According to Fery, Plaintiffs and the Barcodes Enterprise are seeking to "curtail all sales of ID products on Amazon Marketplace" to maintain monopoly power. (*Id.* ¶¶ 24, 30.) In that regard, Fery appears to allege that Plaintiffs are seeking to limit competition in general and competition with Fery in particular. As to competition in general, Fery asserts that Plaintiffs are "covertly urging Amazon customers'"—in breach of their contract with Amazon—"'to divert their purchases from the Amazon Marketplace to the various Barcodes Enterprise's websites on Google." (*Id.*) As to Fery in particular, Fery asserts that Plaintiffs made "disparaging allegations to manufacturers that Fery's sales on the Amazon Marketplace were illegal[]" and brought the "present frivolous allegations against Fery in this Court." (*Id.* ¶¶ 26, 28.) With respect to the disparagement allegations, "Fery alleges, on information and belief, that at least one manufacturer, refused to make sales to Fery, after having previously done so, because the Barcodes Enterprise induced it to refrain from such dealing." (*Id.* ¶ 27.)

Based on these allegations, Fery asserts four counterclaims against Plaintiffs: three antitrust **[*4]** claims under Section 2 of the Sherman Act for attempted monopolization, monopolization, and conspiracy to monopolize; and one claim for tortious interference with existing business relations. (*Id.* ¶¶ 31-67.) On October 16, 2020, Plaintiffs moved to dismiss the counterclaims for failure to state a claim.

II. LEGAL STANDARD

HN1[] A district court conducts a three-part analysis when considering a motion to dismiss for failure to state a claim pursuant to Rule 12(b)(6). Malleus v. George, 641 F.3d 560, 563 (3d Cir. 2011). "First, the court must "tak[e] note of the elements a plaintiff must plead to state a claim.'" *Id.* (alteration in original) (quoting Ashcroft v. Iqbal, 556 U.S. 662, 675, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)). Second, the court must accept as true all of the plaintiffs well-pleaded factual allegations and construe the complaint in the light most favorable to the plaintiff. Fowlerv.

---

[1] The parties are familiar with the factual and procedural history of this matter and therefore the Court recites only those facts necessary to resolve the instant motion. *See* AlphaCard Sys. LLC v. Fery LLC, No. 19-20110, 2020 U.S. Dist. LEXIS 147059, 2020 WL 4736072 (D.N.J. Aug. 14, 2020).

[2] Referring to them collectively as the Barcodes Enterprise, Fery indicates that Plaintiffs and four other nonparty entities are subsidiaries of nonparty Barcodes, which in turn is controlled by nonparty Odyssey Investment Partners, LLC. (Countercls. ¶¶ 1-9, 15.)

UPMC Shadyside, 578 F.3d 203,210 (3d Cir. 2009) (citing Iqbal, 556 U.S. at 678). The court, however, may ignore legal conclusions or factually unsupported accusations that merely state "the-defendant-unlawfully-harmed-me." Iqbal, 556 U.S. at 678 (citing Bell Atl Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)). Finally, the court must determine whether "the facts alleged in the complaint are sufficient to show that the plaintiff has a "plausible claim for relief."' Fowler, 578 F.3d at 211 (quoting Iqbal, 556 U.S. at 679). A facially plausible claim "allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id. at 210 **[*5]** (quoting Iqbal, 556 U.S. at 678). On a 12(b)(6) motion, the "defendant bears the burden of showing that no claim has been presented." Hedges v. United States, 404 F.3d 744, 750 (3d Cir. 2005) (citation omitted).

III. DISCUSSION

A. Antitrust Claims

Plaintiffs raise multiple challenges to Fery's antitrust claims, but the Court need only address one of those arguments at this time: whether Fery adequately pled antitrust injury. Specifically, Plaintiffs argue that Fery's antitrust claims should be dismissed because Fery failed to allege an injury that impacted the overall competitive market. (Pls.' Moving Br. 7-10, ECF No. 39-1.) The Court agrees.

HN2[] "Competition is at the heart of the antitrust laws[.]" Phila. Taxi Ass'n, Inc. v. Uber Techs., Inc., 886 F.3d 332,338 (3d Cir. 2018). "Antitrust laws are only aimed at curtailing anticompetitive conduct, 'or a competition-reducing aspect or effect of the defendant's behavior.'" Pfizer Inc. v. Johnson & Johnson, 333 F. Supp. 3d 494, 501 (E.D. Pa. 2018) (quoting Phila. Taxi Ass'n, 886 F.3d at 338). Stated differently, "the underlying principle of our antitrust laws is to protect competition, not competitors." *Id.* (citing Phila Taxi Ass n, 886 F.3d at 338).

"The law therefore establishes antitrust injury as a common pleading requirement for antitrust plaintiffs." *Id.* (citing in part Brunswick Corp. v. Peublo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)). An antitrust injury is an "injury of the type the antitrust laws were intended to prevent and that flow from that which makes defendants' acts unlawful." Brunswick, 429 U.S. at 489. "Under this requirement, [a party] "must allege harm to competition, not just harm to its own business' to **[*6]** adequately plead antitrust injury." Pfizer, 333 F. Supp. 3d at 502 (citations omitted). "This standard, on a motion to dismiss, requires an antitrust plaintiff to allege facts capable of supporting a finding or inference that the purported anticompetitive conduct produced increased prices, reduced output, or otherwise affected the quantity or quality of the product." *Id.* (citations omitted).

Here, Fery fails to adequately plead antitrust injury because it only alleges injury to itself, not to competition in the relevant market. According to the counterclaims, Fery was injured by Plaintiffs' alleged anti-competitive conduct because Fery lost at least one supplier due to Plaintiffs' "disparaging allegations" and because Fery has been forced to defend against Plaintiffs' "baseless litigation." (Countercls. ¶¶ 26-29.) The counterclaims fail, however, to address how Plaintiffs' alleged anti-competitive conduct negatively impacted the overall competitive market by, for example, increasing prices, reducing output, or otherwise affecting the quantity or quality of the products offered for sale to the market. Pfizer, 333. F. Supp. 3d at 502. Indeed, in each of its three antitrust claims, Fery only asserts that "*Fery has sustained the type of injury* that **[*7]** the antitrust laws were intended to prevent and that which flows from the anticompetitive and exclusionary characteristics that makes [Plaintiffs] and the Barcodes Enterprise's conduct unlawful." (Countercls. ¶¶ 37, 48, 56 (emphasis added).) In short, Fery's counterclaims fail to adequately allege that Plaintiffs' alleged conduct had an anti-competitive impact in the "ID Products market."

Fery's opposition brief highlights its failure to properly plead injury to the overall competitive market. There, Fery recounts some of Plaintiffs' alleged anti-competitive conduct but nevertheless fails to adequately address how that conduct had a wider impact on the competitive market. (*See* Fery Opp'n Br. 8-9, ECF No. 41.) Moreover, for the first time—without citation to its counterclaims—Fery vaguely alleges that Plaintiffs' "conduct allegedly affected prices generally[.]" (*Id.* at 8.) ***HN3***[] It is axiomatic, however, that pleadings "may not be amended by the briefs in opposition to a motion to dismiss." *Pa. ex rel. Zimmermanv. PepsiCo, Inc., 836 F.2d 173, 181 (3d Cir. 1988)* (citation omitted). Nor can Fery's assertion that *Plaintiffs* "have historically charged prices above competitive levels for their products" support an inference that such a pricing scheme damaged competition. **[*8]** (*See* Countercls. ¶ 18.) ***HN4***[] "[A] competitor cannot suffer antitrust injury from its rival's charging higher prices" because "competitors have only to gain from their rivals' higher pricing schemes." *The Treasurer, Inc. v. Phila. Nat 7 Bank, 682 F. Supp. 269, 272 n.2 (D.N.J. 1988)* (citing *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*).

Moreover, Fery's conclusory assertion that Plaintiffs have "exclud[ed] market entrants" is insufficient to state an antitrust injury. (Fery Opp'n Br. 8 (citing Countercls. ¶ 30).) ***HN5***[] It is well established that the Court may ignore legal conclusions or factually unsupported accusations that merely state "the-defendant-unlawfully-harmed-me." *Iqbal, 556 U.S. at 678*. In its pleadings, Fery provides no factual allegations to support its claim that Plaintiffs excluded market entrants.[3] In fact, Fery's own description of the Amazon Marketplace suggests that no market entrants have been excluded from the purported relevant market. (*See, e.g.*, Countercls. ¶ 23 ("Selling through the Amazon Marketplace is a uniquely efficient distribution channel for new entrants into any market, including the ID products market, and is the best means for market entrants who do not have established, free-standing websites able to compete with the Barcodes Enterprise in the sale of those products.").)

On these facts, the Court finds **[*9]** that Fery failed to adequately plead an antitrust injury and, accordingly, grants Plaintiffs' Motion to Dismiss Fery's antitrust claims—counterclaims one through three. *See* *Phila, Taxi Ass 'n, 886 F.3d at 344* (affirming motion to dismiss where appellants "'fail[ed] to aver an antitrust injury, such as a negative impact on consumers or to competition in general, let alone any link between this impact and the harms [a]ppellants have suffered.").

B. Tortious Interference with Existing Business Relations

Plaintiffs also seek to dismiss Fery's tortious inference claim. ***HN6***[] A claim of tortious interference with a contract requires a plaintiff to allege: "(1) actual interference with a contract; (2) that the interference was inflicted intentionally by a defendant who is not a party to the contract; (3) that the interference was without justification; and (4) that the interference caused damage." *Tipton v. U-Go, Inc., No. A-1543-12T3, 2014 N.J. Super. Unpub. LEXIS 2117, 2014 WL 4231363, at *5 (N.J. Super. Ct. App. Div. Aug. 28, 2014)*.

First, Plaintiffs argue that Fery has failed to allege it had a protected interest with which Plaintiffs tortiously interfered. (Pls.' Moving Br. 26-27.) ***HN7***[] "A complaint based on tortious interference must allege facts that show some protectable right—a prospective economic or contractual relationship." *Printing Mart-Morristown v. Sharp Elecs. Corp., 116 N.J. 739, 563 A.2d 31, 37 (N.J. 1989)*; *see also* *Lamorte Burns & Co., Inc. v. Walters, 167 N.J. 285, 770 A.2d 1158, 1170 (N.J. 2001)* ("Not only does the law **[*10]** protect a party's interest in a contract already made, but it also protects a party's interest in reasonable expectations of economic advantage.'"). Here, the Court finds that Fery has sufficiently pled facts that would, if true, establish tortious interference with an existing contractual relationship. Fery alleges that Plaintiffs made "disparaging allegations to manufacturers that Fery's sales on the Amazon Marketplace were illegal[.]" (Countercls. ¶ 26.) According to the counterclaims, "at least one manufacturer[] refused to make sales to Fery, after having previously done so, because the Barcodes Enterprise induced it to refrain from such dealing." (*Id.* ¶ 27.) The Court finds that these pleadings sufficiently demonstrate allegations of interference with Fery's existing contractual relations. *See* *Nostrame v. Santiago, 213 N.J. 109, 61 A.3d 893, 902 (N.J. 2013)* (holding "[t]here can be no doubt that inducing another to end a contractual relationship

[3] Similarly, Fery's conclusory allegation regarding the diversion of customers from Amazon to Plaintiffs' own websites is also insufficient to state an antitrust injury. (Countercls. ¶ 24.) And although the Court only addresses antitrust injury, the Court notes that Fery fails to adequately explain or provide any support—even in its opposition brief—for its proposition that those actions constitute actionable anti-competitive conduct. (*See* Fery Opp'n Br. 12-20.)

through acts that amount to fraud or defamation would be wrongful" and that "deceit and misrepresentation can constitute wrongful means").

Second, Plaintiffs argue that Fery fails to adequately plead malice. (Pls.' Moving Br. 27.) According to Plaintiffs, Fery "cannot show that Plaintiffs' alleged **[*11]** comment was without justification or excuse." *[Id*. at 28.) ***HN8***[] To determine malicious interference, "the relevant inquiry is whether the conduct was sanctioned by the "rules of the game,' [and] where a plaintiffs loss of business is merely the incident of healthy competition, there is no compensable tort injury." *Lamorte Burns & Co., 770 A.2d at 1170*. As noted above, Fery alleges that Plaintiffs made "disparaging allegations to manufacturers" about the legality of Fery's sales on the Amazon Marketplace and that, as a result, Fery lost at least one supplier. (Countercls. ¶¶ 26-27.) Accepting those allegations as true, the Court cannot find that such conduct was sanctioned by the rules of the game. Moreover, Plaintiffs' reliance on third-party analyses at the pleading stage is misplaced; whether Fery placed fake, positive reviews for its own products remains a question of fact. The Court, therefore, finds that Fery sufficiently alleged malice.

Finally, Plaintiffs argue that Fery fails to properly plead that it suffered any economic damage. (Pls.' Moving Br. at 28-29.) The Court disagrees. Fery alleges that Plaintiffs "harmed Fery both by reducing the number and variety of products it could offer its customers and by disparaging **[*12]** customers from dealing with Fery," and as "a result of those actions, Fery has been caused great economic harm," (Countercls. ¶¶ 64-65.) Moreover, the Court finds it prudent to "await the development of [the] record" before dismissing a tortious interference claim for failing to allege damages. *Printing Mart, 563 A.2d at 47*. The Court, accordingly, denies Plaintiffs' Motion to Dismiss Fery's tortious interference claim.

IV. CONCLUSION

For the reasons set forth above, Plaintiffs' Motion to Dismiss is granted in part and denied in part. The Court will enter an Order consistent with this Memorandum Opinion.

/s/ Michael A. Shipp

MICHAEL A. SHIPP

UNITED STATES DISTRICT JUDGE

ORDER

This matter comes before the Court upon Plaintiffs-Counter Defendants AlphaCard Systems LLC, DiscountID.com LLC, and ID Card Group, LLC's (collectively, "Plaintiffs") Motion to Dismiss Defendant-Counter Plaintiff Fery LLC's ("Fery") counterclaims. (ECF No. 39.) Fery opposed (ECF No. 41), and Plaintiffs replied (ECF No. 45). The Court has carefully considered the parties' submissions and decides the matter without oral argument pursuant to *Local Civil Rule 78.1*. For the reasons set forth in the accompanying Memorandum Opinion, and for good cause shown,

IT IS on this 31st **[*13]** day of May 2021, **ORDERED** that:

1. Plaintiffs' Motion to Dismiss (ECF No. 39) is **GRANTED** in part and **DENIED** in part.
2. Counterclaims One through Three are dismissed without prejudice.
3. Fery may file amended counterclaims by **June 15,2021**.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) does not permit Plaintiffs to chase ghosts. The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN3[] **Conspiracy to Monopolize, Elements**

Encouraging lower production by itself is simply not enough to plausibly establish liability. There is a trade-off between price and volume. If firms want to raise prices, they have to produce less, sell less, and thereby say no to customers. It should not be a mark of conspiracy to say what is true, already known by the audience, and articulated by countless third-party analysts, academicians, and jurists alike.

Evidence > Inferences & Presumptions > Inferences

HN4[] Inferences & Presumptions, Inferences

Sparce allegations can sometimes be sufficient to state a claim in the right circumstances and when they permit the necessary inferences.

Judges: Honorable Thomas M. Durkin, United States District Judge.

Opinion by: Thomas M. Durkin

Opinion

MEMORANDUM OPINION AND ORDER

Plaintiffs[1] allege that Rabobank[2] conspired with defendant companies in the poultry industry to limit the supply **[*44]** of chicken meat in violation of the *Sherman Act § 1*. Rabobank has moved to dismiss for failure to state a claim pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. R. 4369. That motion is granted.

---

[1] According to the Direct Action Plaintiffs' consolidated complaint, the following plaintiffs have sued Rabobank: Sysco Corporation; US Foods, Inc.; EMA Foods Co., LLC; L. Hart, Inc.; R&D Marketing, LLC; Timber Lake Foods, Inc.; Campbell Soup Company, and related entities; Target Corporation; McLane Company, Inc. and related entities; Kinexo, Inc.; John Soules Foods, Inc. and John Soules Acquisitions LLC; and Red Bird Farms Distribution Company. *See* R. 4243 at 3-52. The three classes and more than 100 other Direct Action Plaintiffs have not.

Several years ago, the Court held that the class plaintiffs plausibly alleged a conspiracy in the poultry production industry to limit supply in order to increase the price of chicken. *See* R. 541 (*In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772 (N.D. Ill. 2017)*). Shortly thereafter, the Court held that the class plaintiffs had also plausibly alleged that industry analyst, Agri Stats, acted as a co-conspirator by being a conduit of information and communication among chicken producers. *See* R. 1943 (*In re Broiler Chicken Antitrust Litig., 2019 U.S. Dist. LEXIS 32560, 2019 WL 1003111 (N.D. Ill. Feb. 28, 2019)*). Plaintiffs allege that Rabobank played a similar role.

In denying the motion to dismiss the claims against Agri Stats, the Court found that ***HN1***[] "[i]t is at least plausible (if not likely) that a person who facilitates a conspiracy knows about the conspiracy and engages in the facilitation knowing of its consequences." *2019 U.S. Dist. LEXIS 32560, [WL] at *2*. Plaintiffs would argue that this finding applies equally to Rabobank.

It is not surprising, and Rabobank does not dispute that it had frequent communications across the industry. It is apparently the largest or one of the largest lenders to chicken producers. Indeed, Plaintiffs have discovered **[*45]** emails in which a Rabobank director states that he has relayed communications between defendants Perdue and Pilgrim's Pride. *See* R. 4372-5; R. 4372-6; R. 4372-7. These emails raise the specter of Rabobank serving as a communications conduit akin to Agri Stats.

HN2[] *Rule 12(b)(6)*, however, does not permit Plaintiffs to chase ghosts. The mere possibility that the subject matter of Rabobank's communications was the alleged conspiracy to reduce supply is insufficient to state a claim. See *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* ("The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief."). The emails are entirely ambiguous as to the subject matter of the communications they reference. Without knowing this information, Plaintiffs are asking the Court to infer that Rabobank knew about and communicated with Defendants about the alleged conspiracy from the unsurprising and unsuspicious fact that Rabobank communicated with Defendants. There are too many inferences in that chain of **[*46]** reasoning for it to retain plausibility.

Plaintiffs' allegations against Agri Stats were much more concrete. Plaintiffs alleged that Agri Stats "reports are so detailed that the ostensible anonymity of the information is breached, and Defendants were able to use the reports to communicate their Broiler production intentions, thereby conspiring to fix Broiler prices." *In re Broiler Chicken*, 2019 U.S. Dist. LEXIS 32560, 2019 WL 1003111, at *1. And since Agri Stats produced the reports, the Court found it plausible that Agri Stats knew the reports were being used to facilitate conspiracy. There is no similar factual basis regarding Rabobank's communications with Defendants from which the Court can infer that those communications concerned the alleged supply reduction conspiracy.

The rest of the allegations are even less compelling. Plaintiffs emphasize that Rabobank campaigned for the industry to reduce production in order to increase prices. *See* R. 4243 at 189-92 (¶¶ 576-86). You don't need to be John Maynard Keynes to recognize this truism, and simply repeating it without a plausible claim of helping the producers to coordinate production decreases does not an antitrust violation make. ***HN3***[] Encouraging lower production by itself is simply not enough to plausibly **[*47]** establish liability. *See* *Kleen Prods. LLC v. Int'l Paper, 276 F. Supp. 3d 811, 841 (N.D. Ill. 2017)* ("[T]here is a trade-off between price and volume. If firms want to raise prices, they have to produce less, sell less, and thereby say 'no' to customers. It should not be a mark of conspiracy to say what is true, already known by the audience, and articulated by countless third-party analysts, academicians, and jurists alike.").

---

[2] By "Rabobank," Plaintiffs mean: Utrecht-America Holdings, Inc., a Delaware corporation headquartered in New York, NY, which is the American subsidiary of the Dutch cooperative banks Cooperative Rabobank U.A. and Rabobank International Holding, B.V., and the subsidiaries Rabo AgriFinance LLC, a Delaware limited liability company headquartered in Saint Louis, MO; Rabobank USA Financial Corporation, a Delaware corporation headquartered in New York, NY; and Utrecht-America Finance Co., a Delaware company headquartered in New York, NY. *See* R. 4243 at 121-22 (¶ 240).

Plaintiffs also make much of the fact that Rabobank communicated with Agri Stats about the need for production cuts. *See* R. 4243 at 189-90 (¶¶ 577-80). But again, these communications merely establish that Rabobank had a significant interest in the industry. None of these communications show that Rabobank was involved in coordinating production cuts among the producers.

Plaintiffs allegations are all the more insufficient when viewed in the context of the complaint as a whole. Plaintiffs dedicate only 13 of 1,514 paragraphs to Rabobank's conduct. The 425-page complaint provides great detail about the supply of chicken during the relevant time period and the activities of the defendant chicken producers and Agri Stats. The most compelling allegations against Rabobank are based on three emails, which, as discussed, are ambiguous at best. **[*48]** Such***HN4***[] sparce allegations can sometimes be sufficient to state a claim in the right circumstances and when they permit the necessary inferences. But it is simply not plausible that Rabobank participated in an extensive conspiracy and left so little evidence of its participation.

Therefore, Rabobank's motion is granted, and Rabobank is dismissed without prejudice. If Plaintiffs discover facts plausibly implicating Rabobank in the conspiracy, Plaintiffs may amend their complaint. In anticipation of that possibility, the Court addresses several of Rabobank's arguments.

First, the Court rejects Rabobank's argument that "service providers" should not face antitrust liability for colluding with their clients. *See* R. 4372 at 14 (quoting *Gulf States Reorganization Grp., Inc. v. Nucor Corp., 822 F. Supp. 2d 1201, 1219 n.18 (N.D. Ala. 2011)*). If allegations plausibly demonstrate that a banker, lender, accountant, lawyer, or other service provider facilitated an unlawful conspiracy among their clients, the Court does not perceive any precedential danger in holding that person accountable for their conduct. ***HN5***[] The force of the allegations controls the analysis, not the title of the potential defendant.

Next, Rabobank argues that Plaintiffs sued the wrong entities and should have sued an entity called **[*49]** Coöperatieve Rabobank, U.A., New York Branch. *See* R. 4372 at 3 n.1; *id.* at 12. In support of this argument, Rabobank cites a Seventh Circuit holding that a "complaint based on a theory of collective responsibility must be dismissed." R. 4372 at 12 (quoting *Bank of Am., N.A. v. Knight, 725 F.3d 815, 818 (7th Cir. 2013)*). But the claims are plausibly understood as alleging agency among the Rabobank entities, not merely collective liability. Similarly, to the extent Rabobank is correct that Plaintiffs failed to sue the correct entity, that argument would not necessarily undermine the plausibly of the allegations against the other related entities.

Lastly, the Court notes Rabobank's argument that Plaintiffs must have "nothing to say" because they "used just two-thirds of the pages this Court allows for response briefs." *See* R. 4536 at 2. This argument runs contrary to the opinions of great thinkers and writers throughout history who believed that brevity and silence have greater persuasive power, including Blaise Pascal's apology, "I would have written a shorter letter, but I did not have the time." More presently relevant to the parties, the Court suggests that condemnation of a concise brief is not generally a winning argument to make to a Court **[*50]** with many hundreds of pages of motions and briefs to read each week, many in this case alone.

Nevertheless, Rabobank's motion to dismiss [4369] is granted. The claims against Rabobank are dismissed without prejudice.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 8(a)(2) requires a complaint to include a short and plain statement of the claim showing that the pleader is entitled to relief. A complaint that fails to meet this standard may be dismissed pursuant to Fed. R. Civ. P. 12(b)(6). Rule 8(a) requires a plaintiff to plead enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. While a plaintiff must allege more than a sheer possibility that a defendant has acted unlawfully, the plausibility standard is not akin to a probability requirement.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

For purposes of ruling on a Fed. R. Civ. P. 12(b)(6) motion, the court generally accepts factual allegations in the complaint as true and construes the pleadings in the light most favorable to the nonmoving party. The court need not, however, assume the truth of legal conclusions merely because they are cast in the form of factual allegations.

Mere conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss. The court may also look beyond the plaintiff's complaint to matters of public record without converting the Rule 12(b)(6) motion into a motion for summary judgment.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN3[] **Sherman Act, Defenses**

Ordinarily, a cause of action in antitrust accrues each time a plaintiff is injured by an act of the defendant and the statute of limitations runs from the commission of the act. An antitrust cause of action generally accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business. A plaintiff is not required actually discover its antitrust claims before the statute of limitations begins to run.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN4[] **Sherman Act, Defenses**

In the context of a continuing conspiracy to violate the antitrust laws, each time a plaintiff is injured by an act of the defendant a cause of action accrues to him to recover the damages caused by that act. As to those damages, the statute of limitations runs from the commission of the act. To restart the statute of limitations, there must be a new overt act that: (1) is new and independent and not merely a reaffirmation of a previous act, and (2) inflicts new and accumulating injury on the plaintiff. The Supreme Court and federal appellate courts have recognized that each time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Governments > Legislation > Statute of Limitations > Time Limitations

HN5[] **Conspiracy to Monopolize, Elements**

In the context of a continuing conspiracy to violate antitrust laws, each time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act.

Governments > Legislation > Statute of Limitations > Time Limitations

Torts > ... > Statute of Limitations > Begins to Run > Continuing Violations

HN6[] **Statute of Limitations, Time Limitations**

The continuing conspiracy doctrine does not entitle plaintiffs to recover for all past injuries; rather, each new price-fixed sale triggers a new limitations period for Plaintiffs to recover the damages caused by that act. The commission of a separate new overt act generally does not permit the plaintiff to recover for the injury caused by old overt acts outside the limitations period.); (It does not therefore necessarily follow that each new injury constitutes Sherman-Act-compensable harm that—when timely litigated—provides an avenue of redress for past, non-timely-pursued harms.

Governments > Legislation > Statute of Limitations > Pleadings & Proof

Governments > Legislation > Statute of Limitations > Tolling

HN7[] **Statute of Limitations, Pleadings & Proof**

The burden of alleging facts which would give rise to tolling falls upon a plaintiff. However, because resolving tolling disputes is a fact-intensive process, statute of limitations defenses may not be raised by motion to dismiss unless they include no disputed issues of fact.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Torts > ... > Statute of Limitations > Tolling > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Tolling

HN8[] **Tolling of Statute of Limitations, Fraudulent Concealment**

To toll the statute of limitations under a theory of fraudulent concealment, a plaintiff must do more than show that it was ignorant of its cause of action. A plaintiff asserting fraudulent concealment must allege that: (1) the defendant took affirmative acts to mislead the plaintiff; (2) the plaintiff did not have actual or constructive knowledge of the facts giving rise to its claim; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to its claim. Allegations of fraudulent concealment must be pled with particularity; conclusory statements are insufficient.

Business & Corporate Law > ... > Causes of Action & Remedies > Breach of Fiduciary Duty > Statute of Limitations

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Tolling

HN9[] **Breach of Fiduciary Duty, Statute of Limitations**

Although the affirmative acts necessary to show fraudulent concealment can be integral to the underlying conspiracy itself passive concealment is not enough. Passive concealment of information is not enough to toll the statute of limitations, unless the defendant had a fiduciary duty to disclose information to the plaintiff. An affirmative act of denial, however, is enough if the circumstances make the plaintiff's reliance on the denial reasonable. The line between active and passive concealment is very fine indeed.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Clayton Act > Defenses

HN10[] **Sherman Act, Defenses**

Mere failure to own up to illegal conduct in response to an inquiry about whether the defendant engaged in illegal antitrust activity is not sufficient for fraudulent concealment, and to find otherwise would effectively nullify the statute of limitations in these cases.

Antitrust & Trade Law > Sherman Act > Defenses

HN11[] **Sherman Act, Defenses**

Courts have been hesitant to dismiss an otherwise fraudulently concealed antitrust claim for failure to sufficiently allege due diligence, because questions of inquiry notice are necessarily bound up with the facts of the case.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN12[] **Sherman Act, Claims**

Courts in the district do not require plaintiffs in complex, multinational, antitrust cases to plead detailed, defendant-by-defendant allegations; instead they require plaintiffs to make allegations that plausibly suggest that each Defendant participated in the alleged conspiracy. An antitrust complaint must allege that each individual defendant joined the conspiracy and played some role in it because, at the heart of an antitrust conspiracy is an agreement and a conscious decision by each defendant to join it. This is because, at the heart of an antitrust conspiracy is an agreement and a conscious decision by each defendant to join it.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN13[] **Sherman Act, Claims**

Sherman Act § 1provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. 15 U.S.C.S. § 1. A plaintiff asserting a claim under § 1 must plead: (1) a contract, combination or conspiracy among two or more persons or distinct business entities (2) which is intended to restrain or harm trade; (3) which actually injures competition, and (4) harm to the plaintiff from the anticompetitive conduct. But because § 1 does not prohibit all unreasonable restraints of trade but only restraints effected by a contract, combination, or conspiracy, the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN14[] **Actual Monopolization, Claims**

Sherman Act § 2 prohibits monopolization or attempted monopolization of trade or commerce. 15 U.S.C.S. § 2. A plaintiff asserting an attempt claim must plead: (1) a specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct directed at accomplishing that purpose; (3) a dangerous probability of achieving monopoly power, and (4) causal antitrust injury. A monopoly claim has two elements, aside from antitrust injury: (1) the defendant possessed monopoly power in the relevant market and (2) the defendant willfully acquired or maintained that power.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN15[] **Anticompetitive & Predatory Practices, Predatory Pricing**

A plaintiff must show that new rivals are barred from entering the market and show that existing competitors lack the capacity to expand their output to challenge the predator's high price.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Antitrust & Trade Law > Clayton Act > Scope

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN16[] **Clayton Act, Claims**

The Clayton Act § 7 prohibits a corporation from acquiring the stock or assets of another corporation in any line of commerce in which the effect may be substantially to lessen competition, or to tend to create a monopoly. 15

U.S.C.S. § 18. When examining a § 7 claim, a court must be mindful that every merger of two existing entities into one, whether lawful or unlawful, has the potential for producing economic readjustments that adversely affect some persons. But Congress has not condemned mergers on that account; it has condemned them only when they may produce anticompetitive effects.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN17[] **Trade Practices & Unfair Competition, State Regulation**

The Unfair Competition Law (UCL) broadly prohibits any unlawful, unfair or fraudulent business act or practice. By proscribing any unlawful business practice, the UCL borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable. Thus, the unlawful prong of the statute prohibits anything that can properly be called a business practice and that at the same time is forbidden by law.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN18[] **Amendment of Pleadings, Leave of Court**

Requests for leave to amend should be granted with extreme liberality. Under Fed. R. Civ. P. 15(a)(2), he court should freely give leave when justice so requires.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Immaterial Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Irrelevant Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Scandalous Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Redundant Matters

HN19[] **Motions to Strike, Immaterial Matters**

A court may order stricken from any pleading any insufficient defense or any redundant, immaterial, impertinent, or scandalous matter pursuant to Fed. R. Civ. P. 12(f). Fed. R. Civ. P. 12(f). Impertinent matter consists of statements that do not pertain, and are not necessary, to the issues in question. Redundant allegations are those that are needlessly repetitive or wholly foreign to the issues involved in the action. Scandalous matters are allegations that unnecessarily reflect on the moral character of an individual or state anything in repulsive language that detracts from the dignity of the court.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Immaterial Matters

HN20[] **Motions to Strike, Immaterial Matters**

The function of a Fed. R. Civ. P. 12(f) motion to strike is to avoid the expenditure of time and money that must arise from litigating spurious issues by dispensing with those issues prior to trial. In determining whether to grant a motion to strike, a district court views the pleadings in a light most favorable to the non-moving party, and resolves any doubt as to the relevance of the challenged allegations in the plaintiff's favor.

Evidence > Relevance > Exclusion of Relevant Evidence > Confusion, Prejudice & Waste of Time

HN21[] **Exclusion of Relevant Evidence, Confusion, Prejudice & Waste of Time**

Allegations supplying background or historical material or other matter of an evidentiary nature will not be stricken unless unduly prejudicial to defendant.

Opinion

ORDER GRANTING IN PART AND DENYING DEFENDANTS' MOTIONS TO DISMISS; GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO STRIKE

Re: Dkt. Nos. 63, 64, 96, 97

Plaintiffs Spectrum Scientifics, LLC and Radio City, Inc. ("Plaintiffs") brought this putative class action on behalf of themselves and a proposed class of direct purchasers ("DPPs") against Defendants (1) Synta Technology Corp. ("Synta Tech"), (2) Suzhou **[*2]** Synta Optical Technology Co., Ltd. ("Suzhou Synta"), (3) Nantong Schmidt Opto-Electrical Technology Co. Ltd. ("Nantong Schmidt"), (4) Synta Canada International Enterprises Ltd. ("Synta Canada"), (5) Pacific Telescope Corp. ("Pacific Telescope"), (6) Olivon Manufacturing Group Ltd. ("Olivon Manufacturing"), (7) SW Technology Corp. ("SW"), (8) Celestron Acquisition, LLC ("Celestron"), (9) Olivon USA LLC ("Olivon USA"), (10) Dar Tson "David" Shen, (11) Joseph Lupica, (12) David Anderson, (13) Corey Lee; (14) Jean Shen, (15) Sylvia Shen, (16) Jack Chen, (17) Laurence Huen, and (18) Ningbo Sunny Electronic Co. Ltd., ("Ningbo Sunny") (collectively, "Defendants") alleging antitrust violations arising out of a conspiracy to unlawfully monopolize and fix prices in the telescope market.

On October 19, 2020, Plaintiffs filed their Second Amended Complaint ("SAC"). Dkt. No. 54. On November 16, 2020, Defendants Celestron, SW, Mr. Anderson, Mr. Lupica, and Mr. Lee filed (1) a Motion to Strike Allegations in the SAC ("Motion to Strike"), and (2) a Motion to Dismiss the SAC pursuant to *Federal Rule of Civil Procedure 12(b)(6)* ("First Motion to Dismiss"). Dkt. Nos. 63, 64. The remainder of Defendants later joined in the Motion to Strike, **[*3]** with the exception of Ningbo Sunny, which has not appeared in this action. Dkt. No. 98.

On January 20, 2021, Defendants Mr. Shen, Ms. Sylvia Shen, Mr. Chen, Mr. Huen, Suzhou Synta, Nantong Schmidt, Synta Tech, Olivon Manufacturing, Olivon USA, and Pacific Telescope filed a Motion to Dismiss the SAC ("Second Motion to Dismiss"), raising substantially the same arguments as the First Motion to Dismiss. Dkt. No. 96. On the same day, Defendants Jean Shen and Synta Canada filed a separate Motion to Dismiss the SAC for lack of personal jurisdiction and for failure to state a claim pursuant to *Rule 12(b)(2)* and *(6)* ("Synta Canada Motion"). Dkt. No. 97. Following jurisdictional discovery, Ms. Shen and Synta Canada withdrew their motion as to personal jurisdiction. Dkt. Nos. 140, 143. The remainder of the Synta Canada Motion raises substantially the same arguments as the First and Second Motions to Dismiss. The Court, therefore, considers all three motions to dismiss together.

The Court took all three motions under submission for decision without oral argument pursuant to *Civil Local Rule 7-1(b)*. For the reasons stated below, the Court GRANTS IN PART and DENIES IN PART the Motions to Dismiss and GRANTS IN PART AND DENIES IN PART the **[*4]** Motion to Strike.

I. BACKGROUND

The SAC generally alleges that Synta Technology and its affiliates (collectively, "Synta" or "the Synta Entities")[1] participate in a long-running conspiracy with Ningbo Sunny and its affiliates ("the Ningbo Sunny Entities") to "to fix prices, divide the market, retaliate against competitors, mislead U.S. authorities, illegally acquire assets and dominate the U.S. market so that they could rip off American purchasers." SAC ¶ 2. The Synta Entities are "a group of related entities, holding companies, and shell corporations controlled by an individual named David Shen, and his henchmen," including his family members. *Id.* ¶ 13.

Both the Synta Entities and the Ningbo Sunny Entities are vertically integrated corporate families, that manufacture telescopes in China and distribute, market, and sell those telescopes around the world, including in the U.S. through U.S. subsidiaries. *See id.* ¶ 66. Plaintiffs allege that these two corporate families conspired to improperly dominate two relevant markets: (1) the consumer telescope and telescope accessory manufacturing for import into the United States ("the Manufacturing Market"); and (2) the market for consumer telescope **[*5]** distribution in the United States ("the Distribution Market"). *Id.* ¶¶ 55-59. Plaintiffs allege that Synta and Ningbo Sunny presently manufacture over 80% of all consumer telescopes imported into the United States. *Id.* ¶ 3.

In 2005, Synta acquired Celestron through a wholly owned subsidiary holding company, SW. *Id.* ¶¶ 23-24. From 2001 until 2005, Mr. Shen was not only the owner and Chairman of Synta but was also the Vice Chairman of and stakeholder in Ningbo Sunny. *Id.* ¶¶ 15-16. Mr. Shen transferred that interest and resigned from his position in 2005 in order to avoid any conflict of interest created by Synta's acquisition of Celestron, Ningbo Sunny's horizontal competitor. *Id.*

Before they were acquired by Synta, Celestron and Meade Instruments Corp. ("Meade") were the leading U.S. telescope manufacturers and distributors. In 1991, and again in 2002, Celestron attempted to merge with Meade. Both times, the FTC took action to block proposed combinations on antitrust grounds. *Id.* ¶ 74.

When Meade was offered for sale in 2013, a smaller manufacturer of telescopes, Jinghua Optical Co. Ltd. ("Jinghua"), made a bid to purchase it. *Id.* ¶¶ 73, 75. Knowing that Jinghau's purchase of Meade would **[*6]** have allowed Jinghua to more substantially compete in the market, Ningbo Sunny and Synta conspired to prevent the acquisition. *Id.* ¶ 77, Ex. 2. Because Synta owned Celestron, a direct competitor of Meade, Synta could not purchase Meade directly. Instead, Ningbo Sunny's CEO Peter Ni, and Synta's CEO Mr. Chen agreed that Ningbo Sunny would purchase Meade with financial and other assistance from Synta. *Id.* ¶¶ 77-78.

---

[1] The SAC regularly refers to "Synta," defined as "a conglomerate of entities owned and controlled by Dar-Tson 'David' Shen and his close family members that include Synta Technology Corporation, Suzhou Synta, and a shadowy network of other factories and distributors." SAC ¶ 2 n.1. Defendants challenge the use of "Synta" and, as discussed further below, argue that such allegations do not adequately distinguish among corporate affiliates. In summarizing the allegations of the SAC and without prejudging the arguments, the Court refers to Synta where no affiliate is specified.

After the acquisition, Celestron loaned considerable sums to horizontal competitor Ningbo Sunny. *Id.* ¶ 88. In exchange for these capital contributions, Celestron was granted an ownership interest in Meade, another horizontal competitor, which was memorialized in Celestron's "shadow books." *Id.* ¶ 89. David Shen and Peter Ni agreed that Defendant and then-Celestron CEO Joe Lupica would quit his role at Celestron on June 18, 2013 and become CEO of Meade after the deal closed. *Id.* ¶ 83. This transfer took place as planned, and other Celestron executives also joined Meade. *Id.* ¶ 84.

The Synta Entities and Ningbo Sunny Entities effectively divided the telescope market by agreeing that Synta would manufacture and supply higher-end telescopes, that Ningbo Sunny would manufacture and **[*7]** supply lower-end telescopes, and that they would not compete. *Id.* ¶ 96; *see also id.* Ex. 9 (email from Synta's CEO Mr. Shen informing Ningbo Sunny's CEO Mr. Ni and Celestron's CEO David Anderson that "[t]he best way in the future is to divide the products and sell them into different markets to reduce conflicts"). Ningbo Sunny also provided Celestron with Meade's trade secrets and pricing information, allowed Celestron engineers to tour Meade's factory, and continued to coordinate business activities with Mr. Shen and his trusted counselor and Celestron Executive Committee member Laurence Huen. *Id.* ¶¶ 87, 100-101. By dividing the market and sharing information in this way, Ningbo Sunny and Synta together controlled between 90% of the manufacturing market in 2018. *Id.* ¶¶ 118.

On November 1, 2016, independent telescope distributer Optronic Technologies Co. ("Orion") filed suit in this District against its competitors Ningbo Sunny, Meade, and affiliate Sunny Optics, Inc. (the "*Orion* Action"). *See Optronic Techs. Inc. v. Ningbo Sunny et al.*, No. 5:16-cv-06370-EJD (N.D. Cal.). The *Orion* Action involved largely the same causes of action and factual allegations as described in the SAC. Orion was also represented by counsel for Plaintiffs in this case. After a six-week **[*8]** trial in the *Orion* Action, a jury found Ningbo Sunny liable for violations of the *Sherman Act* and *Clayton Act*. *Optronic Techs. Inc. v. Ningbo Sunny et al., No. 5:16-cv-06370-EJD, Dkt. No. 501, 2019 U.S. Dist. LEXIS 224707 (N.D. Cal. Nov. 26, 2019)*. While the *Orion* Action is relevant to the extent it affects the analysis of Plaintiffs' knowledge of the underlying factual allegations, none of the moving Defendants were parties to the *Orion* Action and the holdings of that case are not binding on this one.

Following the *Orion* trial, Plaintiffs filed the present action. Plaintiffs seek to represent a class consisting of all similarly situated retailers and distributors who purchased telescopes manufactured or sold by Defendants during the time period beginning from Synta's acquisition of Celestron in 2005 through such time as class notice is given. On October 19, 2020, Plaintiffs filed the SAC, raising four causes of action: (1) price fixing, credit term fixing, market allocation, product allocation, and other unlawful collusion between competitors in violation of *§ 1 of the Sherman Act (15 U.S.C. § 1)*; (2) monopolization, attempted monopolization, and conspiracy to monopolize in violation of *§ 2 of the Sherman Act (15 U.S.C. § 2)* and *§ 7 of the Clayton Act (15 U.S.C. § 18)*; (3) unfair competition in violation of *California Business & Professions Code §§ 17200 et seq.*; and (4) price fixing, credit term fixing, market allocation, product allocation, other unlawful collusion between competitors, monopolization, **[*9]** attempted monopolization, and conspiracy to monopolize in violation of the Cartwright Act, *California Business & Professions Code §§ 16700 et seq.* Plaintiffs seek, among other things, their actual damages, treble damages, and injunctive relief.

As noted above, Defendants filed two separate motions to dismiss, which raise many of the same arguments and which the Court considers together. Several indirect purchaser plaintiffs ("IPPs") also filed complaints in this District against largely the same defendants ("the IPP Action"), which were later consolidated and related to this case. *Hightower v. Celestron Acquisiton, LLC et al.*, No. 5:20-cv-03639-EJD (N.D. Cal.). The Defendants filed similar motions to dismiss and a motion to strike in the IPP Action, which this Court addressed in a separate order ("the IPP Order"). *Hightower, No. 5:20-cv-03639-EJD, Dkt. No. 177, 2021 U.S. Dist. LEXIS 103832 (N.D. Cal. June 2, 2021)*. Because many of the arguments Defendants raised are the same in both cases, the Court references and relies on its analysis in the IPP Order throughout this order.

II. LEGAL STANDARD

HN1[] *Rule 8(a)(2) of the Federal Rules of Civil Procedure* requires a complaint to include "a short and plain statement of the claim showing that the pleader is entitled to relief." A complaint that fails to meet this standard may be dismissed pursuant to *Rule 12(b)(6)*. *Rule 8(a)* requires a plaintiff to plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility **[*10]** when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. While a plaintiff must allege "more than a sheer possibility that a defendant has acted unlawfully," the plausibility standard "is not akin to a probability requirement." *Id.*

HN2[] For purposes of ruling on a *Rule 12(b)(6)* motion, the Court generally "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. The Court need not, however, "assume the truth of legal conclusions merely because they are cast in the form of factual allegations." *Fayer v. Vaughn, 649 F.3d 1061, 1064 (9th Cir. 2011)* (per curiam). Mere "conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss." *Adams v. Johnson, 355 F.3d 1179, 1183 (9th Cir. 2004)*. The Court may also "look beyond the plaintiff's complaint to matters of public record" without converting the *Rule 12(b)(6)* motion into a motion for summary judgment. *Shaw v. Hahn, 56 F.3d 1128, 1129 n. 1 (9th Cir.1995)*.

III. MOTION TO DISMISS

Defendants seek to dismiss the SAC on three grounds (1) all of Plaintiffs' claims are barred under the applicable statutes of limitations; (2) Plaintiffs fail to raise sufficient allegations as to specific named defendants; and (3) **[*11]** Plaintiffs fail to sufficiently allege claims under the Sherman Act, the Clayton Act, or the relevant state laws.

A. Statutes of Limitations

Plaintiffs have alleged violations of the *Sherman Act §§ 1* and *2*, *Clayton Act § 7*, the Cartwright Act, and *California Business & Professions Code §§ 16700*, *17200*—all of which are subject to a four-year statute of limitations. *Garrison v. Oracle Corp., 159 F. Supp. 3d 1044, 1062-85 (N.D. Cal. 2016)* (analyzing limitations period of these same claims). ***HN3***[] "Ordinarily, '[a] cause of action in antitrust accrues each time a plaintiff is injured by an act of the defendant and the statute of limitations runs from the commission of the act.'" *Intel Corp. v. Fortress Inv. Grp. LLC, No. 19-CV-07651-EMC, 2020 U.S. Dist. LEXIS 158831, 2020 WL 6390499, at *19 (N.D. Cal. July 15, 2020)* (quoting *Oliver v. SD-3C LLC, 751 F.3d 1081, 1086 (9th Cir. 2014)*; *see also* *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1050 (8th Cir. 2000)* ("An antitrust cause of action generally accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business.") (internal quotation marks omitted). A plaintiff is not required actually discover its antitrust claims before the statute of limitations begins to run. *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012)*.

Defendants argue that Plaintiffs' claims are time-barred because Plaintiffs do not allege any wrongful acts within four years of when this action was first filed on June 1, 2020. Defendants further argue that Plaintiffs fail to plead facts to support fraudulent concealment or any other defense to the statute of limitations bar.

1. Continuing conspiracy

Plaintiffs **[*12]** first argue that their claims are timely because they allege a continuing violation of antitrust laws, such that allegations of ongoing sales of price-fixed products are sufficient to restart the statute of limitations period. ***HN4***[] "[I]n the context of a continuing conspiracy to violate the antitrust laws, . . . each time a plaintiff is injured by an act of the defendant[ ] a cause of action accrues to him to recover the damages caused by that act." *Oliver, 751 F.3d at 1086* (quoting *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*) (internal quotation marks omitted). "[A]s to those damages, the statute of limitations runs from the commission of the act." *Id.* (internal quotation marks omitted). To restart the statute of limitations, there must be a new overt act that: (1) is "new and independent . . . [and] not merely a reaffirmation of a previous act," and (2) "inflict[s] new and accumulating injury on the plaintiff." *Id.* (citing *Pace Indus., Inc. v. Three Phoenix Co., 813 F.2d 234, 238 (9th Cir. 1987)*). "[T]he Supreme Court and federal appellate courts have recognized that each time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act." *Id.*

Plaintiffs argue that they have sufficiently alleged a continuing conspiracy, **[*13]** pointing to their allegation that "Defendants entered into a *continuing* combination or conspiracy to unreasonably restrain trade and commerce." SAC ¶ 142 (emphasis added); *see also id.* ¶ 120 ("Through their domination of the supply chain and unlawful agreements, Defendants have effectively prevented new market entrants at the distribution level, and forced many distributors to go out of business, thereby continuing to inhibit and restrict competition."); *id.* ¶ 144 ("Plaintiffs were and continue to be injured in fact by the conspiracies of Defendants."). The Court agrees that at the pleading stage, these allegations are sufficient to show that continuing violations are plausible.

Defendants argue that the Court should not interpret *Oliver* to mean that "each time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act." Dkt. No. 91, Reply in Supp. of Mot. to Dismiss DPP Second Amended Compl. ("First Reply"). at 9. But that is precisely what the Ninth Circuit held. *Oliver, 751 F.3d at 1086* ("***HN5***[] [E]ach time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury **[*14]** to the purchaser and the statute of limitations runs from the date of the act."); *see also* *In re Cal. Bail Bond Antitrust Litig., No. 19-CV-00717-JST, 2020 U.S. Dist. LEXIS 92836, 2020 WL 3041316, at *19 (N.D. Cal. Apr. 13, 2020)* (relying on *Oliver* in holding that "each sale of a bail bond that was artificially inflated as a result of the alleged conspiracy thus constitutes an overt act restarting the statute of limitations").

Defendants cite to *In re Packaged Seafood Products Antitrust Litigation, 242 F. Supp. 3d 1033 (S.D. Cal. 2017)* in support of their argument. There, the court acknowledged *Oliver*'s holding that in a continuing conspiracy "each price-fixed sale constitutes an 'overt act' that starts the statute of limitations anew," but also noted that other Circuits require more, such as another meeting in furtherance of the conspiracy. *Id. at 1098* (citing *Penn. Dental Ass'n v. Med. Serv. Ass'n of Penn., 815 F.2d 270, 277 (3d Cir. 1987)*). In light of the split of authority, the court simply held that the continuing conspiracy did not save *all* of plaintiffs' claims from application of the statute of limitations.

HN6[] The Court agrees with the court in *In re Packaged Seafood* that the continuing conspiracy doctrine does not entitle Plaintiffs to recover for all past injuries; rather, each new price-fixed sale triggers a new limitations period for Plaintiffs to recover "the damages caused by that act." *Zenith Radio Corp., 401 U.S. at 338-39*; *see also* *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* ("[T]he commission of a separate new overt act generally does not permit the plaintiff to **[*15]** recover for the injury caused by old overt acts outside the limitations period."); *In re Packaged Seafood, 242 F. Supp. 3d at 1098* ("It does not therefore necessarily follow that each new injury constitutes Sherman-Act-compensable harm that—when timely litigated—provides an avenue of redress for past, non-timely-pursued harms."). However, the Court departs from the *In re Packaged Seafood* analysis in finding that under *Oliver*, Plaintiffs may recover damages for alleged price-fixed sales throughout the last four years.

2. Fraudulent concealment

Other than the allegations discussed above regarding a continuing conspiracy, the SAC does not raise any allegations of specific unlawful acts in the four years prior to filing. Thus, to the extent Plaintiffs seek to recover damages for conduct that occurred before June 1, 2016, Plaintiffs must establish that the applicable statutes of limitations were tolled. *Hinton v. Pac. Enterprises, 5 F.3d 391, 395 (9th Cir. 1993)* ("***HN7***[] The burden of alleging facts which would give rise to tolling falls upon the plaintiff."). However, "because resolving tolling disputes is a fact-intensive process, statute of limitations defenses 'may not be raised by motion to dismiss' unless they include 'no disputed issues of fact.'" *In re Cal. Bail Bond, 2020 U.S. Dist. LEXIS 92836, 2020 WL 3041316, at *17* (citing *Scott v. Kuhlmann, 746 F.2d 1377, 1378 (9th Cir. 1984)*). Plaintiffs argue that they have sufficiently **[*16]** alleged that Defendants fraudulently concealed their conspiracy and thus their claims are timely.

HN8[] To toll the statute of limitations under a theory of fraudulent concealment, a plaintiff "must do more than show that it was ignorant of its cause of action. *In re Cathode Ray Tube (CRT) Antitrust Litig. ("In re Cathode Ray Tube II"), No. C-07-5944 JST, 2016 U.S. Dist. LEXIS 186204, 2016 WL 8669891, at *4 (N.D. Cal. Aug. 22, 2016)*. A plaintiff asserting fraudulent concealment must allege that: (1) the defendant took affirmative acts to mislead the plaintiff; (2) the plaintiff did not have actual or constructive knowledge of the facts giving rise to its claim; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to its claim. *In re Animation Workers Antitrust Litig., 123 F. Supp. 3d 1175, 1194 (N.D. Cal. 2015)* (quoting *Hexcel Corp., 681 F.3d at 1060*). Allegations of fraudulent concealment must be pled with particularity; conclusory statements are insufficient. *Conmar Corp. v. Mitsui & Co. (U.S.A.), 858 F.2d 499, 502 (9th Cir. 1988)*; *Reveal Chat Holdco, LLC v. Facebook, Inc., 471 F. Supp. 3d 981, 992 (N.D. Cal. 2020)* (citing *Ryan v. Microsoft Corp., 147 F. Supp. 3d 868, 885 (N.D. Cal. 2015)*).

a. Affirmative acts

With respect to the first element, Plaintiffs argue that they sufficiently allege several affirmative acts that Defendants took to mislead Plaintiffs, including:

- "The conspirators falsely told the FTC that Celestron, Synta, and David Shen were uninvolved in Ningbo Sunny's anticompetitive and illegal acquisition of Meade. In fact, Ningbo Sunny's counsel Sheppard Mullin was directed to take instructions from Synta and Celestron personnel, including Defendant **[*17]** Lupica, Defendant Anderson, Defendant Huen, and David Shen. These Celestron and Synta personnel orchestrated the illegal Meade deal behind the scenes." SAC ¶ 132; *see also id.* ¶¶ 91-93 (Ningbo Sunny's counsel stating in an email to the FTC that "except for the limited advice to Peter Ni regarding how to acquire a U.S. company . . . David Shen has no role in the proposed acquisition of Meade."); *id.*, Ex. 4, 8.

- "As part of their unlawful arrangement, Defendant Celestron took equity in its horizontal competitor Meade — which is memorialized in shadow books kept by Defendants' coconspirators." *Id.* ¶ 89, Ex. 7.

- "After the Meade acquisition closed, Synta and Celestron directed millions of dollars to Ningbo Sunny to finance its consolidation and control over Meade. Defendant Anderson (who was President of Celestron at the time) wrote his co-conspirators emails explaining that this arrangement could not be disclosed to Celestron's banking partners." *Id.* ¶¶ 135.

- "The co-conspirators also intentionally and fraudulently concealed their conspiracy from the public by filing disclosures with the SEC relating to the Meade transaction that failed to disclose Chairman Shen, Synta, and Celestron's **[*18]** involvement and role in the Meade acquisition." *Id.* ¶ 136.

Defendants argue that these allegations amount to nothing more than "passive concealment." HN9[] Although the affirmative acts necessary to show fraudulent concealment "can be integral to the underlying conspiracy itself . . . passive concealment is not enough." *In re Cathode Ray Tube II, 2016 U.S. Dist. LEXIS 186204, 2016 WL 8669891, at *4*. "Passive concealment of information is not enough to toll the statute of limitations, unless the defendant had a fiduciary duty to disclose information to the plaintiff." *Reveal Chat, 471 F. Supp. 3d at 992-93* (citing *Conmar Corp., 858 F.2d at 505*)). "An affirmative act of denial, however, is enough if the circumstances make the plaintiff's reliance on the denial reasonable." *Id.* "[T]he line between active and passive concealment is very fine indeed." *In re Cathode Ray Tube II, 2016 U.S. Dist. LEXIS 186204, 2016 WL 8669891, at *4*.

By these standards, Defendants' failure to disclose details of the Meade transaction in public SEC filings is merely passive concealment, not an affirmative act. *See* *Volk v. D.A. Davidson & Co., 816 F.2d 1406, 1416 (9th Cir. 1987)* ("[A]ppellees passively concealed the reports by not disclosing them to the investors. In such situations, the federal tolling doctrine does not apply."); *Reveal Chat, 471 F. Supp. 3d at 992-93* ("HN10[] [T]he mere failure to own up to illegal conduct in response to an inquiry about whether the defendant engaged in illegal antitrust activity is not sufficient for fraudulent **[*19]** concealment, and to find otherwise would effectively nullify the statute of limitations in these cases.") (internal quotation marks omitted).

Ningbo Sunny's affirmative misrepresentation to the FTC regarding Mr. Shen's involvement, however, implies more than mere passive concealment. It is plausible that this affirmative misrepresentation to the FTC was calculated to avoid government scrutiny of the transaction and thereby to hide the alleged antitrust violations from the public. The Court finds that this allegation constitutes an affirmative act to mislead Plaintiffs. Similarly, the fact that Celestron took equity in its competitor Meade, but only maintained records of that transaction in "shadow books," and the fact that Celestron allegedly structured its payments to Ningbo Sunny to avoid raising red flags with its bank or auditors constitute affirmatively misleading conduct "above and beyond" the alleged conspiracy itself. *In re Animation Workers, 87 F. Supp. 3d at 1215* (citing *Guerrero v. Gates, 442 F.3d 697, 706-07 (9th Cir. 2006)*).

The Court also notes that none of the alleged affirmative acts date back to the beginning of the proposed class period in January 2005; rather, they all revolve around the alleged conspiracy to acquire Meade in 2013. Thus, the Court finds that Plaintiffs **[*20]** have only sufficiently alleged affirmative acts to support the first element of fraudulent concealment as to the alleged misconduct that occurred in 2013 or later.

b. Actual or constructive knowledge

Plaintiffs allege that they "had neither actual nor constructive knowledge of the pertinent facts constituting their claims for relief" and could not have discovered those facts until "September 2019, when some evidence revealing Defendants' secret conspiracy was first made public in the summary [judgment] briefing in the Orion Litigation." SAC ¶ 130. Defendants argue that it is implausible that Plaintiffs lacked knowledge of the conspiracy until 2019, because Plaintiffs' peer distributor, Orion, was aware of the conspiracy at least as of 2015. Defendants question "what circumstances would permit Orion, but prevent similarly situated Plaintiffs, from becoming aware of the basis for the claims asserted in the SAC until 2019[.]" First Reply at 8.

The specific facts giving rise to Orion's complaint are not alleged in the SAC and are not before the Court. Although it is possible that Orion uncovered the conspiracy from observing public facts also available to Plaintiffs in this case, that is **[*21]** an inference the Court is unwilling to make at the pleading stage. It is equally possible—and, indeed, Plaintiffs argue—that Orion had unique experiences and interactions with Defendants that provided insight into the alleged conspiracy. It is not clear from the face of the SAC that Plaintiffs had constructive knowledge of the conspiracy, and at this stage, the Court must make all inferences in favor of Plaintiffs. Thus, the Court finds that Plaintiffs have sufficiently alleged that they did not actually or constructively know about the alleged conspiracy before September 2019.

c. Diligence

Defendants argue that Plaintiffs failed to plead specific "acts of diligence." First Mot. to Dismiss at 11. Plaintiffs contend that diligent inquiry is only required "where facts exist that would excite the inquiry of a reasonable person." *Reveal Chat, 471 F. Supp. 3d at 994*. The Court agrees with Plaintiffs. *Conmar Corp., 858 F.2d at 504*.

Defendants argue there are facts alleged in the SAC that should have "excited the inquiry" of Plaintiffs First Reply at 9 ("Surely, Plaintiffs recognized that the same companies had manufactured and distributed the telescopes they purchased for an uninterrupted 10 year period."). The Court does not find this argument persuasive. **[*22]** The fact that two companies dominated a particular industry uninterrupted for ten years does not, without more, suggest any misconduct and would not lead a reasonable person to suspect an antitrust conspiracy in the market.

HN11[] In the absence of any allegations on the face of the SAC that would raise the suspicions of a reasonable consumer, the Court finds that Plaintiffs were not required to plead specific acts of diligence. *See* *In re Animation Workers, 123 F. Supp. 3d at 1205* (noting "courts have 'been hesitant to dismiss an otherwise fraudulently concealed antitrust claim for failure to sufficiently allege due diligence,' because questions of inquiry notice are 'necessarily bound up with the facts of the case.'").

Accordingly, the Court finds that Plaintiffs have plausibly alleged that Defendants' fraudulent concealment of their misconduct tolled the statutes of limitations as to claims arising out of conduct in 2013 or later.

B. Individualized Allegations

HN12[] "Courts in this district do not require plaintiffs in complex, multinational, antitrust cases to plead detailed, defendant-by-defendant allegations; instead they require plaintiffs 'to make allegations that plausibly suggest that each Defendant participated in the alleged conspiracy.'" **[*23]** *In re Cathode Ray Tube (CRT) Antitrust Litig. ("In re Cathode Ray Tube I"), 738 F. Supp. 2d 1011, 1019 (N.D. Cal. 2010)*. An antitrust complaint "must allege that each individual defendant joined the conspiracy and played some role in it because, at the heart of an antitrust conspiracy is an agreement and a conscious decision by each defendant to join it." *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 1117 (N.D. Cal. 2008)*. This is "because, at the heart of an antitrust conspiracy is an agreement and a conscious decision by each defendant to join it." *In re Cal. Title Ins. Antitrust Litig., No. C 08-01341 JSW, 2009 U.S. Dist. LEXIS 43323, 2009 WL 1458025, at *7-8 (N.D. Cal. May 21, 2009)*.

Defendants argue that Plaintiffs fail to state any valid claims against the majority of Synta affiliates and certain individual defendants because they do not allege any misconduct or participation in the conspiracy specific to each defendant. In the First Motion to Dismiss, Defendants challenge the allegations against SW and individual defendants Messrs. Anderson, Lupica, and Lee.

With respect to the individual defendants, Messrs. Anderson, Lupica, and Lee, Defendants argue that they cannot be held liable for antitrust violations "just because they served as CEO at the time." First Mot. to Dismiss at 15 (citing *F.T.C. v. Swish Mktg.*, No. C 09-03814 RS, 2010 U.S. Dist. LEXIS 15016, 2010 WL 653486, at *5-6 (N.D. Cal. Feb. 22, 2010)). Defendants argue that Plaintiffs must instead plead that the individuals actively participated in "inherently wrongful conduct." *Id.* (citing *Murphy Tugboat Co. v. Shipowners & Merchants Towboat Co., 467 F. Supp. 841, 853 (N.D. Cal. 1979)*, *aff'd sub nom. Murphy Tugboat Co. v. Crowley, 658 F.2d 1256 (9th Cir. 1981)*). Defendants contend that the SAC contains no such **[*24]** allegations of inherently wrongful conduct by the individual defendants, such that they could be held liable for the corporations' antitrust violations.

Plaintiffs argue that "the SAC's claims against Defendants Lee, Lupica, and Anderson are not based upon the bare fact that they were all Celestron's CEO, but rather their actual acts in furtherance of the anticompetitive conspiracy." Dkt. No. 86, Opp'n to First Mot. to Dismiss ("First Opp'n"), at 18. For example, the SAC alleges that "[a]s part of their pricing coordination efforts, Celestron's current CEO, Defendant Corey Lee, worked with co-conspirators Synta and Ningbo Sunny to steal competitors' trade secret sales and pricing information." SAC ¶ 99; *see also id.*, Ex. 12 (email exchange showing Mr. Lee requesting confidential information regarding competitor Orion's order statistics from Ningbo Sunny).

The SAC also alleges that Messrs. Lupica and Anderson were highly involved in orchestrating Ningbo Sunny's acquisition of Meade. *See, e.g., id.* ¶ 78 (Ningbo Sunny's Peter Ni sent an email to Mr. Anderson requesting that Celestron and Synta continue to provide financial support for the Meade transaction); *id.* ¶ 82 ("Defendants Lupica **[*25]** and Anderson worked with Sheppard Mullin to help structure and negotiate the [Meade] transaction and to keep Chairmen Shen and Ni informed about its progress."). After the acquisition, Mr. Lupica became Meade's CEO. *Id.* ¶¶ 83-84. In an email to Ningbo Sunny and Synta representatives, Mr. Lupica wrote: "if we take advantage of the strong relationships among Sunny, Synta, Celestron and Meade (under Peter's ownership) we can quickly turn the company around and the four companies can dominate the telescope industry." *Id.*, Ex. 17. Similarly, in an email to Ningbo Sunny's Mr. Ni and Mr. Anderson, Mr. Shen explained that "[t]he best way in the future is to divide the products and sell them into different markets to reduce conflicts." *Id.* ¶ 97, Ex. 10.

Thus, the SAC suggests that Mr. Anderson was directly involved in negotiating Celestron's role in Ningbo Sunny's 2013 acquisition of Meade; that he was aware of and approved of Celestron's payments to Ningbo Sunny; and that he was aware of Mr. Ni's desire to "divide the products." Like Mr. Anderson, Mr. Lupica was involved in advising Ningbo Sunny's legal team on the acquisition of Meade, and he is alleged to have become Meade's CEO following **[*26]** Ningbo Sunny's acquisition of Meade. He appears on a number of communications in which conduct of the conspiracy is discussed. The Court further finds that the allegations against Mr. Lee, while less extensive, plausibly allege that he participated in the conspiracy. Taking these allegations as true, the Court finds that they plausibly allege that Messrs. Anderson, Lupica, and Lee played a role in the alleged conspiracy such that they may be held liable for its consequences.

With respect to SW, the SAC alleges that SW is a wholly owned subsidiary of David Shen's company Synta Tech, that Mr. Shen and his family created SW to acquire Celestron in 2005, that they operate it as a holding company, and that Mr. Shen's sister Sylvia Shen is SW's CEO, CFO, and Secretary. SAC ¶¶ 24-25. The SAC further alleges that all "Synta-related holding companies and shell corporations," including SW, "are operated and run for the common benefit of one another and Chairman Shen and have aided, encouraged, and cooperated with Defendants and their coconspirators to fix the prices of telescopes, and dominate and allocate the markets for telescope manufacturing and distribution." *Id.* ¶ 37. It further alleges **[*27]** that these Synta affiliates "are designed to hide assets, obscure ownership, and divert assets and shift capital away from the People's Republic of China on behalf of their co-conspirators who are based in China." *Id.*

The Court finds that these allegations are not sufficient to raise a plausible inference that SW participated in the alleged conspiracy. The fact that SW was created for the purpose of acquiring Celestron in 2005 does not raise any inference of wrongdoing given that, as explained further below, the SAC does not allege any particular misconduct with respect to that acquisition. It is common for companies to create special purpose entities or holding companies for the purpose of acquiring a target, and without more, there is nothing nefarious about the use of such a holding company to acquire Celestron. The allegations that SW has "aided, encouraged, and cooperated with Defendants and their coconspirators to fix the prices of telescopes" merely offers a legal conclusion, which the Court need not accept as true. *Fayer, 649 F.3d at 1064*; *Adams, 355 F.3d at 1183*.

In the IPP Order, the Court analyzed a different and detailed set of allegations regarding how the Synta "corporate family" operated as a single enterprise. *See* ***[*28]*** *Hightower*, No. 5:20-cv-03639-EJD, Dkt. No. 113 ¶¶ 88-89 (N.D. Cal. Nov. 6, 2020). The Court found those allegations sufficient based on precedent from this District involving nearly identical allegations. *See, e.g., Jones v. Micron Tech. Inc., 400 F. Supp. 3d 897, 923 (N.D. Cal. 2019)*; *In re Cathode Ray Tube I, 738 F. Supp. 2d at 1019-22*; *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179, 1184-85 (N.D. Cal. 2009)*. No such allegations are present in the SAC here. *In re Cal. Title Ins.*, 2009 U.S. Dist. LEXIS 43323, 2009 WL 1458025, at *8 (finding insufficient allegations that "each of the Parent Corporations 'wholly owns and controls its affiliates and subsidiaries,' that each does business in California 'through' those subsidiaries, and that each of the subsidiaries 'engaged in the conduct challenged here with the approval' of the Parent Corporations"). Thus, the Court finds that Plaintiffs have failed to adequately allege claims against SW.

In the Second Motion to Dismiss, Defendants challenge the allegations against Sylvia Shen, Jack Chen, Pacific Telescope, Nantong Schmidt, Olivon Manufacturing, Olivon USA, and Suzhou Synta. The SAC raises the following allegations as to each of these parties:

- Sylvia Shen is David Shen's sister, is a conduit through whom he "exercises control over several Synta-related entities," is a member of Celestron's executive committee, and personally "participated in, planned, and carried out the conspiracy" (SAC ¶ 17);

- Jack Chen is Sylvia Shen's husband, a member of Celestron's executive committee, **[*29]** and personally "participated in, planned, and carried out the conspiracy" (*id.* ¶ 18);

- Pacific Telescope is controlled by Sylvia Shen and it "participated in Defendants' conspiracy by distributing Synta telescopes" (*id.* ¶ 29);

- Nantong Schmidt "is owned and/or controlled by David Shen" and participated in the conspiracy by "manufactur[ing] telescopes that were sold into this District during the Class Period, including to Defendant Celestron" at artificial, supracompetitive prices (*id.* ¶ 21);

- Olivon Manufacturing is controlled by Jean Shen and "participated in Defendants' conspiracy by falsely representing to telescope distributors that Synta's horizontal competitor and co-conspirator Ningbo Sunny Electronic Co., Ltd. is one of Defendant Jean Shen's 'family's companies,' thereby unlawfully coordinating price fixing and market division among horizontal competitors" (*id.* ¶¶ 27, 30);

- Olivon USA is controlled by Jean Shen and "participated in Defendants' conspiracy by falsely representing to telescope distributors that Synta's horizontal competitor and co-conspirator Ningbo Sunny Electronic Co., Ltd. is one of Defendant Jean Shen's 'family's companies,' thereby unlawfully coordinating **[*30]** price fixing and market division among horizontal competitors" (*id.* ¶¶ 28, 30);

- Suzhou Synta "is owned and/or controlled by David Shen and his family" and participated in the conspiracy by "manufactur[ing] telescopes that were sold into this District during the Class Period" at Defendants' artificial, supracompetitive prices (*id.* ¶ 20).

There are several other allegations throughout the SAC that are not raised in the briefing regarding Sylvia Shen, including that she sent or received several emails in which Ningbo Sunny representatives discussed "how to avoid conflict with Celestron products" (*id.* ¶ 106, Ex. 15) and in which Mr. Anderson discusses Celestron providing financial support to Ningbo Sunny during the Meade transaction (*id.*, Ex. 2), among others. The Court finds these allegations sufficient to state claims against Ms. Shen.

As to all other defendants listed above, the Court finds the allegations insufficient for the same reasons as stated above with respect to SW. Allegations merely stating that each defendant "participated in" the conspiracy are conclusory, and Plaintiffs have provided no additional factual allegations from which one could deduce that each defendant joined **[*31]** the conspiracy and played a certain role in it.

In the Synta Canada Motion, Jean Shen and Synta Canada challenge the allegations against them. With respect to Synta Canada, the SAC alleges that it is a 20% owner of Suzhou Synta and that David Shen and his family members own or control Synta Canada. SAC ¶ 26. The SAC further alleges that all "Synta-related holding companies and shell corporations," including Synta Canada, "are operated and run for the common benefit of one another and Chairman Shen and have aided, encouraged, and cooperated with Defendants and their coconspirators to fix the prices of telescopes, and dominate and allocate the markets for telescope manufacturing and distribution." *Id.* ¶ 37. It further alleges that these Synta affiliates "are designed to hide assets, obscure ownership, and divert assets and shift capital away from the People's Republic of China on behalf of their co-conspirators who are based in China." *Id.* These are substantially the same allegations as those against SW, and for the same reasons the Court finds that Plaintiffs have not stated a claim against SW, it likewise finds that Plaintiffs have not stated a claim against Synta Canada.

With respect **[*32]** to Jean Shen, Plaintiffs allege that she is David Shen's sister, that she is a conduit through whom he "exercises control over" Olivon Manufacturing and Olivon USA, and that she personally actively "participated in, planned, and carried out the conspiracy" by "representing to telescope distributors that Synta's horizontal competitor and co-conspirator Ningbo Sunny . . . was one of 'my family's companies.'" SAC ¶ 19. The most that can be inferred from these sparse allegations is that Ms. Shen was aware of the connection between Synta and Ningbo Sunny. However, these allegations say nothing about any action that Ms. Shen may have taken to join the conspiracy, and it is not clear what role—if any—she played in it. Accordingly, the Court finds that Plaintiffs have failed to state a claim against Ms. Shen. *In re Cathode Ray Tube I, 738 F. Supp. 2d at 1019*; *In re TFT-LCD, 586 F. Supp. 2d at 1117*.

Thus, the Motions to Dismiss are GRANTED as to SW, Jack Chen, Pacific Telescope, Nantong Schmidt, Olivon Manufacturing, Olivon USA, Suzhou Synta, Jean Shen, and Synta Canada.

C. Sherman Act § 1 Claim

HN13[] Section 1 of the Sherman Act provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared **[*33]** to be illegal." 15 U.S.C. § 1. A plaintiff asserting a claim under § 1 must plead: (1) a contract, combination or conspiracy among two or more persons or distinct business entities (2) which is intended to restrain or harm trade; (3) which actually injures competition, and (4) harm to the plaintiff from the anticompetitive conduct. *Name.Space, Inc. v. Internet Corp. for Assigned Names & Numbers, 795 F.3d 1124, 1129 (9th Cir. 2015)* (quoting *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197 (9th Cir. 2012)*). But "[b]ecause § 1 . . . does not prohibit all unreasonable restraints of trade but only restraints effected by a contract, combination, or conspiracy, the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express." *Twombly, 550 U.S. at 553*.

Defendants argue first that Plaintiffs fail to allege which Defendants reached what agreements. The Court disagrees. The SAC raises numerous allegations that plausibly suggest a tacit or express agreement to restrain trade. *See, e.g.*, SAC ¶ 96 (alleging that "[a]fter the acquisition, Synta, Celestron, Ningbo Sunny, and Meade colluded not to compete with one another. . . . For example, an email between the principals of Synta and Ningbo Sunny shows Chairman Shen asking Ningbo Sunny's Chairman Peter Ni to work out what he calls a 'tacit understanding' with Defendant Anderson **[*34]** (Celestron's then-CEO) about not competing against Celestron for sales to Costco"); *id.* ¶ 97 (alleging that Synta's Mr. Shen informed Ningbo Sunny's Mr. Ni and Celestron's David Anderson, "[t]he best way in the future is to divide the products and sell them into different markets to reduce conflicts"); *id.* ¶ 107 (alleging that Ningbo Sunny's Mr. Chiu also explained to Synta's Ms. Sylvia Shen that Ningbo Sunny "will take prompt action to avoid conflict in the astronomical market," including "abandoning the small OEM customers so as to protect big customers."). The Court finds these allegations, along with others in the SAC, to sufficiently state a claim under § 1. ("Restraints that are per se unlawful include horizontal agreements among competitors to fix prices or to divide markets." *United States v. eBay, Inc., 968 F. Supp. 2d 1030, 1037 (N.D. Cal. 2013)* (quoting *Leegin Creative Leather Prod., Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*) (internal quotation marks omitted).

Defendants next argue that there "there is no pre-2013 conduct forming the basis for this cause of action." First Mot. to Dismiss at 18. Plaintiffs seek to bring this case on behalf of "all similarly situated retailers and distributors who purchased a telescope manufactured or sold by Defendants from Synta's acquisition of Celestron in 2005 through such time **[*35]** as class notice is given." SAC ¶ 122. The only pre-2013 conduct alleged in the SAC, however, is Synta's acquisition of Celestron in 2005. Just as in the complaint in the IPP Action, the SAC alleges no specific misconduct in connection with that transaction, nor does the SAC allege any particular misconduct occurring between 2005 and the Meade acquisition in 2013. Thus, the Court agrees with Defendants that Plaintiffs fail to sufficiently allege any violation of § 1 before the Meade acquisition in 2013.

Defendants' motions are GRANTED as to Plaintiffs' Sherman Act § 1 claim, to the extent it is based on pre-2013 conduct. The Court otherwise DENIES Defendants' motions as to the Sherman Act § 1 claim.

D. Sherman Act § 2 Claim

HN14[] Section 2 of the Sherman Act prohibits monopolization or attempted monopolization of trade or commerce. 15 U.S.C. § 2. A plaintiff asserting an attempt claim must plead: (1) a specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct directed at accomplishing that purpose; (3) a dangerous probability of achieving "monopoly power," and (4) causal antitrust injury" *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995)*; *Optronic Techs., Inc. v. Ningbo Sunny Elec. Co., No. 5:16-CV-06370-EJD, 2017 U.S. Dist. LEXIS 160238, 2017 WL 4310767, at *3 (N.D. Cal. Sept. 28, 2017)*. A monopoly claim has two elements, aside from antitrust injury: (1) the defendant possessed monopoly power in the relevant market and (2) the defendant **[*36]** willfully acquired or maintained that power. *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1202 (9th Cir. 1997)*.

As with the *§ 1* claim, Defendants argue that Plaintiffs fail to raise any allegations of misconduct before the Meade acquisition in 2013. To the extent Plaintiffs seek to base their *§ 2* claim on Synta's acquisition of Celestron, Defendants argue that Plaintiffs failed to allege any monopolization or threat of monopolization arising out of that merger. In fact, Plaintiffs specifically allege that it was Ningbo Sunny's acquisition of Meade that ultimately gave the co-conspirators effective monopoly power over the market. SAC ¶ 41 (alleging that Ningbo Sunny "orchestrat[ed] the acquisition of Meade using the Synta Defendants' support and assistance to coordinate its pricing, sales, and manufacturing practices with Synta and Celestron to effectively monopolize the U.S. market."). Plaintiffs do not refute this point. The Court finds that Plaintiffs have failed to state a *§ 2* claim for any conduct arising before 2013.

Defendants next contend that "the SAC fails to allege that Defendants either have a monopoly in the market . . . or the 'dangerous probability' of Defendants achieving such a monopoly." First Mot. to Dismiss at 20. Defendants argue that "the **[*37]** SAC simply alleges that Ningbo Sunny and Defendants, in the aggregate, control the distribution market without specifying Defendants' alleged share of the market." *Id.* This argument ignores several allegations in the SAC specifically describing Defendants' share of the relevant market as a result of the conspiracy. *See, e.g.*, SAC ¶ 55 ("The Synta/Celestron Defendants and coconspirators and the Ningbo Sunny/Meade Co-Conspirators together control over 80 percent of that market."); *id.* ¶ 3 ("Synta and Ningbo Sunny together manufacture over 80% of all consumer telescopes imported into the U.S. Instead of competing, Synta and Ningbo Sunny agree on what prices to charge and which products their companies will produce. They have used their unlawful cooperation and dominance over telescope supply to enable their subsidiaries to take over the U.S. distribution market. As a result of this unlawful conspiracy, Celestron controls at least 70% of all U.S. consumer telescope sales, including sales to small distributors like Plaintiffs and their fellow class members, who are forced to pay supracompetitive prices."); *id.* ¶ 118 ("Ningbo Sunny and Synta have together controlled over 65% of the Manufacturing **[*38]** Market since 2012. In 2018, they controlled over 90%.").

Finally, Defendants argue that "[a] mere showing of substantial or even dominant market share alone cannot establish market power sufficient to carry out a predatory scheme." First Mot. to Dismiss at 21 (quoting *Rebel Oil, 51 F.3d at 1439*) (internal quotation marks omitted). ***HN15***[] Instead, a plaintiff "must show that new rivals are barred from entering the market and show that existing competitors lack the capacity to expand their output to challenge the predator's high price." *Rebel Oil, 51 F.3d at 1439*. Plaintiffs point to several allegations in the SAC alleging barriers to entry as a result of the conspiracy. For example, they allege that "telescope manufacturing has high capital investment costs, and the two key manufacturers (Synta and Ningbo Sunny) are vertically integrated with the largest distributors." SAC ¶ 66. Additionally, "[g]iven the size of the market, there are not enough independent distributors to make building an independent manufacturing facility profitable." *Id.* The SAC also alleges that Defendants acquired key intellectual property rights through their acquisition of Meade, which prevented smaller distributors from seriously competing. *Id.* ¶ 67. The Court finds **[*39]** these allegations sufficient to show a dangerous probability of Defendants achieving monopoly power.

Thus, the Court finds that Plaintiffs have adequately stated a *§ 2* claim for the period starting in 2013.

E. Clayton Act § 7 Claim

HN16[] "The *Clayton Act § 7* prohibits a corporation from acquiring the stock or assets of another corporation 'in any line of commerce' in which the effect 'may be substantially to lessen competition, or to tend to create a monopoly.'" *15 U.S.C. § 18*. When examining a *§ 7* claim, a court must be mindful that "[e]very merger of two existing entities into one, whether lawful or unlawful, has the potential for producing economic readjustments that adversely affect some persons." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 487, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. "But Congress has not condemned mergers on that account; it has condemned them only when they may produce anticompetitive effects." *Id.*

Plaintiffs bring a claim under *§ 7* arising out of Ningbo Sunny's acquisition of Meade, alleging that Defendants helped to facilitate that transaction. As an initial matter, for the same reasons stated above, the Court finds that Plaintiffs have failed to allege any conduct giving rise to a *§ 7* claim before the Meade transaction in 2013.

Defendants argue that "Plaintiffs do not substantively allege a **[*40]** violation of *Section 7* anywhere in the SAC," noting that "the only reference to this statute appears in the heading for the Second Cause of Action." First Mot. to Dismiss at 18. Defendants ignore the SAC's express allegation that "Defendant Celestron took equity in its horizontal competitor Meade — which is memorialized in shadow books kept by Defendants' coconspirators." SAC ¶ 89. Accepting this allegation as true, the SAC plausibly alleges that the Meade merger produced anticompetitive effects in violation of *§ 7* of the Clayton Act.

Thus, the Court GRANTS Defendants' motions as to Plaintiffs' *§ 7 Clayton Act* claim to the extent that claim is based on conduct occurring prior to 2013, but DENIES the motions to dismiss the claim in all other respects.

F. State Law Claims

Finally, Defendants argue that Plaintiffs fail to sufficiently allege a Cartwright Act claim or an unfair competition ("UCL") claim because they do not articulate the specific conduct underlying these claims. Plaintiffs contend that "because the SAC states valid Sherman Act claims, it also states valid Cartwright Act claims." First Opp'n at 25; *Cty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)* ("The analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright **[*41]** Act . . . was modeled after the Sherman Act."). Similarly, Plaintiffs argue that the UCL claims "rise and fall" with Plaintiffs' federal claims. *Id.* The Court agrees.

HN17[] "The UCL broadly prohibits 'any unlawful, unfair or fraudulent business act or practice.'" *Alvarez v. Chevron Corp., 656 F.3d 925, 933 (9th Cir. 2011)* (quoting *Cal. Bus. & Prof. Code § 17200*). "By proscribing any unlawful business practice, [the UCL] borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (citation and internal quotation marks omitted). Thus, the "unlawful" prong of the statute prohibits "anything that can properly be called a business practice and that at the same time is forbidden by law." *Id.*

Because the Court finds that Plaintiffs have stated valid Sherman Act and Clayton Act claims, as described above, the Court similarly finds that Plaintiffs state valid state law claims.

G. Leave to Amend

In their opposition brief, Plaintiffs request leave to amend any pleading deficiencies. ***HN18***[] "Requests for leave to amend should be granted with 'extreme liberality.'" *Brown v. Stored Value Cards, Inc., 953 F.3d 567, 574 (9th Cir. 2020)*; *see also* *Fed. R. Civ. P. 15(a)(2)* ("The court should freely give leave when justice so requires."). Because it may be possible for Plaintiffs to allege additional conduct before 2013 **[*42]** which might support antitrust claims for the class period alleged, the Court finds that amendment would not be futile. Similarly, because it may be possible for Plaintiffs to add allegations regarding the participation of the Synta affiliates, the Court finds that further amendment as to those defendants would not be futile either.

The Court, therefore, grants Plaintiffs leave to amend to allege facts, if any, to support the alleged class period between 2005 and 2012, and to support a finding of liability as to the defendants dismissed herein.

IV. MOTION TO STRIKE

HN19[] A court "may order stricken from any pleading any insufficient defense or any redundant, immaterial, impertinent, or scandalous matter" pursuant to *Federal Rule of Civil Procedure 12(f)*. *Fed. R. Civ. P. 12(f)*. "'Impertinent' matter consists of statements that do not pertain, and are not necessary, to the issues in question." *Fantasy, Inc. v. Fogerty, 984 F.2d 1524, 1527 (9th Cir. 1993)*, *rev'd on other grounds*, *510 U.S. 517, 114 S. Ct. 1023, 127 L. Ed. 2d 455 (1994)*. "'Redundant' allegations are those that are needlessly repetitive or wholly foreign to the issues involved in the action." *Cal. Dep't of Toxic Substances Control v. Alco Pac., Inc., 217 F. Supp. 2d 1028, 1033 (C.D. Cal. 2002)*. "Scandalous matters are allegations that unnecessarily reflect on the moral character of an individual or state anything in repulsive language that detracts from the dignity of the court." *Consumer Sols. REO, LLC v. Hillery, 658 F. Supp. 2d 1002, 1020 (N.D. Cal. 2009)* (internal quotations **[*43]** and citations omitted).

"[T]he function of a 12(f) motion to strike is to avoid the expenditure of time and money that must arise from litigating spurious issues by dispensing with those issues prior to trial." *Sidney-Vinstein v. A.H. Robins Co., 697 F.2d 880, 885 (9th Cir. 1983)*. ***HN20***[] In determining whether to grant a motion to strike, a district court views the pleadings in a light most favorable to the non-moving party, and "resolves any doubt as to the relevance of the challenged allegations" in the plaintiff's favor. *Cal. Dep't of Toxic Substances Control, 217 F. Supp. 2d at 1033*.

Defendants move to strike (1) allegations asserting the class period from 2005 to 2012, and (2) allegations concerning the jury verdict in the *Orion* Action.

A. Class Allegations

Defendants argue that the Court should strike Plaintiffs' allegations asserting a class period beginning in 2005 because Plaintiffs fail to allege any actionable conduct prior to 2013. Given the Court's holdings above, the Court agrees that there is no actionable conduct alleged to have occurred before 2013. The Court has, however, granted Plaintiffs leave to amend their complaint to cure some of the deficiencies discussed herein.

For the same reasons articulated in the more in-depth analysis in the IPP Order regarding the motion to strike in that case, the Court DENIES **[*44]** AS MOOT the Motion to Strike, without prejudice to renewal should Plaintiffs fail to cure the pleading deficiencies as to the period between 2005 and 2012.

B. *Orion* Action Allegations

Defendants also seek to strike allegations relating to the *Orion* Action and its verdict. They argue that because that action is not binding on Defendants, the allegations are therefore impertinent and prejudicial. Specifically, Defendants seek to strike the following allegations:

- Paragraph 122: class period beginning in 2005;
- From Paragraph 2: "A jury has already found that Celestron and its parent company in China, Synta,[] conspired with their competitor [Ningbo Sunny] to fix prices, divide the market, retaliate against competitors, mislead U.S. authorities, illegally acquire assets an dominate the U.S. market so that they could rip off American purchasers.";
- From Paragraph 5: "where a jury awarded over $52,000 in damages against Defendants' co-conspirators.";
- All of Paragraph 90: "On November 26, 2019, a jury found that this acquisition, which was orchestrated and aided and abetted by Defendants, their co-conspirators and their agents, violated the antitrust laws."

The Court finds that certain of **[*45]** these allegations provide background and context to the action, while others are indeed impertinent and overly prejudicial. *See In re Facebook PPC Advert. Litig., 709 F. Supp. 2d 762, 773 (N.D. Cal. 2010)* (***HN21***[] "Allegations 'supplying background or historical material or other matter of an evidentiary nature will not be stricken unless unduly prejudicial to defendant.'") (quoting *LeDuc v. Kentucky Cent. Life Ins. Co., 814 F. Supp. 820, 830 (N.D. Cal. 1992)*). Specifically, the Court finds that Paragraph 2 improperly implies that Celestron and Defendants in this case have already been held liable for the same events alleged here, which is not true. While Plaintiffs argue that some of the holdings in the *Orion* Action may be admissible in this action against Ningbo Sunny, which was a defendant in the *Orion* Action, the allegation at issue is not specific to Ningbo Sunny. While the factual background of the *Orion* Action is pertinent to this case, allegations suggesting specific findings of liability against Defendants are not. The remainder of the *Orion* related allegations listed above simply provide background and context for the claims and the SAC as a whole.

Thus, the Court GRANTS IN PART Defendants' Motion to Strike. The cited portion of Paragraph 2 is hereby STRICKEN.

V. CONCLUSION

For the reasons stated above, the Court GRANTS IN PART the **[*46]** First and Second Motions to Dismiss Plaintiffs' Sherman Act, Clayton Act, and state law claims to the extent those claims are based on conduct arising before 2013. The remainder of Defendants' Motions to Dismiss are DENIED.

In light of the Court's findings on Defendants' Motions to Dismiss, the Court DENIES AS MOOT Defendants' Motion to Strike allegations regarding the alleged class period. The Court GRANTS IN PART and DENIES IN PART Defendants' Motion to Strike allegations regarding the *Orion* Action.

Plaintiffs may file an amended complaint, if any, by no later than **14 days** from the date of this order.

IT IS SO ORDERED.

Opinion

ORDER REGARDING MOTION TO DISMISS AMENDED COUNTERCLAIMS

Re: Dkt. No. **[*2]** 132

I. INTRODUCTION

Plaintiff Facebook, Inc. brought this action asserting that Defendants BrandTotal Ltd. and Unimania, Inc. (collectively, "BrandTotal") improperly collected data from Facebook's social networks. BrandTotal, which is in the business of analyzing advertising data collected from social media websites, asserts counterclaims based on Facebook's efforts to block its collection of data. The Court previously denied BrandTotal's motion for a temporary restraining order ("TRO") and granted Facebook's motion to dismiss BrandTotal's counterclaims, with leave to amend. BrandTotal has now amended its counterclaims and moved for a preliminary injunction, and Facebook moves once again to dismiss. The Court held a hearing on May 28, 2021, at which the parties reached an agreement that rendered BrandTotal's motion for a preliminary injunction moot. For the reasons discussed below, Facebook's motion to dismiss is GRANTED in part and DENIED in part.[1]

II. BACKGROUND

The following summary of the facts, allegations, and procedural history of this case is intended for the convenience of the reader to provide context for the analysis below, and should not be construed as resolving any disputed **[*3]** issue of fact. Specific allegations of the amended counterclaims at issue are addressed in the Court's analysis. Because this order addresses a motion to dismiss under *Rule 12(b)(6)*, which turns on the sufficiency of BrandTotal's allegations, its analysis does not address the evidentiary record submitted in support of the motion for a preliminary injunction or the earlier motion for a TRO, although some of that evidence is included in this background section for context.

BrandTotal is an advertising consulting company that helps its corporate customers analyze their own advertising and their competitors' advertising on social media and other websites, by enlisting individual consumers—in BrandTotal's terminology, "panelists"—to agree to share the advertisements they view on those websites. In order to prepare valuable analysis for its corporate customers, BrandTotal relies heavily on data collected from Facebook, as opposed to other social media websites, due to Facebook's size. BrandTotal's most popular consumer product is UpVoice, an application or browser extension that offers panelists cash rewards to share their demographic information and the advertisements they see and interact with on social **[*4]** media. The particular form of UpVoice central to this case is an extension for the Google Chrome browser, offered for download from Google's web store. BrandTotal has also offered other applications and browser extensions that operate similarly in their collection of data, but provide different (non-cash) benefits to users, like a streamlined interface for browsing social media networks. BrandTotal began offering some of those programs multiple years ago. BrandTotal offers its consumer-facing products under the name of its subsidiary Unimania, in what was intended as an effort to obscure the source of its analytical data from potential competitors.

The UpVoice product available before this case commenced—which the parties refer to here as UpVoice Legacy for clarity—automatically collected multiple categories of information when users who had installed it browsed Facebook, including demographic data about the user, information about advertisements the user encountered on Facebook, and information that Facebook had generated about that user's preferences. Some such data was collected by the product automatically querying Facebook for information that would not otherwise have been transmitted **[*5]** to the user in the course of their browsing (although the user could have accessed that information if they chose to). According to BrandTotal, it disclosed all of this data collection to its users and obtained their consent, and did not collect personal data pertaining to any other Facebook users. All personal data was deidentified from a user's name and aggregated for the purpose of analyzing the demographic groups to whom particular advertisements were presented. One flaw in BrandTotal's consent system was that UpVoice Legacy could collect potentially collect personal data from unsuspecting users who logged into Facebook on a shared computer where someone else had installed UpVoice Legacy, although there is no evidence that either party considered that issue before this litigation commenced.

---

[1] The parties have consented to the jurisdiction of a magistrate judge for all purposes pursuant to *28 U.S.C. § 636(c)*.

BrandTotal uses UpVoice and similar products to obtain data about advertising on Facebook that is not available from other sources. Facebook maintains a public "Ad Library" of all advertisements currently running on its platform, but with the exception of ads related to politics and social issues—a category of ads that tends not to be of particular interest to BrandTotal's corporate clients—that **[*6]** library does not provide information about ads that are no longer running, the demographic groups to whom the ads were presented, the number of people who saw an ad, or how users have engaged with an ad. Facebook also offers certain approved application programming interfaces ("APIs") to access data from its network, but none that provide the sort of information that BrandTotal collects through UpVoice and its other products.

By automatically collecting data from users about the ads they see on Facebook and other social networks, BrandTotal is able to provide analytical services to its corporate clients about their own and their competitors' advertising efforts. Facebook provides a more limited set of similar information to at least some advertisers on its platform in at least some circumstances, including metrics for "share of voice"—the portion of advertising within a particular category that a particular advertiser accounts for.

In 2018, a third party (Adguard) published a report indicating that BrandTotal used unsecure means to transmit personal data. BrandTotal thereafter changed its encryption method to a more secure standard. Facebook began investigating some BrandTotal products **[*7]** in the spring of 2019 but closed its investigation after determining that Google had removed those products from its store. BrandTotal disputes that those products were removed.

Among other potentially relevant provisions, Facebook's terms of service prohibit "collect[ing] data from our Products using automated means (without [Facebook's] prior permission)." In March of 2019, BrandTotal received legal advice from its Israeli counsel concluding that to the extent its products passively collected data served to users during their browsing, that did not implicate Facebook's terms of service, based in part on a dubiously narrow interpretation of the word "Products" in those terms to exclude advertisements—an interpretation that, at least thus far, BrandTotal has not pursued here. BrandTotal's attorneys determined that with respect to "active" collection through "calls" initiated by BrandTotal's products, BrandTotal was in a "grey area" because on one had the data collected might not implicate the terms of service if it was not part of Facebook's "Products," but on the other hand that method of collection could be considered as misuse of Facebook's APIs to access data for which BrandTotal **[*8]** lacked permission. BrandTotal did not change its practices in response to that opinion.

In the spring of 2020, Facebook began investigating UpVoice Legacy. On September 21, 2020, Facebook employee Jeremy Brewer sent an email to Google employee Benjamin Ackerman identifying "some Chrome extensions we believe are improperly scraping user PII[2] (e.g. gender, relationship status, ad interests, etc.) without proper disclosure"—including UpVoice Legacy—and requesting that Ackerman coordinate with Facebook security researcher Sanchit Karve, who had conducted the investigation, to "see if there is a way to collaborate and better protect user privacy." 1st. Am. Counterclaims ("FACC," dkt. 120) Ex. I. Karve replied to note that Google had removed certain other extensions that behaved similarly, produced by another developer. *Id.* Ackerman did not immediately respond.

In the days immediately following that exchange, a handful of internal Facebook emails involving other Facebook employees reflect that Facebook had received inquiries from advertisers who were either using BrandTotal's product or curious about its capabilities. One Facebook employee suggested that Facebook might consider partnering with **[*9]** BrandTotal. FACC Ex. G. An employee who had received a request from Facebook's marketing team regarding BrandTotal's capabilities contacted Karve on September 24, 2020, who informed her that Facebook was "enforcing on them this week." FACC Ex. H. The next day, Karve followed up with Ackerman at Google, who responded three days after that on September 29, 2020 to say that Google would investigate the browser extensions Facebook identified (including UpVoice Legacy), and that based on a preliminary review of BrandTotal's privacy policy, "it does look like they are collecting a bunch of information for advertising purposes which is a no no." FACC Ex. I.

[2] "PII" refers to "personally identifiable information."

On September 30, 2020, Facebook disabled BrandTotal's accounts on its social networks. On October 1, 2020, it filed a civil action against BrandTotal in state court. Later that day, Google removed UpVoice Legacy from its store, which disabled most installed copies of the browser extension, although around ten to fifteen percent of installations continued to collect data (with that number slowly declining over time) until relatively recently, when changes that Facebook made caused them to cease sending data. BrandTotal listed another version **[*10]** of UpVoice on Google store on October 12, 2020, which it contends was a mistake arising from efforts to prepare a new version to go live only if it prevailed in obtaining a TRO.

On October 14, 2020, Facebook dismissed its state court action and filed the present action in this Court, adding a federal claim under the *Computer Fraud and Abuse Act ("CFAA")*. BrandTotal filed counterclaims and moved for a TRO, which the Court denied because, although BrandTotal had shown serious issues going to the merits of its counterclaims, the public interest did not favor requiring Facebook, through expedited judicial proceedings, to allow a third party to scrape data from its network without BrandTotal having made any effort before deploying UpVoice Legacy to coordinate with Facebook and confirm that its program would respect user privacy. Order re Mot. for TRO (dkt. 63).[3] The Court later granted Facebook's motion to dismiss BrandTotal's counterclaims because, among other reasons, an order by the Federal Trade Commission ("FTC") requiring Facebook to block access to any "Covered Third Party" that did not certify compliance with Facebook's terms of use appeared to apply to BrandTotal, but granted leave to amend as to most of the counterclaims. **[*11]** Order re Mot. to Dismiss Counterclaims ("1st MTD Order," dkt. 108).[4]

BrandTotal initially filed a motion for a preliminary injunction one day before the hearing on the first motion to dismiss, but withdrew that motion after that hearing and later filed its renewed motion for a preliminary injunction after amending its counterclaims. The Court denied that motion as moot based on the parties' agreement at the May 28, 2021 hearing. *See* dkt. 150. Facebook has moved once again to dismiss BrandTotal's counterclaims.

Just before filing its preliminary injunction motion, BrandTotal released a new version of UpVoice, which the parties refer to here as UpVoice 2021. BrandTotal shared the source code for that program with Facebook two weeks before releasing it. UpVoice 2021 does not collect users' demographic data from Facebook, instead relying on users to enter that information in a form when they sign up for the program. The browser extension collects only identifying information for advertisements presented to the user while they are browsing, and does so passively by scanning the HTML code that Facebook serves to the user, without the UpVoice 2021 browser extension actively requesting any further **[*12]** information from Facebook. UpVoice 2021 also prompts users to confirm whether they wish to continue sharing that data when a new user logs into a social media account. Once the identifying information for an advertisement—a unique ID number, as well as the name of the page that sponsored the ad—is transmitted to BrandTotal, BrandTotal's servers (not the browser extension installed by a panelist) use that information to access the ad on a webpage visible to the general public that does not require logging in with a Facebook username and password, and gather further data about the ad from there.

BrandTotal now asserts the following counterclaims: (1) declaratory judgment that BrandTotal has not violated and will not violate the CFAA, FACC ¶¶ 93-101; (2) declaratory judgment that BrandTotal has not violated and will not violate *section 502 of the California Penal Code*, *id.* ¶¶ 102-10; (3) declaratory judgment that BrandTotal has not interfered and will not interfere with Facebook's contractual relations, *id.* ¶¶ 111-18; (4) intentional interference with contract, *id.* ¶¶ 119-60; (5) intentional interference with prospective economic advantage, *id.* ¶¶ 161-69; (6) violation of California's Unfair Competition Law (the "UCL"), *id.* **[*13]** ¶¶ 170-97.

III. ANALYSIS

---

[3] *Facebook, Inc. v. BrandTotal Ltd., 499 F. Supp. 3d 720 (N.D. Cal. 2020)*. Citations herein to the Court's previous orders in this case refer to page numbers of the versions filed in the Court's ECF docket.

[4] *Facebook, Inc. v. BrandTotal Ltd., No. 20-cv-07182-JCS, 2021 U.S. Dist. LEXIS 31558, 2021 WL 662168 (N.D. Cal. Feb. 19, 2021)*.

A. Legal Standard

A complaint may be dismissed for failure to state a claim on which relief can be granted under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. "The purpose of a motion to dismiss under *Rule 12(b)(6)* is to test the legal sufficiency of the complaint." *N. Star Int'l v. Ariz. Corp. Comm'n, 720 F.2d 578, 581 (9th Cir. 1983)*. Generally, a claimant's burden at the pleading stage is relatively light. *Rule 8(a) of the Federal Rules of Civil Procedure* states that a "pleading which sets forth a claim for relief . . . shall contain . . . a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*.

In ruling on a motion to dismiss under *Rule 12(b)(6)*, the court takes "all allegations of material fact as true and construe[s] them in the light most favorable to the non-moving party." *Parks Sch. of Bus. v. Symington, 51 F.3d 1480, 1484 (9th Cir. 1995)*. Dismissal may be based on a lack of a cognizable legal theory or on the absence of facts that would support a valid theory. *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)*. A pleading must "contain either direct or inferential allegations respecting all the material elements necessary to sustain recovery under some viable legal theory." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 562, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citing *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1106 (7th Cir. 1984)*). "A pleading that offers 'labels and conclusions' or 'a formulaic recitation of the elements of a cause of action will not do.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 555*). "[C]ourts 'are not bound to accept as true a legal conclusion couched as a factual allegation.'" **[*14]** *Twombly, 550 U.S. at 555* (quoting *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*). "Nor does a complaint suffice if it tenders 'naked assertion[s]' devoid of 'further factual enhancement.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 557*). Rather, the claim must be "'plausible on its face,'" meaning that the claimant must plead sufficient factual allegations to "allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* (quoting *Twombly, 550 U.S. at 570*).

With the exception of narrow doctrines of judicial notice, a court may not consider extrinsic evidence in resolving a motion under *Rule 12(b)(6)* without converting it to a motion for summary judgment, which the Court has not done here. *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)*. Accordingly, even though an evidentiary record has been submitted in this case for the purposes of BrandTotal's previous motion for a TRO and motion for a preliminary injunction, the Court disregards that evidence for the purpose of Facebook's motion to dismiss, and focuses instead on the allegations of BrandTotal's amended counterclaims.

B. Declaratory Judgment Counterclaims

The Court previously dismissed BrandTotal's counterclaim seeking declaratory judgment that it did not breach Facebook's terms of service, and denied leave to amend to assert a declaratory judgment counterclaim seeking **[*15]** to establish that those terms of service were unenforceable, holding that such a counterclaim would be redundant to Facebook's affirmative claims. 1st MTD Order at 11-12. BrandTotal now seeks declaratory judgment that its UpVoice 2021 product does not violate the CFAA or *section 502 of the California Penal Code*, and does not interfere with Facebook's contractual relations. FACC ¶¶ 93-118.

District courts have broad discretion whether to hear a counterclaim for declaratory judgment, and "[n]umerous courts have used that discretion to dismiss [such] counterclaims . . . where they are either the 'mirror image' of claims in the complaint or redundant of affirmative defenses." *Stickrath v. Globalstar, Inc., No. C07-1941 TEH, 2008 U.S. Dist. LEXIS 95127, 2008 WL 2050990, at *3 (N.D. Cal. May 13, 2008)*. BrandTotal argued that these new claims were not redundant because Facebook's original complaint did not address the new and distinct UpVoice 2021 product, "[a]ny litigation over UpVoice needs to extend to UpVoice 2021[,] and BrandTotal properly included counterclaims to ensure that it does." Defs.' Opp'n (dkt. 138 at 2; *see also id.* at 22-23.

After briefing on the present motion to dismiss BrandTotal's counterclaims closed, the parties stipulated to Facebook filing an amended complaint, which includes BrandTotal's release of UpVoice 2021. 1st Am.

Compl. **[*16]** (dkt. 148) ¶ 78. The amended complaint asserts claims including interference with contractual relations and violation of the CFAA and *section 502*, and seeks injunctive relief to bar those purportedly ongoing alleged violations. The case therefore now includes the issues BrandTotal wishes to adjudicate, without need for its mirror-image declaratory judgment counterclaims. As a matter of discretion, the Court GRANTS Facebook's motion to dismiss BrandTotal's declaratory judgment counterclaims, without leave to amend at this time, but without prejudice to BrandTotal later moving for leave based on changed circumstances—for example, if Facebook withdraws any of its affirmative claims or limits them to prior versions of UpVoice while BrandTotal believes it still has an interest in proving that UpVoice 2021 does not violate the laws at issue.[5]

C. Interference with Contract

"'The elements which a plaintiff must plead to state the cause of action for intentional interference with contractual relations are (1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of this contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual **[*17]** relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage.'" *hiQ Labs, Inc. v. LinkedIn Corp., 938 F.3d 985, 995-96 (9th Cir. 2019)* (quoting *Pac. Gas & Elec. Co. v. Bear Stearns & Co. ("PG&E"), 50 Cal. 3d 1118, 1126, 270 Cal. Rptr. 1, 791 P.2d 587 (1990)*). While the typical case involves actual breach, the element of "disruption" of a contract can also be satisfied "where the plaintiff's performance has been prevented or rendered more expensive or burdensome." *Id. at 996 n.8* (citation and internal quotation marks omitted); *see also* *PG&E, 50 Cal. 3d at 1129* ("[W]hile the tort of inducing breach of contract requires proof of a breach, the cause of action for interference with contractual relations is distinct and requires only proof of interference.").

"Under California law, a legitimate business purpose can indeed justify interference with contract, but not just any such purpose suffices." *hiQ, 938 F.3d at 997*. "'Whether an intentional interference by a third party is justifiable depends upon a balancing of the importance, social and private, of the objective advanced by the interference against the importance of the interest interfered with, considering all circumstances including the nature of the actor's conduct and the relationship between the parties.'" *Id.* (quoting *Herron v. State Farm Mut. Ins. Co., 56 Cal. 2d 202, 206, 14 Cal. Rptr. 294, 363 P.2d 310 (1961)*). Courts must determine whether the defendant's interest outweighs societal interests in stability of contracts **[*18]** (the defendant's mere pursuit of economic advantage generally does not), "whether the means of interference involve no more than recognized trade practices," "whether the conduct is within the realm of fair competition," and—most importantly—"whether the business interest is pretextual or asserted in good faith." *Id.* (citations and internal quotation marks omitted).

The Court previously dismissed this claim based on the defense of a legitimate business purpose, which was satisfied as to the allegations of the original counterclaims both by Facebook's interest in enforcing its own terms of use, and by Facebook's obligation to comply with the FTC's order. 1st MTD Order at 14-15. The Court also noted that BrandTotal may not have satisfied the affirmative elements of its claim:

> Whether BrandTotal has included sufficient allegations of each of those elements is a close call, and Facebook might be correct that BrandTotal's counterclaim requires further specificity as to, for example, the nature of its contracts with customers, the extent to which it could perform those contracts relying only on non-Facebook

---

[5] In briefing its motion for a preliminary injunction, BrandTotal argues that a likelihood of success on its declaratory judgment counterclaims could support injunctive relief, which would suggest that these counterclaims have practical value separate from Facebook's affirmative claims. The Court disagrees. A determination that UpVoice 2021 does not violate the particular laws at issue in these counterclaims would not in itself require Facebook to allow the use of UpVoice 2021 on its social networks. BrandTotal cites *hiQ*'s reference to the plaintiff in that case having asserted declaratory judgment claims (including claims to declare that it did not violate the CFAA and ***section 502***), *see* *938 F.3d at 992*, but the Ninth Circuit's analysis focused on the plaintiff's interference with contract claim, *id. at 995-99*, and addressed the CFAA only in the context of the defendant's argument that it preempted the interference claim, *id. at 999-1004*, not to consider the merits of the plaintiff's claim for declaratory judgment.

> data sources, and what BrandTotal believes Facebook knew or intended when it deactivated **[*19]** BrandTotal's accounts and asked Google to remove BrandTotal's products from Google's store.

Id. at 12.

1. Legitimate Business Purpose Defense

The FTC order is an appropriate starting point for the Court's analysis here, because Facebook's obligations under that order provided the clearest basis for dismissal of BrandTotal's tortious interference counterclaims as originally pleaded. That order requires Facebook to deny access to any "Covered Third Party" that failed to certify its compliance with Facebook's terms of use, and BrandTotal did not dispute for the purpose of the previous motion to dismiss that it was a "Covered Third Party." *See* 1st MTD Order at 15 (summarizing the FTC order).[6] Since BrandTotal did not obtain Facebook's permission to use automated means to collect data, as required by Facebook's terms of use, BrandTotal could not and did not certify compliance with those terms. The Court therefore held that, based on BrandTotal's original allegations, Facebook was required to deny BrandTotal access.

BrandTotal advances a number of arguments that are not particularly persuasive, including that the order was intended only to target third parties' collecting users' personal data **[*20]** without those users' consent, that the FTC only required Facebook to enforce violations in a manner proportionate to their severity (as opposed to necessarily blocking all access), and that construing the FTC order to apply in these circumstances would place it in conflict with the Ninth Circuit's decision in *hiQ. See* Defs.' Opp'n at 2, 4-5, 13-15.

Requiring third parties to obtain permission from Facebook before engaging in automated data collection is consistent with the FTC's intent to protect users from unauthorized data collection, because without at least some form of vetting, a third party that purports to obtain consent might maliciously collect more data than users authorize, or even if a third party acts in good faith to obtain consent, its product might have unforeseen uses or vulnerabilities that would cause it to exceed that consent—as with the previous version of UpVoice potentially capturing data from users of shared computers who had not themselves consented to its use.

While BrandTotal is correct that one provision of the FTC order requires Facebook to enforce violations of its terms "based solely on the severity, nature, and impact of the violation; the Covered Third **[*21]** Party's malicious conduct or history of violations; and applicable law," FTC Order § VII(E)(1)(d),[7] a separate and more specific provision requires, "if the Covered Third Party fails to complete the annual self-certification, denying or terminating access to all Covered Information unless the Covered Third Party cures such failure within a reasonable time, not to exceed thirty (30) days," *id.* § VII(E)(1)(b). There is no dispute that BrandTotal has not self-certified compliance with Facebook's terms of use—which require Facebook's permission for any automated data collection—as would be required for a Covered Third Party.

As for *hiQ*, that case concerned blocking a competitor's access to "otherwise public data." *hiQ, 938 F.3d at 998*. The opinion in *hiQ* repeatedly distinguished a scenario where information was not available to the general public, noting, for example, that the defendant could "satisfy its 'free rider' concern by eliminating the public access option" and restricting the data at issue to certain users of its platform. *Id. at 995*. Here, there is no dispute that while some of the information BrandTotal gathered was "otherwise public," not all of it was—particularly with respect to the original version of **[*22]** UpVoice, which captured user demographic data. Principles of *hiQ* might nonetheless

---

[6] In a footnote of its brief opposing a preliminary injunction, Facebook implies that BrandTotal conceded that it is a "Covered Third Party," relying on a statement by BrandTotal's counsel at the hearing on its motion for a TRO. *See* Pl.'s Opp'n (dkt. 134) at 21 n.12. The full statement, in response to the Court's question of whether BrandTotal was a "Covered Third Party," was as follows: "I would think that we would be, Your Honor, yes. But I would want to study that specific question more, because it wasn't raised." Oct. 20, 2020 Hr'g Tr. (dkt. 57) at 8:24-9:1. In light of counsel's specifically-stated intent to further investigate the issue, his statement was not a concession.

[7] The FTC order is included in the record in a number of places, including as Exhibit C to BrandTotal's amended counterclaims.

inform the outcome here, but there is no clear conflict that would render the FTC's order unenforceable, at least with respect to password-protected portions of Facebook's network.

BrandTotal's strongest argument—at least for opposing the present motion to dismiss—that the FTC order does not justify Facebook's conduct is that, as alleged for the first time in BrandTotal's amended counterclaim, BrandTotal is not a "Covered Third Party" as that term is used in the FTC order, because BrandTotal collects data "only as part of a User-initiated transfer of information as part of a data portability protocol or standard." FACC ¶ 157. The FTC order defines a "Covered Third Party" as one that collects certain information *outside* of such a user-initiated transfer and protocol. FTC Order at 3, ¶ E. Accordingly, if BrandTotal only collects data in that manner, it is not a Covered Third Party, not required to complete to annual self-certification, and not subject to mandatory blocking by Facebook for its failure to certify compliance with Facebook's terms of use.

Facebook argues that BrandTotal does not fall within **[*23]** that carve-out from the definition of a Covered Third Party because it does not in fact use a "'protocol or standard' for transferring a user's *own* data." Pl.'s Mot. (dkt. 132) at 10 (emphasis added). Both parties rely on vague language from ISO, an international standards organization, with BrandTotal attaching to its counterclaims a screenshot of an ISO webpage defining "data portability" as "ability to easily transfer data from one system to another without being required to re-enter data," FACC Ex. B, and Facebook requesting judicial notice of an earlier portion of the same ISO webpage stating in an "introduction" section that the "goal of portability is to enable cloud service customers (CSCs) to move their data or applications between non-cloud and one or more cloud services and between cloud services."[8] Facebook also requests judicial notice of its own press release announcing its own tool allowing a user to transfer their photos from Facebook to Google Photos, asserting that feature is more in line with the type of data portability protocol contemplated by the FTC order. Pl.'s Mot. at 10.

The parties' reliance on extrinsic evidence—even if some of it is subject to judicial **[*24]** notice—drives home that this is not a matter suitable for resolution on the pleadings. While the original 2012 version of the FTC order was issued unilaterally, the operative version issued on April 27, 2020 reflects a stipulation between the FTC and Facebook in a judicial enforcement proceeding, and thus resembles a consent decree. *See* FACC Ex. C at 1. Interpreting ambiguous language in such a document may require extrinsic evidence:

> Since a consent decree or order is to be construed for enforcement purposes basically as a contract, reliance upon certain aids to construction is proper, as with any other contract. Such aids include the circumstances surrounding the formation of the consent order, any technical meaning words used may have had to the parties, and any other documents expressly incorporated in the decree. [Footnote.] Such reliance does not in any way depart from the 'four corners' rule of [*United States v. Armour & Co., 402 U.S. 673, 91 S. Ct. 1752, 29 L. Ed. 2d 256 (1971)*].
> [Footnote:] Assuming that a consent decree is to be interpreted as a contract, it would seem to follow that evidence of events surrounding its negotiation and tending to explain ambiguous terms would be admissible in evidence

United States v. ITT Cont'l Baking Co., 420 U.S. 223, 238, 95 S. Ct. 926, 43 L. Ed. 2d 148 & n.11 (1975) (considering an FTC consent order).

BrandTotal has alleged **[*25]** that it "receives information only as part of a User-initiated transfer of information as part of a data portability protocol or standard." FACC ¶ 157. It alleges that users chose to share with BrandTotal data that either they had previously provided to Facebook or was presented to them on Facebook. The Court takes those allegations as true. Requiring more detailed allegations as to the precise workings of BrandTotal's product or the facts underlying its interpretation of this term in the FTC order would go beyond the requirements of *Rule 8(a)* and *Iqbal*, and definitely resolving the ambiguous language of the order will likely at least some degree of extrinsic

[8] ISO/IEC 19941:2017(en), Information technology—Cloud computing—Interoperability and portability, https://www.iso.org/obp/ui/#iso:std:iso-iec:19941:ed-1:v1:en (accessed May 24, 2021); *see* Pl.'s Mot. at 10.

evidence. Facebook is aware of BrandTotal's theory, and based on BrandTotal's allegations, that theory is sufficiently plausible to proceed.

Facebook's defense that enforcement of its own contract was a legitimate business purpose is also inappropriate for resolution on the pleadings. Adjudicating affirmative defenses on a motion to dismiss is the exception rather than the rule. "[P]laintiffs ordinarily need not plead on the subject of an anticipated affirmative defense"; such defenses are relevant on a motion under *Rule 12(b)(6)* only when they are **[*26]** "obvious on the face of a complaint" or from facts subject to judicial notice. *Rivera v. Peri & Sons Farms, Inc., 735 F.3d 892, 902 (9th Cir. 2013)* (citations and internal quotation marks omitted); *see also, e.g., Special Situations Fund III QP, L.P. v. Marrone Bio Innovations, Inc., 243 F. Supp. 3d 1109, 1122 (E.D. Cal. 2017)*. A defendant's enforcement of its own contract is not an absolute defense to interference—even then, the "determinative question" is whether the party acted in good faith. *Richardson v. La Rancherita, 98 Cal. App. 3d 73, 81, 159 Cal. Rptr. 285 (1979)*; *see also Webber v. Inland Empire Invs., 74 Cal. App. 4th 884, 902, 88 Cal. Rptr. 2d 594 (1999)*. Even if Facebook can show based on BrandTotal's allegations and facts subject to judicial notice that it had a right to enforce its terms of service, it is not "obvious on the face of" BrandTotal's counterclaims that such enforcement was done in good faith. *See Rivera, 735 F.3d at 902*. And unlike the original counterclaim, which the Court dismissed because "BrandTotal ha[d] not alleged any particular motive by Facebook," 1st MTD Order at 14, BrandTotal now alleges that 'Facebook's fraudulent and misleading statements to Google were known by Facebook to be false, and its actions were malicious," FACC ¶ 149, which BrandTotal supports with additional factual allegations that Facebook's investigations of BrandTotal would have revealed that BrandTotal's terms of service disclosed to panelists the data it collected, *id.* ¶¶ 190-91.

