent misrepresentation and that claim, according to Aetna, should be dismissed as a matter of law for the reasons already discussed and rejected. The undersigned has already discussed its reasons for recommending denial of Aetna's motion to dismiss as to Victory's claim of negligent misrepresentation. If the Court agrees with this recommendation, and Victory's negligent misrepresentation claim remains in this suit, the Court should also deny Aetna's motion to dismiss as Victory's claim for exemplary damages.

Victory also pleads certain ERISA penalties under *29 U.S.C. § 1132(c)(1)*, which subjects an ERISA "administrator" who fails to supply requested information to a plan participant to penalties in the amount of $100 a day from the date of such refusal. Aetna asks the Court to dismiss this claim on the basis that the Complaint fails to sufficiently allege that Aetna is an "administrator" for purposes of this section or that a written request for plan information was ever made. *ERISA Section 3(16)(A)* defines "administrator" as: "(i) the person specifically so designated by the terms of the instrument under which the plan is operated; (ii) if an administrator **[*53]** is not so designated, the plan sponsor; or (iii) in the case of a plan for which an administrator is not designated and a plan sponsor cannot be identified, such other person as the Secretary may by regulation prescribe." *29 U.S.C. § 1002(16)(A)*.

The Court is required to accept the well-pleaded allegations in a plaintiff's complaint as true for purposes of ruling on a motion to dismiss. *Martin K. Eby Const. Co., 369 F.3d at 467*. Victory's Complaint alleges that Aetna is the plan administrator as to self-funded plans and it is the *de facto* administrator for the fully-funded plans which Aetna insures. (Compl. [#1] at ¶¶ 26, 62.) However, during the pendency of Aetna's motion, the Fifth Circuit issued its opinion in *Conn. Gen. Life Ins. Co. v. Humble Surgical Hosp., L.L.C., 878 F.3d 478, 2017 WL 6460150 (Dec. 19, 2017)*, which squarely rejected the theory that a *de facto* plan administrator could be subject to *Section 502(c)* penalties and held that the statutory penalty only applies to named plan administrators. *878 F.3d 478, at [WL] *5* (reversing a district court's award of *Section 502(c)* penalties against Cigna based on its conduct and admissions, despite the fact that it was not a named plan administrator). Accordingly, the undersigned will recommend that the Court grant Aetna's motion to dismiss as to Victory's claim for statutory penalties under *Section 502(c)* with respect to the fully-funded plans which Aetna insures **[*54]** but recommend denying dismissal as to the self-funded plans in which Victory alleges Aetna is the designated plan administrator.

Finally, the undersigned also rejects Aetna's argument that Victory failed to adequately plead the failure to provide plan documents for purposes of its claim for ERISA's statutory penalty. Victory alleges that it requested both plan and plan associated documents on claims; Aetna refused to provide these documents in the normal course of business; and Victory did not receive any documents until Aetna produced a handful of plans through the bankruptcy process. (Compl. [#1] at ¶ 63.) These allegations are sufficient to state a plausible claim for relief under *Rule 8*, and the undersigned will recommend denial of the motion to dismiss on this ground.

III. Conclusion and Recommendation

Having considered Victory's Complaint in light of the arguments raised in Aetna's motion, as well as the response and reply thereto, the undersigned recommends that Defendants' Motion to Dismiss Plaintiffs' Complaint and Brief in Support [#5] be **GRANTED IN PART** as follows:

- Victory's claim for breach of fiduciary duty and other procedural violations under *Section 502(a)(3) of ERISA* (Counts 2, 3, and 4) should be **[*55]** dismissed.

- Victory's claim to recover statutory penalties under *Section 502(c) of ERISA* should be dismissed insofar as Victory relies on a theory of Aetna as *de facto* administrator.

In all other respects, the undersigned recommends that the motion be **DENIED**.

IV. Instructions for Service and Notice of Right to Object/Appeal.

The United States District Clerk shall serve a copy of this report and recommendation on all parties by either (1) electronic transmittal to all parties represented by attorneys registered as a "filing user" with the clerk of court, or (2) by mailing a copy to those not registered by certified mail, return receipt requested. Written objections to this report and recommendation must be filed **within fourteen (14) days** after being served with a copy of same, unless this time period is modified by the district court. *28 U.S.C. § 636(b)(1)*; *Fed. R. Civ. P. 72(b)*. The party shall file the objections with the clerk of the court, and serve the objections on all other parties. A party filing objections must specifically identify those findings, conclusions or recommendations to which objections are being made and the basis for such objections; the district court need not consider frivolous, conclusive or general objections. A party's failure **[*56]** to file written objections to the proposed findings, conclusions and recommendations contained in this report shall bar the party from a *de novo* determination by the district court. *Thomas v. Arn, 474 U.S. 140, 149-52, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)*; *Acuna v. Brown & Root, Inc., 200 F.3d 335, 340 (5th Cir. 2000)*. Additionally, failure to file timely written objections to the proposed findings, conclusions and recommendations contained in this report and recommendation shall bar the aggrieved party, except upon grounds of plain error, from attacking on appeal the unobjected-to proposed factual findings and legal conclusions accepted by the district court. *Douglass v. United Servs. Auto. Ass'n, 79 F.3d 1415, 1428-29 (5th Cir. 1996)* (en banc).

SIGNED this 19th day of January, 2018.

LexisNexis® Headnotes

Evidence > Judicial Notice > Adjudicative Facts > Public Records

HN1[] **Adjudicative Facts, Public Records**

The court may take judicial notice of matters of public record as long as the facts noticed are not subject to reasonable dispute. Matters of public record that may be judicially noticed include records and reports of administrative bodies, and documents filed with courts, both within and without the federal judicial system, if those proceedings have a direct relation to the matters at issue.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) allows a court to dismiss a complaint for failure to state a claim upon which relief can be granted. Such a dismissal is proper based on the lack of a cognizable legal theory or the absence of sufficient facts alleged. In resolving a *Rule 12(b)(6)* motion, the court accepts as true all well-pleaded allegations of material fact, and construes them in the light most favorable to the non-moving party. But a formulaic recitation of the elements of a cause of action will not defeat a motion to dismiss. The complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. This tenet—that the court must accept as true all of the allegations contained in the complaint—is inapplicable to legal conclusions. Accordingly, threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

The plausibility standard asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief. Determining plausibility is a context-specific task that requires the reviewing court to draw on its judicial experience and common sense. And in analyzing these principles in the antitrust context, Twombly recognized that proceeding to antitrust discovery can be expensive, and reiterated that a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > Conspiracy to Monopolize

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Although Twombly did not impose a heightened pleading standard for antitrust conspiracy cases, in this context allegations of facts that could just as easily suggest rational, legal business behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws. And so, when considering plausibility, courts must also consider an obvious alternative explanation, for defendant's behavior.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) review is generally limited to the contents of the complaint. Nevertheless, courts may consider certain materials—documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial notice—without converting the motion to dismiss into a motion for summary judgment. Courts may also take into account documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the plaintiff's pleading.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN6[] **Amendment of Pleadings, Leave of Court**

When a complaint is dismissed, the court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not be cured by the allegation of other facts. Leave to amend is properly denied, however, if amendment would be futile.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN7[] Actual Monopolization, Claims

A Sherman Act § 2 monopolization claim has three essential elements: (a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury. Similarly, to state a claim for attempted monopolization, the plaintiff must allege facts that, if true, will prove: (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. And to prove a conspiracy to monopolize in violation of § 2, a plaintiff must show four elements: (1) the existence of a combination or conspiracy to monopolize; (2) an overt act in furtherance of the conspiracy; (3) the specific intent to monopolize; and (4) causal antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN8[] Conspiracy to Monopolize, Elements

Motivation to enter a conspiracy is never enough to establish a traditional conspiracy.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[] Standing, Requirements

To establish an antitrust injury, a plaintiff must allege facts that show (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent. The inquiry focuses on injury to competition not competitors. Where the defendant's conduct harms the plaintiff without adversely affecting competition generally, there is no antitrust injury. This requirement stems from the principle that the antitrust laws' prohibitions focus on protecting the competitive process and not on the success or failure of individual competitors.

Business & Corporate Compliance > ... > Energy & Utilities Law > Cogeneration & Independent Companies > Public Utility Regulatory Policies Act

HN10[] Cogeneration & Independent Companies, Public Utility Regulatory Policies Act

The federal Public Utility Regulatory Policies Act (PURPA) was enacted in 1978, among other reasons, to ensure sustained long-term economic growth by shifting the nation's reliance on oil and gas to more abundant domestically produced fuels. To support development of non-traditional generating facilities, PURPA and its implementing regulations require electric utilities (a) to sell electric energy and capacity to qualifying facilities upon request, (b) to purchase electric energy and capacity from qualifying facilities and (c) to make all necessary interconnections with any qualifying facility in order to accomplish the aforementioned purchases and sales provided that each qualifying facility pay its share of the interconnection costs. PURPA's regulations mandate that an electric utility offer a qualifying facility built after the enactment of PURPA a purchase rate equal to, but no more than, the utility's full avoided costs.

Business & Corporate Compliance > ... > Energy & Utilities Law > Cogeneration & Independent Companies > Public Utility Regulatory Policies Act

HN11[] Cogeneration & Independent Companies, Public Utility Regulatory Policies Act

While the federal *Public Utility Regulatory Policies Act (PURPA)* was not intended to protect utilities from the reach of the antitrust laws, neither was it meant to create antitrust liability where none existed previously. In short, *PURPA* was designed to be antitrust-neutral.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN12[] Conspiracy to Monopolize, Sherman Act

The *Sherman Act* does not attack every monopoly. That is, the antitrust laws tolerate both efficient monopolies and natural monopolies. Government regulation, as opposed to treble damages and criminal liability under the *Sherman Act*, is generally thought to be the appropriate remedy for difficulties posed by natural monopolies.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

HN13[] Private Actions, Standing

The structure of a regulated industry may create a lack of antitrust standing. The comprehensive regulatory framework significantly restricts the nature of the competition which is permitted.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN14[] Sherman Act, Claims

To state a claim of alleged violations of *§ 1 of Sherman Act*, *15 U.S.C.S. § 1*, which prohibits conspiracies in restraint of trade or commerce, a plaintiff must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition. And allegations of facts that could just as easily suggest rational, legal business behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN15[] Sherman Act, Claims

Antitrust injury is required for both a *Sherman Act § 1* claim and a *§ 2* claim. Stated differently, causal antitrust injury is an element of all antitrust suits brought by private parties seeking damages under *Section 4 of the Clayton Act*, *15 U.S.C.S. § 15(a)*.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN16[] **Standing, Requirements**

Termination of a higher priced supplier, without more, is not antitrust injury. The threat of loss of profits due to possible price competition following a merger does not constitute a threat of antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN17[] **Conspiracy to Monopolize, Elements**

To allege an agreement between antitrust co-conspirators, the complaint must allege facts such as a specific time, place, or person involved in the alleged conspiracies to give a defendant seeking to respond to allegations of a conspiracy an idea of where to begin.

Antitrust & Trade Law > Sherman Act > Claims

HN18[] **Sherman Act, Claims**

Antitrust claims must make economic sense.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Supplemental Jurisdiction

HN19[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

In the usual case in which all federal-law claims are eliminated before trial, the balance of factors will point toward declining to exercise jurisdiction over the remaining state-law claims. However, the court cannot exercise its discretion under *28 U.S.C.S. § 1367(c)* until it has dismissed all claims over which it has original jurisdiction.

Opinion

AMENDED ORDER GRANTING IN PART DEFENDANTS NEXTERA ENERGY, INC.'S AND HAMAKUA ENERGY PARTNERS, L.P.'S MOTIONS TO DISMISS, ECF NOS. 73 & 95, WITH LEAVE TO AMEND

I. INTRODUCTION

Plaintiff Hu Honua Bioenergy, LLC ("Hu Honua") contracted with Defendant Hawaii Electric Light Company, Inc. ("HELCO") to build an independent power plant run on biomass to supply energy to HELCO on the Big Island of Hawaii. Given problems with the construction contractor and other labor issues, Hu Honua was unable to complete the facility on time. After unsuccessful negotiations to extend deadlines, HELCO cancelled the contract.

Hu Honua filed this suit contending that HELCO's cancellation was, among other things, the result of an illegal conspiracy in violation of antitrust laws. **[*3]** The suit alleges federal antitrust and related state-law claims against HELCO; Hawaiian Electric Company, Inc. ("HECO"); Hawaiian Electric Industries, Inc. ("HEI"); NextEra Energy, Inc. ("NextEra"); and Hamakua Energy Partners, L.P. ("HEP"). It also alleges that HELCO breached the contract by refusing to extend deadlines under the contract's terms.

The court now addresses Motions to Dismiss brought by NextEra and HEP under *Federal Rule of Civil Procedure 12(b)(6)*. ECF Nos. 73, 95. Based on the following, the Motions are GRANTED in part. The federal antitrust claims are DISMISSED as to NextEra and HEP, with leave to amend. The Motions are DENIED without prejudice as to the state-law claims against NextEra and HEP. Hu Honua may file a Second Amended Complaint by January 29, 2018.[1]

II. BACKGROUND

A. Factual Background

Hu Honua's 96-page First Amended Complaint ("FAC"), ECF No. 27, describes the structure of the electric utility market in Hawaii —in particular, on the island of Hawaii (the Big Island)—and alleges in detail a scheme (although ultimately deficiently, at least as to its antitrust claims) whereby HELCO's cancellation of the contract not only breached certain of its terms but was also part of a conspiracy or conspiracies **[*4]** among NextEra, HEP and the other Hawaiian Electric Defendants[2] to monopolize or restrain trade in violation of antitrust laws.

---

[1] This Order amends and supersedes the court's December 19, 2017 Order regarding NextEra's and HEP's Motions to Dismiss to add minor changes as reflected in the court's concurrently-filed Order (1) Granting In Limited Part Plaintiff Hu Honua Bioenergy, LLC's First Amended Motion for Reconsideration or Clarification, ECF No.133; and (2) Amending December 19, 2017 Order.

[2] The court sometimes refers to HELCO, HECO, and HEI collectively as the "Hawaiian Electric Defendants."

After suit was filed, Hu Honua and the Hawaiian Electric Defendants reached a settlement in conjunction with a renegotiated contract for Hu Honua to complete its biomass power plant. ECF No. 122. Consummation of that settlement is awaiting final completion of the approval process involving the Hawaii Public Utilities Commission ("PUC").[3] Perhaps because of that settlement, the Hawaiian Electric Defendants have not moved to dismiss the FAC. (Earlier, they filed a motion seeking to compel arbitration, but asked the court to hold that motion in abeyance, pending consummation of the settlement, ECF No. 126). Because only NextEra and HEP have moved to dismiss, the court focuses on setting forth the essential factual allegations against them. That is, the court need not (and does not) reiterate all the details alleged in the lengthy FAC as to the Hawaiian Electric Defendants, but describes those facts necessary to put the claims against NextEra and HEP into proper context. And some of the relevant factual allegations are set forth later, in the appropriate discussion **[*5]** sections analyzing particular claims. For present purposes, the court assumes as true any well-pleaded factual allegations set forth in the FAC.

1. The Basic Structure of the Electric Utility Market in Hawaii

Unlike on the continental United States—where states and utilities may utilize large interconnected, interstate power grids comprised of high-voltage transmission lines —each island in the State of Hawaii has its own isolated grid and power supplies. FAC ¶¶ 14-16. HECO is such an electric utility providing electricity to consumers on the island of Oahu; likewise, HELCO is the electric utility providing electricity to the Big Island. *Id.* ¶ 17. (Although not a defendant, Maui Electric Company ("MECO") powers the islands of Maui, Lanai, and Molokai. *Id.*[4]) HEI is a holding company, with HECO as one of its subsidiaries. In turn, HELCO and MECO are subsidiaries of HECO. *Id.* ¶¶ 3-5.

Power supplied to electric utilities (which utilities then provide to retail consumers) is divided into two basic categories: "firm power" and "intermittent power." *Id.* ¶ 18. "Firm power" (generated by fossil fuels, geothermal, biomass, and similar sources) is power that is intended always to be available **[*6]** during "the period covered by a guaranteed commitment to deliver." *Id.* In contrast, "intermittent" power consists of sources such as wind or solar that are not always available, "with output controlled by the natural variability of the energy resource rather than power dispatched based on system requirements." *Id.*

Much of Hawaii's power currently comes from fossil fuels. "77% of Hawaii's electricity is generated by petroleum, making the State's utility the most oil dependent in the country. All of the petroleum consumed in the State is generated from crude oil imported from South East Asia and other off-shore locations." *Id.* ¶ 11. And so, "[t]o mitigate the risk of dependence on foreign fuel sources, the Hawaii state government policies and legislation have sought to place greater emphasis on the development of renewable energy resources[.]" *Id.* ¶ 13. "[I]n June 2015, the Hawaii Legislature amended Hawaii's Renewable Portfolio Standard statute to require Hawaii to move towards achievement of 100% renewable energy by 2045." *Id.*

HELCO serves approximately 85,000 customers on the Big Island. *Id.* ¶ 21. "HELCO currently owns fossil fuel plants that generate in excess of 65% of the [Big] Island's **[*7]** dispatchable firm electrical capacity." *Id.* Specifically, it "owns and operates six oil-fired power generation plants, accounting for 184 MW [(megawatts)] of firm power capacity[.]" *Id.* ¶ 28. "In addition to its own fossil fuel plants, HELCO purchases firm power generation capacity [and electrical energy] from HEP, which owns a 60 MW fossil-fuel combined cycle power plant, pursuant to a 1997 Power Purchase Agreement." *Id.* ¶ 22. "HEP is one of only two independent power producers ('IPPs') on the Island of Hawaii that provides firm power generating capacity." *Id.* ¶ 23. The other is Puna Geothermal Venture "whose power capacity is 34.6 MW, only part of which is firm." *Id.*

"HELCO is compensated differently for the power that it generates itself through the power plants that it owns versus the power that it purchases from IPPs." *Id.* ¶ 32. "In fact, as a result of HELCO's ability to recover its capital costs, and an annual fixed rate of return on those costs, HELCO receives more revenue through the rates paid by

---

[3] The PUC has approved the renegotiated contract, and construction of the facility is ongoing, although the final settlement with the Hawaiian Electric Defendants is awaiting disposition of a related state-court appeal of the PUC-approval. *See* ECF No. 122.

[4] The island of Kauai is served by Kauai Island Utility Cooperative, which is an entity not related to any of the Defendants.

its customers for the sale of power that HELCO generates from running its own units than from the power it purchases from IPPs." *Id.*

"In Hawaii, IPPs must sell power to a public utility **[*8]** because Hawaii's utilities have not permitted the use of their grids for the 'wheeling' or transmission of power to power purchasers, and because it would be economically impractical for IPPs to build their own transmission and distribution system." *Id.* ¶ 24. "As a result, HELCO is not only the monopoly retail seller of electricity on the Island of Hawaii, but also the monopoly owner of electricity transmission and distribution infrastructure and monopoly purchaser of wholesale electricity." *Id.*

2. The Hu Honua Power Purchase Agreement

In May 2012, Hu Honua entered into a Power Purchase Agreement for Renewable Dispatchable Firm Energy and Capacity ("the Hu Honua PPA" or "the Contract") with HELCO under which Hu Honua would develop an independent power plant on the Hamakua Coast of the Big Island, with a renewable biomass fuel source (e.g., eucalyptus trees) of firm power. *Id.* ¶¶ 1, 34, 38. "The trees were to be 100% locally grown and harvested on a sustainable rotational basis and would have provided an important means to reduce Hawaii's dependence on imported fossil fuels." *Id.* ¶ 34.

Hu Honua's power plant would supply HELCO with "no less than 10 MW of electricity capacity at all times," **[*9]** with the facility having a "maximum 'Available Capacity' of approximately 30 net MW." *Id.* ¶ 46. Hu Honua began construction in late October 2012, but was unable to complete the facility by the end of 2015, as contemplated by the Hu Honua PPA, because of disputes with its construction contractor, labor union issues, and related litigation. *Id.* ¶ 51, 58.[5] After unsuccessful negotiations between Hu Honua and HELCO to extend milestone dates as provided in the Hu Honua PPA (where milestone-date extension requests "shall not be unreasonably withheld," *id.* ¶ 42), HELCO cancelled the Contract on March 1, 2016. *Id.* ¶ 60.

3. NextEra's Proposed Merger with HEI, and HELCO's Proposed Purchase of HEP's Power Plant

Meanwhile, two other relevant things happened: First, "the proposed merger" —on December 3, 2014, NextEra, which is a large Florida-based utility holding company, and HEI entered into an Agreement and Plan of Merger (the "NextEra/HEI Merger Agreement" or "Merger Agreement") under which HEI subsidiaries HELCO and HECO would become wholly-owned subsidiaries of NextEra. *Id. ¶¶ 6, 52*.[6] And second, "the proposed purchase" —on December 23, 2015, HECO and HELCO publicly disclosed that HELCO would **[*10]** purchase HEP's 60 MW fossil-fuel power plant for over $88 million. *Id. ¶¶ 22, 91*.[7]

---

[5] HEP provides a listing from Hawaii state court records of "28 different legal actions against Hu Honua during this time period, including one that resulted in Hu Honua losing control of the facility until it paid a stipulated judgment." ECF No. 95-1, Mem. at 8-9 (citing Egesdal Decl., Ex. D, ECF No. 95-6). Although the court has not reviewed the substance of these actions, the court takes judicial notice of the existence and number of state court actions. *Lee v. City of L.A., 250 F.3d 668, 689 (9th Cir. 2001)*. And, according to the FAC, "Hu Honua's disputes with its former construction contractor and the labor union jurisdiction dispute caused an irretrievable loss of time . . . [such that] Hu Honua realized that it would not be able to achieve two milestone[] dates set forth in the PPA[.]" FAC ¶ 58.

[6] The Merger Agreement required approval by the PUC. But after several months of hearings, the PUC rejected the Merger Agreement on July 15, 2016. *See, e.g.*, Kathryn Mykleseth, *PUC Rejects NextEra's Purchase of Hawaiian Electric, Honolulu Star-Advertiser*, July 15, 2016 (*available at* http://www.staradvertiser.com/2016/07/15/business/business-breaking/puc-rejects-nexteras-purchase-of-hawaiian-electric/(last visited Dec. 15, 2017).

[7] On May 4, 2017, the PUC rejected HELCO and HECO's application to approve the purchase of HEP's facility. *See* Egesdal Decl., Ex. B., ECF No. 95-4 (*In re Hawaiian Electric Co. (Hawaii P.U.C. May 4, 2017) (Decision and Order No. 34536), 2017 Haw. PUC LEXIS 236*). The court takes judicial notice of publicly-available decisions of the PUC. *See, e.g., Bartolotti v. Maui Mem'l Med. Ctr., 2015 U.S. Dist. LEXIS 98121, 2015 WL 4545818, at *3 (D. Haw. July 28, 2015)* (***HN1***[] "The court may 'take

"Article V of the Merger Agreement addresses certain issues relating to HECO's conduct of its and its subsidiaries' business during the pendency of the merger. Among other things, Article V prohibited HECO from engaging in several activities without NextEra's prior consent." *Id. ¶ 56*. Specifically, "§ 5.01(a)(xii) provides that HECO/HELCO shall not:

(1) enter into, terminate or amend in any material respect any material Contract,
(2) consent to any extension or continuation of any material Contract . . . or
(3) waive any material right on any material Contract[.]"

FAC ¶ 56.[8] Based on this consent provision, Hu Honua alleges that NextEra "exercised total control over HECO's/HELCO's conduct of their important business actions and material agreements, including the fate of Hu Honua's PPA." *Id.*

As for HELCO's proposed purchase of the HEP power plant, Hu Honua alleges that its biomass facility "would have been a direct competitor to the HEP Power Plant in the supply of wholesale electricity capacity to HELCO." *Id. ¶ 90*. Hu Honua alleged "[o]n information and belief, HELCO planned to acquire the HEP Power Plant in order to further HELCO's strategy to increase its monopoly over power generation on the Island of Hawaii." *Id. ¶ 92*. "On information and belief, HELCO favors its own power generation instead of purchasing power from Hu Honua, because HELCO generates more profit by owning its own power generation." *Id.* And, as for HEP's motivation, it alleges that

> HEP had its own reasons for wanting the Hu Honua PPA terminated. As early as 2012, HEP recognized that the proposed Hu Honua Facility was a direct competitive threat. On September 19, 2012, it filed a motion to intervene in the Commission's **[*12]** docket for HELCO's Application for Approval of the Hu Honua PPA, which it vigorously opposed on the grounds that "[t]he introduction of the proposed Hu Honua plant would, according to [the] HELCO plan outlined in its application, reduce the HEP Plant's dispatch." In sum, HEP, as the operator of the largest power plant on the Island, attempted unsuccessfully to exclude Hu Honua as a competitor in the power generation market. It was presented with another opportunity three years later to accomplish that objective. Hu Honua is informed and believes, and on that basis alleges, that HEP participated in and supported the termination of Hu Honua's PPA, as alleged [in the FAC].

Id. ¶ 99.[9]

4. Hu Honua Files This Action

---

judicial notice of 'matters of public record[,]' 'as long as the facts noticed are not 'subject to reasonable dispute.'") (quoting *Intri—Plex Techs., Inc. v. Crest Grp., Inc., 499 F.3d 1048, 1052 (9th Cir. 2007))*; *id.* ("'Matters of public record that may be judicially noticed include records and reports of administrative bodies,' and documents filed with courts, 'both within and without the federal judicial system, if those proceedings have a direct relation to the matters at issue.'") (quoting *Barron v. Reich, 13 F.3d 1370, 1377 (9th Cir. 1994)* & *United States v. Borneo, Inc., 971 F.2d 244, 248 (9th Cir. 1992))*.

[8] Paragraph 5.01(a) of the Merger Agreement also provides that such consent "shall not be unreasonably withheld, conditioned or delayed." ECF No. 73-3 at 5, Merger Agreement at 38. And Paragraph 5.01(c) reads in part:

> No Control of [HEI's] Business. [NextEra] acknowledges and agrees that (i) nothing contained in this Agreement is intended to give [NextEra], directly or indirectly, the right to control or **[*11]** direct the operations of [HEI] or an [HEI] Subsidiary prior to the Effective Time and . . . prior to the Effective Time, [HEI] shall exercise, consistent with the terms and conditions of this Agreement, complete control and supervision over its and [HEI's] Subsidiaries' respective operations.

ECF No. 73-3 at 10, Merger Agreement at 43.

[9] HEP challenges the FAC's allegation that it "vigorously opposed" Hu Honua's application, pointing to a public document (a 2012 "Statement of Position" before the Hawaii PUC) stating in part: "HEP does not take a position as to the prudence of approving the power purchase agreement. . . . Rather, HEP's position is that if the Commission *does* approve the Hu Honua PPA, it should not do so without requiring that HELCO adequate[ly] consider and plan to deal with the excess generating capacity that the Hu Honua asset would add[.]" Egesdal Decl. Ex. D at 2, ECF No. 95-3 at 3.

After HELCO cancelled the Hu Honua PPA in March of 2016 (and after the PUC rejected the proposed NextEra/HEI Merger Agreement in July 2016), Hu Honua filed the original Complaint in this action on November 30, 2016, ECF No. 1. It filed the FAC on January 27, 2017, ECF No. 27, alleging the following counts:

- Count One —Violation of *Section Two of the Sherman Act*, *15 U.S.C. § 2* (attempted monopolization, conspiracy to monopolize, and monopolization) against the Hawaiian Electric Defendants **[*13]** and NextEra;

- Count Two —Violation of *Section One of the Sherman Act*, *15 U.S.C. § 1* (conspiracy to restrain trade) against all Defendants;
- Count Three —Breach of Contract against HELCO;
- Count Four —Promissory Estoppel against HELCO;
- Count Five —Breach of the Covenant of Good Faith and Fair Dealing against HELCO;
- Count Six —Breach of Fiduciary Duty against HELCO;
- Count Seven —Tortious Interference with Contract against NextEra;
- Count Eight —Unfair Competition in Violation of HRS Chapter 480 against All Defendants;
- Count Nine —Declaratory Relief against HELCO; and
- Count Ten —Conversion against HELCO.

FAC at 69-93. Hu Honua claims it was damaged "in the amount of its investment of $120 million in the plant, plus lost profits of $435 million." *Id. ¶ 1*. It seeks treble damages and attorney fees, among other injunctive relief. *Id.* at 94-95.

Hu Honua alleges that HELCO's cancellation of the Hu Honua PPA was illegal under the *Sherman Act* in two ways. First, it alleges that, in conjunction with the proposed Merger Agreement, NextEra conspired with Hawaiian Electric Defendants to monopolize the market for wholesale firm power on the Island of Hawaii, in violation of *15 U.S.C. § 2*. FAC ¶¶ 135-55. Second, it alleges that HEP (with the proposed **[*14]** purchase by HELCO of HEP's power plant), NextEra and the Hawaiian Electric Defendants conspired to restrain trade in the market for wholesale firm power on the Big Island, in violation of *15 U.S.C. § 1*. *Id. ¶¶ 156-65*.

B. Procedural History

On February 16, 2017, the Hawaiian Electric Defendants filed a Motion to Compel Arbitration, ECF No. 33, which was set for hearing on May 22, 2017. But on May 12, 2017, the Hawaiian Electric Defendants notified the court of the preliminary settlement between them and Hu Honua, and the hearing was continued until August 7, 2017, to allow the Hawaii PUC to consider the renegotiated Hu Honua PPA. ECF No. 76, 77.

NextEra filed its Motion to Dismiss on May 3, 2017, ECF No. 73, and HEP filed its Motion on June 2, 2017, ECF No. 95. The Motions were also set for hearing on August 7, 2017. (Discovery has been stayed pending a ruling on these Motions. ECF Nos. 59, 105.) Hu Honua filed its Oppositions on July 17, 2017, ECF Nos. 108-09, and Replies were filed on July 24, 2017, ECF Nos. 112-13. On July 17, 2017, the Hawaiian Electric Defendants filed short joinders in both Motions to Dismiss. ECF Nos. 106-07.

The August 7, 2017 hearing was continued to allow further time for **[*15]** PUC approval of the renegotiated Hu Honua/HELCO PPA, ECF Nos. 115, 117, and was later rescheduled for November 6, 2017, upon request by the parties. ECF No. 119. The court then granted a request to hold the Hawaiian Electric Defendants' Motion to Compel Arbitration in abeyance, pending finalization of the settlement, ECF No. 126.[10] The court, however, proceeded to hear the Motions to Dismiss on November 6, 2017.

---

[10] Given the pending settlement between Hu Honua and the Hawaiian Electric Defendants, the court is likewise deferring ruling on the joinders by Hawaiian Electric Defendants. For administrative purposes, as discussed at the November 6, 2017 hearing, the joinders are DENIED as MOOT without prejudice. ECF No. 127.

III. STANDARD OF REVIEW

A. *Rule 12(b)(6)*'s Plausibility Standard

HN2[] *Federal Rule of Civil Procedure 12(b)(6)* allows a court to dismiss a complaint for "failure to state a claim upon which relief can be granted." Such a dismissal is proper "'based on the lack of a cognizable legal theory or the absence of sufficient facts alleged.'" *UMG Recordings, Inc. v. Shelter Capital Partners, LLC, 718 F.3d 1006, 1014 (9th Cir. 2013)* (quoting *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1988))*.

In resolving a *Rule 12(b)(6)* motion, the court "accept[s] as true all well-pleaded allegations of material fact, and construe[s] them in the light most favorable to the non-moving party." *Sateriale v. R.J. Reynolds Tobacco Co., 697 F.3d 777, 784 (9th Cir. 2012)* (quoting *Daniels-Hall v. Nat'l Educ. Ass'n, 629 F.3d 992, 998 (9th Cir. 2010))*. But a "formulaic recitation of the elements of a cause of action" will not defeat a motion to dismiss. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. The complaint "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). This tenet —that the court must accept as true all of the allegations **[*16]** contained in the complaint —"is inapplicable to legal conclusions." *Id.* Accordingly, "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.* (citing *Twombly, 550 U.S. at 555*).

B. The Antitrust Context

HN3[] "The plausibility standard . . . asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* "Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility of entitlement to relief.'" *Id.* (quoting *Twombly, 550 U.S. at 557*). Determining plausibility is "a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id. at 679* (citation omitted). And in analyzing these principles in the *antitrust* context, *Twombly* recognized that "proceeding to antitrust discovery can be expensive," *550 U.S. at 558*, and reiterated that "a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed." *Id.* (quoting *Associated Gen. Contractors of Cal., Inc. v. Carpenters, 459 U.S. 519, 528 n.17, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*.

Thus, ***HN4***[] although *Twombly* did not impose a heightened pleading standard for antitrust conspiracy cases, *550 U.S. at 569 n.14*, in this context "[a]llegations of facts that could **[*17]** just as easily suggest rational, legal business behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1049 (9th Cir. 2008)* (citing *Twombly, 550 U.S. at 553-58 & n.5*); *see also* *Name.Space, Inc. v. Internet Corp. for Assigned Names & Numbers, 795 F.3d 1124, 1130 (9th Cir. 2015)* ("We cannot, however, infer an anticompetitive agreement when factual allegations 'just as easily suggest rational, legal business behavior.'" (quoting *Kendall, 518 F.3d at 1049*)). "[C]onduct that is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 597 n.21, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (citations omitted). And so, "[w]hen considering plausibility, courts must also consider an 'obvious alternative explanation,' for defendant's behavior." *Eclectic Props. E., LLC v. Marcus & Millichap Co., 751 F.3d 990, 996 (9th Cir. 2014)* (quoting *Iqbal, 556 U.S. at 682*).

C. General Principles

HN5[] *Rule 12(b)(6)* review is generally limited to the contents of the complaint. *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)*. Nevertheless, courts may "consider certain materials —documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial notice—without converting the motion to dismiss into a motion for summary judgment." *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*. Courts may also "take into account 'documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to **[*18]** the plaintiff's pleading.'" *Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1160 (9th Cir. 2012)* (quoting *Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)* (brackets omitted)).

HN6[] When a complaint is dismissed, the court "'should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not be cured by the allegation of other facts.'" *Lopez v. Smith, 203 F.3d 1122, 1130 (9th Cir. 2000)* (en banc) (quoting *Doe v. United States, 58 F.3d 494, 497 (9th Cir. 1995))*. Leave to amend "is properly denied, however, if amendment would be futile." *Carrico v. City & Cty. of S.F., 656 F.3d 1002, 1008 (9th Cir. 2011)*.

IV. DISCUSSION

A. Count One (Monopolization) Fails to State a Plausible Claim Against NextEra

Section 4 of the Clayton Act allows "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws" to sue for treble damages and costs of suit. *15 U.S.C. § 15(a)*. Count One asserts such a claim against each of the Hawaiian Electric Defendants and NextEra based upon alleged violations of *§ 2* of the Sherman Act, which makes it illegal for a person to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States[.]" *15 U.S.C. § 2*. Hu Honua claims that "HELCO's, along with HECO's and HEI's, conduct and practices as described [in the FAC], and as controlled by NextEra, were undertaken for the purpose and have had **[*19]** the effect of monopolizing the market for firm generation of electricity on the Island of Hawaii." FAC ¶ 137. It alleges that "NextEra entered into a contract, combination, or conspiracy with HELCO in furtherance of HELCO's unlawful monopolizing and attempting to monopolize the relevant market in violation of *Section 2*," FAC ¶ 138, where "the relevant market" is "the market for wholesale firm baseload power generation on the Island of Hawaii." FAC ¶ 139.[11]

HN7[] A *§ 2* monopolization claim has three essential elements: "'(a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury.'" *Name.Space, Inc., 795 F.3d at 1131* (quoting *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 998 (9th Cir. 2010))*. "Similarly, to state a claim for attempted monopolization, the plaintiff must allege facts that, if true, will prove: '(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.'" *Coalition for ICANN Transparency, Inc. v. VeriSign, Inc., 611 F.3d 495, 506 (9th Cir. 2010)* (quoting *Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 893 (9th Cir. 2008))*. And "[t]o prove a conspiracy to monopolize in violation of *§ 2*, [a plaintiff] must show four elements: (1) the existence of a combination or conspiracy to monopolize; (2) an overt act in furtherance of the conspiracy; (3) **[*20]** the specific intent to monopolize; and (4) causal antitrust injury." *Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1158 (9th Cir. 2003)* (citation omitted).

1. The FAC Fails to State a Claim for Monopolization and Attempted Monopolization Against NextEra

---

[11] As set forth previously, the Hawaiian Electric Defendants did not file a motion to dismiss (having instead filed joinders in NextEra's and HEP's Motions). Again — because the court has held any motions by the Hawaiian Electric Defendants in abeyance pending the settlement between Hu Honua and the Hawaiian Electric Defendants — this Order focuses on the FAC's allegations against NextEra and HEP. That is, the court is not specifically ruling on whether any claims (antitrust or otherwise) are stated (or not) as to the Hawaiian Electric Defendants.

NextEra argues that any monopolization and attempted monopolization claims against it fail at the outset because — as a power producer in *Florida* —it was never a competitor with Hu Honua in the wholesale firm baseload power generation market on the *island of Hawaii. See, e.g., Name.Space, Inc., 795 F.3d at 1131* ("Because [defendant] is not a competitor in any of the three markets, they cannot serve as the basis for a *§ 2* monopoly claim.") (citing *Mercy-Peninsula Ambulance, Inc. v. San Mateo Cty., 791 F.2d 755, 759 (9th Cir. 1986)* ("The gravamen of a *section 2* claim is the deliberate use of market power by a competitor[.]") (other citation omitted)); *Glen Holly Entm't, Inc. v. Tektronix, Inc., 352 F.3d 367, 372 (9th Cir. 2003)* ("'[T]he party alleging the injury must be either a consumer of the alleged violator's goods or services or a competitor of the alleged violator[.]'") (quoting *Eagle v. Star-Kist Foods, Inc., 812 F.2d 538 (9th Cir. 1987))*; *Spanish Broad. Sys. of Fla., Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065, 1075 (11th Cir. 2004)* ("There is no question that [defendant] does not participate in the Spanish-language radio market. Thus, [defendant] cannot *attempt* to monopolize that market.") (emphasis added) (cited with approval in *Name.Space, Inc., 795 F.3d at 1131*).

In response, Hu Honua clarifies that it "only asserts a claim for *conspiracy* to monopolize against NextEra." ECF No. 109, **[*21]** Opp'n at 34-35 n.8 (emphasis added). In any event, the FAC fails to allege a prerequisite (competitor in the same market) to a *§ 2* monopolization or attempted monopolization claim against NextEra. Accordingly, Count One, to the extent it alleges *§ 2* claims for monopolization or attempted monopolization against NextEra, is DISMISSED with prejudice.[12] The court thus focuses on whether the FAC adequately alleges a conspiracy to monopolize as to NextEra.

2. Allegations of Conspiracy to Monopolize Against NextEra Also Fail

a. No specific intent to monopolize

NextEra initially challenges the conspiracy to monopolize claim by focusing on the third element of a *§ 2* conspiracy — "the specific intent to monopolize." *Paladin Assocs., Inc., 328 F.3d at 1158*. NextEra argues that, just because it agreed to merge with HEI and then approved HELCO's termination of Hu Honua's PPA, the conspiracy claim fails because the FAC lacks any facts that, even if true, would plausibly establish that NextEra specifically intended to monopolize the wholesale firm power generation market on the Island of Hawaii. *See Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1437 n.8 (9th Cir. 1995)* ("To prove a conspiracy to monopolize, Rebel must show that the independent dealers had the specific intent to conspire to monopolize; it is not enough **[*22]** to show that the dealers merely agreed to go along with ARCO's pricing."); *see also, e.g., Syufy Enters. v. Am. Multicinema, Inc., 793 F.2d 990, 1000 (9th Cir. 1986)* ("Nor is there any showing that any of the distributors shared with Syufy a common purpose in monopolizing the hardtop theater market in the San Jose area.").

In response, Hu Honua contends that NextEra's specific intent to monopolize can be inferred from the FAC's allegations that HELCO "has an incentive to favor its own generation over that of competitor power generation," FAC ¶ 142, and that incentive is shared by NextEra as part of its own business strategy. ECF No. 109, Opp'n at 33. Hu Honua emphasizes the FAC's allegations that, during the same time-frame as the proposed NextEra/HEI Merger Agreement, HECO (1) terminated three pending solar power purchase agreements on Oahu (similarly to HELCO's cancellation of Hu Honua's PPA), and (2) submitted plans to the Hawaii PUC to convert some power plants on Oahu to liquefied natural gas, FAC ¶¶ 128, 131, where NextEra also has natural gas assets, and planned to "help HECO execute on plans to bring liquid natural gas to Hawaii" with the merger. FAC ¶ 55 (citation omitted).

But even assuming the FAC adequately alleges that the *Hawaiian Electric Defendants* ***[*23]*** possessed or sought a monopoly in the relevant power production market, there are no facts pled that would suggest *NextEra* specifically intended to monopolize that market, merely by consenting to HELCO's termination of the Hu Honua PPA. *See Rebel Oil Co., 51 F.3d at 1438 n.8* ("[I]t is not enough to show that [a defendant] merely agreed to go along.");

---

[12] To be clear, this dismissal is only as to monopolization or attempted monopolization claims against NextEra; the court is not reaching to any extent whether such claims are, or could be, properly stated against any other Defendant.

Syufy Enters., 793 F.2d at 1000 ("[A] supplier who licenses a product to another does not join the licensee in a conspiracy to monopolize merely because the licensee turns around and exploits the license for its own monopolistic purposes.").

In this regard, it is not enough to suggest—as Hu Honua does—that NextEra shared a motive to increase prices or profits with a similar strategy. *See, e.g.,* In re Baby Food Antitrust Litig., 166 F.3d 112, 133 (3d Cir. 1999) (rejecting argument, in a price-fixing context, that a motive to achieve higher prices could demonstrate conspiracy because if that were true "every company in every industry would have such a 'motive.'"). **HN8**[] "Motivation to enter a conspiracy is never enough to establish a traditional conspiracy." VI Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 1411 (4th ed. 2017).[13]

b. No antitrust injury

More important, even if the FAC alleged enough factual content **[*24]** to support an inference that NextEra specifically intended to monopolize the market for wholesale firm power on the Big Island, the § 2 conspiracy claim nevertheless fails for lack of the fourth element — "causal antitrust injury." Paladin Assocs., Inc., 328 F.3d at 1158. **HN9**[] To establish such injury, Hu Honua must allege facts that show "(1) unlawful conduct, (2) causing an injury to [Hu Honua], (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013) (quoting Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999)). The inquiry focuses on injury to "competition not competitors." Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977) (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)); *see also* Paladin Assocs., Inc., 328 F.3d at 1158 ("Where the defendant's conduct harms the plaintiff without adversely affecting competition generally, there is no antitrust injury."). This requirement stems from "the principle that the antitrust laws' prohibitions focus on protecting the competitive process and not on the success or failure of individual competitors." *Cascade Health Sols., 515 F.3d at 902* (citations omitted).

Applying these principles, the FAC's allegations of harm to the "competitive process" in the market for wholesale firm power on the Big Island are implausible. Notably, as alleged in the FAC, Hu Honua's biomass power plant was a "Qualifying Facility under the federal Public Utility Regulatory Policies Act ("PURPA") **[*25]** [.]" FAC ¶ 45. As such a facility, "Hu Honua was entitled to receive special rate and regulatory treatment." *Id.* (Indeed, the Hu Honua PPA was negotiated under a *waiver* by the PUC from its competitive bidding framework. FAC ¶ 49).

HN10[] PURPA was enacted in 1978, among other reasons, to "ensure sustained long-term economic growth by shifting the nation's reliance on oil and gas to more abundant domestically produced fuels." Greensboro Lumber Co. v. Georgia Power Co., 643 F. Supp. 1345, 1371 (N.D. Ga. 1986) (citation omitted). To support development of non-traditional generating facilities, PURPA and its implementing regulations

> require electric utilities (a) to sell electric energy and capacity to qualifying facilities upon request, (b) to purchase electric energy and capacity from qualifying facilities and (c) to make all necessary interconnections with any qualifying facility in order to accomplish the aforementioned purchases and sales provided that each qualifying facility pay its share of the interconnection costs.

Id. at 1372 (footnotes omitted). PURPA's "regulations mandate that an electric utility offer a qualifying facility built after the enactment of PURPA a purchase rate equal to, but no more than, the utility's 'full avoided costs.'" **[*26]** *Id.* (citations and footnote omitted); *see also* Schuylkill Energy Res., Inc. v. Penn. Power & Light Co., 113 F.3d 405, 411 (3d Cir. 1997) ("Pursuant to regulations promulgated . . . under the authority of PURPA, PP&L is required to purchase electric energy from SER."). The Hu Honua PPA contained such power-purchase provisions. *See* FAC ¶ 46.

[13] Furthermore, as analyzed in detail when the court considers Count Two to follow in discussion section B.2.a, the FAC's allegations that NextEra totally controlled HELCO's decisions after the Merger Agreement lack plausibility and thus cannot form the basis of NextEra's specific intent to monopolize.

Effectively, then, Hu Honua does not (or would not) "compete" in the power production market with its qualifying facility, and thus competition could not be harmed by termination of its PPA (even if the FAC otherwise states a claim for breach of contract against HELCO). As *Greensboro Lumber Co.* explained

> In establishing PURPA . . . Congress did not intend to place qualifying facilities in competition with public utilities. To the contrary, Congress has sought to encourage the development of qualifying facilities by insulating them from competition. Qualifying facilities are not authorized under PURPA to sell at retail.

643 F. Supp. at 1373 (citation omitted); *see also* Schuylkill Energy Res., 113 F.3d at 415 (finding no antitrust injury for PURPA power-producer, primarily because "state and federal laws prohibit [plaintiff] from competing in the relevant market"); Kamine/Besicorp Allegany L.P. v. Rochester Gas & Elec. Corp., 908 F. Supp. 1194, 1207 (W.D.N.Y. 1995) (finding no likelihood of an antitrust injury at a preliminary injunction stage, reasoning in part that "[t]he PPA, which [PURPA-producer] **[*27]** Kamine is attempting to enforce, was not created as a result of market forces or a competitive process; it is a creature of a statutory scheme [(PURPA)] set up for reasons that have nothing to do with competition *per se*"); Crossroads Cogeneration Corp. v. Orange & Rockland Utils., Inc., 969 F. Supp. 907, 915 (D.N.J. 1997) (finding no antitrust injury in action brought by PURPA-producer, reasoning that "Defendant's actions may have caused injury to plaintiff, but they did not cause injury to competition in a defined market [and was] not the sort of injury the antitrust laws were meant to prevent"), *rev'd on other grounds*, 159 F.3d 129 (3d Cir. 1998)). "PURPA was created as a vehicle to reduce the nation's dependency on foreign oil and to conserve energy, not to foster competition." Kamine/Besicorp Allegany L.P., 908 F. Supp. at 1204.[14]

Hu Honua attempts to distinguish this authority by arguing that it is not claiming harm to competition in the *retail* market (i.e., energy to consumers who pay HELCO for electricity), but rather harm to competition in the wholesale market for firm power to HELCO.[15] But Hu Honua is largely not a competitor with HELCO in that market either—Hu Honua would have been HELCO's *supplier*, with HELCO in turn providing electricity to retail rate-paying consumers. *See* Schuylkill Energy Res., 113 F.3d at 415 (rejecting argument that defendant's policy of favoring its **[*28]** owned-power producers over an independent producer could harm competition because "[plaintiff] is not [defendant's] *competitor* —it is [defendant's] *supplier*").

---

[14] The court is not suggesting that, just because Hu Honua's facility was a qualifying facility under PURPA, the antitrust laws can never apply. *See* 16 U.S.C. § 2603(1) ("Nothing in this Act or in any amendment made by this Act affects — (1) the applicability of the antitrust laws to any electric utility[.]"). Rather, ***HN11***[] "while PURPA was not intended to *protect* utilities from the reach of the antitrust laws, neither was it meant to *create* antitrust liability where none existed previously. In short, PURPA was designed to be antitrust-neutral." Kamine/Besicorp Allegany L.P., 908 F. Supp. at 1204. And, in this instance, "[h]owever consonant with PURPA's aims it may be to shield a [qualifying facility] like [plaintiff's] from price competition, that end is not something that the antitrust laws were designed to protect." Id. at 1205.

[15] Nevertheless, the FAC's allegations of antitrust injury rely in significant part on harm to retail consumers. Specifically, the FAC alleges that:

> HELCO's anticompetitive acts have caused substantial economic injury to Hu Honua and have also injured competition in the relevant markets by, inter alia, foreclosing, lessening, and eliminating potential competition *and depriving consumers from securing lower rates paid for power*.

FAC ¶ 151 (emphasis added).

> The aforesaid conduct of HELCO has produced antitrust injury to Hu Honua, competition, and consumers, and unless enjoined by this Court, will continue to produce at least the following anticompetitive, exclusionary and injurious effects upon competition in interstate commerce:
>
> (a) competition for the wholesale generation of power on the Island of Hawaii has been substantially and unreasonably restricted, lessened, foreclosed, and eliminated, *and consumers will be forced to pay supra-competitive prices for power as a result*;

FAC ¶ 152 (emphasis added).

The court also recognizes that HELCO is also a supplier to itself (through HELCO-owned power plants). But it is difficult to find plausible harm to competition from Hu Honua in that limited "market," even considering that HEP also **[*29]** provides wholesale power with its independent fossil-fuel power plant. Indeed, the cases cited previously also found no antitrust injury where independent power producers also claimed harm in wholesale markets. *Greensboro Lumber Co.* reasoned that,

> [I]n the wholesale market, PURPA establishes a guaranteed price which is equal to, or greater than, the price that would be received in a competitive market. In addition to providing a guaranteed price to qualifying facilities, PURPA also provides a guaranteed market for the power generated by qualifying facilities by making it a requirement that utilities purchase available energy and capacity from qualifying facilities before buying power from anywhere else; *no amount of price cutting or other competition can change this result*.

643 F. Supp. at 1373 (emphasis added). "In general, qualifying facilities produce a component which is used by public utilities and consume utility service; but, they are not competitors of public utilities." *Id.; see also* Schuylkill Energy Res., 113 F.3d at 416-17; Kamine/Besicorp Allegany, 908 F. Supp. at 1203-05. *But cf.* Long Lake Energy Corp. v. Niagara Mohawk Power Corp., 700 F. Supp. 186, 188 (S.D.N.Y. 1988).

Additionally, the primary "antitrust injury" that Hu Honua alleges from the purported loss of competition for wholesale generation of power — "consumers will be forced to pay supra-competitive prices for **[*30]** power as a result," FAC ¶ 152(a) — is not only speculative (depending upon an assumption, for example, that "fossil fuel costs on the Island of Hawaii could exceed $250 per barrel by 2037 and over $300 per barrel by 2045," FAC ¶ 122) but is also largely controlled by the Hawaii PUC. *See* HRS § 269-16(a) ("All rates, fares, charges, classifications, schedules, rules, and practices made, charged, or observed by any public utility or by two or more public utilities jointly shall be just and reasonable and shall be filed with the public utilities commission."); HRS § 269-16.22 ("All power purchase costs, including costs related to capacity, operations and maintenance, and other costs that are incurred by an electric utility company, arising out of power purchase agreements that have been approved by the public utilities commission and are binding obligations on the electric utility company, shall be allowed to be recovered by the utility from the customer base of the electric utility company through one or more adjustable surcharges, which shall be established by the public utilities commission."). This alleged injury "is simply too speculative to permit relief under the antitrust laws." City of Pittsburgh v. W. Penn Power Co., 147 F.3d 256, 269 (3d Cir. 1998); *see also* Schuylkill Energy Res., 113 F.3d at 414 ("[W]hether and **[*31]** to what extent [the utility] maintains an artificially high rate base [by favoring its own facilities] is not within the purview of the antitrust laws," and "[d]epriving consumers of 'energy sources' is not, however, cognizable antitrust injury.").

HN12[] "[T]he Sherman Act does not attack every monopoly." Alaska Airlines, Inc. v. United Airlines, Inc., 948 F.2d 536, 547 (9th Cir. 1991) (citations omitted). That is, "[t]he antitrust laws tolerate both efficient monopolies and natural monopolies." Id. at 548 (citation omitted). "Government regulation, as opposed to treble damages and criminal liability under the Sherman Act, is generally thought to be the appropriate remedy for difficulties posed by natural monopolies." *Id.* (citations omitted). And here, Hu Honua has alleged anticompetitive behavior in a highly regulated industry. This context is important.

The court is not suggesting that PUC involvement *necessarily* immunizes any of the Defendants from antitrust laws, but **HN13**[] "the structure of [a] regulated industry" may create a "lack of antitrust standing." West Penn Power Co., 147 F.3d at 269 (acknowledging that regulated industries such as utilities are not exempt from antitrust laws under Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973), but finding no antitrust injury in a suit challenging aspects of a merger between two electric utilities controlled by the Pennsylvania **[*32]** Public Utility Commission). *West Penn Power Co.* reasoned in part that "the comprehensive regulatory framework significantly restricts the nature of the competition which is permitted." Id. at 263.

In actuality, then — as most of the FAC alleges, *see, e.g.*, FAC ¶¶ 38-51, 58-89, 101-126, 166-184 — this is little if anything more than a breach of contract action between Hu Honua and HELCO. The fundamental dispute revolves around HELCO's alleged breach of the Hu Honua PPA by unreasonably withholding milestone-date extensions, or otherwise wrongfully terminating that contract. FAC ¶¶ 60, 65, 110-11, 168-71. "As the First Circuit has observed, '[s]ome antitrust cases are intrinsically hopeless because . . . they merely dress up in antitrust garb what is, at best, a business tort or contract violation.'" *Procaps S.A. v. Patheon, Inc., 845 F.3d 1072, 1087 (11th Cir. 2016)* (quoting *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 69 (1st Cir. 2004))*. And this is such a case.

Like *Schuylkill Energy Resources*, "[t]he fundamental dispute between [Hu Honua] and [HELCO] concerns the interpretation of the Power Purchase Agreement . . . and should be resolved pursuant to common-law contract principles," not through the antitrust laws. *113 F.3d at 418*. Like *Kamine/Besicorp Allegany L.P.*, "whether [HELCO] has breached the PPA or not, [Hu Honua] has not sufficiently **[*33]** demonstrated an *antitrust* injury[.]" *908 F. Supp. at 1208*. And like *Crossroads Cogeneration*, "[HELCO's] actions may have caused injury to plaintiff, but they did not cause injury to competition in a defined market. This is not the sort of injury the antitrust laws were meant to prevent." *969 F. Supp. at 915*.

Moreover, outside the utility context, Ninth Circuit authority is also on point — Hu Honua "has [at best] suffered a breach of contract, not an antitrust injury." *Orion Pictures Distrib. Corp. v. Syufy Enters., 829 F.2d 946, 949 (9th Cir. 1987)* (reasoning that, where duties were fixed by "contractual commitment" prior to the alleged anticompetitive behavior, "competition was no longer a factor in determining [defendant's] obligation," such that "[plaintiff's] injury does not reflect the anticompetitive effect of [defendant's] alleged monopolization.") (internal quotation marks omitted). As NextEra points out, ECF No. 73-1, Mot. at 24, the "antitrust" damages Hu Honua seeks ("the loss of revenue and profits that would otherwise have been earned from wholesale power generation on the Island of Hawaii," "the loss of market share," loss of "invested capital in its 50% completed Facility," FAC ¶¶ 154-55) appear to be the same damages it seeks in Count Three for breach of contract. *See* FAC ¶ 172.

In short, **[*34]** the claim fails for lack of antitrust injury. Count One is dismissed as to NextEra.

B. Count Two (Restraint of Trade) Fails to State a Plausible Claim Under *15 U.S.C. § 1* Against Either NextEra or HEP

Count Two seeks treble damages under *15 U.S.C. § 15(a)* against all Defendants based on alleged violations of *§ 1* of Sherman Act, *15 U.S.C. § 1*, which prohibits conspiracies "in restraint of trade or commerce." ***HN14***[] To state such a claim, "[a plaintiff] must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition." *Kendall, 518 F.3d at 1047* (citation omitted). And, to reiterate, "[a]llegations of facts that could just as easily suggest rational, legal business behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws." *Id. at 1049*.

Count Two alleges, in pertinent part, that "the coordinated and collective actions of Defendants HELCO, HECO, HEI, NextEra, and HEP have had the purpose and effect **[*35]** of eliminating or substantially restricting competition in the market for wholesale firm power generation and raising the price of power above competitive levels by eliminating sources of less expensive power where HELCO is required to dispatch lower cost sources." FAC ¶ 159. "These arrangements have had, and continue to have, the effect of unreasonably restraining competition in the market for wholesale firm power generation on the Island of Hawaii." *Id. ¶ 160*.

1. No Antitrust Injury

Count Two fails (against both NextEra and HEP) for the same primary reason that Count One fails — lack of antitrust injury (the third element reiterated in *Kendall*, a conspiracy that "actually injures competition"). *See, e.g., Am. Ad Mgmt., Inc., 190 F.3d at 1055* (requiring antitrust injury in a *§ 1* action). That is, ***HN15***[] antitrust injury is required for both a *§ 1* claim and a *§ 2* claim. *See, e.g., Glen Holly Entm't, Inc., 343 F.3d at 1007-08*. Stated differently, "causal antitrust injury . . . is an element of all antitrust suits brought by private parties seeking damages under *Section 4* of the Clayton Act." *Rebel Oil, 51 F.3d at 1433* (citation omitted). The previous analysis explaining the lack of such injury for a § 2 claim applies equally to the § 1 claim here, which alleges the same "antitrust injury" as Count One, FAC ¶ 162, including **[*36]** "inflated prices for power, and consumers [being] forced to pay supra-competitive prices for power."

In this regard, HEP adds another persuasive reason for lack of the requisite harmful effect on competition. The FAC alleges facts indicating that the Hu Honua PPA offered *higher* prices than other "competition," and was terminated by HELCO after Hu Honua failed to meet HELCO's demand for sufficient price reductions when seeking contract-deadline extensions. FAC ¶¶ 64, 67-71. ***HN16***[] Termination of a higher priced supplier, without more, is not antitrust injury. According to the FAC, because Hu Honua's PPA was cancelled, Hu Honua stands to lose profits of $435 million over a 20-year PPA term. FAC ¶ 165. But "the threat of loss of profits due to possible price competition following a merger does not constitute a threat of antitrust injury." *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 117, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. And if Hu Honua did not present a "lower-cost alternative," damage from cancellation of its contract for nonperformance is not antitrust injury. *See, e.g., Indeck Energy Servs., Inc. v. Consumers Energy Co., 250 F.3d 972, 977 (6th Cir. 2000)* (finding no antitrust injury, reasoning in part that marketplace competitors "must at least allege that exclusion of the competitor from the marketplace results in the elimination of a superior product **[*37]** or a lower-cost alternative").

2. A Lack of Plausibility

Count Two is deficient for another reason as well — fundamentally, it fails to allege a plausible illegal "contract, combination, or conspiracy" to restrain trade.

a. The § 1 claim against NextEra

As to NextEra, Hu Honua bases its conspiracy theory on allegations that NextEra controlled the HEI Defendants after the NextEra/HEI Merger Agreement. Specifically, the FAC alleges that, after the Merger Agreement was signed, NextEra controlled HELCO's decision regarding termination of the Hu Honua PPA, and HECO's termination of three solar power projects on Oahu. *See, e.g.*, FAC ¶¶ 63, 132-34.

These allegations of control, however, are insufficient to establish a § 1 conspiracy claim as to NextEra. Hu Honua relies on the Merger Agreement itself. FAC ¶ 56; *See* Pl.'s NextEra Opp'n at 26-27; ECF No. 109 at 35-36 (arguing that "Hu Honua unquestionably connects NextEra to Defendants' scheme. . . . The Merger Agreement alone connects NextEra"). In particular, it bases the control allegation on express language in the Merger Agreement that required NextEra's "prior written consent" before HEI, HECO, or HELCO could, among other things, "(1) enter into, **[*38]** terminate or amend in any material respect any material Contract, [or] (2) consent to any extension or continuation or any material Contract[.]" FAC ¶ 56; NextEra Mot., Ex.A, ECF No. 73-3 at 5, 9. But that Merger Agreement also specifically *precludes* such control by NextEra. *See* ECF No. 73-3 at 10 (paragraph 5.01(c) ("No Control of [HEI's] Business. [NextEra] acknowledges and agrees that (i) nothing contained in this Agreement is intended to give [NextEra], directly or indirectly, the right to control or direct the operations of [HEI] or an [HEI] Subsidiary prior to the Effective Time and . . . prior to the Effective Time, [HEI] shall exercise, consistent with the terms and conditions of this Agreement, complete control and supervision over its and [HEI's] Subsidiaries' respective operations."). And the FAC fails to allege *facts* indicating that NextEra violated that preclusive language.[16]

Moreover, NextEra could not have withheld consent to HELCO's actions without good reason because, under § 5.01(a), NextEra's prior written consent "shall not be unreasonably withheld, conditioned or delayed." ECF No. 73-3 at 5. Rather than establishing unbridled control by NextEra (and its joinder in an illegal **[*39]** conspiracy), the

---

[16] NextEra explains that these types of material-change provisions (which prevent a company from making significant changes to material contracts during the pendency of a merger) are standard terms which protect the parties' legitimate interests in a pre-merger context. *See* NextEra Mot. at 16-17, ECF No. 73-1.

contract itself establishes no more than NextEra's routine consent in *HELCO's* decision. That is, the FAC "just as easily suggests rational, legal business behavior" by NextEra, rather than an illegal conspiracy to restrain trade. *See* [Kendall, 518 F.3d at 1049] ("Allegations of facts that could just as easily suggest rational, legal business behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a violation of the antitrust laws.").

The FAC's allegations of control by NextEra also lack plausibility given the "obvious alternative explanation" in the FAC that HELCO cancelled the Hu Honua PPA because of Hu Honua's own nonperformance. *See* [Eclectic Props. E., LLC, 751 F.3d at 996] (requiring a court to consider an "obvious alternative explanation," when assessing plausibility). The FAC itself details such obvious reasons for HELCO's termination. FAC ¶ 51. Specifically, "[d]uring the construction [of its facility], disputes arose with the Facility construction contractor that became insoluble." *Id.* Hu Honua became involved in extensive litigation with its contractor and vendors, and a separate labor union dispute. *Id.* "[T]he construction contract and labor disputes, together with corresponding financing **[*40]** interruptions, caused an extended loss of time and delayed the completion of construction of the Hu Honua facility[.]" *Id.* "Hu Honua's disputes with its former construction contractor and the labor union jurisdiction dispute caused an irretrievable loss of time in the construction of the Hu Honua Facility. As a result, Hu Honua realized that it would not be able to achieve two milestone[] dates set forth in the PPA[.]" FAC ¶ 58.