At the hearing, Facebook relied on arguments raised more **[*27]** clearly in its opposition to a preliminary injunction than its briefing on the motion to dismiss, including that its statement to Google was accurate because of potential issues around the margin of disclosing BrandTotal's data collection activities: that BrandTotal described Facebook as a "participating site" on its website; that BrandTotal did not obtain consent from advertisers, and might have obtained names or location data for individuals who sponsored advertisements; and the potential issue with users of shared computers. Pl.'s Opp'n (dkt. 134) at 19. None of those theories are necessarily what a reader of the phrase "improperly scraping user PII (e.g. gender, relationship status, ad interests, etc.), without proper disclosure," FACC Ex. I, would naturally take it to mean, and nothing on the face of BrandTotal's counterclaims suggests such issues in fact motivated Facebook's employee Jeremy Brewer to assert lack of proper disclosure to Google. That incongruity, coupled with Facebook following up with Google to press for a resolution days later after receiving inquiries about BrandTotal's capabilities from advertising customers, raises at least a specter of bad faith sufficient **[*28]** to render BrandTotal's allegation plausible.

Facebook cites *Savage v. Pacific Gas & Electric Co., 21 Cal. App. 4th 434, 26 Cal. Rptr. 2d 305 (1993)*, for the proposition that an "unfounded opinion" may be protected speech for the purpose of an interference claim, based on the "social value in allowing business contacts of enterprises dealing with the public to comment freely on matters affecting their own or the public interest." *21 Cal. App. 4th at 450*; *see* Pl.'s Opp'n at 19. It is possible that Brewer's characterization of BrandTotal was merely an "unfounded opinion," offered in good faith, which would not defeat Facebook's legitimate business purpose of enforcing its terms of use. It is also possible that it was made in bad faith, with knowledge of falsity (or at least omission) or reckless disregard as to its truth, for the purpose of inducing Google to remove UpVoice Legacy. BrandTotal has alleged the latter, and its allegation is sufficiently plausible to proceed.[9]

---

[9] BrandTotal also relies heavily, and mistakenly, on a 2019 report by Facebook's researcher Sanchit Karve characterizing a separate BrandTotal mobile app, Social One—which BrandTotal contends functioned in a materially identical manner to UpVoice Legacy—as "harmless." FACC ¶¶ 59, 63, 155 & Ex. E. In context, Karve clearly distinguishes between the code included in the "app itself," which he concluded did not "contain any spyware/code within it," and a script that he determined the app "inject[ed]," which he concluded appeared to suggest scraping of "profile info and ads," necessitating further analysis "to see what they're stealing exactly" and perhaps "legal action against these guys." *Id.* Ex. E. Taken as a whole, the report cannot reasonably be interpreted as indicating that Karve believed Social One was "harmless." But regardless of the merits of the "harmless" characterization, BrandTotal has included sufficient allegations of bad faith with respect to Facebook's assertion that it lacked sufficient disclosures, as discussed above.

The Court therefore declines to dismiss BrandTotal's interference claims based on Facebook's asserted defense of a legitimate business interested.

2. Contracts at Issue

The first element of a claim for interference with contract is the existence of a valid contract between the plaintiff and a third party. *hiQ, 938 F.3d at 995*. BrandTotal identifies **[*29]** four classes of contracts at issue: contracts between BrandTotal and its corporate customers, FACC ¶ 120, contracts between BrandTotal and its individual "Panelists," *id.* ¶ 129, contracts between BrandTotal and its investors, *id.* ¶ 138, and a contract between BrandTotal and Google, *id.* ¶ 143. This order addresses the remaining elements of the claim—the defendant's knowledge of the contract, the defendant's intentional act to disrupt, actual disruption, and damage, *hiQ, 938 F.3d at 995-96*—for each class of contract separately.

a. Contracts with Customers

Other than the affirmative defenses discussed above, Facebook moves to dismiss BrandTotal's claim for interference with customer contracts primarily on the basis that Facebook was not aware of any specific contracts between BrandTotal and its customers. Pl.'s Mot. at 12; Pl.'s Reply (dkt. 142) at 7.

"'To be subject to liability [for inducing a breach of contract], the actor must have knowledge of the contract with which he is interfering and of the fact that he is interfering with the performance of the contract.'" *Jenni Rivera Enters., LLC v. Latin World Ent. Holdings, Inc., 36 Cal. App. 5th 766, 783, 249 Cal. Rptr. 3d 122 (2019)* (quoting *Little v. Amber Hotel Co., 202 Cal. App. 4th 280, 302, 136 Cal. Rptr. 3d 97 (2011)*) (alteration in original). But under California law, "the defendant need not know exactly who is a party to the contract, so long **[*30]** as he knows he is interfering with a contractual relationship." *Altera Corp. v. Clear Logic, Inc., 424 F.3d 1079, 1092 (9th Cir. 2005)*. Courts have found this element satisfied where a hair product company informed pharmacies selling "diverted" products that it had a "salon-only" distribution policy and all authorized buyers were bound by contract not to distribute them to non-salon resellers, even though the pharmacies did not know the specific other parties to those contracts, *Sebastian Int'l, Inc. v. Russolillo, 162 F. Supp. 2d 1198, 1203-04 (C.D. Cal. 2001)*, and where the operator of a nursing facility overstayed its lease with knowledge that the facility had been leased to a new operator, but did not know the identity of that new lessee, *Ramona Manor Convalescent Hosp. v. Care Enters., 177 Cal. App. 3d 1120, 1132, 225 Cal. Rptr. 120 (1986)*.

Here, BrandTotal alleges that Facebook knew of its relationships with customers based on BrandTotal's advertisements, BrandTotal's statement on its website that "'[m]any of the most recognizable consumer brands'" used its product, specific customers' communications with Facebook, and through Facebook's investigation of various BrandTotal products over the course of multiple years. FACC ¶¶ 121-22, 125 & Exs. D—H. Facebook argues that such potential sources of information fall short of showing actual knowledge of any contract, particularly when the first internal Facebook email referencing a particular **[*31]** customer actually using BrandTotal was dated September 22, 2020, one day after Facebook reported UpVoice to Google as potentially scraping user information on September 21, 2020.[10] Pl.'s Mot. at 12; Pl.'s Reply at 7. But BrandTotal is not required to prove its case in its complaint. BrandTotal has alleged that Facebook knew of its contracts to sell the data it gathered from Facebook, FACC ¶ 121, and the alleged potential sources of such knowledge render that allegation plausible. On a motion to dismiss under *Rule 12(b)(6)*, that is enough.

Facebook also somewhat indirectly attacks BrandTotal's showing of actual disruption, asserting that the internal email concerned "a BrandTotal client contract that BrandTotal does *not* allege was disrupted." Pl.'s Mot. at 12. But

[10] The Court notes that although Facebook employees sent their first two emails to Google one day before the internal email discussing a customer who used BrandTotal, Google did not immediately respond, and Facebook employee Sanchit Karve followed up several days later "to ask if [Google] had a chance to look into our request." FACC Ex. I. BrandTotal is also correct that the September 22 email refers to Facebook having "learned"—in the past tense—that the customer used BrandTotal, which leaves a possibility that Facebook obtained that knowledge before reporting UpVoice to Google.

BrandTotal alleges that its "entire business is premised on access to content on social media, the vast majority of which comes from Facebook," and that "by acting to have UpVoice removed from the Chrome Store, Facebook removed BrandTotal's ability to collect data from any site via UpVoice, not just from Facebook." FACC ¶ 127. BrandTotal also alleges that it "has lost current and prospective customers and has had to give credits of monthly **[*32]** membership fees to customers," *id.* ¶ 88, and that Facebook has made BrandTotal's "collection of this advertising information more costly" by forcing BrandTotal to redesign UpVoice before resubmitting it to the Google Chrome Store, *id.* ¶ 92. Those allegations do not carve out any particular customer contracts from the disruption BrandTotal has alleged. Facebook does not pursue this argument in its reply, and the Court declines to dismiss BrandTotal's counterclaim on this basis.

Facebook's motion to dismiss is therefore DENIED as to BrandTotal's counterclaim for intentional interference with customer contracts.

b. Contracts with Panelists

Facebook argues that BrandTotal's counterclaim for interference with its contracts with individual users or "panelists" must be dismissed because BrandTotal has not alleged that those users had any obligation to share their data with BrandTotal. Pl.'s Mot. at 12. BrandTotal describes its contracts with its panelists as follows:

129. BrandTotal had valid contracts with each of its Panelists.

> 130. When applying to be a Panelist, each individual must acknowledge and agree to the UpVoice Terms of Service. In consideration of a Panelist sharing their information **[*33]** with BrandTotal, BrandTotal provides the Panelist with monetary compensation. Similarly, users of Defendants' other extensions were compensated for the data they chose to share through use of the extension that improved the user's social media experience. If Panelists are unable to share their data with BrandTotal, Panelists cannot perform their duties under the UpVoice Terms of Service.

FACC ¶¶ 129-30.

Facebook may be correct that BrandTotal has not plausibly alleged an *obligation* by panelists to share data with BrandTotal. Despite its characterization of panelists' sharing data as their "duties" under the UpVoice terms of service, the overall relationship BrandTotal describes tends to resemble a unilateral contract, in which the offeree has no obligation to perform, but the offeror is bound to reciprocate if the offeree in fact performs. *See Sateriale v. R.J. Reynolds Tobacco Co., 697 F.3d 777, 785 (9th Cir. 2012)* ("In contrast to a bilateral contract, a unilateral contract involves the exchange of a promise for a performance. The offer is accepted by rendering a performance rather than providing a promise. Typical illustrations are found in offers of rewards or prizes." (cleaned up)). Here, it seems likely that BrandTotal agreed to provide rewards to panelists **[*34]** *if* they shared their data, and less likely that panelists committed to providing any particular amount of data such that they could be held responsible for breach of contract if they ceased using UpVoice. With only a cursory description of BrandTotal's terms of service included in its counterclaim, and no clear allegation that panelists were *obligated* to use UpVoice, it is difficult to say.

The distinction is not the knockout blow that Facebook suggests, but also not entirely insignificant (as BrandTotal appears to assume). While not addressed by either party here, the California Supreme Court has recently held that a claim for interference with an at-will contract requires showing wrongfulness beyond mere interference, based on its resemblance to a claim for interference with prospective relations—in particular, the lack of any "legal basis in either case to expect the continuity of the relationship or to make decisions in reliance on the relationship." *Ixchel Pharma, LLC v. Biogen, Inc., 9 Cal. 5th 1130, 1147, 266 Cal. Rptr. 3d 665, 470 P.3d 571 (2020)*. The same considerations would seem to apply to a contract that did not require panelists to use UpVoice in the future. If panelists had no obligation to provide data, BrandTotal would need to allege and prove wrongfulness.

But in any **[*35]** event, BrandTotal has sufficiently alleged that the same conduct by Facebook was unlawful for interfering with its *customer* contracts, where Facebook has not disputed that BrandTotal had a sufficiently binding obligation. The alleged conduct is therefore tortious for intentionally interfering with customer contracts. If the conduct is a tort with respect to customer contracts, it is "wrongful" for a reason independent of its effect on panelist contracts. BrandTotal has alleged that Facebook's interference with panelist contracts was wrongful at least on that basis, and perhaps also based on its plausible allegations of bad faith discussed above in the context of Facebook's legitimate business interest defense.[11]

Facebook's motion is therefore DENIED as to BrandTotal's counterclaim for intentional interference with panelist contracts.

c. Contracts with Investors

BrandTotal's only allegations regarding its contracts with investors are that it "had valid contracts with multiple investors," that Facebook was aware of the identities of certain specific investors, and that BrandTotal had raised several million dollars in investment. FACC ¶¶ 138-40. Facebook contends that BrandTotal has not "identifie[d] **[*36]** any contract that has been breached or any duty the performance of which has been rendered more burdensome." Pl.'s Mot. at 12. Facebook is correct. Unlike with customers, where there is at least some basis for an inference that BrandTotal was contractually obligated to deliver analytics services that Facebook's conduct rendered impossible or more burdensome, a typical investor relationship would involve investors providing funding in return for an ownership stake in BrandTotal, not a specific obligation on BrandTotal to provide any particular service. BrandTotal's only response is to cite its allegations of harm, which in turn cite a declaration discussing BrandTotal's difficulties attracting *new* investment. Defs.' Opp'n at 16; FACC ¶¶ 84-92 & Ex. L, ¶¶ 8-10.

BrandTotal cites no authority for the proposition that harm to a company constitutes interference with its existing investor contracts merely on the basis that it reduces investors' expected returns. Such a rule would elide basic distinctions of the corporate form, and would threaten to bring virtually any vigorous competition within the scope of an intentional interference claim. *Cf.* Ixchel, 9 Cal. 5th at 1148 (considering the risk of "chilling legitimate **[*37]** business competition" and "expos[ing] routine and legitimate business competition to litigation" in setting the contours of intentional interference with at-will contracts).

Facebook's motion is GRANTED as to BrandTotal's counterclaim for intentional interference with investor contracts. BrandTotal has not identified any way it could further amend its counterclaims to allege interference with any existing contract with investors beyond mere diminished returns. The Court nevertheless grants leave to amend if BrandTotal believes it can cure the defects identified above.

d. Contract with Google

BrandTotal alleges that it "had a valid contract with Google under which BrandTotal was able to provide developer services and promote its product on the Chrome web store," which Facebook disrupted by "fraudulently" reporting that BrandTotal was scraping users' personal information "without proper disclosure." FACC ¶¶ 143-50.

Facebook, requesting judicial notice of the developer agreement on Google's website, argues that "Google took its enforcement action pursuant to, not in violation of, the Google Chrome Web Store Developer Agreement," which "provides that Google may, at any time, remove extensions **[*38]** that violate a third party's terms of service." Pl.'s Mot. at 12. Facebook also contends that the removal of UpVoice Legacy did not prevent BrandTotal from listing other products in the Google Chrome store, including later versions of UpVoice. *Id.* at 13. BrandTotal responds that the developer agreement was tied to particular products (citing its introductory paragraph stating that the "Web Store is a publicly available site on which Developers can publish Products"), and that the allegation that Google removed UpVoice Legacy based on Facebook's misrepresentation of BrandTotal's data gathering and disclosures must be taken as true on a motion under Rule 12(b)(6). Defs.' Opp'n at 16-17. Facebook reiterates in its reply that Google reserved the right to suspend or remove products from its store, and argues that, "absent a contractual right or obligation that has been disrupted, BrandTotal can state no claim for relief." Pl.'s Reply at 8.

While BrandTotal's characterization of the developer agreement as pertaining to a specific product is somewhat questionable, and Facebook is correct that the agreement did not grant BrandTotal a *right* to continue offering

[11] Since the parties have not briefed this issue of independent wrongfulness in detail, this order is without prejudice to arguments that either party might present on that issue at summary judgment.

UpVoice Legacy or impose any *obligation* on **[*39]** Google to continue hosting it, the availability of UpVoice Legacy in Google's store was nevertheless one benefit of BrandTotal and Google's contractual relationship that BrandTotal had enjoyed until the time of Facebook's alleged interference. *See* *PG&E, 50 Cal. 3d at 1127* ("[I]t is the contractual relationship, not any term of the contract, which is protected against outside interference."). Google's contractual right to remove UpVoice Legacy from its store resembles in some ways the right of a party to terminate an at-will contract—which the California Supreme Court has held may support a claim for intentional interference when it is provoked a defendant's wrongful act. *See* *Ixchel, 9 Cal. 5th at 1148*.

For the purpose of Facebook's present motion, the Court takes as true BrandTotal's allegation that Facebook misrepresented BrandTotal's practices by asserting that UpVoice Legacy collected personal information without proper disclosures, and that this misrepresentation caused Google to remove UpVoice Legacy from its store. Those issues may warrant further exploration on a factual record—for one thing, there is some reason to believe that Google removed UpVoice Legacy based on its own determination that the product violated Google's policy **[*40]** against sharing data for advertising purposes, rather than any improper disclosure or violation of Facebook's terms of use. *See* FACC Ex. I (email from a Google employee to Facebook employees stating that, based on "quickly looking through [BrandTotal's] privacy policy[,] it does look like they are collecting a bunch of information for advertising purposes which is a no no"). But BrandTotal has met its relatively low burden to proceed beyond the pleadings on this claim.

D. Interference with Prospective Economic Relations

A claim for intentional interference with prospective economic relations is similar to intentional interference with contract. "A plaintiff asserting this tort must show that the defendant knowingly interfered with an 'economic relationship between the plaintiff and some third party, [which carries] the probability of future economic benefit to the plaintiff.'" *Ixchel, 9 Cal. 5th at 1141* (quoting *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*) (alteration in original). "Although this need not be a contractual relationship, an existing relationship is required." *Roth v. Rhodes, 25 Cal. App. 4th 530, 546, 30 Cal. Rptr. 2d 706 (1994)* (citing *Buckaloo v. Johnson, 14 Cal. 3d 815, 829, 122 Cal. Rptr. 745, 537 P.2d 865 (1975)*, *abrogated on other grounds by* *Della Penna v. Toyota Motor Sales, U.S.A., Inc., 11 Cal. 4th 376, 45 Cal. Rptr. 2d 436, 902 P.2d 740 (1995)*). As with a claim based on an at-will contract, discussed above, the plaintiff "must plead as an element of the claim that the defendant's **[*41]** conduct was 'wrongful by some legal measure other than the fact of interference itself.'" *Id. at 1142* (quoting *Della Penna, 11 Cal. 4th at 393*).

BrandTotal alleges, and attaches to its counterclaim a declaration stating, that certain potential investors and customers walked away from negotiations (and some current customers froze their accounts) after Facebook's alleged interference. FACC ¶ 168 & Ex. L, ¶¶ 9, 17-22. The customers who froze their accounts are presumably encompassed within BrandTotal's interference with contract claim. As for potential new customers and investors, BrandTotal has not alleged any existing relationship at the time of interference, as required to proceed on this claim. *See* *Roth, 25 Cal. App. 4th at 546*. At least one district court has held that where "negotiations and discussions . . . never crystalized into something more . . . no specific, identifiable economic relationship was disrupted" sufficient to support an interference claim. *Medina v. Microsoft Corp., No. C 14-0143 RS, 2014 U.S. Dist. LEXIS 71271, 2014 WL 2194825, at *4 (N.D. Cal. May 23, 2014)*. BrandTotal is correct that a case cited by Facebook holding a relationship sufficient where parties had "had put pen to paper" and executed a term sheet[12] does not necessarily set the minimum standard for interference with prospective relations, but BrandTotal cites no authority allowing a claim **[*42]** to proceed based merely on the sort of negotiations it has alleged.

Even if BrandTotal alleged a sufficient prospective relationship, it has not plausibly alleged that Facebook knew of such a relationship. BrandTotal relies on an internal Facebook email noting "several advertiser partners asking

---

[12] *Loop AI Labs Inc v. Gatti, No. 15-cv-00798-HSG, 2015 U.S. Dist. LEXIS 117330, 2015 WL 5158639, at *5 (N.D. Cal. Sept. 2, 2015)*.

[Facebook's] sales team for their [point of view] on [BrandTotal's] capabilities." FACC ¶ 164 & Ex. H. Curiosity about BrandTotal's capabilities does not plausibly suggest any existing relationship between those advertisers and BrandTotal.

A claim for interference with prospective economic relations can lie where parties have entered a contract that is unenforceable. *See Bed, Bath & Beyond of La Jolla, Inc. v. La Jolla Vill. Square Venture Partners, 52 Cal. App. 4th 867, 879, 60 Cal. Rptr. 2d 830 (1997)*. In an abundance of caution, Court therefore allows this claim to proceed in the alternative to BrandTotal's interference with contract claim as to its relationship with *existing* customers, *existing* panelists, and Google. As for merely *prospective* customers and investors,[13] however, this claim is DISMISSED, with leave to amend if BrandTotal can cure the defects identified above.

E. UCL Claim

California's UCL broadly prohibits unlawful, unfair, and fraudulent business acts. *Korea Supply, 29 Cal. 4th at 1143*. "Unlawful acts are anything that can properly be called **[*43]** a business practice and that at the same time is forbidden by law . . . be it civil, criminal, federal, state, or municipal, statutory, regulatory, or court-made, where court-made law is, for example a violation of a prior court order." *Sybersound Records, Inc. v. UAV Corp., 517 F.3d 1137, 1151 (9th Cir. 2008)* (ellipsis in original) (citations and internal quotation marks omitted). "Unfair acts among competitors means 'conduct that threatens an incipient violation of an ***antitrust law***, or violates the spirit or policy of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.'" *Id. at 1152* (quoting *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*). "Finally, fraudulent acts are ones where members of the public are likely to be deceived." *Id.*

1. "Unlawful" Prong

BrandTotal's counterclaim under the "unlawful" prong is based on its theories of tortious interference, and the parties agree that it rises or falls with those counterclaims. Because the Court denies Facebook's motion to dismiss at least some aspects of those counterclaims as discussed above, Facebook's motion to dismiss BrandTotal's counterclaim under the unlawful prong of the UCL is also DENIED.

2. "Unfair" Prong

As the Court noted in its previous order, an "unfair" claim **[*44]** by a competitor under the UCL generally must implicate the antitrust laws.[14] 1st MTD Order at 16 (citing *Sybersound, 517 F.3d at 1152*). "When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. Courts have dismissed competitors' claims under this prong of the statute where plaintiffs fail to identify "any 'unusual' aspect of the alleged conduct that would make that

---

[13] BrandTotal has not asserted interference with prospective economic advantage as to potential prospective panelists. *See* FACC ¶¶ 161-69. If it had, the Court would similarly dismiss that aspect of the claim for failure to allege existing relationships or Facebook's knowledge of such a relationships.

[14] There may be other circumstances were wrongful conduct can support an "unfair" UCL claim, *see, e.g., Doe v. CVS Pharmacy, Inc., 982 F.3d 1204, 1214-15 (9th Cir. 2020)*, *cert. petition docketed*, No. 20-1374 (U.S. Mar. 26, 2021), but those theories are limited to claims by consumers rather than competitors, *see Morgan v. AT&T Wireless Servs., Inc., 177 Cal. App. 4th 1235, 1254, 99 Cal. Rptr. 3d 768 (2009)*, and BrandTotal has not asserted them here, *see* Defs.' Opp'n at 19-21.

conduct something that violates the 'policy and spirit' of the antitrust laws without violating the actual laws themselves," comparable to the *Cel-Tech* defendant's "'privileged status as one of two holders of a lucrative government-licensed duopoly.'" *Synopsys, Inc. v. ATopTech, Inc., No. C 13-2965 MMC, 2015 U.S. Dist. LEXIS 104763, 2015 WL 4719048, at *10 (N.D. Cal. Aug. 7, 2015)* (quoting *Cel-Tech, 20 Cal. 4th at 190*); *see also* *Creative Mobile Techs., LLC v. Flywheel Software, Inc., No. 16-cv-02560-SI, 2017 U.S. Dist. LEXIS 24173, 2017 WL 679496, at *6 (N.D. Cal. Feb. 21, 2017)*.

BrandTotal contends that it has remedied its previous failure to show injury to competition, as opposed to mere injury to itself, by adding allegations to "detail how Facebook is harming all **[*45]** competition that involves collection of data from its site," having "structured its policies and actions in such a way as to monopolize data about commercial advertising on its site and prevent competition for third-party advertising information." Defs.' Opp'n at 19. Facebook argues that BrandTotal has not sufficiently alleged either monopoly power in a relevant product market or an exception to the usual rule that unilateral refusal to deal with a competitor is not an antitrust violation, both of which would be necessary for it to proceed on its claim. Pl.'s Mot. at 18.

BrandTotal has not alleged unusual circumstances that would allow something other than an antitrust violation to support an "unfair" prong claim here. Its theory of what makes Facebook's conduct unfair is relatively straightforward: Facebook is extremely large and powerful, it controls a product that BrandTotal would like to access, it has denied BrandTotal that access both by refusing to permit it and by pressuring another company (Google) to alter its dealings with BrandTotal, and it also denies other potential competitors access, all to further Facebook's own competitive advantage and "maintain a monopoly over the **[*46]** Third-Party Advertising Information on Facebook." *See* FACC ¶¶ 173-83. The antitrust laws are equipped to deal with such a theory, and to determine whether it should be considered monopolization (or otherwise anticompetitive) or merely vigorous competition by a powerful market participant.

As a starting point to state such a claim, BrandTotal must identify a product market:

> Plaintiffs must plead a relevant market to state an antitrust claim under the Sherman Act, unless they assert a per se claim. While plaintiffs need not plead a relevant market with specificity, there are some legal principles that govern the definition of an antitrust "relevant market," and a complaint may be dismissed under *Rule 12(b)(6)* if the complaint's 'relevant market' definition is facially unsustainable.
>
> The relevant market must include both a geographic market and a product market. The latter . . . must encompass the product at issue as well as all economic substitutes for the product. Economic substitutes have a reasonable interchangeability of use or sufficient cross-elasticity of demand with the relevant product. Including economic substitutes ensures that the relevant product market encompasses the group or groups of **[*47]** sellers or producers who have actual or potential ability to deprive each other of significant levels of business.

Hicks v. PGA Tour, Inc., 897 F.3d 1109, 1120-21 (9th Cir. 2018) (cleaned up). "[O]ne method of determining whether a proposed market is viable is assessing 'whether a monopolist in the proposed market could profitably impose a small but significant and nontransitory price increase." *Id. at 1122-23* (quoting *Theme Promotions, Inc. v. News Am. Mktg. FSI, 546 F.3d 991, 1002 (9th Cir. 2018)*). A complaint that "merely restate[s] a test for market definition without any factual elaboration" is not sufficient. *Id. at 1122*.

BrandTotal's amended counterclaim is inconsistent as to a relevant market. It asserts that the "market comprises at least Facebook's site, which has more users than the size of by far most countries in the world." FACC ¶ 173. Certain other allegations similarly reference a "market for Third Party Advertising Information on Facebook." *Id.* ¶ 125; *see also id.* ¶¶ 15, 179, 182. But a market definition of "at least" one product is no definition at all, and BrandTotal has not explained why data regarding advertising on other social media networks—or perhaps other media entirely—is not an economic substitute for information about Facebook ads. Some of BrandTotal's other allegations tend to suggest a larger market, including that BrandTotal **[*48]** offers "competitive analyses of advertising efforts on social media sites like Facebook, Instagram, Twitter, YouTube, LinkedIn, Amazon and others," *id.* ¶ 44, and that Facebook has used its terms of service "to maintain monopoly power of data on its platform and in the social networking platform market," *id.* ¶ 15.[15]

"[M]any courts have rejected antitrust claims reliant on proposed advertising markets limited to a single form of advertising," *Hicks, 897 F.3d at 1123*, and "[s]ingle-brand markets are, at a minimum, extremely rare," *Apple, Inc. v. Psystar Corp., 586 F. Supp. 2d 1190, 1198 (N.D. Cal. 2008)*. While it is still conceivable that BrandTotal might be able to allege such a market here, some broader market in which Facebook holds power, or perhaps multiple potential markets in the alternative, it has not clearly done so, and certainly has not supported any such a market definition with sufficient factual allegations to render them plausible.

The general rule that a market participant may permissibly refuse to deal with its rivals is also an impediment to BrandTotal's claim. *See, e.g., Verizon Commc'ns Inc. v. Law Offs. of Curtis V. Trinko, LLP, 540 U.S. 398, 407-08, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. BrandTotal argues that this is not a refusal-to-deal case because "Facebook is not merely a competitor, but also the operator of a social media site that reaches more than 2 billion users," because **[*49]** it has "interfere[d] with" rather than merely refused to aid BrandTotal's efforts to collect advertising data, and because "Facebook is not structuring deals to favor certain distributors; it is monopolizing data surrounding commercial advertisements that it displays to millions of users and taking steps to block anyone that would access that data." Defs.' Opp'n at 19-20. Ultimately, though, so long as Facebook generally has a right to set rules for accessing the password-protected portions of its website—a principle not reasonably in dispute—its refusal to authorize the access BrandTotal seeks is a refusal to deal with a potential competitor.

BrandTotal also argues that even if this is a refusal-to-deal case, the right to refuse to deal is not absolute, as recognized by the Supreme Court in *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. Defs.' Opp'n at 20. BrandTotal contends that its counterclaim need not track the precise elements of that case because the Court "did not set forth express prerequisites." *Id.* This Court is bound by recent Ninth Circuit precedent to the contrary, which provides that "[t]he one, limited exception to this general rule that there is no antitrust duty to deal comes under the Supreme Court's decision **[*50]** in *Aspen Skiing*," and that the three key features of that case—(1) unilateral termination of a voluntary and profitable course of dealing; (2) that could only be intended to sacrifice short-term benefits for long-term monopolist profits; (3) involving products already sold to other similarly situated customers—are "required elements for the *Aspen Skiing* exception." *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 994-95 (9th Cir. 2020)*.

BrandTotal's counterclaim under the "unfair" prong of the UCL is therefore DISMISSED. Although it is not obvious how BrandTotal would further amend to avoid the refusal-to-deal doctrine, the Court grants it leave to attempt to do so if it believes it can.

3. "Fraudulent" Prong

The Court previously dismissed a counterclaim under the "fraudulent" prong with prejudice, because BrandTotal could not plausibly allege that references in Facebook's terms of use to users owning their data or controlling their privacy settings were fraudulent when the purportedly conflicting truth—that Facebook barred automated data collection—was also contained in the terms of use. 1st MTD Order at 17-18. BrandTotal's new version of this counterclaim is distinct: it contends that Facebook's request that Google investigate or remove UpVoice Legacy **[*51]** from Google's store was fraudulent in asserting that BrandTotal lacked proper disclosures as to the personal data it collected, and rather than deceiving individual Facebook users, Facebook deceived Google. FACC ¶¶ 189-90. Facebook contends that the previous dismissal with prejudice is reason enough to dismiss this counterclaim again. Perhaps BrandTotal should have sought leave before reasserting a new version of this

---

[15] BrandTotal's opposition brief further muddles its theory of a relevant market, asserting that, "[t]hough BrandTotal contends that the Facebook network is not itself a market, given the dominance of Facebook in the social media sphere, as alleged in the Amended Counterclaims, [FACC] ¶ 182, Facebook's monopolization of data on the Facebook network is crippling to any company engaged in social media commercial advertising." Defs.' Opp'n at 21.

counterclaim previously dismissed with prejudice, but given the significant factual differences between the new counterclaim and the old, as well as *Rule 15*'s general policy favoring amendment, the Court likely would not deny leave to attempt to assert this new and distinct counterclaim based solely on the previous dismissal.

That said, the new counterclaim fails on its merits. Facebook is correct that BrandTotal cannot state a claim under the fraudulent prong of the UCL without showing a likelihood that *members of the public* would be deceived:

> The "fraud" contemplated by *section 17200*'s third prong bears little resemblance to common law fraud or deception. The test is whether the public is likely to be deceived." Stated otherwise, "Fraudulent," as used in the statute, does not refer to the **[*52]** common law tort of fraud but only requires a showing members of the public are likely to be deceived.

S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 888, 85 Cal. Rptr. 2d 301 (1999) (cleaned up);[16] *see also, e.g., Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1169 (9th Cir. 2012)* ("A business practice is fraudulent under the UCL if members of the public are likely to be deceived."); *Watson Labs., Inc. v. Rhone-Poulenc Rorer, Inc., 178 F. Supp. 2d 1099, 1121 (C.D. Cal. 2001)* ("Though many courts have described the scope of business activities prohibited by *§ 17200* in sweeping terms, there is no case authority that 'fraudulent' business acts are separately actionable by business competitors absent a showing that the public, rather than merely the plaintiff, is likely to be deceived."). BrandTotal cites no authority recognizing a UCL "fraudulent" claim under comparable circumstances of a third-party corporation allegedly being deceived by a one-time communication directed to that corporation. *See* Defs.' Opp'n at 22.

Because BrandTotal has not alleged any statement likely to deceive the public, and its current theory could not be amended to do so, its new counterclaim under the "fraudulent" prong of the UCL is DISMISSED with prejudice.

IV. CONCLUSION

For the reasons discussed above, Facebook's motion to dismiss is GRANTED as to: (1) BrandTotal's declaratory judgment counterclaims, which are dismissed without **[*53]** leave to amend but without prejudice to seeking such leave if changed circumstances warrant; (2) BrandTotal's interference with contract counterclaim to the extent it is based on contracts with investors, which is dismissed with leave to amend; (3) BrandTotal's interference with prospective economic advantage counterclaim as to potential (but not existing) customers and investors, which is dismissed with leave to amend; (4) BrandTotal's counterclaim under the "unfair" prong of the UCL, which is dismissed with leave to amend; and (5) BrandTotal's counterclaim under the "fraudulent" prong of the UCL, which is dismissed with prejudice.

Facebook's motion is DENIED as to: (1) BrandTotal's interference with contract counterclaim to the extent it is based on contracts with existing customers, existing panelists, and Google; (2) BrandTotal's interference with advantage counterclaim as an alternative theory with respect to those same entities; and (3) BrandTotal's counterclaim under the "unlawful" prong of the UCL. Those counterclaims may proceed.

If BrandTotal believes it can cure the defects identified above as to the claims dismissed with leave to further amend, it may file a second amended **[*54]** counterclaim no later than June 25, 2021.

IT IS SO ORDERED.

Dated: June 3, 2021

Judges: Harry D. Leinenweber, United States District Judge.

Opinion by: Harry D. Leinenweber

Opinion

MEMORANDUM OPINION AND ORDER

This is a case involving patents for prescription opioids and alleged violations ***antitrust law*** through intellectual property licenses and lawsuit settlements. Broadly speaking, three groups of plaintiffs bring this case: the "End Payor" Plaintiffs, who consist of health insurance companies and trust funds, the "Direct Purchaser" Plaintiffs, who consist of drug distribution companies, and the "Retailer" Plaintiffs, who sell medicines to the general populace. (Pl.'s Resp. to Def.'s Stmt. of Facts on Damages/Causation ("PSOF-DC") ¶¶ 1-3, Pl's Stmt. of Facts on Damages/Causation, Ex. 1, Dkt. No. 618-1.) Defendants are patent holders Endo Pharmaceuticals, Endo Health

Solutions, Inc., and its acquired subsidiary Penwest Pharmaceuticals Co., (together, "Endo") as well as the patent licensee Impax Pharmaceuticals. (*Id.* ¶¶ 4-5.) Defendants argue that they are entitled to summary judgment because Plaintiffs have failed to show there was an antitrust injury or that damages resulted from the putative injury. (Dkt. No. 539.) In the alternative, Defendants filed a second summary judgment motion **[*6]** to argue that they are, at a minimum, entitled to summary judgment on various patent issues. (Dkt. No. 532.) Integral to both summary judgment arguments and in anticipation of trial, the parties have also filed twenty-one *Daubert* motions. (Dkt. Nos. 510, 513, 516, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 537, 541, 545, 546, 550, 552, 556.) For the reasons set forth below, the Court first resolves the *Daubert* motions and then denies Defendants' motions for summary judgment in part.

I. BACKGROUND

Oxymorphone has been available as a prescription opioid in the U.S. market since the 1960s. ("Regulatory History of Opana ER" at 5, Mem. on Causation/Damages, Ex. 4, Dkt. No 558-19.) Starting in the early 2000s, Endo Pharmaceutical Holdings developed, patented, and sold an oxymorphone medication that allowed patients to take a single large dose of medication and relieve pain over a longer duration, in other words an "extended release" oxymorphone, referred to throughout this opinion as "Opana ER" or "oxymorphone ER." (*Id.* at 6-7.) Opana ER was officially approved by the U.S. Food & Drug Administration in 2006. (*Id.*)

Oxymorphone ER was originally protected with one patent which expired **[*7]** on February 29, 2008. *See* U.S. FOOD & DRUG ADMIN., APPROVED DRUG PRODS. WITH THERAPEUTIC EQUIV. EVALS. 6-333 (41st ed. 2021) https://www.fda.gov/media/71474/download. To manage patented drugs and their approved substitutions, the FDA issues a yearly publication called the *Approved Drug Products with Therapeutic Equivalence Evaluations*, usually referred to as the "Orange Book." *Id.* at iv. As is pertinent to this litigation, the Orange Book identifies drug products approved by the FDA under the Federal Food, Drug and Cosmetic Act as well as patent and exclusivity information related to approved drug products. *Id.* at iv—vi.

In June 2007, Impax filed an Abbreviated New Drug Application ("ANDA") with the FDA. (Pretrial Stipulation ¶ 15, Mem. on Causation/Damages, Ex. 5, Dkt. No. 558-24.) The abbreviated application process was created by the Hatch-Waxman Act of 1984, enacted to encourage the entry of generic drugs into the U.S. market. KEVIN J. HICKEY, CONG. RSCH. SERV., R45666, DRUG PRICING AND INTELL. PROP. L. 20 (2019) *https://crsreports.congress.gov/product/pdf/R/R45666*. The Hatch-Waxman Act allows generic drug entrants to file a shorter application, relying on data and results from the original applicant, and gives temporary secondary exclusivity **[*8]** on the market to the first generic drug producer to file. *Id.* at 25. Specifically, the first successful applicant has exclusive right to sell the generic drug, apart from the patent holder, for up to 180 days after going on the market. *Id.* Once the FDA approves the abbreviated application, the generic drug producer is required to notify the original patent holders of their intention to produce a generic drug. The patent holders must challenge this action in court to prevent production and sale. (PSOF-DC ¶ 15.)

In the October 2007 Orange Book, Endo asserted for the first time U.S. Patent No. 7,276,250 ("the '250 patent"), and recently acquired U.S. Patent Nos. 5,662,933 ("the '933 patent") and 5,958,456 ("the '456 patent"), in connection with Opana ER. (Pretrial Stipulation ¶¶ 4,5,11,12.) These additional patents pertained to the controlled release mechanism of drug dosages, and the latest of these added patents expired in September 2013. (Pl.'s Resp. to Def.'s Stmt. of Facts on Patent Issues ("PSOF-PI") ¶ 6, Opp'n, Ex. 2, Dkt. No. 615-2.) In response to Endo's new patent claims, Impax amended its ANDA to certify that these new patents were "invalid, unenforceable, or will not be infringed upon by the manufacture, use or sale of Impax's generic Original Opana ER product." (*Id.* ¶ 9.) On November 15, 2007, **[*9]** Endo subsequently filed a suit for patent infringement based on the acquired '933 and '456 patents (the "underlying litigation patents"). (Joint Stipulation ¶ 18.)

Throughout the course of the 2007 patent litigation, Endo and Impax discussed resolving the case through settlement. Ultimately, Endo rejected each of Impax's proposals, including a July 2011 proposal. (Def.'s Resp. to Pl's Stmt. Of Facts on Damages/Causation ("DSOF-DC") ¶ 19, Dkt. No. 693. ("Impax's proposed July 2011 entry date 'was shut down very quickly.'") (citing Snowden Dep. 147:7-148:9, DSOF-DC, Ex. 66, Dkt. No. 676-10).)

Meanwhile, Endo sued and subsequently settled its lawsuit with Actavis, Inc., another ANDA first filer, albeit on the less popular dosage strengths of Opana ER. (DSOF-DC ¶ 24.) The settlement between Actavis, Inc. and Endo resulted in a July 15, 2011, start date for Actavis' generic Opana ER sales. (*Id.*)

Approximately one month before trial, Impax received tentative approval from the FDA to produce its dosages of generic Opana ER. (PSOF-PI ¶14.) At that time, Endo reinitiated settlement talks with Impax, and the parties eventually settled five days into the patent trial on June 8, 2010. (DSOF-DC ¶ 1.) The parties **[*10]** signed two documents on that date. (*Id.*)

The parties first signed the official settlement between Endo and Impax on the patent infringement litigation, entitled the 2010 Settlement and License Agreement ("2010 SLA"). (2010 SLA at 22-24, Mem. on Patent Issues, Ex. 17, Dkt. No. 535-19.) The 2010 SLA contained five notable provisions. First, Impax agreed to delay the sales of generic Opana ER until, at the latest, January 1, 2013. (*Id.* at 2-3.) Second, Endo agreed to grant Impax a broad license to sell generic Opana ER against both current and future patents, referred to as the "Broad License" provision. (*Id.* at 10-12.) Third, Endo agreed it would not launch its own competing generic version of Opana ER for at least six months after Impax's generic launch, meaning that Impax would be the only generic on the market during the secondary exclusivity period granted through the Hatch-Waxman Act. (*Id.* at 11.) This is referred to as the "No Authorized Generic" provision. The fourth and fifth important provisions constitute related compensation formulas based on the future 2013 market for generic Opana ER. (*Id.* at 13.) Essentially, if the market for generic Opana ER was still strong when Impax **[*11]** launched, then Impax would pay Endo a portion of its revenue. (*Id.*) This is the "Impax Royalty" provision. Conversely, if the market was weak, as might happen if Endo cannibalized the market with an upgraded Opana ER product in the intervening years, Endo would have to pay Impax. (*Id.*) This is referred to as the "Endo Credit" provision. The central dispute of this litigation is whether these provisions of the 2010 SLA violated ***antitrust law*** as an unreasonable restraint on trade.

The second agreement signed that day was a document forming a joint venture between Endo and Impax to develop a Parkinson's disease treatment. (DSOF-DC ¶ 5.) Endo was provided with future "profit-sharing rights," and Impax was provided with an upfront payment of ten million dollars. (*Id.* ¶ 2.) At summary judgment, the parties dispute whether the ten-million-dollar payment is an unrelated negotiation term or a sham venture created to provide an upfront payment to Impax. (*Id.*)

Approximately one month after the 2010 Settlement and License Agreement was signed, Endo submitted a New Drug Application with the FDA for a reformulated version of Opana ER. The "reformulated Opana ER" was crush-resistant and designed to **[*12]** curb the well-documented crushing and snorting abuse of opioid drugs. (PSOF-PI ¶4.) This information was made public when the reformulated Opana ER was approved by the FDA in December 2011. Reformulated Opana ER went on the market in March 2012. (*Id.*) During the next year, Endo filed multiple citizen petitions with the FDA asking the FDA to find the original Opana ER unsafe. (PSOF ¶ 55.) Had Endo been successful, the FDA would have revoked its approval of the generic versions of Opana ER. (*Id.*) The FDA declined to do so.

As a result, Impax launched its generic original Opana ER per the terms of the 2010 SLA between the parties in January 2013. (PSOF-DC ¶ 34.) Because the market for the original Opana ER had been drastically reduced through the launch of the reformulated Opana ER, Endo paid Impax the "Endo Credit," which was approximately $102 million. (DSOF-DC ¶ 4.)

Endo also worked to acquire additional patents to protect Opana ER from infringement. In late 2012, Endo acquired U.S. Patent No. 8,309,122 (the '122 patent) and 8,329,216 (the '216 patent). (PSOF-PI ¶ 34.)

Endo then aggressively enforced the '122 and '216 patents against the many generic drug producers who had filed either original or reformulated Opana ER ANDAs with the FDA. (PSOF-PI ¶ 35.) One of these **[*13]** lawsuits ended with a settlement agreement where Endo became the exclusive licensee of U.S. Patent No. 8,871,779 (the '779 patent) (with the '122 and '216 patents, the "later acquired patents"). (*Id.* ¶¶ 34, 37 n.11.) As the last of the extended release oxymorphone patents, the '779 patent does not expire until 2029. (*Id.* ¶ 34.) Once Endo became licensee of the '779 patent, Endo also sued generic drug producers for infringement on this patent as well. (*Id.* ¶ 44.)

In sum, Endo sued eleven additional generic drug producers over original and reformulated Opana ER infringement on the later acquired patents. (*Id.* ¶ 35.) Following two separate district circuit court decisions and one federal circuit affirmation, all other generic Opana ER producers other than Impax were enjoined from selling generic Opana ER based on the later acquired patents. (PSOF ¶¶ 41-43, 49-51.)

Even though Impax had the Broad License, Endo also sued Impax in a separate contention regarding the later acquired patents. Compl. ¶ 1, Endo Pharmaceuticals Inc. v. Impax Laboratories, Inc., No. 16-CV-2526 (D.N.J. May 4, 2016). In its complaint, Endo alleged that the 2010 SLA's Broad License included a requirement by Impax to enter good faith negotiations to provide Endo with a percentage of the profits. *Id.* The parties settled their dispute with an agreement for Impax to pay Endo three million **[*14]** dollars immediately and 50% of the profits thereafter. (2017 Settlement Agreement at 3, 15, App'x of Exs., Ex. 75, Dkt. No. 620-20.) In return, Endo authorized Impax to be the exclusive producer of generic Opana ER. (*Id.*)

In June 2017, the FDA requested that Endo withdraw reformulated Opana ER "based on its concern that the benefits of the drug may no longer outweigh its risks due to the public health consequences of abuse." *Notice, 85 FED. REG. 247 (Dec. 23, 2020)*. As a result, Impax's generic Opana ER is the only extended release oxymorphone product currently on the market.

This multidistrict litigation began with the December 12, 2014, transfer order from the United States Judicial Panel on Multidistrict Litigation (Dkt. No. 1.) Upon Defendants' motion to dismiss, on February 10, 2015, the Court dismissed all state consumer protection and unjust enrichment claims and allowed the antitrust claims to proceed. (Dkt. No. 151.) On March 2, 2016, the End Payor Plaintiffs filed a Second Consolidated Amended Class Action Compliant. (Dkt. No. 164.) On August 11, 2016, the Court dismissed some, but not all, of the state unjust enrichment and consumer protection claims. (Dkt. No. 210.)

The parties then entered extensive, multi-year **[*15]** discovery. At the close of discovery, the parties filed 25 motions. Defendants filed two motions for summary judgment and eleven *Daubert* motions. The Direct Purchaser Plaintiffs and End Payor Plaintiffs each filed motions for class certification and ten *Daubert* motions. The Court resolves the *Daubert* motions and the summary judgment motions in this opinion and order.

II. STANDARD

Summary judgment is proper "only where the moving party is entitled to judgment as a matter of law, where it is quite clear what the truth is, and where no genuine issue remains for trial." *Lupia v. Stella D'Oro Biscuit Co., 586 F.2d 1163, 1166 (7th Cir. 1978)* (quoting *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 467, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1961)*). There is a genuine issue of material fact when "there is sufficient evidence favoring the nonmoving party for a jury to return a verdict for that party." *See Harney v. Speedway SuperAmerica, LLC, 526 F.3d 1099, 1104 (7th Cir. 2008)* (citation omitted). The Court construes all facts and reasonable inferences in favor of the plaintiffs. *Id.* For the nonmoving party to prevail, it must show a genuine dispute of facts that might affect the outcome at trial; "[i]rrelevant or unnecessary facts do not deter summary judgment, even when in dispute." *Id.* (citation omitted).

"Any assessment of the admissibility of expert witness testimony begins with *Federal Rule of Evidence 702* and the Supreme Court's opinion in *Daubert* ***[*16]*** , as together they govern the admissibility of expert witness testimony." *Krik v. Exxon Mobil Corp., 870 F.3d 669, 673 (7th Cir. 2017)*; *see also Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. Under *Rule 702*:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if:
> (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue;
> (b) the testimony is based on sufficient facts or data;
> (c) the testimony is the product of reliable principles and methods; and
> (d) the expert has reliably applied the principles and methods to the facts of the case.

FED. R. EVID. 702. "In *Daubert*, the Supreme Court interpreted *Rule 702* to require 'the district court to act as an evidentiary gatekeeper, ensuring that an expert's testimony rests on a reliable foundation and is relevant to the task at hand.'" *Gopalratnam v. Hewlett-Packard Co., 877 F.3d 771, 778 (7th Cir. 2017)* (quoting *Krik, 870 F.3d at 674*).

To screen proposed expert testimony, a district court must answer three questions: "whether the witness is qualified; whether the expert's methodology is scientifically reliable; and whether the testimony will assist the trier of fact to understand the evidence or to determine a fact in issue." *Id. at 779* (citations omitted). To evaluate the reliability of an **[*17]** expert's scientific methodology, *Daubert* offers the following factors for case-by-case consideration: whether the methodology can be tested, whether it has been subject to peer review, what the known or potential rate of error is and whether there are standards controlling the technique's operation, and whether there is general acceptance of the technique in the relevant scientific community. *Daubert, 509 U.S. at 594*. This list is neither exhaustive nor mandatory. *Kumho Tire Co., Ltd. v. Carmichael, 526 U.S. 137, 150, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*.

The Court's "'gatekeeping' obligation . . . applies not only to testimony based on 'scientific' knowledge, but also to testimony based on 'technical' and 'other specialized' knowledge." *Kumho, 526 U.S. at 141*. The court must adjust the *Daubert* factors "to fit the facts of the particular case at issue, with the goal of testing the reliability of the expert opinion" because "the reliability of different kinds of expertise may be shown in different ways." *United States v. Brumley, 217 F.3d 905, 911-12 (7th Cir. 2000)*. Where an expert's testimony is based on extensive experience, the court determines the extent and type of experience and may limit both the questioning and the testimony to reflect only those areas in which the expert has extensive experience and training. *Id. at 911*. Nevertheless, "[t]alking off the cuff — deploying neither **[*18]** data nor analysis — is not an acceptable methodology." *Lang v. Kohl's Food Stores, Inc., 217 F.3d 919, 924 (7th Cir. 2000)*. Ultimately, the court's gatekeeper role does not replace the role of the trier of fact, and the "jury must still be allowed to play its essential role as the arbiter of the weight and credibility of expert testimony." *Stollings v. Ryobi Techs., Inc., 725 F.3d 753, 765 (7th Cir. 2013)*.

III. DISCUSSION

The Court notes at the outset that few experts were challenged on the basis of insufficient credentials or that the experts do not qualify as experts in their fields. As a result, the Court focuses on the second and third prongs, the methodology of the expert and the expert opinion's relevance for the trier of fact, unless specifically noted otherwise in the subsequent challenges to the proffered experts.

A. Defendants' *Daubert* Motions

1. Defendants move to exclude the testimony of John R. Tupman, Jr. (Dkt. No. 510)

Defendants first move to exclude fully the opinion of John R. Tupman Jr. Plaintiffs have retained Mr. Tupman, a former pharmaceutical executive from Eli Lilly and Co., to give the opinion that "no reasonable pharmaceutical company in Endo's position" would have entered the side agreement regarding Parkinson's Disease, which was executed by Endo and Impax on the same day as the Opana ER Settlement **[*19]** agreement. (Tupman Rep. ¶¶ 1-3, Mem., Ex. 2, Dkt. No. 512-3.) In support of his opinion, Mr. Tupman identifies the lack of due diligence and contract terms that favor Impax from a risk-sharing perspective. Plaintiffs hope to use Mr. Tupman's testimony to argue that the Parkinson's Disease joint venture was a sham, and that the payment should be considered a reverse payment and part of the settlement between Impax and Endo's Opana ER patent lawsuit. As held in *F.T.C. v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, a reverse payment can indicate that a patent infringement lawsuit settlement was an unlawful restraint on trade.

Defendants argue the Mr. Tupman's expert opinion is deficient in two ways. The first argument is that, under *Actavis*, the trier of fact must determine whether the agreement represents a "fair value for services" rendered. *Id.*

at 156. Because Mr. Tupman's opinion relates to the reasonableness of Endo's actions, it does not assist the trier of fact to determine whether the ten million dollars paid was a fair value for the promised development of the Parkinson's Disease research. Second, Defendants argue that there is no methodology employed by Mr. Tupman when making the determination that Endo was being atypical and unreasonable. **[*20]**

In response, Plaintiffs argue that Defendants, not Plaintiffs, have a burden to show the procompetitive rationale for the restraint. Under the rule of reason test, Plaintiffs have the burden to show that the agreements between the parties was an unreasonable restraint of trade, which Mr. Tupman provides through his testimony. In response to the second argument, Plaintiffs argue that Mr. Tupman's expertise is one of experience, not scientific analysis.

The Court finds neither of Defendants' arguments persuasive. Plaintiffs have the burden to show that the putative reasons set forth in the joint agreement between Endo and Impax are less plausible than Plaintiffs' alternative theory of a sham contract and secret settlement. By opining that Endo acted in an unusual and financially detrimental manner, Mr. Tupman's evidence makes Plaintiffs' theory more plausible and thus relevant to the litigation. The Court's review of Mr. Tupman's testimony shows that Mr. Tupman first articulates a standard process for engaging in pharmaceutical partnerships and then analyzes how Endo deviated from this process. As a result, Mr. Tupman's methodology is reliable under *Daubert. See* *Walker v. Soo Line R. Co., 208 F.3d 581, 591 (7th Cir. 2000)* ("*Rule 702* specifically contemplates **[*21]** the admission of testimony by experts whose knowledge is based on experience.") "Whether a payment was large and unjustified . . . requires viewing the payment in the context of the facts of the case, which may include business considerations that are less tangible or quantifiable." *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. CV 14-MD-02503, 2018 U.S. Dist. LEXIS 18979, 2018 WL 734655, at *4 (D. Mass. Feb. 6, 2018)*. Here, Defendants' objections go to the weight of the evidence and not its admissibility, and the motion is denied. (Dkt. No. 510.)

2. Defendants move to exclude the testimony of Janet K. DeLeon (Dkt. No. 513)

Plaintiffs have retained Janet K. DeLeon, a pharmaceutical consultant, to provide an expert opinion on what the FDA would have done, absent the litigation, specifically (1) when it would have granted approval for Impax's generic Opana ER; (2) when it would have granted approval Actavis' generic Opana ER; (3) whether it would have allowed Endo to claim its reformulated version was an improvement over the original; and (4) other regulatory hurdles, if any, had Endo decided to launch an authorized generic. (DeLeon Rep. ¶ 3, Mem., Ex. 4, Dkt. No. 515-5.)

Defendants move to exclude partially this testimony on three grounds. First, Defendants argued that Ms. DeLeon does not have experience with the FDA on **[*22]** opioid products and lacks the expertise to evaluate the impact reformulated Opana ER had on opioid abuse. Second, Defendants argue that Ms. DeLeon does not employ any methodology, but simply repeats facts already in evidence. Finally, Defendants argue that Ms. DeLeon's opinion regarding Endo's promotion of reformulated Opana ER is a legal conclusion and not a proper subject matter of expert opinion.

Without reaching the question of Ms. DeLeon's expertise in the regulatory pharmaceutical industry, the Court agrees that Ms. DeLeon does not employ expert analysis in her proffered opinion. Instead, DeLeon's report highlights information that is already available through documents and fact witnesses. First, as pointed out by Plaintiffs in their opposition brief, there is already substantial evidence in the record that the FDA declined to allow Endo to claim that the reformulated Opana ER was superior. (Opp'n to Mot. to Exclude DeLeon at 7, Dkt. No. 602.) Further, as stated in Ms. DeLeon's summary of the facts, the FDA had already tentatively approved generic Opana ER and would provide final approval after the required 30-month stay. (DeLeon Rep. ¶¶ 56-64.) Similarly, the FDA's approval of **[*23]** generic Opana ER necessarily means that Endo was free to produce a generic version as well. These facts are already in evidence, so it is unclear why Ms. DeLeon would provide any additional assistance to the jury.

Plaintiffs argue that courts routinely permit expert testimony to assist the jury in understanding complex regulatory issues, citing *Antrim Pharm. LLC v. Bio-Pharm, Inc., 950 F.3d 423, 430-31 (7th Cir. 2020)*. In *Antrim*, the Seventh Circuit held that the district court did not abuse its discretion in allowing the testimony of an FDA regulatory expert that testified about whether or not the FDA would infer ownership when receiving an ANDA application. *Id.* The Seventh Circuit, however, upheld the district court's decision because the jury needed to "determine a fact at issue" about this topic, noting that the fact witness "incorrectly stated there is 'no difference' between ownership of an ANDA and ownership of an underlying product." *Id. at 431*. Here, however, both parties agree as to the underlying facts, and Plaintiffs have not brought any questionable testimony before the Court that might lead to confusion on the facts in question.

Plaintiffs' other cases are similarly inapposite. Plaintiffs' cited cases admitted expert testimony regarding general regulatory **[*24]** processes that would assist the jury. *See, e.g., Jones v. Novartis Pharms. Corp., 235 F.Supp. 3d 1244, 1255-56 (N.D. Ala. 2017)* ("The court finds that Dr. Parisian is qualified, based on her experience at the FDA as a Medical Officer, to offer testimony about regulatory requirements for the testing, marketing, and development of prescription drugs."); *In re Yasmin & YAZ (Drospirenone) Mktg., Sales Practices & Prod. Liab. Litig., No. 3:09-MD-02100-DRH, 2011 U.S. Dist. LEXIS 145593, 2011 WL 6302287, at *13 (S.D. Ill. Dec. 16, 2011)* ("Here, the Court finds that Dr. Kessler's testimony is permissible because of the complex nature of the process and procedures and the jury needs assistance understanding it."). Ms. DeLeon has not submitted expert testimony about how the FDA ANDA approval process works generally. Instead, Ms. DeLeon's application of the FDA regulatory system to this case simply recited facts already present in the record. For this reason, the Court grants Defendants' motion to exclude Ms. DeLeon's testimony. (Dkt. No. 513.)

3. Defendants move to exclude the testimony of Luis A. Molina (Dkt. No. 516)

Luis A. Molina is an MBA-credited pharmaceutical consultant with more than twenty years of experience at a large pharmaceutical company. (Molina Rep. ¶¶ 5-6, Mem., Ex. 12, Dkt. No. 518-13.) Mr. Molina provides four opinions in his report: (1) absent the settlement agreement between Endo and Impax, Endo would have been ready and able **[*25]** to launch an authorized generic; (2) absent the agreement, a rational pharmaceutical company in Endo's position would have launched an AG version contemporaneously with Impax's launch; (3) Endo's actions were consistent with planning to launch an authorized generic; and (4) absent the agreement, a rational company in Endo's position would have continued its production of branded Opana ER and the authorized generic Opana ER, even with the launch of the reformulated version. (*Id.* ¶ 43.)

Defendants object to all of Mr. Molina's testimony, and the Court concurs. Mr. Molina's report does not engage in any analysis or method, but instead reiterates the facts of the case and then offers his opinion based entirely on his industry experience. (*See, e.g., id.* ¶ 68 ("All of [the recited facts are] consistent with and confirms my opinions that absent the no-AG promise Endo made to Impax, Endo was ready, and, in similar circumstances a rational pharmaceutical company would have been willing and financially incentivized to launch an AG version of Opana ER contemporaneously with an Impax generic launch."))

While experience can qualify a person to be an expert witness, the district court cannot simply **[*26]** take the witnesses' word at face value. *See Daubert v. Merrell Dow Pharms., Inc., 43 F.3d 1311, 1319 (9th Cir. 1995)* ("We've been presented with only the experts' qualifications, their conclusions and their assurances of reliability. Under *Daubert*, that's not enough."). "If the witness is relying solely or primarily on experience, then the witness must explain how that experience leads to the conclusion reached, why that experience is a sufficient basis for the opinion, and how that experience is reliably applied to the facts." *FED. R. EVID. 702* advisory committee note to the 2000 amendment; *see also Lang, 217 F.3d at 924* ("Many times we have emphasized that experts' work is admissible only to the extent it is reasoned, uses the methods of the discipline, and is founded on data."). Mr. Molina's expert report is devoid of method or analysis. For this reason, the Court grants the Defendants' motion to suppress Mr. Molina's testimony. (Dkt. No. 516.)

4. Defendants move to exclude certain opinions of Dr. Jeffery J. Leitzinger (Dkt. No. 529.)

Dr. Jeffery J. Leitzinger holds a PhD and is an economist at a national research and consulting firm. (Leitzinger Rep. ¶ 1, Mem., Ex. 2, Dkt. No. 531-3.) Defendants dispute three opinions provided by Dr. Leitzinger: (1) his 'Lerner index' analysis, from which **[*27]** he concludes there is proof of Endo's market power; (2) his analysis on the cross-price elasticity between Opana ER and other long-acting opioids which additionally purports to show Endo's market power; and (3) a damages model based on sales which were unlawful based on the subsequently-acquired patents in this case. (*Id.* ¶¶ 51-53, 79-85, 87-116.) The Court reviews each in turn.

First, Defendants object to Dr. Leitzinger's employment of an economic method of calculating excess profit called the 'Lerner index.' A first principle of economics is that, in a perfectly competitive market, firms will be making almost no economic profit because each firm sells their goods at the cost it takes to make the additional unit. The additional-unit cost is referred to as marginal cost. The Lerner index is employed by economists to calculate the economic profits beyond marginal cost. In theory, a firm that attempts to set its prices above marginal cost would be subject to plummeting demand as consumers switched to competing substitutes. As a result, any excess economic profits that a firm makes on a per-unit basis demonstrates imperfect competition, i.e., constitutes evidence that the firm has enough **[*28]** power in the relevant market to set its prices above the competitive level without consequence.

A firm's Lerner index is calculated using two inputs. Economists take the retail price of the good or service sold, subtract out the marginal cost that it took to provide the good or service, and then divide the resulting number by the price sold. This is notated as (Price — Marginal Cost/Price) or P-MC/P = X. In practice, this number, noted as either a decimal or a percentage, will vary based on the type of product sold. For example, a product with low marginal cost, such as a software download to an end-user, could have a number closer to 1 (or closer to 100%). A company that provided extremely costly goods or services, such as a made-to-measure suit, would be expected to have a much lower ratio, or a number closer to 0 (or closer to 0%). Generally, a Lerner index score closer to 1 indicates strong market power. Dr. Leitzinger opines that Endo's Lerner index, estimated between 60.7 and 74.3 percent, is direct evidence of Endo's monopoly power. (*Id.* ¶¶ 51-53.) Defendants object, arguing the Lerner index is not a reliable method of calculating monopoly power in many industries with high initial **[*29]** costs, including the pharmaceutical industry.

In support of his assertion, Dr. Leitzinger cites to the textbook *Modern Industrial Organization* by Carlton and Perloff, as well as the Department of Justice Merger Guidelines. While the DOJ Guidelines are developed in a different context, the manual uses the same basic principles of economics outlined above. In the event of a proposed merger, the DOJ "employ[s] the hypothetical monopolist test to evaluate whether groups of products in candidate markets are sufficiently broad to constitute relevant antitrust markets." Horizontal Merger Guidelines § 4.1.1, (U.S. Dep't of Justice & Fed. Trade Comm'n 2010). The DOJ evaluates whether products sold by the merging firms are (1) in the same market and (2) could, in the event of the merger, support a small but significant and non-transitory increase in price of at least 5% ("SSNIP"). *Id.* That small increase would have no effect on the cost it took to produce the good; it would be essentially profit, and thus show up as an .05 increase in a Learner index calculation.

Dr. Leitzinger admits in his report using the Merger Guidelines to suggest an absolute Lerner index score of .05 (or 5%) as a standard **[*30]** for monopoly power would be "prone to false indications of monopoly power." (*Id.* ¶52.) Unlike in a potential merger, Plaintiffs do not have a putative "before patent" oxymorphone ER market with which to compare their current economic profits, and thus Dr. Leitzinger's calculations cannot show increases. However, in principle, if a 5% increase in economic profit suggests market power, then a 60-70% calculation of absolute economic profit is an accurate indicator of general market power.

In their opposition, Defendants argue that many goods, including pharmaceutical drugs, have high fixed costs which do not show up on the Learner index because the equation only accounts for the marginal costs. Defendants' argument highlights the purpose of government-provided patents. A patent creates a monopoly to protect the company's investments in research in development as an inducement to undertake those larger fixed costs. It does not fully explain, however, why there would be excess economic profits absent the patent.

Defendants also rely on *United States v. Eastman Kodak Co., 63 F.3d 95 (2d Cir. 1995)*, in support of their petition to exclude Dr. Leitzinger's calculations. In *Kodak*, the United States appealed a district court order granting a motion to terminate **[*31]** two antitrust consent decrees from 1921 and 1954. *Id. at 97*. Integral to the decision was the district court finding that the market for film was worldwide and thus encompassed both foreign and domestic film manufacturers. *Id. at 102*.

On appeal, the Government argued that the scope of the market should be domestic, citing the *Cellophane* case fallacy. *Id. at 103*. In the *Cellophane* case, the Supreme Court found that while the manufacturer "du Pont produced almost 75% of the cellophane sold in the United States," this "constituted less than 20% of all 'flexible packaging material' sales" and thus did not exercise market power. *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 379, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. Later academic literature criticized this decision because it failed to account for the fact that a monopolist "always faces a highly elastic demand; its products are so overpriced that even inferior substitutes begin to look good to consumers." *Kodak, 63 F.3d at 103* (citing William M. Landes & Richard A. Posner, *Market Power in Antitrust Cases*, 94 HARV. L. REV. 937, 960-61 (1981)). In *Kodak*, the district court rejected the Government's *Cellophane* fallacy argument and found that, unlike the inferior wrapping products that were compared to cellophane, "foreign film is an excellent substitute for Kodak film." *63 F.3d at 103*.

The government appealed, arguing that **[*32]** because "the sales price of Kodak film is twice the short-run marginal cost," or .50 on the Lerner index, Kodak was earning monopoly profits and thus had significant market power. *Id. at 108-09*. The Second Circuit was unpersuaded, particularly because it had already affirmed the district court's determination on the scope of the market. *Id. at 109*. Noting the evidence in the record that "fixed costs in the film industry are huge," the Second Circuit affirmed the district court's termination of the antitrust decrees. *Id. at 109-10*.

Unlike *Kodak*, however, the Court has not made any determinations in this litigation regarding the scope of the market. Indeed, the Government in *Kodak* was clearly allowed to present the Lerner index as evidence of profit and thus evidence of market power throughout the district court proceedings. The Court finds that the Lerner index is a well-established method implemented in the field of economics to find evidence of market power, although not conclusive in and of itself. *See* *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *12* ("Plaintiffs' evidence of high margins is insufficient direct evidence as a matter of law to demonstrate market power."); *c.f.* *Dial Corp. v. News Corp., 165 F.Supp. 3d 25, 41-42 (S.D.N.Y. 2016)* (permitting an expert to use a Lerner index analysis to determine the margin variable in **[*33]** his critical loss analysis). For this reason, the Court denies Defendants' motion to exclude Dr. Leitzinger's Lerner index analysis.

Next, Defendants move to exclude Dr. Leitzinger's analysis regarding cross-price elasticity. To determine the relationship between wholesale drug prices and sales volume, Dr. Leitzinger provides an econometrics regression model. (Leitzinger Rep. ¶ 81.) Defendants argue that the model has the wrong inputs and thus reviews the wrong market — i.e., the model charts retailers' wholesale prices instead of the price paid by the patient, and as a result it cannot include rebates and coupons in the analysis. As a result, Dr. Leitzinger's model essentially assumes that coupons and rebates have no effect on price.

The lack of rebate and coupons in the analysis is a questionable assumption given the extent to which pharmacy companies participate and compete via these programs. The Court's review of the econometrics analysis, however, finds that, regardless of inputs, the analysis was not performed with a degree of rigor or reliability such that it would be "generally accepted within the specific scientific field" of economics. *Lapsley v. Xtek, Inc., 689 F.3d 802, 810 (7th Cir. 2012)*. Specifically, Dr. Leitzinger's model **[*34]** does not include a graph to show the variability in retail prices, and Dr. Leitzinger does not include a standard error rate or sample size of his data. This lack of information would make it impossible for another economist to replicate his analysis or determine whether the dummy variables he included smooths his data or are impermissibly selective.

Further, Dr. Leitzinger's evidence against the null hypothesis, noted in the model as the "p-value," is not particularly helpful. Here, the p-values in Dr. Leitzinger's table are higher than 0.05 and thus do not meet the standard for statistical significance. (*Id.* ¶ 82.) Because there is no significance, Dr. Leitzinger cannot rule out that retailer prices have low cross-price elasticity. (*Id.*) When a product has low-price elasticity as compared to another product, it indicates that the price of either one could increase significantly without the typical corresponding switch to the lower priced alternative product. As a result, it is proof that the products should be considered to be in separate antitrust markets.

Given so many unknowns in his data, however, it appears equally plausible that if Dr. Leitzinger changed his null hypothesis, **[*35]** he could not rule out its opposite, i.e., that prices have a high cross-price elasticity. "In a case involving scientific evidence, *evidentiary reliability* will be based upon *scientific validity*." *Daubert, 509 U.S. at 590 n.9*. Because this analysis lacks scientific validity and is equally likely to confuse the jury as to assist them, the Court grants Defendants' motion to exclude this testimony.

Defendants' final objection to Dr. Leitzinger's testimony is a legal one. Dr. Leitzinger's damages model includes the assumption that, had Endo and Impax not entered into the 2010 Settlement and License Agreement, then Impax would have been selling generic Opana ER on the market earlier. In Dr. Leitzinger's model, however, the entry of Impax's generic Opana ER pushes downward not only the price of Endo's branded Opana ER, but also Actavis' generic Opana ER, which was on the market with its limited settlement agreement from 2011 to 2012, and then sold from 2012 to 2016 'at risk' while the litigation was pending in federal court. Plaintiffs have included the difference between Actavis' generic actual price and the projected downward price of Actavis' generic Opana ER in their calculations for damages. Plaintiffs theorize **[*36]** that an antitrust injury affects the entire market, and thus even the marginal price differences in companies not currently involved this lawsuit constitutes part of their injury. Defendants point out, however, that a federal judge, later affirmed by the federal circuit, found that Actavis' generic was infringing on the later acquired patents. The district court then enjoined Actavis from selling its generic Opana ER until the later acquired patents' expirations. Defendants argue that by calculating damages that include Actavis' generic Opana ER, Dr. Leitzinger's model incorporates 'illegal' conduct as part of its damages model and ask that the model be excluded, citing *In re Wellbutrin XL Antitrust Litig. Indirect Purchaser Class, 868 F.3d 132, 165 (3d Cir. 2017)* ("It is not enough for the Appellants to show that Anchen wanted to launch its drug; they must also show that the launch would have been legal.")

Plaintiffs argue that Actavis' generic Opana ER was not illegal from 2012 to 2016 because it is not illegal to sell a generic drug 'at-risk' while the patent litigation is pending. *Anesta AG v. Mylan Pharms., Inc., No. CV 08-889-SLR, 2014 U.S. Dist. LEXIS 112495, 2014 WL 3976456, at *2 (D. Del. Aug. 14, 2014)* ("I agree with defendants that, although their launch was at risk, it was not illegal when it took place and, absent a directive from the Federal Circuit to recall their generic products, defendants **[*37]** had no legal obligation to do so."). Plaintiffs also submitted a recalculated damages model without Actavis' generic Opana ER price differences after 2012.

Although Plaintiffs are correct that Actavis was not acting in a criminal manner by using the Hatch-Waxman Act to launch at-risk, the fact indisputably remains that the later acquired patents' validity is now settled. As a result, the patents were also valid while Actavis was selling its product 'at-risk.' The Court will not permit Plaintiffs to benefit from generic entrants who infringed on Endo's patents for the purpose of damages. However, Dr. Leitzinger also submitted a revised model without Actavis' projected price differences which the Court finds to be an acceptable alternative. To the extent that Dr. Leitzinger's revised model cures this deficiency, then, the Court denies Defendants' motion.

For the foregoing reasons, the Court grants in part and denies in part Defendants' motion to exclude certain portions of Dr. Leitzinger's testimony. (Dkt. No. 529.)

5. Defendants move to exclude partially the opinions of James R. Bruno (Dkt. No. 537)

James R. Bruno is the Managing Director of a pharmaceutical consulting company whose work **[*38]** includes assisting emerging companies develop and commercialize active pharmaceutical ingredients and finished drug products. (Bruno Rep. ¶ 5, Mot. to Exclude, Ex. 7, Dkt. No. 542-8.) Defendants move to exclude the entirety of Mr. Bruno's opinion and testimony, citing to two objections: first, that Mr. Bruno does not engage in expert analysis, but instead reads and summarizes the documents already in the record; second, that Mr. Bruno improperly speculates on Impax's state of mind.

The Court finds neither of these criticisms is persuasive. Upon review of Mr. Bruno's testimony, the closest that Mr. Bruno comes to reiterating a factual summary is his detailing of the progress Impax made prior to the 2010 Settlement Agreement. This information, however, is crucial to Mr. Bruno's expert opinion as to whether an earlier commercial start date was feasible for Impax's commercial entry of generic Opana ER. Mr. Bruno's experience with the policies and procedures required for a mass production of a laboratory drug are clearly articulated and compared with Impax's progress in his testimony.

Defendants also object to Mr. Bruno statements indicating that Impax would have launched 'at-risk,' claiming **[*39]** that Mr. Bruno is thus ascribing intent to Impax's actions. As stated in his testimony, Mr. Bruno only opines that Impax would be capable of launching at a certain time period, and that it was up to the jury to determine when Impax would have launched in a but-for world without the 2010 Settlement Agreement. (Bruno Rep. ¶ 26.) The Court holds that capacity and capability are within the purview of acceptable expert testimony and are not related to Impax's state of mind. Defendants' motion to exclude the testimony of Mr. Bruno is denied. (Dkt. No. 537.)

6. Defendants move to exclude certain opinions of Glen P. Belvis. (Dkt. No. 541.)

Glen P. Belvis is an intellectual property attorney who worked for over 20 years at a nationally recognized intellectually property firm. (Belvis Rep. ¶ 4, Mem., Ex. 1, Dkt. No. 542-2.) He currently serves as intellectual property counsel for multiple companies while maintaining his own law practice. (*Id.*) Among other topics, Mr. Belvis offers testimony regarding the technical aspects of the patents in dispute and their likelihood of success on the merits. Defendants object to one sentence of Mr. Belvis' report. As part of his analysis, Mr. Belvis reports **[*40]** that Impax had a "greater than 85% overall chance of ultimately prevailing at trial and through appeal." (*Id.* ¶ 431.) Defendants do not challenge Mr. Belvis' qualitative opinion that Impax "very likely" would have won the litigation. (*Id.* ¶ 104-05.) Instead, Defendants contend that the "85% chance" determination falsely denotes a level of mathematical precision does not present in Mr. Belvis' opinion and incorrectly relied upon by a later-discussed expert, Dr. McGuire, in his stock market analysis model.

Calculating a percentage chance of a but-for reality, such as Mr. Belvis' hypothetical jury verdict, requires uncertain estimates about human decisions and interactions. The Court is skeptical that Defendants' desired veneer of mathematical certainty on such an inherently dubious enterprise would be more helpful to the jury than what Dr. Belvis' estimate already provides. As Dr. McGuire cannot enter "very likely" into his mathematical model, it is reasonable for Mr. Belvis to draw upon his expertise to provide an estimate in mathematical terms. To the extent that Defendants wish to argue that "very likely" should be a different percentage, they will have the opportunity to do so on **[*41]** cross-examination before the jury.

Defendants also present a second argument, claiming that Mr. Belvis is wrong on the merits. The disagreements on the accuracy of Mr. Belvis' expert opinion goes to the weight of the evidence. For these reasons, Defendants' motion to exclude Mr. Belvis' testimony is denied. (Dkt. 541.)

7. Defendants move to exclude certain opinions of Dr. Meredith Rosenthal (Dkt. No. 545)

Dr. Meredith Rosenthal is a Health Economics and Policy Professor at Harvard University. (Rosenthal Rep. ¶ 1, Mem., Ex. 1, Dkt. No. 560-2.) Dr. Rosenthal opines that generic prices would have been lower without the 2010 Settlement and License Agreement and calculates Plaintiffs' damages based on those lower prices. Defendants object to Dr. Rosenthal's damages model on two grounds. First, Dr. Rosenthal includes sales of Actavis in her damages model, even after Endo's later acquired patents. Next, approximately 37% of Dr. Rosenthal's damages are attributed to "Medicare Part D" patients, who are not part of the proposed class.

The Court grants the motion. Plaintiffs argue that they are entitled to assume that Actavis would have begun selling at-risk in the hypothetical world, like Actavis' **[*42]** actual actions. Like the analysis above, however, the question at issue is not about the assumptions that Plaintiffs are permitted to incorporate into their models. Now that two district courts and the federal circuit have determined the later acquired patents are valid, there cannot be damages that

Plaintiffs "should" have received from Actavis being in the market past the acquisition of the '216 and '122 patents. This fact prohibits any recovery after the patents' issuances, and any model incorporating this for the purpose of calculating damages is stricken. For this reason, the Court grants the Defendants' motion to exclude Dr. Rosenthal's flawed damages model. (Dkt. No. 545.)

8. Defendants move to exclude the opinions of Dr. Stephen R. Byrn (Dkt. No. 546)

Dr. Stephen R. Byrn is a Professor of Medical Chemistry at Purdue University. (Byrn Rep. ¶ 3, Mem., Ex. 3, Dkt. 549-4.) He offers the opinion that the underlying patents Endo asserted and then settled in the 2010 Settlement and License Agreement are invalid. (*Id.* ¶¶ 12-16.) Defendants argue that Dr. Byrn's testimony is irrelevant and thus will not assist a trier of fact to understand the evidence or determine a fact in issue. Defendants argue that **[*43]** Dr. Byrn does not limit himself to the admissible and entered evidence present at the time of the 2010 litigation, and thus he will be unable to assist the upcoming jury in determining whether or not a 2010 jury would have found the patents infringed upon, and thus whether Impax or Endo would have prevailed in the underlying litigation. Plaintiffs disagree vehemently, stating that Dr. Byrn reached his conclusions based on the evidence Impax advanced in its materials filed in the 2010 patent litigation. In response, Plaintiffs reviewed each allegation made by Defendants and then pointed to where it was used in the underlying litigation.

Defendants also object to Dr. Byrn's responses to Drs. Lowman and Fassihi's expert opinions, claiming that they contain novel arguments. Plaintiffs counter that it is Defendants' experts who advance the novel arguments, and Plaintiffs are thus required to counter these arguments with their own expert.

Upon review of the disputed evidence, Court finds that Defendants have failed "to identify a particular reference or piece of information that was verifiably outside the scope" of the prior record Dr. Byrn "*relied upon* to form his opinion on validity and **[*44]** enforceability." *United Food & Com. Workers Loc. 1776 & Participating Emps. Health & Welfare Fund v. Teikoku Pharma USA, 296 F.Supp. 3d 1142, 1186 (N.D. Cal. 2017)*. Ultimately, however, both of Defendants' arguments misunderstand the purpose of this antitrust litigation. The purpose of the jury is to find whether the actual patents in the underlying litigation were invalid, and thus the 2010 SLA an unreasonable restraint on trade, and not whether the patents would have been found valid in the but-for world where the 2010 litigation continued without settlement. Under Defendants' framework of slavish devotion to the recreation of the 2010 litigation, the Court would not be able to correct clear errors in the prior litigation, and be forced to allow the appellate court to review as would have after the 2010 litigation, or, to Defendants' detriment, Defendants could not benefit from the knowledge that the 2012 lawsuit against Actavis would be successful on the merits. Defendants cannot insist on benefiting from later knowledge when it is convenient to Defendants and otherwise argue the Court and Plaintiffs are handicapped from bringing fresh analysis to the case. For these reasons, the Court denies the motion. (Dkt. No. 546.)

9. Defendants move to exclude the opinions of Patricia Zettler and Martin Lessem (Dkt. No. 550)

Plaintiffs **[*45]** have retained Patricia Zettler and Martin Lessem, both attorneys, to opine on any additional regulatory impediments, if any, Impax would have faced after receiving approval from the FDA. Defendants move to exclude these opinions on the basis that they are legal arguments, not expert opinions, and that Ms. Zettler and Mr. Lessem are advancing opinions as to Impax's intent and state of mind, both of which are prohibited under *Daubert*.

The Court's review of Ms. Zettler's expert report found that Ms. Zettler limited her opinions to (1) observations about the FDA's methods and processes regarding opioid launches generally, and (2) her professional opinion that the FDA's processes would not have impeded a generic Opana ER product launch. (Zettler Rep. ¶¶ 19-68, Mem., Ex. 8, Dkt. No. 554-9.) The Court did not review any initial report from Mr. Lessem, as no report was attached to any of the fillings associated with this motion, however, a review of Mr. Lessem's rebuttal report and testimony appear to be similarly unrelated to Defendants' concerns. Mr. Lessem's rebuttal report opposed Dr. Patel's opinion regarding a "reasonable company in Impax's situation" would have faced regulatory hurdles **[*46]** to an earlier generic Opana

ER launch. (Lessem Rebuttal Rep. ¶ 19, Mem., Ex. 12, Dkt. No. 554-11.) Mr. Lessem instead opines that there is no reason to think FDA's final approval letter would have been rescinded due to regulatory hurdles. (*Id.* ¶ 23.)

These opinions appear entirely unrelated to legal arguments or Impax's state of mind. In complex regulatory cases, opinions regarding government regulations are permitted "to testify on complex statutory or regulatory frameworks when that testimony assists the jury in understanding a party's actions within that broader framework." *Antrim Pharm. LLC, 950 F.3d at 430-31*. The Court finds that the testimony of Ms. Zettler and Mr. Lessem will be helpful to assist the trier of fact and denies Defendants' motion. (Dkt. No. 550.)

10. Defendants' motion to exclude partially the opinions of Dr. Keith Leffler (Dkt. No. 552.)

Dr. Keith Leffler is a Professor of Economics at the University of Washington, specializing in antitrust and industrial organization. He opines as to Endo's market share, the effect of Impax's generic Opana ER on the market, and presents a model for damages. (Leffler Rep. ¶ 11, Mem., Ex. 2, Dkt. No. 555-3.) Defendants allege Dr. Leffler's opinions on (1) an alternative **[*47]** settlement, (2) damages, and (3) Endo's market power are all endemically flawed and do not pass the 'reliability test' in the second prong of *Daubert*'s analysis. Defendants move to exclude all aspects of these topics from Dr. Leffler's testimony.

Like Dr. Leitzinger, Dr. Leffler also performs a Lerner index analysis using Endo's public SEC filings. Dr. Leffler similarly admits that no firm would "engage in a research and development project absent an anticipation of being able to sell at a price" that would create a 'high' Lerner index number, which would allow it to recoup its fixed costs, such as research and development costs. (June 2019 Leffler Dep. 182:25-183:9). As stated in Section III.A.4, this statement explains why drug manufacturers seek patent protections on newly developed drugs. Absent the patent, however, a company in a perfectly competitive market would nonetheless be forced to sell at lower-than-recoupable costs to compete with those manufacturers who did not shoulder the initial drug development outlays, as long as the company could charge enough on a per-item basis to cover the products' marginal cost. As a result, this admission does not fully explain Endo's high **[*48]** economic profits beyond marginal costs.

Dr. Leffler also acknowledges that "third party insurers, managed care entities, and pharmacies play a role in constraining price increases," but considers these considerations to be constraining the already-monopolized market of generic Opana ER, similar to the marginal price sensitivity of cellophane in the *Cellophane* case. (Leffler Rep. ¶ 50.) Despite these deposition concessions pointed out by Defendants, the Court reaches the same conclusion as it did with Dr. Leitzinger: a high Lerner index can be indicative of monopoly power. As such, it is permissible evidence to provide to the jury. Defendants' disagreement over the extent that insurance negotiations affect economic profits can be made before the jury. As such, Dr. Leffler is similarly permitted to present his expert opinion. The motion to exclude this opinion is denied.

Dr. Leffler also offers testimony regarding a hypothetical and more procompetitive agreement between Endo and Impax. Defendant first argues that Dr. Leffler impermissibly opines that an alternative agreement would have included the Broad License. Plaintiffs explain, however, that Dr. Leffler assumes the Broad License would **[*49]** have been included based on testimony by other fact witnesses. "The fact that an expert's testimony contains some vulnerable assumptions does not make the testimony irrelevant or inadmissible." *Stollings, 725 F.3d at 768*. The Court therefore declines to exclude Dr. Leffler's testimony on this basis.

Defendants also object to Dr. Leffler's hypothetical agreement between Endo and Impax because Dr. Leffler picked his entrance date based on a settlement offer letter from Impax. Defendants argue that Dr. Leffler's model works for numerous dates, and thus it is not rational to pick one date instead of a range of dates. The Court finds that Dr. Leffler is similarly assuming a date based on the factual record which does not cause his testimony to be suddenly inadmissible. As such, Defendants' objections go to the weight of the evidence to be submitted to the jury.

Finally, Defendants challenge Dr. Leffler's damages models. Dr. Leffler presents models on both a 'continued litigation' theory as well as a 'alternative settlement' theory. First, the Court notes that Defendants' objection to the 'alternative settlement' is identical to their objection to the hypothetical procompetitive agreement. In both cases, Defendants **[*50]** find fault with Dr. Leffler's inclusion of the Broad License. For the same reasons set forth above, Dr. Leffler's assumption that a Broad License would be included in the Plaintiffs' alternative settlement scenario is a permissible part of Dr. Leffler's damages model. The Court denies the Defendants' motion to exclude this model.

Second, Dr. Leffler's presents multiple 'continued litigation' damages models depending on various dates that Opana ER could have come onto the market. The complication to any continued litigation model, however, is that Endo acquired additional patents in 2012 which Endo immediately enforced against all generic producers. To avoid this complication, Dr. Leffler stops his damages model prior to the acquisition of the later acquired patents. Rather magnanimously, Plaintiffs state that they do not intend to seek damages after 2012.

Absent the 2010 SLA, Endo's acquisition of additional patents would have resulted in some change in the alleged oxymorphone ER market based on Endo's subsequent business decisions. On a general level, Endo could have decided (1) to sell a generic Opana ER either through its own production or a license agreement with another company, **[*51]** (2) to restart operations to sell branded Opana ER, or (3) to stop selling Opana ER entirely. Because some of these post-2012 continued litigation alternative histories would have decreased the competitiveness of the market or the price that Opana ER was sold to consumers, the 2010 SLA contained potentially procompetitive effects.

For this reason, Defendants argue that models that stop calculating damages after 2012 are inherently inaccurate as they do not consider the time periods where Plaintiffs received a procompetitive effect. Defendants argues that it is solely because of the 2010 SLA's Broad License that Plaintiffs can purchase any Opana ER product to this day. Defendants acknowledge that, in a continued litigation alternative history, Plaintiffs may have been able to purchase generic Opana ER earlier (either August 17, 2010 or July 14, 2011, as predicted Dr. Leffler's various models) but that ability would have stopped in 2012, and no Opana ER would have been available at that point forward.

The Court agrees in part. "[A]ny model supporting a 'plaintiff's damages case must be consistent with its liability case, particularly with respect to the alleged anticompetitive effect of **[*52]** the violation.'" *Comcast Corp. v. Behrend, 569 U.S. 27, 35, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (citing ABA Section of ***Antitrust Law***, Proving Antitrust Damages: Legal and Economic Issues 57, 62 (2d ed. 2010)). Absent the 2010 SLA and particularly after the FDA's request for Endo to remove the reformulated Opana ER, it is possible that Endo may have decided to exit the extend release oxymorphone market entirely. However, this is not the only potential outcome: Endo may have made other, more financially lucrative decisions such as continuing in the market as either a branded or generic product. To succeed on the merits in a continued litigation scenario, Plaintiffs must put forth evidence to support the likely outcome of generic or branded Opana ER market without the 2010 SLA. What Plaintiffs cannot do, however, is avoid the post-2012 market in its entirety. For that reason, Dr. Leffler also cannot cut off his damages model as to only some of the effects of the settlement. For these reasons, the Court grants the motion to exclude the challenged 'continued litigation' models and denies the motion on all other grounds. (Dkt. No. 552.)

11. Defendants' motion to exclude partially the opinions of Dr. Thomas G. McGuire (Dkt. No. 556)

Dr. Thomas G. McGuire is Professor **[*53]** of Health Economics at Harvard University. (McGuire Rep. ¶ 5, Mem., Ex. B, Dkt. No. 559-3.) He has been retained by Plaintiffs to conduct an economic analysis of the 2010 SLA and the accompanying joint-venture agreement to determine whether the agreements are anticompetitive. (*Id.* ¶ 2.) Defendants challenge two portions of Dr. McGuire's testimony. First, Defendants challenge Dr. McGuire's assumption that the Broad License would be part of any alternative settlement. As determined in Section III.A.10 *supra*, the inclusion of an assumption based on the testimony of fact witnesses is admissible, and the Court similarly denies this part of the motion.

Second, Defendants challenge Dr. McGuire's testimony regarding his stock price analysis. As part of his opinion, Dr. McGuire makes the following assumption about the real-world financial markets:

> If the announcement of a pay-for-delay settlement was not anticipated by financial markets, new profits kept by the brand will be capitalized by traders in financial markets and reflected in the brand's stock price (i.e., the market will reward the brand for keeping its monopoly and associated profits beyond the expected expiration).

(*Id.* ¶ 151.) According **[*54]** to Defendants, Dr. McGuire's resulting opinion on Endo's stock prices is methodologically unsound. Defendants first object to Dr. McGuire relying on Mr. Belvis' opinion that Impax had a "greater than 85% likelihood of success" in the underlying patent litigation. (*Id.* ¶ 184.) "[A]s a general matter, there is nothing objectionable about an expert relying upon the work a colleague." *Gopalratnam, 877 F.3d at 789*. Dr. McGuire is permitted to assume that the jury will accept the testimony of another witness, and the Court will not prohibit the jury's access to Dr. McGuire's model on that basis.

Defendants also argue that the stock price increase following the announcement of the 2010 Settlement and License Agreement could have been due to any number of factors beyond the settlement announcement, and Dr. McGuire failed to properly consider the myriad of other reasons a stock price fluctuates in his analysis. Plaintiffs oppose the motion on the basis that Dr. McGuire's work has been published in prominent peer-reviewed economic journals. *See, e.g., Do "Reverse Payment" Settlements Constitute an Anticompetitive Pay-for-Delay*?, 22 Int'l J. Econ. Bus. 173 (2015). The Court finds no issue with Dr. McGuire's methodology, **[*55]** and any theories that Defendants have on confounding variables properly go to the weight of Mr. McGuire's testimony and should be argued before the jury. For these reasons, the Court denies the motion. (Dkt. No. 556.)

B. Plaintiffs' *Daubert* Motions

Plaintiffs filed ten motions to exclude various experts presented by Defendants. The Court reviews whether the witness is "qualified as an expert by knowledge, skill, experience, training, or education;" whether "the expert's reasoning or methodology underlying the testimony [is] scientifically reliable;" and whether "the testimony [assists] the trier of fact to understand the evidence or to determine a fact in issue." *Ervin v. Johnson & Johnson, Inc., 492 F.3d 901, 904 (7th Cir. 2007)* (citation omitted).

1. Plaintiffs' motion to exclude the opinions of Dr. Nina Patel (Dkt. No. 519)

Dr. Nina Patel is Vice President of a consulting group that specializes in advising pharmaceutical, biotech, and medical device companies. (Patel Rep. ¶ 1, Curley Aff., Ex. 67, Dkt. No. 534-71.) Dr. Patel opines that it "would not have been reasonable for a company in Impax's position to have launched or sold its generic Opana ER product without an FDA-approved risk management program in place." (*Id.* ¶ 14.)

The Hatch-Waxman Act "allows **[*56]** generic manufacturers to rely on FDA's prior approval of another drug with the same active ingredient — the reference listed drug (RLD) — to establish that the generic drug is safe and effective." KEVIN J. HICKEY, CONG. RSCH. SERV., R45666, DRUG PRICING AND INTELL. PROP. L. at 20. Dr. Patel acknowledges that Impax received a "final approval" letter regarding Impax's generic Opana ER from the FDA on this basis. (Patel Rep. ¶ 39.) While Dr. Patel appears to walk back her specific claim that additional approvals were required to launch a pharmaceutical drug in her deposition, Dr. Patel's testimony suggests that additional money, time, and research was required before Impax could launch generic Opana ER. (*See* Patel Dep. at 416:14-22, Curley Aff., Ex. 70, Dkt. No. 534-74. ("I have no opinion on [whether Impax had a statutory right to launch its generic Opana product after final approval].") While this may be true for initial drugs coming onto the market, it is without dispute that the FDA subsequently approved Impax's application based on Endo's research and safety analyses without the additional concern, cost or time highlighted by Dr. Patel.

An expert witness "ha[s] the responsibility **[*57]** to apply his [or her] analysis to the facts of the case." *Deimer v. Cincinnati Sub-Zero Prod., Inc., 58 F.3d 341, 345 (7th Cir. 1995)*. The Court finds that Dr. Patel's testimony did not do so here, and as such it would be unhelpful to jurors during trial. The Court grants the motion to exclude Dr. Patel's testimony. (Dkt. No. 519.)

2. Plaintiffs' motion to exclude partially the opinions of Mr. Jonathan Singer (Dkt. No. 520)

Mr. Jonathan Singer is a patent law attorney who has been hired by Defendants to rebut Plaintiffs' patent expert, Mr. Glen Belvis. Plaintiffs move to exclude portions of Mr. Singer's opinions and testimony, arguing that it fails *Daubert's* relevancy requirement and *Federal Rule of Evidence 702*'s reliability requirement.

The majority of Mr. Singer's report is a review of Endo's current and pending patents at the time of the 2010 Settlement and License Agreement. (Singer Rep. ¶¶ 118-261, Resp., Ex. 1, Dkt. No. 601-2.) Plaintiffs ask the Court to exclude the concluding paragraph of Mr. Singer's report where Mr. Singer states that, for the technical reasons described above, "one cannot simply assume that Endo would have entered into an alternative settlement agreement that provided (1) an earlier entry date for Impax; and (2) broad freedom to operate, including a broad **[*58]** license to all future patents covering Opana ER." (Singer Rep. ¶ 262.) Plaintiffs argue that this statement goes beyond the scope of Mr. Singer's expertise. Mr. Singer is a patent law attorney, not an economist, and Mr. Singer opined on the settlement and license agreement terms based off knowledge only provided by counsel instead of experts.

The Court declines to strike this portion of the opinion. While Plaintiffs attempt to frame this as an economic opinion, the discussion is in the context of Endo's bargaining position for settlement and licensing of its patents, a subject well within Mr. Singer's expertise.

Plaintiffs also move to exclude an earlier portion of Mr. Singer's report, where Mr. Singer notes that the "average cost of bringing a new drug to market in the United States was $1.32 billion in 2010," and that "new drugs can take at least ten years to reach profitability, if at all." (*Id.* ¶¶ 53-54.) Plaintiffs argue that this statement is not relevant to the case at hand and in no way relates to the costs of developing Opana ER or Opana ER's profitability profile. The Court agrees. The average cost of drug development is not relevant here and, if provided, could create an anchoring **[*59]** bias as to the cost Endo had in developing Opana ER. The Court grants the motion to exclude this portion of the testimony.

For the reasons stated above, the Court grants in part and denies in part the motion to exclude portions of Dr. Singer's testimony. (Dkt. No. 520.)

3. Plaintiffs' motion to exclude the opinions of E. Anthony Figg (Dkt. No. 521)

E. Anthony Figg is an intellectual property attorney and co-founder of his present patent law firm who was hired by Impax to assess whether it was reasonable for Impax to settle with Endo. (Figg Rep. ¶¶ 1-3, Curley Aff., Ex. 17, Dkt. No. 534-17.) Plaintiffs move to exclude two of Mr. Figg's opinions regarding the 2010 Settlement and License Agreement. First, Plaintiffs object to Mr. Figg's opinion that it was "reasonable" or "prudent" for Impax to settle. Second, Plaintiffs move to exclude Mr. Figg's opinion that the agreement "likely provided Impax the earliest opportunity to sell generic Opana ER to the benefit of consumers." (*Id.* ¶ 3.)

Plaintiffs argue that they do not challenge Impax's right to settle, or even Impax's right to settle reasonably. Generally, private parties may contract with each other in any way not prohibited by law. Here, **[*60]** however, Plaintiffs challenge the reverse payments between Endo and Impax as proof of Endo and Impax's collusive behavior. According to Mr. Figg's deposition testimony, however, he did not consider the reverse payments when making his determination about reasonableness. Mr. Figg also took pains to state that he does not "intend[] to comment on the rule of reason analysis in the antitrust sense" but rather offers an opinion on the "reasonable outcome of the patent litigation." (Figg Dep. 196:8-11, Curley Aff., Ex. 18, Dkt. No. 534-18.) Because the reasonableness of the patent litigation is not in dispute, the Court agrees with Plaintiffs that Mr. Figg's testimony is not relevant and thus unhelpful to the jury. The Court grants Plaintiffs' motion to exclude this portion of Mr. Figg's testimony.

The Court finds Mr. Figg's second opinion to be equally problematic. Mr. Figg's expert report does not describe or implement any scientific method for reaching his conclusions regarding what the "likely" earliest opportunity Impax had to sell generic Opana ER. "An expert scientific opinion must be grounded in the 'methods and procedures of science,' and must consist of more than simply 'subjective **[*61]** belief or unsupported speculation.'" *Cummins v.*

Lyle Indus., 93 F.3d 362, 368 (7th Cir. 1996) (quoting *Deimer, 58 F.3d at 344*). As Mr. Figg fails to offer a method for reaching his conclusion, the Court grants the Plaintiffs' motion to exclude Mr. Figg's opinion in this matter. (Dkt. No. 521.)

4. Plaintiffs' motion to exclude opinions of Dr. Anthony Lowman (Dkt. No. 522)

Dr. Anthony Lowman is a Professor of Chemical Engineering at Drexel University. (Lowman Rep. ¶¶ 1-2, Resp., Ex. 1, Dkt. No. 595-2.) He was hired by Defendants to provide an expert opinion on the patent infringement claim in Impax's ANDA that gave rise to the lawsuit between Endo and Impax. (*See id.* ¶¶ 11-13.) Plaintiffs move to exclude Dr. Lowman's testimony because Dr. Lowman allegedly applies the wrong standard in the patent infringement claims. Specifically, Plaintiffs claim that Dr. Lowman impermissibly interchanges the material description from "that which is effective to slow the hydration of the gelling agent without disrupting the hydrophilic matrix" with the "hydration rates of the tablets" generally. (Mot. at 1-2, Dkt. No. 522.) Defendants disagree and argue that Dr. Lowman only used the term "tablets" as a shorthand for measuring the gelling agent.

Plaintiffs' objection to Dr. Lowman's **[*62]** testimony appears to this Court to be a distinction without a difference, as the hydration of the tablet will necessarily be a hydration of the gelling agent that resides within the tablet. To the extent that Plaintiffs disagree, however, it is with the "soundness of the factual underpinnings of the expert's analysis and the correctness of the expert's conclusions based on that analysis" and not with Dr. Lowman's credentials, methods, or relevance to this case. *Smith v. Ford Motor Co., 215 F.3d 713, 718 (7th Cir. 2000)*. As such, the disagreement must be left to the trier of fact. The Court denies Plaintiffs' motion to exclude Dr. Lowman's testimony. (Dkt. No. 522.)

5. Plaintiffs' motion to exclude the opinions of Dr. Reza Fassihi (Dkt. No. 524)

Dr. Reza Fassihi is a Professor in Biopharmaceutics and Industrial Pharmacy at Temple University. (Fassihi Rep. ¶ 2, Resp., Ex. 1, Dkt. No. 596-2.) Dr. Fassihi was initially hired by Endo in the underlying 2010 litigation and was rehired in the current litigation to provide similar testimony on the disputed patents. Plaintiffs move to exclude Dr. Fassihi's opinions, arguing she used the incorrect standard of law when determining whether the underlying patents were valid.

Dr. Fassihi's testimony centers **[*63]** around the "anticipation reference" defense to a patent infringement suit. A patent cannot be granted if the invention was "described in a printed publication in this or a foreign country . . . more than one year prior to the date of the application for patent in the United States." *35 U.S.C. § 102(b)(2002)*(amended 2011). An anticipatory reference discloses "each and every element of the claimed invention, whether it does so explicitly or inherently." *In re Gleave, 560 F.3d 1331, 1334 (Fed. Cir. 2009)* (citing *Eli Lilly & Co. v. Zenith Goldline Pharms., Inc., 471 F.3d 1369, 1375 (Fed. Cir. 2006)*). "Anticipation does not require the actual creation or reduction to practice of the prior art subject matter; anticipation requires only an enabling disclosure." *Schering Corp. v. Geneva Pharms., 339 F.3d 1373, 1380 (Fed. Cir. 2003)*.

According to Plaintiffs, Dr. Fassihi incorrectly discounts several disclosures that potentially qualify as "anticipatory disclosures" of the sustained release component of the underlying litigation patents. Dr. Fassihi's testimony states that there isn't enough data attached to these disclosures to prove the idea works correctly, and thus the disclosures fail to meet the standard for anticipatory disclosures under federal law. Plaintiffs argue that proof is not legally necessary, and Dr. Fassihi's incorrect espousal of law would mislead jurors if presented at trial.

In response, **[*64]** Defendants first argue that it would be unfair to limit Dr. Fassihi's testimony in any manner because Impax did not move to limit Dr. Fassihi's testimony prior to the 2010 Settlement and License Agreement. As pointed out by Plaintiffs, however, the 2010 trial was intended before a judge, as opposed to a jury, which necessarily changes Plaintiffs' trial strategy. Further, as previously stated, the Court is unconvinced by Defendants arguments that an exact replica of 2010 is required to meet Defendants' exacting sense of fairness. The Court's hands are not so tied such that it cannot correct mistakes of law that might have occurred had the original trial happened as scheduled; to preserve potentially incorrect proceedings in the name of "fairness" would compound only the original mistake instead of fixing it. The Court freely considers whether Dr. Fassihi's opinion incorrectly states the legal requirements for anticipatory disclosure.

Defendants' second argument is that Plaintiffs have presented only inherent anticipatory disclosures, as opposed to explicit ones. Defendants argue that, because there are only inherent disclosures, Plaintiffs have a somewhat higher standard, as articulated **[*65]** in *Continental Can Co. USA, Inc. v. Monsanto Co.*:

> Inherency, however, may not be established by probabilities or possibilities. The mere fact that a certain thing *may* result from a given set of circumstances is not sufficient. If, however, the disclosure is sufficient to show that the natural result flowing from the operation as taught would result in the performance of the questioned function, it seems to be well settled that the disclosure should be regarded as sufficient.

948 F.2d 1264, 1269 (Fed. Cir. 1991) (quoting *In re Oelrich, 666 F.2d 578, 581 (C.C.P.A. 1981)*). According to Defendants, the fact that the prior disclosures stated "sustained-release over any desired period and, in particular, over a twelve-hour period" (Mot. at 7, Dkt. No. 524.) does not show that "the disclosure of the required 'sustained release' as construed by the court (release out of a tablet over 12 hours does not equate to maintaining therapeutically beneficial levels of the active in a patient's bloodstream for 12 hours)." (Resp. at 16., Dkt. No. 596).

Even using Defendants' inherency standard, the natural and expected result of having a sustained-release drug over a twelve-hour period would be to have the drug be present in the patient's bloodstream over that same period. Defendants may **[*66]** argue on the factual record that the prior anticipatory patents did not, for some reason not mentioned in the briefing, intend for the drug to enter the bloodstream. The Court was not provided with any evidence to suggest that this patent intended something other than the natural result of a sustained drug release. For this reason, the Court holds that Defendants cannot use an expert testimony to require more than the "inherency" standard required by law. The Court grants Plaintiffs' request that Dr. Fassihi's testimony be excluded to the extent that it suggests additional proof as required by law. (Dkt. No. 524.)

6. Plaintiffs' motion to exclude the opinions of Dr. Christopher J. Gilligan (Dkt. No. 525)

Dr. Christopher J. Gilligan is Chief Physician at Brigham and Women's Hospital and Assistant Professor at Harvard Medical School. (Gilligan Rep. ¶ 2, Resp., Ex. 1, Dkt. No. 599-2.) Dr. Gilligan has been asked to offer his opinions on the interchangeability of long-lasting opioids and the benefits of the tamper resistant reformulated Opana ER. (*Id.* ¶ 1.) Plaintiffs object to Dr. Gilligan's characterizations about what clinicians generally believed, beyond his own experience, claiming **[*67]** it lacks reliable methodology or evidence. Plaintiffs also move to exclude opinions espoused by Dr. Gilligan that suggest that the reformulated Opana ER deterred abuse or was safer than original Opana ER in any capacity. Plaintiffs argue such an opinion is contrary to the facts in the case, as reformulated Opana ER was, in fact, more dangerous as determined by the FDA.

In response, Defendants argue that doctors are permitted to testify about uses beyond the recommendations of the FDA. Defendants also argue that Dr. Gilligan is a leader in his field, and thus qualified to testify generally about what physicians do or don't do, without an explicit methodology or scientifically measured component. The Court agrees. Plaintiffs objections go to the weight of the testimony and may be brought up at cross-examination. The motion is denied. (Dkt. No. 525.)

7. Plaintiffs' motion to exclude the opinions of Dr. Sumanth Addanki (Dkt. No. 526)

Dr. Sumanth Addanki is an economist and managing director of an economist research company. (Addanki Rep. ¶ 1, Attachment, Ex. 3, Dkt. No. 531-4.) Dr. Addanki primarily testifies regarding Endo's lack of market power, which Plaintiffs do not challenge on this **[*68]** motion. Plaintiffs do, however, move to exclude some of Dr. Addanki's ancillary opinions.

First, Plaintiffs argue to exclude Dr. Addanki's opinion that "economics provides no standard to evaluate the size of the reverse payments." (Mot. at 4, Dkt. No. 526.) The Court was unable to find where in Dr. Addanki's expert report he purported to make such a statement, and Plaintiffs unhelpfully did not cite to the record in their briefing. Defendants, perhaps similarly confused, do not address the point directly in their response. Since it is unclear to the Court whether Dr. Addanki holds this position in dispute, and, if so, the exact context for the statement, the Court denies the motion.

Plaintiffs' second contention also relates to another of Dr. Addanki's opinions on reverse payments. Under *F.T.C v. Actavis*, reverse payment settlements (i.e., payments from patent holder plaintiff to patent infringer defendant) are subject to the rule of reason test because the reverse payment could either be an innocuous "rough approximation of the litigation expenses saved through the settlement" or a problematic transfer of "'large sums' to induce 'others to stay out of its market.'" *570 U.S. at 156* (citing P. Areeda **[*69]** & H. Hovenkamp, ***Antitrust Law*** ¶ 2046, p. 351 (3d ed. 2012)). According to Dr. Addanki, it is impossible for Plaintiffs in this case to establish the size of the reverse payment associated with the 2010 Settlement and License Agreement. The terms of the 2010 SLA were conditioned on real-world events — specifically, the sale numbers of branded Opana ER prior to the launch date — so there was no exact payment calculated at the time of the agreement. (Addanki Rep. ¶¶ 112-127.) Without a specific number in the agreement, Dr. Addanki opines that the settlement agreement could not have contained a problematic reverse payment. Plaintiffs argue this standard is incorrect as a matter of law and ask the Court to find that the standard for a reverse transfer is met if the parties could estimate the worth of the contract at the time of the agreement, and that estimation was greater than the estimated attorneys' fees.

In support, Plaintiffs cite to language in *Actavis* and *Brown Shoe Co. v. United States. Actavis, 570 U.S. at 158* ("[A] court, by examining the size of the payment, may well be able to assess its likely anticompetitive effects along with its potential justifications without litigating the validity of the patent."); *Brown Shoe Co. v. United States, 370 U.S. 294, 323, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* ("Congress used the words 'may be substantially **[*70]** to lessen competition,' to indicate that its concern was with probabilities, not certainties. Statutes existed for dealing with clear-cut menaces to competition; no statute was sought for dealing with ephemeral possibilities.")

Defendants object, claiming that "[i]t is necessary . . . to show" that an agreement produces "actual harm to competition," citing *Bunker Ramo Corp. v. United Bus. Forms, Inc., 713 F.2d 1272, 1283 (7th Cir. 1983)*. According to Defendants, Plaintiffs must prove actual harm as reviewed at the time the agreement. Because the payment amount was not known at the time of the agreement, and the estimated payment not "actual harm," Defendants are in effect arguing that any contract containing a contingency would escape review under the Sherman Act and other antitrust laws. Defendants go on to argue that it is only after Plaintiffs have shown actual harm that Defendants need to show a procompetitive reason for the agreement's terms.

The logic of this argument is flawed. Plaintiffs must prove both an actual antitrust injury and an unreasonable restraint on trade to succeed on an antitrust claim. *In re Humira (Adalimumab) Antitrust Litig., 465 F.Supp. 3d 811, 835 (N.D. Ill. 2020)*. To prove the injury, Plaintiffs may rely on the actual amount paid from Endo to Impax. To show the parties engaged in an unreasonable restraint on trade, **[*71]** Plaintiffs may present the parties' expected outcome at the time the contract was signed. Unexpected market forces are a part of all negotiations, and that alone cannot prohibit a contract from being in violation of antitrust laws. By separately requiring both components, an attempted unreasonable restraint of trade that did not result in an actual injury would properly fail to state a claim.

Importantly, the provision at issue here gave Endo full control over whether to continue to sell branded Opana ER or whether to take it off the market, which in turn controlled how much money would be provided to Impax under the contingent provisions. This control aligns with the traditional concerns of reverse payments. *See Actavis, 570 U.S. at 157* ([W]here a reverse payment threatens to work unjustified anticompetitive harm, the patentee likely possesses the power to bring that harm about in practice."). To the extent that Dr. Addanki's opinion relies on Defendants unsound articulation of law, the Court grants Plaintiffs' motion to exclude Dr. Addanki's opinion regarding the contract's uncertainty.

Plaintiffs next object to Dr. Addanki's opinions regarding the alternative settlements presented by Plaintiffs. According **[*72]** to Dr. Addanki, unless Plaintiffs show "the parties would have agreed on an alternative settlement [without a reverse payment,] the provisions giving rise to the payment cannot be deemed 'unjustified' as a matter of economics." (Addanki Rep. ¶ 129.) Similar to Dr. Figg, Section III.B.3 *supra*, Dr. Addanki proposes to testify as to whether it is economically reasonable to enter into this contract between two private actors. The Court notes that many contracts that are prohibited by ***antitrust law*** would be 'economically reasonable' to enter, e.g., a cartel agreement is usually wildly profitable, and it would be economically rational to enter such agreement. However, the question that will be before the jury in this matter is not whether the contract was economically reasonable or even advantageous for both parties. Instead, the jury will determine whether the 2010 SLA was an unreasonable restraint on trade. Presenting the jury with an unrelated reasonability standard is unhelpful and potentially misleading. For this reason, the Court grants the motion to exclude this section of Dr. Addanki's testimony.

In addition to the above concerns, Plaintiffs object to Dr. Addanki's opinions regarding **[*73]** the economic feasibility of an alternative settlement absent the FDA's approval of reformulated Opana ER and Dr. Addanki's characterization of the 2010 Settlement and License Agreement as procompetitive. In these cases, Plaintiffs' objections are disputes with factual evidence and conclusions based on those facts, and thus should be presented to the jury. The Court denies the motion to exclude these opinions. (Dkt. No. 526.)

8. Plaintiffs' motion to exclude the opinions of Dr. Jody L. Green (Dkt. No. 527)

Dr. Jody L. Green is currently the Chief Scientific Officer at Inflexxion, a health analytics company. (Green Rep. ¶ 9, Resp., Ex. 1, Dkt. 597-2.) Dr. Green testifies that the new reformulated Opana ER "was associated with a reduction in the overall rate of abuse for Opana ER." (*Id.* ¶ 14.) Plaintiff seeks to exclude Dr. Green's testimony in its entirety as it is (1) irrelevant, (2) rejected by the FDA, and (3) based on unreliable data.

Defendants object, claiming that it would be prejudicial to Endo if Plaintiffs could characterize the FDA's actions without an opportunity for Endo to rebut Plaintiffs' interpretations. The Court disagrees. The reformulation of Opana ER is only marginally **[*74]** relevant to the underlying patent litigation at the heart of this case. Whether or not the reformulation was successful is arguably even less relevant. Moreover, the facts surrounding the FDA's 2013 and 2017 decisions regarding the reformulated Opana ER are public and straightforward. *See Oxymorphone (marketed as Opana ER) Information*, U.S. Food & Drug Admin., (Feb. 6, 2018) *https://www.fda.gov/drugs/postmarket-drug-safety-information-patients-and-providers/oxymorphone-marketed-opana-er information*. Both parties may characterize the public statements through their attorneys at argument, but Defendants cannot produce an expert whose testimony directly contradicts the FDA and the facts of the case. The Court grants Plaintiffs' motion to exclude Dr. Green's testimony. (Dkt. No. 527.)

9. Plaintiffs' motion to exclude the opinions of Dr. Louis P. Berneman (Dkt. No. 528)

Dr. Louis P. Berneman holds a doctorate in Education and is currently managing director of a technology transfer consulting company. (Berneman Rep. ¶ 76, Curley Aff., Ex. 13, Dkt. No. 534-13.) Dr. Berneman assesses the commercial reasonableness of the Parkinson's Disease joint venture between Impax and Endo, entered into by **[*75]** the parties at the same time as the 2010 SLA. (*Id.* ¶ 11.) Plaintiffs challenge Dr. Berneman's 'fair value' analysis, arguing that Dr. Berneman does not employ any methodology when making this determination. Plaintiffs point to Dr. Berneman's testimony where he acknowledges that he did not use any of the industry standards, nor did he identify any comparable contracts, or do any "independent evaluation." (Berneman Dep. 173:11-12, Curley Decl., Ex. 16, Dkt. No. 534-16.) As a result, Plaintiffs move to exclude his testimony based on his lack of methodology.

Defendants object, stating that Dr. Berneman relies entirely on Endo's contemporaneous valuation for his opinion. Defendants further argue that it is necessary for Dr. Berneman to explain Endo's contemporaneous valuation despite those facts already being in the record for the jury to consider. The Court disagrees. Because Dr. Berneman does no valuation or other independent analysis, the Court grants Plaintiffs' motion to exclude Dr. Berneman's testimony. (Dkt. No. 528.)

10. Plaintiffs' motion to exclude experts that post-date the challenged reverse payment agreement. (Dkt. No. 523.)

Finally, Plaintiffs move to exclude certain portions **[*76]** of the opinions of Dr. Fassihi, Mr. Singer, Mr. Figg, and Dr. Addanki, each of whom has already been discussed in this opinion. All four experts opine in some way on the patents acquired by Endo after the 2010 Settlement License and Agreement. Plaintiffs argue that these patents are not relevant to any issue in the case, and thus these experts' opinions should be discarded. In support, Plaintiffs cite to *Valley Drug Co. v. Geneva Pharmacy, Inc., 344 F.3d 1294, 1306 (11th Cir.)*, *cert. denied 543 U.S. 939 (2004)* ("[T]he reasonableness of agreements under the antitrust laws are to be judged at the time the agreements are entered into.") Because these patents did not exist at the time of the agreement, Plaintiffs argue that any mention of them is inappropriate in the trial.

The Court denies the motion. (Dkt. No. 523.) When deciding as to whether there was an unreasonable restraint on trade, the jury takes into consideration "a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. As a result, the later acquired patents are relevant to the determination as to whether the overall effect of the agreement was an unreasonable restraint on trade and **[*77]** whether an actual antitrust injury resulted from the restraint on trade.

C. Motions for Summary Judgment

Having reviewed all *Daubert* motions, the Court turns to Defendants' two motions regarding summary judgment. The first motion contends that Plaintiffs have failed to show that the 2010 Settlement and License Agreement between Endo and Impax caused an injury, and that Plaintiffs cannot show damages from the 2010 SLA's restraint on trade because Plaintiffs would be financially worse off absent the agreement. The second motion argues that there should be summary judgment as to the underlying patent issues in this case. For the reasons below, the Court denies all parts except Defendants' motion on the state claims.