Also unavailing is Hu Honua's argument that the FAC's allegations are sufficient under [Starr v. Baca, 652 F.3d 1202 (9th Cir. 2011)]. *Starr* held that "[i]f there are two alternative explanations, one advanced by defendant and the other advanced by plaintiff, *both of which are plausible*, plaintiff's complaint survives a motion to dismiss under [Rule 12(b)(6)]." [Id. at 1216] (emphasis added). Although Hu Honua's theories are not impossible (at least at this stage of the litigation), they are not *plausible*, which is what *Twombly/Iqbal* requires. *See, e.g., In re Century Aluminum Co. Secs. Litig., 729 F.3d 1104, 1108 (9th Cir. 2013)* (distinguishing *Starr* because "[h]ere, [unlike in *Starr*,] plaintiffs' explanation is merely *possible* rather than plausible. To render their explanation plausible, plaintiffs must do more than allege facts that are merely consistent with both their explanation and defendants' competing **[*41]** explanation.") (citing [Iqbal, 556 U.S. at 678]); [Eclectic Props E., LLC, 751 F.3d at 997] ("Applying *Twombly, Iqbal, Starr*, and *Century* . . . Plaintiffs have not made the kind of factual allegations that 'nudg[e] their claims across the line from conceivable to plausible.'") (citing [Twombly, 550 U.S. at 570])).

b. The [§ 1] claim against HEP

Similarly, the FAC lacks a plausible conspiracy theory as to HEP. The FAC alleges that "[a]s early as 2012, HEP recognized that the proposed Hu Honua facility was a direct competitive threat" and that "as the operator of the largest power plant on [Hawaii] Island . . . [HEP] attempted unsuccessfully to exclude Hu Honua as a competitor in the power generation market [when HELCO applied to the PUC for the approval of the original Hu Honua PPA in 2012]." FAC ¶ 99. "Hu Honua is informed and believes, and on that basis alleges, that HEP participated in and supported the termination of Hu Honua's PPA [in 2015.]" *Id.* But this allegation is deficient as it offers no facts indicating what HEP might have done to "participate[] in and support[] the termination." *See* [Kendall, 518 F.3d at 1047] (***HN17***[]) "[T]o allege an agreement between antitrust co-conspirators, the complaint must allege facts such as a 'specific time, place, or person involved in the alleged conspiracies' to give a **[*42]** defendant seeking to respond to allegations of a conspiracy an idea of where to begin.") (quoting [Twombly, 550 U.S. at 565 n.10]).

What's more, the FAC also alleges — in support of its monopolization claim against HELCO—that in 2015 HELCO and HEP agreed for HELCO to acquire HEP's fossil fuel plant for some $88 million. FAC ¶¶ 91-97. That is, HEP was *exiting* the very wholesale power market from which it allegedly sought to eliminate Hu Honua. Whatever these allegations might mean as to HELCO, they are inconsistent as to *HEP's* participation in a conspiracy to restrain trade as to Hu Honua. As HEP argues, "HEP's decision to sell [its] Hamakua Facility in 2015 and exit the relevant market removes any economic incentive for HEP to conspire to terminate the Hu Honua PPA [in 2016.]" HEP Opp'n at 20, ECF No. 95-1 at 27. That is, the FAC's conspiracy theory as to HEP makes no "economic sense." [Adaptive Power Sols., LLC v. Hughes Missile Sys. Co., 141 F.3d 947, 952 (9th Cir. 1998)] (***HN18***[]) "Antitrust claims must make economic sense") (citing *Eastman Kodak Co. v. Image Tech. Servs. Inc., 504 U.S. 451, 468, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992))*.

In response, Hu Honua offers an implausible explanation that is not pled in the FAC. It claims that HEP wanted to remove Hu Honua from the wholesale firm power market so that HEP's power plant would become more valuable when selling it. Opp'n at 12-13, ECF No. 108 at 20-21. But **[*43]** nothing in the FAC indicates HEP knew, when it entered into the agreement for HELCO to acquire HEP's facility (in 2015), that HELCO would later (in 2016) terminate the Hu Honua PPA. And, even assuming HEP would want to increase its facility's selling price, why would HELCO be part of that conspiracy to pay more for HEP's facility? Again, the theory makes no economic sense. *See Adaptive Power Sols., LLC, 141 F.3d at 952*.

And, as with the *§ 1* claim as to NextEra, the claim as to HEP lacks plausibility when considering the "obvious alternative explanation" pled in the FAC that HELCO terminated the Hu Honua PPA for lack of performance by Hu Honua, and Hu Honua's subsequent refusal to meet HELCO's terms in renegotiating the PPA. *See Eclectic Props. E., LLC, 751 F.3d at 996*. Whether or not the FAC adequately alleges that HELCO breached the PPA in unreasonably refusing to approve Hu Honua's requests to extend milestones, there is no plausible antitrust conspiracy theory pled as to HEP. There are no facts in the FAC suggesting that HEP's decision to sell to HELCO was anything but a rational business decision. *See Kendall, 518 F.3d at 1049*.[17]

C. State Law Counts Against NextEra and HEP

Count Seven asserts state-law antitrust or unfair competition claims against all Defendants under HRS chapter 480 **[*44]** . Similarly, Count Eight asserts a state-law claim for Tortious Interference with Contract against NextEra. But because the court has dismissed the federal antitrust claims as to NextEra and HEP (and the suit was not based on diversity jurisdiction), the court intends to dismiss both of the state-law claims without prejudice under *28 U.S.C. § 1367(c)(3)* ("The district courts may decline to exercise supplemental jurisdiction over a claim under *subsection (a)* [regarding Article III jurisdiction] if — . . . the district court has dismissed all claims over which it has original jurisdiction[.]"). *See Acri v. Varian Assocs., Inc., 114 F.3d 999, 1001 (9th Cir. 1997)* (en banc) (***HN19***[]] "[I]n the usual case in which all federal-law claims are eliminated before trial, the balance of factors . . . will point toward declining to exercise jurisdiction over the remaining state-law claims.").[18]

But it is premature to dismiss these state-law claims because, under the present procedural posture (where all claims as to the Hawaiian Electric Defendants have been held in abeyance), the Hawaiian Electric Defendants still remain in the action with federal claims against them. That is, the court cannot exercise its discretion under *§ 1367(c)* until it "has dismissed all claims over which it has original jurisdiction." **[*45]** Accordingly, the court DEFERS ruling on Counts Seven and Eight until the conditional settlement as to the Hawaiian Electric Defendants is completely finalized. For administrative purposes, the court DENIES — without prejudice — NextEra's and HEP's Motions to Dismiss as to Counts Seven and Eight.

V. CONCLUSION

---

[17] Given that Count Two fails as to HEP for lack of antitrust injury and lack of a plausible conspiracy theory, the court need not reach HEP's alternative argument that its acts are shielded from antitrust scrutiny by the *Noerr-Pennington* or State Action Doctrines.

[18] It is unlikely that the chapter 480 antitrust claims could otherwise survive. *See HRS § 480-3* ("This chapter shall be construed in accordance with judicial interpretations of similar federal antitrust statutes[.]"); *Int'l Healthcare Mgmt. v. Haw. Coalition for Health, 332 F.3d 600, 609 (9th Cir. 2003)* ("[Plaintiff's] state antitrust claims fail for the same reasons as their federal claims because Hawaii antitrust statutes are interpreted 'in accordance with judicial interpretations of similar federal antitrust statutes.'") (quoting *HRS § 480-3*). Nevertheless, the court has not fully analyzed the state-law allegations to determine whether the FAC states a claim under chapter 480.

Hu Honua's federal antitrust claims lack plausibility as to both NextEra and HEP. The Motions to Dismiss are GRANTED as to Counts One and Two, and those claims are DISMISSED without prejudice. Because the court DEFERS ruling on the state-law claims, the Motions as to Counts Seven and Eight are DENIED without prejudice. The court will allow Hu Honua an opportunity to file a Second Amended Complaint that cures the FAC's deficiencies, if it believes it can do so. *See* *Lopez, 203 F.3d at 1130*. A Second Amended Complaint (or a statement indicating that a Second Amended Complaint will not be filed) is due by **January 29, 2018**.

IT IS SO ORDERED.

DATED: Honolulu, Hawaii, January 19, 2018.

/s/ J. Michael Seabright

Opinion

MEMORANDUM AND ORDER

Plaintiffs Kevin Dvorak and Kathleen Dvorak[1] are proceeding on an eight count class action Complaint (Doc. 2). The case involves an alleged conspiracy to fix St. Clair County, Illinois real estate tax sales so that owners were required to pay artificially high interest penalties to redeem their properties. The defendants include St. Clair County, St. Clair County Treasurer Charles Suarez, and a number of individual and business purchasers who are alleged to have participated in the conspiracy (collectively, "Purchaser Defendants"). Now pending before the Court is Plaintiffs' Motion for Class Certification (Doc. 208). Defendants have all replied (Docs. 219, 221, 222, 224, and 230). For the following reasons, Plaintiffs' Motion for Class Certification is **DENIED**.

Background

This case revolves around St. Clair County, Illinois real estate tax sales for properties for which the prior year's property taxes are delinquent. The County Collector (an *ex officio* role **[*4]** of the County Treasurer) conducts the sales. Purchasers do not receive clear title to the property at issue, but rather a Certificate of Purchase and the right to collect the amount of unpaid taxes from the owner plus a "penalty" ranging from 0 to 18 percent interest. Each successful bidder pays the county the amount of the delinquency. The winning bidder for a given parcel is the one who is willing to accept the lowest penalty rate if the owner exercises his/her/its right of redemption. The maximum penalty percentage that may be bid is 18 percent, and if no bids are received on a given property, it reverts to the County at the maximum penalty rate.

For example, a property with a $2000 overall delinquency is offered at the tax sale. One bidder offers 18 percent - meaning that he will pay the $2000 to the county and charge the property owner an additional 18 percent, if she wishes to redeem the property. Another bidder offers 13 percent - meaning that the property owner would pay less to redeem the property. If no lower bids are received, the second bidder receives the Certificate of Purchase.

If a property owner fails to redeem a property within the statutory redemption period, the successful **[*5]** bidder may file a Petition for a tax deed. Once a tax deed is issued, it conveys merchantable title, free and clear from most previous interests in the property.

If the property is redeemed, the purchaser of the tax lien receives the certificate amount (what is owed to the county) plus the penalty percentage. The penalty rate increases every six months by the amount of the penalty rate that was originally bid. Using the above example, the property owner would owe the winning bidder $2,260 if redeemed within six months, $2,520 if redeemed between six months and a year, $2,780 if redeemed between a

[1] The named plaintiffs originally included John R. Bloyer, Jr. and Adrianne L. Bloyer. They have voluntarily dismissed their individual claims. (Doc. 120).

year and 18 months, etc. The holder of a tax lien may also pay subsequent unpaid real estate taxes on a property and claim an automatic 12 percent penalty on the subsequent taxes.

Because the cost of redemption is usually significantly less than the market value of the property, there is a strong incentive for anyone holding a sizeable ownership or security interest in the property to redeem it following a tax sale. If a property owner is unable to pay the cost of redemption, it is common for a mortgage holder or other lienholder to redeem on behalf of the property owner in order to preserve **[*6]** their interest. The amount paid on the owner's behalf is then added to the owner's outstanding obligation.

Here, Plaintiffs maintain that something went very wrong with this process at the St. Clair County tax sales conducted in 2007 and 2008. Specifically, they allege that Defendant Suarez—in exchange for political contributions for himself and the "Democrat Party of St. Clair County"— arranged for the auctioneer to recognize the Purchaser Defendants as winning bidders (presumably in cases of identical bids) and to distribute the winning bids from the various auctions between the Purchaser Defendants. (Doc. 2 at ¶¶74, 79). They also allege that Suarez arranged for the Purchaser Defendants to have advantageous seating positions and caused the auctioneer to ignore subsequent lower bids, thereby artificially inflating the penalty rates. For their part, the Purchaser Defendants are alleged to have agreed to keep their bids at or near the 18 percent statutory maximum penalty rate. (*Id.* at ¶74).

Plaintiffs Kevin and Kathleen Dvorak owned two properties that were sold at the 2007 St. Clair County real estate tax sale conducted in November 2008. (*Id.* at ¶¶6-11). The first property is located **[*7]** at 518 E. Washington St., O'Fallon, Illinois ("Washington Property"); the second property is located at 619 W. Schuetz St., Lebanon, Illinois ("Schuetz Property"). Both properties were purchased by Defendant White Oak Securities at a penalty rate of 18 percent and redeemed on November 8, 2011 by mortgage holder, First Federal Savings Bank (Docs. 208-4 at 2; 208-5 at 3). Because the redemption took place nearly three years after the sale, $1,725.03 in penalty interest was assessed on a $1,597.25 tax bill for the Washington Property. (Doc. 208-5 at 3). Redemption of the Schuetz Property cost $2,018.22 in penalty interest on a $1,868.72 2007 tax bill, which was paid by the same mortgage holder. (Doc. 208-4 at 2). Both properties were sold at tax sales before and after the 2006 and 2007 tax year sales at penalty rates ranging from one to three percent. (Docs. 278-2 and 278-3).

Plaintiffs assert eight causes of actions, including claims against all defendants for Civil Conspiracy (Count I), violations of the Sherman Anti-Trust Act (Counts III and IV) and violations of the Illinois Antitrust Act, *740 ILCS 10/1, et seq.* (Counts V-VII). They also assert claims for Money Had and Received against all defendants except **[*8]** Suarez (Count II) and breach of fiduciary duty against Suarez alone (Count VIII). In each Count, Plaintiffs allege damages "based on the difference [between] the amount redeemed and the amount that would have been needed to redeem the property at a reasonable and appropriate penalty rate[,]" plus attorneys' fees, expenses and trebling of damages where allowed by statute. (Doc. 2)

Legal Standard

Plaintiffs move for class certification under *Rules 23(a)* and *23(b)(3) of the Federal Rules of Civil Procedure*, seeking to certify a plaintiff class consisting of:

> all owners of real estate parcels that were sold at a St. Clair County Tax sale auction for unpaid real estate taxes for the 2006 and 2007 tax years with respect to which a Certificate of Purchase was obtained at such auction in response to a penalty rate bid in excess of 0 percent, excluding the owners of parcels for which there were no bids and therefore were "sold" to St. Clair County at penalty rate of 18% by operation of statute.

(Doc. 208 at ¶ 3).

To be certifiable, a class must be definable and must meet the requirements of numerosity, commonality, typicality and adequacy of representation. *See* *Fed. R. Civ. P. 23(a)*; *Alliance to End Repression v. Rochford, 565 F.2d 975, 977 (7th Cir. 1977)*. The case must also fall within one of the three enumerated *Rule 23(b)* categories. *Spano v. The Boeing Co., 633 F.3d 574, 583 (7th Cir. 2011)* ("(1) a mandatory **[*9]** class action (2) an action seeking final injunctive or declaratory relief, or (3) a case in which the common questions predominate and class treatment is superior.").

A class may be certified only if a district court is "satisfied, after a rigorous analysis," that compliance with *Rule 23* has been shown, even if the analysis entails some overlap with the merits. *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 351, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*. Although a plaintiff bears the burden of showing that the proposed class satisfies the *Rule 23* requirements, he "need not make that showing to a degree of absolute certainty." *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 811 (7th Cir. 2012)* (internal citation omitted).

Discussion

As an initial matter, Defendants Dennis Ballinger Sr., Dennis Ballinger Jr., Empire Tax Corp. and Vista Securities, Inc. (collectively "Ballinger Defendants") challenge the proposed class definition as "fatally overbroad." (Doc. 230 at 23). They object to the inclusion of every owner whose property was purchased or a penalty rate above 0% in the 2006 and 2007 tax sales, arguing that definition may encompass a significant number of property owners (1) whose penalty rate was at or below what it would have been in a "normal" year, (2) whose property was not redeemed and therefore did not pay the allegedly inflated penalty rates, **[*10]** or (3) whose claims would be barred by the statute of limitations.

A class may be overbroad "if it is apparent that it contains a great many persons who have suffered no injury at the hands of the defendant." *Messner, 669 F.3d at 825* *citing* *Kohen v. Pac. Inv. Mgmt. Co. LLC & PIMCO Funds, 571 F.3d 672, 677 (7th Cir.2009)*. However, the mere fact that a proposed class contains members who ultimately will not be able to recover once the merits of the case are reached does not preclude certification of the class. *See* *Kohen, 571 F.3d at 677* ("[a] class will often include persons who have not been injured by the defendant's conduct; indeed this is almost inevitable because at the outset of the case many of the members of the class may be unknown, or if they are known still the facts bearing on their claims may be unknown. Such a possibility or indeed inevitability does not preclude class certification[.]") The determining factor is whether the class includes a significant number of individuals who *could not* have been harmed by a defendant's allegedly unlawful conduct. *Messner, 669 F.3d at 824*.

It is possible that Plaintiffs' proposed class contains owners who received the same rate they would have received in an auction that was not (allegedly) "rigged" and who therefore, would not have compensable damages. But sorting them out from those **[*11]** who did sustain an injury is an issue to be decided on the merits. By contrast, it is not possible for owners who did not redeem their property to have sustained the damages alleged in the Complaint. Because they did not actually pay the inflated rate, they cannot recover the difference between what they paid and the amount due under a "reasonable and appropriate" penalty rate.[2] Because it is unclear from the pleadings and the parties' submissions whether the proposed class includes a significant or trivial number of such owners, Court cannot conclude at this juncture that the proposed class is fatally overbroad.

Rule 23(a) Requirements

Numerosity

In order to meet the numerosity requirement, Plaintiffs must establish that there are a sufficient number of class members that joinder would be impractical. "Although there is no 'bright line' test for numerosity, a class of forty is

---

[2] Conceivably, an owner of an unredeemed property could claim that it would have redeemed it at the "reasonable and appropriate" penalty rate, but that the inflated rate caused them to forego the option. However, that is neither the claim before the Court, nor one that would be appropriate for class treatment as it would be speculative and would require extensive individual inquiries.

generally sufficient." *McCabe v. Crawford & Co., 210 F.R.D. 631, 643 (N.D. Ill. 2002)* (citation omitted). This is not a hard-and-fast rule, however. "A class can be certified without determination of its size, so long as it's reasonable to believe it's large enough to make joinder impracticable and thus justify a class action suit." *Arnold Chapman and Paldo Sign & Display Co. v. Wagener Equities Inc., 747 F.3d 489, 492 (7th Cir. 2014)*.

Here, the proposed class is sufficiently numerous. **[*12]** The auction results for the 2006 tax year show in excess of 3700 properties that were bid upon and awarded at rates over 0%. (Doc. 230-2 at 208-311). There were more than 3500 such properties purchased at the 2007 tax year auction. (*Id.* at 313-432). While there may be a number of owners with multiple properties within this group, it is reasonable to assume that the class would number at least in the hundreds, if not thousands. The numerosity requirement is therefore satisfied.

Commonality

Rule 23(a) also requires the existence of at least one question of law or fact common to the class. *Fed. R. Civ. P. 23(a)(2)*; *Keele v. Wexler, 149 F.3d 589, 594 (7th Cir. 1998)*. The putative class members' "claims must depend on a common contention" and "[t]hat common contention...must be of such a nature that it is capable of classwide resolution - which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." *Dukes, 564 U.S. at 350*. "A common nucleus of operative fact is usually enough to satisfy the commonality requirement." *Keele, 149 F.3d at 594*.

The existence of the alleged conspiracy between Suarez and the Purchaser Defendants in this case is the type of common issue contemplated by the rule. All of the claims asserted in the Complaint require proof **[*13]** of the existence of a conspiracy to manipulate the penalty rates at these two auctions. This meets the commonality threshold.

Typicality

To satisfy typicality, "there must be enough congruence between the named representative's claim and that of the unnamed members of the class to justify allowing the named party to litigate on behalf of the group." *Spano, 633 F.3d at 586*. The typicality requirement addresses concerns that (1) the representative's claim may fail on unique grounds, dooming meritorious claims of absent class members or that (2) the representative's claims may prevail on unique grounds, and the representative may therefore fail to adequately present alternative grounds under which the unnamed class members could prevail on their own claims. *CE Design Ltd. v. King Architectural Metals, Inc., 637 F.3d 721, 724 (7th Cir. 2011)*. The "presence of even an arguable defense peculiar to the named plaintiff or a small subset of the plaintiff class may destroy the required typicality of the class as well as bring into question the adequacy of the named plaintiff's representation." *Id. at 726*, *citing* *J.H. Cohn & Co. v. American Appraisal Associates, Inc., 628 F.2d 994, 999 (7th Cir. 1980)*. Here, Plaintiffs' claims are not sufficiently typical of the class to support certification because their claims are subject to a statute of limitations defense.

The statutes of limitations for claims **[*14]** grounded in state law are governed by the applicable state law. *Indep. Tr. Corp. v. Stewart Info. Servs. Corp., 665 F.3d 930, 935 (7th Cir. 2012)*. Conspiracy, standing alone, is not a separate and distinct tort in Illinois. *See* *Weber v. Cueto, 253 Ill. App. 3d 509, 624 N.E.2d 442, 449, 191 Ill. Dec. 593 (1993)*. Rather, a civil conspiracy claim is subject to the same statute of limitations as the underlying tort on which the claim is based. *Mauvais-Jarvis v. Wong, 2013 IL App (1st) 120070, 987 N.E.2d 864, 894, 370 Ill. Dec. 98 (2013)*. A private action for violation of the *Illinois Antitrust Act, 740 ILCS 10/1, et seq.* (Counts V-VII) must be commenced within 4 years after the cause of action accrued. *740 ILCS 10/7(2)*. In the context of an antitrust conspiracy, accrual is generally triggered by the last overt act in furtherance of the alleged conspiracy. *People ex rel. Hartigan v. Moore, 143 Ill. App. 3d 410, 493 N.E.2d 85, 86, 97 Ill. Dec. 603 (1986)*.

Claims for "money had and received" (Count II) and breach of fiduciary duty (Count VIII) must be commenced within five years after the cause of action accrued. *735 ILCS 5/13-205*. The *Sherman Act* carries a statute of limitations of four years (*15 U.S.C. § 15b*), and generally, a federal antitrust cause of action "accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business." *In re Copper Antitrust Litig., 436 F.3d 782, 789 (7th Cir. 2006)* *quoting* *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*.

The last tax sale involved in this case was on November 10, 2008, which is when the tax liens on Plaintiffs' properties were sold. (Doc. 230-4 at 78). Plaintiffs have not alleged any overt acts in furtherance of the alleged conspiracy **[*15]** after that sale. While they claim that Defendants "actively and fraudulently concealed these violations," this allegation appears to relate to meetings that occurred prior to the auctions at issue. Nor do Plaintiffs claim that their injury arose from any act committed after November 10, 2008. Because the instant action was filed on October 17, 2014 - five years, eleven months and four days later (Doc. 2), facially, Plaintiffs' claims were filed out of time.

The Plaintiffs contend that application of the "discovery rule" moves the accrual for their claims forward to at least a press conference in May of 2014, making the filing of the Complaint timely. Under the discovery rule, the accrual date for statute of limitations purposes "is not determined when the injury occurs but when it is discovered or should have been discovered." *Barry Aviation Inc. v. Land O'Lakes Mun. Airport Comm'n, 377 F.3d 682, 688 (7th Cir. 2004)*. When the discovery rule applies, a statute of limitation begins to run "once a plaintiff has knowledge which would lead a reasonable person to investigate the possibility that her legal rights had been infringed." *CSC Holdings, Inc. v. Redisi, 309 F.3d 988, 992-93 (7th Cir. 2002)*; *citing* *LaSalle v. Medco Research, Inc., 54 F.3d 443, 446 (7th Cir. 1995)*; *Khan v. Deutsche Bank AG, 2012 IL 112219, 978 N.E.2d 1020, 1029, 365 Ill. Dec. 517 (2012)* (citation omitted) ("When a party knows or reasonably should know both that an injury has occurred and that it was wrongfully caused, **[*16]** the statute begins to run and the party is under an obligation to inquire further to determine whether an actionable wrong was committed").

The question of when the Dvoraks knew or should have known that they had been wrongfully injured renders their claims vulnerable to a statute of limitations defense not necessarily applicable to other members of the putative class. There is some discrepancy between the Complaint allegations and Plaintiffs' discovery responses regarding how and when they first became aware of their potential claims against Defendants. In the Complaint, Plaintiffs allege that they and members of the class

> "...were unaware of and did not learn of Defendants' conspiracy until approximately June of 2014, when it was publicly disclosed by the Treasurer of Madison County, Kurt Prenzler, after much research and analyzing different and seemingly unrelated records, that Defendant, Charles Suarez, had accepted "political contributions" from the Defendants and that these same Defendants had purchased properties in St. Clair County at the maximum 18% interest rate. The connection between Charles Suarez and Defendants Rothman, Vassen and McClean and that Defendants had engaged **[*17]** in a conspiracy to rig public auctions for the real estate tax sales in St. Clair County during the Class Period was disclosed for the first time in June 2014."

(Doc. 2 at ¶¶90-91).

Plaintiffs further allege that Defendants and those involved in the alleged conspiracy "actively and fraudulently concealed these violations to obscure their illegal activity by meeting and discussing amongst themselves for the express purpose of rigging the public auction." (*Id.*). Essentially, in the Complaint, Plaintiffs assert that they did not know, and that reasonable diligence would not have uncovered, the information indicating wrongful conduct and injury until Kurt Prenzler's press conference.

But Kathleen Dvorak's deposition testimony is inconsistent with the Complaint allegations. She testified that she and her husband did not become aware of any possible issues with the property tax auctions until October 2014 (Deposition of Kathleen Dvorak, Doc. 271-4 at 5), and that she first learned of a potential issue when a letter from Ken Brosh was left at the Washington Property.[3] She also testified that, "[t]he high interest rate" led her to believe

---

[3] Kevin Dvorak testified in his deposition that his wife handles the financial matters in the household, that he was not significantly involved with the current matter and had no personal knowledge of any of the allegations in the Complaint other than the fact

that the sales were illegally conducted or rigged, and **[*18]** the 18 percent rate "on its face struck [her] as being wrong based on [her] prior experience of redeeming at a much lower interest rate," (*Id.* at 4, 10), and that she knew that their properties had been sold at the 18 percent rate for the 2007 tax year shortly after the sale had occurred. (*Id.* at 11).[4]

Given Mrs. Dvorak's testimony, that her sole basis for believing that she and her husband's rights had been infringed was the abnormally high penalty rate that the Washington and Schuetz Properties were sold for at the 2007 tax year auction compared to prior years, and her admission that she was aware of the 18 percent rate shortly after the sale took place in November 2008, one could reasonably find that the statutes of limitations began to run for the Dvoraks when Kathleen Dvorak received the 18 percent rate information. Depending on when that information was received, some or all of the Dvoraks' claims may be time-barred, notwithstanding the application of the discovery rule.

Application of the discovery rule may yield a different result for some or all of the remainder of the putative class. For example, the Dvoraks had significant experience dealing with property tax sales on their properties, which is **[*19]** a central explanation given for how Kathleen Dvorak "knows" that something improper happened at the 2007 tax year sale. On the other hand, the same information would not necessarily put another putative class member with no prior experience with tax sales on notice that further investigation was warranted. In that instance, Kurt Prenzler's May 2014 press conference could arguably be the first notice they had that their "injury" (paying a higher than normal rate) may have been wrongfully caused. Because the Dvoraks' claims may be dismissed on grounds not applicable to absent class members, their claims are not sufficiently typical to support class certification.

Adequacy

For purposes of *Rule 23(a)(4)*, "adequacy of representation is composed of two parts: the adequacy of the named plaintiff's counsel, and the adequacy of representation provided in protecting the different, separate, and distinct interest of the class members." *Retired Chicago Police Ass'n v. City of Chicago, 7 F.3d 584, 598 (7th Cir. 1993)* (quotation omitted). The adequacy requirement is satisfied when the named representative has "a sufficient interest in the outcome of the case to ensure vigorous advocacy" and "does not have interests antagonistic to those of the class." *Saltzman v. Pella Corp., 257 F.R.D. 471, 480 (N.D. Ill. 2009)*.

A class representative may be found **[*20]** inadequate if they are subject to a unique defense that could compromise his or her ability to adequately represent the class. The fear is that the named plaintiff will become distracted by the presence of a possible defense applicable only to him so that the representation of the rest of the class will suffer." *CE Design, 637 F.3d at 726*. Because the Dvoraks' claims may uniquely be subject to a statute of limitations defense, certification of a class with them as the only class representatives would be inappropriate.

Rule 23(b) **Requirements**

Even if a named plaintiff satisfies *Rule 23(a)*, they must also satisfy one of *Rule 23(b)*'s three subsections. Here, the Dvoraks proceed under *Rule 23(b)(3)*, which allows for certification upon a finding that "questions of law or fact common to members of the class predominate over any questions affecting only individual members," and that "a class action is superior to other available methods for resolving the controversy." *Fed. R. Civ. P. 23(b)(3)*. Their motion also fails on this basis.

---

that he owned the properties, and that they were sold for delinquent taxes and eventually redeemed. (Docs. 271-5 at 3 and 278-6 at 4-5).

[4] Brosh, a competing tax auction buyer, steered Kathleen Dvorak to attorney Don Weber, who in turn referred her to Plaintiffs' Counsel's law firm. (*Id.* at 6-7).

"*Rule 23(b)(3)*'s predominance requirement is met when common questions represent a significant aspect of a case and can be resolved for all members of a class in a single adjudication." *Messner, 669 F.3d at 815* (quotation omitted). "If, to make a prima facie showing on a given question, the **[*21]** members of a proposed class will need to present evidence that varies from member to member, then it is an individual question. If the same evidence will suffice for each member to make a prima facie showing, then it becomes a common question." *Id.* (quotation omitted).

Predominance "trains on the legal or factual questions that qualify each class member's case as a genuine controversy" and "tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 624, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*. The predominance requirement overlaps considerably with *Rule 23(a)(2)*'s commonality requirement, but is "far more demanding." *Id.* "Where liability determinations are both individual and fact intensive, class certification under *Rule 23(b)(3)* is improper." *Miller v. Janssen Pharmaceutica Prods., L.P., No. 05-CV-4076-DRH, 2007 U.S. Dist. LEXIS 31863, 2007 WL 1295824, at *7 (S.D. Ill. May 1, 2007)*.

"Analysis of predominance under *Rule 23(b)(3)* begins, of course, with the elements of the underlying cause of action." *Messner, 669 F.3d at 818*, *quoting* *Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 809, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011)*. Antitrust claims require that a plaintiff prove: (1) that the defendant violated ***antitrust law***; and (2) that the antitrust violation caused them some injury. *Id.* (citations omitted). "[I]ndividual injury (also known as antitrust impact) is an element of the cause of action; to prevail on the merits, **[*22]** every class member must prove at least some antitrust impact resulting from the alleged violation." *Reed v. Advocate Health Care, 268 F.R.D. 573, 581 (N.D. Ill. 2009)* *quoting* *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 311 (3d Cir. 2008)*, as amended (Jan. 16, 2009). A plaintiff's burden at the class certification stage is to "demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members." *Messner, 669 F.3d at 818* (quotations omitted).

In this case, the "fact of injury" is not susceptible to common class proof, and would require individualized inquiry to determine whether the sale of a given parcel was actually higher than it would have been in the absence of the alleged conspiracy. As the defendants note, "[o]ut of all of the parcels that sold to tax buyers for 2006 and 2007 at a rate of 1-18% that also were up for auction for 2004-2005 and 2008-2012, 59% sold at the same or higher rate in at least one other year." (Doc. 230 at 11). This suggests that a significant number of properties owned by putative class members were not in fact impacted by the alleged anticompetitive behavior.

Plaintiffs have not identified a class-wide applicable method for determining whether a given parcel was impacted by the conspiracy. They merely assert that **[*23]** "[t]he bids at the 2006 and 2007 St. Clair County taxes sales were significantly higher than those of the years preceding and after," and "[i]t will also be the same evidence for all class members." (Doc. 231 at 6). These conclusory assertions alone do not survive the "rigorous analysis" required for class certification.[5] *See* *Parko v. Shell Oil Co., 739 F.3d 1083, 1085 (7th Cir. 2014)* ("Mere assertion by class counsel that common issues predominate is not enough.")

Plaintiffs fare no better on the question of whether individualized damages defeat certification in this case. Defendants correctly point out that a number of factors influence what a potential tax purchaser would bid on a property, including location, size, terrain, zoning, condition of any structures and accessibility. (Doc. 221 at 17). Obviously, these factors vary from parcel to parcel. In the absence of a class-wide factual or statistical methodology for determining which properties were affected by the alleged antitrust violations, the Court would be forced to engage in a complicated and tedious property-by-property analysis of whether each property was purchased at a higher rate than it would have in a non-tainted auction - presumably by taking into consideration a

[5] Subsequent to filing their Motion for Class Certification, Plaintiffs disclosed Dr. Carl Peters as an expert. Dr. Peters appears to have conducted some statistical analyses regarding the overall results of the 2006 and 2007 tax year auctions and how they compare with other years and other counties. (Peters Expert Report, Doc. 255-1). While Dr. Peters posits an overall potential damage figure, he offers no figures or methodology which would enable a finder of fact to determine whether any given parcel had been impacted by the alleged anticompetitive behavior.

combination **[*24]** of historical data (if a given property had been sold in other years) and expert testimony as to that parcel's characteristics as viewed by a disinterested tax auction purchaser.

Plaintiffs concede that the class claims will require individualized proof for damages, but emphasize that the need for individualized damage determinations is not necessarily grounds to deny certification. *See* *Mullins v. Direct Digital, LLC, 795 F.3d 654 671, (7th Cir. 2015)*. That is true, but if "...fact of damage cannot be established for every class member through proof common to the class, the need to establish antitrust liability for individual class members defeats *Rule 23(b)(3)* predominance" (quotation omitted) *Reed, 268 F.R.D. at 582 (N.D. Ill. 2009)*.

Moreover, *Rule 23(b)(3)* also requires that a class action be "superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. Factors relative to this determination include the class members' interests in individually controlling the prosecution or defense of separate actions; the extent and nature of any litigation concerning the controversy already begun by or against class members; the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and the likely difficulties in managing a class action. *Id.*

Class **[*25]** action is not the superior vehicle for litigation of this matter. Rather, a class action would rapidly become unmanageable. While it would be more efficient to consolidate the litigation as it relates to that existence of a conspiracy, that benefit is outweighed by the necessity of conducting hundreds or thousands of individualized hearings on impact and damages. The Court acknowledges that because of (relatively) low individual recovery potential, individual class members would not likely be interested in personally controlling their claims. On balance, however, this Court concludes that, based on the above-detailed issues with respect to predominance and superiority, class certification is inappropriate under *Rule 23(b)(3)*.

Conclusion

For the foregoing reasons, Plaintiffs' Motion for Class Certification (Doc. 208) is **DENIED**. Plaintiffs' Motion for Leave to File Supplemental Exhibit (Doc. 264) is **DENIED** as moot.

IT IS SO ORDERED.

Opinion

MEMORANDUM AND ORDER RE: MOTION TO DISMISS SECOND AMENDED COMPLAINT

Plaintiff Ixchel Pharma, LLC ("Ixchel") brought this action against defendant Biogen Inc. ("Biogen") asserting federal and state antitrust and state tort claims arising from an agreement that plaintiff entered into with non-party Forward Pharma FA ApS ("Forward") regarding the development of a pharmaceutical drug and a settlement agreement defendant entered into with Forward. Before the court is defendant's Motion to Dismiss the Second Amended Complaint pursuant to *Federal Rule of Civil Procedure 12(b)(1)* and *12(b)(6)*. (Docket No. 37.)

I. Procedural History

Plaintiff initiated this action alleging: (1) violation of the *Sherman Act, 15 U.S.C. § 1*; (2) tortious interference with contract; (3) intentional and negligent interference with prospective economic advantage; (4) violation of the **[*2]** *California Cartwright Act, Cal. Bus. & Prof. Code § 16700, et seq.*; and (5) violation of California's Unfair Competition Law ("UCL"). Plaintiff filed a First Amended Complaint ("FAC") on June 14, 2017 (Docket No. 17), which the court dismissed on September 14, 2017 for four reasons: (1) plaintiff did not appear to have Article III standing because it had not allegedly suffered an actual or imminent injury in fact; (2) plaintiff was not a current or potential competitor in the alleged market and therefore did not allege antitrust injury; (3) plaintiff's tortious interference claim failed to allege "wrongful means"; and (4) plaintiff could not satisfy either the UCL's "unlawful" or "unfairness" prongs because plaintiff's other claims had been dismissed and plaintiff's allegations of harm were speculative. (Sept. 12 Order Re: Mot. to Dismiss (Docket No. 25).)

On October 2, 2017, plaintiff filed a Second Amended Complaint ("SAC") asserting all of the same claims the court previously dismissed. (Docket No. 34.) In the Second Amended Complaint, plaintiff's Sherman and Cartwright Act claims remain unchanged from the First Amended Complaint. Plaintiff has amended its other claims and added (1) an allegation that defendant included an illegal "non-compete" **[*3]** provision in its agreement with Forward; (2) an allegation that Forward did not wait the necessary amount of time before it stopped working for plaintiff; and (3) additional facts related to speculative harms plaintiff allegedly suffered.

II. Discussion

A. Sherman Act and Cartwright Act

To bring a Sherman Act or Cartwright Act claim, a plaintiff must establish antitrust standing.[1] See *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535 n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*; *Dang v. S.F. Forty Niners, 964 F. Supp. 2d 1097, 1110 (N.D. Cal. 2013)*. For a plaintiff to have antitrust standing, it must have an antitrust injury. See *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 110 n.5, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*; see also *Am. Ad Mgmt., 190 F.3d at 1055*. Antitrust injury requires that a plaintiff be "a participant in the same market as the alleged malefactors." *Bhan v. NME Hospitals, Inc., 772 F.2d 1467, 1470 n.3 (9th Cir. 1985)*.

The court previously dismissed plaintiff's Sherman and Cartwright Act claims because it held that plaintiff had not alleged an antitrust injury. (Docket No. 25 at 7.) Plaintiff concedes its allegations as to these claims are identical to those in the First Amended Complaint. (Pl.'s Opp'n at 1 (Docket No. 40).) The court therefore dismisses them for the reasons discussed in the court's September 12 Order. (Docket No. 25 at 4-7.)

B. Tortious Interference with Contract

Although plaintiff's Second Amended Complaint pleads additional facts related to defendant's alleged tortious interference with contract, **[*4]** this claim continues to suffer from the same shortfalls this court identified in its September 12, 2017 Order granting defendant's Motion to dismiss the First Amended Complaint.

A claim for tortious interference with a contract requires the plaintiff allege: "(1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of this contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship and (5) resulting damage." *Quelimane Co. v. Stewart Title Guar. Co., 19 Cal. 4th 26, 55, 77 Cal. Rptr. 2d 709, 960 P.2d 513 (1998)*. While tortious interference with a contract does not generally require independent wrongfulness, see id., interference with an at-will contract requires a pleading of wrongful means. *Reeves v. Hanlon, 33 Cal. 4th 1140, 1152, 17 Cal. Rptr. 3d 289, 95 P.3d 513 (2004)*. The court previously held that the Forward-Ixchel Agreement was an at-will contract because Forward could terminate it at any time, and thus in order to plead tortious

[1] Antitrust standing is distinct from Article III standing. As the court noted when it dismissed plaintiff's First Amended Complaint, plaintiff also does not appear to have Article III standing because it has not allegedly suffered an actual or imminent injury in fact, and this alone would be enough to dismiss the Second Amended Complaint. See *Clapper v. Amnesty Int'l USA, 568 U.S. 398, 409, 133 S. Ct. 1138, 185 L. Ed. 2d 264 (2013)*; *Maya v. Centex Corp., 658 F.3d 1060, 1067 (9th Cir. 2011)* (injury in fact must be "actual or imminent, not conjectural or hypothetical"); cf. *Brotech Corp. v. White Eagle Int'l Techs. Grp., Inc., No. Civ.A.03-232, 2004 U.S. Dist. LEXIS 11552, 2004 WL 1427136, at *6 (E.D. Pa. June 21, 2004)* (antitrust injury was too speculative where there were insufficient allegations regarding how far plaintiff had gone in seeking "FDA approval, when such approval may be anticipated, or whether it will be prepared to enter the product to market" upon FDA approval).

interference plaintiff must also allege "that the defendant engaged in an independently wrongful act." (Id.; see also Docket No. 25 at 8-10.)[2]

In the Second Amended Complaint, plaintiff identifies two allegedly "wrongful means": (1) Forward's cessation of clinical trial work following termination **[*5]** of its agreement with plaintiff (SAC ¶ 64) and (2) Forward's failure to wait the required 60 days before ceasing its work with plaintiff after serving its notice of termination (SAC ¶ 62).

With regard to the first claim, plaintiff alleges that Forward breached an obligation to conduct clinical trials after its Collaboration Agreement with plaintiff had terminated. (FAC 34; SAC 64.) However, the court previously noted that such an obligation to continue with trials post-termination did not exist. (Docket No. 25 at 10.) Thus, defendant cannot be liable for inducing Forward to breach this nonexistent duty.

As to plaintiff's new claim that Forward failed to honor the full 60-day notice period, plaintiff does not allege that defendant instructed Forward not to wait the requisite time period. In fact, plaintiff merely indicates that defendant instructed Forward to terminate its existing contract with plaintiff, but has not alleged that defendant instructed Forward to in any way breach the existing contract or terminate it in such a way that would constitute a violation. To state a valid claim for tortious interference with a contract, plaintiff must allege that defendant's "intentional acts **[*6]** [were] designed to induce a breach or disruption of the contractual relationship" between Forward and plaintiff. See *Quelimane Co., 19 Cal. 4th at 55*. Here, plaintiff has pled that defendant induced Forward to terminate its contracts with plaintiff, but plaintiff has not identified any evidence that indicates that defendant specifically told Forward to terminate its contract with plaintiff before the requisite 60 days had elapsed, or to breach its contract in any other way. Accordingly, plaintiff has failed to aver that defendant intentionally directed this alleged breach.

Additionally, plaintiff fails to allege any harm that resulted from this alleged early termination. Plaintiff does not, and seemingly cannot, allege that had Forward waited 60 days to cease its work on the clinical trials, plaintiff would have avoided the alleged speculative harms it asserts. Accordingly, even if plaintiff had satisfied the other requirements of a claim for tortious interference with a contract, plaintiff's failure to plead "resulting damage" means that its tortious interference claim based on this supposed breach would still warrant dismissal. See **[*7]** *Sebastian Int'l, Inc. v. Russolillo, Civ. No. 00-3476 SVW JWJX, 2005 U.S. Dist. LEXIS 45828, 2005 WL 1323127, at *7 (C.D. Cal. Feb. 22, 2005)*(plaintiff claiming intentional interference with contract based on induced breach must show damages "attributable to" the alleged induced breach "and not other causes unrelated to the alleged wrong").

C. Intentional and Negligent Interference with Prospective Economic Advantage

As with plaintiff's claim for intentional interference with a contract, plaintiff fails to allege independently wrongful conduct, a necessary requirement to sustain its claims for intentional and negligent interference with prospective economic advantage. (Docket No. 25 at 11.) Accordingly, the court must dismiss plaintiff's third and fourth causes of action.

D. UCL

California's Unfair Competition Law prohibits unfair competition, which is defined to include "any unlawful, unfair, or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*.

1. Unlawfulness

Because the court would dismiss all of plaintiff's other claims, as discussed above, the unlawful prong of the Unfair Competition Law is not met. See *name.space, Inc. v. Internet Corp. for Assigned Names & Numbers, Civ. No. 12-8676 PA (PLAx), 2013 U.S. Dist. LEXIS 72790, 2013 WL 2151478, at *9 (C.D. Cal. Mar. 4, 2013)*; *Berryman v. Merit Prop. Mgmt., Inc., 152 Cal. App. 4th 1544, 1554, 62 Cal. Rptr. 3d 177 (4th Dist. 2007)* ("[T]he UCL borrows violations of other laws . . . and makes those unlawful practices actionable under the UCL.").

---

[2] Plaintiff again attempts to argue, using the same reasoning the court previously rejected, that there is no independently wrongful act requirement in this case. However, the court remains unpersuaded by plaintiff's argument and again holds that independent wrongfulness is a required element.

In an **[*8]** attempt to otherwise satisfy the unlawfulness requirement, plaintiff argues that defendant's inclusion of § 2.13 in the Forward-Biogen Agreement is an allegedly illegal "non-compete" provision that violates *California Business & Professions Code § 16600* and New York common law. (SAC ¶¶ 56, 59, 113.) However, the court does not find that § 2.13 is in fact a non-compete agreement. The Forward-Biogen Agreement expressly preserves Forward's ability to compete against Biogen under the terms of a co-exclusive license. In fact, the Agreement explicitly permits Forward to "authoriz[e] contractors to perform services for [Forward], including services to manufacture or import products and to perform wholesale and distribution services for [Forward]." Forward-Biogen Agreement § 3.01. Therefore, § 2.13 clearly does not prevent Forward from developing and selling any pharmaceutical products containing DMF, as plaintiff asserts, and thus does not prevent Forward from competing with Biogen. Accordingly, this section cannot be classified as a "non-compete covenant," which Black's Law Dictionary defines as a commitment "not to engage in the same type of business." Black's Law Dictionary 420 (9th ed. 2009).

Rather than defining § 2.13 as some sort of illegal non-compete agreement, **[*9]** the court views it instead as an ancillary restraint, one that is subordinate to the larger, lawful agreement between Forward and defendant. Section 2.13 is merely a restriction that prevents Forward from competing with defendant in very limited and defined circumstances, and as such is not subject to the principles that govern non-competes as a matter of law. See *Educ. Impact, Inc. v. Danielson, Civ. No. 14-937 FLW, LGHG, 2015 U.S. Dist. LEXIS 9467, 2015 WL 381332, at *8 (D.N.J. Jan. 28, 2014)*(principles that govern "non-compete clause" were "not applicable" when license "restricted [licensor] from competing with [licensee] in only defined circumstances").

The Supreme Court has explained that the Rule of Reason "has been regarded as a standard for testing the enforceability of covenants in restraint of trade which are ancillary to a legitimate transaction." *Nat'l Soc. of Prof'l Engineers v. United States, 435 U.S. 679, 689, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. Whether or not § 2.13 is a non-compete clause, because it falls outside of the employment context, the court would analyze its legality under the ***antitrust law***'s Rule of Reason and not the narrower rule of per se illegality *§ 16600* applies to non-compete agreements in employment contracts. See, e.g., *Martikian v. Hong, 164 Cal. App. 3d 1130, 1133, 211 Cal. Rptr. 66 (2nd Dist. 1985)*; *Ikon Office Solutions, Inc. v. Rezente, Civ. No. 2:10-1704 WBS KJM, 2010 WL 5129293, at *4 n.5 (E.D. Cal. Dec. 9, 2010)* (explaining that **[*10]** *Section 16600* "bars restrictive covenants in employment contracts"); *Dayton Time Lock Service, Inc. v. Silent Watchman Corp., 52 Cal. App. 3d 1, 6, 124 Cal. Rptr. 678 (1975)*(applying the Rule of Reason to a *Section 16600* challenge to an exclusive dealing arrangement).

Although plaintiff argues that *Section 16600*, and not the Rule of Reason, should be applied in this case, California courts have concluded that *Section 16600* does not apply outside of the employment context. The case law plaintiff relies on, notably *Edwards v. Arthur Andersen LLP, 44 Cal. 4th 937, 81 Cal. Rptr. 3d 282, 189 P.3d 285 (2008)*, indicates that *Section 16600*, rather than the Rule of Reason, applies when assessing "employee noncompetition agreements," but plaintiff has identified no case law expanding the Edwards decision to situations outside of the narrow employee context. When restraints, whether ancillary restraints as is the case here, or non-compete clauses, do not involve an employment agreement, a court must apply the ***antitrust law***'s Rule of Reason. See, e.g., *Martikian v. Hong, 164 Cal. App. 3d 1130, 1133, 211 Cal. Rptr. 66 (2d Dist. 1985)* (upholding restrictive covenant in commercial lease under antitrust principles and explaining that "from earliest times there has been developed a 'rule of reason' whereby any given restraint is to be tested as lawful or unlawful" (citing *Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*). Accordingly, the court finds that the legality of § 2.13 must be analyzed according to the Rule of Reason. See *USS-POSCO Indus. v. Case, 244 Cal. App. 4th 197, 209, 197 Cal. Rptr. 3d 791 (1st Dist. 2016)*(holding Edwards inapplicable unless the provision at issue **[*11]** is a "quintessential noncompete agreement that expressly restrain[s] an employee").

The Rule of Reason states that "the antitrust laws prohibit only those contracts which unreasonably restrain competition." *Centeno v. Roseville Community Hosp., 107 Cal. App. 3d 62, 72, 167 Cal. Rptr. 183 (3rd Dist. 1979)*. "The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49 n. 15, 97 S. Ct. 2549, 53 L. Ed. 2d 568* (citing *Board of Trade of City of Chicago v. U.S., 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*. Because all inquiry conducted under the Rule of

Reason "is confined to a consideration of impact on competitive conditions," *Nat'l Soc. of Prof'l Engineers, 435 U.S. at 690*, it requires that plaintiff file well-pleaded allegations of harm to competition. See *Tanaka v. University of Southern California, 252 F.3d 1059, 1063 (9th Cir. 2001)*.

The court previously rejected plaintiff's First Amended Complaint, holding that the "allegations are limited to speculative harms to competition." (Docket No. 25 at 12.) The court finds that the Second Amended Complaint adds nothing new, and thus again must dismiss this cause of action for failure to plead harm to competition. Plaintiff re-invokes its allegation that, due to defendant's actions, it lost a $150,000 grant, (Pl.'s Opp'n at 49), but this allegation does not establish injury in fact as a lost grant does not constitute a harm to competition. Further, although **[*12]** plaintiff claims that the Second Amended Complaint added allegations that § 2.13 completely blocks Forward from competing with defendant, (*id. at 17-18*), as described above, the Forward-Biogen Agreement explicitly granted Forward the right to compete in particular situations. Accordingly, the court holds that plaintiff's purported harms remain entirely speculative and do not sufficiently allege harm to competition.[3]

2. Unfairness

In the antitrust context, the unfairness prong of the Unfair Competition Law requires conduct "that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. Unfairness must be "tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Id. at 186-87*.

Here, plaintiff fails to identify and sufficiently allege conduct tethered to an actual or threatened impact on competition. As with the First Amended Complaint, plaintiff's allegations are limited to speculative harms to competition, as discussed above. (See Docket No. 25 at 12.) Accordingly, the court must **[*13]** dismiss plaintiff's sixth cause of action for violation of California's Unfair Competition Law.

IT IS THEREFORE ORDERED that defendant's Motion to Dismiss (Docket No. 37) be, and the same hereby is, GRANTED. The Second Amended Complaint is hereby DISMISSED. Plaintiff has already amended its complaint two times, and the court finds that further amendment as to plaintiff's first, second, third, and fourth claims would be futile. However, because plaintiff presented a new argument related to defendant's alleged violation of the California Unfair Competition Law, the court will grant plaintiff one more opportunity to amend its complaint with regard to this claim. Plaintiff has twenty days from the date this Order is signed to file a Third Amended Complaint, if it can do so consistent with this order.

Dated: January 25, 2018

WILLIAM B. SHUBB

UNITED STATES DISTRICT JUDGE

End of Document

[3] In its Opposition to the Motion to Dismiss, plaintiff makes a weak argument that § 2.13 also violates New York Law. (Id. at 28-19.) However, plaintiff previously disavowed reliance on New York law in its Complaint (SAC ¶ 60) and thus cannot now attempt to rely on it.

COURT'S RULING AND ORDER RE:

1) PLAINTIFFS' MOTION FOR CLASS CERTIFICATION; AND

2) PLAINTIFFS' MOTION FOR PRELIMINARY INJUNCTION

I.

BACKGROUND

Plaintiffs, a group of owners of Multi-Dwelling Units ("MDUs"), brought this putative class action against Defendant DirecTV. Plaintiffs allege that DirecTV "uses an illegal sham process which enables it to violate the rights of the owners of MDUs in, *inter alia*, the State of California by permanently affixing its satellite dishes and associated equipment to rooftops, external walls and other common or restricted areas without Landlord consent.[1] Plaintiffs bring this action to stop this alleged policy and practice.[2]

---

[1] Complaint, ¶2.

Plaintiffs allege that DirecTV delivers its satellite television service to subscribers who reside in MDUs by means of satellite dishes and associated equipment that it installs in, on, or near the MDUs.[3] Because the DirecTV system requires unrestricted "line of sight" access to a satellite, the Equipment is typically affixed permanently to the exterior of the MDU in which the subscriber resides and in which the subscriber's television is to be used.[4] Plaintiffs allege that DirecTV **[*2]** knows that it is, and at all times relevant, was, improper and illegal to permanently affix its Equipment to common or restricted areas of an MDU, such as the MDU's exterior walls or rooftop, without first obtaining the authorization of the Landlord.[5]

The Plaintiffs allege that while the Federal Communications Commission had issued a regulation that limits restrictions by Landlords on attachment of devices (such as DirecTV's equipment) to property "within the exclusive use or control" of a tenant, it did not diminish the ability of Landlords of MDUs to prohibit the installation or use of such equipment in common or restricted access areas not within the tenant's exclusive use or control.[6] DirecTV allegedly knows that it cannot permanently attach its equipment to the exterior wall or roof of an MDU without Landlord consent. However, DirecTV's policy and procedure for obtaining authorization for such attachment purportedly fails to take proper account of the Landlord's rights.[7]

According to the Complaint, DirecTV requests that its *subscribers* submit to it a written authorization form ("the Form"). The Form allegedly acknowledges that installation of the Equipment is improper without prior **[*3]** approval of the Landlord, and purports to release DirecTV from any liability arising from the installation of the Equipment.[8] The Installation Form gives MDU tenants two alternatives: i) either obtain the landlord's written authorization for the installation of the equipment by getting the Landlord to sign and return Part 1 of the installation form to DirecTV; or ii) simply sign the Form themselves and return to DirecTV Part 2 of the Installation Form, which states: "Landlord approval of a DirecTV System installation at [address] has been verbally approved by my landlord (or is not required pursuant to my lease or rental agreement)."[9]

However, the Plaintiffs allege that DirecTV's purpose in allowing customers to obtain "consent" through part 2 of the Form is to help it circumvent the requirement that it obtain the required Landlord consent, thereby enabling DirecTV to sell its services to prospective customers.[10] Part 2 of the Form allegedly enables DirecTV "to document and perpetuate the fiction that it has obtained the required Landlord consent when it knows that it has not."[11] Plaintiffs allege that DirecTV has had and adheres to a uniform sham practice and policy designed to evidence **[*4]** the fiction that it has obtained consent from the Landlord and thereby justify the wrongful installation of the Equipment — a policy and practice that was conceived by, is directed by, and is implemented under the direction of, the corporate decision-makers in DirecTV's Los Angeles County corporate headquarters.[12]

[10] Complaint, ¶14.

[11] *Id.*

[12] Complaint, ¶15.

Plaintiffs allege that DirecTV has a duty to avoid actions which are likely to breach a legal duty and injure a foreseeable class of persons such as Landlords.[13] It is allegedly reasonable for companies to obtain actual permission from Landlords prior to permanently installing their equipment on a Landlord's MDU, and it is unreasonable to have a policy of making installations without Landlord permission.[14] Rather than meet this reasonable standard of care, Plaintiff alleges that DirecTV instead authorized installation of its Equipment "based on nothing more than the representation of tenants by accepting Part 2 of the Installation Form."[15]

Based on these allegations and the other allegations more fully set forth in the operative pleading (and following Defendant's prior motion to strike), Plaintiffs allege a sole claim for violation of *Business & Professions Code §§17200 et seq.*

Plaintiffs have two (2) motions before **[*5]** the Court. In the first motion, Plaintiffs seek an order certifying the following injunctive relief class:

> All persons or entities ("Landlords") that own and rent or lease residential MDUs in the State of California upon or in common or restricted areas of which Defendant DIRECTV, LLC, or its agents ("DIRECTV") have permanently installed DIRECTV Equipment.

In the second motion, Plaintiffs move for a preliminary injunction, restraining Defendant DirecTV, LLC or its agents during the pendency of this action from entering into common or restricted areas and/or attaching its equipment thereto, of residential multi-dwelling units in the State of California based solely on the representation of a renter who wishes to subscribe to DirecTV's services that the landlord has authorized the installation or that no permission of the landlord is required for the installation.

For the reasons discussed *infra*, the motion for class certification of the injunctive relief class is granted. The motion for a preliminary injunction is denied.

II.

ISSUE WITH DOCUMENTS LODGED UNDER SEAL

Plaintiffs have lodged with the Court copies of unredacted documents in support of the motion for class certification, pursuant **[*6]** to the parties' stipulated protective order. However, where a party wants to use at trial (or on a summary judgment motion) documents that are subject to a confidentiality agreement or protective order, and does *not* want the documents sealed, he or she must:

> — lodge the unredacted documents with the court clerk as required on a motion to seal (¶ *9:417*);
> — file redacted copies of the documents (redacted so as to conceal the protected portions); and
>
> — give notice to opposing parties that the documents will become part of the public court file unless they file a timely motion to seal. See California Practice Guide, Civil Procedure Before Trial, ¶9:420 (The Rutter Group 2017) (citing *CRC 2.551(b)(3)* and Savaglio v. Wal-Mart Stores, Inc., supra, 149 CA4th at 601, 57 CR3d at 224).

Under *CRC 2.551(b)(3)(B)*, if the party that produced the documents and was served with the notice under (A)(iii) fails to file a motion or an application to seal the records within 10 days or to obtain a court order extending the time to file such a motion or an application, the clerk must promptly transfer all the unredacted records subject to the

---

[13] Complaint, ¶17.

[14] *Id.*

[15] *Id.*

confidentiality agreement or protective order and any pleadings, memorandums, declarations, and other documents that disclose the contents of the records from the envelope, container, **[*7]** or secure electronic file to the public file. If the party files a motion or an application to seal within 10 days or such later time as the court has ordered, these documents are to remain conditionally under seal until the court rules on the motion or application and thereafter are to be filed as ordered by the court. See *CRC 2.551(b)(3)(B)*.

Thus, the Court can and has considered the lodged, unredacted documents. In doing so, however, the Court notes that either party may file an application to seal the documents within 10 days of this order. The application must include an appropriate proposed order for the Court's signature. Unless a non-filing party objects, no hearing will be required for the application. The application must state clearly on the first page that, pursuant to today's Ruling and Order, no hearing date was required by the Court or requested by any non-filing party. If no application to seal is made within 10 days, the lodged documents will be publicly filed.

III.

MOTION FOR CLASS CERTIFICATION

A. Standards governing motions for class certification

CCP § 382 allows the Court to certify a class action "when the question is one of a common interest, of many persons, or when the parties are numerous, **[*8]** and it is impracticable to bring them all before the court..." Additionally, "[T]here must be questions of law or fact common to the class that are substantially similar and predominate over the questions affecting the individual members; the claims of the representatives must be typical of the claims or defenses of the class; and the class representatives must be able to fairly and adequately protect the interests of the class." *Wershba v. Apple Computer, Inc. (2001) 91 Cal.App. 4th 224, 237-238, 110 Cal. Rptr. 2d 145*.

Stated differently, there are two broad requirements for a class action: 1) an ascertainable class; and 2) a well-defined community of interest. *Hicks v. Kaufman & Broad Home Corp. (2001) 89 Cal. App. 4th 908, 913, 107 Cal. Rptr. 2d 761*. *See also* *Brinker Rest. Corp. v. Sup. Ct. (2012) 53 Cal.4th 1004, 1021, 139 Cal. Rptr. 3d 315, 273 P.3d 513* (a plaintiff seeking certification "must demonstrate the existence of an ascertainable and sufficiently numerous class, a well-defined community of interest, and substantial benefits from certification that render proceeding as a class superior to the alternatives").

In determining whether the class is ascertainable, courts consider the size of the class, the class definition, and the means to identify class members. *Reyes v. San Diego County Board of Supervisors (1987) 89 Cal. App. 3d 1263, 1274*. The community of interest factor is established by showing: (1) predominant common questions of law or fact; (2) class representatives with claims or defenses typical of the class; and (3) **[*9]** class representatives who can adequately represent the class. *Linder v. Thrifty Oil Co. (2000) 23 Cal. 4th 429, 435, 97 Cal. Rptr. 2d 179, 2 P.3d 27*.

Further, under California law, a class action is not "superior" where there are numerous and substantial questions affecting each class member's right to recover, following determination of liability to the class as a whole. *City of San Jose v. Superior Court (Lands Unlimited) (1974) 12 Cal.3d 447, 459, 115 Cal. Rptr. 797, 525 P.2d 701*.

California follows the procedures set forth under *Federal Rules of Civil Procedure 23* for class actions, whenever California authority is lacking. *City of San Jose v. Superior Court, supra, 12 Cal. 3d at 453*.

The potentially mandatory and discretionary factors applicable to class certification include:

- whether there is an ascertainable class (mandatory);

- ■ whether there is a well-defined community of interest as to common questions of law or fact that predominate (mandatory);
- ■ whether the class is so numerous that joinder of all members is impractical;
- ■ whether the claims of the representative plaintiff are typical of the class;
- ■ whether substantial benefits accrue to the litigants and courts;
- ■ whether the proposed class is manageable;
- ■ whether the person representing the class is able to fairly and adequately protect the interests of the class; and
- ■ whether a class action is superior (including whether individual plaintiffs would bring claims for small sums).

E.g., Feitelberg v. Credit Suisse First Boston, LLC (2005) 134 Cal.App.4th 997, 1014, 36 Cal. Rptr. 3d 592; *Linder v. Thrifty Oil Co. (2000) 23 Cal.4th 429, 435, 97 Cal. Rptr. 2d 179, 2 P.3d 27*; *Prince v. CLS Transp., Inc. (2004) 118 Cal.App.4th 1320, 1324, 13 Cal. Rptr. 3d 725*; *In re Cipro Cases I and* ***[*10]*** *II (2004) 121 Cal.App.4th 402, 409*.