1. Motion for Summary Judgment on Causation and Damages

Section 1 of the Sherman Act declares illegal "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. To state a claim, Plaintiffs must plead "(1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in a relevant market; (3) and an accompanying injury." *In re Humira (Adalimumab) Antitrust Litig., 465 F.Supp. 3d at 835* (citation omitted). In this case, Plaintiffs, all of whom purchased Opana ER either wholesale or individually, **[*78]** argue that the 2010 Settlement and License Agreement between Endo Pharmaceuticals and Impax Laboratories, Inc. was an unreasonable restraint on trade in the extended release oxymorphone market which caused financial loss. Defendants argue that Plaintiffs have not proven an antitrust injury, however, the arguments employed by Defendants primarily hinge on whether the restraint is unreasonable. The Court reviews the best arguments presented by Defendants in both cases. Finally, the Court addresses Defendants argument that Plaintiffs have been unable to prove damages in this action.

a. Unreasonable Restraint on Trade

Under *Actavis*, courts reviewing reverse payment agreements apply the rule of reason test. *570 U.S. at 156*. The test directs courts to determine "whether under all the circumstances of the case the restrictive practice imposes an unreasonable restraint on competition." *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 343, 102 S. Ct. 2466,* 73 L. Ed. 2d 48 (1982). Judges consider the following factors: "(1) whether the alleged agreement involved the exercise of power in a relevant economic market, (2) whether this exercise had anti-competitive consequences, and (3) whether those detriments outweighed efficiencies or other economic benefits." *In re Nexium (Esomeprazole) Antitrust Litig., 968 F.Supp. 2d 367, 387 (D. Mass. 2013)* (citations omitted). The parties also engage **[*79]** in a "three-step, burden-shifting framework." *Ohio v. Am. Express Co., 138 S.Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)*. The plaintiff "has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market." *Id.* If successful, the defendant must show a procompetitive reason for the restraint. *Id.* If the defendant can make this showing, then the burden "shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means." *Id.*

First, a reasonable juror could conclude that Opana ER constituted its own market, and thus an agreement regarding Opana ER was an exercise of market power. Patent ownership of a good or manufacturing process is not dispositive of market power. *See* *Illinois Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 45, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)* ("Congress, the antitrust enforcement agencies, and most economists have all reached the conclusion that a patent does not necessarily confer market power upon the patentee.") In this case, however, it is undisputed that Endo was selling Opana ER at a large profit. Dr. Leffler and Dr. Leitzinger estimate between 60% to 93% profit beyond marginal cost. (*See* Leitzinger Rep. ¶ 53 ("Endo's reported contribution margins for 2011 and 2012 were **[*80]** 74.3 percent and 60.7 percent, respectively."); Leffler Rep. ¶ 48 ("The evidence in this case shows that Endo achieved Lerner Indices as high as .93 from 2008 through 2011.") In contrast, the DOJ scrutinizes mergers with a 5% increase in price over marginal cost. Horizontal Merger Guidelines §§ 4, 4.1.1, 4.2, 4.2.1.

Taken alone, of course, there are other explanations for the high profit margin, including the research and other fixed costs associated with drug development. Here, Impax has presented enough supporting evidence that a reasonable juror could find Endo's actions regarding Opana ER on the underlying litigation patents to be evidence of shoring up supracompetitive pricing practices. For example, Endo imitated lawsuits and then settled with ANDA filers Actavis and Impax, both of whom allegedly infringed on the underlying litigation patents. Part of the reason the Court is faced with the question of whether the underlying patents are valid in this litigation is because Endo did not allow the jury to make a determination about the underlying patent lawsuits, preferring instead to settle that first round of patent disputes. In contrast, once Endo had the later acquired patents, **[*81]** Endo relied on their protections to twice reach trial and win.

Further, as repeatedly emphasized by the Defendants, Endo negotiated a settlement agreement with Impax that potentially negated the need for a reverse payment based on Endo's future conduct. For example, if Endo had continued to sell Opana ER at a similar volume up until Impax's launch, a small or non-existent reverse payment might have been instituted. Endo instead chose to transition the market over to the more profitable reformulated Opana ER and pay Impax $102 million. A reasonable juror could find this behavior evidence of protecting monopoly profits to the detriment of the consumer. For this reason, there is sufficient evidence such that a juror could find there to be evidence of market power.

Plaintiffs have the initial burden of proof to show this exercise of market power had a detrimental effect on competition. Assuming the underlying litigation patents to be invalid, the primary harm to the consumer in a Hatch-Waxman Act related lawsuit is the late start date of the generic entrant, which increases the amount of time that customers pay artificially inflated prices. In the 2010 Settlement and License Agreement, there **[*82]** was also a No Authorized Generic clause, where Endo agreed to forbear selling generic oxymorphone ER while Impax was the exclusive generic market entrant, again allowing higher prices to the detriment of the consumer.

These anticompetitive practices, however, are only anticompetitive to the extent the underling litigation patents are invalid. *Actavis* instructs that "it is normally not necessary to litigate patent validity to answer the antitrust question." *570 U.S. at 157*. Instead, "[a]n unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival." *Id.* The combination of a delayed release and a large payment to the generic drug producer, such as in this case, "suggests that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market." *Id.*

Once Plaintiffs meet their initial burden, it is Defendants' burden to show the procompetitive benefits of the anticompetitive restraint. "An allegedly anticompetitive restraint survives a rule of reason analysis if it achieves legitimate, procompetitive justifications and is reasonably **[*83]** necessary to achieve those justifications." *In re Wellbutrin XL Antitrust Litig., 133 F.Supp. 3d 734, 760 (E.D. Pa. 2015)*, *aff'd sub nom.* *In re Wellbutrin XL Antitrust Litig. Indirect Purchaser Class, 868 F.3d 132 (3d Cir. 2017)*.

According to Defendants, "the undisputed evidence demonstrates that the 2010 SLA benefitted [Plaintiffs]." (Mem. at 20, Dkt. No. 558.) Because of the Broad License provision, Impax was licensed to sell generic Opana ER even if Endo acquired additional patents. Defendants argue this procompetitive license outweighs any anticompetitive effects from the other provisions in the contract. Without the Broad License, Defendants would be entitled to either reintroduce branded Opana ER, which would be more expensive, or take oxymorphone ER entirely off the market until the expiration of the last acquired patent. Defendants state that Plaintiffs cannot prove that Defendants would have agreed to Impax starting production any earlier than January 2013. As a result, Defendants argue that Plaintiffs are worse-off without the 2010 SLA.

A reverse payment settlement has three components. First, the plaintiff agrees to stop pursuing the patent infringement case. Second, and theoretically in return, the defendant stops the production and sale of the generic version of the drug until a later time. In theory, if the parties feel the patent is **[*84]** likely to be found valid by the Court, the start date for the generic entrant would be closer to the patent's expiration, and in a weak patent case, earlier and closer to the FDA's ANDA approval date. The problem identified in *Actavis*, however, is the third element: a payment from the plaintiff, the allegedly injured party in need of relief, to the defendant. Under the rule of reason test, *Actavis* contemplated that the payment could be explained quite unobjectionably as saved litigation costs or the "compensation for other services that the generic [defendant] has promised to perform—such as distributing the patented item or helping to develop a market for that item [for the plaintiff]." *570 U.S. at 156*. If it cannot be explained, however, there is a risk that "a patentee is using its monopoly profits to avoid the risk of patent invalidation or a finding of noninfringement." *Id.*

In addition to the three elements outlined above, Endo and Impax also agreed to the Broad License provision. Defendants would like to use the Broad License as a counterbalance to the reverse payment, but the Broad License is a concession in the same direction as the reverse payment—from Endo to Impax. As a result, while the **[*85]** Broad License has potentially beneficial effects to consumers, it does not counterbalance the $102 million reverse payment from Endo to Impax. Instead, the Broad License concession serves only to highlight how much Endo valued Impax's delayed start, suggesting monopolistic effects instead of procompetitive ones.

Defendants also argue that the reverse payment was an unfortunate $102-million accident, as mathematically Defendants could have engineered the sales to be between the Impax Royalty provision (paid from Impax to Endo if sales remained strong) and the Endo Credit (from Endo to Impax if sales faltered) such that no money would have exchanged hands. While this is one interpretation of the facts, the Court finds it equally compelling to interpret these facts mean that Endo was making so much money by delaying the production of the generic drug and switching patients from original Opana ER to reformulated Opana ER that the $102 million cost was worth the benefit of cannibalizing Opana ER sales. And even if the jury discounts the later payment due to market uncertainty, the jury could consider either the ten million dollar payment purportedly made in furtherance of the Parkinson's **[*86]** Disease joint venture or the Broad License itself as items of value not fully explained under *Actavis*' reverse payment rubric.

Assuming that there are sufficient procompetitive justifications for the restraint, Plaintiffs may also present evidence that the procompetitive reason for the anticompetitive restraints — in this case, the January 2013 start date provision and the No Authorized Generic provision in the 2010 SLA — are "not reasonably necessary to achieve the stated objective." *In re Wellbutrin XL Antitrust Litig., 133 F. Supp. 3d at 753* (citation omitted). Here, there is additional evidence in the record that the Broad License was not a reasonably necessary part of the 2010 Settlement and License Agreement.

After Endo successfully defended Opana ER on the basis of its later acquired patents, Endo also filed a lawsuit regarding the Broad License between itself and Impax. According to Endo's filings, inherent in the Broad License provision was the understanding that Endo would receive royalties from Impax's use of any future patents. The parties eventually settled the suit without a determination on the merits, and Impax currently pays half its profits to Endo, likely raising the current price of generic Opana ER on the market. This is **[*87]** significant because it is unclear how the other provisions of the agreement were a necessary or even related to the Broad License, as Endo both settled a multitude of other lawsuits without this provision and later negotiated 50% of all proceeds from Broad License from Impax to this day. It is at least equally plausible that procompetitive conduct was sufficiently unrelated to the anticompetitive conduct at issue and therefore not necessary to induce the procompetitive conduct.

Ultimately, while it is "true that granting an exclusive licensing agreement is procompetitive relative to not granting it," the question here is "whether a large and unjustifiable reverse payment was made in order to avoid the risk of patent invalidation." *In re Aggrenox Antitrust Litig., 94 F.Supp. 3d 224, 245 (D. Conn. 2015)*. "If a settlement that grants an exclusive license violates the rule of *Actavis*, it is not saved by . . . the licensing arrangement being more competitive than a settlement agreement that lacked one." *Id.*

Because a jury could find that the anticompetitive portions were not necessary to receive the procompetitive benefit of Impax's licensing agreement, the Court declines to enter summary judgment for Defendants on this basis.

b. Anti-Trust Injury

To succeed on **[*88]** an antitrust claim, "a plaintiff must prove the existence of "antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (citation omitted). This analysis is generally done in two parts: the type of injury and the but-for cause of the injury.

The alleged injury at issue here, "the improper use of a patent monopoly, is invalid under the antitrust laws." *Actavis, 570 U.S. at 148* (citation omitted). As a result, assuming the jury first finds the patent to be invalid, the reverse payment agreement constitutes an injury that the antitrust laws were meant to prevent.

Second, Plaintiffs must show that the injury is one "that flows from that which makes the defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Endo and Impax entered into an agreement that delayed production and sale of generic Opana ER. As a result, there is a direct causal line between the agreement and the injury.

Defendants argue the later acquired patents are an independent barrier which breaks the causal chain. In support, Defendants cite to *In re Wellbutrin XL Antitrust Litig. Indirect Purchaser Class, 868 F.3d at 152 (3d Cir. 2017)* (holding that it would be difficult to show an antitrust injury because "generic entry would have been blocked by the '708 patent owned **[*89]** by Andrx.") However, the Third Circuit's decision *In re Wellbutrin XL Antitrust Litigation* contemplates a patent present at the time of the alleged antitrust injury. Because Endo did not acquire its additional patents until years after the agreement was signed, the additional patents do not break the causal chain. The Court cannot grant summary judgment on this ground.

c. Damages

Defendants argue that, under either of Plaintiffs' theories, Plaintiffs have failed to prove that they are financially worse off from the 2010 Settlement and License Agreement. First, Defendants argue that Plaintiffs cannot prove that Endo would have signed an alternative agreement that still included the Broad License. As a result, in either the theories of alternative agreements or in Plaintiffs' theory of continued litigation, Plaintiffs would not have had access to generic Opana ER after 2016.

As discussed earlier in this opinion, the Court has permitted Plaintiffs' experts to pursue a theory of alternative settlement based on factual evidence in the record that Impax would not have agreed to a settlement without the

Broad License provision. Assuming the jury is convinced by this evidence, Plaintiffs theory **[*90]** of damages based on an "alternative settlement" survives summary judgment.

However, even under a continued litigation or alternative agreement without the Broad License provision, the Court finds that it is possible there would still be damages available to Plaintiffs. Because there is evidence in the record disputing that the procompetitive effect of the Broad License is reasonably necessary to the anticompetitive conduct, Defendants' theory of damages on summary judgment also fails. As previously discussed, both the reverse payment and the Broad License benefited Impax, making it unlikely that they were interdependent on each other.

Nevertheless, Defendants claim without evidence in the record that, absent the 2010 SLA, there would be no Opana ER on the market, generic or otherwise. While technically possible, the Court is skeptical that Defendants or any other rational economic actor would have sued eleven generic drug companies to cease and desist production of Opana ER and then forgo profits on seventeen years of patent-protected pain medication.

There are other reasons to think that, had the parties continued the underlying patent litigation, Defendants and Plaintiffs would have **[*91]** ended up in a similar financial situation. It is undisputed that Endo made a strategic decision to distance itself from the original Opana ER in order to promote the reformulated version, including a stop on its own production and petitions to the FDA to remove original Opana ER from the market prior to the entrance of Impax and other generic drug producers. Despite Endo's best efforts, generic Opana ER did enter the market for several years before Endo was able to secure the later acquired patents and enforce them against them against infringers. Unfortunately for Endo, the FDA also subsequently asked Endo to remove the reformulated Opana ER from the market, which meant that consumers had already purchased oxymorphone ER at generic prices and there was no oxymorphone ER alternative in the market sold by Endo.

Having, in effect, backed the wrong horse, Endo could have decided to stop selling any extended release oxymorphone pain medication as intimated by Defendants. Endo could have also attempted to reintroduce the branded Opana ER at its original price, although there could have been a risk of consumer pushback against that decision. A reasonable juror, however, could also find that **[*92]** Endo would have either produced an authorized generic version or entered a very similar license agreement with any number of generic drug companies after enforcing the later acquired patents, at which point the later acquired patents would have little to no effect on the damages claimed by Plaintiffs.

Because it is at least possible that Plaintiffs could prove damages under either theory, the Court denies summary judgment on this ground.

d. State Law Claims

Finally, Defendants move to narrow the scope of the unjust enrichment claims under Arizona, Massachusetts, and Mississippi law. According to Defendants, all three state laws contain a three-year statute of limitations for torts. The first End Payor Plaintiff complaint was filed on June 4, 2014. As a result, all recovery is limited to the three years prior to the filing date of the Complaint. Under one of End Payor Plaintiffs' theories, however, Impax would have launched its generic Opana ER as early as April 2011, which is approximately two months beyond the statute of limitations.

End Payor Plaintiffs concede that Mississippi law prevents relief beyond three years but argue that unjust enrichment claims in Massachusetts and Arizona **[*93]** are governed by alternative statutes which have longer statute of limitations. Antitrust claims have traditionally sounded in tort. *See, e.g., Supreme Auto Transp., LLC v. Arcelor Mittal USA, Inc., 902 F.3d 735, 743 (7th Cir. 2018)* (analyzing state unjust enrichment claims as a tort). A review of Arizona and Massachusetts tort law shows it is governed by the three-year statute of limitations. *See Costanzo v. Stewart, 9 Ariz. App. 430, 453 P.2d 526, 528 (Ariz. Ct. App. 1969)* (applying *Ariz. Rev. Stat. Ann. § 12-543(1)*); *Mass. Gen. Laws ch. 260, § 2A*. For this reason, the Court grants the motion to limit summary judgment to damages within three years of the first filed complaint as to the state law claims in Mississippi, Arizona, and Massachusetts.

2. Patent Issues

In the alternative to their first motion, Defendants have also filed a motion for partial summary judgment as to some of the patent issues within the litigation. First, Defendants note that Opana ER's later acquired patents have already been determined to be valid and upheld by the Federal Circuit. As a result, Defendants move to limit any recovery by Plaintiffs to the point of acquisition of the earliest valid patent, as opposed to point of injunction from the district court or the subsequent affirmation from the appellate court. Second, Defendants' motion to limit Plaintiffs from presenting any defense Impax had not prepared to provide at the beginning **[*94]** of the underlying patent litigation which ended shortly before trial with the 2010 Settlement and License Agreement.

a. Subsequently Acquired Patents

Endo received approval from the FDA on the '122 and '216 patents in late 2012 and prevailed in federal court against numerous generic drug manufacturers in defense of these patents. (PSOF-PI ¶¶ 35-36, 41-47.) As a result, Endo argues that the Court should grant summary judgment as to this material fact and prevent Plaintiffs from recouping potential damages after the issuance of these two patents.

Plaintiffs object on the theory that the later acquired patents are not a material fact. Because the patents did not exist at the time the 2010 Settlement and License Agreement was entered, Plaintiffs argue that it is irrelevant too for the Court to grant summary judgment as to this fact. Plaintiffs also note that they do not seek damages after November 2012, obliviating the need to consider the patents. A restraint on trade is "viewed at the time it was adopted." *Polk Bros. v. Forest City Enterprises, Inc., 776 F.2d 185, 189 (7th Cir. 1985)*. As a result, this fact is not material in determining whether was an antitrust injury. However, as discussed above, if successful, the fact is potentially salient to show the extent of Plaintiffs' **[*95]** damages. Defendants may argue that the Broad License's benefit to consumers over 2012 to present outweighs the prior injury, and Plaintiffs must convince the jury that the benefit of the Broad License either do not outweigh was sufficiently unrelated to the harm as to merit damages. As such, the Court denies the motion for summary judgment as to this marginal fact.

b. Underlying Patent Litigation Defenses

Defendants also argue that Plaintiffs are limited in their patent defenses to those that Impax would have prepared at trial and asks the Court to grant Endo summary judgment with respect to two of Endo's infringement claims. According to Defendants, this will "streamline any trial" and "pare away any patent defenses asserted by Plaintiffs that the trial court in the underlying litigation would have found deficient as a matter of law." (Mem. on Patent Issues at 10-11, Dkt. No 535.)

Both parties vigorously dispute the specifics as to what Impax would or would not have done in the original underlying litigation, however, the Court does not find this to be an appropriate matter to resolve on summary judgment. It is not usually necessary to litigate patent's validity to determine whether **[*96]** or not antitrust laws were violated. *Actavis, 570 U.S. at 157*. Defendants' focus on forcing summary judgment on patent issues is not helpful for the trier of fact. If Endo believed that the patent was strong at the time the contract was signed, Defendants can show that by providing a justification for the reverse payment. Otherwise, "the size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself." *Id. at 158*.

Further, the jury must evaluate the contested restraint on the market, here the 2010 Settlement and License Agreement, at the time the restraint was adopted. The Court notes there was no summary judgment motion pending when the agreement was reached five days after the start of trial, and to resolve patent issues now would confuse rather than aid the jury.

While discussion of the underlying patent at issue is inevitable, the Court will not prematurely foreclose the jury's determination in this matter through summary judgment on the hypothetical patent defenses that might have been made at trial. As stated throughout this opinion, the purpose of this litigation is not to recreate **[*97]** the decision the 2010 jury would have made a determination about the validity of the patent, but rather whether Endo had, or likely had, a valid patent at the time of the 2010 Settlement and License Agreement. For these reasons, the Court denies the motion.

III. <u>CONCLUSION</u>

For the reasons stated herein, the Court rules as follows:

1. Defendants' *Daubert* motions to exclude Ms. DeLeon (Dkt. No. 513), Mr. Molina (Dkt. No. 516), and Dr. Rosenthal (Dkt. No. 545) are granted.

2. Defendants' *Daubert* motions to exclude Dr. Leitzinger (Dkt. No. 529) and Dr. Leffler (Dkt. No. 552) are granted in part and denied in part.

3. All of Defendants' other *Daubert* motions (Dkt. No. 510, Dkt. No. 537, Dkt. No. 541, Dkt. No. 546, Dkt. No. 550, Dkt. No. 556) are denied.

4. Plaintiffs' motions to exclude Dr. Patel (Dkt. No. 519), Mr. Figg (Dkt. No. 521), Dr. Fassihi (Dkt. No. 524), Dr. Green (Dkt. No. 527), and Dr. Berneman (Dkt. No. 528) are granted.

5. Defendants' *Daubert* motions to exclude Dr. Addanki (Dkt. No. 526) and Mr. Singer (Dkt. No. 520) are granted in part and denied in part.

6. All of Plaintiffs' other *Daubert* motions (Dkt. No. 522, Dkt. No. 525, Dkt. No. 523) are denied.

7. Defendants' motion for summary **[*98]** judgment as to the state claims is granted but denied as to all other claims in Defendants' summary judgment motions. (Dkt. No. 532, Dkt. No. 539).

IT IS SO ORDERED.

Opinion

[*796] ORDER ON DEFENDANT'S MOTION TO DISMISS PLAINTIFF'S FIRST AMENDED COMPLAINT PURSUANT TO *RULE 12(b)(6) OF THE FEDERAL RULES OF CIVIL PROCEDURE* [ECF No. 27]

Before the Court is the motion[1] of Defendant Brio Water Technology, Inc. to dismiss the Amended Complaint[2] filed by Plaintiff BHRS Group, LLC, pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. After considering the papers filed in support and in opposition,[3] and the **[*797]** arguments of counsel at the hearing on February 19, 2021, the Court **GRANTS** the Motion, **without leave to amend**.

---

[1] Def. Brio Water Technology, Inc.'s Mot. to Dismiss Pl.'s Amend. Compl. pursuant to *Fed. R. Civ. P. 12(b)(6)* (the "Motion") [ECF No. 27].

[2] First Amend. Compl. (the "Amended Complaint") [ECF No. 26].

[3] The Court considered the following papers: (1) the Amended Complaint; (2) the Motion (including its attachments); (3) Pl.'s Opp'n to the Motion (the "Opposition") [ECF No. 28]; and (4) Def.'s Reply in Supp. of the Motion (the "Reply") [ECF No. 29].

I. BACKGROUND

A. Procedural Background

BHRS filed its original complaint in this action on August 21, 2020. On September 23, 2020, Brio moved to dismiss the original complaint pursuant to *Rule 12(b)(6)*, which BHRS opposed. The Court granted Brio's motion to dismiss, with leave to amend, with respect to each of the four claims for relief asserted by BHRS.[4]

BHRS filed its Amended Complaint on January 8, 2021.[5] In that pleading, BHRS asserts the following three claims for relief against Brio: (1) Violation of the Lanham Act, 28 U.S.C. § 1125; (2) Violation of California Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200, et seq.*; and (3) Breach of Contract—Third Party Beneficiary. Brio filed the instant Motion on January 22, 2021. The Motion is fully briefed.

B. The Amended Complaint

The Amended Complaint is premised upon the same theory and foundational factual allegations as the original complaint, which the Court examined in detail in its First Order.[6] To summarize, BHRS and Brio are competitors in the "water cooler and related hydration products marketplace" on Amazon.com.[7] This case concerns the "star rating" that is associated with a product on Amazon.com, which reflects the average consumer rating of a particular product based upon product reviews posted by other Amazon.com consumers. BHRS alleges—based in large part upon a report by a third-party investigator[8] — that Brio engaged in a fraudulent scheme to manipulate Amazon review ratings by enlisting individuals associated with Brio's management "to purchase products for the purpose of leaving a series of negative reviews **[**3]** of BHRS's products and post positive reviews of Brio's own brands of water cooler products on Amazon."[9] With that general background, the Court will focus on the additional allegations in the Amended Complaint.

The focus of the Amended Complaint, according to BHRS, is the alleged practice by Brio of enlisting reviewers in an effort to manipulate the Amazon star rating, "not the content of the statements of the reviews themselves."[10] The Amended Complaint includes additional allegations that:[11] (1) Amazon reviews that appear to be submitted by "verified" purchasers can sometimes be fabricated;[12] (2) consumers rely on the average star rating when making **[*798]** purchases;[13] and (3) Brio fabricated Amazon Vine reviews[14] which it then used on its website and the

website of Walmart without disclosing (in addition to the fabrication) that the reviewers received free products in exchange for their reviews.[15]

II. LEGAL STANDARD

A. Motion to Dismiss

A motion to dismiss under *Rule 12(b)(6) of the Federal Rules of Civil Procedure* tests the legal sufficiency of the claims asserted in a complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. In ruling on a *Rule 12(b)(6)* motion, "[a]ll allegations of material fact are taken as true and construed in the light most **[**4]** favorable to the nonmoving party." *Am. Family Ass'n v. City & County of San Francisco, 277 F.3d 1114, 1120 (9th Cir. 2002)*. Although a complaint attacked by a *Rule 12(b)(6)* motion "does not need detailed factual allegations," a plaintiff must provide "more than labels and conclusions." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

To state a plausible claim for relief, the complaint "must contain sufficient allegations of underlying facts" to support its legal conclusions. *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*. "Factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all the allegations in the complaint are true (even if doubtful in fact) . . . ." *Twombly, 550 U.S. at 555* (citations and footnote omitted). Accordingly, to survive a motion to dismiss, a complaint "must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face," which means that a plaintiff must plead sufficient factual content to "allow[] the Court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotation marks omitted). A complaint must contain "well-pleaded facts" from which the Court can "infer more than the mere possibility of misconduct." *Id. at 679*.

The Federal Rules of Civil Procedure require a party alleging fraud to "state with particularity the circumstances constituting **[**5]** fraud." *Fed. R. Civ. P. 9(b)*. To plead fraud with particularity, the pleader must state the time, place, and specific content of the false representations. *See* *Odom v. Microsoft Corp., 486 F.3d 541, 553 (9th Cir. 2007)*. The allegations "must set forth more than neutral facts necessary to identify the transaction. The plaintiff must set forth what is false or misleading about the statement, and why it is false." *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)* (internal quotation marks omitted). The heightened pleading standard under *Rule 9(b)* applies to claims that are "grounded in fraud" or that "sound in fraud." *Kearns v. Ford Motor Co., 567 F.3d 1120, 1122 (9th Cir. 2009)* (quoting *Vess, 317 F.3d at 1102*).

B. Leave to Amend

Pursuant to *Rule 15(a)*, a district court "should freely give leave when justice so requires." The purpose underlying **[*799]** the amendment policy is to "facilitate decision on the merits, rather than on the pleadings or technicalities." *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)*. Leave to amend should be granted unless the Court determines "that the pleading could not possibly be cured by the allegation of other facts." *Id.* (quoting *Doe v. United States, 8 F.3d 494, 497 (9th Cir. 1995)*).

III. DISCUSSION

---

[14] According to BHRS, "[i]n order to facilitate reviews for products, Amazon provides sellers the opportunity to participate in its 'Vine' program. In exchange for a fee to Amazon, sellers can provide products to Amazon, who in turn, gives those products for free to customer reviewers to post reviews on Amazon." *Id.* at ¶ 54.

[15] *See id.* at ¶¶ 54-61.

Brio moves to dismiss each of BHRS's claims for relief pursuant to *Rule 12(b)(6)*. The Court, therefore, addresses the sufficiency of Brio's allegations with respect to each of BHRS's claims.

A. False Advertising in Violation of the Lanham Act

In its first claim for relief, BHRS avers that Brio engaged in **[**6]** false advertising in violation of § 43(a) of the *Lanham Act*, *15 U.S.C. § 1125(a)*.[16] Section 43(a) of the *Lanham Act* "authorizes suit against persons who make false and deceptive statements in a commercial advertisement about their own or the plaintiff's product." *Jarrow Formulas, Inc. v. Nutrition Now, Inc., 304 F.3d 829, 835 (9th Cir. 2002)*. A claim for false advertising under § 43(a) has five elements:

> (1) a false statement of fact by the defendant in a commercial advertisement about its own or another's product; (2) the statement actually deceived or has the tendency to deceive a substantial segment of its audience; (3) the deception is material, in that it is likely to influence the purchasing decision; (4) the defendant caused the false statement to enter interstate commerce; and (5) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to defendant or by a lessening of the goodwill associated with its products.

Skydive Arizona, Inc. v. Quattrocchi, 673 F.3d 1105, 1110 (9th Cir. 2012) (citing *15 U.S.C. § 1125(a)(1)(B)*).

Because BHRS alleges that Brio placed "false," "fraudulent," and "misleading"[17] customer reviews on Amazon.com as part of the alleged "false advertising scheme,"[18] BHRS's false advertising claim sounds in fraud, and, therefore, is subject to the heightened pleading requirements of *Rule 9(b)*. *See* *Kearns, 567 F.3d at 1122*. Accordingly, BHRS must allege the "who, **[**7]** what, when, where, and how" of the alleged fraud. *Vess, 317 F.3d at 1106*.

In its First Order, the Court explained that BHRS failed to plead sufficient facts to establish the first element of its claim under § 43(a) of the *Lanham Act*—"a false statement of fact ***by the defendant*** in a ***commercial advertisement*** about its own or another's product," *Skydive Arizona, 673 F.3d at 1110* (emphasis added)—because BHRS did not allege that Brio itself made the statements at issue and because BHRS did not plead enough facts plausibly to connect the non-party reviewers to Brio, such as would support an inference that the third parties were acting on behalf of Brio.[19]

With those deficiencies in mind, in its Amended Complaint, BHRS attempts to shift the focus to the alleged broader scheme by Brio to manipulate the average star rating for the products. BHRS alleges that Brio's use of purportedly fake reviews results in a false and misleading star rating. **[*800]** BHRS's contention in this regard seems to be that the star rating is itself a "commercial advertisement" for the purpose of the *Lanham Act*.[20] However, these allegations still are not enough to state a plausible claim for false advertising under the *Lanham Act*, for the same reasons detailed in the Court's First Order.

BHRS's theory that **[**8]** the star rating itself constitutes a commercial advertisement ***by Brio*** is not persuasive. To constitute commercial advertising or promotion, a statement of fact must be:

> (1) commercial speech; (2) ***by the defendant*** who is in commercial competition with the plaintiff; (3) for the purpose of influencing consumers to buy defendant's goods or services. While the representations need not be

---

[16] *See* Amended Complaint ¶¶ 74-83.

[17] *See id.* at ¶¶ 75 & 76.

[18] *Id.* at ¶ 81.

[19] *See* First Order 9:20-11:7.

[20] *See* Amended Complaint ¶ 76; Opposition 7:21-9:8.

> made in a "classic advertising campaign," but may consist instead of more informal types of "promotion," the representations (4) must be disseminated sufficiently to the relevant purchasing public to constitute "advertising" or "promotion" within that industry.

Coastal Abstract Service, Inc. v. First American Title Insurance Co., 173 F.3d 725, 735 (9th Cir. 1999) (quotations omitted; emphasis added). In support of its theory that manipulated star ratings are actionable commercial advertising under the *Lanham Act*, BHRS cites *Grasshopper House, LLC v. Clean and Sober Media, LLC, 2018 U.S. Dist. LEXIS 228190, 2018 WL 6118440 (C.D. Cal. July 18, 2018)*, and *Interlink Prods. Int'l, Inc. v. F & W Trading LLC, 2016 U.S. Dist. LEXIS 44256, 2016 WL 1260713 (D.N.J. Mar. 31, 2016)*. Putting aside that this Court is not bound by the decisions of other district courts, *Grasshopper* and *Interlink* are each distinguishable from this case, particularly with respect to the first element of a claim under § 43(a) of the *Lanham Act*.

In each of those case cases, the plaintiff alleged that the ***defendant itself, or through its paid agents***, made false statements in commercial advertisements. *See* *Grasshopper, 2018 U.S. Dist. LEXIS 228190, 2018 WL 6118440, at *1-*2 & *5-*7* (allegations that defendants **[**9]** falsely attributed one-star rating of the plaintiff's facility to the plaintiff's own clients, without disclosing that the review publication was owned by one of the defendants, were sufficient to state a claim under the *Lanham Act*); *Interlink, 2016 U.S. Dist. LEXIS 44256, 2016 WL 1260713, at *2 & *9* (allegations that defendants engaged in "massive" and "continuous ratings manipulation" by sending "excessive quantities of free samples to professional reviewers" resulting in numerous fake or biased reviews were sufficient). In contrast, here, BHRS does not allege any facts plausibly to show that Brio ***itself*** posted or is responsible for the content of the allegedly misleading reviews. Nor does BHRS allege a "massive" scheme of ratings manipulation involving an "excessive" number of paid reviews. *Cf.* *Interlink, 2016 U.S. Dist. LEXIS 44256, 2016 WL 1260713, at *2 & *9*; *see also* *AlphaCard Sys. LLC v. Fery LLC, 2020 U.S. Dist. LEXIS 147059, 2020 WL 4736072, at *1 & *3 (D.N.J. Aug. 14, 2020)* (denying motion to dismiss false advertising claim where the plaintiff alleged that the defendant "placed hundreds of phony customer reviews on its products, which purport to state customers' honest opinions even though reviewers did not purchase or honestly evaluate the product"). As explained in the Court's First Order, BHRS does not allege facts plausibly to show that any of the individual reviewers were controlled or paid by Brio, or otherwise acting **[**10]** on behalf of Brio.[21] And BHRS has not alleged additional facts to support any inference in that regard. In **[*801]** the absence of such allegations, BHRS fails to state a claim for false advertising under § 43(a) of the *Lanham Act*.

To the extent that BHRS's false advertising claim is based upon the content of the allegedly misleading reviews cited in the Amended Complaint, the Court finds that the reviewers' statements are classic statements of opinion, and, therefore, the reviews are not actionable.[22] *Cf., e.g., Newcal Industries*, 513 F.3d at 1052-53 (affirming district court's finding that the defendant's statement that it would "deliver 'flexibility' in [its] 'cost-per-copy' contracts" was puffery); *JIVE Commerce, LLC v. Wine Racks Am., Inc., 2018 U.S. Dist. LEXIS 138967, 2018 WL 3873675, at *2-*3 (D. Utah Aug. 15, 2018)* (evaluating similar complaint allegations and finding that "the Court has no information that would suggest the reviews are actionable under the *Lanham Act*"). Like the original Complaint, each of the customer reviews cited in the Amended Complaint contains vague, generalized statements of opinion about the quality of, and the respective reviewers' experience with, the BHRS product—not statements of fact about the product.[23]

---

[21] *See* First Order 10:13-11:7.

[22] Although BHRS attempts to shift the focus away from the content of the reviews at issue, *see* Opposition 7:21-25, the Amended Complaint includes screenshots of three negative reviews of BHRS's products, which reviews BHRS alleges were connected to Brio, *see* Amended Complaint ¶¶ 49-51. Notably, though, BHRS does not allege that these reviews are fake. To the contrary, BHRS explicitly acknowledges that these reviewers purchased products from BHRS. *Id.* at ¶ 50; *cf. id.* at ¶¶ 36-39. And, as explained above, BHRS does not allege sufficient facts to support a plausible inference that these reviewers are part of Brio's alleged false advertising scheme.

[23] *See* First Order 11:8-12:15.

Accordingly, the Court **GRANTS** Brio's Motion with respect to BHRS's first claim for relief. Furthermore, in view of the **[**11]** fact that BHRS was already granted leave to amend, and because the Court finds that the Amended Complaint does not cure the pleading deficiencies identified in the Court's First Order, granting leave to amend again would be futile. *See* *Lopez, 203 F.3d at 1127*.

B. Violation of California's Unfair Competition Law

The second claim for relief in the Amended Complaint is for unfair competition in violation of California's Unfair Competition Law ("UCL").[24] California's UCL prohibits "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. BHRS alleges that Brio engaged in unfair competition by, "*inter alia*, making representations and omissions of material facts in causing and orchestrating fraudulent Amazon.com star ratings . . . ."[25]

Because BHRS alleges a "unified course of fraudulent conduct," BHRS is required to plead its claims under the unlawful and unfair prongs of the UCL[26] with particularity. *See* *Fed. R. Civ. P. 9(b)*; *Kearns, 567 F.3d at 1122, 1126-27* (if "the claim is said to be 'grounded in fraud' . . . the pleading of that claim as a whole must satisfy the particularity requirement of *Rule 9(b)*").

The Court addresses the sufficiency of BHRS's allegations under each of these prongs in turn.

[*802] 1. "Unfair" [12] Prong**

The "unfair" prong of the UCL prohibits a business practice that "violates established public policy or . . . is immoral, unethical, oppressive or unscrupulous and causes injury to consumers which outweighs its benefits." *McKell v. Wash. Mut., Inc., 142 Cal. App. 4th 1457, 1473, 49 Cal. Rptr. 3d 227 (2006)*. The California Supreme Court has held that "[w]hen a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*.

BHRS's claim under the "unfair" prong of the UCL fails for the reasons discussed in the preceding section. Although BHRS sufficiently alleges that BHRS and Brio are direct competitors, BHRS does not aver (or argue) that Brio's alleged misconduct threatens an incipient violation of an ***antitrust law*** or has effects comparable to a violation of an ***antitrust law***. The Amended Complaint does not state sufficient facts to show that the alleged false statements were made ***by*** Brio, or by individuals who received compensation **[**13]** (monetary or otherwise) in exchange for their reviews. Rather, BHRS merely alleges, in conclusory fashion, that Brio's conduct "is substantially injurious to BHRS, competitors, and the consuming public, offends public policy, and is immoral, unethical, oppressive, and unscrupulous . . . ."[27] Such allegations are mere "labels and conclusions," which, absent supporting evidentiary facts, are not sufficient to survive a motion under *Rule 12(b)(6)*. *Twombly, 550 U.S. at 555*.

Accordingly, the Court finds that BHRS has not alleged sufficient facts to state a plausible claim for relief under the UCL's unfair prong.

---

[24] *Id.* at ¶¶ 84-98.

[25] *Id.* at ¶ 88.

[26] *See* Opposition 13:16-17 ("Plaintiff alleges claims for violations of the unlawful and unfair prongs of the statute.").

[27] *Id.* at ¶ 92. The Court explained in its First Order that this conclusory allegation, which BHRS left unchanged in the Amended Complaint, is not sufficient to plead a claim under the "unfair" prong of the UCL. *See* First Order 15:16-21.

2. "Unlawful" Prong

Under the UCL's "unlawful" prong, "[t]he UCL 'borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable.'" *Wilson v. Hewlett—Packard Co., 668 F.3d 1136, 1140 (9th Cir. 2012)* (quoting *Cel-Tech, 20 Cal. 4th at 180*).

Here, BHRS alleges that Brio has violated the unlawful prong of the UCL through Brio's violation of the UCL itself and Brio's breach of Amazon's Seller Agreement (BHRS's third claim for relief).[28] However, as stated in the preceding section, the Court finds that BHRS has not alleged sufficient facts to state a plausible claim for relief under *§ 17200 of the California Business and Professions Code*. Furthermore, as explained below, BHRS is no longer pursuing its **[**14]** claim for breach of **[*803]** contract. Accordingly, BHRS cannot state a claim under the UCL's unlawful prong.

Based upon the foregoing, the Court **GRANTS** Brio's Motion to Dismiss BHRS's claim for violation of the UCL. For the reasons explained with respect to BHRS's claim for false advertising, the Court finds that granting leave to amend again would be futile. *See* *Lopez, 203 F.3d at 1127*.

C. Breach of Contract—Third Party Beneficiary

BHRS indicates in its Opposition that it has agreed to dismiss its breach of contract claim "without prejudice to Plaintiff's ability to raise any violations of the Amazon seller policies with Amazon as part of any informal process provided by Amazon in those agreements."[29]

Accordingly, the Court **GRANTS** Brio's Motion to Dismiss BHRS's claim for breach of contract, without prejudice to BHRS's right to pursue that claim in connection with any process provided by Amazon for resolving such claims.

IV. CONCLUSION

For the reasons set forth above, the Court hereby **ORDERS** as follows:

1. Brio's instant Motion to Dismiss is **GRANTED** in its entirety, **without leave to amend**.

2. The Court makes no findings or conclusions with respect to BHRS's right to raise its breach of contract claim through Amazon's **[**15]** dispute resolution process.

3. The Clerk is **DIRECTED** to close this case.

IT IS SO ORDERED.

Dated: June 7, 2021

/s/ John W. Holcomb

John W. Holcomb

---

[28] The Amended Complaint also alleges that Brio's conduct violates "28 U.S.C. § 1125," *id.* at ¶ 89; however, BHRS likely meant to cite *15 U.S.C. § 1125* (*i.e.*, the *Lanham Act*), because title 28 of the United States Code does not contain a *§ 1125* (title 28 governs the judiciary and judicial procedure). Regardless, the Court already determined, in the preceding section, that the Amended Complaint fails adequately to allege a claim under the *Lanham Act*.

Opinion

FINDINGS OF FACT AND CONCLUSIONS OF LAW

This antitrust case concerns private security services in Davidson County, Tennessee. For years, private companies, including Plaintiffs, were the primary suppliers of private security services in Davidson County. Those private companies hired off-duty Metropolitan Nashville Police Department ("MNPD") officers to provide part-time security services. Beginning in 2013, MNPD started a five-year plan to transition the secondary employment of off-duty MNPD officers away from private companies. As MNPD implemented this transition, it also decided to enter the private security services market. In order to win business, MNPD lowered rates, changed administrative procedures, and eventually prohibited off-duty MNPD officers from working for private security companies. **[*2]**

MNPD won a number of contracts previously held by private security companies and became a significant player in the private security services market.

Plaintiffs allege a disruption caused by MNPD's aggressive, competitive, and successful entry into the private security services market. They argue that MNPD was successful through the use of anticompetitive conduct in violation of *Section 2 of the Sherman Act, 15 U.S.C. § 2* ("Section 2").[1] A bench trial was held on November 12 through 16, 2020, (Doc. Nos. 138-140), and the parties submitted post-trial briefs. (Doc. No. 137, 145, 146). The Court makes the following Findings of Fact and Conclusions of Law in accordance with *Rule 52(a) of the Federal Rules of Civil Procedure*.

FINDINGS OF FACT

The Private Security Services Market In Davidson County, Tennessee

1. Plaintiffs are three long-established private security companies operating in Davidson County, Tennessee. Comprehensive Security, Inc. ("Comprehensive") is headed by Loyd Poteete, a former MNPD officer. Associated Protected Services ("APS") is owned by Michael Woods, a former Millersville, Tennessee police officer. OnTrac Security is operated by Ralph Douglas Jones, a formed MNPD sergeant.

2. Plaintiffs offer traditional police and security services to the public, including site **[*3]** security, asset security, traffic control, crowd control, individual protection and other similar security services.

3. In order to deliver police and other security services, Plaintiffs hire off-duty police officers as part-time employees on an as-needed basis. (Doc. No. 138 at 16-26, 157-60). Those off-duty officers are either commissioned by the Tennessee Peace Officer Standards & Training Commission ("POST officers") or without a POST commission. (Id. at 17-19, 26, 159-63, 191). The distinction is significant because only POST officers can make arrests and direct traffic on public streets. (Id. at 16; Doc. No. 139 at 26; Doc. No. 140 at 66). Most of the off-duty officers typically work full-time for local and state governmental law enforcement agencies, such as MNPD, and receive employment benefits and annual training through that employment. As a result, private security companies benefit greatly from having access to trained off-duty officers who desire sporadic, additional part-time work pay without incurring the training cost or other costs associated with regular employees. (Doc. No. 139 at 116). Having this ready labor made it easier for private security companies, like Plaintiffs, **[*4]** to fulfill their contractual security obligations in Davidson County. (Doc. No. 138 at 171-72).

4. MNPD facilitated the success of private security companies through secondary employment policies and procedures. As far back as the 1990s, an MNPD officer who wanted to work part-time for a private security company could submit a secondary employment work request, known as a Form 150, and approval was "pretty much guaranteed." (Doc. No. 138 at 173; see also id. 51-52; Doc. No. 119-20). In 1997, MNPD created the Secondary Employment Unit ("SEU"), to help MNPD officers obtain approval of secondary employment requests. The SEU gave private security companies "very easy" access to a "great pool" of MNPD officers that were "on standby constantly." (Doc. No. 138 at 51-53, 172).

5. The cooperative relationship between MNPD and private security companies extended to Metro's Special Events Committee, which consisted of representatives from the Mayor's Office, Public Works, Metro Parks, MNPD, Metro Fire, and special event coordinators. The Committee's responsibilities included the planning, permitting, and approval of special events in Davidson County. (Id. at 37-38, 175; Doc. No. 139 at 57-58). **[*5]** The inclusion of Plaintiffs and other private security companies reflected the then market reality that private security companies did the "lion's share of [the private security] work," and were able to share their expertise on security, road closures, and traffic control. (Doc. No. 139 at 58-59).

---

[1] Plaintiffs abandoned their *Section 2* predatory pricing claim. (Doc. No. 145 at 2, 32).

Chief Anderson's Five-Year Transition Plan for MNPD

6. In April 2013, then MNPD Chief Steve Anderson announced a five-year transition plan to change "the future of secondary employment of [MNPD] police officers" and to ensure the "safety" of citizens and visitors. (Ex. 68 at 2, 6). In an April 26, 2013 email to city officials, Chief Anderson explained that "practices relating to the off-duty employment of police officers that were in place 20 years ago would not be acceptable today." (Id. at 2). He explained that there was "little or no regulation or oversight as to how, or even where, officers used their police authority in off-duty employment," and that without "sufficient oversight, there is the real potential, and as we have seen in other cities, [for] the reality of inappropriate conduct, favoritism, misbehavior and/or corruption." (Id.) He was committed to "improving accountability and **[*6]** reducing liability to the city" by changing the availability and controls surrounding secondary employment of off-duty MNPD officers. (Id.)

7. Chief Anderson also determined that continued employment of MNPD officers by private security companies had "the potential to divide an [MNPD] officer's loyalties, create conflicts of interest and otherwise have a detrimental effect on the operation of the Metropolitan Government." (Id. at 3). So, he decided to restrict officers' secondary employment by requiring that all private security services work be approved by MNPD. (Id.) This would enable MNPD to "limit its liability and exercise sufficient control so as to minimize any detrimental impact [secondary employment] can create." (Id.) The change would also help MNPD become more "professional [and] coordinated," and "enhance public safety and service." (Id. at 6).

8. The transition plan for MNPD officers' secondary employment would occur over five years to avoid any "outcry" over sudden change to an existing system "[e]ngrained into the culture of Nashville." (Id.) It was important to Chief Anderson that special event planners would not hire MNPD officers directly unless the fees charged by **[*7]** MNPD were "reasonable and affordable." (Id. at 5). He explained that it was "imperative" that MNPD "give the Nashville community and event organizers an affordable way to have Metropolitan Nashville police officers staff their events." (Id. at 5-6).

9. MNPD Captain David Corman, the head of SEU from 2010 to 2019, was responsible for implement Chief Anderson's five-year transition plan. (Doc. No. 140 at 76).

10. Beginning in April 2013, Corman began the process. First, the focus of SEU changed to obtaining private security contracts for MNPD that could be directly staffed with MNPD officers. (Doc. No. 139 at 37). MNPD Sergeant Kim Forsyth testified that Corman was concerned that private security companies were using MNPD's officers to make their own money, and he became excited at the prospect of generating business for MNPD. (Id. at 37-38). Forsyth, a witness offered by Plaintiffs, was very critical and accusatory of Corman. She believed that Corman wanted to make as much money as possible for MNPD and operated SEU with the goal of eliminating the work available to private security companies so that eventually they would be forced out of business. At trial, she was nervous, unsure, fearful **[*8]** and contrived. She lacked any direct or indirect knowledge about MNPD's anti-competitive activities or motive. Instead, her testimony consisted of aggressive, prepackaged speeches that were often not responsive to questions. Overall, the Court found Forsyth not credible, and likely influenced by personal feelings about Corman.

11. Second, Corman implemented administrative changes to add "more structure" and "more oversight" to the Form 150 process for approving secondary requests. (Doc. No. 140; see also Doc. No. 138 at 51-57, 173-75). For example, MNPD required multiple escalating levels of approval - first by the captain or precinct commander, then by the head of SEU, and eventually by Chief Anderson. (Doc. No. 54-55, 173). MNPD also made a determination on each private security work opportunity to access whether it was "worthwhile." (Id. at 173-74). As a result, it became more difficult to get Form 150 approvals, and private security companies began to rely more on non-MNPD officers. (Id. at 78-80, 87-90).

12. Third, the five-year transition plan also changed the operation of the Special Events Committee. No longer were private security companies, like Plaintiffs, invited by Metro **[*9]** to attend meetings. Instead, they had to be invited by special event planners to discuss individual projects. (Id. at 69-70, 195-97; Doc. No. 140 at 140-41). The most

significant change occurred when MNPD began promoting itself to special event planners to provide private security services for their events. (Doc. No. 138 at 176, 196; Doc. No. 139 at 71-72). As Michael Woods of Plaintiff APS conceded, MNPD was merely "let[ting] [event organizers] know they had other options." (Doc. No. 138 at 198).

13. Between 2013 and 2018, Plaintiffs, and other private security companies, felt the impact of MNPD entrance into the private security market. In their case-in-chief, Plaintiffs painted an impressive picture through multiple private security companies who told stories of losing business to MNPD. According to them, MNPD used the Special Events Committee, control over the availability of off-duty MNPD offers through the Form 150 process, the parade permit process and the approval process for road closure to systemically take business that previously went to Plaintiffs and other private security companies. A few examples illustrate MNPD's takeover of the customer base for the private security **[*10]** market:

- For many years, Patrick McKellar and his company provided security for the annual Iroquois Steeplechase event, until he lost that work to MNPD.
- George H. Curry, Jr. provided security services for all events at the Ryman Auditorium and the Grand Ole Opry House until he lost that work to Ryman's in-house security force in 2018 because he could no longer employ MNPD officers.
- Doug Jones provided security services for TriStar Hospitals, which are part of the HCA family of companies. His contract approached 1 million dollars and was lost to MNPD in 2018.
- Also in 2018, Chaz Vetter, owner of Premier Protective Services, Inc., provided security services to the State Fairgrounds for at least six years until he lost that work to MNPD.
- Comprehensive, owned by Loyd Poteete, lost its customer, the Nashville Pride Festival to MNPD, which provided security services for free.
- APS, owned by Michael Woods, lost work for the Nashville Pride Festival and the Nashville Christmas Parade to MNPD.

Completion of the Five-Year Transition Plan

14. On March 2, 2018 - almost exactly five years after announcing the five-year transition plan - Chief Anderson issued a memorandum ending MNPD's approval **[*11]** of MNPD officers' requests to perform off-duty work for private security companies. (Ex. 6; Doc. No. 138 at 60-61; Doc. No. 139 at 14). This effectively ended Plaintiffs' ability to hire off-duty MNPD officers to staff their private security services contracts. Now, Plaintiffs had to use non-MNPD officers. (Doc. No. 138 at 90-94).

15. As a result, SEU now "operate[s] the same way" as a private security company and "provide[s] businesses or individuals an opportunity to hire [MNPD] police officers" for private security services. (Doc. No. 140 at 36, 113). SEU has been very successful. (Doc. No. 139 at 47, 49, 81-82). MNPD has obtained a number of significant contracts previously held by Plaintiffs and other private security companies. In some cases, MNPD even offered free or discounted private security services to the public. (Doc. No. 138 at 28-32; 178-80).

16. MNPD rates for private security services reflects its entrance into, and competition within, the private security market. From 2009 until 2013, Metro's range for hourly services ranged from $66.00 per hour to $116.00 per hour, much higher than the private security companies. Ex. 61 at 1. But in 2013, when MNPD began to implement **[*12]** Chief Anderson's five-year transition plan, MNPD lowered the range to $40.00 per hour to $75.00 per hour. (Id.) There was a small increase in 2017 to a range of $44.50 per hour to $79.50 per hour, encompassing completion of the five-year plan in 2018. (Id. at 2.) Finally, in 2020 to 2021, after MNPD had obtained many of Plaintiffs' and other private security companies' clients, the range had a modest increase to $46.50 per hour to $79.50 per hour. (Id.)

Expert Opinions

17. At trial, the Court qualified two witnesses as experts under *Federal Rule of Evidence 702*: Dr. Gilbert Mathis, Professor Emeritus of Economics at Murray State University, on behalf of Plaintiffs (Ex. 40), Dr. Charles L. Baum II, Professor of Economics at Middle Tennessee State University, a rebuttal expert on behalf of Defendant. (Ex. 60).

Having considered the testimony of both, the Court gives little weight to Dr. Mathis's opinions because the Court finds them to be flawed due to incomplete analysis.

18. Dr. Mathis opined that MNPD was anticompetitive when it reduced the available labor pool needed by Plaintiffs and other private security companies to compete in the private security services market. According to Dr. Mathis, MNPD increased market **[*13]** power and decreased competition when it restricted off-duty MNPD officers from working for Plaintiffs.

19. The Court concludes that Dr. Mathis's opinion is unreliable. (Doc. No. 139 at 136 47, 176-79). First, Dr. Mathis analyzed the wrong market. As credibly explained by Dr. Baum, Dr. Mathis failed to analyze the sell-side market for the supply of private security services that is the basis of Plaintiffs' claim. (Doc. No. 139 at 152). Indeed, contrary to Plaintiffs' own legal arguments, Dr. Mathis insisted that this case concerns buyers, not sellers. (Doc. No. 138 at 120 21). Dr. Mathis compounded this error by rejecting, contrary to the evidence at trial, that the "buyers" relevant to private security services are special event planners and organizers. Instead, Dr. Mathis devised a market in which the buyers are private security companies and the product is off-duty officers employed by law enforcement agencies. (Id. at 112, 121-22; Ex. 40 at 1-3). Because his "labor pool" market focus bears no resemblance to the private security service supply market at issue in this case, Dr. Baum concluded that Dr. Mathis failed to demonstrate that MNPD had market power. (Doc. No. 139 at 133, 137-38). **[*14]** The Court agrees that the labor pool market analysis offers little insight into MNPD's alleged anticompetitive behavior in the supply-side security service market.

20. Even if the labor pool market analysis were relevant, Dr. Mathis used untenable assumptions that undercut his conclusions. In particular, Dr. Mathis did not include all available off-duty officers such as non-POST officers, retired POST officers, Tennessee Highway Patrol officers, and officers in nearby counties. (Id. at 136-47, 190-91). His contrary assumptions are wholly unsupported by the evidence at trial. Rather, the evidence at trial establishes that private security companies routinely hire non-POST officers, retired POST officers, THP officers, and POST officers from law enforcement agencies in geographically distant counties, including as far as Alabama. (Doc. No. 138 at 17-22, 26, 58, 87, 90-91, 163, 191; Doc. No. 139 at 100; Doc. No. 140 at 144). Moreover, Dr. Mathis acknowledged making no attempt to ascertain how many MNPD officers are willing or able to work for private security companies. (Doc. No. 138 at 127 29). Indeed, Dr. Mathis conceded at trial that he did not consider much of the available information **[*15]** about private security companies' labor force; that it was reasonable to consider such data; and that correcting his assumptions with such data would alter his conclusions. (Id. at 114; 118-20; 125-30).

21. The HHI value calculated by Dr. Mathis is also unreliable. The HHI, typically used to evaluate a market in a merger case, has more limited utility in a *Section 2* case concerned with the market power of a single firm. Moreover, Dr. Mathis's method for calculating the HHI value likely overstated the results. Again, as Dr. Baum credibly explained, Dr. Mathis considered all of the POST officers in five counties as one "unit," instead of following standard principles and squaring the shares of the employers that supply POST officers in each county. (Doc. No. 139 at 176-83). "[L]umping all the firms in a county together and consider[ing] that to be one entity" makes the labor pool "seem way more concentrated than it really is." (Id.)

22. Finally, Dr. Mathis assumes that the "reasonable available" labor pool for private security companies includes MNPD, but he concedes that MNPD is not obligated to make its officers available to private security companies *at all*. (Doc. No. 138 at 136-37). In rebuttal, **[*16]** Dr. Baum stressed that Dr. Mathis failed to acknowledge that "there is no economic theory . . . that says it's somehow anticompetitive for a company to not allow its workers to work for another company." (Doc. No. 139 at 135-36). Dr. Mathis compounded this error by failing to ever consider the stated purposes for Chief Anderson's MNPD secondary employment transition plan. (Doc. No. 138 at 140). As a result, the labor pool market analysis entirely fails to take into account MNPD's alternate reasons for limiting the outside work of its officers, including "provid[ing] better security and control[ling] MNPD's public image." (Doc. No. 139 at 168, 187).

CONCLUSIONS OF LAW

***Antitrust Law* and the Sherman Act**

1. The antitrust laws protect "competition, not competitors." *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. To violate the Sherman Act, a firm must engage in anticompetitive conduct "designed to destroy competition, not just to eliminate a competitor." *Richter Concrete Corp. v. Hilltop Concrete Corp., 691 F.2d 818, 823 (6th Cir. 1982)*. Congress authorized Sherman Act scrutiny of a single firm only when the firm poses a danger of monopolization. This strict focus "reduces the risk that the antitrust laws will dampen the competitive zeal of a single aggressive entrepreneur." *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. *Section 2* thus prohibits only monopolizing, attempting **[*17]** to monopolize, or conspiring with others to monopolize, commerce.[2] *15 U.S.C. § 2*; *Superior Prod. P'ship v. Gordon Auto Body Parts Co., 784 F.3d 311, 318 (6th Cir. 2015)*.

2. To prove monopolization, a plaintiff must prove that a firm: (1) "possess[ed] monopoly power in a relevant market"; (2) "willful[ly] acqui[red], maint[ained], or use[d] [ ] that power by anti-competitive or exclusionary means as opposed to 'growth or development resulting from a superior product, business acumen, or historic accident,'" *Conwood Co. v. U.S. Tobacco Co., 290 F.3d 768, 782 (6th Cir. 2002)* (quoting *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 595-96, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*); and (3) had a general intent to exclude others from the market. *Superior Prod. P'ship, 784 F.3d at 319* (quoting *Conwood, 290 F.3d at 782*).

3. To prove attempted monopolization, a plaintiff must prove that a firm: (1) "with a dangerous probability of success, engage[d] in anti-competitive practices the specific design of which [was] to build a monopoly or exclude or destroy competition"; and (2) had a "specific intent to destroy competition or build a monopoly."[3] *Conwood, 290 F.3d at 782* (quoting *Smith v. N. Mich. Hosps., Inc., 703 F.2d 942, 954 (6th Cir. 1983)*); *Superior Prod. P'ship, 784 F.3d at 319*; *Arthur S. Langenderfer, Inc. v. S.E. Johnson Co., 917 F.2d 1413, 1431-32 (6th Cir. 1990)*. To satisfy the "dangerous probability of success" element, a firm must demonstrably "possess market strength that approaches monopoly power." *Langenderfer, 917 F.2d at 1431-32*; *Tarrant Serv. Agency, Inc. v. Am. Standard, Inc., 12 F.3d 609, 615 (6th Cir. 1993)*.

4. Consideration of every *Section 2* claim begins with two threshold issues: (1) the definition of "the relevant product and geographic markets" in which the plaintiffs compete with the defendant, and (2) whether the defendant, **[*18]** "in fact, possesses monopoly power." *Spirit Airlines, Inc. v. Northwest Airlines, Inc., 431 F.3d 917, 932 (6th Cir. 2005)* (quoting *Conwood, 290 F.3d at 782*); see also *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*; *Hand v. Cent. Transp., Inc., 779 F.2d 8, 11 (6th Cir. 1985)*.

5. The proof at trial established, by a preponderance of the evidence, that Plaintiffs and other private security companies primarily used full-time MNPD officers and other law enforcement officers to supply the labor necessary to staff their for-profit companies providing security services to the public. They relied greatly upon MNPD. Their business model worked well because MNPD hired, trained, paid, and controlled their labor source with no direct costs to Plaintiffs. Then, in 2013, MNPD changed its administration of its employees. MNPD decided that more management and control was needed to maintain MNPD standards when its employees engaged in off-duty secondary employment. Recognizing that some MNPD officers wanted and needed part-time work for additional pay, MNPD entered the private security services market using its employees. Plaintiffs' claims that MNPD's

---

[2] The Clayton Act provides the vehicle to sue for redress under *Section 2*. *Section 16* of the Clayton Act provides in part that "[a]ny person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws[.]" *15 U.S.C. § 26*.

[3] Specific intent may be inferred from evidence of anticompetitive conduct, *Langenderfer, 917 F.2d at 1432*, and courts have found "[i]mproper exclusion . . . is always deliberately intended." *Spirit Airlines v. NW Airlines, Inc., 431 F.3d 917, 932 (6th Cir. 2005)*(citing *Aspen Skiing, 472 U.S. at 603*).

decision to compete with Plaintiffs is a violation of the antitrust laws is fundamentally flawed. Nothing in *Section 2 of the Sherman Act* requires MNPD to make its employees available to a for-profit company. Nothing in *Section 2 of the Sherman Act* requires MNPD to refrain from competing against Plaintiffs in the private **[*19]** security market. Nothing in *Section 2 of the Sherman Act* makes illegal MNPD decision to compete against Plaintiff. And, certainly nothing in *Section 2 of the Sherman Act* requires MNPD to help its competition once MNPD enters the market. For the reasons that follow, there is no violation of *Section 2 of the Sherman Act* in this case.

Market Definition

6. Plaintiffs must first accurately define the relevant market in which they compete with MNPD. *Worldwide Basketball & Sport Tours, Inc. v. Nat'l Collegiate Athletic Ass'n, 388 F.3d 955, 962 (6th Cir. 2004)*; see also *In re Se. Milk Antitrust Litig., 801 F. Supp. 2d 705, 724 (E.D. Tenn. 2011)*. The relevant market consists of two components: (1) product or service market, and (2) geographic market. *Brown Shoe, 370 U.S. at 324*; *Spirit Airlines, 431 F.3d at 932-33*; *In re Se. Milk, 801 F. Supp. 2d at 724*. Here, by a preponderance of the evidence, it is apparent that Plaintiffs, MNPD, and other private security companies compete primarily in the Nashville, Davidson County, Tennessee market in the private security market.

7. Plaintiffs contend that the appropriate service market is the supply of private security services "that require POST-commissioned officers." (Doc. No. 132 at 2; Doc. No. 145 at ¶ 206). However, Plaintiffs have not proven this narrow definition by a preponderance of the evidence. First, Plaintiffs have offered no antitrust analysis to support the definition. Dr. Mathis disagreed with the definition entirely and offered no relevant analysis of *any* supply market. And Plaintiffs presented no **[*20]** qualitative information to support the definition (e.g., data regarding the number and size of market participants; specific services supplied in the market; cross-elasticity; firms that have left the market; firms that could enter the market; barriers to entry, etc.) Indeed, Dr. Baum credibly opined that Plaintiffs did not even collect the appropriate data to analyze the supply market. (Doc. No. 139 at 139, 152).

Monopoly Power

8. The Court next considers the "critical factor" of whether MNPD has monopoly power in the relevant market. *Byars v. Bluff City News Co., 609 F.2d 843, 850 (6th Cir. 1979)* (citing *American Tobacco Co. v. United States, 328 U.S. 781, 813-14, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*). A single seller has monopoly power when it is able to raise prices or exclude competition when it desires to do so. *Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 464, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (quoting *Fortner Enterprises, Inc. v. United States Steel Corp., 394 U.S. 495, 503, 89 S. Ct. 1252, 22 L. Ed. 2d 495 (1969)*); see also *E.I. du Pont, 351 U.S. at 391*.

9. "The existence of [monopoly] power ordinarily is inferred from the seller's possession of a predominant share of the [relevant] market." *Spirit Airlines, 431 F.3d at 935* (quoting *Eastman Kodak, 504 U.S. at 464*). Although *Section 2* does not contain a specific percentage of market share that triggers an inference of monopoly power, courts have adopted a standard that is "very high." *In re Se. Milk, 801 F. Supp. 2d at 725* (citing *Smith Wholesale Co., Inc. v. Philip Morris USA, Inc., 219 F. App'x 398, 409 (6th Cir. 2007)*). In particular, the Sixth Circuit typically infers monopoly power "where the market share is *75-80% or greater*." *Byars, 609 F.2d at 850* (emphasis added). The Sixth Circuit has also endorsed Judge Learned **[*21]** Hand's "classic explanation" of market share sufficient to constitute monopoly power: "over ninety . . . percentage [market share] is enough to constitute a monopoly; it is *doubtful whether sixty or sixty-four percent would be enough*; and certainly thirty-three percent is not." *Spirit Airlines, 431 F.3d at 935* (emphasis added) (quoting *United States v. Aluminum Co. of America, 148 F.2d 416, 424 (2d Cir. 1945)*).

10. The Sixth Circuit has also taken a demanding approach to whether a plaintiff has demonstrated market share "approach[ing] monopoly power" sufficient to satisfy the "dangerous probability of success" element of an attempted monopolization claim. *Langenderfer, 917 F.2d at 1431-32*; *Tarrant, 12 F.3d at 615*. Twice, the court has held that a

market share between 30 and 40 percent was insufficient evidence that a firm had even the capacity to monopolize. See *Richter, 691 F.2d at 826*; *Langenderfer, 917 F.2d at 1431*.

11. Plaintiffs have not established MNPD's market share. As discussed above, Dr. Mathis conducted a "buy-side" study of a "reasonable labor pool" that offers no insight into MNPD's share of the relevant sell-side market. Moreover, even if Dr. Mathis's labor pool analysis were relevant and reliable, it is insufficient to demonstrate monopoly power because MNPD's "share" is below the high threshold required under Section 2. *Byars, 609 F.2d at 850*. Indeed, Dr. Mathis implicitly acknowledged this shortfall **[*22]** by concluding that MNPD has only "considerable market power," not *monopoly* power. (See Ex. 40 at 3-4). Finally, Plaintiffs' anecdotal evidence at trial concerning MNPD's performance in the relevant market does not alone support a finding, of monopoly power. Accordingly, Plaintiffs have failed to prove, by a preponderance of the evidence, that MNPD possesses sufficient market share for the Court to infer the existence of monopoly power in the relevant market.

Anticompetitive Conduct

12. Even if Plaintiffs had met their burden regarding monopoly power in the relevant market, their *Section 2* claims still fail because Plaintiffs have not proven that MNPD engaged in anticompetitive conduct. There is insufficient proof that MNPD "willful[ly] acqui[red], maint[ained], or use[d] [monopoly] power by anti-competitive or exclusionary means as opposed to 'growth or development resulting from a superior product, business acumen, or historic accident,'" or "engage[d] in anti-competitive practices the specific design of which [was] to build a monopoly or exclude or destroy competition." *Conwood, 290 F.3d at 782* (quoting *Aspen Skiing, 472 U.S. at 595-96* and *Smith, 703 F.2d at 954*); see also *Superior Prod. P'ship, 784 F.3d at 319*. Neither have Plaintiffs proved that MNPD engaged in other anticompetitive behavior designed to **[*23]** destroy competition. See *Richter, 691 F.2d at 823* (explaining that anticompetitive conduct is "designed to destroy competition, not just to eliminate a competitor").

13. This Court does not find that Chief Anderson's five-year transition plan was intended to "destroy competition." His plan was largely inward-looking and concerned MNPD and MNPD officers. (See Ex. 68). Chief Anderson outlined specific and credible business reasons and police powers for the transition plan, including that MNPD sought better control over its own officers; better management of its reputation; limitation of complaints; improved training and risk management; and a better ability to provide for the public safety. Likewise, Plaintiffs offered insufficient evidence that changes to the Special Events Committee meetings were intended to "destroy competition." In short, Plaintiffs have not established, by a preponderance of the evidence, MNPD's pursuit of contracts for MNPD officers was anything other than vigorous competition upon completion of the transition plan. See *Richter, 691 F.2d at 823* (observing that an "attempt to succeed in business" is not punishable under the Sherman Act).

CONCLUSION

For these reasons, the Court concludes that Plaintiffs have not **[*24]** established a basis for relief under *Section 2 of the Sherman Act*. The Clerk shall enter judgment for the Defendant.

An appropriate order will enter.

Opinion

MEMORANDUM

Schiller, J.

June 9, 2021

Defendants[1] move to exclude the testimony of Plaintiffs Winn-Dixie and Bi-Lo's proposed expert Dr. Keith Leffler, Ph.D. Dr. Leffler is an Emeritus Associate Professor of Economics who analyzed the impact of the anticompetitive acts of the Eastern Mushroom Marketing **[*3]** Cooperative, Inc. (EMMC) and estimated Plaintiffs' damages. Meanwhile, Plaintiffs move to exclude the testimony of Defendants' proposed rebuttal expert, Dr. Jesse David, Ph.D. Dr. David is an economist and President of a consulting firm that provides economic and financial analysis for litigation and public policy matters. He analyzed the opinions of Plaintiffs' expert Dr. Leffler and provided opinions regarding Plaintiffs' alleged damages. For the reasons that follow, the Court will largely permit the testimony of both experts; however, the Court will limit the damages period proposed by Dr. Leffler to fit the facts of the case.

I. FACTUAL BACKGROUND

This case is one in a related series of actions dealing with alleged price fixing and collusion in the market for fresh Agaricus mushrooms. In February 2006, WM Rosenstein & Sons Co. filed a class action complaint in this district alleging that the EMMC and its members and affiliates colluded to inflate the price of mushrooms by agreeing on minimum prices and by decommissioning various mushroom farms in order to reduce mushroom supply. The Rosenstein complaint was later consolidated with six similar class cases, and those putative class **[*4]** plaintiffs filed a consolidated class action complaint on November 13, 2007. The Plaintiff here, Winn-Dixie, along with co-plaintiff Bi-Lo, opted out of that consolidated class action, and initiated this matter in 2015. Plaintiffs' First Amended

---

[1] The motion was joined by Eastern Mushroom Marketing Cooperative, Inc. (EMMC); Robert A. Feranto, Jr., t/a Bella Mushroom Farms; Brownstone Mushroom Farms, Inc.; To-Jo Fresh Mushrooms, Inc.; Country Fresh Mushroom Co.; Gino Gaspari & Sons, Inc.; Kaolin Mushroom Farms, Inc.; South Mill Mushroom Sales, Inc.; Modern Mushroom Farms, Inc.; Sher-rockee Mushroom Farm, LLC; C&C Carriage Mushroom Co.; Oakshire Mushroom Farm, Inc.; Phillips Mushroom Farms, Inc.; Louis M. Marson, Jr., Inc.; Monterey Mushrooms, Inc.; John Pia; and Forrest Mushrooms (collectively, "Certain Defendants"), Giorgi Mushroom Co.; Giorgio Foods, Inc.; Franklin Farms, Inc.; M. Cutone Mushroom Co., Inc.; J-M Farms, Inc.; and United Mushroom Farms Cooperative, Inc. While the motion was pending, claims against Franklin Organic Mushrooms, Inc. (f/k/a Franklin Farms, Inc.) and J-M Farms, Inc. were dismissed with prejudice.

Complaint is similar in all meaningful respects to the class action complaint that preceded it. Two other plaintiffs that had historically opted out of the class action—Publix Super Markets, Inc. and Giant Eagle, Inc.—also filed complaints, which were consolidated with the class action.

A. Expert Reports in the Historic Opt-Out Cases

The historic opt-out plaintiffs, Publix and Giant Eagle, retained Dr. Leffler as an expert witness. In the historic opt-out cases, Dr. Leffler's expert report analyzed the impact of EMMC's anticompetitive acts and estimated the damages the historic opt-out plaintiffs incurred using multiple regression analysis. *In re Mushroom Direct Purchaser Antitrust Litig., Civ A. No. 06-0620, 2015 U.S. Dist. LEXIS 119446, 2015 WL 5775600, at *1 (E.D. Pa. Aug. 5, 2015)*. "Multiple regression analysis is the comparing of variables to determine the influence that one variable, the independent or explanatory variable, has on another variable, the dependent variable." *Id.* Dr. Leffler ran two separate regression models, one for each historic opt-out plaintiff, which attempted **[*5]** to isolate and quantify the impact on mushroom prices caused by the EMMC's policies. *Id.*

The EMMC defendants in the historic opt-out cases retained Dr. David as a rebuttal expert. Dr. David analyzed the expert opinion of Dr. Leffler and opined on the reliability of Dr. Leffler's regression model. *Id.* Defendants in the historic opt-out cases filed a motion to exclude Dr. Leffler's testimony, pursuant to *Federal Rule of Evidence 702*, and the historic opt-out plaintiffs filed a motion to exclude Dr. David's testimony, pursuant to *Rules 702* and *403*. Following *Daubert* hearings for each expert witness, Judge O'Neill issued opinions denying both motions and permitting the proposed testimony of Drs. Leffler and David. The historic opt-out plaintiffs settled their cases before trial.

B. Expert Reports in this Action

In this action, Winn-Dixie and Bi-Lo have also retained Dr. Leffler to analyze the EMMC's market power and the impact of EMMC's anticompetitive acts. Dr. Leffler's initial report, dated July 2, 2020, offers opinions on these topics and estimates Plaintiffs' overcharge damages for mushroom purchases from EMMC members and affiliates. (Pls.' Ex. 18, Expert Report of Keith Leffler, Ph.D. [Leffler Rpt.].) The EMMC Defendants **[*6]** have once again retained Dr. David as a rebuttal expert. Dr. David's expert report, dated July 23, 2020, analyzes the findings of Dr. Leffler's initial report and provides opinions regarding his assessment of damages. (Pls.' Ex. 2, Expert Report of Jessie David, Ph.D. [David Rpt.].) Dr. Leffler responds to Dr. David's opinions in a rebuttal report dated August 13, 2020. (Pls.' Ex. 8, Rebuttal Report of Keith Leffler, Ph.D. [Leffler Rebut. Rpt.].) Now before the Court are the parties' respective motions to exclude the proposed expert testimony of Drs. Leffler and David. In addition to Dr. David's expert report, Defendants' motion also presents a Declaration of Dr. David, dated August 31, 2020, in which he offers additional critiques of Dr. Leffler's opinions. (Defs.' Ex. B [David Decl.].) Plaintiffs' Response in Opposition presents a declaration of Dr. Leffler, dated October 2, 2020, which responds to arguments raised in Defendants' motion to exclude his testimony. (Pls.' Opp'n Ex. 1 [Leffler Decl.].)

Dr. Leffler's initial expert report opines that: (1) there is a relevant economic market for the sale of fresh Agaricus mushrooms in the eastern United States; (2) the EMMC controlled a **[*7]** sufficient percentage of those mushroom sales to have market power; (3) the anticompetitive actions of the EMMC caused the average prices of fresh Agaricus mushrooms sold to Winn-Dixie and Bi-Lo to be higher than competitive levels; and (4) as a result of the actions of the EMMC, Winn-Dixie and Bi-Lo suffered overcharge damages in the prices they paid for mushrooms. (Leffler Rpt. ¶ 4.) Dr. Leffler estimates the overcharge with an econometric analysis of mushroom prices paid by Winn-Dixie and Bi-Lo, controlling for supply and demand conditions. (*Id.* ¶ 53.) He performed this analysis by creating a model of fresh Agaricus mushroom prices using a standard multiple regression analysis with fixed-effects.[2] (*Id.* ¶¶ 54-55.)

---

[2] "[F]ixed effects allows the econometrician to identify statistical relationships after accounting for the...effects unique to subgroups...in the dependent variable. This can be important as these effects could influence the estimated relationship between

Based on this regression analysis, Dr. Leffler's report offers opinions about the overcharge damages Winn-Dixie and Bi-Lo incurred in their mushroom purchases. (*Id.* at p. 32, Table 2.) Dr. Leffler's initial expert report splits Winn-Dixie's damages into three distinct conspiracy periods: (1) February 2001 - July 2005; (2) August 2005 - June 2007; and (3) July 2007 - December 2010. (*Id.*) His rebuttal report slightly revises **[*8]** these conspiracy periods. The rebuttal report divides Winn-Dixie's damages into four conspiracy periods by separating the damages incurred from July 2007 to December 2010 by mushroom provider; it defines the third conspiracy period as Winn-Dixie's purchases from Oakshire, July 2007 - December 2010, and the fourth conspiracy period as Winn-Dixie's purchases from Modern, July 2010 - December 2010. (Leffler Rebut. Rpt. ¶ 14, Table 1.) Dr. Leffler opines that Winn-Dixie incurred overcharges of: (1) 2.9% for the first conspiracy period; (2) 5.3% for the second conspiracy period; and (3) 12% for the third and fourth conspiracy periods. (*Id.*)

Dr. David's expert report offers a variety of critiques of Dr. Leffler's opinions. His opinions can be broadly summarized as criticisms that Dr. Leffler's regression model double counts certain transactions, fails to control for key industry factors, and inappropriately relies on sales from non-EMMC members and anticompetitive conduct after 2005. (David Rpt. ¶¶ 54-80.) Dr. Leffler accepts Dr. David's first criticism concerning double-counted transactions and offers a revised opinion of total overcharge damages after removing those duplicative transactions. **[*9]** (Leffler Rebut. Rpt. ¶ 14, Table 1.) The rebuttal report responds to Dr. David's remaining criticisms by defending Dr. Leffler's original opinions.

Before turning to the merits of the motions, the Court will briefly summarize its other relevant opinions in this action, as these opinions are relevant to whether the proposed expert testimony fits the case.

C. The Court's Previous Decisions in this Action

On July 15, 2020, the Court denied Plaintiffs' motion for leave to file a Second Amended Complaint. (Document Nos. 280, 281.) Plaintiffs' First Amended Complaint alleges:

> [s]tarting on or about January 1, 2001 and continuing until at least through 2008, the EMMC...engaged in an overarching scheme to unlawfully fix the price of fresh Agaricus mushrooms in the United States by agreeing to set floor (minimum) prices for mushrooms and by agreeing to collectively fund and effectuate the purchase or lease of mushrooms farms for the express purpose of reducing output, removing existing available production capacity from the market and artificially raising prices.

(FAC ¶ 3.) Six days before the close of fact discovery, Plaintiffs sought leave to amend the complaint to allege that the conspiracy period **[*10]** continued through December 31, 2010 and that "as part of this scheme, beginning no later than October of 2005, the EMMC added a 'non-compete' policy whereby members agreed not to compete against another member so as to take business away from a member or reduce a member's profit margin." (Document No. 266, Ex. 1 ¶¶ 1, 3, 10.) The Court denied leave to amend the Complaint because Plaintiffs' delay in seeking to extend the conspiracy period and assert this new theory of antitrust liability was both prejudicial and undue. The Court also denied Plaintiffs' motion for reconsideration on this issue, or in the alternative, for clarification that Winn-Dixie could move at trial to conform the pleadings to the evidence, finding that *Rule 15(b)* was inapplicable because no objection to evidence or trial had yet occurred and Defendants had not consented to trial on a non-compete theory of liability. (Document No. 297.)

On September 1, 2020, the Court granted partial summary judgment to Defendants for Bi-Lo's claims for damages. (Document Nos. 298, 299.) The Court found that Bi-Lo was an indirect purchaser from the alleged conspiracy, and therefore, was not an injured party eligible to recover damages pursuant **[*11]** to *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. On May 12, 2021, the Court denied summary judgment on Winn-Dixie's claims for damages, finding that there was a genuine dispute of material fact as to whether Winn-Dixie can recover damages for its mushroom purchases from non-party, Oakshire Mushrooms Sales, LLC (OMS). (Document Nos. 347, 348.) Defendants' liability and Winn-Dixie's damages are outstanding issues to be resolved at trial.

---

the dependent variable and other independent variables." ABA Section of ***Antitrust Law***, *Econometrics: Legal, Practical, and Technical Issues* § 5.B.1.a (2d ed. 2014).

II. STANDARD OF REVIEW

Federal Rule of Evidence 702 provides that a qualified expert witness may offer opinion testimony if:

> (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702. In essence, "Rule 702 embodies three distinct substantive restrictions on the admission of expert testimony: qualifications, reliability, and fit." Elcock v. Kmart Corp., 233 F.3d 734, 741 (3d Cir. 2000).

"*Daubert* holds that admissibility under Rule 702 is governed by Rule 104(a), which requires the judge to conduct preliminary factfinding, to make 'a preliminary assessment of whether the reasoning or methodology **[*12]** underlying the testimony is scientifically valid,'...." In re Paoli R.R. Yard PCB Litig., 35 F.3d 717, 743 (3d Cir. 1994) ("*Paoli II*") (quoting Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 592-93, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)). The burden is on the proponent to establish admissibility by a preponderance of the evidence. Padillas v. Stork-Gamco, Inc., 186 F.3d 412, 418 (3d Cir. 1999). However, "[t]his does not mean that plaintiffs have to prove their case twice—they do not have to demonstrate to the judge by a preponderance of the evidence that the assessments of their experts are *correct*, they only have to demonstrate by a preponderance of evidence that their opinions are reliable." Paoli II, 35 F.3d at 744. A "merits standard of correctness," is "a higher bar than what Rule 702 demands." Karlo v. Pittsburgh Glass Works, LLC, 849 F.3d 61, 83 (3d Cir. 2017).

A court's focus in determining admissibility of an expert's testimony is on "principles and methodology, not on the conclusions generated by the principles and methodology." In re TMI Litig., 193 F.3d 613, 665 (3d Cir. 1999), amended, 199 F.3d 158 (3d Cir. 2000). "The test of admissibility is not whether a particular scientific opinion has the best foundation, or even whether the opinion is supported by the best methodology or unassailable research. Rather, the test is whether the 'particular opinion is based on valid reasoning and reliable methodology.'" *Id.* (quoting Kannankeril v. Terminix Int'l Inc., 128 F.3d 802, 806 (3d Cir. 1997)). However, a court must be mindful that, "the reliability analysis [required by *Daubert*] applies to all aspects of an expert's testimony: the **[*13]** methodology, the facts underlying the expert's opinion, [and] the link between the facts and the conclusion." ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 291 (3d Cir. 2012) (quoting Heller v. Shaw Indus., Inc., 167 F.3d 146, 155 (3d Cir.1999)) (alterations in original).

In addition to reliability, district courts must also assess Rule 702's independent requirement of "fit"—that the expert's opinion will help the trier of fact to understand the evidence or to determine a fact in issue. Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 591, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993). "Thus, even if an expert's proposed testimony constitutes scientific knowledge, his or her testimony will be excluded if it is not scientific knowledge *for purposes of the case*." Paoli II, 35 F.3d at 743.

III. DISCUSSION

Plaintiffs and Defendants each seek to exclude the testimony of the other's proposed expert. Neither side has challenged the experts' qualifications. The Court will first consider Defendants' motion to exclude Dr. Leffler's expert testimony on the grounds that his opinions are unreliable and not relevant to the claims. The Court concludes that Dr. Leffler's methodology is reliable, but some of his opinions will be excluded because they do not fit the facts of the case. Then the Court will consider and deny Plaintiffs' motion to exclude Dr. David's rebuttal expert testimony on the grounds that his opinions are untested, based upon unreliable **[*14]** methodology and data, and their probative value is substantially outweighed by its prejudicial effect.

A. Defendants' Motion to Preclude Dr. Leffler's Proposed Expert Testimony

Defendants argue that Dr. Leffler's proposed testimony should be excluded for two reasons. First, Defendants argue that Dr. Leffler's multiple regression analysis is flawed in multiple ways, and therefore, his methodology is unreliable. Second, Defendants argue that Dr. Leffler's opinions do not fit the facts of the case because he relies on damages that resulted from a non-compete theory of anticompetitive conduct. The Court will consider each of these arguments in turn.

Further, Defendants argue that Dr. Leffler's damages estimate does not fit the facts of the case because he relies upon indirect purchases for which there are no recoverable damages. (Defs.' Mem. in Supp. of Mot. Pursuant to *Fed. R. of Evid. 702* [Defs.' Mot.] at 6-9.) After Dr. Leffler produced his initial report, the Court ruled that Bi-Lo was an indirect purchaser, which means it is not entitled to recover damages. Therefore, the Court agrees that Dr. Leffler's damages estimate pertaining to Bi-Lo must be excluded because it will not help the trier of fact determine **[*15]** any fact in dispute.[3] However, this Court has already ruled that there is a disputed question of fact as to whether Winn-Dixie may recover damages for its purchase of mushrooms from non-party OMS, based on application of the control exception to the direct purchaser rule. Thus, the Court will not exclude any of Dr. Leffler's damages opinions for Winn-Dixie merely because they are premised on Winn-Dixie's purchases from OMS.

1. Reliability of Dr. Leffler's Multiple Regression Analysis

Dr. Leffler estimated the overcharge damages in this case using a multiple regression analysis with fixed-effects. (Leffler Rpt. ¶ 55.) A multiple regression model measures the impact of two or more independent variables—such as demand, production costs, or conspiratorial conduct—on a dependent variable. Here, Dr. Leffler's dependent variable is the price of fresh Agaricus mushrooms. The seven independent variables in his regression model are: (1) wage rates for farm workers; (2) the price of alfalfa hay in Pennsylvania; (3) the cost of electricity to industrial customers in Pennsylvania; (4) the cost of fuel oil in Pennsylvania; (5) personal income per capita in the states where Plaintiffs bought mushrooms; **[*16]** (6) consumption of fresh vegetables as a share of all food consumption at home; and (7) the volume of purchases of a particular mushroom product at a particular time. (Leffler Rpt. ¶ 54.) The model also includes fixed-effects variables of a conspiracy period indicator and mushroom product indicator.[4] (*Id.*)

"There is no dispute that when used properly multiple regression analysis is one of the mainstream tools in economic study and it is an accepted method of determining damages in antitrust litigation." *In re Flat Glass Antitrust Litig., 191 F.R.D. 472, 486 (W.D. Pa. 1999)*; *see* *Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., 998 F.2d 1224, 1238 (3d Cir. 1993)* ("the scientific method used by the economists, multiple regression analysis, is reliable."). Defendants do not generally dispute that a multiple regression analysis is a proper methodology to estimate antitrust injury and overcharge damages. Instead, Defendants argue the particulars of Dr. Leffler's multiple regression model are flawed. Specifically, Defendants argue that Dr. Leffler's multiple regression analysis suffers from: (1) omitted control variable bias; (2) ineffective control variables; (3) over-fitting; (4) a limited benchmark period; and (5) counterintuitive results. Defendants made several of these same arguments when they sought to exclude Dr. Leffler's testimony **[*17]** in the historic opt-out cases. For many of the same reasons Judge O'Neill explained in his well-reasoned opinion, the Court is not persuaded that Defendants' criticisms of Dr. Leffler's regression model warrant exclusion of his testimony as unreliable. *See* *In re Mushroom, 2015 U.S. Dist. LEXIS 119446, 2015 WL 5775600 (E.D. Pa. Aug. 5, 2015)*.

---

[3] In light of the Court's opinion that Bi-Lo is ineligible for overcharge damages, Dr. Leffler "re-estimated the regression analysis using only Winn-Dixie data[,]" and excluding Bi-Lo purchases. (Leffler Decl. ¶ 5.) The result was an increase to Winn-Dixie's overcharges that, according to Dr. Leffler, was not statistically significant and did not meaningfully change Dr. Leffler's opinions. (*Id.*)

[4] "Fixed-effects models often use dummy variables to measure the effect of interest, where a dummy variable is a variable that takes the value of 1 for observations in the subgroup, time period, or event of interest, and 0 for all other observations." ABA Section of ***Antitrust Law***, *supra*, § 5.B.1.a.

a. Omitted Control Variable Bias

Defendants argue that Dr. Leffler's regression model fails to include three distinct control variables, and therefore, is an unreliable methodology. Defendants argue that Dr. Leffler's model fails to account for: (1) the closing of certain mushroom farms; (2) the Dole brand mushroom sales price premium; and (3) price discounts pursuant to sales contracts.

The Court is unpersuaded by Defendants' arguments that Dr. Leffler's failure to account for these variables renders his testimony inadmissible. "[T]he omission of variables from a regression analysis may render the analysis less probative than it otherwise might be[,]" but, absent some other infirmity, "an analysis which accounts for the major factors" likely to influence the result is admissible evidence. *Bazemore v. Friday, 478 U.S. 385, 400, 106 S. Ct. 3000, 92 L. Ed. 2d 315 (1986)*. "Normally, failure to include variables will affect the analysis' probativeness, not its admissibility." *Id.* Still, the court in *Bazemore* noted, **[*18]** "[t]here may, of course, be some regressions so incomplete as to be inadmissible as irrelevant[.]" *Id. at 400 n.10*. In the context of price-fixing cases, other district courts have recognized that "[m]erely pointing to economic conditions that may affect the dependent variable is not enough to call into question the reliability of an econometric model." *Resco Prods., Inc. v. Bosai Mins. Grp., Civ. A. No. 06-235, 2015 U.S. Dist. LEXIS 124930, 2015 WL 5521768, at *5 (W.D. Pa. Sept. 18, 2015)* (quoting *In re Linerboard Antitrust Litig., 497 F. Supp. 2d 666, 678 (E.D. Pa. 2007)*); *accord* *In re Polypropylene Carpet Antitrust Litig., 93 F. Supp. 2d 1348, 1365 (N.D. Ga. 2000)*. Rather, a party challenging a regression model's admissibility for omission of variables, "must introduce evidence to support its contention that the failure to include those variables would change the outcome of the analysis." *In re Indus. Silicon Antitrust Litig., Civ. A. No. 95-1131, 1998 U.S. Dist. LEXIS 20464, 1998 WL 1031507, at *3 (W.D. Pa. Oct. 13, 1998)*; *accord* *Resco, 2015 U.S. Dist. LEXIS 124930, 2015 WL 5521768, at *5, 10 (W.D. Pa. Sept. 18, 2015)*.

i. Farm Closures

Defendants argue first that among the methodological problems with Dr. Leffler's regression model is its failure to account for farm closings over his ten-year damages period. (Defs.' Mot. at 11.) Dr. David's expert report discusses various mushroom farm closures that occurred between 2000 and 2009 and opines that Dr. Leffler does not account for how these farm closures may have affected pricing since there are no variables in the model to control for farm closures. (*See* David Rpt. ¶¶ 17-21, 78.) But because Dr. David did not create or test his own regression model that included **[*19]** a control variable for farm closures, Defendants have not shown that inclusion of this variable would have changed the results of the regression analysis.

Dr. Leffler responds that changes in supply resulting from farm closures are the result of price fluctuation through the application of supply and demand curves, meaning that farm closures are the result of price decreases. (Leffler Rebut. Rpt. ¶ 32.) As a result, Dr. Leffler argues that farm closures are already accounted for in the regression model because they are an "endogenous" variable (*id.* p. 16 n.56), meaning that they are "a factor...driven by 'economically driven changes in supply' that are accounted for in his model." *In re Mushroom, 2015 U.S. Dist. LEXIS 119446, 2015 WL 5775600, at *4 n.2* (quoting Civ. A. No. 06-620, Document No. 664 at 38). Judge O'Neill previously analyzed this same critique in the historic opt-out cases and concluded that, "Dr. Leffler adequately established for purposes of the reliability inquiry that a separate control variable for farm closings is not necessary where such closings are driven by price pressure rather than some independent intervening event such as a natural disaster." *2015 U.S. Dist. LEXIS 119446, [WL] at *4*. Similarly, here, the Court finds that Defendants' argument concerning an omitted variable **[*20]** for farm closures goes to the ultimate probativeness of Dr. Leffler's regression model but does not render it so incomplete as to be irrelevant.

ii. Dole Brand Premium

Defendants also argue that the sales price premium for Dole brand mushrooms was not adequately accounted for in the regression analysis. (Defs.' Mot. at 9-10.) The Dole brand issue is unique to Winn-Dixie's purchases from

OMS and, therefore, was not relevant to Dr. Leffler's opinions for the historic opt-out plaintiffs. From 1999 through 2003, Winn-Dixie's mushroom suppliers were EMMC members Monterey and Modern. (Leffler Rpt. ¶ 35.) In 2004, Winn-Dixie began purchasing mushrooms from OMS, which became Winn-Dixie's only mushroom supplier through 2010. (*Id.*) Winn-Dixie signed a two-year sales agreement with OMS in 2005 (Pls.' Opp'n Ex. 6), and a three-year sales agreement with OMS in 2007. (Pls.' Opp'n Ex. 7.) OMS had an exclusive license to sell mushrooms under the Dole brand, and it purchased mushrooms from suppliers, including EMMC members Country Fresh Mushroom Co., South Mill Mushroom Sales, Inc., and Oakshire Mushroom Farm, Inc., to re-sell under the Dole brand. (*See* David Rpt. ¶ 35.) Therefore, Dr. Leffler's first **[*21]** conspiracy period for Winn-Dixie's mushroom purchases, between February 2001 and July 2005, includes some Dole brand purchases from OMS and other non-Dole brand purchases from Monterey or Modern. Dr. Leffler's second and third conspiracy periods are exclusively for Winn-Dixie's purchases from OMS pursuant to the 2005 and 2007 sales agreements. (Leffler Rpt. ¶ 54 n.127.)

Dr. David opines that Winn-Dixie may have paid OMS as much as a nine percent premium for Dole mushrooms compared to the prices it had previously paid for mushrooms from Monterey or Modern. (David Rpt. ¶ 79.) Dr. David bases this conclusion on the fact that OMS pays Dole a royalty of three percent of net sales for the use of the Dole brand, (*id.* ¶ 35 n.99), and OMS had increased freight costs of approximately six percent compared to Monterey or Modern. (*Id.* ¶ 35 n.103.) As a result, Dr. David states that the Dole premium "could explain most or all" of Dr. Leffler's alleged overcharges. (*Id.* ¶ 79.) Defendants argue that because Winn-Dixie's purchases of Dole brand mushroom began in 2004, all of those purchases occurred during the conspiracy conduct period (2001-2010), as opposed to the benchmark period (1999-2000). (David **[*22]** Decl. ¶ 3 n.5.) Therefore, Defendants argue Dr. Leffler's model cannot distinguish between the premium paid for Dole products and overcharges resulting from the alleged conspiracy. (David Rpt. ¶ 79.)

In response, Dr. Leffler argues that he adequately accounted for the Dole brand mushroom purchases because he included a Dole indicator variable in his product definition "using a fixed-effects methodology." (Leffler Rebut. Rpt. ¶ 31.) Dr. Leffler's regression model includes a set of 0/1 indicator variables for each type of mushroom product. (Leffler Rpt. ¶ 54.) Dr. Leffler applied a Dole indicator variable to approximately 15 percent of Winn-Dixie's purchases from OMS, depending on whether the name of the purchase product indicated it was a "Dole" product. (Leffler Decl. ¶ 2.) Dr. Leffler argues that his analysis,

> bases any Dole premium on differences in prices between Dole branded purchases and Monterey and Modern purchases in Conspiracy period 1. The overcharges in Conspiracy Periods 2 and 3 are then measured by increases in the prices of Dole branded mushrooms, given any premium, that are not explained by the supply and demand control variables.

(*Id.* ¶ 3.)

However, the parties dispute **[*23]** what proportion of OMS's sales to Winn-Dixie were Dole brand mushrooms. Defendants argue that all mushrooms Winn-Dixie purchased from OMS were Dole brand. (David Decl. ¶ 5.) As a result, Dr. David asserts that no Dole indicator variable could separate the Dole premium from alleged overcharges because any Dole indicator variable, "would be indistinguishable from...Dr. Leffler's second and third damages periods." (*Id.*) Defendants reference the sales agreements between Winn-Dixie and OMS to argue that all mushroom sales pursuant to those agreements were Dole brand, but they do not cite any specific provisions of those agreements stating that all mushrooms sold under the agreements were Dole brand. (Defs.' Mot. at 9 n.4.) A cursory review of the sales agreements demonstrates that they describe the products sold pursuant to the agreement as "Oakshire Dole Mushrooms" (Pls.' Opp'n Ex. 6), or refer to OMS as "Dole Mushrooms" (Pls.' Opp'n Ex. 7), and both agreements bear the "Dole" brand logo. Even so, Dr. Leffler argues that these agreements present no conclusive evidence that all OMS sales were Dole brand mushrooms. (Leffler Decl. ¶ 2 n.3.) Nevertheless, Dr. Leffler recreated the regression **[*24]** analysis labelling all OMS sales to Winn-Dixie as "Dole", and the result was to increase the overcharge by less than one percent, which, according to Dr. Leffler, is not statistically significant. (*Id.* ¶ 4.)

The Court concludes that Dr. Leffler's reliance on the description of "Dole" in the product name to apply a Dole indicator variable to only a fraction of Winn-Dixie's purchases from OMS contains sufficient factual basis in the record. "A party confronted with an adverse expert witness who has sufficient, though perhaps not overwhelming, facts and assumptions as the basis for his opinion can highlight those weaknesses through effective cross-examination." [Stecyk v. Bell Helicopter Textron, Inc., 295 F.3d 408, 414 (3d Cir. 2002)](). The contested issue of whether all of Winn-Dixie's purchases from OMS were Dole mushrooms should appropriately be resolved by the trier of fact, so the Court will not exclude Dr. Leffler's testimony on this basis. Dr. Leffler has also articulated how his regression model took the Dole premium into account, despite there being no Dole mushroom purchases during the benchmark period. (Leffler Decl. ¶ 3.) Defendants have not responded to this argument or offered any suggestion of how Dr. Leffler should have altered his regression **[*25]** analysis to take the Dole premium into account. Moreover, because Dr. David did not create or test his own regression model that included a control variable for the Dole premium, Defendants have not shown that inclusion of this variable would have changed the results of the regression analysis. The Court finds the alleged omission or ineffectiveness of the Dole premium variable goes to the regression model's probative value, not its admissibility, since it does not render the model so incomplete as to be irrelevant. Dr. Leffler's argument concerning the Dole premium will be subject to cross-examination at trial.

iii. Price Discounts

The final control variable Dr. David contends is missing from Dr. Leffler's regression model reflects contract price discounts. (David Rpt. ¶ 77.) Winn-Dixie's sales agreements with OMS set purchase prices, but the agreements also provided for a certain quantity of purchases at a discounted price. (*Id.* ¶ 39; Pls.' Opp'n Ex. 6-7.) Dr. David argues that Winn-Dixie purchased significant quantities of mushrooms at discounted rates but there is not a control variable for this feature of the transactions in Dr. Leffler's regression model. (David Rpt. ¶ 77.) Dr. **[*26]** Leffler responds that because he aggregates the data at a monthly level, his model adequately captures the variation that results from contract discounting. (Leffler. Rebut. Rpt. ¶ 20 n.29; *see* Leffler Rpt. ¶ 54.) As with farm closures and the Dole premium, the Court is not persuaded that the absence of a control variable for contract price discounts renders Dr. Leffler's methodology unreliable. Defendants may cross examine Dr. Leffler concerning this alleged deficiency at trial.

b. Ineffective Control Variables

Next, Defendants argue Dr. Leffler's methodology is unreliable because the coefficients on the conspiracy-period control variables indicate that the regression model is flawed. "Coefficients in multiple regression models indicate the degree of correlation between the dependent variable and each independent variable." ABA Section of ***Antitrust Law***, *supra*, Appendix and Glossary.C.3. Dr. David explains that, ordinarily, economic theory would predict that prices should be correlated with production cost—meaning that if costs increase, prices should increase, if all other factors are held constant. (David Rpt. ¶ 76.) Dr. David states that both of Dr. Leffler's variables for heating **[*27]** oil costs (contemporaneous and lagged) show a negative correlation with price, and only five of Dr. Leffler's eleven variables have coefficients that demonstrate statistically significant results, which Dr. David opines indicates that the regression model is not reliable. (*Id.*)

In response, Dr. Leffler contends that there are only seven total supply and demand variables, since contemporaneous and lagged values for the same variable are combined. (Leffler Rebut. Rpt. ¶ 29 n.50.) According to Dr. Leffler, five of the seven variables in his model affect Winn-Dixie's prices as predicted by economic theory; the exceptions with negative coefficients are the costs of hay and heating oil. (*Id.* ¶ 29.) Dr. Leffler explains that excluding either of these variables with a negative coefficient does not significantly change the outcome of the model, so it is unlikely that their inclusion renders the model unreliable. (*Id.* ¶¶ 29 n.52, 30 n.53.) He further states that an increase in the totality of his cost variables resulted in a statistically significant increase in prices, which validates the reliability of his model. (*Id.* ¶ 30; *see* Leffler Rpt. ¶ 55.)

Finally, Dr. Leffler explains that the cost **[*28]** variables of heating oil and electricity are highly correlated with one another, which can result in a phenomenon known as multicollinearity. (Leffler Rebut. Rpt. ¶ 30.) According to one treatise on regression models, "multicollinearity does not indicate a failure of the model. Instead, it reflects the fact that there is insufficient independent variation in the variables included in the data set." ABA Section of ***Antitrust***

Law, *supra*, § 6.C.2.b. Dr. David argues that Dr. Leffler "did not demonstrate...that multicollinearity was the cause of the non-sensical results...." (David Rpt. ¶ 76 n.153.)

Judge O'Neill assessed many of these same arguments in the historic opt-out cases. There, Judge O'Neill found that the cost control variables Dr. Leffler had chosen had "at least a logical relationship to mushroom prices[,]" and as a result, Dr. Leffler had shown that "his model is not equivalent to one that functionally has no cost control variables at all...." *In re Mushroom, 2015 U.S. Dist. LEXIS 119446, 2015 WL 5775600, at *5*. As a result, in the historic opt-out cases, Dr. Leffler's choice of cost control variables, including electricity, heating fuel, hay, and labor—which are many of the same control variables Dr. Leffler used in his regression model in **[*29]** this case (Leffler Rpt. ¶ 54)—did not present a reason to exclude his regression model. *In re Mushroom, 2015 U.S. Dist. LEXIS 119446, 2015 WL 5775600, at *5*. Judge O'Neill noted, "[w]hile there may be questions as to the probativeness of Dr. Leffler's damages models, they can be subjected to vigorous cross-examination at trial." *Id.* The Court agrees with this sound reasoning and will not exclude Dr. Leffler's model because of his choice of cost control variables or the resulting negative coefficients for the cost of heating oil or hay. For purposes of the *Daubert* analysis, Dr. Leffler has adequately shown that his conspiracy-period control variables create a reliable multiple regression model.

c. Over-fitting

Defendants next argue that Dr. Leffler's use of a multi-variable regression analysis is an inappropriate methodology because it suffers from over-fitting. Dr. David describes "over-fitting" as a violation of a cardinal rule in econometrics that "the number of independent observations should be substantially more than the number of independent variables for a regression analysis to be reliable." (David Rpt. ¶ 73 (citing Frank E. Harrell, *Regression Modeling Strategies* (2013).) Here, Dr. David argues that Dr. Leffler's regression model overfits because **[*30]** it incorporates far fewer price observations than it initially appears to include. The regression model "treats the average price for each product in a given month as the unit of observation, and further treats consecutive months as independent observations." (*Id.*) However, Dr. David argues that prices for Winn-Dixie's purchases did not vary monthly because they were negotiated according to contracts with OMS in 2004, 2005, and 2007. (*Id.*) For Winn-Dixie's purchases from other EMMC members Monterey and Modern, Dr. David similarly claims that these prices were negotiated for one-year periods. (*Id.* ¶¶ 34, 73; *see id.* ¶ 39.) Therefore, Defendants argue, Winn-Dixie's purchase prices on a consecutive monthly basis were not independent observations, "rather the data indicate that there were no more than approximately ten unique price observations for each product purchased by Winn-Dixie...." (*Id.*¶ 73.) Defendants argue Winn-Dixie's price data is too limited to generate valid results because Dr. Leffler's regression model uses fourteen independent variables,[5] which is not substantially fewer than the number of price observations.

Dr. Leffler disagrees with Defendants' factual premises and methodological **[*31]** argument. He states that Winn-Dixie purchased mushrooms at 79 unique prices for sliced products and 75 unique prices for whole mushrooms. (Leffler Rebut. Rpt. ¶ 19.) Moreover, Dr. Leffler explains that his use of the fixed-effects methodology with an indicator variable for each type of product means that the independent variable coefficients in his regression are based on estimates of price variation within each product. (*Id.* ¶ 20.)

Based on this explanation, the Court concludes that Dr. Leffler has provided good grounds for his use of average monthly prices, which should be tested in the adversarial process. While Dr. David criticizes that there are only "ten unique price observations *for each product*[,]" (David Rpt. ¶ 73 (emphasis added)), he fails to consider how many total products are included in the regression. Nor does he explain why Dr. Leffler's fixed-effects methodology does not resolve this concern of over-fitting. Moreover, the factual dispute between the experts of how many unique price observations are in the relevant data should be appropriately resolved by the factfinder. Thus, even if Defendants' over-fitting critique is a potential methodological flaw, such a flaw **[*32]** should go to the probativeness of Dr. Leffler's testimony but does not render the regression model unreliable. *See In re Urethane Antitrust Litig., 166 F.*

---

[5] Dr. Leffler states that his model uses only seven variables, since when a contemporaneous and lagged value of the same variable are included, the sum of those coefficients are the expected sign for that variable. (Leffler Rebut. Rpt. ¶ 29 n.50.)

Supp. 3d 501, 505-06 (D.N.J. 2016). In sum, Defendants' arguments concerning over-fitting can be addressed on cross-examination.

d. Limited Benchmark Period

Defendants next argue that Dr. Leffler's regression model is unreliable because he has attempted to model a ten-year period of alleged conspiracy using only two years of pre-conspiracy data as a benchmark. (David Rpt. ¶ 74.) Dr. Leffler's regression model assesses data from January 1999 through December 2010. (Leffler Rpt. ¶ 51.) The data for January 1999 through January 2001 reflects a competitive benchmark period, whereas the data for February 2001 through December 2010 is assigned to one of the conspiracy periods. (*See id.* ¶ 54.) Dr. Leffler explains that his benchmark period was only two years because this was the only data available for his analysis, but even so, he found statistically significant overcharges despite these limitations in the data. (Leffler Rebut. Rpt. ¶ 21.) Dr. Leffler performed additional analysis to confirm that the relationship between cost variables and price did not change between the benchmark and conspiracy periods, and **[*33]** his demand variables did not show a statistically significant difference between the coefficients in the benchmark and conspiracy periods (with the exception of one conspiracy period for the fresh vegetable consumption variable). (*Id.* ¶ 22.) He argues these results prove the reliability of the two-year benchmark period in his model.

Dr. David states that practitioners generally recommend a benchmark period of similar length to the treatment period, and, as a result, Dr. Leffler's benchmark period is unreliable. (David Rpt. ¶ 74.) Dr. David explains that in situations with a disproportionately short benchmark period, "if market conditions change over time, the model may not be able to accurately predict the relationship between the independent and dependent variables, leading again to unreliable results." (*Id.*) However, Dr. David has not pointed to any specific market conditions that changed over the course of the conspiracy period which would render Dr. Leffler's model unreliable. In light of Dr. Leffler's empirical assessments described above, Defendants' speculative criticism is not sufficient to justify exclusion of Dr. Leffler's regression model as an unreliable methodology.

*e. Counterintuitive **[*34]** Results*

Finally, Defendants argue that "[t]he lack of reliability of Dr. Leffler's approach is evident from a straightforward examination of his results." (David Rpt. ¶ 75.) Specifically, Defendants point to Dr. Leffler's estimates that the percentage of overcharges increased in each consecutive conspiracy period, as follows: (1) 2.9% for February 2001-July 2005; (2) 5.3% for August 2005 - June 2007; and (3) 12% for July 2007 - December 2010. (*See* Leffler Rebut. Rpt. ¶ 14, Table 1.) Defendants argue that these overcharges are counterintuitive, since Dr. Leffler's "highest overcharges are found at the end of [the conspiracy] period...a time during which the EMMC's minimum pricing requirements had been eliminated and the EMMC's membership controlled less than half of the relevant market...." (David Rpt. ¶ 75; *see id.* ¶ 65.)

It bears remembering that a court's focus in determining admissibility of an expert's testimony is on "principles and methodology, not on the conclusions generated by the principles and methodology." In re TMI Litig., 193 F.3d at 665 (3d Cir. 1999). Indeed, Judge O'Neill considered and rejected this argument in the historic opt-out cases for precisely this reason, finding that "[this] argument is not consistent with **[*35]** the legal standard on *Daubert*...." In re Mushroom, 2015 U.S. Dist. LEXIS 119446, 2015 WL 5775600, at *7 (citing In re TMI Litig., 193 F.3d at 665). This Court agrees with Judge O'Neill that the counterintuitive trajectory of Dr. Leffler's overcharge estimates is not a sufficient reason to exclude the testimony as unreliable. Plaintiffs have established that Dr. Leffler's regression model, and its application to Winn-Dixie's purchase data, are based on good grounds and employ valid reasoning and reliable methodology. Therefore, the Court will not find Dr. Leffler's opinions inadmissible simply because Defendants deem his conclusions counterintuitive.[6]

---

[6] Separately, Defendants also argue Dr. Leffler's model is unreliable because of his "failure to account for the substantially declining market share due to resignation of EMMC members...." (Defs.' Mot. at 10.) Specifically, Dr. David argues that because

2. Fit of Damages Premised on a Non-Compete Theory

In addition to reliability, district courts must also assess *Rule 702*'s independent requirement that the expert's opinion will help the trier of fact to understand the evidence or determine a fact in issue. *Fed. R. of Evid. 702(a)*; *see United States v. Bennett, 161 F.3d 171, 182 (3d Cir. 1998)* ("the trial judge has broad discretion to admit or exclude expert testimony, based upon whether it is helpful to the trial of fact."). This inquiry goes primarily to relevance and has been referred to as "fit" of the expert opinion. *Daubert, 509 U.S. at 591*. Here, Defendants argue Dr. Leffler's damages estimate does not fit the facts of the case because it is premised on an alleged non-compete **[*36]** agreement among EMMC members. (Defs.' Mot. at 10; Defs.' Reply in Supp. of Mot. Pursuant to *Fed. R. of Evid. 702* [Defs.' Reply] at 2-4.) The Court previously denied Plaintiffs' leave to amend the Complaint to assert a theory of liability premised on a non-compete agreement. (Document Nos. 280, 281, 297.) As a result, the Court agrees that any damages estimates premised on a non-compete agreement theory of liability, which was not pleaded, will not assist the trier of fact and, therefore, are not admissible. *Cf. In re Urethane, 166 F. Supp. 3d at 511 (D.N.J. 2016)* (declining to exclude damages for lack of fit because "the models here do not seek to measure damages stemming from an antirust impact that has been rejected or is otherwise no longer at issue."). However, the parties disagree as to what portions of Dr. Leffler's damages estimate, if any, are impacted by the Court's prior ruling denying leave to assert a non-compete theory of liability.

Dr. Leffler's initial report in this case described his opinions concerning the timeline of transition from the EMMC minimum pricing policy to a non-compete agreement.

> The EMMC's mandatory minimum pricing policies were in effect through August of 2005 when they were suspended by agreement of the members. Immediately **[*37]** after the suspension of the mandatory minimum pricing policy, the EMMC entered into a 'noncompete' period during which members agreed not to compete with another member's business.

(Leffler Rpt. ¶ 26 (footnote omitted).) Similarly, in the historic opt-out cases, Dr. Leffler opined that EMMC minimum pricing was suspended in 2005. At the *Daubert* hearing in the historic opt-out cases, Dr. Leffler testified that the *impact* of the "minimum pricing period" extended until June 2007, which was the end date of a sales contract one of the opt-out plaintiffs made in 2005, while EMMC minimum pricing was in effect. (Civ. A. 06-620, Document No. 664 at 57:9-58:3.) Dr. Leffler explained that the minimum pricing impact period was "longer than the period of the minimum pricing rules[,]" because of the two-year contract which began before EMMC's suspension of minimum pricing. (*Id.* at 58:4-11.) In that case, Dr. Leffler testified that the damages impact period beginning in July 2007 was "the non-compete impact period." (*Id.* at 58:18-59:4.) Judge O'Neill concluded that the possibility of this alleged non-compete agreement was a "sufficient rationale for [Dr. Leffler's] decision to include a conduct period **[*38]** after the official cessation of EMMC minimum pricing agreement." *In re Mushroom, 2015 U.S. Dist. LEXIS 119446, 2015 WL 5775600, at *7* (describing "the formal dissolution of the minimum pricing policy in [redacted text] 2005.").

Despite Dr. Leffler's statement in his initial report that EMMC minimum pricing was suspended in August 2005 and a non-compete period began immediately thereafter, Plaintiffs now argue that there is "a sufficient factual basis for the fact that the EMMC minimum pricing and policies were in effect from 2006 through 2009." (Pls.' Resp. in Opp'n to Defs.' Mot. to Exclude [Pls.' Resp.] at 15.) In opposition to the instant motion, Dr. Leffler states, "the facts...indicate continuing anticompetitive acts after July 2005. I understand Plaintiffs will offer evidence that the minimum price policy continued in effect after July 2005. I cited this evidence in my Rebuttal Report." (Leffler Decl. ¶ 7 (citing Leffler Rebut. Rpt. p. 8 n.23).) Plaintiffs rely on three pieces of evidence to support this new conclusion.

---

there were significant resignations from the EMMC beginning in 2002, "there is no evidence of market power beginning at least as early as 2006." (David Rpt. ¶ 67; *see id.* ¶¶ 66, 68.) Defendants also argue that Dr. Leffler's third conspiracy period should be excluded because it reflects Winn-Dixie's purchases after OMF and Monterey had resigned from the EMMC. (*See id.* ¶¶ 58-62.) Both of these additional arguments only implicate Dr. Leffler's assessment of damages after 2005. In light of the Court's decision in Section III.A.2 *infra* to exclude damages premised on anticompetitive conduct after August 2005, the Court need not address these additional arguments concerning reliability.

First, Plaintiffs present the declaration of Michael Cardile stating that when Cardile Mushrooms, Inc. was a member of EMMC, during the period January 2001 through 2009, "there was never a time when either the minimum pricing or **[*39]** the non-compete was not in place." (Pls.' Ex. 17 [Cardile Decl.] ¶¶ 2, 4; *accord* Leffler Rebut. Rpt. p. 8 n.23.) Relying on this statement, Plaintiffs argue that because Defendants have taken the position that the EMMC never adopted any non-compete agreement, minimum pricing must have continued through 2009. (Pls.' Resp. at 10 (citing Pls.' Opp'n Ex. 3; Document No. 268 at n.1).) Second, Plaintiffs point to a document stating that in October 2005 the EMMC discussed "a transition from non-compete to price management." (Pls.' Opp'n Ex. 4 at 1; *accord* Leffler Rebut. Rpt. p. 8 n.23.) Finally, Plaintiffs cite an EMMC Policies document "[l]ast revised on December 6, 2005" stating that a new section entitled "Non-compete" was "to be voted December 13, 2005[.]" (Pls.' Opp'n Ex. 5 at 4.) The non-compete section states that "[t]he non-compete policy is intended to be used as a temporary tool to create stability among members during periods of transition. For example, as a bridge to the time when 80% coop market share is achieved and minimum pricing implemented." (*Id.*) This document further describes the terms of the non-compete policy and states that the "[n]on-compete will not be in effect **[*40]** when minimum pricing is in place except for brief periods of time...during a transition to new pricing. . . ." (*Id.*; *accord* Leffler Rebut. Rpt. p. 8 n.23.) Plaintiffs therefore contend that the EMMC minimum pricing policy must have resumed after December 13, 2005 and was in place through the end of 2009, or at least through the start of the third conspiracy period in 2007. (Pls.' Resp. at 16.) As a result, Plaintiffs argue that the full scope of Dr. Leffler's damages estimate is premised on EMMC minimum pricing, rather than an alleged non-compete agreement, and therefore is relevant to this case. At the very least, Plaintiffs argue, the end date of EMMC minimum pricing "involves a factual dispute not suitable for resolution by a *Daubert* motion, and instead, goes to the weight of his opinion and regression model and not their admissibility." (Pls.' Resp. at 17.)

The Court is not persuaded by Plaintiffs' forage for evidence in support of this new argument. "It is an abuse of discretion to admit expert testimony which is based on assumptions lacking any factual foundation in the record." *Stecyk, 295 F.3d at 414 (3d Cir. 2002)*; *see* *Elcock, 233 F.3d at 756 n.13 (3d Cir. 2000)* (describing the foundation requirement as "found in the interstitial gaps among the federal **[*41]** rules[,]" but also noting that an expert opinion lacking factual foundation "misleads the fact-finder and arguably does not comply with the 'fit' requirement" of *Rule 702*). Before the Court denied Plaintiffs leave to amend the Complaint to allege the existence of a non-compete agreement, Dr. Leffler stated in his initial report that EMMC minimum pricing was suspended in August 2005 and a non-compete period began immediately thereafter. (Leffler Rpt. ¶ 26.) Dr. Leffler also took this position in the historic opt-out cases. (*See* Civ. A. 06-620, Document Nos. 664, 703.) Dr. David's report concludes the same. (David Rpt. ¶ 29.) Plaintiffs' attempt to obfuscate this fact in rebuttal—only after the Court denied Plaintiff leave to assert a non-compete theory—is unconvincing. Moreover, Plaintiffs do not present any factual foundation that EMMC minimum pricing resumed after it was suspended in August 2005. Thus, the Court concludes that any expert opinions premised on the argument that the EMMC minimum pricing policy extended beyond August 2005 are inadmissible because this opinion lacks any factual foundation in the record.