The burden of proof on a motion for class certification is on the party seeking certification. *Washington Mutual Bank, NA. v. Superior Court (Briseno) (2001) 24 Cal. 4th 906, 922, 103 Cal. Rptr. 2d 320, 15 P.3d 1071*; *Soderstedt v. CBIZ S. California, LLC (2011) 197 Cal.App.4th 133, 154, 127 Cal. Rptr. 3d 394*. This usually requires demonstration of predominance of common issues of law and fact, and manageability of the proposed class. *Lockheed Martin Corp. v. Sup.Ct. (Carrillo) (2003) 29 Cal.4th 1096, 1103-1104, 131 Cal. Rptr. 2d 1, 63 P.3d 913*; California Practice Guide, Civil Procedure Before Trial, ¶14:99.2 (The Rutter Group 2017). In making the determination as to whether the requirements for a class action have been met, the court may consider not only the parties' pleadings but also extrinsic evidence, including declarations and discovery responses. California Practice Guide, Civil Procedure Before Trial, ¶14:99 (The Rutter Group 2017). The court must examine together all of the evidence presented by the moving and opposing parties "under the prism of plaintiffs theory of recovery." *Department of Fish & Game v. Sup.Ct. (Adams) (2011) 197 Cal.App.4th 1323, 1349, 129 Cal. Rptr. 3d 719*

The burden is on the party seeking class certification to establish each of the class prerequisites through substantial evidence. *Say-On Drug Stores, Inc. v. Superior Court (2004) 34 Cal.4th 319, 327*. In weighing the evidence, the Court does not evaluate whether the claims asserted are legally or factually meritorious. *Linder v. Thrifty Oil Co. (2000) 23 Cal.4th 429, 439-440, 97 Cal. Rptr. 2d 179, 2 P.3d 27*.

B. *CCP §382* controls, not the Federal Rules of Civil Procedure, for the putative injunctive relief class

Plaintiffs argue that the standards of *Federal Rule of Civil Procedure 23(b)(1)(A)* and *23(b)(2)* govern the motion for certification **[*11]** of this injunctive relief class. Recently, however, the Court of Appeal for the Fourth District stated:

> [T]here is no gap in California precedent to be filled by reference to *Federal Rules of Civil Procedure, rule 23(b)(1)(A)* or *(b)(2)*(28 U.S.C.) on the issue of what class certification standards must be met when a plaintiff seeks only declaratory or injunctive relief on behalf of a class. *Even when the plaintiff seeks solely declaratory or injunctive relief*, California case law follows the well-established requirements that our Supreme Court has consistently stated, namely, (as relevant here) that the plaintiff must establish that (1) the class is ascertainable; (2) common Questions predominate; and (3) a class action would provide substantial benefits, making it superior to other procedures for resolving the controversy. *Hefczyc v. Rady Children's Hospital-San Diego (2017) 17 Cal.App.5th 518, 535-536, 225 Cal. Rptr. 3d 641* (emphasis added).

In light of this authority, Plaintiffs' reliance on Federal *Rule 23(b)(2)* for the notion that "the party seeking certification must show that 'the party opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole'"[16] is not persuasive. Nor is the Plaintiffs' argument that **[*12]** "[f]or a class to be certified under these

---

[16] Motion at 11:14-17 (citing FRCivPro 23(b)(2)).

sections, '[it is sufficient if class members complain of a pattern or practice that is generally applicable to the class as a whole,' even if not all class members have been injured by the challenged practice."[17]

Accordingly, Plaintiffs must demonstrate that the class certification requirements as set forth under California law (referenced *supra*) are satisfied.

C. Discussion

With the above standards in mind, Plaintiffs seek an order certifying the following injunctive relief class:

> All persons or entities ("Landlords") that own and rent or lease residential MDUs in the State of California upon or in common or restricted areas of which Defendant DIRECTV, LLC, or its agents ("DIRECTV") have permanently installed DIRECTV Equipment.

As the party moving for class certification, the evidentiary burden to demonstrate the class elements are satisfied falls on Plaintiffs.

Ascertainability/Numerosity

"Ascertainability requires a class definition that is 'precise, objective and *presently* ascertainable.' Otherwise, it is not possible to give adequate notice to class members or to determine after the litigation has concluded who is barred from relitigating." California **[*13]** Practice Guide, Civil Procedure Before Trial, ¶14:23 (The Rutter Group 2017) (citing *Global Minerals & Metals Corp. v. Sup.Ct. (National Metals, Inc.) (2003) 113 Cal.App.4th 836, 858, 7 Cal. Rptr. 3d 28* (emphasis added)). The class should be defined in terms of objective characteristics and common transactional facts that will enable identification of the class members when such identification becomes necessary. *Hicks v. Kaufman & Broad Home Corp., supra, 89 Cal.App.4th at 915*.

The goal is to use terminology that will convey sufficient meaning "to enable persons hearing it to determine whether they are members of the class plaintiffs wish to represent." *Global Minerals & Metals Corp. v. Sup.Ct. (National Metals, Inc.), supra, 113 Cal.App.4th at 858*. Importantly, a class may be ascertainable even if the definition includes ultimate facts or conclusions of law. *Hicks, supra, 89 Cal.App.4th at 915-916*. "Class members are 'ascertainable' *where they may be readily identified without unreasonable expense or time by reference to official records*." *Thompson v. Automobile Club of Southern California, supra, 217 Cal.App.4th 719, 728* (internal citations omitted; emphasis added); *see also* *Bridgeford v. PacificHealth Corp. (2012) 202 Cal.App.4th 1034, 1041, 135 Cal. Rptr. 3d 905*. "In determining whether a class is ascertainable, the trial court examines the class definition, the size of the class and the means of identifying class members. [Citation.]" *Lee v. Dynamax, Inc. (2008) 166 Cal.App.4th 1325, 1334*.

"Courts have recognized that 'class certification can be denied for lack of ascertainability when the proposed definition is overbroad and the plaintiff offers no means by which only those class members who have claims can be **[*14]** identified from those who should not be included in the class.' [Citation.]" *Sevidal v. Target Corp. (2010) 189 Cal.App.4th 905, 921, 117 Cal. Rptr. 3d 66*.

Further, no set number is required as a matter of law for the maintenance of a class action. *Hebbard v. Colgrove (1972) 28 Cal.App.3d 1017, 1030, 105 Cal. Rptr. 172*. California case law indicates that as few as ten (10) or twenty-eight (28) members satisfies numerosity. *Bowles v. Superior Court (1955) 44 Cal.2d 574, 283 P.2d 704*; *Hebbard, 28 Cal.App.3d at 1030*.

Numerosity

---

[17] Motion at 11:17-20 (citing *Walters v. Reno (9th Cir. 1998) 145 F.3d 1032, 1047)*.

In support of numerosity, Plaintiffs reference the deposition of DirecTV's Person Most Knowledgeable ("PMK"), Adrian Dimech. Dimech testified that DirecTV installs over one million systems per year.[18] Plaintiffs also reference the 38,000 electronic signatures appearing on Part 2 of its consent form, which DirecTV produced in discovery.[19]

This evidence establishes that the putative class is sufficiently numerous.

Ascertainability

With respect to ascertainability, the Court previously determined in its earlier motion to strike that the class was ascertainable. The Court's September 11, 2015 Ruling and Order Re: Defendants' Motion to Strike Class Allegations stated:

> [A]t the pleading stage, the Court determines that class 2 is ascertainable, with respect to the UCL claim. The Court recognizes that the UCL does not "authorize an award for injunctive relief and/or restitution on behalf of a consumer who was never **[*15]** exposed in any way to an allegedly wrongful business practice." *Davis-Miller v. Automobile Club of Southern California (2011) 201 Cal.App.4th 106, 121, 134 Cal. Rptr. 3d 551*. However, in the Court's view, subclass 2 would not necessarily be overbroad as to the UCL class. The named Plaintiffs themselves have alleged injury in fact pursuant to the UCL's standing requirements, as articulated in *In re Tobacco II Cases (2009) 46 Cal.4th 98* and its progeny (holding that only the class representatives in a UCL claim must meet the standing requirements of injury and causation). In the Court's view, subclass 2 is ascertainable, insofar as it seeks relief pursuant to the UCL.[20]

Here, the class is defined in a straightforward manner. Persons who hear the class definition would know whether they are landlords that own and rent or lease residential multi-dwelling units where DirecTV has installed equipment in common or restricted areas. Further, the class is defined in terms of objective characteristics.

As alleged in the complaint, DirecTV requests that its subscribers submit to it a written authorization form ("the Form"). The Form allegedly acknowledges that installation of the Equipment is improper without prior approval of the Landlord, and purports to release DirecTV from any liability arising from the installation of the Equipment.[21] The Installation **[*16]** Form gives MDU tenants two alternatives: i) either obtain the landlord's written authorization for the installation of the equipment by getting the Landlord to sign and return Part 1 of the installation form to DirecTV; or ii) simply sign the Form themselves and return to DirecTV Part 2 of the Installation Form, which states: "Landlord approval of a DirecTV System installation at [address] has been verbally approved by my landlord (or is not required pursuant to my lease or rental agreement)."[22]

In the Court's view, actual consent by certain landlords would not be relevant in assessing whether, on a going-forward basis, DirecTV continues to implement a policy that would allow installations to occur potentially *without* a landlord's consent.

For these reasons, ascertainability is satisfied at the class certification stage.

Do common questions predominate?

---

[18] Dimech Depo. at 26:7-8 (Exh. 2 to Rosenberg Decl.).

[19] A portion of these forms for Orange County DirecTV installations from October 18, 2013 through October 27, 2013 is attached as Exhibit 7 to the Rosenberg Declaration.

[20] September 11, 2015 Ruling and Order re: Defendants' Motion to Strike Class Allegations at 8:17-9:4.

[21] Complaint, ¶12.

[22] Complaint, ¶12.

a. General standards on the "commonality" element

In deciding whether the common questions "predominate," the courts must identify the common and individual issues; consider the manageability of those issues; and, taking into account the available management tools, weigh the common issues against the individual issues to determine which of **[*17]** them predominate. California Practice Guide, Civil Procedure Before Trial, ¶14:16 (The Rutter Group 2017) (referencing *Dunbar v. Albertson's, Inc. (2006) 141 Cal.App.4th 1422, 1432-1433, 47 Cal. Rptr. 3d 83)*.

Additionally, a class action is not inappropriate simply because each member of the class may at some point be required to make an individual showing as to his or her eligibility for recovery or as to the amount of his or her damages. *Vasquez v. Superior Court (1971) 4 Cal.3d 800, 815-816, 94 Cal. Rptr. 796, 484 P.2d 964*. However, a class action "will not be permitted...where there are diverse factual issues to be resolved, even though there may be many common questions of law." *Brown v. Regents of Univ. of Calif (1984) 151 Cal. App. 3d 982, 988-89, 198 Cal. Rptr. 916*. "[E]ach member must not be required to individually litigate numerous and substantial questions to determine his right to recover following the class judgment." *City of San Jose, supra, at 460*.

In *Arenas v. El Torito, Inc. (2010) 183 Cal.App.4th 723, 108 Cal. Rptr. 3d 15*, the Court of Appeal observed:

> The focus in a class certification dispute is not entirely on the merits but on the procedural issue of what types of questions are likely to arise in the litigation—common or individual. Thus, the existence of some common issues of law and fact does not dispose of the class certification issue. (Rather, in order to justify class certification, the Supreme Court held, "[T]he proponent of certification must show ... that questions of law or fact common to the class predominate over **[*18]** the questions affecting the individual members ...." *Arenas v. El Torito, Inc., 183 Cal.App.4th at 732* (citations omitted).

Critically, the court in *Jaimez v. Daiohs USA, Inc. (2009) 181 Cal.App.4th 1286, 1298, 105 Cal. Rptr. 3d 443* recognized that that 'the trial court must evaluate whether the theory of recovery advanced by the plaintiff is likely to prove amenable to class treatment ...." (citing *Ghazaryan v. Diva Limousine, Ltd. (2008) 169 Cal.App.4th 1524, 1531, 87 Cal. Rptr. 3d 518)* (emphasis added).

However, "when the merits of the claim are enmeshed with class action requirements, the trial court must consider evidence bearing on the factual elements necessary to determine whether to certify the class." *Bartold v. Glendale Fed'l Bank (2000) 81 Cal.App.4th 816, 829, 97 Cal. Rptr. 2d 226*; *Brinker Restaurant Corp. v. Sup. Ct. (Hohnbaum), supra, 53 Cal.4th at 1023-1024*; *JP. Morgan & Co., Inc. v. Sup.Ct. (Heliotrope Gen., Inc.) (2003) 113 Cal.App.4th 195, 222, 6 Cal. Rptr. 3d 214*; *see* *Wal-Mart Stores, Inc. v. Dukes (2011) 131 S.Ct. 2541, 2551—*class determination will "(Orequently. . . entail some overlap with the merits of the plaintiffs underlying claim"]

Such issues include, e.g., "whether substantially similar questions are common to the class and predominate over individual questions or whether the claims or defenses of the representative plaintiffs are typical of class claims or defenses." *Linder v. Thrifty Oil Co. (2000) 23 Cal.4th 429, 443, 97 Cal. Rptr. 2d 179, 2 P.3d 27*; *see* *Brinker Restaurant Corp. v. Sup. Ct. (Hohnbaum), supra, 53 Cal.4th at 1024* ("whether common or individual questions predominate will often depend upon resolution of issues closely tied to the merits"); *Morgan v. Wet Seal, Inc. (2012) 210 Cal.App.4th 1341, 1358, 149 Cal. Rptr. 3d 70*.

Predominance is a comparative concept, and 'the necessity for class members to individually establish eligibility does not mean individual fact questions predominate.' [Citation.]" *Medrazo v. Honda of North Hollywood, supra*, 166 Cal.App.4th at 99-100 (emphasis added). **[*19]** Common issues are predominant when such issues would be primary to each individual action. *Caro v. Procter & Gamble Co. (1993) 18 Cal.App.4th 644,447*-48.

b. Discussion on commonality

According to Plaintiffs, DirecTV employs a policy of depending on the tenant to provide consent for installation of the equipment. Specifically, Plaintiffs reference the Demich Deposition, where he testified that DirecTV employs such a policy.[23] Demich confirms that DirecTV accepts a dwelling occupant's representation that an owner or authorized agent of the owner has consented to the installation of DirecTV equipment in common areas of an MDU as sufficient authorization to go ahead with the installation.[24] Demich confirmed that it is DirecTV's general policy that if a customer who provides a signature in §2 of the consent form, DirecTV does not independently verify the installation has actually been approved by the landlord.[25]

DirecTV's training manual sets forth its policy with obtaining permission for installation. The manual states in applicable part as follows:

> **Landlord Permission Form**
>
> This form is only required if the customer is renting the property where you will be installing DIRECTV service. Because you are modifying the property..., it is important that the customer **[*20]** has received permission from their landlord to do so.
> The form is signed by the customer, not the landlord. The form states that the customer has, in fact, received permission from the landlord to install DIRECTV equipment. You do not need to speak with or receive a signature from the landlord. The customer is responsible for getting this permission.[26]

Michael Kefalas, one of the managers of Plaintiff LBM Properties, states that he has never succeeded in having DirecTV remove an unauthorized satellite dish, and is unable to identify which dish on a roof belongs to which tenant (and DirecTV has never assisted him in doing so).[27]

Frederick Nichols, another putative class member, testified that in 2013, he and his wife discovered that DirecTV, without having sought or obtained permission, and without his prior knowledge, had installed a satellite dish on the roofs of two of his multi-unit rental properties in Torrance.[28] He says that the installations damaged the roofs.[29] Nichols said that had he been asked, he would not have agreed to the installation of these dishes on the roofs of his properties.[30]

Mark Sanger states that two DirecTV satellite dishes were installed on the rooftop of his building **[*21]** without his prior knowledge or consent.[31] He states that in November 2014, he contacted DirecTV and demanded the dishes be removed; however, DirecTV did not remove them.[32]

Ken Wayte states that in December 2014, following installation of a new roof, he was surprised to discover that DirecTV had installed a satellite dish on the roof of the Property.[33] He says he did not consent to the installation of

that dish, and that nobody ever contacted him to ask permission to make the installation.[34] Wayte says that had he been asked, he *would* not have agreed to the installation of a dish on the roof of the property.[35]

William Risconsin similarly states that in August 2016, he discovered that a new DirecTV satellite dish had been improperly installed directly onto his roof without his knowledge or consent, with wires attached to the newly refurbished building exterior.[36] He also became aware that a second DirecTV satellite dish had earlier been improperly installed directly onto the roof without his knowledge or consent.[37] A third older DirecTV satellite dish installation that he had been aware of was properly mounted onto a vertical faux chimney, but for some unknown reason was not being used.[38] Risconsin **[*22]** states that he did not agree to the installation of these two satellite dishes, and DirecTV never asked him for permission to install them.[39] Risoncon says that had he been asked, he would not have agreed to installation of these dishes on the roof of the property.[40]

John Landsberger says that in March 2015, he discovered that about nine new DirecTV satellite dishes had been improperly installed directly onto the roof of his building.[41] He says that DirecTV told him that of the nine satellite dishes that had been installed on the property, there were only three signed authorization documents in its records.[42] The others had been installed by subcontractors or retailers who sold DirecTV service.[43] Landsberger states that he did not agree to the installation of any of these satellite dishes, and DirecTV never asked him for permission to install them.[44] Had he been asked, he would not have agreed to the installation of these dishes on the roof of the property.[45]

Katharine Beckwith states that in 2014 or earlier, she discovered that DirecTV, without having sought or obtained her permission, and without her prior knowledge, had installed a satellite dish on the roof of the property.[46]

The **[*23]** evidence before the Court indicates that DirecTV has a uniform policy with respect to its authorization form. DirecTV's company-wide policy is that it accepts a tenant's representation that the landlord has authorized the installation of the equipment in common areas (in the event that the landlord has not provided written authorization for the installation). This is a common question which predominates among the class. Even if individual landlords provide written authorization, this same policy would have applied equally to them, as well. The question is whether this policy constitutes an unfair business practice in violation of the UCL. Such a question would be suitable on a class-wide basis for this putative class seeking injunctive relief.

[46] Beckwith Decl., ¶3.

The Court is not persuaded that it would be required to conduct individualized determinations with respect to consent (including examining individual leases to determine if a tenant had a lawful right to have a satellite dish installed) and whether an individual class member's rights were violated by DirecTV. While this argument may be persuasive in assessing whether a given tenant suffered damages (or otherwise is entitled to restitution under **[*24]** the UCL), Plaintiffs here solely seek certification of an injunctive relief class. If unlawful, the Court would be empowered to issue an injunction to prohibit the policy on a going-forward basis.

For these reasons, the Court finds that Plaintiffs have submitted substantial evidence supporting the notion that common questions predominate over individualized assessments.

Typicality

The purported class representative's claim must be "typical" but not necessarily identical to the claims of other class members. It is sufficient that the representative is similarly situated so that he or she will have the motive to litigate on behalf of all class members. *Classen v. Weller (1983) 145 Cal.App.3d 27, 45, 192 Cal. Rptr. 914*. Thus, it is not necessary that the class representative have personally incurred all of the damages suffered by each of the other class members. *Wershba v. Apple Computer, Inc., supra, 91 Cal.App.4th at 228*.

"Typicality refers to the nature of the claim or defense of the class representative, and not to the specific facts from which it arose or the relief sought. The test of typicality is whether other members have the same or similar injury, whether the action is based on conduct which is not unique to the named plaintiffs, and whether other class members have been injured by the same course of conduct." **[*25]** *Seastrom v. Neways, Inc. (2007) 149 Cal.App.4th 1496, 1502, 57 Cal. Rptr. 3d 903*.

Here, Plaintiffs' claims are typical. Mr. Kefalas, the managing agent for each of the Plaintiffs, has testified about Plaintiffs' experiences with the installations of DirecTV equipment on the properties. Kefalas claims that the Plaintiffs did not authorize the installation of the equipment, and that DirecTV has refused to remove the equipment when asked to do so. The Plaintiffs' experience is similar to those of the other putative class members who have submitted declarations (as set forth above).

DirecTV raises a number of arguments in opposition to typicality. First, Defendant attacks the notion that there is no evidence that the putative class of landlords was subjected to similar unauthorized attachments. Again, however, it is the allegedly unlawful policy, on a going-forward basis, which Plaintiffs seek to enjoin. They were all subjected to the same policy; whether a given landlord suffered damages does not detract from typicality for purposes of the injunctive relief class.

DirecTV also argues that Plaintiffs do not satisfy typicality because they are subject to unique defenses, including that their claim for injunctive relief is moot. Specifically, DirecTV says it has formulated **[*26]** a Restricted Address List, meaning that its satellite dishes no longer will be installed on the properties of those on the list (including Plaintiffs). This, according to DirecTV, renders the Plaintiffs' claim moot and renders their claim atypical.

The argument, however, is not persuasive. As Plaintiffs note in the reply, DirecTV's mootness argument is based on its unilateral placement of Plaintiffs' properties on the "Resident Address List." There was no voluntary settlement with the Plaintiffs (which, if this was the case, would likely be grounds for a finding that Plaintiffs lack typicality). If DirecTV's argument was followed to its logical conclusion, any time it was sued by a putative class member challenging the authorization policy, it could simply place that person or entity on its "Resident Address List" and avoid litigation of the allegedly unlawful policy. Absent a court order prohibiting an allegedly unlawful policy, a defendant could resume its practice in the future.

For these reasons, the Court determines Plaintiffs have satisfied the typicality requirement.

Adequacy of Representation

"The primary criterion in determining adequacy of representation is whether the representative, **[*27]** through qualified counsel, vigorously and tenaciously protected the interests of the class." *Simons v. Horowitz (1984) 151 Cal. App. 3d 834, 846, 199 Cal. Rptr. 134*. Additionally, the class representative must "raise claims reasonably expected to be raised by the members of the class." *City of San Jose, supra, 12 Cal. 3d at 464*. The fiduciary duty must be undertaken free of demonstrable conflicts of interest with other class members. *Amchem Prods. Inc. v. Windsor, 521 U.S. 591, 625-26, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*. The "adequacy of representation" requirement has not been precisely differentiated from the typicality requirement. *Caro v. Procter & Gamble*, supra, 18 Cal. App. 4th at 670. Other cases have stated that "adequacy of representation" depends on whether plaintiffs attorney is qualified to conduct the proposed litigation and plaintiffs interests are not antagonistic to the interests of the class. *McGhee v. Bank of America (1976) 60 Cal. App 3d 442, 450, 131 Cal. Rptr. 482*.

Here, since typicality has not been "precisely differentiated" from the adequacy requirement, and since Plaintiffs have claims typical of those of the class, they are adequate class representatives. The Court is not persuaded by DirecTV's arguments in opposition that the Plaintiffs' interests are in conflict with those of the putative class members because "the issuance of Plaintiffs' requested injunction would narrow landlords' choices and impose additional administrative costs and burdens upon them."[47] Again, the injunctive relief **[*28]** class seeks a remedy on a prospective basis. In any event, there is nothing which indicates that there would in fact be administrative costs or burdens to landlords if the injunction were to issue.

Mr. Kefalas, for his part, states that he has reviewed the complaint and written discovery in this action; has assisted in responding to said discovery on behalf of all Plaintiffs; has searched Plaintiffs' files to retrieve documents to produce; has acted as designee to testify on behalf of Plaintiff (and spent a day testifying in that capacity); has spent hours in in-person meetings and conferring by telephone with counsel; and continues to act on behalf of Plaintiffs and the class.[48]

DirecTV does not challenge the qualifications of class counsel. Class counsel Rosenberg notes that her firm, Bramson, Plutzik, Mahler & Birkhaeuser, prosecutes class actions, derivative suits, and other complex litigation nationwide.[49] These cases include consumer protection, business torts, securities, antitrust, and communications, with particular emphasis on class actions, in both state and federal courts. The firm, Ms. Rosenberg represents, has been appointed lead or co-lead counsel or a member of a litigation **[*29]** executive committee dozens of times, and in those capacities has recovered millions of dollars for class members.[50] Ms. Rosenberg attaches as Exhibit 10 a copy of the firm's resume.

Similarly, co-counsel Mark Kindall of Izard, Kindall & Raabe, states that his firm has been appointed, or has acted, as lead counsel or co-led counsel in over 60 cases throughout the country.[51] Plainly, class counsel is qualified.

For these reasons, Plaintiffs have demonstrated they are adequate class representatives, and that their counsel is adequate.

<u>Superiority</u>

In deciding whether a class action would be "superior" to individual lawsuits, the Court will usually consider:

1) The interest of each member in controlling his or her own case personally;
2) The difficulties, if any, that are likely to be encountered in managing a class action;

---

[47] Opposition at 7:26-27.

[48] Kefalas Decl., ¶3.

[49] Rosenberg Decl., ¶3.

[50] Rosenberg Decl., ¶3.

[51] Kindall Decl., ¶2.

3) The nature and extent of any litigation by individual class members already in progress involving the same controversy; and
4) The desirability of consolidating all claims in a single action before a single court.

California Practice Guide, Civil Procedure Before Trial, ¶14:16 (The Rutter Group 2017) (citing FRCivPro 23(b)(3)); *see also Basurco v. 21st Century Ins. Co. (2003) 108 Cal.App.4th 110, 120, 133 Cal. Rptr. 2d 367* and *Newell v. State Farm Gen. Ins. Co. (2004) 118 Cal.App.4th 1094, 1101, 13 Cal. Rptr. 3d 343*.

Further, under California **[*30]** law, a class action is not "superior" where there are numerous and substantial questions affecting each class member's right to recover, following determination of liability to the class as a whole. *City of San Jose v. Superior Ct., supra, 12 Cal.3d 447, 459*.

Here, each member of the class would not have an interest in controlling his or her own case personally, given the fact that the Plaintiffs, by virtue of the instant motion, seek only injunctive relief. Obtaining such individual relief would not justify the costs of individually bringing such an action. There are not significant difficulties which are apparent, and which are likely to be encountered in a class of this nature (given the fact that the Court will be assessing the legality of DirecTV's use of the authorization form). It would be desirable to consolidate all such claims before a single court. As discussed *supra*, individualized issues would not outweigh the common issues, and thus, the case would be manageable, overall — given what appears to be a uniform policy of DirecTV not verifying a landlord's consent when Part 2 of the installation form is selected. There also does not appear to be any similar litigation already in progress involving the same controversy between Plaintiffs **[*31]** and Defendant DirecTV. On balance, it would be desirable to consolidate the injunctive relief claim under the UCL in a single action.

Accordingly, the Court finds that the superiority factor is satisfied.

Conclusion

The Court determines that Plaintiffs have demonstrated, by substantial evidence, that the criteria supporting class certification are satisfied. For these reasons, the motion for certification of the injunctive relief class is granted.

IV.

MOTION FOR PRELIMINARY INJUNCTION

A. General standards on preliminary injunctions

CCP §526 provides the basis for which the Court may issue (or deny issuance of) an injunction. *CCP §527(a)* authorizes issuance of injunctions before trial "if sufficient grounds exist therefor."

Injunctions will rarely be granted (absent specific statutory authority) where a suit for damages provides a clear remedy. *Thayer Plymouth Center, Inc. v. Chrysler Motors (1967) 255 Cal.App.2d 300, 307, 63 Cal. Rptr. 148*; Pacific *Designs Sciences Corp. v. Sup.Ct. (Maudlin) (2004) 121 Cal.App.4th 1100, 1110*. Conversely, injunctive relief is more likely to be granted where a damages remedy is precluded by law. *Department of Fish & Game v. Anderson-Cottonwood Irrig. Dist. (1992) 8 Cal.App.4th 1554, 1564, 11 Cal. Rptr. 2d 222*.

Further, *CCP §526(a)(2)* lists the traditional consideration of "irreparable harm." Irreparable harm is often related to the "inadequate legal remedy" (i.e., the damages remedy is inadequate because some immeasurable harm is threatened). But it is also a separate consideration. **[*32]** Courts look for more than a mere dispute. Relief is unlikely unless someone will be badly hurt in a way which cannot be later repaired. California Practice Guide, Civil

Procedure Before Trial, ¶9:522 (The Rutter Group 2017) (referencing *People ex rel. Gow v. Mitchell Brothers' Santa Ana Theater (1981) 118 Cal.App.3d 863, 870-871, 173 Cal. Rptr. 476*.

Moreover, the threat of irreparable harm must be imminent, as opposed to a mere possibility of harm some time in the future: "An injunction cannot issue in a vacuum based on the proponents' fears about something that may happen in the future. It must be supported by actual evidence that there is a realistic prospect that the party enjoined intends to engage in the prohibited activity." California Practice Guide, Civil Procedure Before Trial, ¶9:522 (The Rutter Group 2017) (referencing *Korean Philadelphia Presbyterian Church v. California Presbytery (2000) 77 Cal.App.4th 1069, 1084, 92 Cal. Rptr. 2d 275)*.

While the statute makes no reference to the traditional equitable concern of "balancing equities," it is a crucial factor in the judge's determination: i.e., the court must exercise its discretion "in favor of the party most likely to be injured.. ..If denial of an injunction would result in great harm to the plaintiff, and the defendants would suffer little harm if it were granted, then it is an abuse of discretion to fail to grant the preliminary injunction." *Robbins v. Sup. Ct. (1985) 38 Cal.3d 199, 205, 211 Cal. Rptr. 398, 695 P.2d 695*.

While **[*33]** the Court has broad discretion in ruling on an application for preliminary injunction, such discretion must be exercised in light of the following interrelated factors:

1) Are the plaintiffs likely to suffer greater injury from denial of the injunction than defendants are likely to suffer if it is granted? *Shoemaker v. County of Los Angeles (1995) 37 Cal.App.4th 618, 633, 43 Cal. Rptr. 2d 774*.

2) Is there a reasonable probability that plaintiffs will prevail on the merits? *Robbins, supra, 38 Cal.3d at 206*.

The Court's determination must be guided by a "mix" of the potential-merit and interim-harm factors: the greater plaintiff's showing on one, the less must be shown on the other to support an injunction. *Butt v. State of California (1992) 4 Cal.4th 668, 678, 15 Cal. Rptr. 2d 480, 842 P.2d 1240*; *Pleasant Hill Bayshore Disposal, Inc. v. chip-It Recycling, Inc.* (2001) 91 Cla.App.4th 678, 696.

Importantly, the avowed purpose of a preliminary injunction is to preserve the status quo pending a trial on the merits. *Continental Baking Co. v. Katz (1968) 68 Cal.2d 512, 528, 67 Cal. Rptr. 761, 439 P.2d 889*. See also California Practice Guide, Civil Procedure Before Trial, ¶9:558 (The Rutter Group 2017) (referencing *White v. Davis (2003) 30 Cal.4th 528, 554, 133 Cal. Rptr. 2d 648, 68 P.3d 74*; *Costa Mesa City Employees' Ass'n. v. City of Costa Mesa (2012) 209 Cal.App.4th 298, 305)*. It is not an adjudication of the ultimate rights in controversy; it merely represents the trial court's discretionary decision whether the defendant should be restrained from exercising a claimed right pending trial. California Practice Guide, Civil Procedure Before Trial, **[*34]** ¶9:639 (The Rutter Group 2017); *Cohen v. Board of Supervisors (1985) 40 Cal.3d 277, 286, 219 Cal. Rptr. 467, 707 P.2d 840*. For "affirmative" or "mandatory" injunctions that alter the status quo, rather than simply preserve it, many courts hold the party seeking the injunction to the higher standard of showing a "clear" or "substantial" likelihood of success. *Dahl v. HEM Pharmaceuticals Corp., 7 F.3d 1399, 1403 (9th Cir.1993)*; *Daniels Cablevision, Inc. v. San Elijo Ranch, Inc. (S.D. Cal. 2001) 158 F.Supp.2d 1178, 1180*.

The burden is on the plaintiff to show all elements necessary to support issuance of a preliminary injunction. California Practice Guide, Civil Procedure Before Trial, ¶9:632.1 (The Rutter Group 2017); *O'Connell v. Sup.Ct. (Valenzuela) (2006) 141 Cal.App.4th 1452, 1481, 47 Cal. Rptr. 3d 147*.

B. Discussion

Plaintiffs have moved for a preliminary injunction restraining Defendant DirecTV, LLC or its agents during the pendency of this action from entering into common or restricted areas and/or attaching its equipment thereto, of residential multi-dwelling units in the State of California based solely on the representation of a renter who wishes to subscribe to DirecTV's services that the landlord has authorized the installation or that no permission of the landlord is required for the installation

As noted above, the Court must weigh two interrelated factors in assessing whether to impose an injunction: whether there is a reasonable probability that Plaintiffs will prevail on the merits at trial; and whether **[*35]** plaintiffs are likely to suffer greater injury from denial of the injunction than defendants are likely to suffer if it is granted. The Court must also consider whether Plaintiffs have an adequate remedy at law.

1. Likelihood of success on the merits

The first consideration is whether Plaintiffs have demonstrated a likelihood of success on the merits on the sole remaining claim in the case, violation of the UCL.

a. Standing Issue

At the outset, Defendant DirecTV contends that Plaintiffs do not have standing to sue under the UCL because they are neither consumers nor competitors.

Under Business and Professions Code ("B&P Code") *§ 17200*, "unfair competition shall mean and include any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising." *B&P Code §17203* provides:

> Any person who engages, has engaged, or proposes to engage in unfair competition may be enjoined in any court of competent jurisdiction. The court may make such orders or judgments, including the appointment of a receiver, as may be necessary to prevent the use or employment by any person of any practice which constitutes unfair competition, as defined in this chapter, or as may be necessary to **[*36]** restore to any person in interest any money or property, real or personal, which may have been acquired by means of such unfair competition. Any person may pursue representative claims or relief on behalf of others *only if the claimant meets the standing requirements of* *Section 17204* and complies with *Section 382 of the Code of Civil Procedure*, but these limitations do not apply to claims brought under this chapter by the Attorney General, or any district attorney, county counsel, city attorney, or city prosecutor in this state. (Emphasis added.)

In turn, *B&P Code §17204*, which was amended by Proposition 64, allows a private person to bring an action for violation of the UCL when *he "has suffered injury in fact* and has lost money or property *as a result of* such unfair competition." *Durell v. Sharp Healthcare (2010) 183 Cal.App.4th 1350, 1359, 108 Cal. Rptr. 3d 682* (emphasis added).

In *Camacho v. Automobile Club of Southern California (2006) 142 Cal.App.4th 1394, 1403, 48 Cal. Rptr. 3d 770*, the Court applied the following test for an "unfair" IJCL claim by a consumer: (1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided. *See also* *Klein v. Chevron U.S.A., Inc. (2012) 202 Cal.App.4th 1342, 1376, 137 Cal. Rptr. 3d 293* (citing *Camacho*). Whether a practice is unfair is generally a question of fact which requires consideration and weighing of evidence **[*37]** from both sides. *Klein, supra, 202 Cal.App.4th at 1376* (citing *Camacho, supra, at 1403*).

Defendants cite *Linear Technology Corp. v. Applied Materials, Inc. (2007) 152 Cal.App.4th 115, 61 Cal. Rptr. 3d 221* for the proposition that Plaintiffs do not have standing because they are neither business competitors or consumers. However, *Linear Technology Corp.* was distinguished by the Central District in *In re Yahoo! Litigation (2008) 251 F.R.D. 459*. The district court noted:

> Defendants argue that because the UCL "was enacted to protect consumers and competitors," *O'Brien v. Camisasca Automotive Mfg., Inc., 161 Cal.App.4th 388, 73 Cal.Rptr.3d 911, 918 (2008)*, plaintiffs, which are neither consumers nor defendants' competitors, lack standing under the UCL. Defendants rely on the following language in *Linear Tech. Corp. v. Applied Materials, Inc., 152 Cal.App.4th 115, 135, 61 Cal.Rptr.3d 221 (2007)*:

> "where a UCL action is based on contracts not involving either the public in general or individual consumers who are parties to the contracts, a corporate plaintiff may not rely on the UCL for the relief it seeks."
>
> The foregoing language in *Linear Tech.*, which was decided after the enactment of Proposition 64, appears not to have recognized the apparent change in the UCL's standing requirement that the Court recognized in its October 30, 2006 Order. The *Linear Tech.* court relied on the discussion in *Rosenbluth Ina, Inc. v. Super. Ct., 101 Cal.App.4th 1073, 124 Cal.Rptr.2d 844 (2002)*, regarding standing under the UCL pre-Proposition 64. However, even if this is the case, *Linear Tech.* and *Rosenbluth* do not preclude plaintiffs' claims under the UCL.
>
> Read in context, the above-quoted **[*38]** language from *Linear Tech.* does not necessarily prevent *any* corporate plaintiff from proceeding under the UCL in a case arising from a contract that does not involve either the public or individual consumers. The holdings of both *Linear Tech.* and *Rosenbluth* turn less on the fact that the alleged victims in those cases were businesses, and more on the fact that these entities were sophisticated and individually capable of seeking relief for their injuries. The alleged victims in *Linear Tech.* were Silicon Valley corporations—as distinct from "powerless, unwary consumers"—each of which "presumably [had] the resources to seek damages or other relief should it choose to do so." *Linear Tech., 152 Cal.App.4th at 135, 61 Cal.Rptr.3d 221* (quoting *Rosenbluth, 101 Cal.App.4th at 1078, 124 Cal.Rptr.2d 844*) (ellipses omitted). The potential UCL plaintiffs in *Rosenbluth* were "sophisticated corporations, most in the Fortune 1000 ..." *Rosenbluth, 101 Cal.App.4th at 1078, 124 Cal.Rptr.2d 844*.

See *In re Yahoo! Litigation (C.D. Cal. 2008) 251 F.R.D. 459, 474-475* (emphasis in original).

Thus, under *In re Yahoo!*, the focus is on the sophistication of the plaintiffs, rather than whether the plaintiffs were businesses or not. Here, as in *In re Yahoo!*, the Court cannot make a finding that the proposed class is "so uniformly sophisticated and capable of seeking relief against defendants." *In re: Yahoo! at 475*. Accordingly, Plaintiffs would have standing to **[*39]** prosecute the UCL claim.

(2) Mootness of individual claims

DirecTV also argues that Plaintiffs cannot demonstrate a likelihood of success because their individual claims are moot. DirecTV raises the mootness issue in opposing the class certification motion, arguing Plaintiffs' claims are atypical. As discussed *supra*, Defendants have not shown the claims are moot.

(3) Substantive discussion of likelihood of success

Separately, the Court must assess whether Plaintiffs have demonstrated a likelihood of success on the merits of their UCL claim. The claim is premised on the assertion that DirecTV's failure to seek or obtain permission from landlords before installing its equipment in common or restricted areas of MDUs is an unfair business practice under the UCL.

Plaintiffs' theory of the case is that DirecTV does not seek such permission in advance of installation on the putative class members' property. Plaintiffs have referenced the three tests determining whether a business practice is "unfair" under the UCL — the "Traditional Test," the "FTC Act Test," and the "Tethering Test."

The "traditional test" deems a business practice "unfair" where it "offends an established public policy or when **[*40]** the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *West v. JPMorgan Chase Bank, NA., 214 Cal.App.4th 780, 806, 154 Cal. Rptr. 3d 285 (2013)*. The determination of whether a practice is unfair under the statute "necessarily involves an examination of its impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer." *Motors, Inc., supra*, 102 Cal.App.3d at 740; *accord* *Progressive West Ins. Co. v. Superior Court, 135 Cal.App.4th 263, 286, 37 Cal. Rptr. 3d 434 (2005)*.

As noted above, in *Camacho v. Automobile Club of Southern California, supra, 142 Cal. App. 4th 1394*, the Court held that in determining whether or not a practice is "unfair" in a consumer context, courts should amity the test employed in assessing alleged violations of *§ 5* of the Federal Trade Commission Act, *15 U.S.C. § 45(a)*, under which a business practice is deemed unfair if it (1) causes substantial harm (2) that is not outweighed by countervailing benefits to consumers or competition, and (3) consumers could not reasonably have avoided the harm.

Finally, in *Cel-Tech Communications v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 186, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*, the Supreme Court held that in cases involving anticompetitive conduct by a competitor, conduct is "unfair" if it "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." As Plaintiffs note, some **[*41]** lower courts have extrapolated that test beyond claims between direct competitors, holding that a business practice is "unfair" where the public policy which is a predicate to the action is "tethered" to specific constitutional, statutory or regulatory provisions" that are or are threatened to be violated either in letter or spirit. E.g., ***Scripps Clinic v. Superior Court, 108*** *Cal.App.4th 917, 940, 134 Cal. Rptr. 2d 101 (2003)*.

With these standards in mind, as Plaintiffs note, "the landowner's right to exclude [is] 'one of the most essential sticks in the bundle of rights that are commonly characterized as property.'" *Loretto v. Teleprompter Manhattan CA TV Corp. (1982) 458 U.S. 419, 102 S. Ct. 3164, 73 L. Ed. 2d 868* (citing *Kaiser Aetna v. United States (1979) 444 U.S. 164, 176, 100 S. Ct. 383, 62 L. Ed. 2d 332)*. *Loretto* invalidated a New York statute that provided a landlord must permit a cable television company to install its cable facilities upon his property and may not demand payment from the company in excess of an amount determined by a state commission to be reasonable. The Court held that the New York statute operated as a taking of a portion of the plaintiff's property for which she was entitled to just compensation under the Fifth Amendment (as made applicable to the States by the Fourteenth Amendment). The Court noted that the installation "of plates, boxes, wires, bolts, and screws to the building" or of wires and outlets in particular units constitutes a physical invasion of **[*42]** the property. *Loretto at 438*; *see also* *Gulf Power Co. v. United States (N.D. Fla. 1998) 998 F.Supp. 1386, 1391-92* (holding that *Loretto* established a *per se* takings rule, in that a permanent physical occupation authorized by government is a taking without regard to the public interests that it may serve); affirmed at *187 F.3d 1324 (11th Cir. 1999)*.

Other courts have applied the *Loretto* rule to non-governmental actors. For instance, the U.S. District Court in *Daniels Cablevision, Inc. v. San Elijo Ranch, Inc. (S.D. Cal. 2001) 158 F.Supp.2d 1178* denied a cable company's motion for preliminary injunction in its suit against a real estate developer, claiming entitlement to lay cable in a utility trench without paying the fee demanded by the developer. *See also* *Century Sw. Cable Television, Inc. v. CHF Assocs. (9th Cir. 1994) 33 F.3d 1068, 1071*.

The question is whether DirecTV's admitted practice of relying on the word of tenants to obtain a landlord's consent is one which, consistent with the traditional UCL "unfair" test set forth above (which is the test the Court determines is appropriate to apply here), is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers. Here, while this process is not immoral, unethical, oppressive, or unscrupulous, it could be substantially injurious to consumers (i.e., the members of the putative class of MDU owners) for DirecTV to rely solely on the word of tenants in installing the satellite dishes and related **[*43]** equipment on the MDU owners' property. While DirecTV argues that a tenant, and not DirecTV, has a preexisting relationship with his or her landlord (and is thus in the best position to obtain any needed consent), and that it is perfectly legal to install equipment with consent (*citing* *Church of Christ in Hollywood v. Sup. Ct. (2002) 99 Cal.App.4th 1244, 1252, 121 Cal. Rptr. 2d 810)*, the alleged practice may actually result in an end-run around the consent requirement.

Indeed, the Declarations of the putative class members submitted in support of the motion for class certification (the declarations are also submitted in support of the motion for preliminary injunction) all state that the dishes were installed without their prior knowledge or consent.[52] Without verifying that the MDU owner has provided consent, there is a significant risk that the practice could be injurious to consumers.

In sum, Plaintiffs have demonstrated a reasonable likelihood of success on the merits to support issuance of the preliminary injunction.

2. Whether Plaintiffs are likely to suffer greater injury from denial of the injunction than defendants are likely to suffer if it is granted

The next consideration is whether Plaintiffs are likely to suffer greater injury from denial of the injunction than defendants **[*44]** are likely to suffer if it is granted. It is here where issuance of the injunction would be problematic.

If the Court were to grant the motion for *preliminary* injunction, without litigating the ultimate issue in the case, it would be changing DirecTV's long-standing nationwide policy.[53] DirecTV represents that if its current practice is blocked pending trial, untold numbers of installations will necessarily be delayed or cancelled. This assuredly would result in significant injury to DirecTV. Further, as DirecTV states, changing the policy would require DirecTV to rewrite all training materials and consumer forms, and retraining all employees and contractors engaged in this type of work.[54] On the other hand, if the injunction is denied pending trial, it would preserve the current status quo and would keep DirecTV's policy in place. While Plaintiffs may in fact suffer some injury from denial of the preliminary injunction, this is outweighed by the injury DirecTV would suffer if the motion is granted at the present time, in advance of trial.

Related to the "balance of harms" inquiry is whether Plaintiffs have shown DirecTV's conduct threatens irreparable injury. According to Plaintiffs, unless **[*45]** enjoined, DirecTV's installation practices will lead to continued abuse of the property rights of Plaintiffs and other landlords — more unconsented entry, more unauthorized permanent installations of dishes and other hardware, and more damage to roofs and walls.[55] However, Plaintiffs have not demonstrated at this time that, pending an actual trial on the UCL claim, the harm would be "irreparable."

Plaintiffs argue that the harm is irreparable because DirecTV, as a matter of policy, refuses to remove these dishes.[56] Plaintiffs further contend that suing for damages would be infeasible, as "they are too difficult to assess and uneconomical to obtain."[57] At the present time, however, without having tried these issues, the Court is not in a position to determine that, in fact, Plaintiffs would suffer irreparable harm if the injunction were denied.

For these reasons, Defendant has shown that it is likely to suffer greater injury from granting the injunction than Plaintiffs would suffer from denial of the injunction

3. Adequacy of Remedy at Law

Another consideration for the Court in assessing whether to issue the preliminary injunction is whether Plaintiffs have an adequate remedy at law. Injunctions **[*46]** will rarely be granted (absent specific statutory authority) where a suit for damages provides a clear remedy. *Thayer Plymouth Ctr., Inc. v. Chrysler Motors Corp. (1967) 255*

---

[52] See, e.g., Nichols Decl., ¶3; Sanger Decl. ¶3; Wayte Del., ¶4; Risconsin Decl., Landsberger Decl., ¶7.

[53] Edelstein Decl., Exh. A (Dimech Tr. At 50:9-55:18.

[54] Opposition at 5:25-27.

[55] Motion at 14:26-29.

[56] Reply at 9:26-27.

[57] Reply at 10:1-2.

Cal.App.2d 300, 63 Cal. Rptr. 148; 307; *Pacific Decision Sciences Corp. v. Sup. Ct. (Maudlin) (2004) 121 Cal.App.4th 1100, 1110, 18 Cal. Rptr. 3d 104*.

Here, it is unclear whether the Plaintiffs' remedy at law is adequate. DirecTV denies causing any damage when it installs a satellite dish, but even so, DirecTV claims that any damages could be remedied by removal of the dish and/or repairs compensable in money damages (and putative class members have testified to the same).[58] At this time, and without having conducted a trial on the matter, Plaintiffs have not made the requisite showing that their remedy at law is inadequate.

V.

RULING AND ORDER

For the foregoing reasons, the motion for certification of the injunctive relief class is granted. The motion for preliminary injunction is denied. The Court sets a further status conference in this matter for March 21, 2018 at 2 p.m. The parties shall submit a joint statement by March 15, 2018, outlining their proposals for proceeding with the subsequent phases of the litigation.

Dated: January 25, 2018

Opinion

ORDER

THIS CAUSE came before the Court at a December 15, 2017 hearing [ECF No. 288] on Defendants, Fox Sports Latin America, Ltd. ("FSLA"); Pan American Sports Enterprises Company ("PASEC"); Fox International Channels (US), Inc. ("FIC"); Fox Networks Group, Inc. ("FNG"); Torneos y Competencias, S.A. ("Torneos"); T&T Sports Marketing Ltd. ("T&T"); Hernan Lopez; Carlos Martinez; James Ganley; Alejandro Burzaco; and Juan Angel Napout's Motion to Dismiss [ECF No. 255], filed October 9, 2017. Defendants seek dismissal of Plaintiffs, GolTV, Inc. and Global Sports Partners LLP's eleven-count Amended Complaint [ECF No. 78] on the ground it fails to state a claim upon which relief may be granted. Plaintiffs filed a Memorandum of Law in Opposition [ECF No. 279], to which Defendants filed a Reply [ECF No. 286]. The Court has carefully considered the parties' oral arguments, written submissions, the record, and applicable law. For the **[*5]** reasons explained below, the Motion is granted in part and denied in part.

I. BACKGROUND

The Amended Complaint details how Defendants engaged in a bribery scheme between 2000 and 2015 to ensure Defendant, T&T, would secure exclusive television rights to Confederación Sudamericana de Fútbol's ("Conmebol[']s") prestigious international club soccer tournaments: the Copa Libertadores de America, the Copa Sudamericana, and the Recopa Sudamericana (collectively, the "Club Tournaments"). (*See* Am. Compl. ¶ 3). The Amended Complaint relies on a 92-count Superseding Indictment [ECF Nos. 78-1 through 78-3] from a parallel criminal case in the Eastern District of New York, in which 27 individual defendants have been charged with crimes including racketeering, conspiracy, wire fraud, and money laundering (*see* Am. Compl. ¶ 2 (citing *United States v. Webb*, No. 15-cr-0252 (E.D.N.Y. Nov. 25, 2015))); and Torneos's Deferred Prosecution Agreement [ECF No. 78-4] acknowledging criminal culpability for wire fraud conspiracy to pay bribes and kickbacks to Conmebol officials in exchange for their support in awarding Club Tournament television rights to T&T (*see* Am. Compl. ¶ 6 (citing *United States v. Torneos* ***[*6]*** *y Competencias S.A.*, No. 16-00634-PKC, ECF Nos. 4-1 & 4-2 (E.D.N.Y. Dec. 13, 2016))). Plaintiffs allege Defendants' scheme to obtain exclusive television rights for the Club Tournaments injured GolTV and Global Sports, who otherwise would have won bids for Club Tournament television rights. (*See generally* Am. Compl.).

A. Parties and Relevant Entities

On October 20, 2016, Plaintiffs, GolTV and Global Sports, filed an initial Complaint [ECF No. 1], alleging 16 defendants were involved in the bribery scheme to award and obtain exclusive television rights for the Club Tournaments. (*See generally* Compl.). On March 6, 2017, Plaintiffs filed the Amended Complaint against 14 defendants, voluntarily dismissing Hugo Jinkis and Mariano Jinkis from this action. (*See* Pls.' Third Status Report [ECF No. 77] 2). On September 19, 2017, the Court entered an Order [ECF No. 238] dismissing Conmebol and Full Play for lack of personal jurisdiction, further narrowing the list of defendants to those identified below.

While the Amended Complaint discusses multiple players and details several aspects of the bribery scheme, only the parties relevant to the present Motion are discussed.

1. Plaintiffs

GolTV, a Florida-based **[*7]** television channel, provides Spanish and English-language soccer programming in the United States. (*See* Am. Compl. ¶ 14). GolTV is the only TV channel in the U.S. media market devoted exclusively to soccer. (*See id.* ¶ 15). GolTV is owned by Francisco "Paco" Casal, a Uruguayan businessman and former soccer player; and Nelson Gutierrez and Enzo Francescoli, former members of the Uruguayan national soccer team. (*See id.*). GolTV partnered with Global Sports to make offers on the worldwide or Americas television rights from Conmebol, "with the understanding that GolTV would pay for and acquire the U.S. portion of those rights." (*Id.* ¶ 111).

Global Sports[1] is an English partnership formed by Casal and Gutierrez to acquire television and marketing rights to international soccer tournaments for GolTV. (*See id.* ¶ 16). Global Sports "acted, among other capacities, as an agent for GolTV to attempt to acquire television broadcasting rights to the Club Tournaments." (*Id.*). "GolTV controlled and coordinated the actions that Global Sports took on behalf of GolTV and Global Sports served the corporate interests of GolTV in seeking to acquire television rights to the Club Tournaments." (*Id.*).

2. Defendants

T&T is a Cayman Islands company, which during the relevant time period was owned by Torneos and Fox Pan American Sports LLC[2] — the predecessor company to PASEC. (*See id.* ¶¶ 5, 17). T&T paid tens of millions of dollars in bribes and kickbacks to Conmebol officials between 2000 and 2015 in exchange for the exclusive television rights to the Club Tournaments. (*See id.* ¶ 3 (citing Superseding Indictment ¶¶ 174-85)). Once the rights to Club Tournaments were licensed to T&T, T&T then sublicensed them to Fox Sports Latin America in order for the tournaments to broadcast on Fox Sports channels in the United States and abroad. (*See id.* ¶ 7).

---

[1] Plaintiffs refer to GolTV and Global Sports collectively as GolTV in the Amended Complaint (*see* Am. Compl. ¶ 111), and throughout their Opposition (*see generally* ***[*8]*** Opp'n). The Court refers to GolTV and Global Sports as Plaintiffs unless it is necessary to refer to them separately.

[2] Unless otherwise necessary, the Court refers to the Fox parties collectively as "Fox" or the "Fox Defendants."

PASEC is the surviving entity and legal successor to Fox Pan American Sports LLC, a Delaware limited liability company that did business in Florida as Fox Sports Latin America. (*See id.* ¶ 18). Fox Pan American owned 75 percent of T&T during most of 2005 to 2015. (*See id.* ¶ 17). In 2015, Fox Pan American merged with PASEC, which became the surviving entity and legal successor to Fox Pan American. (*See id.* ¶ 19). PASEC continues to directly or indirectly own 75 percent of T&T. (*See id.*).

FIC has its principal place of business in Beverly Hills, California **[*9]** and offices in Florida. (*See id.* ¶ 20). FIC owned and operated Fox Pan American Sports, and now owns PASEC. (*See id.* ¶¶ 19-21).

FSLA owns and operates the Fox Sports networks in Latin America as well as Fox Deportes, a Spanish-language sports programming service distributed in the United States. (*See id.* ¶ 18).

FNG is a Delaware corporation and subsidiary of Twenty-First Century Fox, Inc. (*See id.* ¶ 22). In January 2016, a corporate reorganization announced FIC would be dissolved and FNG would assume operation of Fox Sports Latin America as the legal successor to FIC. (*See id.*).

Torneos is an Argentinean sports media and marketing corporation with a number of subsidiaries and affiliates. (*See id.* ¶ 24). Torneos has historically held exclusive agreements to produce and distribute television programming related to South American league soccer matches. (*See id.*). On December 13, 2016, Torneos acknowledged criminal culpability to the Department of Justice ("DOJ") for wire fraud conspiracy to pay bribes and kickbacks to Conmebol officials in exchange for their support in awarding the Club Tournament television rights to T&T. (*See id.* ¶ 6 (citing Torneos DPA)). Torneos agreed to pay over $112.8 **[*10]** million in forfeiture and criminal penalties after making admissions of its role in the bribery scheme. (*See id.* ¶ 11). Torneos admitted to paying and causing to be paid annual six-figure, and in some instances seven-figure, bribes and kickback payments in exchange for Club Tournament television rights. (*See id.* ¶ 7).

Martinez, a Florida resident, is President of FNG Latin America, responsible for the operations of Fox Sports Latin America. (*See id.* ¶ 26). Martinez was previously President of FIC Latin America, and as such operated Fox Pan American from the FIC offices in Florida. (*See id.*). Martinez was also on the board of T&T from approximately October 31, 2012 until December 11, 2013. (*See id.*). Martinez is alleged to have been personally involved in the bribery scheme, including signing an agreement on behalf of T&T to restructure the payment of bribes through intermediaries. (*See id.* ¶¶ 65, 78).

Lopez, a California resident, was the CEO of FIC from 2011 until January 2016, when he left the company. (*See id.* ¶ 27). Prior to that, Lopez was the Chief Operating Officer of FIC from 2008 to 2011 and General Manager of Fox Latin American Channels from 2000 to 2008. (*See id.*). Lopez served **[*11]** on the board of directors of T&T from approximately June 1, 2010 to December 10, 2013. (*See id.*).

Ganley, a citizen and resident of Florida, operated Fox Pan American as its Chief Operating Officer and was an employee of FSLA. (*See id.* ¶ 28). Ganley served on the board of directors of T&T from approximately April 28, 2005 to October 31, 2012. (*See id.*).

Martinez, Lopez, and Ganley allegedly participated in T&T's payment of bribes to Conmebol officials to ensure FSLA would obtain the television rights for the Club Tournaments through T&T. (*See id.* ¶¶ 7, 43, 64-66). These executives also served as directors of T&T. (*See id.* ¶ 8).

Burzaco, an Argentinean citizen, was a principal of T&T and a shareholder, director, and officer of Torneos. (*See id.* ¶¶ 8, 29). Burzaco was on the T&T board of directors from 2005 to 2013. (*See id.* ¶ 29). Burzaco had an ownership share in Torneos and served as the company's general manager, legal representative, and president of its board of directors between 2005 and 2015. (*See id.*). Burzaco was also a principal of Torneos's affiliates and shell companies, which he created and controlled off of Torneos's books. (*See id.*). He paid bribes to Conmebol officials. **[*12]** (*See id.* ¶ 69). In the criminal RICO action, Burzaco pled guilty to racketeering conspiracy, wire fraud conspiracy, and money laundering conspiracy involving the bribery of Conmebol officials, including bribery in connection with the television rights for the Club Tournaments. (*See id.* ¶¶ 4, 30 (citing *Webb*, Transcript of Criminal Case for Guilty Plea [ECF No. 312-2] 5, 26-28)).

Napout, a citizen of Paraguay who has long maintained a home in Florida, was the president of Conmebol from August 2014 to December 11, 2015. (*See id.* ¶ 34). Napout served as a Vice President of Conmebol from 2007 to 2014. (*See id.*). Napout was also a member of Conmebol's Executive Committee from 2007 to 2015. (*See id.*). Napout is alleged to have received annual six-figure bribe payments from Burzaco in exchange for his cooperation in providing T&T the television rights to the Copa Libertadores tournament from 2011 through 2015. (*See id.* ¶¶ 69, 76, 84). As the then-President of Conmebol, Napout rejected Plaintiffs' October 2015 offer for the 2019 to 2022 Club Tournament television rights. (*See id.* ¶¶ 129-31).

B. The Bribery Scheme

Fox and Plaintiffs have previously vied for and continue to compete for television **[*13]** broadcasting rights to the South American club soccer tournaments run by Conmebol. (*See id.* ¶¶ 56-58). Estimates suggest the United States accounts for 16 percent of the Copa Libertadores's audience. (*See id.* ¶ 55). Only Conmebol, by decision of its Executive Committee, can award television rights for the Club Tournaments. (*See id.* ¶ 59). The combined popularity of these soccer tournaments and Conmebol's unique monopoly over the television rights to telecast Club Tournaments ensure telecasters who obtain the Club Tournament television rights derive significant revenue, including advertising revenue, from the purchase of the rights. (*See id.* ¶ 58).

T&T acquired the exclusive television rights to the Club Tournaments through bribery and other criminal wrongdoing with the aid of co-conspirators. (*See id.* ¶ 62 (citing Superseding Indictment ¶¶ 174-75)). From 1999 through 2015, T&T held the exclusive worldwide television rights to the Copa Libertadores. (*See id.* ¶ 61). From approximately 2002 until 2015, T&T held the exclusive worldwide television rights to the Copa Sudamericana. (*See id.*). In 2008, T&T also acquired the exclusive worldwide television rights to Recopa Sudamericana. (*See* ***[*14]*** *id.*).

The bribery scheme began in 2000, at which time one of the founders of Torneos unlawfully agreed to pay, and began to pay, annual bribes of $1 million to Conmebol officials Eugenio Figueredo, Nicolas Leoz, Eduardo Deluca, and Romer Osuna; such payments continued for more than 10 years. (*See id.* ¶ 62). As a result, throughout this period, Conmebol awarded the Club Tournament television rights exclusively to T&T. (*See id.*).

In 2005, Burzaco began to manage the day-to-day operations of Torneos, learned of the annual bribe payments, and helped continue the bribery scheme. (*See id.* ¶ 67). That same year, soon after Fox increased its interest in T&T from 25 percent to 75 percent, Martinez, Lopez, Fox Pan American, Ganley, and FSLA agreed with Torneos, T&T, and Burzaco that Fox and Torneos would fund and facilitate T&T's payments of bribes to Conmebol officials Leoz, Figueredo, Deluca, and Osuna. (*See id.* ¶ 64). As part of this agreement, Conmebol officials would sell the Club Tournament television rights to T&T, with the understanding the rights would be sublicensed to FSLA, and Conmebol would refuse to sell the rights to T&T's competitors or Fox, including Plaintiffs. (*See id.*). Moreover, **[*15]** the terms of the license agreements between Conmebol and T&T expressly contemplated the sublicensing of those rights to Fox. (*See id.* ¶ 77).

In 2009, other presidents of member associations of Conmebol began to demand annual bribes. (*See id.* ¶ 69). In response, Burzaco agreed to pay and did pay bribes to several others, including Napout. (*See id.*). "DOJ has revealed that the annual bribe payments of at least $400,000 that were made to Napout for the 2011, 2012, 2013, 2014, and 2015 editions of the Copa Libertadores" were wired to bank accounts controlled by Hugo and Mariano Jinkis, who facilitated the payments to Napout. (*Id.* ¶ 76).

Co-conspirators also engaged in conduct designed to prevent the detection of their illegal activities. (*See id.* ¶ 73). To disguise bribe payments in connection with the Copa Libertadores and other tournaments, Fox Pan American and Torneos agreed T&T would enter into sham "consulting" contracts with companies owned by Jose Margulies and companies he controlled. (*See id.* ¶¶ 71, 82-92). T&T's payments of bribes to Conmebol officials were also made through Productora de Eventos, S.A., an affiliate of Torneos, which then paid FPT Sports S.A. in exchange for consulting **[*16]** services. (*See id.* ¶¶ 99-100). T&T did not receive any legitimate services from these financial intermediaries, but paid the companies as a way to facilitate the bribery of Conmebol. (*See id.* ¶¶ 71, 100). T&T, Torneos, Fox, and the financial intermediaries all knew the payments from T&T to the intermediaries, and from the intermediaries to Conmebol, were intended to serve as bribes to obtain Club Tournament television rights for the Fox Defendants. (*See id.* ¶¶ 77-78).

C. Conmebol Rejects Plaintiffs' Offers for Club Tournament Television Rights

The payment of tens of millions of dollars of bribes to Conmebol officials led to T&T securing the television rights for the Club Tournaments despite Plaintiffs' superior offers. (*See id.* ¶¶ 79, 108). Plaintiffs detail how Conmebol, its Executive Committee members (including Napout), and other Defendants agreed to prevent Plaintiffs from obtaining the Club Tournament television rights by misleading Plaintiffs about when proposals for the rights would be considered; licensing Club Tournament television rights in advance of expected offers from Plaintiffs; and refusing to revoke rights wrongfully awarded to T&T at below-market prices — all due to **[*17]** T&T's bribery. (*See id.* ¶ 139). Since there were no parties actively making offers to acquire the television rights apart from Plaintiffs and T&T (*see id.* ¶ 140), the only reason Conmebol did not accept Plaintiffs' offers was because T&T and its co-conspirators were paying illegal bribes to Conmebol officials (*see id.* ¶ 110). To the extent rights had already been awarded to T&T when Plaintiffs made more favorable offers, had it not been for the bribery scheme, Conmebol would have revoked T&T's rights and awarded them to Plaintiffs. (*See id.* ¶ 140).

1. Conmebol Rejects Plaintiffs' March 2010 Offer for Television Rights for Years 2011 to 2014 for the Copa Libertadores and Copa Sudamericana Tournaments

On March 3, 2010, one of GolTV and Global Sports's owners, Paco Casal, met with Nicolas Leoz, then President of Conmebol, to present a formal offer for the television rights for the Copa Libertadores and the Copa Sudamericana for years 2011 to 2014, which Conmebol had previously awarded to T&T. (*See id.* ¶ 111). Plaintiffs offered Conmebol a total of $270 million for the rights, representing a nearly 70 percent increase over the $164 million believed to have been paid by T&T for the same years. **[*18]** (*See id.* ¶ 112). Conmebol disclosed to T&T and Fox Plaintiffs' offer to purchase the television rights, at which time T&T, with Fox Pan American and Torneos's knowledge, urged Conmebol to reject the offer. (*See id.* ¶ 113). Conmebol did not accept Plaintiffs' superior offer. (*See id.* ¶ 114). Conmebol could have revoked its agreement with T&T, and its Executive Committee was legally obligated to revoke it in favor of Plaintiffs' superior offer based on fiduciary duties owed to Conmebol. (*See id.* ¶ 115).

2. Conmebol Rejects Plaintiffs' October 2012 Offer for Television Rights for Years 2015 to 2020 for the Copa Libertadores and Copa Sudamericana Tournaments

In 2012, Plaintiffs offered to purchase from Conmebol the 2015 to 2020 television rights for Copa Libertadores and Copa Sudamericana. (*See id.* ¶ 116). Again, the offer was far more than what was being received from T&T and Fox. (*See id.*). Conmebol President Leoz promised Plaintiffs that he and the Conmebol officials on the Executive Committee would formally consider the proposal at an October 24, 2012 Executive Committee meeting. (*See id.*). As a result, on October 21, 2012, Plaintiffs submitted a sealed proposal to purchase television **[*19]** rights to the Copa Libertadores and Copa Sudamericana for years 2015 to 2020, for a total price of $805 million. (*See id.* ¶ 117). Conmebol disclosed to T&T and Fox the offer made by Plaintiffs to purchase the television rights for the tournaments. (*See id.* ¶ 118). T&T and Conmebol again agreed Conmebol would reject Plaintiffs' offer and instead accepted a competing offer from T&T. (*See id.*).

Conmebol then invited Burzaco to attend its October 24, 2012 Executive Committee meeting on behalf of T&T and offer reasons why the Plaintiffs' offer should not be accepted. (*See id.* ¶ 119). Conmebol did not inform Plaintiffs that Burzaco would be present, nor did Conmebol invite a representative of Plaintiffs to present their offer. (*See id.*). Conmebol ultimately rejected Plaintiffs' offer and amended its agreement with T&T to increase the price for the 2015 to 2018 television rights for the Copa Libertadores and Copa Sudamericana tournaments. (*See id.* ¶ 120).

3. Conmebol Rejects Plaintiffs' November 2013 Offer for Television Rights for Years 2015 to 2024 for Club Tournaments

On November 18, 2013, Plaintiffs made a new offer to purchase the 2015 to 2024 television rights for all three Club Tournaments. **[*20]** (*See id.* ¶ 122). Plaintiffs offered Conmebol $2.1 billion for the television rights to the three tournaments, with the total price being four times higher than the $560 million paid by T&T and its affiliate. (*See id.* ¶ 123). Predictably, Conmebol disclosed to T&T and Fox Pan American that Plaintiffs had offered to buy tournament rights and again, Conmebol agreed to reject Plaintiffs' offer. (*See id.* ¶ 125).

4. Conmebol Rejects Plaintiffs' May and October 2015 Offers for Television Rights for Years 2016 to 2022 for Club Tournaments

By letter dated May 7, 2015, Plaintiffs renewed their November 2013 offer to pay $360 million per year for Club Tournament television rights for the years 2019 to 2022. (*See id.* ¶ 126). On May 27, 2015, the DOJ unsealed the indictment describing criminal wrongdoing associated with soccer tournaments, including charges against T&T principal, Burzaco. (*See id.* ¶ 127). On July 29, 2015, Conmebol released a statement advising it was reevaluating its commercial relationships with entities implicated in the wrongdoing. (*See id.* ¶ 128). Plaintiffs engaged in a series of meetings with Conmebol officials, including its then-president Napout, to propose acquiring the **[*21]** Club Tournament television rights on terms superior to those on which Conmebol had awarded the rights to T&T and a Torneos affiliate. (*See id.* ¶ 129). On October 16, 2015, Plaintiffs again formally renewed the offer for the Club Tournament television rights for years 2019 to 2022. (*See id.* ¶ 130). Plaintiffs additionally proposed acquiring the Club Tournament television rights for 2016 to 2017 for $170 million per year. (*See id.*). Conmebol did not accept either proposal. (*See id.* ¶ 131).

Instead, Fox negotiated an agreement with Napout, on behalf of Conmebol, under which Conmebol would award the Club Tournament television rights for years 2016 to 2018 that had previously been licensed to T&T, directly to FIC. (*See id.* ¶ 132). FIC paid between $135 million and $155 million per year, approximately $70 million to $90 million more than the $65 million to $69 million per year T&T previously agreed to pay. (*See id.*). This agreement was negotiated with FIC by Napout in secret and in violation of Conmebol's procedures. (*See id.* ¶ 132). Plaintiffs were not informed of the negotiations, nor were they invited to submit a competing bid. (*See id.* ¶ 134). Napout was subsequently indicted and arrested **[*22]** in connection with accepting bribes in exchange for awarding Club Tournament television rights to T&T. (*See id.* ¶ 135).

D. Claims

Plaintiffs allege they are victims of Defendants' bribery, as they repeatedly offered Conmebol substantially more for Club Tournament television rights than the amounts T&T paid or offered to Conmebol for those rights. (*See id.* ¶ 12). Plaintiffs seek compensation for the harm they suffered from the loss of the television rights they otherwise would have been able to obtain in a fair and competitive market. (*See id.* ¶ 13). Plaintiffs accordingly bring this action alleging injury under the Racketeer Influenced and Corrupt Organizations ("RICO") Act, the Sherman Act, the Florida Deceptive and Unfair Trade Practices Act ("FDUTPA"); and Florida tort law. (*See id.* ¶¶ 183-329).

Plaintiffs assert eleven claims. (*See generally id.*). Count One is a civil RICO claim pursuant to *18 U.S.C. section 1962(c)* against all Defendants. (*See* Am. Compl. ¶¶ 183-269). Count Two is a civil RICO conspiracy claim brought under *18 U.S.C. section 1962(d)* against all Defendants. (*See* Am. Compl. ¶¶ 270-76).

Count Three is a claim of conspiracy in restraint of trade in the Americas Television Rights Market, in violation of *section 1* of the Sherman **[*23]** Act, *15 U.S.C section 1*, against all Defendants. (*See id.* ¶¶ 277-82). Count Four is a claim of conspiracy in restraint of trade in the U.S. Television Programming Market, in violation of *section 1* of the Sherman Act, against all Defendants. (*See id.* ¶¶ 283-87). Count Five is a claim of conspiracy in restraint of trade in the U.S. Television Advertising Airtime Market, in violation of *section 1* of the Sherman Act, against all Defendants. (*See id.* ¶¶ 288-92).

Count Six is a claim of monopsonization[3] of the Americas Television Rights Market, in violation of *section 2* of the Sherman Act, *15 U.S.C. section 2*, against T&T. (*See id.* ¶¶ 293-98). Count Seven is a claim of attempted monopsonization of the Americas Television Rights Market, in violation of *section 2* of the Sherman Act, against T&T. (*See id.* ¶¶ 299-303). Count Eight is a claim of conspiracy to monopsonize the Americas Television Rights Market, in violation of *Section 2* of the Sherman Act, against all Defendants. (*See id.* ¶¶ 304-11).

Count Nine is a claim of violation of the FDUTPA, *Fla. Stat. §§ 501.201 et seq.*, against all Defendants. (*See* Am. Compl. ¶¶ 312-17). Count Ten is a claim of tortious interference with prospective economic advantage against the Fox Defendants, Torneos, and T&T. (*See id.* ¶¶ 318-24). Count Eleven is a claim of **[*24]** civil conspiracy to commit tortious interference against all Defendants. (*See id.* ¶¶ 325-29). The underlying factual allegations pertaining to each count are discussed in greater detail below.

II. LEGAL STANDARD

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim for relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A plaintiff need not plead "detailed factual allegations," but the complaint must offer "more than an unadorned, the defendant-unlawfully-harmed-me accusation." *Id.* (internal quotation marks omitted) (quoting *Twombly, 550 U.S. at 555*). "[A] plaintiff's obligation to provide the grounds of his entitle[ment] to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (first alteration added; internal quotation marks omitted) (quoting *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986))*.

To meet the *Iqbal/Twombly* plausibility standard, a complaint must "plead[] factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 556* (alteration added)). A claim will not survive "if it tenders naked assertions devoid of further factual enhancement." **[*25]** *Id.* (internal quotation marks and alteration omitted) (quoting *Twombly, 550 U.S. at 557*).

On a motion to dismiss, a court construes the complaint in the light most favorable to the plaintiff and accepts its factual allegations as true. *See Brooks v. Blue Cross Blue Shield of Fla., Inc., 116 F.3d 1364, 1369 (11th Cir. 1997)* (citing *SEC v. ESM Grp., Inc., 835 F.2d 270, 272 (11th Cir. 1988))*. Unsupported allegations and conclusions of law, however, will not benefit from this favorable reading. *See Iqbal, 556 U.S. at 679* ("While legal conclusions can provide the framework of a complaint, they must be supported by factual allegations."); *see also Sinaltrainal v. Coca-Cola, 578 F.3d 1252, 1261 (11th Cir. 2009)* ("[U]nwarranted deductions of fact in a complaint are not admitted as true for the purpose of testing the sufficiency of [a] plaintiff's allegations." (alterations added; internal quotation marks omitted) (quoting *Aldana v. Del Monte Fresh Produce, N.A., Inc., 416 F.3d 1242, 1248 (11th Cir. 2005)))*.

While a court is generally limited to the allegations of the complaint in evaluating a *Rule 12(b)(6)* motion to dismiss, "where the plaintiff refers to certain documents in the complaint and those documents are central to the plaintiff's claim, then the [c]ourt may consider the documents part of the pleadings for purposes of *Rule 12(b)(6)* dismissal." *Brooks, 116 F.3d at 1369* (alteration added; citation omitted). Where those "exhibits contradict the general and conclusory allegations of the pleading, the exhibits govern." *Crenshaw v. Lister, 556 F.3d 1283, 1292 (11th Cir. 2009)* (internal quotation marks omitted) (quoting *Griffin Indus., Inc. v. Irvin, 496 F.3d 1189, 1206 (11th Cir.*

[3] Monopsonization is an offense involving the control or monopoly of a market, which exists where an individual or organization is the only supplier of a particular good or commodity. *See In re Beef Indus. Antitrust Litig., 600 F.2d 1148, 1154 n.3 (5th Cir. 1979)*.

2007); **[*26]** other citation omitted). The court may also consider documents whose "authenticity and veracity are . . . unchallenged." *Long v. Slaton, 508 F.3d 576, 578 n.3 (11th Cir. 2007)* (alteration added) (considering investigative report plaintiffs submitted in opposing motion to dismiss).

III. DISCUSSION

Defendants[4] assert the Amended Complaint is deficient because Plaintiffs: (1) fail to state a RICO claim; (2) fail to state a claim under the Sherman Act; (3) lack standing to bring RICO and antitrust claims; and (4) fail to state claims under the FDUTPA and Florida tort law. (*See generally* Mot.). Burzaco writes separately, challenging the RICO claims for failure to show his underlying conduct was a proximate cause of injury to Plaintiffs; and, on behalf of all Defendants, asserts Plaintiffs' claims are time barred. (*See id.* 81-84[5]). Napout separately asserts all counts fall short of stating actionable causes of action against him. (*See id.* 84-89). The Court addresses these arguments in turn.

A. RICO Claims (Counts 1 and 2)

In Count One, Plaintiffs allege a civil RICO claim under *18 U.S.C. section 1962(c)* (*see* Am. Compl. ¶¶ 183-269); and in Count Two, they allege a civil RICO conspiracy claim under *section 1962(d)* (*see id.* ¶¶ 270-76).

A civil RICO claim under *section 1962(c)* requires a plaintiff allege defendants (1) **[*27]** operated or managed (2) an enterprise (3) through a pattern (4) of racketeering activity that included at least two racketeering acts that caused injury to plaintiff's business or property. *See* *Ray v. Spirit Airlines, Inc., 836 F.3d 1340, 1348 (11th Cir. 2016)* (citation omitted); *see also* *Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479, 496-97, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)* (requiring conduct of an enterprise through a pattern of racketeering activity in order to state a claim for civil RICO). To establish a RICO conspiracy, a plaintiff must show defendants either (1) agreed with the objective of the conspiracy, or (2) agreed to commit two racketeering predicates. *See* *Rajput v. City Trading, LLC, 476 F. App'x 177, 180 (11th Cir. 2012)*.

Plaintiffs allege Defendants operated a scheme to bribe Conmebol officials in exchange for assurances T&T would receive Club Tournament television rights. (*See* Am. Compl. ¶ 188). Defendants' illicit actions, including wire fraud, commercial bribery, money laundering and monetary transactions in property derived from unlawful activity, over a period of 15 years, caused Conmebol to award T&T the television rights for the Club Tournaments, which otherwise would have gone to Plaintiffs because they were the only other bidders and they offered more favorable proposals. (*See id.* ¶¶ 108-37, 139, 268, 276). Plaintiffs suffered substantial injury to their business and property, **[*28]** including loss of revenues and profits, lower market share, and lessened profile in the sports telecasting marketplace, amounting to hundreds of millions of dollars or more in damages. (*See id.* ¶¶ 268, 276).

Notwithstanding the requisite elements are alleged, Defendants argue Plaintiffs fail to state a civil RICO claim because they do not show: (1) Defendants' actions were the proximate cause of an injury to Plaintiffs; (2) the underlying bribery scheme presents a pattern of racketeering; and (3) Defendants committed two or more predicate acts. (*See* Mot. 20-32).

1. Proximate Cause

---

[4] All Defendants join the present Motion with the exception of Eugenio Figueredo, who has not appeared in the case. (*See* Mot. 12 n.1).

[5] The Court uses the pagination generated by the Case Management/Electronic Case Files system, which appears as a header on all court filings.

"When a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries." *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 461, 126 S. Ct. 1991, 164 L. Ed. 2d 720 (2006)*. To satisfy RICO's heightened proximate cause standard and withstand a motion to dismiss, a complaint must allege a "direct relationship" between the alleged RICO violations and the plaintiff's alleged injury. *E.g., Hemi Grp., LLC v. City of New York, 559 U.S. 1, 9, 130 S. Ct. 983, 175 L. Ed. 2d 943 (2010)*. The "direct relationship" test is more than "a mere pleading rule." *Id. at 13*. Although the unlawful conduct need not be the sole cause of the injury asserted, there must be a direct and identifiable connection between the fraud and a **[*29]** plaintiff's injury. *See Bridge v. Phoenix Bond & Indem. Co., 553 U.S. 639, 654-55, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008)*. A plaintiff cannot "circumvent the proximate-cause requirement simply by claiming that the defendant's aim was to increase market share at a competitor's expense," because RICO only reaches harm that necessarily is caused by the predicate acts. *Hemi Grp., 559 U.S. at 13* (citation and quotation marks omitted).

When evaluating whether proximate cause exists, "courts should consider the motivating principles behind the directness component of the proximate-cause standard in RICO cases." *Corcel Corp., Inc. v. Ferguson Enters., Inc., 551 F. App'x 571, 576 (11th Cir. 2014)* (citations and internal quotation marks omitted). The motivating principles include: whether (1) difficulty would arise when a court attempts to ascertain damages caused by a remote action; (2) the nature of the proceedings would be speculative if the plaintiff were permitted to proceed; (3) the harm could have resulted from independent factors; (4) there is a risk of duplicative recoveries by other plaintiffs; and (5) other immediate victims of the RICO violation are better suited to vindicate the laws by pursuing their own claims. *See id.* (citing *Anza, 547 U.S. at 458-60*). The Supreme Court has cautioned "proximate cause is generally not amenable to bright-line rules." *Bridge, 553 U.S. at 659* (citation omitted).

Defendants assert Plaintiffs do not **[*30]** satisfy the proximate causation requirement because they were not direct victims of the bribery scheme and, as such, their alleged injuries are too remote. (*See* Mot. 23-24; Reply 10-15). Defendants supply several arguments in support of their remoteness characterization.

First, Defendants urge the Court find the RICO claims foreclosed because Plaintiffs are not the direct victims of the alleged RICO predicates. (*See* Mot. 23; Reply 10-12). But Defendants rely on authorities involving significantly different factual scenarios than that of a plaintiff, who but for its competitor's fraudulent activity during a bidding process, would have won the bid, as is the case here. (*See* Mot. 22-23 (citing cases)). Plaintiffs' position is the more persuasive because Plaintiffs rely on cases in which, had it not been for the fraudulent acts of competitors in bidding processes, the plaintiffs would have won the bids.

For example, Plaintiffs rely on *Bridge* for the proposition a plaintiff may be directly harmed by the acts of a rival bidder when, but for the fraudulent actions of the rival bidder, the plaintiff would have received the winning bid. (*See* Opp'n 25-26). The facts in *Bridge* involved an annual **[*31]** public auction at which a county government sold off tax liens on delinquent taxpayers' properties. *See Bridge, 553 U.S. at 642*. The county established an allocation system to ensure fair apportionment of the liens, including a requirement that any entity submitting a bid do so in its own name and a prohibition on the purchase of liens through agents or employees. *See id. at 643*. The plaintiffs in *Bridge*, would-be purchasers, alleged the defendants defrauded the county by attesting they were not purchasing liens through agents or employees, while engaging several related bidders to submit bids on their behalf. *See id. at 643-44*.

The predicate act in *Bridge* was mail fraud. *See id. 644*. The plaintiffs claimed they were injured as a result of the defendants' criminal actions because, based on the allocation system, but for the illicit actions of the defendants, the plaintiffs would have received a greater share of liens and financial benefits. *See id.* After noting "RICO's text provides no basis for imposing a first-party reliance requirement," *id. at 660*, the Supreme Court found the defendants' fraudulent acts proximately caused plaintiffs' injuries by causing competitors to win a county contract over the plaintiffs, *see id. at 660-61*.

In *Corcel Corp.*, the Eleventh **[*32]** Circuit similarly examined whether a pleading sufficiently demonstrated proximate causation where the plaintiff would have received a contract had it not been for the fraud of its competitors, the rival bidders. *551 F. App'x at 577-78*. The complaint there alleged "if the County had not relied on the defendants' false and fraudulent documents and actions[,] the County would have awarded plaintiff Corcel the supply and construction contract at issue because plaintiff Corcel was the next lowest [] bidder." *Id. at 577* (alterations added). This allegation was sufficient to show a direct relation between the claimed injury and the defendants' federal civil RICO violations, satisfying proximate causation. *See id.*

At the December 15 hearing, Defendants attempted to distinguish *Bridge*, stating the basis upon which tax liens were apportioned by the county government was a unique situation in which, unlike here, there was certainty the plaintiffs would have won because they were next in line. Defendants also attempted to distinguish this case from *Corcel Corp.* for the same reason, stating the facts of *Corcel* are inapplicable because Conmebol may not have accepted Plaintiffs' bids regardless of whether Defendants conspired and **[*33]** bribed Conmebol officials. In their oral arguments and their written briefing, Plaintiffs liken the facts of this case to the facts in *Bridge* and *Corcel Corp.*, emphasizing their allegation they were the only parties making offers to acquire the rights to the Club Tournaments other than T&T, and had Plaintiffs' competitors not been engaged in bribery and fraud, Plaintiffs would have prevailed and been awarded the television rights. (*See* Am. Compl. ¶ 140; Opp'n 23-24).

The Court is persuaded the facts in *Bridge* and the line of cases involving injuries of a bidder by a competitor are analogous to this case. Plaintiffs allege the relative certainty of their winning the bids for Club Tournament television rights in the absence of Defendants' wrongdoing, as the plaintiffs did in *Bridge* and *Corcel Corp.* As such, Plaintiffs sufficiently allege a plausible direct injury flowing from Defendants' bribery scheme.

Second, Defendants state the claims of injury are too remote and speculative because Plaintiffs' injuries depend on intervening and independent factors. (*See* Mot. 24-28; Reply 15-19). Defendants describe Plaintiffs' injuries as speculative because the bids were received after Conmebol had **[*34]** entered into contracts with T&T (*see* Mot. 25), and revoking the television rights from T&T and awarding them to Plaintiffs is necessarily an intervening step that breaks the chain of causation between the predicate acts alleged (wire fraud, commercial bribery, money laundering, etc.) and Plaintiffs' injuries (*see id.* 25-27). Defendants highlight Plaintiffs' failed last bid, made after the bribery scheme stopped, as evidence Plaintiffs would not have necessarily won the rights absent the fraudulent acts. (*See id.* 25-26).

Plaintiffs point to their allegation that had it not been for Defendants' illicit actions, no other factors supported awarding the licensing to T&T over Plaintiffs' higher bids. (*See* Opp'n 23 (citing Am. Compl. ¶ 110)). Plaintiffs explain not every proposal was under contract with T&T at the time of each offer. (*See* Opp'n 46). Indeed, the pleading does not identify whether the rights at issue in each proposal were under contract with T&T at the time of each offer. (*See* Am. Compl. ¶¶ 116-18). Furthermore, to the extent the television rights were already under contract, Conmebol would have revoked T&T's rights and awarded them to Plaintiffs in exchange for more favorable terms from Plaintiffs, **[*35]** but for Defendants' bribery of Conmebol officials. (*See id.* ¶ 140). Plaintiffs also refute Defendants' characterization of the circumstances of their last failed bid for Club Tournament television rights (*see* Opp'n 30), as the illegal activities continued throughout 2015, when the last bid was rejected (*see* Am. Compl. ¶¶ 3, 133). The Court is persuaded the claims of injury are not so remote and speculative as to defeat the causes of action, and agrees with Plaintiffs that many of the issues raised in this section of the briefing are factual disputes not appropriate for consideration on a *Rule 12(b)(6)* motion. (*See* Opp'n 31).

Defendants next assert that upon receiving the television rights, Plaintiffs would have had to exploit the rights to make a profit - yet another causal gap between Defendants' conduct and Plaintiffs' injuries. (*See* Reply 18). According to Plaintiffs, the proximate cause standard articulated in *Bridge* is concerned with the conduct and the allegation of injury, not the later steps a plaintiff would need to take to make a profit from winning a bid. (*See* Opp'n 31). The Court agrees. Alleging a loss of profits is sufficient to establish proximate cause, *see* *Bridge, 553 U.S. at 644 n.3*; whether Plaintiffs would **[*36]** have exploited the rights or in fact been successful in making a profit is not considered at this stage.

Third, Defendants assert determining damages will be very difficult because of the "numerous intervening decisions by Conmebol, TV viewers, and advertisers" (Mot. 28), and because there may be future plaintiffs in Conmebol and its member organizations that may have an incentive to vindicate the law (*see* Reply 14). With regard to the issue of calculating damages, Defendants rely on *Harris v. Orange S.A., 636 F. App'x 476 (11th Cir. 2015)*. There, the Eleventh Circuit found no proximate cause because it was difficult to determine what losses were attributable to the defendants' conduct, as opposed to market conditions and the like, as well as the fact another plaintiff was necessary to vindicate the same interest. (*See* Mot. 28 (citing *Harris, 636 F. App'x at 483*)).

Harris is distinguishable. In *Harris*, the plaintiff was a shareholder and employee of a company capable of vindicating the same interest as the plaintiff. *See* *Harris, 636 F. App'x at 483*. In order to calculate damages in *Harris*, the shareholder and employee's damages would have depended on the company's damages calculation. Here, there is no reason to believe Plaintiffs' damages calculation will depend on a potential damages calculation **[*37]** by Conmebol. Plaintiffs' damages calculation will likely come from their losses as a result of not receiving the bids, whereas Conmebol's loss in revenue will likely be calculated by looking at the difference between the revenue received and what Conmebol was offered by Plaintiffs for the Club Tournament rights.

Difficulty in ascertaining Plaintiffs' lost profits is not sufficient in and of itself to find a lack of proximate cause. *See* *Maiz v. Virani, 253 F.3d 641, 663 (11th Cir. 2001)* ("The touchstone of the inquiry . . . is proximate cause; there is no automatic rule against the recovery of any type of lost profits or lost value damages if proximate cause is shown." (alteration added)).

Last, Plaintiffs state Defendants implicitly concede there is no risk of duplicative recoveries, as they do not address the issue in the Motion. (*See* Opp'n 34-35). In any event, Plaintiffs argue there is minimal risk of duplicative recoveries from other disappointed bidders because Plaintiffs were next in line to receive the bids, similar to the plaintiff in *Corcel Corp.* vying for the county contract. (*See id.* 35 (citing *Corcel Corp., 551 F. App'x at 578*)).

In their Reply, Defendants insist there is a significant risk of duplicative recoveries, stating other media companies may claim that, **[*38]** absent the bribery scheme, they, too, could have obtained television rights for the Club Tournaments. (*See* Reply 13 n.3). Discovery may reveal if Defendants' supposition is correct. But as Plaintiffs allege they were the only other entities bidding on Club Tournament television rights, other than T&T (*see* Am. Compl. ¶ 140), Defendants' argument fails to persuade Counts One and Two fail to state claims for relief on the basis proximate cause is not sufficiently alleged.

2. "Pattern of Racketeering Activity"

To establish a "pattern of racketeering" under *section 1962(c)*, a plaintiff must allege the defendants committed (1) at least two predicate acts over a ten year period that (2) amount to, or threaten, continued criminal activity. *See* *H.J. Inc. v. Nw. Bell Tel. Co., 492 U.S. 229, 237, 109 S. Ct. 2893, 106 L. Ed. 2d 195 (1989)* (A "pattern of racketeering activity . . . requires at least two acts of racketeering activity . . . within ten years" (alterations added; internal quotation marks and citation omitted)); *see also* *id. at 239* ("[T]o prove a pattern of racketeering activity a plaintiff . . . must show that the racketeering predicates . . . amount to or pose a threat of continued criminal activity." (alterations added)). A plaintiff must also allege either open-ended or closed-ended continuity. **[*39]** *See* *id. at 241*; *see also* *Profilet v. Cambridge Fin. Corp., 231 B.R. 373, 381 (S.D. Fla. 1999)* ("[T]he continuity requirement can be satisfied either by showing past conduct that by its nature shows a threat of future racketeering or by showing repeated racketeering acts over a substantial period of time." (alteration added)). Defendants argue Plaintiffs do not properly allege either open-ened or closed-ended continuity. (*See* Mot. 30-32).

"A party alleging a RICO violation may demonstrate continuity over a closed period by proving a series of related predicates extending over a substantial period of time." *H.J. Inc., 492 U.S. at 242*. According to Defendants, Plaintiffs do not properly allege closed-ended continuity because the RICO allegations concern "only a single scheme with a discrete goal." (Mot. 30 (quoting *Jackson v. Bell S. Telecomms., 372 F.3d 1250, 1267 (11th Cir. 2004)*; other citations omitted)). Defendants cite to several cases where courts found fraudulent activity that took place over several years was insufficient to establish continuity because in each case there was only one scheme. (*See id.* (collecting cases)). In *Daedalus Capital LLC v. Vinecombe*, for example, the Eleventh Circuit found a multi-year scheme to divert a company's proceeds and bleed the company of assets did not show closed-ended continuity because there was only one victim **[*40]** and a single scheme with "one discrete goal, directed at one individual." *625 F. App'x 975, 976 (11th Cir. 2015)* (internal quotation marks and citation omitted). Defendants argue the scheme to bribe Conmebol officials in exchange for Club Tournament television rights is similarly one multi-year scheme with one discrete goal.

The Amended Complaint details a number of illegal bribe payments: first in order to obtain the rights for the Copa Libertadores in 2000, then in 2002 to obtain the rights to the Copa Sudamericana, and again in 2008 for the rights to the Recopa Sudamericana. (*See* Am. Compl. ¶¶ 3, 61-62). Defendants are alleged to have engaged in several rounds of fraudulent acts with a series of distinct goals over a substantial period of time. While there is no precise definition of "substantial period of time," *H.J. Inc., 492 U.S. at 242-43*, the allegations of wrongdoing during a 15-year period satisfy the requirement.

Plaintiffs adequately allege closed-ended continuity. Consequently, the Court does not address the arguments directed to open-ended continuity.

3. Predicate Acts

A RICO claim under *18 U.S.C. section 1962* requires a plaintiff allege defendants "received . . . income derived, directly or indirectly," from "racketeering activity," and the proceeds of the racketeering **[*41]** activity were then used to engage in activities impacting "interstate or foreign commerce." *Id. § 1962(a)* (alteration added). The term "racketeering activity" includes a list of predicate acts that violate federal or state law. *Id. § 1961(1)*. "[A] private plaintiff who wants to recover under civil RICO must show some injury flowing from *one or more* predicate acts." *Pelletier v. Zweifel, 921 F.2d 1465, 1497 (11th Cir. 1991)* (alteration and emphasis added), *abrogated on other grounds by Bridge, 553 U.S. 639, 128 S. Ct. 2131, 170 L. Ed. 2d 1012*.

Plaintiffs allege Defendants committed the following RICO predicates: (1) wire fraud, in violation of *18 U.S.C. section 1343* (*see* Am. Compl. ¶¶ 193-204); (2) money laundering (promotion by international transfer), in violation of *18 U.S.C. section 1956(a)(2)(A)* (*see id.* ¶¶ 205-09); (3) money laundering (concealment by use of an international transfer), in violation of *18 U.S.C. section 1956(a)(2)(B)(i)* (*see id.* ¶¶ 210-17); (4) money laundering (promotional money laundering), in violation of *18 U.S.C. section 1956(a)(1)(A)(i)* (*see id.* ¶¶ 218-24); (5) money laundering (money laundering by concealment), in violation of *18 U.S.C. section 1956(a)(1)(B)(i)* (*see id.* ¶¶ 225-32); (6) monetary transactions in property derived from specified unlawful activity, in violation of *18 U.S.C. section 1957* (*see id.* ¶¶ 233-36); (7) bribery under New York state law, *N.Y. Penal Law sections 180.03* and *180.08* (*see id.* ¶¶ 237-47); and (8) violation of the Travel Act, *18 U.S.C. sections 1952(a)(1)* and *1952(a)(3)* (*see id.* ¶¶ 248-53). To recover on **[*42]** a RICO claim, a plaintiff need only allege two predicate acts constituting a pattern.

Defendants argue Plaintiffs do not properly allege any predicate acts because the wrongdoing occurred extraterritorially and cannot be tied to Plaintiffs' injury. (*See* Mot. 32-43). In this regard, the Court examines two of the RICO predicates alleged: wire fraud and New York commercial bribery.

i. Wire Fraud

When a plaintiff's *section 1962(c) RICO* claims are premised on the predicate act of wire fraud, the substantive RICO allegations must comply with *Federal Rule of Civil Procedure 9(b)*'s heightened pleading standard, requiring the plaintiff state, with particularity, the circumstances constituting fraud or mistake. *See Ambrosia Coal & Constr. Co. v. Pages Morales, 482 F.3d 1309, 1316 & n.10 (11th Cir. 2007)* (holding civil RICO claims, which are "essentially a certain breed of fraud claims, must be pled with an increased level of specificity" under *Rule 9(b)*); *see also Durham v. Business Management Associates, 847 F.2d 1505, 1511-12 (11th Cir. 1988)* (finding the *Rule 9(b)* pleading requirement applicable to RICO claims predicated on wire and/or mail fraud). The Eleventh Circuit has further held to meet this heightened standard, a plaintiff must allege: "(1) the precise statements, documents, or misrepresentations made; (2) the time, place, and person responsible for the statement; (3) the content and manner in which these statements misled **[*43]** the Plaintiffs; and (4) what the defendants gained by the alleged fraud." *Brooks, 116 F.3d at 1380-81* (citation omitted).

As stated, Defendants maintain Plaintiffs' allegations of wire fraud fail because they rely on extraterritorial conduct outside the scope of the statute. (*See* Mot. 35). A two-step analysis is used to determine whether the civil RICO statute applies to instances of foreign racketeering. *See* *RJR Nabisco, Inc. v. European Cmty., 136 S. Ct. 2090, 2101, 195 L. Ed. 2d 476 (2016)*. First, the court asks whether the statute giving rise to the predicate act in question "gives a clear, affirmative indication that it applies extraterritorially." *Id.* If it does, the inquiry is over and the conduct violating the statute may constitute a predicate act for RICO purposes. *See* *id. at 2099*. If not, the court must "determine whether the case involves a domestic application of the statute," which is also sufficient for RICO purposes. *Id. at 2101*.

Defendants insist wire fraud under *18 U.S.C. section 1343* does not apply extraterritorially because there is no language evincing an intent to reach foreign conduct. (*See* Mot. 36 (citing *European Cmty. v. RJR Nabisco, Inc., 764 F.3d 129, 141 (2d Cir. 2014)*, *rev'd and remanded on other grounds by* *RJR Nabisco, Inc., 136 S. Ct. 2090, 195 L. Ed. 2d 476*)). Plaintiffs point to a circuit split and cite to contrary decisions of the First and Third Circuits, which have found the language of *section 1343* supports the extraterritorial reach **[*44]** of the statute. *See, e.g.,* *United States v. Georgiou, 777 F.3d 125, 137-38 (3d Cir. 2015)* (stating wire fraud statute applies extraterritorially, as *section 1343* "punishes frauds executed in "interstate or foreign commerce, and is surely not a statute in which Congress had only domestic concerns in mind" (internal quotation marks and citations omitted)); *see also* *United States v. Lyons, 740 F.3d 702, 718 (1st Cir. 2014)* (same).

While the Eleventh Circuit has yet to weigh in on the issue, one district court in this Circuit recently found the First and Third Circuit decisions persuasive. *See* *Drummond Co., Inc. v. Collingsworth, No. 2:15-CV-506-RDP, 2017 U.S. Dist. LEXIS 120525, 2017 WL 3268907, at *17 (N.D. Ala. Aug. 1, 2017)* ("While the Second Circuit has held that *18 U.S.C. [section] 1343* does not have extraterritorial application . . . other courts have held to the contrary[.]" (internal citations omitted; alterations added) (quoting *Absolute Activist Value Master Fund Ltd. v. Devine, 233 F. Supp. 3d 1297, 1324 (M.D. Fla. 2017)))*. Given this precedent, the Court concludes *18 U.S.C. section 1343* applies to actions taken extraterritorially.

Defendants also assert Count One is insufficient because Plaintiffs do not explain how the wire fraud injured them. (*See* Mot. 39 (quoting *United States v. Takhalov, 827 F.3d 1307, 1313 (11th Cir. 2016)))*. According to Defendants, Plaintiffs fail to meet the standard in *Takhalov*, where the Eleventh Circuit found a scheme to defraud exists where a defendant intends to do harm to a victim. *See* *Takhalov, 827 F.3d at 1312-13*, *as revised* (Oct. 3, 2016), *opinion modified on denial of reh'g*, *838 F.3d 1168 (11th Cir. 2016)*.

Plaintiffs **[*45]** sufficiently plead wire fraud for the same reasons they sufficiently plead proximate cause: they have demonstrated how the wire fraud directly harmed them. The Amended Complaint details Defendants' knowledge Plaintiffs were seeking Club Tournament television rights from Conmebol and the increasing bribe payments extracted to ensure T&T, and not Plaintiffs, received those rights. (*See* Am. Compl. ¶¶ 113-118, 122, 125). These are allegations of Defendants intending to do harm. Reading the Complaint in the light most favorable to Plaintiffs, the Court finds they meet the heightened standard for wire fraud as a RICO predicate act.

ii. New York commercial bribery

New York Penal Law Section 180.03 prohibits "confer[ring] . . . any benefit upon any employee, agent or fiduciary without the consent of the latter's employer or principal," where the benefit conferred "causes economic harm to the employer or principal in an amount exceeding two hundred fifty dollars." *N.Y. Penal Law § 180.03* (alterations added). A well-pled claim for violation of the New York commercial bribery statute requires allegations "a person conferred, offered or agreed to confer a benefit of value exceeding one thousand dollars upon an employee or agent without the consent of **[*46]** his employer or principal with the intent to influence the employee's or agent's conduct in relation to his employer's or principal's affairs." *Welch Foods Inc. v. Gilchrist, No. 93-CV-0641E(F), 1996 U.S. Dist. LEXIS 15819, 1996 WL 607059, at *5 (W.D.N.Y. Oct. 18, 1996)* (citing *N.Y. Penal Law § 180.03*).

The parties agree *New York Penal Law Section 180.03* does not have extraterritorial application. (*See* Mot. 40-41; Opp'n 46). Defendants argue Plaintiffs do not allege a domestic violation of the statute because T&T, a foreign entity, made payments through foreign subsidiaries to bribe Conmebol officials overseas. (*See* Mot. 41).

In response, Plaintiffs point to trips to New York, use of New York bank accounts, and sham contracts with New York choice-of-law provisions, as constituting domestic conduct. (*See* Opp'n 45-46 (citing Am. Compl. ¶¶ 42, 74, 84)). Certainly the Amended Complaint details the transmission of bribe payments by Defendants into accounts in New York. (*See* Am. Compl. ¶¶ 185-86). The transfer of money from one New York bank account to another is hardly dissimilar to standing in New York with a bag of cash and handing it to someone as a bribe payment — an example offered by Plaintiffs at oral argument. There is sufficient domestic conduct allowing New York commercial bribery to serve as a RICO predicate act. **[*47]**

Defendants also argue there are no allegations Conmebol suffered economic harm as a result of the bribes, and as such not all elements of New York commercial bribery are satisfied. (*See* Mot. 42). Defendants challenge Plaintiffs' assertion that Conmebol suffered harm by not accepting Plaintiffs' higher bids. (*See id.*). According to Defendants, the fact the rights at issue were under contract would have left Conmebol subject to suit for breach of contract. (*See id.*). And Defendants insist Plaintiffs do not demonstrate Conmebol stood to gain more than it could have lost. (*See id.*).

While Plaintiffs submitted a proposal on October 21, 2012, covering the years 2015 to 2020, it is unclear whether the rights for 2015 to 2020 were already under contract. (*See* Am. Compl. ¶¶ 116-18). Plaintiffs also state any contracts in place with T&T at the time were the result of a bribery scheme, and thus void as a matter of law. (*See* Opp'n 46). Furthermore, the effects of Defendants' wrongdoing extended to "misleading Plaintiffs about when proposals for the rights would be considered," thus making it difficult for Plaintiffs to present offers before the rights were awarded to T&T at below-market prices. **[*48]** (Am. Compl. ¶ 139). The allegations, viewed in the light most favorable to Plaintiffs, plausibly show Conmebol suffered economic harm. As such, Plaintiffs sufficiently allege New York commercial bribery as a RICO predicate act.

Because Plaintiffs allege injury flowing from the predicate acts of wire fraud and bribery under New York state law, the Court does not address whether money laundering, monetary transactions, bribery under New York state law or violations of the Travel Act may serve as RICO predicate acts.

B. Antitrust Claims (Counts 3-8)

Plaintiffs state antitrust claims against all Defendants for conspiracy in restraint of trade under *Section 1* of the Sherman Act (Counts 3-5); and conspiracy to monopsonize the Americas Television Rights Market under *Section 2* of the Sherman Act (Count 8). (*See* Am. Compl. ¶¶ 277-92, 304-11). Plaintiffs also bring claims against T&T for monopsonization and attempted monopsonization of the Americas Television Rights Market, under *Section 2* of the Sherman Act (Counts 6-7). (*See id.* ¶¶ 293-303).

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States . . . ." *15 U.S.C. § 1* (alterations **[*49]** added). To establish a *Section 1* violation of conspiracy in restraint of trade, a plaintiff does not need to allege the specific elements of conspiracy to monopolize, but instead, must show "concerted action between two or more persons — a conscious commitment to a common scheme designed to achieve an unlawful objective — in restraint of trade." *Procaps S.A. v. Patheon, Inc., 845 F.3d 1072, 1080 (11th Cir. 2016)* (internal quotation marks and citation omitted); *see also* *Aquatherm Indus., Inc. v. Fla. Power & Light Co., 145 F.3d 1258, 1262 (11th Cir. 1998)*. It is not enough to allege conspiracy in restraint of trade; the contract, combination or conspiracy in the restraint must rise to the level of "unreasonable and anticompetitive." *Quality Auto Painting Ctr. of Roselle, Inc. v. State Farm Indem. Co., 870 F.3d 1262, 1271 (11th Cir. 2017)* (internal quotation marks omitted) (quoting *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006))*.

Section 2 of the Sherman Act makes it illegal to "monopolize, or attempt to monopolize, or combine or conspire with any person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*. To demonstrate a violation of *section 2* of the Sherman Act, a plaintiff must allege: (1) monopoly power, which is the power to control prices in or to exclude competition from a relevant market; and (2) the willful acquisition or maintenance of power through predatory or exclusionary acts or practices that have the effect of preventing or excluding **[*50]** competition within the same relevant market. *See* *Morris Commc'ns Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1293-94 (11th Cir. 2004)* (citations omitted).

In their oral arguments, Defendants generally characterized Plaintiffs' antitrust claims as trying to fit the square peg of bribery into the round hole of ***antitrust law*** — an apt description. Defendants challenge the sufficiency of the antitrust claims, stating they should be dismissed because Plaintiffs: (1) only allege harm to themselves as competitors, not harm to consumers and competition; (2) fail to plead a viable theory of causation; and (3) do not plead plausible antitrust markets. (*See* Mot. 47-62). Defendants also argue the complained-of conduct amounts to commercial bribery, which alone is neither exclusionary conduct cognizable under *Section 2* of the Sherman Act, nor an agreement in restraint of trade in violation of *Section 1* of the Act. (*See id.* 44-47). Last, Defendants argue the Foreign Trade Antitrust Improvement Act bars Plaintiffs' claims because the conduct alleged concerns commerce that is not U.S. import commerce (*see id.* 62-68), and does not have a "direct, substantial and reasonably foreseeable effect" on U.S. commerce (*id.* 63). Because the Court agrees Plaintiffs do not sufficiently allege harm to competition, this Order does not address **[*51]** Defendants' arguments as to causation, plausible antitrust markets, commercial bribery or the FTAIA.

Under *Sections 1* and *2* of the Sherman Act, an antitrust plaintiff must allege injury to competition, not merely to the plaintiff as a competitor. *See* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *see also* *Am. Key Corp. v. Cole Nat'l Corp., 762 F.2d 1569, 1579 n.8 (11th Cir. 1985)* ("Harm to competition is a necessary element of all private antitrust suits under *Sections 1* and *2* of the Sherman Act[.]" (alteration added; citation omitted)). To allege actual harm to competition, Plaintiffs must "point to the specific damage done to consumers in the market[.]" *Jacobs v. Tempur-Pedic Intern., Inc., 626 F.3d 1327, 1339 (11th Cir. 2010)* (alteration added; internal quotation marks and citation omitted).

Defendants contend Plaintiffs do not allege harm to competition because each reference of harm to competition is conclusory and implausible. (*See* Mot. 49). In response, Plaintiffs argue (1) cases of monopsonization only require harm to the seller — not to consumers; but in any event, (2) they do include sufficient allegations of harm to consumers. (*See* Opp'n 54-58).

Plaintiffs cite to two out-of-circuit cases for the proposition they only need demonstrate harm to the seller, not the end consumer. (*See id.* 54 (citing *O'Bannon v. NCAA, 7 F. Supp. 3d 955 (N.D. Cal. 2014)*, *aff'd in part, vacated in part on other grounds*, *802 F.3d 1049 (9th Cir. 2015)*; then citing *Telecor Commc'ns, Inc. v. Sw. Bell Tel. Co., 305 F.3d 1124 (10th Cir. 2002)*; additional citation omitted)). **[*52]** In *O'Bannon*, the district court characterized student athletes bringing a labor-related suit against the NCAA as sellers and the schools they attended as the buyers, finding the student-sellers' alleged injury harmed competition because the legal theory of the case was that of a monopsony. *See* *O'Bannon, 7 F. Supp. 3d at 991-92*. In *Telecor*, the Tenth Circuit held "[t]he Supreme Court's treatment of monopsony cases strongly suggests that suppliers . . . are protected by antitrust laws even when the anti-competitive activity does not harm end-users." *305 F.3d at 1133-34* (alterations added).

Defendants distinguish the facts in both *O'Bannon* and *Telecor* from the allegations here. (*See* Reply 29-30). Defendants argue *O'Bannon* involved labor markets for student athletes, in which the buyers are more like consumers, and thus should be treated differently. (*See id.* 29 (citing *Todd v. Exxon Corp., 275 F.3d 191, 201 (2d Cir. 2001))*. Defendants also assert the facts in *Telecor* differ significantly from the facts of this case because they involved multiple entities being prevented from entering a market.

Both decisions rely on *Mandeville Island Farms v. Am. Crystal Sugar Co.*, where the Supreme Court stated the Sherman Act "does not confine its protection to consumers, or to purchasers, or to competitors, or **[*53]** to sellers." *334 U.S. 219, 236, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)*. Admittedly, the court in *O'Bannon* observed "the Supreme Court has indicated that monopsonistic practices that harm suppliers may violate ***antitrust law*** even if they do not ultimately harm consumers." *7 F. Supp. 3d at 992* (citing *Mandeville Island Farms, 334 U.S. at 236*). But while *O'Bannon* reads this standard into *Mandeville Island Farms*, the Supreme Court made no such pronouncement. *See generally* *Mandeville Island Farms, 334 U.S. 219, 68 S. Ct. 996, 92 L. Ed. 1328*. The Supreme Court found injured parties bringing antitrust claims need not be customers or consumers, *see* id. at 235-36; but it did not go so far as to state there need not also be harm to consumers.

In *O'Bannon*, the district court extrapolated an additional meaning from *Mandeville Island Farms* — that antitrust laws do not require harm to consumers — by relying on Justice Jackson's dissent, which noted the price of sugar had not been impacted. *See* 7 F. Supp. 3d at 992 (citation omitted). It is unclear from the majority or the dissent in *Mandeville Island Farms* whether there was other alleged harm to consumers; and it does not appear the specific issue of whether harm to consumers is required as a secondary harm was reached. As a result, the Court interprets Mandeville Island Farms as allowing parties that are not customers or consumers to bring claims under the Sherman **[*54]** Act, but does not read beyond the holding of the case to find harm to consumers is not a required element of antitrust claims.

Defendants correctly point to binding Eleventh Circuit precedent (*see* Reply 29), which holds "[i]n order for a practice to be exclusionary, it must harm the competitive process and thereby harm consumers." Morris, 364 F.3d at 1294 (alteration added; internal quotation marks and citations omitted). More recently, the Eleventh Circuit again held plaintiffs seeking to meet the burden of alleging actual harm to competition "should point to the specific damage done to consumers in the market." Jacobs, 626 F.3d at 1339 (internal quotation marks omitted). Most importantly, neither *Jacobs* or *Morris*, nor any other Eleventh Circuit precedent, carves out exceptions to the rule federal antitrust claims require harm to the consumer.

The Court next turns to Plaintiffs' assertion the Amended Complaint sufficiently alleges harm to consumers as a result of Defendants' conduct. Two allegations involving harm to consumers appear in the pleading: (1) "[d]ecreasing the quantity, quality, and diversity of television programming catering to viewers of South American international club soccer tournaments, due in part to the Fox Defendants' **[*55]** decision not to air all games of the Club Tournaments" (Am. Compl. ¶ 178(h) (alteration added)); and (2) "[r]educing Conmebol's revenues for television rights to the Club Tournament[s], and consequently reducing the revenues passed on by Conmebol to its member soccer associations, thereby decreasing the funds available to recruit, develop and retain soccer players and to develop new facilities, organizations, and events" (*id.* ¶ 178(e) (alterations added)).

First, Defendants correctly note Plaintiffs do not explain how the Fox Defendants not airing all of the games is connected to the bribery scheme. (*See* Reply 30-31). The Amended Complaint falls short of establishing a connection between the bribery scheme and the decrease in quantity, quality, and diversity of television programming catering to South American international club soccer fans.

Second, Defendants argue the harm related to Conmebol's reduced revenues is too removed from the conduct at issue, and thus amounts to an unexplained and conclusory assertion. (*See id.* 31 (citing Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 540, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))). In *Associated General Contractors*, the harm alleged by the plaintiffs was held to be overly removed from the conduct because it required "several somewhat vaguely **[*56]** defined links," 459 U.S. at 540. Here, Plaintiffs ask the Court to take several logical steps: (1) Conmebol received less revenue (*see* Am. Compl. ¶¶ 12, 112, 121, 124); which in turn meant (2) less revenue for the soccer clubs (*see id.* ¶ 178(e)); and therefore, (3) less investment in recruiting, developing and retaining players or developing new facilities, organizations and events (*see id.*); which then finally (4) harmed viewers of soccer matches (*see id.*). The Amended Complaint is vague as to this alleged harm, as Plaintiffs do not spell out whether less revenue for Conmebol necessarily leads to less revenue for the soccer clubs; and whether less revenue for the soccer clubs necessarily leads to spending less on players, facilities, or events.[6] (*See id.*). It is too late now for Plaintiffs to connect the dots for the Court in their Opposition Memorandum by citing to evidence outside the pleading. (*See* Opp'n 57 (citing to González Aff. ¶ 24)).

---

[6] The Court does not consider the information contained in the Affidavit of Fatima Lorena González Toppi [ECF No. 204], filed in response to Defendants' Motion to Dismiss for Lack of Jurisdiction and cited in Plaintiffs' Opposition Memorandum. (*See* Opp'n 43).

The Amended Complaint does not allege a direct harm to consumers. Counts Three through Eight, alleging violations of *Sections 1* and *2* of the Sherman Act, are therefore dismissed.

C. Standing

Defendants argue neither GolTV nor Global Sports has standing to bring civil RICO **[*57]** or antitrust claims. (*See* Mot. 69). According to Defendants, GolTV is not a proper plaintiff because it did not directly bid for the Club Tournament rights. (*See id.*). And while Global Sports did bid for the Club Tournament rights, Defendants argue Global Sports is barred from bringing claims because any injury it suffered occurred outside the United States. (*See id.*). Because Counts Three through Eight are dismissed on other grounds, *see supra* Part III.B., the Court considers whether Plaintiffs have standing to bring the civil RICO claims stated in Counts One and Two.

The RICO statute gives "[a]ny person injured in his business or property by reason of a violation of *section 1962* of this chapter [standing to] sue." *18 U.S.C. § 1964(c)* (alterations added). To determine whether a plaintiff has RICO standing, the Eleventh Circuit requires a plaintiff show "his injuries were proximately caused by the RICO violation." *Bivens Gardens Office Bldg., Inc. v. Barnett Banks of Fla., Inc., 140 F.3d 898, 906 (11th Cir. 1998)* (citing *Pelletier, 921 F.2d at 1499*). The Eleventh Circuit has also found the same motivating principles required to find proximate cause should be considered in determining whether a plaintiff's injury is sufficiently direct for a plaintiff to have RICO standing. *See Harris, 636 F. App'x at 483*.

1. GolTV

The Eleventh Circuit has interpreted the Sherman Act **[*58]** as limiting antitrust standing to "only the customer who purchased the goods or services at issue directly from the alleged antitrust violator." *Lakeland Reg'l Med. Ctr., Inc. v. Astellas US, LLC, 763 F.3d 1280, 1285 (11th Cir. 2014)* (emphasis omitted) (citing *Ill. Brick Co. v. Illinois, 431 U.S. 720, 729, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*; other citations omitted). Defendants contend this indirect-purchaser doctrine for antitrust standing must also be applied in determining whether a plaintiff has standing to bring civil RICO claims. (*See* Mot. 70 (citing *McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 855 (3d Cir. 1996)))*. Plaintiffs disagree and reference a footnote in *Holmes v. Securities Investor Protection Corp., 503 U.S. 258, 270 n.15, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*, as evidence the Supreme Court has rejected the application of antitrust injury principles to RICO claims. (*See* Opp'n 71 (citing *Holmes, 503 U.S. 258, 270 n.15, 112 S. Ct. 1311, 117 L. Ed. 2d 532*)). Plaintiffs also cite *Sedima, 473 U.S. at 493-99*, *Anza, 547 U.S. at 457*, and *Bridge, 553 U.S. at 654-55*, in which the Supreme Court applied a proximate cause standard to determine whether plaintiffs could bring civil RICO claims. (*See* Opp'n 72).

While Defendants assert multiple circuits have applied the antitrust standing doctrine to RICO claims (*see* Reply 43), they only cite to decisions of the Third Circuit (*see* Mot. 70; Reply 43). The parties have not cited to any Eleventh Circuit case applying such a standard. Instead, the Eleventh Circuit has found the standard for RICO standing is a determination of proximate cause. *See, e.g., Bivens Gardens Office Bldg., 140 F.3d at 906*; *Pelletier, 921 F.2d at 1499*; *Harris, 636 F. App'x at 483*. Here, the pleading alleges proximate cause, and as **[*59]** such, is sufficient to establish GolTV's RICO standing. *See Viridis Corp. v. TCA Glob. Credit Master Fund, LP, 155 F. Supp. 3d 1344, 1357 (S.D. Fla. 2015)* (recognizing "the intertwined nature of the standing, proximate cause, and damages analyses under the RICO statutes" in determining the plaintiffs failed to allege proximate cause and damages in addition to RICO standing).

2. Global Sports

"A private RICO plaintiff [] must allege and prove a *domestic* injury to its business or property" in order to establish standing to bring suit under RICO. *RJR Nabisco, Inc., 136 S. Ct. at 2106* (alteration added; emphasis in original). In determining whether an injury is domestic or foreign, "[t]he application of this rule in any given case will not always be self-evident, as disputes may arise as to whether a particular alleged injury is 'foreign' or 'domestic.'" *Id. at 2111* (alteration added). The parties disagree whether Global Sports alleges a domestic or foreign injury — and whether it has standing to bring RICO claims against Defendants.

Many district courts have grappled with this issue, some taking a nuanced approach, and others simply looking to the nationality or home of the plaintiff to determine where the injury was felt. *Compare* *Tatung Co., Ltd. v. Hsu, 217 F. Supp. 3d 1138 (C.D. Cal. 2016)* (holding the plaintiff suffered a domestic RICO injury because the conduct in question was directed **[*60]** at the plaintiff's business pursuits in the United States), *and* *Glock v. Glock, 247 F. Supp. 3d 1307, 2017 WL 1049448, at *7 (N.D. Ga. 2017)* (deciding the injury of an Austrian ex-wife was not suffered in the United States because there was no indication the injury arose when she was working, traveling, or doing business in the United States, or that the assets at issue were in the United States), *appeal filed*, Apr. 7, 2017; *with* *Armada (Singapore) Pte Ltd. v. Amcol Int'l Corp., No. 13 C 3455, 2017 U.S. Dist. LEXIS 70499, 2017 WL 1862836, at *1 (N.D. Ill. May 9, 2017)* (determining the injury was foreign because it was suffered at the plaintiff's principal place of business in Singapore), *and* *Cevdet Aksüt Oğullari Koll. Sti v. Cavusoglu, 245 F. Supp. 3d 650, 659 (D.N.J. 2017)* (holding injury to a business was foreign because the business was located in Turkey). Recently, in *Lan Li v. Walsh, No. 16-81871-CIV, 2017 U.S. Dist. LEXIS 114553, 2017 WL 3130388, at *10 (S.D. Fla. July 24, 2017)*, the court held Iranian and Chinese immigrant investors were injured abroad, not domestically, because they did not allege an economic impact felt in the United States, nor did they allege they were working, traveling, or doing business in the United States at the time.

Defendants argue Global Sports may not bring RICO claims because it is not based in the United States and thus any injury or economic impact felt as a result of Defendants' actions occurred where Global Sports is located — in Uruguay. (*See* Mot. 74 (citing *Absolute Activist Value Master Fund Ltd., 233 F. Supp. 3d 1297, 2017 WL 519066, at *20))*. Plaintiffs contend where **[*61]** Global Sports suffered the injury is not necessarily where the company is based. They offer alternative tests to determine whether an injury is domestic or foreign. (*See* Opp'n 75 (citing *Bascuñán v. Elsaca, 874 F.3d 806, 814 (2d Cir. 2017)*; and *Tatung, 217 F. Supp. 3d at 1138*)). In *Bascuñan*, where misappropriation of property was at issue, the Second Circuit concluded "an injury to tangible property is generally a domestic injury only if the property was physically located in the United States." *874 F.3d at 819*. In *Tatung*, the court found the defendants "thwarted" the plaintiff's business dealings in California and noted it "cannot be the case that the mere fact that a loss is economic means that foreign corporations are unable to avail themselves of the protections of civil RICO." *217 F. Supp. 3d at 1155*. Plaintiffs similarly argue Global Sports's exclusion and injury are domestic events because of its efforts to conduct business in the United States in the form of purchasing U.S. broadcasting rights to Club Tournaments. (*See* Opp'n 75).

The Court is persuaded by the nuanced approach to determining whether a RICO injury is "domestic" or "foreign." Evidence of foreign nationality or primary place of business alone is insufficient to categorize an injury as foreign under RICO. Consideration of factors such **[*62]** as where the injury to a property interest took place, *see* *Bascuñán, 874 F.3d at 819*; and whether Plaintiffs were working, traveling or doing business in the United States at the time, *see* *Lan Li, 2017 U.S. Dist. LEXIS 114553, 2017 WL 3130388, at *10*; are relevant.

Here, the injury to Global Sports's property interest was the loss of bids to purchase the U.S. and Americas broadcasting rights for Club Tournaments. (*See* Am. Compl. ¶¶ 111-12, 116-17, 122-23). Each of the bids was also an attempt by Global Sports to do business in the United States, as "GolTV and Global Sports together were denied the ability to provide telecasts of the Club Tournaments in the Florida market and throughout the United States." (*Id.* ¶ 141). As a result, the Amended Complaint alleges domestic injury to Global Sports, and Global Sports has civil RICO standing.

D. State Law Claims (Counts 9-11)

In their Amended Complaint, Plaintiffs raise claims against Defendants under the FDUTPA (Count 9) (*see id.* ¶¶ 312-17); and for civil conspiracy to commit tortious interference under Florida law (Count 11) (*see id.* ¶¶ 325-29). Plaintiffs also bring a claim against T&T, Torneos and the Fox Defendants for tortious interference with prospective economic advantage under Florida law (Count 10). (*See id.* ¶¶ 318-24). **[*63]** Defendants request the Court dismiss all of the Florida law claims. (*See* Mot. 75-81).

1. Florida Deceptive and Unfair Trade Practices Act Claim

The FDUTPA "protect[s] the consuming public and legitimate business enterprises from those who engage in unfair methods of competition, or unconscionable, deceptive, or unfair acts or practices in the conduct of any trade or commerce." *Fla. Stat. § 501.202(2)* (alteration added). The "FDUTPA can be violated in two ways: (1) a per se violation premised on the violation of another law proscribing unfair or deceptive practice and (2) adopting an unfair or deceptive practice." *Felice v. Invicta Watch Co. of Am., Inc., No. 16-CV-62772, 2017 U.S. Dist. LEXIS 122895, 2017 WL 3336715, at *2 (S.D. Fla. Aug. 4, 2017)* (internal quotation marks and citation omitted). "An unfair practice is one that offends established public policy and one that is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *PNR, Inc. v. Beacon Prop. Mgmt., Inc., 842 So. 2d 773, 777 (Fla. 2003)* (internal quotation marks and citations omitted). An act is deceptive "if there is a representation, omission[,] or practice that is likely to mislead the consumer acting reasonably in the circumstances, to the consumer's detriment." *Millennium Commc'ns & Fulfillment, Inc. v. Office of the Att'y Gen., 761 So. 2d 1256, 1263 (Fla. 3d DCA 2000)* (alteration added) (quoting *Sw. Sunsites, Inc. v. FTC, 785 F.2d 1431, 1434-35 (9th Cir. 1986))*.

Defendants argue the FDUTPA claim fails because it is derivative of Plaintiffs' deficient federal antitrust claims, and **[*64]** so should also be dismissed. (*See* Mot. 75). To this, Plaintiffs respond, "even if the Court were to conclude that Defendants' conduct has not violated the antitrust laws, Defendants' use of commercial bribery to deprive Plaintiffs of a fair opportunity to bid upon and obtain the tournament rights would by itself be sufficient to state a FDUTPA claim." (Opp'n 77). The Court agrees dismissal of antitrust claims does not necessarily strike a death knell for a claim under the FDUTPA.

Yet, as is the case for antitrust claims, claims under the FDUTPA require harm to consumers. Plaintiffs concede as much, asserting an unfair or deceptive practice must be "injurious to consumers." (*Id.* (quoting *Am. Airlines, Inc. v. Despegar.com USA, Inc., No. 13-2277-CIV, 2013 U.S. Dist. LEXIS 201682, 2013 WL 12064859, at *7 (S.D. Fla. Nov. 13, 2013)))*. For the same reasons articulated in *supra* Part III.B., the Amended Complaint fails to sufficiently plead harm to consumers for purposes of articulating a claim under the FDUTPA. Consequently, the Court does not address Defendants' other arguments regarding the FDUTPA claim, and dismisses Count Nine.

2. Tortious Interference and Conspiracy to Interfere Claims

To state a claim for tortious interference with prospective economic advantage or business **[*65]** relationship, a plaintiff must show: "(1) the existence of a business relationship, not necessarily evidenced by an enforceable contract; (2) knowledge of the relationship on the part of the defendant; (3) an intentional and unjustified interference with the relationship by the defendant; and (4) damage to the plaintiff as a result of the breach of the relationship." *Tamiami Trail Tours, Inc. v. Cotton, 463 So. 2d 1126, 1127 (Fla. 1985)*; *see also* G.M. Brod & Co. Inc., v. U.S. Home Corp., 759 F.2d 1526, 1534 (11th Cir. 1985) (explaining elements of tortious interference under Florida law).

The Eleventh Circuit has held "[a] mere offer to sell . . . does not, by itself, give rise to sufficient legal rights to support a claim of intentional interference with a business relationship." *Duty Free Ams., Inc. v. Estee Lauder Cos., 797 F.3d 1248, 1279-80 (11th Cir. 2015)* (internal quotation marks and citation omitted; alterations added). Instead, "an action for tortious interference with a business relationship requires a business relationship evidenced by an actual and identifiable understanding or agreement which in all probability would have been completed if the defendant had not interfered." *Ethan Allen, Inc. v. Georgetown Manor, Inc., 647 So. 2d 812, 815 (Fla. 1994)*; *see also* *Int'l Sales & Serv., 262 F.3d at 1154*. To be clear, "[a] business relationship need not be evidenced by a contract." *Int'l Sales & Serv., Inc. v. Austral Insulated Prods., Inc., 262 F.3d 1152, 1154 (11th Cir. 2001)* (alteration added; citation omitted).