Because the Court has denied leave to amend the Complaint to assert a non-compete **[*42]** theory of liability, and EMMC minimum pricing was suspended in August 2005, any damages resulting from alleged anticompetitive conduct after August 2005 do not fit the facts of the case. Plaintiffs' third conspiracy period covers the duration of the three-year sales contract between OMS and Winn-Dixie beginning June 28, 2007 and ending in 2010. The fourth conspiracy period covers only a few months in late 2010. Dr. Leffler's third and fourth conspiracy periods each begin years after the suspension of EMMC minimum pricing in August 2005, and Plaintiffs do not contend that any overcharges in those periods were caused by anticompetitive conduct before August 2005. Therefore, Dr. Leffler's opinions on damages during the third and fourth conspiracy periods will not assist the trier of fact to understand the evidence or resolve a disputed issue and are not admissible pursuant to *Rule 702*.

As for the second conspiracy period—August 2005 through June 2007—Plaintiffs argue that even if this period extends after EMMC minimum pricing ended, those damages are still the result of EMMC minimum pricing before August 2005. Winn-Dixie's mushroom purchases during the second conspiracy period were made pursuant **[*43]** to a two-year contract between Winn-Dixie and OMS that was entered into in June 2005, which was before the end of EMMC minimum pricing. (Pls.' Resp. at 9, 15, 19.) Plaintiffs present the June 2005 contract between Winn-Dixie and OMS, which set the price of mushroom sales throughout the second conspiracy period. (*See* Pls.' Opp'n Ex. 6.)

Dr. Leffler also states that the prices in this contract were above EMMC minimum prices. (Leffler Rebut. Rpt. p. 8 n.23.) The Court agrees that the 2005 contract between Winn-Dixie and OMS is a sufficient factual basis for Dr. Leffler to conclude that his damages estimate during the second conspiracy period is attributable to EMMC minimum pricing. Any damages estimate for mushroom sales during the second conspiracy period could be helpful to the trier of fact and will not be excluded.

In his declaration presented in opposition to Defendants' motion, Dr. Leffler re-estimates the Winn-Dixie overcharges until only June 2007, the end of the second conspiracy period. (Leffler Decl. ¶ 7 n.12; *see id.* ¶ 5 n.8.) The Court will allow Plaintiff to rely on the revised damages estimate set forth in Dr. Leffler's declaration as though it were a timely supplemental **[*44]** disclosure pursuant to *Rule 26(e)(2)*.

B. Plaintiffs' Motion to Exclude the Proposed Testimony of Dr. David

Plaintiffs move to exclude the testimony of Defendants' rebuttal expert Dr. David, pursuant to *Rule 702*, on the grounds that his opinions are untested and based upon unreliable methodology and data, and, pursuant to *Rule 403*, on the grounds that the probative value of his testimony is substantially outweighed by its prejudicial effect. Following a *Daubert* hearing in the historic opt-out cases, Judge O'Neill considered and rejected many of these same arguments in a well-reasoned opinion permitting the proposed testimony of Dr. David. For many of the same reasons previously articulated by Judge O'Neill, the Court will deny the motion to exclude Dr. David's testimony.

1. Reliability of Dr. David's Rebuttal Expert Opinions and Methodology

Rule 26(a)(2)(D)(ii) permits expert testimony "solely to contradict or rebut evidence on the same subject matter identified by another party[.]" "It is the proper role of rebuttal experts to critique plaintiffs' expert's methodologies and point out potential flaws in the plaintiff's experts' reports." *Aviva Sports, Inc. v. Fingerhut Direct Mktg., Inc., 829 F. Supp. 2d 802, 835 (D. Minn. 2011)*. Dr. David is a rebuttal expert witness retained to analyze the findings of Plaintiffs' expert Dr. **[*45]** Leffler and to offer opinions regarding Plaintiffs' damages. (David Rpt. ¶ 2.) In support of the expert report he authored for this case, Dr. David reviewed materials including Defendants' transactional data, excel files of sales data, documents produced in this matter, deposition transcripts, Dr. Leffler's report and supporting materials, and publicly available data concerning many of the variables in Dr. Leffler's analysis. (*See* David Rpt. App'x 1.) Dr. David offers specific criticisms of Dr. Leffler's regression model and the facts upon which it relies (*see id.* ¶¶ 58-80), which the Court described in Section III.A, *supra*. Plaintiff seeks to exclude Dr. David's testimony, pursuant to *Rule 702*, because it is based on untested theories, unreliable data, and an unaccepted methodology.

a. Testing of Regression Model Criticism

Plaintiffs' primary argument to exclude Dr. David's testimony is that he did not test his opinions or conclusions. (Pls.' Mot. to Exclude or Limit the Opinions of Defs.' Expert [Pls.' Mot.] at 5-23.) Specifically, Plaintiffs argue Dr. David did not test his criticisms of Dr. Leffler's regression model related to an omitted control variable for farm closings, the Dole brand **[*46]** premium, negative supply variable coefficients, or the benchmark period, and therefore, Dr. David's opinions on these topics are unreliable.

Plaintiffs argue that an expert's testing of a theory is the first *Daubert* reliability factor, but *Daubert* explicitly declined to "set out a definitive checklist or test" to ascertain reliability and emphasized that the *Rule 702* inquiry is "a flexible one." *509 U.S. at 593-94*; *see* *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 150, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. Nevertheless, Plaintiffs essentially argue that Dr. David fails to satisfy *Rule 702*'s requirements that expert witnesses apply reliable principles and methods and that the testimony be helpful to the fact-finder. Plaintiffs rely on *Advanced Telemedia, L.L.C. v. Charter Communications, Inc., Civ. A. No. 05-2662, 2008 U.S. Dist. LEXIS 110021, 2008 WL 6808442, *1 (N.D. Ga. July 17, 2008)*, in which the court excluded a proposed rebuttal expert who had identified flaws in the plaintiff's expert's method, without reviewing the underlying data, performing any testing, or testifying that a different method would yield different results. The *Advanced Telemedia* court concluded that the rebuttal expert's testimony did not meet the *Daubert* standard because it was "too speculative and unreliable and it will not assist the jury in determining the amount of damages...." *Id.*; *see also* *B-K Cypress Log Homes Inc. v. Auto-Owners Ins. Co., Civ. A. No. 09-211, 2012 U.S. Dist. LEXIS 73773, 2012 WL 1933766, *6 (N.D. Fla. May 25, 2012)* ("a pure rebuttal opinion that does not offer any alternative methodology or analysis...would **[*47]** not aid the jury in determining the amount of damages").

Despite this opinion, "[a] number of other district courts have held that rebuttal expert witnesses may criticize other experts' theories and calculations without offering alternatives." *Aviva Sports, 829 F. Supp. 2d at 834-35 (D. Minn. 2011)* (collecting cases). Indeed, "[i]f two contradictory expert opinions meet the requisite threshold of reliability," it is the function of the factfinder to assess the credibility of those contradictory experts, but "defendants' experts have a less demanding task, since they have no burden to produce models or methods of their own; they need only attack those of plaintiffs' experts." *In re Zyprexa Prods. Liab. Litig., 489 F. Supp. 2d 230, 285 (E.D.N.Y. 2007)* (Weinstein, J.). In order to demonstrate reliability to meet the requirements of *Rule 702*, a rebuttal expert, like any expert witness, need only show "good grounds" for the proposed testimony. *United States v. Velasquez, 64 F.3d 844, 851, 33 V.I. 265 (3d Cir. 1995)*; *see* *Paoli II, 35 F.3d at 744 (3d Cir. 1994)* ("an expert opinion [is] reliable under *Rule 702* if it is based on 'good grounds,' *i.e.*, if it is based on the methods and procedures of science"). In *Velasquez*, the Third Circuit found reversible error in a trial court's decision to exclude rebuttal expert testimony and noted that such testimony was "highly relevant" and would assist the jury "to properly weigh the testimony" of the **[*48]** initial expert. *Id. at 848, 852*. Judge O'Neill adopted this same perspective when admitting Dr. David's opinion in the historic opt-out cases. He concluded that "Dr. David's testimony will aid the fact finder in evaluating the proper weight to be afforded to Dr. Leffler's testimony as it is relevant to the question of whether Dr. Leffler's regression models...are flawed." (Civ. A. 06-620, Document No. 740 at 8.) The Court agrees with this sound reasoning.

Here, Dr. David's proposed testimony will assist the finder of fact in properly weighing Dr. Leffler's testimony. Dr. David did not need to perform his own damages computation or develop his own regression model to meet the standards of reliability as a rebuttal witness. Instead, he needed only to reliably apply reliable scientific methods in assessing and critiquing Dr. Leffler's regression model. Dr. David reviewed the underlying facts and data on which Dr. Leffler relied to reach his opinions. (*See* David Rpt. ¶¶ 35-39, 54-57, App'x 1.) In fact, Dr. Leffler agreed with Dr. David's criticisms concerning transactions that were double counted in the data and revised his report accordingly. (Leffler Rebut. Rpt. ¶ 13 n.18.) Moreover, Dr. David cites **[*49]** to econometric source materials for his opinions on principles such as over-fitting, negative coefficient correlation, and omitted control variable bias.[7] Dr. David's background also favors finding these opinions reliable, since an expert's "level of expertise may affect the reliability of the expert's opinion." *Elcock, 233 F.3d 734, 749 (3d Cir. 2000)* (quoting *Paoli II, 35 F.3d at 741*). Dr. David holds a Ph.D. in economics from Stanford University, and he has performed economic analysis for litigation and public policy matters for a total of approximately 24 years with the National Economics Research Associates, Inc., Criterion Economics, LLC, and Edgeworth Economics, LLC, where he is the current President. (David Rpt. ¶¶ 4-5, App'x 2.) Throughout his career, Dr. David has specialized in applied microeconomics and econometrics, and he has provided expert testimony on more than 60 occasions. (*Id.* ¶ 5.) Thus, the Court concludes that Dr. David's criticisms of Dr. Leffler's regression model are reliable.

Plaintiffs make two additional unavailing arguments to exclude Dr. David's opinions on supposedly omitted variables in Dr. Leffler's regression model. First, Plaintiffs **[*50]** argue that Dr. David's criticism concerning farm closures does not fit the facts of the case because overall mushroom production in Pennsylvania increased after the farm closures Dr. David identifies. (Pls.' Mot. at 9.) This argument regarding mushroom production does not make irrelevant or unreliable Dr. David's opinion that farm closures were a necessary control variable. The Court agrees with Judge O'Neill's prior ruling that Defendants sufficiently proved that Dr. David's opinions regarding farm closures

---

[7] (*See* David Rpt. ¶ 73 n.150 (citing Frank E. Harrell, *Regression Modeling Strategies* (2013)); ¶ 75 n.152 (citing J. Johnston, *Econometric Models* (3d ed. 1984)); ¶ 76 n.153 (quoting Peter Kennedy, *A Guide to Econometrics* (5th ed. 2005)); ¶¶ 74 n.151, 78 (citing ABA Section of ***Antitrust Law***, *supra*, § 5.B.1.b.2).)

were based on good grounds, and thus are admissible. Next, Plaintiffs argue that Dr. David's opinion concerning the Dole brand premium should be excluded because he incorrectly asserts that all Winn-Dixie purchases from OMS were Dole brand mushrooms. (Pls.' Mot. at 22-23.) As explained in Section III.A.1.a.ii, *supra*, this is a disputed question of fact that should appropriately be resolved by the factfinder. Thus, the Court will not exclude Dr. David's opinions on these topics under *Rule 702*.

b. Unreliable Data for Declining Market Share

In addition to arguing that Dr. David failed to test his opinions, Plaintiffs also seek to exclude Dr. David's testimony regarding market share because **[*51]** it is based on unreliable data. (Pls.' Mot. at 26-28.) *Rule 702* requires expert testimony to be "based on sufficient facts or data." *Fed. R. Evid. 702(b)*; *see* *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 294 (3d Cir. 2012)* (reasonableness of an expert's reliance on facts or data to form an opinion is an appropriate inquiry under *Rule 702*). In addition, though Plaintiffs do not cite to *Rule 703*, it dictates that an expert's opinion may rely on hearsay facts or data if they are "of a type reasonably relied upon by experts in the particular field in forming opinions or inferences upon the subject...." *Fed. R. Evid. 703*. This standard is equivalent to the reliability standard of *Rule 702*, meaning "there must be good grounds on which to find the data reliable." *Paoli II, 35 F.3d at 748 (3d Cir. 1994)*.

Dr. David opines that the market share of EMMC members was declining such that by 2006 the EMMC did not have sufficient market share to undertake monopolistic activity. (David Rpt. ¶ 67; *see* ¶¶ 66, 68.) Plaintiffs argue that this assessment of declining EMMC market share is based on unreliable data from two sources—EMMC dues assessment data and sales data that lacks a citation. (Pls.' Mot. at 26-27.) Plaintiffs argue that these data sources differ substantially from one another and are contradicted by deposition testimony and other documents from the EMMC, and **[*52]** therefore, Dr. David's opinions based on this data are unreliable. First, the Court notes that in light of its ruling to exclude Dr. Leffler's third conspiracy period, it is unlikely that Dr. David's opinion concerning declining market share remains relevant to the case. *See supra* n.6. But even if declining EMMC market share does remain relevant to Dr. David's opinions, Dr. David's data sources related to EMMC membership and Defendants' Agaricus mushroom sales were produced in this litigation or the related class action. (*See* David Rpt. App'x 1.) These sources therefore present reliable grounds for the basis of Dr. David's opinions. As for the discrepancies Plaintiffs point out in these data sources, "[v]igorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence." *Karlo v. Pittsburgh Glass Works, LLC, 849 F.3d 61, 83 (3d Cir. 2017)* (quoting *Daubert, 509 U.S. at 596*). Plaintiffs' arguments go to the weight of Dr. David's testimony on this issue, not its admissibility.

c. Price Trends Methodology

Plaintiffs also argue that Dr. David's opinions on mushroom price trends are based solely on "visual inspection" of a trend in a price graph, which is **[*53]** not a sound scientific principle, and therefore must be excluded. (Pls.' Mot. at 30-36.) Specifically, Plaintiffs argue that price trends cannot provide an economic explanation as to causation, since an economist must use an analysis that controls for supply and demand factors. (Pls.' Mot. at 32.) Plaintiffs state that Dr. David relies on his presentation of declining prices to argue that Dr. Leffler's model is flawed. (Pls.' Mot. at 31 (quoting David Rpt. ¶ 30).) This argument misstates Dr. David's opinion. Dr. David uses his analysis of price trends to criticize Dr. Leffler's claim that the pattern of rising average prices of fresh Agaricus mushrooms verified the impact of the EMMC minimum pricing policy. (David Rpt. ¶ 69 (citing Leffler Rpt. ¶ 50).) In fact, Dr. David's report makes an analogous critique to Plaintiffs' argument. Dr. David states that Dr. Leffler's assertion that a correlation existed between market-wide price increases and EMMC minimum pricing could not explain causation. (*Id.* ¶ 70.) Thus, both sides agree that a visual inspection of price trends is not a reliable scientific method to prove causation.

However, neither expert relies exclusively on visual inspections **[*54]** of price trends to offer opinions on causation or overcharge damages. In order to offer opinions on causation and damages, Dr. Leffler relies on testimony and documents regarding the EMMC's anticompetitive conduct and empirical analysis of damages using his multiple regression model. (*See* Leffler Rpt. ¶¶ 50-56.) Dr. David's critique of those opinions relies on an analysis of the econometric principles underlying the regression model. (*See* David Rpt. ¶¶ 73-80.) Therefore, Dr. David's opinions on overcharge damages are not premised on price trends, so the Court will not exclude his opinions as unreliable.

2. Rule 403

Finally, Plaintiffs seek to exclude Dr. David's testimony pursuant to *Federal Rule of Evidence 403*. Pursuant to *Rule 403*, the Court may exclude relevant evidence if its probative value is substantially outweighed by unfair prejudice or confusion of the issues. *Fed. R. Evid. 403*. Because expert evidence can be more misleading than other evidence, *Rule 403* gives a judge more power over experts than over lay witnesses. *Paoli II, 35 F.3d at 747* (citing *Daubert, 509 U.S. at 595*). Nevertheless, "exclusion under *Rule 403* should be rare[,]" and "in order for a district court to exclude scientific evidence, there must be something *particularly* confusing about the scientific evidence at issue—something other **[*55]** than the general complexity of scientific evidence." *Id. at 747, 747 n.16*. Plaintiffs argue that because Dr. David's opinions were never tested, and thus are speculative and unreliable, their inclusion at trial would mislead the jury and prejudice Plaintiffs. (Pls.' Mot. at 36.) The Court has already concluded that Dr. David's testimony is not unreliable, and Plaintiffs have not pointed to any aspect of Dr. David's testimony that is so particularly confusing or misleading as to substantially outweigh its probative value. At this pretrial stage, the Court will not exclude the proposed testimony pursuant to *Rule 403*.

IV. CONCLUSION

For the foregoing reasons, Defendants' Motion to Preclude Plaintiffs' Proposed Expert Testimony at Trial is granted in part and denied in part. Plaintiffs' Motion to Exclude or Limit the Opinions of Defendants' Expert is denied. An Order consistent with this Memorandum will be docketed separately.

ORDER

AND NOW, this **9th** day of **June**, **2021**, after consideration of Defendants' Motion to Preclude Plaintiffs' Proposed Expert Testimony at Trial, and the responses and replies thereto, and Plaintiffs' Motion to Exclude or Limit the Opinions of Defendants' Expert, and the responses and replies thereto, **[*56]** and for the reasons outlined in this Court's Memorandum dated June 9, 2021, it is **ORDERED** that:

1. Defendants' Motion to Preclude Plaintiffs' Proposed Expert Testimony at Trial (Document No. 300) is **GRANTED in part** and **DENIED in part**. Plaintiffs' expert Dr. Leffler is not permitted to offer opinion testimony of damages incurred during conspiracy periods three and four.

2. Plaintiffs' Motion to Exclude or Limit the Opinions of Defendants' Expert (Document No. 301) is **DENIED**.

BY THE COURT:

/s/ Berle M. Schiller

LexisNexis® Headnotes

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

HN1[] **Standards of Review, Substantial Evidence**

Factual findings of the Commission are binding if they are supported by such relevant evidence as a reasonable mind might accept as adequate to support a conclusion. The Commission's legal conclusions are for the courts to resolve, although even in considering such issues the courts are to give some deference to the Commission's informed judgment that a particular commercial practice is to be condemned as unfair.

Antitrust & Trade Law > Sherman Act > Defenses

HN2[] Sherman Act, Defenses

To be sure, in Actavis the Supreme Court detailed how certain commonplace forms of settlement agreements did not, by the nature of their existence alone, create antitrust liability. However, the Court went on to say that the possibility that agreements may not always bring about anticompetitive consequences does not justify dismissing the FTC's complaint. An antitrust defendant may show in the antitrust proceeding that legitimate justifications are present.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN3[] Per Se Rule Tests, Manifestly Anticompetitive Effects

The mere fact that an agreement implicates intellectual property rights does not immunize an agreement from antitrust attack. Intellectual property rights do not confer a privilege to violate the antitrust laws. As in any antitrust case, the court must determine whether the restraints in the agreements are reasonable in light of their actual effects on the market and their pro-competitive justifications.

Antitrust & Trade Law > Sherman Act > Claims

HN4[] Sherman Act, Claims

To prove a Sherman Act violation — and by extension, a violation of § 5 of the — the FTC must establish (1) a contract, combination, or conspiracy exists that (2) unreasonably restrains trade.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN5[] Per Se Rule Tests, Manifestly Anticompetitive Effects

The court presumptively applies what is known as the rule of reason analysis to the Challenged Agreements to determine whether they restrain trade. Under that analysis an antitrust plaintiff must demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive before it will be found unlawful. As Justice Brandeis famously articulated: The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN6[] Per Se Rule Tests, Manifestly Anticompetitive Effects

A plaintiff bears the initial burden of showing that the challenged action has had an actual adverse effect on competition as a whole in the relevant market. After a prima facie case of anticompetitive conduct has been established, the burden shifts to the defendant to proffer procompetitive justifications for the agreement. Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN7[] Per Se Rule & Rule of Reason, Per Se Violations

In some cases, however, certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. Such agreements are deemed per se illegal. This designation is saved for certain types of restraints, e.g., geographic division of markets or horizontal price fixing, that have been established over time to lack any redeeming virtue.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] Per Se Rule Tests, Manifestly Anticompetitive Effects

The Supreme Court, however, has rejected fixed categories of analysis when considering the anticompetitive nature of a restraint. Some restraints, therefore, fall between the type of conduct typically labeled per se anticompetitive and that which is analyzed under a full-blown rule of reason analysis. When the great likelihood of anticompetitive effects can easily be ascertained, courts apply an abbreviated rule of reason analysis sometimes known as the quick-look approach. The Commission calls the standard it applies in these situations the "inherently suspect" framework.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN9[] Per Se Rule Tests, Manifestly Anticompetitive Effects

Under the Commission's inherently suspect framework, neither direct evidence of harm nor proof of market power is needed to show the anticompetitive effect of the restraint because the likely tendency to suppress competition posed by the challenged conduct makes it inherently suspect. An elaborate market analysis is unnecessary, and once the government has identified a suspect agreement, the burden shifts directly to the defendant to show any procompetitive justifications it might have for the restraint. This approach is only permissible when an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets. Further, if an arrangement might plausibly be thought to have a net procompetitive effect, or possibly no effect at all on competition,' more than a "quick look" is required.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] **Per Se Rule & Rule of Reason, Sherman Act**

But even if restraints on truthful advertising have a tendency to raise prices, the fact that a practice may have a tangential relationship to the price of the commodity in question does not mean that a court should dispense with a full rule-of-reason analysis.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Evidence > Inferences & Presumptions > Presumptions > Creation

HN11[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Trademarks are by their nature non-exclusionary. Agreements to protect trademarks, then, should not immediately be assumed to be anticompetitive — in fact, Clorox tells the court instead to presume they are procompetitive.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Public Contracts Law > Dispute Resolution > Bid Protests

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Public Contracts Law > Bids & Formation > Competitive Proposals

HN12[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

An absolute ban on competitive bidding, or bid rigging, would be anticompetitive on its face and may justify an abbreviated rule of reason analysis.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN13[] Per Se Rule Tests, Manifestly Anticompetitive Effects

Under the rule of reason, the Commission bears the burden of establishing a prima facie case of anticompetitive effect. Direct evidence of anticompetitive effects establishes a prima facie case of a *Sherman Act § 1* violation and obviates the need for a detailed market analysis or showing of market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN14[] Attempts to Monopolize, Elements

Anticompetitive effects in a relevant market may be shown through direct evidence of output reductions, increased prices, or reduced quality in the relevant market. The Commission has also defined sufficient evidence of anticompetitive harm to include evidence of retarded innovation, or other manifestations of harm to consumer welfare. When an antitrust plaintiff advances an antitrust claim based on direct evidence in the form of increased prices, the question is whether it can show an actual anticompetitive change in prices after the restraint was implemented.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Evidence > Types of Evidence > Circumstantial Evidence

HN15[] Actual Monopolization, Anticompetitive & Predatory Practices

Empirical evidence is required under our caselaw to find direct evidence of an anticompetitive effect. But showing that a price for certain keywords dropped is not direct evidence of the effect on the market as a whole.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

HN16[] Infringement Actions, Determinations

Trademarks are by their nature non-exclusionary, and agreements to protect trademark interests are common, and favored, under the law. As a result, it is difficult to show that an unfavorable trademark agreement creates antitrust concerns. This is true even though trademark agreements inherently prevent competitors from competing as effectively as they otherwise might.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN17[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Where the petitioner has carried its burden of identifying a procompetitive justification, the government must show that a less restrictive alternative exists that achieves the same legitimate competitive benefits. That is, the restraint only survives a rule of reason analysis if it is reasonably necessary to achieve the legitimate objectives proffered by the defendant. Less restrictive alternatives are those that would be less prejudicial to competition as a whole.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

HN18[] **Infringement Actions, Determinations**

In Clorox the court noted that it is usually unwise for courts to second-guess trademark agreements between competitors. In this context, what is "reasonably necessary," is likely to be determined by competitors during settlement negotiations, And, absent something that would negate the typically procompetitive nature of these agreements, the parties' determination of the scope of needed trademark protections is entitled to substantial weight.

Evidence > Weight & Sufficiency

HN19[] **Evidence, Weight & Sufficiency**

At the end of the day, the court's job is to weigh the competing evidence to determine if the effects of the challenged restraint tend to promote or destroy competition.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN20[] **Standing, Requirements**

When the restraint at issue in an antitrust action implicates intellectual property (IP) rights, Actavis directs the court to consider the policy goals of the relevant IP law.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

HN21[] **Infringement Actions, Determinations**

While trademark agreements limit competitors from competing as effectively as they otherwise might, the court owes significant deference to arm's length use agreements negotiated by parties to those agreements. Doing so may give rise to collateral harm in a relevant market. But forcing companies to be less aggressive in enforcing their trademarks is antithetical to the procompetitive goals of trademark policy.

Opinion

[*109] PER CURIAM:

Between 2004 and 2013, Petitioner 1-800 Contacts, Inc. ("1-800") entered into thirteen trademark settlement agreements and one sourcing and services agreement with competitors (the "Challenged Agreements"). As explained below, the Challenged **[**3]** Agreements contained provisions restricting specific terms on which the parties could "bid" when participating in auctions held by companies that operate search engines. By restricting bidding on terms in these auctions, the competitors agreed not to advertise their products when consumers used the search engines' platforms to search the specific terms at issue. In August 2016, the Federal Trade Commission ("FTC" or the "Commission") issued an administrative complaint against Petitioner, alleging that the Challenged Agreements and Petitioner's enforcement of the agreements unreasonably restrain truthful, non-misleading advertising as well as price competition in search advertising auctions in violation of *Section 5 of the FTC Act, 15 U.S.C. § 45*. The claim was tried before an Administrative Law Judge (ALJ), who in 2017 issued an Initial Decision and Order finding that the agreements violate *Section 5*. Petitioner then appealed to the full Commission, which affirmed the ALJ's conclusion in a three to one decision, with one Commissioner not participating. This timely petition for review followed the issuance of the Commission's Final Order.

Although we hold that trademark settlement agreements are not automatically immune from antitrust **[**4]** scrutiny, the Commission's analysis of the alleged restraints under the "inherently suspect" framework was improper. We further hold that the Commission incorrectly concluded that the agreements are an unfair method of competition under the FTC Act. We therefore GRANT the petition for review, VACATE the Final Order of the Commission, and REMAND the case to the Commission with orders to DISMISS the administrative complaint.

[*110] BACKGROUND

Contact lenses, prescription eyewear designed to improve the user's vision, can be sold only pursuant to a prescription. Such prescriptions specify both the characteristics of the lens, such as its strength, and the manufacturer brand. Thus, when consumers purchase contact lenses, they may not substitute one brand for another, but must purchase the brand listed on the prescription. Contact lenses are sold by four different types of retailers: independent eye care professionals; optical retail chains; mass merchants and club stores; and purely

---

[*] Judge Peter W. Hall, originally a member of the panel, died on March 11, 2021. The two remaining members of the panel, who are in agreement, have determined the matter. See *28 U.S.C. § 46(d)*; 2d Cir. IOP E(b); *United States v. Desimone, 140 F.3d 457, 458-59 (2d Cir. 1998)*.

internet-based retailers, such as Petitioner. Internet-based retailers accounted for 17 percent of all contact lens sales in 2015, the year before these proceedings began. 1-800 accounts for a majority of all online **[**5]** sales of contact lenses. The price of contact lenses varies significantly based on retail channel; independent eye care professionals typically charge the most, followed by retail chains, mass merchants, and then online retailers. Petitioner, however, admits that it charges more than its rival online retailers. It prices its lenses somewhere below independent professionals and retail chains but above mass merchants and other club stores.

Petitioner and its competitors pay to advertise their sales of contact lenses on the internet. One way they do this is via "search advertising." When an online shopper uses a search engine such as Google or Bing, the search engine's program returns two types of results to the shopper: "sponsored" and "organic," both of which provide links to web pages. Sponsored results are ads; they appear because the owner of the featured web page has paid for its page to appear in that space. Sponsored links are typically designated by a label like "Ad" or "Sponsored," and by colored or shaded boxes around the link. Organic results, on the other hand, appear based exclusively on which results a search engine's algorithm deems to be most relevant to the shopper's **[**6]** search. Organic results are listed separately from the sponsored results.

Search engines determine which advertisements to display on a search results page based in part on the relevance or relation of the consumer's search to various words or phrases called "keywords." Advertisers bid on these keywords during auctions hosted by the search engines. The highest bidders' ads are typically displayed most prominently on a page, though search engines consider other factors when determining where to place an ad on a results page, such as an ad's quality and relevance to a consumer's search. Search engines generally do not limit the keywords available to advertisers at auction. As a result, competitors often bid on each other's brand names so that their ad runs when a consumer searches for a competitor. Brand name terms are often trademarked.

Via bidding on "negative keywords," an advertiser may also prevent its ad from being displayed when a consumer searches for a particular keyword. These negative keywords preclude ads from being displayed even when the search engine independently determined that the ad would be relevant to the consumer. The Commission suggests that this is useful when, **[**7]** for example, a retailer selling eyeglasses has bid on the advertising keyword "glasses" but wants to prevent its ad from appearing in response to the term "wine glasses."

Many online retailers of contact lenses devote the majority of their advertising budgets to search advertising. The Commission found that these ads are presented to consumers "at a time when [they are] more likely looking to buy." JA 279. Unlike its online retail competitors, Petitioner also **[*111]** uses other methods of advertising, including printed materials, radio, and television. Online search advertising, however, still represents a large portion of Petitioner's advertising budget. Because Petitioner charges more than other online retailers, when its competitors' ads appear in response to a search for 1-800's trademark terms, Petitioner's sales tend to decrease.

In 2002, Petitioner began filing complaints and sending cease-and-desist letters to its competitors alleging trademark infringement related to its competitors' online advertisements.[1] Between 2004 and 2013, Petitioner entered into thirteen settlement agreements to resolve most of these disputes. Each of these agreements includes language that prohibits the parties **[**8]** from using each other's trademarks, URLs, and variations of trademarks as search advertising keywords. The agreements also require the parties to employ negative keywords so that a search including one party's trademarks will not trigger a display of the other party's ads. The agreements do not prohibit parties from bidding on generic keywords such as "contacts" or "contact lenses."[2] Petitioner enforced the agreements when it perceived them to be breached.

---

[1] Some of these trademark infringement allegations did not involve search advertising.

[2] Advertisers may designate how closely the keyword they bid on must match the consumer's search in order for their ads to be displayed. For example, Google, the leading search engine in the United States, offers different options for advertisers on its paid search platform. An advertiser may designate the keyword on which they have bid as "broad match," "phrase match," "exact match," or, as mentioned, "negative match." An ad tied to a keyword designated as "broad match" may appear when a consumer's search on Google contains the specific keyword, any plural forms or synonyms of the keyword, or phrases similar to the keyword. An advertiser selecting "phrase match" will have its ad appear when a search contains additional words along with

Apart from the settlement agreements, in 2013 Petitioner entered into a "sourcing and services agreement" with Luxottica, a company that sells and distributes contacts through its affiliates. JA 283. That agreement also contains reciprocal online search advertising restrictions prohibiting the use of trademark keywords and requiring both parties to employ negative keywords.

The FTC issued an administrative complaint against Petitioner in August 2016 alleging that the thirteen settlement agreements and the Luxottica agreement (the "Challenged Agreements"), along with subsequent actions to enforce them, unreasonably restrain truthful, non-misleading advertising as well as price competition in search advertising auctions, all of which **[**9]** constitute a violation of *Section 5 of the FTC Act, 15 U.S.C. § 45*.[3] The complaint alleges that the Challenged Agreements prevented Petitioner's competitors from disseminating ads that would have informed consumers that the same contact lenses were available at a cheaper price from other online retailers, thereby reducing competition and making it more difficult for consumers to compare online retail prices. The case was tried before an ALJ, who concluded that a violation had occurred.

[*112] As an initial matter, the ALJ rejected Petitioner's assertion that trademark settlement agreements are not subject to antitrust scrutiny in light of *FTC v. Actavis, 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. Applying the "rule of reason" and principles of *Section 1 of the Sherman Act, 15 U.S.C. § 1*, the ALJ determined that "[o]nline sales of contact lenses constitute a relevant product market." JA 120. He found that the agreements constituted a "contract, combination, or conspiracy" as required by the Sherman Act and held that the advertising restrictions in the agreements harmed consumers by reducing the availability of information, in turn making it costlier for consumers to find and compare contact lens prices. JA 184, 221-22.

Having found actual anticompetitive effects, as required under the rule of reason analysis, the ALJ rejected the **[**10]** procompetitive justifications for the agreements offered by Petitioner. He found that while trademark protection is procompetitive, it did not justify the advertising restrictions in the agreements and also that Petitioner failed to show that reduced litigation costs would benefit consumers. The ALJ issued an order that barred Petitioner from entering into an agreement with any marketer or seller of contact lenses to limit participation in search advertising auctions or to prohibit or limit search advertising.

1-800 appealed the ALJ's order to the Commission. In a split decision, a majority of the Commission agreed with the ALJ that the agreements violated *Section 5 of the FTC Act*. The majority, however, analyzed the settlement agreements differently from the ALJ. The majority classified the agreements as "inherently suspect" and alternatively found "direct evidence" of anticompetitive effects on consumers and search engines. The majority then analyzed the procompetitive justifications Petitioner offered for the agreements and rejected arguments that the benefits of protecting trademarks and reducing litigation costs outweighed any potential harm to consumers. Finally, the majority identified what it believed **[**11]** to be less anticompetitive alternatives to the advertising restrictions in the agreements. One Commissioner dissented, reasoning both that the majority should not have applied the "inherently suspect" framework and that it failed to give appropriate consideration to Petitioner's proffered procompetitive justifications. This timely appeal followed.

JURISDICTION AND STANDARD OF REVIEW

We have jurisdiction over this appeal under *15 U.S.C. § 45(c)*. The majority opinion of the Commission "adopt[ed] the ALJ's findings of fact to the extent that they [were] not inconsistent" with its opinion. JA 285. ***HN1***[] Factual findings of the Commission are binding "if they are supported by such relevant evidence as a reasonable mind might accept as adequate to support a conclusion." *FTC v. Ind. Fed'n of Dentists (IFD), 476 U.S. 447, 454, 106 S.*

---

the keyword. An "exact match" limits the ad's appearance to when the consumer searches the exact keyword. "Negative keywords" can also be designated by an advertiser for broad, phrase, or exact match. The Challenged Agreements do not specify whether the negative keywords must be employed using broad, phrase, or exact match.

[3] *Section 5 of the FTC Act* states that "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce, are hereby declared unlawful." *15 U.S.C. § 45(a)(1)*.

Ct. 2009, 90 L. Ed. 2d 445 (1986) (internal quotation marks and citation omitted). The Commission's legal conclusions are "for the courts to resolve, although even in considering such issues the courts are to give some deference to the Commission's informed judgment that a particular commercial practice is to be condemned as 'unfair.'" *Id.*

DISCUSSION

I. *Actavis* Considerations

Petitioner argues, as it did below, that trademark litigation settlements are generally immune from antitrust **[**12]** review. It contends that in *Actavis*, the Supreme **[*113]** Court "cabin[ed] its extension of antitrust scrutiny" to the "unusual" intellectual property settlements at issue there and did not intend to implicate "commonplace" settlements. Petitioner's Br. 43. Neither the ALJ nor any participating member of the Commission found this argument persuasive.[4] Nor do we.

In *Actavis*, the Supreme Court analyzed what are known as "reverse payment" patent settlements. *570 U.S. at 141*. In short, manufacturers of brand name drugs paid manufacturers of generic drugs to keep the generic manufacturers from litigating the validity of the brand name manufacturers' patents. *See id. at 145*. This effectively allowed the brand name manufacturers to maintain exclusive sales of certain drugs for longer than they would have if the applicable patent, through litigation, was found to be invalid. *Id. at 153-54*. In *Actavis*, the Court rejected the idea that the conduct at issue was immune from antitrust scrutiny just because it occurred within the context of a patent litigation settlement. *Id. at 146-48*. The Court explained that "it would be incongruous to determine antitrust legality by measuring the settlement's anticompetitive effects solely against patent law policy, **[**13]** rather than by measuring them against procompetitive antitrust policies as well." *Id. at 148*.

Petitioner argues that *Actavis* represents an exception to the general rule against subjecting intellectual property (IP) settlement agreements to antitrust scrutiny because patents, unlike trademarks, for example, are inherently exclusionary and because the reverse payment scheme at issue in *Actavis* was "unusual." Petitioner's Br. 43 (citing *Actavis, 570 U.S. at 147*). ***HN2***[] To be sure, in *Actavis* the Court detailed how certain commonplace forms of settlement agreements did not, by the nature of their existence alone, create antitrust *liability*. *570 U.S. at 151-52*. Contrary to Petitioner's claim, however, the Court went on to say that the possibility that agreements may not always bring about anticompetitive consequences "does not justify dismissing the FTC's complaint. An antitrust defendant may show in the antitrust proceeding that legitimate justifications are present[.]" *Actavis, 570 U.S. at 156*.

As in *Actavis*, Petitioner's trademark, "if valid and infringed, might have permitted it to" preclude competitors from bidding on its trademarked terms in search advertising auctions or running advertisements on those terms. *Id. at 147*. We "take this fact as evidence that the agreement's **[**14]** anticompetitive effects fall within the scope of" the trademark protections. *Id.* (internal quotation marks omitted). ***HN3***[] But the mere fact that an agreement implicates intellectual property rights does not "immunize [an] agreement from antitrust attack." *Id.*; *see also In re Indep. Serv. Orgs. Antitrust Litig., 203 F.3d 1322, 1325 (Fed. Cir. 2000)* ("Intellectual property rights do not confer a privilege to violate the antitrust laws."); *United States v. Microsoft Corp., 253 F.3d 34, 63, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (same). We have not shied away from considering antitrust claims that implicate trademark rights in the past, *see, e.g., Clorox Co. v. Sterling Winthrop, Inc., 117 F.3d 50, 55-56 (2d Cir. 1997)*, and we decline to do so now. As in any antitrust case, we must "determine whether the restraints in the agreement[s] are reasonable in light of their actual effects on the market **[*114]** and their pro-competitive justifications." *Id. at 56*.

[4] All four participating Commissioners agreed that *Actavis* does not immunize trademark settlement agreements from antitrust scrutiny. Commissioner Wilson did not participate in the appeal to the Commission.

II. Sherman Act Framework

Because "[t]he FTC Act's prohibition of unfair competition and deceptive acts or practices . . . overlaps the scope of *§ 1 of the Sherman Act* . . . aimed at prohibiting restraint of trade," *California Dental Ass'n v. FTC (Cal. Dental), 526 U.S. 756, 762 n. 3, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*, it was appropriate that the ALJ and the Commission consulted Sherman Act jurisprudence to determine whether the Challenged Agreements violated *Section 5 of the FTC Act*. *See* *Realcomp II, Ltd. v. FTC, 635 F.3d 815, 824 (6th Cir. 2011)*; *North Carolina Bd. of Dental Examiners v. FTC, 717 F.3d 359, 370-71 (4th Cir. 2013)* (recognizing a *Section 1* violation as a "species" of unfair competition prohibited under the FTC Act).

HN4[] To prove a Sherman Act violation — and by extension, a *Section 5* **[**15]** violation — the FTC must establish (1) a contract, combination, or conspiracy exists that (2) unreasonably restrains trade. *See* *Major League Baseball Props., Inc. v. Salvino, Inc. (MLB), 542 F.3d 290, 315-16 (2d Cir. 2008)*. In this case, the Challenged Agreements are undeniably contracts between Petitioner and its competitors. ***HN5***[] We "presumptively appl[y]" what is known as the "rule of reason" analysis to the Challenged Agreements to determine whether they restrain trade. *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. Under that analysis an antitrust plaintiff "must demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive before it will be found unlawful." *Id.* As Justice Brandeis famously articulated:

> The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918). ***HN6***[] A plaintiff bears the initial burden of showing that the challenged action has had an actual adverse effect on competition as a whole in the relevant market. *North Am. Soccer League, LLC v. U.S. Soccer Fed'n, Inc., 883 F.3d 32, 42 (2d Cir. 2018)*. After a prima facie case of anticompetitive conduct has been established, the burden shifts to the defendant to proffer procompetitive justifications for the agreement. *Id.* "Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means." *Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 386 F.3d 485, 507 (2d Cir. 2004)*.

HN7[] In some cases, however, "certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the **[**16]** precise harm they have **[*115]** caused or the business excuse for their use." *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. Such agreements are deemed *per se* illegal. *See* *MLB, 542 F.3d at 315*. This designation is saved for certain types of restraints, e.g., geographic division of markets or horizontal price fixing, that have been established over time to "lack . . . any redeeming virtue." *Id.*

HN8[] The Supreme Court, however, has rejected fixed categories of analysis when considering the anticompetitive nature of a restraint. *See* *Cal. Dental, 526 U.S. at 779*. Some restraints, therefore, fall between the type of conduct typically labeled *per se* anticompetitive and that which is analyzed under a "full-blown" rule of reason analysis. *MLB, 542 F.3d at 317*. When "the great likelihood of anticompetitive effects can easily be ascertained[,]" courts apply an abbreviated rule of reason analysis sometimes known as the "quick-look" approach.

Cal. Dental, 526 U.S. at 770. The Commission calls the standard it applies in these situations the "inherently suspect" framework.[5] JA 291.

HN9[] Under the Commission's "inherently suspect" framework, neither direct evidence of harm nor proof of market power is needed to show the anticompetitive effect of the restraint because the "likely tendency to suppress competition" posed by the challenged conduct makes it "inherently **[**17]** suspect." *In re Polygram Holding, 136 F.T.C. 310, 344-45 (2003)*, *aff'd*, *416 F.3d 29, 367 U.S. App. D.C. 367 (D.C. Cir. 2005)*. An "elaborate market analysis" is unnecessary, *Polygram, 416 F.3d at 35*, and once the government has identified a "suspect" agreement, the burden shifts directly to the defendant to show any procompetitive justifications it might have for the restraint. *See United States v. Apple, 791 F.3d 290, 330 (2d Cir. 2015)*.

This approach is only permissible when "an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets." *Cal. Dental, 526 U.S. at 770*; *see also* *Dagher, 547 U.S. at 7 n.3* (rejecting a quick-look analysis because it applies only "to business activities that are so plainly anticompetitive that courts need undertake only a cursory examination before imposing antitrust liability"); *Polygram, 416 F.3d at 37* (explaining that the inherently suspect framework is only applicable when "close family resemblance [exists] between the suspect practice and another practice that already stands convicted in the court of consumer welfare").

Further, "[i]f an arrangement 'might plausibly be thought to have a net procompetitive effect, or possibly no effect at all on competition,' more than a 'quick look' is required." *MLB, 542 F.3d at 318* (quoting *Cal. Dental, 526 U.S. at 771*). In *California Dental*, the Supreme Court considered the California Dental Association's rule **[**18]** prohibiting price advertising, specifically discounted fees, and advertising relating to the quality of dental services. *526 U.S. at 761*. There, the Court rejected the use of an abbreviated rule of reason analysis, holding that the existence of a plausible procompetitive justification — in that case, the prohibition of deceptive advertising in an asymmetrical information marketplace — effectively foreclosed the ability of **[*116]** courts to utilize the quick look approach. *See id. at 771*.

Here, the Commission viewed the advertising restrictions in the Challenged Agreements as inherently suspect; it also found that the agreements were a form of "bid rigging" that harmed search engines — i.e., an independent basis upon which it could apply the inherently suspect analytical framework. Petitioner and *amici* argue that the application of the inherently suspect framework was improper and that the Challenged Agreements should only be considered under a rule of reason analysis. We agree with Petitioner that the Challenged Agreements cannot be classified as inherently suspect.

Citing expert reports and economic theory, the government argues that the Commission was correct to employ the inherently suspect framework because restrictions **[**19]** on advertising are likely to cause consumers to pay more for contact lenses. ***HN10***[] But even if restraints on truthful advertising have a tendency to raise prices, "[t]he fact that a practice may have a tangential relationship to the price of the commodity in question does not mean that a court should dispense with a full rule-of-reason analysis." *MLB, 542 F.3d at 317*.

Crucially, the restraints at issue here could plausibly be thought to have a net procompetitive effect because they are derived from trademark settlement agreements. In *Clorox*, applying the rule of reason, we considered whether a trademark settlement agreement illegally restrained trade under the Sherman Act and we explained that ***HN11***[] "[t]rademarks are by their nature non-exclusionary." *117 F.3d at 55-56*. Agreements to protect trademarks, then, should not immediately be assumed to be anticompetitive — in fact, *Clorox* tells us instead to presume they are *procompetitive. Id. at 60*. As the Challenged Agreements restrict the parties from running advertisements on Petitioner's trademarked terms, they directly implicate trademark policy.

[5] The "quick-look" and "inherently suspect" approaches are similar, and Petitioner does not take issue with the interchangeability of the two formulations of this abbreviated analysis.

The Commission acknowledged as much, finding Petitioner's proffered procompetitive justifications to be "cognizable and, at least, facially plausible[.]" **[**20]** JA 296. Rather than take that fact as an indication that it should not apply an abbreviated rule of reason analysis, as the Supreme Court instructed in *California Dental*, the Commission instead set out to show (i) that there was a theoretical basis for the alleged anticompetitive effect and that the restraints were likely, in this particular context, to harm competition and (ii) that Petitioner could have minimized the anticompetitive effects and accomplished its procompetitive justifications through less restrictive means. While this may be analytically acceptable in some situations, *see* *Cal. Dental, 526 U.S. at 779* (noting to require a "more extended examination" does not always translate to a call for "plenary market examination"), it was not appropriate here.

Courts do not have sufficient experience with this type of conduct to permit the abbreviated analysis of the Challenged Agreements undertaken by the Commission. *See* *Cal. Dental, 526 U.S. at 781* (explaining that the quick-look approach may be applicable if rule-of-reason analyses in case after case reach identical conclusions); *Polygram, 416 F.3d at 36-37* (accepting the Commission's definition of "inherently suspect" as describing restraints previously condemned by both "judicial experience and economic learning"). **[**21]** While both *California Dental* and *Polygram* consider advertising restraints, there are key differences between the restraints in those cases and the restraints **[*117]** here,[6] and our own precedent suggests that trademark agreements like those at issue here need to be examined using a fuller analysis. *See* *Clorox, 117 F.3d at 55-56, 59* (applying a rule of reason analysis and rejecting the alleged anticompetitive harm of a trademark agreement); *see also* *Actavis, 570 U.S. at 158-59* (rejecting the application of a quick-look analysis for intellectual property agreements). When, as here, not only are there cognizable procompetitive justifications but also the type of restraint has not been widely condemned in our "judicial experience," *see* *Polygram, 416 F.3d at 37*, more is required. *Cf.* *Bogan v. Hodgkins, 166 F.3d 509, 514 n.6 (2d Cir. 1999)* (noting pre-*California Dental* that "[u]nder quick look, once the defendant has shown a procompetitive justification for the conduct, the court must proceed to weigh the overall reasonableness of the restraint using a full-scale rule of reason analysis" (internal quotation marks and citation omitted)). The Challenged Agreements, therefore, are not so obviously anticompetitive to consumers that someone with only a basic understanding of economics would immediately recognize them to be so.[7] *See* *Cal. Dental, 526 U.S. at 770*. **[**22]** We are bound, then, to apply the rule of reason.[8]

---

[6] In *California Dental*, as an initial matter, the court rejected the use of an abbreviated rule of reason analysis for restraints on price and quality advertising. *526 U.S. at 781*. And in *Polygram*, the fact that the challenged conduct also restricted the parties from offering discounts on concert albums was key to the D.C. Circuit's affirmation of the inherently suspect analysis; the court thought that the agreement looked "suspiciously like a naked price fixing agreement between competitors[.]" *See* *Polygram, 416 F.3d at 37*.

[7] We do not discount the economic evidence cited by the Commission in coming to its conclusion, but the fact that it required the testimony of expert witnesses who provided empirical analyses in order to determine the net competitive effect of the Challenged Agreements underscores the point: these restraints are not obviously anticompetitive to someone with only a rudimentary understanding of economics. *See* *MLB, 542 F.3d at 340, n.10* (Sotomayor, *J.*, concurring).

[8] We also reject the Commission and *amici*'s arguments that the restrictions constitute illegal bid rigging as support for their use of the inherently suspect framework. ***HN12***[] An absolute ban on competitive bidding, or bid rigging, would be anticompetitive on its face and may justify an abbreviated rule of reason analysis. *Cal. Dental, 570 U.S. at 770* (citing *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 692-93, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*); *see also* *United States v. Joyce, 895 F.3d 673, 679 (9th Cir. 2018)* (finding bid rigging to be *per se* illegal). It is not clear to us, however, that the restrictions constitute such a ban. The Challenged Agreements do not prevent the parties from participating in keyword auctions, only from bidding on trademarked terms. Whether restrictions on advertisers' use of particular terms leads to overall harm to the search engines is not obvious and therefore does not justify analyzing the agreements under the inherently suspect framework. Nor, as *amici* in support of the government argue, is it obvious that the restrictions constitute market division, another type of restraint that would justify an abbreviated analysis. *See* *Palmer v. BRG of Georgia, Inc., 498 U.S. 46, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)* (per curiam).

III. Application of the Rule of Reason

HN13[] Under the rule of reason, the Commission bears the burden of establishing a prima facie case of anticompetitive effect. Direct evidence of anticompetitive effects establishes a prima facie case of a *Sherman Act Section 1* violation and obviates the need for a detailed market analysis or showing of market power.[9] *See IFD,* ***[*118]*** *476 U.S. at 460*. The Commission contends that it satisfied its burden by adducing evidence of increased contact lens prices and a reduction in the quantity of advertisements.

A. Anticompetitive Effects

HN14[] Anticompetitive effects in a relevant market may be shown through direct evidence of output reductions, increased prices, or reduced quality in the relevant market. *Ohio v. Am Express Co. (Am. Express), 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)*; *see also North Am. Soccer League, 883 F.3d at 42*. The Commission has also defined sufficient evidence of anticompetitive harm to include evidence of "retarded innovation, or other manifestations of harm to consumer welfare." *In re Realcomp II Ltd., No. 9320, 2009 FTC LEXIS 250, 2007 WL 6936319 (F.T.C. Oct. 30, 2009)*, *aff'd 635 F.3d 815*. We reject the Commission's argument that it has established direct evidence of anticompetitive effect in the form of increased prices. When an antitrust plaintiff advances an antitrust claim based on direct **[**23]** evidence in the form of increased prices, the question is whether it can show an actual anticompetitive change in prices after the restraint was implemented. *See Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 236-37, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*; *MacDermid, 833 F.3d at 184*. The government could not make that showing because it did not conduct an empirical analysis of the Challenged Agreements' effect on the price of contact lenses in the online market for contacts. The evidence offered by the government is theoretical and anecdotal;[10] it is not "direct." Consequently, the Commission's conclusion that differences between 1-800 Contacts' prices and those of its competitors constitute direct evidence of the Challenged Agreements' anticompetitive effects is not supported by substantial evidence.[11]

---

[9] Though the government argued to the ALJ that the parties to the Challenged Agreements collectively have market power in the relevant market and that the nature of the restraints makes it likely that the Challenged Agreements will have an anticompetitive effect, the ALJ chose not to determine the prima facie case under that theory, nor did the Commission on appeal.

[10] The government argues, inter alia, that (a) Petitioner admits that it charges more than their competitors in the relevant market; (b) economic theory strongly suggests that advertising restrictions tend to increase prices of any given product; and (c) Petitioner offered to meet or beat any price offered by other online retailers. Even accepting all this as true, it is not *direct* evidence that the Challenged Agreements caused the price of contact lenses in the relevant market to rise, as our precedent requires. *MacDermid, 833 F.3d at 184*.

[11] A slightly different issue plagues the government's argument that there is direct evidence of reduced revenues for search engines. To show this, the government did not show that Google or Microsoft, the companies who control the two most popular search engines, had lower revenues after the Challenged Agreements were put into place. Nor did the government introduce evidence that Petitioner spent less money on search advertising than it did before the Challenged Agreements came into effect. Instead, the government offered empirical evidence that the Challenged Agreements reduced the price paid by Petitioner for each click on one of its keywords. JA 1096-99. ***HN15***[] Empirical evidence is, as noted, required under our caselaw to find direct evidence of an anticompetitive effect. *K.M.B., 61 F.3d at 127*. But showing that a price for certain keywords dropped is not direct evidence of the effect on the *market as a whole. See Clorox, 117 F.3d at 56* (quoting *K.M.B., 61 F.3d at 127*). This snapshot shows only that Petitioner paid less for certain keyword advertisements, no more and no less.

While it is true that, when evaluating "whether horizontal restraints had an adverse effect on competition," we do not always "need to precisely define the relevant market to conclude that these agreements were anticompetitive," *Am. Express, 138 S.Ct. at 2285 n.7*, more was needed under our precedent if the Commission wished to show "direct" evidence in the market as a whole. *See Clorox, 117 F.3d at 56*. The "product" offered by search engines of which the Challenged Agreements allegedly restrain trade is, presumably, advertisers' use of keywords, but that is not clear from the record. For the same reason, we also

[*119] The government also argues that "disrupted information flow" is an anticompetitive effect and that a reduction in the quantity of advertisements is direct evidence of that effect. Respondent's Br. 63. While, to our knowledge, no Court of Appeals has held that a reduction of truthful information is necessarily a manifestation of anticompetitive harm, our sister circuits have occasionally considered advertising restraints in different contexts and have found the conduct in **[**24]** question to have anticompetitive effects. *See, e.g., California Dental Ass'n v. FTC (Cal. Dental II), 224 F.3d 942, 949 (9th Cir. 2000)* (considering professional advertising restraints in an asymmetrical information marketplace); *Polygram, 416 F.3d at 37* (holding that the FTC appropriately concluded an agreement to restrain price cutting and advertising violated the FTC Act); *Realcomp II, 635 F.3d at 831-32, 832 n.9* (denying petition for review when petitioner's policy limited access to internet marketing); *Blackburn v. Sweeney, 53 F.3d 825, 827-29 (7th Cir. 1995)* (identifying an agreement not to advertise in certain geographic areas as a *per se* illegal attempt to allocate markets). We need not decide whether the Commission's theory of harm is viable, however, because we conclude that Petitioner has shown a procompetitive justification and the Commission fails to carry its burden at the third step.

B. Procompetitive Justifications

Petitioner asserts that the Challenged Agreements are justified by two procompetitive effects: reduced litigation costs and protecting Petitioner's trademark rights. The Commission found that, while both of these justifications were "cognizable and facially plausible," Petitioner did not show that they "have a basis in fact," and therefore they were not "valid." JA 309. We disagree. The protection of Petitioner's trademark interests constitutes a valid procompetitive **[**25]** justification for the Challenged Agreements.

The Commission determined that, since "the [Challenged Agreements] restrict a type of competitive advertising that has never been found to violate the trademark laws, and the weight of authority overwhelmingly points to non-infringement[,]" trademark protection was not a valid procompetitive benefit that justified the Challenged Agreements. JA 313. This was incorrect. ***HN16***[] Trademarks are by their nature non-exclusionary, and agreements to protect trademark interests are "common, and favored, under the law." *Clorox, 117 F.3d at 55*. As a result, "it is difficult to show that an unfavorable trademark agreement creates antitrust concerns." *Id. at 57*. This is true even though trademark agreements inherently prevent competitors "from competing as effectively as [they] otherwise might[.]" *Id. at 59*.

In *Clorox*, we found that the plaintiff had failed to show adverse effects on the market as a whole because the restrictions at issue did not restrict competitors' ability to enter into the relevant market. *Id. at 59*. Although we held that the plaintiff in that case failed to present a prima facie case of anticompetitive harm, we also went on to detail how the procompetitive justifications of the agreement **[**26]** weighed against finding an antitrust violation. *Id. at 60*. We stated that "trademark agreements are favored in **[*120]** the law as a means by which parties agree to market products in a way that reduces the likelihood of consumer confusion and avoids time-consuming litigation." *Id.* And again, *Clorox* counsels that we should "presume" that trademark settlement agreements are procompetitive. *Id.*

The Commission, however, decided that the trademark claims that led to the Challenged Agreements were likely meritless. While it claimed not to be determining the validity of Petitioner's trademark claims, it did just that by weighing the potential validity of the trademark claims in order to show that Petitioner's procompetitive justification was invalid.[12] Even if the Commission's analysis of the underlying trademark claims were correct, trademark

---

cannot say that the Commission's conclusion that the Challenged Agreements harmed search engines by reducing quality in the market was supported by substantial evidence.

[12] Though the Luxottica agreement was not the result of a trademark dispute, the agreement contains trademark protections similar to those in the other Challenged Agreements. And while the restrictions in the Luxottica Agreement may best be considered under the doctrine of ancillary restraints, *see MLB, 542 F.3d at 334* (Sotomayor, *J.*, concurring), the government does not attempt here to offer direct evidence differentiating the reductions in advertising stemming solely from that agreement.

agreements that "only marginally advance[] trademark policies" can be procompetitive.[13] *See id. at 57*. Under *Clorox*, "[e]fforts to protect trademarks, even aggressive ones, serve the competitive purpose of furthering trademark policies." *Id. at 61*.

That does not mean that every trademark agreement has a legitimate procompetitive justification. If the "provisions relating **[**27]** to trademark protection are auxiliary to an underlying illegal agreement between competitors," or if there were other exceptional circumstances,[14] we would think twice before concluding the challenged conduct has a procompetitive justification. *See id. at 60*. As in *Clorox*, however, there is a lack of evidence here that the Challenged Agreements are the "product of anything other than hard-nosed trademark negotiations."[15] *Id.* Consequently, we find Petitioner met its burden at step two.

C. Less Restrictive Alternatives

HN17[] Because Petitioner has carried its burden of identifying a procompetitive justification, the government must show that a less restrictive alternative exists that achieves the same legitimate competitive **[*121]** benefits.[16] *Am. Express, 138 S. Ct. at 2284*; *North Am. Soccer League, 883 F.3d at 42*. That is, the restraint "only survives a rule of reason analysis if it is reasonably necessary to achieve the legitimate objectives proffered by the defendant." *United States v. Brown Univ., 5 F.3d 658, 678-79 (3d Cir. 1993)*. "Less restrictive alternatives are those that would be less prejudicial to competition as a whole." *North Am. Soccer League, 883 F.3d at 45* (internal quotation marks omitted). The Commission found that the government had shown a viable less restrictive alternative, namely that the parties to the Challenged Agreements could have **[**28]** agreed to require clear disclosure in each search advertisement of the identity of the rival seller rather than prohibit all advertising on trademarked terms. According to the government, therefore, the Challenged Agreements are overbroad.

HN18[] In *Clorox*, however, we noted that "it is usually unwise for courts to second-guess" trademark agreements between competitors. *117 F.3d at 60*. In this context, what is "reasonably necessary," *Brown Univ., 5 F.3d at 679*, is likely to be determined by competitors during settlement negotiations, *Clorox, 117 F.3d at 60*. And, as articulated above, absent something that would negate the typically procompetitive nature of these agreements, "the parties' determination of the scope of needed trademark protections is entitled to substantial weight." *Clorox, 117 F.3d at 60*.

In any event, because we hold that protecting trademarks is a valid procompetitive justification for the restrictions, we see no further need to differentiate the Luxottica Agreement from the other agreements.

[13] At the time the agreements were entered into, the law regarding the validity of Petitioner's trademark claims was unsettled, and it remains so in this Circuit. The fact that the law was unsettled at the time is one reason a party might enter into a settlement agreement.

[14] It has not been argued that exceptional circumstances exist in this case. We, therefore, need not decide what circumstances might qualify as exceptional, *von Hofe v. United States, 492 F.3d 175, 185 n.3 (2d Cir. 2007)*, such as, for example, agreements between parties with unequal bargaining power. *See Clorox, 117 F.3d at 60* ("There is no evidence that [a party to the challenged agreement] entered the agreement under duress.").

[15] Intent plays a role in this conclusion. *See Clorox, 117 F.3d at 60* (citing *Chicago Bd. of Trade, 246 U.S. at 238*). There is ample evidence that, if Petitioner's competitors had not been precluded by the Challenged Agreements from running ads on Petitioner's trademarks, they would have done so; the competitors' use of the terms is what spawned the agreements in the first place. This is unlike a typical market division case, where the two parties agree not to compete in the same geographic areas because it would benefit both of their bottom lines. *Cf. Palmer, 498 U.S. at 49-50* (holding an agreement between bar review course providers dividing market territories for the purpose of raising prices was *per se* illegal).

[16] The government argues that if we find that the Commission improperly weighed the procompetitive justification of Petitioner's trademark protections, we should remand to allow the Commission to reconsider in the first instance. The Commission, however, already determined that, assuming the procompetitive justifications were legitimate, they were not reasonably necessary to achieve the proffered procompetitive benefits. We need not remand to allow them to rearticulate the same point.

The government attempts to differentiate *Clorox* by arguing that the FTC is different than a private plaintiff, and when it brings an antitrust claim we should not give the settling parties as much latitude to negotiate a trademark agreement as a court would in a private antitrust suit. Even if we were to accept the Commission's argument that its presence in a case warrants less solicitude for trademark interests, the government still needs to show more than the mere possibility **[**29]** there could be crafted an alternative form of the trademark agreement. The alternative must be "substantially less restrictive." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application ¶ 1502 (3rd & 4th eds., 2019 Cum. Supp. 2010-2018). The alternative must also achieve the same legitimate competitive benefits outlined by the Petitioner. *North Am. Soccer League, 883 F.3d at 42*. And ***HN19***[] at the end of the day, our job is to "weigh[] the competing evidence to determine if the effects of the challenged restraint tend to promote or destroy competition." *Apple, 791 F.3d at 329* (internal quotation marks omitted).

The Commission majority thought that a disclosure requirement was enforceable because, *inter alia*, it has ordered similar requirements in the past. But the majority failed to consider the practical reasons for the parties entering into the Challenged Agreements. Under *Clorox*, this was insufficient. *117 F.3d at 60-61*. The Commission did not consider, for example, how the parties might enforce such a requirement moving forward or give any weight to how onerous such enforcement efforts would be for private parties. ***HN20***[] When the restraint at issue in an antitrust action **[*122]** implicates IP rights, *Actavis* directs us to **[**30]** consider the policy goals of the relevant IP law. *See 570 U.S. at 149*. Here, those considerations must include the practical implications of the government's proffered alternatives on the parties' ability to protect and enforce their trademarks.

HN21[] While trademark agreements limit competitors from competing as effectively as they otherwise might, we owe significant deference to arm's length use agreements negotiated by parties to those agreements. *Clorox, 117 F.3d at 59-60*. Doing so may give rise to collateral harm in a relevant market. But forcing companies to be less aggressive in enforcing their trademarks is antithetical to the procompetitive goals of trademark policy.[17] *See id. at 61*. And without considering the downstream effects of requiring less aggressive enforcement, the government has failed to show that the proffered alternatives achieve the same legitimate procompetitive benefits as those advanced by the Petitioner.

CONCLUSION

In this case, where the restrictions that arise are born of typical trademark settlement agreements, we cannot overlook the Challenged Agreements' procompetitive goal of promoting trademark policy. In light of the strong procompetitive justification of protecting Petitioner's trademarks, we conclude the **[**31]** Challenged Agreements "merely regulate[] and perhaps thereby promote[] competition." *Chicago Bd. of Trade, 246 U.S. at 238*. They do not constitute a violation of the Sherman Act, and therefore an asserted violation of the FTC Act fails of necessity.

The petition for review is GRANTED, the Final Order of the Federal Trade Commission is VACATED, and the case is REMANDED with instructions to DISMISS the administrative complaint.

End of Document

[17] We acknowledge a concern that the Challenged Agreements require the parties to employ negative keywords, which prevent ads of competitors from appearing in a consumer search for each other's trademarked terms — even absent purchase of a keyword (but rather due to a search engine's independent determination that an ad is relevant to the consumer). Even if we were inclined to consider whether this aspect of the settlement agreement goes beyond any legitimate claim of trademark infringement, and therefore imposes a restraint on competition not justified by the procompetitive value of enforcing trademark rights, the Commission has neither made separate findings with respect to the specific anticompetitive effects of this narrow aspect of the settlement agreements, nor urged that we should evaluate this issue separately. Accordingly, we have no reason to consider that issue.

Opinion

MEMORANDUM OF DECISION AND ORDER ON PLAINTIFF'S MOTION FOR LEAVE TO FILE A THIRD AMENDED CLASS ACTION COMPLAINT

DEIN, U.S.M.J.

I. INTRODUCTION

Plaintiff FWK Holdings, LLC ("FWK"), a direct purchaser of the insulin glargine products, Lantus and Lantus SoloSTAR (collectively, "Lantus"), has brought this putative class action against Sanofi-Aventis U.S. LLC ("Sanofi U.S."), the manufacturer of both products, claiming that Sanofi U.S. violated *Section 2* of the *Sherman Act*, *15 U.S.C. § 2*, by monopolizing and attempting to monopolize the market for insulin glargine in the United States, its territories and the District of Columbia. The matter is before the court on FWK's "Motion for Leave to File a Third Amended Class Action Complaint" (Docket No. 176), by which FWK is seeking permission to amend its complaint to add Meijer, Inc. and Meijer Distribution, Inc. (collectively, "Meijer") as named plaintiffs and proposed class representatives; add Sanofi-Aventis Puerto Rico ("Sanofi P.R.") as a defendant; revise the class definition to include all persons or entities in the United States or its territories who purchased Lantus directly from Sanofi U.S. "or from any entity which is **[*4]** part of the same economic enterprise with Sanofi, including Sanofi P.R." during the class period; and make a number of minor updates and revisions to the operative complaint. Sanofi U.S. and Sanofi P.R. (collectively, "Sanofi") oppose the motion "to the extent it seeks to add Sanofi PR as a party or amend the class definition[,]" and they object to naming the Meijer entities as plaintiffs and proposed class representatives "to the extent Meijer's allegations rest on purchases from Sanofi PR."[1] Because Sanofi does not oppose the remaining amendments, FWK's motion will be allowed with respect to those matters and this court's discussion will focus solely on the parties' dispute regarding the proposed addition of Sanofi P.R. and revision of the class definition.

FWK's request to add Sanofi P.R. as a defendant in this case, and its proposed expansion of the class definition to encompass Sanofi P.R. and "any entity which is part of the same economic enterprise with Sanofi," are premised upon the theory that Sanofi U.S. and Sanofi P.R. are part of a single economic enterprise under ***antitrust law***, and that Sanofi U.S.'s alleged anticompetitive conduct must be imputed to Sanofi P.R. and any **[*5]** other entity that is part of the single enterprise. Sanofi disputes these assertions and argues that FWK's motion should be denied as futile because the proposed amendments are insufficient to state a claim against Sanofi P.R. under a single economic enterprise theory, and because FWK's proposed expansion of the class definition would render the class unascertainable based on objective criteria. Sanofi further argues that the motion should be denied as untimely under Local Rule 15.1(a) because FWK failed to seek leave to amend its complaint as soon as its attorneys reasonably could have been expected to learn about Sanofi P.R.'s identity as a party.

After consideration of the parties' written submissions and their oral arguments, as well as a thorough review of the relevant case law, this court concludes that the question whether FWK may pursue a claim against Sanofi P.R. under a single economic enterprise theory should be resolved following further development of the factual record. This court also concludes that while it would have been far more appropriate for FWK to have filed its motion earlier, once it learned of Sanofi P.R.'s alleged sales of Lantus to members of the putative class, the plaintiff's **[*6]** decision to file its motion on the last day allowed under the operative Scheduling Order cannot, in fairness, be

---

[1] Sanofi P.R., which is not a party to the litigation, has appeared solely for the purpose of opposing FWK's motion for leave to amend.

deemed untimely except to the extent FWK is seeking to expand the class definition to encompass sales by unidentified entities beyond Sanofi U.S. and Sanofi P.R. Therefore, and for the reasons described below, the plaintiff's motion for leave to file a Third Amended Class Action Complaint ("TAC") is ALLOWED IN PART and DENIED IN PART as follows:

1. The motion is allowed with respect to FWK's request to file a TAC (a) adding the Meijer entities as named plaintiffs and proposed class representatives; (b) adding allegations against Sanofi P.R.; (c) removing Cesar Castillo, Inc. from the complaint; (d) revising the class definition to include members who purchased Lantus from Sanofi U.S. or Sanofi P.R.; (e) including six minor revisions of factual allegations; (f) eliminating a stray paragraph erroneously included in earlier complaints; and (g) updating counsel appearing on behalf of the direct purchaser class plaintiffs.

2. The motion is denied with respect to FWK's request to revise the class definition to encompass unidentified entities from which class members may have purchased **[*7]** Lantus. Specifically, the class definition shall be limited to all persons or entities in the United States and its territories, or subsets thereof, that purchased Lantus (in cartridges or SoloSTAR) *directly from Sanofi U.S. or Sanofi P.R.* at any time between February 13, 2015 and December 31, 2016 or until the anticompetitive effects of Sanofi's conduct cease (the "class").

3. By **June 21, 2021**, the parties shall file a joint proposed schedule for the completion of discovery and, if appropriate, the filing of motions for summary judgment addressing the issue whether FWK can maintain claims against Sanofi P.R. based on the theory that Sanofi P.R. and Sanofi U.S. are part of a single economic enterprise. In the event the parties are unable to agree on a joint schedule, they shall file separate proposals.

II. DISCUSSION

A. Standard of Review of Motions to Amend

The decision whether to grant a motion for leave to amend falls within the trial court's discretion. *Sheehan v. City of Gloucester, 321 F.3d 21, 26 (1st Cir. 2003)*. Pursuant to *Rule 15(a) of the Federal Rules of Civil Procedure*, "[t]he court should freely give leave [to amend a complaint] when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. "This liberal amendment policy applies unless the plaintiff exhibited bad faith, undue delay, the amendment would work undue prejudice **[*8]** on the opposing party or be futile." *Ortiz v. Mara, 435 F. Supp. 3d 330, 332 (D. Mass. 2020)* (quoting *Weinberg v. Grand Circle Travel, LLC, 891 F. Supp. 2d 228, 236 (D. Mass. 2012)*). In the instant case, Sanofi argues that the proposed amendments relating to Sanofi P.R. are futile and untimely under this court's Local Rules.

B. Futility

The primary issue raised in connection with FWK's motion is whether the proposed amendments against Sanofi P.R. are futile because they fail to allege sufficient facts to show that Sanofi P.R. and Sanofi U.S. comprise a single economic enterprise for antitrust purposes. "In assessing futility, the district court must apply the standard which applies to motions to dismiss under *Fed. R. Civ. P. 12(b)(6)*." *Adorno v. Crowley Towing & Transp. Co., 443 F.3d 122, 126 (1st Cir. 2006)*. Pursuant to this standard, "the court must 'accept as true all well-pleaded facts set forth in the [proposed] complaint and draw all reasonable inferences therefrom in the pleader's favor.'" *Drachman v. Boston Sci. Corp., 258 F. Supp. 3d 207, 210 (D. Mass. 2017)* (alteration in original) (quoting *Haley v. City of Boston, 657 F.3d 39, 46 (1st Cir. 2011)*) (additional quotations and citation omitted). The court will "not, however, credit 'bald assertions, unsupportable conclusions, periphrastic circumlocutions, and the like.'" *Aponte-Torres v. Univ. of P.R., 445 F.3d 50, 55 (1st Cir. 2006)* (quoting *Aulson v. Blanchard, 83 F.3d 1, 3 (1st Cir. 1996)*). "At bottom, a complaint will survive a motion to dismiss when it alleges 'enough facts to state a claim to relief that is plausible on its face.'" *Alston v. Spiegel, 988 F.3d 564, 571 (1st Cir. 2021)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S.*

Ct. 1955, 1974, 167 L. Ed. 2d 929 (2007)). "A claim is plausible when the factual **[*9]** content adumbrated in the complaint permits a reasonable inference that the defendant is liable." Id.

Ordinarily, a court applying the standard established under *Rule 12(b)(6)* may "consider only the 'facts alleged in the complaint, and exhibits attached thereto.'" *Newman v. Lehman Bros. Holdings Inc., 901 F.3d 19, 25 (1st Cir. 2018)* (quoting *Freeman v. Town of Hudson, 714 F.3d 29, 35 (1st Cir. 2013)*). "However, there are some 'narrow exceptions' in which a court may, if it chooses, consider extrinsic documents, such as 'documents the authenticity of which are not disputed by the parties; ... official public records; ... documents central to the plaintiff's claim; [and] ... documents sufficiently referred to in the complaint[.]'" Id. (quoting *Freeman, 714 F.3d at 36*). In the instant case, the court has reviewed the documents cited by the plaintiff in its Reply memorandum and attached to the Declaration of Bradley J. Vettraino (Docket No. 195) because they include public records that have been filed with the Securities and Exchange Commission ("SEC") and because courts in some instances have looked at information beyond the complaint in evaluating whether the single economic enterprise theory applies. See *Gonzalez-Maldonado v. MMM Healthcare, Inc., 693 F.3d 244, 250 (1st Cir. 2012)* (relying on affidavit submitted in connection motion to dismiss to determine that related companies were part of a single corporate enterprise); **[*10]** *OrbusNeich Med. Co., Ltd., BVI v. Boston Sci. Corp., 694 F. Supp. 2d 106, 111 (D. Mass. 2010)* (considering Annual Report filed with the SEC on a motion to dismiss "as a matter of official public record"). Moreover, at this stage in the litigation, it would make little sense to deny the motion and force FWK to attempt to replead its proposed claim against Sanofi P.R. if the plaintiff possesses evidence that might ultimately support the claim on the merits.[2]

The Single Economic Enterprise Theory

The single economic enterprise theory under which FWK seeks to pursue claims against Sanofi P.R. arises out of the Supreme Court's decision in *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. In that case, the Supreme Court addressed the question whether a parent corporation and its wholly owned subsidiary are capable of conspiring with each other in violation of *§ 1* of the *Sherman Act*. *Copperweld Corp., 467 U.S. at 755, 104 S. Ct. at 2733-34*. The Court determined that "the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the *Sherman Act*" because they "have a complete unity of interest." *Id. at 771, 104 S. Ct. at 2741*. In particular, the Court emphasized that in the case of a parent and a wholly owned subsidiary,

> [t]heir objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but **[*11]** one. They are not unlike a multiple team of horses drawing a vehicle under the control of a single driver. With or without a formal "agreement," the subsidiary acts for the benefit of the parent, its sole shareholder. If a parent and a wholly owned subsidiary do "agree" to a course of action, there is no sudden joining of economic resources that had previously served different interests, and there is no justification for *§ 1* scrutiny.

Id. at 771, 104 S. Ct. at 2741-42. Because it determined that they comprise a single economic enterprise, the Supreme Court held a parent company and its wholly owned subsidiary "are incapable of conspiring with each other for purposes of *§ 1* of the *Sherman Act*." *Id. at 777, 104 S. Ct. at 2745*.

A majority of Circuit Courts of Appeal, including the First Circuit, "have held that *Copperweld*'s 'rationale and underlying policy apply with equal force to sister corporations that are wholly owned subsidiaries of the same parent,' and that such subsidiaries, along with their parent, constitute a single economic enterprise for antitrust purposes." *Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 847 F.3d 1221, 1233 (10th Cir. 2017)* ("*Lenox*") (footnote omitted) (quoting *Gonzalez-Maldonado, 693 F.3d at 249-50*). Accordingly, "*Copperweld* supports treating

[2] While this court expresses no opinion on whether FWK will be able to support its claim that Sanofi U.S. and Sanofi P.R. are part of a single economic enterprise, FWK has submitted evidence indicating that Sanofi P.R. could potentially face liability under such a theory. Under these circumstances, denying the motion for leave to amend and forcing FWK to replead its claim against Sanofi P.R. would be inefficient and effectively elevate form over substance.

the coordinated acts of sister subsidiaries wholly owned by the same parent as those of a single enterprise" for purposes of *§ 1* of the *Sherman Act*. *Id. at 1234* **[*12]** . Moreover, "every court to address the question has held that affiliated entities which must be treated as a single enterprise for purposes of *§ 1* also must be treated as a single enterprise for purposes of *§ 2*." *Id. at 1235* (footnote omitted). See also *Growers 1-7 v. Ocean Spray Cranberries, Inc., No. 12-12016-RWZ, 2014 U.S. Dist. LEXIS 61654, 2014 WL 1764533, at *7 (D. Mass. May 2, 2014)* (finding that parent company and its wholly owned subsidiary comprised a single economic entity for purposes of *§ 2* of the *Sherman Act* where they had "overlapping ownership, personnel, and economic interests"). Sanofi does not dispute, for purposes of the present motion, that the single economic enterprise theory could potentially apply in the context of this case. Instead, it argues that FWK's proposed allegations are insufficient to state a plausible claim for relief against Sanofi P.R. because they are devoid of facts showing that Sanofi U.S. and Sanofi P.R. function as a single economic enterprise or that they engaged in "coordinated activity" as required by *Copperweld*. (See Sanofi Opp. Mem. (Docket No. 188) at 9-13; Sanofi Surreply Mem. (Docket No. 202) at 1-2, 4-8).

"*Copperweld* 'held only that "the *coordinated* activity" of [related entities] must be viewed as that of a single enterprise.'" *Lenox, 847 F.3d at 1237* (alteration in original) (quoting *Mitchael v. Intracorp, Inc., 179 F.3d 847, 857 (10th Cir. 1999)* (quoting *Copperweld, 467 U.S. at 771, 104 S. Ct. at 2741*) (emphasis added)). Accordingly, courts have repeatedly emphasized that a corporation cannot "be held liable under *§ 2* for the anticompetitive conduct of one or more related entities, merely by virtue of its place in the same corporate family." Id. See also *Arandell Corp. v. Centerpoint Energy Servs., Inc., 900 F.3d 623, 633 (9th Cir. 2018)* (noting that *Copperweld* "does not supply a theory of unbounded vicarious liability for the *acts* of legally distinct entities."); *Chandler v. Phoenix Servs., No. 7:19-cv-00014-O, 2020 U.S. Dist. LEXIS 63779, 2020 WL 1848047, at *14 (N.D. Tex. Apr. 13, 2020)* (slip op.) ("It is well established that a parent cannot be held liable for the anticompetitive conduct of its subsidiary 'merely by virtue of its place in the same corporate family.'" (quoting *Lenox, 847 F.3d at 1237*)), appeal docketed, No. 20-1848 (Fed Cir. May 27, 2020); *Acuity Optical Labs, LLC v. Davis Vision, Inc., No. 14-cv-03231, 2016 U.S. Dist. LEXIS 112423, 2016 WL 4467883, at *9 (C.D. Ill. Aug. 23, 2016)* (explaining that because "commonly-owned companies have a unity of interest *only* when they are engaged in coordinated **[*13]** activity[,] ... courts have declined to extend the reasoning of *Copperweld* ... in the absence of specific evidence of coordinated activity."), and cases cited. In order to hold a related company liable under a single enterprise theory, the plaintiff "must put forth evidence that [the company] engaged in anticompetitive conduct." *Arandell Corp., 900 F.3d at 633* (footnote omitted). Accord *Lenox, 847 F.3d at 1237*; *Chandler, 2020 U.S. Dist. LEXIS 63779, 2020 WL 1848047, at *14*. Thus, a plaintiff seeking to show that legally distinct but related companies make up a single economic enterprise under ***antitrust law*** must establish that the companies' corporate relationship is such that they "have a complete unity of interest," *Copperweld, 467 U.S. at 771, 104 S. Ct. at 2741*, and "that each defendant independently participated in the enterprise's [anticompetitive] scheme[.]" *Lenox, 847 F.3d at 1237*.

Application to the Present Case

The new allegations pertaining to the addition of Sanofi P.R. as a defendant are set forth in four paragraphs of the proposed TAC as follows:

- In paragraph 16, FWK alleges that "[t]he defendant Sanofi-Aventis Puerto Rico Inc. ("Sanofi P.R.") is a corporation organized under the laws of Puerto Rico with its principal place of business located at City View Plz 2 4 FL Ste 4020, Guaynabo, Puerto Rico, 00968."

- In paragraph 195, FWK claims that "[a]fter approval by **[*14]** the FDA of NDA No. 21-081, in May 2001 Lantus was launched for sale in the United States and its territories. Lantus was prescribed and sold in the United States from May 2001 through the present. Lantus has been sold in the United States and its territories by Sanofi U.S. and Sanofi-Aventis Puerto Rico Inc. ("Sanofi P.R."), which constitute a single economic enterprise for antitrust purposes."
- Paragraph 460 provides that "[d]uring the relevant period, the plaintiffs and other purchasers bought substantial amounts of Lantus from Sanofi [] and from entities who are part of the same economic enterprise in the United States and its territories and possessions. One way in which activities were coordinated between Sanofi and other entities who are part of the same economic enterprise is through Sanofi's control of the price

set for Lantus by other Sanofi subsidiaries such as, for example, Sanofi-Aventis Puerto Rico, Inc. The plaintiffs' and the other purchasers' prices for these products were substantially greater than the prices that they would have paid absent the unlawful conduct alleged herein."

• Paragraph 487 would amend the class definition to include "[a]ll persons or entities in **[*15]** the United States and its territories, or subsets thereof, that purchased Lantus (in cartridges or SoloSTAR) directly from Sanofi, or from any entity which is part of the same economic enterprise . . . with Sanofi, including Sanofi P.R., at any time between February 13, 2015 and December 31, 2016 or until the anticompetitive effects of Sanofi's conduct cease (the 'class')."

FWK argues that these allegations merely clarify and formalize the fact that Sanofi U.S. and Sanofi P.R. are part of the same economic enterprise, and that "sales by Sanofi P.R. in the defined geographic market are implicated in the allegations of the complaint." (Pl. Mem. (Docket No. 177) at 9). In addition, FWK relies on documents, including public filings and evidence produced in discovery, to show that Sanofi U.S. and Sanofi P.R. are 100% owned and controlled by the same corporate entity, hold themselves out as a single economic enterprise, and operate as a single economic enterprise with respect to sales of Lantus in Puerto Rico. (Pl. Reply Mem. (Docket No. 194-1) at 3-8).

Sanofi argues that it is inappropriate to consider documents outside the complaint, and it disputes the plaintiff's characterization of the **[*16]** documents on which FWK relies. (See Sanofi Surreply at 1-5). In Sanofi's view, the relationship between Sanofi U.S. and Sanofi P.R. is one of "corporate cousins" and the documentation is insufficient to show that the entities function as a single economic enterprise, or that each entity participated in the alleged anticompetitive scheme. (Id. at 2; see also Sanofi Opp. Mem. at 10-13). This court finds, based on the differing interpretations of the evidence, that the question whether the plaintiffs may pursue claims against Sanofi P.R. under a single economic enterprise theory should be resolved following further development of the relevant facts.

While this court recognizes that the TAC contains conclusory allegations describing Sanofi U.S. and Sanofi P.R. as a "single economic enterprise for antitrust purposes[,]" relevant case law sets forth no specific requirements and provides little guidance for pleading such a claim. Moreover, the First Circuit has indicated that there are circumstances where consideration of evidence beyond the pleadings may be appropriate to establish the corporate relationship necessary to support a single economic enterprise theory. See *Gonzalez-Maldonado, 693 F.3d at 250* (relying on affidavit **[*17]** submitted by appellees in connection with their motion to dismiss to establish appellees' status as wholly owned subsidiaries of a parent company and conclude that they had "a total unity of economic interests" with the parent for purposes of ***antitrust law***). In the instant case, FWK relies on publicly filed documents to show that Sanofi U.S. and Sanofi P.R. are sufficiently related to establish a complete unity of interest as required under *Copperweld* and its progeny. (See Pl. Reply Mem. at 3-5). Sanofi vigorously disputes the plaintiff's reading of those documents, and argues that FWK has repeatedly misrepresented the corporate relationship between Sanofi U.S. and Sanofi P.R. (See Sanofi Surreply (Docket No. 202) at 3-4). Consequently, this court concludes that a determination regarding the Sanofi entities' corporate relationship would best be made at a later stage in the case, following further development of the factual record.

This court finds that the question whether Sanofi P.R. engaged in coordinated activity should also be resolved following development of the evidence. As described above, FWK's proposed amendments allege that Sanofi P.R. sold Lantus at inflated prices set by Sanofi U.S. **[*18]** Under the existing case law, it is unclear whether such facts are sufficient to support a claim that Sanofi P.R. participated in the anticompetitive scheme to monopolize the market for insulin glargine in the United States, its territories and the District of Columbia. Compare *Arandell Corp., 900 F.3d at 634-35* (ruling that evidence was sufficient to create a triable issue of liability against wholly owned subsidiary under a single economic enterprise theory where plaintiffs presented facts showing that subsidiary sold natural gas to consumers at artificially inflated prices set by parent company and disbursed profits to parent company, but subsidiary claimed to have acted innocently, without knowledge of parent company's price-fixing scheme) with *Chandler, 2020 U.S. Dist. LEXIS 63779, 2020 WL 1848047, at *15* (ruling that parent company could not be held liable for subsidiary's anticompetitive scheme as part of a single enterprise where parent was unaware of subsidiary's wrongful conduct and there was no evidence that parent shared the subsidiary's intent to monopolize the relevant market). The First Circuit has not addressed the question as to what level of involvement must be shown to hold an affiliated corporation liable as part of an enterprise's anticompetitive scheme, and **[*19]** it appears that no other circuit has provided a clear answer. See *Lenox, 847 F.3d at 1239* ("The question of what must be shown in order to hold a particular affiliated corporation liable as part of an inter-corporate scheme appears to be uncharted territory at the federal circuit level."); *Chandler, 2020 U.S. Dist. LEXIS 63779, 2020 WL 1848047, at *14* (explaining in a 2020 decision that question as to how involved a defendant must be in the enterprise's scheme to be held liable for coordinated activity of a single entity remains unresolved at the federal circuit level). Additionally, Sanofi takes issue with documents that FWK submitted in support of its assertion that Sanofi P.R. and Sanofi U.S. "coordinate — and operate as a single economic unit — with respect to the sale of Lantus in Puerto Rico." (See Pl. Reply Mem. at 6-8; Exhibits attached to the Declaration of Bradley J. Vettraino (Docket No. 195)). In particular, Sanofi disputes FWK's contention that the documents implicate Sanofi P.R. in the alleged anticompetitive conduct and notes that they represent no more than a handful of the documents produced by Sanofi U.S. in this action. (Sanofi Surreply at 4). Given the unsettled nature of the case law and the disputes raised by FWK's submission of evidence, this **[*20]** court finds that this issue should be resolved based on a more complete factual record, by way of summary judgment if appropriate.

Proposed Expansion of the Class

Sanofi argues that FWK's request to amend the class definition to include those who purchased Lantus "from any entity which is part of the same economic enterprise ... with Sanofi, including Sanofi P.R.[,]" should be denied as futile because it would render the class unascertainable based on objective criteria. (Sanofi Opp. Mem. at 14). It further urges this court to "reject this moving target, and FWK's unilateral attempt to extend the time by which it was required to conduct an investigation of the claims it seeks to vindicate, and to add additional parties to its complaint." (Id.). As described below, this court finds that FWK's effort to expand the class to encompass as yet unidentified parties is untimely, and that its motion to amend should be denied to the extent it seeks to expand the class definition to include purchases from entities other than Sanofi U.S. and Sanofi P.R. It is not necessary at this stage to determine whether the proposed amendment to the class definition should be denied on the grounds of futility **[*21]** as well.

C. Timeliness

Sanofi also contends that the plaintiff's motion for leave to file a TAC should be denied as untimely pursuant to Local Rule 15.1. Under that Rule, amendments adding parties must "be sought as soon as an attorney reasonably can be expected to have become aware of the identity of the proposed new party." L.R. 15.1(a). It is undisputed in this case that counsel for FWK knew by July 2020 at the latest that members of the putative class had purchased Lantus from Sanofi P.R. (See Declaration of Michelle K. Fischer (Docket No. 188-1) ¶¶ 11-12). Nevertheless, the plaintiff waited another six months, until January 21, 2021, to file its motion for leave to amend. During that time, FWK gave no indication to this court that it intended to add a defendant or had identified Sanofi P.R. as a potential party to the lawsuit. This court does not condone the plaintiff's tactics but will not deny the motion on this basis.

While FWK's delay in seeking to add Sanofi P.R. further complicates an already complex and protracted litigation, this court reluctantly concludes that the motion for leave to amend should not be denied under Local Rule 15.1. The operative Scheduling Order set January 21, 2021 as the deadline for the parties **[*22]** to amend the pleadings or add parties or claims except upon a showing of good cause.[3] (Docket No. 214 at 1). The plaintiff was entitled to rely on this Order. See *Viscito v. Nat'l Planning Corp., No. 3:18-30132-MGM, 2019 U.S. Dist. LEXIS 225137, 2019 WL 7578462, at *5 (D. Mass. July 5, 2019)* (slip op.) (declining to deny motion for leave to file amended complaint for failure to comply with Local Rule 15.1 where plaintiff met the deadline for filing motions for leave to amend the pleadings to add parties, claims or defenses set forth in the court's scheduling order). Additionally, "this is not a

[3] The January 21, 2021 deadline for amending the pleadings contains an exception for "any proposed amendments or additions based on information discovered through the review of the post-May 2016 discovery materials[.]" (Docket No. 214 at 1 n.1). That exception is not relevant to the plaintiff's present motion for leave to file a TAC.

case in which allowing Plaintiff leave to file the [TAC] would require re-opening discovery or postponing other scheduled events." Id. The Scheduling Order calls for the parties to serve supplemental discovery requests by July 28, 2021, serve final privilege logs by September 8, 2021, serve certain discovery motions by October 11, 2021 and complete all fact discovery by December 3, 2021. (Docket No. 214 at 1-2). Accordingly, fairness dictates that FWK's motion be allowed to the extent it seeks to add allegations relating to Sanofi P.R.

The plaintiff's proposal to amend the class definition to include purchases from unnamed entities "which [are] part of the same economic enterprise ... with Sanofi" warrants a different result. As Sanofi **[*23]** argues, allowing such an amendment would effectively "extend the time by which [FWK] was required to conduct an investigation of the claims it seeks to vindicate, and to add additional parties to its complaint." (Sanofi Opp. Mem. at 14). It would also cause unnecessary confusion over the scope of the class, increase the likelihood of disputes between the parties, and open the door to future delays. In short, it is simply too late in the litigation to allow the scope of the class to remain undefined. Therefore, FWK's motion will be denied to the extent it attempts to expand the class definition to include purchases from entities other than Sanofi U.S. and Sanofi P.R.

III. ORDER

For all the reasons detailed herein, FWK's "Motion for Leave to File a Third Amended Class Action Complaint" (Docket No. 176) is ALLOWED IN PART and DENIED IN PART as follows:

1. The motion is allowed with respect to FWK's request to file a TAC (a) adding the Meijer entities as named plaintiffs and proposed class representatives; (b) adding allegations against Sanofi P.R.; (c) removing Cesar Castillo, Inc. from the complaint; (d) revising the class definition to include members who purchased Lantus from Sanofi U.S. **[*24]** or Sanofi P.R.; (e) including six minor revisions of factual allegations; (f) eliminating a stray paragraph erroneously included in earlier complaints; and (g) updating counsel appearing on behalf of the direct purchaser class plaintiffs.

2. The motion is denied with respect to FWK's request to revise the class definition to encompass unidentified entities from which class members may have purchased Lantus. Specifically, the class definition shall be limited to all persons or entities in the United States and its territories, or subsets thereof, that purchased Lantus (in cartridges or SoloSTAR) *directly from Sanofi U.S. or Sanofi P.R.* at any time between February 13, 2015 and December 31, 2016 or until the anticompetitive effects of Sanofi's conduct cease (the "class").

3. By **June 21, 2021**, the parties shall file a joint proposed schedule for the completion of discovery and, if appropriate, the filing of motions for summary judgment addressing the issue whether FWK can maintain claims against Sanofi P.R. based on the theory that Sanofi P.R. and Sanofi U.S. are part of a single economic enterprise. In the event the parties are unable to agree on a joint schedule, they shall file separate **[*25]** proposals.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

HN1[] **Defenses, Experimental Use & Testing**

Under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C.S. § 301 et seq., a pharmaceutical company must file a New Drug Application (NDA) with the FDA any time it wishes to market a new brand-name drug. The NDA must provide the agency with scientific data showing that the drug is safe and effective. This generally requires conducting preclinical and clinical trials, and can take many years. 21 U.S.C.S. § 355. Although the process is costly and time consuming, once a patented drug is approved, it enjoys a period of exclusivity on the market (generally twenty years) — effectively, a government-sanctioned monopoly. A brand-name drug's developer can recoup its investment into the drug during this exclusivity period because the drug faces no competition from generics. However, once the exclusivity period ends and generic versions of the drug enter the market, it generally results in the brand-name drug losing more than 80% to 90% of its market share within six months — a process known in the industry as going off the "patent cliff".

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

HN2[] **Defenses, Experimental Use & Testing**

The Drug Price Competition and Patent Term Restoration Act (the Hatch-Waxman Act), Pub. L. No. 98-417, 98 Stat. 1585, permits generic manufacturers to file an Abbreviated New Drug Application (ANDA), which allows them to "piggy-back" on an already-approved branded drug's New Drug Application (NDA) information to show that the generic is safe and effective. The generic manufacturer can forgo any independent preclinical and clinic trials, but must certify that the generic has the same active ingredients as, and is bioequivalent to, the already-approved brand-name drug. 21 U.S.C.S. § 355(j). By allowing generic manufacturers to "piggy-back" on the studies of already-approved drugs, Hatch-Waxman reduced the development costs for lower-priced generics, speeding their introduction to the market.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Offers to Sell & Sales

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Making & Manufacturing Infringement

HN3[] **Defenses, Experimental Use & Testing**

But to succeed on an Abbreviated New Drug Application (ANDA), a generic manufacturer must submit a certification to the FDA describing the generic's implications on patents held by the branded manufacturer. The "Paragraph IV" route, so named after 21 U.S.C.S. § 355(j)(2)(A)(vii)(IV) permits certification where the generic manufacturer states that any relevant patent held by the brand-name manufacturer is invalid or will not be infringed by the manufacture, use, or sale of the generic. 21 U.S.C.S. § 355(j)(2)(A)(vii)(IV)). Submitting an ANDA under Paragraph IV exposes the applicant to patent litigation. A branded manufacturer has 45 days after the submission to initiate a patent-infringement action against the ANDA applicant. If the branded manufacturer files suit, the FDA must withhold approving the generic, usually for a 30-month period, while the parties litigate patent validity (or infringement) in court. 21 U.S.C.S. § 355(j)(5)(B)(iii).

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

HN4[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Like any lawsuit, the parties can decide to settle the patent-infringement litigation arising out of the Abbreviated New Drug Application (ANDA). However, in these instances, it is usually the brand-name manufacturer (the patent holder and plaintiff) that pays to settle the case against the generic manufacturer (the alleged infringer/patent challenger and defendant). Such settlements are therefore called reverse payments or reverse settlements. Because these payments tend to preclude, rather than encourage, market entry of generic competitors, there is reason for concern that settlements taking this form tend to have significant adverse effects on competition. A reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects. For this reason, the U.S. Supreme Court has held that reverse payments are not immune from antitrust scrutiny.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN5[] **Entitlement as Matter of Law, Appropriateness**

Because only admissible evidence need be considered by the trial court in ruling on a motion for summary judgment. It is appropriate for district courts to decide questions regarding the admissibility of evidence on summary judgment. The resolution of evidentiary questions on summary judgment conserves the resources of the parties, the court, and the jury.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > ... > Testimony > Expert Witnesses > Qualifications

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

HN6[] **Expert Witnesses, Daubert Standard**

Under the Daubert standard and Fed. R. Evid. 702, the district court serves a gatekeeping function in determining whether an expert witness really qualifies as one.

Evidence > ... > Testimony > Expert Witnesses > Qualifications

Evidence > Relevance > Relevant Evidence

HN7[] **Expert Witnesses, Qualifications**

The Second Circuit has distilled Fed. R. Evid. 702's requirements into three broad criteria: (1) qualifications, (2) reliability, and (3) relevance and assistance to the trier of fact.

Evidence > Burdens of Proof > Allocation

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN8[] **Burdens of Proof, Allocation**

The party proffering the expert's opinions has the burden to establish the Fed. R. Evid. 702 admissibility requirements, with the district court acting as a gatekeeper to ensure that the expert's testimony both rests on a reliable foundation and is relevant to the task at hand. The court need not admit opinion evidence that is connected to the existing data only by the ipse dixit of the expert. A court may conclude that there is simply too great an analytical gap between the data and the opinion proffered. In its evaluation, the district court must focus on the principles and methodology employed by the expert, without regard to the conclusions the expert has reached or the district court's belief as to the correctness of those conclusions.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Evidence > Relevance > Exclusion of Relevant Evidence > Confusion, Prejudice & Waste of Time

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN9[] **Judges, Discretionary Powers**

Ultimately, the Daubert standard is a flexible one, and will necessarily vary from case to case, District courts have broad discretion in the matter of the admission or exclusion of expert evidence. Even if an expert is qualified, the court must still consider whether the probative value of the testimony is substantially outweighed by a danger of unfair prejudice or likelihood of confusing or misleading the jury. Fed. R. Evid. 403.

Antitrust & Trade Law > Sherman Act > Defenses

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN10[] **Sherman Act, Defenses**

In the context of Actavis scrutiny, where the payor offers justifications for the payment aside from suppressing competition, there exists a question of fact as to whether the payment is unjustified. While parties may have reasons to prefer settlements that include reverse payments, the relevant antitrust question is: What are those reasons? If the basic reason is a desire to maintain and to share patent-generated monopoly profits, then, in the absence of some other justification, the anti-trust laws are likely to forbid the arrangement. Put otherwise, if the reasons proffered by the parties are not persuasive to the trier of fact to justify the payment, then a large reverse payment likely means there has been an antitrust violation.

Patent Law > Nonobviousness > Elements & Tests > Prior Art

HN11[] **Elements & Tests, Prior Art**

A patent claim may be held invalid if it is anticipated or made obvious by prior art.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN12[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate if the moving party can demonstrate that there is no genuine issue of material fact and the movant is entitled to judgment as a matter of law. Fed. R. Civ. P. 56(a). In deciding a summary judgment motion, the court must view the evidence in the light most favorable to the party against whom summary judgment is sought and must draw all reasonable inferences in its favor. Whether any disputes of fact remain after the evidence is considered is a matter for the court. Only disputes over facts that might affect the outcome of the suit under the governing law will properly preclude the entry of summary judgment.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN13[] **Actual Monopolization, Claims**

To prove that there was unlawful monopoly maintenance, there must be evidence that a defendant (1) possessed monopoly power in the relevant market and (2) willfully acquired or maintained that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. To have a demonstrable restraint-of-trade claim, a plaintiff must prove (1) a combination or some form of concerted action between at least two legally distinct economic entities that (2) unreasonably restraints trade.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Trademark Law > ... > Infringement Actions > Defenses > Genericness

HN14[] **Inequitable Conduct, Anticompetitive Conduct**

While a large payment may provide strong evidence that the patentee seeks to induce the generic challenger to abandon its claim, the U.S. Supreme Court has held that there are other considerations for evaluating whether a reverse payment was anticompetitive, such as whether the payment was a rough approximation of the litigation expenses saved through the settlement or reflected compensation for other services that the generic has promised to perform. Importantly, these considerations were not exhaustive; by using the phrase "such as," the Court made it clear that there were other things that could render a reverse settlement not anticompetitive. Because the likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification. The only consideration that cannot factor into whether the reverse settlement was made are the expected profits from delayed competition.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN15[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is inappropriate when there are dueling experts, both of whom have put forward opinions in contradiction with each other, and when those opinions are important to resolution of a material factual dispute.

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN16[] **Summary Judgment, Burdens of Proof**

To survive a summary judgment motion, An antitrust plaintiff must show that a defendant's anticompetitive act was a material and but-for cause of plaintiff's injury, although not necessarily the sole cause.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN17[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

An alleged co-conspirator is not free from liability simply because it was not the most active participant in the scheme. It is sufficient that a defendant, regardless of its own motive, merely acquiesced in the restraint with the knowledge that it would have anticompetitive effects.

Antitrust & Trade Law > Regulated Practices > Private Actions > Purchasers

Governments > Legislation > Statutory Remedies & Rights

HN18[] **Private Actions, Purchasers**

Ala. Code § 8-19-10 et seq. only provides a private right of action to a consumer which it defines as any natural person who buys goods or services for personal, family, or household use. Ala. Code § 8-19-3(2).

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN19[] **Trade Practices & Unfair Competition, State Regulation**

Mich. Comp. Laws § 445.903, the Michigan Consumer Protection Act (MCPA), prohibits unfair, unconscionable, or deceptive methods in the conduct of trade or commerce. Michigan courts interpret this statute as providing relief only for consumers who purchased a product for personal use. Although the MCPA includes corporation under its definition of a person that can sue, Michigan courts hold that if an item is purchased primarily for business or commercial rather than personal purposes, the MCPA does not supply protection. The key question is whether the purchaser intends to use the product himself. Items purchased for commercial, rather than personal use, are outside the scope of the MCPA's protection.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN20[] **Trade Practices & Unfair Competition, State Regulation**

Mich. Comp. Laws § 445.903, the Michigan Consumer Protection Act (MCPA), appears to only prohibit fraud or fraud-related acts in commerce. The statute includes a long list of what it defines as unfair, unconscionable, or deceptive methods. These include things like causing a probability of confusion or misunderstanding as to the source of goods; using deceptive representations; disparaging the goods, services, or reputation of another by false or misleading representation of fact; gross discrepancies between the oral representations of the seller and the written agreement, and etc. Mich. Comp. Laws §§ 445.903(1)(a)-(kk). None of the expressly prohibited acts pertains to any kind of antitrust violation. As a result, some courts have dismissed MCPA consumer-protection claims when brought in the antitrust context.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN21[] **Trade Practices & Unfair Competition, State Regulation**

In the context of the Illinois Consumer Fraud and Deceptive Business Practices Act (ICFA), Illinois courts allow non-consumer plaintiffs to pursue relief if it can satisfy the consumer nexus text, which requires only that the complained-of conduct involves trade practices addressed to the market generally or otherwise implicates consumer protection concerns.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN22[] **State Regulation, Claims**

While a claimant would have to prove that there was an injury or detriment to consumers in order to satisfy all of the elements of a Florida Deceptive and Unfair Practices Act claim, the claimant does not have to be a consumer to bring the claim.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN23[] **Purchasers, Indirect Purchasers**

Massachusetts has two standing provisions for consumer-protection suits. Mass. Gen. Laws Ann. ch. 93A, § 11 provides a right of action to any person who engages in the conduct of any trade or commerce, while Mass. Gen. Laws Ann. ch. 93A, § 9 provides a right of action to any person other than a person entitled to bring action under section eleven. Mass. Gen. Laws Ann. ch. 93A, §§ 9, 11. This effectively splits the claims raised by "consumers" under § 9 and those raised by "businesses" under § 11. The key difference between §§ 9 and 11 is that the latter does not provide for indirect-purchaser standing. In any action brought under § 11, the court shall be guided in its interpretation of unfair methods of competition by the provisions of the Massachusetts Antitrust Act, which bars indirect-purchaser suits. Put simply, businesses cannot sue under § 11 for antitrust violations if they are indirect purchasers.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Torts > Business Torts > Unfair Business Practices > Remedies

HN24[] **Purchasers, Indirect Purchasers**

Mass. Gen. Laws Ann. ch. 93A does allow indirect purchaser claims, but only if the entity is not a business and is suing under Mass. Gen. Laws Ann. ch. 93A, § 9, not Mass. Gen. Laws Ann. ch. 93A, § 11.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Contracts Law > Remedies > Restitution

Torts > Business Torts > Unfair Business Practices > Remedies

HN25[] **False Advertising, State Regulation**

Prevailing plaintiffs are generally limited to injunctive relief and restitution under Cal. Bus. & Prof. Code § 17203.

Civil Procedure > Remedies > Damages > Monetary Damages

HN26[] **Damages, Monetary Damages**

Just because a certain type of monetary recovery is unavailable to a plaintiff does not mean that the substantive claim itself must be dismissed.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN27[] **Trade Practices & Unfair Competition, State Regulation**

Nebraska's Consumer Protection Act (NCPA), Neb. Rev. Stat. §§50-1601 et seq., prohibits unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce but does not define "unfair" or "deceptive." Neb. Rev. Stat. § 59-1602. Liability exists under the NCPA if the plaintiff proves that the practice either (1) fell within some common-law, statutory, or other established concept of unfairness or (2) was immoral, unethical, oppressive, or unscrupulous.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN28[] Deceptive & Unfair Trade Practices, State Regulation

Utah's consumer-protection statute, Utah Code Ann. § 13-11-5, requires that the defendant have engaged in an unconscionable act or practice.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN29[] Private Actions, State Regulation

Evaluating Utah's consumer-protection statute, Utah Code Ann. § 13-11-5, in the antitrust context, the court permits such claims to proceed, construing the statute liberally to conclude that an antitrust violation can be unconscionable.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN30[] Deceptive & Unfair Trade Practices, State Regulation

A defendant cannot be liable for an unfair trade practice if it did not engage in any relevant trade in the United States.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN31[] Trade Practices & Unfair Competition, State Regulation

Several states' consumer-protection statutes require that the actual unfair method of competition or deceptive act be associated with the commerce in question. The following include language specifically prohibiting unfair methods of competition in the conduct of any trade or commerce: Fla. Stat. § 501.204; Idaho Code § 48-603; 815 ILCS 505/2; Neb. Rev. Stat. Ann. § 59-1602; RSA § 358-A:2; N.M. Stat. Ann. § 57-12-3; Nev. Rev. Stat. Ann. § 598.0923(3); N.C. Gen. Stat. § 75-1.1(a); Utah Code Ann. § 13-11-5.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN32[] Purchasers, Indirect Purchasers

Indirect-purchaser cannot bring unjust-enrichment claims in states that do not explicitly permit indirect-purchasers to bring suit, as permitting them to do so would constitute an impermissible end run around the Illinois Brick prohibition on indirect purchaser actions.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN33[] Equitable Relief, Quantum Meruit

The Florida Supreme Court has squarely held that to prevail on an unjust enrichment claim, the plaintiff must directly confer a benefit to the defendant. Courts following this holding have dismissed indirect-purchaser claims for lack of a "direct benefit" being conferred from an indirect-purchaser plaintiff to a defendant.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN34[] Equitable Relief, Quantum Meruit

Florida case law plainly precludes unjust-enrichment claims if the plaintiff only indirectly benefitted the defendant.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Personal Property > Choses in Action

HN35[] Types of Contracts, Quasi Contracts

Utah's Supreme Court has held that while unjust enrichment does not result if the defendant has received only an incidental benefit from the plaintiff's service this court has found that a large variety of items fall under the definition of benefit, including an interest in money, land, chattels, or choses in action; beneficial services conferred; satisfaction of a debt or duty owed by the defendant; or anything which adds to the defendant's security or advantage. Courts interpreting Utah law have construed benefit broadly and have declined to dismiss claims when there has arguably been an indirect benefit conferred by the plaintiff to the defendant.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Civil Procedure > Preliminary Considerations > Equity > Adequate Remedy at Law

HN36[] Types of Contracts, Quasi Contracts

Under New York law, an unjust-enrichment claim is an equitable claim that is unavailable where an adequate remedy at law exists. Courts in the Second Circuit have recognized that an unjust enrichment claim cannot survive where it simply duplicates, or replaces, a conventional contract or tort claim.

Civil Procedure > Special Proceedings > Class Actions > Class Action Fairness Act

HN37[] Class Actions, Class Action Fairness Act

The Class Action Fairness Act (CAFA) provides U.S. Const. art. III standing to class plaintiffs who represent out-of-state class members.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Clayton Act > Defenses

HN38[] Sherman Act, Defenses

For federal antitrust statutes, the statute of limitations restarts whenever there is an overcharge associated with the anticompetitive conduct. The U.S. Supreme Court has held that if there are a series of unlawfully high priced sales over a period of years, each overt act that is part of the violation and that injures the plaintiff, e.g., each sale to the plaintiff, starts the statutory period running again. Obviously, reimbursement cannot be obtained for periods that fall outside of the statute of limitations, but that does not mean that the claims as a whole are time barred.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Governments > Legislation > Statute of Limitations > Time Limitations

HN39[] Purchasers, Indirect Purchasers

Claims in indirect-purchaser actions are timely where there are allegations of overcharges within the class period that are within the statute of limitations.

Opinion

DECISION AND ORDER GRANTING IN PART AND DENYING IN PART PLAINTIFF'S AND DEFENDANTS' *DAUBERT* MOTIONS; AND GRANTING IN PART AND DENYING IN PART THE MOTIONS FOR SUMMARY JUDGMENT

McMahon, J:

Sergeants Benevolent Association Health & Welfare Fund commenced this antitrust lawsuit on behalf of itself and a class of similarly situated indirect purchasers of the brand and generic versions of Namenda — a drug used to treat Alzheimer's **[*5]** disease. Plaintiff accuses Defendants — Forest Laboratories and Merz Pharmaceuticals — of taking actions designed to limit generic competition for Namenda. Plaintiff originally advanced two theories of antitrust liability: (1) that Defendants' entered into several reverse-payment ("pay for delay") settlements with generic manufacturers of Namenda, which unlawfully delayed the market entry of generic competitors; and (2) Defendants' conduct in effectuating a "hard switch" for consumers between two versions of Namenda.

On February 11, 2021, this Court certified a class of indirect purchasers (or "end payors") of Namenda. However, the decision certified only the "pay for delay" theory for class treatment, and "den[ied] the motion insofar as it seeks to certify the same class (or any subclass) pursuant to the hard switch theory." *In re Namenda Indirect Purchaser Antitrust Litig., No. 15-cv-6549 (CM), 338 F.R.D. 527, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988 at *1 (S.D.N.Y. Feb. 11, 2021)*.

Presently before the Court are three motions for summary judgment: one filed by Defendant Forest (ECF 564); one filed by Defendant Merz (ECF 555); and one for partial summary judgment on Count I filed by SBA (ECF 568). Also before the Court are seven *Daubert* motions to exclude the opinions and proposed testimony of several experts.

The motions to exclude are granted **[*6]** in part and denied in part. As is generally the case, the principal reason given by each side for excluding the testimony of experts proffered by the other boils down to, "their expert doesn't agree with our expert, and since our expert is correct, theirs is not." Such motions waste the Court's time. There are, however, valid grounds for excluding certain portions of the testimony of several experts.

As for the summary judgment motions, they, too, are granted in part and denied in part. The motions are denied as to SBA's antitrust claims (Counts I and II). As to the consumer-protection claims (Count III), Forest's motion is granted for claims arising under the laws of Alabama, Massachusetts, and Michigan, but are denied for the remaining states; while Merz's motion is granted for all claims except the one arising under California law. Finally, Defendants' motions are granted as to the unjust-enrichment claims (Count IV) arising under the laws of Arkansas, Florida, and New York, but are denied without prejudice as to the rest of the states for further briefing (following trial) on whether the claims are duplicative under each state's unjust-enrichment jurisprudence.

I. BACKGROUND

This **[*7]** decision is the latest in a long line of opinions addressing actions that Forest took regarding its brand-name drug, Namenda. The underlying facts of the case are recounted at length in these other opinions. *See, e.g., New York v. Actavis, PLC ("Namenda I"), No. 14-cv-7473, 2014 U.S. Dist. LEXIS 172918, 2014 WL 7015198 (S.D.N.Y. Dec. 11, 2014)*, *aff'd sub nom. Schneiderman ex rel. New York v. Actavis, PLC ("Namenda II"), 787 F.3d 638 (2d Cir. 2015)*; *Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, PLC ("Namenda III"), No. 15-cv-7488, 2016 U.S. Dist. LEXIS 128349, 2016 WL 4992690 (S.D.N.Y. Sept. 13, 2016)* (denying motion to dismiss federal claims brought by direct purchasers); *In re Namenda Direct Purchaser Antitrust Litig. ("Namenda V"), 331 F. Supp.3d 152 (S.D.N.Y. 2018)* (certifying class of direct purchasers); *Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, plc (Namenda VI), No. 15-cv-6549, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233 (S.D.N.Y. Dec. 26, 2018)* (denying Defendants' motion to dismiss in this indirect-purchaser action); *In re Namenda Indirect Purchaser Antitrust Litig. ("Namenda VII")*, No. 15-cv-6549 (CM), 2021 WL 1000489 (S.D.N.Y. Jan. 12, 2021); *In re Namenda Indirect Purchaser Antitrust Litig. ("Namenda VIII"), No. 15-cv-6549 (CM), 338 F.R.D. 527, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988 (S.D.N.Y. Feb. 11, 2021)* (granting in part and denying in part motion for class certification).

The Court only summarizes the facts relevant to summary judgment.

A. The Product

Namenda IR (immediate release) and Namenda XR (extended release) (collectively "Namenda") are brand-name prescription drugs that contain the active ingredient memantine. Namenda is used to treat Alzheimer's disease, and has been commercially successful ever since Forest introduced Namenda IR to the U.S. market in 2003. Total annual sales of Namenda IR grew to approximately $1.5 billion by 2013, the same year that Forest launched Namenda XR. *Namenda II, 787 F.3d at 647*.

Although both versions of Namenda were patent protected, the patents had different expiration dates. Therein lies the dispute animating this lawsuit. SBA alleges that Defendants **[*8]** acted anticompetitively in attempting to protect Namenda's market advantage afforded by the patents, ultimately resulting in indirect purchasers paying higher prices for memantine than would otherwise have been the case but-for Defendants' conduct.

B. The Parties

Lead plaintiff Sergeants Benevolent Association Health & Welfare Fund ("SBA") is a fund that administers the prescription drug benefit plan for active and retired New York City Police Department sergeants and their dependents. It represents a class of indirect-purchaser plaintiffs ("IPPs"), which includes — subject to some exceptions — "All Third-Party Payors who indirectly purchased, and/or paid, and/or provided reimbursement for, some or all of the price for Namenda IR 5 or 10 mg tablets, their AB-rated generic equivalents, and/or Namenda XR capsules" between June 1, 2012, through December 31, 2017. (ECF 489).

Third-party payors are entities (besides the patient or the health care provider) that reimburse for health care expenses. They include insurance companies and self-insured health and welfare plans run by employers. They are indirect purchasers because they do not purchase drugs directly from the manufacturer (in contrast **[*9]** to direct purchasers like wholesalers). Instead, they pay reimbursement for the purchases made by the individual consumers that they insure.

Defendant Forest Laboratories is a limited-liability company incorporated in Delaware that manufactures and sells branded pharmaceutical products. Forest is a wholly owned subsidiary of Actavis PLC (now known as Allergan PLC).

Defendants Merz GmbH & Co. KGaA.; Merz Pharma GmbH & Co. KGaA; and Merz Pharmaceuticals GmbH (collectively "Merz") are headquartered in Germany and are engaged in the development, production, and distribution of pharmaceutical products. Merz is the original holder of the patent at the center of this dispute, U.S. Patent No. 5,061,703. Merz granted Forest an exclusive license to the '703 Patent in June 2000, which gave Forest the right to market a memantine drug in the United States. As part of the agreement, Forest was required to pay Merz 20% of its net revenues on sales of memantine products in the U.S. (ECF 607, Exh. 23 at 14).