Defendants argue Plaintiffs fail to state two of the required elements for this claim in Count **[*66]** Ten: the existence of a relationship between Conmebol and Plaintiffs beyond that of offeror and offeree, and damage to Plaintiffs as a result of a breach of the relationship. (*See* Mot. 79-81). According to Defendants, no business relationship is alleged because Plaintiffs' connection to Conmebol was limited to Global Sports's offers to purchase Club Tournament television rights from Conmebol. (*See id.* 80). Defendants describe Plaintiffs' claims as even weaker than those in a typical case in which a party makes an offer because here the rights were not for sale and were under contract to T&T when the offers were made.[7] (*See id.*). For their part, Plaintiffs emphasize facts Defendants overlook supporting Plaintiffs' relationship with Conmebol, including:[8] a preexisting and ongoing relationship at the time Plaintiffs pursued the tournament rights; Conmebol's President's promise Plaintiffs' proposal would receive formal consideration by the Conmebol Executive Committee; and the fact Plaintiffs' submissions were the only other proposals for the television rights for the Club Tournaments. (*See* Opp'n 84-85 (citing Am. Compl. ¶¶ 116-17, 321)).

Other courts have addressed the standard for **[*67]** whether a business relationship arises in the context of a bidding process for a contract or exclusive rights. "[T]o establish a protected business relationship within a bidding process, a plaintiff must allege additional facts indicating that the relationship went beyond the bidding process and into negotiations which in all probability would have been completed." *Duty Free Ams., Inc. v. Estée Lauder Cos., Inc., 946 F. Supp. 2d 1321, 1339 (S.D. Fla. 2013)* (alteration added; citations omitted). In *Diversified Management Solutions, Inc. v. Control Systems Research, Inc., No. 15-81062-CIV, 2016 U.S. Dist. LEXIS 189771, 2016 WL 4256916 (S.D. Fla. May 16, 2016)*, the court held the plaintiff, a weather observation service, had a business relationship with the Federal Aviation Authority as part of a bidding process. *See id. at *7*. The defendant, a rival contractor that interfered in the bidding process, argued the plaintiff's relationship with the FAA was limited to that of offeror and offeree, but the court found plaintiff had shown two of its bids were later accepted by the FAA, indicating the plaintiff would have had significantly more than a "speculative hope" of winning the contracts had it not been for the defendant. *Id.*

In this case, there are allegations of a relationship between Conmebol and Plaintiffs go beyond the simple submission of offers. Plaintiffs **[*68]** were the only party other than T&T to bid for the Club Tournament television rights (*see* Am. Compl. ¶ 140); Plaintiffs' bids were significantly higher than T&T's (*see id.* ¶¶ 112, 117, 121-24, 126); Conmebol officials told Plaintiffs if they submitted a proposal, it would be formally considered by the Executive Committee (*see id.* ¶¶ 116-20); Conmebol shared its bids with Defendants, resulting in an increase in the amount T&T ultimately paid for the television rights (*see id.* ¶¶ 113-14, 118, 120, 125, 321); and Global Sports had previously entered into an agreement with Conmebol to purchase static advertising rights, such as billboard space for the Club Tournaments from 2010 to 2014 (*see id.* ¶ 320). Together, these are plausible allegations of a business relationship in which, had it not been for Defendants, Conmebol and Plaintiffs would have in all probability reached an agreement for Plaintiffs to purchase the Club Tournament television rights. *See* *Ethan Allen Inc., 647 So. 2d at 815*. For these reasons, as well as those previously explained, the Amended Complaint sufficiently alleges damage to Plaintiffs as a result of a breach of the relationship.

Count Ten for tortious interference under Florida law survives the Motion. **[*69]** As to Count Eleven, Defendants do not present a meaningful challenge to Plaintiffs' conspiracy claim. (*See generally* Mot.). In fact, Defendants' only reference to the conspiracy claim is in the title of the subsection on tortious interference, which states "Plaintiffs Do Not Plead Cognizable Claims for Tortious Interference or Conspiracy to Interfere." (*Id.* 79). As such, Count Eleven is not dismissed.

---

[7] Arguments focused on whether the television rights were already under contract at the precise moment Plaintiffs brought each proposal to Conmebol and whether Conmebol would have revoked those contracts had it not been for the fraudulent acts of Defendants are factual disputes the Court will not address. *See supra* Part III.A.1.

[8] The Court does not consider extraneous facts referenced in Plaintiffs' Opposition stating T&T reacted to Plaintiffs' 2012 offer to Conmebol by paying an additional $200,000 per year to two Conmebol directors and that Defendants' actions were aimed at preventing Plaintiffs from being awarded the Club Tournament television rights. (*See* Opp'n 85-86).

E. Alejandro Burzaco

While Burzaco adopts and joins Defendants' Motion, he also writes separately. (*See id.* 81). First, Burzaco addresses the RICO claims, arguing Plaintiffs fail to allege their injury was proximately caused by Defendants' conduct. (*See id.*). Second, Burzaco argues Plaintiffs' claims are time-barred to the extent the claims are based on events surrounding the rejection of an offer made by Plaintiffs to Conmebol in March 2010.[9] (*See id.* 82-84). Burzaco does not make any new arguments regarding proximate cause (*see id.* 81), and so the Court only addresses his arguments as they pertain to whether the claims are time-barred.

"[A] *Rule 12(b)(6)* dismissal on statute of limitations grounds is appropriate only if it is apparent from the face of the complaint that the claim is time-barred." *La Grasta v. First Union Sec., Inc., 358 F.3d 840, 845-46 (11th Cir. 2004)* (alteration added; **[*70]** internal quotation marks and citations omitted). The Court considers whether the RICO claims (Counts 1 & 2) and the remaining Florida state law claims (Counts 10 & 11) are time-barred.

1. RICO claims

A four-year statute of limitations applies to civil RICO claims. *See Rotella v. Wood, 528 U.S. 549, 552, 120 S. Ct. 1075, 145 L. Ed. 2d 1047 (2000)* (citation omitted). The date of accrual is based on the date the plaintiff knew or should have known it was injured. *See id. at 553*; *see also Pac. Harbor Capital, Inc. v. Barnett Bank, N.A., 252 F.3d 1246, 1251 (11th Cir. 2011)* (citation omitted). Defendants maintain the injury occurred when Plaintiffs' March 2010 offer to purchase the Club Tournament rights was rejected,[10] falling outside the four-year statute of limitations. (*See* Mot. 82-83). According to Plaintiffs, Defendants' fraudulent concealment in the form of sham consulting agreements and the hidden bribery scheme prevented Plaintiffs from learning of the injury. (*See* Opp'n 87; *see also* Am. Compl. ¶ 136). The Court looks to the Amended Complaint to determine the accrual date.

The Amended Complaint shows the accrual date was May 27, 2015, when Plaintiffs learned of an indictment for bribery, fraud, and other criminal wrongdoing associated with Conmebol's awarding of rights for soccer tournaments. (*See* Am. Compl. ¶ 127). Plaintiffs claim to have investigated **[*71]** why Conmebol had rejected their offers prior to May of 2015, but were unable to uncover the injuries caused by Defendants' wrongdoing and interference until the criminal indictments brought Defendants' bribery conspiracy to light. (*See id.* ¶¶ 136-37). Unlike *Pacific Harbor, 252 F.3d at 1246*, where the plaintiff suspected wrongdoing several years before beginning to investigate, there is no indication Plaintiffs should have suspected they had been injured by Defendants prior to the May 2015 indictment. Since the accrual date is May 27, 2015 and Plaintiffs filed suit on October 20, 2016 — less than four years later — the RICO claims are not time-barred.

2. State law claims

Under Florida law, the statute of limitations for malicious interference and other intentional tort claims is four years. *See Fla. Stat. § 95.11(3)(o)*. "A cause of action accrues, for statute of limitations purposes 'when the last element constituting the cause of action occurs.'" *New Lenox Indus., Inc. v. Fenton, 510 F. Supp. 2d 893, 906 (M.D. Fla. 2007)* (footnote call number omitted) (quoting *Fla. Stat. § 95.031(1)*).

Defendants argue the Florida state law claims are brought occurred outside the applicable four-year limitations period and no delayed discovery doctrine applies. (*See* Mot. 84 n.27 (citing *Yusuf Mohamad Excavation, Inc. v.*

---

[9] Defendants join and adopt Burzaco's argument Plaintiffs' claims are time-barred. (*See* Mot. 84 n.27; *see also* Reply 52 n.30).

[10] The offer to Conmebol to purchase television rights for 2011 to 2014 was presented through a series of meetings, the first of which occurred on March 3, 2010. (*See* Am. Compl. ¶¶ 111-12). The Amended Complaint is not specific as to when Conmebol rejected Plaintiffs' offer, stating only that "Conmebol did not accept [Plaintiffs'] offer." (*Id.* ¶ 114 (alteration added)).

Ringhaver Equip., Co., 793 So. 2d 1127, 1127 (Fla. 5th DCA 2001))). Plaintiffs concede Defendants' point, instead arguing the doctrine **[*72]** of fraudulent concealment should be employed to toll the statute of limitations. (*See* Opp'n 88 n.26 (citing Razor Capital, LLC v. CMAX Fin. LLC, No. 17-80388, 2017 U.S. Dist. LEXIS 128362, 2017 WL 3481761, at *3 (S.D. Fla. Aug. 14, 2017))).

Generally two elements are required for fraudulent concealment to toll the statute of limitations: "'[a] plaintiff must show both successful concealment of the cause of action and fraudulent means to achieve that concealment.'" Jones v. Childers, 18 F.3d 899, 909 (11th Cir. 1994) (alteration added) (quoting Nardone v. Reynolds, 333 So. 2d 25, 37 (Fla. 1976), *holding modified on other grounds by* Tanner v. Hartog, 618 So. 2d 177 (Fla. 1993)). The Amended Complaint describes how Burzaco and his co-Defendants successfully concealed their bribery conspiracy for years through a series of sham consulting agreements that disguised bribery payments to corrupt Conmebol officials as payments for legitimate services which were never rendered. (*See* Am. Compl. ¶¶ 71-74, 136). Defendants' actions fall squarely into the standard set by the Florida Supreme Court for fraudulent concealment. As such, Counts Ten and Eleven are not dismissed.

F. Juan Angel Napout

Napout[11] argues the general allegations against Conmebol officials do not give him fair notice of the claims against him; and the specific factual allegations fall short of stating a claim against him. (*See* Mot. 84-89). Certainly, Rule 8 requires a plaintiff give "fair notice" of what its claims **[*73]** are and the "grounds upon which [they] rest[]." Twombly, 550 U.S. at 555 (alterations added; citation omitted). To satisfy the minimum standard of Rule 8, a complaint "must delineate the conduct at issue as to each Defendant, [and] allege facts showing knowledge or intent as to each Defendant[.]" Bentley v. Bank of Am., N.A., 773 F. Supp. 2d 1367, 1373 (S.D. Fla. 2011) (alterations added). As discussed in *supra* Part III.A.3., civil RICO plaintiffs alleging wire fraud, as is the case here, must additionally satisfy the heightened pleading requirements of Rule 9(b). *See* Durham, 847 F.2d at 1511-12.

Napout accuses Plaintiffs of lumping him together with other Conmebol officials by using the term "Conmebol officials," which refers to as many as 16 individuals. (*See* Mot. 87 (citing Am. Compl. ¶ 66)). Plaintiffs use the term "Conmebol officials" to refer to (1) individuals other than Napout (*see id.* (citing Am. Compl. ¶¶ 62, 64, 66, 70, 116)); (2) an unspecified and general set of individuals (*see id.* (citing Am. Compl. ¶¶ 3, 4, 5, 11, 12, 71, 78)); and (3) Napout and Figueredo (*see id.* (citing Am. Compl. ¶¶ 129, 139, 168, 186, 189, 190, 191, 238, 258, 274)). Napout cites several cases for the unremarkable proposition a plaintiff cannot lump together defendants. (*See id.* 86 (citations omitted)).

In *Joseph v. Bernstein*, only **[*74]** one of the five defendants was specifically named as engaging in fraudulent activities, while other allegations lacked any explanation of how each defendant was liable. *See* No. 13-24355, 2014 U.S. Dist. LEXIS 114997, 2014 WL 4101392, at *6 (S.D. Fla. Aug. 19, 2014). In *Lane v. Capital Acquisitions & Mgmt. Co.*, the complaint did not differentiate among the defendants, instead alleging violations by one collective defendant despite naming five defendants. *See* No. 04-60602 CIV, 2006 U.S. Dist. LEXIS 96422, 2006 WL 4590705, at *5 (S.D. Fla. Apr. 14, 2006). Consequently, the district court found each individual defendant could not determine from the face of the complaint which acts or omissions the plaintiffs sought to hold them each liable for. *See id.* In *City of Miami v. Bank of Am. Corp.*, the plaintiff lumped together the defendants and made "undifferentiated allegations against the composite entity." 171 F. Supp. 3d 1314 (S.D. Fla. 2016).

The Amended Complaint is unlike the pleadings discussed in Joseph, Lane, and City of Miami. There are 34 paragraphs containing specific allegations against Napout. (*See* Am. Compl. ¶¶ 2, 34, 38-39, 45, 54, 69, 76, 84, 129, 132-35, 139, 168, 184, 186, 189-92, 203, 238, 245, 250, 258, 262-64, 266-67, 274, 327). The term "Conmebol officials" is defined as members of the Executive Committee of Conmebol (*see id.* ¶ 32), and Napout was a member of the Executive Committee **[*75]** from 2007 to 2014 (*see id.* ¶ 34). The Amended Complaint's specificity is thus a

---

[11] Napout additionally adopts and joins Defendants' arguments for dismissal of Counts One through Five, Eight, Nine and Eleven of the Amended Complaint. (*See* Mot. 84 n.28; *see also* Reply 55 n.32).

far cry from the indiscriminate lumping together of defendants in the cases Napout cites. Furthermore, Plaintiffs point out Napout's ability to distinguish which allegations do not pertain to him is itself evidence the pleading provides Napout with fair notice of the claims against him. (*See* Opp'n 92). The Court agrees.

Napout also asserts the Amended Complaint falls short of stating an actionable claim against him. (*See* Mot. 88-89). But he merely recycles Defendants' prior arguments that Plaintiffs (1) could not have successfully bid for Club Tournament rights already under contract and (2) were unsuccessful in bidding for broadcasting rights once there was no ongoing bribery taking place. (*See id.* 89). Again, the Court declines to address what amounts to a factual dispute between the parties.

Instead, the Court looks to the Amended Complaint to determine whether the factual allegations against Napout are sufficient. Plaintiffs allege Napout committed illegal acts, including: (1) unlawfully negotiating and reaching agreements regarding the television rights (*see, e.g.*, Am. Compl. ¶¶ 132-35, 139, 168, 186, 189-92, **[*76]** 245, 250, 258); (2) soliciting and receiving six-figure bribe payments in exchange for those rights (*see, e.g., id*. ¶¶ 69, 76, 135, 168, 186, 189-92, 203, 238, 245, 250, 258); (3) misleading Plaintiffs about when the rights were available and licensing those rights in advance of expected offers from Plaintiffs (*see, e.g., id*. ¶¶ 129, 139); and (4) conspiring with co-Defendants to conceal the fraudulent activity (*see, e.g., id*. ¶¶ 84, 186). These allegations are sufficient to state a claim under RICO with wire fraud and commercial bribery as predicate offenses. *See supra* Part III.A.3.

The Court also considers whether the pleading states a claim against Napout for conspiracy to commit tortious interference. Since the alleged conduct sufficiently demonstrates tortious interference, *see* Part III.D.2., the Court limits its analysis below to whether Plaintiffs plead a claim for civil conspiracy against Napout.

In Florida, the elements of a civil conspiracy claim are: "(a) an agreement between two or more parties, (b) to do an unlawful act or to do a lawful act by unlawful means, (c) the doing of some overt act in pursuance of the conspiracy, and (d) damage to plaintiff as a result of the acts **[*77]** done under the conspiracy." *UTC Indus., Inc. v. Presidential Fin. Corp., 976 So. 2d 92, 94 (Fla. 3d DCA 2008)* (citation and internal quotation marks omitted). The "gist of a civil conspiracy is . . . the civil wrong which is done through the conspiracy which results in injury to the Plaintiff." *Czarnecki v. Roller, 726 F. Supp. 832, 840 (S.D. Fla. 1989)* (alteration added; citation and internal quotation marks omitted). The Amended Complaint makes it clear Napout agreed to participate in wire fraud and commercial bribery involving several parties (*see* Am. Compl. ¶¶ 69, 186, 189-92, 245); received bribes in exchange for ensuring T&T rather than Plaintiffs received the rights to the Club Tournaments (*see id.* ¶¶ 76, 84, 139, 250); and caused harm to Plaintiffs in the form of loss of profits (*see id.* ¶ 179, 268). Count Eleven for conspiracy to commit tortious interference amply states a claim for relief.

For the reasons stated above, the antitrust claims (Counts 3-5 & 8), and the FDUTPA claim (Count 9), against Napout are dismissed. *See supra* Part III.B. (dismissing antitrust claims for failing to allege harm to consumers); *see also supra* Part III.D.1. (dismissing the FDUTPA claim for the same reasons).

IV. CONCLUSION

In accordance with the foregoing, it is

ORDERED AND ADJUDGED that the Motion to Dismiss **[ECF No. 255]** is **GRANTED [*78] in part** and **DENIED in part**. The parties shall file a joint scheduling report, as required by *Local Rule 16.1*, by **February 8, 2018**.

DONE AND ORDERED in Miami, Florida, this 26th day of January, 2018.

/s/ Cecilia M. Altonaga

CECILIA M. ALTONAGA

UNITED STATES DISTRICT JUDGE

Opinion by: R. GARY KLAUSNER

Opinion

CIVIL MINUTES - GENERAL

Proceedings: (IN CHAMBERS) Order Re: Defendant's Motion to Dismiss (DE 13)

I. INTRODUCTION

On October 19, 2017, Plaintiffs Hush Hush Sound, Inc. ("Hush"), Michael David ("David"), and Tyler Blake ("Blake") (collectively, "Plaintiffs") filed the present action against Defendant H&M Hennes & Mauritz LP ("H&M") and ten Doe Defendants. Plaintiffs raise the following claims in their Complaint: (1) trademark infringement in violation of *15 U.S.C. § 1114(1)(a)*; (2) trademark infringement in violation of *15 U.S.C. § 1125(a)*; (3) common law misappropriation of name and likeness; and (4) violation of California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code § 17200*.

H&M now moves to dismiss Plaintiffs' Complaint under *Federal Rule of Civil Procedure ("Rule") 12(b)(6)*. For the following reasons, the Court **GRANTS in part** and **DENIES in part** H&M's Motion to Dismiss.

II. FACTUAL BACKGROUND

The following facts are alleged in the Complaint.

David and Blake formed a disc jockey ("DJ") group that produces and performs electronic dance music. David and Blake perform under the name "Classixx" and, together with Hush, do business under the name **[*2]** "Classixx." Hush owns a registered trademark for the unstylized word mark "Classixx" ("trademark") for (a) use in musical sound and video recordings in all media and (b) live musical performances. Plaintiffs market and sell t-shirts, apparel, and other merchandise that bears their "Classixx" trademark. Although Plaintiffs did not register their trademark until 2013, they have used the trademark to identify their brand, performances, music, and merchandise continuously since they began producing music in 2007. Plaintiffs' music is critically and commercially successful. It landed in the top 15 of the "American Billboard Independent Albums" and "Heatseekers Albums" charts, and received critical acclaim in the magazines "Chicagoist" and "LA Weekly."

H&M is a clothing retailer. H&M began selling garments, including a sweater featuring the word "classixx" in a shadow design ("the sweater" or "'classixx' sweater"), as shown below.

The sweater and H&M's other infringing garments create a likelihood of confusion, especially because H&M sometimes plays Plaintiffs' music in its stores. In fact, one consumer uploaded a photo of the sweaters on social media, with the caption "@Classixx merch in **[*3]** H&M Paris?" H&M's use of Plaintiffs' trademark has caused Plaintiffs general and special damages. In addition, H&M obtained profits they would not have realized but for their use of Plaintiffs' trademark.

III. JUDICIAL STANDARD

To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Ad. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A claim is facially plausible if the plaintiff alleges enough facts to draw a reasonable inference that the defendant is liable. *Id.* A plaintiff need not provide detailed factual allegations but must provide more than mere legal conclusions. *Twombly, 550 U.S. at 555*. When ruling on a *Rule 12(b)(6)* motion, the court must accept the allegations in the complaint as true and construe them in the light most favorable to the non-moving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 19961)*. However, the court need not accept as true conclusory legal allegations cast in the form of factual allegations. *Ashcroft, 556 U.S. at 678*.

Apart from factual insufficiency, a complaint is also subject to dismissal under *Rule 12(b)(6)* where it lacks a cognizable legal theory, *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (1988)* or where the allegations on their face "show that relief is barred" for some legal reason, *Jones v. Bock, 549 U.S. 199, 215, 127 S. Ct. 910, 166 L. Ed. 2d 798 (2007)*.

IV. DISCUSSION

A. Trademark Claims (Claims 1 and 2)

To successfully **[*4]** allege trademark infringement under the Lanham Act, a plaintiff must plead (1) that it has a protectable interest in the trademark at issue and (2) that the defendant's use of the mark creates a likelihood of confusion. *Rearden LLC v. Rearden Commerce, Inc., 683 F.3d 1190, 1203 (9th Cir. 2012)* (citing *Network Automation, Inc. v. Advanced Sys. Concepts, Inc., 638 F.3d 1137, 1144 (9th Cir. 2011)*. H&M argues that Plaintiffs' trademark claims are barred by the *First Amendment* and that Plaintiffs otherwise fail to adequately allege a likelihood of confusion. The Court addresses each argument in turn.

1. First Amendment Protection

H&M argues that its "classixx" sweaters are protected under the *First Amendment*. The Court disagrees.

a. H&M Is Not Engaged in Expressive Conduct

H&M first argues that Plaintiffs' trademark infringement claims are barred under the *First Amendment's* expressive conduct doctrine. Conduct is expressive and entitled to *First Amendment* protection if the actor intends to convey "a particularized message" and there is a great likelihood that the message will be understood by those viewing it. *Texas v. Johnson, 491 U.S. 397, 404, 109 S. Ct. 2533, 105 L. Ed. 2d 342 (1989)*. Courts have treated wearing particular clothing as a form of expressive conduct. *See* *Jacobs v. Clark CO.). Sch. Dist., 373 F. Supp. 2d 1162, 1172 (D. Nev. 2005)* ("[W]earing clothing bearing a printed message constitutes speech") (citing *Cohen v. Cal., 403 U.S. 15, 26, 91 S. Ct. 1780, 29 L. Ed. 2d 284 (1971))*. In this case, however, the consumer's right to wear a garment bearing the word "classixx" is not impacted; rather, at issue is H&M's right to sell such a garment. **[*5]** H&M does not argue that selling its "classixx" apparel is expressive conduct. To the contrary, it argues that it exercises no creative choice in what apparel it sells. This defense fails.

b. The Sale ofH&M's Sweater Does Not Serve a Predominantly Expressive Purpose

H&M also cites to *Mastrovincenzo*, in which the Second Circuit explained that the sale of clothing is speech protected by the *First Amendment* if it has a predominantly expressive purpose. *Mastrovincenzo v. City of New York, 435 F.3d 78, 95-97 (2d Cir. 2006)*.[1] If the sale of clothing is instead "a mere commercial transaction," the *First Amendment* offers no protection. *Id. at 97*. In *Mastrovincenzo*, street vendors sold hand-painted hats and clothing of their own design, for the stated purpose of expressing "the particular idea represented on the work" and the vendors' "upbringing and style as an artist." *Id.* H&M admits that, unlike the defendants in *Mastrovincenzo*, it did not design or create the infringing garments. H&M claims it merely resells what clothing is allocated to it. Although H&M argues its consumers can express themselves by wearing their "classixx" sweater, H&M does not argue that it is expressing any message about itself by selling the infringing garments. *See id.* (noting courts should consider "whether a vendor (if different **[*6]** from the artist) purports, through the sale of goods, to be engaging in an act of self-expression rather than a mere commercial transaction"). The sale of H-M's "classixx" apparel therefore does not serve a predominantly expressive purpose. This defense also fails.

c. The Rogers Test is Inapplicable

---

[1] Although H&M cites *Mastrovincenzo* in support of its arguments regarding expressive conduct and the *Rogers* test (discussed below), *Mastrovincenzo* applied neither the expressive conduct doctrine nor *Rogers. See* *Mastrovincenzo v. Caly of New York. 435 F.3d 78, 91 n.9 (2d Cir. 2006)*.

Finally, H&M argues that its "classixx" sweater is an artistic work protected under the *Rogers* test. In *Mattel, Inc. v. MCA Records, 296 F.3d 894, 902 (9th Cir. 2002)*, the Ninth Circuit adopted the *Rogers* test as the "method for balancing the trademark . . . rights protected by *§43(a)* of the Lanham Act against *First Amendment* rights in cases involving expressive works." *Brown v. Electronic Arts, Inc., 724 F.3d 1235, 1241 (9th Cir. 2013)*. Under the *Rogers* test, an artistic work's infringing use of a trademark is not actionable unless the use of the mark (1) "has no artistic relevance to the underlying work whatsoever" or (2) "[I]f it has some artistic relevance, . . . [it] explicitly misleads as to the source or the content of the work." *Mattel, Inc. v. MCA Records, Inc., 296 F.3d 894, 902 (9th Cir. 2002)* (quoting *Rogers v. Grimaldi, 875 F.2d 994, 999 (2d Cir. 1989))*.

The *Rogers* test applies only to artistic or expressive works; it is not applicable to commercial works such as a traditional advertisement. *Brown, 724 F.3d at 1241*; 6 J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition §31:144.50* (5th ed. 2017). In addition, courts **[*7]** in the Ninth Circuit have refused to apply the *Rogers* test unless the mark at issue was "imbue[d] . . . with a meaning beyond its source-identifying function." *Mattel, 296 F.3d at 902* (noting marks like "Band-Aid," "Rolls Royce," "Barbie," and "aspirin" have taken on expressive meaning beyond their source-identifying function); *Rebelution, LLC v. Perez, 732 F. Supp. 2d 883, 888 (N.D. Cal. 2010)* (refusing to apply the *Rogers* test when the word at issue — "rebelution" — had been imbued with no alternate meaning by the public).

H&M argues its sweaters satisfy each requirement of the *Rogers* test. Plaintiffs counter that *Rogers* is inapplicable because H&M's "classixx" sweater is not an artistic work. Indeed, H&M cites no cases in which the court applies the *Rogers* test to an item of clothing. The Court need not decide the issue here. Even assuming the sweater at issue is an expressive work, there is no evidence the word "classixx" has entered public discourse. The allegations suggest that "classixx" is understood only in association with Plaintiffs' musical group. As such, the *Rogers* test is inapplicable.

Even if the *Rogers* test applied, H&M's arguments fail to establish artistic relevance. Courts in the Ninth Circuit require the artistic relevance of the defendant's use of the **[*8]** mark "to be with reference to the meaning associated *with plaintiff's* mark " *Rebelution, LLC v. Perez, 732 F. Supp. 2d 883, 889 (N.D. Cal. 2010)* (collecting cases). If the plaintiff does not target the original product or service, but instead "merely borrow[s] another's property to get attention," the *Rogers* defense fails. *Warner Bros. Entm't v. Global Asylum, Inc., No. CV 12-9547, 2013 U.S. Dist. LEXIS 193925, 2013 WL 12114836, at *10 (C.D. Cal. Jan. 29, 2013)* (quoting *Mattel, 296 F.2d at 901*)).

H&M asserts that the word "classixx" is a restructuring of the commonly used word "classic," and that its use furthers the sweater's goal of communicating that the wearer has a timeless, yet edgy personality. That the expressive intent of the sweater bears relevance to H&M's interpretation of the word "classixx" is irrelevant. "This argument, at its logical conclusion, would allow any person to ascribe their own meaning to a mark and thereafter argue that their artistic work bears relevance to this opportunistically-defined meaning." *Rebelution, LLC, 732 F. Supp. 2d at 889*. H&M makes no showing that the musical group "Classixx" had genuine relevance to the message expressed by the sweater. It is more likely that "classixx" was chosen to capitalize on the publicity value of Plaintiffs' mark, so that fans of the musical group would buy H&M's sweater and other "classixx" apparel. *Cf. Rogers, 875 F.2d at 1001* (finding that **[*9]** the defendant satisfied the artistic relevance prong where its use of the trademark was "not arbitrarily chosen just to exploit the publicity value of [the plaintiffs' mark] but instead ha[d] genuine relevance to the film's story"). H&M's *Rogers* defense fails.

2. Likelihood of Confusion

H&M argues Plaintiffs fail to adequately allege a likelihood of confusion.[2] The likelihood of confusion requirement asks whether "a reasonably prudent consumer in the marketplace is likely to be confused as to the origin or source

[2] H&M also argues that Plaintiffs' trademark infringement claims fail because H&M's use of "classixx" is merely ornamental and has no source-identifying purpose. The cases on which H&M relies establish establish only that, if H&M's use of "classixx" is

of the goods . . . bearing one of the marks . . . at issue in the case." Rearden LLC, 683 F.3d at 1209. The likelihood of confusion must be probable, not just possible. *Id.* To determine whether a likelihood of confusion exists, courts in the Ninth Circuit consider the eight *Sleeken** factors, first articulated in AMF, Inc. v. Sleekcraft Boats, 599 F.2d 341 (9th Cir. 1979). Rearden LLC, 683 F.3d at 1209. The *Sleekcraft* factors are: "(1) strength of the mark; (2) proximity of the goods; (3) similarity of the marks; (4) evidence of actual confusion; (5) marketing channels used; (6) type of goods and the degree of care likely to be exercised by the purchaser; (7) defendant's intent in selecting the mark; and (8) likelihood of expansion of the product lines." Id. "The *Sleek-craft* factors are intended **[*10]** to function as a proxy or substitute for consumer confusion, not a rote checklist." *Id.*

Trademarks are divided into five categories of varying strengths. Surfvivor Media, Inc. v. Survivor Prods., 406 F.3d 625, 631 (9th Cir. 2005). From strongest to weakest, those categories are: arbitrary, fanciful, suggestive, descriptive, and generic. Id. at 631-32. Arbitrary marks are "common words that have no connection with the actual product." *Id.* Fanciful marks are "'coined phrases' that also have no commonly known connection with the product at hand." Id. at 632. Suggestive marks suggest rather than describe the product's features and require some imagination to associate the mark with the product. *Id.* Descriptive marks define a particular characteristic of the product in a way that does not require imagination. *Id.* Generic marks describe the product in its entirety. *Id.* Because of its similarity to the word "classics," "Classixx" can be construed as at least somewhat evocative of Plaintiffs' style of music. Associating "Classixx" with Plaintiffs' musical group nevertheless requires some imagination. Thus. Plaintiffs' mark is best categorized as suggestive. As a suggestive mark, "Classixx" is entitled to trademark protection.

In addition to the strength of the mark, three **[*11]** other *Sleekcraft* factors point toward finding a likelihood of confusion. Both Plaintiffs and H&M sell apparel bearing the word "classixx." The similarity of the goods at issue therefore creates a greater likelihood of confusion. Plaintiffs have also demonstrated some evidence of actual confusion: a consumer posted a photo of H&M's "classixx" sweaters and asked whether H&M was selling "Classixx" merchandise. In addition, Plaintiffs allege an intent to expand their product line to include not just t-shirts but also long-sleeve shirts and sweaters.

The remaining factors are more neutral. First, the prominence of the word "classixx" — Plaintiffs' entire word mark — on H&M's sweater suggests strong similarity of the mark and supports finding a likelihood of confusion. Plaintiffs' apparel, however, generally uses a more stylized, geometric version of the "Classixx" word mark, as depicted here: . H&M's shadow design is somewhat derivative of the geometric style used by Plaintiffs, but otherwise bears no stylistic similarities to Plaintiffs' apparel. Second, while both Plaintiffs' and H&M's apparel is sold online, the parties do not sell their products on the same websites. Similarly, neither **[*12]** product is sold in the same retail locations: Plaintiffs' apparel is sold at their performances, while H&M's apparel is sold in its own retail stores. Third, Plaintiffs argue consumers are less likely to exercise a high degree of care when buying H&M's "reasonably inexpensive sweaters." While less expensive products generally lead to less purchaser care, the type of consumer likely to buy "Classixx" merchandise would already be a fan of the musical group, and therefore more likely to exercise care in purchasing an official product. Fourth, although H&M purportedly played no role in deciding to use the "classixx" mark on its sweaters, a finding of intent is not foreclosed by Plaintiffs' allegations.

Based on the Court's review of the relevant factors, the Court cannot say that the parties' products are unrelated and there is no likelihood of confusion as a matter of law. *Cf Murray v. Cable Nat. Broadcasting Co., 86 F.3d 858,*

---

purely ornamental, H&M could not register "classixx" as a trademark. *See* In Re Astro-Gods Inc., 223 U.S.P.Q. 621 (T.T.A.B. Aug. 10, 19S4) (stating that an ornamental mark is protectable only if it also serves a source-indicating function, such as if "it names the secondary source of the goods or if, at the time of its first use as ornamentation, it was already a recognized trademark of applicant for services or other goods."). How H&M uses the mark has no bearing on whether Plaintiffs have a protectable interest in their own trademark. Nor does it establish as a matter of law that no likelihood of confusion could result from selling a sweater bearing only the word "classixx." The Court turns instead to the *Sleek-craft* factors to determine whether Plaintiffs adequately allege a likelihood of confusion.

861 (9th Cir. 1996) (affirming dismissal of trademark claim where the plaintiff and defendant shared no customers and their services were unrelated as a matter of law). Plaintiffs plausibly allege a likelihood of confusion.

3. Conclusion

Accordingly, H&M's Motion to Dismiss Plaintiffs' trademark claims is DENIED.

B. Misappropriation Claim [*13] (Claim 3)

In their third claim, Plaintiffs assert common law misappropriation of name or likeness. H&M argues this claim must be dismissed because Plaintiffs lack standing and Plaintiffs fail to allege that H&M used their identity as celebrities. Each argument is addressed below.

1. Standing

H&M argues that Plaintiffs' claim fails because California recognizes no right of publicity for musical groups or corporate plaintiffs. In addition, H&M argues that Plaintiffs fail to allege an injury as required to establish standing.

The cases to which H&M cites stand for the proposition that non-natural persons like corporations have no right of publicity under California common law. *See, e.g., Virag, S.R.L. v. Sony Comput. Entm't America LLC, No. 15-cv-01729, 2015 U.S. Dist. LEXIS 111211, 2015 WL 5000102, at *5 (N.D. Cal. Aug. 21, 2015)*. Groups of natural persons, including musical groups, do have a right of publicity and therefore have standing to bring a misappropriation claim. *See Id. 2015 U.S. Dist. LEXIS 111211, [WL]at *5* (noting several cases that "either determined or assumed that a group of human beings has a right of publicity as a group"); *No Doubt v. Activision Publ Inc., 702 F.Supp.2d 1139, 1140, 1146-47 (C.D. Cal. 2010)* (addressing common law right of publicity claim by a musical group). As a musical group, David and Blake have a right of publicity in their identity as "Classixx." Hush, **[*14]** however, has no right of publicity unless David and Blake transferred their rights to it. *See Virag, S.R.L., 2015 U.S. Dist. LEXIS 111211, 2015 WL 5000102, at *6* (explaining that a corporate plaintiff can sue only if "a human being or group of human beings transferred or assigned his or their right of publicity to the corporate plaintiff') (citing *No Doubt, 702 F.Supp.2d at 1140*). Plaintiffs allege no facts indicating that David or Blake assigned their rights to Hush. Therefore, only David and Blake have standing to assert their common law misappropriation claim.

H&M argues that David and Blake nevertheless lack standing because they failed to allege an injury in fact. To have standing to sue under Article III of the United States Constitution, a plaintiff must allege (1) an injury in fact (2) that is caused by the conduct complained of and (3) that is likely to be redressed by a favorable decision. *Lujan v. Deft. Of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. Plaintiffs allege that H&M's misappropriation of their name caused injury including damage to marketing and publicity value and loss of goodwill. This is sufficient to allege actual injury. David and Blake have standing to assert their common law misappropriation claim.

2. *Elements of Common Law Misappropriation*

To maintain a cause of action for misappropriation of name or likeness under California common law, a plaintiff must **[*15]** allege "(1) the defendant's use of the plaintiff's identity; (2) the appropriation of plaintiff's name or likeness to defendant's advantage, commercially or otherwise; (3) lack of consent; and (4) resulting injury." *Eastwood v. Superior Court, 149 Cal. App. 3d 409, 417, 198 Cal. Rptr. 342 (1983)*. H&M argues that Plaintiffs fail to allege the first element because H&M make no creative use of the "Classixx" mark, and its sweater does not implicate Plaintiffs' identities as celebrities. The Court disagrees.

California case law does not specify that a defendant must make "creative use" of plaintiff's name or likeness to be liable. The focus is instead on the defendant's exploitation of another's name or likeness for its own advantage. Here, Plaintiffs sufficiently allege that H&M used the name of their musical group "Classixx" to sell its own clothing. This is sufficient to allege H&M's use of Blake and David's identity.

3. Conclusion

H&M's Motion to Dismiss Hush's misappropriation claim is **GRANTED** for lack of standing, with leave **to amend within three days** of this Order. H&M's Motion to Dismiss David and Blake's misappropriation claim is **DENIED**.

C. UCL Claim (Claim 4)

Plaintiffs allege that H&M's use of the "Classixx" mark constitutes an unlawful and unfair business practice **[*16]** under the UCL, *Cal. Bus & Prof Code § 17200*. H&M argues that Plaintiffs' UCL claim fails because (1) Plaintiffs fail to allege standing under Article BI or the UCL; (2) Plaintiffs' requested relief is unavailable under the UCL; and (3) Plaintiffs fail to allege H&M engaged in unlawful or unfair business practices.

1. Standing

As with Plaintiffs' misappropriation claim, H&M argues that Plaintiffs lack Article III standing because they failed to allege an injury in fact. In addition, H&M argues that Plaintiffs fail to allege that they "lost money or property as a result of . . . unfair competition," as required to establish standing under UCL. *See* *Cal. Bus. & Prof Code § 17204*.

As explained above, Plaintiffs adequately alleged that H&M's misappropriation, which grounds Plaintiffs' UCL claim, caused them injury, including damage to marketing and publicity value. This is sufficient to establish injury in fact under Article III and the UCL.

2. Unlawful Business Practices

The unlawful prong "borrows violations of other laws and treats them as independently actionable." *Daugherty v. Am. Honda Motor Co., Inc., 144 Cal. App. 4th 824, 837, 51 Cal. Rptr. 3d 118 (2006)*. H&M argues that Plaintiffs' unlawful business practices claim fails because Plaintiffs insufficiently alleged the trademark infringement and misappropriation claims on which it relies. **[*17]** As explained above, Plaintiffs sufficiently allege trademark infringement and misappropriation. Accordingly, Plaintiffs adequately allege H&M engaged in unlawful business practices.

3. Unfair Business Practices

When the plaintiff in a UCL action is the defendant's competitor, a business practice is unfair if it "threatens an incipient violation of an ***antitrust law***, . . . [has] effects [that] are comparable to or the same as a violation of [an ***antitrust] law***, or otherwise significantly threatens or harms competition." *Cel Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. H&M's arguments in favor of dismissal rely on the separate test for unfairness in a UCL consumer action. *See* *Drum v. San Fernando Valley Bar Assn., 182 Cal. App. 4th 247, 253, 106 Cal. Rptr. 3d 46 (2010)* (explaining that the test for unfairness differs depending on whether the plaintiff is a competitor or a consumer). Consequently. H&M's arguments are unavailing.

4. Availability of Relief Requested

The remedies available under the UCL are limited to injunctive relief and restitution. *Cel-Tech Commc'ns, Inc., 20 Cal. 4th at 179*; *E.W. French & Sons, Inc. v. Gen. Portland, Inc., 885 F.2d 1392, 1402 (9th Cir. 1989)*. In addition, "disgorgement of money obtained through an unfair business practice is an available remedy . . . to the extent that it constitutes restitution." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1145, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*.

Here, Plaintiffs seek disgorgement of the revenues and profits that H&M allegedly received in connection with the sales of **[*18]** its infringing "classixx" apparel. Restitution, and therefore restitutionary disgorgement, is available to a plaintiff for loss of a vested interest, such as earned but unpaid wages; it is not available for a mere expectancy interest. *See* *Korea Supply Co., 29 Cal. 4th at 1149*. H&M argues Plaintiffs' request fails as a matter of law because H&M received its revenues and profits directly from its customers, not Plaintiffs. Plaintiffs make no arguments in opposition. The Court finds that Plaintiffs at most had an "expectancy" that it would have received additional profits but for H&M's allegedly unfair business practices. Plaintiffs have no claim for restitution under the UCL.

Plaintiffs also seek preliminary and permanent injunctive relief H&M argues Plaintiffs' request is moot because H&M stopped selling the allegedly infringing sweater after receiving Plaintiffs' cease and desist letter. Plaintiffs counter that H&M could recommence its sale of "classixx" apparel at any time.

H&M's argument requires consideration of its response to Plaintiffs' cease and desist letter. That response was not referenced in Plaintiffs' Complaint, and H&M does not argue it is subject to judicial notice. As such, the Court cannot consider it on **[*19]** a motion to dismiss. *See* *Swartz v. KPMG LLP, 476 F.3d 756, 763 (9th Cir. 2007)* (per curiam) ("When reviewing a motion to dismiss we consider only allegations contained in the pleadings, exhibits attached to the complaint, and matters properly subject to judicial notice.").

Even if the Court were to consider H&M's responsive letter, the Court would not dismiss Plaintiffs' claim. Cessation of unlawful conduct moots a request for injunctive relief where "the reform of the defendant [is] irrefutably demonstrated and total." *Polo Fashions, Inc. v. Dick Bruhn, Inc., 793 F.2d 1132, 1135 (9th Cir. 1986)*. The Court is unconvinced at this stage that H&M has no intention of resuming its allegedly infringing sales in the future. *See* *In re Circuit Breaker Litig., 860 F. Supp. 1453, at 1456 (C .D. Cal. 1994)* (noting that "courts usually deny requests for permanent injunctions" when the "defendant infringed innocently, ceased before judgment and assured the court that it has no intention of infringing in the future"). Plaintiffs adequately assert a claim for injunctive relief under the UCL.

5. Conclusion

H&M's Motion to Dismiss Plaintiffs' UCL claim is **GRANTED in part**. To the extent Plaintiffs' seek restitution under the UCL, its claim is **dismissed with prejudice**. Otherwise, H&M's Motion to Dismiss Plaintiffs' UCL claim is **DENIED**.

V. CONCLUSION

Defendants' Motion is **DENIED** with two exceptions. First, **[*20]** to the extent Hush asserts a claim for misappropriation of Classixx's name (Claim 3), its claim is **dismissed with leave to amend** within three days of this Order. Second, to the extent Plaintiffs seek restitution under the UCL, that claim is **dismissed with prejudice**.

IT IS SO ORDERED.

Old Town Util. & Tech. Park v. Mfgr

Business and Consumer Court of Maine, Cumberland County

January 31, 2018, Decided

DOCKET NO. BCD-RE-17-11

Reporter

2018 Me. Bus. & Consumer LEXIS 6 *

OLD TOWN UTILITY & TECHNOLOGY PARK, LLC, et al., Plaintiffs, v. MFGR, LLC, et al., Defendants.

Advisory, promise, motion to dismiss, Deadline, antitrust, counts, promissory estoppel, alleges, induce, restraint of trade, parties, argues, assign, fiduciary duty, unjust enrichment, particularity, commerce, loyalty, buyer, breach of contract, definite statement, statute of frauds, alleged breach, purchaser, terminate, warehouse, grounds, terms, pled, team

Opinion

[*1] COMBINED ORDER ON DEFENDANTS' MOTIONS TO DISMISS

This matter is before the Court on Defendants MFGR, LLC's ("MFGR") and William Firestone's ("Firestone") (collectively the "MFGR Defendants") motion to dismiss all counts against them and Defendants Old Town Holdings II, LLC's ("OTH") and Joseph Everett Deschenes's ("Deschenes") (collectively the "OTH Defendants") motion to dismiss all counts against them. Plaintiffs Old Town Utility and Technology Park, LLC ("OTU"); Relentless Capital Company, LLC ("Relentless"); and Samuel Eakin ("Eakin") oppose the motion. Oral argument was heard on January 5, 2018 at the Capital Judicial Center in Augusta, Maine. Clifford Ginn, Esq. appeared on behalf of Plaintiffs. Daniel Mitchell, Esq. appeared on behalf of the MFGR Defendants and Julia Pitney, Esq. appeared for the OTH Defendants.

FACTUAL BACKGROUND[1]

This case arises out of a disputed transaction for the sale and purchase of the former Expera Mill Facility (the "Facility") in the City of Old Town, Maine, ("Old Town," or the "City") which includes approximately 300 acres of land, roughly 400,000 square feet of warehouse building, a wastewater treatment plant, a 16MW biomass boiler, and other miscellaneous **[*2]** industrial assets. (Compl. ¶ 4.) MFGR purchased the Facility from its former owner on or about January 27, 2016. (Compl. ¶ 5.) Firestone is the principal of MFGR. (Compl. ¶ 3.)

Relentless, acting through Eakin, and James W. Sewall Company ("Sewall"), acting through its president and CEO David Edson ("Edson"), formed OTU on or about December 15, 2015, for the purpose of acquiring or leasing and redeveloping the Facility. (Compl. ¶ 6.) OTH later joined OTU through its principal, Deschenes, the former manager of fiber and logistics at the Facility. (Compl. ¶ 7.) When and to what extent OTH and Deschenes began working with

[1] The information in this section is taken in large part from Plaintiffs' First Amended Verified Complaint (the "Complaint").

or joined OTU is disputed, but by July 15, 2016, the three members executed an operating agreement for OTU giving each member equal one-third ownership of OTU and naming Edson, Eakin, and Deschenes its managers. (*Id.*)

Eakin's work on acquiring or leasing and redeveloping the Facility went three directions in 2016. One project involved securing contracts for the provision of steam and power from the Facility's power and boiler assets with the University of Maine (the "University"). (Compl. ¶¶ 14-17.) Eakin undertook this work through Relentless and partnered with another **[*3]** entity, Consolidated Edison Solutions ("ConEd"). (*Id.*) This "ConEd Team" was ultimately invited to participate in "Phase II" of the University's bidding process. (Compl. ¶¶ 19, 68.) Sometime thereafter Relentless was removed from the team. (Compl. ¶ 68.)

Meanwhile, OTU was negotiating with MFGR (the Facility's owner) and Old Town to facilitate the sale of the Facility's wastewater treatment plant and warehouses. (Compl. ¶ 9-10, 20.) In March 2016, MFGR and OTU executed an agreement whereby OTU would provide services for compensation (the "Advisory Agreement") to that end. (Compl. ¶¶ 20-21.) Pursuant to the Advisory Agreement, OTU secured[2] financing and developed a transactional framework agreeable to all parties. (Compl. ¶¶ 22-29, 32.) The terms of this proposed transaction were reduced to writing in an offer letter dated April 28, 2016 from the City to MFGR which was countersigned by Firestone. (Compl. ¶ 32.) This letter was a binding[3] letter of intent and is thus styled the "4/28/16 Agreement" by Plaintiffs, and will be so referenced in this Order. The letter proposes purchase of the Facility by the City "and/or its assigns;" Plaintiffs allege that MFGR, the City, and OTU understood **[*4]** the City's "assigns" to mean OTU. (Compl. ¶ 33.)

Through Relentless, Eakin was simultaneously developing a business model for the Facility. (Compl. ¶ 35.) As part of this process, OTU's managers met with representatives of the Carrier, Varney, and Gardner families (the "CVG families") regarding securing timber assets to fuel the facility because these three families owned substantial timberland in the State of Maine. (Compl. ¶ 37-38.) The CVG families formed CVG, Inc. ("CVG") in January 2015 to pursue their joint interests. (Compl. ¶ 38.) CVG allegedly came to view Relentless's proposal as a threat and recognized that acquiring the Facility would better serve its interests. (Compl. ¶ 43.) CVG also became part of the ConEd team, as Relentless was removed from the ConEd team and replaced with Penobscot Energy and Fiber, LLC, which was formed by CVG and its partners to redevelop the Facility. (Compl. ¶ 68.)

Meanwhile, in June through October 2016, OTU continued to work with the City and MFGR to close the sale of the Facility in accordance with the 4/28/16 Agreement. (Compl. ¶ 51.) Problems arose. Changes to the State of Maine's regulatory approach to regulation of stormwater treatment **[*5]** necessitated changes to the proposed ownership structure. (Compl. ¶¶ 52-54). On or about July 5, 2016, OTU's closing attorney circulated a draft buy-sell instrument to the parties; MFGR raised certain concerns, which OTU's closing attorney addressed. (Compl. ¶¶ 54-56.) In early August 2016, OTU and the City discovered that the Facility's tissue building warehouse roof required substantial repairs and they began working with MFGR to address the issue. (Compl. ¶ 62.) By September 1, 2016, emails had been circulated among various representatives of the three parties indicating that the City was waiting only on closing documents discussed in a prior conference call. (Compl. ¶ 70). The City's mayor had subsequently requested those documents from Firestone and the September 1 emails charged MFGR with producing these "exhibits." (*Id.*)

By early October 2016, no closing had occurred. Firestone informed OTU that a competing buyer had emerged, and on October 10, 2016, gave OTU two weeks to respond with a counteroffer. (Compl. ¶¶ 77-78.) On October 24,

---

[2] The Court appreciates that whether and to what extent OTU was successful in securing financing for the sale of the Facility is a central issue in this litigation and disputed by the parties. The Court uses "secured" here because Plaintiffs allege they were able to secure adequate financing for the transaction and for purposes of a motion to dismiss, the Court must accept all well-pleaded allegations as true. *Bonney v. Stephens Mem. Hosp., 2011 ME 46, ¶ 16, 17 A.3d 123*.

[3] The MFGR Defendants challenge whether they are bound by the terms of this letter. (Def's Reply Mot. Dismiss at 1 n. 1.) *See* note 2 *supra*.

2016, Firestone raised issues with the proposed closing that OTU claims dealt with well-settled matters. (Compl. ¶¶ 84-86.) Shortly thereafter MFGR **[*6]** elected to sell the Facility to CVG. (Compl. ¶ 87.)

Plaintiffs filed their nine-count Complaint on September 5, 2017; although much has transpired since then regarding the sale of the Facility, as of that date and up until the entry of this Order, MFGR has not closed a sale of the Facility. (Compl. ¶ 95.) Supplemental briefing and letters to the Court, as well as assertions made at oral argument, suggest that in the time since the Complaint was filed: (1) The deal with CVG failed; (2) e4research.org, a non-profit corporation with a relationship with Sewall emerged as a potential new buyer; (3) that agreement expired by its terms at the end of 2017; and (4) CVG has emerged resurgent in the new year as the prospective buyer. OTU maintains that it is still willing and able to purchase the Facility from MFGR; MFGR has indicated that it is ready to move toward a closing with CVG.

OTU alone brings six counts against only MFGR in this lawsuit: Count I (Breach of Contract: 4/28/16 Agreement), Count II (Specific Performance: Sale of the Facility from MFGR to OTU), Count III (Breach of Contract: Advisory Agreement), Count IV (Promissory Estoppel: Sale of the Facility), Count V (Promissory Estoppel: **[*7]** Advisory Fees), and Count VI (Unjust Enrichment). All Plaintiffs bring two counts against OTH and Deschenes: Count VIII (Breach of Contract: OTU Operating Agreement) and Count IX (Breach of Fiduciary Duty). One Count is brought by all Plaintiffs against all Defendants: Count VII (Restraint of Trade/ Monopoly).

STANDARD OF REVIEW

In reviewing a motion to dismiss under M.R. Civ. P. 12(b)(6), courts "consider the facts in the complaint as if they were admitted." *Bonney v. Stephens Mem. Hosp., 2011 ME 46, ¶ 16, 17 A.3d 123*. The complaint is viewed "in the light most favorable to the plaintiff to determine whether it sets forth elements of a cause of action or alleges facts that would entitle the plaintiff to relief pursuant to some legal theory." *Id.* (quoting *Saunders v. Tisher, 2006 ME 94, ¶ 8, 902 A.2d 830*). "Dismissal is warranted when it appears beyond a doubt that the plaintiff is not entitled to relief under any set of facts that he might prove in support of his claim." *Id.*

DISCUSSION

I. MFGR DEFENDANTS' MOTION TO DISMISS: COUNTS I - IV

The MFGR Defendants have moved this Court to dismiss all counts against them on the grounds that Plaintiffs have failed to state a claim upon which relief can be granted. M.R. Civ. P. 12(b)(6). Plaintiffs counter that they have adequately pled sufficient facts **[*8]** to state a cause of action as to each count. The Court considers each count in turn.

A. Count I: Breach of Contract (4/28/16 Agreement) and Count II: Specific Performance (Sale of the Facility by MFGR to OTU)

MFGR urges this Court to dismiss Counts I and II[4] on the grounds that OTU's breach of contract claim alleged in Count I is barred by Maine's statute of frauds, which states that no action can be maintained for the sale of land unless the promise, contract, or agreement is in writing and signed by the party to be charged therewith. *33 M.R.S.A. § 51(4)*. OTU responds that the 4/28/16 Agreement satisfies the statute of frauds, and that because OTU has standing to enforce that agreement, the statute of frauds is satisfied. In the alternative, OTU argues that the doctrine of part performance applies, and operates as an exception to the statute of frauds.

---

[4] As the MFGR Defendants point out in their motion, specific performance is an equitable remedy, not a cause of action. (Mot. Dismiss at 3 n. 2.) The Court therefore treats Count II as a prayer for relief for MFGR's breach of the 4/28/16 Agreement plead in Count I.

The 4/28/16 Agreement is a letter of intent from Old Town to Firestone (and countersigned by same) regarding the City's proposed purchase of the Facility (or the "Old Town Mill Site," as it is referred to in the letter).[5] The 4/28/16 Agreement does not mention OTU by name. OTU alleges that where the letter refers to the "[City of Old Town] and/or its assigns," **[*9]** it is referring to OTU as the City's assignee in the proposed transaction. MFGR argues that even if the 4/28/16 Agreement is an enforceable written contract for the sale of the Facility, OTU lacks standing to enforce the agreement, because it is between MFGR and the City.

OTU claims it has standing to enforce the agreement under two theories. First, OTU claims an independent right to enforce the agreement as the City's "assign." OTU alleges that all parties to the agreement understood that OTU was the City's assign under the 4/2816 Agreement. (Compl. ¶ 33.) OTU further alleges that from the time the 4/28/16 Agreement was entered into, OTU acted on behalf of both OTU and the City, with the City and OTU determining which assets the City would purchase and lease to OTU and which assets OTU would purchase outright. (*Id.*) The Complaint alleges further facts tending to establish that the City in fact assigned its rights under the 4/28/16 Agreement to OTU. (*See* Compl. ¶¶ 51-58, 62-66)

OTU also argues that even if these facts are insufficient to establish an independent right to enforce the 4/28/16 Agreement as the referenced "assign," they at least establish a course of dealing among OTU, MFGR, **[*10]** and the City sufficient to establish that OTU is an intended thirdparty beneficiary of the 4/28/16 Agreement. In *F.O. Bailey Co. v. Ledgewood, Inc., 603 A.2d 466, 468 (Me. 1992)*, Maine adopted the *Restatement (Second) of Contracts § 302* test for whether a third party beneficiary is an intended beneficiary with a right to enforce the agreement: "A beneficiary of a promise is an intended beneficiary if recognition of a right to performance in the beneficiary is appropriate to effectuate the intention of the parties and . . . the circumstances indicate that the promisee intends to give the beneficiary the benefit of the promised performance." The *F.O. Bailey* Court cautioned that while an intent to create an enforceable benefit in third party must be "clear and definite," it is nonetheless a factual determination and such intent may be "expressed in the circumstances surrounding" the contract's execution. *Id.*

This Court rules that OTU has alleged sufficient facts to establish its standing to enforce the 4/28/16 Agreement, whether as a party to the contract or as a third party beneficiary thereto.[6] OTU has alleged that it is the "assign" referenced in the 4/28/16 Agreement, and corroborated that allegation with further factual assertions indicating that OTU, MFGR, and the City all understood **[*11]** OTU to be the City's "assign" under the 4/28/16 Agreement. The Court therefore **denies** Defendant MFGR's motion to dismiss as to Count I and Count II.

B. <u>Count III: (Breach of Contract-Advisory Agreement)</u>

MFGR claims that OTU has inadequately pled a breach of the advisory agreement. It argues that the Advisory Agreement expired by its terms prior to OTU's performance, triggering MFGR's right to terminate the Advisory Agreement. OTU counters that it performed under the agreement prior to the contract deadlines, or, in the alternative, that any deficiency in meeting those deadlines was waived by MFGR.

The Advisory Agreement provides that MFGR will pay fees to OTU if OTU "facilitate[s] the sale" of two Facility assets (the wastewater treatment plant and the warehouse) to the City or "another buyer acceptable to MFGR but not previously known to MFGR."[7] The Advisory Agreement gives both parties the right to "terminate [the

---

[5] Plaintiffs attached a copy of the 4/28/16 Agreement to the Complaint as Exhibit D, and it is central to OTU's breach of contract claim. The Court thus may consider the document without converting the MFGR Defendants' motion to one for summary judgment. *Moody v. State Liquor & Lottery Comm'n, 2004 ME 20, ¶ 10, 843 A.2d 43*.

[6] Because the Court rules that OTU has alleged sufficient facts to establish standing to enforce the signed 4/28/16 Agreement, the Court declines to consider whether the doctrine of part performance would otherwise operate to except the purported agreement to sell the Facility from the requirements of *33 M.R.S.A. § 51(4)*. The Court further expresses no opinion on whether the 4/28/16 Agreement is binding on any party, an argument that MFGR reserved but did not raise in its motion to dismiss. *See* note 3 of this Order *supra*.

agreement] with respect to any [p]roperty for which there is no executed purchase agreement by the applicable Contract Deadline or no sale as described herein prior to the applicable Closing Deadline." Firestone signed the Advisory Agreement on behalf of MFGR.

The Contract **[*12]** Deadline and Closing Deadlines for both assets are disputed by the parties. The Contract Deadline for the wastewater treatment plant is defined as "within 60 calendar days of the Effective Date;" the Closing Deadline is defined as "within 90 days of the Effective Date." The Contract Deadline for the warehouse is defined as "within 30 days of the Effective Date" and the Closing Deadline is defined as "April 30, 2016." The Effective Date of the Advisory Agreement is defined as "March __, 2016." Both Closing Deadlines are followed by the parenthetical "(or such later closing date, if any, to which MFGR and the applicable buyer have agreed)."

This parenthetical language renders the Closing Deadlines ambiguous on the face of the Advisory Agreement, and OTU has pled facts that suggest that MFGR and the applicable buyer (that is, the City and OTU) agreed to a later closing date. (Compl. ¶¶ 22-29, 32-34, 51-58, 63-64, 70.) Although MFGR points out that the Advisory Agreement includes an integration clause that states the agreement "cannot be amended, modified, or varied except by the written agreement of MFGR and [OTU]," the parenthetical language allowing for a later closing date is already **[*13]** a part of the integrated document.

The Contract Deadline, however, is a date certain, albeit fixed in relation to the undefined Effective Date. While the Effective Date is clearly ambiguous, the plain language of the contract indicates that the parties intended that date to be some day in March of 2016. Even assuming the Effective Date was March 31, 2016, OTU does not allege that it succeeded in obtaining an executed purchase agreement with the City or any other buyer within the Contract Deadline for either party.

OTU first argues that its success in "securing the City as a purchaser" within the Contract Deadline was sufficient performance under the terms of the Advisory Agreement such that MFGR did not have a right to terminate. This is inconsistent with the plain language of the applicable provision, which expressly gives either party the right to terminate the agreement in the event that no purchase agreement is executed by the Contract Deadline, and is silent about the effect of "securing" a purchser. OTU next argues that it has nonetheless stated a claim for breach of contract under the theory "that any deficiency in meeting those deadlines was waived by MFGR's conduct."

Maine has **[*14]** long recognized the principle that one who "by his own act, deprived himself of the power of fulfilment," cannot then escape his obligations under a contract. *Richards v. Allen, 17 Me. 296, 299 (1840)*. The modern doctrine of waiver maintains this principle. Waiver is the voluntary or intentional relinquishment of a known right. *Indus. Unif. Rental Svc., Inc. v. Couri Pontiac, Inc., 355 A.2d 913, 919 (Me. 1976)*. If a party entitled to a contractual right acts inconsistent with that right, the party "is estopped form asserting that right if renunciation of the waiver would prejudice the party who has relied on it." *Id.* To bar enforcement of a contractual right, the waiver "must have induced a belief in the party who is claiming reliance on that waiver that the waiving party intended voluntarily to relinquish his rights." *Id.* Waiver may be inferred from the conduct of the waiving party. *Id.*

Read in the light most favorable to OTU, OTU has plead sufficient facts to give rise to the inference that MFGR waived its right to terminate the Advisory Agreement for OTU's failure to perform by the Contract Deadline. OTU has alleged that MFGR continued to work with OTU and the City toward the execution of a purchase contract well after the Contract Deadline had run. (Compl. ¶¶ 22-29, 32-34, 51-58, 63-64, 70.) OTU's reliance **[*15]** on this purported waiver is reflected in these same allegations.

OTU has stated a claim for breach of contract for MFGR's failure to perform under the Advisory Agreement. The Court therefore **denies** the MFGR Defendants' motion to dismiss as to Count III.

C. Count IV: (Promissory Estoppel: Sale of the Facility)

---

[7] Plaintiffs attached a copy of the Advisory Agreement to the Complaint as Exhibit A, and it is central to OTU's breach of contract claim. The Court thus may consider the document without converting the MFGR Defendants' motion to one for summary judgment. *Moody v. State Liquor & Lottery Comm'n, 2004 ME 20, ¶ 10, 843 A.2d 43*.

Plaintiffs plead this claim as an alternative avenue of relief if the Court determines that the purported contract between MFGR and OTU for the sale of the Facility is otherwise unenforceable. *See* Part I.A. of this Order, *supra*. "The doctrine of promissory estoppel applies to promises that are otherwise unenforceable, and is invoked to enforce such promises so as to avoid injustice." *Harvey v. Dow, 2008 ME 192, ¶ 11, 962 A.2d 322*. Maine has adopted the definition of promissory estoppel set out in *Section 90(1) of the Restatement (Second) of Contracts*:

> A promise which the promisor should reasonably expect to induce action or forbearance on the part of the promisee or a third person and which does induce such action or forbearance is binding if injustice can be avoided only by enforcement of the promise. The remedy granted for breach may be limited as justice requires.