C. The Hatch-Waxman Act and Generic Competition

HN1[] Under the *Federal Food, Drug, and Cosmetic Act, 21 U.S.C. § 301 et seq.*, a pharmaceutical company must file a New Drug Application ("NDA") with the FDA any time it wishes to market a new brand-name drug. The NDA must provide the agency with scientific **[*10]** data showing that the drug is safe and effective. This generally requires conducting preclinical and clinical trials, and can take many years. *Namenda II, 787 F.3d at 643*; *21 U.S.C. § 355*. Although the process is costly and time consuming, once a patented drug is approved, it enjoys a period of exclusivity on the market (generally twenty years) — effectively, a government-sanctioned monopoly. A brand-name drug's developer can recoup its investment into the drug during this exclusivity period because the drug faces no competition from generics. However, once the exclusivity period ends and generic versions of the drug enter the market, it generally results in the brand-name drug losing more than 80% to 90% of its market share within six months — a process known in the industry as going off the "patent cliff." *Namenda II, 787 F.3d at 647*.

In 1984, Congress enacted the *Drug Price Competition and Patent Term Restoration Act (the "Hatch-Waxman Act"), Pub. L. No. 98-417, 98 Stat. 1585*. Hatch-Waxman attempted to serve a dual purpose: to lower drug prices by encouraging greater generic competition; and to incentivize innovation from branded drug manufacturers by providing for patent extensions beyond the standard 20-year patent term. *Namenda II, 787 F.3d at 644*.

HN2[] To increase generic competition, Hatch-Waxman permits generic manufacturers to file an Abbreviated New Drug Application ("ANDA"), which allows **[*11]** them to "piggy-back" on an already-approved branded drug's NDA information to show that the generic is safe and effective. *Ibid.* The generic manufacturer can forgo any independent preclinical and clinic trials, but must certify that the generic has the same active ingredients as, and is "bioequivalent" to, the already-approved brand-name drug. *21 U.S.C. § 355(j)*. By allowing generic manufacturers to "piggy-back" on the studies of already-approved drugs, Hatch-Waxman reduced the development costs for lower-priced generics, speeding their introduction to the market. *Namenda II, 787 F.3d at 644*.

HN3[] But to succeed on an ANDA, a generic manufacturer must submit a certification to the FDA describing the generic's implications on patents held by the branded manufacturer. The relevant certification here is the "Paragraph IV" route, so named after *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*. In a Paragraph IV certification, the generic manufacturer states that any relevant patent held by the brand-name manufacturer "is invalid or will not be infringed by the manufacture, use, or sale" of the generic. *FTC v. Actavis, Inc., 570 U.S. 136, 143, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)* (quoting *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*). Submitting an ANDA under Paragraph IV exposes the applicant to patent litigation. A branded manufacturer has 45 days after the submission to initiate a patent-infringement **[*12]** action against the ANDA applicant. If the branded manufacturer files suit, the FDA "must withhold approving the generic, usually for a 30-month period, while the parties litigate patent validity (or infringement) in court." *Ibid.*; *see also* *21 U.S.C. § 355(j)(5)(B)(iii)*.

Hatch-Waxman provides incentives for generic manufacturers who incur the risk of patent litigation. Generic manufacturers that first file a Paragraph IV certification (as many "first" certifications can be submitted on the same day) receive a 180-day exclusive marketing period for that generic. Generic manufacturers that are not "first filers" cannot market their versions of the drug during this period. "If the first-to-file generic manufacturer can overcome any patent obstacle and bring the generic to market, this 180-day period of exclusivity can prove valuable, possibly 'worth several hundred million dollars.'" *Actavis, 570 U.S. at 144* (citation omitted).

HN4[] Like any lawsuit, the parties can decide to settle the patent-infringement litigation arising out of the ANDA. However, in these instances, it is usually the brand-name manufacturer (the patent holder and plaintiff) that pays to settle the case against the generic manufacturer (the alleged infringer/patent challenger **[*13]** and defendant). Such settlements are therefore called "reverse payments" or "reverse settlements." Because these payments tend to preclude, rather than encourage, market entry of generic competitors, "there is reason for concern that settlements taking this form tend to have significant adverse effects on competition." *Id. at 148*. "[A] reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects." *Id. at 158*. For this reason, the Supreme Court has held that reverse payments are not immune from antitrust scrutiny.

Defendants' reverse settlements to generic manufacturers form the IPP class' remaining theory of liability — that the Defendants "paid to delay" generic competition.

D. The Generic Settlements

After Merz provided Forest with an exclusive license to the '703 Patent in June 2000, Forest developed Namenda IR and began marketing it in the U.S. following FDA approval in 2003. *Namenda II, 787 F.3d at 647*. Namenda IR's exclusivity period based on the '703 Patent was originally set to expire on April 11, 2010, but after securing several extensions, the final expiration date of the patent was October 11, 2015. *Namenda IV, 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *6*.

Starting in late 2007 — before Forest obtained the extensions — fourteen generic manufacturers **[*14]** "first filed" ANDAs in preparation to enter the market. These generic manufacturers provided Forest with Paragraph IV certifications, notifying Forest of their view that the '703 Patent was either invalid or was not infringed by their versions of a memantine product. (Second Amended Complaint, ECF 326 at ¶ 72). In early 2008, Forest and Merz commenced litigation against these generic manufacturers, triggering the automatic 30-month stay under Hatch-Waxman, during which the validity of the '703 Patent was to be litigated. (*Id.* at ¶ 74). The lawsuits were filed in the District of Delaware, and the consolidated cases were assigned to Judge Sleet and then-Magistrate Judge Stark (now a District Judge).

Between April 2008 and August 2009, four of the fourteen first-filers ended their ANDA challenges against Forest for various reasons. (ECF 566 at ¶¶ 14-16). In July 2009, Magistrate Judge Stark issued a "*Markman*"[1] Report and Recommendation rejecting every claim construction proposed by the generic challengers and adopting Forest's and Merz's positions on nine out of thirteen disputed issues. *See* *Forest Labs., Inc. v. Cobalt Labs., Inc., No. 8-21-GMS-*

---

[1] In a patent litigation, "the construction of a patent, including terms of art within its claim, is exclusively within the province of the court." *Markman v. Westview Instruments, Inc., 517 U.S. 370, 372, 116 S. Ct. 1384, 134 L. Ed. 2d 577 (1996)*.

LPS, 2009 U.S. Dist. LEXIS 56368, 2009 WL 1916935 (D. Del. July 2, 2009). Judge Sleet largely adopted the R&R, agreeing on all but one clerical issue. *See* Forest Labs., Inc. v. Cobalt Labs, Inc., No. 8-21-GMS-LPS, 2009 U.S. Dist. LEXIS 86772, 2009 WL 3010837 (D. Del. Sept. 21, 2009).

Following the *Markman* ruling, nine **[*15]** of the remaining ten challengers (all except for Mylan) settled the patent-infringement lawsuits between September 2009 and March 2010. (ECF 566 at ¶ 18; ECF 570 at ¶¶ 38-47). All were reverse settlements; the amounts Forest and Merz paid to the generic challengers (splitting the costs 50/50) ranged between $150,000 and $2 million. (ECF 566 at ¶ 25).

The reverse-settlement agreements provided that the generic manufacturer was not allowed to launch generic versions of Namenda IR earlier than three months before April 11, 2015 (the date of the '703 Patent's expiration) or October 11, 2015 (the expiration date if Forest obtained another six-month extension for pediatric exclusivity, which it did). Thus, the agreements effectively "locked in" the date of generic entry to be July 11, 2015.

Each agreement also provided that if Forest or Merz permitted a third-party to launch a generic of Namenda IR earlier than the date provided in the agreement, or if Forest lost its ANDA patent-infringement suit in court, then the settling manufacturer could launch its generic at the same time as the first launching generic. These "Most Favored Nation" ("MFN") or "acceleration" clauses made it such that once one generic **[*16]** entered the market, they all could. IPPs claim that these clauses greatly reduced the incentive that any individual generic manufacturer had of continuing to pursue their Paragraph IV challenge against the '703 Patent, effecting deterring any substantive challenge to patent validity.

E. The Lexapro Amendment

By April 2010, Mylan was the only remaining generic manufacturer that had yet to settle with Forest. But its situation was different from that of the other generics, in that Mylan and Forest had a pre-existing relationship related to another brand-name drug — an antidepressant known as Lexapro — that they wanted to renegotiate. Negotiations over the "Lexapro Amendment" became part and parcel of the negotiations relating to Namenda. (*See* ECF 576, Exh. 20).

The original Lexapro Agreement was executed in October 2005 between Forest and Alphapharm (later acquired by Mylan), and governed the distribution and supply of an authorized generic of Lexapro ("Lexapro AG"). The terms of the original agreement provided that Forest would manufacture and supply Alphapharm's requirements of Lexapro AG for sale and distribution, and that Alphapharm would market Lexapro AG. Alphapharm agreed to pay Forest a 40% **[*17]** share of its "product profit" on Lexapro AG, which the agreement defined as Alphapharm's net sales less Forest's manufacturing costs. (ECF 566 at ¶ 42).

Although the term of the agreement was for five years, it also provided that Alphapharm could terminate the agreement after just one year. If Alphapharm terminated the agreement, it would no longer be able to sell an authorized generic of Lexapro, but it could have theoretically launched its own competing generic and would have retained 100% of the profits of that version. At the time of the original agreement, both parties anticipated that Lexapro AG would launch at some point in early 2012, since that was when the patent upon which Lexapro was based ("the '712 Patent") was set to expire. *See* Namenda V, 331 F.3d at 192.

But between 2005 and 2010, legislative and administrative changes to Medicaid apparently would have increased Forest's Medicaid liability under the original agreement to more than it had expected when it first entered into it. *Id. at 193*. The Court will not go into needless detail on the changes; what is important is that, because the original Lexapro Agreement obligated Forest to "transfer" the supply of Lexapro AG that it manufactured to Alphapharm/Mylan, **[*18]** the price of Lexapro AG was factored into how much Forest owed in rebates back to the government. In this lawsuit, Forest asserts that its executives believed the company could reduce its Medicaid liabilities if it shifted the manufacturing of the Lexapro AG to Mylan. (ECF 566 at ¶ 46-50).

Thus, Forest proposed an amendment to the Lexapro Agreement at the same time it was trying to settle Mylan's Paragraph IV challenge. (*See* ECF 576, Exh. 20). Forest and Mylan ultimately agreed to amend the Lexapro agreement on the following terms: In exchange for a $20 million up-front payment, Mylan agreed to manufacture the Lexapro AG (instead of Forest) and also agreed to extend the minimum term of the agreement from one year to two. The parties also agreed to alter the profit-sharing percentages. Instead of 40% profit share for all sales, Forest's take was reduced to 30% on the first $100 million in profit and 35% on the next $50 million in profit; Forest would not earn the original 40% until Lexapro AG generated more than $150 million in profits. (ECF 566 at ¶¶ 61-65; ECF 570 at ¶ 80).

Forest and Mylan executed both the Lexapro Amendment and a reverse-settlement agreement to Mylan's Paragraph IV challenge on the **[*19]** same day: July 21, 2010. Forest agreed to pay $2 million to Mylan to settle the patent-infringement suit — an amount in line with the rest of the reverse-payment settlements. The settlement also contained the same MFN/acceleration clause as the other agreements. But the primary dispute for resolution in this case is whether the Lexapro Amendment qualifies as a "large and unjustified" payment made to settle the Paragraph IV patent-infringement suit in violation of *Actavis*. *570 U.S. at 158*.

F. History of Litigation

Litigation regarding Forest began in 2014. After Forest announced a plan to discontinue Namenda IR — ostensibly in an attempt to improve the prospects of Namenda XR, a new version of the drug it hoped to market — the State of New York sued Forest and Actavis to enjoin it from doing so, arguing that this "hard switch" was anticompetitive. *Namenda I, 2014 U.S. Dist. LEXIS 172918, 2014 WL 7015198, at * 1*. The Honorable Judge Robert Sweet granted a preliminary injunction, and that ruling was affirmed on appeal. *Namenda II, 787 F.3d at 663*.

In August 2015, Plaintiffs filed the instant lawsuit, and in September 2015, direct purchasers of Namenda filed a similar lawsuit. (*See* Case No. 15-cv-7488 (CM)(RWL)). Both sets of plaintiffs alleged that Defendants' actions in effectuating the hard **[*20]** switch and the reverse-payment settlements forced them to pay supra-competitive prices for memantine. In contrast to the direct purchasers, who brought their claims under the federal Sherman Act, the IPPs in this lawsuit bring their claims under state antitrust and consumer-protection laws. (ECF 326).[2]

In September 2016, this Court denied the Defendants' consolidated motions to dismiss in both the direct purchaser action and this action. *Namenda III, 2016 U.S. Dist. LEXIS 128349, 2016 WL 4992690, at * 1*. The Court then stayed the IPP litigation until a resolution of the federal claims from the direct purchasers' lawsuit. That litigation ultimately settled on the eve of trial. Following that, several of the generic defendants in this suit also settled. The only Defendants remaining in this litigation are those affiliated with the brand-name manufacturers and originators of Namenda — Forest and its parent, Actavis, and their German counterpart, Merz.

On February 11, 2021, this Court granted in part and denied in part SBA's motion for class certification. *Namenda VIII, 338 F.R.D. 527, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988*. The Court certified only the "pay for delay" theory of antitrust liability and denied certification as to the hard switch theory. This means that only the only basis for liability to be found on a class-wide **[*21]** basis (as well as for class-wide damages) pertains to the reverse settlement of the Paragraph IV lawsuits.

Presently before the Court are seven *Daubert* motions to exclude the testimony of experts for both sides: four filed by Defendants and three by SBA. Also before the Court are three motions for summary judgment.

[2] SBA brings state, rather than federal, claims because "Under the United States Supreme Court's decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 745-46, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, indirect purchasers of products sold at supra-competitive prices lack standing to sue under federal antitrust statutes" but "may still bring suit under state antitrust laws, if a state permits such claims." *Namenda VI, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *1*

II. *DAUBERT* MOTIONS

As I did when deciding the motions for summary judgment in the direct-purchaser action, I will decide the *Daubert* motions before addressing the merits. ***HN5***[] Because "only admissible evidence need be considered by the trial court in ruling on a motion for summary judgment . . . . it is appropriate for district courts to decide questions regarding the admissibility of evidence on summary judgment." *Raskin v. Wyatt Co., 125 F.3d 55, 66 (2d Cir. 1997)*. "The resolution of evidentiary questions on summary judgment conserves the resources of the parties, the court, and the jury." *Ibid.*

Defendants move to exclude the opinions and proposed testimony of: (1) Michael A. Davitz (ECF 543); (2) Jacob C. Holzer (ECF 545); (3) Susan Marchetti (ECF 547); and (4) Thomas McGuire (ECF 549). SBA moves to exclude the opinions and proposed testimony of: (1) Lona Fowdur (ECF 560); Philip Green (ECF 571); and Sue L. Robinson (ECF 574). **[*22]**

The opinions of Davitz, Holzer, and Green are admitted in full. Portions of the opinions of Marchetti, McGuire, Fowdur, and Robinson are admitted, with certain caveats.

Daubert Standard

HN6[] Under the standard set forth in *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)* and *Rule 702 of the Federal Rules of Evidence*, the district court serves a "gatekeeping" function in determining whether an expert witness really qualifies as one. *Rule 702* provides that:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case.

HN7[] "The Second Circuit has 'distilled *Rule 702*'s requirements into three broad criteria: (1) qualifications, (2) reliability, and (3) relevance and assistance to the trier of fact.'" *In re Aluminum Warehousing Antitrust Litig., 336 F.R.D. 5, 27 (S.D.N.Y. 2020)* (quoting *In re LIBOR-Based Fin. Instruments Antitrust Litig., 299 F. Supp. 3d 430, 466 (S.D.N.Y. 2018)*).

HN8[] The party proffering the expert's opinions "has the burden to establish the [*Rule 702*] admissibility requirements, with the district court acting **[*23]** as a 'gatekeeper' to ensure that the 'expert's testimony both rests on a reliable foundation and is relevant to the task at hand.'" *In re Pfizer Inc. Secs. Litig., 819 F.3d 642, 658 (2d Cir. 2016)* (quoting *United States v. Williams, 506 F.3d 151, 160 (2d Cir. 2017)*). The court need not "admit opinion evidence that is connected to the existing data only by the *ipse dixit* of the expert. A court may conclude that there is simply too great an analytical gap between the data and the opinion proffered." *Gen. Elec. Co. v. Joiner, 522 U.S. 136, 146 (1997)*. In its evaluation, "the district court must focus on the principles and methodology employed by the expert, without regard to the conclusions the expert has reached or the district court's belief as to the correctness of those conclusions." *Amorgianos v. Nat'l R.R. Passenger Corp., 303 F.3d 256, 266 (2d Cir. 2002)*.

HN9[] Ultimately, the *Daubert* standard is a "flexible one," *Daubert, 509 U.S. at 594*, "and will necessarily vary from case to case," *Amorgianos, 303 F.3d at 266*. District courts have "broad discretion in the matter of the admission or exclusion of expert evidence." *Boucher v. U.S. Suzuki Motor Corp., 73 F.3d 18, 21 (2d Cir. 1996)* (quoting *Salem v. United States Lines Co., 370 U.S. 31, 35, 82 S. Ct. 1119, 8 L. Ed. 2d 313 (1962)*). Even if an expert is qualified, the court must still consider whether the probative value of the testimony is "substantially outweighed by a danger of . . . unfair prejudice" or likelihood of confusing or misleading the jury. *Fed. R. Evid. 403*; *see also* *United States v. Dukagjini, 326 F.3d 45, 55 (2d Cir. 2002)*.

Defendants' Motions to Exclude Plaintiff's Experts

A. Defendants' motion to exclude the opinion of Dr. Michael A. Davitz [*24] is denied

SBA asked Davitz to opine about what a reasonable and competent patent attorney would have informed the parties about their likelihood of success in the Namenda Paragraph IV litigation. (Davitz Report at ¶ 6). SBA offers Davitz primarily for his view that Mylan was more likely than not to succeed in the litigation against Forest — more specifically, that "Mylan had at least a seventy (70%) percent chance of prevailing." (*Id.* at ¶ 9).

Davitz is a patent attorney with extensive experience and impressive expertise in advising clients on the likelihood of whether they will prevail in patent litigation, including especially the type of patent litigation in which Mylan and Forest were engaged: Paragraph IV Hatch-Waxman litigation. He has been a registered patent attorney for twenty-three years. Of particular relevance is his six years as the Vice President of Intellectual Property at Taro Pharmaceuticals — a manufacturer of generic pharmaceuticals. During his time at Taro, Davitz directed the company's Paragraph IV ANDA litigation, which included advising executives on the probability of success on such litigation. He is thus more than qualified to offer his opinion on Mylan's likelihood **[*25]** of success on its Paragraph IV challenge. He is also a trained physician (hence, "Dr. Davitz").

It is wise that Defendants do not ask the Court to preclude Davitz from opining that Mylan was substantially likely to win its challenge or any of his other opinions, as any such motion would have failed. Instead, Defendants focus on the "70% chance of prevailing" statement, arguing that it improperly attempts to quantify an unquantifiable evaluation and that Davitz's methodology to arrive at that number was unreliable. The motion is denied.

The Court has carefully reviewed Davitz's exceptionally well written and highly readable (especially for this type of litigation) 193-page report, in which he lays out in great detail the reasons why he believes that Mylan was "substantially likely" to prevail in its Paragraph IV challenge to the '703 Patent.

His conclusion is based on his experience as a patent attorney and a variety of factors, including the statistical likelihood of success in ANDA litigation generally (success rate of generic challengers versus brand-name patent holders); his assessment of the history of the '703 Patent and its approval by the Patent and Trademark Office ("PTO"); and his assessment of the **[*26]** merits of the claims and defenses of the parties involved. Ultimately, Davitz arrived at his 70% number because it was his view that "Mylan had at least a seventy (70%) percent chance of prevailing in the Namenda ANDA Litigation *on at least one of its defenses to Forest's allegations of infringement*." (*Id.* at ¶ 427 (emphasis added)). Since Mylan only needed to win on any one of its arguments to prevail, Davitz concluded that a reasonable and competent patent attorney would have advised the parties that it was more likely than not that Mylan would have won given the merits of the arguments both sides advanced.

Dr. Davitz's 70% number was chosen carefully and with due regard for precision. He began by observing that challengers to patent validity prevail in approximately 75-76% of cases, and challengers in Paragraph IV litigation specifically prevail about 73% percent of the time. (*Id.* at ¶¶153-156). Mylan, however, prevails in only 64% of its Paragraph IV lawsuits — around 2 times in 3, but not 3 times in 4 — so Davitz decided to incorporate a "Mylan discount" of shorts into his assessment.[3] Davitz used these statistics as a "benchmark for the probability of a generic manufacturer to **[*27]** prevail in a Paragraph IV litigation." (*Id.* at ¶ 157). He then factored in his assessment of the strengths and weaknesses of Mylan's and Forest's positions relative to other Paragraph IV cases to arrive at his ultimate number.

The key question, thus, is whether his assessment of the '703 Patent case is reliable. A trier of fact could find it so.

---

[3] I use the word "assessment" advisedly. Dr. Davitz did not purport to "calculate" anything, but sought to quantify, to the extent he could do so, his conclusion that Mylan was "substantially likely" to prevail in the '703 patent lawsuit.

Davitz carefully examines the factors that an experienced patent litigator would consider if asked to advise Mylan or Forest about their possibility of success in the Paragraph IV litigation. Some of these factors (such as the success-rate percentages described above) are quantifiable; some of them (such as the assessment of whether the PTO granted the patent without fully addressing issues relating to validity) consider both quantifiable and non-quantifiable factors; and some (like the importance of *Markman* rulings to the underlying infringement case, or a lawyer's evaluation of the merits of particular legal arguments in light of the evidence) are non-quantifiable.

But importantly, Dr. Davitz explains the importance of each factor he considered — or why he did not consider a factor to be of much importance — bringing to bear his experience in conducting **[*28]** precisely this sort of evaluation for real clients who want hard advice from their lawyers about whether to bring, settle, or try a Paragraph IV case.

Davitz pointed to reasons why he felt that each of Mylan's challenges, whether to patent validity or to infringement, were stronger than Forest's counterarguments — even with the presumption of validity accorded to patents that have already been granted. He observed that Mylan only needed to prevail on one of these challenges to win, whereas Forest had to win every single one if it were to succeed. Davitz also noted that the patent had been invalidated abroad, albeit under law not identical to U.S. patent law. To that he added reviews of academic research about the work of particular patent examiners (including specifically the examiners in this case), the correlations between the granting of patents and length of time on the job, and personal experience from his involvement in the patent-prosecution process (which allowed him to identify some oddities in the process used to grant the '703 Patent).

In short, Dr. Davitz gathered a huge set of information, which he assessed in light of his own considerable experience in doing precisely what SBA asked **[*29]** him to do — assess the likelihood that one side or the other would have prevailed in the Mylan Paragraph IV challenge to the '703 Patent. This is exactly what an experienced patent litigator would be expected to do for clients.

But the Court was once a lawyer, so I know that clients want more. Being told that you are "substantially likely" to prevail is never enough; it inevitably leads to the question, "Just how much is "substantial?" Every client wants a number. Dr. Davitz opines that Mylan was at least 70% likely to prevail. That estimate is admissible. Lawyers are not engineers, and much of what they are asked to predict cannot be based on anything that reduces to numbers and mathematics. That does not make it any less valuable to clients, or any less the product of expertise on the part of the advising attorneys. Nor does it mean that Dr. Davitz did not employ any ascertainable or reliable methodology in reaching his conclusions. On the contrary, he employed a very precise methodology, which involved a complete review of the patent's file wrapper, the entire record in the Paragraph IV lawsuit, and the body of patent law in effect at the time the litigation was scheduled for trial. He does **[*30]** not offer legal opinions, but clearly articulates his view of the strengths and weaknesses of each side's arguments in light of the case law at the time.

Given all of the above, I can understand why Davitz concluded that Mylan had a greater chance of winning this particular patent challenge than its overall record, and that "substantially likely" was about halfway between (i) Mylan's customary success rate when taking such lawsuits to trial, and (ii) the overall trend in the industry, which favors generics over patent holders. It is for a jury to decide whether his arguments are persuasive.

Defendants argue that another court has rejected a quantification of a party's litigation success rate. *See* *In re Intuniv Antitrust Litig., No. 16-cv-12653-ADB, 2020 U.S. Dist. LEXIS 187578, 2020 WL 5995326, at *11 (D. Mass. Oct. 9, 2020)*. But *Intuniv* observed that the expert in that case had not "provided a methodology for how he arrived at [his] 95% figure." *Id. at *12*. Here, Dr. Davitz has provided a methodology, one that I consider to be perfectly sound. It is exactly what lawyers do when counseling clients on such matters — not firmly grounded in statistical probabilities, but far from *ipse dixit*. Dr. Davitz appears to me to have considered all of the data that should be considered in evaluating the likelihood of Mylan's success. **[*31]** Notably, Forest points to nothing that he overlooked or left out of his analysis. It argues only that the number should be excluded. But Davitz's number is not a number he pulled out of thin air; he thoroughly explains how he arrived at it. If Defendants wish to challenge his conclusions at trial, that is their right. But I will allow his testimony.

Defendants' motion to exclude is denied.

B. Defendants' motion to exclude the opinions of Susan Marchetti is granted in part and denied in part

Ms. Marchetti, a former pharmaceutical executive, was asked to opine on the following three questions:

1. Does the evidence support the fact that in the years 2010-11, Forest had sufficient manufacturing capacity to produce Lexapro and did not require the resources of a third-party manufacturer to meet sales and inventory requirement?
2. Does the evidence show that Forest anticipated it would obtain cost savings as a result of subcontracting Mylan to manufacture Lexapro?
3. Did the compensation Mylan received from Forest under the terms of the 2010 Lexapro Amendment to the 2005 Lexapro Agreement represent "fair value" for the services Forest contracted Mylan to provide?

Marchetti answered the first question **[*32]** "yes," and the second and third questions "no." As to the third question, Marchetti opined that Forest received virtually nothing of value from the Lexapro Amendment, while Mylan obtained net benefits worth between $30.5 million and $31.3 million; thus, the Amendment did not constitute "fair value." (Marchetti Report at ¶ 30).

Ms. Marchetti has over 35 years' experience in the pharmaceutical industry, working at both major branded drug manufacturers and generics. She has extensive experience leading supply chain operations at these companies and had responsibility for sales forecasting, budgeting and product planning. (*Id.* at ¶ 5). She has worked on product launches of both authorized generics (generics approved by the company that held the patent on the branded drug) and competing generics. She is also intimately familiar with the manufacturing processes for solid dose (tablet and capsule) products at U.S. sites and abroad. (*Id.* at ¶ 9). Defendants do not contest Marchetti's expertise in the pharmaceutical supply chain field, but they do contest opinions which they believe are outside of her field of expertise — namely, her assessment that the Lexapro Amendment was not a "fair value" **[*33]** agreement.

Marchetti's report begins by recounting the background of the Lexapro Agreement and Amendment. The original agreement stipulated that Alphapharm/Mylan would be responsible for marketing and distributing Lexapro AG (but not manufacturing), and for paying royalties of 40% of its "Product Profit" to Forest. It also permitted Alphapharm/Mylan to terminate the agreement after one year. (*Id.* at ¶ 44). The Lexapro Amendment reduced the royalty rate Mylan had to pay Forest. Instead of 40%, Mylan needed only to pay 30% on the first $100 million in profit and $35% on the next $50 million, with the original 40% in place for any profit above $150 million. Mylan also agreed to extend the term of the contract by one year, and to manufacture Lexapro AG. In exchange, Forest paid Mylan an upfront payment of $20 million.

Marchetti's opinions focus on calculating the "cost" of the Lexapro Amendment to Forest in order to determine whether Forest's payments were "large and unjustified" in violation of *Actavis*. By her calculation, the original Lexapro Agreement would have netted Forest $60 million on the first $150 million of Lexapro AG's profits (40% of $150 million). (*Id.* at ¶ 121) In contrast, **[*34]** the Lexapro Amendment required Forest to *pay* a $20 million upfront fee *and* to accept reduced royalties — with royalties of only $47.5 million on the first $150 million in profit (a $12.5 million decrease from the original agreement). Thus, when compared to the original agreement, the "cost" of the Amendment to Forest totaled between $30.5 million and $31.3 million: the $20 million upfront payment plus the $12.5 million in reduced royalties, minus estimated "technical transfer costs" for moving the manufacturing of the product from Forest to Mylan. (*Id.* at ¶ 30).

Marchetti then explored whether Forest expected to recoup the "costs" it paid Mylan; but she focused primarily on whether Forest saved money *by offloading manufacturing costs*. She concluded that Forest did not anticipate recouping manufacturing costs that were anywhere close to the amount it paid as part of the settlement. By her calculation, Forest was saving only $1.2 million to $2 million by transferring the manufacturing of Lexapro to Mylan. (*Id.* at ¶¶ 59-60). In her view, these minimal "saved" costs did not justify the payments made to Mylan and thus the Amendment did not constitute "fair value."

Forest primarily moves to **[*35]** exclude this opinion on "fair value." It notes that Marchetti has no training or experience in "business valuation" — a fact that SBA concedes — and argues that she has never before offered an expert opinion on valuation of any sort, let alone the fair value of a business transaction involving intellectual property rights. Forest's expert, Philip Green — who does have considerable business valuation experience — observes that, in making her cost/benefit calculations, Marchetti focused only on possible manufacturing savings from the Lexapro Amendment but completely ignored certain other anticipated benefits to Forest. These included a large reduction in anticipated Medicaid liabilities by offloading the manufacture of Lexapro AG to Mylan, *see* Section I.E, *supra*, as well as Forest's expectation of what it could earn during a second year of profit sharing from the Amendment's one-year extension.

In short, Forest argues that Marchetti's conclusion on "fair value" does not encompass all that should be considered — from a legal standpoint — when evaluating whether a reverse payment was "large" and "unexplained." I agree.

In an opinion that has long bedeviled district courts, the Supreme Court's **[*36]** *Actavis* decision held that reverse-payment settlements could be challenged as violative of the antitrust laws, but also explained that there could be justifications for reverse payments other than buying off potential competitors. Therefore, the Court declined to hold that reverse-payment settlements were *per se* unlawful — only "large and unjustified" payments were subject to antitrust scrutiny. *Actavis, 570 U.S. at 158*.

In this case, the payment to Mylan (inclusive of the Lexapro amounts) is sufficiently large, on its face and in the absence of any explanation, to trigger *Actavis* scrutiny. Indeed, when compared to the rest of the reverse-payment settlements Forest entered into to stave off challenges to the '703 Patent — all of which settled for between $150,000 and $2 million — the Lexapro Amendment's payment of upwards of $30 million to Mylan appears to be inexplicably large. ***HN10***[] But where, as here, the payor (Forest) offers justifications for the payment aside from suppressing competition, there exists a question of fact as to whether the payment is "unjustified." As *Actavis* put it, while "parties may have reasons to prefer settlements that include reverse payments, the relevant antitrust question is: What are those **[*37]** reasons? If the basic reason is a desire to maintain and to share patent-generated monopoly profits, then, in the absence of some other justification, the anti-trust laws are likely to forbid the arrangement." *Ibid.* Put otherwise, if the reasons proffered by the parties are not persuasive to the trier of fact to justify the payment, then a large reverse payment likely means there has been an antitrust violation.

But contrary to Marchetti's assertion, the issue is not whether Forest's payment is "unjustified" in relation to "the services Mylan agreed to deliver." (*Id.* at ¶ 31), Rather, the question is whether, weighing the costs and benefits to both parties, the payment can be explained for reasons other than solely keeping Mylan out of the market. Nothing from *Actavis* limits the acceptable "reasons" for making a reverse payment to only compensating for "services" a payor receives — in this instance, to saved manufacturing costs. Savings from elsewhere could also be an economically rational factor in deciding to settle. If Marchetti's formulation were correct, anticipated litigation cost savings — a well-known reason why parties who believe they are likely to win lawsuits choose to settle **[*38]** — could never be invoked as a justification for settling a patent case with a reverse payment. Nor could anticipated Medicaid savings. I do not read *Actavis* so narrowly.

This Court is already on record, in the direct-purchasers' case, stating that any value Forest obtained from the Lexapro Amendment, whatever its source, must be factored into an *Actavis* analysis. *See* *In re Namenda Direct Purchaser Antitrust Litig., No. 15-cv-7488 (CM), 2019 U.S. Dist. LEXIS 204827, 2019 WL 6242128, at *10 (S.D.N.Y. Aug. 2, 2019)* ("The jury will be allowed to consider evidence of the value of the Lexapro Amendment to Forest — whatever the 'source' of that value — in its evaluation of whether the settlement payment was 'large' or 'for fair value.'"). The jury in this case will be similarly instructed, and it will be for the jury to decide whether the benefits Forest claims to have received from its deal with Mylan really were benefits as claimed.

The core flaw of Marchetti's report is her assumption that the value of the Lexapro Amendment to Forest must be measured only by the cost of shifting the manufacture of Lexapro AG to Mylan. Forest disclaims that manufacturing cost savings were its only consideration, and Marchetti has essentially given no opinion about some of Forest's other stated sources of "benefit" (i.e., Medicaid savings). In the view **[*39]** of this Court, she cannot simply dismiss them out of hand — *Actavis* recognized that it was possible to settle litigation for various things of value. *See* [570 U.S. at 158] ("The fact that a large, unjustified reverse payment risks antitrust liability does not prevent litigating parties from settling their lawsuit; they may, as in other industries, settle in other ways.").

I thus conclude that Marchetti's opinion on what is essentially the ultimate issue in the case — that the "Amended Lexapro Agreement did not represent 'fair value' to Forest since effectively all of the gains from the agreement benefitted Mylan — not Forest" (*Id.* at ¶ 121) — is unlikely to be of assistance to the trier of fact, because that is not based on the proper standard for measuring benefits to a reverse payor when applying *Actavis*. Marchetti's opinion that the Lexapro Amendment was not "fair value" thus cannot be accepted into evidence.

But that does not mean that the rest of Marchetti's opinions must also be excluded.

I reject Defendants' argument that Marchetti's testimony should be stricken in its entirety because she lacks training or experience in business valuation. As Forest's own expert, Philip Green, attested in his **[*40]** report, "*The fairness of a transaction is not the same as a business valuation for transaction purposes*. Fairness considers the relative payments and benefits to both parties to a transaction." (Green Rep. at ¶ 26 (emphasis added)). It thus seems to me beside the point that Marchetti has no formal training or experience in business valuation. Marchetti is not being asked to value a business. She is being asked her views on the value of what Forest got for conferring over $30 million in benefits on Mylan. Although she cannot opine that the value was "fair" or not, she can provide her assessment of the value of what Forest received in return. After 35 years in the pharmaceutical industry, including stints as the Chief Operation Officer at one pharmaceutical company and managing the product life cycle and product launches at others, Marchetti's extensive practical experience qualifies her to opine on the value of what Forest was getting in exchange for what it paid — including the amount that it saved in manufacturing costs. It is simply the ultimate conclusion that I will not allow, because Marchetti's ultimate conclusion is predicated on a misreading of *Actavis*.

That being so, to the **[*41]** extent that Marchetti's testimony (especially in her rebuttal report) takes issue with Forest's assertions of value received as a result of the Lexapro Amendment, her expert testimony is admissible, because it would help the jury decide whether Forest's claimed benefits are legitimately worth what Forest contends they are worth. For instance, Marchetti takes issue with the way Forest values both what it got from Mylan and what it got from other sources, including cost savings. She opines that the Lexapro Amendment's one-year extension of the term of the contract was essentially worthless because it would not have been financially sensible for Mylan to stop selling Lexapro AG after just one year. (Marchetti Rebuttal at ¶¶ 16-17). In other words, the "value" of the extended year of the contract to Forest was zero because Mylan would have continued the agreement into a second year regardless of whether it had been contractually obligated to do so.

This conclusion contrasts with that of Forest's experts, who opine that there was considerable value (from royalties) in the additional year. But Marchetti gives perfectly sensible reasons for her opinion — testimony that she is qualified to **[*42]** give. The fact that Marchetti's opinion differs from the opinions of Forest's experts is not a reason to exclude her testimony; and her extensive experience in the pharmaceutical business qualifies her to criticize Forest's reasoning. Such disputes are the stuff that expert battles are made of; disagreements between experts rarely if ever justify *Daubert* exclusions (although they are too often the basis for *Daubert* motions). In particular, there is no reason to strike Marchetti's opinion that the payment of $20 million is well in excess of what is common "in the pharmaceutical industry for the transfer of technology and manufacturing responsibilities," especially since she offers cogent reasons why the benefits Forest received for that $20 million was less. (*Id.* at ¶ 40).

Marchetti is also indubitably qualified to opine on the first two questions she was asked; her long experience in supply chain management so qualifies her. Recognizing this, Forest asks that the Court exclude her testimony relating to saved manufacturing costs and manufacturing capacity on the ground that Forest has never asserted that these things were the "primary reason" it entered into the Lexapro Amendment. I **[*43]** assume that Forest chose to insert the word "primary" in that sentence (which I take directly from its brief) advisedly. I will respond in kind: As long as saved manufacturing costs and/or manufacturing capacity were *any part* of the reason why Forest entered into the Lexapro Amendment — primary, secondary, tertiary, or even the last reason — those things are fair game for the sort of analysis that Marchetti provides.

Thus, except to the extent that Marchetti opines on the ultimate question in the case — that Forest did not receive "fair value" for its reverse payment — her report will not be stricken from the summary judgment record, and the Court will consider her testimony in deciding the motion.

Defendants' motion to exclude is granted in part and denied in part consistent with this opinion.

C. Defendants' motion to exclude the opinions of Thomas McGuire is granted in part and denied in part

Defendants move to exclude the opinions of SBA's economist Thomas McGuire, on largely the same grounds as they sought to exclude Marchetti's opinions on "fair value." For the same reasons, Defendants' motion is granted in part and denied in part.

McGuire is a professor of Health Economics in the **[*44]** Department of Health Care Policy at Harvard Medical School. The parties do not dispute that he is eminently qualified to offer opinions on economics, but — as discussed below — he is not qualified to offer legal opinions or to base certain ultimate conclusions on a legal opinion that differs from the law as the Court will give it to the jury.

McGuire was asked to "conduct an economic analysis of the settlement between Forest and Mylan . . . in order to address the question of whether or not the [Lexapro Amendment] included an anticompetitive reverse payment." (McGuire Report at ¶ 2). He was also asked whether — if the Amendment was anticompetitive — there nonetheless were "any procompetitive justifications . . . that outweigh the anticompetitive impacts." (*Ibid.*). He concluded that the Amendment was anticompetitive, and that there was "no explanation for Forest's reverse payment well in excess of its avoided litigation costs." (*Ibid.*). Defendants seek to exclude this opinion.

Like Ms. Marchetti, McGuire analyzes whether the benefits Forest expected to receive from the Amendment justified the roughly $30 million payment it made to Mylan. But instead of focusing on the manufacturing and **[*45]** transfer "services" that Mylan provided (Marchetti's focus), McGuire opines on the expected costs and benefits associated with the litigation surrounding the '703 Patent.

McGuire believes that for Forest, settling the lawsuit offset certain litigation costs it expected to incur for continuing to defend the '703 Patent. These offset litigation costs totaled only around $3 million. (*Id.* at ¶ 103). For Mylan, a settlement would necessarily preclude the ability to earn profits from winning its Paragraph IV challenge — but these expected profits totaled only around $0.9 million spread over four years. (*Id.* at ¶ 106). McGuire thus concludes that Forest's expected saved litigation costs did not justify its payments to Mylan, but instead indicated "a large, unexplained reverse payment," which was a "means to induce Mylan to delay generic entry." (*Id.* at ¶¶ 103, 114).

Most critically for purposes of this *Daubert* motion, McGuire spills considerable ink opining on what he believes constitutes a "large and unjustified" reverse payment. He interprets *Actavis*, which he views as standing for the proposition that "If the reverse payment exceeds any avoided litigation costs, we can infer that the brand must be getting higher **[*46]** profits from the settlement than it would with litigation (because if the brand expected higher profits with litigation, it would litigate)." (*Id.* at ¶ 76). In other words, McGuire believes that a reverse payment is anticompetitive if the payment exceeds the anticipated future litigation costs of continued defense against the Paragraph IV challenge. Most of Section V.A in his opening report is dedicated to supporting this view. While other justifications — like the ones proffered by Forest (i.e., reduced Medicaid liability) also matter — McGuire's calculations ignored them.

Defendants thus argue that the McGuire's opinions on the fair value of the Lexapro Amendment should be excluded because it does not conform to the relevant legal principles. I agree. McGuire's opinions regarding the ultimate issue in the case — whether the Lexapro Amendment was a "large and unjustified" payment — are excluded for the same reason that Marchetti's opinions on such matters are excluded.

McGuire's conclusions rest on an erroneous reading of *Actavis*. He ignores the fact that Forest justifies the payment on the ground that the new Lexapro arrangement would result in several benefits to its financial position **[*47]** *in* *addition to* saved litigation costs, which — from Forest's point of view — "justified" a "large" payment to settle the Paragraph IV lawsuit. For example, Forest claims that it expected to save at least $26.5 million in reduced Medicaid liabilities from the arrangement, but McGuire ignores these benefits in his analysis.

SBA is free to argue that these claimed savings did not in fact result in the economic benefits that Forest ascribes to them, and the trier of fact will ultimately conclude whether Forest's purported justifications were the real reason for settling the lawsuit on the terms chosen, or whether the real reason was suppression of competition. But the jury will not be instructed that the "justification" for a large payment must be limited in the way that McGuire has chosen to limit it. It will not be told that *Actavis* limits the justification for a reverse payment to saved litigation costs, or that saved litigation costs are the only quantitative measure of the size of the payment. In fact, the jury will be told exactly the opposite — that nothing in *Actavis* as this Court reads the case limits reverse payments to saved litigation costs. For Dr. McGuire, this eliminates **[*48]** the portion of his testimony that is summarized in Section "V.A" of his report.

McGuire also opines that the agreement was not a "competitive compromise," and that the Lexapro Amendment was designed to delay competition because Mylan would never have made as much money by winning the Paragraph IV lawsuit as it made via the reverse payment. To the extent that McGuire opines that Mylan stood to make more by settling than by winning the lawsuit (which seems a self-evident proposition), he can explain that to the jury; such testimony does not run afoul of the Court's reading of *Actavis* because it goes to the value of the payment to one of the parties. It may, therefore, be evaluated by the jury for what it is worth. That is, McGuire may say that the best case scenario for Mylan in the absence of a reverse payment, was "a win in the patent litigation allowing them, along with the other first filers with final approval, to sell generic Namenda beginning around October 1, 2011, and for 180 days thereafter, before other generics could enter." (*Id.* at ¶ 104). And he may say that the reverse payment left Mylan better off than the best-case litigation scenario.

McGuire may also offer opinions about **[*49]** the expected value of the settlement to Mylan. For example, he states that — had Mylan prevailed in its Paragraph IV challenge — its "expected profits from selling generic Namenda [would have been] small, $0.9 million in profit over a period of approximately four years and negative thereafter." (*Id.* at ¶ 101). This low amount of expected profit is due in part to the fact that the MFN/acceleration clauses contained in the reverse settlements permitted all of the generic manufacturers to launch its generic whenever any other generic manufacturer launched its version. Thus, the expected profits from generic Namenda IR would have been split among many different companies. McGuire is eminently qualified to explain this to the jury and offer his opinion of how that number compares to the economic value of the Lexapro Amendment.

However, he may not offer the ultimate conclusory opinion that "no compromise has been made, rather, Mylan has been paid to induce it to accept a delayed entry date." (*Ibid.*). The reason is that this conclusion rests on SBA's unsound reading of *Actavis* — specifically on the argument that only the value of the settlement to the settling generic (Mylan) can be considered **[*50]** under the reasoning of the Supreme Court (*see* Section III.B.2, *infra*). It will be left to the jury to make the decision about the value of the settlement to the settling parties (assuming, of course, that the Paragraph IV settlement and Lexapro Amendment constitute an integrated deal, *see* Section III.C, *infra*). McGuire's view of the situation adds nothing to the jury's ability to evaluate the evidence; his ultimate opinion rests in significant part on SBA's misreading of *Actavis* and on Marchetti's calculations, to which he tries to add an economist's gloss.

For these reasons, Defendants' motion to exclude McGuire's opinions is granted in part and denied in part consistent with this opinion.

D. Defendants' motion to exclude the opinions of Jacob Holzer is denied

SBA offers Holzer as a prior art witness. He was asked to opine on whether "as a person of ordinary skill in the art, it is [his] opinion that prior art references establish that memantine was used to treat Organic Brain Syndrome and Alzheimer's Disease Prior to April 14, 1989" — the date when Merz first filed the application that ultimately led to the '703 Patent. (Holzer Report at ¶¶ 15, 41).

Dr. Holzer has over thirty years' experience **[*51]** as a practicing psychiatrist. He has completed fellowships in neuropsychiatry and behavioral neurology at Yale and Harvard, and he has an appointment as an instructor at Harvard Medical School. He has also served as a consultant for Eli Lilly, a pharmaceutical company. Dr. Holzer currently serves as a Clinical Staff Associate of Geriatric Psychiatry Outpatient Services at McLean Hospital, and as a Staff Psychiatrist at Spaulding Rehab Hospital. As part of his work, Dr. Holzer treats patients suffering from a broad range of neurological disorders, including Alzheimer's.

In total, Holzer reviewed six clinical studies dating prior to April 14, 1989 that relate to the effects of memantine on patients with brain disease. These studies involved different patient sizes and timelines, but all focus on the effects of memantine and whether it could be used to treat certain brain conditions. Holzer goes into detail about how the studies were conducted, the characteristics of the patients involved, and the studies' conclusions. His review of the literature led him to conclude that "prior art references establish that memantine was used to treat . . . Alzheimer's Disease prior to April 14, 1989." **[*52]** (*Id.* at ¶ 87). Forest seeks to exclude this opinion.

Holzer is not a lawyer and does not purport to give legal conclusions. But his opinions on prior art are probative of the strength of Mylan's Paragraph IV challenge to the '703 Patent. A conclusion that memantine was used to treat Alzheimer's prior to 1989 means that the knowledge contained within the '703 Patent arguably already existed in the public domain prior to its being patented — which might have strengthened Mylan's Paragraph IV challenge. *See, e.g.,* *Papyrus Tech. Corp. v. New York Stock Exchange, LLC, 653 F. Supp. 2d 402, 414 (S.D.N.Y. 2009)* ***HN11***[] ("A patent claim may be held invalid if it is anticipated or made obvious by prior art.").

Dr. Holzer easily qualifies as a "Person of Ordinary Skill in the Art (POSA)" of treating Alzheimer's, and he is qualified to opine about what a POSA would have understood about using memantine to treat Alzheimer's prior to 1989 through his review of the pre-1989 studies.

Forest objects to Holzer's testimony on the ground that the studies he reviewed do not focus exclusively on Alzheimer's patients, but rather on persons suffering from both Alzheimer's *and* Organic Brain Syndrome more generally. Forest argues that this renders Holzer's opinions too broad and contravenes the *Markman* ruling from the Delaware District **[*53]** Court, which it argues rejected Mylan's proposal to define "Alzheimer's" as extending to OBS.

This characterization is inaccurate. As Dr. Holzer notes, Alzheimer's is just one form of OBS, and so if the studies referenced a potential benefit of memantine to patients suffering from OBS generally, the natural implication is that it would necessarily be beneficial to Alzheimer's patients as well. (Holzer Rebuttal at ¶ 8). Regardless, his opinions on Alzheimer's and OBS do not contradict the Delaware court's claim construction; in fact, they do not address the claim construction at all, and there is absolutely no reason why he needed to have read the *Markman* decision to form his opinions. He opines only about what a POSA in 1989 would have understood from the prior art — nothing more. He believes that a POSA would have understood that using memantine to treat OBS encompassed the treatment of Alzheimer's prior to 1989 because Alzheimer's is and at that time was one of the most prevalent forms of OBS. Holzer offers no opinion about the scope of the '703 Patent's claims or the validity of the patent. His opinion is limited to what a POSA would have understood, from the literature in existence at the **[*54]** time Merz filed for what became the '703 Patent, about the use of memantine to treat Alzheimer's. He is eminently qualified to offer that opinion.

The fact that the subjects in the studies were not, or may not have been, limited to persons who definitively had Alzheimer's — as opposed to some other form of OBS — is a matter to be taken up on cross examination and goes to the weight of Dr. Holzer's opinion, not to his ability to offer it. However, it is the Court's understanding that, even today, it is not possible to diagnose Alzheimer's definitively over other forms of OBS until after the patient's death, when the brain can be autopsied — and that was certainly the case prior to 1989, which is the relevant period for our purposes. If my understanding is correct (and that statement comes from the National Institutes of Health[4]), the fact that a POSA cannot be absolutely certain that a person suffering from dementia has Alzheimer's, as opposed to some other form of OBS, might well affect how a POSA interprets studies in which patients were not classified by the form of OBS from which they suffered. Such matters are appropriate for exploration at trial; they are not a basis to exclude under *Daubert* ***[*55]*** .

The motion to exclude is denied.

Plaintiff's Motions to Exclude Defendants' Experts

E. SBA's motion to exclude the opinions of Philip Green is denied

Defendants' expert Philip Green is a foil to SBA's expert Susan Marchetti in that he offers views on the "fair value" of the Lexapro Amendment that directly contradict hers. Since October 1996, Green has served as a founding principal of the consulting firm Hoffman Alvary & Company LLC, where he is regularly involved in the valuation and licensing of intellectual property, including patents related to pharmaceuticals. His work encompasses the valuation of intellectual property transactions and providing opinions on the fairness of the compensation provided.

Defendants asked Green to "evaluate financial aspects" of the Lexapro Amendment and to "respond as necessary" to the reports of SBA experts Susan Marchetti and Thomas McGuire. (Green Report at ¶¶ 1, 2). Green supplied a substantially similar expert report as part of the direct-purchaser litigation. The Plaintiffs in that case did not file a *Daubert* challenge to Green's report.

Green's report is like Marchetti's in that he attempts to calculate the value of the Lexapro Amendment **[*56]** to Forest. But his analysis is broader. Instead of determining only the value of the services that Mylan provided Forest, Green itemizes the specific benefits/costs that each party expected to receive to see if the Amendment was "fair" for both sides. For example, Green, like Marchetti, calculates that the Lexapro Amendment decreased the amount of profit-sharing royalties that Forest expected to receive from Mylan by $12.5 million (*Id.* at ¶ 49); but unlike Marchetti, he concluded that Forest also "reasonably expected to gain $21.1 million in net profit share in the second year of the agreement due to the minimum term extension included in the amendment." (*Id.* at ¶ 55). Green thus believes that Forest's expected profit share benefits *increased* as part of the Lexapro Amendment — to a net of $8.6 million over the first two years of the new arrangement ($21.1 million minus $12.5 million). (*Id.* at ¶ 91). The additional profit share from year two differs from Marchetti's conclusion that there was no "reasonable expectation that sales of the Lexapro AG could have been sold at a profit by year two." (Marchetti Report at ¶ 113).

Green also calculates another net benefit to Forest that Marchetti **[*57]** does not — the expected effect on Medicaid liabilities. As discussed, legislative and administrative changes to Medicaid altered the regulatory landscape underpinning the original Lexapro Agreement. Green observes that by shifting the manufacturing of Lexapro AG to Mylan, "Forest forecast $26.5 million in Medicaid best price liability savings." (Green Report at ¶ 75). Thus, in his opinion, the total net benefits that Forest expected to receive from the Lexapro Amendment — without any consideration of saved litigation costs — would have been around $15.1 million ($26.5 million in reduced Medicaid liabilities plus $21.1 million in second-year profit, minus the $20 million upfront payment, minus the $12.5 million in decreased first-year profit share). (*Id.* at ¶ 83).

Green performs a similar analysis for Mylan, concluding that — despite it receiving an additional $12.5 million in net profit from the renegotiated agreement — its potential loss of 100% profit (if it terminated the agreement) in the second year due to the extension resulted in a total net loss from the Amendment of $19.2 million. However, this

[4] *See* How is Alzheimer's Disease Diagnosed, National Institute on Aging, https://www.nia.nih.gov/health/how-alzheimers-disease-diagnosed (last visited June 10, 2021) ("It's important to note that Alzheimer's disease can be *definitively* diagnosed only after death, by linking clinical measures with an examination of brain tissue in an autopsy.").

was offset by the $20 million upfront payment such that the total expected net benefits **[*58]** to Mylan as a result of the Lexapro Amendment was a net gain of $0.8 million. (*Id.* at ¶ 83).

These calculations led Green to conclude that — because the net benefits to each side exceeded the costs — the Lexapro Amendment "constitutes fair value." (*Id.* at ¶ 33). It is this opinion and the calculations leading to this opinion that SBA seeks to exclude.

SBA seeks to exclude Green's opinions on the basis that he incorrectly included anticipated benefits from reduced Medicaid liabilities as part of his analysis. SBA insists — as it does with its defense against Defendants' *Daubert* motions against Marchetti and McGuire — that the relevant *Actavis* question is what *Mylan* stood to profit from the deal, rather than what benefits Forest anticipated from the deal.

This motion can be disposed of quickly. It is denied because SBA's motion is predicated on an incorrect premise. Mr. Green does not run afoul of the Court's prior ruling on what can be considered in assessing the value of the settlement to Forest and Mylan — the error that renders Marchetti's and McGuire's ultimate conclusions inadmissible. It is SBA, not Green, who runs afoul of *Actavis* by insisting that any analysis must be limited to **[*59]** the "services rendered" by Mylan to Forest — a concept that appears nowhere in the *Actavis* decision.

Moreover, SBA's arguments are a classic example of the "his expert doesn't agree with my expert, so we must exclude his expert's testimony" school of *Daubert* motions. Mr. Green — whose credentials as an expert in valuation are unchallenged — offers his opinion about what value Forest obtained by entering into the Lexapro Amendment as part of that settlement. In the admissible portions of her testimony, Ms. Marchetti takes issue with a number of Green's conclusions about the "value" of specific items to a patent holder in Forest's position. She will be allowed to testify that Green's opinion is not worth the paper on which it is written. But the "errors" to which SBA points in its motion to exclude are really nothing more than differences of opinion that undergird any battle of the experts. The trier of fact can decide whether Ms. Marchetti's objections to Mr. Green's opinions are valid and whether his ultimate conclusion is to be accepted or not. Green's opinions are admissible, SBA's motion is denied.

F. SBA's motion to exclude the opinions of Lona Fowdur is granted in part but principally [*60] denied

Lona Fowdur is an economist. Her areas of specialization include antitrust analyses and industrial organization. Her work consists of analyzing market definition and the competitive effects of mergers and other corporate transactions.

SBA does not contest that Fowdur is qualified as an economist but criticizes her conclusions, again based on its misinterpretations of *Actavis*.

Fowdur was asked to address the potential harms and possible damages associated with SBA's claims. Her report largely responds to the opinions of Plaintiff witnesses, including Marchetti and McGuire as well as those of Dr. Russell Lamb and William Vogt (whose opinions were key in determining class certification). Most of her analysis focuses on the class-wide impacts of the hard switch. Since the hard switch theory was not certified for class treatment, those opinions are now irrelevant and need not be addressed.

As to the reverse payment theory, Fowdur first offers her opinions on the *Actavis* decision, and how the decision is "consistent" with the principle that "there is no reasonable economic basis to infer an anticompetitive settlement when payments to the generic manufacturer approximate or are less than **[*61]** the brand's likely avoided litigation costs." (Fowdur Report at ¶ 36). She then uses these conclusions to critique how Marchetti's and McGuire's opinions misapply the decision and are therefore unreliable. For example, she claims that McGuire "inappropriately narrow[s] the elements considered to be traditional settlement considerations under his interpretation of [] *Actavis*." (*Id.* at ¶ 47).

Apart from these legal opinions, Fowdur also draws on her economics background to evaluate the economic rationality of Forest's payments. She bases her opinions from the calculations performed by Philip Green. Based on her expertise, Fowdur concludes that "Forest's payment for the Lexapro Amendment was economically rational and fully explained by the benefits that it expected to receive," and that "Forest would expect the Lexapro Amendment to make economic sense." (*Id.* at ¶¶ 69-71). Fowdur also criticizes the claims of Marchetti and McGuire — for example, by taking issue with Marchetti's conclusion that the additional second year extension from the Lexapro Amendment was practically worthless. (*Id.* at ¶¶ 72-87).

Fowdur's testimony is admissible insofar as it contests and criticizes specific opinions **[*62]** propounded by Forest's experts. Her views antithetical to Marchetti's and McGuire's provide a classic battle of experts, and SBA does not appear to contest Dr. Fowdur's ability to do this.

What SBA seeks to preclude are Fowdur's interpretations of *Actavis*, and the conclusions (principally contained in Sections VII.B, C) that rely on that interpretation. That aspect of the motion is granted — but not for the reason argued by SBA.

SBA's motion is predicated on the notion that *Actavis* limited the value of reverse payments to "avoided litigation costs or the fair value of services" rendered by Mylan to Forest. *Actavis, 570 U.S. at 156*. It did not. As this Court has now repeatedly noted, *Actavis* did not limit the allowable economic effects of reverse payments to those two items; rather, it used them as illustrations of considerations that might impel settlement (hence its use of the phrase "such as" before mentioning those two items). *Ibid.* As far as I am concerned, it is SBA whose interpretation of *Actavis* is legally erroneous.

Nonetheless, this aspect of the motion is granted, but only because no expert, for either side, will be allowed to explain *Actavis* to the jury. The Court will interpret the case for the jury. **[*63]** To the extent any expert's testimony contradicts that interpretation, it will be disallowed. But the rest of Fowdur's opinions are admissible. SBA's motion is granted in part but principally denied.

G. SBA's motion to exclude the opinions of Sue L. Robinson is granted in part and denied in part

Ms. Robinson is a retired judge who served for more than twenty-five years on the United States District Court in the District of Delaware, where she presided over many a patent trial. She served as Chief Judge of that district from 2000 to 2007.

Robinson was asked by Defendants to provide background on how patent trials are conducted in the District of Delaware, where Mylan's Paragraph IV challenge took place. She reviewed the record from the Paragraph IV litigation and the merits of the claims and defenses from each side to evaluate the strengths and weaknesses of Forest's and Mylan's positions. She also responded to the opinions of Plaintiff expert Michael A. Davitz, who similarly opined on the merits of the litigation for each side. (Robinson Report at ¶ 13).

SBA argues that Robinson lacks the unique knowledge to opine as an expert on patent litigation, claiming that she has never practiced **[*64]** as a patent attorney before becoming a judge. SBA also criticizes Robinson for offering opinions about how Forest or Mylan would have litigated the case if it had gone to trial, and also how the judge presiding over the case, Judge Sleet, would have ruled on certain evidentiary issues or would have perceived certain arguments. SBA claims that these opinions are outside her scope of expertise.

SBA's motion is granted in part and denied in part.

This Court is second to none in its acknowledgement of Judge Robinson's expertise where patent law is concerned, as well as her expertise in how patent cases are tried. But we do not need an expert in patent law or patent trial procedure in this case. So, the first thing that I must make clear is that Judge Robinson will not be allowed to express any opinions about *Actavis* or her understanding of it. Fortunately, in her report, she disclaims any such intent.

I also do not see the need for extensive testimony about how a trial that never happened would have been conducted by another judge of Judge Robinson's court, who may or may not have followed the procedures or reached the conclusions that Judge Robinson would have reached had she been the presiding **[*65]** judge in the Mylan Paragraph IV case. These are, however, matters for another day.

As for her other opinions, Robinson is well qualified to criticize Dr. Davitz's methodology and conclusions, and I will allow her to do so. For example, she notes that the judges of the District of Delaware are exceedingly well qualified to try patent cases — because they try so many of them — and points out that generics succeeded just 36% of the time in courts with large patent dockets (i.e., Delaware, New Jersey and the Southern District of New York). (*Id.* at ¶ 45). She also observes that Davitz's statistics include settlements as "wins" for generics, a conclusion with which she understandably disagrees. (*Id.* at ¶ 47). She notes that Davitz's opinions give great weight to witness testimony from the Paragraph IV litigation that is amenable to cross examination on identifiable grounds, and that the testimony appears to be internally contradictory.[5] As long as she is responding to Davitz's opinions by criticizing the factors he considers in reaching his "70% success rate" conclusion, her testimony is admissible.

As the former Chief Judge in Delaware, Robinson is familiar with the practices of her colleagues **[*66]** in conducting Paragraph IV cases.[6] She is thus also in a position to criticize Davitz's conclusions about the timing of the Paragraph IV case. Indeed, in that regard, she is arguably not testifying as an expert at all, but as a fact witness. Her testimony on this subject is perfectly acceptable.

But the critical part of Robinson's testimony is her assessment of the strength of Forest's and Mylan's case on the merits, which she bases principally on her review of the pre-trial record in the Paragraph IV litigation. However, part of her conclusions come from her views of how Judge Sleet — the judge presiding over the litigation — would have ruled on certain motions, or how he would have viewed certain arguments. (*E.g., Id.* at ¶¶ 47, 107, 109). Robinson cannot predict how Judge Sleet would have ruled; such testimony is off limits, from anyone, including especially a former colleague. Therefore, statements such as, "Judge Sleet would likely not have found this or that credible" cannot and will not be permitted. (*See, e.g., Id.* at ¶ 109).

Part of her assessment is based on Judge Sleet's "track record" in patent cases. For example, Robinson notes that, as of 2010, Judge Sleet ruled against generic **[*67]** drug manufacturers in two cases and had not ruled in favor of any. (*Id.* at ¶ 47). But this has absolutely no bearing on the likelihood of whether he would have ruled against Mylan in a totally different case. Thus, to the extent that Judge Robinson's views about the likelihood of Mylan's success are predicated on her consideration of Judge Sleet's "track record" in patent cases, her opinions may not be offered or considered. I am certain that Judge Robinson did not mean to suggest that Judge Sleet was not entirely open-minded about each new case that came before him, or that he had some sort of predisposition to rule against generic drug manufacturers. Unfortunately, her testimony about a former colleague could easily be interpreted in that way, so I will not allow a jury to consider it.

But other aspects of her testimony are admissible. Robinson reviewed an extensive evidentiary record — depositions, documents produced, papers filed, and decisions and orders of the court — that was available to the parties and to any lawyer who would have been advising Forest or Mylan on its chances of winning the case. It would have been malpractice to not be familiar with that record; and a patent **[*68]** lawyer (Davitz) or judge (Robinson) are both well-positioned to opine on the strength of the evidence supporting particular arguments. And while neither Judge Robinson nor anyone else (Davitz, for example) can employ the word "credible" when discussing a witness's testimony — because no one can assess credibility without seeing the witness and listening to both direct and cross examination — she is perfectly free to point out things in the record as it existed at the time

---

[5] Of course, since the witnesses never actually testified, we cannot know whether a seeming internal contradiction was not a contradiction at all, or whether it could be explained in a way that would appeal to the common sense of the trier of fact.

[6] That is because Chief Judges get statistics about their colleagues' work, not because Chief Judges have any power to control their colleagues' dockets, to assign them work, to supervise their work, or to require that they complete their work in a timely manner—all points that I, as a former Chief Judge, would insist be made if the jury were to become aware that Ms. Robinson had been Chief Judge. The title "Chief United States District Judge," as I learned during my term, is highly misleading to the uninitiated — especially since Chief Judges in the several states tend to have a great deal of power over the conduct of business in their respective courts. Chief United States District Judges do not.

of the Forest-Mylan settlement that would have provided fodder for cross examination at a trial — even though we cannot know how that cross examination would have played out (*see* n.5, supra).

But the only things on which expert testimony about the relative merits of each party's case can be based are those that Forest and Mylan were able to consider when evaluating whether to settle the lawsuit. Ergo, Robinson cannot factor into her assessment things that Forest and Mylan did not know about in 2010 and could not possibly have known in 2010 — like the contents of internal documents of another generic manufacturer (Dr. Reddy's) discussing *its* decision to settle. (*Id.* at ¶¶ 75-76). Those items did not come to light until **[*69]** discovery in this litigation, so a reasonable patent attorney advising a client in 2010 could not possibly have factored them into his or her equation. The fact that generics other than Mylan settled soon after the *Markman* decision is an objective fact that existed in 2010, and that an expert might well believe was suggestive of Forest's having a strong case in light of claim construction.[7] But the internal discussions about settlement at another firm — discussions to which Forest and Mylan were not privy — are not factors that a competent patent attorney advising Forest or Mylan in 2010 could have considered, and are not indicative of what Forest or Mylan would have considered or viewed. How other generic manufacturers viewed the relative strength of their position is not indicative of how *Forest* or *Mylan* viewed their positions. I will not allow such factors to serve as the basis for expert testimony on the only subject in which the trier of fact in this case is interested: did *Forest* and *Mylan* have a reason other than suppression of competition to settle their Paragraph IV lawsuit on the terms they reached in 2010.

In sum, Robinson will be permitted to testify about: (1) critiques **[*70]** to Davitz's methodology insofar as they pertain to the procedural aspects of the District of Delaware and; (2) her views on the strengths and weaknesses of the merits of Mylan's Paragraph IV challenge based off of her experience as a patent judge.

She will not be permitted to testify about: (1) the "credibility" of witnesses; (2) facts that neither Forest or Mylan would have been aware of in 2010; and (3) Judge Sleet's views or "track record" on patent cases, or how he would or would not have ruled on certain motions or how he would have viewed certain arguments. SBA's motion to exclude is granted in part and denied in part in accordance with this opinion.

III. SUMMARY JUDGMENT MOTIONS

SBA alleges four[8] substantive state-law claims against Forest and Merz. Count I alleges unlawful monopolization and maintenance of monopoly power through the reverse payments to generics (focusing on the Lexapro Amendment) and the hard switch theory, as to which no class has been certified. Count II alleges conspiracy-to-monopolize and restraint-of-trade claims based on the reverse payments. Count III alleges state consumer-protection and unfair-competition claims, and Count IV alleges claims under state **[*71]** common law principles of unjust enrichment.

There are three motions for summary judgment before the Court: (1) Forest's motion for summary judgment on all counts against it; (2) Merz's motion for summary judgment on all counts against it; and (3) SBA's motion for partial summary judgment on Count I against Forest.

A. Legal standards

---

[7] It is my understanding that the Court of Appeals for the Federal Circuit reverses district court claim construction decisions about 50% of the time. It could of course be that reversal is less likely for Delaware judges; that datum is not in the record. But the nationwide reversal rate is quite well known among district court judges. And a 50% reversal rate makes it a coin toss whether such interesting constructions as the one adopted by Judges Stark and Sleet about "cerebral ischemia" (a common medical term for the interruption of blood flow to the brain, a/k/a stroke) would have withstood an appeal.

[8] There is also a fifth count for declaratory relief, seeking the Court to declare that "Defendants' conduct seeking to prevent competition" constituted illegal monopolization. (ECF 326 at ¶ 246). Its fate hinges on the fate of the other claims and it is probably not a form of relief the Court will be inclined to award.

HN12[] Summary judgment is appropriate if the moving party can demonstrate that there is no "genuine issue of material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*; *see also* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. In deciding a summary judgment motion, "The court must view the evidence in the light most favorable to the party against whom summary judgment is sought and must draw all reasonable inferences in [its] favor." *L.B. Foster Co. v. Am. Piles, Inc., 138 F.3d 81, 87 (2d Cir. 1998)*. Whether any disputes of fact remain after the evidence is considered is a matter for the court. "Only disputes over facts that might affect the outcome of the suit under the governing law will properly preclude the entry of summary judgment." *Anderson, 477 U.S. at 248*.

While SBA's claims are brought under a variety of state laws, liability under each of the claims fundamentally hinges on whether SBA can prove that Defendants' actions — i.e., the reverse payments — were anticompetitive. **[*72]** This is because SBA's consumer-protection and unjust-enrichment claims all depend on injuries suffered from there being higher prices following the allegedly anticompetitive conduct. (*See* Second Amended Compl., ECF 326 at ¶¶ 223-243). Thus, at this point in the litigation the parties primarily focus on the key aspect of the case: whether the reverse-payment settlements — and specifically the Lexapro Amendment — were anticompetitive.

Although IPPs' claims arise under state antitrust statutes, each of the statutes in question contain "harmonization" provisions that make the analysis of whether all elements have been met the same as if the claim were brought under federal ***antitrust law***. *See* *Namenda VIII, 338 F.R.D. 527, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988, at *34-36*. ***HN13***[] To prove that there was unlawful monopoly maintenance, there must be evidence that a defendant (1) possessed monopoly power in the relevant market and (2) willfully acquired or maintained that power "as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. To have a demonstrable restraint-of-trade claim, a plaintiff must prove "(1) a combination or some form of concerted action between at least two legally distinct economic entities **[*73]** that (2) unreasonably restraints trade." *Geneva Pharm. Tech. Corp. v. Barr Lab. Inc., 2004 U.S. App. LEXIS 21586, 386 F.3d 485, 506 (2d Cir. 2004)*.

B. Forest's and SBA's cross-motions for summary judgment as to Counts I and II are denied

Forest moves for summary judgment on all four of SBA's counts against it. The IPPs moves for summary judgment on Count I's unlawful maintenance of monopoly power issue. Fundamentally, the parties dispute whether the reverse-payment settlements were anticompetitive and — if they were anticompetitive — whether they caused a delay in generic competition. But since there are disputes of fact including, but not necessarily limited to, the issues of the "fair value" of the Lexapro Amendment and causation, these cross-motions for summary judgment are denied — just as they were in the direct-purchaser case.

1. Preliminary issues

First, one must note that there is no dispute that Forest possessed monopoly power in the memantine market during the relevant period. This issue has already been litigated, and Forest is estopped from arguing to the contrary. *See, e.g.,* *Namenda VI, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *13*.

Second, Forest purports not to "concede" that the Lexapro Amendment was "linked" to Mylan's decision to settle, but it also does not move for summary judgment on the ground that the Lexapro Amendment was **[*74]** not part and parcel of the Mylan settlement. (ECF 565 at 16 n.6). I thus assume that Forest takes the position — as it did in the DPP lawsuit — that whether the Lexapro Amendment was part and parcel of the Mylan settlement is a disputed issue of fact. It takes this position notwithstanding the fact that almost all of the reverse-settlement agreements between Forest/Merz and a generic manufacturer *except* Mylan contained a clause stating that the payments included in the settlement were the "sole consideration" being exchanged for ending the generic's Paragraph IV challenge. (ECF 606 at ¶¶ 232-34). Only the Mylan reverse-settlement agreement — and another settlement not at issue in this litigation[9] — did *not* contain the "sole consideration" representation. That fact is enough to get the question of whether the Paragraph IV settlement and the Lexapro Amendment were part of one deal to the jury. *See* *Namenda V, 331 F.3d at 199* (noting that, in the DPP case, "Plaintiffs have presented enough evidence to allow a rational juror to conclude that the Lexapro Agreement was a part of the Forest-Mylan patent settlement" thereby precluding summary judgment on the issue of whether these were two separate settlements).

2. Disputes [*75] of fact remain as to the value of the Lexapro Amendment

If indeed the Lexapro Amendment was part of the consideration for the settlement of the Paragraph IV lawsuit, then the question that arises is whether the payments Forest made to Mylan constituted "large and unjustified" payments that were anticompetitive.[10] Forest and SBA dispute whether the payments can be justified by benefits unrelated to the desire to delay generic competition — whether the payments constituted fair value for what Mylan gave up or for what Forest expected to receive. As should be obvious from the decisions on the *Daubert* motions, there are hotly disputed issues of fact concerning whether the Amendment constituted a fair bargain.

SBA argues, as a matter of law, that the trier of fact can consider only the generic's perspective, and that the Lexapro Amendment was anticompetitive if it "induced Mylan to settle rather than continue its challenge to the '703 Patent." (ECF 569 at 14). For SBA, it does not matter if Forest expected to save money in the long run by agreeing to the Amendment. "[T]he 'net benefits' that 'Forest expected to receive' . . . are immaterial" because they are not probative of "whether the reverse payment **[*76]** induced Mylan not to compete." (ECF 599 at 16). All that a factfinder can consider is whether the generic manufacturer received a payoff greater than the profits it expected to earn from winning the Paragraph IV litigation. Whatever benefits the branded manufacturer expected to gain from settling (other than saved litigation costs) are irrelevant.

As has been stated repeatedly, (*see, e.g.*, Section II.B—F, *supra*), the Court disagrees with this position. It is predicated on what I view to be a misreading of *Actavis*. We will not go to the jury on that theory. SBA's "generic inducement test" improperly narrows the scope of analysis. A factfinder must also be allowed to consider the net benefits to the branded manufacturer, which could include, among other things, reduced Medicaid liabilities and saved manufacturing costs — all in addition to the saved litigation costs from settling. The only prohibited "benefit" for which a reverse payment cannot pay are profits that a branded manufacturer could expect to earn by delaying generic competition.

Forest thus argues that the Lexapro Amendment was not a net loss for it, but a net gain. Despite paying upwards of $32.5 million to Mylan, it argues **[*77]** that it saved at least $3 million in litigation costs; $26.5 million in reduced Medicaid liabilities; and another $21.1 million in additional profit-sharing royalties from extending the term of the Agreement by another year. (ECF 565 at 17). Forest claims that it would have netted around $18.1 million from the Lexapro Amendment if all factors are considered.

Forest has the correct view of the law. Nothing from *Actavis* justifies SBA's interpretation. ***HN14***[] The Supreme Court held that, while a large payment may "provide strong evidence that the patentee seeks to induce the generic challenger to abandon its claim," *570 U.S. at 154*, there are other considerations for evaluating whether a reverse payment was anticompetitive, such as whether the payment was "a rough approximation of the litigation expenses saved through the settlement" or "reflect[ed] compensation for other services that the generic has promised to perform," *id. at 156*. Importantly, these considerations were not exhaustive; by using the phrase "such as," the

[9] The other agreement was with the generic manufacturer, Orchid. Orchid was the last generic manufacturer to settle before Mylan. Although Forest/Merz sued Orchid along with the other generics in the District of Delaware, the case was transferred to the District of New Jersey. Orchid settled on March 23, 2010, four months before Mylan settled on July 21, 2010. (ECF 570 at ¶ 27). The record does not indicate if there was any other possible consideration associated with the Orchid agreement.

[10] If the jury decides that there were two separate settlements — which would mean that the Paragraph IV lawsuit was settled for $2 million, not upwards of $32 million — the Court may well direct a verdict on the issue of "large and unjustified," although we will hash this out fully at trial.

Court made it clear that there were other things that could render a reverse settlement not anticompetitive. If SBA's reading of *Actavis* were correct, then all reverse-payment settlements would be **[*78]** illegal, because one of the effects of such a settlement is always delayed generic entry. But that is precisely what the Supreme Court refused to hold in *Actavis*, "because the likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, *and the lack of any other convincing justification*." *Id. at 159* (emphasis added). The only consideration that cannot factor into whether the reverse settlement was made are the expected profits from delayed competition.

Here, Forest has provided several reasons for why it agreed to the Lexapro Amendment with Mylan. But disputes remain as to whether the benefits it claims to have received from the deal (upwards of $50 million) were actually as valuable as Forest insists.

First, a dispute exists over the value of the one-year extension on the deal. The original Lexapro Agreement was for a term of five years, but Mylan could terminate the deal after one year, after which it could develop and market its own Lexapro generic, earning 100% of the profits. The Lexapro Amendment was also for five years, but **[*79]** Mylan could not terminate the deal for two years. The parties disagree about the value of that second year of "locked-in" royalties. Forest's expert, Philip Green, opines that Forest's internal documents forecast a total of $508.7 million in profit from Lexapro AG the first year it was on the market, and a total profit of $79.3 million in year two. (Green Report at ¶ 54). The Lexapro Amendment entitled Forest to 40% of the $79.3 million second-year projection, for a total of around $31.7 million. After accounting for other royalties that Forest owed to other companies, Green concluded that Forest expected to net approximately $21.1 million from the one-year extension. (*Id.* at ¶ 55).

SBA disputes this conclusion. Its expert, Susan Marchetti, states that the $21.1 million figure is "inconsistent with the evidence" she reviewed. (Marchetti Report at ¶ 113). Marchetti claims that there is no indication that Mylan ever intended to terminate the deal after just one year, and that it would have been economically irrational for it to have done so. (Marchetti Rebuttal at ¶¶ 17-19). This is because authorized generics (generics marketed in conjunction with the branded manufacturer) "retain a **[*80]** stronger market share than competing generic" companies and so Mylan could have expected to earn more profit by continuing to sell the Lexapro AG rather than by switching to its own generic. (*Id.* at ¶ 19). She critiques Green's methodology for failing to calculate how much Mylan would have expected to earn by making and selling its own version of generic Lexapro. For it to have been economically rational for Mylan to cancel the original agreement after just one year, Mylan needed to expect to make just as much if not more by selling its own generic, but this analysis was completely lacking from Green's opinions. (*Id.* at ¶ 29). If it would not have been economically rational for Mylan to cancel the Agreement after one year, then the "additional" benefits that Forest assigns to the second year of the Agreement are nothing more than a mirage — inflated numbers that both sides knew would not have materialized, but which provide great cover against antitrust scrutiny.

HN15[] Summary judgment is inappropriate "when there are dueling experts, both of whom have put forward opinions in contradiction with each other, and when those opinions are important to resolution of a material factual dispute." **[*81]** *Realtime Data, LLC v. Stanley, 897 F. Supp.2d 146, 153 (S.D.N.Y. 2012)*. Given that the Court has already determined that both Green's and Marchetti's pure calculations of the Lexapro Amendment are admissible, this is a classic battle-of-the-experts that precludes summary judgment for either side.

Second, a dispute remains as to whether the amount Forest claims it expected to save from reducing Medicaid liabilities ($26.5 million) by shifting the manufacturing of Lexapro AG to Mylan was pretextual. SBA does not appear to quibble with Forest's calculations to arrive at the $26.5 million figure, but it argues that internal Forest documents show that its executives in 2007 — when evaluating the Medicaid changes — viewed that "Having [Lexapro] AG on market still makes sense under this scenario" given the profits that Forest still expected to receive under the original agreement. (ECF 572, Exh. 66 at 6). SBA claims this indicates that there was no need for Forest to renegotiate the Agreement, and that the Lexapro Amendment — and the payments contained within it — was a pretextual reason to hide the fact that Forest was just trying to share monopoly profits with Mylan. That, too, presents a question for the jury.

These are just two examples of the myriad factual **[*82]** disputes concerning whether the Lexapro Amendment constituted a "large and unjustified" reverse settlement that is subject to antitrust scrutiny. This issue will be decided by a factfinder.

3. Disputes of fact remain as to causation

Disputes of fact also remain as to causation — whether Forest's actions actually caused delayed generic competition such that it resulted in higher prices for memantine. Plaintiffs bear the burden of proof on causation. ***HN16***[] To survive a summary judgment motion, "An antitrust plaintiff must show that a defendant's anticompetitive act was a 'material' and 'but-for' cause of plaintiff's injury, although not necessarily the sole cause." *In re Actos End-Payor Antitrust Litig., 848 F.3d 89, 97 (2d Cir. 2017)*; *see also* Argus Inc. v. Eastman Kodak Co., 801 F. 2d 38, 41 (2d Cir. 1986). Forest insists that SBA cannot carry this burden because it cannot show that, absent the Lexapro Amendment, Mylan would have both won its challenge to the '703 Patent and then launched a competing version of generic Namenda IR.

If Mylan had won the challenge, it could have launched its version of generic Namenda IR earlier than when generics launched in the real world — July 11, 2015. But if Mylan lost the patent challenge, then the date of its generic entry in the but-for world would have been the same as in the real world. The **[*83]** market for generic memantine would have been in the same position as it is now — meaning that Forest's actions did not depress competition.

So it is important to assess whether Mylan would have won its Paragraph IV challenge, and more specifically to assess how each side *perceived* its chances of succeeding (and thus the desirability of settling). A second "battle of the experts" will queue that issue up for the jury. SBA's expert, Michael Davitz, opines that Mylan had a 70% chance of success. Forest's expert, Sue Robinson, disagrees. This disputed issue of fact precludes summary judgment on the issue of causation.

The parties also disagree about whether the acceleration clauses included in all the reverse settlements (not just Mylan's) were anticompetitive. The clauses permitted each settling manufacturer to launch its version of generic Namenda IR as soon as any other generic manufacturer launched.

SBA argues that the acceleration clauses decreased the incentive for any single generic manufacturer (like Mylan) from continuing its Paragraph IV challenge, because even if it won the litigation and the '703 Patent was declared invalid or not infringed, its competitors (the generics that settled with **[*84]** the acceleration clause) could launch their products simultaneously. Thus, any "holdout" generics would be burdened with all of the expense, effort, and risk of the litigation, while those that settled could simply wait and take advantage if a court ultimately found that the patent was invalid or was not infringed. By July 2010, Mylan was of course, the lone holdout.

Moreover, whenever any generic settled with an acceleration provision, it arguably further disincentivized any non-settling holdout from continuing its Paragraph IV challenge, because the holdout knew that it would have had to share the market with yet another competitor even if it prevailed in the litigation. The more generics that settled, the greater the pressure on remaining holdouts to settle — the expected profit "pie" would be split into smaller and smaller pieces. SBA's expert Thomas McGuire opines that, by the time Mylan ended its Paragraph IV challenge to the '703 Patent, its expected profits from prevailing in the patent lawsuit was only around $0.9 million over four years — because it would have had to share the generic market with all of the rest of the settling generics. (McGuire Report at ¶ 106). SBA claims that these **[*85]** clauses are anticompetitive because they deterred generic challenges to branded patents.

Forest counters by arguing that the acceleration clauses did not change the generic market at all, and arguably increased competition. Because there were originally fourteen ANDA "first-filers," Forest argues that, even if there had been no Paragraph IV litigation, the profit "pie" for generics would still have been split into small pieces. If all fourteen "first-filers" were allowed to launch their generics on the same day (as was their right under law), the scenario was identical to having all the generics sue and settle with an acceleration clause that merely allowed the generics to do what they otherwise would have done — enter the market on the same day. Forest insists that the clauses actually increased generic competition by averting a scenario in which one generic manufacturer (the last holdout) would have dominated the market for generic Namenda IR if it had succeeded in its Paragraph IV challenge. Forest argues that the "harm" that SBA assigns to the acceleration clauses is actually just increased competition among generics, which cannot be a factor in declaring any deal anticompetitive. **[*86]**

Whether Forest's rather appealing argument entitles it to summary judgment on this point presents a close question, but as the motion is being otherwise denied there is no need to resolve it now. At present, I am inclined to let the jury make this decision. *See* *In re Loestrin 24 Fe Antitrust Litig., 433 F. Supp. 3d 274, 321 (D.R.I. 2019)*. But I may change my mind after hearing further argument at trial.

C. Merz's motion for summary judgment dismissing Count II is denied

Merz originally moved for summary judgment on all the counts against it on the ground that it was not involved in any of Forest's allegedly unlawful acts. In particular, Merz was not party to the Lexapro Amendment; it argues that it cannot be held liable for any anticompetitive effects that may have stemmed from the agreement.

In its opposition to Merz's motion for summary judgment, SBA "requests to voluntarily dismiss its Count I — Monopolization Under State Law, Unlawful Maintenance of Monopoly Power — claims against the Merz Defendants." (ECF 599 at 51 n.20). SBA and Merz then entered a joint stipulation whereby SBA voluntarily dismissed Count I against Merz. (ECF 612). This leaves Merz as a defendant on Count II — the restraint-of-trade claim — and the various state-law unfair-competition and **[*87]** unjust-enrichment claims, which will be discussed separately.

The special argument that Merz raises for dismissing Count II as against it is that Merz was not a party to the Lexapro Amendment and did not make any payments to Mylan pursuant to the Amendment — which is the allegedly "large and unjustified" portion of the settlement. SBA does not dispute this fact. (*E.g.*, ECF 570 at ¶¶ 78-82).

If Defendants convince the jury that the Lexapro Amendment and the Mylan reverse settlement were two separate agreements here, not just one, then Merz will be dismissed as a defendant. But unless and until that happens, the fact that Merz was not a formal party to the Lexapro Amendment is not reason enough to dismiss Count II against it.

It is undisputed that Merz stood to benefit from keeping generics out of the market for memantine for as long as possible, since Forest had to pay Merz 20% of its net revenues on sales of memantine in the U.S. As the Supreme Court has noted, "acquiescence in an illegal scheme is as much a violation of the [antitrust laws] as the creation and promotion of one." *United States v. Paramount Pictures, 334 U.S. 131, 161, 68 S. Ct. 915, 92 L. Ed. 1260 (1948)*.

There is, admittedly, nothing in the record that evidences Merz's participation in discussions about or the **[*88]** drafting of the Lexapro Amendment, either its terms or as part of an overall settlement between Forest and Mylan. SBA points to two other pieces of evidence of Merz's "acquiescence" in the allegedly illegal scheme cooked up between Forest and Mylan — a scheme that had the potential to confer a great financial benefit on Merz.

First, as was mentioned previously (*see* Section III.B.1, *supra*), nearly all of the reverse-settlement agreements between Forest/Merz and the other generic manufacturers contained a clause stating that the payments included in the settlement were the "sole consideration" being exchanged for dropping the patent challenge. (ECF 606 at ¶¶ 232-34). But the Mylan reverse-settlement agreement — which Merz signed, and toward which it contributed 50% of the stated financial consideration — did *not* contain the a "sole consideration" representation. That curious and highly significant omission suggests that Merz was well aware that Mylan was receiving additional consideration for settling the Paragraph IV lawsuit — which could only have come in the form of the simultaneously executed

Lexapro Amendment — and acquiesced in the overall scheme by playing its part in the settlement **[*89]** of the patent lawsuit, to which it was a necessary party.[11]

Second, the record also shows that Merz and Forest jointly submitted both the Mylan reverse-settlement agreement *and* the Lexapro Amendment to FTC authorities as part of the disclosures mandated under Section 1112(a) of the Medicare Modernization Act, which requires all brand-generic agreements regarding any ANDA lawsuit to be transmitted to the FTC. (ECF 606 at ¶ 203).

However, this piece of "evidence" is not at all persuasive. The Lexapro Amendment itself represented an alteration in the terms of the settlement of an entirely different ANDA lawsuit — the one between Alphapharm and Forest concerning Forest's '712 Patent — so it arguably had to be transmitted to the FTC in any event. Moreover, as the cover letter transmitting the document to the FTC makes clear, Forest and Merz took the position that they were supplying the FTC with the Lexapro Amendment "for the sake of completeness" even though it was not required to be filed along with the Mylan settlement agreement:

> On behalf of Forest . . . and Merz . . . and pursuant to Section 1112(a) of the [MMA], I [Forest's counsel] enclose two copies of the agreement settling patent infringement litigation brought by Forest and Merz against Mylan . **[*90]** . . . Although we do not believe that the following documents must be submitted with this filing, for the sake of completeness we are also enclosing two copies of: (1) a Distribution and Supply Agreement between Forest . . . and Alphapharm . . . [the original Lexapro Agreement]; (2) an amendment to the Distribution and Supply Agreement between Forest. . . Mylan, and Alphapharm, dated July 21, 2010 [the Lexapro Amendment] . . . .

I do not agree with SBA that this demonstrates that Merz considered itself to have a relationship to the Lexapro Amendment; indeed, in the opinion of this Court it suggests the contrary.

But even if the FTC submission fails to raise a genuine issue of fact, there is sufficient evidence in the record of Merz's financial interest in Mylan's delayed entry into the Namenda market to make it appropriate for the jury to determine whether the Lexapro Amendment was part and parcel of a settlement that involved Merz, and whether Merz, as Forest's co-conspirator or aider and abettor, knowingly acquiesced in an anticompetitive agreement in violation of *Paramount Pictures*. I note that, in analogous circumstances, my colleague in the District of Massachusetts declined to **[*91]** dismiss a claim against generics who entered into reverse-settlement agreements with the understanding that they could have knowingly "acquiesced" in a scheme to harm competition. *See In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d 231, 259-60 (D. Mass. 2014)*.

A far more interesting question is whether the fact that Merz made no payment in connection with the Lexapro Amendment means that it cannot be liable for an antitrust violation under *Actavis*. It is undisputed that Merz paid Mylan $1 million — half the cost of the Mylan reverse settlement, and an amount that would not qualify as large or unexplained given the experts' estimates of the cost to the parties of continuing the Mylan Paragraph IV lawsuit. There is no evidence that Merz paid any portion of the $20 million upfront fee to Mylan per the Lexapro Amendment or that it reimbursed Forest for any portion of that payment. In fact, SBA concedes as much. (ECF 599 at 15-16, 52). Merz contends that this concession is fatal to SBA's claim that Merz was Forest's co-conspirator, "because

---

[11] As the owner of the '703 Patent, Merz was a necessary party to any lawsuit that alleged the infringement of that patent. "Traditionally, when the interest transferred is deemed a license" — as was the case with Merz's licensing of the '703 Patent to Forest — "the patent-holder is a necessary party because the patent-holder is still the real party in interest with respect to the validity of the patent." *Refac Int'l, Ltd. v. Mastercard Int'l, 758 F. Supp. 152, 157 (S.D.N.Y. 1991)* (citation omitted.); *see also IpVenture, Inc. v. Prostar Computer, Inc., 503 F. 3d 1324, 1325 (Fed. Cir. 2007)*. Merz's contract with Forest also required Merz to be involved in any litigation defending its intellectual property. It included a provision stating that Merz "shall be solely responsible for taking all actions, in the courts, administrative agencies, or otherwise, to prevent or enjoin any and all such infringements and other unauthorized uses of Merz' Intellectual Property Rights" and that Forest was to "take no action with respect to any such infringement or unauthorized use of Merz' Intellectual Property Rights, without the prior written authorization of Merz." (ECF 607, Exh. 24 at 20).

there is no rational basis for Forest to bear the full cost of the alleged illegal payment if Merz was part of an alleged conspiracy." (ECF 631 at 3).

I fear I must differ with Merz on this point. If the Lexapro Amendment constituted **[*92]** a "large and unexplained" payment under *Actavis* that was made for the purpose of forestalling competition — competition that would have been economically harmful to Merz — then the fact that Forest shelled out the bulk of the consideration for that agreement does not lead inexorably to the conclusion that Merz was not involved in an anticompetitive conspiracy. As long as Merz stood to benefit from the delay in generic entry — and it indisputably did — it had a reason to participate in and promote an anticompetitive settlement. It is true that there is no "smoking gun" email evidencing Merz' overt agreement to participate in an anticompetitive scheme, but there does not need to be in order for plaintiffs to overcome Merz' motion for summary judgment. Circumstantial evidence suffices.

Merz is free to argue at trial that it had nothing to do with the "side deal" Lexapro Amendment other than being aware of it — that it was not consulted in any way about the negotiations surrounding it, that it obtained no benefit directly (or indirectly) from it, and that the only agreement to which it was a party was the $2 million reverse-settlement agreement that ended the Paragraph IV lawsuit. It is **[*93]** also free to argue that its financial contribution to the Mylan deal or deals (if it concedes that the Lexapro Amendment was part of the consideration for settling) was limited to half of the cost of settling the Paragraph IV lawsuit, or only $1 million, which hardly qualifies as a "large" or "unjustified" payment when solely viewed in light of anticipated litigation costs.

But the logic of Merz's participation in an anticompetitive settlement that would put money in its pocket[12] — not to mention any potential anticompetitive impact from the acceleration clause[13] — seems clear enough to get the issue to the jury, which can then decide whether there is a lack of evidence on this point. ***HN17***[] An alleged co-conspirator is not free from liability simply because it was not the most active participant in the scheme. "[I]t is sufficient that [a defendant], regardless of its own motive, merely acquiesced in the restraint with the knowledge that it would have anticompetitive effects." *Virginia Vermiculite, Ltd. v. W.R. Grace & Co., 156 F. 3d 535, 541 (4th Cir. 1998)* (citing cases); *see also* *In re Nexium (Esomeprazole), 42 F. Supp. 3d at 259* (denying a motion to reconsider denial of summary judgment because "the record support[ed] the inference that [defendant generic manufacturer] knew" it was agreeing to a deal that would have delayed **[*94]** generic competition and "understood generic delay to be anticompetitive").

Merz's motion for summary judgment dismissing Count II as against it is denied.

D. Forest's motions for summary judgment on Count III is granted in part and denied in part

The IPPs' claims under Count III allege violations of the consumer-protection and unfair-competition laws of thirteen states: Alabama, California, Florida, Idaho, Illinois, Massachusetts, Michigan, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, and Utah.[14] Forest now moves for summary judgment on the claims arising under eight of these thirteen states.

---

[12] Exactly how much money is not clear. SBA's damages expert, William Vogt, calculated total overcharges to the IPPs as between $1.98 and $2.21 billion, depending on the date of generic entry in the but-for world. (ECF 447, Exh. 2 at tbl. 6). Assuming that to be a rough approximation of the revenues Forest expected to earn (which appears reasonable in light of Namenda's $1.5 billion in sales in 2013, *see* *Namenda II, 787 F.3d at 647*), then Merz's entitlement to 20% of Forest's revenue could have netted it between an additional $396 million and $424 million due to the delayed generic entry.

[13] Again, I am effectively "reserving" on that issue at present.

[14] The Second Amended Complaint originally included claims arising under the laws of fourteen states, not thirteen. The extra state was Missouri, but SBA did not move for class certification in connection with any actions taken in or any harmed incurred in Missouri. *See* *Namenda VIII, 338 F.R.D. 527, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988 at *5*. SBA also does not mention any Missouri claims in the summary judgment motions. Accordingly, the Court finds that the IPPs have abandoned any Missouri claims.

1. Alabama

Forest argues that the Alabama consumer-protection statute, *Ala. Code § 8-19-10, et seq.* only permits a "natural person" from recovering damages. This is true. ***HN18***[] The statute only provides a private right of action to a "consumer" which it defines as "any natural person who buys goods or services for personal, family, or household use." *Ala. Code § 8-19-3(2)*. No third-party purchaser of Namenda like the IPPs would qualify as a consumer under this definition. *See* *EBSCO Indus. V. LMN Enters., 89 F. Supp. 2d 1248, 1266 (N.D. Ala. 2000)* (granting summary judgment because the corporate plaintiff was not a "consumer"). Apparently realizing this, SBA states in its response to Forest's summary **[*95]** judgment motion that it "voluntarily dismisses its Count III claim brought under Alabama's consumer protection statute." (ECF 599 at 35).

Accordingly, Forest's motion for summary judgment is GRANTED as to Count III's claim under Alabama's consumer-protection statute.

2. Michigan

HN19[] *M.C.L.A. § 445.903*, the Michigan Consumer Protection Act ("MCPA"), prohibits "unfair, unconscionable, or deceptive methods . . . in the conduct of trade or commerce." Michigan courts interpret this statute as providing relief only for consumers who purchased a product for personal use. Although the MCPA includes "corporation" under its definition of a "person" that can sue (in contrast to the Alabama statute), Michigan courts hold that "if an item is purchased primarily for business or commercial rather than personal purposes, the MCPA does not supply protection." *Zine v. Chrysler Corp., 236 Mich. App. 261, 600 N.W.2d 384, 393 (Mich. Ct. App. 1999)*. The key question is "whether the purchaser intends to use the product himself." *Ibid.* Items purchased for commercial, rather than personal use, are outside the scope of the MCPA's protection. *See, e.g.,* *In re OnStar Contract Litig., 278 F.R.D. 352, 380 (E.D. Mich. 2011)*; *In re Ford Motor Co. E-350 Van Prods. Liab. Litig. (No. II), No. 03-cv-4558, 2010 U.S. Dist. LEXIS 68241, 2010 WL 2813788, at *67 (D.N.J. July 9, 2010)*.

Here, IPPs did not "purchase" the drug at all, and certainly not for their own use. Rather, they r*eimbursed* their insureds, who both purchased the drug and used the memantine, presumably for personal purposes. **[*96]** SBA concedes that the IPP class members only "provide[] prescription drug benefits for *its members['] personal use*." (ECF 599 at 36 (emphasis added)). The parties have not cited, and the Court has not located, any Michigan case in which an insurer was able to sue under this statute because its insured purchased an item for personal use where the marketing of the item was tainted by unfair trade practices.

HN20[] Additionally, the MCPA appears to only prohibit *fraud* or *fraud-related* acts in commerce. The statute includes a long list of what it defines as "unfair, unconscionable, or deceptive methods." These include things like "causing a probability of confusion or misunderstanding as to the source . . . of goods"; "using deceptive representations"; "disparaging the goods, services, . . . or reputation of another by false or misleading representation of fact"; "gross discrepancies between the oral representations of the seller and the written agreement," and etc. *Mich. Code. Ann. §§ 445.903(1)(a)-(kk)*. None of the expressly prohibited acts pertains to any kind of antitrust violation. As a result, some courts have dismissed MCPA consumer-protection claims when brought in the antitrust context. *See, e.g.,* *In re Pork Antitrust Litig., 495 F. Supp. 3d 753, 785 (D. Minn. 2020)* ("The MCPA is narrower **[*97]** than other state consumer-protection statutes because it specifically defines what constitutes unfair or unconscionable conduct."); *In re Packaged Seafood Prods. Antitrust Litig., 242 F. Supp. 3d 1033, 1076 (S.D. Cal. 2017)* ("Plaintiffs do not point to a specific provision of the MCPA definitional section covering antitrust violations, and the Court is unable to find one."). I find the reasoning of these cases persuasive. So, while this issue is not a basis upon which either Forest or Merz moved for summary judgment, it provides the Court with yet another reason to dismiss the MCPA claim.

Accordingly, because IPPs did not "purchase" anything at all — which Michigan courts deem to be a prerequisite for any proper plaintiff under the MCPA — and because the conduct here complained of is not the kind of conduct reached by the MCPA, the Count III claim under Michigan law is dismissed.

Forest's summary judgment motion is GRANTED as to Count III under Michigan law.

3. Illinois

Forest makes the same "IPPs are not consumers" argument with regard to IPPs' claim under the Illinois Consumer Fraud and Deceptive Business Practices Act ("ICFA"). But this claim will not be dismissed. ***HN21***[] Illinois courts allow non-consumer plaintiffs to pursue relief if it "can satisfy the 'consumer nexus text,'" which requires only that the complained-of conduct "'involves trade **[*98]** practices addressed to the market generally or otherwise implicates consumer protection concerns.'" *Roppo v. Travelers Companies, 100 F. Supp. 3d 636, 651 (N.D. Ill. 2015)* (quoting *Downers Grove Volkswagen, Inc. v. Wigglesworth Imports, Inc., 190 Ill. App. 3d 524, 534, 546 N.E.2d 33, 137 Ill. Dec. 409 (1989)*).

Here, the complained-of conduct clearly addresses the market and implicates consumer-protection concerns. If Forest's actions delayed generic entry (as IPPs allege they did), then that likely would have increased the price for memantine during the relevant period, negatively impacting consumers. This is sufficient to sustain IPPs' claim under the ICFA.

Forest's summary judgment motion dismissing this count under Illinois law is DENIED.

4. Florida

Forest concedes that the Florida Deceptive and Unfair Practices Act ("FDUTPA") permits third-party purchasers like the IPPs to bring a consumer-fraud claim. Instead, Forest claims that it is still entitled to summary judgment because IPPs cannot demonstrate that there was any injury or detriment to consumers.

But whether consumers were harmed by Forest's actions is an issue of fact to be decided by a factfinder.***HN22***[] "[W]hile the claimant would have to prove that *there was an injury or detriment to consumers* in order to satisfy all of the elements of a FDUTPA claim, the claimant *does not have to be a consumer* to bring the claim." *Caribbean Cruise Line, Inc. v. Better Business Bureau of Palm Beach Cnty., Inc., 169 So. 3d 164, 169 (Fla. 4th Dist. Ct. App. 2015)*. The IPPs are alleging that Forest's actions harmed consumers **[*99]** by paying more for memantine than they otherwise would have. Whether there truly was any harm — and the extent of that harm — is an issue of fact to be resolved at trial.

Forest's summary judgment motion dismissing this count under Florida law is DENIED.

5. Massachusetts

Forest argues that the Massachusetts statute, Mass. Gen. Laws ch. 93A, *et seq.*, does not provide a cause of action for indirect purchasers that are businesses.

HN23[] Massachusetts has two standing provisions for consumer-protection suits. *Section 11 of 93A* provides a right of action to "Any person who engages in the conduct of any trade or commerce" while *Section 9* provides a right of action to "Any person other than a person entitled to bring action under section eleven." *Mass. Gen. L. c. 93A §§ 9*, 11. This effectively splits the claims raised by "consumers" (under *§ 9)* and those raised by "businesses" (under *§ 11*). *See* *Cont'l Ins. Co. v. Bahnan, 216 F.3d 150, 156 (1st Cir. 2000)*. The key difference between *§§ 9* and 11 is that the latter does not provide for indirect-purchaser standing; it follows the Supreme Court's holding in *Illinois Brick. See* *In re Asacol Antitrust Litig., 2016 U.S. Dist. LEXIS 94605, 2016 WL 4083333, at *13 (D. Mass. July 20, 2016)*; *Ciardi v. F. Hoffmann-La Roche, Ltd., 436 Mass. 53, 62-63, 762 N.E.2d 303 (2002)* (noting that "in any action brought under [*§ 11*], the court shall be guided in its interpretation of unfair methods of competition by the provisions of the [Massachusetts] Antitrust Act," which bars indirect-purchaser suits pursuant to ***[*100]*** *Illinois Brick*). Put simply, *businesses* cannot sue under *§ 11* for antitrust violations if they are indirect purchasers.

SBA makes a "law of the case" argument, stating that this Court held, in its decision and order denying the motions to dismiss, that "Chapter 93A [of the Massachusetts statute] . . . allows indirect purchaser claims." *Namenda VI, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233 at *22*. **HN24**[] That statement is technically true: Chapter 93A *does* allow indirect purchaser claims, but only if the entity is not a business and is suing under *§ 9, not § 11*. *See Ciardi, 436 Mass. at 63* ("[W]e cannot conclude that the application of . . . *§ 9*, is to be guided by the provisions of the Antitrust Act, and by association, *Illinois Brick Co. v. Illinois* . . . so as to preclude indirect purchasers" from suing.) To the extent that the earlier decision may have implied that businesses like the plaintiff indirect purchasers could bring *§ 11* claims, the decision was wrong and I happily correct it.

SBA also argues that IPPs are not "motivated by business considerations" but are nonprofit organizations. While it may be true for some IPPs contained within the class, it certainly is not true for all class members. Moreover, many nonprofits are motivated by the commercial aspects of their enterprises. Frankly, **[*101]** it strains credulity to argue that third-party insurers are altruistically motivated. Moreover, I do not understand the Massachusetts Legislature to have allowed indirect purchaser businesses to bring *§ 11* suits if their motivation was pure.

The Court concludes that IPPs lack standing to pursue an indirect-purchaser claim under *§ 11 of Mass. Gen. L. c. 93A*. Forest's summary judgment motion dismissing this count under Massachusetts law is GRANTED.

6. California

Forest argues that it is entitled to summary judgment on IPPs' California claim because, under the statute, **HN25**[] "Prevailing plaintiffs are generally limited to injunctive relief and restitution." *Cel-Tech Commc'ns., Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 179, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*; *see also* *Cal. Bus. & Prof. Code § 17203*. The IPPs do not dispute this conclusion, but argue that there is no reason to dismiss their claim because they are seeking restitution. I agree. **HN26**[] Just because a certain type of monetary recovery is unavailable to a plaintiff does not mean that the substantive claim itself must be dismissed. *See In re Loestrin 24 FE Antitrust Litig., 410 F. Supp. 3d 352, 377 (D.R.I. 2019)*. If IPPs succeed in proving liability, it is likely that they would be entitled to some form of restitution.

Forest's summary judgment motion dismissing this count under California law is DENIED.

7. Nebraska

Forest claims that IPPs' claims under Nebraska's Consumer Protection Act ("NCPA"), Neb. Rev. Stat. §§50-1601, *et seq.*, must be dismissed because **[*102]** the statute requires the defendant to have engaged in "deception," which Forest claims the evidence does not support. The IPPs insist that the NCPA does not have a "deception" element. Their disagreement centers on one case — cited by both sides — from the Supreme Court of Nebraska, *State ex rel. Stenberg v. Consumer's Choice Foods, Inc., 276 Neb. 481, 755 N.W.2d 583 (Neb. 2008)*.

In *Stenberg*, Nebraska's Attorney General sued suppliers of food items for entering into installment contracts with customers knowing full well that the contracts could not be fulfilled, and ultimately not delivering on their terms. **HN27**[] The Court noted that the NCPA prohibits "'Unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce'" but does not define "unfair" or "deceptive." *Id. at 590* (quoting *Neb. Rev. Stat. § 59-1602*). Nevertheless, the State's allegations were more than enough for a violation of the NCPA since the record was "replete with examples of deceptive acts . . . that were unethical and unscrupulous." *Id. at 591*. This was because liability exists under the NCPA if the plaintiff proves "that the practice either '(1) fell within some common-law, statutory, *or other established concept of unfairness* or (2) was immoral, unethical, oppressive, or unscrupulous.'" *Ibid.* (quoting *Road v. Wal-Mart Stores, Inc., 13 F. Supp. 2d 1003, 1014 (D. Neb. 1998)*) (emphasis **[*103]** added).

The Court notes that *Stenberg* is a breach-of-contract case, which gives it little value in assessing claims under the NCPA for alleged antitrust violations. But I do not read *Stenberg* as precluding liability except in cases where actual deception is alleged. For well over a century, "established concept[s] of unfairness," have included antitrust violations.

Forest's summary judgment motion dismissing this count under Nebraska law is DENIED.

8. Utah

Finally, Forest argues that IPPs cannot bring sue under ***HN28***[] Utah's consumer-protection statute, *Utah Code Ann. § 13-11-5*, which requires that the defendant have engaged in an "unconscionable act or practice." Forest contends that Utah courts interpret "unconscionable" to mean "gross bargaining power inequality or oppressive contractual terms." *Imperial Mobile Home Park, L.L.C. v. Kelsch, No. 971591-CA, 1998 Utah App. LEXIS 171, 1998 WL 1758393, at *1 (Ct. App. Utah Nov. 27, 1998).*

But the *Imperial Mobile Home Park* case does not appear to have been a restraint-of-trade case, and that single short, non-precedential opinion does not persuade this Court that Utah law defines the term "unconscionable act or practice" so narrowly. Other federal courts that have ***HN29***[] evaluated Utah's statute in the antitrust context have all permitted such claims to proceed, construing the statute liberally to conclude that an **[*104]** antitrust violation can be unconscionable. *See, e.g., In re Packaged Seafood, 242 F. Supp. 3d at 1087*; *In re Microprocessors Antitrust Litig., 2007 U.S. Dist. LEXIS 50654, 496 F. Supp. 2d 404, 418 (D. Del. 2007)*. This Court agrees.

Forest's summary judgment motion dismissing this count under Utah law is DENIED.

****

As a result of these rulings, the only consumer-protection claims remaining against Forest under Count III are those arising under the laws of California, Florida, Idaho, Illinois, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, and Utah.

E. Merz's motion for summary judgment on Count III is granted as to all of the claims except the one arising under California law

Merz is entitled to summary judgment on the Count III claims arising under the consumer-protection statutes of Alabama, Massachusetts, and Michigan, for the same reasons that Forest was entitled to dismissal of the claims under those states' laws.

But Merz also goes further, insisting that it is entitled to summary judgment on all claims arising under Count III.

Merz notes that most of the remaining consumer-protection statutes (all but California) require that a plaintiff prove that the defendant engaged in "trade" or "commerce" within the state. Because Merz has never advertised, marketed, or sold Namenda or any other memantine product within the United **[*105]** States (having licensed the '703 Patent to Forest), it insists that it cannot be held liable under any of the remaining consumer-protection statutes.

Merz correctly points out that the consumer-protection statutes of Florida, Idaho, Illinois, Nevada, New Hampshire, New Mexico, and Utah all require that the allegedly "unfair" or "deceptive" practice have involved some form of advertising, purchase, sale, or distribution *by the defendant within the state. See, e.g.*, *Fla. Stat. § 501.203* (defining "trade or commerce" to mean "the advertising, soliciting, providing, offering, or distributing . . . of any good or service"); *Idaho Code § 48-602* ("advertising, offering for sale, selling, leasing, renting, collecting debts . . . or distributing goods or services"); *815 Ill. Comp. Stat. Ann. 505/1(f)* ("advertising, offering for sale, sale, or distribution"); *Nev. Rev. Stat. Ann. § 598.094* ("any sale, offer for sale or attempt to sell property"); *N.H. Rev. Stat.*

Ann. § 358-A:1 ("advertising, offering for sale, sale, or distribution"); *N.M. Stat. Ann. § 57-12-2(C)* ("advertising, offering for sale or distribution"); *Utah Code Ann. § 13-11-3* ("sale, lease, assignment, award by chance, or other written or oral transfer or disposition of goods, services, or other property").

The statutes of Nebraska and North Carolina contain more expansive definitions of "commerce." See *Neb. Rev. Stat. Ann. § 59-1601* ("Trade and commerce **[*106]** shall mean the sale of assets or services and any commerce directly or indirectly affecting the people of the State of Nebraska"); *N.C. Gen. Stat. § 75-1.1(b)* ("For purposes of this section, 'commerce' includes all business activities, however denominated, but does not include professional services rendered by a member of a learned profession.").

It is undisputed that Merz did not advertise, buy, sell, or distribute memantine in the U.S. This, alone, is enough to dismiss the claims arising under the laws of all the states except Nebraska and North Carolina from the lawsuit. There is no evidence in the record that Merz conducted any commercial activity related to the promotion or sale of any memantine product in the United States — let alone that it did so in any of the specific states in question. Indeed, SBA alleges that Forest had *exclusive rights* to market a memantine product in the U.S., and that it was Forest, not Merz, that had 100% market share of the relevant market. (ECF 326 at ¶¶ 65, 175). ***HN30***[] A defendant cannot be liable for an unfair trade practice if it did not engage in any relevant trade in the United States.

SBA insists that these statutes should still apply to Merz because it engaged in "commerce" **[*107]** by licensing the '703 Patent to Forest and by initiating the patent-infringement lawsuits against the generic manufacturers. But SBA completely misses the point. ***HN31***[] The consumer-protection statutes require that the actual unfair method of competition or deceptive act be associated with the commerce in question. All of the consumer-protection statutes (including those of North Carolina and Nebraska) include language specifically prohibiting "unfair methods of competition . . . *in the conduct of any trade or commerce*." *Fla. Stat. § 501.204* (emphasis added); *see also* *Idaho Code § 48-603* (same); *815 Ill. Comp. Stat. Ann. 505/2* (same); *Neb. Rev. Stat. Ann. § 59-1602* (same); *N.H. Rev. Stat. Ann. § 358-A:2* (same); *N.M. Stat. Ann. § 57-12-3* (same); *Nev. Rev. Stat. Ann. § 598.0923(3)* ("A person engages in a 'deceptive trade practice' when *in the course of his or her business* . . . he or she knowingly . . . violates a state or federal statute"); *N.C. Gen. Stat. § 75-1.1(a)* ("Unfair methods of competition *in or affecting commerce* . . . are declared unlawful"); *Utah Code Ann. § 13-11-5* ("An unconscionable act or practice *by a supplier in connection with a consumer transaction* violates this act"). The licensing of its patent, which is the only commercial activity that Merz undertook with respect to memantine in the United States, does not fall within any of those statutes.

There is no allegation from SBA — nor any evidence in the record — that **[*108]** there was any unfair, deceptive, or otherwise unlawful practice when Merz licensed the '703 Patent to Forest in 2000, or when Merz filed suit against the generic challengers beginning in 2007. SBA denominates these actions as the "commerce" to try to hold Merz to account, but as there is no evidence that these actions were deceptive or otherwise unlawful in respect of the consumers in the respective states, and so they cannot be used to sustain the consumer-protection claims against Merz.

Accordingly, the consumer-protection claims against Merz arising under the laws of Alabama, Massachusetts, Michigan, Florida, Idaho, Illinois, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, and Utah are dismissed. Summary judgment dismissing Count III against Merz under the laws of those states is GRANTED.

The only remaining consumer-protection claim against Merz is the one arising under California law. Merz — for whatever reason — does not move for summary judgment on this claim on the same basis that it moved for summary judgement as to the other claims — namely, that it did not engage in "trade or commerce" in California. Instead, it argues that it is entitled to summary judgment because California's **[*109]** statute limits a plaintiff's recovery to injunctive relief or restitutionary relief.

But as I noted above, just because a certain type of monetary recovery is unavailable does not mean that the substantive claim must be dismissed. Since this is the only basis upon which Merz moves for summary judgment on the California claim, its motion is denied.

F. Forest's and Merz's motions for summary judgment on Count IV is granted in part and denied in part without prejudice

Finally, the IPPs bring claims arising under the common law doctrine of unjust enrichment of 28 states and the District of Columbia.[15] In its Second Amended Complaint, SBA acknowledged that these claims were "pled in the alternative to the other claims" in the complaint, to the extent necessary and permitted by *Rule 8(a)*. (ECF 326 at ¶ 230).

Forest and Merz move for summary judgment on this count on the same basis: first, that the claims are duplicative of the antitrust and consumer-protection claims; and second, for various, independent reasons under certain states' unjust-enrichment jurisprudence. I will address the individualized arguments first, before addressing the generalized argument of duplicative claims.

1. Arkansas

Defendants **[*110]** first argue that indirect-purchaser antitrust actions under Arkansas law must be brought by the State's Attorney General and cannot be brought by a private plaintiff. *See* *Ark. Code Ann. §§ 4-75-309*, 310, 315. ***HN32***[] This means that indirect purchasers lack standing to bring a claim under the statute, mirroring the doctrine enshrined under the federal antitrust statutes by *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. As many courts (including this one) have held, IPPs cannot bring unjust-enrichment claims in states that do not explicitly permit indirect-purchasers to bring suit, as permitting them to do so would "constitute an impermissible 'end run' around the *Illinois Brick* prohibition on indirect purchaser actions." *Namenda VI, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *56*. Defendants claim that since IPPs did not bring an antitrust claim under Arkansas law, allowing an unjust-enrichment claim to proceed in light of Arkansas's prohibition on indirect-purchaser suits would allow the impermissible "end run" around *Illinois Brick* I had referenced in the earlier decision.

In the motion-to-dismiss order in this action, I deferred deciding the Arkansas unjust-enrichment claim until "a later date on proper briefing." *Id.* at 58. That day has come. SBA does not contest that Arkansas does not permit indirect-purchaser antitrust **[*111]** suits, arguing only that Forest's citations were insufficient because they did not come directly from an Arkansas court. But other courts — in cases extremely similar to the present one — have dismissed indirect-purchaser claims on the basis that "Arkansas flatly outlaws indirect-purchaser antitrust claims *ab initio* unless asserted by . . . the State Attorney General." *In re Packaged Seafood, 242 F. Supp. 3d at 1069*; *In re Cast Iron Soil Pipe and Fittings Antitrust Litig., No. 14-md-2508, 2015 U.S. Dist. LEXIS 121620, 2015 WL 5166014, at *22 (E.D. Tenn. June 24, 2015)*; *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179, 1192 (N.D. Cal. 2009)* ("[P]laintiffs have not cited any authority from Arkansas . . . holding that an indirect purchaser plaintiff may bring an unjust enrichment claim when that same claim would be barred under state ***antitrust law***").

Accordingly, the unjust-enrichment claim under Arkansas law is dismissed. Defendants' motion for summary judgment dismissing this count under Arkansas law is GRANTED.

2. Florida

---

[15] Alabama, Arizona, Arkansas, California, Florida, Hawaii, Illinois, Iowa, Kansas, Maine, Massachusetts, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. IPPs also originally included claims arising under the unjust-enrichment laws of Missouri, Wyoming, and Puerto Rico, but the IPPs did not move for class certification based on any actions undertaken or any harmed incurred in those four territories. *See* *Namenda VIII, 338 F.R.D. 527, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988 at *5*. Accordingly, the Court assumes that those claims are dropped.

Defendants move for summary judgment on the Florida unjust-enrichment claim because they argue that Florida courts require that a plaintiff have conferred a "direct benefit" on the defendant. Because indirect purchasers pay for Namenda that is purchased and used by their insureds, they do not confer a "direct benefit" on Forest or Merz such that an unjust-enrichment claim can be sustained.

This Court originally denied Defendants' motion **[*112]** to dismiss the Florida claim on this basis, noting "that while some Florida courts had not allowed plaintiffs to rely on the doctrine of unjust enrichment absent a direct benefit, other courts had allowed these claims to proceed." *Namenda VI, 2018 U.S. Dist. LEXIS 220574 2018 WL 7197233, at *60*. The Court thus denied the motion to dismiss "at this stage" of the litigation. *Ibid.*

Defendants now move for summary judgment based on a ***HN33***[] 2017 Florida Supreme Court case, which squarely held that "to prevail on an unjust enrichment claim, the plaintiff must directly confer a benefit to the defendant." *Kopel v. Kopel, 229 So. 3d 812, 818 (2017)*. Courts following *Kopel* have dismissed indirect-purchaser claims for lack of a "direct benefit" being conferred from an indirect-purchaser plaintiff to a defendant. *See, e.g., Sandee's Catering v. Agri Stats, Inc., No. 20-cv-2295, 2021 U.S. Dist. LEXIS 47443, 2021 WL 963812, at *4 (Mar. 15, 2021)*; *South Broward Hosp. Dist. v. ELAP Servs., LLC, No. 20-cv-61007, 2020 U.S. Dist. LEXIS 226859, 2020 WL 7074645, at *7 (Dec. 3, 2020)*; *Johnson v. Catamaran Health Solutions, LLC, 687 F. App'x 825, 830 (11th Cir. 2017)*; *In re Packaged Seafood, 242 F. Supp. 3d at 1090*. The issue has now been resolved.

Defendants' motion is, therefore, GRANTED, and Count IV is dismissed insofar as it alleges a claim under Florida law.

3. Utah

Defendants make the same "direct benefits" argument regarding unjust enrichment under Utah law. They cite to a 2015 Utah Supreme Court case which held that "unjust enrichment does not result if the defendant has received only an incidental benefit from the plaintiff's service[s]." *Jones v. Mackey Price Thompson & Ostler, 2015 UT 60, 355 P.3d 1000, 1018 (2015)* (citation omitted). However, this Court does **[*113]** not read the Utah case the same way as the Florida directive. An "incidental benefit" is not the same as an "indirect benefit" — at least not how Utah's courts have interpreted the phrase.

HN34[] Florida case law plainly precludes unjust-enrichment claims if the plaintiff only indirectly benefitted the defendant. For example, in *Peoples Nat'l Bank of Commerce v. First Union Nat'l Bank of Florida, N.A., 667 So.2d 876 (Fla. 3d Dist. Ct. App. 1996)* — the principal case cited by the Florida Supreme Court in *Kopel* — the court held that a plaintiff bank did not directly confer a benefit upon several defendant banks even though the defendants had allegedly received overpayments from a third-party lender that had used some of the plaintiff's funds to make the overpayments. The court held that whatever overpayments the defendants received "could only have been conferred upon them by [the third-party lender], not [the plaintiff]." *Id. at 879*; *see also* *Extraordinary Title Services, LLC v. Florida Power & Light Co., 1 So.3d 400 (Fla. 3d Dist. Ct. App. Fla. 2009)* (noting that a plaintiff's payments to a defendant's subsidiary did not constitute a direct benefit).

HN35[] But Utah's Supreme Court has held that

> While unjust enrichment does not result if the defendant has received only an incidental benefit from the plaintiff's service . . . this court has found that a large variety of items fall under the definition of "benefit," including an "interest **[*114]** in money, land, chattels, or choses in action; beneficial services conferred; satisfaction of a debt or duty owed by [the defendant]; or anything which adds to [the defendant's] security or advantage."

Emergency Physicians Integrated Care v. Salt Lake Cnty., 2007 UT 72, 167 P.3d 1080, 1086 (2007) (quoting *Baugh v. Darley, 112 Utah 1, 184 P.2d 335, 337 (1947)*).

Accordingly, courts interpreting Utah law have construed "benefit" broadly and have declined to dismiss claims when there has arguably been an *indirect* benefit conferred by the plaintiff to the defendant. *See* *Johnson v. Blendtec, Inc., 500 F. Supp. 3d 1271, No. 19-cv-83, 2020 WL 6710432, at *14 (Nov. 16, 2020)*; *In re Packaged Seafood, 242 F. Supp. 3d at 1092*.

In this case, the IPPs indirectly benefitted the Defendants when they reimbursed the cost of Namenda that was purchased by their clients in Utah. For example, the record indicates that SBA paid out $351,797 in reimbursement[16] to their clients for Namenda between 2012 through 2017. (Expert Report of Laura Craft at ¶ 67). Presumably many Alzheimer's patients would not have purchased Namenda if they could not obtain insurance reimbursement for it. Put differently, if a patient would not have received reimbursement, he or she may have not been able to afford the drug and would not have made a purchase. That is enough to confer a benefit recognizable under Utah law.

The motion for summary judgment dismissing Count IV under Utah law is DENIED.

4. Whether unjust-enrichment claims [*115] from ten states are precluded because adequate statutory remedies exist

Defendants move for summary judgment on the unjust-enrichment claims of ten states, arguing that they prohibit unjust-enrichment claims when adequate statutory remedies already exist: Arizona, California, Hawaii, Illinois, Massachusetts, Minnesota, Mississippi, New York, North Dakota, and Utah.

Defendants cite only one unpublished case from the Eastern District of Arkansas for this proposition, and do not point to any state-specific cases to support their argument. *See* *Thompson v. Bayer Corp., No. 4:07-cv-17, 2009 U.S. Dist. LEXIS 15190, 2009 WL 362982, at *6 (E.D. Ark. Feb. 12, 2009)* (noting that "some states do not allow an unjust enrichment claim to survive if there is an adequate remedy at law" and citing cases from Arizona, California, Hawaii, Delaware, Idaho, Illinois, Louisiana, Massachusetts, Minnesota, Mississippi, Missouri, New York, North Dakota, Oklahoma, Utah, and Washington). But the Defendants do not explain whether the cases cited in *Thompson* pertain to antitrust claims, how unjust-enrichment claims in these states should be evaluated in the context of their state's antitrust laws, or even whether the cases cited by *Thompson* in support of its proposition are still good law, as many of the cases cited are now over **[*116]** twenty years old.

The Court is dissatisfied with the briefing on this point, and it will not "independently undertake a review of each state's requirements, armed with only" a mere reference to inquire further into the state laws at issue. *Namenda VI, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *20*. If it was not important enough for Forest to brief the issue as it should have been briefed, there is no reason why the Court should do Forest's work for it.

HN36[] However, because this federal court sits in New York, it is acutely aware of New York law, under which an unjust-enrichment claim "is an equitable claim that is unavailable where an adequate remedy at law exists." *Fed. Treasury Enter. Sojuzplodoimport v. Spirits Int'l N.V., 400 F. App'x 611, 613 (2d Cir. 2010)* (summary order); *see also* *Samiento v. World Yacht Inc., 10 N.Y. 3d 70, 81, 883 N.E.2d 990, 854 N.Y.S.2d 83 (2008)*. "Courts in the Second Circuit have recognized that 'an unjust enrichment claim cannot survive where it simply duplicates, or replaces, a conventional contract or tort claim.'" *Reynolds v. Lifewatch, Inc., 136 F. Supp. 3d 503, 524 (S.D.N.Y. 2015)* (quoting *Koenig v. Boulder Brands, Inc., 995 F. Supp. 2d 274, 290 (S.D.N.Y. 2014)*); *see also* *Corsello v. Verizon New York, Inc., 18 N.Y. 3d 777, 790, 967 N.E.2d 1177, 944 N.Y.S.2d 732 (2012)*.

An adequate remedy exists under the New York antitrust statutes. IPPs acknowledge that their "unjust enrichment claims are premised on the same alleged facts, arise from an identical course of conduct by the Defendants, and will be proven using the same evidence as their antitrust and consumer protection claims." (ECF 445 at 19). There

[16] This is a nationwide number, not just a Utah number; in fact, I do not know whether it included any consumers in Utah. However, the certified class undoubtedly includes plaintiffs who reimbursed Utah consumers for Namenda.

is no reason to conclude **[*117]** that the New York claim will require demonstrating anything different than what IPPs need to prove for its antitrust claims. Accordingly, that claim simply "duplicates" the antitrust claims and must be dismissed as duplicative unjust-enrichment claims cannot exist under New York law.

Defendants' motion for summary judgment dismissing the New York unjust-enrichment claim is GRANTED.

5. Whether the remaining unjust-enrichment claims must be dismissed because they are duplicative

Defendants also argue that *all* of the unjust-enrichment claims are duplicative — whether or not a statutory remedy exists — and so need to be dismissed. Defendants make no more than a conclusory assertion on this point, in the hope that this Court will "streamlin[e] the litigation proceedings of a complex case." *In re Novartis and Par Antitrust Litig., No. 18-cv-4361 (AKH), 2019 U.S. Dist. LEXIS 138133, 2019 WL 3841711, at *7 (S.D.N.Y. Aug. 15, 2019)*.

However, the question of whether an unjust-enrichment claim is duplicative is a state-law issue, and Forest has not elected to brief that issue on a state-by-state basis. As I stated in the motion-to-dismiss order, whether these claims must be dismissed "turns on a case-by-case examination of whether each state's antitrust or consumer protection statute has 'override[n]' or 'limit[ed] ... the scope of restitutionary **[*118]** relief' that would normally be available to a plaintiff at equity." *Namenda VI, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *57* (quoting *In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 413 (S.D.N.Y. 2011)*). For whatever reason, Defendants have elected not to present the court with the sort of analysis required to dispose of these issues on summary judgment.

For that reason, I deny Defendants' motion for summary judgment, without prejudice. "Without prejudice" should not be read as an invitation to make yet another summary judgment motion. I will not entertain another round of motion; these matters will have to be dealt with at trial. Any new motion for summary judgment will be summarily denied.

****

In sum, each Defendant's motion for summary judgment is GRANTED as to the unjust-enrichment claims arising under Arkansas, Florida, and New York. It is DENIED without prejudice as to the rest of the states. The unjust-enrichment claims remaining under IPPs' Count IV are those arising under Alabama, Arizona, California, Hawaii, Illinois, Iowa, Kansas, Maine, Massachusetts, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, West Virginia, Wisconsin, and the District of Columbia.

G. Remaining Issues

1. Proof of [*119] Injury in Certain States

Forest argues that SBA cannot proceed as the class plaintiff for claims arising under the antitrust laws of twelve[17] states and the consumer-protection laws of three[18] states, because there is no evidence that SBA reimbursed for Namenda (i.e., paid overcharges) in any of those states. I assume Forest is making this motion to preserve its appellate rights — because the Court has already denied it. It is denied again.

In my order on the motions to dismiss, I noted that — per the Second Circuit's decision in *Langan v. Johnson & Johnson Consumer Companies, Inc., 897 F.3d 88 (2d Cir. 2018)* — ***HN37***[] the Class Action Fairness Act ("CAFA") provides Article III standing to class plaintiffs who represent out-of-state class members. *See Namenda*

---

[17] Hawaii, Maine, Minnesota, Mississippi, Nebraska, New Mexico, North Dakota, Oregon, South Dakota, West Virginia, Wisconsin, and Washington D.C. (ECF 565 at 39).

[18] Idaho, Illinois, and Nebraska. (ECF 565 at 39).

*VI, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233 at *22*. But I also observed that *Langan* did not necessarily "foreclose[] consideration of a properly made *Rule 12(b)(6)* motion" if the plaintiff is otherwise unable to state a claim. *Ibid.* Forest appears now to take up this line of argument, asserting that because SBA would be unable to state a claim as an individual plaintiff in certain states, it cannot be a proper class representative for plaintiffs in those states and thus those claims must be dismissed. In other words, because SBA may be unable to assert an *individual* claim in any state in which it did not make a reimbursement, **[*120]** Defendants claim that the whole class cannot proceed for those state-law claims.

This argument fails. The statutes that Forest cite to as requiring a specific "injury-in-the-state" are not as they seem. Forest argues that the statutes require the *plaintiff* to have been injured in the state, when in fact, they simply prohibit potential *defendants* from acting "in restraint of trade or commerce" within the state. *See, e.g.*, *D.C. Code § 28-4502*; *Haw. Rev. Stat. § 480-4*; *Me. Rev. Stat. tit. 10 § 1102*; *Minn. Stat. § 325D.54*; *Neb. Rev. Stat. Ann. § 59-801*; *N.M. Stat. Ann. § 57-1-2*. This means that — contrary to Forest's assertion — the focus is on whether the *defendants'* actions affected competition in the market for memantine in that state, not whether the lead plaintiff in a class action was injured in that particular state.

In the present case, where the market for Namenda was nationwide and reached approximately $1.5 billion by 2013, it is safe to assume that Forest's products (and therefore the consequences of its allegedly illegal behavior) reached all of the states implicated. And while it may be the case that SBA did not reimburse any clients in all 50 states, that does not render it an inadequate representative of class members located in those states. SBA's injuries (paying overcharges) are the same injuries allegedly suffered **[*121]** by all class members regardless of in whichever state they reimbursed for Namenda. The class has already been certified, and this Court concluded that it "does not see any substantive discrepancy between the various state antitrust laws that would preclude this case's going forward as a class action." *Namenda VIII, 338 F.R.D. 527, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988, at *36*. SBA's injuries are "typical" of the class and there is nothing that indicates it would be unable to adequately represent all class members, including those who suffered the same "typical" injury but under the law of a different state.

Of course, if no members of the plaintiff class reimbursed anyone in a particular state, then claims under that state's laws must be dismissed. Forest, however, has limited its motion to the Lead Plaintiff.

I note that other courts have refused to dismiss class actions based on similar arguments. *See, e.g., In re Restasis (Cyclosporine Ophthalmic Emulsion) Antitrust Litig., 355 F. Supp. 3d 145, 158 (E.D.N.Y. 2018)*; *Wellbutrin XL Antitrust Litig., 260 F.R.D. 143, 166 (E.D. Pa. 2009)*.

2. Statute of Limitations in Certain States

Forest also argues — regardless of how the Court rules on any merits-related issues — that claims arising under the laws of certain states must be dismissed as untimely under the state's statute of limitations. (ECF 565 at 39).

Forest insists that any cause of action stemming from the reverse settlements accrued **[*122]** on the date of the first overcharge associated with that conduct, which IPPs claim to be on June 1, 2012 (the date the class period begins). However, SBA did not file this lawsuit until August 20, 2015, which Forest argues bars the claims in states that have statutes of limitations of three years or less. These would bar the antitrust claims under Mississippi, Tennessee, and Kansas law (each have three-year statutes of limitations), and the consumer-protection claims in Illinois, New Hampshire, Utah (three years each), and Idaho (two years).[19]

All of the class' antitrust claims are timely. ***HN38***[] For federal antitrust statutes, the statute of limitations restarts whenever there is an overcharge associated with the anticompetitive conduct. The Supreme Court has held that if

[19] Forest also raised a statute-of-limitations argument about consumer-protection claims under Alabama law, but since that claim has been dismissed, the statute-of-limitations argument is now moot.

there are a "series of unlawfully high priced sales over a period of years, 'each overt act that is part of the violation and that injures the plaintiff,' *e.g.*, each sale to the plaintiff, 'starts the statutory period running again.'" *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* (quoting 2 P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶ 338b, p. 145 (rev. ed.1995)). Obviously, reimbursement cannot be obtained for periods that fall outside of the statute of limitations, but **[*123]** that does not mean that the claims as a whole are time barred.

Defendants point out that the highest courts of the states at issue — Mississippi, Tennessee, and Kansas — have not definitively decided whether such a "continuing violation" doctrine applies to their state's antitrust statute-of-limitations. But this is not a "continuing violation" rule, in that it does not permit the recovery of damages for reimbursements that were made prior to the commencement of the limitations period, as measured from the date on which this lawsuit was filed. The rule is that each reimbursement constitutes a separate injury. There is no reason for this Court to assume that these high courts would refuse to apply the doctrine when evaluating whether the present claims are time-barred. The antitrust statutes of the states in question all either contain harmonization provisions or have been interpreted in such a way that supports construing the statute conterminously with federal antitrust statutes. *See* *Kan. Stat. Ann. § 50-163* ("[T]he Kansas restraint of trade act shall be construed in harmony with ruling judicial interpretations of federal ***antitrust law*** by the United States Supreme Court."); *Walker v. U-Haul Co. of Mississippi, 734 F.2d 1068, 1070 n.5 (5th Cir. 1984)* (noting that claims under Mississippi's **[*124]** and the United States' antitrust statutes must be treated as "analytically identical"); *Freeman Indus. LLC v. Eastman Chem. Co., 172 S.W. 3d 512, 521 (Tenn. 2005)* ("[T]he enforcement of the state antitrust laws should be consistent with the federal laws.").

The same logic applies to the statutes-of-limitations of the consumer-protection laws of Illinois, New Hampshire, Utah, and Idaho. These statutes also contain harmonization provisions that require it to be construed in accordance with "the interpretation of the federal trade commission and the federal courts" relating to the FTC Act when deciding cases. *Idaho Code Ann. § 48-604*; *see also* *815 Ill. Comp. Stat. Ann. 505/2*; N.H. Rev. Stat. Ann. § 358-A: 13; *Utah Code Ann. § 13-11-2(4)*.

HN39[↑] Accordingly, this Court agrees with others that have concluded that claims in indirect-purchaser actions are timely because there are allegations of overcharges within the class period that are within the statute of limitations. *See, e.g.,* *In re Loestrin 24 FE, 433 F. Supp. 3d at 333*; *In re Glumetza Antitrust Litig., No. C 19-05822 WHA, 2020 U.S. Dist. LEXIS 39649, 2020 WL 1066934, at *11 (N.D. Cal. Mar. 5, 2020)*; *In re K-Dur Antitrust Litig., 338 F. Supp. 2d 517, 551 (D.N.J. 2004)*.

H. The Motion for Summary Judgment on the Hard Switch Theory Must Be Re-briefed

One last piece of housekeeping. Forest moves for summary judgment on the hard switch theory of liability. Forest filed its motion and its memorandum of law in support before this Court issued its decision declining to certify a class as to the hard switch theory, and so its arguments are all generalized at the class-wide **[*125]** level and are not specific to SBA. The same is true of SBA's responses.

No class having been certified as to the theory, SBA must demonstrate that it was personally harmed by the hard switch. It has not done this. It points to no evidence showing the harm that it and it alone suffered as a result of the hard switch. In her expert report, Laura A. Craft, noted that, between 2012-2017, SBA reimbursed for 2,219 class products, paying a total of $351,797. (Craft Report at ¶ 67). But Craft does not tie any of these reimbursements to the "hard switch," or even the period when the "hard switch" could have resulted in damage to SBA (i.e., between the February 2014 hard switch announcement and Judge Sweet's injunction in December 2014). Not a single SBA customer is identified as having switched to Namenda XR during this period, nor is there any testimony from any single doctor that he switched his patient to XR because of the "hard switch." To have suffered injury, not only would a patient have to have switched from Namenda IR to XR as a result of the hard switch, but SBA would need to show that that patient would have opted for generic Namenda IR once it became available. *See* *Namenda VIII, 338 F.R.D. 527, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988, at *31* ("For the hard **[*126]** switch to have injured a TPP, that TPP must have reimbursed for Namenda XR, and the XR reimbursement must have been for a prescription *that would otherwise have been a generic but for the hard switch*.").

Once the Court declined to certify a hard switch class, SBA needed to prove *its own* case, with evidence relating to *its own* customers, and *its own* reimbursements. SBA cannot rely on class-wide evidence to proves its individual claims. Therefore, SBA has not raised a genuine issue of fact in relation to its hard switch claim. Nor has it sought to supplement the record in opposition to Forest's motion to take account of this new reality since the class certification decision was announced almost four months ago.

Fairness, however, compels me to give SBA one last chance to oppose Forest's motion with evidence that is pertinent to it and it alone. SBA has twenty days from today's date to supply the court with evidence that ties any portion of its claimed damages to the "hard switch." Forest will have ten days after that to file a reply.

IV. CONCLUSION

The motions to exclude the expert reports and testimony of Michael Davitz, Jacob Holzer, and Philip Green are denied. The motions to exclude **[*127]** the expert reports and testimony of Susan Marchetti, Thomas McGuire, Lona Fowdur, and Sue Robinson are granted in part and denied in part consistent with this opinion.

As for the summary judgment motions, the cross-motions for summary judgment on Counts I and II — the antitrust claims — are denied in full. These claims will go to trial as to whether the reverse-payment settlements (including the Lexapro Amendment) were anticompetitive, and whether they caused any delay in generic competition. Defendants' motions for summary judgment as to Counts III and IV are granted in part and denied in part consistent with this opinion.

If we are still on centralized trial scheduling due to the COVID pandemic in late 2021, the Court will be applying for a trial date for this case during the first quarter of 2022. If I am back in control of my own trial calendar, I will be assigning a first quarter trial date as soon as I am authorized to do so.

The Clerk of Court is respectfully directed to close Dkt. Nos. 543, 545, 547, 549, 555, 560, 564, 568, 571, 574, and 614 and to remove them from this Court's list of open motions.

Opinion

ORDER

This cause is before the Court on Defendants' Motion to Stay (Doc. 43 (the "**Motion**")) and Plaintiffs' response thereto (Doc. 50). Upon consideration, the Motion is due to be denied.

I. BACKGROUND

The procedural and factual background as set forth in the Court's Order on Defendants' Motion to Dismiss is hereby **[*3]** adopted and made a part of this Order. (*See* Doc. 57).

II. STANDARD OF REVIEW

It may be appropriate for the district court to stay a case where a pending state court action arises out of the same controversy. *Colo. River Water Conservation Dist. v. United States, 424 U.S. 800, 817-19, 96 S. Ct. 1236, 47 L. Ed. 2d 483 (1976)*.[1] This type of abstention "avoid[s] duplicative litigation" and promotes "wise judicial administration." *Id.* However, "[a]bstention from the exercise of federal jurisdiction is the exception, not the rule," and, "[g]enerally, as between state and federal courts, the rule is that the pendency of an action in the state court is no bar to proceedings concerning the same matter in the Federal court having jurisdiction." *Id. at 813, 817* (internal quotations and citations omitted).

The Eleventh Circuit employs a two-part test to determine whether abstention under *Colorado River* is proper. First, the district court must evaluate whether the *Colorado River* analysis is applicable to the case. *Ambrosia Coal & Const. Co. v. Pages Morales, 95 Fed. Appx. 1320, 368 F.3d 1320, 1330-31 (11th Cir. 2004)*. The *Colorado River* analysis is only applicable "when federal and state proceedings involve substantially the same parties and substantially the same issues." *Id. at 1330*. "[T]he balance in these situations begins tilted heavily in favor of the exercise of the court's jurisdiction. Thus, if there is any substantial **[*4]** doubt about whether two cases are parallel the court should not abstain." *Acosta v. James A. Gustino, P.A., 478 F. App'x 620, 622 (11th Cir. 2012)*[2] (citing *Huon v. Johnson & Bell, Ltd., 657 F.3d 641, 646 (7th Cir. 2011)*).

If the *Colorado River* analysis is applicable, then the district court considers the "permissibility of abstention." *Ambrosia, 368 F.3d at 1331*. The Eleventh Circuit uses several factors to analyze the propriety of abstention: (1) whether one of the courts has assumed jurisdiction over property; (2) the inconvenience of the federal forum; (3) the potential for piecemeal litigation; (4) the order in which the fora obtained jurisdiction; (5) whether state or federal law will be applied; and (6) the adequacy of the state court to protect the parties' rights. *Id.* (citing *Am. Bankers Ins. Co. of Fla. v. First State Ins., 891 F.2d 882, 884 (11th Cir. 1990)*). Additionally, "'the vexatious or reactive nature of either the federal or the state litigation may influence the decision whether to defer to a parallel state litigation under *Colorado River*,'" and the policies underlying the relevant federal statute are important considerations to the

---

[1] In the Eleventh Circuit, "a stay, not a dismissal, is the proper procedural mechanism for a district court to employ when deferring to a parallel state-court proceeding under the *Colorado River* doctrine." *Moorer v. Demopolis Waterworks & Sewer Bd., 374 F.3d 994, 998 (11th Cir. 2004)* (internal quotations and citations omitted).

[2] "Unpublished opinions are not controlling authority and are persuasive only insofar as their legal analysis warrants." *Bonilla v. Baker Concrete Const., Inc.*, 487 F.3d 1340, 1345 (11th Cir. 2007).

abstention inquiry. *Id.* (quoting *Moses H. Cone Mem'l Hosp. v. Mercury Const. Corp., 460 U.S. 1, 17 n.20, 103 S. Ct. 927, 74 L. Ed. 2d 765 (1983)*).

III. DISCUSSION

Defendants request a stay for a period of 90 days or more in light of the ongoing State Court Action under the *Colorado River* abstention doctrine. (Doc. 43). However, Defendants cannot satisfy either prong of the Eleventh Circuit's **[*5]** two-part *Colorado River* test.

First, the *Colorado River* analysis is inapplicable here. Defendants argue that this action and the State Court Action involve "substantially the same issues" because "Both cases arise out of [Defendant] Matrix's acquisition of HealthFair . . . and Plaintiffs' theory of liability in both cases postulates that HealthFair failed to meet its benchmarks because of [Defendant] Matrix's subsequent business decisions, and not some other cause." (*Id.* at p. 8). They posit that the only distinction between the cases is that, in this action, Plaintiffs allege that Defendant Matrix "sought to *permanently* eliminate mobile services offered by HealthFair as an alternative product to [its] home services" whereas, in the State Court Action, Plaintiffs counterclaim that Defendant Matrix "halted HealthFair's mobile business only *temporarily*" to avoid its Earnout Payment obligation. (*Id.* at p. 6) (emphasis added in original).

It is true that the *factual* circumstances giving rise to the two cases are the same. (*See* Docs. 1, 50-2, 50-3). But the *legal* issues are ultimately very different: this case presents questions of federal ***antitrust law*** under the Clayton Act, and the State **[*6]** Court Action presents questions of state contract law. In this action, the Court must assess the alleged permanent damage to the risk adjustment service provider market and to the public while Plaintiffs act as private attorney generals. In the State Court Action, the state court must address the alleged private harm to the parties while each party acts on their own behalf. Given the variance in the cases' legal issues, there is no risk of conflicting rulings. *Cf. Atlantic Games of Delray, LLC v. Atlantic Games, LLC, No. 14-81610, 2015 U.S. Dist. LEXIS 182426, 2015 WL 12672725, at *4 (S.D. Fla. June 17, 2015)* (stating that it was possible for the federal court and the state court to "reach different decisions as to the competing counts of trademark infringement in both cases," resulting in "deleterious duplication of resources").[3]

Second, abstention is impermissible here because Plaintiffs can *only* assert their Clayton Act claim in this Court. *Aquatherm Indus., Inc. v. Fla. Power & Light Co., 84 F.3d 1388, 1392 n.2 (11th Cir. 1996)*, *cert. denied*, *526 U.S. 1050 (1999)*, (citing *15 U.S.C. § 15(a)* and stating that "Exclusive federal jurisdiction is provided by statute for . . . Clayton Act claims"). Consequently, abstaining from the exercise of jurisdiction over Plaintiffs' Clayton Act claim would completely contravene the statutory language withholding jurisdiction from the state courts, and it would run afoul of Congress' intent **[*7]** to restrict adjudication of Clayton Act claims—which can involve regional or national monopolies that have regional or national effects—to the federal courts. *See Andrea Theatres, Inc. v. Theatre Confections, Inc., 787 F.2d 59, 63 (2d Cir. 1986)* ("[A]bstention is clearly improper when a federal suit alleges claims within the exclusive jurisdiction of the federal courts. . . . Indeed, abstention would run counter to Congress' determination, reflected in grants of exclusive federal jurisdiction, that federal courts should be the primary fora for handling such claims. The grant of such jurisdiction could be seriously hampered if federal courts exercised discretionary power to await the outcome of related state court proceedings."); *Key v. Wise, 629 F.2d 1049, 1059 (5th Cir. 1980)* (recognizing that "When Congress has directed . . . not only that the federal courts may take jurisdiction of a particular class of cases, but also that they have exclusive jurisdiction of those cases, abstention to permit adjudication of the entire case in a state forum defeats the purpose of that legislation").[4] Abstention would

[3] Because the Court finds that the proceedings do not involve "substantially the same issues," there is no need to consider whether the proceedings involve "substantially the same parties." However, the Court notes that Defendant Matrix sues two individuals in the State Court Action that are not parties in this case, and, in this case, Plaintiffs sue six entities (*i.e.*, Defendants Providence and the Frazier Entities) that are not parties in the State Court Action. (*See* Docs. 1, 50-2). Although *Colorado River* does not require an exact match, these dissimilarities are likely so substantial as to tip the balance in favor of the Court's exercise of jurisdiction. *See Acosta, 478 F. App'x at 622*.

also be unfair to Plaintiffs and to the public because it would deprive them of a forum to litigate their Clayton Act claim, and it would conflict with Congress' purpose of authorizing private lawsuits for effective **[*8]** and efficient enforcement. *See Palmyra Park Hosp. Inc. v. Phoebe Putney Mem'l Hosp., 604 F.3d 1291, 1299 (11th Cir. 2010)* (stating that "The government has limited resources with which to uncover and prosecute antitrust violations, which is precisely why Congress created a private right of action with treble damages as an incentive").

Relatedly, it is worth noting that this case only raises a Clayton Act claim. As a matter of federal ***antitrust law*** designated solely to the federal courts, this Court not only "possess[es] greater experience in the determination of the substantive claims," but it is also the only forum authorized to do so. *Vacation Break, U.S.A., Inc. v. Mktg. Response Grp. & Laser Co., 28 F. Supp. 2d 651, 653 (M.D. Fla. 1998)* (denying the defendant's motion to stay in part because of the presence of Clayton Act claims and stating that "'The presence of federal law issues must always be a major consideration weighing against surrender.'" (quoting *Moses H. Cone Mem'l Hosp., 460 U.S. at 26*)).[5]

Moreover, because this Court *must* adjudicate Plaintiffs' Clayton Act claim, the state court cannot adequately protect Plaintiffs' federal antitrust rights. And because the state court does not have jurisdiction to adjudicate Plaintiffs' Clayton Act claim, abstention would only "encourage piecemeal adjudication of the issues raised in the federal suit" and delay litigation of this claim. *Andrea Theatres, 787 F.2d at 62*; *see also* *Aquatherm, 84 F.3d at 1391-94* ("Florida's **[*9]** preclusion laws do not permit a prior state court judgment to act as a bar to claims over which the state court did not have subject matter jurisdiction.").[6]

The Court realizes that the State Court Action has been pending for over two years and that, during this time, Defendant Matrix amended its state court complaint three times and has moved for leave to amend again to add a claim for punitive damages. (Doc. 43-1, p. 3, ¶ 4). The Court also recognizes that the parties exchanged discovery requests and objections, that the parties filed motions to compel (one of which required the state court's intervention), that Defendant Matrix produced more than 2.1 million pages of documents and received millions of documents from HealthFair, and that fact discovery concludes on June 9, 2021. (*Id.* at p. 4, ¶¶ 10-11).[7]

However, depositions have not been taken, export reports have not been exchanged, and the parties have represented to the state court that they may move to extend the June fact discovery deadline, depending on the status of the ongoing COVID-19 pandemic, to safely conduct key depositions in person. (Doc. 50-1, p. 4, ¶ 13; Doc. 50-14, pp. 5-6 n.3). And, notably, the Court's **[*10]** retention of this case does not undermine the discovery efforts taken in the State Court Action because the parties agreed "that all discovery produced in the state court case may be used in this case" in their Case Management Report. (Doc. 34, p. 2). Thus, the State Court Action's progress is not so substantial as to weigh in favor of abstention. *See* *Moses H. Cone Mem'l Hosp., 460 U.S. at 21* (stating that "priority should not be measured exclusively by which complaints was filed first, but rather in terms of how much progress has been made in the two actions").

---

[4] The Eleventh Circuit has adopted as binding precedent the decisions of the former Fifth Circuit issued before October 1, 1981. *Bonner v. City of Prichard, 661 F.2d 1206 (11th Cir. 1981)* (en banc).

[5] Defendants contend that the fifth factor is neutral because this case does not involve "complex questions of state law that a state court might be best suited to resolve." (Doc. 43, p. 10) (internal quotations omitted). However, Defendants misconstrue this factor; the inquiry is whether state *or federal* law is at issue. The absence of complex state law issues is irrelevant—the presence of a federal claim that can only be adjudicated in federal court is what matters here.

[6] Defendants assert that the resolution of the State Court Action will be determinative of this case, but that result is far from inevitable given the difference in the issues. Regardless, in *Aquatherm*, the Eleventh Circuit found that the Florida court judgment as to the parties' state antitrust claims did not have preclusive effect in a federal action brought under the federal antitrust laws due to lack of subject matter jurisdiction. *See id.* Accordingly, the third factor weighs against abstention.

[7] The Motion states that the state court resolved a motion to dismiss, but the cited paragraphs of Ernest Leonard's Declaration in Support of Defendants' Motion to Stay does not mention a motion to dismiss. (Doc. 43, p. 9; Doc. 43-1, pp. 3, 5, ¶¶ 4, 10-11). However, the resolution of a motion to dismiss by the state court does not change the Court's conclusion.

Finally, contrary to Defendants' argument, the fact that Plaintiffs initiated this action a year and a half after their original counterclaim in the State Court Action does not demonstrate that their Clayton Act claim is vexatious or reactive. (Doc. 43, p. 10). Defendants cite to *Atlantic Games*, wherein the Southern District of Florida ruled that the plaintiff's federal trademark case, filed approximately two months after the state trademark case, was reactive because the plaintiff should have been raising its arguments as defenses or counterclaims in the state case. *2015 U.S. Dist. LEXIS 182426, 2015 WL 12672725, at *5*. But it found that the federal trademark case was not vexatious, reasoning that the plaintiff "may **[*11]** have felt compelled to file [the] federal suit to protect any potential interest it may have under federal law." *Id.*

Here, unlike *Atlantic Games*, Plaintiffs could not have raised its Clayton Act arguments as defenses or counterclaims in the State Court Action due to this Court's exclusive jurisdiction over such claims. *See id.* And Plaintiffs did not merely "feel compelled" to file this case—Plaintiffs *had to* file this case to protect any potential interest they may have under the Clayton Act. *See id.*

Furthermore, the timing of the filing of this action is not necessarily suspect. It is reasonable that Plaintiffs would file this case after the commencement of discovery and the elapse of a substantial amount of time because the alleged Clayton Act violation may not have been immediately apparent, and Plaintiffs may have a legitimate claim for relief.[8] *See Clay v. AIG Aerospace Ins. Servs., Inc., 61 F. Supp. 3d 1255, 1265 (M.D. Fla. 2014)* (finding that the litigation was not vexatious or reactive where the plaintiffs "have stated what appear on the face of their Amended Complaint to be legitimate claims for relief"). "It is not the case that Plaintiffs have filed this lawsuit after an unfavorable disposition of a claim on its merits or continue to file lawsuit after lawsuit **[*12]** against Defendants in numerous different forums." *Id.* There is nothing else in the record that suggests Plaintiffs filed this action for any improper purpose.[9]

Because the *Colorado River* analysis is inapplicable and impermissible, and because abstention would blatantly defy the text of and the policies supporting the Clayton Act, it is not justified on grounds of "wise judicial administration, giving regard to conservation of judicial resources and comprehensive disposition of litigation." *Colo. River, 424 U.S. at 817* (internal quotations omitted) (stating that the "most important" factor in considering whether to abstain was "the McCarran Amendment itself"); *see Cottrell v. Duke, 737 F.3d 1238, 1248 (8th Cir. 2013)* (stating "we join the Second, Seventh, and Ninth Circuits and hold that the *Colorado River* doctrine may not be used to stay or dismiss a federal proceeding in favor of a concurrent state proceeding when the federal proceeding contains a claim over which Federal courts have exclusive jurisdiction").[10] "As long as this Court has jurisdiction over the matter, it must not skirt the duties conferred to it by the United States Constitution," particularly when that matter is

---

[8] Defendants also argue that Plaintiffs' "conflicting allegations" shows that this case is "an illegitimate pressure tactic." (Doc. 43, p. 10). Plaintiffs counter that "Defendants do not explain how, even if there were an inconsistency between the state court counterclaim and the Clayton Act claim here, that inconsistency would render this action 'vexatious.' . . . Plaintiffs first asserted their state court counterclaim *in 2019*, before it was known whether Defendants' wrongful halt of Plaintiffs' mobile business was permanent. *By late 2020*, when Plaintiffs filed this action, it was clear that Defendants' actions were permanent." (Doc. 50, p. 20) (emphasis in original). The Court agrees that the discrepancy in the pleadings is not inherently vexatious, reiterates that the distinction merely seems reflective of the different legal issues presented in the two actions, and notes that Defendants do not provide an explanation for how the inconsistency is vexatious. Moreover, the Court finds Plaintiffs' explanation conceivable, and it again notes that they may have a legitimate Clayton Act claim. The Court dismissed the Complaint without prejudice, and therefore the legitimacy of Plaintiffs' claim is unknown at this stage of the litigation.

[9] The parties agree that neither court has assumed jurisdiction over property and that the federal forum and the state forum are equally convenient. (Doc. 43, p. 10; Doc. 50, pp. 13-14). Thus, the first and second factors are neutral.

[10] Defendants also request a stay under the Court's inherent staying authority. (Doc. 43). District courts have broad discretion to stay proceedings. *Clinton v. Jones, 520 U.S. 681, 706, 117 S. Ct. 1636, 137 L. Ed. 2d 945 (1997)*. The party seeking a stay has the burden to show good cause for and reasonableness of the requested stay. *Belloso v. Asplundh Tree Expert Co., No. 6:18-cv-460, 2018 U.S. Dist. LEXIS 157936, 2018 WL 4407088, at *2 (M.D. Fla. Sept. 17, 2018)*. For the reasons stated above, the Court finds that a stay under its inherent staying authority is unreasonable and unsupported by good cause.

within the Court's exclusive jurisdiction. *See* *Clay, 61 F. Supp. 3d at 1266*. Thus, the Court declines **[*13]** to abstain pending the resolution of the State Court Action.

IV. CONCLUSION

Accordingly, it is **ORDERED AND ADJUDGED** that Defendants' Motion to Stay is **DENIED**.

DONE AND ORDERED in Orlando, Florida on June 14, 2021.

Opinion by: DENISE L. COTE

Opinion

[*426] OPINION & ORDER

DENISE COTE, District Judge:

The plaintiffs, who are college and graduate school students, bring antitrust claims against three publishers of textbooks and two on-campus bookstore operators. The plaintiffs assert that the defendants have conspired to eliminate competition presented by the robust market for used textbooks. The defendants are alleged to have convinced universities and their faculty to require students to purchase their textbooks and associated course materials in a digital format through a program referred to as Inclusive Access. This is alleged to have restricted consumer choice in the market for textbooks and to have raised textbook prices for students. The defendants have moved for dismissal of the entire complaint. For the reasons stated below, the defendants' motion is granted.

Background

The following facts are taken from the Second Consolidated Amended Class Action Complaint ("SAC") and documents integral to it, unless otherwise noted, and are taken to be true for purposes of this motion. *Coal. for Competitive Elec. v. Zibelman, 906 F.3d 41, 48-49 (2d Cir. 2018)*. The plaintiffs bring this action as representatives of a class defined as "All students at colleges or graduate schools in the **[**3]** United States who purchased subscriptions to Inclusive Access Materials."[1] The SAC defines "Inclusive Access Materials" as "textbooks and Ancillary Required Course Materials assigned through the Inclusive Access system." It defines "Ancillary Required Course Materials" as "required assignments, homework problems, exams, and quizzes." "University" is defined as "any institution of undergraduate or graduate higher education, including any college of higher education." This Opinion will use the term Institutions to refer to colleges and universities, except when quoting directly from the SAC.

Three of the four named plaintiffs purchased subscriptions to Inclusive Access from the Retailer Defendants. The SAC asserts, however, that a fourth plaintiff, Kira Cloonan ("Cloonan"), "was required to and did purchase subscriptions to Inclusive Access Materials from [Publisher] Defendant Pearson."

A. Secondary Market for Textbooks

The three Publisher Defendants -- Cengage Learning, Inc. ("Cengage"); McGraw Hill, LLC ("McGraw Hill"); and Pearson Education, Inc. ("Pearson") -- are the dominant publishers of college textbooks in the United States. Together, they control 80-90% of the market for new textbooks. **[**4]**

In the early 2000s, the Publisher Defendants began to face increasing competition from the rapidly growing secondary marketplace for textbooks. At online sites such as Amazon, eBay, and Chegg, and at brick-and-mortar vendors, college students could buy, sell, and rent used textbooks at prices **[*427]** dramatically below the prices for new textbooks.

On-campus bookstores also suffered from the rapid growth of the secondary market for textbooks. Although on-campus bookstores sold both new and used textbooks, they faced competition in the market for used textbooks from off-campus and online bookstores. The majority of on-campus bookstores are operated by the Retailer Defendants: Barnes & Noble College Booksellers, LLC and Barnes & Noble Education, Inc. (collectively, "Barnes & Noble") and Follett Higher Education Group, Inc. ("Follett"). Together, they manage on-campus bookstores at over 700 Institutions.

B. Inclusive Access

[1] Alternatively, in the event they are determined not to be direct purchasers, the plaintiffs explain that they bring this action on behalf of "all persons and entities who indirectly purchased Inclusive Access Materials from the Defendants or co-conspirators for personal use."

1. Origins

In response to the rise of the secondary market for college textbooks, the Publisher Defendants adopted a "digital-first strategy" that aimed to curtail the growth of the secondary market by reducing sales of new hardcopy textbooks. As part of that strategy, the Publisher **[**5]** Defendants developed "Inclusive Access,"

> a system of providing time-limited access to digital course content[2] that requires University students to obtain their textbooks only in an online format and only from their official on-campus bookstore (or from publishers themselves) and not from any other source.[3]

The Publisher Defendants first experimented with products similar to Inclusive Access in 2014 and 2015 through "pilot programs," but the products failed to take root. The plaintiffs claim that:

> Inclusive Access was rolled back at a number of institutions after a study showed that, in a majority of classes where an Inclusive Access pilot program was launched [in 2014 or 2015], the percentage of students with a grade of "C" or better declined.

On May 18, 2015, the United States Department of Education ("DOE") published for comment a proposed rule pursuant to Title VII of the *Higher Education Act of 1965* that would permit, among other things, Institutions to include the cost of textbooks as part of tuition and fees ("Notice"). *80 Fed. Reg. 28484 (2015)*. In the Notice, the DOE stated that it "initially considered prohibiting institutions from including books and supplies as part of tuition and fees," but had

> decided against a total prohibition on including **[**6]** books and supplies as part of tuition and fees, and agreed to a compromise position that would still benefit students, allow institutional flexibility when materials are integral to the course, and hold institutions accountable through cost transparency.

Id. at 28521-22.

On October 30, 2015, the DOE published the final rule, which became effective on July 1, 2016 ("*Rule 164*"). Id. at 67126. *Rule 164* allows Institutions to directly bill students for textbooks and supplies on their tuition statements in some circumstances. It provides:

> **[*428]** An institution may include the costs of books and supplies as part of tuition and fees under paragraph (c)(1)(i) of this section if -
>
> (i) The institution -
>
> (A) Has an arrangement with a book publisher or other entity that enables it to make those books or supplies available to students below competitive market rates;
>
> (B) Provides a way for a student to obtain those books and supplies by the seventh day of a payment period; and
>
> (C) Has a policy under which the student may opt out of the way the institution provides for the student to obtain books and supplies under this paragraph (c)(2). . . .
>
> (ii) The institution documents . . . that the books or supplies, including digital or electronic course materials, are not available elsewhere **[**7]** or accessible by students enrolled in that program from sources other than those provided or authorized by the institution[] . . . .

---

[2] The SAC notes that digital textbooks, whether offered through Inclusive Access or otherwise, are sometimes accompanied by Ancillary Required Course Materials.

[3] The plaintiffs vacillate between using the term Inclusive Access to refer to digital textbooks and course materials sold by the Publisher Defendants to the Institutions and using it to describe the process and contractual arrangements for the delivery of these materials. The Defendants contend that the plaintiffs "mischaracterize[] . . . Inclusive Access as if it were the educational materials themselves, rather than one of several mechanisms for the distribution and sale of those materials."

34 C.F.R. § 668.164(c)(2) (2016) (emphasis supplied).

The DOE explained that it was motivated by its statutory mandate to protect "the rights of students as consumers." 80 Fed. Reg. 67138 (2015). Commentators had persuaded it "that including books and supplies [in tuition] would not only enable an institution to negotiate better prices for its students, it would result in students having acquired course materials at the beginning of a term or payment period." Id. Aware, however, that the inclusion of the cost of books as part of tuition would mean that "students will not have the option of seeking even lower cost alternatives such as used books, rentals, or e-books," the Rule requires the Institution to provide the student an opt-out. Id. at 67139.

The DOE also justified its adoption of the Rule by reference to the increased demand for digital course material:

> We are convinced that digital platforms, and digital course content in general, will become more ubiquitous and that including digital content as part of tuition and fees ensures that students have access to this technology.

Id. at 67126-01.[4] The **[**8]** DOE cited "the best financial interests of students" as its guiding principle in drafting the Rule. Id. at 67138.

2. Adoption of Inclusive Access

The SAC alleges that the Defendants "began working together in 2015 and 2016 to promote" Inclusive Access. McGraw Hill launched a "precursor" to Inclusive Access "in 2015," Cengage's "earliest known contracts with Universities for Inclusive Access programs date back to early 2016," and Pearson "launched its Inclusive Access program in 2016." They began to "evangelize" Inclusive Access, and Inclusive Access programs were introduced at Institutions across the United States. For example, between July 2016 and November 2017, Pearson executed agreements to implement Inclusive Access with over 200 Institutions. The SAC alleges that by promoting Inclusive Access, "the Defendants are effectively 'aging out' traditional textbooks."

[*429] 3. Features

Digital textbooks delivered through Inclusive Access programs are typically cheaper than new hardcopy textbooks. On the other hand, they are more expensive than used hardcopy textbooks sold or rented on the secondary market.

Students are "automatically" subscribed to Inclusive Access when they enroll in a college **[**9]** course that has adopted it and are automatically charged for the digital textbooks on their tuition bills. Students may elect to purchase "print upgrades" for an additional fee, but the Publisher Defendants limit the number of students who may do so in any given course. Although students nominally have the right to opt out of Inclusive Access, they are often warned that opting out of Inclusive Access will make passing the course "impossible" since they will not have access to Inclusive Access if they opt out.

C. Agreements

The plaintiffs allege that the Defendants entered into agreements that "induce[] Universities to mandate Inclusive Access" and "create[] exclusive dealing relationships between the Publisher Defendants and on-campus bookstores, including those run by the Retailer Defendants." They further allege that "[e]ach of these contracts has the purpose and effect of destroying the Defendants' major source of competition (the secondary marketplace for textbooks)." The SAC describes agreements between Institutions and their on-campus bookstores, which are referred to as Bookstore Operating Agreements, and between Institutions and Publisher Defendants, which are referred to as **[**10]** Institution Agreements.

---

[4] The SAC does not highlight the enactment of Rule 164 in its description of the adoption of Inclusive Access, but it does mention that the Rule "govern[s] automatic billing for textbooks." The SAC also asserts that the Defendants have violated Rule 164 because textbooks distributed through Inclusive Access are not offered at a lower-than-competitive market rate and students are provided only an "illusory" opt-out.

1. Bookstore Operating Agreements

Through Bookstore Operating Agreements, the Institutions engage the Retailer Defendants to operate and provide services for their on-campus bookstores. Under a Barnes & Noble Bookstore Operating Agreement ("B&N Agreement"),[5] for example, Barnes & Noble "shall fill orders for books and required supply items from term to term in accordance with textbook and supply adoptions by the faculty," and shall contact "all faculty members for their textbook and supply adoptions." The Institution is "not . . . responsible for compiling, nor shall it maintain, a list of such adoptions."

The B&N Agreement made Barnes & Noble the exclusive buyer and seller of the Institution's textbooks, including digitally published or distributed course materials. To underscore the exclusive nature of the relationship between Barnes & Noble and the Institution, the Agreement states:

> [The Institution] shall not contract with any third party to provide any services of the type outlined in this Agreement whether on or off campus, through e-commerce sites, hyperlinks to alternate sources, or otherwise endorsed or supported by [the Institution].

The B&N Agreement gives **[**11]** the Institution commissions on the gross sales of any hardcopy and digital textbooks. The SAC explains that "in some instances" the Retailer Defendants also pay the Institutions up-front signing bonuses of $1 million or more when the Institution signs an on-campus bookstore contract.

2. Institution Agreements

The SAC also describes an Institution Agreement between each of the Publisher Defendants and an Institution that participates **[*430]** in Inclusive Access. The Defendants have provided the full agreements with their motion to dismiss.

i. Pearson Agreement

Under a Pearson Institution Agreement ("Pearson Agreement"),[6] for example, the Institution selects, and Pearson approves, a third-party (in this case, Follett) to operate the Institution's on-campus bookstores and "purchase, on its behalf," for two years, digital textbooks and Ancillary Required Course Materials from Pearson. If the Institution does not enroll a minimum number of its students in Inclusive Access, the Publisher Defendant can terminate the agreement or raise the prices of Inclusive Access textbooks.[7] An exhibit attached to the Pearson Agreement provides an initial list of courses that will adopt Inclusive Access textbooks.

The **[**12]** Pearson Agreement also contemplates discounts for Inclusive Access textbooks. For instance, Pearson will sell its digital textbooks[8] at a discount to the online purchase price for the corresponding "nationally available eBook." The Institution and its on-campus bookstore may not sell the digital textbooks to students at a price more than a defined margin above the agreement's discounted price. Pearson also agrees to provide the Institution or its on-campus bookstore "the option" to purchase, at a set price, a loose-leaf print upgrade version of the digital textbooks.

ii. Cengage Agreement

---

[5] A B&N Agreement between Barnes & Noble and Eastern Kentucky University, dated June 30, 2017, was described in the SAC. The Defendants provided that agreement as an exhibit to their motion to dismiss.

[6] The agreement is between Pearson and the University of Florida Board of Trustees, dated May 1, 2017.

[7] The Pearson Agreement provides that the Institution must achieve thousands of enrollments in the first year and multiples of that number in the second year. An enrollment is defined as "one student registered in one Course."

[8] The SAC does not separately define digital textbooks and eBooks. This Opinion therefore only uses the term digital textbooks except when quoting from the SAC or the agreements upon which it relies.

Under a Cengage Institution Agreement ("Cengage Agreement"),[9] Cengage agrees to offer the Institution digital textbooks for a two-year period at a discount and to give the Institution's on-campus bookstore the right to acquire access to those textbooks on the Institution's behalf. The discount is off of Cengage's "then current digital list price." Cengage agrees to provide loose-leaf versions of the digital textbooks that have been purchased under the agreement for a substantial minority of the enrollments at a defined price per book.

iii. McGraw Hill Agreement

Under a McGraw Hill Institution Agreement **[**13]** ("McGraw Hill Agreement"), the Institution's "Auxiliary," which is described as the Subscriber, agrees to adopt digital McGraw Hill textbooks as the required course materials for courses described in an attachment to the agreement.[10] The McGraw Hill Agreement provides that the Subscriber "shall purchase and [McGraw Hill] shall provide access for each of the Registered Students in each Course" at the discounted fees listed in the attachment. The Agreement also allows the Subscriber to order a loose-leaf print version of the digital textbook for each student for an additional per-semester fee.[11]

[*431] D. Electronic Publishers Enforcement Group

In 2016, the Publisher Defendants and two other publishing companies formed a trade association, Electronic Publishers Enforcement Group ("EPEG"). EPEG maintains a website and promulgates anti-counterfeiting "best practices" guidelines for the purpose of eliminating counterfeit textbooks.

E. Procedural History

On January 22, 2020, off-campus college textbook retailers and online booksellers filed a class action in the District of Delaware asserting antitrust claims against the Defendants over their use of Inclusive Access ("Retailer Plaintiffs Action"). Student **[**14]** plaintiffs filed over a dozen similar actions thereafter.

On August 11, the Judicial Panel on Multidistrict Litigation ordered the centralization of Inclusive Access-related cases in this Court. Of the fourteen cases that have been transferred, thirteen are class actions brought by student purchasers of Inclusive Access.[12] Lead counsel for both sets of actions were chosen at a September 3 conference.

The student plaintiffs filed a consolidated amended complaint on October 16. On December 18, the student plaintiffs filed the SAC instead of opposing a December 4 motion to dismiss filed by the Defendants. The Defendants' motion to dismiss the SAC was filed on January 22, 2021, and became fully submitted on March 9. Meanwhile, the defendants in the Retailer Plaintiffs Action moved to dismiss that action as well. That motion is addressed in a separate Opinion filed today.

The SAC alleges that the Defendants entered into a conspiracy to restrain trade in several textbook markets through the implementation of Inclusive Access. The plaintiffs claim that the conspiracy is an unreasonable restraint

---

[9] The Cengage Agreement, dated March 21, 2017, is between Cengage and Central Washington University.

[10] The McGraw Hill Agreement, dated March 27, 2019, is between McGraw Hill and Aztec Shops, Ltd., "an Auxiliary" of San Diego State University.

[11] None of the Bookstore Operating Agreements or Institution Agreements use the term "Inclusive Access." The McGraw Hill Agreement, for example, refers to a "web-based solution" that enables students to subscribe to "MHE Content," consisting of "certain online products and services . . . offered by MHE through [its] website . . . ." The Pearson Agreement refers to "Pearson Products," including "eBooks," "Revel," "MyLabs," and "Mastering." The Cengage Agreement describes "Titles" that comprise "eBooks and digital homework solutions." The B&N Agreement covers, among other things, digital textbooks and "course materials and supplies, including . . . materials published or distributed electronically and/or through learning management systems, or sold over the Internet."

[12] An additional student purchaser class action that is before this Court, Cabral v. Cengage Learning, Inc., et al., 20cv3660, is related to this multi-district litigation.

of trade in violation of *§ 1 of the Sherman Act, 15 U.S.C. § 1*. The SAC also alleges that each Defendant **[**15]** monopolized each of the textbook markets it describes, and has conspired to do so, in violation of *§ 2 of the Sherman Act, 15 U.S.C. § 2*. In addition, the plaintiffs bring a variety of state law claims. The plaintiffs seek damages and injunctive relief under the Clayton Act. *15 U.S.C. §§ 15*, *26*.

Discussion

When deciding a motion to dismiss under *Rule 12(b)(6), Fed. R. Civ. P.*, a court must "constru[e] the complaint liberally, accept[] all factual allegations as true, and draw[] all reasonable inferences in the plaintiff's favor." *Zibelman, 906 F.3d at 48-49*. To survive a motion to dismiss, "a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. A complaint must do more than offer "naked assertions devoid of further factual enhancement," and a court is not "bound to accept as true a legal conclusion couched as a factual allegation." Id. (quoting *Bell Atl. Corp. v.* ***[*432]*** *Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). In determining the adequacy of a complaint, "a district court may consider the facts alleged in the complaint, documents attached to the complaint as exhibits, and documents incorporated by reference in the complaint." *DiFolco v. MSNBC Cable L.L.C., 622 F.3d 104, 111 (2d Cir. 2010)*.

This Opinion will first address the plaintiffs' claims under the Sherman Act. It will then turn to their claims under the state antitrust statutes.

I. Sherman **[**16]** Act Claims

To survive a motion to dismiss, a Sherman Act claim must allege an antitrust injury, define a relevant market, and plausibly allege conduct in violation of the antitrust laws. *Concord Assocs., L.P. v. Ent. Properties Tr., 817 F.3d 46, 52 (2d Cir. 2016)*. This section will first determine whether each of the four representative plaintiffs has antitrust standing. It will then evaluate the plaintiffs' claims brought under *§ 1 of the Sherman Act*. Finally, it will examine the plaintiffs' claims brought under *§ 2*.

A. Antitrust Standing

The Defendants contend that, as indirect purchasers of Inclusive Access, the plaintiffs lack standing to sue the Defendants for damages. See *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. *Section 4* of the Clayton Act entitles "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws" to treble damages. *15 U.S.C. § 15*. Applying *§ 4*, the Supreme Court has "consistently stated that the immediate buyers from the alleged antitrust violators may maintain a suit against the antitrust violators," but "indirect purchasers who are two or more steps removed from the violator in a distribution chain may not sue." *Apple Inc. v. Pepper, 139 S. Ct. 1514, 1520, 203 L. Ed. 2d 802 (2019)* (citation omitted). This "indirect purchaser rule" stems from the Supreme Court's decision in Illinois Brick, which "established a bright-line rule that authorizes **[**17]** suits by direct purchasers but bars suits by indirect purchasers." Id. (citation omitted). "The Illinois Brick Court listed three reasons for barring indirect-purchaser suits: (1) facilitating more effective enforcement of antitrust laws; (2) avoiding complicated damages calculations; and (3) eliminating duplicative damages against antitrust defendants." *Id. at 1524*.

1. Retailer Defendants

The SAC adequately pleads standing to sue the Retailer Defendants for damages. The SAC alleges that three of the named plaintiffs purchased their Inclusive Access subscriptions from on-campus bookstores operated by one or the other of the two Retailer Defendants. Throughout the SAC, the plaintiffs allege that on-campus bookstores are the exclusive sellers of Inclusive Access. The SAC alleges that the Bookstore Operating Agreements are agreements "between a University and a Retailer Defendant vesting the retailer with exclusive rights to distribute Inclusive Access Materials on the University's campus." This allegation is borne out by the Bookstore Operating Agreements themselves, which provide that an on-campus Retailer Defendant shall be the Institution's "exclusive" seller of any Inclusive Access textbooks **[**18]** that the Institution's students require for their courses.

The Defendants do not deny that the SAC plausibly alleges that students purchase Inclusive Access from the Retailer Defendants. They instead emphasize that it is the Institutions that purchase Inclusive Access from the Publisher Defendants. **[*433]** These arrangements between the Publisher Defendants and the Institutions do not affect, however, the plaintiffs' standing to sue the Retailer Defendants.

2. Publisher Defendants

While three of the four plaintiffs are alleged to have purchased Inclusive Access from the Retailer Defendants, one of the plaintiffs is alleged to have purchased Inclusive Access from one of the Publisher Defendants. In a single paragraph, the SAC asserts that Cloonan "was required to and did purchase subscriptions to Inclusive Access Materials from Defendant Pearson." The Defendants argue that the SAC

> fail[s] to explain how . . . Cloonan's alleged direct purchase from Pearson, made through Pearson's website or by other means, qualifies as Inclusive Access, whose signature characteristics, according to the [SAC], include automatic subscription and direct billing by the university.

The SAC's conclusory assertion regarding **[**19]** Cloonan's purchase does not plausibly plead that she directly purchased an Inclusive Access textbook from Pearson. The SAC consistently alleges that Inclusive Access is sold by the Publisher Defendants to the Institutions and sold to the students by those Institutions' on-campus bookstores. The SAC defines Inclusive Access as "a partnership between an institution, bookstore, and publisher to deliver digital course materials to students." Nowhere does the SAC allege that the Publisher Defendants operate separate distribution channels for Inclusive Access in which they directly sell the product to students. Accordingly, with its meager allegation regarding Cloonan's purchase, the SAC fails to plausibly plead that Cloonan directly purchased an Inclusive Access subscription from Pearson.

In opposing the Defendants' motion, the plaintiffs argue that the factual circumstances of Cloonan's alleged purchase from Pearson are ill-suited to resolution on a motion to dismiss. But the Supreme Court's decisions in *Iqbal* and *Twombly* require "factual amplification where needed to render a claim plausible . . . ." *Arista Recs., LLC v. Doe 3, 604 F.3d 110, 120 (2d Cir. 2010)* (citation omitted). The plaintiffs have provided no such amplification. Their pleading **[**20]** of Cloonan's direct purchase is instead a threadbare attempt to circumvent the requirement that each plaintiff plead antitrust standing. This the plaintiffs may not do.

The plaintiffs have standing to sue the Retailer Defendants, but they are barred from suing the Publisher Defendants by the indirect purchaser rule of *Illinois Brick*. Accordingly, the plaintiffs' damages claims against the Publisher Defendants, counts 4, 5, and 6, are dismissed.[13]

B. Section 1

Defendants move to dismiss the plaintiffs' claims under *§ 1*, counts 1, 2, 4, and 5,[14] on the ground that the SAC fails **[*434]** to plead an agreement with respect to any of these alleged conspiracies. *Section 1 of the Sherman Act* prohibits contracts, combinations, or conspiracies in restraint of trade. *US Airways, Inc. v. Sabre Holdings Corp., 938 F.3d 43, 54 (2d Cir. 2019)*. "Although the Sherman Act, by its terms, prohibits every agreement 'in restraint of trade,' the Supreme Court has long recognized that Congress intended to outlaw only unreasonable restraints." United States v. Apple, Inc., *791 F.3d 290, 320 (2d Cir. 2015)* (citation omitted). "Thus, to succeed **[**21]** on an antitrust claim, a plaintiff must prove that the common scheme designed by the conspirators constituted an

---

[13] The plaintiffs in this case seek both damages and injunctive relief. The Supreme Court stated in Apple Inc. v. Pepper:

> Illinois Brick held that the direct-purchaser requirement applies to claims for damages. Illinois Brick did not address injunctive relief, and we likewise do not address injunctive relief in this case.

139 S. Ct. 1514, 1520 n.1, 203 L. Ed. 2d 802 (2019); see also *id. at 1527 & n.1* (Gorsuch, J., dissenting) (arguing that under "traditional proximate cause principles," Illinois Brick should be read to bar suits by indirect purchasers for injunctive relief).

[14] Counts 1 and 2 are for injunctive relief; counts 4 and 5 are for damages. Each of these counts also alleges a conspiracy-to-monopolize claim in violation of *§ 2*. That claim is addressed as part of the *§ 2* discussion below.

unreasonable restraint of trade either per se or under the rule of reason." *Id. at 320-21*. Section 1 embraces both horizontal and hub-and-spoke conspiracies. *Id. at 313-14*; *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 182 (2d Cir. 2012)*.

"The first crucial question in a *Section 1* case is therefore whether the challenged conduct stems from independent decision or from an agreement, tacit or express." *Apple, 791 F.3d at 314-15* (citation omitted). At the pleading stage, a plaintiff must allege sufficient facts to support the inference that a conspiracy existed. *Mayor and City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 136 (2d Cir. 2013)*. An allegation of parallel conduct, standing alone, is not sufficient to plead the existence of a conspiracy. *Apple, 791 F.3d at 315*. "[S]uch behavior could be the result of coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties." Id. (citation omitted).

Antitrust conspiracies are "rarely evidenced by explicit agreements and nearly always must be proven through inferences that may fairly be drawn from the behavior of the alleged conspirators." *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 781 (2d Cir. 2016)* (citation omitted). Therefore, the existence of "additional circumstances, often referred to as 'plus' factors, which, when viewed in conjunction **[**22]** with the parallel acts" can serve to permit an inference that a conspiracy exists. *Apple, 791 F.3d at 315* (citation omitted). A non-exhaustive list of plus factors includes: "(1) a common motive to conspire; (2) evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators; and (3) evidence of a high level of interfirm communications." *Gelboim, 823 F.3d at 781* (citation omitted).

The SAC principally alleges a horizontal conspiracy among the Publisher Defendants "to eliminate competition from the secondary marketplace and raise the prices students pay for textbooks." The SAC appears to allege two other forms of conspiracies, although it does not state them with particularity. These are: (1) a horizontal conspiracy between the Retailer Defendants, and (2) hub-and-spoke conspiracies, with each Publisher as the "hub" and the Retailer Defendants and/or Institutions as the "spokes." In opposing the Defendants' motion, however, the plaintiffs almost exclusively defend their claim that the Publisher Defendants entered into a horizontal conspiracy. The plaintiffs argue that the "Inclusive Access conspiracy is a fundamentally horizontal conspiracy" "driven by the Publishers." **[**23]** Under any of its proposed conspiracies, however, the SAC fails to plausibly allege that the Defendants entered into an agreement.

1. Horizontal Conspiracy: Publisher Defendants

The SAC fails to plausibly allege that the three Publisher Defendants agreed with each other to restrain trade. The SAC does not describe any direct evidence of such an agreement. Nor does it **[*435]** plead facts that circumstantially suggest a meeting of the minds to restrain trade as alleged here. Instead, the SAC describes market conditions that would have independently suggested to any publisher of textbooks that digital innovations such as Inclusive Access might help their bottom line. As detailed in the SAC, there was a flourishing secondary marketplace for textbooks and the sales of new textbooks had declined. These phenomena had a negative impact on publishers' revenue and profits. Then, in 2016, the DOE adopted a rule that permitted Institutions to include the cost of books and supplies, including digital textbooks, in tuition bills. Meanwhile, the digital revolution was well underway and both faculty and students were accustomed to using electronic devices to access information. These phenomena affected every **[**24]** textbook publisher and gave each of them an incentive to develop digital textbooks that could be charged on a tuition bill.

Underscoring this commonsense reaction to market phenomena, the SAC pleads that the adoption of the Inclusive Access program for courses was significantly more profitable for a publisher than the sale of hardcopy textbooks. Digital materials are less expensive to produce and reduce the opportunity for competition in the secondary market. Taken together, these allegations suggest that the Publisher Defendants' decisions to implement Inclusive Access were likely the result of "independent responses to common stimuli." *Apple, 791 F.3d at 315*. They do not support an inference that Inclusive Access was adopted and promoted because there was a conspiracy among the Publisher Defendants.

The plaintiffs argue that they have plausibly alleged a horizontal conspiracy among the three Publisher Defendants by pointing principally to three "plus" factors. Taken singly or together, these allegations in the SAC do not plausibly plead a conspiratorial agreement.

First, the plaintiffs argue that the Publisher Defendants had a common motive to conspire to protect their historical prices and market shares. **[**25]** This argument confuses two phenomena. While the SAC describes a commercial environment that would motivate any textbook publisher to independently consider the advantages of adopting a digital textbook regime like Inclusive Access, it does not describe an environment that encouraged or required them to conspire with each other to do so. After all, a motive to innovate is different than a motive to conspire. At best, the SAC describes conscious parallelism, and that is insufficient to plead that the Publisher Defendants conspired with each other. *Connecticut Fine Wine & Spirits, LLC v. Seagull, 932 F.3d 22, 38 (2d Cir. 2019)*; *Twombly, 550 U.S. at 553-54*.

As a second plus factor, the plaintiffs claim that each Publisher Defendant acted against its own economic self-interest when it introduced Inclusive Access. The SAC alleges that

> [i]f an individual Publisher Defendant moved on its own to introduce a digital-only subscription model like Inclusive Access, it would have been perceived as offering an experimental, overly restrictive, and higher priced product and would have lost sales to competitors willing to sell textbooks in a variety of formats, including e-books and print, which students prefer.

Based on this analysis, the plaintiffs contend that no single publisher could "shift the marketplace **[**26]** away from print" textbooks. In support of this claim, the SAC points to the independent efforts by the Publisher Defendants to promote programs like Inclusive Access before 2016 **[*436]** and alleges that it was only in 2016 that the Publisher Defendants implemented a "hard switch" by "rolling out their Inclusive Access programs together."

There are at least three problems with this argument. First, it ignores the impact of the DOE's adoption of *Rule 164* in 2016. With that adoption, Inclusive Access became a government-sanctioned billing option for Institutions, allowing the costs of Inclusive Access to be added to tuition bills.

Second, the plaintiffs' argument implies that the Publisher Defendants colluded to remove hardcopy textbooks from the marketplace and thereby coerce Institutions into accepting digital textbooks through Inclusive Access.[15] But the SAC stops short of actually asserting that the Publisher Defendants discontinued their hardcopy offerings. Moreover, any such allegation would be in tension with the very Institution Agreements on which the SAC relies. Those contracts include references to the comparable hardcopy textbook.

Finally, according to the SAC, Institutions adopted **[**27]** Inclusive Access in order to increase the revenues at their on-campus bookstores, which pay them commissions. Based on the SAC's allegations, it was in each Institution's economic self-interest to adopt Inclusive Access for its students and faculty. These overlapping incentives did not require any collusion among the Publisher Defendants.

As a third plus factor, the SAC alleges that there was a high level of interfirm communication among the Publisher Defendants. It points to the high degree of concentration in the textbook publishing industry and alleges that the Publisher Defendants' trade association EPEG served as a convenient forum for their conspiratorial planning. This

---

[15] The plaintiffs briefly contend that the Publisher Defendants also coerced students into purchasing Inclusive Access materials and that this coercion constitutes another plus factor. It is the Institution, presumably in consultation with faculty, that decides whether to purchase Inclusive Access for any particular course. The extent to which students are deprived of a voice in that decision is irrelevant to the question of whether the SAC contains a plausible claim that the Publisher Defendants colluded with each other.

Moreover, the plaintiffs misread the precedent on which they rely, *Ambook Enterprises v. Time Inc., 612 F.2d 604, 616 (2d Cir. 1979)*, in arguing that consumer coercion is a plus factor for purposes of *§ 1*. The "coercion" that the *Ambook* court identified as a possible plus factor was "[c]oerced parallelism," i.e., coerced participation in a conspiracy, rather than consumer coercion. Id. & n.19.

description of opportunities to conspire to restrict competition does not raise the inference that the Publisher Defendants actually engaged in any unlawful activity. Having failed to plausibly plead an agreement, the SAC fails to allege a horizontal conspiracy among the Publisher Defendants.

2. Horizontal Conspiracy: Retailer Defendants

The SAC also appears to allege that the two Retailer Defendants conspired with each other to restrain trade in violation of *§ 1 of the Sherman Act*. The plaintiffs do not explicitly oppose the Defendants' **[**28]** motion to dismiss this *§ 1* claim.

The SAC fails to plead sufficient facts to support a plausible claim that the two Retailer Defendants conspired with each other. Barnes & Noble and Follett compete with each other and with other retailers for the opportunity to become an Institution's on-campus bookstore. The SAC alleges that Inclusive Access "is a win" for the Retailer Defendants, who "directly benefit" from it. As the SAC itself concedes, therefore, agreeing to be an Institution's **[*437]** exclusive partner in providing that Institution's students with all of their textbooks, including digital textbooks sold through Inclusive Access, was very much in each Retailer Defendant's independent financial interest.

3. Hub-and-Spoke Conspiracy

The third form of conspiracy that the SAC may attempt to plead is a so-called "hub-and-spoke" conspiracy among the Defendants, with each Publisher Defendant at the hub of a conspiracy with the two Retailer Defendants and the many Institutions that have adopted Inclusive Access. The plaintiffs do not explicitly oppose the Defendants' motion to dismiss this alternative *§ 1* claim.

"[C]ourts have long recognized the existence of 'hub-and-spoke' conspiracies in which an entity **[**29]** at one level of the market structure, the 'hub,' coordinates an agreement among competitors at a different level, the 'spokes.'" *Apple, 791 F. 3d at 314* (citation omitted). The SAC fails to plead that the Retailer Defendants and the Institutions, the "spokes" in the alleged hub-and-spoke conspiracy, entered into a horizontal agreement with each other. This alone is fatal to the plaintiffs' claim. The SAC pleads a series of vertical agreements between each Publisher Defendant and Institution and between each Retailer Defendant and Institution. It does not, however, plead that any of the Publisher Defendants used these vertical agreements to coordinate a horizontal agreement among the Retailer Defendants and/or the Institutions. The plaintiffs' claim for a hub-and-spoke conspiracy fails. The SAC's claims under *§ 1* are dismissed.

C. Section 2

The plaintiffs bring claims under *§ 2 of the Sherman Act*, counts 1 through 6, as well. Counts 3 and 6 assert that the Publisher Defendants monopolized those markets. Counts 1, 2, 4, and 5 allege that the Defendants conspired to monopolize certain textbook markets. The Defendants move to dismiss the plaintiffs' monopolization claims on the ground that, among other deficiencies, the SAC does not plausibly **[**30]** plead a relevant market. They move to dismiss the SAC's conspiracy-to-monopolize claims on the ground that it fails to plead an agreement. For the reasons discussed below, the Defendants' motion is granted with respect to each of the plaintiffs' *§ 2* claims.

1. Market Definition

For purposes of the Sherman Act, "the relevant market is the area of effective competition within which the defendant operates." *Concord, 817 F.3d at 52* (citation omitted). "[A] market consists of an area where sellers, if unified by a hypothetical cartel or merger, could profitably raise prices significantly above the competitive level." Id. (citation omitted). "[T]he concept of a market has two components: a product market and a geographic market." Id.

"A relevant product market consists of products that have reasonable interchangeability for the purposes for which they are produced -- price, use and qualities considered." Id. (citation omitted). The "outer boundaries" of the relevant product market are "determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Sabre, 938 F.3d at 64* (citation omitted); see *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481-82, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. Thus, products will be considered to be reasonably interchangeable **[**31]** "if consumers treat them as acceptable substitutes." *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 105 (2d Cir. 2002)* (citation omitted). "Cross-elasticity **[*438]** of demand exists if consumers would respond to a slight increase in the price of one product by switching to another product." *Todd v. Exxon Corp., 275 F.3d 191, 201-02 (2d Cir. 2001)* (citation omitted). In defining the relevant market, courts are to consider the "'commercial realities' faced by consumers." *Kodak, 504 U.S. at 482* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 572, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*).

The inquiry into the relevant geographic market, on the other hand, "seeks to identify the precise geographic boundaries of effective competition in order to reach a more informed conclusion on potential harm to the market." *Concord, 817 F.3d at 52-53* (citation omitted). "Courts generally measure a market's geographic scope, the area of effective competition, by determining the areas in which the seller operates and where consumers can turn, as a practical matter, for supply of the relevant product." *Id. at 53* (citation omitted). "Taken together, the product and geographic components illuminate the relevant market analysis, which is essential for assessing the potential harm to competition from the defendants' alleged misconduct." Id. (citation omitted).

"To survive a *Rule 12(b)(6)* motion to dismiss, an alleged product market must bear a rational relation to the methodology courts **[**32]** prescribe to define a market for antitrust purposes -- analysis of the interchangeability of use or the cross-elasticity of demand, and it must be 'plausible.'" *Todd, 275 F.3d at 200* (citation omitted). "Although market definition is a deeply fact-intensive inquiry not ordinarily subject to dismissal at the pleadings stage, there is no absolute rule against dismissal where the plaintiff has failed to articulate a plausible explanation as to why a market should be limited in a particular way." *Concord, 817 F.3d at 53* (citation omitted). "Thus, in order to survive a motion to dismiss, it is appropriate for a district court to assess whether the plaintiffs' complaint asserts sufficient facts to allege plausibly the existence of both a product and geographic market." Id.

The SAC alleges that the relevant product markets in this action are "the markets for each textbook assigned in courses subject to Inclusive Access" ("Textbook Markets"). Although the SAC claims that "used, electronic, and earlier versions of textbooks, which are available on the secondary market, are no longer interchangeable with Inclusive Access textbooks," in opposing the Defendants' motion to dismiss, the plaintiffs clarify that the Textbook Markets "include **[**33]** the textbooks assigned for a particular course in whatever format and from whatever source." (Emphasis in original.) The SAC alleges that the relevant geographic market is the United States. It also claims that "a Publisher Defendant has a market share of over 95% in each Textbook Market."

Even if it is assumed that the Textbook Markets are not limited to any single format or source, defining a Textbook Market as a single textbook is too narrow. The relevant market must include every product that consumers treat as an acceptable substitute. Here, it is the Institutions (and their faculty) that decide which textbooks to assign for their courses and therefore which textbooks the Institution and/or its on-campus bookstore will purchase. In making this decision, an Institution is presented with a menu of options. For example, when choosing a textbook for an introductory economics course, an Institution and its faculty can elect to assign any author's introductory economics textbook. Accordingly, "each textbook" cannot serve as the relevant market because it excludes interchangeable products -- namely, rival **[*439]** authors' and publishers' textbooks for each course.

The plaintiffs defend their relevant **[**34]** market definition by switching the focus from the Institution's choice and purchase of a book, including Inclusive Access digital textbooks, to the students. The plaintiffs argue that it is the students, not the Institutions and their faculty, who are the "consumers" for purposes of the relevant market inquiry. Highlighting the disconnect "between the party selecting the product and the party buying it," the plaintiffs emphasize that the students pay for the Inclusive Access textbooks. But, as the SAC explains, the Institution first purchases Inclusive Access textbooks from the Publisher Defendants at negotiated prices. The Institutions then authorize their on-campus bookstores to resell the textbooks to the students at a markup. Thus, both the Institutions and their students are consumers and pay for Inclusive Access, albeit at different stages of the process.

The fundamental "commercial realit[y]" dictates that the Institutions and their faculty are the relevant consumers for the antitrust claims pursued here. *Kodak, 504 U.S. at 482* (citation omitted). Given this reality, the plaintiffs' Textbook Markets are too narrowly defined. Accordingly, the SAC fails to plead a plausible relevant market, and its **[**35]** *§ 2* monopolization claims are dismissed.

2. Conspiracy to Monopolize

The SAC also alleges that the Defendants conspired to monopolize the Relevant Markets. The Defendants move to dismiss this claim on the ground that the SAC also fails to plead evidence of an agreement.

Section 2 of the Sherman Act prohibits entities from "combin[ing] or conspir[ing] with any other person or persons, to monopolize any part of the trade or commerce among the several States . . . ." *15 U.S.C. § 2*. The elements of a *§ 2* conspiracy to monopolize claim are: "(1) proof of a concerted action deliberately entered into with the specific intent to achieve an unlawful monopoly, and (2) the commission of an overt act in furtherance of the conspiracy." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 233 (2d Cir. 1999)*. "[I]n deciding whether there is concerted action, courts routinely apply the same analysis under both *Sections 1* and *2*." 2 Julian von Kalinowski, Peter Sullivan, & Maureen McGuirl, Antitrust Laws and Trade Regulation § 26.02 (2d ed. 2021).

The plaintiffs' conspiracy-to-monopolize claims fail for the same reason that their claims brought under *§ 1* do -- namely, the SAC fails to plausibly plead an agreement. More fundamentally, accepting the plaintiffs' market definition, it would be unnecessary for any of the Publisher Defendants **[**36]** to conspire to monopolize a Textbook Market. The copyright laws give each publisher a monopoly in its textbook. For both of these reasons, the plaintiffs' *§ 2* conspiracy-to-monopolize claims are dismissed.

II. State Law Claims

The SAC also asserts that the Defendants are liable under the antitrust statutes of 26 states and the District of Columbia. The parties agree that the state antitrust statutes should be construed in harmony with federal ***antitrust law*** where possible. Because the plaintiffs' federal antitrust claims under the Sherman Act fail, their claims under the state antitrust statutes must be dismissed as well.

Conclusion

The Defendants' January 22, 2021 motion to dismiss is granted. The Clerk of Court shall close the case and enter judgment for the Defendants.

Judges: DENISE COTE, United States District Judge.

Opinion by: DENISE COTE

Opinion

(DLC)

OPINION & ORDER

DENISE COTE, **[*2]** District Judge:

The plaintiffs, on behalf of a class of businesses that sell college textbooks online or through off-campus bookstores, assert that the defendants have conspired to eliminate competition in the market for college textbooks. The defendants are the three principal publishers of textbooks, two large operators of on-campus bookstores, and a textbook industry trade association. The plaintiffs assert that the publishers' promotion of digital textbooks to colleges and their faculty at the expense of traditional hardcopy textbooks has reduced the size of the secondary market for textbooks. Pointing to contracts between colleges and on-campus bookstore operators that make the latter the exclusive sellers of digital textbooks at each college's campus, the plaintiffs claim that they have been denied the opportunity to distribute digital textbooks, and that competition in the market for textbooks has suffered as a result. The defendants have moved for dismissal of the entire complaint. For the reasons stated below, the defendants' motions are granted.

Background

The following facts are taken from the Second Consolidated Amended Class Action Complaint ("SAC") and documents integral **[*3]** to it, unless otherwise noted, and are taken to be true for purposes of this motion. *Coal. for Competitive Elec. v. Zibelman, 906 F.3d 41, 48-49 (2d Cir. 2018)*. The plaintiffs are independent off-campus bookstores and online sellers of college textbooks. They bring this action as representatives of a class defined as "All persons or entities in the United States who were in the business of selling Course Materials at off-campus retail outlets serving students at the Universities or online" from January 1, 2015 to the present. The SAC defines "Course Materials" as "traditional printed textbooks . . . as well as digital textbooks and e-textbooks."[1] It defines "Universities" as "colleges and universities . . . throughout the United States." For simplicity, this Opinion will use the term Institutions rather than colleges or universities except when quoting directly from the SAC.

A. Secondary Market for Textbooks

The three Publisher Defendants -- Cengage Learning, Inc. ("Cengage"); McGraw Hill, LLC ("McGraw Hill"); and Pearson Education, Inc. ("Pearson") -- are the dominant publishers of college textbooks in the United States. Together, they control 80-90% of the market for new textbooks.

In the early 2000s, the Publisher Defendants began to face increasing competition **[*4]** from the rapidly growing secondary marketplace for textbooks. At online sites such as Amazon and Chegg, and at brick-and-mortar vendors, college students could buy, sell, and rent used textbooks at prices dramatically below the prices for new textbooks.

On-campus bookstores also suffered from the rapid growth of the secondary market for textbooks. Although on-campus bookstores sold both new and used textbooks, they faced competition in the market for used textbooks from off-campus and online bookstores. The majority of on-campus bookstores are operated by the Retailer Defendants: Barnes & Noble College Booksellers, LLC and Barnes & Noble Education, Inc. (collectively, "Barnes & Noble") and Follett Higher Education Group, Inc. ("Follett").

B. Inclusive Access

1. Origins

In response to the rise of the secondary market for college textbooks, the Publisher Defendants adopted a "digital-first strategy" that aimed to curtail the growth of the secondary market by reducing sales of new hardcopy textbooks. As part of that strategy, the Publisher Defendants developed "Inclusive Access," a program through which a professor at a participating Institution may designate her chosen textbook to be offered **[*5]** digitally to

---

[1] The SAC does not separately define digital and e-textbooks. This Opinion therefore only uses the term digital textbooks.

students.[2] Subscriptions to Inclusive Access last only for the length of the course. Once the course concludes, students lose access to the textbooks that they received through Inclusive Access.

The Publisher Defendants first experimented with products similar to Inclusive Access in 2014 and 2015 through "pilot programs," but the product "was not well-received" and failed to take root. The plaintiffs claim that:

> [A] variety of studies showed the products did not evidence improvement in areas such as affordability, quality, or learning outcomes, and further showed that the students (and in many cases, the faculty) did not like the products. There were no significant movements of the market to Inclusive-Access-style products at that time.

On May 18, 2015, the United States Department of Education ("DOE") published for comment a proposed rule pursuant to *Title VII of the Higher Education Act of 1965* that would permit, among other things, postsecondary institutions to include the cost of textbooks as part of tuition and fees ("Notice"). *80 Fed. Reg. 28484 (2015)*. In the Notice, the DOE stated that it "initially considered prohibiting institutions from including books and supplies as part of tuition and fees," but had

> decided against a total prohibition **[*6]** on including books and supplies as part of tuition and fees, and agreed to a compromise position that would still benefit students, allow institutional flexibility when materials are integral to the course, and hold institutions accountable through cost transparency.

Id. at 28521-22.

On October 30, 2015, the DOE published the final rule, which became effective on July 1, 2016 ("*Rule 164*"). Id. at 67126. *Rule 164* allows postsecondary institutions in some circumstances to directly bill students for textbooks and supplies on their tuition statements. It provides:

> An institution may include the costs of books and supplies as part of tuition and fees under *paragraph (c)(1)(i)* of this section if -
>
> (i) The institution -
>
> (A) Has an arrangement with a book publisher or other entity that enables it to make those books or supplies available to students below competitive market rates;
> (B) Provides a way for a student to obtain those books and supplies by the seventh day of a payment period; and
>
> (C) Has a policy under which the student may opt out of the way the institution provides for the student to obtain books and supplies under this *paragraph (c)(2)*. . . .
>
> (ii) The institution documents on a current basis that the books or supplies, including digital or electronic **[*7]** course materials, are not available elsewhere or accessible by students enrolled in that program from sources other than those provided or authorized by the institution[] . . . .

34 C.F.R. § 668.164(c)(2) (2016) (emphasis supplied).

The DOE explained that it was motivated by its statutory mandate to protect "the rights of students as consumers." *80 Fed. Reg. 67138 (2015)*. Commentators had persuaded it "that including books and supplies [in tuition] would not only enable an institution to negotiate better prices for its students, it would result in students having acquired course materials at the beginning of a term or payment period." Id. Aware, however, that the inclusion of the cost of books as part of tuition would mean that "students will not have the option of seeking even lower cost alternatives such as used books, rentals, or e-books," the Rule requires the Institution to provide the student an opt-out. Id. at 67139.

---

[2] The SAC notes that digital textbooks, whether offered through Inclusive Access or otherwise, are sometimes accompanied by other educational materials, such as digital homework, quizzes, and exams.

The DOE also justified its adoption of the Rule by reference to the increased demand for digital course material:

> We are convinced that digital platforms, and digital course content in general, will become more ubiquitous and that including digital content as part of tuition and fees ensures that students have access **[*8]** to this technology.

Id. at 67126-01.[3] The DOE cited "the best financial interests of students" as its guiding principle in drafting the Rule. Id. at 67138.

2. Adoption of Inclusive Access

The SAC alleges that in 2016, Inclusive Access was implemented "in its current form" by "all of the Publishers practically simultaneously." They began to "evangelize" Inclusive Access, and Inclusive Access programs were introduced at Institutions across the United States. For example, between July 2016 and November 2017, Pearson executed agreements to implement Inclusive Access with over 200 Institutions. The Publisher Defendants have announced "that they would be restricting and eventually discontinuing their production of all Course Materials other than Inclusive Access Materials." The SAC defines "Inclusive Access Materials" as textbooks delivered through Inclusive Access.

3. Features

Digital textbooks delivered through Inclusive Access programs are typically cheaper than new hardcopy textbooks. On the other hand, they are more expensive than used hardcopy textbooks sold or rented on the secondary market.

Students are "automatically" subscribed to Inclusive Access when they enroll in a college course **[*9]** that has adopted it and are automatically charged for the digital textbooks on their tuition bills. Students may elect to purchase "print upgrades" for an additional fee, but the Publisher Defendants limit the number of students who may do so in any given course. Although students nominally have the right to opt out of Inclusive Access, they are often warned that opting out of Inclusive Access will make passing the course "impossible" since the students will not have access to Inclusive Access if they opt out.

C. Bookstore Operating Agreements

The plaintiffs allege that the Defendants entered into agreements that "compel" Institutions and students "to deal with the Defendants on an exclusive or nearly exclusive basis" for textbooks delivered through Inclusive Access. The SAC describes in particular agreements between Institutions and their on-campus bookstores, which are referred to as Bookstore Operating Agreements.

Through Bookstore Operating Agreements, the Institutions engage the Retailer Defendants to operate and provide services for their on-campus bookstores. Under a Barnes & Noble Bookstore Operating Agreement ("B&N Agreement"),[4] for example, Barnes & Noble "shall fill orders for **[*10]** books and required supply items from term to term in accordance with textbook and supply adoptions by the faculty," and shall contact "all faculty members for their textbook and supply adoptions." The Institution is "not . . . responsible for compiling, nor shall it maintain, a list of such adoptions."

---

[3] The SAC does not highlight the enactment of *Rule 164* in its description of the adoption of Inclusive Access, but it does assert that the Publisher Defendants coordinated their efforts related to the DOE rulemaking that resulted in the Rule's promulgation. The SAC also asserts that the Defendants have violated *Rule 164* because textbooks distributed through Inclusive Access are not offered at a lower-than-competitive market rate and students are not allowed to opt out.

[4] Two B&N Agreements that were excerpted in the SAC were provided as exhibits to the Defendants' motion to dismiss. This Opinion refers only to the agreement between Barnes & Noble and Eastern Kentucky University, dated June 30, 2017. The other exemplar B&N Agreement, which is with Northwest Arkansas Community College, dates from 2012.

The B&N Agreement made Barnes & Noble the exclusive buyer and seller of the Institution's textbooks, including digitally published or distributed course materials. To underscore the exclusive nature of the relationship between Barnes & Noble and the Institution, the Agreement states:

> [The Institution] shall not contract with any third party to provide any services of the type outlined in this Agreement whether on or off campus, through e-commerce sites, hyperlinks to alternate sources, or otherwise endorsed or supported by [the Institution].

The B&N Agreement gives the Institution commissions on the gross sales of any hardcopy and digital textbooks. The SAC explains that "in some instances" the Retailer Defendants also pay the Institutions up-front signing bonuses of $1 million or more when the Institution signs an on-campus bookstore contract.

A Follett Bookstore Operating Agreement ("Follett **[*11]** Agreement") that is described in the SAC has many provisions that are similar to those in the B&N Agreement, including the duty to "develop and maintain strong relationships with faculty at each campus and market and promote course materials to students at each campus." It also has a provision requiring Follett to protect the campus bookstore's market share.[5] It also adds that Follett "shall provide a non-exclusive digital delivery program that addresses the changing types" of textbooks. It adds:

> [Follett] shall provide an Inclusive Access/Course Fee Program at [the Institution], if required by [the Institution]. Inclusive/Course Fee Program course materials commissions and gross profit margins shall be mutually agreed upon by [Follett] and [the Institution] prior to implementation.

An amendment to the Follett Agreement addresses the implementation of Inclusive Access.[6] The amendment states:

> The parties will agree at the outset of each academic term which students or courses are automatically part of the [Inclusive Access] Program. [The Institution] will provide Follett with the student data necessary to administer the Program . . . . [The Institution] will be responsible for the collection **[*12]** of [Inclusive Access] Fees . . . from students . . . .

It further provides:

> [Inclusive Access] course material adoptions will continue to be the responsibility of [the Institution] and [its] faculty. . . . Follett will work with [the Institution] to set adoption guidelines to be used by faculty that respect the academic integrity and freedom of the faculty but strive to keep the [Inclusive Access] fees low.

In addition, the amendment states that Follett will determine the fees for Inclusive Access for each semester, and if the Institution accepts the fee, the Institution will "record the appropriate Fee . . . for each student enrolled in a class participating in the program." Then, Follett "shall invoice [the Institution] with supporting data (including student name, enrollment numbers and the Program course materials) . . . . [The Institution] shall pay Follet the Fees . . . ."

D. Electronic Publishers Enforcement Group

In 2016, the Publisher Defendants and two other publishing companies formed a trade association, Electronic Publishers Enforcement Group ("EPEG"). EPEG maintains a website and promulgates anti-counterfeiting "best practices" guidelines (the "EPEG Guidelines") for the purpose **[*13]** of eliminating counterfeit textbooks.[7]

E. Procedural History

This action was filed on January 22, 2020 in the District of Delaware. Over a dozen actions filed on behalf of a class of student plaintiffs were filed thereafter. On April 24, the Defendants moved to dismiss this action.

---

[5] The Follett Agreement that was excerpted in the SAC was provided as an exhibit to the Defendants' motion to dismiss. The Agreement is between Follett and the Tennessee Board of Regents and is dated April 2, 2018.

[6] The amendment to the Follett Agreement is dated September 6, 2018.

[7] The website for EPEG is located at https://stopcounterfeitbooks.com/.

On August 11, the Judicial Panel on Multidistrict Litigation (the "JPML") ordered the centralization of Inclusive Access-related class action cases in this Court.[8] Lead counsel for both the retailer plaintiffs class action and the consolidated student plaintiffs class action ("Student Plaintiffs Action") were chosen at a September 3 conference.

The plaintiffs in this action filed a consolidated amended complaint on October 16. In response to a December 4 motion to dismiss, on December 18, the plaintiffs filed the SAC. The Defendants renewed their motions to dismiss on January 22, 2021, which became fully submitted on March 9. Meanwhile, the defendants in the Student Plaintiffs Action moved to dismiss that action as well. That motion is addressed in a separate Opinion filed today.

The SAC alleges that the Defendants entered into a conspiracy to restrain trade in several textbook **[*14]** markets through the implementation of Inclusive Access. The plaintiffs claim that the conspiracy is an unreasonable restraint of trade in violation of *§ 1 of the Sherman Act, 15 U.S.C. § 1*. The SAC also alleges that each Defendant monopolized each of the textbook markets it describes, has attempted to do so, and has conspired to do so, in violation of *§ 2 of the Sherman Act, 15 U.S.C. § 2*. In addition, the plaintiffs bring price discrimination claims under the *Robinson-Patman Act, 15 U.S.C. §§ 13(a)* and *(f)*, and a variety of state law claims. The plaintiffs seek damages and injunctive relief under the *Clayton Act*. *15 U.S.C. §§ 15*, *26*.

Discussion

When deciding a motion to dismiss under *Rule 12(b)(6), Fed. R. Civ. P.*, a court must "constru[e] the complaint liberally, accept[] all factual allegations as true, and draw[] all reasonable inferences in the plaintiff's favor." *Zibelman, 906 F.3d at 48-49*. To survive a motion to dismiss, "a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. A complaint must do more than offer "naked assertions devoid of further factual enhancement," and a court is not "bound to accept as true a legal conclusion couched as a factual allegation." Id. (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). In determining the adequacy of a complaint, "a district court may consider the facts alleged in the complaint, **[*15]** documents attached to the complaint as exhibits, and documents incorporated by reference in the complaint." *DiFolco v. MSNBC Cable L.L.C., 622 F.3d 104, 111 (2d Cir. 2010)*.

This Opinion will first address the plaintiffs' claims under the Sherman Act. It will then turn to their claims under the Robinson-Patman Act and various state antitrust statutes. Finally, it will determine whether EPEG may be named as a defendant.

I. Sherman Act Claims

To survive a motion to dismiss, a Sherman Act claim must allege an antitrust injury, define a relevant market, and plausibly allege conduct in violation of the antitrust laws. *Concord Assocs., L.P. v. Ent. Properties Tr., 817 F.3d 46, 52 (2d Cir. 2016)*. After addressing the plaintiffs' standing to bring an antitrust claim, the adequacy of the plaintiffs' claims brought under *§ 1* and then *§ 2 of the Sherman Act* will be discussed.

A. Antitrust Standing

The Defendants move to dismiss counts 1 through 9 on the ground that the plaintiffs lack antitrust standing. *Section 4* of the Clayton Act establishes a private right of action for violations of the federal antitrust laws. It entitles "[a]ny person who [is] injured in his business or property by reason of anything forbidden in the antitrust laws" to treble damages. *15 U.S.C. § 15*. The Supreme Court has explained that "Congress was primarily interested in creating an effective remedy for consumers **[*16]** who were forced to pay excessive prices." *Associated Gen. Contractors of Ca., Inc. v. Ca. State Council of Carpenters, 459 U.S. 519, 530, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. But Congress did not "intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be

[8] An additional student purchaser class action that is before this Court, Cabral v. Cengage Learning, Inc., et al., 20cv3660, is related to this multi-district litigation.

traced to an antitrust violation." *Id. at 534* (citation omitted). Courts have therefore imposed "limiting contours" on the right to pursue private actions. *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 75 (2d Cir. 2013)*. "Absent such boundaries, the potent private enforcement tool that is an action for treble damages could be invoked without service to -- and potentially in disservice of -- the purpose of the antitrust laws: to protect competition." Id.

The "limiting contours" imposed on the private right to pursue actions for treble damages under *§ 4* "are embodied in the concept of 'antitrust standing.'" Id. (citation omitted). "To satisfy antitrust standing at the pleading stage a plaintiff must plausibly allege two things: (1) that it suffered a special kind of antitrust injury, and (2) that it is a suitable plaintiff to pursue the alleged antitrust violations and thus is an efficient enforcer of the antitrust laws." *IQ Dental Supply, Inc. v. Henry Schein, Inc., 924 F.3d 57, 62 (2d Cir. 2019)* (citation omitted). The Defendants do not contest that the plaintiffs are efficient enforcers of the antitrust laws.

"[W]hether seeking relief in law or equity, an antitrust plaintiff **[*17]** must demonstrate "antitrust injury." *Freedom Holdings, Inc. v. Cuomo, 624 F.3d 38, 52 n.14 (2d Cir. 2010)*. Courts consider three factors in determining whether a private plaintiff satisfies the antitrust injury requirement:

> (1) the court must identify the practice complained of and the reasons such a practice is or might be anticompetitive, (2) the court must identify the actual injury the plaintiff alleges which requires us to look to the ways in which the plaintiff claims it is in a worse position as a consequence of the defendant's conduct, and (3) the court compares the anticompetitive effect of the specific practice at issue to the actual injury the plaintiff alleges.

IQ Dental Supply, 924 F.3d at 62-63 (citation omitted).

At the first step of the analysis, plaintiffs "need allege only that the Defendants have engaged in unlawful anticompetitive conduct." *Id. at 63*. Although "[t]he bar for such a showing is a low one," id., plaintiffs must demonstrate standing. *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 437 (2d Cir. 2005)*. Courts have noted the difficulty of "distinguish[ing] the question of whether an antitrust violation occurred from whether plaintiffs have standing to pursue it." Id. "To avoid confusing these issues, some courts and commentators have suggested assuming the existence of a violation in addressing the issue of standing." Id.

Once a plaintiff **[*18]** has identified its injuries at the second step of the test, the third step requires a court to compare that alleged injury to the anticompetitive effect of the challenged practice. *Gatt, 711 F.3d at 76*. This comparison requires more than an allegation that the practice and injury are "causally linked." Id. (citation omitted). "Rather, in order to establish antitrust injury, the plaintiff must demonstrate that its injury is of the type the antitrust laws were intended to prevent and that [it] flows from that which makes or might make defendants' acts unlawful." Id. (citation omitted). In other words, the plaintiff must plead that its injury "stems from a competition-reducing aspect or effect of the defendant's behavior." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. If a plaintiff can make such a showing, then its injury falls within the "zone of interests" protected by the antitrust laws. *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 129, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)* (citation omitted).

The plaintiffs contend that they have antitrust standing because they participate in a market restrained by the anticompetitive conduct of the Defendants and have been injured. The injury that the plaintiffs identify is their exclusion from the retail market for the sale of Inclusive Access textbooks.

It will be assumed, for purposes of analyzing **[*19]** the plaintiffs' standing, that the SAC identifies a practice that is anticompetitive. It is worth noting, however, that the plaintiffs argue that the Defendants' conduct has been anti-competitive largely by focusing on the students' lack of choice when a faculty member or Institution has decided that the textbooks for the student's course will be digital textbooks provided through Inclusive Access. They assert as well that Inclusive Access provides students with an inferior product in comparison to hardcopy textbooks. The plaintiffs fail to grapple with the fact that the creation of Inclusive Access increases the options available to the faculty members and Institutions who make the choices about which textbooks will be required reading for any particular course.

But even if it is assumed that the Defendants' conduct is anticompetitive, the plaintiffs have not carried their burden to demonstrate that the injury they have suffered -- the decline in their textbook sales due to their exclusion from the Inclusive Access market -- resulted from any competition-reducing aspects of the Defendants' conduct. Rather, it is the result of the Institutions' decisions to adopt digital textbooks and **[*20]** to use on-campus bookstores to manage that digital program. And, as significantly, any injury to the plaintiffs is due to the Institutions selecting brick-and-mortar retailers other than the plaintiffs as their on-campus bookstores. The harm to the plaintiffs' revenue and profits, therefore, is not due to any anticompetitive harm that this lawsuit challenges. The antitrust laws "are not concerned with injuries to competitors . . . resulting from their participation in or exile from [anticompetitive] schemes." *Gatt, 711 F.3d at 77*.

The SAC therefore fails to plead that the plaintiffs have suffered a cognizable antitrust injury, and the plaintiffs do not have standing to pursue their Sherman Act claims. Even if the plaintiffs had standing, however, their Sherman Act claims would fail on the merits, as explained next.

B. Section 1

Defendants move to dismiss the plaintiffs' *§ 1* claims, counts 1 through 3, on the ground that the SAC fails to plead an agreement with respect to any of these alleged conspiracies. *Section 1 of the Sherman Act* prohibits contracts, combinations, or conspiracies in restraint of trade. *US Airways, Inc. v. Sabre Holdings Corp., 938 F.3d 43, 54 (2d Cir. 2019)*. "Although the Sherman Act, by its terms, prohibits every agreement 'in restraint of trade,' the Supreme Court has long recognized **[*21]** that Congress intended to outlaw only unreasonable restraints." *United States v. Apple, Inc., 791 F.3d 290, 320 (2d Cir. 2015)* (citation omitted). "Thus, to succeed on an antitrust claim, a plaintiff must prove that the common scheme designed by the conspirators constituted an unreasonable restraint of trade either per se or under the rule of reason." *Id. at 320-21*. Section 1 embraces both horizontal and hub-and-spoke conspiracies. *Id. at 313-14*; *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 182 (2d Cir. 2012)*.

"The first crucial question in a *Section 1* case is therefore whether the challenged conduct stems from independent decision or from an agreement, tacit or express." *Apple, 791 F.3d at 314-15* (citation omitted). At the pleading stage, a plaintiff must allege sufficient facts to support the inference that a conspiracy existed. *Mayor and City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 136 (2d Cir. 2013)*. An allegation of parallel conduct, standing alone, is not sufficient to plead the existence of a conspiracy. *Apple, 791 F.3d at 315*. "[S]uch behavior could be the result of coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties." Id. (citation omitted).

Antitrust conspiracies are "rarely evidenced by explicit agreements and nearly always must be proven through inferences that may fairly be drawn from the behavior of the alleged conspirators." *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 781 (2d Cir. 2016)* (citation omitted). Therefore, the existence **[*22]** of "additional circumstances, often referred to as 'plus' factors, which, when viewed in conjunction with the parallel acts" can serve to permit an inference that a conspiracy exists. *Apple, 791 F.3d at 315* (citation omitted). A non-exhaustive list of plus factors includes: "(1) a common motive to conspire; (2) evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators; and (3) evidence of a high level of interfirm communications." *Gelboim, 823 F.3d at 781* (citation omitted). "Coerced parallelism," that is, coerced participation in a conspiracy, can serve as a plus factor as well. *Ambook Enterprises v. Time Inc., 612 F.2d 604, 616 & n.19 (2d Cir. 1979)*.

The SAC alleges three forms of conspiracies that violate *§ 1 of the Sherman Act*: (1) A horizontal conspiracy among the Publisher Defendants, (2) a horizontal conspiracy among the Retailer Defendants, and (3) hub-and-spoke conspiracies between each Publisher Defendant and the Retailer Defendants. The SAC fails to plausibly allege any of these conspiracies.

1. Horizontal Conspiracy: Publisher Defendants

The SAC fails to plausibly allege that the three Publisher Defendants agreed with each other to restrain trade. The SAC does not describe any direct evidence of such an agreement. Nor does it plead facts **[*23]** that circumstantially suggest a meeting of the minds to restrain trade as alleged here. Instead, the SAC describes market conditions that would have independently suggested to any publisher of textbooks that digital innovations such as Inclusive Access might help their bottom line. As detailed in the SAC, there was a flourishing secondary marketplace for textbooks and the sales of new textbooks had declined. These phenomena had a negative impact on publishers' revenue and profits. Then, in 2016, the DOE adopted rules that permitted Institutions to include the cost of books and supplies, including digital textbooks, in tuition bills. Meanwhile, the digital revolution was well underway and both faculty and students were accustomed to using electronic devices to access information. These phenomena affected every textbook publisher and gave each of them an incentive to develop digital textbooks that could be charged on a tuition bill. Underscoring this commonsense reaction to market phenomena, the SAC pleads that the adoption of the Inclusive Access program for courses was significantly more profitable for a publisher than the sale of hardcopy textbooks. Digital materials are less expensive **[*24]** to produce and reduce the opportunity for competition in the secondary market. Taken together, these allegations suggest that the Publisher Defendants' decisions to implement Inclusive Access were likely the result of "independent responses to common stimuli." *Apple, 791 F.3d at 315*. They do not support an inference that Inclusive Access was adopted and promoted because there was a conspiracy among the Publisher Defendants.

The plaintiffs argue that they have plausibly alleged a horizontal conspiracy among the three Publisher Defendants by pointing principally to four "plus" factors. Taken singly or together, these allegations in the SAC do not plausibly plead a conspiratorial agreement.

First, the plaintiffs argue that the Publisher Defendants had a common motive to conspire to protect their historical prices and market shares. This argument confuses two phenomena. While the SAC describes a commercial environment that would motivate any textbook publisher to independently consider the advantages of adopting a digital textbook regime like Inclusive Access, it does not describe an environment that encouraged or required them to conspire with each other to do so. After all, a motive to innovate is different **[*25]** than a motive to conspire. At best, the SAC describes conscious parallelism, and that is insufficient to plead that the Publisher Defendants conspired with each other. *Connecticut Fine Wine & Spirits, LLC v. Seagull, 932 F.3d 22, 38 (2d Cir. 2019)*; *Twombly, 550 U.S. at 553-54*.

As a second plus factor, the plaintiffs claim that each Publisher Defendant acted against its own economic self-interest when it introduced Inclusive Access. In opposing the Defendants' motion, the plaintiffs argue that it was in each Publisher Defendant's self-interest to sell Inclusive Access through as many retailers and in as many different formats as possible. The plaintiffs also argue that the Institutions would never have adopted a restrictive format such as Inclusive Access unless given no other choice, suggesting that it was not in an individual Publisher Defendant's self-interest to introduce Inclusive Access unless it could be certain that the other Publisher Defendants would do so as well. The plaintiffs point to the independent efforts by the Publisher Defendants to promote programs like Inclusive Access before 2016 and allege that it was only in 2016 that each of the Publisher Defendants "practically simultaneously" adopted Inclusive Access in its current form.

There are at least two problems with this **[*26]** argument. First, the plaintiffs' claims regarding the timing of Inclusive Access ignore the impact of the DOE's adoption of *Rule 164* in 2016. With that adoption, Inclusive Access became a government-sanctioned billing option for Institutions, allowing the costs of Inclusive Access to be added to tuition bills. The DOE justified its adoption of the Rule on the ground that digital textbooks will inevitably become "more ubiquitous" and that including those materials as part of students' tuition would "ensure that students have access to this technology." *80 Fed. Reg. 67126-01 (2015)*.

Second, the plaintiffs' argument about the Publisher Defendants' economic self-interest contradicts the other allegations in the SAC. The SAC explains that it is in each Publisher Defendant's interest to sell digital textbooks and that it is up to each Institution to decide whether to purchase Inclusive Access and add the cost of those digital materials to tuition (with the appropriate mark-up). According to the SAC as well, it is in the financial interest of each Institution to grant its on-campus bookstore the exclusive right to supply the Institution's students with all course materials. Thus, as much as anything else, it is the structure **[*27]** of the relationship between each Institution and its on-campus bookstore, a relationship that long predated the adoption of Inclusive Access, that has excluded other retailers from Inclusive Access. Simply put, the SAC does not plausibly plead that the exclusion of the plaintiff retailers from the Inclusive Access market was against the self-interest of any Publisher Defendant.

As a third plus factor, the SAC alleges that there was a high level of interfirm communication among the Publisher Defendants and that their trade association EPEG served as a convenient forum for their conspiratorial planning. This description of opportunities to conspire to restrict competition does not raise the inference that the Publisher Defendants actually engaged in any unlawful activity.

As a fourth and final plus factor, the SAC alleges that the Defendants coerced Institutions into joining their conspiracy. This allegation fails because the SAC does not identify coercion but only describes financial incentives that were provided to Institutions by the Defendants. The SAC explains that Institutions increasingly took textbook choice away from the faculty and entered into contracts that required all or **[*28]** many core classes to use Inclusive Access. While the SAC asserts that coercive activity by the Publisher Defendants prevented Institutions from making "any truly free choice," that conclusory statement is not a plausible allegation of actual coercion. For instance, the SAC does not allege that the Institutions that adopted Inclusive Access did not have the option of selecting hardcopy textbooks for their courses.[9] Instead, the SAC pleads that, principally for financial reasons, hundreds of Institutions elected to adopt Inclusive Access for some courses.

Having failed to plausibly plead an agreement, the SAC fails to allege a horizontal conspiracy among the Publisher Defendants. Accordingly, count 1 is dismissed.

2. Horizontal Conspiracy: Retailer Defendants

The SAC alleges that the two Retailer Defendants conspired with each other to restrain trade in violation of *§ 1 of the Sherman Act*. The SAC fails to plead sufficient facts, however, to support a plausible claim that the Retailer Defendants entered into a conspiratorial agreement.

Barnes & Noble and Follett compete with each other and with other retailers for the opportunity to become an Institution's on-campus bookstore. This competition presents a significant **[*29]** hurdle to the SAC's assertion of collusion. It is unsurprising, therefore, that the SAC contains no direct allegation that Barnes & Noble and Follett conspired together to sell Inclusive Access. Moreover, the SAC describes a commercial environment in which every on-campus bookstore faced competition from the secondary textbook market. Faced with this competition, the willingness to support an Institution's adoption of Inclusive Access was in each Retailer Defendant's own interest and did not require collusion with its co-defendant. Therefore, agreeing to be an Institution's exclusive partner in providing that Institution's students with all of their textbooks, including digital textbooks sold through Inclusive Access, was very much in its independent financial interest.

In opposing the motion to dismiss the *§ 1* claim, the plaintiffs chiefly focus on the *§ 1* claim against the Publisher Defendants. They argue in passing that the SAC adequately pleads this claim of collusion by the two Retailer Defendants by pointing to the large up-front bonuses that each Retailer Defendant paid to the Institutions that adopted Inclusive Access. Nothing about these payments, however, raises the inference that **[*30]** the Retailer Defendants conspired with each other. Rather, it suggests that they acted in accordance with their own self-interest to become the on-campus bookstore. Because the SAC fails to plead an agreement between the Retailer Defendants, count 2 is dismissed.

3. Hub-and-Spoke Conspiracy

The third form of conspiracy that the SAC pleads is a socalled "hub-and-spoke" conspiracy among the Defendants, with each Publisher Defendant at the hub of a conspiracy with the two Retailer Defendants. "[C]ourts have long recognized the existence of 'hub-and-spoke' conspiracies in which an entity at one level of the market structure, the 'hub,' coordinates an agreement among competitors at a different level, the 'spokes.'" *Apple, 791 F.3d at 314* (citation omitted). "These arrangements consist of both vertical agreements between the hub and each spoke and a

---

[9] The SAC asserts that the Publisher Defendants announced that they "would be" restricting and eventually discontinuing their production of hardcopy textbooks, but stops short of alleging that hardcopy textbooks are not available.

horizontal agreement among the spokes 'to adhere to the hub's terms,' often because the spokes 'would not have gone along with the vertical agreements except on the understanding that the other spokes were agreeing to the same thing.'" Id. (citation omitted).

The SAC does not allege that there is direct evidence of an agreement among the Defendants to form a hub-and-spoke **[*31]** conspiracy. It also fails to plead that the Retailer Defendants, the "spokes" in the alleged hub-and-spoke conspiracy, entered into a horizontal agreement with each other. This alone is fatal to the plaintiffs' claim. The SAC pleads a series of vertical agreements between each Retailer Defendant and each Publisher Defendant. It does not, however, plead that any of the Publisher Defendants used these vertical agreements to coordinate a horizontal agreement between the Retailer Defendants. The plaintiffs' claim for a hub-and-spoke conspiracy fails, and count 3 is dismissed.

C. Section 2

The SAC asserts that each of the Defendants violated *§ 2* in three ways: each of them monopolized each of the textbook markets that the SAC describes, attempted to do so, and conspired to do so. The Defendants have moved to dismiss each of these claims. Although the *§ 2* claims are purportedly brought against each Defendant, the plaintiffs' opposition to the motion defends the *§ 2* claims solely as brought against the three Publisher Defendants. After a discussion of the SAC's definition of the relevant markets, the *§ 2* claims as to each Publisher Defendant are addressed.

1. Market Definition

For purposes of the Sherman **[*32]** Act, "the relevant market is the area of effective competition within which the defendant operates." *Concord, 817 F.3d at 52* (citation omitted). "[A] market consists of an area where sellers, if unified by a hypothetical cartel or merger, could profitably raise prices significantly above the competitive level." Id. (citation omitted). "[T]he concept of a market has two components: a product market and a geographic market." Id.

"A relevant product market consists of products that have reasonable interchangeability for the purposes for which they are produced -- price, use and qualities considered." Id. (citation omitted). The "outer boundaries" of the relevant product market are "determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Sabre, 938 F.3d at 64* (citation omitted); see *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481-82, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. Thus, products will be considered to be reasonably interchangeable "if consumers treat them as acceptable substitutes." *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 105 (2d Cir. 2002)* (citation omitted). "Cross-elasticity of demand exists if consumers would respond to a slight increase in the price of one product by switching to another product." *Todd v. Exxon Corp., 275 F.3d 191, 201-02 (2d Cir. 2001)* (citation omitted).

Within a relevant product market, "well-defined submarkets may **[*33]** exist which, in themselves, constitute product markets for antitrust purposes." *Sabre, 938 F.3d at 64* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*). Commentators have cautioned, however, that "speaking of submarkets is both superfluous and confusing in an antitrust case," and "nothing would be lost by deleting the word 'submarket' from the antitrust lexicon." Phillip E. Areeda et al., ***Antitrust Law*** ¶ 510b, at 170, 173 (Supp. 1998).

The inquiry into the relevant geographic market, on the other hand, "seeks to identify the precise geographic boundaries of effective competition in order to reach a more informed conclusion on potential harm to the market." *Concord, 817 F.3d at 52-53* (citation omitted). "Courts generally measure a market's geographic scope, the area of effective competition, by determining the areas in which the seller operates and where consumers can turn, as a practical matter, for supply of the relevant product." *Id. at 53* (citation omitted). "Taken together, the product and geographic components illuminate the relevant market analysis, which is essential for assessing the potential harm to competition from the defendants' alleged misconduct." Id. (citation omitted).

"To survive a *Rule 12(b)(6)* motion to dismiss, an alleged product market must bear a rational relation to **[*34]** the methodology courts prescribe to define a market for antitrust purposes -- analysis of the interchangeability of use or the crosselasticity of demand, and it must be 'plausible.'" *Todd, 275 F.3d at 200* (citation omitted). "Although market definition is a deeply fact-intensive inquiry not ordinarily subject to dismissal at the pleadings stage, there is no absolute rule against dismissal where the plaintiff has failed to articulate a plausible explanation as to why a market should be limited in a particular way." *Concord, 817 F.3d at 53* (citation omitted). "Thus, in order to survive a motion to dismiss, it is appropriate for a district court to assess whether the plaintiffs' complaint asserts sufficient facts to allege plausibly the existence of both a product and geographic market." Id.

The plaintiffs allege that the relevant product market in this action is the market for "higher education course materials," which consists of traditional hardcopy textbooks as well as digital textbooks (collectively, the "Course Materials Market"). The SAC also alleges several submarkets, which are themselves relevant product markets. These include: (1) Topic Markets, such as History Course Materials; (2) Individual Course Markets, such as **[*35]** the European History Course Market; (3) the Inclusive Access Course Materials Market; (4) Inclusive Access Topic Markets; and (5) Inclusive Access Individual Course Markets.

The SAC alleges that the relevant geographic market for the Course Materials Market, Topic Markets, and Individual Course Markets is the United States. For the Inclusive Access Markets, the SAC alleges that each individual Institution or the United States as a whole is the relevant geographic market.

The Defendants do not dispute that the Individual Course Markets, such as the European History Course Market, can serve as the relevant product market. In addition, they do not take issue with the SAC's proposed geographic markets. They do dispute, however, that the Course Materials Market, Topic Markets, or any of the Inclusive Access Markets is a relevant product market.

In support of their Inclusive Access market definitions, the plaintiffs emphasize that the students, as the purchasers of Inclusive Access, have no choice as to which textbook they must buy. Those choices are made by the faculty member teaching the course or by the Institution.[10] The SAC adds that students are discouraged from opting out of Inclusive **[*36]** Access.