Id. Maine allows promissory estoppel to enforce promises to convey land that lack a signed writing as required by **[*16]** the statute of frauds. *See Chapman v. Bomann, 381 A.2d 1123, 1127 (Me. 1978)*. However, our Law Court has since allowed the exception only where the "action induced" involves substantial, physical improvement to the real estate by the promisee. *See Harvey v. Dow, 2008 ME 192, ¶ 13, 962 A.2d 322* (purchaser built house on lot); *Tozier v. Tozier, 437 A.2d 645, 648-49 (Me. 1981)* (donee built house and outbuildings on lot). *See also Nappi v. Nappi Distrib., 1997 ME 54, ¶ 9, 691 A.2d 1198* ("In the context of the transfer of land, when the donee has made *substantial improvements to the land* in 'reliance upon the promise to convey the land, courts will enforce the promise to convey.'") (quoting *Tozier, 437 A.2d at 648*) (emphasis added).

OTU does not allege that it has made any physical improvements to the land. Instead, OTU argues that it expended substantial time and resources enhancing the value of the Facility in intangible ways (*i.e.* by finding tenants, developing a business plan, and securing financing), and that this induced action is sufficient to enforce the alleged promise to sell the Facility to OTU. However, based on the holdings of *Harvey* and *Tozier*, as well as the dictum from *Nappi* cited above, this Court holds that under Maine law, promissory estoppel operates as an exception to the statute of frauds only where the party seeking to enforce the promise to convey has made substantial, physical improvements **[*17]** to the land in reasonable reliance on the promise.

While the purchasers in *Chapman* did not make substantial improvements to land in reliance on a seller's promise to convey, that case is distinguishable from this one. There, one of the sellers made a specific promise to sign and return the written contract for the sale of property in direct response to an inquiry being specially made because the purchasers were about to undertake a substantial financial commitment in furtherance of the deal. *Chapman, 381 A.2d at 1127*. The *Chapman* Court was explicit that "the doctrine of promissory estoppel [applied] to raise issues of material fact concerning . . . whether [this] *separate ancillary promise* became a contract binding on [the sellers.]" *Id. at 1126* (emphasis in original). Here, OTU has not alleged that MFGR promised to sign a purchase and sale agreement for the transfer of the Facility. There is thus no separate, ancillary promise by which MFGR can be bound, and the rule since propounded in *Harvey, Tozier*, and *Nappi*—that substantial improvement to the land by the promisee is a necessary element for promissory estoppel to except a contract for the sale of land from the statute of frauds' writing requirement—applies in this **[*18]** case.

Because OTU has failed to allege that it made substantial, physical improvements to the Facility or the land on which it sits, OTU has failed to state a claim for promissory estoppel regarding the sale of the Facility by MFGR to OTU. The Court thus **grants** MFGR Defendants' motion to dismiss as to Count IV.

D. Count V: (Promissory Estoppel-Advisory Fees)

The elements of promissory estoppel are recited in Part I.C. of this Order, *supra*. In their Complaint, Plaintiffs allege that MFGR promised to pay OTU fees and costs in return for advisory services pursuant to the Advisory Agreement, that MFGR should have reasonably expected that promise to induce action on the part of OTU, Relentless, and Eakin, and that MFGR's promise in fact did induce action on the part of Plaintiffs. (Compl. ¶ 120-121.) MFGR argues that this count should be dismissed for failure to state a claim because MFGR could not have reasonably expected that OTU would perform outside the terms of the Advisory Agreement (*i.e.* by failing to perform by the contract deadline) and still expect compensation. MFGR further argues that no injustice would result if the purported promise to pay fees was not enforced because Plaintiffs **[*19]** have not performed under the Advisory Agreement, as there has not yet been a closing on the sale of the Facility.

Plaintiffs counter that MFGR should have reasonably expected its promise to induce action on their part because MFGR breached its promise of good faith and fair dealing pursuant to the Advisory Agreement. In other words, Plaintiffs argue that they were induced to continue performance under the Advisory Agreement in bad faith, and that as such expectation of payment was reasonable given the long course of dealing that is alleged in some detail in the Complaint. (*See* Compl. ¶¶ 22-29, 32-34, 51-58, 63-64, 70.)

Viewing these facts in the light most favorable to the Plaintiffs, the inference can be drawn that it was not unreasonable for Plaintiffs to continue to perform under the Advisory Agreement in hopes of future payment based on MFGR's conduct during and after the period for performance recited in the written contract. OTU has alleged that they were induced to continue performing under the Advisory Agreement by MFGR's promise to pay. That is enough to survive MFGR's motion to dismiss. The Court therefore **denies** the MFGR Defendants' motion to dismiss Count V.

E. Count VI: (Unjust **[*20]** Enrichment)

OTU pleads unjust enrichment as an alternative avenue to recovery if the Court finds the Advisory Agreement unenforceable. *See* *June Roberts Agency, Inc. v. Venture Properties, Inc., 676 A.2d 46, 49 n. 1 (Me. 1996)* (stating that the existence of a contractual agreement "precludes recovery on a theory of unjust enrichment"). "Unjust enrichment describes recovery for the value of the benefit retained when there is no contractual relationship, but when, on the grounds of fairness and justice the law compels performance of a legal and moral duty to pay. . . ." *Paffhausen v. Balano, 1998 ME 47, ¶ 6, 708 A.2d 269*. The elements that a plaintiff must prove to recover for unjust enrichment are (1) that the plaintiff conferred a benefit on the other party (2) the defendant had appreciation of the benefit and (3) the acceptance or retention of the benefit was under such circumstances as to make it inequitable for the defendant to retain the benefit without payment of its value. *Forrest Assocs. v. Passamaquoddy Tribe, 2000 ME 195, ¶ 14, 760 A.2d 1041*.

MFGR moves to dismiss Count VI on the grounds that there has been no benefit conferred on them because Plaintiffs' work related to the sale and development of the Facility amounted to "an elaborate marketing proposal . . . that was ultimately rejected." *Id.* ¶ 15. Plaintiffs allege that their labor has enhanced the value of the Facility by millions **[*21]** of dollars above the auction price MFGR would have received absent the Plaintiffs' efforts, thereby conferring a significant benefit on MFGR.

MFGR claims that *Forrest Assocs*. compels dismissal of Count VI. Although this case resembles *Forrest Assocs*. in some respects, the plaintiffs in that case had an opportunity to fully develop the record at a bench trial. Plaintiffs here have alleged facts which, if true, would distinguish Plaintiffs' claim from that brought by the plaintiffs in *Forrest Assocs*. Specifically, the *Forrest Assocs*. Court held that the plaintiffs could not recover under an unjust enrichment theory because "[a]lthough [the plaintiff] created a comprehensive plan and presented it to the [defendants], there [was] no evidence that the [defendants] benefitted from either the presentation or the information contained in the plan" and the evidence demonstrated that the plan was ultimately rejected. *Id.* Under those facts, the evidence failed to establish that the plaintiff had conferred a benefit on the defendant.

In contrast, Plaintiffs here have alleged with some particularity how MFGR benefitted from Plaintiff's plans and proposals. Specifically, Plaintiffs allege that they **[*22]** "laid the foundation for financing from the City and others, recruited and negotiated terms with future tenants that increased the Facility's value and creditworthiness, and played an instrumental role in the winning ConEd [bid]." (Compl. ¶ 124.) Plaintiffs further allege that MFGR knew of and appreciated the value of that benefit, and that the circumstances render the retention of that benefit unjust without compensation paid to Plaintiffs. (Compl. ¶¶ 125-126.)

Plaintiffs have thus stated a claim for unjust enrichment. The Court therefore **denies** MFGR's motion to dismiss as to Count VI.

II. COUNT VII: RESTRAINT OF TRADE/ MONOPOLY

In Count VII, Plaintiffs allege that MFGR's plan to sell the Facility to CVG is a contract in restraint of trade or commerce in Maine and that a consummated transaction would be a combination in restraint of trade or commerce in Maine, both in violation of 10 M.R.S.A. § 1101.[8] Plaintiffs allege Defendants are all liable as co-conspirators for attempting to facilitate CVG's purchase of the Facility. *Id.*

Defendants move to dismiss on the grounds that (1) Plaintiffs have not alleged an antitrust injury and (2) Plaintiffs have not alleged that Defendants entered into a contract, combination, **[*23]** or conspiracy which restrained trade or commerce in Maine. The Court considers each argument in turn.

A. Plaintiffs Have Not Alleged An Antitrust Injury

"Maine's antitrust act provides that a plaintiff must prove injury or damage before the plaintiff can recover." McKinnon v. Honeywell Int'l, Inc., 2009 ME 69, ¶ 19, 977 A.2d 420. Maine courts may consider federal ***antitrust law*** as persuasive authority when construing Maine's antitrust statute. *Id.* In the federal context, the U.S. District Court for the District of Maine has clarified that a plaintiff "must prove an *antitrust injury*, which is to say an injury of the type the antitrust laws were intended to prevent . . . ." In re Compact Disc Min. Advertised Price Antitrust Litig., 456 F. Supp. 2d 131, 148 (D. Me. 2006) (quoting Serpa Corp. v. McWane, Inc., 199 F.3d 6, 10 (1st Cir. 1999)) (emphasis added). *See also* Int'l Ass'n of Machn's & Aerospace Workers, AFL-CIO, Local. L. No. 1821 v. Verso Paper Co., 80 F. Supp. 3d 247, 272 (D. Me. 2015) (citing Brunswick Corp. v. Pueblo Bowl-o-Mat, Inc., 429 U.S. 477 (1977)). This Court has previously imposed the same requirement on plaintiffs bringing an antitrust action. *See Central Distribs., Inc. v. Labatt USA Opn'g Co.*, No. BCD-CV-12-33, at 10 (Bus. & Consumer Ct. Oct. 15, 2012, *Horton, J.*). The "presumptive proper" plaintiff to allege an antitrust injury "is a customer who obtains services in the threatened market or a competitor who seeks to serve that market." In re Compact Disc, 456 F. Supp. 2d at 146 (citing SAS of P.R. v. P.R. Tel. Co., 48 F.3d 39, 44 (1st Cir. 1995)).

Plaintiffs' antitrust claim stems from the allegation that CVG's acquisition of the Facility would allow it to charge elevated prices **[*24]** for its forest products and prevent the rest of Maine's forest products industry from selling forestry products to another operator of the Facility. (Compl. ¶ 129.) Plaintiffs do not allege that they are consumers of forest products or competitors in the forest products industry who would be harmed from this anticipated anticompetitive behavior. Plaintiffs' alleged damages resulting from CVG's proposed purchase of the Facility are rather "deprivation of the value of purchasing the Facility, exclusion from the team implementing the [ConEd team] bid, and expenditure of time, money, and resources in pursuing the transaction . . . ." (Compl. ¶ 139.) Significantly, these are identical to the damages attributed to the breach of contract count. (Compl. ¶ 101.) The U.S. District Court for the District of Maine—as well as this Court—have held that breach of contract damages are insufficient to establish an antitrust injury. In re Compact Disc, 456 F. Supp. 2d at 147-48 ("[Plaintiff's] injuries flow from an alleged breach of contract, unlawful transfer of proprietary information, and breach of fiduciary duty. These are not the type[s] of injury that the antitrust laws were meant to protect [against]."); *Central Distribs.*, BCD-CV-12-33, **[*25]** at 10 ("The gist of this claim is really a restatement of a breach of contract action . . . the complaint fails to state a claim for antitrust statute violations.").

This Court thus rules that Plaintiffs lack standing to bring the antitrust claim alleged in Count VII. Regardless of whether CVG's purchase of the Facility could amount to a violation of Maine's antitrust statute, as alleged, Plaintiffs have failed to allege how they have been injured by this purported anticompetitive activity.

B. Plaintiffs Have Not Alleged Necessary Action On The Part Of The Alleged Co-Conspirators

To establish a prima facie case pursuant to 10 M.R.S.A. § 1101, a plaintiff must show: "(1) that the defendants entered into a contract, combination, or conspiracy; (2) which restrained trade or commerce in Maine; and (3) that they were injured thereby for each allegation." *Pease v. Jasper Wyman & Son*, No. KNOSC-CV-00-015, at 18 (Me. Super. Ct., Knox Cty., July 31, 2002). The third element is discussed above, in Part II.B. of this Order, *supra*. Defendants in this case further argue that Plaintiffs have failed to allege facts satisfying the first two elements, and have thus failed to state a claim for antitrust violation on that **[*26]** ground.

---

[8] Plaintiffs are not entitled to the injunctive relief they seek under this count. That remedy is available only to the Attorney General. State v. MaineHealth, 2011 ME 115, ¶ 8, 31 A.3d 911.

The "contract, combination, or conspiracy" alleged by Plaintiffs is the acquisition of the Facility by CVG. (Compl. ¶ 131.) All parties agree that that has not happened, although CVG has apparently resurfaced as the proposed purchaser of the Facility. (Compl. ¶ 95.) Plaintiffs nonetheless argue that MFGR's contract to sell the Facility to CVG is itself a contract in restraint of trade or commerce in Maine. (Compl. ¶ 132.) However, beyond this conclusory allegation, Plaintiffs plead no further facts to show how the purported contract for the sale of the Facility to CVG, standing alone, restrains trade in Maine. Instead, the Plaintiffs suggest that, once consummated, the transaction would "substantially lessen competition or tend to create a monopoly of lines of commerce in Maine . . ." (*Id.*)

The Court rules that Plaintiffs have failed to adequately allege the existence of a "contract, combination, or conspiracy . . . which restrained trade or commerce in Maine." *Pease*, No. KNOSC-CV-00-015, at 18. On its face, the Complaint alleges that a "consummated transaction . . . would" result in a violation *10 M.R.S.A. § 1101*—conceding that the Defendants have not yet entered into a contract that has restrained **[*27]** trade in Maine. Factual allegations that some future contract, once consummated, would eventuate an anticompetitive result does not state a claim for a violation of Maine's antitrust statute.[9]

By reason of the foregoing, the Court hereby **grants** the Defendants' motions to dismiss Count VII.[10] Plaintiffs have failed to state a claim for violation of Maine's antitrust laws, *10 M.R.S.A. §§ 1101-1108*.

III. OTH DEFENDANTS' MOTION TO DISMISS: COUNTS VIII AND IX

Although Count VIII and Count IX recite two separate causes of action—breach of contract and breach of fiduciary duty, respectively—there is factual and legal overlap between the two claims. Count VIII alleges that the OTH Defendants breached OTU's operating agreement *"as well as* their duty of loyalty, their duty not to exploit a business opportunity without first disclosing it to OTU, and their duty of confidentiality" by "facilitat[ing] CVG's opportunity to purchase the Facility from MFGR." (Compl. ¶ 143 (emphasis added).) Count IX alleges that the OTH Defendants "breached their fiduciary duty *and* duty of loyalty to OTU through self-dealing, usurpation of corporate opportunity, misrepresentation and omission of material facts, inducement, disclosure and misuse **[*28]** of confidential information, misuse of superior knowledge, failure to disclose, and rendering inappropriate advice." (Compl. ¶ 147 (emphasis added).) As in Count VIII, Plaintiffs allege this breach was committed through the OTH Defendants "facilitation" of CVG's opportunity to purchase the Facility from MFGR. (*Id.*)

It is unclear whether Plaintiffs are pleading a breach of OTU's operating agreement apart from OTH's alleged breach of its fiduciary duties in Count VIII. It is also unclear whether Plaintiffs allege that the OTH Defendants' breached only their duty of loyalty to OTU in Count IX or whether Plaintiffs are alleging a breach of fiduciary duty beyond the expressly stated breach of the fiduciary duty of loyalty. *See* *Sargent v. Buckley, 1997 ME 159, ¶ 1, 697 A.2d 1272* (defining duty of loyalty as a fiduciary duty). As grounds for the alleged breach of duty of loyalty, Count IX alleges "misrepresentation and omission of material facts," which sounds in fraud. *See* *Letellier v. Small, 400 A.2d 371, 376 (Me. 1979)*. Allegations of fraud are subject to a heightened pleading standard: "In all averments of fraud . . . the circumstances constituting the fraud . . . shall be stated with particularity . . . ." M.R. Civ. P. 9(b). The facts which could give rise to a fiduciary relationship **[*29]** must likewise be pled with particularity. *Ramsey v. Baxter Title Co., 2012 ME 113, ¶ 6, 54 A.3d 710*.

---

[9] Notwithstanding the issues of standing and ripeness on which the Court decides to dismiss Count VII, Plaintiffs have not alleged how this transaction would result in an antitrust violation in any event. In essence, Plaintiffs allege that CVG's acquisition of the Facility would give CVG an advantage over its competitors by substantially lessening competition. That alone is insufficient to allege an antitrust violation. *Tri-State Rubbish, Inc. v. Waste Mgmt., Inc., 875 F. Supp. 8, 13 (D. Me. 1994)* ("[G]aining an advantage over your competitors is not, in itself, a violation of antitrust laws.").

[10] Because the Court rules that Plaintiffs have failed to state a claim against any defendant for violating Maine's antitrust statute, the issue of whether Firestone or Deschenes could be individually liable for the alleged violation is moot. The OTH Defendants also argued grounds for dismissal that were unique to them. This argument is also moot, for the same reason.

Plaintiffs have alleged that Deschenes sought to terminate OTH's membership in OTU in August 2016, falsely promised not to act in competition with OTU, and used that false promise to procure Eakin's waiver of OTU's nondisclosure/ noncompete provisions. (Compl. ¶ 59.) This is the only affirmative fraud pled with any particularity in the Complaint. Plaintiffs allege that fiduciary duties were expressly provided for in OTU's operating agreement,[11] and cited to Maine statutory law that suggests Deschenes as manager (and, apparently, OTH as a "member active in management," *see* Pl's Opp. Mot. D. at 5) may have owed fiduciary duties to OTU as a matter of law. *See 31 M.R.S.A. §§ 1521(3)(A)*, *1559(3)*. Plaintiffs allege that Deschenes sought a report on the Facility's tissue building warehouse roof on CVG's behalf. (Compl. ¶¶ 66-67.) Plaintiffs further allege that Deschenes "facilitated" CVG's letter of intent to purchase the Facility from MFGR after Deschenes and OTH had left OTU. (Compl. ¶ 61.) Beyond this, the Complaint contains only general insinuations that the OTH Defendants were working against OTU's interest, and in CVG's interest, while OTH was still a member of OTU. (Compl. **[*30]** ¶¶ 60.)

The Court rules that Plaintiffs have not met the elevated pleading requirements for fraud or the existence of a fiduciary relationship in their Complaint against the OTH Defendants. Particularly, Plaintiffs have alleged nothing to suggest that the OTH Defendants owed Plaintiffs any duty when Deschenes allegedly facilitated the letter of intent between CVG and MFGR. Together with the lack of clarity regarding whether Count VIII alleges a breach of contract beyond the breach of fiduciary duty alleged in Count IX, the Court finds that the OTH Defendants cannot reasonably be required to frame a responsive pleading to these Counts in their current form.

Because the Court finds that the allegations supporting Counts VIII and IX lack sufficient particularity under the heightened pleading standard required by M.R. Civ. P. 9(b) and *Ramsey*, Plaintiffs ask the Court to treat the OTH Defendants' motion to dismiss as a motion for a more definite statement. M.R. Civ. P. 12(e). A motion for a more definite statement is used to remedy pleadings that are "so vague or ambiguous that a party cannot reasonably be required to frame a responsive pleading" and must "point out the defects complained **[*31]** of and the details desired." *Id.*

When such a motion is granted, the pleading party must file a more definite statement within 10 days to remedy the defects highlighted in the motion. *Id.* Although the Court rules that the causes of action pled in Counts VIII and IX are too vague or ambiguous to allow the OTH Defendants a reasonable opportunity to respond, the Court agrees with Plaintiffs that allowing them an opportunity to plead these counts with the requisite level of particularity and sufficient factual support is appropriate here. Plaintiffs are thus **ordered** to file a more definite statement pursuant to M.R. Civ. P. 12(e). Plaintiffs' more definite statement should plead with sufficient particularity the factual basis for the alleged fiduciary relationship, and to the extent that Plaintiffs allege a breach of a fiduciary duty through fraud, the fraudulent acts of which they accuse the OTH Defendants. Plaintiffs should also clarify whether they are alleging a breach of contract beyond the OTH Defendant's alleged breach of the fiduciary duty of loyalty in Count VIII.

CONCLUSION

Based on the foregoing the entry will be:

1. The MFGR Defendants' motion to dismiss is GRANTED IN PART and DENIED **[*32]** IN PART as follows:
    a. The MFGR Defendants' motion to dismiss is GRANTED as to Count IV and Count VII.
    b. The MFGR Defendants' motion to dismiss is DENIED as to Count I, Count II, and Count III, Count V, and Count VI.
2. The OTH Defendants' motion to dismiss is GRANTED IN PART and DENIED IN PART as follows:
    a. The OTH Defendants' motion to dismiss is GRANTED as to Count VII.

[11] OTU's operating agreement was not attached to the Complaint and is not currently before the Court.

b. The OTH Defendants' motion to dismiss is DENIED as to Count VIII and Count IX. As to those Counts, Plaintiffs are hereby ORDERED to file within 10 days of the entry of this Order a more definite statement pursuant M.R. Civ. P. 12(e) as described in Part III, *supra*, of this Order.

Administrative Law > ... > Freedom of Information > Defenses & Exemptions From Public Disclosure > Statutory Exemptions

Antitrust & Trade Law > Procedural Matters

HN1[] **Defenses & Exemptions From Public Disclosure, Statutory Exemptions**

W. Va. Code § 29B-1-4(a)(5) (2015) of the West Virginia Freedom of Information Act, concerning "statutory exemptions," incorporates the "investigative exemption" of the West Virginia Antitrust Act, *W. Va. Code § 47-18-7(d) (1978)*.

Administrative Law > ... > Freedom of Information > Methods of Disclosure > Vaughn Indexes

HN2[] **Methods of Disclosure, Vaughn Indexes**

When a public body asserts that certain documents or portions of documents in its possession are exempt from disclosure under any of the exemptions contained in *W. Va. Code § 29B-1-4 (2003 Supp.)*, the public body must produce a Vaughn index. The Vaughn index must provide a relatively detailed justification as to why each document is exempt, specifically identifying the reason(s) why an exemption under *W. Va. Code § 29B-1-4 (2003 Supp.)* is relevant and correlating the claimed exemption with the particular part of the withheld document to which the claimed exemption applies. The Vaughn index need not be so detailed that it compromises the privilege claimed. The public body must also submit an affidavit, indicating why disclosure of the documents would be harmful and why such documents should be exempt.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Governments > Legislation > Interpretation

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN3[] **Standards of Review, Clearly Erroneous Review**

Generally, findings of fact are reviewed for clear error and conclusions of law are reviewed de novo. However, in complex cases, ostensible findings of fact, which entail the application of law or constitute legal judgments which transcend ordinary factual determinations, must be reviewed de novo. Moreover, an interpretation of the West Virginia Freedom of Information Act is subject to de novo review.

Administrative Law > ... > Freedom of Information > Defenses & Exemptions From Public Disclosure > Statutory Exemptions

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN4[] **Defenses & Exemptions From Public Disclosure, Statutory Exemptions**

The antitrust exemption incorporated into the Freedom of Information Act must be viewed in the context of the Attorney General's powers and duties under the Antitrust Act. In investigating a suspected violation in the form of a monopoly, restraint of trade or illegal bidding process, the Attorney General is authorized under *W. Va. Code § 47-18-7(a) (1978)* of the Antitrust Act (Act) to administer oaths or affirmations, and may subpoena witnesses, compel their attendance, adduce evidence, and require the production of any matter which is relevant to the investigation. The Attorney General may direct a local prosecutor to assist him or her. Remedies for violations of the Act include injunctive relief, a penalty and treble damages. Pursuant to *W. Va. Code § 47-18-16 (1978)*, the Antitrust Act shall be construed liberally and in harmony with ruling judicial interpretations of comparable federal antitrust statutes.

Administrative Law > ... > Freedom of Information > Defenses & Exemptions From Public Disclosure > Statutory Exemptions

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] **Defenses & Exemptions From Public Disclosure, Statutory Exemptions**

A necessary component of the West Virginia Antitrust Act is the investigative exemption set forth in *W. Va. Code § 47-18-7(d) (1978)* which states that the Attorney General shall not make public the name or identity of a person whose acts or conduct he or she investigates or the facts disclosed in the investigation, except disclosures in actions or enforcement proceedings. The Antitrust Act's investigative exemption is incorporated in the Freedom of Information Act through *W. Va. Code § 29B-1-4(a)(5) (2015)*, i.e., information "specifically exempted from disclosure by statute."

Administrative Law > Governmental Information > Freedom of Information > Defenses & Exemptions From Public Disclosure

Administrative Law > Governmental Information > Freedom of Information > Enforcement

HN6[] **Freedom of Information, Defenses & Exemptions From Public Disclosure**

A context-based analysis can be applied in determining whether public records are to be disclosed pursuant to a Freedom of Information Act request, but the determination is subject to the specific exemptions of the Freedom of Information Act listed in *W. Va. Code § 29B-1-4 (2015)*.

Administrative Law > Governmental Information > Freedom of Information > Compliance With Disclosure Requests

HN7[] **Freedom of Information, Compliance With Disclosure Requests**

The West Virginia Freedom of Information Act defines "public record" as any writing containing information prepared or received by a public body, the content or context of which, judged either by content or context, relates to the conduct of the public's business.

Administrative Law > ... > Freedom of Information > Defenses & Exemptions From Public Disclosure > Statutory Exemptions

Public Contracts Law > Bids & Formation > Competitive Proposals

Antitrust & Trade Law > Regulated Practices

HN8[] **Defenses & Exemptions From Public Disclosure, Statutory Exemptions**

Pursuant to *W. Va. Code § 47-18-3(b)(2) (1978)*, the following activities are unlawful: A contract, combination or conspiracy between two or more persons whereby, in the letting of any public or private contract: (A) The price quotation of any bid is fixed or controlled, or (B) One or more persons submits a bid intending it to be higher than another bid and thus complementary thereto, submits a bid intending it to be substantially identical to another bid, or refrains from the submission of a bid. Consequently, the bidding process and its associated documents are within the scope of the Attorney General's investigative powers and, specifically, the investigative exemption from public disclosure of the West Virginia Antitrust Act, *W. Va. Code § 47-18-7(d) (1978)*.

Administrative Law > ... > Defenses & Exemptions From Public Disclosure > Law Enforcement Records > Investigative Techniques

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Administrative Law > ... > Freedom of Information > Defenses & Exemptions From Public Disclosure > Statutory Exemptions

HN9[] **Law Enforcement Records, Investigative Techniques**

The West Virginia Antitrust Act's investigative exemption, incorporated in the Freedom of Information Act (FOIA) through *W. Va. Code § 29B-1-4(a)(5) (2015)*, is to be distinguished from the investigation-related FOIA exemption set forth in *W. Va. Code § 29B-1-4(a)(4) (2015)*, which exempts records of law-enforcement agencies that deal with the detection and investigation of crime and the internal records and notations of such law-enforcement agencies which are maintained for internal use in matters relating to law enforcement.

Administrative Law > ... > Freedom of Information > Defenses & Exemptions From Public Disclosure > Statutory Exemptions

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN10[] **Defenses & Exemptions From Public Disclosure, Statutory Exemptions**

The West Virginia Freedom of Information Act, *W. Va. Code § 29B-1-4(a)(5) (2015)*, which excepts from public accessibility information specifically exempted from disclosure by statute, incorporates the investigative exemption from disclosure of information set forth in the West Virginia Antitrust Act, *W. Va. Code § 47-18-7(d) (1978)*. The investigative exemption is mandatory in specifying that the Attorney General "shall not" make public the name or identity of a person whose acts or conduct he or she investigates or "the facts" disclosed in the investigation. Nevertheless, the legislature has provided an exception or caveat in that the investigative exemption in *W. Va. Code § 47-18-7(d) (1978)* does not apply to disclosures in actions or enforcement proceedings. An additional caveat pertains to the Assurance of Voluntary Compliance which must be publicly filed pursuant to *W. Va. Code § 47-18-22 (1978)*.

Administrative Law > ... > Freedom of Information > Defenses & Exemptions From Public Disclosure > Statutory Exemptions

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Interpretation

HN11[] **Defenses & Exemptions From Public Disclosure, Statutory Exemptions**

W. Va. Code § 47-18-7(d) (1978) is free from ambiguity in its admonition that the Attorney General "shall not" make public the name or identity of a person whose acts or conduct he or she investigates or "the facts" disclosed in an investigation under the West Virginia Antitrust Act. Where the language of a statute is free from ambiguity, its plain meaning is to be accepted and applied without resort to interpretation.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN12[] **Public Enforcement, State Civil Actions**

Pursuant to *W. Va. Code § 47-18-14 (1978)* of the West Virginia Antitrust Act, the Attorney General "may cooperate with officials of the federal government and the several states in the enforcement of this article."

Administrative Law > ... > Freedom of Information > Methods of Disclosure > Vaughn Indexes

HN13[] **Methods of Disclosure, Vaughn Indexes**

The purpose of a Vaughn Index is limited to matters of litigation and serves as a resource for the benefit of a trial court.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN14[] **Public Enforcement, State Civil Actions**

When considering whether the West Virginia Health Care Authority Act exempts a hospital's acquisition from West Virginia antitrust laws, under *W. Va. Code § 16-29B-26 (2016)*, "cooperative agreement" is defined in *W. Va. Code § 16-29B-28(a)(2) (2016)* as including, inter alia, an agreement providing for the consolidation, by merger or other combination, of facilities and services traditionally offered by hospitals or other health care providers. *W. Va. Code § 16-29B-28(c) (2016)* provides that, when such an agreement might be anticompetitive within the meaning of the antitrust laws, the legislature believes it is in the state's best interest to supplant such laws with regulatory approval and oversight by the Health Care Authority (Authority). *W. Va. Code § 16-29B-28(f) (2016)* states that the Authority shall consult with the West Virginia Attorney General regarding his or her assessment of whether or not to approve the proposed cooperative agreement.

Governments > Legislation > Effect & Operation > Prospective Operation

Governments > Legislation > Effect & Operation > Retrospective Operation

HN15[] **Effect & Operation, Prospective Operation**

The presumption is that a statute is intended to operate prospectively, and not retrospectively, unless it appears, by clear, strong and imperative words or by necessary implication, that the legislature intended to give the statute retroactive force and effect.

Syllabus

[*240] BY THE COURT

1. The *West Virginia Freedom of Information Act*, *W.Va. Code, 29B-1-4(a)(5)* [2015], which excepts from public accessibility "information specifically exempted from disclosure by statute," incorporates the investigative exemption from disclosure of information set forth in the *West Virginia Antitrust Act*, *W.Va. Code, 47-18-7(d)* [1978]. The investigative exemption is mandatory in specifying that the Attorney General "shall not" make public the name or identity of a person whose acts or conduct he investigates or "the facts" disclosed in the investigation.

2. "Where the language of a statute is free from ambiguity, its plain meaning is to be accepted and applied without resort to interpretation." Syl. pt. 2, *Crockett v. Andrews, 153 W.Va. 714, 172 S.E.2d 384 (1970)*.

3. "The presumption is that a statute is intended to operate prospectively, and not retrospectively, unless it appears, by clear, strong and imperative words or by necessary implication, that the Legislature intended to give the statute retroactive force and effect." Syl. pt. 4, *Taylor v. State Comp. Comm'n., 140 W.Va. 572, 86 S.E.2d 114 (1955)*.

Judges: JUSTICE KETCHUM delivered the Opinion of the Court.

Opinion by: Ketchum

Opinion

[710]** **Justice Ketchum**:

West Virginia Attorney General Patrick Morrisey ("Attorney General") appeals from two orders of the Circuit Court of Kanawha County entered on October 28, 2016, unsealing an index of 349 documents and directing the Attorney General to produce 89 of those documents. The orders were entered in an action brought by Steel of West Virginia, Inc. ("Steel"), to enforce its request for production of material under this State's *Freedom of Information Act ("FOIA")*. The Attorney General received the 349 documents in connection with his investigative powers under the West Virginia Antitrust Act regarding the proposed merger of St. Mary's Medical Center, Inc. ("St. Mary's"), **[***3]** and Cabell Huntington Hospital, Inc. ("Cabell Huntington").

Steel opposed the merger before the West Virginia Health Care Authority. The Authority's approval of the merger through its award of a certificate of need was the subject of a separate appeal before this Court. The issues in that appeal, however, were settled and resolved, and Steel's appeal from the Authority's decision was dismissed as moot. A motion to dismiss the current FOIA matter in conjunction with the dismissal of Steel's appeal on the merits of the Authority's decision was refused by this Court. *See* syl. pt. 1, *State ex rel. M.C.H. v. Kinder, 173 W.Va. 387, 317 S.E.2d 150 (1984)* (A case not rendered moot if the issues "are capable of repetition and yet will evade review.").

In the current matter, limited to Steel's FOIA request, both the Attorney General and St. Mary's contend that the index of the 349 documents and the 89 documents to be produced are exempt from disclosure.[1] Thus, the Attorney General's appeal has been consolidated with two related appeals filed by St. Mary's. In one appeal, St. Mary's challenges the denial of its motion to intervene in the **[**711]** **[*241]** underlying FOIA action. In the other, St. Mary's challenges the unsealing of the index and the production of the 89 documents. **[***4]** [2]

This Court concludes that the circuit court committed error in ordering the production of the index and the 89 documents. The circuit court ordered the production of the index as a sanction against the Attorney General for

---

[1] The record reveals a discrepancy in whether 89 or 87 documents were to be produced. In an October 28, 2016, order, the Attorney General was directed to produce 89 documents.

[2] Although not a party to the FOIA action brought by Steel against the Attorney General, the denial of St. Mary's motion to intervene is appealable to this Court, which enabled St. Mary's to file "protective notices of appeal." *See* *Stern v. Chemtall Inc., 217 W.Va. 329, 617 S.E.2d 876 (2005)* (granting appeal from denial of motion to intervene); Louis J. Palmer, Jr., and The Hon. Robin Jean Davis, *Litigation Handbook on West Virginia Rules of Civil Procedure*, Rule 24, § 24[2][e] (5th ed. 2017) ("An order denying intervention is final and immediately appealable."). *See also* Wright, Miller & Kane, *Federal Practice and Procedure*: *Civil 3d*, § 1923 (2007) (Denial of intervention should be regarded as an appealable final order.). Steel's motion to dismiss St. Mary's appeals was denied by this Court in April 2017.

sharing part of the index with the Federal Trade Commission. We find the sanction inappropriate. We further find that the 89 documents are not subject to production because of the statutory exemption raised by the Attorney General. That exemption is set forth in *W.Va. Code, 29B-1-4* [2015], of the *Freedom of Information Act* which incorporates, in *subsection (a)(5)*, the confidentiality provisions of the *Antitrust Act*. Finally, inasmuch as the arguments of St. Mary's largely mirror those of the Attorney General, we find the two appeals filed by St. Mary's to be moot.

The orders entered by the circuit court on October 28, 2016, are reversed, and this action is remanded to the circuit court for the entry of an order dismissing Steel's FOIA action.

I. Factual Background

St. Mary's is a general, acute care hospital in Huntington, West Virginia. Its parent corporation is Pallottine Health Services, Inc. In 2014, Pallottine decided to sell **[***5]** St. Mary's, and, following a competitive bidding process, an agreement was reached in November 2014 whereby St. Mary's would merge with Cabell Huntington, another general, acute care hospital in the Huntington area. Support for the merger in the local community was based on the likelihood that the merger would save jobs, allow more portability of health care providers and result in better patient care. Steel opposed the merger, asserting that healthcare costs will increase if the two hospitals do not remain in competition.

Various regulatory reviews and approvals were required before the merger could take place. Among the requirements was the opening in 2014 of antitrust investigations by the Federal Trade Commission and the West Virginia Attorney General. The Attorney General's investigative authority regarding the merger is found in the *West Virginia Antitrust Act, W.Va. Code, 47-18-1 [1978], et seq.*

Documents concerning the business operations and finances of the two hospitals, and the bidding process, were sent by St. Mary's and Cabell Huntington to the Federal Trade Commission and the Attorney General. The Federal Trade Commission transferred a number of the documents it received to the Attorney General. **[***6]** On November 25, 2014, a confidentiality agreement was executed by St. Mary's, Cabell Huntington and the Attorney General which stated that the documents received by the Attorney General would not be subject to disclosure and would only be used in the investigation "for any legal challenge of the Transaction [merger] under federal or state antitrust laws, or for other law enforcement purposes."

On July 31, 2015, the Attorney General filed an Assurance of Voluntary Compliance in the Office of the Clerk of Cabell County. An amended Assurance of Voluntary Compliance was filed on November 4, 2015.[3] In both **[**712]** **[*242]** documents, the Attorney General concluded that the merger was in the best interests of the State of West Virginia. However, the Assurances also secured commitments from St. Mary's and Cabell Huntington to abide by antitrust laws in future operations.

Specifically, St. Mary's and Cabell Huntington were required under the Assurances of Voluntary Compliance to observe a number of conditions for a period of years following the merger's consummation. The November 4, 2015, amended Assurance extended the period of years from seven to ten years. Both Assurances stated that neither St. Mary's nor Cabell Huntington would oppose the award of a certificate of need to any health care provider seeking to

---

[3] *W.Va. Code, 47-18-22* [1978], of the Antitrust Act, states:

> In the administration of this article, the attorney general may accept an assurance of voluntary compliance with respect to any method, act or practice deemed to be a violation of this article from any person who has engaged or was about to engage in such method, act or practice. Such assurance may include a stipulation for voluntary payment **[***7]** by the alleged violator of damages sustained by any person or public body. Any such assurance shall be in writing and be filed with the circuit court in which the alleged violator resides, has his principal place of business, or is doing business. Such assurance of voluntary compliance shall not be considered an admission of violation for any purpose. *Matters thus closed may at any time be reopened by the attorney general for further proceedings in the public interest*. (emphasis added)

provide services "similar to or competitive with" the services provided by St. Mary's or Cabell Huntington in the market area. The amended Assurance clarified that "services" in that context included both outpatient and inpatient services. Moreover, under the amended **[***8]** Assurance, St. Mary's and Cabell Huntington were required to submit compliance reports to the Attorney General until the amended Assurance expired. St. Mary's and Cabell Huntington were also required to submit additional information or documentation upon request of the Attorney General "at any time." Should such a request be made, the request would be deemed "made in the investigation of a potential violation of state and/or federal antitrust laws and as such both the request and any response thereto, including documents or things produced, are subject to confidentiality provisions contained in state and/or federal law."

In September 2015, Steel sent the Attorney General a request under the *West Virginia Freedom of Information Act, W.Va. Code, 29B-1-1 [1977], et seq.*, "to inspect or obtain copies of all public records and incoming and outgoing correspondence relating to the proposed merger of Cabell Huntington Hospital and St. Mary's Medical Center."

In response, the Attorney General provided Steel with copies of documents considered subject to disclosure[4] but determined that the remaining documents were statutorily exempt under *subsection (a)(5)* of *W.Va. Code, 29B-1-4* [2015]. *Subsection (a)(5)* provides in relevant part:

> (a) There is a presumption of public **[***9]** accessibility to all public records, subject only to the following categories of information which are specifically exempt from disclosure under the provisions of this article:
> (5) Information specifically exempted from disclosure by statute[.]

The parties do not dispute that ***HN1***[] *subsection (a)(5)*, concerning "statutory exemptions," incorporates the "investigative exemption" of the West Virginia Antitrust Act, *W.Va. Code, 47-18-7(d)* [1978]. *W.Va. Code, 47-18-7(d)* [1978], states: "The attorney general shall not make public the name or identity of a person whose acts or conduct he investigates pursuant to this section or the facts disclosed in the investigation, but this subsection does not apply to disclosures in actions or enforcement proceedings pursuant to this article."

II. Procedural Background

In December 2015, Steel filed a complaint in the Circuit Court of Kanawha County to enjoin the Attorney General from withholding the documents claimed to be exempt from disclosure.[5] Steel alleged that the Attorney General had no basis for the exemptions and that, in any event, the Attorney General should submit a "*Vaughn* Index" of the withheld documents and an affidavit providing a detailed explanation why each document is exempt and why disclosure of the **[***10]** document **[**713]** **[*243]** would be harmful.[6] St. Mary's, Pallottine and Cabell Huntington were not named parties in the action.

---

[4] Steel described the documents the Attorney General considered subject to disclosure as largely consisting of previously available public records, news articles, and e-mails exchanging press releases and news stories.

[5] The action was styled *Steel of West Virginia, Inc., Plaintiff v. Patrick Morrisey, Attorney General, State of West Virginia, Acting in his Official Capacity, Defendant*, Civil Action No. 15-C-2214 (Kan. Co. 2015).

[6] A *Vaughn* Index was described in *Farley v. Worley, 215 W.Va. 412, 599 S.E.2d 835 (2004)*, as follows:

> ***HN2***[] When a public body asserts that certain documents or portions of documents in its possession are exempt from disclosure under any of the exemptions contained in *W.Va. Code, 29B-1-4* (2002 Repl.Vol.) (2003 Supp.), the public body must produce a *Vaughn* index named for *Vaughn v. Rosen, 484 F.2d 820, 157 U.S. App. D.C. 340 (D.C. Cir. 1973)*, *cert. denied*, *415 U.S. 977, 94 S. Ct. 1564, 39 L. Ed. 2d 873 (1974)*. The *Vaughn* index must provide a relatively detailed justification as to why each document is exempt, specifically identifying the reason(s) why an exemption under *W.Va. Code, 29B-1-4* is relevant and correlating the claimed exemption with the particular part of the withheld document to which the claimed exemption applies. The *Vaughn* index need not be so detailed that it compromises the privilege claimed. The public

The Attorney General asserted in the answer that the documents sought were collected in the course of an antitrust investigation. Therefore, **[***11]** production of the documents or providing a *Vaughn* Index would be precluded by the confidentiality provisions of the *Freedom of Information Act* and the Antitrust Act.

In a parallel proceeding, Cabell Huntington filed an application with the West Virginia Health Care Authority for a certificate of need regarding the merger.[7] Steel, granted "affected person" status by the Authority, was permitted to participate in the proceeding and oppose the merger.[8] On March 16, 2016, the Health Care Authority granted certificate of need approval to Cabell Huntington to complete the merger. That decision was affirmed by the Office of Judges. In April 2017, the Office of Judges's approval of the certificate of need was affirmed by the Circuit Court of Kanawha County. Steel's petition for appeal therefrom was separately pending before this Court.[9] However, the issues therein were settled and resolved, rendering that appeal moot.

In the current FOIA action, the circuit court ordered the Attorney General to prepare a *Vaughn* Index of the withheld documents and file the Index under seal in the circuit court. On September 7, 2016, the Attorney General filed the *Vaughn* Index, listing 349 documents claimed to be exempt from disclosure. The circuit court then ordered the Attorney General to produce the *Vaughn* Index to Steel, with the Index to otherwise remain under seal. Upon analyzing the Index, Steel agreed that in excess of 200 documents were exempt from disclosure. On October 5, 2016, an order was entered directing the Attorney General to produce each of the 349 documents, in unredacted form, to the circuit court for an *in camera* review.

In an October 6, 2016, letter to the circuit court, the Federal Trade Commission stated that the documents the FTC received concerning the merger of St. Mary's and Cabell Huntington had been provided to the Attorney General upon the Attorney General's certification "that the material would be maintained in confidence and used only for official law enforcement purposes." The letter concluded:

> The current program for cooperation in federal-state law enforcement depends on private parties **[***13]** being confident that their **[**714]** **[*244]** commercially sensitive materials [are] being maintained in confidence by state regulators. If third parties cannot rely on such assurances, they will be far less likely to cooperate in merger investigations, to the detriment of both federal and state law enforcement.

Similar letters indicating that the documents in question should not be publically disclosed were sent to the circuit court by St. Mary's and Cabell Huntington. On October 11, 2016, St. Mary's and Cabell Huntington filed motions to intervene in Steel's FOIA action. St. Mary's alleged that the confidentiality of its business operations, finances and trade secrets were at stake and that it had the clearest understanding of the harm which would befall it should the documents become public records under the FOIA request. Cabell Huntington, however, later withdrew its motion to intervene on the basis that the Attorney General effectively represented its interests.

> body must also submit an affidavit, indicating why disclosure of the documents would be harmful and why such documents should be exempt.

Syllabus point 6, in part. *Accord* syllabus point 8, *Hurlbert v. Matkovich, 233 W.Va. 583, 760 S.E.2d 152 (2014)*.

[7] *See* *W.Va. Code, 16-2D-1 [2016], et seq.* (establishing a certificate of need process in relation to the offering or development of health services). The proceeding concerning the proposed merger was styled *In re: Cabell Huntington Hospital, Inc.*, CON File # 14-2-10375-A.

[8] Steel filed a petition for a writ of mandamus in this Court to compel the Health Care Authority to issue a subpoena duces tecum to St. Mary's for documents concerning the bidding process which resulted in the proposed merger. The Authority maintained that the documents were irrelevant to the certificate of need proceeding. This Court refused Steel's petition for a writ of mandamus in December 2015. *See State ex rel. Steel of West Virginia, Inc., v. West Virginia Health Care Authority and Cabell Huntington Hospital, Inc.*, Supreme Court No. 15-1163 (2015). The documents concerning the bidding process are among the documents in question in Steel's FOIA action now before us.

[9] *See* **[***12]** *Steel of West Virginia, Inc., v. West Virginia Health Care Authority and Cabell Huntington Hospital, Inc., Supreme Court No. 17-0406, 2017 W.V. Cir. LEXIS 5*.

On October 28, 2016, the circuit court entered three orders which resulted in these consolidated appeals. First, the circuit court denied St. Mary's motion to intervene. The circuit court concluded that the interests of St. Mary's, as in the **[***14]** case of Cabell Huntington, were adequately represented by the Attorney General. Second, the circuit court ordered the unsealing of the entire *Vaughn* Index of the 349 documents. The order was entered as a sanction because the Attorney General, at the request of the Federal Trade Commission, had disclosed to the FTC the portion of the Index listing the documents the FTC had sent to the Attorney General.

Third, having reviewed the 349 documents *in camera*, the circuit court ordered the production of 89 documents. The 89 documents to be disclosed were subject to the redaction of trade secrets, and, if any such redaction was made, the Attorney General was to identify the nature of the redacted information and the connection to a claimed exemption. Among the 89 documents were the original bids which had been submitted to St. Mary's by other hospital systems and other interested buyers. *See* n. 8, *supra*.

The October 28, 2016, orders have been stayed pending the outcome of these consolidated appeals.

III. Standard of Review

HN3[] Generally, findings of fact are reviewed for clear error and conclusions of law are reviewed *de novo*. Syl. pt. 4, *Burgess v. Porterfield, 196 W.Va. 178, 469 S.E.2d 114 (1996)*. However, in complex cases such as the one now before us, we **[***15]** have observed that "ostensible findings of fact, which entail the application of law or constitute legal judgments which transcend ordinary factual determinations, must be reviewed *de novo*." Syl. pt. 1, in part, *State ex rel. Cooper v. Caperton, 196 W.Va. 208, 470 S.E.2d 162 (1996)*. *Accord* syl. pt. 1, in part, *Manville Pers. Injury Settlement Trust v. Blankenship, 231 W.Va. 637, 749 S.E.2d 329 (2013)*. Moreover, in *W.Va. Reg'l Jail and Corr. Facility Auth. v. Marcum, 239 W.Va. 109, 799 S.E.2d 540, 543 (2017)*, this Court confirmed that an interpretation of this State's *Freedom of Information Act* is subject to *de novo* review.

IV. Discussion

A. The Investigative Exemption

HN4[] The antitrust exemption incorporated into the *Freedom of Information Act* relied on by the Attorney General must be viewed in the context of his powers and duties under the Antitrust Act. In investigating a suspected violation in the form of a monopoly, restraint of trade or illegal bidding process, the Attorney General is authorized under *W.Va. Code, 47-18-7(a)* [1978], of the Antitrust Act to "administer oaths or affirmations, and may subpoena witnesses, compel their attendance, adduce evidence, and require the production of any matter which is relevant to the investigation." The Attorney General may direct a local prosecutor to assist him. Remedies for violations of the Act include injunctive relief, a penalty and treble damages. Pursuant to *W.Va. Code, 47-18-16* [1978], the Antitrust Act "shall be construed liberally **[***16]** and in harmony with ruling judicial interpretations of comparable federal antitrust statutes."

HN5[] A necessary component of the Antitrust Act is the investigative exemption set forth in **[**715]** **[*245]** *W.Va. Code, 47-18-7(d)* [1978], which states: "The attorney general shall not make public the name or identity of a person whose acts or conduct he investigates pursuant to this section or the facts disclosed in the investigation, but this subsection does not apply to disclosures in actions or enforcement proceedings pursuant to this article." As the parties agree, the Antitrust Act's investigative exemption is incorporated in the *Freedom of Information Act* through *W.Va. Code, 29B-1-4(a)(5)* [2015], *i.e.*, information "specifically exempted from disclosure by statute."[10]

---

[10] The comparable federal statute to the nondisclosure provisions of *W.Va. Code, 47-18-7(d)* [1978], is *subsection (h) of 15 U.S.C. § 18a*. [2000] concerning "premerger notification." *Subsection (h)* states in part:

In the November 25, 2014, confidentiality agreement executed by St. Mary's, Cabell Huntington and the Attorney General, the **[***17]** statutory investigative exemption was expressly relied upon:

> The Transaction [merger] Information covered by this Agreement shall be treated by the Attorney General as if such Transaction Information were received pursuant to *W.Va. Code § 47-18-7*, whether received directly from [Cabell Huntington, St. Mary's and/or the FTC], before or after the execution of this Agreement, and the Attorney General agrees not to disclose such Transaction Information to any person or entity except as expressly provided in this Agreement or *W.Va. Code § 47-18-7*.[11]

In *Associated Press v. Canterbury, 224 W.Va. 708, 688 S.E.2d 317 (2009)*, this Court held that certain e-mails of a personal nature withheld by a public official from a FOIA request were not subject to disclosure. We determined that the e-mails were irrelevant to the conduct of public business and found the e-mails comparable to a note scheduling a family dinner or a private letter from a friend. We concluded, in *Canterbury*, that the e-mails were not "a public record" under the *Freedom of Information Act*.

In *Canterbury*, the status of the e-mails was determined by a "content analysis" of what the e-mails actually said, rather than a "context analysis" which could have warranted disclosure under FOIA based on the interest of the general public in the e-mails. **[***18]** However, we acknowledged in *Canterbury* that our cases permit a context-based analysis for writings that are, in fact, public records, "but which are specifically exempted from disclosure by FOIA." *224 W.Va. at 725 n. 18, 688 S.E.2d at 334 n. 18*. In other words, ***HN6***[] a context-based analysis can be applied in determining whether public records are to be disclosed pursuant to a FOIA request, but the determination is subject to the specific exemptions of the *Freedom of Information Act* listed in *W.Va. Code, 29B-1-4* [2015].[12]

At the time *Canterbury* was decided, "public record" was defined in *W.Va. Code, 29B-1-2* [1977], as "any writing containing information relating to the conduct of the public's business, prepared, owned and retained by a public body." The later 2015 and 2016 versions of the statute, however, ***HN7***[] define "public record" as "any writing containing information prepared or received by a public body, *the content or context of which, judged either* ***[**716]*** ***[*246]*** *by content or context*, relates to the conduct of the public's business." (emphasis added)

The "content" versus "context" distinction *per se* is less significant in this proceeding because the Attorney General relies on the express investigative exemption set forth in the Antitrust Act. Although that exemption is broad based, **[***19]** it has its own statutory exceptions or caveats as indicated below.

Prior to Steel's FOIA request, a description of the merger and its prospective operation were set forth in the original and amended Assurances of Voluntary Compliance. The Assurances were publically filed by the Attorney General pursuant to statute. *See* n. 3, *supra*. After the FOIA request, the Attorney General provided Steel with copies of a number of documents relating to the merger. Later, upon analyzing the *Vaughn* Index, Steel agreed that in excess

---

> Any information or documentary material filed with the Assistant Attorney General or the Federal Trade Commission pursuant to this section shall be exempt from disclosure under *section 552 of Title 5* [regarding public information], and no such information or documentary material may be made public, except as may be relevant to any administrative or judicial action or proceeding.

With regard to the disclosure of information to the public, this Court has recognized "the close relationship between the federal and West Virginia FOIA." *Farley v. Worley, 215 W.Va. at 420, 599 S.E.2d at 843*.

[11] In syllabus point 5 of *Hechler v. Casey, 175 W.Va. 434, 333 S.E.2d 799 (1985)*, we recognized that "[a]n agreement as to confidentiality between the public body and the supplier of the information may not override the *Freedom of Information Act*, *W.Va. Code, 29B-1-1 et seq.*" However, our holding in these consolidated appeals is not based on the November 25, 2014, confidentiality agreement. Rather, our holding is based on the Attorney General's statutory investigative exemption incorporated in the *Freedom of Information Act* through *W.Va. Code, 29B-1-4(a)(5)*.

[12] *See* *Farley v. Worley, 215 W.Va. at 419-25, 599 S.E.2d at 842-48 (2004)* (decided under the 1977 version of the statute but making clear that a public body cannot simply refuse a FOIA request without specific justification.).

of 200 documents were exempt from disclosure. Thereafter, the circuit court ordered the disclosure of the *Vaughn* Index itself, as a sanction, and the 89 documents listed therein.

Among the 89 documents ordered disclosed were the original bidding documents that were submitted to St. Mary's by other hospital systems and other interested buyers. Those documents reveal the identity of the bidder, the amount of the bid and detailed bid specifications. Of the documents in question under the FOIA request, the parties' primary focus is on the bidding documents. St. Mary's asserts that the disclosure of the bidding documents would give its competitors an unfair business advantage **[***20]** whether or not the merger takes place. Steel asserts that it needed to present the bidding documents to the Health Care Authority. In December 2015, however, Steel unsuccessfully petitioned this Court for mandamus relief to obtain the bidding documents. During that proceeding, the Authority indicated that, for its purposes, the original bidding documents were irrelevant. *See* n. 8, *supra*.

The Antitrust Act, however, provides the Attorney General with an independent interest in the bidding documents. ***HN8***[] Pursuant to *W.Va. Code, 47-18-3(b)(2)* [1978], the following activities are unlawful:

> A contract, combination or conspiracy between two or more persons whereby, in the letting of any public or private contract:
> (A) The price quotation of any bid is fixed or controlled; or
> (B) One or more persons submits a bid intending it to be higher than another bid and thus complementary thereto, submits a bid intending it to be substantially identical to another bid, or refrains from the submission of a bid.

Consequently, the bidding process and its associated documents are within the scope of the Attorney General's investigative powers and, specifically, the investigative exemption of the Antitrust Act, *W.Va. Code, 47-18-7(d)* [1978].[13]

Steel's **[***21]** FOIA request to obtain "all public records and incoming and outgoing correspondence relating to the proposed merger" directly implicates the Attorney General's investigative exemption. We hold that ***HN10***[] the West Virginia Freedom of Information Act, *W.Va. Code, 29B-1-4(a)(5)* [2015], which excepts from public accessibility "information specifically exempted from disclosure by statute," incorporates the investigative exemption from disclosure of information set forth in the West Virginia Antitrust Act, *W.Va. Code, 47-18-7(d)* [1978]. The investigative exemption is mandatory in specifying that the Attorney General "shall not" make public the name or identity of a person whose acts or conduct he investigates or "the facts" disclosed in the investigation. Nevertheless, the Legislature has provided an exception or caveat in that the investigative exemption in *W.Va. Code, 47-18-7(d)* [1978], "does not apply **[**717]** **[*247]** to disclosures in actions or enforcement proceedings pursuant to this article."

An additional caveat pertains to the Assurance of Voluntary Compliance which must be publically filed pursuant to *W.Va. Code, 47-18-22* [1978]. However, in the current matter, the Assurances of Voluntary Compliance concerning the merger provided that, in the event the Attorney General were to request further **[***22]** information, the request would be deemed "made in the investigation of a potential violation of state and/or federal antitrust laws and as such both the request and any response thereto, including documents or things produced, are subject to confidentiality provisions contained in state and/or federal law."

This Court finds ***HN11***[] *W.Va. Code, 47-18-7(d)* [1978], to be free from ambiguity in its admonition that the Attorney General "shall not" make public the name or identity of a person whose acts or conduct he investigates or "the facts" disclosed in the investigation. Syllabus point 2 of *Crockett v. Andrews, 153 W.Va. 714, 172 S.E.2d 384*

[13] To be clear, ***HN9***[] the Antitrust Act's investigative exemption, incorporated in the *Freedom of Information Act* through *W.Va. Code, 29B-1-4(a)(5)* [2015], is to be distinguished from the investigation-related FOIA exemption set forth in *W.Va. Code, 29B-1-4(a)(4)* [2015], which exempts: "Records of law-enforcement agencies that deal with the detection and investigation of crime and the internal records and notations of such law-enforcement agencies which are maintained for internal use in matters relating to law enforcement." *See, e.g., Ogden Newspapers, Inc. v. City of Williamstown, 192 W.Va. 648, 453 S.E.2d 631 (1994)* (discussing *subsection (4)* in the context of a police incident report). *Subsection (4)* is not relevant to the current matter.

(1970), makes clear: "Where the language of a statute is free from ambiguity, its plain meaning is to be accepted and applied without resort to interpretation." *Accord* syl. pt. 5, *Leggett v. EQT Prod. Co., 239 W.Va. 264, 800 S.E.2d 850*, *cert. denied*, *138 S. Ct. 472, 199 L. Ed. 2d 358 (2017)*. *See* syl. pt. 1, *Nelson v. W.Va. Pub. Employees Ins. Bd., 171 W.Va. 445, 300 S.E.2d 86 (1982)* ("It is well established that the word 'shall,' in the absence of language in the statute showing a contrary intent on the part of the Legislature, should be afforded a mandatory connotation."); *accord*, syl. pt. 10, *Thomas v. McDermitt, 232 W.Va. 159, 751 S.E.2d 264 (2013)*.

A denial of the full import of the Attorney General's statutory exemption would place investigations of illegal conduct under the Antitrust Act at a disadvantage and would be contrary to the public's interest **[***23]** in the enforcement of the law. We therefore reverse the October 28, 2016, order which directed the Attorney General to produce the 89 documents.[14]

B. The Vaughn Index

This Court reverses the October 28, 2016, order which unsealed the entire *Vaughn* Index of 349 documents and allowed its production. The order was entered as a sanction against the Attorney General for sharing part of the Index with the Federal Trade Commission.

During the investigations of the proposed merger, the Federal Trade Commission transferred a number of documents it received to the Attorney General. The FTC transferred the documents on the condition that the material be kept confidential and used only for law enforcement purposes. Later, at the FTC's request, the Attorney General provided the FTC with a redacted version of the *Vaughn* Index which listed the documents the FTC had sent to the Attorney General. Finding that the Attorney General had, thus, revealed a portion of the Index without authorization, the circuit court entered the sanction.

This Court is of the opinion that the unsealing of the *Vaughn* Index, thereby permitting public access to the list of 349 documents, was inappropriate, given the relatively minor **[***24]** nature of the Attorney General's transgression. The record before us includes the affidavit of the Senior Deputy Attorney General which states that the materials provided to the FTC only referenced FTC documents.[15] No additional **[**718]** **[*248]** information contained in the *Vaughn* Index was provided.

HN12[] Pursuant to *W.Va. Code, 47-18-14* [1978], of the Antitrust Act, the Attorney General "may cooperate with officials of the federal government and the several states in the enforcement of this article." Moreover, ***HN13***[] the purpose of a *Vaughn* Index is limited to matters of litigation and serves as a resource for the benefit of the trial court. *See* *Associated Press v. Canterbury, 224 W.Va. at 713, 688 S.E.2d at 322* (The purpose of the *Vaughn* Index is to allow the circuit court to determine the validity of the government's claimed exemptions without the court having to physically examine each document.). *See also* *Farley v. Worley, 215 W.Va. at 426, 599 S.E.2d at 849*

[14] As a result of this holding, this Court need not address the additional exemption raised by the Attorney General under *W.Va. Code, 29B-1-4(a)(8)* [2015], of the *Freedom of Information Act* which provides for the nondisclosure of "internal memoranda or letters received or prepared by any public body." We note, however, that the Attorney General's conclusion that the merger was in the best interests of the State of West Virginia was not effectively made until the amended Assurance of Voluntary Compliance was filed on November 4, 2015, after the Attorney General received the documents in question.

[15] The Attorney General's transgression was providing the FTC with a portion of the sealed *Vaughn* Index without first requesting authorization or leave from the circuit court in the form of a motion or otherwise. *See, e.g.*, *W.Va. R. Civ. P. 26(c)* (providing that a deposition sealed under a protective order "be opened only by order of the court"). The affidavit of the Senior Deputy Attorney General states that the providing of the portion of the Index was in compliance with *W.Va. Code, 47-18-14* [1978], which authorizes cooperation between the Attorney General and the federal government in the enforcement of antitrust laws. According to the affidavit, there was no intent to violate the order placing the *Vaughn* Index under seal. However, the Senior Deputy Attorney General also set forth an apology in the affidavit, in the event the circuit court were to take a different view of the disclosure.

(The *Vaughn* Index "is implicated by FOIA litigation - not simply by a FOIA denial." It is specifically prepared for litigation purposes.).

Here, no contents of any documents were disclosed, and the Federal Trade Commission only received a portion of the Index listing its own material. This Court concludes that the unsealing of the *Vaughn* Index constituted an abuse of discretion. **[***25]** *See State ex rel. Richmond Am. Homes of W.Va., Inc. v. Sanders, 226 W.Va. 103, 110, 697 S.E.2d 139, 146 (2010)* (An abuse of discretion standard is applied in reviewing the imposition of sanctions.).

The October 28, 2016, order which unsealed the *Vaughn* Index is reversed. Furthermore, having reversed the orders of the circuit court which directed production of the 89 documents and the *Vaughn* Index, the petitions for appeal filed by St. Mary's are moot.

C. Exemption From Antitrust Laws

Finally, the Attorney General contends that the circuit court committed error in concluding that the *West Virginia Health Care Authority Act* "exempts the subject acquisition from the state antitrust laws enforced by the Attorney General." The statute in question, *W.Va. Code, 16-29B-26* [2016], effective March 12, 2016, provides:

> Actions of the board [of the West Virginia Health Care Authority] shall be exempt from antitrust action under state and federal antitrust laws. Any actions of hospitals and health care providers under the board's jurisdiction, when made in compliance with orders, directives, rules, approvals or regulations issued or promulgated by the board, shall likewise be exempt.
>
> It is the intention of the Legislature that this chapter shall also immunize cooperative agreements approved and subject to supervision by the **[***26]** authority and activities conducted pursuant thereto from challenge or scrutiny under both state and federal ***antitrust law***: Provided, That a cooperative agreement that is not approved and subject to supervision by the authority shall not have such immunity.