It is unnecessary to resolve the many disputes among the parties regarding the relevant market definitions because the plaintiffs fail to allege that any one of the Publisher Defendants possesses monopoly power in any of the plaintiffs' proposed markets or has engaged in anticompetitive behavior in that market. Even at its narrowest -- an Inclusive Access Individual Course Market at a single Institution -- the SAC fails to plead a market in which a Publisher Defendant has a monopoly.

2. Monopolization

The SAC alleges that each of the three Publisher Defendants monopolized each of the Relevant Markets in violation of *§ 2 of the Sherman Act*. The Publisher Defendants move to dismiss the plaintiffs' monopolization claim on the ground that the SAC does not plausibly allege that any of the three Publisher Defendants possessed either monopoly power or engaged in anticompetitive conduct.

Section 2 of the Sherman Act provides that it is unlawful to "monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*. To plead a monopolization claim under *§ 2*, a plaintiff must allege both: (1) "the possession of monopoly power in the relevant market, and (2) the willful acquisition **[*37]** or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *PepsiCo, 315 F.3d at 105* (citation omitted).

i. Possession of Monopoly Power

"The core element of a monopolization claim is market power." *Id. at 107*. "Market power is the ability to raise price profitably by restricting output." *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2288, 201 L. Ed. 2d 678 (2018)* (emphasis in original) (citation omitted). A plaintiff can plead market power through either direct evidence that the

---

[10] It is unnecessary to decide here whether the consumers, for purposes of a relevant market analysis, should be defined as the Institution and its faculty or the students.

defendant can control prices or exclude competitors from the market, or through indirect evidence, such as the defendant's share of the relevant market. Kaufman v. Time Warner, 836 F.3d 137, 143 (2d Cir. 2016). Thus, a defendant's share of the relevant market "can be used as a proxy for market power." Pepsico, 315 F.3d at 108. A market share of over 70% is "usually strong evidence of monopoly power." Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 99 (2d Cir. 1998) (citation omitted). See also United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966) (87%); Am. Tobacco Co. v. United States, 328 U.S. 781, 797, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946) (80%); United States v. Aluminum Co. of Am., 148 F.2d 416, 424 (2d Cir. 1945) (Hand, J.) (90%). Absent additional evidence, however, "a 64 percent market share is insufficient to infer monopoly power." PepsiCo, 315 F.3d at 109. "A high market share alone, however, is insufficient to infer a seller's market power if other characteristics of the product market, such as low barriers to entry, high cross elasticity of demand, or technological developments in the industry, **[*38]** interfere with the seller's control of prices." Kaufman, 836 F.3d at 143.

"Antitrust analysis must always be attuned to the particular structure and circumstances of the industry at issue," and "[p]art of that attention to economic context is an awareness of the significance of regulation." Verizon Commc'ns Inc. v. L. Offs. of Curtis V. Trinko, LLP, 540 U.S. 398, 411, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004). "One factor of particular importance is the existence of a regulatory structure designed to deter and remedy anticompetitive harm." Id. at 412. "Where such a structure exists, the additional benefit to competition provided by antitrust enforcement will tend to be small, and it will be less plausible that the antitrust laws contemplate such additional scrutiny." Id. Where, by contrast, there is nothing built into the regulatory scheme which performs the antitrust function, "the benefits of antitrust are worth its sometimes considerable disadvantages." Id.

The SAC fails to plead direct evidence of monopoly power. The plaintiffs do not plausibly allege that any Publisher Defendant was able to control prices within any one of their Relevant Markets or exclude another publisher from that market.

In opposition to this motion, the plaintiffs assert, with little explanation, that the SAC does allege that the Publisher Defendants have excluded **[*39]** competition and engaged in supracompetitive pricing. The paragraphs in the SAC to which the plaintiffs point to support that assertion do not plausibly allege direct evidence of monopoly power. Those paragraphs appear to allege first that Inclusive Access textbooks are more expensive than used hardcopy textbooks. This does not constitute supracompetitive pricing. For example, the SAC does not assert that Inclusive Access textbooks are more expensive than new hardcopy textbooks. Nor could it. Rule 164 explicitly requires Institutions to make Inclusive Access available at "below competitive market rates." 34 C.F.R. § 668.164(c)(2) (2016).

Next, the paragraphs to which the plaintiffs point appear to assert that the adoption of digital textbooks eliminates competition in the secondary market. This feature of the digital revolution is not direct evidence of monopolistic power. To successfully plead that a Publisher Defendant has excluded competitors, the SAC would have to plead that the Publisher Defendant excluded other publishers from developing and marketing digital textbooks. This the SAC does not plead.

The SAC also fails to plead indirect evidence of monopoly power. To the extent it pleads market share at all, the **[*40]** SAC relies on joint market shares, for example, that the three Publisher Defendants control 70% or more of the relevant market. But a shared monopoly does not state a § 2 claim. See In re Credit Default Swaps Antitrust Litig., No. 13MD2476 (DLC), 2014 U.S. Dist. LEXIS 123784, 2014 WL 4379112, at *13 (S.D.N.Y. Sept. 4, 2014) (citing H.L. Hayden Co. of New York v. Siemens Med. Sys., Inc., 879 F.2d 1005, 1018 (2d Cir. 1989)) (attempt and conspiracy to monopolize claims). In opposition to this motion, the plaintiffs argue that the SAC does succeed in one paragraph in pleading that the Publisher Defendants had a monopolistic market share in the Individual Course Markets. That paragraph asserts: "On information and belief, a significant number (if not all) of the Individual Course Markets are monopolistic, with each Publisher having specific monopoly control over a subset of these markets." Even if this sentence is read to suggest that each one of the Publisher Defendants has a monopolistic market share in the hardcopy and digital textbook market for at least one individual course, for instance European History, it fails to give the fair notice required to plead such a central element of its monopolization claim. This failure is not surprising. The SAC brings a monopolization claim against three publishers, each of which is a significant publisher of U.S. textbooks. If any one of them attempted to charge supracompetitive **[*41]** prices for textbooks, it would run the risk of competition from another publisher. To the extent this allegation is an effort to plead a *§ 1* claim against the three Publisher Defendants for dividing the market, it is far too conclusory to do so.

ii. Anticompetitive Conduct

The SAC also fails to plausibly allege that a Publisher Defendant willfully acquired or maintained monopoly power through anticompetitive means. "To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct." *In re Adderall XR Antitrust Litig., 754 F.3d 128, 133 (2d Cir. 2014)* (quoting *Trinko, 540 U.S. at 407*). "Anticompetitive conduct is conduct without a legitimate business purpose that makes sense only because it eliminates competition." Id. (citation omitted).

The plaintiffs claim that each Publisher Defendant willfully maintained its alleged monopoly power by refusing to sell Inclusive Access to the plaintiffs. "[A]s a general matter, the Sherman Act does not restrict the long recognized right of a trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal." *Trinko, 540 U.S. at 408* (quoting *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*). "However, the high value that we have placed **[*42]** on the right to refuse to deal with other firms does not mean that the right is unqualified." Id. (quoting *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*). There are "limited circumstances in which a firm's unilateral refusal to deal with its rivals can give rise to antitrust liability." *Pac. Bell Tel. Co. v. linkLine Commc'ns, Inc., 555 U.S. 438, 448, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*. Under the "limited exception recognized in Aspen Skiing," a case that is "at or near the outer boundary of *§ 2* liability," the "unilateral termination of a voluntary (and thus presumably profitable) course of dealing" can suggest "a willingness to forsake short-term profits to achieve an anticompetitive end." *Trinko, 540 U.S. at 409*.

The SAC fails to plausibly plead that a Publisher Defendant's refusal to distribute Inclusive Access through the plaintiffs exhibits anticompetitive behavior. According to the SAC, the preexisting course of dealing between the Publisher Defendants and the plaintiffs continues to exist -- the Publisher Defendants continue to distribute textbooks other than Inclusive Access through the plaintiffs. It is only a new product, Inclusive Access, that the Publisher Defendants refuse to distribute through the plaintiffs. When an Institution selects Inclusive Access for its courses, it distributes Inclusive Access through its on-campus bookstore. Thus, **[*43]** unlike in *Aspen Skiing*, the Publisher Defendants have not unilaterally terminated a preexisting course of dealing. Rather, they have declined to extend their dealings with the plaintiffs to their newest product. Accordingly, the SAC fails to plead that any one of the Publisher Defendants willfully acquired or maintained its alleged monopoly power through anticompetitive means. The SAC's monopolization claims, in count 4, are dismissed.

3. Attempted Monopolization

The SAC claims that the Defendants attempted to monopolize the Relevant Markets in violation of *§ 2 of the Sherman Act*. The Defendants move to dismiss this claim, count 6, arguing that it fails for the same reasons that the plaintiffs' monopolization claim does -- namely, that the SAC does not allege monopoly power or any anticompetitive conduct.

In order to plead attempted monopolization, the plaintiff must allege: "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638, 651 (2d Cir. 2015)* (citation omitted). "Attempted monopolization, unlike monopolization, requires a finding of specific intent." Id.

As was true for the monopolization claim, in **[*44]** opposing this motion, the plaintiffs focus on the conduct of the Publisher Defendants. The SAC fails to plausibly allege that any Publisher Defendant attempted to monopolize any one of the Relevant Markets or engaged in anticompetitive conduct. Also, the SAC fails to allege either a specific intent by a Publisher Defendant to monopolize or a dangerous probability that a defendant would succeed in achieving monopoly power. Count 6 is dismissed.

4. Conspiracy to Monopolize

The SAC also alleges the Defendants conspired to monopolize the Relevant Markets. The Defendants move to dismiss this claim, count 5, on the ground that the SAC fails to plead evidence of an agreement.

Section 2 of the Sherman Act prohibits entities from "combin[ing] or conspir[ing] with any other person or persons, to monopolize any part of the trade or commerce among the several States . . . ." *15 U.S.C. § 2*. The elements of a *§ 2* conspiracy to monopolize are: "(1) proof of a concerted action deliberately entered into with the specific intent to achieve an unlawful monopoly, and (2) the commission of an overt act in furtherance of the conspiracy." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 233 (2d Cir. 1999)*. "[I]n deciding whether there is concerted action, courts routinely apply the same analysis under both *Sections 1* and *2*." 2 **[*45]** Julian von Kalinowski, Peter Sullivan, & Maureen McGuirl, Antitrust Laws and Trade Regulation § 26.02 (2d ed. 2021).

The SAC fails to allege that one or more of the Defendants entered into an agreement with others to monopolize a Relevant Market for the same reasons that it fails to allege that they violated *§ 1*. Count 5 is therefore dismissed.

II. Robinson-Patman Act Claims

The SAC brings two claims for violation of the Robinson-Patman Act. It alleges that the Publisher Defendants sold textbooks, which it refers to as Course Materials, to the Retailer Defendants at prices that were "substantially less" than those that they charged the plaintiffs. The SAC claims that this conduct amounts to price discrimination in violation of *§ 13(a)* of the Act. *15 U.S.C. § 13(a)*. The plaintiffs separately allege that the Retailer Defendants "knowingly induced" and "received" discriminatory pricing for those materials in violation of *§ 13(f)* of the Act. *15 U.S.C. § 13(f)*. The Defendants move to dismiss both claims, counts 7 and 8.

> *Section 2(a)* of the Robinson-Patman Act makes it unlawful to discriminate in price between different purchasers of commodities of like grade and quality . . . where the effect of such discrimination may be substantially to lessen competition **[*46]** . . . or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them[.]

15 U.S.C. § 13(a). *Section 2(f)* provides that "[i]t shall be unlawful for any person . . . knowingly to induce or receive a discrimination in price which is prohibited by this section." Id. *§ 13(f)*. "'Price discrimination' in this context means a difference in the price charged for the items of like grade and quality to two different buyers." *Cash & Henderson Drugs, Inc. v. Johnson & Johnson, 799 F.3d 202, 209 (2d Cir. 2015)*.

The competitive injury that the plaintiffs assert is what is known as "secondary-line injury," which is "an injury to competition between different purchasers of the same product. Id. To state a claim for secondary-line injury through price discrimination, a plaintiff must allege:

> (1) that the seller's sales were made in interstate commerce; (2) that the seller discriminated in price as between the two purchasers; (3) that the product or commodity sold to the competing purchasers was of the same grade and quality; and (4) that the price discrimination had a prohibited effect on competition.

Id. at 209-10 (citation omitted). "Plaintiffs attempting to establish competitive injury generally have two routes available **[*47]** to them: showing substantial discounts to a competitor over a significant period of time, known as the Morton Salt inference, or proof of sales lost to favored purchasers." *Id. at 210*. "[I]f the loss attributable to impaired competition is de minimis, then the challenged practice cannot be said to have had a 'substantial' affect on competition." Id.; see also *Volvo Trucks N. Am., Inc. v. Reeder-Simco GMC, Inc., 546 U.S. 164, 180, 126 S. Ct. 860, 163 L. Ed. 2d 663 (2006)*.

The SAC alleges that "in almost every case" where the plaintiffs "encountered Inclusive Access Materials," the Publisher Defendants refused to sell them Inclusive Access textbooks. In a "very few instances," however, the Publisher Defendants did offer to sell Inclusive Access textbooks to the plaintiffs, but only "at a higher price compared to that offered to the [Retailer Defendants] operating at the same" Institutions. The SAC provides just two examples of instances in which Pearson allegedly sold Inclusive Access textbooks to one of the plaintiffs at a discriminatory price. It contains no examples of any discriminatory pricing by either McGraw Hill or Cengage.

First, at one Institution's campus, after "originally refus[ing]" to sell digital textbooks to one of the plaintiffs through Inclusive Access, Pearson "sold [the] product to [that **[*48]** plaintiff] at prices that were substantially higher than those for sales to Defendant Follett . . . ." Second, at a different Institution's campus, Pearson offered to sell a print upgrade for a digital textbook to one of the plaintiffs for a course that was subscribed to Inclusive Access. It charged that plaintiff "a significantly higher price" than it charged Barnes & Noble, however. Citing these examples, the plaintiffs allege that "[i]n these few instances where the Plaintiff Retailers were sold any product related to Inclusive Access Materials (including the supplemental print products)," they were offered higher prices than the Retailer Defendants were given.

The SAC does not state a claim for price discrimination under either *§ 2(a)* or *§ 2(f)* of the Robinson-Patman Act. According to the SAC, the plaintiffs assert the central feature of Inclusive Access is its exclusivity: The Publisher Defendants distribute digital textbooks through the Retailer Defendants and refuse to offer those products to the plaintiffs. The SAC relies on only two examples in which Pearson offered one of the plaintiffs the chance to distribute either a digital textbook or its print upgrade. These two isolated incidents **[*49]** fall far short of the "significant period of time" that is required to plead a substantial effect on competition in a secondary-line price discrimination case.

The SAC does not contain any developed allegations against the Retailer Defendants in support of the *§ 2(f)* claim and the plaintiffs do not oppose its dismissal. Accordingly, counts 7 and 8 are dismissed.[11]

III. State Law Claims

The Defendants move to dismiss the plaintiffs' state law claims, counts 10 through 14, on the ground that they are inapplicable or derivative of the plaintiffs' federal claims. The SAC fails to state a claim under any of its state law causes of action.

The SAC brings state law price discrimination claims under the *Arkansas Unfair Practices Act ("AUPA"), Ark. Code Ann. §§ 4-75-201, et seq.*; the *Kentucky Unfair Trade Practices Act ("KUTPA")*, *Ky. Rev. Stat. Ann. §§ 365.020, et seq.*; and the *New Mexico Price Discrimination Act ("NMPDA"), N.M. Stat. Ann. §§ 57-14-1, et seq.* The AUPA and KUTPA are broader than the federal Robinson-Patman Act in that they prohibit price discrimination in the sale of a "product" or "service" in addition to a "commodity." They are narrower, however, in that they only prohibit price discrimination among different localities within the state. Because the SAC does not allege discrimination on that basis, its claims under those statutes fail. The NMPDA, on the other hand, "closely parallels" the Robinson-Patman Act. *Jay Walton Enterprises, Inc. v. Rio Grande Oil Co. of Bernalillo Cty., 1987- NMCA 070, 106 N.M. 55, 56-57, 738 P.2d 927 (N.M. Ct. App. 1987)*. Because of **[*50]** this similarity, courts "look to the federal law for assistance in interpretation and application of the state act." *Id. at 57*. Since the SAC fails to state a claim under the Robinson-Patman Act, its claim under the NMPDA fails as well.

The plaintiffs also bring unjust enrichment claims under Arkansas, Kentucky, New Mexico, Tennessee, and Texas common law.[12] Each of these claims fails as well. In connection with these claims, the SAC alleges that the Defendants "received higher prices for Course Materials and Inclusive Access Materials" by "engaging in the wrongful conduct described herein." Since the SAC fails to plead that the Defendants engaged in any unlawful conduct, its unjust enrichment claims fail.

The SAC also asserts claims under the *New Mexico Unfair Practices Act ("NMUPA"), N.M. Stat. Ann. §§ 57-12-1, et seq.* and the *Texas Free Enterprise and Antitrust Act of 1983 ("TFEAA"), Tex. Bus. & Com. Code §§ 15.01, et seq.* The NMUPA "does not provide a cause of action for competitive injury claims." *Gandydancer, LLC v. Rock House*

---

[11] The Defendants also move to dismiss the plaintiffs' Robinson-Patman Act claims on the ground that digital textbooks are not "commodities" within the meaning of the Act. They describe Inclusive Access as a method of delivering content. This Opinion assumes without deciding that discriminatory pricing of Inclusive Access is subject to redress under the Robinson-Patman Act.

[12] The Arkansas, New Mexico, and Texas unjust enrichment claims are brought against both the Publisher and Retailer Defendants. The Kentucky and Tennessee unjust enrichment claims are directed toward the Publisher Defendants alone.

CGM, LLC, 2019- NMSC 021, 453 P.3d 434, 438 (N.M. 2019). The plaintiffs' claim under the TFEAA must be dismissed because it is derivative of their federal antitrust claims. See *Tex. Bus. & Com. Code § 15.04* (providing that the TFEAA "shall be construed in harmony with federal judicial interpretations of comparable federal antitrust statutes"). Counts 10 through 14 are therefore dismissed.

IV. Claims Against EPEG

The Publisher Defendants[13] move to dismiss **[*51]** the claims against EPEG, counts 1, 3, and 9, on the ground that the SAC fails to plausibly allege two related issues: that EPEG has the capacity to be sued and that EPEG has a legal existence such that there is jurisdiction over it.[14] The SAC asserts that EPEG is an "unincorporated association recognized as a legal entity under the laws of Delaware and federal law."[15]

Under *Rule 17(b)(3)*, the capacity of an unincorporated association to be sued is determined in the first instance by the law of the state where the court is located, except that an "unincorporated association with no such capacity under that state's law may . . . be sued in its common name to enforce a substantive right existing under the United States Constitution or laws." *Fed. R. Civ. P. 17(b)(3)*. The purpose of the federal law exception in *Rule 17(b)(3)(A)* is to "prevent[] state law from frustrating the enforcement of federal substantive rights where state law does not grant unincorporated associations and partnerships the capacity to be sued." *E.E.O.C. v. St. Francis Xavier Parochial Sch., 77 F. Supp. 2d 71, 77 (D.D.C. 1999)*, aff'd sub nom. *E.E.O.C. v. St. Francis Xavier Sch., 254 F.3d 315, 349 U.S. App. D.C. 238 (D.C. Cir. 2000)*.[16]

Delaware law grants unincorporated associations the capacity to bring suits and to be **[*52]** sued. Under Delaware law, "[a]n unincorporated association of persons[] . . . using a common name may sue and be sued in such common name . . . ." *Agar v. Judy, 151 A.3d 456, 488 (Del. Ch. 2017)* (quoting *10 Del. C. § 3904*).

The question next becomes which body of law governs the determination of whether EPEG is in fact an unincorporated association capable of being sued. The Court of Appeals for the Second Circuit does not appear to have addressed this question, but the Ninth Circuit has explained that federal law should govern this determination. "For purposes of [*Rule 17(b)(3)(A)*], the determination of what constitutes an 'unincorporated association' is a question of federal law" when the action arises under federal law. *Comm. for Idaho's High Desert, Inc. v. Yost, 92 F.3d 814, 820 (9th Cir. 1996)* (citation omitted); *Sierra Ass'n for Env't v. F.E.R.C., 744 F.2d 661, 662 (9th Cir. 1984)*. See also *Goldenberg v. Indel, Inc., 741 F. Supp. 2d 618, 628 (D.N.J. 2010)*.; *In re Magnetic Audiotape Antitrust Litig., No. 99 CIV. 1580 (LMM), 2000 U.S. Dist. LEXIS 18197, 2000 WL 1855119, at *1 (S.D.N.Y. Dec. 19, 2000)*; *St. Francis, 77 F. Supp. 2d at 76*. Federal courts have generally defined an unincorporated association as "a voluntary group of persons, without a charter, formed by mutual consent for the purpose of promoting a common

---

[13] The Publisher Defendants, as members of EPEG, have standing to move to dismiss the claims against EPEG. The plaintiffs' argument to the contrary is rejected.

[14] Counts 1, 3, and 9 plead that EPEG violated *§ 1 of the Sherman Act*.

[15] Where a legal standard is supplied by state law, Delaware law will be applied since this lawsuit was filed in Delaware. "An MDL transferee court 'applies the substantive state law, including choice-of-law rules, of the jurisdiction in which the action was filed.'" *In re Mirena IUD Prods. Liab. Litig., 29 F. Supp. 3d 345, 350 (S.D.N.Y. 2014)* (quoting *Menowitz v. Brown, 991 F.2d 36, 40 (2d Cir. 1993)*). In any event, the parties' briefs assume that Delaware rather than New York law controls. This "implied consent . . . is sufficient to establish choice of law." *Santalucia v. Sebright Transp., Inc., 232 F.3d 293, 296 (2d Cir. 2000)* (citation omitted).

[16] The Advisory Committee Notes to *Rule 17(b)* identify Charles E. Clark, A New Federal Civil Procedure - II. Pleadings and Parties, 44 Yale L.J 1291 (1935) and *United Mine Workers of Am. v. Coronado Coal Co., 259 U.S. 344, 42 S. Ct. 570, 66 L. Ed. 975 (1922)*, among other authorities, as influences on the Rule's development. Advisory Committee Notes of 1937, *Rule 17, Fed. R. Civ. P.* In United Mine Workers, the Supreme Court "treated a defendant unincorporated association as an entity, though the state court of the forum had earlier refused to recognize the association as such." Clark, A New Federal Civil Procedure, 44 Yale L.J. at 1316. Professor Clark notes with approval that the rule of United Mine Workers is "desirable" when a "federal right would otherwise be impaired." Id.

objective." *Yost, 92 F.3d at 820* (citation omitted); *Goldenberg, 741 F. Supp. 2d at 628*; *In re Magnetic, 2000 U.S. Dist. LEXIS 18197, 2000 WL 1855119, at *1*.

The SAC pleads that EPEG is a voluntary association formed by the mutual consent of the Publisher Defendants for the purpose of engaging in anti-counterfeiting efforts. The SAC has plausibly plead that EPEG is an unincorporated association, and as such, it has the capacity to be sued under **[*53]** Delaware law.[17] Nonetheless, because the SAC fails to plead an agreement with respect to any of the Defendants, the plaintiffs' claims against EPEG, counts 1, 3, and 9, are dismissed.

Delaware law controlled the question of whether EPEG was an unincorporated association such that it had the capacity to sue and be sued, it appears that the SAC adequately pleads such existence. The Delaware cases that have addressed this issue do not describe the minimum characteristics that an organization must have to qualify as an unincorporated association. See, e.g., *Furek v. Univ. of Delaware, 594 A.2d 506 (Del. 1991)*; *Twardowski v. Jester, 39 Del. Ch. 221, 163 A.2d 242 (1960)*. While both of these decisions found the entity under consideration to have a more formal existence than EPEG has, neither purports to set out the boundaries for this determination. They do not supply a basis to find therefore that Delaware law is in conflict with federal law on this issue.

Conclusion

The Defendants' January 22, 2021 motions to dismiss are granted. The Clerk of Court shall close the case and enter judgment for the Defendants.

End of Document

---

[17] The Defendants' motion to dismiss pursuant to *Rule 12(b)(2)* for lack of personal jurisdiction is denied. The SAC has pleaded sufficient facts to make a prima facie showing of jurisdiction. See *SPV Osus Ltd. v. UBS AG, 882 F.3d 333, 342 (2d Cir. 2018)*. The plaintiffs' assertion that the *Rule 12(b)(2)* motion is untimely is rejected.

LexisNexis® Headnotes

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > Remedies > Injunctions > Temporary Restraining Orders

HN1[] **Injunctions, Preliminary & Temporary Injunctions**

The analysis courts apply to assess whether a preliminary injunction should be granted is substantially identical to the analysis used to assess whether to grant a temporary restraining order.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Balance of Hardships

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] **Grounds for Injunctions, Balance of Hardships**

A plaintiff seeking a preliminary injunction generally must show that: (1) he or she is likely to succeed on the merits; (2) he or she is likely to suffer irreparable harm in the absence of preliminary relief; (3) the balance of equities tips in his or her favor; and (4) that an injunction is in the public interest. A preliminary injunction is an extraordinary remedy that may only be awarded upon a clear showing that the plaintiff is entitled to such relief.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Balance of Hardships

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] Grounds for Injunctions, Balance of Hardships

A stronger showing of one element of the preliminary injunction test may offset a weaker showing of another. Thus, when the balance of hardships tips sharply towards the plaintiff, the plaintiff need demonstrate only serious questions going to the merits.

Civil Procedure > Remedies > Injunctions > Mandatory Injunctions

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN4[] Injunctions, Mandatory Injunctions

The already high standard for granting a preliminary injunction is further heightened when the type of injunction sought is a mandatory injunction. To obtain a mandatory injunction, a plaintiff must establish that the law and facts clearly favor her position, not simply that she is likely to succeed. In plain terms, mandatory injunctions should not issue in doubtful cases.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] Sherman Act, Claims

15 U.S.C.S. § 1 of the Sherman Anti-Trust Act prohibits any contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. 15 U.S.C.S. § 1. It is intended to prohibit actions that unreasonably restrain competition.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN6[] Sherman Act, Claims

The rule of reason is the accepted standard for testing whether an alleged restraint on competition imposed by a sports league violates the Sherman Anti-Trust Act, 15 U.S.C.S. § 1.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Burdens of Proof > Burden Shifting

HN7[] Per Se Rule Tests, Manifestly Anticompetitive Effects

To determine whether a restraint violates the rule of reason, courts apply a three-step, burden-shifting framework. The plaintiff bears the initial burden to show that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. If the plaintiff carries this burden, then the burden shifts to the defendant to show a procompetitive rationale for the restraint. If the defendant makes that showing, then the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Burdens of Proof > Allocation

HN8[] Conspiracy to Monopolize, Elements

A plaintiff must establish three elements to meet its initial burden that the challenged restraint has a substantial effect that harms consumers in the relevant market: (1) the existence of a contract, combination, or conspiracy among two or more separate entities that; (2) unreasonably restrains trade; and (3) affects interstate or foreign commerce.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN9[] Per Se Rule Tests, Manifestly Anticompetitive Effects

A plaintiff can show that an agreement unreasonably restrains trade either directly or indirectly. Direct evidence of anticompetitive effects would be proof of actual detrimental effects on competition, such as reduced output, increased prices, or decreased quality in the relevant market. Indirect evidence would be proof of market power plus some evidence that the challenged restraint harms competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Justifications offered under the rule of reason may be considered only to the extent that they tend to show that, on balance, the challenged restraint enhances competition. Procompetitive benefits are those that improve or broaden competitive choices and include increasing output, creating operating efficiencies, making a new product available, enhancing product or service quality, and widening consumer choice. Cost-cutting, promoting social or ethical values, public policy, and public safety are not considered procompetitive benefits.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Labor > Statutory Exemptions

HN11[] **Scope, Exemptions**

The United States Supreme Court has recognized that a proper accommodation between the congressional policy favoring collective bargaining under the National Labor Relations Act and the congressional policy favoring free competition in business markets requires that some union-employer agreements be accorded a limited nonstatutory exemption from antitrust sanctions. The Court has explained that the purpose behind the exemption is to effectuate the intent of the United States Congress to prevent judicial use of ***antitrust law*** to resolve labor disputes.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN12[] **Sherman Act, Claims**

In the context of professional sports leagues, courts have consistently held that rules created through or incorporated by collective bargaining agreements between leagues and their respective players unions are immune from scrutiny under the Sherman Anti-Trust Act, 15 U.S.C.S. § 1.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN13[] **Scope, Exemptions**

To give effect to federal labor laws and policies and to allow meaningful collective bargaining to take place, some restraints on competition imposed through the bargaining process must be shielded from antitrust sanctions.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN14[] **Sherman Act, Claims**

The mere existence of an agreement outlining the process through which collective bargaining might begin in the future does not insulate the Age Rule from scrutiny under 15 U.S.C.S. § 1 of the Sherman Anti-Trust Act.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN15[] **Grounds for Injunctions, Irreparable Harm**

To obtain a preliminary injunction, a plaintiff must also demonstrate that irreparable injury is likely in the absence of an injunction.

Opinion

[*1066] OPINION AND ORDER

IMMERGUT, District Judge.

Before this Court is Plaintiff's Motion for Preliminary Injunction. ECF 2. Plaintiff, a 15-year-old soccer player, seeks an order from this Court enjoining Defendant National Women's Soccer League ("NWSL" or "the League") from enforcing against her its rule that all players in the League must be at least 18 years old (the "Age Rule"). This Court previously granted Plaintiff's request for a temporary restraining order ("TRO") prohibiting enforcement of the Age Rule pending this Court's ruling **[**2]** on the Motion for Preliminary Injunction. ECF 47; ECF 77.

The preliminary injunction sought by Plaintiff is limited in its scope. Plaintiff seeks an order prohibiting the League from preventing her from playing professional soccer on an NWSL team through its requirement that players be at least 18 years of age. ECF 1 at 12; ECF 2 at 31. As Plaintiff clarified during the hearing on the TRO, she does not seek an order requiring the NWSL or any of its member teams to hire her. Further, Plaintiff does not seek an order that interferes with negotiations between the NWSL and the NWSL Players Association ("NWSL PA"). Plaintiff concedes that if the NWSL and the NWSL PA enter into a collective bargaining agreement ("CBA") that includes an age restriction, she could lose her ability to play for the NWSL until she is age-eligible and would not have grounds to challenge such a restriction. ECF 1 at 12; ECF 50 at 17. Through this preliminary injunction, Plaintiff solely seeks the opportunity to compete for a position on a professional soccer team free from the Age Rule's restrictions.

On May 4, 2021, Plaintiff filed her complaint and a motion for a temporary restraining order and preliminary injunction. **[**3]** ECF 1; ECF 2. Plaintiff's complaint challenges the NWSL's Age Rule as a violation of the *Sherman Anti-Trust Act, 15 U.S.C. § 1*, and argues that "[t]he ten teams in the NWSL have agreed among themselves, and with the League, not to contract with soccer players under the age of 18, without regard to their talents or their ability to compete in the League." ECF 1 at ¶¶ 3, 40. Plaintiff further argues that the NWSL is the only option for women to play professional soccer in the United States, and that the Age Rule serves no legitimate business justification or procompetitive purpose. *Id.* at ¶¶ 41, 44. Plaintiff points to the absence of any age restrictions for male soccer players to demonstrate that the public interest in open competition and the equal treatment of women favors an injunction in this case. *Id.* at ¶ 45. Plaintiff asserts that keeping her out of the NWSL, which has already started its season of games, "will continually slow her development, delay her improvement, and more generally impede her career as a soccer player." *Id.* at ¶ 35.

On May 20, 2021, this Court held a hearing on Plaintiff's TRO motion at which both sides had an opportunity to present **[*1067]** additional evidence and argument.[1] ECF 46. On May 24, 2021, this **[**4]** Court granted Plaintiff's TRO motion, finding that Plaintiff had presented facts and legal support sufficient to warrant a TRO enjoining the enforcement of the Age Rule against her until a preliminary injunction hearing could be held. ECF 47. After this Court entered the TRO against Defendant, five of the NWSL's ten teams submitted discovery requests for Plaintiff's rights. ECF 80, Levine Decl., at ¶ 3.[2]

After this Court issued the TRO, the parties submitted supplemental briefing addressing whether the Court should issue a preliminary injunction. Plaintiff submitted briefing and multiple declarations containing NWSL governing documents and agreements which she obtained through discovery. ECF 50; ECF 54; ECF 55; ECF 67; ECF 68; ECF 69. Defendant submitted briefing and a declaration from the NWSL's general counsel containing League documents and outlining Defendant's efforts to comply with the TRO. ECF 62; ECF 63.

On June 7, 2021, this Court held a hearing on Plaintiff's preliminary injunction motion. ECF 77. The parties again had the opportunity to present additional evidence and argument. The Court heard testimony from Plaintiff which it found credible. Defendant presented no new evidence **[**5]** at the preliminary injunction hearing.

---

[1] The Court adopted the parties' proposed briefing schedule leading up to the TRO hearing. ECF 23. In its Response to Plaintiff's TRO Motion, Defendant argued that the *Norris LaGuardia Act's* ("NLGA") anti-injunction provision, *29 U.S.C. § 101*, divested this Court of jurisdiction to issue an injunction in this case unless it conformed with the NLGA's enumerated special requirements. ECF 35 at 25-30. This Court ordered the parties to provide briefing addressing whether the NLGA's anti-injunction provision applied to this case. ECF 40. On May 19, 2021, this Court issued an order finding that the NLGA's anti-injunction provision does not apply to this case. ECF 45.

[2] In her supplemental memorandum in support of the preliminary injunction motion, Plaintiff alleges that Defendant has violated the spirit of the Court's TRO by adopting new "age-related barriers" to delay Plaintiff's entry into the League. ECF 50 at 12-17. Plaintiff therefore requests that this Court enter a preliminary injunction that not only enjoins Defendant from enforcing the Age Rule but also (1) prohibits Defendant "from implementing any new measure, policy, or rule that has the effect of delaying or impeding the processing and approval of the Thorns' discovery request for [Plaintiff]; (2) prohibits [Defendant] from revoking or interfering with [Plaintiff's] status as a contracted player unless and until the League enters into a final CBA that includes an Age Rule which [Plaintiff] does not meet, and (3) expressly retains jurisdiction to monitor [Defendant's] compliance with the preliminary injunction and to award appropriate relief for any noncompliance." *Id.* at 17. Defendant denies that it has violated the spirit of the TRO and insists that it "is making all reasonable efforts to accommodate [Plaintiff's] desire to join a team as expeditiously as possible." ECF 62 at 29. This afternoon, Plaintiff filed supplemental briefing and a declaration from counsel alleging further misconduct by Defendant and seeking intervention from this Court. ECF 85; ECF 86. Defendant has not yet had an opportunity to respond. Whether Defendant has violated the spirit of the TRO is an issue distinct from whether this Court should grant Plaintiff's request for a preliminary injunction. Accordingly, the Court considers only whether Plaintiff has met her burden of establishing that the preliminary injunction she sought in her complaint and the initial motion, ECF 2, is warranted at this time. Once Defendant has been afforded the opportunity to respond to Plaintiff's latest allegations, this Court will decide whether further action is required to ensure Defendant's compliance with its orders.

HN1[] The analysis courts apply to assess whether a preliminary injunction should be granted is "substantially identical" to the analysis used to assess whether to grant a TRO. *Stuhlbarg Int'l Sales Co., Inc. v. John D. Brush & Co., Inc., 240 F.3d 832, 839 n.7 **[*1068]** (9th Cir. 2001)*. As explained further below, the evidence presented since this Court granted the TRO does not alter its conclusion that the NWSL and its ten teams have agreed to impose the NWSL's age restriction which excludes female competitors from the only available professional soccer opportunity in the United States because they are under 18, regardless of talent, maturity, strength, and ability. Indeed, the new evidence in the record bolsters this Court's prior conclusion that the NWSL and its member teams are not a single entity under the *Sherman Act*. Rather, the teams function as separate economic entities competing for player rights. The NWSL's governing documents also support the Court's prior conclusion that the NWSL and its member teams formed an agreement to enforce the Age Rule, and that the member teams play a central role in its continued implementation.

This Court again finds that Defendant has not presented any compelling procompetitive reasons to justify its anticompetitive **[**6]** policy, nor has it shown that eliminating the Age Rule will cause any concrete injury to the NWSL. Instead, Defendant repeats its previously rejected procompetitive justifications for the Age Rule, which strain credulity.

Accordingly, this Court adopts its reasoning and conclusions from the TRO opinion, ECF 47, and supplements its findings as explained below. This Court again finds that the merits clearly favor Plaintiff's position, that she will be irreparably harmed if it does not grant the preliminary injunction, and that the balance of equities and the public interest strongly favor affording girls in the United States the same opportunities as boys. Plaintiff's Motion for Preliminary Injunction, ECF 2, is GRANTED.[3]

STANDARDS

HN2[] A plaintiff seeking a preliminary injunction generally must show that: (1) he or she is likely to succeed on the merits; (2) he or she is likely to suffer irreparable harm in the absence of preliminary relief; (3) the balance of equities tips in his or her favor; and (4) that an injunction is in the public interest. *Winter v. NRDC, Inc., 555 U.S. 7, 20, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)*. A preliminary injunction is an "extraordinary remedy that may only be awarded upon a clear showing that the plaintiff is entitled to such relief." **[**7]** *Id. at 22*.

The Ninth Circuit applies a "sliding scale" approach in considering the factors outlined in *Winter*. *HN3*[] A stronger showing of one element of the preliminary injunction test may offset a weaker showing of another. *All. for the Wild Rockies v. Cottrell, 632 F.3d 1127, 1131-35 (9th Cir. 2011)*. Thus, when the balance of hardships "tips sharply towards the plaintiff," the plaintiff need demonstrate only "serious questions going to the merits." *Id. at 1135* (internal quotation marks omitted).

HN4[] Finally, the already high standard for granting a preliminary injunction is further heightened when the type of injunction sought is a "mandatory injunction." *Garcia v. Google, Inc., 786 F.3d 733, 740 (9th Cir. 2015)*. To obtain a mandatory injunction, a plaintiff must "establish that the law and facts *clearly favor* her position, not simply that she is likely to succeed." *Id.* (emphasis in original). "In plain terms, mandatory injunctions should not issue in 'doubtful cases.'" *Id.* (quoting **[*1069]** *Park Vill. Apartment Tenants Ass'n v. Mortimer Howard Trust, 636 F.3d 1150, 1160 (9th Cir. 2011)*).

DISCUSSION

A. Form of Injunction

---

[3] In granting the preliminary injunction motion, this Court is not making a final ruling on the merits of this case. The preliminary injunction will remain in place until there is a trial on the merits, which this Court is willing to oversee on an expedited schedule.

Defendant argues that Plaintiff seeks a mandatory injunction and thus this Court must apply the heightened standard described above. ECF 35 at 24-25. Plaintiff asserts that her requested relief can be properly categorized as prohibitory. ECF 41 at 12. At the TRO stage, this Court found that Plaintiff met her burden under either standard **[**8]** and assumed without finding that Plaintiff sought a mandatory injunction. ECF 47 at 5. This Court again finds that Plaintiff has met her burden under either the mandatory or prohibitory injunction standard, and therefore assumes without deciding that Plaintiff requests a mandatory injunction.

B. Preliminary Injunction Factors

1. The Law and the Facts Clearly Favor Plaintiff's Position

Plaintiff alleges Defendant's Age Rule violates *§ 1 of the Sherman Act, 15 U.S.C. § 1*. ECF 1 at ¶ 3. ***HN5***[] Section 1 prohibits any "contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. It "is intended to prohibit actions that unreasonably restrain competition." *Jack Russell Terrier Network of N. Cal. v. Am. Kennel Club, Inc., 407 F.3d 1027, 1033 (9th Cir. 2005)* (citing *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*).

a. Rule of Reason Analysis

HN6[] In its TRO, this Court analyzed the Age Rule under the "rule of reason," which is the accepted standard for testing whether an alleged restraint on competition imposed by a sports league violates *§ 1 of the Sherman Act*. ECF 47 at 5-12; *see also Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 202-03, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*; *N. Am. Soccer League, LLC v. U.S. Soccer Fed'n, Inc., 883 F.3d 32, 41 (2d Cir. 2018)* ("Regulation of league sports is a textbook example of when the rule of reason applies.").

HN7[] To determine whether a restraint violates the rule of reason, courts apply a three-step, burden-shifting framework. *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)*. The plaintiff bears the initial burden to show that the challenged restraint **[**9]** has a substantial anticompetitive effect that harms consumers in the relevant market. *Id.* If the plaintiff carries this burden, then the burden shifts to the defendant to show a procompetitive rationale for the restraint. *Id.* If the defendant makes that showing, then the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means. *Id.*

i. Anticompetitive Effect

HN8[] A plaintiff must establish three elements to meet its initial burden: "(1) the existence of a contract, combination, or conspiracy among two or more separate entities that (2) unreasonably restrains trade and (3) affects interstate or foreign commerce." *Jack Russell Terrier, 407 F.3d at 1033*.

At the TRO stage, this Court found that Plaintiff met her initial burden. ECF 47 at 6-11. In so finding, the Court rejected Defendant's arguments that the NWSL and its member teams are a single entity incapable of conspiring under *§ 1 of the Sherman Act* and that Plaintiff had not shown evidence of "concerted action" between separate entities sufficient to establish a conspiracy. *Id.*

[*1070] In her supplemental briefing on the preliminary injunction motion, Plaintiff provides additional evidence further supporting the **[**10]** Court's conclusion that the NWSL and its member teams are not a single entity for the purposes of a *§ 1* claim. ECF 50 at 4-7. Specifically, Defendant points to provisions of the Operating Agreement attached to the NWSL's LLC Agreement which demonstrate ways in which the NWSL and its member teams function as separate economic entities competing for player rights:

• Each Team Operator is required to deposit a "Collateral Deposit" amount in cash into a Collateral Account, in order to ensure each and every team operator meets its financial obligations. ECF 55 at 169-70.

• Each Team Operator has the exclusive right to operate a team in its Home Territory. *Id.* at 168.

• Each Team Operator's accounting and operational records, annual budget, and business and marketing plan are kept confidential from other Team Operators and parties. *Id.* at 168-69.

• Each Team Operator is authorized to (i) license Local Broadcast Rights and sell Local Commercial Affiliations, (ii) sell tickets to home games, (iii) market and sell NWSL-sponsored, local promotional programs, (iv) sell and collect revenues generated by stadium concessions, parking, and other revenue-providing sources under the Stadium Lease, (v) sell **[**11]** team-branded merchandise in the Home Territory or via team website, and (vi) manage, promote, and sell and take other actions in connection with team-branded soccer camps, clinics, training, and academy and local soccer club affiliations. *Id.* at 170.

• Each Team Operator is also authorized to negotiate agreements with players, conduct all local marketing within the Home Territory, and take other such actions on behalf of NWSL as NWSL shall expressly authorize. *Id.*

• Each Team Operator hires its own general manager or executive in charge of soccer operations for the Team, head coach and assistant coaches, and local office staff and other personnel to carry out its obligations under the form Operating Agreement. *Id.* at 171.

• Each Team Operator selects players for the team from NWSL's pool of eligible players pursuant to the rules and procedures established by the NWSL. *Id.* at 171.

• The Team Operator is entitled to, upon the prior written consent of the NWSL, trade players to other NWSL teams pursuant to rules and procedures established by NWSL. *Id.*

• Each Team Operator must carry its own insurance. *Id.*

• Each Team Operator executes its own Stadium Lease and pays all rent, expenses, and any **[**12]** other fees, penalties, and interest under the lease. *Id.* at 172.

• The Team Operator is required to provide uniforms and certain types of equipment. *Id.* at 173.

• Each Team Operator is required to pay all travel expenses associated with players and team staff. *Id.* at 175-76.

• Each Team Operator is required to pay for players' per-diem expenses and any ticket deductions. *Id.*

This additional evidence bolsters this Court's prior finding that the NWSL and **[*1071]** its member teams are not a single entity under § 1 of the Sherman Act despite the League's legal classification as one LLC.

In its response brief addressing the instant motion, Defendant again argues that the Age Rule does not constitute concerted action between the NWSL and its member teams because the NWSL unilaterally created the rule before any member teams existed and the member teams merely accepted the Age Rule. ECF 62 at 10-15. Defendant relies on *Toscano v. Prof'l Golfers' Ass'n, 258 F.3d 978 (9th Cir. 2001)*. In *Toscano*, the Ninth Circuit found that no concerted action had been shown between the PGA Tour and "local sponsors" who organized the tournament events because the local sponsors "merely accepted the PGA Tour's rules and regulations and played no role in creating or enforcing them." *Toscano, 258 F.3d at 983*. Unlike *Toscano*, the **[**13]** member teams here play a central role in enforcing the Age Rule. No athlete can play in the League unless one of the member teams chooses her through one of the League's player allocation methods. Further, while there was no evidence in *Toscano* that the "sponsors [had] an economic interest in the eligibility and participation rules challenged," the member teams here are direct competitors in the market for players that the Age Rule restricts. *Toscano v. PGA Tour, Inc., 70 F.*

Supp. 2d 1109, 1117 n. 10 (E.D. Cal. 1999), *aff'd sub nom.* Toscano v. Professional Golfers Ass'n, 258 F.3d 978 (9th Cir. 2001).[4]

The member teams' agreement to enforce the Age Rule is evidenced by the fact that they each must annually reaffirm in Rules Compliance Affidavits that they are not aware of any violation of "NWSL rules related to . . . any aspect of the NWSL competition." ECF 63-1 at 2. Further, each member team has also signed the NWSL Team Operating Agreement. ECF 67 at 4. The Operating Agreement states that the members' operation of a team in the League is "[s]ubject to the provisions of this Agreement and the Operating Rules" and that the member teams "shall (i) abide by the Operating Rules; [and] (ii) enforce all Operating Rules concerning the designation and conduct of the Team Staff and Players assigned to the Team." **[**14]** ECF 55 at 963, 966. "Operating Rules" are defined as "such procedures, policies, standards, requirements, guidelines and rules of general application to all NWSL team operators as may be duly adopted or modified by NWSL and expressed to the team operators and in effect from time to time." *Id.* at 986. Both the Rules Compliance Affidavits and the Operating Agreement constitute affirmative agreements by the member teams to abide by and enforce the NWSL's rules, including its Age Rule.

Finally, although Defendant argues that Plaintiff "has not made any showing that the NWSL or its members took any action on the Age Rule after its LLC agreement was amended to join its member-operators," ECF 62 at 15, the record shows that the NWSL and its member teams have enforced the Age Rule by prohibiting otherwise eligible players from playing in the League until they turned 18, even when they already had a signed contract,[5] ECF 52 at ¶¶ 9-10. Moreover, the fact that five **[*1072]** of the NWSL's ten teams submitted discovery requests for Plaintiff's rights after this Court enjoined enforcement of the Age Rule further demonstrates that the teams had previously been enforcing its restriction. ECF 80 at ¶ 3.

In sum, **[**15]** Plaintiff has established concerted action between the NWSL and its member teams to enforce the Age Rule, restricting the market for players in which the member teams compete. Thus, this Court again finds that Plaintiff has satisfied the first step of her initial burden by showing "the existence of a contract, combination, or conspiracy among two or more separate entities." *See* Jack Russell Terrier, 407 F.3d at 1033.

Next, Defendant repeats its argument that Plaintiff cannot satisfy the second step of her initial burden because she has not established that the Age Rule "unreasonably restrains trade." ECF 62 at 15; *see also* Jack Russell Terrier, 407 F.3d at 1033. ***HN9***[] A plaintiff can show that an agreement unreasonably restrains trade either directly or indirectly. Ohio, 138 S. Ct. at 2284. "Direct evidence of anticompetitive effects would be proof of actual detrimental effects on competition, such as reduced output, increased prices, or decreased quality in the relevant market." *Id.* (internal quotation marks, citations and alterations omitted). "Indirect evidence would be proof of market power plus some evidence that the challenged restraint harms competition." *Id.* (citations omitted).

In its TRO, this Court found that as the only professional women's soccer league in the United States, **[**16]** the NWSL clearly has market power in the labor market for women professional soccer players. ECF 47 at 9. The Court then found that the Age Rule unreasonably harmed competition in the same way the NBA's "four years from high school" rule did in *Denver Rockets v. All-Pro Management, Inc., 325 F. Supp. 1049 (C.D. Cal. 1971) injunction reinstated by* Haywood v. Nat'l Basketball Ass'n, 401 U.S. 1204, 91 S. Ct. 672, 28 L. Ed. 2d 206 (1971). ECF 47 at 10-11.

Defendant now points to *Nat'l Hockey League Players' Ass'n v. Plymouth Whalers Hockey Club, 325 F.3d 712 (6th Cir. 2003)*, to argue that Plaintiff has shown that the Age Rule causes harm only to her personally rather than to competition in the market.[6] ECF 62 at 15-17. Defendant's argument is based on a flawed reading of *Plymouth*

---

[4] Defendant also argues that *Jack Russell Terrier* is "instructive." ECF 62 at 13-14. However, that case held that a national breed club and registry and its regional affiliates were incapable of conspiring because, among other things, the JRTCA and its regional affiliates were not alleged to be actual or even potential competitors in the relevant market. Jack Russell Terrier, 407 F.3d at 1035-36. Here, the member teams of the NWSL compete directly with each other for players' services.

[5] The NWSL discovery rule permits a player to be discovered at 17, but she cannot play until she is 18. ECF 52 at ¶ 10.

Whalers. While Defendant suggests that the *Plymouth Whalers* court's determination that there was no harm to competition stemmed from the fact that the plaintiff alleged injury only to himself, the court actually found that the plaintiff failed to define a relevant market and prove that market was being injured by the challenged policy. *Plymouth Whalers, 325 F.3d at 719-20*. The plaintiff there had defined the relevant market as competition among teams in two minor hockey leagues—the Ontario Hockey League (OHL) and Canadian Hockey League **[*1073]** (CHL)—for player services. *Id. at 714-15, 720*. The Sixth Circuit held that the plaintiff alleged insufficient injury to economic competition because the OHL, as an amateur league, limited the **[**17]** amount a player could be paid to schooling expenses and a limited stipend. *Id. at 715, 720*. Accordingly, "the market for player services in the OHL [wa]s not a market that involve[d] economic competition." *Id. at 720*. Additionally, the plaintiff's allegations focused on competition between leagues, rather than amongst teams in a league. Because the OHL and CHL were but two of many hockey leagues, the restriction on competition was minimal.

In contrast to *Plymouth Whalers*, the relevant market here for the services of professional women soccer players involves economic competition. As Plaintiff alleges in her complaint and notes in her briefing, the NWSL's member teams can use Allocation Money to attract and retain players by paying them more than would otherwise be permitted. ECF 1 at ¶ 29; ECF 65 at 11-12. The teams also compete with each other for players' rights through league mechanisms like the NWSL Draft, the discovery process, and the ability to trade players. ECF 1 at ¶ 29; ECF 65 at 11-12. Rather than alleging an impact on amateur athletic competition, Plaintiff alleges that the Age Rule adversely impacts economic competition among the ten professional teams of the NWSL, who all **[**18]** pay and compete economically for the services of prospective professional soccer players. ECF 1 at ¶¶ 29-30, 40-44; *see also* *Nat'l Hockey League Players Ass'n v. Plymouth Whalers Hockey Club, 419 F.3d 462, 474 (6th Cir. 2005)* (distinguishing between arguments regarding non-economic harm to "quality" of athletic competition and limitations placed on the competition for "players' services" which make that economic market "less competitive").

Defendant also argues that Plaintiff has not shown that the Age Rule impacts competition in the market. ECF 62 at 17. This argument is undermined by the fact that half of the teams in the NWSL put in discovery requests for Plaintiff's rights within days of this Court enjoining the enforcement of the Age Rule. Once the teams were no longer allowed to enforce their anticompetitive agreement, they immediately sought to compete for Plaintiff's services. Accordingly, this Court again finds that Plaintiff has satisfied the second step of her initial burden by showing that the Age Rule unreasonably restrains trade.

Defendant does not contest the Court's prior determination that Plaintiff satisfied the third step of her initial burden by showing that the Age Rule "affects interstate commerce." ECF 47 at 11. Thus, this Court concludes that Plaintiff has made **[**19]** a sufficient showing of all three elements to satisfy her initial burden under the rule of reason.

ii. Procompetitive Rationales

Because Plaintiff has met her initial burden, the burden shifts to Defendant to show a procompetitive rationale for the Age Rule's restraint. *Ohio, 138 S. Ct. at 2284*. The antitrust laws are concerned with competition. ***HN10***[] Accordingly, "[j]ustifications offered under the rule of reason may be considered only to the extent that they tend to show that, on balance, 'the challenged restraint enhances competition.'" *Law v. NCAA, 134 F.3d 1010, 1021 (10th Cir. 1998)* (quoting *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. 85, 104, 104 S.*

---

[6] At the preliminary injunction hearing, counsel for Defendant for the first time argued that this Court could not find that the Age Rule unreasonably restrained trade absent expert testimony from a PhD economist. When asked for authority to support this position, counsel pointed the Court to *United States v. Am. Express Co., 838 F.3d 179 (2d Cir. 2016)* and *Major League Baseball Properties, Inc. v. Salvino, Inc., 542 F.3d 290 (2d Cir. 2008)*. To start, counsel should not be raising unbriefed arguments for the first time at oral argument. Regardless, the cited cases do not support counsel's position. Neither *Am. Express Co.* nor *Salvino* stand for the proposition that testimony from economists is always required to prove an unreasonable restraint on a relevant market. The relevant market here, the competition for services of professional women soccer players, is controlled by a monopsony, the NWSL. It does not require a PhD in economics to see how an anticompetitive rule promulgated by a monopsony controlling an entire market has market-wide impact.

Ct. 2948, 82 L. Ed. 2d 70 (1984)). Procompetitive benefits are those that improve or broaden competitive choices and include increasing output, creating operating efficiencies, making a new product available, enhancing product or **[*1074]** service quality, and widening consumer choice. *Id. at 1023*; *see also* *In re Nat'l Collegiate Athletic Ass'n Athletic Grant-in-Aid Cap Antitrust Litig., 958 F.3d 1239, 1257 (9th Cir. 2020)* (citing *O'Bannon v. Nat'l Collegiate Athletic Ass'n ("O'Bannon II"), 802 F.3d 1049, 1072 (9th Cir. 2015)*); *Bd. of Regents, 468 U.S. at 102* (expanding consumer choice is procompetitive). Cost-cutting, promoting social or ethical values, public policy, and public safety are not considered procompetitive benefits. *Law, 134 F.3d at 1022-23*; *F.T.C. v. Superior Ct. Trial. Laws. Assn., 493 U.S. 411, 423-24, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)*; *F.T.C. v. Ind. Fed'n of Dentists, 476 U.S. 447, 462-64, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*; *Bd. of Regents, 468 U.S. at 117*; *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 695-96, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*.

At the TRO stage, this Court found that Defendant failed to show a procompetitive rationale for the Age Rule's restraint on the market. ECF 47 at 11-12. Defendant had offered justifications for the Age Rule which focused on **[**20]** cost reduction without explaining how its proffered rationales improve or broaden competitive choices in any way. *Id.* In its preliminary injunction briefing supported by a new declaration from the NWSL's general counsel, Defendant again focuses on cost-cutting as the rationale behind the Age Rule. ECF 62 at 17-20; ECF 63 at ¶ 8. Defendant argues that by limiting employment to players who have reached the legal age of majority, the NWSL avoids expending the "significant time and resources" that would be required to comply with laws aimed at protection of minors. ECF 62 at 18.

Defendant claims that the Age Rule is designed to create "operating efficiencies" but fails to demonstrate how the rule increases efficiency. *Id.* Defendant does not attempt to quantify the costs of having a minor on a team nor identify whether such costs would be borne by the NWSL or the team that decides to hire the minor. Instead, Defendant speculates that allowing minors to play "could further increase administrative costs" which "could lead to reduced output." ECF 63 at ¶ 8. This Court finds that Defendant's justifications for the Age Rule are not only speculative, but they also do not show that the Age Rule **[**21]** enhances competition. Accordingly, this Court concludes that Defendant has failed to meet its burden of demonstrating a procompetitive rationale for the Age Rule and Plaintiff has shown that the law and facts clearly favor her position that it violates *§ 1 of the Sherman Act*.

b. The Non-statutory Labor Exemption

Defendant also repeats its previously rejected argument that the Age Rule falls under the non-statutory labor exemption to the antitrust laws. ECF 62 at 22-26. ***HN11***[] The Supreme Court has recognized "that a proper accommodation between the congressional policy favoring collective bargaining under the [National Labor Relations Act] and the congressional policy favoring free competition in business markets requires that some union-employer agreements be accorded a limited nonstatutory exemption from antitrust sanctions." *Connell Constr. Co. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 622, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)* (citing *Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*). The Court has explained that the purpose behind the exemption is to effectuate the intent of Congress to prevent "judicial use of ***antitrust law*** to resolve labor disputes." *Brown v. Pro Football, Inc., 518 U.S. 231, 236, 116 S. Ct. 2116, 135 L. Ed. 2d 521 (1996)*.

[*1075] ***HN12***[] In the context of professional sports leagues, courts have consistently held that rules created through or incorporated by collective bargaining agreements between leagues and their respective players unions **[**22]** are immune from scrutiny under *§ 1 of the Sherman Act*. *See* *Wood v. National Basketball Asso., 809 F.2d 954, 963 (2d Cir. 1987)*; *Nat'l Hockey League Players Ass'n v. Plymouth Whalers Hockey Club, 419 F.3d 462, 474-75 (6th Cir. 2005)*; *Clarett v. Nat'l Football League, 369 F.3d 124, 142-43 (2d Cir. 2004)*. The NWSL and the NWSL PA have never entered into a collective bargaining agreement.

In its TRO, this Court rejected Defendant's argument that the Age Rule became immunized from antitrust scrutiny once Defendant recognized the NWSL PA as an exclusive bargaining agent and began the collective bargaining process. ECF 47 at 12-15. First, the Court found that Defendant had not identified a single case where the non-statutory labor exemption applied to a regulation created before the recognition of a union, and which had not been subsequently included or implicitly incorporated into a collective bargaining agreement. *Id.* This Court reasoned that extending the non-statutory exemption as Defendant urged would mean that employers could fully insulate themselves from antitrust scrutiny by simply recognizing a union and commencing the (often years-long) collective bargaining process. *Id.* Second, this Court found that nothing about the injunction Plaintiff seeks would interfere with the NWSL PA's ability to collectively bargain over the terms or conditions of employment with Defendant. *Id.* Plaintiff acknowledges in her complaint that an injunction prohibiting **[**23]** Defendant from enforcing its current Age Rule against Plaintiff in no way prevents the NWSL PA and Defendant from including a new age rule into a collective bargaining agreement, at which point it could be lawfully enforced against Plaintiff. *See* ECF 1 at ¶ 3, 12-13 (requesting injunctive relief preventing Age Rule enforcement "unless and until such Age Rule is contained in a fully effective collective bargaining agreement that would apply to her, as permitted by law").

At the preliminary injunction hearing, this Court asked Defendant's counsel for his best case supporting the notion that the non-statutory labor exemption can apply to a regulation created before the recognition of a union which had not been subsequently included or implicitly incorporated into a collective bargaining agreement. Counsel referred the Court to *Brown v. Pro Football, Inc., 518 U.S. 231, 116 S. Ct. 2116, 135 L. Ed. 2d 521 (1996)* and *Zimmerman v. Nat'l Football League, 632 F. Supp. 398 (D.D.C. 1986)*. Neither case helps Defendant. Both *Zimmerman* and *Brown* were cases where a collective bargaining agreement had previously been reached between the relevant employers and unions. ***HN13***[] Further, *Brown* stands for the proposition that "to give effect to federal labor laws and policies and to allow meaningful collective bargaining to take place, some restraints on competition **[**24]** imposed *through the bargaining process* must be shielded from antitrust sanctions." *518 U.S. at 237* (emphasis added). There, after the expiration of a collective bargaining agreement between football club owners and a players' union, the parties bargained for a new agreement until they reached impasse. *Id. at 234-35*. The owners then agreed among themselves, but not with the union, to implement the terms of their own last best bargaining offer. *Id.* The Supreme Court found that the non-statutory exemption applied because "impasse and an accompanying implementation of proposals constitute an integral part of the bargaining process," and therefore the challenged policy that the owners implemented "grew out of, and was directly related to, the **[*1076]** lawful operation of the bargaining process." *Id. at 239, 250*.

Unlike *Brown*, where the challenged policy was imposed during the collective bargaining process itself via a recognized labor negotiation tactic, the Age Rule was created years before the NWSL's recognition of the NWSL PA and the commencement of collective bargaining. As Plaintiff recognizes, her requested relief may be displaced by any contrary collective bargaining agreement term. ECF 1 at 12. Thus, this Court enjoining the Age Rule's **[**25]** enforcement does not interfere with the NWSL and the NWSL PA's ability to meaningfully collectively bargain. *See id. at 250* ("Our holding is not intended to insulate from antitrust review every joint imposition of terms by employers, for an agreement among employers could be sufficiently distant in time and in circumstances from the collective-bargaining process that a rule permitting antitrust intervention would not significantly interfere with that process.").

Similarly, in *Zimmerman*, the court held that the non-statutory exemption applied to shield a supplemental draft mechanism from antitrust scrutiny where the NFL and the NFLPA specifically negotiated and agreed to the terms of the draft itself. *632 F. Supp. at 406*. Here, it is undisputed that the neither the Age Rule nor any of the NWSL's current rules have been negotiated with and agreed to by the NWSL PA. Thus, Defendant's cases are inapposite.

Defendant also repeats its previously rejected argument that the "Voluntary Recognition Agreement" ("VRA") between the NWSL and the NWSL PA places the Age Rule beyond antitrust scrutiny. ECF 62 at 23-25; *see also* ECF 38-3 at 1-3. As noted in the TRO, that agreement reflects that it is not the result of collective **[**26]** bargaining negotiations, which had not yet begun in November 2018. ***HN14***[] The mere existence of an agreement outlining the process through which collective bargaining might begin in the future does not insulate the Age Rule from *§ 1* scrutiny.

Defendant insists that the VRA implicates the non-statutory exemption because under its terms and the *National Labor Relations Act ("NLRA")*, it may no longer make any unilateral changes to the League's status quo with respect to terms and conditions of employment without negotiating with the NWSL PA. ECF 62 at 24-25. Defendant has provided no evidence or legal authority demonstrating that the Age Rule is a term or condition of employment which must be negotiated under the VRA or the NLRA before it can make unilateral changes. First, this Court doubts whether the Age Rule is a term or condition of employment subject to any obligation to bargain that the NLRA imposes on Defendant. *See, e.g., Star Trib., 295 NLRB 543, 546 (1989)* (pre-employment requirements imposed by management on non-employee applicants are "not encompassed within the statutory duty to bargain about terms and conditions of employment of the employer's employees in an appropriate unit"). Second, the plain language in the VRA does not impose any obligations on Defendant **[**27]** before making unilateral changes to the NWSL's rules. The VRA provides that during the pre-bargaining period, the NWSL reserves the unilateral right to make changes to the terms and conditions of employment. ECF 38-3 at 3 (requiring the League to give "notice of any unilateral material changes" to terms and consider input but stating that "NWSL's ability to implement such changes" will not be delayed or limited). After the expiration of the pre-bargaining period, the VRA provides that Defendant's ability to make changes to the terms and conditions of employment is limited solely by any relevant provisions of the NLRA. **[*1077]** *Id.* Defendant does not identify any NLRA provisions which would prevent it from making changes to the Age Rule. Finally, Defendant has cited no cases finding that a voluntary recognition agreement between an employer and a union on its own brings all of the employer's preexisting rules under the umbrella of the non-statutory labor exemption.

Thus, this Court again finds that the non-statutory labor exemption does not apply to this case.

2. Irreparable Harm

HN15[] To obtain a preliminary injunction, Plaintiff must also "demonstrate that irreparable injury is likely in the absence **[**28]** of an injunction." *Winter, 555 U.S. at 22* (emphasis omitted). In its TRO, this Court found that Plaintiff had shown that she has the requisite skills and is ready to play professional soccer, that the Age Rule is impeding her development as a soccer player in an irreversible manner, that the career of a professional soccer player is short, and that there are no substitutes to actual professional competition to help her realize her full potential. ECF 47 at 16-17.

Defendant challenges the Court's irreparable harm finding by arguing that because no player on the U.S. Women's National Team ever played in the NWSL as a minor, "there is no evidence that employment with the NWSL before the age of 18 is necessary for a soccer player to excel in the sport or to compete on a national team." ECF 62 at 20-21. This argument misses the mark. Plaintiff does not contend that playing in the NWSL as a minor is necessary to achieve her goal of playing on the National Team. Rather, she asserts that the Age Rule interferes with that goal by requiring her to wait several years before she can play professional soccer. Defendant's argument that Plaintiff is not harmed by the barrier it creates because the women who came before **[**29]** her were also subjected to the barrier is nonsensical.

Thus, this Court again finds that Plaintiff has shown that she will suffer irreparable injury in the absence of an injunction.

3. The Balance of the Equities and the Public Interest

In its TRO, this Court found that the threat of irreparable injury to Plaintiff was not counterbalanced by any cognizable harm to Defendant from a temporary injunction, and that the public interest weighed in favor of granting the requested injunction. ECF 47 at 17-18. Specifically, the Court found that Defendant provided insufficient evidence of the hardships it would allegedly suffer in the face of an injunction, and that enjoining the Age Rule serves the public interest because it both preserves free and open competition and promotes gender equity. *Id.* The Court noted that the NWSL's comparable men's league in the United States, MLS, has no age limit and employs players under 18. ECF 47 at 18 (citing ECF 1 at ¶ 4). As of the date Plaintiff's Complaint was filed, more than half of MLS teams allegedly had one or more players on their roster under the age of 18. ECF 1 at ¶ 4. In other words, the only thing currently standing between Plaintiff and her aspiration **[**30]** to be a professional soccer player in this country is her gender.

Defendant did not challenge this Court's findings on the balance of the equities or the public interest. Accordingly, this Court finds Plaintiff has satisfied these elements of the preliminary injunction analysis.

By satisfying all four of the elements outlined above, Plaintiff has met her burden of establishing that a preliminary injunction is appropriate in this case until a trial on the merits can be held. Accordingly, Plaintiff's Motion for Preliminary Injunction, ECF 2, is GRANTED as follows:

[*1078] PRELIMINARY INJUNCTION

1. Defendant and its members, officers, agents, servants, employees, attorneys, teams, and all persons in active concert or participation with them are enjoined from enforcing the Age Rule against Plaintiff, unless and until such Age Rule is contained in a fully effective collective bargaining agreement that would apply to her, as permitted by law.

IT IS SO ORDERED.

DATED this 17th day of June 2021.

restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN2[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Most restraints challenged under the Sherman Act—including most joint venture restrictions—are subject to the rule of reason, which the United States Supreme Court has described as a fact-specific assessment of market power and market structure aimed at assessing the challenged restraint's actual effect on competition—especially its capacity to reduce output and increase price.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN3[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

For purposes of the Sherman Act, the United States Supreme Court has suggested that sometimes it can determine the competitive effects of a challenged restraint in the twinkling of an eye. That is true, though, only for restraints at opposite ends of the competitive spectrum. For those sorts of restraints—rather than restraints in the great in-between—a quick look is sufficient for approval or condemnation.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN4[] **Per Se Rule & Rule of Reason, Per Se Violations**

For purposes of the Sherman Act, at one end of the competitive spectrum, some restraints may be so obviously incapable of harming competition that they require little scrutiny. If the exercise of market power is not plausible, the challenged practice is legal. Unless firms have the power to raise price by curtailing output, their agreement is unlikely to harm consumers, and it makes sense to understand their cooperation as benign or beneficial. At the other end of the competitive spectrum, some agreements among competitors so obviously threaten to reduce output and raise prices that they might be condemned as unlawful per se or rejected after only a quick look. Recognizing the inherent limits on a court's ability to master an entire industry—and aware that there are often hard-to-see efficiencies attendant to complex business arrangements—the United States Supreme Court takes special care not to deploy these condemnatory tools until the Court has amassed considerable experience with the type of restraint at issue and can predict with confidence that it would be invalidated in all or almost all instances.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN5[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

For purposes of the Sherman Act, that some restraints are necessary to create or maintain a league sport does not mean all aspects of elaborate interleague cooperation are. While a quick look will often be enough to approve the restraints necessary to produce a game, a fuller review may be appropriate for others.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN6[] **Per Se Rule & Rule of Reason, Sherman Act**

Whether an antitrust violation exists necessarily depends on a careful analysis of market realities. If those market realities change, so may the legal analysis.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN7[] **Private Actions, Sherman Act**

The statutory policy of the Sherman Act is one of competition and it precludes inquiry into the question whether competition is good or bad.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN8[] **Scope, Exemptions**

The orderly way to temper the Sherman Act's policy of competition is by legislation and not by court decision. A party is free to argue that, because of the special characteristics of its particular industry, it should be exempt from the usual operation of the antitrust laws—but that appeal is properly addressed to Congress. Nor has Congress been insensitive to such requests. It has modified the antitrust laws for certain industries in the past, and it may do so again in the future. But until Congress says otherwise, the only law it has asked courts to enforce is the Sherman Act, and that law is predicated on one assumption alone—competition is the best method of allocating resources in the Nation's economy.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Evidence > Burdens of Proof > Burden Shifting

HN9[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

When describing the rule of reason, the United States Supreme Court has sometimes spoken of a three-step, burden-shifting framework as a means for distinguishing between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest. The plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect. Should the plaintiff carry that burden, the burden then shifts to the defendant to show a procompetitive rationale for the restraint. If the defendant can make that showing, the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means. These three steps do not represent a rote checklist, nor may they be employed as an inflexible substitute for careful analysis. What is required to assess whether a challenged restraint harms competition can vary depending on the circumstances.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

The whole point of the rule of reason is to furnish an enquiry meet for the case, looking to the circumstances, details, and logic of a restraint to ensure that it unduly harms competition before a court declares it unlawful. The factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN11[] **Per Se Rule & Rule of Reason, Sherman Act**

Antitrust law does not require businesses to use anything like the least restrictive means of achieving legitimate business purposes. To the contrary, courts should not second-guess degrees of reasonable necessity so that the lawfulness of conduct turns upon judgments of degrees of efficiency.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN12[] **Sherman Act, Claims**

Rules that seek to embody every economic complexity and qualification may well, through the vagaries of administration, prove counter-productive, undercutting the very economic ends they seek to serve. After all, even under the best of circumstances, applying the antitrust laws can be difficult—and mistaken condemnations of legitimate business arrangements are especially costly, because they chill the very procompetitive conduct the antitrust laws are designed to protect. Indeed, static judicial decrees in ever-evolving markets may themselves facilitate collusion or frustrate entry and competition. To know that the Sherman Act prohibits only unreasonable restraints of trade is thus to know that attempts to meter small deviations is not an appropriate antitrust function.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN13[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

However framed and at whichever step, anticompetitive restraints of trade may wind up flunking the rule of reason to the extent the evidence shows that substantially less restrictive means exist to achieve any proven procompetitive benefits. To be sure, the two questions can be collapsed into one, since a legitimate objective that is not promoted by the challenged restraint can be equally served by simply abandoning the restraint, which is surely a less restrictive alternative.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN14[] **Sherman Act, Claims**

Firms deserve substantial latitude to fashion agreements that serve legitimate business interests—agreements that may include efforts aimed at introducing a new product into the marketplace. But none of that means a party can relabel a restraint as a product feature and declare it immune from Sherman Act §1, 15 U.S.C.S. § 1, scrutiny. In any suit, the district court has to determine whether the defendants' agreements harmed competition and whether any procompetitive benefits associated with their restraints could be achieved by substantially less restrictive alternative means.

Antitrust & Trade Law > Sherman Act > Scope

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN15[] **Antitrust & Trade Law, Sherman Act**

Antitrust courts must give wide berth to business judgments before finding liability. Judges must be sensitive to the possibility that the continuing supervision of a highly detailed decree could wind up impairing rather than enhancing competition. Costs associated with ensuring compliance with judicial decrees may exceed efficiencies gained; the decrees themselves may unintentionally suppress procompetitive innovation and even facilitate collusion. Judges must be wary, too, of the temptation to specify the proper price, quantity, and other terms of dealing—cognizant that they are neither economic nor industry experts. Judges must be open to reconsideration and modification of decrees in light of changing market realities, for what they see may vary over time. And throughout courts must have a healthy respect for the practical limits of judicial administration: An antitrust court is unlikely to be an effective day-to-day enforcer of a detailed decree, able to keep pace with changing market dynamics alongside a busy docket. Nor should any court impose a duty that it cannot explain or adequately and reasonably supervise. In short, judges make for poor central planners and should never aspire to the role.

Antitrust & Trade Law > Sherman Act > Remedies

Governments > Courts > Authority to Adjudicate

HN16[] **Sherman Act, Remedies**

When it comes to fashioning an antitrust remedy, caution is key. Judges must resist the temptation to require that enterprises employ the least restrictive means of achieving their legitimate business objectives. Judges must be mindful, too, of their limitations—as generalists, as lawyers, and as outsiders trying to understand intricate business relationships. Judges must remain aware that markets are often more effective than the heavy hand of judicial power when it comes to enhancing consumer welfare. And judges must be open to clarifying and reconsidering their decrees in light of changing market realities. Courts reviewing complex business arrangements should, in other words, be wary about invitations to set sail on a sea of doubt.

Lawyers' Edition Display

Decision

[314]** District court properly applied rule of reason analysis in finding that National Collegiate Athletic Association violated Sherman Act, 15 U.S.C.S. § 1, by limiting education-related benefits schools could offer student-athletes; restraints were found to be stricter than necessary to achieve demonstrated procompetitive benefits.

Summary

Overview: HOLDINGS: [1]-The district court did not err in finding that the National Collegiate Athletic Association (NCAA) violated the Sherman Act, 15 U.S.C.S. § 1, by limiting the education-related benefits schools could offer student-athletes, such as rules limiting scholarships for graduate or vocational school, payments for academic tutoring, or paid posteligibility internships. The district court properly applied a rule of reason analysis and nowhere required the NCAA to show that its compensation rules constituted the least restrictive means of preserving consumer demand, and it was only after finding that the restraints were stricter than necessary to achieve demonstrated procompetitive benefits that the district court declared a violation of the Sherman Act.

Outcome: Judgment affirmed. Unanimous decision; 1 concurrence.

Nor should any court impose a duty that it cannot explain or adequately and reasonably supervise. In short, judges make for poor central planners and should never aspire to the role.

Restraints of Trade, Monopolies, and Unfair Trade Practices § 74 > ANTITRUST REMEDY -- LIMITS > Headnote:
LEdHN16.[] 16.

When it comes to fashioning an antitrust remedy, caution is key. Judges must resist the temptation to require that enterprises employ the least restrictive means of achieving their legitimate business objectives. Judges must be mindful, too, of their limitations—as generalists, as lawyers, and as outsiders trying to understand intricate business relationships. Judges must remain aware that markets are often more effective than the heavy hand of judicial power when it comes to enhancing consumer welfare. And judges must be open to clarifying and reconsidering their decrees in light of changing market realities. Courts reviewing complex business arrangements should, in other words, be wary about invitations to set sail on a sea of doubt.

Syllabus

[319]** Colleges and universities across the country have leveraged sports to bring in revenue, attract attention, boost enrollment, and raise money from alumni. That profitable enterprise relies on “amateur” student-athletes who compete under horizontal restraints that restrict how the schools may compensate them for their play. The National Collegiate Athletic Association (NCAA) issues and enforces these rules, which restrict compensation for student-athletes in various ways. These rules depress compensation for at least some student-athletes below what a competitive market would yield.

Against this backdrop, current and former student-athletes brought this antitrust lawsuit challenging the NCAA's restrictions on compensation. Specifically, they alleged that the NCAA's rules violate *§ 1 of the Sherman Act*, which prohibits “contract[s], combination[s], or conspirac[ies] in restraint of trade or commerce.” *15 U. S. C. § 1*. Key facts were undisputed: The NCAA and its members have agreed to compensation limits for student-athletes; the NCAA enforces these limits on its member-schools; and these compensation limits affect interstate commerce. **[***2]** Following a bench trial, the district court issued a 50-page opinion that refused to disturb the NCAA's rules limiting undergraduate athletic scholarships and other compensation related to athletic performance. At the same time, the court found unlawful and thus enjoined certain NCAA rules limiting the education-related benefits schools may make available to student-athletes. Both sides appealed. The Ninth Circuit affirmed in full, holding that the district court “struck the right balance in crafting a remedy that both prevents anticompetitive harm to Student-Athletes while serving the procompetitive purpose of preserving the popularity of college sports.” *958 F. 3d 1239, 1263*. Unsatisfied with that result, the NCAA asks the Court to find that all of its existing restraints on athlete compensation survive antitrust scrutiny. The student-athletes have not renewed their across-the-board challenge and the Court thus does not consider the **[**320]** rules that remain in place. The Court considers only the subset of NCAA rules restricting education-related benefits that the district court enjoined. The Court does so based on the uncontested premise that the NCAA enjoys monopsony control in the relevant market—such that **[***3]** it is capable of depressing wages below competitive levels for student-athletes and thereby restricting the quantity of student-athlete labor.

Held: The district court's injunction is consistent with established antitrust principles. Pp. ___ - ___, 210 L. Ed. 2d, at ___ - ___.

(a) The courts below properly subjected the NCAA's compensation restrictions to antitrust scrutiny under a "rule of reason" analysis. In the Sherman Act, Congress tasked courts with enforcing an antitrust policy of competition on the theory that market forces "yield the best allocation" of the Nation's resources. *National Collegiate Athletic Assn. v. Board of Regents of Univ. of Okla., 468 U. S. 85, 104, n. 27, 104 S. Ct. 2948, 82 L. Ed. 2d 70*. The Sherman Act's prohibition on restraints of trade has long been understood to prohibit only restraints that are "undue." *Ohio v. American Express Co., 585 U. S. ___, ___, 138 S. Ct. 2274, 201 L. Ed. 2d 678*. Whether a particular restraint is undue "presumptively" turns on an application of a "rule of reason analysis." *Texaco, Inc. v. Dagher, 547 U. S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1*. That manner of analysis generally requires a court to "conduct a fact-specific assessment of market power and market structure" to assess a challenged restraint's "actual effect on competition." *American Express, 585 U. S., at ___, 138 S. Ct. 2274, 201 L. Ed. 2d 678*. *Pp. ___ - ___, 210 L. Ed. 2d, at ___ - ___*.

(1) The NCAA maintains the courts below should have analyzed its compensation restrictions under an extremely deferential standard because it is a joint venture among members who must collaborate **[***4]** to offer consumers the unique product of intercollegiate athletic competition. Even assuming the NCAA is a joint venture, though, it is a joint venture with monopoly power in the relevant market. Its restraints are appropriately subject to the ordinary rule of reason's fact-specific assessment of their effect on competition. *American Express, 585 U. S., at ___, 138 S. Ct. 2274, 201 L. Ed. 2d 678*. Circumstances sometimes allow a court to determine the anticompetitive effects of a challenged restraint (or lack thereof) under an abbreviated or "quick look." See *Dagher, 547 U. S., at 7, n. 3, 126 S. Ct. 1276, 164 L. Ed. 2d 1*; *Board of Regents, 468 U. S., at 109, n. 39, 104 S. Ct. 2948, 82 L. Ed. 2d 70*. But not here. *Pp. ___ - ___, 210 L. Ed. 2d, at ___ - ___*.

(2) The NCAA next contends that the Court's decision in *Board of Regents* expressly approved the NCAA's limits on student-athlete compensation. That is incorrect. The Court in *Board of Regents* did not analyze the lawfulness of the NCAA's restrictions on student-athlete compensation. Rather, that case involved an antitrust challenge to the NCAA's restraints on televising games—an antitrust challenge the Court sustained. Along the way, the Court commented on the NCAA's critical role in maintaining the revered tradition of amateurism in college sports as one "entirely **[**321]** consistent with the goals of the Sherman Act." *Id., at 120, 104 S. Ct. 2948, 82 L. Ed. 2d 70*. But that sort of passing comment on an issue not **[***5]** presented is not binding, nor is it dispositive here. *Pp. ___ - ___, 210 L. Ed. 2d, at ___ - ___*.

(3) The NCAA also submits that a rule of reason analysis is inappropriate because its member schools are not "commercial enterprises" but rather institutions that exist to further the societally important noncommercial objective of undergraduate education. This submission also fails. The Court has regularly refused these sorts of special dispensations from the Sherman Act. See *FTC v. Superior Court Trial Lawyers Assn., 493 U. S. 411, 424, 110 S. Ct. 768, 107 L. Ed. 2d 851*. The Court has also previously subjected the NCAA to the Sherman Act, and any argument that "the special characteristics of [the NCAA's] particular industry" should exempt it from the usual operation of the antitrust laws is "properly addressed to Congress." *National Soc. of Professional Engineers v. United States, 435 U. S. 679, 689, 98 S. Ct. 1355, 55 L. Ed. 2d 637*. *Pp. ___ - ___, 210 L. Ed. 2d, at ___ - ___*.

(b) The NCAA's remaining attacks on the district court's decision lack merit. *Pp. ___ - ___, 210 L. Ed. 2d, at ___ - ___*.

(1) The NCAA contends that the district court erroneously required it to prove that its rules are the least restrictive means of achieving the procompetitive purpose of preserving consumer demand for college sports. True, a least restrictive means test would be erroneous and overly intrusive. But the district court nowhere expressly or effectively required the NCAA to show that its rules met that standard. **[***6]** Rather, only after finding the NCAA's restraints "patently and inexplicably stricter than is necessary" did the district court find the restraints unlawful. Pp. ___ - ___, 210 L. Ed. 2d, at ___ - ___.

(2) The NCAA contends the district court should have deferred to its conception of amateurism instead of "impermissibly redefin[ing]" its "product." But a party cannot declare a restraint "immune from § 1 scrutiny" by relabeling it a product feature. *American Needle, Inc. v. National Football League, 560 U. S. 183, 199, n. 7, 130 S. Ct. 2201, 176 L. Ed. 2d 947*. Moreover, the district court found the NCAA had not even maintained a consistent definition of amateurism. Pp. ___ - ___, 210 L. Ed. 2d, at ___ - ___.

(3) The NCAA disagrees that it can achieve the same pro-competitive benefits using substantially less restrictive alternatives and claims the district court's injunction will "micromanage" its business. Judges must indeed be sensitive to the possibility that the "continuing supervision of a highly detailed decree" could wind up impairing rather than enhancing competition. *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U. S. 398, 415, 124 S. Ct. 872, 157 L. Ed. 2d 823*. The district court's injunction honored these principles, though. The court enjoined only certain restraints—and only after finding both that relaxing these restrictions would not blur the distinction between college and professional sports and thus impair demand, and further that this **[***7]** course represented a significantly (not marginally) less restrictive means of achieving the same procompetitive **[**322]** benefits as the NCAA's current rules. Finally, the court's injunction preserves considerable leeway for the NCAA, while individual conferences remain free to impose whatever rules they choose. To the extent the NCAA believes meaningful ambiguity exists about the scope of its authority, it may seek clarification from the district court. Pp. ___ - ___, 210 L. Ed. 2d, at ___ - ___.

958 F. 3d 1239, affirmed.

Counsel: Seth P. Waxman argued the cause for petitioners.

Jeffrey L. Kessler argued the cause for respondents.

Elizabeth B. Prelogar argued the cause for the United States, as amicus curiae, by special leave of court.

Judges: Gorsuch, J., delivered the opinion for a unanimous Court. Kavanaugh, J., filed a concurring opinion.

Opinion by: GORSUCH

Opinion

[*2147] JUSTICE **GORSUCH** delivered the opinion of the Court.

In the Sherman Act, Congress tasked courts with enforcing a policy of competition on the belief that market forces "yield the best allocation" of the Nation's resources. *National Collegiate Athletic Assn. v. Board of Regents of Univ. of Okla., 468 U. S. 85, 104, n. 27, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. The plaintiffs before us brought this lawsuit alleging that the National Collegiate Athletic Association (NCAA) and certain of its member institutions violated this policy by agreeing to restrict the compensation colleges and universities may offer the student-athletes who play for their teams. After amassing a vast record and conducting an exhaustive trial, the district court issued a 50-page opinion **[***8]** that cut both ways. The court refused to disturb the NCAA's rules limiting undergraduate athletic scholarships and other compensation related to athletic performance. At the same time, the court struck down NCAA rules limiting the education-related benefits schools may offer student-athletes—such as rules that prohibit schools from offering graduate or vocational school scholarships. Before us, the student-athletes do not challenge the district court's judgment. But the NCAA does. In essence, it seeks immunity from the normal operation of the antitrust laws and argues, in any event, that the district court should have approved all of its existing restraints. We took this case to consider those objections.

[*2148] I

A

From the start, American colleges and universities have had a complicated relationship with sports and money. In 1852, students from Harvard and Yale participated in what many regard as the Nation's first intercollegiate competition—a boat race at Lake Winnipesaukee, New Hampshire. But this was no pickup match. A railroad executive sponsored the event to promote train travel to the picturesque lake. T. Mendenhall, The Harvard-Yale Boat Race 1852-1924, pp. 15-16 (1993). He offered **[***9]** the competitors an all-expenses-paid vacation with lavish prizes—along with unlimited alcohol. See A. Zimbalist, Unpaid Professionals 6-7 (1999) (Zimbalist); Rushin, Inside the Moat, Sports Illustrated, Mar. 3, 1997. The event filled the resort with "life and excitement," N. Y. Herald, Aug. 10, 1852, p. 2, col. 2, and one student-athlete described the " 'junket' " as an experience " 'as unique and irreproducible as the Rhodian colossus,' " Mendenhall, Harvard-Yale Boat Race, at 20.

Life might be no "less than a boat race," Holmes, On Receiving the Degree **[**323]** of Doctor of Laws, Yale University Commencement, June 30, 1886, in Speeches by Oliver Wendell Holmes, p. 27 (1918), but it was football that really caused college sports to take off. "By the late 1880s the traditional rivalry between Princeton and Yale was attracting 40,000 spectators and generating in excess of $25,000 . . . in gate revenues." Zimbalist 7. Schools regularly had "graduate students and paid ringers" on their teams. *Ibid.*

Colleges offered all manner of compensation to talented athletes. Yale reportedly lured a tackle named James Hogan with free meals and tuition, a trip to Cuba, the exclusive right to sell scorecards from **[***10]** his games—and a job as a cigarette agent for the American Tobacco Company. *Ibid.*; see also Needham, The College Athlete, McClure's Magazine, June 1905, p. 124. The absence of academic residency requirements gave rise to " 'tramp athletes' " who "roamed the country making cameo athletic appearances, moving on whenever and wherever the money was better." F. Dealy, Win at Any Cost 71 (1990). One famous example was a law student at West Virginia University—Fielding H. Yost—"who, in 1896, transferred to Lafayette as a freshman just in time to lead his new teammates to victory against its arch-rival, Penn." *Ibid.* The next week, he "was back at West Virginia's law school." *Ibid.* College sports became such a big business that Woodrow Wilson, then President of Princeton University, quipped to alumni in 1890 that " 'Princeton is noted in this wide world for three things: football, baseball, and collegiate instruction.' " Zimbalist 7.

By 1905, though, a crisis emerged. While college football was hugely popular, it was extremely violent. Plays like the flying wedge and the players' light protective gear led to 7 football fatalities in 1893, 12 deaths the next year, and 18 in 1905. *Id.*, at 8. President **[***11]** Theodore Roosevelt responded by convening a meeting between Harvard, Princeton, and Yale to review the rules of the game, a gathering that ultimately led to the creation of what we now know as the NCAA. *Ibid.* Organized primarily as a standard-setting body, the association also expressed a view at its founding about compensating college athletes—admonishing that "[n]o student shall represent a College or University in any intercollegiate game or contest who is paid or receives, directly or indirectly, any money, or financial concession." Intercollegiate Athletic Association of the United States Constitution By-Laws, Art. VII, §3 (1906); see also Proceedings of the Eleventh Annual Convention of the National **[*2149]** Collegiate Athletic Association, Dec. 28, 1916, p. 34.

Reality did not always match aspiration. More than two decades later, the Carnegie Foundation produced a report on college athletics that found them still "sodden with the commercial and the material and the vested interests that these forces have created." H. Savage, The Carnegie Foundation for the Advancement of Teaching, American College Athletics Bull. 23, p. 310 (1929). Schools across the country sought to leverage sports **[***12]** to bring in revenue, attract attention, boost enrollment, and raise money from alumni. The University of California's athletic revenue was over $480,000, while Harvard's football revenue alone came in at $429,000. *Id*., at 87. College football was "not a student's game"; it was an "organized **[**324]** commercial enterprise" featuring athletes with "years of training," "professional coaches," and competitions that were "highly profitable." *Id*., at viii.

The commercialism extended to the market for student-athletes. Seeking the best players, many schools actively participated in a system "under which boys are offered pecuniary and other inducements to enter a particular college." *Id*., at xiv-xv. One coach estimated that a rival team "spent over $200,000 a year on players." Zimbalist 9. In 1939, freshmen at the University of Pittsburgh went on strike because upperclassmen were reportedly earning more money. Crabb, The Amateurism Myth: A Case for a New Tradition, *28 Stan. L. & Pol'y Rev. 181, 190 (2017)*. In the 1940s, Hugh McElhenny, a halfback at the University of Washington, "became known as the first college player 'ever to take a cut in salary to play pro football.' " Zimbalist 22-23. He reportedly said: " '[A] wealthy guy puts big bucks **[***13]** under my pillow every time I score a touchdown. Hell, I can't afford to graduate.' " *Id*., at 211, n. 17. In 1946, a commentator offered this view: "[W]hen it comes to chicanery, double-dealing, and general undercover work behind the scenes, big-time college football is in a class by itself." Woodward, Is College Football on the Level?, Sport, Nov. 1946, Vol. 1, No. 3, p. 35.

In 1948, the NCAA sought to do more than admonish. It adopted the "Sanity Code." Colleges Adopt the 'Sanity Code' To Govern Sports, N. Y. Times, Jan. 11, 1948, p. 1, col. 1. The code reiterated the NCAA's opposition to "promised pay in any form." Hearings before the Subcommittee on Oversight and Investigations of the House Committee on Interstate and Foreign Commerce, 95th Congress, 2d Sess., pt. 2, p. 1094 (1978). But for the first time the code also authorized colleges and universities to pay athletes' tuition. *Ibid.* And it created a new enforcement mechanism—providing for the "suspension or expulsion" of "proven offenders." Colleges Adopt 'Sanity Code,' N. Y. Times, p. 1, col. 1. To some, these changes sought to substitute a consistent, above-board compensation system for the varying under-the-table schemes that **[***14]** had long proliferated. To others, the code marked "the beginning of the NCAA behaving as an effective cartel," by enabling its member schools to set and enforce "rules that limit the price they have to pay for their inputs (mainly the 'student-athletes')." Zimbalist 10.

The rules regarding student-athlete compensation have evolved ever since. In 1956, the NCAA expanded the scope of allowable payments to include room, board, books, fees, and "cash for incidental expenses such as laundry." *In re National Collegiate Athletic Assn. Athletic Grant-in-Aid Cap Antitrust Litig., 375 F. Supp. 3d 1058, 1063 (ND Cal. 2019)* (hereinafter D. Ct. Op.). In 1974, the NCAA began permitting paid professionals in one sport to compete on an amateur basis in another. Brief for Historians as *Amici Curiae* 10. In **[*2150]** 2014, the NCAA "announced it would allow athletic conferences to authorize their member schools to increase scholarships up to the full cost of attendance." *O'Bannon v. National Collegiate Athletic Assn., 802 F. 3d 1049, 1054-1055 (CA9 2015)*. The 80 member schools of the "Power Five" athletic conferences—the conferences with the highest revenue in Division I—promptly voted to raise their scholarship **[**325]** limits to an amount that is generally several thousand dollars higher than previous limits. *D. Ct. Op., at 1064*.

In recent years, changes have continued. The NCAA has created the "Student Assistance Fund" and **[***15]** the "Academic Enhancement Fund" to "assist student-athletes in meeting financial needs," "improve their welfare or academic support," or "recognize academic achievement." *Id., at 1072*. These funds have supplied money to student-athletes for "postgraduate scholarships" and "school supplies," as well as "benefits that are not related to education," such as "loss-of-value insurance premiums," "travel expenses," "clothing," and "magazine subscriptions." *Id., at 1072, n. 15*. In 2018, the NCAA made more than $84 million available through the Student Activities Fund and more than $48 million available through the Academic Enhancement Fund. *Id., at 1072*. Assistance may be provided in cash or in kind, and there is no limit to the amount any particular student-athlete may receive. *Id., at 1073*. Since 2015, disbursements to individual students have sometimes been tens of thousands of dollars above the full cost of attendance. *Ibid.*

The NCAA has also allowed payments " 'incidental to athletics participation,' " including awards for "participation or achievement in athletics" (like "qualifying for a bowl game") and certain "payments from outside entities" (such as for "performance in the Olympics"). *Id., at 1064, 1071, 1074*. **[***16]** The NCAA permits its member schools to award up to (but no more than) two annual "Senior Scholar Awards" of $10,000 for students to attend graduate school after their athletic eligibility expires. *Id., at 1074*. Finally, the NCAA allows schools to fund travel for student-athletes' family members to attend "certain events." *Id., at 1069*.

Over the decades, the NCAA has become a sprawling enterprise. Its membership comprises about 1,100 colleges and universities, organized into three divisions. *Id., at 1063*. Division I teams are often the most popular and attract the most money and the most talented athletes. Currently, Division I includes roughly 350 schools divided across 32 conferences. See *ibid.* Within Division I, the most popular sports are basketball and football. The NCAA divides Division I football into the Football Bowl Subdivision (FBS) and the Football Championship Subdivision, with the FBS generally featuring the best teams. *Ibid.* The 32 conferences in Division I function similarly to the NCAA itself, but on a smaller scale. They "can and do enact their own rules." *Id., at 1090*.

At the center of this thicket of associations and rules sits a massive business. The NCAA's **[***17]** current broadcast contract for the March Madness basketball tournament is worth $1.1 billion annually. See *id., at 1077, n. 20*. Its television deal for the FBS conference's College Football Playoff is worth approximately $470 million per year. See *id., at 1063*; Bachman, ESPN Strikes Deal for College Football Playoff, Wall Street Journal, Nov. 21, 2012. Beyond these sums, the Division I conferences earn substantial revenue from regular-season games. For example, the Southeastern Conference (SEC) "made more than $409 million in revenues from television contracts alone in 2017, with its total conference revenues exceeding $650 million that **[*2151]** year." *D. Ct. Op., at 1063*. **[**326]** All these amounts have "increased consistently over the years." *Ibid.*

Those who run this enterprise profit in a different way than the student-athletes whose activities they oversee. The president of the NCAA earns nearly $4 million per year. Brief for Players Association of the National Football League et al. as *Amici Curiae* 17. Commissioners of the top conferences take home between $2 to $5 million. *Ibid.* College athletic directors average more than $1 million annually. *Ibid.* And annual salaries for top Division I college **[***18]** football coaches approach $11 million, with some of their assistants making more than $2.5 million. *Id*., at 17-18.

B

The plaintiffs are current and former student-athletes in men's Division I FBS football and men's and women's Division I basketball. They filed a class action against the NCAA and 11 Division I conferences (for simplicity's sake, we refer to the defendants collectively as the NCAA). The student-athletes challenged the "current, interconnected set of NCAA rules that limit the compensation they may receive in exchange for their athletic services." *D. Ct. Op., at 1062, 1065, n. 5*. Specifically, they alleged that the NCAA's rules violate *§ 1 of the Sherman Act*, which prohibits "contract[s], combination[s], or conspirac[ies] in restraint of trade or commerce." *15 U. S. C. § 1*.

After pretrial proceedings stretching years, the district court conducted a 10-day bench trial. It heard experts and lay witnesses from both sides, and received volumes of evidence and briefing, all before issuing an exhaustive decision. In the end, the court found the evidence undisputed on certain points. The NCAA did not "contest evidence showing" that it and its members have agreed to compensation limits on student-athletes; the NCAA **[***19]** and its conferences enforce these limits by punishing violations; and these limits "affect interstate commerce." *D. Ct. Op., at 1066*.

Based on these premises, the district court proceeded to assess the lawfulness of the NCAA's challenged restraints. ***HN1***[] ***LEdHN[1]***[] [1] This Court has "long recognized that in view of the common law and the law in this country when the *Sherman Act* was passed, the phrase 'restraint of trade' is best read to mean 'undue restraint.' " *Ohio v. American Express Co., 585 U. S. ___, ___, 138 S. Ct. 2274, 201 L. Ed. 2d 678, 689 (2018)* (brackets and some internal quotation marks omitted). Determining whether a restraint is undue for purposes of the Sherman Act "presumptively" calls for what we have described as a "rule of reason analysis." *Texaco Inc. v. Dagher, 547 U. S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*; *Standard Oil Co. of N. J. v. United States, 221 U. S. 1, 60-62, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. That manner of analysis generally requires a court to "conduct a fact-specific assessment of market power and market structure" to assess a challenged restraint's "actual effect on competition." *American Express, 585 U. S., at ___-___, 138 S. Ct. 2274, 201 L. Ed. 2d 678* (internal quotation marks omitted). Always, "[t]he goal is to distinguish between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest." *Ibid.*(brackets and internal quotation marks omitted).

[327]** In applying the rule of reason, the district **[***20]** court began by observing that the NCAA enjoys "near complete dominance of, and exercise[s] monopsony power in, the relevant market"—which it defined as the market for "athletic services in men's and women's Division I basketball and **[*2152]** FBS football, wherein each class member participates in his or her sport-specific market." *D. Ct. Op., at 1097*. The "most talented athletes are concentrated" in the "markets for Division I basketball and FBS football." *Id., at 1067*. There are no "viable substitutes," as the "NCAA's Division I essentially *is* the relevant market for elite college football and basketball." *Id., at 1067, 1070*. In short, the NCAA and its member schools have the "power to restrain student-athlete compensation in any way and at any time they wish, without any meaningful risk of diminishing their market dominance." *Id., at 1070*.

The district court then proceeded to find that the NCAA's compensation limits "produce significant anticompetitive effects in the relevant market." *Id., at 1067*. Though member schools compete fiercely in recruiting student-athletes, the NCAA uses its monopsony power to "cap artificially the compensation offered to recruits." *Id., at 1097*. In a market without the challenged restraints, **[***21]** the district court found, "competition among schools would increase in terms of the compensation they would offer to recruits, and student-athlete compensation would be higher as a result." *Id., at 1068*. "Student-athletes would receive offers that would more closely match the value of their athletic services." *Ibid.* And notably, the court observed, the NCAA "did not meaningfully dispute" any of this evidence. *Id., at 1067*; see also Tr. of Oral Arg. 31 ("[T]here's no dispute that the—the no-pay-for-play rule imposes a significant restraint on a relevant antitrust market").

The district court next considered the NCAA's procompetitive justifications for its restraints. The NCAA suggested that its restrictions help increase output in college sports and maintain a competitive balance among teams. But the district court rejected those justifications, *D. Ct. Op., at 1070, n. 12*, and the NCAA does not pursue them here. The NCAA 's only remaining defense was that its rules preserve amateurism, which in turn widens consumer choice by providing a unique product—amateur college sports as distinct from professional sports. Admittedly, this asserted benefit accrues to consumers in the NCAA 's seller-side consumer market rather **[***22]** than to student-athletes whose compensation the NCAA fixes in its buyer-side labor market. But, the NCAA argued, the district court needed to assess its restraints in the labor market in light of their procompetitive benefits in the consumer market—and the district court agreed to do so. *Id., at 1098*.

Turning to that task, the court observed that the NCAA's conception of amateurism has changed steadily over the years. See *id., at 1063-1064, 1072-1073*; see also *supra*, at ___ - ___, 210 L. Ed. 2d, at ___ - ___. The court noted that the NCAA "nowhere define[s] the nature of the amateurism they claim consumers insist upon." *D. Ct. Op., at 1070*. And, given all this, the court struggled to ascertain for itself "any coherent definition" of the term, *id., at 1074*, noting the testimony of a former SEC commissioner that he's **[**328]** " 'never been clear on . . . what is really meant by amateurism.' " *Id., at 1070-1071*.

Nor did the district court find much evidence to support the NCAA's contention that its compensation restrictions play a role in consumer demand. As the court put it, the evidence failed "to establish that the challenged compensation rules, in and of themselves, have any direct connection to consumer demand." *Id., at 1070*. The court observed, for example, that the NCAA's "only **[***23]** economics expert on the issue of consumer demand" did not "study any standard measures of consumer demand" but instead simply "interviewed people connected with the NCAA and its schools, who were chosen for him by defense **[*2153]** counsel." *Id., at 1075*. Meanwhile, the student-athletes presented expert testimony and other evidence showing that consumer demand has increased markedly despite the new types of compensation the NCAA has allowed in recent decades. *Id., at 1074, 1076*. The plaintiffs presented economic and other evidence suggesting as well that further increases in student-athlete compensation would "not negatively affect consumer demand." *Id., at 1076*. At the same time, however, the district court did find that one particular aspect of the NCAA's compensation limits "may have some effect in preserving consumer demand." *Id., at 1082*. Specifically, the court found that rules aimed at ensuring "student-athletes do not receive unlimited payments unrelated to education" could play some role in product differentiation with professional sports and thus help sustain consumer demand for college athletics. *Id., at 1083*.

The court next required the student-athletes to show that "substantially less restrictive alternative rules" existed that "would achieve the **[***24]** same procompetitive effect as the challenged set of rules." *Id., at 1104*. The district court emphasized that the NCAA must have "ample latitude" to run its enterprise and that courts "may not use antitrust laws to make marginal adjustments to broadly reasonable market restraints." *Ibid.* (internal quotation marks omitted). In light of these standards, the court found the student-athletes had met their burden in some respects but not others. The court rejected the student-athletes' challenge to NCAA rules that limit athletic scholarships to the full cost of attendance and that restrict compensation and benefits unrelated to education. These may be price-fixing agreements, but the court found them to be reasonable in light of the possibility that "professional-level cash payments . . . could blur the distinction between college sports and professional sports and thereby negatively affect consumer demand." *Ibid.*

The court reached a different conclusion for caps on education-related benefits—such as rules that limit scholarships for graduate or vocational school, payments for academic tutoring, or paid posteligibility internships. *Id., at 1088*. On no account, the court found, could such education-related benefits **[***25]** be "confused with a professional athlete's salary." *Id., at 1083*. If anything, they "emphasize that the recipients are students." *Ibid.* Enjoining the NCAA's restrictions on these forms of compensation alone, the court concluded, would be substantially less restrictive than the NCAA's current rules and yet fully capable of preserving consumer demand for college sports. *Id., at 1088*.

[329]** The court then entered an injunction reflecting its findings and conclusions. Nothing in the order precluded the NCAA from continuing to fix compensation and benefits unrelated to education; limits on athletic scholarships, for example, remained untouched. The court enjoined the NCAA only from limiting education-related compensation or benefits that conferences and schools may provide to student-athletes playing Division I football and basketball. App. to Pet. for Cert. in No. 20-512, p. 167a, ¶1. The court's injunction further specified that the NCAA could continue to limit cash awards for academic achievement—but only so long as those limits are no lower than the cash awards allowed for athletic achievement (currently $5,980 annually). *Id*., at 168a-169a, ¶5; Order Granting Motion for Clarification of Injunction in No. 4:14-md-02541, **[***26]** ECF Doc. 1329, pp. 5-6 (ND Cal., Dec. 30, 2020). The court added that the NCAA and its members were free to propose a definition of compensation or benefits " 'related to education.' " App. to Pet. for Cert. in No. 20-512, at 168a, ¶4. And the court **[*2154]** explained that the NCAA was free to regulate how conferences and schools provide education-related compensation and benefits. *Ibid.* The court further emphasized that its injunction applied only to the NCAA and multi-conference agreements—thus allowing individual conferences (and the schools that constitute them) to impose tighter restrictions if they wish. *Id*., at 169a, ¶6. The district court's injunction issued in March 2019, and took effect in August 2020.

Both sides appealed. The student-athletes said the district court did not go far enough; it should have enjoined all of the NCAA's challenged compensation limits, including those "untethered to education," like its restrictions on the size of athletic scholarships and cash awards. *In re National Collegiate Athletic Assn. Athletic Grant-in-Aid Cap Antitrust Litig., 958 F. 3d 1239, 1263 (CA9 2020)*. The NCAA, meanwhile, argued that the district court went too far by weakening its restraints on education-related compensation and benefits. In the end, the court of appeals affirmed in full, explaining its **[***27]** view that "the district court struck the right balance in crafting a remedy that both prevents anticompetitive harm to Student-Athletes while serving the procompetitive purpose of preserving the popularity of college sports." *Ibid.*

C

Unsatisfied with this result, the NCAA asks us to reverse to the extent the lower courts sided with the student-athletes. For their part, the student-athletes do not renew their across-the-board challenge to the NCAA 's compensation restrictions. Accordingly, we do not pass on the rules that remain in place or the district court's judgment upholding them. Our review is confined to those restrictions now enjoined.

Before us, as through much of the litigation below, some of the issues most frequently debated in antitrust litigation are uncontested. The parties do not challenge the district court's definition of the relevant market. They do not contest that the NCAA enjoys monopoly (or, as it's called on the buyer side, monopsony) control in that labor market—such that it is capable of depressing wages below competitive levels and restricting the quantity of student-athlete **[**330]** labor. Nor does the NCAA dispute that its member schools compete fiercely for student-athletes **[***28]** but remain subject to NCAA-issued-and-enforced limits on what compensation they can offer. Put simply, this suit involves admitted horizontal price fixing in a market where the defendants exercise monopoly control.

Other significant matters are taken as given here too. No one disputes that the NCAA's restrictions *in fact* decrease the compensation that student-athletes receive compared to what a competitive market would yield. No one questions either that decreases in compensation also depress participation by student-athletes in the relevant labor market—so that price and quantity are both suppressed. See 12 P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶2011b, p. 134 (4th ed. 2019) (Areeda & Hovenkamp). Nor does the NCAA suggest that, to prevail, the plaintiff student-athletes must show that its restraints harm competition in the seller-side (or consumer facing) market as well as in its buyer-side (or labor) market. See, *e.g.*, *Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U. S. 219, 235, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)*; *Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U. S. 312, 321, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)*; 2A Areeda & Hovenkamp ¶352c, pp. 288-289 (2014); 12 *id*., ¶2011a, at 132-134.

[*2155] Meanwhile, the student-athletes do not question that the NCAA may permissibly seek to justify its restraints in the labor market by pointing to procompetitive effects they produce in the **[***29]** consumer market. Some *amici* argue that "competition in input markets is incommensurable with competition in output markets," and that a court should not "trade off " sacrificing a legally cognizable interest in competition in one market to better promote competition in a different one; review should instead be limited to the particular market in which antitrust plaintiffs have asserted their injury. Brief for American Antitrust Institute as *Amicus Curiae* 3, 11-12. But the parties before us do not pursue this line.

II

A

With all these matters taken as given, we express no views on them. Instead, we focus only on the objections the NCAA *does* raise. Principally, it suggests that the lower courts erred by subjecting its compensation restrictions to a rule of reason analysis. In the NCAA's view, the courts should have given its restrictions at most an "abbreviated deferential review," Brief for Petitioner in No. 20-512, p. 14, or a " 'quick look,' " Brief for Petitioners in No. 20-520, p. 18, before approving them.

The NCAA offers a few reasons why. Perhaps dominantly, it argues that it is a joint venture and that collaboration among its members is necessary if they are to offer consumers the **[***30]** benefit of intercollegiate athletic competition. We doubt little of this. There's no question, for example, that many "joint ventures are calculated to enable firms to do something more cheaply or better than they did it before." 13 Areeda & Hovenkamp ¶2100c, at 7. And the fact that joint ventures can have such procompetitive benefits surely stands as a caution against condemning their arrangements too reflexively. See **[**331]** *Dagher, 547 U. S., at 7, 126 S. Ct. 1276, 164 L. Ed. 2d 1*; *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U. S. 1, 22-23, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*.

But even assuming (without deciding) that the NCAA is a joint venture, that does not guarantee the foreshortened review it seeks. ***HN2***[] ***LEdHN[2]***[] [2] Most restraints challenged under the Sherman Act—including most joint venture restrictions—are subject to the rule of reason, which (again) we have described as "a fact-specific assessment of market power and market structure" aimed at assessing the challenged restraint's "actual effect on competition"—especially its capacity to reduce output and increase price. *American Express, 585 U. S., at ___-___, 138 S. Ct. 2274, 201 L. Ed. 2d 678* (internal quotation marks omitted).

Admittedly, the amount of work needed to conduct a fair assessment of these questions can vary. As the NCAA observes, ***HN3***[] ***LEdHN[3]***[] [3] this Court has suggested that sometimes we can determine the competitive effects of a challenged restraint in the " 'twinkling **[***31]** of an eye.' " *Board of Regents, 468 U. S., at 110, n. 39, 104 S. Ct. 2948, 82 L. Ed. 2d 70* (quoting P. Areeda, The "Rule of Reason" in Antitrust Analysis: General Issues 37-38 (Federal Judicial Center, June 1981)); *American Needle, Inc. v. National Football League, 560 U. S. 183, 203, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*. That is true, though, only for restraints at opposite ends of the competitive spectrum. For those sorts of restraints—rather than restraints in the great in-between—a quick look is sufficient for approval or condemnation.

HN4[] ***LEdHN[4]***[] [4] At one end of the spectrum, some restraints may be so obviously incapable of harming competition that they require little scrutiny. In **[*2156]** *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 792 F. 2d 210, 253 U.S. App. D.C. 142 (CADC 1986)*, for example, Judge Bork explained that the analysis could begin and end with the observation that the joint venture under review "command[ed] between 5.1 and 6% of the relevant market." *Id., at 217*. Usually, joint ventures enjoying such small market share are incapable of impairing competition. Should they reduce their output, "there would be no effect upon market price because firms making up the other 94% of the market would simply take over the abandoned business." *Ibid.*; see also 7 Areeda & Hovenkamp ¶1507a, p. 444 (2017) (If "the exercise of market power is not plausible, the challenged practice is legal"); *Polk Bros., Inc. v. Forest City Enterprises, Inc., 776 F. 2d 185, 191 (CA7 1985)* ("Unless the firms have the power to raise price by curtailing output, their agreement is unlikely **[***32]** to harm consumers, and it makes sense to understand their cooperation as benign or beneficial").

At the other end, some agreements among competitors so obviously threaten to reduce output and raise prices that they might be condemned as unlawful *per se* or rejected after only a quick look. See *Dagher, 547 U. S., at 7, n. 3, 126 S. Ct. 1276, 164 L. Ed. 2d 1*; *California Dental Assn. v. FTC, 526 U. S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. Recognizing the inherent limits on a court's ability to master an entire industry—and aware that there are often hard-to-see efficiencies attendant to complex business arrangements—we take special care not to **[**332]** deploy these condemnatory tools until we have amassed "considerable experience with the type of restraint at issue" and "can predict with confidence that it would be invalidated in all or almost all instances." *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U. S. 877, 886-887, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*; Easterbrook, On Identifying Exclusionary Conduct, *61 Notre Dame L. Rev. 972, 975 (1986)* (noting that it can take "economists years, sometimes decades, to understand why certain business practices work [and] determine whether they work because of increased efficiency or exclusion"); see also *infra, at ___ - ___, 210 L. Ed. 2d, at ___ - ___* (further reasons for caution).

None of this helps the NCAA. The NCAA. *accepts* that its members collectively enjoy monopsony power in the market for student-athlete services, such that its restraints can (and in fact **[***33]** do) harm competition. See *D. Ct. Op., at 1067*. Unlike customers who would look elsewhere when a small van company raises its prices above market levels, the district court found (and the NCAA does not here contest) that student-athletes have nowhere else to sell their labor. Even if the NCAA is a joint venture, then, it is hardly of the sort that would warrant quick-look approval for all its myriad rules and restrictions.

Nor does the NCAA's status as a particular type of venture categorically exempt its restraints from ordinary rule of reason review. We do not doubt that some degree of coordination between competitors within sports leagues can be procompetitive. Without some agreement among rivals—on things like how many players may be on the field or the time allotted for play—the very competitions that consumers value would not be possible. See *Board of Regents, 468 U. S., at 101, 104 S. Ct. 2948, 82 L. Ed. 2d 70* (quoting R. Bork, The Antitrust Paradox 278 (1978)). Accordingly, even a sports league with market power might see some agreements among its members win antitrust approval in the " 'twinkling of an eye.' " *American Needle, 560 U. S., at 203, 130 S. Ct. 2201, 176 L. Ed. 2d 947*.

But this insight does not always apply. ***HN5***[] ***LEdHN[5]***[] [5] That *some* restraints are necessary to create or maintain a league sport does not mean *all* "aspects **[***34]** of elaborate interleague cooperation are." *Id., at 199, n. 7,* ***[*2157]*** *130 S. Ct. 2201, 176 L. Ed. 2d 947*. While a quick look will often be enough to approve the restraints "necessary to produce a game," *ibid.*, a fuller review may be appropriate for others. See, *e.g.*, *Chicago Professional*

Sports Ltd. Partnership v. National Basketball Assn., 95 F. 3d 593, 600 (CA7 1996) ("Just as the ability of McDonald's franchises to coordinate the release of a new hamburger does not imply their ability to agree on wages for counter workers, so the ability of sports teams to agree on a TV contract need not imply an ability to set wages for players").

The NCAA's rules fixing wages for student-athletes fall on the far side of this line. Nobody questions that Division I basketball and FBS football can proceed (and have proceeded) without the education-related compensation restrictions the district court enjoined; the games go on. Instead, the parties dispute whether and to what extent those restrictions in the NCAA's labor market yield benefits in its consumer market that can be attained using substantially less restrictive **[**333]** means. That dispute presents complex questions requiring more than a blink to answer.

B

Even if background antitrust principles counsel in favor of the rule of reason, the NCAA replies that a particular precedent ties our hands. The NCAA directs **[***35]** our attention to *Board of Regents*, where this Court considered the league's rules restricting the ability of its member schools to televise football games. 468 U. S., at 94, 104 S. Ct. 2948, 82 L. Ed. 2d 70. On the NCAA's reading, that decision expressly approved its limits on student-athlete compensation—and this approval forecloses any meaningful review of those limits today.

We see things differently. *Board of Regents* explained that the league's television rules amounted to "[h]orizontal price fixing and output limitation[s]" of the sort that are "ordinarily condemned" as " 'illegal *per se*.' " Id., at 100, 104 S. Ct. 2948, 82 L. Ed. 2d 70. The Court declined to declare the NCAA's restraints *per se* unlawful only because they arose in "an industry" in which some "horizontal restraints on competition are essential if the product is to be available at all." Id., at 101-102, 104 S. Ct. 2948, 82 L. Ed. 2d 70. Our analysis today is fully consistent with all of this. Indeed, if any daylight exists it is only in the NCAA's favor. While *Board of Regents* did not condemn the NCAA's broadcasting restraints as *per se* unlawful, it invoked abbreviated antitrust review as a path to condemnation, not salvation. Id., at 109, n. 39, 104 S. Ct. 2948, 82 L. Ed. 2d 70. If a quick look was thought sufficient before rejecting the NCAA's procompetitive rationales in that case, it is hard **[***36]** to see how the NCAA might object to a court providing a more cautious form of review before reaching a similar judgment here.

To be sure, the NCAA isn't without a reply. It notes that, in the course of reaching its judgment about television marketing restrictions, the *Board of Regents* Court commented on student-athlete compensation restrictions. Most particularly, the NCAA highlights this passage:

> "The NCAA plays a critical role in the maintenance of a revered tradition of amateurism in college sports. There can be no question but that it needs ample latitude to play that role, or that the preservation of the student-athlete in higher education adds richness and diversity to intercollegiate athletics and is entirely consistent with the goals of the Sherman Act." Id., at 120, 104 S. Ct. 2948, 82 L. Ed. 2d 70.

See also id., at 101, 102, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (the NCAA "seeks to market a particular brand of football" in which "athletes must not be paid, must be required to attend class, and the like"). On the NCAA 's telling, **[*2158]** these observations foreclose any rule of reason review in this suit.