HN14[] "Cooperative agreement" is defined in *W.Va. Code, 16-29B-28(a)(2)* [2016], also effective March 12, 2016, as including, *inter alia*, an agreement providing for the consolidation, by merger or other combination, of facilities and services traditionally offered by hospitals or other health care providers. *Subsection (c)* of *W.Va. Code, 16-29B-28* [2016], provides that, when such an agreement might be anticompetitive within the meaning of the antitrust laws, "the Legislature believes it is in the state's best interest to supplant such laws with regulatory approval and oversight by the Health Care Authority as set out in this article." *Subsection (f)* of *W.Va. Code, 16-29B-28* [2016], states that the Authority "shall consult with the Attorney General of this state regarding his or her assessment of whether or not to approve the proposed cooperative agreement."[16]

Here, the bidding process concerning the proposed merger of St. Mary's and Cabell Huntington; the commencement of the **[**719]** **[*249]** federal and State antitrust investigations; the filing of the **[***27]** two Assurances of Voluntary Compliance; Steel's FOIA request; and the filing of Steel's complaint in the circuit court to enjoin the Attorney General from withholding documents all occurred prior to the March 12, 2016, enactment of *W.Va. Code, 16-29B-26* [2016] and *W.Va. Code, 16-29B-28* [2016]. Nothing suggests that those statutes have retroactive application regarding the investigative exemption asserted by the Attorney General. This Court held in syllabus point 4 of *Taylor v. State Comp. Comm'n., 140 W. Va. 572, 86 S.E.2d 114 (1955)*: ***HN15***[] "The presumption is that a statute is intended to operate prospectively, and not retrospectively, unless it appears, by clear, strong and imperative words or by necessary implication, that the Legislature intended to give the statute retroactive force and effect." *Accord* syl. pt. 3, *Findley v. State Farm Mut. Auto. Ins. Co., 213 W.Va. 80, 576 S.E.2d 807 (2002)*, *cert. denied*, *539 U.S. 942, 123 S. Ct. 2609, 156 L. Ed. 2d 628 (2003)*.

The amended Assurance of Voluntary Compliance filed in 2015 requires St. Mary's and Cabell Huntington to observe a number of conditions for a period of ten years following the merger's consummation. The requirement to

[16] Later amendments to *W.Va. Code, 16-29B-26* [2016] and *W.Va. Code, 16-29B-28* [2016], are not applicable herein.

enter into an Assurance of Voluntary Compliance and its public filing are found in the Antitrust Act. The terms thereof in the current matter reflect the Attorney General's investigative authority and the confidentiality of the information obtained. **[***28]**

The effect of the circuit court's ruling would completely eliminate the Attorney General's investigative exemption found in *W.Va. Code, 47-18-7(d)* [1978], in relation to the proposed merger of St. Mary's and Cabell Huntington. However, the Attorney General's duties of confidentiality in securing information regarding the merger predate the 2016 statutes. The ruling of the circuit court regarding the 2016 statutes is, therefore, reversed.

V. Conclusion

The orders entered by the circuit court on October 28, 2016, are reversed, and this action is remanded to the circuit court for the entry of an order dismissing Steel's FOIA action.

Reversed and Remanded.

Seaman v. Duke Univ.

United States District Court for the Middle District of North Carolina

February 1, 2018, Decided; February 1, 2018, Filed

1:15-CV-462

Reporter

2018 U.S. Dist. LEXIS 16136 *; 2018-1 Trade Cas. (CCH) P80,273; 2018 WL 671239

DANIELLE SEAMAN, individually and on behalf of all others similarly situated, Plaintiff, v. DUKE UNIVERSITY, DUKE UNIVERSITY HEALTH SYSTEM, WILLIAM L. ROPER, and DOES 1-20, Defendants.

Prior History: Seaman v. Duke Univ., 2016 U.S. Dist. LEXIS 31337, Trade Reg. Rep. (CCH) P 79499 (M.D.N.C., Feb. 12, 2016)

Core Terms

faculty, non-faculty, damages, no-hire, antitrust, class member, predominate, suppression, lateral, common question, faculty member, class-wide, defendants', hiring, medical school, class action, seniority, increases, asserts, proposed class, calculating, structures, questions, returns, certification, regression, salary, spread, class certification, individual issues

Counsel: **[*1]** For DANIELLE SEAMAN, individually and on behalf of all others similarly situated, Plaintiff: ROBERT M. Judges: Catherine C. Eagles, UNITED STATES DISTRICT JUDGE.

Opinion by: Catherine C. Eagles

Opinion

MEMORANDUM OPINION AND ORDER

Catherine C. Eagles, District Judge.

In 2015, Dr. Danielle Seaman, a radiologist at Duke University, inquired about a posted opening in the UNC radiology department. Via email, the UNC department head told her that he had confirmed that the deans at Duke and UNC had agreed not to permit lateral moves of faculty between Duke and UNC. She has sued Duke and UNC, alleging that this agreement not to hire the other's medical school faculty violates the antitrust laws and suppressed compensation throughout the defendants' medical schools and healthcare facilities. She seeks to certify a class of faculty, physicians, nurses, and skilled medical staff that worked for the defendants.

The plaintiff has met the class certification standards in *Rule 23(a)* and *Rule 23(b)(3)* for faculty members. Inclusion of non-faculty **[*3]** in the class, however, would inject issues that cannot be resolved based on the proof offered for the faculty case, would cause significant confusion at trial, and would raise difficult manageability problems. Therefore, the Court will grant the motion, in part, to certify the proposed class to the extent it includes faculty. The Court will deny the motion for class certification as to all other proposed class members.

BACKGROUND

The plaintiff Dr. Seaman was an Assistant Professor of Radiology at Duke University School of Medicine from 2011 to 2016. Doc. 85 at ¶ 2. The defendants are Duke University, Duke University Health Systems, Dr. William Roper, the University of North Carolina at Chapel Hill, the University of North Carolina School of Medicine, the University of North Carolina Health Care System and Does 1-20.

Dr. Seaman applied for a position at UNC in 2015. In response, a UNC radiology department chief told her in an email that "lateral moves of faculty between Duke and UNC are not permitted" due to a "'guideline' which was agreed upon between the deans of UNC and Duke a few years back." Doc. 88-62 at 2.

Dr. Seaman alleges that the defendants conspired and agreed that the Duke **[*4]** defendants would not hire or attempt to hire faculty[1] employed by the UNC defendants, and vice-versa.[2] The only exception to this alleged agreement was for faculty who received a promotion when they were hired. Doc. 109 at ¶ 47. Dr. Seaman alleges that the defendants historically have had the no-hire agreement, but that the agreed-to hiring restraints were "tighten[ed] up" in 2012 following the Duke defendants attempt to recruit the UNC bone marrow transplant physician faculty. Doc. 93 at 17; *see also* Doc. 109 at ¶ 59. According to Dr. Seaman, the no-hire agreement suppressed compensation for the defendants' faculty, physicians, nurses, and other skilled medical staff.

---

[1] Dr. Seaman's expert defines "faculty" to include employees who have an academic appointment at the Duke or UNC Schools of Medicine. Doc. 94 at ¶ 14. There was some question about whether physicians without an academic appointment should be included in the faculty category. The plaintiff is not sure whether the no-hire agreement was applied to physicians without an academic appointment, Doc. 187 at 83-84, and these physicians were included in Dr. Seaman's non-faculty analysis. *See id.* at 6-7. For these reasons, the Court considers physicians that do not have an academic appointment at the Duke or UNC Schools of Medicine to be non-faculty.

[2] In her complaint, Dr. Seaman alleges that the no-hire agreement extended to "skilled medical labor, including medical facility faculty," *see* Doc. 109 at ¶ 1; however, in her class certification briefing and supporting expert reports she only alleges that the no-hire agreement restricted recruitment of faculty. *See, e.g.*, Doc. 93 at 12-20. At the hearing, Dr. Seaman's counsel confirmed it had no direct evidence of an agreement as to non-faculty and admitted the only circumstantial evidence was the evidence about the agreement as to faculty. Doc. 187 at 23-24. The Court will evaluate the facts for purposes of class certification under the more limited allegations provided in Dr. Seaman's class certification briefing.

After discovery on the class certification issue was complete, Dr. Seaman and the UNC defendants settled. The Court approved the settlement.[3]

As against the Duke defendants and pursuant to *Federal Rule of Civil Procedure 23*, Dr. Seaman asks the Court to certify the following class:

> All natural persons employed by Defendants and their co-conspirators in the United States during the period from January 1, 2012 through the present (the "Class Period") as a faculty member, physician, nurse, or other skilled medical employee. Excluded from the **[*5]** Class are: members of the boards of directors and boards of trustees, boards of governors, and senior executives of Defendants and their co-conspirators who entered into the illicit agreements alleged herein; and any and all judges and justices, and chambers' staff, assigned to hear or adjudicate any aspect of this litigation.

Doc. 87 at 1. Dr. Seaman also asks the Court to appoint her as class representative and Lieff, Cabraser, Heimann & Bernstein, LLP, and Elliot Morgan Parsonage, P.A., as class counsel.

OVERVIEW OF QUESTION PRESENTED

"The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only." *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*.[4] To show that a case falls within the exception, the plaintiff "must affirmatively demonstrate his compliance" with *Federal Rule of Civil Procedure 23*. *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*.

As threshold matters, the putative class representative must show that she is a member of the proposed class, *see* *Fed. R. Civ. P. 23(a)*, and must establish that the members of the proposed class are "readily identifiable" or "ascertainab[le]." *EQT Prod. Co. v. Adair, 764 F.3d 347, 358 (4th Cir. 2014)*. The plaintiff must then establish that the case satisfies all four requirements of *Rule 23(a)* and fits into at least one of the three subsections of *Rule 23(b)*. *Comcast, 569 U.S. at 33*. Here, the plaintiff relies on **[*6]** *Rule 23(b)(3)*, which requires that common issues predominate and that a class action is the superior method for resolution of the issues.

The Duke defendants do not seriously contend that the requirements of *Rule 23(a)* are not met, and the dispute centers on whether common issues predominate and the related question of manageability. "Considering whether questions of law or fact common to class members predominate begins, of course, with the elements of the underlying cause of action." *Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 809, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011)*. To establish an antitrust violation, a plaintiff must prove (1) a violation of ***antitrust law***, (2) impact to the plaintiff caused by the violation, and (3) damages sustained by the plaintiff. *Deiter v. Microsoft Corp., 436 F.3d 461, 467 (4th Cir. 2006)*.

Dr. Seaman contends that the predominance requirement is met because all three elements of the antitrust claim—violation, impact, and damages—can be proven with common evidence for all class members. The Duke defendants contend that antitrust impact and damages cannot be proven with common evidence and that individual issues on these claim elements will predominate such that class certification is not appropriate.

---

[3] The Court has approved a class settlement between Dr. Seaman, class plaintiffs, and the following defendants: Dr. William Roper, the University of North Carolina at Chapel Hill, the University of North Carolina School of Medicine and the University of North Carolina Health Care System. Doc. 185. Final judgment has been entered on claims between these parties as well. Doc. 186. The settlement class has a different class definition from the proposed class at issue in the pending motion. *See* Doc. 81 at 1-2; Doc. 108 at 2-3 (defining settlement class).

[4] The Court omits internal citations and quotation marks from all cited cases in this opinion, unless otherwise noted. *See* *United States v. Marshall, 872 F.3d 213, 217 n. 6 (4th Cir. 2017)*.

ANALYSIS

I. *RULE 23(b)*

There are two requirements under *Rule 23(b)(3)*: predominance and superiority. *EQT, 764 F.3d at 357*. These requirements relate to the manageability **[*7]** of a class action, which is "a practical problem, and primarily a factual one with which a district court generally has a greater familiarity and expertise." *See* *Windham v. Am. Brands, Inc., 565 F.2d 59, 65 (4th Cir. 1977)* (en banc). For this reason, trial courts have "a wide range of discretion" in evaluating whether the requirements of *Rule 23(b)(3)* have been met. *Id.;* *Reiter v. Sonotone Corp., 442 U.S. 330, 345, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)* (noting that district courts "have broad power and discretion vested in them" as to the "certification and management of potentially cumbersome" class actions).

The predominance requirement is satisfied when "questions of law or fact common to the members of the class predominate over any questions affecting only individual members." *Gariety v. Grant Thornton, LLP, 368 F.3d 356, 362 (4th Cir. 2004)*; *see also* *Fed. R. Civ. P. 23(b)(3)*. "An individual question is one where members of a proposed class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof." *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1045, 194 L. Ed. 2d 124 (2016)*. In practice, the predominance requirement asks whether a trial meant to resolve class-wide issues is manageable or whether it is likely to devolve into a series of mini-trials examining questions specific to individual plaintiffs. *See* *Thorn v. Jefferson-Pilot Life Ins. Co., 445 F.3d 311, 328-29 (4th Cir. 2006)* (upholding **[*8]** district court's denial of class certification).

"The superiority requirement ensures that a class action is superior to other available methods for the fair and efficient adjudication of the controversy." *Thorn, 445 F.3d at 319*; *see also* *Fed. R. Civ. P. 23(b)(3)*. This inquiry looks at whether the class action "would achieve economies of time, effort, and expense, and promote . . . uniformity of decision as to persons similarly situated." *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 615, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*.

Dr. Seaman must provide evidentiary proof that the requirements of *Rule 23(b)(3)* are met. *Comcast, 569 U.S. at 33*. This Court must rigorously assesses that evidence and make findings as to whether the *Rule 23* requirements have been met, *Gariety, 368 F.3d at 359*, and, where necessary, it must "resolve a genuine legal or factual dispute relevant to determining the requirements." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 320 (3d Cir. 2008)*.[5] However, "*Rule 23* grants courts no license to engage in free-ranging merits inquiries at the certification stage." *Brown v. Nucor Corp., 785 F.3d 895, 903 (4th Cir. 2015)* (quoting *Amgen Inc. v. Conn. Ret. Plans & Trust Funds, 568 U.S. 455, 466, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)*). Rather, "the merits of a claim may be considered only when relevant to determining whether the *Rule 23* prerequisites for class certification are satisfied." *Id.* Persuasiveness of the class-wide evidence is, in general, a matter for a jury. *Tyson Foods, 136 S.Ct at 1049*.[6]

A. Antitrust Violation

---

[5] The findings stated in this Order apply only to the motion for class certification. *See* *Gariety, 368 F.3d at 366* (noting that if the jury or factfinder's "finding on any fact differs from a finding made in connection with class action certification, the ultimate factfinder's finding on the merits will govern the judgment.").

[6] Of course, if no reasonable juror could believe the class-wide evidence, Dr. Seaman would lack common proof. *Tyson Foods, 136 S. Ct at 1049* (comparing class certification standards to standards for summary judgment and directed verdict). That does not appear to be the case on the current record, and any arguments that Dr. Seaman's evidence fails to prove some elements of her claim can be addressed at summary judgment or at trial. *Id. at 1047*.

Both parties will present common evidence to determine whether the defendants did, or did not, enter into a **[*9]** no-hire agreement that violated *Section 1 of the Sherman Antitrust Act*. As previously mentioned, Dr. Seaman received an e-mail from a UNC School of Medicine department chief that indicates there was an agreement with Duke not to hire each other's faculty. Doc. 88-62 at 2. In addition, Dr. Seaman will rely on testimony from the defendants' employees as well as the defendants' internal and external correspondence discussing recruitment to prove that the no-hire agreement existed and was enforced. *See* Doc. 93 at 12-20 (citing depositions of Dr. Roper, Dr. Molina, John Burness, and defendants' correspondence). Likewise, Duke has indicated that it will dispute the existence of the no-hire agreement with common evidence, such as testimony from the employees alleged to have made and enforced the agreement. *See* Doc. 187 at 78-81. There is no indication that individual questions will arise in determining whether the defendants violated the Sherman Act. The Court finds that the issue of antitrust violation is a common question that will be addressed with common proof for all proposed class members.

B. Antitrust Impact and Damages for Faculty

1. Impact

Antitrust impact is "injury [that] reflect[s] the anticompetitive **[*10]** effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Dr. Seaman asserts that common evidence can be used to demonstrate that the alleged no-hire agreement had an antitrust impact on all or nearly all of the proposed class members because the agreement suppressed the class members' compensation.

Dr. Seaman contends that the no-hire agreement had an antitrust impact on faculty compensation in two ways. First, she asserts that because of the no-hire agreement the UNC and Duke defendants did not have to provide preemptive compensation increases for faculty that otherwise would have been needed to ensure employee retention, which suppressed compensation across the faculty. *See, e.g.*, Doc. 94 at ¶¶ 44, 59, 62, 72, 83 (plaintiff's expert Dr. Leamer explaining economic theory of impact). Second, she asserts that the defendants' internal equity structures—policies and practices that are alleged to have ensured relatively constant compensation relationships between employees—spread the individual harm of decreased lateral offers and corresponding lack of retention offers to all faculty, thus suppressing compensation faculty-wide. *See, e.g.* Doc. 94 at ¶¶ **[*11]** 63, 68, 71, 81-82. Dr. Seaman has presented documentary and testimonial evidence and expert reports that include economic theory, statistical modeling, and data to support her theories, which are summarized below. Collectively, this evidence supports her theories that the alleged no-hire agreement caused preemptive faculty-wide compensation suppression and individual faculty compensation suppression that spread to all faculty through the defendants' internal equity structures.

As explained below, these antitrust impact theories and the proffered evidence in support of the theories are common to all faculty: proving either theory for a single faculty class member would prove it for all, without the need for individual inquiry. The Court therefore finds that Dr. Seaman's theories of anti-trust impact to faculty present common questions for which common proof will be proffered.

a. The relationship between lateral hiring and faculty compensation

Dr. Seaman offers evidence that the Duke and UNC defendants were unique competitors for faculty who want to remain in the Durham/Chapel Hill area and that restrictions on lateral hiring between the two would limit preemptive and retroactive compensation **[*12]** increases causing compensation suppression for all faculty.[7] *See* Doc. 93 at

[7] The UNC School of Medicine is located approximately 12 and 30 miles from the Duke University Hospital and Duke Raleigh Hospital, respectively. Doc. 94 at ¶ 16. According to the plaintiff's expert, these facilities are located within the same "commuting zone." *Id.* at ¶ 17.

11-12, 21-22. The former President of Duke University and the Dean of the Medical School at UNC acknowledge in their testimony that the Duke and UNC medical schools are each other's closest peers, and an internal Duke analysis shows the Duke medical school's next closest competitor for faculty is 300 miles away. *See* Doc. 96-5 at 6, 9 (deposition testimony of former president of Duke University); Doc. 88-8 at 99 (Dr. Roper testifying that the "amount of [competitive] sensitivity is inverse to the geographic distance"). Further, Dr. Seaman's experts, Dr. Leamer and Dr. Cappelli, reviewed the competitive nature of the relationship between the Duke and UNC medical schools and opined that their geographic proximity and similar rankings makes them each other's main competitors for physicians who want to live in the Durham-Chapel Hill area. *See, e.g.*, Doc. 95 at ¶¶ 22-25; Doc. 94 at ¶¶ 16-24; Doc. 151 at ¶¶ 12-20.

Dr. Leamer and Dr. Cappelli offer opinions about how lateral hiring affects compensation generally and how it applies to the defendants, concluding that lateral hiring competition between the defendants **[*13]** would encourage the defendants to preemptively increase compensation to retain faculty. *See* Doc. 94 at ¶ 57; Doc. 95 at ¶¶ 70-76. Dr. Seaman also provides evidence to corroborate that the general economic theory is applicable to the Duke and UNC defendants, relying on testimony from former and current Duke employees about the need to increase salaries to prevent lateral moves. *See, e.g.*, Doc. 93 at 21 (citing Doc. 96-56); Doc. 94 at ¶ 62.

This is a class-wide theory supported with class-wide proof.

b. The relationship between internal equity structures and faculty compensation.

According to Dr. Seaman, the no-hire agreement prevents one defendant's individual faculty member from receiving a lateral offer from the other defendant and consequently also prevents receipt of a corresponding retention offer from the current employer, which would increase that faculty's salary to retain the employee. She does not seek to prove impact on any particular faculty member in this situation, and instead she will rely on experts who opine that this individual faculty compensation suppression was spread to all faculty through the defendants' internal equity structures.

Dr. Leamer and Dr. Cappelli explain **[*14]** that employers reactively increase compensation in response to a competing offer or to address overall attrition rates and that this general economic theory is applicable to the defendants. *See* Doc. 94 at ¶ 57; Doc. 95 at ¶¶ 65-77. Dr. Seaman provides evidence that both defendants have historically increased salaries for faculty to retain them in the face of competing offers. *See* Doc. 93 at 22-23 (explaining examples supported by Docs. 96-28, 96-29, 96-33, 96-35, 96-46, 96-47, 96-61, 88-64); Doc. 93 at 16-17 (discussing Duke's recruitment of UNC's bone marrow transplant team supported by Docs. 96-62, 96-63, 96-88).

Dr. Seaman also provides evidence that the lack of competing offers and corresponding individual compensation suppression was spread to all faculty members through the defendants' internal equity structures. Dr. Leamer and Dr. Cappelli explain the general economic theory of how lateral hiring increases compensation for employees throughout an organization when that organization manages employee compensation to maintain parity within employment categories or to achieve compensation relationships between employee categories (e.g., Associate Professors to Assistant Professors). **[*15]** Doc. 95 at ¶¶ 43-49; Doc. 94 at ¶¶ 80-83.

Dr. Seaman provides documentary and testimonial evidence that Duke and UNC maintain internal equity structures for faculty. The evidence shows that the UNC defendants have policies that "set[] out identical salary ceilings across 18 departments by professor level" and expects departments "to work towards or maintain average salary profiles by academic rank ...; enable recruitment and retention ...; [] promote a good morale and sense of fair treatment amongst the faculty;" and consider "internal equity among groups of otherwise similarly-situated individuals in the [medical school] department." Doc. 151 at ¶¶ 33-39 (summarizing evidence). The UNC defendants also perform annual "Salary Equity Review[s]" to "identify[] instances of potential salary inequity amongst like subsets of faculty" and requires an explanation or remedial plan for any inequality that is discovered. *Id.* at ¶ 39.

While the evidence at Duke is less direct, it shows that the Dean of the School of Medicine "signs off" on all department head compensation decisions. *See, e.g.*, Doc. 151 at ¶¶ 46, 49. For both new faculty and adjustments to current faculty's compensation, there is **[*16]** documentary evidence and testimony to support the assertion that internal equity is considered in setting and adjusting compensation, particularly within each department. *See, e.g.*, Doc. 151 at ¶¶ 46-51, 54; Doc. 150 at ¶¶ 31, 33, 44-48; Doc. 94 at ¶¶ 91, 93, 97-98, 100; Doc. 95 at ¶¶ 54, 58(d), (e).

Finally, Dr. Seaman provides Dr. Leamer's "sharing" regression analyses that examine how an individual faculty member's compensation moved in relationship to other faculty compensation. *See* Doc. 94 at ¶¶ 102-08, 110-11. This analysis shows that there is a correlation between faculty compensation and provides further support for Dr. Seaman's theory that the defendants managed faculty compensation with internal equity structures.

This is a class-wide theory supported with class-wide proof.

2. Damages

Dr. Seaman proposes calculating damages attributable to the no-hire agreement in the same manner for all faculty class members and using common evidence from Dr. Leamer about reduced "returns to seniority." "Returns to seniority" are compensation increases associated with increases in experience, i.e., individual faculty members are typically paid more as they obtain more experience. *See* Doc. 94 **[*17]** at ¶¶ 54, 113, 120. Dr. Leamer's calculations provide estimates (one for UNC faculty and one for Duke faculty) of how much returns to seniority are suppressed for all faculty in the presence of the no-hire agreement. *See, e.g.*, Doc. 94 at Figure 9, ¶ 123; Doc. 150 at ¶¶ 113-116 (Dr. Leamer's explanation of how baseline returns to seniority may be calculated based on returns to seniority experienced by new recruits at previous jobs, or by comparing returns to seniority in the class period to pre-class period).

Specifically, Dr. Leamer conducts regression analyses using common data—payroll and other employment records for all faculty—to estimate the suppressed returns to seniority for faculty at UNC and Duke. Doc. 94 at ¶¶ 115-123. Dr. Leamer applies his regression results to the faculty compensation data—common data—to develop an aggregate class-wide damages estimate for faculty. Doc. 94 at ¶ 125, Figure 12. This analysis is consistent with Dr. Seaman's theory of anti-trust impact to faculty—it purports to measure faculty-wide compensation suppression that is attributable to the no-hire agreement, which is the particular antitrust impact that Dr. Seaman alleges. *See* *Comcast, 569 U.S. at 37-38*.

The Court finds **[*18]** that Dr. Seaman's proposed method for calculating faculty damages presents common questions for faculty and will be based on proof common to the faculty.

C. Antitrust Impact & Damages for Non-Faculty

1. Impact

As noted, *supra* at n. 2, Dr. Seaman does not seriously contend that the no-hire agreement applied to non-faculty. She does assert that the no-hire agreement as to faculty and the resulting suppression of faculty compensation spread to all non-faculty through the defendants' internal equity structures. This theory presents common questions for a class composed of non-faculty because proving the theory for a single non-faculty class member would prove it for all.

While the economic theory of internal equity on which Dr. Seaman relies is the same for faculty and non-faculty, *see, e.g.*, Doc. 94 at ¶¶ 45, 79, 82, 84 (Dr. Leamer explaining economic theory of impact that applies to non-faculty), the evidence is different. The documentary and testimonial evidence of internal equity for non-faculty is specific to non-faculty. *See* Doc. 151 at ¶¶ 27-32, 41-44 (summarizing evidence that both Duke and UNC use rigid step-wise pay tiers for non-faculty that provide a mechanism for spreading compensation **[*19]** affects throughout the non-faculty class). Dr. Leamer's non-faculty sharing regression analysis is similar to the faculty sharing regression, but analyzes different compensation metrics. Doc. 94 at ¶¶ 137, 139 (explaining different analyses for faculty and non-faculty). Further, an additional evidentiary step is required for non-faculty: Dr. Leamer's separate regression analysis that purports to show sharing of compensation impacts between faculty and non-faculty. Doc. 94 at ¶¶ 109, 140. This step connects the non-faculty evidence to the no-hire agreement's alleged impact on faculty compensation.

Dr. Seaman's evidence of antitrust impact for non-faculty based on this generalized compensation suppression theory is common to all non-faculty and will not require separate inquiry for individual non-faculty claims. This evidence consists of expert evidence providing economic theory and statistical analysis that is backed up, in part, by documentary and testimonial evidence. The Court finds that, for a class composed of non-faculty, the issue of antitrust impact presents common questions that can be addressed with common proof.

In addition, Dr. Seaman also contends that the no-hire agreement **[*20]** affected a subset of non-faculty more directly because they missed out on compensation increases associated with lateral moves undertaken in connection with a faculty-lead team. *See* Doc. 109 at ¶ 39; Doc. 93 at 24. She has not articulated how non-faculty compensation overall, as opposed to at an individual level, would be affected under this theory. Unlike with faculty, there is no evidence that non-faculty received retention offers or preemptory compensation increases in this context, which compensation increases would then be spread to other non-faculty through the internal equity theory discussed *supra*. At most, Dr. Seaman asserts that faculty sought compensation increases for non-faculty who undertook lateral moves with them, *see* Doc. 93 at 24,[8] but this assertion only supports individualized impact to those faculty members who would have received increased compensation in a lateral move. She has not offered any expert analysis specific to this theory that indicates class-wide impact. While the plaintiff's briefing does not fully flesh out this theory, it only appears to support finding impact to individuals and not to non-faculty as a whole or the class as a whole. The Court finds **[*21]** that this theory of impact does not present a common question or common proof for non-faculty.

2. Damages

Dr. Seaman proposes calculating damages attributable to the no-hire agreement in the same manner for all non-faculty class members and using common evidence. She relies on Dr. Leamer's analysis, which takes the faculty damages analysis and applies an additional step. He starts with the estimates of how much returns to seniority are suppressed for all faculty in the presence of the no-hire agreement. He then passes these estimates through the sharing regression that he calculated in support of finding that faculty compensation suppression spreads to non-faculty. Doc. 94 at ¶¶ 126-27. Finally he applies the results to common non-faculty compensation data to develop an aggregate class-wide damages estimate for non-faculty. Doc. 94 at Figure 13. Dr. Leamer's calculation of non-faculty damages is consistent with Dr. Seaman's internal equity theory of anti-trust impact to non-faculty. *See* *Comcast, 569 U.S. at 37-38*.

The Court finds that Dr. Seaman's proposed method for calculating damages for non-faculty class members based on an internal equity theory presents common questions for non-faculty and will be based **[*22]** on proof common to the non-faculty.

She has offered no damages evidence in support of her "lateral move with a team" theory. Moreover, it appears that such evidence would be individual, not class-wide.

---

[8] The Court notes that this appears to be a bald allegation at this stage. The documentary evidence cited in support, Doc. 93 at 24 n. 58, does not provide any indication or confirmation that faculty seek compensation increases for non-faculty during lateral moves.

D. Weighing Predominance and Superiority

Finding that an antitrust violation is based on common questions and evidence is not sufficient to establish predominance. Rather, this must be considered in relation to the questions and evidence that will be presented for the antitrust impact and damages elements. *See* Windham, 565 F.2d at 66-72 (upholding district court's determination that antitrust violation issue did not predominate in the face of individual impact and damages issues). Even if common questions and proof would predominate, a court may deny certification if class adjudication is not manageable or would be unfair. *See* Fed. R. Civ. P. 23(b)(3) (requiring class action be the superior method "for fairly and efficiently adjudicating the controversy"); *see also* Reiter, 442 U.S. at 345 (recognizing the district court's discretionary authority to refuse to certify potentially cumbersome class actions with manageability issues).

1. Faculty

Dr. Seaman's theories of violation, antitrust impact, and anti-trust damages present common questions for faculty members **[*23]** and she presents common proof to support her claims. There is no indication that Dr. Seaman's proof for faculty is susceptible to individualized inquiry, that it is so unreliable no juror could believe it, or that it is not probative. The Court finds that, with respect to faculty, common questions will predominate over individualized questions. This Court finds that a class action is the superior method of adjudicating the faculty class member claims because the individual damages are insufficient to warrant individual litigation, there are no related cases pending, the forum is convenient, and a unitary adjudication will be more efficient than individual adjudications. *See* Fed. R. Civ. P. 23(b)(3); Amchem, 521 U.S. at 615; Thorn, 445 F.3d at 319.[9]

The Duke defendants identify individual issues that they contend undermine predominance, but none of these individual issues align with Dr. Seaman's theories of liability. Duke's briefing presumes that each class member is seeking damages based on the impact of enforcing the agreement against the individual class member in particular.[10] But "the choice of the injury to assert is in the plaintiff's hands," American Bar Association, *Proving Antitrust Damages: Legal and* ***[*24]*** *Economic Issues*, 8 (3d ed. 2017), and Dr. Seaman chose to assert theories of class-wide impact, not individual impact. Individual issues arising under a theory of liability that Dr. Seaman does not assert do not defeat predominance because there is no reason to think that those issues will present themselves in the adjudication.

Duke also asserts that Dr. Seaman's proposed common proof is unsupported, insufficient, or otherwise flawed and, therefore, that Dr. Seaman has not established that common issues will predominate over individual issues. *See, e.g.*, Doc. 127 at 27-40 (asserting that internal equity structures have not been established), at 23-27 (asserting that

---

[9] In their briefing, neither Dr. Seaman nor Duke addressed how class-wide damages, if established, would be allocated to individual class members. The Court has considered this issue and does not anticipate that allocation to individual faculty members would create individual issues that predominate over other faculty damages issues, as it appears. That is because Dr. Seaman's theories of impact and her class-wide damages calculations would support a formulaic class-wide approach to distribution of the aggregate class-wide damages using the common employment data. *See* In re Titanium Dioxide Antitrust Litig., No. RDB-10-0318, 2013 U.S. Dist. LEXIS 62394, 2013 WL 1855980, at *16 (D. Md. May 1, 2013) (noting that at class certification "th[e] Court ... recognized [class-wide] options for determining individual damages" following an aggregate damages award); Rubenstein, Newberg on Class Actions § 12:2 (5th ed., Dec. 2017 Update).

[10] For example, Duke asserts that individualized proof will be required to show that the agreement actually restrained the movement of each particular faculty member and that each faculty member was embedded in the area such that the agreement affected them. Doc. 127 at 20-21, 26-27; *see also* Doc. 187 at 77-78. The fact that there may be some evidence about individual situations does not defeat predominance because the plaintiff's theory does not require her to prove that the movement of every faculty member was restrained or that every faculty member was embedded in the area. Evidence that this was or was not the case for individuals may well be relevant to support or rebut the assumptions underlying the plaintiff's theories. But this is in effect common evidence, and individual questions will not require resolution.

unique competitive relationship between Duke and UNC is not present), at 30-41 (asserting that Dr. Leamer's analysis is flawed but not moving to exclude it). Duke does not argue, and this Court does not find, that no reasonable juror could believe Dr. Seaman's common evidence such that her proffered evidence should be disregarded. Duke's assertions, therefore, go to the persuasiveness of Dr. Seaman's evidence and do not negate the fact that her evidence is common proof.

2. Non-Faculty

Dr. Seaman's theories and evidence **[*25]** differ between faculty and non-faculty class members. It is apparent from the briefing on this motion and on the plaintiff's motion to exclude defendants' experts that the inclusion of faculty and non-faculty in the same class is likely to cause significant confusion. Disputes already have arisen as to whether witnesses are talking only about faculty, only about non-faculty, or both. *See* Doc. 163 at 22-23. And there are extra steps required for a finding of anti-trust impact and damages as to non-faculty as compared to faculty; these are not minor steps, but include detailed and complicated expert statistical analyses and additional fact witnesses. Moreover, the evidence as to non-faculty is substantially weaker, at least on this record, since it is based on several inferences-on-inferences; this gives rise to the possibility that the strength of the faculty claim or the weakness of the non-faculty claim might tend to bleed over to the other claim in the jury's mind. Finally, the plaintiff has put forth one theory as to non-faculty that seems to be driven by individualized evidence.

Collectively these problems—different evidence, the likelihood of substantial confusion, potential for **[*26]** unfairness at trial, and the possibility of individual issues as to non-faculty—will make it very difficult to manage the class. Trial of the relatively straightforward faculty claims would be unduly complicated and there is a real potential for unfairness to both the class members and the defendant. For these reasons the Court finds that including non-faculty in the class would defeat predominance and superiority.[11] *Reiter, 442 U.S. at 345* (recognizing the district court's discretionary authority to refuse to certify potentially cumbersome class actions with manageability issues).

II. *RULE 23(a)*

Duke does not seriously dispute that Dr. Seaman has met the requirements of *Rule 23(a)*. As the discussion that follows shows, the record is clear that these requirements have been met as to the faculty class.[12]

As an initial matter, the Court finds that Dr. Seaman is a member of the proposed faculty class. She worked for the defendant Duke University from 2011 until 2016 as a Medical Instructor and Assistant Professor of Radiology. Doc. 85 at ¶ 2. The Court also finds that other members of the proposed faculty class are ascertainable. The defendants keep adequate records of their faculty and those persons are easily identifiable. *See* **[*27]** Doc. 94 at ¶ 14, Figure 1 (Dr. Leamer's report identifying other members of the class).

A. Numerosity

The plaintiff's proposed class includes approximately 5,469 faculty members. *Id.*; Doc. 93 at 27. Several thousand persons "is so numerous that joinder of all members is impracticable." *Fed. R. Civ. P. 23(a)(1)*; *see* *Cent. Wesleyan Coll. v. W.R. Grace & Co., 6 F.3d 177, 183 (4th Cir. 1993)* (noting district court's finding "that some 480 potential class members would easily satisfy the numerosity requirement"). The proposed class meets the numerosity requirements of *Rule 23(a)(1)*, and the Court so finds.

---

[11] Non-faculty class members may pursue a separate class action and obtain the corresponding economies of time, effort, and expense, and uniformity of decision. *See* *Amchem, 521 U.S. at 615*.

[12] Since the Court has concluded that a non-faculty class is not manageable, the Court need not address the *Rule 23(a)* requirements as to it.

B. Commonality

To satisfy the commonality requirements, there must be "questions of law or fact common to the class." *Fed. R. Civ. P. 23(a)(2)*. Commonality does not require that all, or even most questions be common and "even a single common question will do." *Dukes, 564 U.S. at 359*.

This case presents at least one question common to the faculty—whether the no-hire agreement existed. *See supra* at pp.7-8. This one common issue is sufficient to meet the *Rule 23(a)(2)* requirements, *see* *Dukes, 564 U.S. at 369*, and the Court so finds.

C. Typicality

To satisfy the typicality requirement, the claims of the named plaintiff must be typical of the claims of the class. *Fed. R. Civ. P. 23(a)(3)*. "The typicality requirement is met where the claims asserted by the named plaintiffs arise from the same course of conduct and are based **[*28]** on the same legal theories as the claims of the unnamed class members." *Tatum v. R.J. Reynolds Tobacco Co., 254 F.R.D. 59, 65 (M.D.N.C. 2008)*.

In this case, Dr. Seaman's claims and the faculty class members' claims are based on the same alleged facts and legal theory—that a no-hire agreement existed between the defendants and that the agreement injured the faculty by suppressing their compensation and causing monetary damages. Therefore, this Court finds that the typicality requirement of *Rule 23(a)(3)* is satisfied.

D. Adequacy

Rule 23(a)(4) requires that class representatives "fairly and adequately protect the interests of the class." *Fed. R. Civ. P. 23(a)(4)*. It "serves to uncover conflicts of interest between named parties and the class they seek to represent," as well as "competency and conflicts of class counsel." *Amchem, 521 U.S. at 625 & n.20*.

Dr. Seaman has declared that she will fairly and adequately represent the interests of the class. She has provided answers to interrogatories and documents in response to discovery, which shows commitment to the case. Doc. 85 at ¶¶ 5-7.

While the parties have not identified any conflicts among the class members' interests, one concern has arisen. The defendants may attempt to assert res judicata to bar future claims that are based on a theory of individual impact and damages attributable **[*29]** to the no-hire agreement.[13] In the Court's view res judicata should not bar future claims based on theories of individual impact and damages because those individual theories are not included in this certification order and may not be brought in this case. *See* *Cooper v. Fed. Reserve Bank of Richmond, 467 U.S. 867, 880, 104 S. Ct. 2794, 81 L. Ed. 2d 718 (1984)*. The risk of any such conflict also is small because there have not been any other antitrust claims brought against the defendants based on the no-hire agreement. The Court finds that this small risk can be managed via a disclosure in the class notice, *see* Doc. 187 at 10-11 (Dr. Seaman's counsel discussing opt-out notice), or other mechanism.

The Court also reviewed qualifications of proposed class counsel, *see* Docs. 83 and 84, and finds that they meet the requirements of *Rule 23(g)*.

---

[13] For example, the agreement may have suppressed an individual's compensation under Dr. Seaman's theories of class-wide liability, but the agreement also may have impacted and damaged an individual who missed out on increased compensation associated with a lateral move or lateral move offer. The class-wide and individual theories of impact and damages are not mutually exclusive, but only the class-wide theories are being asserted in this case.

Dr. Seaman is an appropriate class representative and Lieff, Cabraser, Heimann & Bernstein, LLP, and Elliot Morgan Parsonage, P.A., are appropriate class counsel. The Court finds the requirements of *Rule 23(a)(4)* are satisfied.

CONCLUSION

Dr. Seaman has met the *Rule 23* requirements for certification of a class composed of faculty members. She has met the *Rule 23(b)(3)* requirements by demonstrating that questions and proof common to the faculty will predominate over any individual questions and **[*30]** proof and that class adjudication is the superior method of adjudication for faculty. All of her asserted theories and proposed proof are common to a class composed of faculty. Inclusion of the proposed non-faculty class members would involve differences in proof and would raise significant manageability and fairness issues so that certification of a class including non-faculty is not appropriate.

Dr. Seaman also has met the *Rule 23(a)* requirements. She established that she is a member of the faculty class and that the other faculty class members are ascertainable. She has established that a class composed of faculty members satisfies the numerosity, commonality, and adequacy of representation requirements of *Rule 23(a)(1)*, *(2)*, and *(4)*. Dr. Seaman is a member of the proposed class and therefore satisfies the typicality requirement of *Rule 23(a)(3)*.

For these reasons, the Court will certify a class of faculty members.

It is **ORDERED** that:

1. The plaintiff's motion for certification of a litigation class, Doc. 87, is **GRANTED, in part**, and the following faculty class is certified:

> All natural persons employed by Defendants and their co-conspirators in the United States during the period from January 1, 2012 through the present (the **[*31]** "Class Period") as a faculty member with an academic appointment at the Duke or UNC Schools of Medicine. Excluded from the Class are: members of the boards of directors and boards of trustees, boards of governors, and senior executives of Defendants and their co-conspirators who entered into the illicit agreements alleged herein; and any and all judges and justices, and chambers' staff, assigned to hear or adjudicate any aspect of this litigation.

2. Plaintiff Dr. Danielle Seaman is appointed class representative.
3. Lieff, Cabraser, Heimann & Bernstein, LLP, and Elliot Morgan Parsonage, P.A., are appointed class counsel.

4. The motion is otherwise **DENIED**.

This the 1st day of February, 2018.

/s/ Catherine C. Eagles

Opinion by: JOHN W. deGRAVELLES

Opinion

RULING AND ORDER

I. INTRODUCTION

Before the Court is a Motion to Dismiss the Amended and Restated Complaint ("Amended Complaint") for Failure to State a Claim filed by Defendant The Williamette Valley Company ("Defendant"). ("Motion," Doc. 40). Plaintiff Clean Water Opportunities, Inc., d/b/a Engineered Polyurethane Patching Systems ("Plaintiff") has filed an Opposition, (Doc. 48), and Defendant has filed a Reply in further support of the Motion, (Doc. 51).

For the reasons discussed below, the Motion is granted, and this action will be dismissed.

II. [*2] PLAINTIFF'S ALLEGATIONS AND PROCEDURAL BACKGROUND

This action concerns Defendant's alleged monopolization of the market for "patch," a product used to fill imperfections in mill-produced plywood. (Doc. 34 at 2-3). Patch is applied to sheets of plywood traveling down a conveyor belt at the rate of six to twelve sheets per minute and is applied by an employee using a "patch gun," which is a handheld piece of equipment that mixes the two components of patch. (*Id.* at 3). Patch is sold to manufacturers on a per-gallon basis, but, as part of the price, the seller provides and services patch application equipment. (*Id.*).

The American Plywood Association ("APA") is an industry-based governing organization that sets standards for different grades of plywood. (*Id.*). The APA also produces a guide for synthetic repairs that includes repair using patch. (*Id.*). The APA allows two other types of "veneer repair," namely "wood plug" and "wood dough" or "wood putty" repair. (*Id.* at 4). Wood plug repair requires that imperfections be punched out and ultimately re-inserted in sheets of plywood by hand, while wood dough repair's mechanical and reliability limits "render it 'not approved' for the majority of defects commonly **[*3]** found in panel faces today." (*Id.*). Wood dough repair also requires long drying time and may leave "residual cracks." (*Id.*). Therefore, according to Plaintiff, "there are no market substitutes for patch." (*Id.*).

Patch is a "disbursed suspension" with a functional shelf life of two to four weeks. (*Id.* at 5). This shelf life shortens when the suspension is agitated, "like it would be while being transported in a semi-bulk container on a flat-bed trailer (the standard method of delivery)." (*Id.*). Between patch's limited shelf life and the requirement that a patch seller service patch application equipment (including on an emergency basis), Plaintiff contends that the relevant geographic market in this action includes patch users within a five-hundred-mile, six-hour drive radius around Baton Rouge, Louisiana. (*Id.* at 5-6). This corresponds with a "Southern Market" for patch allegedly "defined" by Defendant, which includes east Texas, Louisiana, Mississippi, Alabama, southern Arkansas, and the Florida panhandle. (*Id.* at 5).

Defendant is the sole supplier of patch in the continental United States. (*Id.* at 6). Defendant installs patch application equipment where patch is sold, but it does not allow others to purchase the equipment, **[*4]** which is not commercially sold, nor will it supply data to others on how to build it. (*Id.* at 6-7). Additionally, only two companies have the equipment to make patch "mixing tubes," and, to purchase them at a low enough price to be competitive, a supplier "would have to purchase a minimum of 10,000." (*Id.* at 7). One component of patch is a "non-standard" formula within the polyurethane industry that a new manufacturer would need to develop independently, and this component must meet numerous performance standards. (*Id.*). The other component is available "off the shelf" but there are "hundreds of varian[ts]" that a potential supplier would need to try, and the component is costly to store and ship. (*Id.* at 7-8).

To make patch, raw materials must be purchased, and these raw materials must be obtained at competitive prices to make the sale of patch economically feasible. (*Id.* at 8). "[S]ome of the better choices in raw materials" are also "essentially unavailable" because Defendant uses them. (*Id.*).

A patch supplier must also have APA approval to operate in a mill, and approval to operate industry-wide is contingent upon three tests of a supplier's patch and equipment at three different mills. (*Id.* at 8-9).

Plaintiff also alleges, "perhaps **[*5]** most importantly," that the "mere suggestion" that Defendant will no longer supply patch to a particular mill will, "in virtually all cases," be sufficient to stop a mill from using a different supplier. (*Id.* at 9).

In 1990, Plaintiff's principal owner, David Edwards, entered into the business of supplying patch to mills. (*Id.*). At that time, there were several companies in the market for providing patch; however, by 1997 or 1998, only Edwards's former company and Defendant remained. (*Id.* at 10). In 2000, Defendant bought Edwards's former company, which was then enjoying 10 to 15 percent market share, and Edwards signed a ten-year noncompete agreement. (*Id.*).

Spurred either by Defendant raising prices or by mills becoming concerned about Defendant's monopoly, a competitor entered the market nine months after Defendant first established its monopoly. (*Id.*). The competitor was "viable" for about a year before Defendant bought it out. (*Id.*).

About three years after the noncompete agreement ended, Edwards began developing and selling patch through Plaintiff, his new company. (*Id.*). Edwards reentered the market after observing that, while he had been out of the market, the cost of patch components had risen **[*6]** fifty percent but the selling price of patch had risen 250 percent. (*Id.* at 10-11). He also thought the industry would "embrace a second source" for patch and believed he could make cost-saving technological improvements to patch application equipment. (*Id.* at 11).

In July 2014, Plaintiff entered into a production contract with MARTCO, a plywood manufacturer, under which Plaintiff would provide patch and application equipment for one of two production lines at MARTCO's plant. (*Id.*). At that time, Plaintiff was selling patch for $15 per gallon and Defendant was selling patch for $17 per gallon. (*Id.*). At some point, MARTCO advised Plaintiff that Plaintiff would be permitted to take over a second production line if Defendant did not lower its prices. (*Id.* at 12). Plaintiff "encouraged" MARTCO to allow it to sell patch on both lines and offered a five-year contract at $12.90 per gallon. (*Id.*).

Defendant then offered MARTCO "substantial discount[s]" on all items Defendant sold MARTCO, including ones that did not use patch, with the contingency that MARTCO purchase all patch from Defendant and for the purpose of undercutting Plaintiff. (*Id.*). Plaintiff "reasonably believes and avers that," when these discounts are considered, **[*7]** MARTCO was buying patch at a price below Defendant's variable costs of production. (*Id.* at 14).

Plaintiff also offered MARTCO a discount but was advised that it would be unable to match Defendant's discount. (*Id.* at 13). In a meeting between representatives of MARTCO and Plaintiff, MARTCO assured Edwards that it was protected "long term." (*Id.*). MARTCO terminated its relationship with Plaintiff and required Plaintiff to remove its patch application equipment by April 23, 2015. (*Id.*). Plaintiff believes that similar discount agreements were accepted by two other manufacturers with which Plaintiff had been in discussions about supplying patch. (*Id.* at 13-15).

In June 2015, because it had been unable to enter into sales agreements with patch customers and Plaintiff was not "financially viable," Plaintiff's assets were sold to Defendant. (*Id.* at 15-16).

Plaintiff claims that, based on the prevailing price of patch when Defendant last had significant competition, the current competitive price of patch should be around $10 per gallon, not the $17 per gallon actually charged. (*See id.* at 16). This difference is passed on to plywood consumers. (*Id.* at 17).

Plaintiff claims that Defendant engaged in illegal conduct to maintain its monopoly, including predatory **[*8]** pricing, threatening termination of its relationships with mills that did business with Plaintiff, and an unlawful merger. (*Id.* at 17-18). Plaintiff alleges violations of the *Sherman Antitrust Act, 15 U.S.C. § 2*; the *Clayton Antitrust Act, 15 U.S.C. §§ 4*, *7*; and the *Louisiana Antitrust Statute, La. R.S. 51:122*, *51:123*, *51:124(A)*. (*Id.* at 18-20).

Plaintiff's original Complaint raised many of the same claims. The Court dismissed the Complaint on March 30, 2017, ruling that Plaintiff had failed to address barriers to entry to the market for patch and sufficiently define the relevant market, both in geographic terms and in terms of possible substitutes for patch. (Doc. 33 at 4-7, 9). The Court also granted leave to amend "to the extent Plaintiff finds it necessary to amend its complaint to specifically allege *how* Defendant's conduct was unlawful." (*Id.* at 9). The Court further observed that Plaintiff's "illegal acquisition" claim could not be maintained absent its other claims, as Plaintiff was required to show that Defendant's anticompetitive conduct was the but-for cause of Plaintiff's acquisition. (*Id.* at 11-12).

III. DISCUSSION

A. General Standards

In *Johnson v. City of Shelby, Miss., ___ U.S. ___, 135 S. Ct. 346, 190 L. Ed. 2d 309 (2014)*, the Supreme Court explained that "[f]ederal pleading rules call for a 'short and plain statement of the claim showing that the pleader **[*9]** is entitled to relief,' *Fed. R. Civ. P. 8(a)(2)*; they do not countenance dismissal of a complaint for imperfect statement of the legal theory supporting the claim asserted." *135 S.Ct. at 346-47* (citation omitted).

Interpreting *Rule 8(a)*, the Fifth Circuit has explained:

> The complaint (1) on its face (2) must contain enough factual matter (taken as true) (3) to raise a reasonable hope or expectation (4) that discovery will reveal relevant evidence of each element of a claim. "Asking for [such] plausible grounds to infer [the element of a claim] *does not impose a probability requirement* at the pleading stage; it simply calls for enough facts to raise a reasonable expectation that discovery will reveal [that the elements of the claim existed]."

Lormand v. U.S. Unwired, Inc., 565 F.3d 228, 257 (5th Cir. 2009) (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

Applying the above case law, the Western District of Louisiana has stated:

> Therefore, while the court is not to give the "assumption of truth" to conclusions, factual allegations remain so entitled. Once those factual allegations are identified, drawing on the court's judicial experience and common sense, the analysis is whether those facts, which need not be detailed or specific, allow "the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." **[*10]** [*Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)*]; *Twombly, [550] U.S. at 556, 127 S. Ct. at 1965*. This analysis is not substantively different from that set forth in *Lormand, supra*, nor does this jurisprudence foreclose the option that discovery must be undertaken in order to raise relevant information to support an element of the claim. The standard, under the specific language of *Fed. R. Civ. P. 8(a)(2)*, remains that the defendant be given adequate notice of the claim and the grounds upon which it is based. The standard is met by the "reasonable inference" the court must make that, with or without discovery, the facts set forth a plausible claim for relief under a particular theory of law provided that there is a "reasonable expectation" that "discovery will reveal relevant evidence of each element of the claim." *Lormand, 565 F.3d at 257*; *Twombly, [550] U.S. at 556, 127 S. Ct. at 1965*.

*Diamond Servs. Corp. v. Oceanografia, S.A. De C.V., 2011 U.S. Dist. LEXIS 27358, 2011 WL 938785, at *3 (W.D. La. Feb. 9, 2011)* (citation omitted).

More recently, in *Thompson v. City of Waco, Tex., 764 F.3d 500 (5th Cir. 2014)*, the Fifth Circuit summarized the standard for a *Rule 12(b)(6)* motion:

> We accept all well-pleaded facts as true and view all facts in the light most favorable to the plaintiff . . . To survive dismissal, a plaintiff must plead enough facts to state a claim for relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable **[*11]** for the misconduct alleged. Our task, then, is to determine whether the plaintiff state a legally cognizable claim that is plausible, not to evaluate the plaintiff's likelihood of success.

Id. at 502-03 (citations and internal quotations omitted).

B. Parties' Arguments

i. Defendant's Motion

Defendant argues that the Amended Complaint "adds new allegations" but does not save Plaintiff's "core predatory pricing claim." (Doc. 40-1 at 1). First, Defendant argues that Plaintiff's predatory pricing claims are conclusorily pled and are, in fact, undercut by the facts that Plaintiff has provided. (*Id.* at 8). Defendant observes that, according to the Amended Complaint, the current competitive price of patch should be around $10 per gallon, which includes both the variable cost associated with the gallon of patch and a share of profit, fixed costs, and overhead, including the equipment and repair costs that a patch supplier covers. (*Id.* at 8-9). To state a predatory pricing claim, Defendant argues, Plaintiff must show that Defendant priced patch below its incremental costs, represented by variable costs, *i.e.*, "substantially below" $10 per gallon. (*Id.*). Plaintiff's factual allegations concerning predatory pricing allege that **[*12]** Defendant undercut the price Plaintiff offered to MARTCO, which was $12.90 per gallon. (*Id.* at 9). Defendant believes it "utterly implausible" that, in response to Plaintiff's bid of $12.90 per gallon, Defendant not only undercut Plaintiff's price, but unnecessarily undercut Plaintiff's price to a point substantially below $10 and lost money on every gallon. (*Id.*). Defendant also observes that Plaintiff has provided no specifics about its own incremental costs of producing patch or other information that would permit the Court to draw the conclusion that Defendant may have priced below incremental cost. (*Id.* at 10).

Second, Defendant argues that Plaintiff has not shown a "dangerous probability" that Defendant will recoup any losses incurred as a result of predatory pricing. (*Id.*). According to Defendant, the Amended Complaint describes multiple instances in which a new competitor entered the market for patch, Plaintiff has not shown that any alleged barriers to entry affect Defendant more than a new entrant into the market, numerous listed "barriers to entry" are overstated or not legally relevant (*e.g.*, that a competitor must develop and manufacture a product it wishes to sell), and Defendant's presence **[*13]** in the market is not itself a barrier to entry. (*Id.* at 12-15).

Third, Defendant argues that Plaintiff has insufficiently defined the market in this case. (*Id.* at 15). With respect to the product market, Defendant attaches as exhibits APA guides which approve of the use of wood putty in certain instances and also permit the use of epoxies, which the Amended Complaint does not discuss. (*Id.* at 15-16). Defendant also argues that the qualitative differences between patch and other means of filling imperfections does not place these products in different markets. (*Id.* at 16). With respect to the geographic market, Defendant argues that the relevant question is "how far consumers will go to obtain the product or its substitute," not where the customers or sellers are located. (*Id.* at 17-18).

Finally, Defendant argues that Plaintiff's illegal acquisition claims and its "catchall" claims under federal and Louisiana law should be dismissed for the reasons discussed in the Court's prior order. (*Id.*at 18-19).

ii. Plaintiff's Opposition

In opposition, Plaintiff first observes that no discovery has occurred in this action, it does not have access to Defendant's cost and pricing information, and its plausible allegations must be accepted as true. (Doc. 48 at 5). **[*14]** Plaintiff also argues that a predatory pricing claim may be viable even absent an allegation that a monopolist priced below cost. (*Id.* at 5-8).

With respect to barriers to entry, Plaintiff maintains that, because Defendant has been in the market since 1990, it is "firmly established" and does not have to overcome the barriers discussed by Plaintiff to enter the market. (*Id.* at 8-9). Plaintiff also argues that the limited entry into the patch market since 1990 does not show limited barriers to entry and that Edwards had particular expertise that permitted his companies to enter the market. (*Id.*).

With respect to the product market, Plaintiff argues that there are no substitutes for patch "when it comes to high-volume sanded plywood production." (*Id.* at 10). Plaintiff also asks that the Court not consider the APA guides attached to the Motion, which it contends may not be considered at this stage and could only be properly understood if accompanied by testimony concerning the differences between patch and its various alleged substitutes. (*Id.* at 10-12).

With respect to the geographic market, Plaintiff reiterates the allegations in the Amended Complaint, arguing that it answered the "questions" posed in the Court's prior order **[*15]** and that the market for patch is a function of the distance between a patch supplier and its customers. (*Id.* at 12-13).

Plaintiff further argues that its Amended Complaint sets forth factual allegations showing that Defendant's "anticompetitive activities" led to the sale of Plaintiff to Defendant. (*Id.* at 13). Finally, Plaintiff argues that its remaining claims are not "catch-all" claims and should be permitted to stand alone regardless of the merits of the predatory pricing claims. (*Id.* at 13-14).

iii. Defendant's Reply

In its Reply, Defendant reiterates some arguments made in its Motion and further argues that: (1) following the Supreme Court's decision in *Brooke Group v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*, only below-cost prices suffice to state a predatory pricing claim; (2) the fact that an incumbent incurred entry costs years earlier does not demonstrate that costs incurred by new entrants significantly exceed the costs incurred by a monopolist; (3) the Court may consider the APA documents attached to the Motion; (4) the distance between a patch supplier and consumer is a relevant factor in defining the product market, but it is not the only factor; and (5) the Court's previous rulings warrant dismissal of the illegal acquisition claim and the alleged **[*16]** "catchall" claims. (Doc. 51 at 1-6).

C. Analysis

i. Predatory Pricing

"Predatory pricing occurs when '[a] business rival has priced its products in an unfair manner with an object to eliminate or retard competition and thereby gain and exercise control over prices in the relevant market.'" *Big River Indus., Inc. v. Headwaters Resources, Inc., 971 F. Supp. 2d 609, 619 (M.D. La. 2013)* (quoting *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 221, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993))*. The United States Supreme Court has cautioned that such claims should be approached with "extreme skepticism," as "[t]he central difficulty with such actions is that the conduct alleged is difficult to distinguish from conduct that benefits consumers." *Stearns Airport Equip. Co., Inc. v. FMC Corp., 170 F.3d 518, 527 (5th Cir. 1999)* (citing *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 594, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986))*.

Preliminarily, the parties dispute whether a predatory pricing claim requires allegations that an alleged monopolist priced below incremental cost. According to Plaintiff, a predatory pricing claim may also rely on a "limit pricing" theory, under which a monopolist sets a price "just below that which a prospective entrant to the market would need to charge in order to sustain a successful entry." (Doc. 48 at 7 (citing *Phototron Corp. v. Eastman Kodak Co., 842 F.2d 95, 101 (5th Cir. 1988)*; *Dimmitt Agri Industries, Inc. v. CPC Intern, Inc., 679 F.2d 516, 524 (5th Cir. 1982))*. However, *Stearns*, interpreting *Brooke Group*, forecloses this argument:

> Under *Brooke Group*, a claimant must demonstrate that the prices at issue were below an appropriate measure of its rival's costs. Stearns incorrectly **[*17]** relies on cases in this Circuit predating *Brooke Group*, in which we left open the possibility that prices above a monopolist's variable costs could be predatory under certain circumstances. The district court case from which Stearns extracts its predatory pricing standard was decided in the same month as, but before, *Brooke Group*. In the wake of *Brooke Group's* clarification of the standard, a plaintiff must show pricing below the standard this Court has long embraced as an appropriate measure of cost - average variable cost.

Stearns, 170 F.3d at 532 (citations omitted). Plaintiff argues that "[t]he cases relied on by [Defendant] do not involve 100-percent monopolists and consequently are legally and factually distinguishable," (Doc. 48 at 6), but it provides no argument or analysis that would permit the Court to depart from the clear standard set forth in *Stearns* and *Brooke Group*. Therefore, to succeed on a predatory pricing claim, a plaintiff must demonstrate: "(1) the defendant's pricing is below an appropriate measure of its costs, and (2) there is a dangerous probability that the defendant will recoup any losses sustained during the below-cost pricing period." *Big River, 971 F. Supp. 2d at 619* (citing *Brooke Group, 509 U.S. at 222-24*).

With respect to the first element, **[*18]** Plaintiff's allegations of pricing below variable cost are implausible. The only instance of "predatory pricing" alleged with specificity in the Amended Complaint is in Defendant's dealings with MARTCO. At most, these factual allegations support an inference that, when discounts are considered, Defendant offered MARTCO a price somewhere below $12.90 per gallon, the price offered by Plaintiff. (Doc. 34 at 12). According to Plaintiff's allegations, however, the competitive price for patch "should be" about $10 per gallon. (*Id.* at 16). Moreover, as Defendant observes, if a patch supplier is to remain viable, the per-gallon price must include both the variable cost of producing the unit and a contribution to fixed costs and any profit to be realized. (Doc. 40-1 at 8-10). It is unclear exactly what the variable cost of a gallon of patch is, but it is wholly speculative that Defendant reduced its price not only below Plaintiff's offered price, but unnecessarily reduced it below variable cost in order to drive Plaintiff out of the market. Absent such a plausible allegation, Plaintiff's predatory pricing claim fails.

In an abundance of caution, the Court also considers Defendant's ability to recoup **[*19]** losses that it might have incurred. To plead a plausible claim for recoupment, the pleadings must plausibly allege that: (1) the predatory pricing scheme could actually drive the competitor out of the market and (2) the surviving monopolist could then raise prices to consumers so as to recoup his costs without encouraging new entrants to the market. *Big River, 971 F. Supp. 2d at 619*. As Judge Brady explained in *Felder's Collision Parts, Inc. v. Gen. Motors Co.,*

> The second prong assesses the probability of whether Defendants could charge supracompetitive prices for a period of time long enough to recoup profit lost as a result of the challenged program. The object of this inquiry is to determine the likelihood of a predator's success in achieving the end goal of any predatory plan—net profit. Courts will not condemn behavior where it appears likely that a predator's plan will fail to be profitable, because such behavior "produces lower aggregate prices in the market, and consumer welfare is enhanced."

960 F. Supp. 2d 617, 632 (M.D. La. Apr. 17, 2013) (citing *Brooke Group, 509 U.S. at 224*). An important market factor to consider at this stage is, "[i]f barriers to entry in an industry are low, new entrants into the industry will appear when the monopolist raises its prices, and the net effect of **[*20]** the campaign will be a loss to the predator..." *Id. at 633* (citing *Stearns, 170 F.3d at 530*). In evaluating the barriers to entry, the relevant inquiry focuses on market conditions after the defendant eliminates the plaintiff from the relevant market and what will stop other competitors from entering the market once the defendant begins to raise its prices. *See* *Stearns, 170 F.3d at 530*. As the Court previously discussed, a barrier to the market must affect a new entrant significantly more than a monopolist, and contentions that Defendant's mere existence is a barrier are "unavailing." (Doc. 33 at 4-5 (citing *Stearns, 170 F.3d at 530*; *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 119 n.15, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986))*; *see also* *United States v. Syufy Enterprises, 903 F.2d 659, 668 (9th Cir. 1990)* ("The government is not claiming that Syufy monopolized the market by being too efficient, but that Syufy's effectiveness as a competitor creates a structural barrier to entry, rendering illicit Syufy's acquisition of its competitors' screens. We hasten to sever this new branch that the government has caused to sprout from the moribund *Alcoa* trunk.").

The Court agrees with Defendant that Plaintiff's alleged barriers to entry generally do not satisfy the applicable legal standards. In particular, the fact that Defendant may have surmounted these "barriers to entry" years ago does not transform them into legally significant **[*21]** barriers. *See* *HTI Health Servs., Inc. v. Quorum Health Grp., Inc., 960 F. Supp. 1104, 1133 (S.D. Miss. 1997)* ("This record contains no evidence whatsoever of new primary care physicians incurring long-term costs that *were not incurred* by already-established physicians." (emphasis added)); *E. Portland Imaging Ctr., P.C. v. Providence Health Sys.-Oregon, 280 F. App'x 584, 586 (9th Cir. 2008)* ("Plaintiffs have failed to create a factual issue regarding the barriers to entry and expansion in the diagnostic imaging market. They have not provided evidence that new entrants face long-run costs that *were not* or will not be incurred by incumbent providers." (emphasis added)); *Moecker v. Honeywell Int'l, Inc., 144 F. Supp. 2d 1291, 1308 (M.D. Fla. 2001)* ("The disadvantage of new entrants as compared to incumbents is the hallmark of an entry barrier. However, the mere fact that entry requires a large absolute expenditure of funds does not constitute a 'barrier to entry'; a new entrant is disadvantaged only to the extent that he must pay more to attract those funds than would an established firm." (citations omitted)); *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1439 (9th Cir. 1995)* ("The main sources of entry barriers are: (1) legal license requirements; (2) control of an essential or superior resource; (3) entrenched buyer preferences for established brands; (4) capital market evaluations imposing higher capital costs on new entrants; and, in some situations, (5) economies of scale."); *see also* Advo, Inc. v. Philadelphia Newspapers, Inc., 51 F.3d 1191, 1202 (3d Cir. 1995) (disapproving of argument implying **[*22]** that there are legally significant barriers to entry in all markets).

While Court must accept as true that the barriers alleged by Plaintiff exist, (*see* Doc. 48 at 8-9), the Court need not accept Plaintiff's conclusions about the legal significance of these barriers. The vast majority of these barriers were satisfied by Defendant at some time in the past, and the few that were not (*e.g.*, Plaintiff's allegation that "some of the better choices in raw materials are essentially unavailable because [Defendant] uses them") are conclusory. Moreover, while the Court acknowledges Plaintiff's argument that actual entry has been fairly limited and requires some special expertise, (Doc. 48 at 8-9), it is significant that the Amended Complaint acknowledges some actual entry in a "100 percent monopoly" market in response to rising prices, one instance of which occurred only nine months after the monopoly was first established. (Doc. 34 at 10-11). Under the circumstances, the Court cannot conclude that Plaintiff has plausibly pled legally significant barriers to entry, and Plaintiff's predatory pricing claims fail for this additional reason.

ii. Illegal Acquisition Count

The Court previously ruled **[*23]** that Plaintiff's voluntary withdrawal from the market cannot give rise to an unlawful acquisition claim and that such a claim would generally "rise and fall" with Plaintiff's predatory pricing claim. (Doc. 33 at 10-12 (citing, *inter alia,* Chrysler Corp. v. Fedders Corp., 643 F.2d 1229, 1235 (6th Cir. 1981)). That is, Plaintiff was required to show some anticompetitive conduct by Defendant that was the but-for cause of Plaintiff's insolvency. (*Id.* at 11-12).

With respect to this claim, the Amended Complaint suffers from the same defects as the initial Complaint: although it contains legal conclusions that Defendant's actions were the sole cause of Plaintiff's sale to Defendant, the only specific facts concerning anticompetitive conduct are those that the Court analyzed *supra* in connection with Plaintiff's predatory pricing claim. (*See* Doc. 34 at 20). Because these allegations are lacking, there are no plausible allegations that anticompetitive conduct by Defendant caused the sale. Plaintiff's illegal acquisition claim therefore fails and will be dismissed.

iii. Remaining Claims

Plaintiff's first ground for relief reiterates all of the preceding paragraphs of the Amended Complaint and alleges that, "[b]y such acts, practices, and conduct," Defendant violated § 2 of the Sherman Act. **[*24]** (Doc. 34 at 18). The Court previously dismissed a virtually identical allegation claiming a "general violation" of § 2, citing favorably Defendant's argument that "where no piece of conduct is illegal, adding them together doesn't magically transform them into actionable conduct." (*See* Doc. 33 at 13); *see also* Eatoni Ergonomics, Inc. v. Research in Motion Corp., 486 F. App'x 186, 191 (2d Cir. 2012) ("Because these alleged instances of misconduct are not independently anti-competitive, we conclude that they are not cumulatively anti-competitive either."). Defendant's Motion argues that this "catchall" count should be dismissed again for the same reasons. (Doc. 40-1 at 19). Plaintiff argues that this claim is "separate and apart" from its predatory pricing and illegal acquisition claim, "as it is obvious, and has not been denied by [Defendant], that it maintains a pure monopoly over patch in the subject geographic market." (Doc. 48 at 13-14). However, as Plaintiff also observes, "the offense of monopoly . . . has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." **[*25]** (*Id.* at 13 (citing United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)). Plaintiff again lacks plausible allegations of anticompetitive conduct (especially ones distinct from its predatory pricing claim) sufficient to satisfy the second element of this test. Therefore, Plaintiff's first claim for relief is inadequately pled and will be dismissed.

Finally, Plaintiff invokes Louisiana ***antitrust law*** on the same grounds as his federal claims. (Doc. 34 at 20; Doc. 48 at 14). The Court has previously ruled that Louisiana ***antitrust law*** mirrors federal ***antitrust law***. (Doc. 33 at 14). Because Plaintiff's federal claims are lacking, Plaintiff's claims under Louisiana ***antitrust law*** are similarly dismissed.

iv. Leave to Amend

The Court now considers whether to grant further leave to amend. In a recent antitrust case, the Fifth Circuit described the standard as follows:

> "*Rule 15(a)* requires a trial court to grant leave to amend freely, and the language of this rule evinces a bias in favor of granting leave to amend." *Jones v. Robinson Prop. Grp., LP, 427 F.3d 987, 994 (5th Cir. 2005)* (citation and internal quotation marks omitted). Leave to amend is in no way automatic, but the district court must possess a "substantial reason" to deny a party's request for leave to amend. *Id.* (citation and internal quotation marks omitted). The district **[*26]** court is entrusted with the discretion to grant or deny a motion to amend and may consider a variety of factors including "undue delay, bad faith or dilatory motive on the part of the movant, repeated failures to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party ..., and futility of the amendment." *Id.* (citation omitted). "In light of the presumption in favor of allowing pleading amendments, courts of appeals routinely hold that a district court's failure to provide an adequate explanation to support its denial of leave to amend justifies reversal." *Mayeaux v. La. Health Serv. and Indent. Co., 376 F.3d 420, 426 (5th Cir. 2004)* (citation omitted). However, when the justification for the denial is "readily apparent," a failure to explain "is unfortunate but not fatal to affirmance if the record reflects ample and obvious grounds for denying leave to amend." *Id.* (citation and internal quotation marks omitted).
>
> Denying a motion to amend is not an abuse of discretion if allowing an amendment would be futile. *Briggs v. Miss., 331 F.3d 499, 508 (5th Cir. 2003)*. An amendment is futile if it would fail to survive a *Rule 12(b)(6)* motion. *Id.* Therefore, we review the proposed amended complaint under "the same standard of legal sufficiency as applies under *Rule 12(b)(6)*." *Stripling v. Jordan Prod. Co., LLC, 234 F.3d 863, 873 (5th Cir. 2000)* (citation internal and quotation **[*27]** marks omitted).

Marucci Sports, L.L.C. v. Nat'l Collegiate Athletic Ass'n, 751 F.3d 368, 378 (5th Cir. 2014).

The Fifth Circuit has also stated:

> In view of the consequences of dismissal on the complaint alone, and the pull to decide cases on the merits rather than on the sufficiency of pleadings, district courts often afford plaintiffs at least one opportunity to cure pleading deficiencies before dismissing a case, unless it is clear that the defects are incurable or the plaintiffs advise the court that they are unwilling or unable to amend in a manner that will avoid dismissal.

Great Plains Trust Co. v. Morgan Stanley Dean Witter & Co., 313 F.3d 305, 329 (5th Cir. 2002). Relying on *Great Plains* and other cases from this circuit, one district court in Texas articulated the standard as follows:

> When a complaint fails to state a claim, the court should generally give the plaintiff at least one chance to amend before dismissing the action with prejudice unless it is clear that the defects in the complaint are incurable. *See* *Great Plains Trust Co. v. Morgan Stanley Dean Witter & Co., 313 F.3d 305, 329 (5th Cir. 2002)*; *see also* *United States ex rel. Adrian v. Regents of the Univ. of Cal., 363 F.3d 398, 403 (5th Cir. 2004)* ("Leave to amend should be freely given, and outright refusal to grant leave to amend without a justification . . . is considered an abuse of discretion.") (internal citation omitted). However, a court may deny leave to amend a complaint if the court determines that "the proposed change clearly is frivolous or advances a claim or defense that **[*28]** is legally insufficient on its face." 6 Charles A. Wright, Arthur R. Miller & Mary Kay Kane, Federal Practice and Procedure § 1487 (2d ed.1990) (footnote omitted); *see also* *Martin's Herend Imports, Inc. v. Diamond & Gem Trading United States of Am. Co., 195 F.3d 765, 771 (5th Cir. 1999)* ("A district court acts within its discretion when dismissing a motion to amend that is frivolous or futile.") (footnote omitted).

Tow v. Amegy Bank N.A., 498 B.R. 757, 765 (S.D. Tex. 2013). Finally, one leading treatise explains:

> As [] numerous case[s] . . . make clear, dismissal under *Rule 12(b)(6)* generally is not immediately final or on the merits because the district court normally will give the plaintiff leave to file an amended complaint to see if the shortcomings of the original document can be corrected. The federal rule policy of deciding cases on the basis of the substantive rights involved rather than on technicalities requires that the plaintiff be given every opportunity to cure a formal defect in the pleading. This is true even when the district judge doubts that the plaintiff will be able to overcome the shortcomings in the initial pleading. Thus, the cases make it clear that leave to amend the complaint should be refused only if it appears to a certainty that the plaintiff cannot state a claim. A district court's refusal to allow leave to amend is reviewed for abuse of discretion **[*29]** by the court of appeals. A wise judicial practice (and one that is commonly followed) would be to allow at least one amendment regardless of how unpromising the initial pleading appears because except in unusual circumstances it is unlikely that the district court will be able to determine conclusively on the face of a defective pleading whether the plaintiff actually can state a claim for relief.

5B Charles A. Wright, Arthur R. Miller, *et al., Federal Practice and Procedure* § 1357 (3d ed. 2016).

Here, acting in accordance with "wise judicial practice," the Court previously afforded Plaintiff an opportunity to file an Amended Complaint. After reviewing the Amended Complaint and the briefing on the Motion, the Court concludes that granting further leave to amend would be futile. Significantly, the Amended Complaint confirms that Plaintiff's specific factual allegations center on its dealings with MARTCO and Defendant's alleged attempts to undercut Plaintiff's price. After two iterations, Plaintiff has been unable to provide facts plausibly suggesting that Defendant's conduct may have constituted predatory pricing; indeed, the Amended Complaint renders Plaintiff's claims *less* plausible by clarifying **[*30]** the broad range of prices that would have undercut Plaintiff's price but remained well above variable cost. As discussed above, Plaintiff's predatory pricing claims are necessary to his other claims. It appears that Plaintiff will be unable to amend to state a viable claim. The Court therefore dismisses Plaintiff's claims without further leave to amend.[1]

D. CONCLUSION

Accordingly, **IT IS ORDERED** that Defendant's Motion (Doc. 40) is **GRANTED**, and Plaintiff's claims are **DISMISSED WITH PREJUDICE**. Judgement will be entered consistent with this order.

Signed in Baton Rouge, Louisiana, on February 6, 2018.

/s/ John W. deGravelles

JUDGE JOHN W. deGRAVELLES

UNITED STATES DISTRICT COURT

MIDDLE DISTRICT OF LOUISIANA

End of Document

---

[1] In light of this ruling, the Court need not consider the sufficiency of Plaintiff's definition of the relevant product or geographic markets.

Opinion by: KEARNEY

Opinion

MEMORANDUM

Competing manufacturers relying upon a limited number of companies qualified to distribute their product to consumers may seek to induce the distributors' primary allegiance in a number of ways which we do not consider unlawfully anti-competitive. One effort which can invite scrutiny is a manufacturer's exclusivity agreement with a distributor with penalties for selling other products when the manufacturer enjoys a 55% market share and the market continues to lose qualified distributors. In addressing these issues in the suspended acoustical ceiling tile industry, we today find a manufacturer with a smaller market share adequately pleads anti-competitive conduct by a manufacturer with a much **[*2]** larger market share through exclusivity agreements in the relevant market in the United States but not, as yet, in Canada and does not plead a claim for tortious interference with contractual relationships. In the accompanying Order, we grant the larger manufacturer's motion to dismiss claims against it for anti-competitive conduct in the Canadian market and for tortious interference but deny its motion to dismiss the remaining claims under the Sherman and Clayton Acts subject to further discovery.

I. Alleged facts.

Roxul USA, Inc. and Armstrong World Industries, Inc. manufacture and sell ceiling tiles and related products in the United States and Canada.[1] Roxul and Armstrong produce ceiling tiles comparable in quality and function.[2] Ceiling tiles are used in both residential and nonresidential spaces, but the non-residential market accounts for at least 90% of the demand for ceiling tiles.[3] Armstrong holds at least a 55% share of the ceiling tile market in the United States and Canada.[4] In total, three firms, including Roxul, compete against Ainistrong in the ceiling tile market in the United States and Canada.[5]

Ceiling tile manufacturers sell approximately 85% of their ceiling **[*3]** tile offerings through distributors specializing in building project matenals.[6] The vast majority of ceiling tile consumers are building contractors purchasing materials for interior construction projects. Contractors rely on distributors because they offer a wide-range of building material products in addition to ceiling tiles and provide multiple offerings for each material type.[7] Distributors also provide services such as same day delivery, logistical planning, product selection and installation expertise, storage and stocking services, and a knowledgeable sales force.[8] Contractors rely on distributors because very few contractors have the resources and network necessary to achieve the same efficiencies as specialized distributors.[9] Due to market forces, regional and national distributors have consolidated resulting in limited numbers of distributors capable of servicing Roxul and Armstrong.[10]

Roxul challenges Armstrong's actions with distributors to protect its market share in this consolidating distributor market, including through exclusivity agreements.[11] Following Roxul's entry into this market in 2013, Armstrong expanded its geographic scope of the exclusivity with some **[*4]** distributors from regional to national exclusivity or exclusivity throughout the United States and Canada.[12] Armstrong's exclusive distributors are not permitted to carry Roxul's or other competing firms' ceiling tiles.[13] Armstrong polices its exclusivity arrangements by raising prices to distributors who violate the exclusivity arrangement, enforcing liquidating damages provisions, or refusing to supply

its products to the distributors after the breach.[14] Armstrong also threatens to retaliate against distributors who sell or attempt to sell Roxul and other competing products in non-exclusive territories,[15] Armstrong also signed exclusivity contracts with some direct purchasers.[16] Roxul alleges these steps allow Armstrong to raise its prices and now charge more than 5% over competitive prices despite an overall decline in sales volume in the ceiling tile market since 2011.[17]

II. Analysis

Roxul alleges Armstrong's exclusivity arrangements with building material distributors violates the Sherman Act[18] and Clayton Act,[19] Roxul alleges Armstrong unlawfully obtained and maintained a monopoly under *Section 2 of the Sherman Act*. In the alternative, Roxul argues Armstrong is attempting to monopolize **[*5]** the ceiling tile market in violation of *Section 2* of the Sherman Act. Roxul also alleges Armstrong engaged in concerted action in restraint of trade in violation of *Section 1 of the Sherman Act* and *Section 3 of the Clayton Act*. Finally, Roxul alleges Armstrong tortiously interfered with Roxul's business relations with building material distributors.

Armstrong moves to dismiss Roxul's complaint.[20] Armstrong challenges Roxul's definition of the ceiling tile market and argues we lack subject matter jurisdiction over foreign commerce in Canada. Armstrong argues Roxul failed to allege it holds monopoly power in the ceiling tile market. Armstrong argues its exclusivity arrangements with distributors are not anticompetitive because it has valid business justifications for exclusivity and it did not foreclose Roxul from a substantial portion of the ceiling tile market. Armstrong argues Roxul failed to plead antitrust injury. Finally, Armstrong argues Roxul failed to plead tortious interference with business relations because it did not

[18] *15 U.S.C. § 1, et seq.*

[19] *15 U.S.C. § 12, et seq.*

[20] In deciding a motion to dismiss under *Rule 12(b)(6)*, we accept all well-pleaded allegations in the complaint as true and draw all reasonable inferences in favor of the non-moving party, but we "are not compelled to accept unsupported conclusions and unwarranted inference, or a legal conclusion couched as a factual allegation." *Castleberry v. STI Group, 863 F.3d 259, 263 (3d Cir. 2017)* (quoting *Morrow v. Balaski, 719 F.3d 160, 165 (3d Cir. 2013))*. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face." *Edinboro Coll. Park Apartments v. Edinboro Univ. Found., 850 F.3d 567, 572 (3d Cir. 2017)* (quoting ***In re Vehicle Carrier Servs. Antitrust Litig., 846 F.3d 71, 79 n.4 (3d Cir. 2017))***. A claim satisfies the plausibility standard when the facts alleged "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Maiden Creek Assocs., L.P. v. United States DOT, 823 F.3d 184, 189 (3d Cir. 2016)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009))*. While the plausibility standard is not "akin to a 'probability requirement,'' there nevertheless must be more than a "sheer possibility that a defendant has acted unlawfully." *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929*). "Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility of entitlement to relief." *Id.* (quoting *Twombly, 550 U.S. at 557*).

Our court of appeals requires we apply a three-step analysis under a 12(b)(6) motion: (1) "it must 'tak[e] note of the elements [the] plaintiff must plead to state a claim;" (2) "it should identify allegations that, 'because they are no more than conclusions, are not entitled to the assumption of truth;" and, (3) "[w]hen there are well-pleaded factual allegations, [the] court should assume their veracity and then determine whether they plausibly give rise to an entitlement for relief." *Connelly v. Lane Constr. Corp., 809 F.3d 780, 787 (3d Cir. 2016)* (quoting *Iqbal, 556 U.S. at 675, 679)*.

identify a contract Armstrong interfered with or identify a prospective business relationship with necessary specificity.

A. Roxul fails to state a claim of antitrust [*6] violations based on foreign trade under the Foreign Trade Antitrust Improvements Act.

Armstrong challenges Roxul's definition of the relevant market as "the sale of suspended acoustical ceiling tiles . . . sold in the United States of America and Canada."[21] Armstrong specifically challenges Roxul including ceiling tile sales in Canada. Armstrong argues the Foreign Trade Antitrust Improvements Act ("Act")[22] prohibits our exercise of jurisdiction over foreign conduct under the Sherman Act.[23] Roxul alleges it sufficiently plead the "domestic commerce exception" to the Act.

The Sherman Act "shall not apply to conduct involving trade or commerce (other than important trade or commerce) with foreign nations."[24] But there are exceptions for conduct creating a "direct, substantial and reasonably foreseeable effect" on domestic trade or commerce, import trade or import commerce with foreign nations, or export trade or commerce with foreign nations.[25] The Act requires we determine the "geographical effect" of the alleged conduct.[26] The conduct at issue must also "have an effect of a kind that ***antitrust law*** considers harmful."[27] Stated differently, conduct involving foreign trade falls within the Sherman Act **[*7]** if the conduct has a "direct, substantial, and reasonably foreseeable effect" on domestic commerce and such effect gives rise to a claim under the Sherman Act. When the proffered anti-competitive conduct affects both customers outside the United States and within the United States but the adverse foreign effect "is independent of any adverse domestic effect," the domestic commerce exception does not apply and the Sheiman Act does not apply.[28] "The [Act] requires a plaintiff to allege that its claims were directly caused by the domestic effects of the conduct and not the foreign effects."[29] "Courts discussing the 'direct effects' requirements of the [Act] have recognized that 'direct effect' means that there must be an 'immediate consequence of the alleged anticompetitive conduct with no 'intervening developments.'"[30]

27 *F. Hoffmann-La Roche Ltd., 542 U.S. at 162*; *15 U.S.C. § 6a(2)*.

28 *F. Hoffmann-La Roche Ltd., 542 U.S. at 162*.

29 *In re Intel Corp. Microprocessor Antitrust Litig. v. Intel Corp., 452 F Supp. 2d at 561*.

30 *Id. at 560* (citation omitted).

Allegations of conduct resulting in a "ripple effect" on domestic commerce are insufficient to satisfy the domestic commerce exception.[31]

In *In re Intel Corp. Microprocessor Antitrust Litig. v. Intel Grp.*,[32] the plaintiff argued the defendant's anti-competitive conduct involving foreign commerce resulted in the plaintiff losing foreign sales and weakened the plaintiff as a domestic **[*8]** rival to the defendant.[33] The court found the plaintiff's argument insufficient to satisfy the "direct effects" standard.[34] The court described the alleged effect as speculative and found the plaintiff failed to identify how the foreign conduct resulted in a "substantial and direct domestic effect."[35] The court also discounted plaintiff's reliance on pleading it is an American company engaged in foreign commerce, as courts assess the geographical effect of foreign conduct as opposed to the location of the parties under the Act.[36]

Roxul fails to allege how foreclosure from the Canadian market because of Armstrong's exclusivity contracts directly, substantially, and foreseeably affects United States commerce. Foreclosure from the Canadian market certainly impacts Canadian commerce and consumers by limiting their choice and reducing competition in Canada, but Roxul fails to allege how reduced competition in Canada directly affects domestic commerce. Roxul argues its claim encompasses injury to competition in both the United States and Canada. We agree, as discussed below, Roxul has adequately alleged Armstrong's foreclosure of competition in the United States market impacted domestic commerce. **[*9]** But under the Act, Roxul must allege how the foreclosure from the Canadian market directly and substantially affected domestic commerce. Even if Roxul's allegations allowed for an inference the foreclosure from Canada impacted Roxul's foreign sales thereby impacting its profitability and resulting in lost opportunity to compete domestically with Armstrong, such effect would be speculative and insufficient to allege a direct effect on domestic commerce.[37] Based on the present pleading, we can only fairly conclude the effect from Armstrong foreclosing Roxul and other competing firms from the Canadian market is separate and independent from the effect Armstrong's conduct created in the United States market.

B. Roxul pleads monopolization under the Sherman Act.

Roxul alleges Armstrong unlawfully obtained and maintained monopoly power in the ceiling tile market through its exclusivity arrangements with building material distributors. Armstrong argues Roxul's allegations of Armstrong controlling at least 55 percent of the ceiling tile market is insufficient to plead monopoly power. Armstrong also argues its exclusivity arrangements are not anti-competitive and offers business justifications **[*10]** for the exclusive contracts. Armstrong argues Roxul fails to state a plausible antitrust injury because Roxul only seeks relief for injury to itself, not competition.

To plead monopolization under Section 2 of the Sherman Act, Roxul must allege "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition of maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident."[38]

"Monopoly power is the ability to control prices and exclude competition from the given market."[39] To support an inference of monopoly power, a plaintiff typically must plead "a firm has a dominant share in a relevant market, and that significant 'entry barriers' protect that market."[40] Absent other factors, our court of appeals has found a market share of 55% is typically insufficient to demonstrate *prima facie* monopoly power.[41] Other factors to consider to determine whether a firm holds monopoly power include, "the size and strength of competing firms, freedom of entry into the field, pricing trends and practices in the industry, ability of consumers to substitute comparable goods or services from outside the market, **[*11]** and consumer demand factors."[42] Whether a firm can charge "supracompetitive prices" is also relevant to determining monopoly power.[43]

Anti-competitive conduct under the second element includes "behavior that not only (1) tends to impair the opportunities of rivals, but also (2) either does not further competition on the merits or does so in an unnecessarily restrictive way."[44] We apply the rule of reason in assessing whether the use of exclusivity contracts is anticompetitive.[45] An exclusive dealing arrangement violates the rule of reason when the "probable effect' of the arrangement is to substantially lessen competition, rather than merely disadvantage rivals.",[46] Roxul must allege the exclusivity arrangement resulted in "substantial foreclosure" to the relevant market.[47] Foreclosure does not become substantial by pleading a particular fixed percentage and courts look to whether the exclusivity arrangement "bar[s] a substantial number of rivals or severely restricts the market's ambit."[48] "Exclusive dealing arrangements are of special concern when imposed by a monopolist."[49]

To plead antitrust injury, Roxul must allege it suffered the type of harm antitrust laws are intended **[*12]** to prevent and the injury flows "from that which makes the defendants' acts unlawful."[50]

Roxul plausibly pleads monopoly power. Roxul alleges Armstrong holds a market share "in excess of 55%."[51] Although an allegation of 55% alone may not be sufficient to allege monopoly power, Roxul alleges a high barrier of entry into the market and Armstrong's history of controlling prices despite an overall decrease in sales volume in the market.[52] Only three companies compete against Armstrong in the ceiling tile market.[53] Armstrong has raised its prices since 2011, despite an overall decrease in sales volume in the ceiling tile market.[54] Armstrong now charges 5% over competitive market prices.[55] Roxul alleges only a few distributors are capable of servicing companies the size of Roxul.[56] Regional and local distributors have consolidated with national distributors expanding the reach of the Armstrong exclusivity agreements.[57] Roxul alleges Armstrong's exclusivity agreements with key distributors prevented new competitors from entering the market and remaining competitive.[58] Viewing these facts favorably to Roxul as we must do at this stage, Roxul sufficiently alleges monopoly power.

Roxul plausibly **[*13]** pleads Armstrong's willful acquisition of monopoly power through exclusivity agreements resulting in anti-competitive conduct. Armstrong argues Roxul fails to plead substantial foreclosure in the ceiling tile market. Armstrong argues Roxul's claim the exclusivity arrangements with distributors resulted in a 65% foreclosure to the ceiling tile market is unsubstantiated. Armstrong argues under the facts alleged it can only theoretically foreclose at most its total market share — 55%. Armstrong narrows its argument on the percentage alleged but ignores the supporting facts. Roxul is not required to allege a specific foreclosure percentage and we analyze all the facts in the complaint to determine whether substantial foreclosure is alleged.[59]

Specialty building products distributors are a critical channel between manufacturers, like Armstrong and Roxul, and consumers.[60] Ceiling tile manufacturers sell about 85% of their ceiling tile product through these distributors.[61] Manufacturers rely on distributors because they are able to efficiently manage the "logistical complexity of distribution services."[62] Distributors also provide a wide range of products to best meet consumer needs such as walling, **[*14]** metal framing, grid systems necessary to install ceiling tiles, necessary tools for installation, and safety accessories.[63] Distributors also provide supplemental services such as logistical planning, same day delivery, product selection and installation expertise, and networking with local contractors.[64] Consolidation of distributors heightened the importance of ceiling tile manufacturers' maintaining relationships with the limited

[64] *Id.* at ¶ 32.

number of distributors.[65] Without access to distributors, manufacturers lack access to a viable distribution channel end-users rely upon to make ceiling tile purchases.[66]

The exclusivity agreements prohibit distributors from selling competitor ceiling tiles nationally or regionally, depending on the agreement.[67] Roxul also alleges Armstrong retaliates against distributors who violate the exclusivity provision by charging the distributors higher prices for its products, enforcing liquidated damages clauses, and choosing to stop supplying Armstrong ceiling tiles to the distributor.[68] Armstrong's exclusivity with distributors coupled with fear of retaliation for selling Roxul products forced distributors to stop carrying Roxul products.[69] Roxul sufficiently **[*15]** alleges Armstrong's exclusivity agreements and its retaliatory conduct foreclosed competition in the ceiling tile market.

Armstrong argues Roxul failed to allege substantial foreclosure because alternative channels of distribution allow Roxul to reach consumers. Armstrong cites to Roxul's allegations identifying direct buy contractors and big-box home improvement retailers as potential alternative distribution channels.[70] But Roxul alleges very few direct buy contractors exist because they lack the financial resources and expertise to establish the same value-added services specialty distributors provide.[71] Roxul alleges big-box retailers are unable to service most commercial projects because of their limited product selection and inability to provide supplemental services.[72] Roxul alleges these distribution channels are not viable options to reach ceiling tile consumers.[73] Armstrong also cites to Roxul's allegation architects "spec" or specify the brand of ceiling tile in 90% of interior construction projects.[74] Armstrong argues this allegation proves the selection of ceiling tile brand is "in the hands of the consumer." Armstrong argues Roxul could promote and sell its products to **[*16]** architects at the specification phase. But Armstrong ignores Roxul's allegation when contractors attempt to fulfill an architect's spec from exclusive distributors, the distributor attempts to change the Roxul spec to an Armstrong spec or faces the risk of retaliation from Armstrong.[75] We accept Roxul's allegations at this preliminary stage. Armstrong's factual defense regarding the availability and viability of alternative distribution channels is best reserved for summary judgment or trial.

Armstrong argues it has a valid business justification for entering into exclusivity agreements with distributors. Armstrong argues the pro-competitive effects of the exclusivity arrangements outweigh the anti-competitive effects. Armstrong argues its exclusivity arrangements encourage distributors to more aggressively market Armstrong products. Armstrong asserts exclusivity arrangements prevent "free riding on the substantial investments that manufacturers (like Armstrong) make with distributors to promote their own products."[76] Roxul alleges sufficient

facts outlining the anti-competitive effects the exclusivity arrangements have on the ceiling tile market.[77] Weighing pro-competitive **[*17]** and anti-competitive effects is best reserved for summary judgment or trial after the benefit of discovery.[78]

Armstrong argues Roxul fails to plead plausible antitrust injury because it does not allege Armstrong's conduct injured competition and Roxul's alleged harm is not casually connected to Armstrong's conduct. Contrary to Armstrong's argument, Roxul alleges harm to competition in the ceiling tile market. Roxul alleges the exclusivity arrangements between Armstrong and distributors foreclosed Roxul and other competitors from the ceiling tile market.[79] Armstrong's exclusivity arrangements have prevented possible competitors from entering the market and reduced consumer choice in the ceiling tile market.[80] Viewing the facts alleged favorably to Roxul, we allow for a reasonable inference the injury to competition is casually connected to Armstrong's exclusivity arrangements with building material distributors. Roxul adequately pleads antitrust injury. Roxul states a claim for monopolization under the Sherman Act.

C. Roxul pleads attempted monopolization under the Sherman Act.

Roxul alleges Armstrong's exclusivity deals are an unlawful attempt to monopolization under *Section 2 of the Sherman Act*. **[*18]** Armstrong raises the same arguments it raised to Roxul's monopolization claim: (1) Roxul has not alleged anticompetitive conduct and (2) Roxul has not alleged antitrust injury.

To state a claim for attempted monopolization under *Section 2 of the Sherman Act*, Roxul must allege "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) specific intent to monopolize and (3) a dangerous possibility of achieving monopoly power."[81] We consider many factors in determining whether a defendant has a dangerous probability of achieving monopoly power including the size of the defendant's market share, strength of competition, barriers to entry into the market, the nature of the alleged anticompetitive market, the elasticity of consumer demand, and the probable development of the relevant industry.[82] Determining whether there is a dangerous probability of achieving monopoly power is "a particularly fact intensive inquiry."[83] "Courts typically should not resolve this question at the pleading stage 'unless it is clear on the face of the complaint that the 'dangerous probability' standard cannot be met as a matter of law.'"[84]

As described earlier, Roxul adequately alleges anticompetitive **[*19]** conduct through exclusivity arrangements with distributors. The exclusivity arrangements foreclose competitors from accessing a significant portion of the ceiling tile market.[85] Roxul's allegations also allow for a reasonable inference Armstrong acted with the specific intent to monopolize. Armstrong pursued exclusivity arrangements with key distributors in the ceiling tile industry and have actively policed and enforced the exclusivity arrangements to the detriment of competition in the ceiling tile

market.[86] Roxul's sufficiently pleads monopoly power as discussed above, but in the alternative, Roxul also sufficiently pleads a dangerous probability of achieving monopoly power. Roxul alleges Armstrong's exclusivity arrangements prevent the entry of new competitors into the market, foreclose competitors from a significant portion of the market, and allow Armstrong to raise its prices despite an overall decrease in sales volume.[87] Only three firms compete against Armstrong in the ceiling tile market.[88] Roxul sufficiently pleads antitrust injury of foreclosure from a significant portion of the ceiling tile market. Roxul states a claim of attempted monopolization under *Section 2* of the Sherman Act.

D. Roxul pleads concerted action in restraint of trade under the Sherman Act and Clayton Act.

Roxul alleges Armstrong engaged in concerted action in restraint of trade with building material distributors in violation of *Section 1 of the Sherman Act* and *Section 3 of the Clayton Act*. *Section 1 of the Sherman Act* prohibits every contract or conspiracy in restraint of trade or commerce.[89] To state a claim under *Section 1* of the Sherman Act, Roxul must allege (1) the defendant was a party to a contract, combination or conspiracy and (2) the contract, combination or conspiracy imposed an unreasonable restraint on trade.[90] To plead an unreasonable restraint on trade, Roxul must allege the concerted action resulted in anticompetitive effects within the market.[91] *Section 3 of the Clayton Act* prohibits a firm from entering into exclusivity arrangements where the effect of such arrangement "may be to substantially lessen competition or tend to create a monopoly in any line of commerce."[92] To determine the legality of an exclusive dealing arrangement under the Clayton Act, we determine "whether the competition foreclosed constitutes a substantial share of the relevant market."[93] Roxul relies on the same theory asserted above: Armstrong's exclusivity **[*21]** arrangements foreclosed Roxul and other competing firms from a substantial portion of the ceiling tile market.

Armstrong raises the same arguments it raised in defense to Roxul's Sherman Act claims. These arguments fail today for the same reasons. Roxul sufficiently alleges a contractual arrangement between Armstrong and distributors creating an exclusive distribution relationship.[94] Roxul also sufficiently alleges the contracts created an unreasonable restrain on trade by foreclosing competitors from entering the market and foreclosing competitors from a substantial share of the ceiling tile market.[95] Roxul states a claim under *Section 1 of the Sherman Act* and *Section 3 of the Clayton Act*.

E. Roxul fails to plead tortious interference with business relationships under Delaware law.

[95] *Id.* at ¶¶ 66, 72-73, 75, 83.

Roxul claims Armstrong tortiously interfered with its business relations by entering into exclusivity arrangements with distributors and by prohibiting non-exclusive distributors from purchasing Roxul and other competitors ceiling tiles. Roxul claims Armstrong interfered with its existing and prospective business relationships. To the extent Roxul's claim is based on existing business relationships, Armstrong **[*22]** argues Roxul failed to allege the existence of a contract between Roxul and a distributor and failed to allege a breach of the contract. To the extent Roxul's claims is based on prospective business relations, Armstrong argues Roxul did not identify a specific party with which it held a prospective business relationship.

To state a claim for tortious interference with existing contractual relations, Roxul must allege "(1) a contract, (2) about which defendant knew, *and* (3) an intentional act that is a significant factor in causing the breach of such contract, (4) without justification, (5) which causes injury."[96] To state a claim for tortious interference with prospective business relations, Roxul must allege (1) the reasonable probability of business opportunity, (2) the intentional interference by the defendant with that opportunity, (3) proximate causation, and (4) damages.[97] To satisfy the first element, Roxul "must identify a specific party who was prepared to entered [sic] into a business relationship but was dissuaded from doing so by the defendant and cannot rely on generalized allegations of harm.'"[98] "While the plaintiff does not need to identify a party by name, the plaintiff must **[*23]** do more than offer 'vague statements about unknown customers.'"[99] "A plaintiff cannot plead this element by alleging a 'nebulous, unascertainable class' of business relationships."[100]

Roxul fails to state a claim for tortious interference with existing contractual relations. Roxul does not allege a contractual relationship between it and a distributor and does not allege Armstrong's interference resulted in the distributor breaching an agreement with Roxul. Roxul also fails to state a claim for tortious interference with prospective business relationships. Roxul fails to allege a reasonable probability of business opportunity. Roxul alleges Armstrong prohibited distributors from selling Roxul ceiling tile products.[101] To the extent these distributors sold Roxul products, interference with the distributors would not be interference with prospective relations. It is unclear from Roxul's allegations if distributors sought to sell Roxul ceiling tile products and Armstrong prevented these sales. Roxul cites its allegation upon information and belief "Building Products Distributors would prefer to carry multiple Ceiling Tile brands."[102] But Roxul does not allege facts supporting an inference of **[*24]** a single distributor prepared to enter into a business relationship with Roxul. These types of macro allegations suffice for our Sherman and Clayton Act analysis, but not under the elements of tortious interference under Delaware law. We are aware of no exception to tortious interference law in the anti-competitive context. Roxul fails to state a claim for tortious interference with prospective business relations.

III. Conclusion

Roxul adequately pleads Armstrong's exclusivity arrangements in the United States' suspended acoustical ceiling tile market violate the Sherman Act and Clayton Act. Armstrong's fact defenses are best reserved for summary judgment or trial. We dismiss Roxul's claim for antitrust violations to the extent Roxul bases its claim on foreign

Opinion

[*660] MEMORANDUM OPINION

This matter is before the Court on DEFENDANT JELD-WEN, INC.'S MOTION FOR PARTIAL SUMMARY JUDGMENT ON COUNTS I AND IV OF PLAINTIFF STEVES AND SONS, INC.'S COMPLAINT (ECF No. 375). For **[*661]** the reasons set forth below, the motion was denied, except on the issue of future lost profits damages under Count One, as to which the Court ordered further briefing. See ECF No. 578. The Court has considered that briefing in the context of JELD-WEN, Inc.'s ("JELD-WEN") motion for judgment as a matter of law on the future lost profits damages claim at trial, after Steves and Sons, Inc. ("Steves") had put on its fact witnesses. Accordingly, only the ripeness of that **[**3]** claim, and not its validity, is addressed in this opinion.

BACKGROUND

A. Factual Background

1. Pre-2012 Interior Molded Doorskin Market

Steves and JELD-WEN are both participants in the interior molded doorskin market in the United States. That type of doorskin is used to make interior molded doors, which are built to resemble solid wood doors at a much lower cost. Interior molded doorskin manufacturers create and ship doorskins to assembly plants, where molded door manufacturers use the doorskins to build door slabs that are then sold to retailers or distributors. Steves is an independent door manufacturer that is currently unable to produce its own doorskins, and has never done so. As a result, it must purchase doorskins from doorskin manufacturers. JELD-WEN, however, is a vertically integrated door manufacturer, meaning that it both produces doorskins and uses those doorskins internally to manufacture and sell finished doors.

Before 2012, Steves and other independent door manufacturers purchased interior molded doorskins from three main suppliers: JELD-WEN, CraftMaster Manufacturing, Inc. ("CMI"),[1] and Masonite.[2] Like JELD-WEN, CMI and Masonite were both vertically integrated manufacturers **[**4]** of interior molded doorskins and doors.

2. Execution of Supply Agreement

On May 1, 2012, Steves and JELD-WEN entered into a long-term supply agreement ("the Supply Agreement"), pursuant to which Steves would purchase, inter alia, interior molded doorskins from JELD-WEN. EOF No. 379-2 (Under Seal) § 1; JELD-WEN's Statement of Undisputed Material Facts (ECF No. 379) (Under Seal) ("Def. SUMF") ¶ 1. The Supply Agreement would be in effect through December 31, 2019, but would automatically renew for a successive seven-year term at that time unless either party terminated the contract. Supply Agreement § 2. The Agreement further provided that Steves could terminate it for any reason upon two-year written notice to JELD-

---

[1] CMI came into existence following the merger of Masonite and Premdor in 2002. After the Department of Justice ("DOJ") filed suit to block the merger, the parties entered into a consent decree allowing the merger on the condition that Masonite divest its Towanda plant, which CMI subsequently purchased.

[2] JELD-WEN argues that the Court should not consider this fact and others referenced in this section because Steves presented them in narrative format, in violation of *Local Rule 56(B)*. See *Integrated Direct Mktg., LLC v. May, 129 F. Supp. 3d 336, 344-46 (E.D. Va. 2015)* (refusing to consider new facts presented in narrative format in oppositions to motions for summary judgment because oppositions did not specifically state which undisputed material facts in motions were disputed). But Steves' opposition, besides stating narrative facts, specifically disputes or agrees to all of JELD-WEN's purportedly undisputed material facts. Moreover, JELD-WEN included an appendix to its reply disputing the narrative facts in Steves' opposition. Therefore, unlike in *Integrated Direct Marketing,* it is fairly easy to discern which facts are disputed and which are not.

WEN, and that JELD-WEN could likewise terminate it without cause upon seven-year **[*662]** written notice to Steves. Id. § 3(a)(2)(b); Def. SUMF ¶ 2; Steves' Statement of Additional Material Facts (ECF No. 452) (Under Seal) ("Pl. SAMF") ¶ 4.

Under the Supply Agreement, Steves had to purchase at least 80% of its interior molded doorskin requirements from JELD-WEN. Pl. SAMF ¶ 2. Steves could, however, purchase any quantity of doorskins from another supplier that offered a price **[**5]** at least 3% lower than JELD-WEN's purchase price, after JELD-WEN had the chance to match that lower price. Id. ¶ 3; Supply Agreement § 4. The prices that JELD-WEN would charge Steves for doorskins were variable and were calculated using a formula based on JELD-WEN's key input costs. Supply Agreement § 6(c). In addition, the contract obligated JELD-WEN to provide Steves with doorskin products of satisfactory quality. Id. § 8. Finally, if any disputes arose under the Agreement, the parties were required to participate in an alternative dispute resolution process before initiating litigation. That process began with an internal conference between the parties' senior executives, and then mediation if the conference was unsuccessful. Id. § 10.

3. JELD-WEN's Acquisition of CMI

On June 15, 2012, JELD-WEN and CMI announced that JELD-WEN was acquiring CMI and merging CMI's operations and assets into JELD-WEN ("the CMI Acquisition"), pending due diligence and the signing of a definitive agreement. Def. SUMF ¶ 14. Although Steves knew before it executed the Supply Agreement that JELD-WEN was planning to purchase CMI, Steves and JELD-WEN did not condition the effectiveness of that contract on the occurrence or **[**6]** non-occurrence of the merger. Steves was aware at that time that the Acquisition would reduce the U.S.-based doorskin manufacturers to only JELD-WEN and Masonite. Id. ¶¶ 16-18.

On July 17, 2012, the DOJ's Antitrust Division notified JELD-WEN that it had opened a preliminary investigation into the proposed CMI Acquisition. Steves indicated to the DOJ that it did not oppose the merger. The Antitrust Division closed its investigation on September 28, 2012 without having taken any action to prevent the CMI Acquisition. Id. ¶¶ 19-21. The Acquisition was then completed on October 24, 2012. Id. ¶ 15.

Following the merger, JELD-WEN closed the head office of CMI in Chicago, as well as two of CMI's four door manufacturing plants, and transitioned CMI's sales staff into JELD-WEN's organizational structure. JELD-WEN also shut down its own doorskin manufacturing plants in Iowa and North Carolina. In addition to those broader changes, JELD-WEN consolidated the JELD-WEN and CMI doorskin dies into one portfolio, retired more than one hundred obsolete dies, and reduced the number of doorskin designs from 31 to 19. Id. ¶¶ 33-41.

JELD-WEN also acquired CMI's Towanda plant. JELD-WEN subsequently constructed **[**7]** a $1.6 million paint plant inside that building, and JELD-WEN's MiraTec and Extira products are now manufactured at the Towanda plant. Id. ¶¶ 42-43. The effect of this consolidation of operations at the Towanda plant is disputed. JELD-WEN contends that it cannot physically separate the manufacturing lines for the MiraTec and Extira products from the doorskin manufacturing lines that are also at the Towanda plant, id. ¶ 44, but Steves points to evidence that JELD-WEN has not conducted an extensive analysis of the effects of a divestiture order with respect to the plant, Pl. SAMF ¶¶ 37, 39.

4. Post-Merger Interactions Between Steves and JELD-WEN

After the merger, JELD-WEN's key input costs declined, and have continued to **[*663]** do so in most years since then. The parties disagree about whether these declining costs are the result of JELD-WEN having acquired the low-cost Towanda plant, or whether the input costs for JELD-WEN's "legacy" plants would have declined notwithstanding the CMI Acquisition. Id. ¶ 5. Despite these declining costs, however, Steves claims that JELD-WEN has increased the prices it charges Steves to purchase doorskins under the Supply Agreement. Id. ¶ 7. Steves also highlights **[**8]** documents indicating that JELD-WEN might have imposed price increases for certain doorskins that JELD-WEN believed were outside the scope of the Supply Agreement.

Some JELD-WEN employees also acknowledged quality problems with the company's doorskins after the CMI Acquisition, and Steves complained to JELD-WEN about the declining quality of the doorskins. Id. ¶¶ 10-11. Moreover, Steves cites evidence that JELD-WEN made it more difficult after the merger for external customers, such as Steves, to return defective products. It is unclear, however, whether these problems were caused by the CMI Acquisition. Indeed, JELD-WEN began internal testing of thinner doorskins in early 2012, and informed Steves before the Acquisition was consummated that it had reduced the target thickness of its doorskins. Def. SUMF ¶¶ 10-11.

The acrimony between Steves and JELD-WEN peaked in July 2014 when, according to Steves, JELD-WEN demanded that Steves agree to a new pricing structure for the Supply Agreement, including a "capital charge"—an 11% increase in the price of doorskins. JELD-WEN asserts that it never made this demand, noting that Steves has never paid any capital charge under the Agreement. Id. ¶ **[**9]** 8. In any event, shortly thereafter, on September 10, 2014, JELD-WEN provided Steves with notice of termination of the Supply Agreement. Consequently, the Agreement will terminate on September 10, 2021. Id. ¶¶ 3-4.

The parties present conflicting evidence about JELD-WEN's interest in continuing to sell doorskins to Steves after that date. Steves claims that JELD-WEN has refused to provide Steves with any proposal for terms of a new long-term supply agreement, but JELD-WEN insists that it has told Steves it is interested in negotiating future doorskin sales after 2021. Notwithstanding this dispute, the parties agree that JELD-WEN has supplied doorskins to Steves since giving notice of termination. Id. ¶ 5.

5. Steves' Efforts to Obtain Alternative Doorskin Supply

After JELD-WEN notified Steves that it would terminate the Supply Agreement, Steves began to explore ways to produce or acquire interior molded doorskins without relying on JELD-WEN. Id. ¶ 32. One other supplier that Steves considered was Masonite. However, in July 2014, Masonite announced that it would no longer sell doorskins to third parties. Whether Masonite is, or ever was, amenable to selling doorskins to Steves at reasonable **[**10]** prices is highly disputed. Steves points to documents indicating that, after the merger, Masonite has not entered into long-term supply agreements with any third-party customers; will not negotiate the price of its doorskins; limits external sales of doorskins to customers or products with which Masonite does not compete; cannot sell Steves enough doorskins to meet Steves' needs; and has only offered Steves doorskins at prices much higher than prices Masonite offered in 2012, or prices JELD-WEN charged under the Supply Agreement in 2015. Pl. SAMF ¶¶ 16-22. JELD-WEN, however, claims that some evidence indicates that Masonite would sell **[*664]** doorskins to Steves at standard prices; that Masonite has sold doorskins to external customers from 2010 to 2016; and that Steves has not determined whether the 2015 prices that Masonite quoted to Steves would be unprofitable for Steves. Def. SUMF ¶¶ 27-31.

Steves has also pursued relationships with foreign doorskin suppliers like Teverpan, Kastamonu, and Yildiz, although it is unclear whether those suppliers can provide Steves with the quantity and range of doorskins that Steves requires. Negotiations with those suppliers are at various stages. Pl. SAMF **[**11]** ¶¶ 24-27. Some evidence indicates that Steves could obtain doorskins from Teverpan at prices more than 3% lower than those JELD-WEN charges under the Supply Agreement, but other evidence suggests that the quality of doorskins from foreign suppliers is inadequate to satisfy Steves.

Finally, Steves has considered becoming vertically integrated by building its own doorskin manufacturing plant. The parties disagree about how long this process might take. JELD-WEN highlights evidence indicating that the timeline is closer to two years, and Steves has presented evidence showing that three to four years is a more realistic estimate. In any event, Steves has not yet identified a partner to help it build any manufacturing facility. Id. ¶ 29.

6. Initiation of Alternative Dispute Resolution Process

In January 2015, consistent with the Supply Agreement, Steves requested an affidavit from JELD-WEN supporting its announced price increases. Id. ¶ 33. Then, in March 2015, Steves demanded an internal conference to resolve its dispute with JELD-WEN over doorskin pricing and quality issues. When no resolution was reached, the parties participated in mediation, and then entered into a standstill agreement **[**12]** regarding Steves' claims under the Supply Agreement and "the antitrust laws." Even after mediation, the parties continued settlement discussions, and agreed to four extensions of the standstill agreement between September 2015 and April 2016. Id. ¶¶ 34-36.[3] However, that agreement did not at any point explicitly prevent Steves from filing an antitrust claim. Def. SUMF ¶ 26.

B. Procedural Background

Following the failure of the parties' required dispute resolution process, Steves initiated this action on June 29, 2016, asserting antitrust and contract claims against JELD-WEN related to the CMI Acquisition and JELD-WEN's alleged breach of the Supply Agreement. Complaint (ECF No. 5) (Under Seal). The Complaint contained the following claims: COUNT ONE, a claim under the Clayton Act, *Section 7*, *15 U.S.C. § 18*; COUNT TWO, Breach of Contract; COUNT THREE, Breach of Warranty; COUNT FOUR, Declaratory Judgment, concerning certain rights under the Supply Agreement and the putative termination of that contract; COUNT FIVE, Specific Performance, regarding the Supply Agreement; **[*665]** and COUNT SIX, Trespass to Chattels.[4] Id. ¶¶ 175-206. Count One sought two forms of relief. It primarily requested injunctive relief pursuant **[**13]** to *Section 16* of the Clayton Act, *15 U.S.C. § 26*, to force JELD-WEN to divest assets sufficient to: (1) create a doorskin manufacturer with the same market significance that CMI had before the Acquisition; or (2) restore the interior molded doorskin market to its competitive state before the CMI Acquisition. Alternatively, Steves sought treble damages pursuant to *Section 4* of the Clayton Act, *15 U.S.C. § 15*, for injuries suffered by Steves as a result of the anticompetitive effects of the CMI Acquisition, including JELD-WEN's refusal to sell doorskins to Steves at prices consistent with the Supply Agreement and JELD-WEN's termination of the contract. Id. ¶¶ 177-78.

On August 5, 2016, JELD-WEN moved to dismiss Count One for failure to state a claim. ECF No. 20. The Court denied that motion on October 21, 2016, concluding that the Complaint plausibly alleged that the CMI Acquisition violated Section 7 by causing higher doorskin prices, lower doorskin quality, reduced doorskin output, and increased coordination between JELD-WEN and Masonite, and that these anticompetitive effects impacted both Steves and the broader doorskin market. ECF No. 64. At a pretrial conference on October 19, 2016, the matter was set for trial to begin on June 12, 2017, **[**14]** and a detailed schedule for the conduct of pretrial proceedings was thereafter implemented. ECF No. 65. Pursuant to that schedule, the parties engaged in extensive discovery.

On March 27, 2017, JELD-WEN sought leave to amend its Answer and to add counterclaims against Steves based on JELD-WEN's recent detection, from documents produced by Steves during discovery, of "Steves' theft of JELD-WEN trade secrets and confidential information." ECF No. 101 at 1-2. In relevant part, the counterclaims alleged that Steves and two former JELD-WEN employees, John Pierce and John Ambruz ("Ambruz"), had engaged in a conspiracy to steal trade secrets from JELD-WEN concerning how to build and operate a doorskin plant that could produce the type of doorskins that Steves was buying from JELD-WEN under the Supply Agreement. Although the Court granted JELD-WEN leave to assert the counterclaims, the Court also ordered that they be tried separately from the antitrust and contract claims. ECF Nos. 239-240. Trial for the counterclaims is set to begin on April 9,

---

[3] JELD-WEN disputes these facts solely on the basis that they are inadmissible at trial because they reflect confidential settlement communications. See *Fed. R. Evid. 408(a)(2)*. But even if this evidence concerns a "disputed claim" within the scope of *Rule 408*, Steves may offer this evidence at trial for purposes other than "prov[ing] or disprov[ing] the validity or amount" of that claim, or impeaching one of JELD-WEN's witnesses. Id. *408(a)*. The Court already recognized as much in denying JELD-WEN's related motion in limine. ECF No. 779. Thus, it is not true that this evidence "cannot be presented in a form that would be admissible in evidence," *Fed. R. Civ. P. 56(c) (2)*, so the Court can consider those facts here.

[4] On October 2, 2017, the Court dismissed Count Six as moot after Steves notified the Court that it would not persist with that claim. ECF No. 409. All other claims remain here.

2018, and the parties are proceeding on a separate pretrial schedule for that case. ECF No. 374. Those counterclaims are not relevant to the Court's **[**15]** decision on summary judgment here.

After completing discovery, Steves and JELD-WEN both moved for summary judgment on September 22, 2017. Steves sought a ruling from the Court that it had established its prima facie case under Count One that the CMI Acquisition is likely to have anticompetitive effects in the interior molded doorskin market. ECF No. 381. The Court denied Steves' motion on November 21, 2017, based on the Court's finding at oral argument that there were genuine disputes of material fact as to whether Steves had satisfied the elements of its prima facie case. ECF No. 575.

JELD-WEN sought summary judgment on Count One, as to both the divestiture claim and the claim for future lost profits damages caused by the CMI Acquisition, **[*666]** and Count Four. On November 27, 2017, the Court denied JELD-WEN's motion to the extent it sought summary judgment on Count One's divestiture claim and Count Four, for reasons to be explained in a forthcoming memorandum opinion. ECF No. 578. However, the Court ordered the parties to submit supplemental briefs on the question of whether JELD-WEN was entitled to summary judgment on Steves' future lost profits damages claim under Count One. ECF Nos. 574, **[**16]** 578.

Shortly thereafter, on December 1, 2017, JELD-WEN notified the Court that Steves had recently produced to JELD-WEN more than two hundred pages of handwritten notes of Gregory Wysock ("Wysock"), a Steves employee whose testimony is relevant to certain aspects of Steves' claims. ECF No. 603. After allowing JELD-WEN to conduct a supplemental deposition of Wysock, the Court granted JELD-WEN's request to conduct limited additional discovery of Wysock, Sam Steves II, and Ambruz based on information obtained during that deposition. The Court also amended the briefing schedule for the supplemental briefs as to Steves' future lost profits damages claim under Section 7, to allow the parties to include evidence from Wysock's deposition and recently-produced notes. ECF No. 732. As a result, JELD-WEN's motion for summary judgment did not become ripe for decision on all issues contained therein until January 9, 2018.

The Court then heard further argument on the future lost profits damages claim at the Final Pretrial Conference on January 22 and 26, 2018. It did not, however, decide whether summary judgment should be granted on that claim before trial commenced. Instead, the Court allowed Steves to present **[**17]** evidence at trial to attempt to establish a factual predicate upon which the jury could determine the fact and amount of the future lost profits damages with reasonable certainty. On February 6, 2018, after Steves had introduced that evidence but before its damages expert presented his future lost profits damages estimates, JELD-WEN moved for a judgment under *Federal Rule of Civil Procedure 50(a)* on the future lost profits claim—effectively converting its motion for summary judgment on that issue to a motion for judgment as a matter of law. The Court denied that motion, but its reasons for doing so are irrelevant here. In any event, having entertained Steves' trial evidence about future lost profits damages, the Court will not consider in this opinion whether summary judgment on that claim would have been appropriate.

DISCUSSION

I. Legal Standard

Under *Fed. R. Civ. P. 56*, a court "shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. *Rule 56* requires the entry of summary judgment "after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential **[**18]** to that party's case, and on which that party will bear the burden of proof at trial." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. For a court to enter summary judgment, "there can be no genuine issue as to any material fact, since a complete failure of proof concerning an essential element of the nonmoving party's case renders all other facts immaterial." *Id. at 323* (internal quotations omitted).

When reviewing a motion for summary judgment, a court must interpret the facts and any inferences drawn therefrom in the light most favorable to the nonmoving party. **[*667]** See *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*; *Lee v. Town of Seaboard, 863 F.3d 323, 327 (4th Cir. 2017)*. To successfully oppose a motion for summary judgment, the nonmoving party must demonstrate to the court that there are specific facts that would create a genuine issue for trial. See *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 250, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. However, "'[c]onclusory or speculative allegations do not suffice' to oppose a properly supported motion for summary judgment, 'nor does a mere scintilla of evidence.'" *Matherly v. Andrews, 859 F.3d 264, 280 (4th Cir. 2017)* (quoting *Thompson v. Potomac Elec. Power Co., 312 F. 3d 645, 649 (4th Cir. 2002))*. "Where . . . the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, disposition by summary judgment is appropriate." *United States v. Lee, 943 F.2d 366, 368 (4th Cir. 1991)*.

II. Count One

JELD-WEN seeks summary judgment on Count One on three grounds. First, it contends that Steves has not suffered any antitrust injury from **[**19]** the CMI Acquisition that is separate from the contract injury caused by JELD-WEN's alleged breach of the Supply Agreement. Moreover, JELD-WEN says, even if its breach of contract could have caused cognizable antitrust harm, Steves has not shown that any anticompetitive effects of the Acquisition impacted Steves by forcing it to pay higher prices or receive lower quality doorskins. Second, JELD-WEN asserts that Steves' claim for future lost profits damages is not ripe because those damages are based on speculation about future antitrust injury. Alternatively, those future damages depend on the occurrence of certain future events and are thus entirely speculative. Third, Steves' divestiture claim is barred by the doctrine of laches and because Steves cannot show a significant threat of antitrust injury.

A. Antitrust Injury and Impact

"[A]ny person . . . injured in his business or property by reason of anything forbidden in the antitrust laws" can assert a private damages claim under *Section 4* of the Clayton Act. *15 U.S.C. § 15(a)*. To prevail on that claim, the plaintiff must demonstrate three elements: (1) violation of the ***antitrust law***, (2) direct injury to the plaintiff from such violation, and (3) damages sustained **[**20]** by the plaintiff. *Windham v. Am. Brands, Inc., 565 F. 2d 59, 65 (4th Cir. 1977)*. The "gravamen" of a *Section 4* claim is not the antitrust violation itself, but rather the subsequent "individual injury." Id. Furthermore, the injury proven must be "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. In other words, "[t]he injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Id.*

1. Existence of Antitrust Injury

JELD-WEN's first argument is that Steves' injuries do not satisfy the Brunswick definition of antitrust injury because those harms arose under the Supply Agreement, not because of any reduced competition from the CMI Acquisition. JELD-WEN compares this case to others in which courts rejected *Section 4* claims based on injuries that were linked to defendant's breach of an existing contract between the parties. See, e.g., *Orion Pictures Distribution Corp. v. Syufy Enters., 829 F.2d 946, 949 (9th Cir. 1987)* (movie theater owner's repudiation of guarantees owed to film distributor by contract, after owner acquired competitor, was not antitrust **[*668]** injury because "[owner]'s duties to [distributor] were fixed by its contractual commitment to pay guarantees," so "competition was no longer a factor in determining **[**21]** [owner]'s obligation to [distributor]"). Noting that the parties entered into the Supply Agreement five months before the CMI Acquisition closed, JELD-WEN argues that, as in those cases, Steves' injuries (JELD-WEN's price increases under the Supply Agreement and its refusal to reimburse Steves for claims of defective doorskins) stem from the contract rather than as a consequence of the lessening of competition as a result of the CMI Acquisition.

This argument mischaracterizes Steves' *Section 4* claim and ignores key differences between this case and those cited by JELD-WEN. As JELD-WEN acknowledges, contractual harm can still constitute antitrust injury even if the parties' actions are bound by a contract. The relevant question is not whether the contract itself predated the anticompetitive effects at issue, but instead whether "the only competition alleged to be injured predated" the anticompetitive activity. *Z Channel Ltd. P'ship v. Home Box Office, Inc., 931 F.2d 1338, 1342 (9th Cir. 1991)* (emphasis in original). In Orion Pictures, there was no antitrust injury because "the injury to competition in that case (allegedly acquiring monopoly power) had ended before the . . . injury (loss of revenue from the broken contract) occurred." *Id. at 1345 n.10*. Here, by contrast, competition was not **[**22]** eliminated by the time that the doorskin pricing and quality injuries occurred. To the contrary, Steves asserts that the Supply Agreement contained provisions intended to preserve competition: for instance, the requirement that Steves purchase only 80% of its doorskins from JELD-WEN, or the allowance of purchases from other suppliers if JELD-WEN could not match their low prices. Consequently, breaches of the Supply Agreement can also be considered antitrust injuries to the extent that they resulted from the reduced competition under that contract that was facilitated by the CMI Acquisition.

Steves has produced sufficient evidence to create a genuine dispute of fact on this issue. It has shown at least that the Acquisition may have allowed JELD-WEN to raise prices under the Supply Agreement or provide lower quality doorskins because the merger undercut Steves' ability to seek favorable prices or higher-quality doorskins from other suppliers. JELD-WEN claims that there is no evidence to support these theories, but the post-merger availability of alternate supply—from either Teverpan or Masonite, both of which JELD-WEN focuses on—is a subject of intense dispute. In addition, Steves has **[**23]** presented evidence indicating that the merger permitted JELD-WEN to raise prices on Madison and Monroe doorskins, to coordinate with Masonite to limit doorskin supply to the market, and to terminate the Supply Agreement in September 2014 because of JELD-WEN's enhanced market power. A jury could conclude that these steps were "anticompetitive acts made possible by the [CMI Acquisition]." See *Brunswick, 429 U.S. at 489*. As a result, even if is not extensive, this evidence raises a genuine dispute about whether Steves has suffered an antitrust injury.

2. Impact from Anticompetitive Effects