Once more, we cannot agree. *Board of Regents* may suggest that courts should take care when assessing the NCAA's restraints on student-athlete compensation, **[***37]** sensitive to their procompetitive possibilities. But these remarks do not suggest that courts must reflexively reject *all* challenges to the NCAA's compensation restrictions. Student-athlete compensation rules were not even at issue in Board of Regents. And the Court made clear it was only assuming the reasonableness **[**334]** of the NCAA's restrictions: "It is reasonable to *assume* that most of the regulatory controls of the NCAA are justifiable means of fostering competition among amateur athletic teams and are therefore procompetitive . . . ." Id., at 117, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (emphasis added). Accordingly, the Court simply did not have occasion to declare—nor did it declare—the NCAA's compensation restrictions procompetitive both in 1984 and forevermore.

Our confidence on this score is fortified by still another factor. ***HN6***[] ***LEdHN[6]***[] [6] Whether an antitrust violation exists necessarily depends on a careful analysis of market realities. See, *e.g.*, *American Express Co., 585 U. S., at ___-___, 138 S. Ct. 2274, 201 L. Ed. 2d 678*; 2B Areeda & Hovenkamp ¶500, p. 107 (2014). If those market realities change, so may the legal analysis.

When it comes to college sports, there can be little doubt that the market realities have changed significantly since 1984. Since then, the NCAA has dramatically increased the amounts **[***38]** and kinds of benefits schools may provide to student-athletes. For example, it has allowed the conferences flexibility to set new and higher limits on athletic scholarships. *D. Ct. Op., at 1064*. It has increased the size of permissible benefits "incidental to athletics participation." *Id., at 1066*. And it has developed the Student Assistance Fund and the Academic Enhancement Fund, which in 2018 alone provided over $100 million to student-athletes. *Id., at 1072*. Nor is that all that has changed. In 1985, Division I football and basketball raised approximately $922 million and $41 million respectively. Brief for Former NCAA Executives as *Amici Curiae* 7. By 2016, NCAA Division I schools raised more than $13.5 billion. *Ibid.* From 1982 to 1984, CBS paid $16 million per year to televise the March Madness Division I men's basketball tournament. *Ibid.* In 2016, those annual television rights brought in closer to $1.1 billion. *D. Ct. Op., at 1077, n. 20*.

Given the sensitivity of antitrust analysis to market realities—and how much has changed in this market—we think it would be particularly unwise to treat an aside in *Board of Regents* as more than that. This Court may be "infallible only because **[***39]** we are final," *Brown v. Allen, 344 U. S. 443, 540, 73 S. Ct. 397, 97 L. Ed. 469 (1953)* (Jackson, J., concurring in result), but those sorts of stray comments are neither.

C

The NCAA submits that a rule of reason analysis is inappropriate for still another reason—because the NCAA and its member schools are not "commercial enterprises" and instead oversee intercollegiate athletics "as an integral part of the undergraduate experience." Brief for Petitioner in No. 20-512, at 31. The NCAA represents that it seeks to "maintain amateurism in college sports as part of serving [the] societally important non-commercial objective" of "higher education." *Id*., at 3.

Here again, however, there may be less of a dispute than meets the eye. The NCAA does not contest that its restraints affect interstate trade and commerce and are thus subject to the Sherman Act. See **[*2159]** *D. Ct. Op., at 1066*. The NCAA acknowledges that this Court already analyzed (and struck down) some of its restraints as anticompetitive **[**335]** in *Board of Regents*. And it admits, as it must, that the Court did all this only after observing that the Sherman Act had already been applied to other nonprofit organizations—and that "the economic significance of the NCAA's nonprofit character is questionable at best" given **[***40]** that "the NCAA and its member institutions are in fact organized to maximize revenues." *468 U. S., at 100-101, n. 22, 104 S. Ct. 2948, 82 L. Ed. 2d 70*. Nor, on the other side of the equation, does anyone contest that the status of the NCAA's members as schools and the status of student-athletes as students may be relevant in assessing consumer demand as part of a rule of reason review.

With this much agreed it is unclear exactly what the NCAA seeks. To the extent it means to propose a sort of judicially ordained immunity from the terms of the Sherman Act for its restraints of trade—that we should overlook its restrictions because they happen to fall at the intersection of higher education, sports, and money—we cannot agree. This Court has regularly refused materially identical requests from litigants seeking special dispensation from the Sherman Act on the ground that their restraints of trade serve uniquely important social objectives beyond enhancing competition.

Take two examples. In *National Soc. of Professional Engineers v. United States, 435 U. S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*, a trade association argued that price competition between engineers competing for building projects had to be restrained to ensure quality work and protect public safety. *Id., at 679-680, 98 S. Ct. 1355, 55 L. Ed. 2d 637*. This Court rejected that appeal as "nothing less than a frontal assault on the basic policy **[***41]** of the Sherman Act." *Id., at 695, 98 S. Ct. 1355, 55 L. Ed. 2d 637*. ***HN7***[] ***LEdHN[7]***[] [7] The "statutory policy" of the Act is one of competition and it "precludes inquiry into the question whether competition is good or bad." *Ibid.* In

FTC v. Superior Court Trial Lawyers Assn., 493 U. S. 411, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990), criminal defense lawyers agreed among themselves to refuse court appointments until the government increased their compensation. Id., at 414, 110 S. Ct. 768, 107 L. Ed. 2d 851. And once more the Court refused to consider whether this restraint of trade served some social good more important than competition: "The social justifications proffered for respondents' restraint of trade . . . do not make it any less unlawful." Id., at 424, 110 S. Ct. 768, 107 L. Ed. 2d 851.

To be sure, this Court once dallied with something that looks a bit like an antitrust exemption for professional baseball. In Federal Baseball Club of Baltimore, Inc. v. National League of Professional Baseball Clubs, 259 U. S. 200, 42 S. Ct. 465, 66 L. Ed. 898, 20 Ohio L. Rep. 211 (1922), the Court reasoned that "exhibitions" of "base ball" did not implicate the Sherman Act because they did not involve interstate trade or commerce—even though teams regularly crossed state lines (as they do today) to make money and enhance their commercial success. Id., at 208-209, 42 S. Ct. 465, 66 L. Ed. 898. But this Court has refused to extend Federal Baseball's reasoning to other sports leagues—and has even acknowledged criticisms of the decision as " 'unrealistic' " and " 'inconsistent' " and "aberration[al]." Flood v. Kuhn, 407 U. S. 258, 282, 92 S. Ct. 2099, 32 L. Ed. 2d 728 (1972) (quoting **[**336]** Radovich v. National Football League, 352 U. S. 445, 452, 77 S. Ct. 390, 1 L. Ed. 2d 456 (1957)); see also Brief for Advocates for Minor **[***42]** Leaguers as *Amicus Curiae* 5, n. 3 (gathering criticisms). Indeed, as we have seen, this Court has already recognized that the NCAA itself *is* subject to the Sherman Act.

[*2160] ***HN8***[] ***LEdHN[8]***[] [8] The "orderly way" to temper that Act's policy of competition is "by legislation and not by court decision." Flood, 407 U. S., at 279, 92 S. Ct. 2099, 32 L. Ed. 2d 728. The NCAA is free to argue that, "because of the special characteristics of [its] particular industry," it should be exempt from the usual operation of the antitrust laws—but that appeal is "properly addressed to Congress." National Soc. of Professional Engineers, 435 U. S., at 689, 98 S. Ct. 1355, 55 L. Ed. 2d 637. Nor has Congress been insensitive to such requests. It has modified the antitrust laws for certain industries in the past, and it may do so again in the future. See, *e.g.*, 7 U. S. C. §§ 291-292 (agricultural cooperatives); 15 U. S. C. §§ 1011-1013 (insurance); 15 U. S. C. §§ 1801-1804 (newspaper joint operating agreements). But until Congress says otherwise, the only law it has asked us to enforce is the Sherman Act, and that law is predicated on one assumption alone—"competition is the best method of allocating resources" in the Nation's economy. National Soc. of Professional Engineers, 435 U. S., at 695, 98 S. Ct. 1355, 55 L. Ed. 2d 637.

III

A

While the NCAA devotes most of its energy to resisting the rule of reason in its usual form, the league lodges some objections to the district court's application of it as well.

HN9[] ***LEdHN[9]***[] [9] When describing the rule of reason, **[***43]** this Court has sometimes spoken of "a three-step, burden-shifting framework" as a means for " 'distinguish[ing] between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.' " American Express Co., 585 U. S., at ___, 138 S. Ct. 2274, 201 L. Ed. 2d 678, 690. As we have described it, "the plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect." *Ibid.* Should the plaintiff carry that burden, the burden then "shifts to the defendant to show a procompetitive rationale for the restraint." *Ibid.* If the defendant can make that showing, "the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means." Id., at ___-___, 138 S. Ct. 2274, 201 L. Ed. 2d 678, 690.

These three steps do not represent a rote checklist, nor may they be employed as an inflexible substitute for careful analysis. As we have seen, what is required to assess whether a challenged restraint harms competition can vary depending on the circumstances. See supra, at ___-___, 210 L. Ed. 2d, at ___-___. ***HN10***[] ***LEdHN[10]***[] [10] The whole point of the rule of reason is to furnish "an enquiry meet for the case, looking to the circumstances, **[***44]** details, and logic of a restraint" to ensure that it unduly harms competition before a court declares it unlawful. California Dental, 526 U. S., at 781, 119 S. Ct. 1604, 143 L. Ed. 2d 935; see also, *e.g.*, Leegin

Creative, 551 U. S., at 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (" '[T]he **[**337]** factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition' "); *Copperweld Corp. v. Independence Tube Corp., 467 U. S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*; 7 Areeda & Hovenkamp ¶1507a, at 442-444 (slightly different "decisional model" using sequential questions).

In the proceedings below, the district court followed circuit precedent to apply a multistep framework closely akin to *American Express*'s. As its first step, the district court required the student-athletes to show that "the challenged restraints produce significant anticompetitive effects in the relevant market." *D. Ct. Op., at 1067*. This was no slight burden. According to **[*2161]** one *amicus*, courts have disposed of nearly all rule of reason cases in the last 45 years on the ground that the plaintiff failed to show a substantial anticompetitive effect. Brief for 65 Professors of Law, Business, Economics, and Sports Management as *Amici Curiae* 21, n. 9 ("Since 1977, courts decided 90% (809 of 897) on this ground"). This suit proved different. As we have seen, based on a voluminous **[***45]** record, the district court held that the student-athletes had shown the NCAA enjoys the power to set wages in the market for student-athletes' labor—and that the NCAA has exercised that power in ways that have produced significant anticompetitive effects. See *D. Ct. Op., at 1067*. Perhaps even more notably, the NCAA "did not meaningfully dispute" this conclusion. *Ibid.*

Unlike so many cases, then, the district court proceeded to the second step, asking whether the NCAA could muster a procompetitive rationale for its restraints. *Id., at 1070*. This is where the NCAA claims error first crept in. On its account, the district court examined the challenged rules at different levels of generality. At the first step of its inquiry, the court asked whether the NCAA 's entire package of compensation restrictions has substantial anticompetitive effects *collectively*. Yet, at the second step, the NCAA says the district court required it to show that each of its distinct rules limiting student-athlete compensation has procompetitive benefits *individually*. The NCAA says this mismatch had the result of effectively—and erroneously—requiring it to prove that each rule is the least restrictive means of achieving the **[***46]** procompetitive purpose of differentiating college sports and preserving demand for them.

We agree with the NCAA's premise that ***HN11***[] ***LEdHN[11]***[] [11] ***antitrust law*** does not require businesses to use anything like the least restrictive means of achieving legitimate business purposes. To the contrary, courts should not second-guess "degrees of reasonable necessity" so that "the lawfulness of conduct turn[s] upon judgments of degrees of efficiency." *Rothery Storage, 792 F. 2d, at 227*; *Continental T. V., Inc. v. GTE Sylvania Inc., 433 U. S. 36, 58, n. 29, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. That would be a recipe for disaster, for a "skilled lawyer" will "have little difficulty imagining possible less restrictive alternatives to most joint arrangements." 11 Areeda & Hovenkamp ¶1913b, p. 398 (2018). And judicial acceptance of such imaginings would risk interfering "with the legitimate objectives at issue" without "adding that much to competition." 7 *id*., ¶1505b, at 435-436.

HN12[] ***LEdHN[12]***[] [12] Even worse, "[r]ules that seek **[**338]** to embody every economic complexity and qualification may well, through the vagaries of administration, prove counter-productive, undercutting the very economic ends they seek to serve." *Barry Wright Corp. v. ITT Grinnell Corp., 724 F. 2d 227, 234 (CA1 1983)* (BREYER, J.). After all, even "[u]nder the best of circumstances," applying the antitrust laws " 'can be difficult' "—and mistaken condemnations of legitimate business **[***47]** arrangements " 'are especially costly, because they chill the very' " procompetitive conduct " 'the antitrust laws are designed to protect.' " *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U. S. 398, 414, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. Indeed, static judicial decrees in ever-evolving markets may themselves facilitate collusion or frustrate entry and competition. *Ibid.* To know that the Sherman Act prohibits only *unreasonable* restraints of trade is thus to know that attempts to " '[m]ete[r]' small deviations is not an appropriate antitrust function." Hovenkamp, Antitrust Balancing, *12 N. Y. U. J. L. & Bus. 369, 377 (2016)*.

[*2162] While we agree with the NCAA's legal premise, we cannot say the same for its factual one. Yes, at the first step of its inquiry, the district court held that the student-athletes had met their burden of showing the NCAA's restraints collectively bear an anticompetitive effect. And, given that, yes, at step two the NCAA had to show only that those same rules collectively yield a procompetitive benefit. The trouble for the NCAA, though, is not the level of generality. It is the fact that the district court found unpersuasive much of its proffered evidence. See *D. Ct. Op., at 1070-1076, 1080-1083*. Recall that the court found the NCAA failed "to establish that the challenged compensation rules . . . have **[***48]** any direct connection to consumer demand." *Id., at 1070*.

To be sure, there is a wrinkle here. While finding the NCAA had failed to establish that its rules collectively sustain consumer demand, the court did find that "some" of those rules "may" have procompetitive effects "to the extent" they prohibit compensation "unrelated to education, akin to salaries seen in professional sports leagues." *Id., at 1082-1083*. The court then proceeded to what corresponds to the third step of the *American Express* framework, where it required the student-athletes "to show that there are substantially less restrictive alternative rules that would achieve the same procompetitive effect as the challenged set of rules." *D. Ct. Op., at 1104*. And there, of course, the district court held that the student-athletes partially succeeded—they were able to show that the NCAA could achieve the procompetitive benefits it had established with substantially less restrictive restraints on education-related benefits.

Even acknowledging this wrinkle, we see nothing about the district court's analysis that offends the legal principles the NCAA invokes. The court's judgment ultimately turned on the key question at the third step: whether the student-athletes **[***49]** could prove that "substantially less restrictive alternative rules" existed to achieve the same procompetitive benefits the NCAA had proven at the second step. *Ibid.* Of course, deficiencies in the NCAA's proof of procompetitive benefits at the second step influenced the analysis at the third. But that is only because, ***HN13***[] ***LEdHN[13]***[] [13] however **[**339]** framed and at whichever step, anticompetitive restraints of trade may wind up flunking the rule of reason to the extent the evidence shows that substantially less restrictive means exist to achieve any proven procompetitive benefits. See, *e.g.*, 7 Areeda & Hovenkamp ¶1505, p. 428 ("To be sure, these two questions can be collapsed into one," since a "legitimate objective that is not promoted by the challenged restraint can be equally served by simply abandoning the restraint, which is surely a less restrictive alternative").

Simply put, the district court nowhere—expressly or effectively—required the NCAA to show that its rules constituted the *least* restrictive means of preserving consumer demand. Rather, it was only after finding the NCAA's restraints " 'patently and inexplicably stricter than is necessary' " to achieve the procompetitive benefits the league had demonstrated **[***50]** that the district court proceeded to declare a violation of the Sherman Act. *D. Ct. Op., at 1104*. That demanding standard hardly presages a future filled with judicial micromanagement of legitimate business decisions.

B

In a related critique, the NCAA contends the district court "impermissibly redefined" its "product" by rejecting its views about what amateurism requires and replacing them with its preferred conception. **[*2163]** Brief for Petitioner in No. 20-512, at 35-36.

This argument, however, misapprehends the way a defendant's procompetitive business justification relates to the antitrust laws. ***HN14***[] ***LEdHN[14]***[] [14] Firms deserve substantial latitude to fashion agreements that serve legitimate business interests—agreements that may include efforts aimed at introducing a new product into the marketplace. *Supra, at ___ - ___, 210 L. Ed. 2d, at ___ - ___*. But none of that means a party can relabel a restraint as a product feature and declare it "immune from *§ 1* scrutiny." *American Needle, 560 U. S., at 199, n. 7, 130 S. Ct. 2201, 176 L. Ed. 2d 947*. In this suit, as in any, the district court had to determine whether the defendants' agreements harmed competition and whether any procompetitive benefits associated with their restraints could be achieved by "substantially less restrictive alternative" means. *D. Ct. Op., at 1104*. **[***51]**

The NCAA's argument not only misapprehends the inquiry, it would require us to overturn the district court's factual findings. While the NCAA asks us to defer to its conception of amateurism, the district court found that the NCAA had not adopted any consistent definition. *Id., at 1070*. Instead, the court found, the NCAA's rules and restrictions on compensation have shifted markedly over time. *Id., at 1071-1074*. The court found, too, that the NCAA adopted these restrictions without any reference to "considerations of consumer demand," *id., at 1100*, and that some were "not necessary to preserve consumer demand," *id., at 1075, 1080, 1104*. None of this is product redesign; it is a straightforward application of the rule of reason.

C

Finally, the NCAA attacks as "indefensible" the lower courts' holding that substantially less restrictive alternatives exist capable of delivering the same procompetitive benefits as its current rules. Brief for Petitioner **[**340]** in No. 20-512, at 46. The NCAA claims, too, that the district court's injunction threatens to "micromanage" its business. *Id*., at 50.

Once more, we broadly agree with the legal principles the NCAA invokes. As we have discussed,***HN15***[] ***LEdHN[15]***[] [15] antitrust courts must give wide berth to business judgments before finding liability. **[***52]** See *supra, at ___ - ___, 210 L. Ed. 2d, at ___ - ___*. Similar considerations apply when it comes to the remedy. Judges must be sensitive to the possibility that the "continuing supervision of a highly detailed decree" could wind up impairing rather than enhancing competition. *Trinko, 540 U. S., at 415, 124 S. Ct. 872, 157 L. Ed. 2d 823*. Costs associated with ensuring compliance with judicial decrees may exceed efficiencies gained; the decrees themselves may unintentionally suppress procompetitive innovation and even facilitate collusion. See *supra, at ___ - ___, 210 L. Ed. 2d, at ___ - ___*. Judges must be wary, too, of the temptation to specify "the proper price, quantity, and other terms of dealing"—cognizant that they are neither economic nor industry experts. *Trinko, 540 U. S., at 408, 124 S. Ct. 872, 157 L. Ed. 2d 823*. Judges must be open to reconsideration and modification of decrees in light of changing market realities, for "what we see may vary over time." *California Dental, 526 U. S., at 781, 119 S. Ct. 1604, 143 L. Ed. 2d 935*. And throughout courts must have a healthy respect for the practical limits of judicial administration: "An antitrust court is unlikely to be an effective day-to-day enforcer" of a detailed decree, able to keep pace with changing market dynamics alongside a busy docket. *Trinko, 540 U. S., at 415, 124 S. Ct. 872, 157 L. Ed. 2d 823*. Nor should any court " 'impose a duty . . . that it cannot explain or adequately and reasonably supervise.' " *Ibid.* In short, judges make **[***53]** for poor "central planners" and **[*2164]** should never aspire to the role. *Id., at 408, 124 S. Ct. 872, 157 L. Ed. 2d 823*.

Once again, though, we think the district court honored these principles. The court enjoined only restraints on education-related benefits—such as those limiting scholarships for graduate school, payments for tutoring, and the like. The court did so, moreover, only after finding that relaxing these restrictions would not blur the distinction between college and professional sports and thus impair demand—and only after finding that this course represented a significantly (not marginally) less restrictive means of achieving the same procompetitive benefits as the NCAA's current rules. *D. Ct. Op., at 1104-1105*.

Even with respect to education-related benefits, the district court extended the NCAA considerable leeway. As we have seen, the court provided that the NCAA could develop its own definition of benefits that relate to education and seek modification of the court's injunction to reflect that definition. App. to Pet. for Cert. in No. 20-512, at 168a, ¶4. The court explained that the NCAA and its members could agree on rules regulating how conferences and schools go about providing these education-related benefits. ***[***54]*** *Ibid.* The court said that the NCAA and its members could continue fixing education-related cash awards, too—so long as those "limits are never lower than the limit" on awards for athletic performance. *D. Ct. Op., at 1104*; App. to Pet. for Cert. in No. **[**341]** 20-512, at 168a-169a, ¶5. And the court emphasized that its injunction applies only to the NCAA and multi-conference agreements; individual conferences remain free to reimpose every single enjoined restraint tomorrow—or more restrictive ones still. *Id*., at 169a-170a, ¶¶6-7.

In the end, it turns out that the NCAA's complaints really boil down to three principal objections.

First, the NCAA worries about the district court's inclusion of paid posteligibility internships among the education-related benefits it approved. The NCAA fears that schools will use internships as a way of circumventing limits on payments that student-athletes may receive for athletic performance. The NCAA even imagines that boosters might promise posteligibility internships "at a sneaker company or auto dealership" with extravagant salaries as a "thinly disguised vehicle" for paying professional-level salaries. Brief for Petitioner in No. 20-512, at 37-38.

This argument **[***55]** rests on an overly broad reading of the injunction. The district court enjoined only restrictions on education-related compensation or benefits "that may be made available *from conferences or schools*." App. to Pet. for Cert. in No. 20-512, at 167a, ¶1 (emphasis added). Accordingly, as the student-athletes concede, the injunction "does not stop the NCAA from continuing to prohibit compensation from" sneaker companies, auto dealerships, boosters, "or anyone else." Brief for Respondents 47-48; see also Brief for United States as *Amicus Curiae* 33. The NCAA itself seems to understand this much. Following the district court's injunction, the organization adopted new regulations specifying that only "a conference or institution" may fund post-eligibility internships. See Decl. of M. Boyer in No. 4:14-md-02541, ECF Doc. 1302-2, p. 6 (ND Cal., Sept. 22, 2020) (NCAA Bylaw 16.3.4(d)).

Even when it comes to internships offered by conferences and schools, the district court left the NCAA considerable flexibility. The court refused to enjoin NCAA rules prohibiting its members from providing compensation or benefits unrelated to legitimate educational activities—thus leaving the league room to police **[***56]** phony internships. As we've observed, the **[*2165]** district court also allowed the NCAA to propose (and enforce) rules defining what benefits do and do not relate to education. App. to Pet. for Cert. in No. 20-512, at 168a, ¶4. Accordingly, the NCAA may seek whatever limits on paid internships it thinks appropriate. And, again, the court stressed that individual conferences may restrict internships however they wish. *Id*., at 169a, ¶6. All these features underscore the modesty of the current decree.

Second, the NCAA attacks the district court's ruling that it may fix the aggregate limit on awards schools may give for "academic or graduation" achievement no lower than its aggregate limit on parallel athletic awards (currently $5,980 per year). *Id*., at 168a-169a, ¶5; *D. Ct. Op., at 1104*. This, the NCAA asserts, "is the very definition of a professional salary." Brief for Petitioner in No. 20-512, at 48. The NCAA also represents that "[m]ost" of its currently permissible athletic awards are "for genuine individual or team *achievement*" and that "[m]ost . . . are received by only a few student-athletes each year." *Ibid.* Meanwhile, the NCAA says, the district **[**342]** court's decree would allow a school to **[***57]** pay players thousands of dollars each year for minimal achievements like maintaining a passing GPA. *Ibid.*

The basis for this critique is unclear. The NCAA does not believe that the athletic awards it presently allows are tantamount to a professional salary. And this portion of the injunction sprang directly from the district court's finding that the cap on athletic participation awards "is an amount that has been shown not to decrease consumer demand." *D. Ct. Op., at 1088*. Indeed, there was no evidence before the district court suggesting that corresponding academic awards would impair consumer interest in any way. Again, too, the district court's injunction affords the NCAA leeway. It leaves the NCAA free to reduce its athletic awards. And it does not ordain what criteria schools must use for their academic and graduation awards. So, once more, if the NCAA believes certain criteria are needed to ensure that academic awards are legitimately related to education, it is presently free to propose such rules—and individual conferences may adopt even stricter ones.

Third, the NCAA contends that allowing schools to provide in-kind educational benefits will pose a problem. This relief focuses **[***58]** on allowing schools to offer scholarships for "graduate degrees" or "vocational school" and to pay for things like "computers" and "tutoring." App. to Pet. for Cert. in No. 20-512, at 167a-168a, ¶2. But the NCAA fears schools might exploit this authority to give student-athletes " 'luxury cars' " "to get to class" and "other unnecessary or inordinately valuable items" only "nominally" related to education. Brief for Petitioner in No. 20-512, at 48-49.

Again, however, this over-reads the injunction in ways we have seen and need not belabor. Under the current decree, the NCAA is free to forbid in-kind benefits unrelated to a student's actual education; nothing stops it from enforcing a "no Lamborghini" rule. And, again, the district court invited the NCAA to specify and later enforce rules delineating which benefits it considers legitimately related to education. To the extent the NCAA believes meaningful ambiguity really exists about the scope of its authority—regarding internships, academic awards, in-kind benefits, or anything else—it has been free to seek clarification from the district court since the court issued its injunction three years ago. The NCAA remains free to do so today. **[***59]** To date, the NCAA has sought clarification only once—about the precise amount at which it can cap academic awards—and the question was quickly resolved. Before conjuring hypothetical concerns **[*2166]** in this Court, we believe it best for the NCAA to present any practically important question it has in district court first.

HN16[] ***LEdHN[16]***[] [16] When it comes to fashioning an antitrust remedy, we acknowledge that caution is key. Judges must resist the temptation to require that enterprises employ the least restrictive means of achieving their legitimate business objectives. Judges must be mindful, too, of their limitations—as generalists, as lawyers, and as outsiders trying to understand intricate business relationships. Judges must remain aware that markets are often more effective than the heavy hand of judicial power when it comes to enhancing consumer welfare. And judges must be open to clarifying and **[**343]** reconsidering their decrees in light of changing market realities. Courts reviewing complex business arrangements should, in other words, be wary about invitations to "set sail on a sea of doubt." *United States v. Addyston Pipe & Steel Co., 85 F. 271, 284 (CA6 1898)* (Taft, J.). But we do not believe the district court fell prey to that temptation. Its judgment does not float on a **[***60]** sea of doubt but stands on firm ground—an exhaustive factual record, a thoughtful legal analysis consistent with established antitrust principles, and a healthy dose of judicial humility.

*

Some will think the district court did not go far enough. By permitting colleges and universities to offer enhanced education-related benefits, its decision may encourage scholastic achievement and allow student-athletes a measure of compensation more consistent with the value they bring to their schools. Still, some will see this as a poor substitute for fuller relief. At the same time, others will think the district court went too far by undervaluing the social benefits associated with amateur athletics. For our part, though, we can only agree with the Ninth Circuit: " 'The national debate about amateurism in college sports is important. But our task as appellate judges is not to resolve it. Nor could we. Our task is simply to review the district court judgment through the appropriate lens of ***antitrust law***.' " *958 F. 3d, at 1265*. That review persuades us the district court acted within the law's bounds.

The judgment is

Affirmed.

Concur by: KAVANAUGH

Concur

JUSTICE **KAVANAUGH**, concurring.

The NCAA has long restricted the compensation and benefits **[***61]** that student athletes may receive. And with surprising success, the NCAA has long shielded its compensation rules from ordinary antitrust scrutiny. Today, however, the Court holds that the NCAA has violated the antitrust laws. The Court's decision marks an important and overdue course correction, and I join the Court's excellent opinion in full.

But this case involves only a narrow subset of the NCAA's compensation rules—namely, the rules restricting the *education-related* benefits that student athletes may receive, such as post-eligibility scholarships at graduate or vocational schools. The rest of the NCAA's compensation rules are not at issue here and therefore remain on the books. Those remaining compensation rules generally restrict student athletes from receiving compensation or benefits from their colleges for playing sports. And those rules have also historically restricted student athletes from receiving money from endorsement deals and the like.

I add this concurring opinion to underscore that the NCAA's remaining compensation rules also raise serious questions **[*2167]** under the antitrust laws. Three points warrant emphasis.

First, the Court does not address the legality of the NCAA's **[***62]** remaining compensation rules. As the Court says, "the student-athletes do not renew their across-the-board challenge to the NCAA's compensation restrictions. Accordingly, we do not pass on the rules that remain in place or the **[**344]** district court's judgment upholding them. Our review is confined to those restrictions now enjoined." *Ante, at ___, 210 L. Ed. 2d, at ___*.

Second, although the Court does not weigh in on the ultimate legality of the NCAA's remaining compensation rules, the Court's decision establishes how any such rules should be analyzed going forward. After today's decision, the

NCAA's remaining compensation rules should receive ordinary "rule of reason" scrutiny under the antitrust laws. The Court makes clear that the decades-old "stray comments" about college sports and amateurism made in *National Collegiate Athletic Assn. v. Board of Regents of Univ. of Okla., 468 U. S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*, were dicta and have no bearing on whether the NCAA's current compensation rules are lawful. *Ante, at ___, 210 L. Ed. 2d, at ___*. And the Court stresses that the NCAA is not otherwise entitled to an exemption from the antitrust laws. *Ante, at ___ - ___, 210 L. Ed. 2d, at ___ - ___*; see also *Radovich v. National Football League, 352 U. S. 445, 449-452, 77 S. Ct. 390, 1 L. Ed. 2d 456 (1957)*. As a result, absent legislation or a negotiated agreement between the NCAA and the student athletes, the NCAA 's remaining compensation rules should be subject to ordinary rule of **[***63]** reason scrutiny. See *ante, at ___ - ___, 210 L. Ed. 2d, at ___ - ___*.

Third, there are serious questions whether the NCAA's remaining compensation rules can pass muster under ordinary rule of reason scrutiny. Under the rule of reason, the NCAAmust supply a legally valid procompetitive justification for its remaining compensation rules. As I see it, however, the NCAAmay lack such a justification.

The NCAA acknowledges that it controls the market for college athletes. The NCAA concedes that its compensation rules set the price of student athlete labor at a below-market rate. And the NCAA recognizes that student athletes currently have no meaningful ability to negotiate with the NCAA over the compensation rules.

The NCAA nonetheless asserts that its compensation rules are procompetitive because those rules help define the product of college sports. Specifically, the NCAA says that colleges may decline to pay student athletes because the defining feature of college sports, according to the NCAA , is that the student athletes are not paid.

In my view, that argument is circular and unpersuasive. The NCAA couches its arguments for not paying student athletes in innocuous labels. But the labels cannot disguise the reality: The **[***64]** NCAA's business model would be flatly illegal in almost any other industry in America. All of the restaurants in a region cannot come together to cut cooks' wages on the theory that "customers prefer" to eat food from low-paid cooks. Law firms cannot conspire to cabin lawyers' salaries in the name of providing legal services out of a "love of the law." Hospitals cannot agree to cap nurses' income in order to create a "purer" form of helping the sick. News organizations cannot join forces to curtail pay to reporters to preserve a "tradition" of public-minded journalism. Movie studios cannot collude to slash benefits to camera crews to kindle a "spirit of amateurism" in Hollywood.

[345]** Price-fixing labor is price-fixing labor. And price-fixing labor is ordinarily a textbook **[*2168]** antitrust problem because it extinguishes the free market in which individuals can otherwise obtain fair compensation for their work. See, *e.g.*, *Texaco Inc. v. Dagher, 547 U. S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. Businesses like the NCAA cannot avoid the consequences of price-fixing labor by incorporating price-fixed labor into the definition of the product. Or to put it in more doctrinal terms, a monopsony cannot launder its price-fixing of labor by calling it product definition.

The **[***65]** bottom line is that the NCAA and its member colleges are suppressing the pay of student athletes who collectively generate *billions* of dollars in revenues for colleges every year. Those enormous sums of money flow to seemingly everyone except the student athletes. College presidents, athletic directors, coaches, conference commissioners, and NCAA executives take in six- and seven-figure salaries. Colleges build lavish new facilities. But the student athletes who generate the revenues, many of whom are African American and from lower-income backgrounds, end up with little or nothing. See Brief for African American Antitrust Lawyers as *Amici Curiae* 13-17.

Everyone agrees that the NCAA can require student athletes to be enrolled students in good standing. But the NCAA 's business model of using unpaid student athletes to generate billions of dollars in revenue for the colleges raises serious questions under the antitrust laws. In particular, it is highly questionable whether the NCAA and its member colleges can justify not paying student athletes a fair share of the revenues on the circular theory that the defining characteristic of college sports is that the colleges do not pay student **[***66]** athletes. And if that asserted justification is unavailing, it is not clear how the NCAA can legally defend its remaining compensation rules.

If it turns out that some or all of the NCAA's remaining compensation rules violate the antitrust laws, some difficult policy and practical questions would undoubtedly ensue. Among them: How would paying greater compensation to student athletes affect non-revenue-raising sports? Could student athletes in some sports but not others receive compensation? How would any compensation regime comply with Title IX? If paying student athletes requires something like a salary cap in some sports in order to preserve competitive balance, how would that cap be administered? And given that there are now about 180,000 Division I student athletes, what is a financially sustainable way of fairly compensating some or all of those student athletes?

Of course, those difficult questions could be resolved in ways other than litigation. Legislation would be one option. Or colleges and student athletes could potentially engage in collective bargaining (or seek some other negotiated agreement) to provide student athletes a fairer share of the revenues that they generate **[***67]** for their colleges, akin to how professional football and basketball players have negotiated for a share of league revenues. Cf. *Brown v. Pro Football, Inc., 518 U. S. 231, 235-237, 116 S. Ct. 2116, 135 L. Ed. 2d 521 (1996)*; *Wood v. National Basketball Assn., 809 F. 2d 954, 958-963 (CA2 1987)* (R. Winter, J.). Regardless of how those issues ultimately would be resolved, however, **[**346]** the NCAA's current compensation regime raises serious questions under the antitrust laws.

To be sure, the NCAA and its member colleges maintain important traditions that have become part of the fabric of America—game days in Tuscaloosa and South Bend; the packed gyms in Storrs and Durham; the women's and men's lacrosse championships on Memorial Day weekend; track and field meets in Eugene; the spring softball and baseball World Series **[*2169]** in Oklahoma City and Omaha; the list goes on. But those traditions alone cannot justify the NCAA 's decision to build a massive money-raising enterprise on the backs of student athletes who are not fairly compensated. Nowhere else in America can businesses get away with agreeing not to pay their workers a fair market rate on the theory that their product is defined by not paying their workers a fair market rate. And under ordinary principles of ***antitrust law***, it is not evident why college sports should be any different. The NCAA is not above **[***68]** the law.

Opinion

MEMORANDUM OPINION AND ORDER

Plaintiff Demetrius Yvonne Parks, doing business as Parks Pharmacy, Inc., brings this action against the Alabama Board of Pharmacy and five individual Board members, alleging due process and antitrust violations arising from action taken against her by the Board in 2016. Defendants collectively moved to dismiss Plaintiff's Complaint (Doc. 27), Plaintiff filed a response (Doc. 32), Defendants filed a reply (Doc. 33), and both parties filed subsequent sur-replies (Docs. 34, 37). Upon consideration of **[*2]** the parties' submissions and the relevant law, the motion to dismiss is GRANTED for the reasons set forth below.

I. BACKGROUND[1]

Plaintiff is a pharmacist who owns and operates multiple pharmacies in Montgomery, Gadsden, and Hayneville. Doc. 1 at 2-3. In 2015, the Board received a complaint from the Alabama Medicaid Agency regarding one or more of Plaintiff's pharmacies. *Id.* at 3. Accordingly, the Board initiated inspections of Plaintiff's pharmacies and discovered numerous illegal or improper practices in which Plaintiff and her pharmacies were allegedly engaged.[2] *Id.* Subsequently, the Board charged Plaintiff and her pharmacies with 46 counts of improper conduct, and it held a public hearing on those charges on August 23-24, 2016. *Id.* at 4. Plaintiff received timely notice of the hearing, and she and her legal counsel were present at the hearing. *See* Docs. 1-4, 34 at 11.

Following the hearing, the Board found Plaintiff and her pharmacies guilty of all 46 charges. On October 6, 2016, the Board entered a final order concluding that Plaintiff and her pharmacies had violated the Alabama Pharmacy Practice Act ("APPA"), the Alabama Uniform Controlled Substances Act ("AUCSA"), and various Board rules and regulations. Doc. 1-5. As sanctions, the Board suspended **[*3]** Plaintiff's pharmacy license for five years; ordered Plaintiff to pay an administrative fine of $27,000; placed the permits of several of her pharmacies on probation for five years; and ordered several of her pharmacies to pay administrative fines in varying amounts. *Id.*

In November 2016, Plaintiff filed a complaint in the Montgomery County Circuit Court, seeking judicial review of the Board's final order. *See Parks v. Ala. State Bd. of Pharmacy*, 03-CV-2016-901576.00 (Montgomery Cty. Cir. Ct. Nov. 22, 2016), Doc. 2. Plaintiff's state court complaint contained many of the allegations in her current Complaint. *See id.* In a subsequent motion to the state court, Plaintiff alleged that the proceedings initiated by the Board violated various provisions of the Alabama Administrative Code, "violated [her] due process rights," and "resulted in a finding contrary to her due process rights." *Id.*, Doc. 24 at 2-3. As relief, Plaintiff sought a court order "overturning all counts of the Board's Final Order of October 6, 2016." *Id.*, Doc. 2 at 5. After reviewing the record from Plaintiff's hearing before the Board, hearing oral arguments from the parties, and reviewing briefs in support of their respective positions, the circuit court determined that Plaintiff engaged in the improper conduct the **[*4]** Board alleged; that "the Board's Final Order and the Finding of Facts set out therein [were] supported by substantial evidence"; and that the Board's conclusions of law based on its findings were correct, with the exception of the sanctions imposed, which the court found too severe. *Id.*, Doc. 143 at 3.

The Board appealed the circuit court's ruling finding the sanctions too severe and, on July 26, 2019, the Alabama Court of Civil Appeals reversed the circuit court's ruling, finding that the sanctions imposed were both statutorily authorized and reasonable. The appellate court stated:

> In this case, the board found that Parks and the pharmacies were guilty of the 46 charges it had alleged against them. The board also found that, in addition to violating the [A]PPA, Parks and the pharmacies were guilty of violating the AUCSA. The circuit court found that the board's findings as to the charges were supported by substantial evidence. The board had the statutory authority to suspend Parks's license, to place the pharmacies on probation, and to impose the administrative fines against Parks and the pharmacies. Under the applicable standard of review, we conclude that the board did not act in **[*5]** an unreasonable, arbitrary, or capricious manner in imposing those sanctions. In reducing the sanctions, the circuit court improperly substituted its judgment for that of the board.

---

[1] The following history is derived from Plaintiff's Complaint (Doc. 1), exhibits attached thereto, and state court records. *See* *Brooks v. Blue Cross & Blue Shield of Fla., Inc., 116 F.3d 1364, 1368 (11th Cir. 1997)* (noting that, in considering a motion to dismiss, a court may consider both the contents of a complaint and its attachments); *see also* *U.S. ex rel. Osheroff v. Humana Inc., 776 F.3d 805, 811-12 n.4 (11th Cir. 2015)* ("Courts may take judicial notice of publicly filed documents, such as those in state court litigation, at the *Rule 12(b)(6)* stage.").

[2] For purposes of this Order, the Court need not discuss the specific conduct underlying the Board's charges against Plaintiff. A recitation of the events and activities that led to the charges can be found in *Ala. State Bd. of Pharmacy v. Parks, 296 So. 3d 316 (Ala. Civ. App. 2019)*, *cert. denied* (Oct. 11, 2019).

> Accordingly, we reverse the circuit court's judgment and remand the cause to the circuit court for it to enter a judgment reinstating the board's decision in its entirety.

Parks, 296 So. 3d at 321, *cert. denied* (Oct. 11, 2019). Thereafter, Parks appealed to the Alabama Supreme Court, which denied certiorari on October 11, 2019. *See Parks*, 03-CV-2016-901576.00, Doc. 173.

Following the Alabama Supreme Court's denial of certiorari, Plaintiff filed suit in this Court on May 7, 2020. *See* Doc. 1. In her Complaint, Plaintiff claims the way the Board handled her inspections, hearing, and sanctions—the same underlying issues previously addressed in state court—violated her due process rights and constitutes anticompetitive and unfair methods of competition in violation of the Sherman Act.[3] *Id.* at 3-7. As relief, she seeks a Court order holding that Defendants' conduct violated due process and the Sherman Act; for all sanctions imposed by the Board to be discharged (that is, for her license to be reinstated, the probationary status of her pharmacy **[*6]** permits to be ended, and all fines and assessments levied against her to be released); $750,000 in compensatory damages; and $5,000,000 in punitive damages. *Id.* at 7-8.

II. DISCUSSION

In their motion and subsequent filings, Defendants argue that Plaintiff's claims must be dismissed for numerous reasons, including that (1) Plaintiff's due process claims are time-barred by the applicable two-year statute of limitations; (2) Plaintiff has failed to state an antitrust claim; and (3) the Court lacks subject matter jurisdiction over Plaintiff's claims under the *Rooker-Feldman* doctrine.[4] After careful review of these arguments, Plaintiff's responses to each, and pertinent case law, the Court finds that Plaintiff's claims are subject to dismissal for the reasons discussed below.

A. Plaintiff's due process claims are time-barred.

Defendants contend that a two-year statute of limitations applies to Plaintiff's due process claims and, therefore, they are time-barred. "All constitutional claims brought under *§ 1983* are tort actions, subject to the statute of limitations governing personal injury actions in the state where the *§ 1983* action has been brought." *McNair v. Allen, 515 F.3d 1168, 1173 (11th Cir. 2008)* (citation omitted). "In Alabama, the statute **[*7]** of limitations in an action for alleged constitutional violations is two years." *Daniel v. Colee*, No. 2:07-CV-01460, 2008 WL 11424117, at *4 (N.D. Ala. Mar. 20, 2008) (citing *McKissick v. Busby, 936 F.2d 520, 521 (11th Cir. 1991)* and *Ala. Code § 6-2-38(l)*); *see also McNair, 515 F.3d at 1173* ("[Plaintiff's] claim was brought in Alabama, where the governing limitations period is two years."). Generally, "the statute of limitations begins to run from the date 'the facts which would support a cause of action are apparent or should be apparent to a person with a reasonably prudent regard for his rights.'" *Brown v. Ga. Bd. of Pardons & Paroles, 335 F.3d 1259, 1261 (11th Cir. 2003)* (quoting *Rozar v. Mullis, 85 F.3d 556, 561-62 (11th Cir. 1996)*).

Plaintiff does not dispute that a two-year statute of limitations applies to her due process claims; she argues that the limitations period did not begin to run until late 2019, when her state court litigation concluded. *See* Docs. 32 at 38, 34 at 27. Plaintiff is incorrect. Plaintiff's due process claims are based solely on the Board's administrative actions

---

[3] Plaintiff also references, in passing, the Federal Trade Commission Act ("FTC Act"). However, the Eleventh Circuit has made clear that "a private right of action . . . does not exist under the FTC Act." *Holmes v. Ocwen Fin. Corp., 747 F. App'x 836, 837 (11th Cir. 2019)* (citing *Jeter v. Credit Bureau, Inc., 760 F.2d 1168, 1174 n.5 (11th Cir. 1985)*).

[4] Defendants also argue that (1) Plaintiff's due process claims are barred by res judicata, barred by collateral estoppel, and fail under *Federal Rule of Civil Procedure 12(b)(6)*; (2) Plaintiff's antitrust claims fail because Defendants are entitled to state-action, or *Parker*, immunity; (3) the Board is entitled to *Eleventh Amendment* sovereign immunity; and (4) the individual Defendants are entitled to quasi-judicial immunity. However, because the Court finds the legal theories above to be dispositive of Plaintiff's claims, it need not address Defendants' additional theories for dismissal.

against her—that is, the inspections of her pharmacies, the subsequent charges, the hearing on those charges, and the resulting imposed sanctions—and not on anything that took place during her state court litigation. All of the Board's action with respect to Plaintiff concluded at the time of its final order in October 2016. Upon receipt of that order,[5] "the facts which would support a cause of action **[*8]** [were] apparent" to Plaintiff; indeed, immediately thereafter, Plaintiff filed suit in state court, based on the same facts, alleging due process and other violations. *See Parks*, 03-CV-2016-901576.00, Docs. 2, 24. Thus, the statute of limitations on Plaintiff's due process claims began to run, at the latest, in October 2016, when Plaintiff received the Board's final order—not when Plaintiff's state court litigation regarding that order ended.[6]

Furthermore, the statute of limitations was not tolled during Plaintiff's state court litigation. In *§ 1983* actions, just as a court must apply the appropriate state statute of limitations, it must also apply that state's rules for tolling that limitations period. *Bowman v. City of Birmingham*, No. 2:04-CV-3487, 2007 WL 9711415, at *1 n.2 (N.D. Ala. Jan. 29, 2007) (citing *Bd. of Regents of Univ. of State of N.Y. v. Tomanio, 446 U.S. 478, 100 S. Ct. 1790, 64 L. Ed. 2d 440 (1980)*). In Alabama, the statute of limitations for personal injury actions may be tolled "only if there is intentional misrepresentation or fraud committed by the defendant." *Bowman*, 2007 WL 9711415, at *1 n.2 (citing *Ala. Code § 6-2-3*; *Dorsey v. U.S. Pipe & Foundry Co., 353 So. 2d 800 (Ala. 1977)*; and *City of Gadsden v. Harbin, 398 So. 2d 707 (Ala. Civ. App. 1981)* (holding that fraudulent concealment of a tort or injury by the defendant will toll the running of the statute of limitations until the tort or injury is discovered or could have been discovered by due diligence)). Plaintiff has not alleged any misrepresentation or fraud by Defendants **[*9]** in this case, intentional or otherwise, that would warrant tolling.

Accordingly, because Plaintiff did not file this action until May 7, 2020, more than three years after the Board issued its final order and the two-year statute of limitations began to accrue, and because there is no basis for tolling, Plaintiff's due process claims are time-barred and must be DISMISSED.

B. Plaintiff's Complaint fails to state an antitrust claim.

Defendants argue that Plaintiff has failed to state a valid antitrust claim under the Sherman Act,[7] and, therefore, any purported antitrust claims must be dismissed under *Federal Rule of Civil Procedure 12(b)(6)*. Under the Federal Rules of Civil Procedure, a complaint must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. While detailed factual allegations are not required, a plaintiff must present "more than an unadorned, the-defendant-unlawfully-harmed-me accusation." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). "A pleading that offers 'labels and conclusions' or 'a formulaic recitation of the elements of a cause of action will not do.'" *Id.* "Nor does a complaint suffice if it tenders 'naked assertion[s]' devoid of 'further factual enhancement.'" *Id.* (quoting *Twombly, 550 U.S. at 557*). "Threadbare recitals **[*10]** of the

---

5 Plaintiff stated in her circuit court complaint that she received the Board's final order on or about October 14, 2016 (*Parks*, 03-CV-2016-901576.00, Doc. 2 at 2) or October 17, 2016 (*Id.* at 4). Both dates fall well outside of the two-year statute of limitations.

6 *See Arezzo v. City of Hoboken, 719 F. App'x 115, 118 (3d Cir. 2018)* (rejecting plaintiff's argument that his due process claim accrued when the state supreme court denied review, instead finding that it accrued when defendant issued its final administrative decision to terminate his employment; "After [defendant] took final administrative action, [plaintiff] could have filed his *Section 1983* claim alleging that [defendant] removed him without providing sufficient due process."); *Foudy v. Indian River Cty. Sheriff's Office, 845 F.3d 1117, 1123 (11th Cir. 2017)* (citing *Chardon v. Fernandez, 454 U.S. 6, 8, 102 S. Ct. 28, 70 L. Ed. 2d 6 (1981)* (holding a *§ 1983* action for unlawful termination accrued when the unlawful act, namely the decision to terminate, took place)).

7 The *Sherman Act* is a federal ***antitrust law*** enacted in 1890 to prohibit combinations and conspiracies in restraint of trade (Section 1) and to regulate monopolies (Section 2). *Ramos v. Tomasino, 701 F. App'x 798, 802 (11th Cir. 2017)* (citing *15 U.S.C. §§ 1-2*). As will be discussed below, it is unclear from the Complaint under which section of the Sherman Act Plaintiff purports to state a claim.

elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.* (citing *Twombly, 550 U.S. at 555* (noting that, although a court must accept all factual allegations in a complaint as true at the motion to dismiss stage, it need not "accept as true a legal conclusion couched as a factual allegation")).

With respect to her purported antitrust claim(s), Plaintiff's Complaint contains only vague, conclusory allegations. For instance, she states broadly that Defendants "engag[ed] in purposeful unilateral broadly prohibitive conduct against Plaintiff that monopolizes or attempts to monopolize the market Plaintiff is engaged in . . . amounting to unfair competition." Doc. 1 at 2. She further states that Defendants, "either jointly or severally, have engaged in prohibitive conduct through either direct acts, attempted acts, purposeful, unfair, and illegal practices against Plaintiff that forces her businesses out of the pharmaceutical markets amounting to unfair competition . . . ." *Id.* at 5. These statements are mere legal conclusions couched as factual allegations, which are insufficient to state an antitrust claim. *See* *Twombly, 550 U.S. at 555*; *see also* *Lombard's, Inc. v. Prince Mfg., Inc., 753 F.2d 974, 975 (11th Cir. 1985)* ("A conclusory allegation of conspiracy to restrain **[*11]** trade will not survive a motion to dismiss.") (citing *Larry R. George Sales Co. v. Cool Attic Corp., 587 F.2d 266, 273-74 (5th Cir. 1979)*).

The only other allegations in the Complaint purportedly related to an antitrust claim are as follows: (1) Defendants made "damaging recorded statements to other professionals in the business" that they "were trying to set [Plaintiff] up for charges"[8] ; (2) Defendants "caused or greatly contributed to the termination of [Plaintiff's] contract with [her] primary vendor"; (3) Defendants "have recklessly taken on conduct that prevented the sale by Plaintiff to a willing buyer of one of her [p]harmacies"; (4) Defendants "intentionally provided or made . . . false statements, or otherwise supplied untrue information regarding Plaintiff on the National Practitioner Data Bank"; and (5) Defendants "illegally confiscated certain medicines belonging to Plaintiff from her stores . . . in violation of due process of law." Doc. 1 at 6-7. First, these allegations are conclusory with no supporting factual allegations, including what specifically occurred, when, and which specific defendants committed each alleged act. *See* *Lombard's, Inc., 753 F.2d at 975* ("The present claim states only a conclusory allegation that there was a conspiracy in violation of the Sherman Act.[] [N]ot **[*12]** only are no facts alleged to demonstrate the conspiracy but the specific participants of the conspiracy are not even identified. Such pleading is inadequate to give the defendant fair notice of [plaintiff's] claim."). Second, and most importantly, Plaintiff alleges injury only to herself, not to competition in general.

As noted above, it is unclear from the Complaint whether Plaintiff purports to state a claim under *Section One* or *Section Two of the Sherman Act*. Under either section, however, a plaintiff must allege facts sufficient to demonstrate injury or harm to competition as a whole, rather than to a specific individual. *See* *Spanish Broad. Sys. of Fla., Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065, 1069 (11th Cir. 2004)* ("Critically, under both sections [of the Sherman Act], an antitrust plaintiff must show harm to competition in general, rather than merely damage to an individual competitor.") (citing *Am. Key Corp. v. Cole Nat'l Corp., 762 F.2d 1569, 1579 n.8 (11th Cir. 1985)* ("Harm to competition is a necessary element of all private antitrust suits under *Sections 1* and *2 of the Sherman Act* . . . ."); *see also* *Weight-Rite Golf Corp. v. U.S. Golf Ass'n, 766 F. Supp. 1104, 1110 (M.D. Fla. 1991)*, *aff'd sub nom. Weight-Rite Golf v. U.S. Golf, 953 F.2d 651 (11th Cir. 1992)* ("[S]howing merely injury to oneself as a competitor is insufficient [to state an antitrust claim]. [I]njury to a competitor need not result in injury to competition.") (citing *L.A. Draper & Son v. Wheelabrator-Frye, Inc., 735 F.2d 414, 421-22 (11th Cir. 1984)*); *Fla. Seed Co., Inc. v. Monsanto Co., 105 F.3d 1372, 1375 (11th Cir. 1997)* ("[Plaintiff] complains not about higher prices or about injury to competition, but about injury to **[*13]** itself. Thus, [plaintiff] had suffered no antitrust injury.").

---

[8] For the reasons stated herein, this allegation—even accepted as true—fails to state an antitrust claim. However, the Court notes as an aside that evidence provided by Plaintiff in support of this allegation actually belies it. Indeed, the affidavit of Tony Bodiford (Doc. 32-1), attached to Plaintiff's response to the motion to dismiss, does not indicate that any of the named Defendants "were trying to set [Plaintiff] up for charges," as Plaintiff suggests. Instead, the affidavit simply indicates that "Sue Roxie, Executive Assistant to Board Secretary, Susan Alverson," neither of whom are named as defendants in this action, told Bodiford that he could work as a pharmacist for Parks Pharmacy despite his license being expired and that, thereafter, Inspector Daniels, who is also not a named defendant in this action, arrived to inspect one of the pharmacies and confiscated Bodiford's expired license. Doc. 32-1 at 1. Nowhere does the affidavit state that Defendants were trying to "set [Plaintiff] up," as Plaintiff repeatedly indicates.

Indeed, in *Spanish Broadcasting*, the Eleventh Circuit affirmed a district court's dismissal of a plaintiff's claims under both sections of the Sherman Act because the plaintiff alleged injury or harm only to itself, rather than to competition in general. *376 F.3d at 1069-77*. The Court recognized that an antitrust plaintiff must show harm to competition rather than to competitors and that "[h]arm to one or many competitors will not suffice." *Id. at 1071-72* (citing *Dickson v. Microsoft Corp., 309 F.3d 193, 206 (4th Cir. 2002)*). The Court noted that "[e]ven an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws." *Id. at 1076* (citing *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*). This includes situations in which one competitor disseminates false information about another. *Id. at 1072* (citing *Aquatherm Indus., Inc. v. Fla. Power & Light Co., 145 F.3d 1258, 1263 (11th Cir. 1998)* ("[Plaintiff's] only claim is [that defendant] acted unfairly by disseminating false information, and this unfair competition in turn harmed [plaintiff's] business. This claim of unfair competition is *not* sufficient to support a claim under *§ 1* or any other federal antitrust provision.") (emphasis in original)).

Like in *Spanish Broadcasting*, Plaintiff fails to allege any injury or harm to competition in general; she **[*14]** simply alleges that Defendants acted unfairly to her.[9] The Eleventh Circuit has made clear that this is insufficient to support an antitrust claim. Accordingly, even construing Plaintiff's Complaint liberally and accepting her allegations as true, Plaintiff has failed to state an antitrust claim under the Sherman Act.

C. The Court lacks subject matter jurisdiction over Plaintiff's claims under the *Rooker-Feldman* doctrine.[10]

Finally, Defendants argue that, even if Plaintiff had stated any valid claims that were not time-barred—which she has not—the Court lacks subject matter jurisdiction over Plaintiff's claims under the *Rooker-Feldman* doctrine.[11] The *Rooker-Feldman* doctrine "is a jurisdictional rule that precludes the lower federal courts from reviewing state court judgments." *Alvarez v. Att'y Gen. for Fla., 679 F.3d 1257, 1262 (11th Cir. 2012)* (citation omitted). The doctrine derives from *28 U.S.C. § 1257*, which "vests authority to review a state court's judgment solely in [the Supreme] Court." *Exxon Mobil Corp. v. Saudi Basic Indus. Corp., 544 U.S. 280, 292, 125 S. Ct. 1517, 161 L. Ed. 2d 454 (2005)*. It applies to "cases brought by state-court losers complaining of injuries caused by state-court judgments rendered before the district court proceedings commenced and inviting district court review and rejection of those judgments." *Id. at 284*. The doctrine "operates **[*15]** as a bar to federal court jurisdiction where the issue before the federal court was 'inextricably intertwined' with the state court judgment so that (1) the success of the federal claim would 'effectively nullify' the state court judgment, or that (2) the federal claim would succeed 'only to the extent that the state court wrongly decided the issues.'" *Alvarez, 679 F.3d at 1262-63* (quoting *Casale v.*

---

[9] Additionally, throughout her filings, Plaintiff repeatedly states that the individual Defendants are both members of the Board and, as pharmacists themselves, active market participants. However, to the extent Plaintiff believes that fact—alone and without any further factual development—establishes the requisite injury or harm to competition, she is incorrect. *See Robb v. Conn. Bd. of Veterinary Med., 157 F. Supp. 3d 130, 146 (D. Conn. 2016)* ("[T]o . . . hold that [plaintiff's] bare allegations make out an antitrust [claim] would effectively mean that nearly all actions of an adjudicative body controlled by a majority of industrial participants would constitute an antitrust [claim] *per se*, an unsupportable argument . . . ."); *see also Ala. Power Co. v. Ala. Elec. Co-op., Inc., 394 F.2d 672, 677 (5th Cir. 1968)* ("The Supreme Court has repeatedly held that, where a restraint upon trade or monopolization is the result of valid governmental action, as opposed to private action, no violation of the [Sherman] Act can be made out.") (citations omitted).

[10] *See Rooker v. Fid. Tr. Co., 263 U.S. 413, 44 S. Ct. 149, 68 L. Ed. 362 (1923)*; *D.C. Ct. of Appeals v. Feldman, 460 U.S. 462, 103 S. Ct. 1303, 75 L. Ed. 2d 206 (1983)*.

[11] In their motion, Defendants only address the applicability of *Rooker-Feldman* to Plaintiff's due process claims, not her antitrust claims. However, because the doctrine is jurisdictional, the Court may consider the doctrine's application to all of Plaintiff's claims sua sponte. *See Jackson v. Farmers Ins. Grp./Fire Ins. Exch., 391 F. App'x 854, 856-57 (11th Cir. 2010)* (affirming sua sponte dismissal of plaintiff's complaint under *Rooker-Feldman* and stating that "a district court may sua sponte consider subject matter jurisdiction at any stage in the litigation and must dismiss a complaint if it concludes that subject matter jurisdiction is lacking").

Tillman, 558 F.3d 1258, 1260 (11th Cir. 2009)). In other words, the doctrine bars the losing party "from seeking what in substance would be appellate review of" the state court's judgment. Ramos, 701 F. App'x at 801 (citing Brown v. R.J. Reynolds Tobacco Co., 611 F.3d 1324, 1330 (11th Cir. 2010)).

Here, Plaintiff seeks, at least in part, the same relief based on the same facts and allegations that were adjudicated in her prior state court proceedings. In both cases, Plaintiff has sought to overturn the Board's final order and do away with the sanctions it imposed. And, in both cases, this relief is or was premised on Plaintiff's allegations that Defendants' conduct violated various statutory provisions and her due process rights.[12] Accordingly, for Plaintiff to prevail in this action, this Court would have to find the circuit court was wrong in determining that the Board's factual findings were supported by substantial evidence, the Board's **[*16]** legal conclusions were correct, and the Board acted lawfully.[13] This Court would also have to invalidate the appellate court's judgment directing the circuit court to "reinstat[e] the board's decision in its entirety." In other words, the only way for Plaintiff to succeed here is for this Court to decide that the state courts—which heard the same facts and underlying issues presented here—wrongfully decided those issues. As such, Plaintiff's current claims are inextricably intertwined with her prior state court claims, and this Court lacks jurisdiction over them. *See, e.g.,* Powell v. Powell, 80 F.3d 464, 468 (11th Cir. 1996) (holding district court lacked jurisdiction over Plaintiff's constitutional claim because, if a federal district court were to hold in Plaintiff's favor on his federal claim, that holding would "effectively nullify" the state court's judgment).

Notably, Rooker-Feldman applies in this instance notwithstanding Plaintiff's purported federal antitrust claims, as those claims are premised on the exact same conduct alleged and considered in the state court litigation.[14] Although *Rooker-Feldman* may generally not apply where a plaintiff did not have a reasonable opportunity to raise her federal claim in state proceedings, ***[*17]*** *see* Casale, 558 F.3d at 1260, the Eleventh Circuit has nevertheless applied *Rooker-Feldman* when a plaintiff's federal claim amounts to nothing more than "an invitation for the district court to review judgments entered against [her] by . . . state courts." Stack v. Mason & Assocs., 245 F. App'x 920, 923-24 (11th Cir. 2007). In *Stack*, the Eleventh Circuit held that the district court lacked subject matter jurisdiction over Plaintiff's antitrust claims under *Rooker-Feldman*. The court stated:

> Although the Stacks' amended complaint alleges RICO conspiracy violations, Sherman Antitrust Act violations, and common law fraud, all of those allegations are based upon the premise that the defendants either extorted or aided the extortion of unreasonably high costs and fees during the foreclosure of their home and the proceedings to enforce Mr. Stack's credit card debt. As such, the Stacks' amended complaint was without a doubt an invitation for the district court to review judgments entered against them by Florida state courts. However, the Stacks have already filed several motions in state court contesting the amount of attorney's fees awarded, and every state court that entertained one of those motions decided that the fees and costs were both appropriate and reasonable. The Stacks **[*18]** are not entitled to have a federal district court review those determinations. Therefore, the district court did not err in dismissing their complaint based on the *Rooker-Feldman* doctrine.

Id.

---

[12] In her response to the motion to dismiss, "Plaintiff concedes that the issues before this Court [are] identical to the issues at the administrative hearing [before the Board]." Doc. 32 at 34. In her subsequent sur-reply, she admits that she "prayed the [circuit court] to review the legalities of Defendants' actions, and reverse [the Board's] decision." Doc. 34 at 15. She also makes clear throughout her various responses that the issues presented here and the issues considered in state court are premised on the same acts and events.

[13] As noted above, Plaintiff admits that she "prayed the [circuit court] to review the legalities of Defendants' actions, and reverse [the Board's] decision," but the court found no illegalities and affirmed the Board's decision, determining "that Plaintiff was . . . guilty of the charges filed by Defendants." Doc. 32 at 12-13.

[14] Indeed, Plaintiff states in her complaint and throughout her various responses that Defendants have violated the Sherman Act "by suspending her personal license . . . and business permits and licenses" (Doc. 34 at 6, n.3) and not following proper procedure in conducting her inspections and subsequent hearing (*Id.* at 8, n.4).

Similarly, Plaintiff's purported antitrust claims in this case are based on the general premise that the Board's final order and sanctions were unlawful. However, both state courts that reviewed the final order found it was based on substantial evidence; contained correct conclusions of law; and was not unreasonable, arbitrary, or capricious. Plaintiff is not entitled to have a federal district court review those determinations under *Rooker-Feldman*, and Plaintiff cannot circumvent *Rooker-Feldman* by simply wrapping the same facts and issues in a different legal theory. *See id.*; *Staley v. Ledbetter, 837 F.2d 1016, 1017-18 (11th Cir. 1988)* (holding district court lacked jurisdiction to review a county agency's decision that had been upheld by the state court of appeals).[15]

Additionally, the fact that the Board was the sole named defendant or respondent in Plaintiff's state court proceedings rather than individual Board members does not render *Rooker-Feldman* inapplicable. **[*19]** The Eleventh Circuit has held that the doctrine may apply even where a party to the federal proceeding was not, and could not have been, a party to the state proceeding. *See* *Powell, 80 F.3d at 467*. The relevant question is not whether a particular party was present in the prior proceeding, but whether the plaintiff had a "reasonable opportunity" to bring his claim in the state court proceeding. *Id. at 468* ("The absence of the Secretary from the state court proceeding did not deprive [plaintiff] of an opportunity to press his claim. If [plaintiff] had prevailed on his claim . . . the Secretary's absence would have been immaterial.").

Plaintiff presented to the circuit court her claim that the Board's conduct was unlawful, but the circuit court found that Plaintiff was guilty of the conduct alleged by the Board and that the Board was statutorily entitled to issue sanctions for that conduct. Like in *Powell*, if Plaintiff had prevailed on her claims in state court and the state court had overturned the Board's final order like she asked, the absence of the individual Board members would have been immaterial.

Accordingly, even if Plaintiff's claims were not subject to dismissal based on the statute of limitations or failure **[*20]** to state a claim, the Court nevertheless lacks subject matter jurisdiction over Plaintiff's claims under *Rooker-Feldman*, and they must be DISMISSED.

III. CONCLUSION

For the reasons set forth above, it is

ORDERED that Defendants' Motion to Dismiss (Doc. 27) is GRANTED, and this case is DISMISSED.

DONE this 22nd day of June, 2021.

Wash. July 1, 2013)* ("Plaintiff may be suing under different causes of action than were chosen in the State Court, but the parties are essentially the same, Plaintiff's goal is the same, and the only real effect of his additional claims, including his *RICO* and Sherman Anti-Trust Act charges, is to provide additional grounds to overturn [defendant's] decision to disbar him."); *Guerrero v. Bensalem Racing Ass'n, Inc., 25 F. Supp. 3d 573, 584 (E.D. Pa. 2014)* (holding plaintiff's Sherman Act claims were barred by *Rooker-Feldman* and stating, "Plaintiff's 'manufactured effort' to re-characterize the source of his injuries is insufficient to circumvent the *Rooker—Feldman* bar.") (citations omitted); *Stern v. Nix, 840 F.2d 208, 212 (3d Cir. 1988)* ("Despite this genuflecting to the *Rooker-Feldman* doctrine, closer consideration convinces us that [plaintiff's] complaint is simply a skillful attempt to mask the true purpose of the action, which essentially is to reverse the judicial decision of the Supreme Court of Pennsylvania, in contravention of *Rooker-Feldman*."), *cert. denied* ***488 U.S. 826, 109 S. Ct. 77, 102 L. Ed. 2d 53 (1988)***).

UNITED STATES MAGISTRATE JUDGE

Reorganized FLI, Inc. v. Williams Cos.

United States Court of Appeals for the Tenth Circuit

June 22, 2021, Filed

No. 20-3056

Reporter
1 F.4th 1214 *; 2021 U.S. App. LEXIS 18505 **

REORGANIZED FLI, INC., Plaintiff - Appellee, v. THE WILLIAMS COMPANIES, INC.; DYNEGY MARKETING & TRADE; WILLIAMS MERCHANT SERVICES COMPANY, INC.; WILLIAMS ENERGY MARKETING & TRADING COMPANY, Defendants - Appellants.

Prior History: [1]** APPEAL FROM THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF KANSAS. (D.C. NO. 2:05-CV-02389-JAR-GEB).

Core Terms

repeal, damages, retroactively, full consideration, retroactive application, apply retroactively, summary judgment, violations, statutory change, district court, vested right, treble damages, prevails, cause of action, quotation, courts, merits, rights, default, measure of compensation, amended complaint, available remedy, eliminating, extinguish, antitrust, changes

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

HN1[] **Standards of Review, De Novo Review**

A federal appellate court reviews a district court's decision on a summary judgment motion de novo, applying the standard set out in *Fed. R. Civ. P. 56(a)*. Under that standard, a district court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Rule 56(a)*. Where there is no assertion the matter involves a genuine dispute as to any material fact, appellate review is limited to determining if the district court correctly applied the law.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Governments > Courts > Judicial Precedent

HN2[] **Federal & State Interrelationships, Erie Doctrine**

When an appeal presents an unsettled question of state law, a federal appellate court must ordinarily attempt to predict how the highest court would interpret the issue. The appellate court may seek guidance from decisions rendered by lower courts in the relevant state, appellate decisions in other states with similar legal principles, district court decisions interpreting the law of the state in question, and the general weight and trend of authority in the relevant area of law.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Governments > Legislation > Effect & Operation > Prospective Operation

Governments > Legislation > Effect & Operation > Retrospective Operation

HN3[] **Procedural Due Process, Scope of Protection**

Many decades ago, the Kansas Supreme Court held that unless there is legislative intent to the contrary, when a change of law merely affects the remedy or law of procedure, all rights of action will be enforced under the new procedure without regard to whether they accrued before or after such change of law. A change that affects the substantive rights of the parties, however, operates prospectively unless its language clearly indicates that the legislature intended it to operate retroactively. These general rules are applicable unless retroactive application of the statutory change would infringe vested rights and thereby violate due process.

Governments > Legislation > Statutory Remedies & Rights

HN4[] **Legislation, Statutory Remedies & Rights**

The Kansas Supreme Court has held that substantive laws give or define the right, give the right or denounce the wrong, or create liability against a defendant for a tort committed. Substantive legislation that creates a cause of action is distinguishable from a provision entitling a party to recover damages if it prevails in its action.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN5[] **Deceptive & Unfair Trade Practices, State Regulation**

The full-consideration provision of *Kan. Stat. Ann. § 50-115* was not a substantive provision because it did not create liability; it merely set out the remedy available to a plaintiff upon proof a defendant was liable for violating *Kan. Stat. Ann. § 50-112*.

Governments > Courts > Rule Application & Interpretation

HN6[] **Courts, Rule Application & Interpretation**

The Kansas Court of Appeals has held that a provision setting out the type of relief a plaintiff may obtain from the court and the procedure for doing so is remedial.

Torts > Wrongful Death & Survival Actions > Defenses > Statute of Limitations

HN7[] **Defenses, Statute of Limitations**

An increase, decrease or repeal of the statutory maximum recoverable in wrongful death actions is not retroactive because statutory increases in damage limitations are changes in substantive rights and not mere remedial changes.

Torts > ... > Damages > Types of Damages > Compensatory Damages

HN8[] **Types of Damages, Compensatory Damages**

Under the Kansas wrongful death statute, the death limitation is not a measure of compensation. Instead, it is simply a limitation upon recovery.

Governments > Legislation > Statute of Limitations > Time Limitations

HN9[] **Statute of Limitations, Time Limitations**

The Kansas Supreme Court has made it clear that a statutory change to a measure of compensation is not substantive, expressly distinguishing the statutory death limitation from a measure of compensation.

Governments > Legislation > Effect & Operation > Retrospective Operation

HN10[] **Effect & Operation, Retrospective Operation**

A remedial change applies retroactively by default unless there is clear legislative intent to the contrary or the retroactive application would affect a party's vested rights.

Governments > Legislation > Effect & Operation > Retrospective Operation

HN11[] **Effect & Operation, Retrospective Operation**

There is no statutory language exempting the repeal of *Kan. Stat. Ann. § 50-115* from retroactive application.

Governments > Legislation > Effect & Operation > Prospective Operation

HN12[] **Effect & Operation, Prospective Operation**

Kan. Stat. Ann. § 50-164 provides limited exemptions to the Kansas default rule that substantive legislation applies only prospectively.

Governments > Legislation > Effect & Operation > Retrospective Operation

HN13[] **Effect & Operation, Retrospective Operation**

To determine whether applying a statutory change retroactively infringes vested rights, Kansas courts consider three factors: (1) the nature of the rights at stake (e.g., procedural, substantive, remedial), (2) how the rights were affected (e.g., were the rights partially or completely abolished by the legislation; was any substitute remedy provided), and (3) the nature and strength of the public interest furthered by the legislation.

Governments > Legislation > Effect & Operation > Retrospective Operation

HN14[] **Effect & Operation, Retrospective Operation**

Under the default Kansas rule, changes to remedial statutes apply retroactively when there is no legislative intent to the contrary.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Governments > Legislation > Effect & Operation > Retrospective Operation

HN15[] **Procedural Due Process, Scope of Protection**

The second factor for determining whether applying a statutory change retroactively infringes vested rights requires the court to examine how retroactive application of the statutory change affects the parties' rights. The Kansas Supreme Court has held that the legislature may retroactively modify remedies by which rights are enforced, unless the modification has the practical effect of abolishing the right. Thus, in some circumstances, the repeal of a purely remedial statutory provision, like *Kan. Stat. Ann. § 50-115*, cannot be applied retroactively because of due process concerns.

Governments > Courts > Rule Application & Interpretation

HN16[] **Courts, Rule Application & Interpretation**

The general rule is that there are no vested rights in a particular remedy or method of procedure.

Governments > Legislation > Effect & Operation > Retrospective Operation

HN17[] **Effect & Operation, Retrospective Operation**

As to the third and final factor for determining whether applying a statutory change retroactively infringes vested rights, the court examines the nature and strength of the public interest furthered by the legislation.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN18[] **Reviewability of Lower Court Decisions, Preservation for Review**

If a party specifically asks for full consideration damages under repealed *Kan. Stat. Ann. § 50-115* but it also requests such other and further relief as the court may deem necessary and appropriate, *Fed. R. Civ. P. 54* does not require any greater specificity than this to preserve a remedy.

Civil Procedure > Appeals > Appellate Jurisdiction > Certified Questions

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

HN19[] **Appellate Jurisdiction, Certified Questions**

The Tenth Circuit has previously exercised its discretion in an interlocutory appeal to resolve whether a party is entitled to summary judgment even though the district court did not expressly certify the question of whether a genuine issue of material fact precluded summary judgment. Under the standard set out in Rural Water Dist. No. 4 v. City of Eudora, the appellate court should exercise its discretion if an issue is fairly included within the certified order and is a controlling question of law.

Opinion by: MURPHY

Opinion

[*1217] **MURPHY**, Circuit Judge.

I. Introduction [2]**

In 2005, Appellee Reorganized FLI, Inc.[1] ("Farmland") brought an action against Appellants alleging violations of the *Kansas Restraint of Trade Act ("KRTA")*. Farmland sought, *inter alia*, full consideration damages pursuant to

[1] The named plaintiff in this action was J.P. Morgan Trust Company in its capacity as the Liquidating Trustee of the Farmland Industries Liquidating Trust.

Kan. Stat. Ann. § 50-115. In 2019, Appellants moved for summary judgment on Farmland's claims, arguing the repeal of *§ 50-115* operated retroactively to preclude Farmland from obtaining any relief. The Kansas District Court denied the motion for summary judgment but granted Appellants' motion for leave to file an interlocutory appeal with this court. In this interlocutory appeal, Appellants seek reversal of the district court's denial of summary judgment and a ruling ordering the district court to enter judgment in their favor.

Exercising jurisdiction pursuant to *28 U.S.C. § 1292(b)*, this court **affirms** the denial of summary judgment but for reasons different from those of the district court. Although we conclude *§ 50-115* applies retroactively to foreclose Farmland from recovering full consideration damages, Farmland is entitled to other relief if it prevails on the merits of its claims. Thus, the repeal of *§ 50-115* does not leave Farmland without a remedy and Appellants are not entitled to summary judgment.

II. Background

On August 8, 2005, Farmland filed an action in **[**3]** Kansas state court alleging, *inter* ***[*1218]*** *alia*, that Appellants engaged in anti-competitive conduct by conspiring to manipulate the price of natural gas, in violation of the KRTA, *Kan. Stat. Ann § 50-112*.[2] According to Farmland's complaint, Appellants' conduct distorted and artificially inflated the price Farmland paid for natural gas. After Appellants removed the matter to the United States District Court for the District of Kansas, Farmland filed an amended complaint. The matter was thereafter transferred to the United States District Court for the District of Nevada where it was consolidated with multi-district litigation addressing similar claims made by other plaintiffs (the "MDL Case"). In 2019, the matter was returned to the District of Kansas.

At the time Farmland's claims arose, Kansas law permitted "any person injured or damaged by any such arrangement, contract, agreement, trust or combination, described in [*Kan. Stat. Ann § 50-112*] . . . [to] sue for and recover . . . the full consideration or sum paid by such person." *Kan. Stat. Ann. § 50-115* (repealed 2013). Plaintiffs who alleged violations of *§ 50-112* could also seek treble damages. *Id. § 50-161(b)*. Farmland's amended complaint contains the following paragraph related to damages:

> During the relevant period of the **[**4]** antitrust violations by defendants and their co-conspirators, plaintiff purchased natural gas, and by reason of the violations alleged herein, paid more for natural gas than it would have paid in the absence of such antitrust violations. As a result, plaintiff has been injured. Plaintiff is seeking damages under the full consideration damage remedy of *Kansas Statutes Annotated § 50-115* during the relevant time period, January 1, 2000 thru December 31, 2001, the exact dates being undetermined at this time. The amount of damages sustained by plaintiff is presently undetermined.

In its Prayer for Relief, the amended complaint also asked that Farmland "be awarded such other and further relief as [the] Court may deem necessary and appropriate." *Section 50-115* was repealed in 2013, thereby eliminating full consideration damages for violations of *§ 50-112*. Farmland did not amend its complaint after the statute was repealed to remove its request for full consideration damages.

In 2019, Appellants moved for summary judgment, asserting the repeal of full consideration damages applies retroactively, leaving Farmland with no available remedy and, thus, no viable suit. The district court denied Appellants' motion, concluding the repeal of *§ 50-115* operated only **[**5]** prospectively and, thus, Farmland remains entitled to full consideration damages if it prevails on the merits of its claims. The district court, however, certified for interlocutory appeal the question of whether the repeal of *§ 50-115* applies retroactively under Kansas law, noting there was substantial ground for difference of opinion.

III. Discussion

[2] Farmland's complaint was brought pursuant to *Kan. Stat. Ann §§ 50-101*, *-108*, *-112*, *-115*, *-117*, and *-161*.

A. Standard of Review

HN1[] This court reviews a district court's decision on a summary judgment motion de novo, applying the standard set out in *Rule 56(a) of the Federal Rules of Civil Procedure*. *Doe v. Univ. of Denver, 952 F.3d 1182, 1189 (10th Cir. 2020)*. Under that standard, a "court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. **[*1219]** Because there is no assertion this matter involves a genuine dispute as to any material fact, our review is limited to determining if the district court correctly applied the law. *See Wolf v. Prudential Ins. Co. of Am., 50 F.3d 793, 796 (10th Cir. 1995)*; *see also Knoll v. Olathe Sch. Dist. No. 233, 309 Kan. 578, 439 P.3d 313, 315 (Kan. 2019)* ("A statute's applicability presents a question of law.").

B. Retroactivity Under Kansas Law

Both parties acknowledge Kansas law controls the analysis of whether the repeal of *§ 50-115* applies retroactively. They also agree the Kansas courts have not definitively decided the question. ***HN2***[] When an appeal presents an unsettled question **[**6]** of state law, we must ordinarily attempt to predict how the highest court would interpret the issue.[3] *Schrock v. Wyeth, Inc., 727 F.3d 1273, 1284 (10th Cir. 2013)*. We "may seek guidance from decisions rendered by lower courts in the relevant state, appellate decisions in other states with similar legal principles, district court decisions interpreting the law of the state in question, and the general weight and trend of authority in the relevant area of law." *Wade v. EMCASCO Ins. Co., 483 F.3d 657, 666 (10th Cir. 2007)* (quotation and citations omitted).

HN3[] Many decades ago, the Kansas Supreme Court held that unless there is legislative intent to the contrary, "when a change of law merely affects the remedy or law of procedure, all rights of action will be enforced under the new procedure without regard to whether they accrued before or after such change of law." *Jones v. Garrett, 192 Kan. 109, 386 P.2d 194, 199 (Kan. 1963)*. A change that affects the substantive rights of the parties, however, "operates prospectively unless its language clearly indicates that the legislature intended it to operate retroactively." *Norris v. Kan. Empl. Sec. Bd. of Review, 303 Kan. 834, 367 P.3d 1252, 1257 (Kan. 2016)* (quotation omitted). These general rules are applicable unless retroactive application of the statutory change would infringe vested rights and thereby violate due process. *Owen Lumber Co. v. Chartrand, 276 Kan. 218, 73 P.3d 753, 756 (Kan. 2003)* (noting the Kansas Supreme Court has repeatedly held that procedural and remedial **[**7]** statutes "will be given retrospective application only if such retrospective application will not affect a vested right of a party" (quotation and alteration omitted)); *Brennan v. Kan. Ins. Guar. Ass'n, 293 Kan. 446, 264 P.3d 102, 113 (Kan. 2011)*.

The parties do not quarrel with any of these general principles of Kansas law. Their disagreement centers on whether *§ 50-115* was remedial or substantive. If substantive, the repeal operates prospectively under the general Kansas rule, and Farmland's right to full consideration damages if it prevails on the merits is unaffected. If remedial, however, the repeal operates retroactively unless the Kansas legislature intended otherwise or unless retroactive application would affect Farmland's vested rights. If applied retroactively, the repeal of *§ 50-115* will extinguish Farmland's ability to recover full consideration damages.

C. Section 50-115's Full-Consideration Provision Was Remedial

HN4[] The Kansas Supreme Court has held that "[s]ubstantive laws give or define the right, give the right or denounce the wrong, or create liability against a defendant for a tort committed." *Brennan, 264 P.3d at 113*. Substantive legislation that **[*1220]** creates a cause of action is distinguishable from a provision entitling a party to recover damages if it prevails in its action. *Foster v. Humburg, 180 Kan. 64, 299 P.2d 46, 50 (Kan. 1956)* ("The

---

[3] Neither party has asked this court to certify the retroactivity question to the Kansas Supreme Court.

'cause **[**8]** of action' is the wrong done, not the measure of compensation for it, or the character of relief sought."). "Damage is not the cause of action. It is merely a part of the remedy which the law allows for the injury resulting from a breach or wrong." *Id.* ***HN5***[] Applying these principles of Kansas law, we conclude the full-consideration provision of *§ 50-115* was not a substantive provision because it did not create liability; it merely set out the remedy available to a plaintiff upon proof a defendant was liable for violating *§ 50-112*.[4] This conclusion is supported by the express language used by the Kansas legislature in *§ 50-112* and *§ 50-115*.

Section 50-112 provides as follows:

> Except as provided in *K.S.A. 50-163*, and amendments thereto, all arrangements, contracts, agreements, trusts, or combinations between persons made with a view or which tend to prevent full and free competition in the importation, transportation or sale of articles imported into this state, or in the product, manufacture or sale of articles of domestic growth or product of domestic raw material, or for the loan or use of money, or to fix attorney or doctor fees, and all arrangements, contracts, agreements, trusts or combinations between persons, designed or which tend to advance, **[**9]** reduce or control the price or the cost to the producer or to the consumer of any such products or articles, or to control the cost or rate of insurance, or which tend to advance or control the rate of interest for the loan or use of moneys to the borrower, or any other services, are hereby declared to be against public policy, unlawful and void.

Section 50-112 describes multiple arrangements that wrongly restrain competition in violation of Kansas public policy, plainly fitting within the definition of a substantive provision under settled Kansas law. *See* *Brennan, 264 P.3d at 113*. *Section 50-115*, on the other hand, did not define any right, denounce any wrongs, or create liability. It merely referenced *§ 50-112* and provided that once a litigant proved a defendant engaged in the conduct prohibited by *§ 50-112*, he was entitled to damages equal to "the full consideration or sum paid . . . for any goods, wares, merchandise and articles included in or advanced or controlled in price by such combination, or the full amount of money borrowed."[5] *Kan. Stat. Ann. § 50-115* (repealed 2013). ***HN6***[] The Kansas Court of Appeals has held that a provision setting "out the type of relief a [plaintiff] may obtain from the court and the procedure for doing so" is remedial. **[*1221]** *Dester v. Dester, 50 Kan. App. 2d 914, 335 P.3d 119, 123 (Kan. Ct. App. 2014)*. The full-consideration provision **[**10]** of *§ 50-115* did just that and no more.

Relying on statements made by the Kansas Supreme Court in *Kleibrink v. Missouri-Kansas-Texas Railroad Co., 224 Kan. 437, 581 P.2d 372 (Kan. 1978)*, Farmland argues the repeal of *§ 50-115* affected the amount of damages recoverable for violations of the KRTA and, under Kansas law, amendments affecting the amount of damages are substantive. The *Kleibrink* court addressed the question of whether an increase in the statutory limit recoverable in a wrongful death action applied prospectively or retroactively. *Id. at 378*. ***HN7***[] Concluding the statutory change applied prospectively, the Kansas Supreme Court adopted the position that "an increase, decrease or repeal of the statutory maximum recoverable in wrongful death actions is Not retroactive" because "[s]tatutory increases in damage limitations are changes in substantive rights and not mere remedial changes." *Id. at 378-79* (quotation omitted). ***HN8***[] As support for this conclusion, the *Kleibrink* court stated that "under [the Kansas] wrongful death statute, the death limitation is Not a measure of compensation. Instead, it is simply a limitation upon recovery." *Id. at 379*. It is not surprising that Kansas treats an increase in statutory damages as substantive. Such a change

---

[4] Our retroactivity analysis has no bearing on whether the damages provisions of the KRTA are procedural or substantive for purposes of *Erie Railroad Co. v. Tompkins, 304 U.S. 64, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)*.

[5] *Section 50-115* also gave any person injured or damaged by the conduct set out in *§ 50-112* the right to "sue for" full consideration damages. But this appeal does not involve the question of whether a provision creating a private right of action is substantive or procedural. Further, the repeal of *§ 50-115* had no affect on the ability of "any person who may be damaged or injured by any agreement, monopoly, trust, conspiracy or combination which is declared unlawful by the Kansas restraint of trade act" to bring suit pursuant to *Kan. Stat. Ann. § 50-161(b)*. And, more to the point, Appellants have not argued Farmland's suit should be dismissed because the repeal of *§ 50-115* retroactively stripped Farmland of the right to bring a cause of action alleging a violation of *§ 50-112*. Appellants have argued only that Farmland can no longer seek full consideration damages as a result of the repeal of *§ 50-115*. Accordingly, our review is limited to the damages provision of *§ 50-115*.

impacts the amount of a defendant's maximum liability based on legislative **[**11]** decree, not wrongful conduct. Thus, if applied retroactively, an increase in statutory damage limitations could increase a defendant's liability for past conduct without regard to the specifics of defendant's conduct or plaintiff's evidence of damages.

The situation presented here is not analogous to that in *Kleibrink* because the repeal of § 50-115 was not a change to a statutory damage limitation and did not, on its face, increase or decrease a defendant's liability for past conduct. It, instead, involved a change to the measure of compensation for violations of the KRTA by eliminating full consideration damages. ***HN9***[] The Kansas Supreme Court in *Kleibrink* made it clear that a statutory change to a measure of compensation is not substantive, expressly distinguishing the statutory "death limitation" from "a measure of compensation." *Id.* Thus, *Kleibrink* supports, rather than undermines, the proposition that the repeal of § 50-115 applies retroactively because § 50-115 was remedial and not substantive.[6]

Farmland also relies on the decision of the United States Supreme Court in *Landgraf v. USI Film Products, 511 U.S. 244, 114 S. Ct. 1483, 128 L. Ed. 2d 229 (1994)*. *Landgraf* involved changes made to Title VII by the Civil Rights Act of 1991, including the addition of the right **[**12]** to recover compensatory and punitive damages for violations of the statute. *Id. at 247*. Before the amendment, "the law did not then authorize any recovery of damages even though [the plaintiff] was injured." *Id. at 250*; *see also id. at 252* ("Before the enactment of the 1991 Act, Title VII afforded only 'equitable' remedies. The primary **[*1222]** form of monetary relief available was backpay."). After the amendment, a plaintiff was able to sue for "monetary relief for some forms of workplace discrimination that would not previously have justified *any* relief." *Id. at 254*. Because the new compensatory damages provision "effect[ed] a major expansion in the relief available to victims of employment discrimination" and "attache[d] an important new legal burden" to the conduct of the defendant occurring before its enactment, the Court held the amendment was substantive and did not apply retroactively. *Id. at 255, 282-83*. The Court characterized the amendments to Title VII made by the Civil Rights Act of 1991 as "creating a new cause of action" by "confer[ring] a new right to monetary relief on [employees] who were victims of a hostile work environment but were not constructively discharged." *Id. at 283*. The repeal of § 50-115, however, did not affect a plaintiff's right to recover compensatory damages **[**13]** for violations of the KRTA. That right existed before the repeal and continues to exist after. Neither did the repeal impose new duties on a defendant or expand the conduct prohibited by the KRTA. Thus, the analysis of the Supreme Court in *Landgraf* has no bearing on the question before us and does not alter our conclusion that the repeal of § 50-115 was remedial, not substantive.[7]

D. The Repeal of § 50-115 Applies Retroactively

Having concluded § 50-115 was a remedial provision, not a substantive provision, we must now address whether its repeal applies retroactively. ***HN10***[] Kansas law on the point is clear: a remedial change applies retroactively by default unless there is clear legislative intent to the contrary or the retroactive application would affect a party's vested rights. *Owen Lumber Co., 73 P.3d at 755-56*. ***HN11***[] As to the first part of this inquiry, there is no statutory language exempting the repeal of § 50-115 from retroactive application.

[6] For the same reasons, the Kansas Supreme Court's decision in *In re Estate of Laue, 225 Kan. 177, 589 P.2d 558 (Kan. 1979)*, does not support Farmland's argument that the repeal of § 50-115 was substantive. *In re Estate of Laue* involved an amendment to the statutory allowance of a surviving spouse. *Id. at 567*. Like the change at issue in *Kleibrink*, the statutory amendment in *In re Estate of Laue* was substantive because it legislatively established the amount to which the surviving spouse was entitled. The Kansas Supreme Court noted "[t]he statutory allowance does not involve a mere remedy or procedure." *Id.* Again, that is not the situation presented in this matter because § 50-115 did not dictate a minimum or maximum damages award prior to its repeal.

[7] Further, the Supreme Court's decision in *Landgraf* was not grounded in Kansas law and the issue currently before this court involves only a question of Kansas law.

At the same time it repealed *§ 50-115*, the Kansas legislature enacted a separate provision addressing the retroactivity of the changes made to *§§ 50-101*, *50-112*, and *50-163*. That provision, *Kan. Stat. Ann. § 50-164*, is still part of the Kansas Code and reads as follows:

> *K.S.A. 50-163* and the amendments to *K.S.A. 50-101* and *50-112* by this act shall be applied retroactively to any choses in action **[**14]** or defenses premised on any provision of the Kansas restraint of trade act amended or repealed by this act, and any such choses in action or defenses that have accrued as of the effective date of this act shall be abated, but causes of action that were pending in any court before the effective date of this act, shall not be abated. All other non-remedial provisions of this section shall be applied prospectively.

By its express terms, *§ 50-164* directs that substantive amendments made to *§ 50-101* and *§ 50-112* and the 2013 enactment of *§ 50-163* apply retroactively in certain circumstances. ***HN12***[] In other words, *§ 50-164* provided limited exemptions to the Kansas default rule that substantive legislation applies only prospectively. *Section 50-164* also reiterated the default Kansas rule that non-remedial statutory provisions apply prospectively. But, as we held above, *§ 50-115* was remedial and, thus, this clause is inapplicable. Further, the statutory provision at issue here, *i.e.*, *§ 50-115*, is not referenced in *§ 50-164*. Thus, the Kansas legislature did not express any intention in *§ 50-164* to exempt the repeal of **[*1223]** *§ 50-115* from the default Kansas rules on retroactivity.

This leaves only the question of whether the retroactive application of the statutory change would affect Farmland's vested **[**15]** rights. *Owen Lumber Co., 73 P.3d at 755-56*. ***HN13***[] To determine whether applying a statutory change retroactively infringes vested rights, Kansas courts consider three factors: "(1) the nature of the rights at stake (e.g., procedural, substantive, remedial), (2) how the rights were affected (e.g., were the rights partially or completely abolished by the legislation; was any substitute remedy provided), and (3) the nature and strength of the public interest furthered by the legislation." *Brennan, 264 P.3d at 113* (quotation omitted). As to the first factor, we have already concluded *§ 50-115* was a remedial statute. ***HN14***[] Thus, the first factor weighs in favor of retroactive application because, under the default Kansas rule, changes to remedial statutes apply retroactively when there is no legislative intent to the contrary. *See* *Owen Lumber Co., 73 P.3d at 755-56*.

HN15[] The second factor requires this court to examine how retroactive application of the statutory change affects the parties' rights. The Kansas Supreme Court held in *Brennan* that "the legislature may retroactively modify remedies by which rights are enforced, unless the modification has the practical effect of abolishing the right." *Brennan, 264 P.3d at 114* (citing *Owen Lumber Co., 73 P.3d at 753*). Thus, in some circumstances, the repeal of a purely remedial statutory provision, like *§ 50-115*, cannot **[**16]** be applied retroactively because of due process concerns. *See id.* ("[A] statute may be remedial and affect a vested right . . . ."). *Brennan* involves a medical malpractice suit brought by a patient against his doctor. *Id. at 106*. After the complaint was filed, the doctor's malpractice insurer became insolvent, triggering the statutory obligation of the Kansas Insurance Guaranty Association ("KIGA") to cover the claim. *Id.* While the suit was pending, the Kansas legislature passed a law authorizing KIGA to offset its liability to claimants with amounts paid by the claimant's health insurance. *Id. at 106*. The statutory change was expressly made retroactive to pending claims. *Id.* The Kansas Supreme Court held that retroactive application of the change to Mr. Brennan's pending claim against KIGA adversely impacted his "vested right" because it "extinguished Brennan's right to recover from KIGA," a "statutory right [that] arose at the time [the doctor's malpractice insurer] was declared insolvent." *Id. at 114*; *see also* *id. at 106* (noting Mr. Brennan "received medical reimbursements from his personal health insurance policy that totaled more than the insolvent insurer's policy limits"). Thus, even though the statutory change was **[**17]** purely remedial, the Kansas Supreme Court held there were due process concerns if it was applied retroactively to Mr. Brennan. *Id. at 114*.

In *Norris*, the Kansas Supreme Court addressed the retroactivity of a procedural amendment. *367 P.3d at 1253*. *Norris* involved a statutory deadline that was shortened after the plaintiff filed a petition for judicial review of an adverse decision by the Kansas Employment Security Board of Review. *Id. at 1255*. The Kansas Supreme Court held the new law was procedural and, thus, would generally apply retroactively. *Id. at 1258*. However, retroactive application would bar the plaintiff's action even though it was timely when filed, eliminating the plaintiff's cause of action entirely. *Id.* Accordingly, the court held that retroactive application was inappropriate. *Id.*

The repeal of *§ 50-115* did not completely or even partially extinguish any of Farmland's vested rights. Both before and after the 2013 repeal, Farmland, or any **[*1224]** other plaintiff, could bring a private action for alleged violations of the KRTA—including violations detailed in *§ 50-112*—pursuant to *§ 50-161(b)* and could recover "treble the actual damages sustained." The repeal of *§ 50-115* only affected Farmland's right to recover full consideration damages, which is not a substantive **[**18]** right but merely a remedy by which the substantive rights set out in the KRTA are enforced. ***HN16***[] *See State v. Dupree, 304 Kan. 43, 371 P.3d 862, 873 (Kan. 2016)* ("[T]he general rule is that there are no vested rights in a particular remedy or method of procedure." (quotation omitted)). Further, unlike the situations in *Brennan* and *Norris*, retroactive application of the statutory change *in this matter* does not have the practical effect of eliminating Farmland's cause of action alleging a violation of the KRTA. Farmland is not precluded from recovering treble damages if it prevails on the merits of its claims. *See infra* § III. F.

HN17[] As to the third and final factor, we examine "the nature and strength of the public interest furthered by the legislation." *Brennan, 264 P.3d at 113* (quotation omitted). The purposes of the 2013 amendments to the KRTA were set out by the Kansas legislature in *Kan. Stat. Ann. § 50-163*. Those purposes include "harmoniz[ing]" the KRTA with federal ***antitrust law*** which does not allow for recovery of full consideration damages. *Kan. Stat. Ann. § 50-163(b)*; *see also 15 U.S.C. § 15(a)* (providing treble damages may be recovered by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws"). *Section 50-163(d)(3)* also states that the KRTA "shall not be construed to prohibit . . . recovery **[**19]** of damages pursuant to *[Kan. Stat. Ann. §] 50-161*, and amendments thereto." According to Farmland, however, if retroactive application of the repeal of *§ 50-115* results in the dismissal of its claims against Appellants, none of these interests are furthered. To the contrary, Farmland argues, dismissal of long-pending claims—assuming they have merit—permits antitrust violators to escape liability. As we have already concluded, Farmland's concern is unfounded. Retroactive application of the statutory elimination of full consideration damages does not compel dismissal of Farmland's claims and it is entitled to treble damages if it prevails on the merits and proves entitlement to damages. Accordingly retroactive application of the repeal furthers the purposes of the statutory change by harmonizing Kansas law with federal law while still providing a prevailing plaintiff with a remedy.[8]

Having considered all the factors deemed relevant by the Kansas Supreme Court, we conclude the repeal of *§ 50-115* applies retroactively in this matter. All three factors weigh in favor of retroactivity: the repealed statute was purely remedial, applying the repeal retroactively does not present any due process concerns because Farmland's vested rights **[**20]** are not affected by retroactive application, and retroactive application of the repeal promotes the purposes of the legislative change.

E. Kansas Courts Have Not Considered Whether the Repeal of § 50-115 Applies Prospectively or Retroactively

The only remaining consideration is whether the Kansas courts have previously indicated the repeal of *§ 50-115* should not be applied retroactively. Farmland relies on two Kansas cases for the proposition the Kansas courts, if squarely presented **[*1225]** with the question, would rule in favor of prospective application. The first, *Smith v. Philip Morris Cos., 50 Kan. App. 2d 535, 335 P.3d 644, 651 (Kan. Ct. App. 2014)*, involved a class action brought against cigarette manufacturers, alleging the manufacturers conspired to fix the wholesale price of cigarettes in violation of the KRTA. In its opinion, the Kansas Court of Appeals provided a short overview of the KRTA, noting "substantial changes" had been made to the law in 2013. *Id. at 652-53*. The court mentioned the repeal of *§ 50-115* as one of the changes that did "not apply retroactively to cases . . . already pending" at the time of the amendments. *Id. at 652* Although the plaintiff in *Smith* sought full consideration damages, *id. at 653*, the matter before the Kansas Court of Appeals involved only the question of whether defendants were entitled **[**21]** to summary judgment on plaintiffs' conspiracy claim. *Id. at 651-52* ("The case is now before us because the district court found Plaintiffs stated only a claim for a wholesale price-fixing conspiracy and granted Defendants summary judgment on that claim."). To answer that question, the court focused its attention on *§ 50-112*, the provision of the KRTA proscribing certain activities in restraint of trade. *Id. at 653*. Because the court concluded summary judgment

---

[8] Farmland has not argued the treble damages remedy set out in *§ 50-161(b)* is insufficient to make a plaintiff whole.

was appropriate, any mention of full consideration damages or the retroactivity of the repeal of § 50-115 was dicta. Further, the statement in *Smith* is neither precedent for nor a suggestion that the repeal in 50-115 applies only prospectively since the Kansas Court of Appeals did not engage in any retroactivity analysis.

The second case on which Farmland relies, *O'Brien v. Leegin Creative Leather Prods., 321 P.3d 799, 2014 WL 1362657 (Kan. Ct. App. 2014)* ("*O'Brien II*"), is no more helpful. The Kansas Court of Appeals issued an unpublished decision in *O'Brien II* addressing a KRTA case pending at the time § 50-115 was repealed. The issue appealed was whether the district court abused its discretion when it modified the class by narrowing it. *321 P.3d 799, [WL] at *4*. As it did in *Smith*, the Kansas Court of Appeals began its analysis with a brief overview of the changes made to the KRTA in **[**22]** 2013. *321 P.3d 799, [WL] at *5*. It then stated, without any analysis of the Kansas retroactivity principles discussed at length above, that it was evaluating the district court's ruling based on "the law as it stood before April 18, 2013, not afterward." *Id.* Although the court later discussed § 50-115 in its analysis of the district court's ruling, *321 P.3d 799, [WL] at *9*, the discussion was based on the court's assumption that all the pre-2013 statutory provisions applied. Because the *O'Brien II* memorandum opinion lacks any meaningful retroactivity analysis, it does not support Farmland's assertion that the Kansas courts have indicated they would not apply the repeal of § 50-115 retroactively to cases pending at the time of the repeal.

Having considered the parties' arguments, we conclude no Kansas appellate court has directly, or even indirectly, addressed the retroactivity issue currently before this court.[9] Thus, no Kansas case law affects our conclusion that the repeal of § 50-115 operates retroactively to extinguish **[*1226]** Farmland's ability to recover full consideration damages.

F. Appellants' Request for Summary Judgment

In Appellants' opening brief, they ask for three forms of relief: (1) a ruling that the repeal of § 50-115's full consideration **[**23]** remedy applies retroactively; (2) reversal of the district court's decision denying their motion for summary judgment; and (3) remand of the matter to the district court with instructions to enter judgment in their favor. Although we conclude the repeal of full consideration damages applies retroactively, Appellants are not entitled to summary judgment.

In support of their request for summary judgment, Appellants argue the repeal of § 50-115 has left Farmland without any available remedy because it has only sought full consideration damages and cannot now change tack and seek treble damages. They assert Farmland had ample opportunity after the repeal of § 50-115 to amend its complaint to specifically seek treble damages pursuant to § 50-161(b) but purposefully chose not to do so. *See Norris, 367 P.3d at 1258* (holding a procedural statute did not apply retroactively, in part, because the plaintiff "d[id] not have a reasonable time after the enactment of the statute to comply" with the statutory change). Appellants characterize Farmland's decision to challenge retroactive application of the statutory change as a choice "to exclusively pursue a potentially more lucrative remedy" even though the treble damages remedy has always been available. **[**24]** According to Appellants, the lack of any available remedy is the result of Farmland's litigation strategy, not the mere retroactive application of the statutory change.

---

[9] We note the United States District Court for the District of Nevada concluded the repeal of § 50-115 operates retroactively. *In re W. States Wholesale Nat. Gas Antitrust Litig., MDL No. 1566, 2017 U.S. Dist. LEXIS 134890, 2017 WL 3610553, at *3-*4 (D. Nev. Aug. 22, 2017)*, *rev'd on other grounds by 743 F. App'x 802 (9th Cir. 2018)*. That ruling was based on the district court's conclusion the statute was remedial, not substantive. *2017 U.S. Dist. LEXIS 134890, [WL] at *3*. The court, however, did not engage in any extended analysis of why § 50-115 was remedial or examine whether retroactive application of its repeal would affect vested rights.

We conclude Farmland's amended complaint, filed on October 17, 2005, preserves the treble damages remedy available under *§ 50-161(b)*.[10] In the "Jurisdiction and Damages" paragraph of its amended complaint, Farmland stated its claims were brought pursuant to several Kansas statutes, including *§ 50-161* which is the treble damages provision. As to the damages sought, the paragraph further stated Farmland was suing to "obtain damages and injunctive and other equitable relief which plaintiff has sustained due to violations by defendants named herein **of these statutes** (emphasis added)." In its prayer for relief, Farmland specifically asked for full consideration damages under *§ 50-115* but it also requested "such other **[*1227]** and further relief as [the] Court may deem necessary and appropriate."[11] ***HN18***[] *Rule 54 of the Federal Rules of Civil Procedure* does not require any greater specificity than this to preserve a remedy.[12] *See* *Fed. R. Civ. P. 54* (stating that other than default judgments, "[e]very other final judgment should grant the relief to which each party is entitled, even if the party has not demanded that relief in its pleadings"). **[**25]** Because retroactive application of the statutory change at issue in this matter does not extinguish Farmland's right to pursue its claims against Appellants and recover some measure of damages if it prevails on the merits, Appellants are not entitled to summary judgment.

IV. Conclusion

We **affirm** the district court's order denying Appellants' motion for summary judgment but for reasons other than those given by the district court. Specifically, we hold the repeal of *Kan. Stat. Ann. § 50-115* applies retroactively in this matter. If Farmland prevails on the merits of its KRTA claims, it may not recover full consideration damages but it may recover **[**26]** any other damages to which it shows entitlement.

End of Document

[10] Ironically, Appellants seek summary judgment from this court but also assert the controlling legal question of whether Farmland's complaint sufficiently preserves the treble damages remedy is not properly before us as part of this interlocutory appeal. ***HN19***[] This court, however, has previously exercised its discretion in an interlocutory appeal to resolve whether a party is entitled to summary judgment even though the district court did not expressly certify the question of whether a genuine issue of material fact precluded summary judgment. *Rural Water Dist. No. 4 v. City of Eudora, 720 F.3d 1269, 1278 (10th Cir. 2013)*. Under the standard set out in *City of Eudora*, we should exercise our discretion "if an issue is 'fairly included within the certified order' and is 'a controlling question of law.'" *Id.* Here, the district court's order certifying this interlocutory appeal addressed the parameters of Farmland's complaint, concluding it did not preserve the treble damages remedy. That conclusion, while erroneous, was one basis on which the district court certified this interlocutory appeal. It is also central to the question presented in the district court's retroactivity order, *i.e.*, whether Farmland has no available remedies if it prevails on the merits of its KRTA claims. *See supra* § III. D. Thus, we conclude the issue is "fairly included within the certified order" and must be addressed to resolve "a controlling question of law." In the interest of judicial economy, we exercise our discretion to resolve it.

[11] The parties have not directed this court to any pretrial order refining or narrowing the scope of the damages recoverable by Farmland.

[12] Although Appellants assert in a single phrase in their reply brief that they will be prejudiced if Farmland is permitted to pursue the treble damages remedy, they do not explain the nature of this alleged prejudice in any detail. And, in any event, even if prejudice may be relevant to what evidence Farmland is permitted to present on the treble-damages issue, it is not relevant to the purely legal question of whether Farmland's amended complaint is sufficient to preserve the treble damages remedy.

Constitutional Law > ... > Freedom of Speech > Free Press > Public Access

Governments > Courts > Court Records

HN1[] **Free Press, Public Access**

The public enjoys a common-law right of access to judicial records. A litigant can rebut the strong presumption in favor of public access when countervailing interests heavily outweigh the public interests in access to the judicial record.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN2[] **Entitlement as Matter of Law, Appropriateness**

The court's summary judgment analysis relies on the factual information submitted by the parties to determine the litigants' rights; so, the public has a strong interest in accessing the information. Especially where documents are used to determine litigants' substantive legal rights, a strong presumption of access attaches.

Evidence > ... > Exceptions > Residual Exception > Necessity

Evidence > ... > Exceptions > Residual Exception > Trustworthiness

HN3[] **Residual Exception, Necessity**

Fed. R. Evid. 807(a) provides an exception permitting the admission of hearsay evidence if: (1) the statement is supported by sufficient guarantees of trustworthiness and (2) it is more probative on the point for which it is offered than any other evidence that the proponent can obtain through reasonable efforts. *Fed. R. Evid. 807(a)*.

Evidence > Admissibility > Statements as Evidence > Hearsay

HN4[] **Statements as Evidence, Hearsay**

Scholarly articles, standing alone, contain inadmissible hearsay and have limited utility under the Federal Rules of Evidence.

Evidence > ... > Hearsay > Rule Components > Assertions

Evidence > ... > Hearsay > Rule Components > Statements

Evidence > ... > Hearsay > Rule Components > Truth of Matter Asserted

Evidence > ... > Hearsay > Rule Components > Declarants

HN5[] **Rule Components, Assertions**

The Federal Rules of Evidence define hearsay as a statement that: (1) the declarant does not make while testifying at the current trial or hearing; and (2) a party offers in evidence to prove the truth of the matter asserted in the statement. *Fed. R. Evid. 801(c)*. But, statements that are offered for purposes other than proving the truth of the matter asserted don't count as hearsay. In short, a statement that is offered to show its effect on the listener isn't hearsay because it isn't offered to prove the truth of the matter asserted i.e., to prove the truth of the contents of the declarant's statement but instead is offered to prove how the statement affected the person who heard the statement. A statement offered to show its effect on the person who heard the statement is not hearsay.

Evidence > Judicial Notice > Scientific & Technical Facts

Evidence > Types of Evidence > Documentary Evidence > Summaries

HN6[] **Judicial Notice, Scientific & Technical Facts**

Under *Fed. R. Evid. 1006*, a summary is admissible to prove the content of voluminous writings that cannot be conveniently examined in court.

Evidence > ... > Exceptions > Public Records > Investigative Reports

HN7[] Public Records, Investigative Reports

Fed. R. Evid. 803(8)'s public records exception to the hearsay rule defines a public record as: A record or statement of a public office if: (A) it sets out: (i) the office's activities; (ii) a matter observed while under a legal duty to report, but not including, in a criminal case, a matter observed by law enforcement personnel; or (iii) in a civil case or against the government in a criminal case, factual findings from a legally authorized investigation; and (B) the opponent does not show that the source of the information or other circumstances indicate a lack of trustworthiness. Fed. R. Evid. 803(8). The justification for the exception is the assumption that a public official will perform his duty properly and the unlikelihood that he will remember details independently of the record. Fed. R. Evid. 803 advisory committee's note to Paragraph (8). And, cases illustrating the admissibility of records of the office's or agency's own activities are numerous. Fed. R. Evid. 803 advisory committee's note to Paragraph (8).

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

HN13[] Entitlement as Matter of Law, Appropriateness

Summary judgment is appropriate if the moving party demonstrates that no genuine dispute exists about any material fact, and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. When the court applies this standard, it views the evidence and draws reasonable inferences in the light most favorable to the non-moving party. An issue of material fact is genuine if the evidence is such that a reasonable jury could return a verdict for the nonmoving party on that issue. And, an issue of fact is material if it has the ability to affect the outcome of the suit under the governing law.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN14[] Burdens of Proof, Absence of Essential Element

The party moving for summary judgment bears the initial burden of showing the basis for its motion. The moving party bears both the initial burden of production on a motion for summary judgment and the burden of establishing that summary judgment is appropriate as a matter of law. A summary judgment movant can satisfy this burden by demonstrating there is an absence of evidence to support the nonmoving party's case. The moving party, to meet its summary judgment burden, need not negate the non-movant's claim, but need only point to an absence of evidence to support the non-movant's claim.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Accompanying Documentation

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN15[] **Opposing Materials, Accompanying Documentation**

If the moving party satisfies its initial burden, the non-moving party must set forth specific facts showing that there is a genuine issue for trial. If the movant carries the initial burden, the nonmovant may not rest on its pleadings, but must bring forward specific facts showing a genuine issue for trial on those dispositive matters for which it carries the burden of proof. To satisfy this requirement, the nonmoving party must go beyond the pleadings and by its own affidavits, or by the depositions, answers to interrogatories, and admissions on file, designate specific facts showing that there is a genuine issue for trial. When deciding whether a party has shouldered its summary judgment burden, the judge's function is not to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Need for Trial

HN16[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is not a disfavored procedural shortcut. Instead, it is an important procedure designed to secure the just, speedy and inexpensive determination of every action.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN17[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment should be used sparingly in antitrust cases. But still, a court must apply the usual rules governing summary judgment to antitrust cases. Like any *Fed. R. Civ. P. 56* motion, an antitrust plaintiff has the burden to set forth specific facts showing that there is a genuine issue for trial. Summary judgments have a place in the antitrust field because some of the law in this area is so well developed that when the gist of the case turns on documentary evidence, the rule at times can be divined without a trial. Even in antitrust litigation, if the pertinent area of law is well developed and the case turns on documentary evidence, disposition by summary judgment may be appropriate.

Civil Procedure > Preliminary Considerations > Venue > Multidistrict Litigation

HN18[] **Venue, Multidistrict Litigation**

A Multi-district Litigation transferee court applies the law of the circuit in which it sits. Although the U.S. Court of Appeals for the Tenth Circuit hasn't addressed this question, an appellate court has explained that this ruling is consistent with the rule followed by a number of circuit courts that have considered the question. The transferee court applies its own Circuit's cases on the meaning of federal law. Questions of federal law in cases transferred under *28 U.S.C.S. § 1407* are governed by the clearly settled law of the transferee court's circuit.

HN19[] **Sherman Act, Claims**

An antitrust conspiracy requires the plaintiff to establish: (1) concerted action in the form of a contract, combination, or conspiracy, and (2) an unreasonable restraint of trade. *15 U.S.C.S. § 1*. *15 U.S.C.S. § 1*. And, to prevail on a monopolization claim, a plaintiff must prove: (1) defendants have monopoly power in a properly defined relevant market; and (2) that defendants willfully acquired or maintained this power by means of anticompetitive conduct. *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN20[] **Cartels & Horizontal Restraints, Price Fixing**

A patent settlement involving a large and unjustified reverse payment can violate the antitrust laws if its objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market because that objective is the very anticompetitive consequence that underlies the claim of antitrust unlawfulness.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN21[] **Noerr-Pennington Doctrine, Sham Exception**

In reverse payment settlement claims, it is normally not necessary to litigate patent validity to answer the antitrust question unless, perhaps, to determine whether the patent litigation is a sham.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN22[] **Remedies, Damages**

The Sherman Act requires an antitrust plaintiff to show that its injury was caused by reason of the defendant's anticompetitive conduct. *15 U.S.C.S. § 15(a)*. The fact of injury and damages suffered by reason of a violation of the antitrust laws must also be shown for a private litigant to recover on a claim of monopolization. Thus, to recover under the antitrust laws, an antitrust plaintiff must establish that defendant's unlawful conduct caused plaintiff injury in its business or property. An antitrust plaintiff must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN23[] **Sherman Act, Claims**

An antitrust plaintiff cannot shoulder its burden to prove an antitrust violation if the injury is attributable to its lack of desire, its limited production capabilities, or to other factors independent of the alleged unlawful conduct. But, at the same time, an antitrust plaintiff need not show that defendant's conduct was the exclusive cause of plaintiff's injury. A plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury. Instead, it is enough that the illegality is shown to be a material cause of the injury. An antitrust plaintiff must show that a defendant's anticompetitive act was a material and but-for cause of plaintiff's injury, although not necessarily the sole cause.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN24[] **Remedies, Damages**

A material cause is often interpreted as proximate cause of an antitrust violation. An antitrust violation is a material cause of an injury if it is a proximate cause of that injury. The doctrine of proximate cause in the antitrust context considers whether the alleged injury is too remote to be fairly attributed to the asserted antitrust violation.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Torts > ... > Elements > Causation > Intervening Causation

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Torts > ... > Proof > Evidence > Province of Court & Jury

HN25[] **Remedies, Damages**

An antitrust plaintiff demonstrates proximate cause by showing there is a causal connection between an antitrust violation and an injury sufficient to establish the violation as a substantial factor in the occurrence of damage. But, if an independent cause fully accounts for the plaintiff's alleged injury, then that intervening, independent cause breaks the causal connection between the alleged antitrust violation and the plaintiff's injury. Proximate cause and intervening cause are usually issues for the jury to decide. Causation is generally a question best left for the jury to decide.

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN26[] **Summary Judgment, Burdens of Proof**

To avoid summary judgment, the non-moving party must adduce evidence that is based on more than mere speculation, conjecture, or surmise.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Torts > ... > Elements > Causation > Intervening Causation

HN27[] **Jury Trials, Province of Court & Jury**

Whether conduct constitutes intervening conduct that breaks the chain of causation and whether intervening conduct is a foreseeable consequence of a defendant's actions are questions of fact to be submitted to the jury.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN28[] Noerr-Pennington Doctrine, Right to Petition Immunity

The Noerr-Pennington doctrine exempts from antitrust liability any legitimate use of the political process by private individuals, even if their intent is to eliminate competition. But Noerr-Pennington immunity does not apply to sham activities. Petitioning the government is a sham activity if: (1) it is objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits, and (2) it uses the governmental process, as opposed to the outcome of that process, as an anticompetitive weapon.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN29[] Noerr-Pennington Doctrine, Sham Exception

The question whether petitioning activity is a sham is generally one for the jury. Whether something is a genuine effort to influence governmental action, or a mere sham, is a question of fact. A court can rule the objectively baseless question as a matter of law where there is no dispute over the predicate facts of the underlying proceeding.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN30[] Standing, Requirements

In the context of finding of causation, plaintiffs must also show that the launch would have been legal because if the launch were stopped because it was illegal, then the antitrust injury, if it could still be called that, would be caused not by the settlement but by the patent laws prohibiting the launch.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Inferences & Presumptions > Inferences

HN31[] Conspiracy to Monopolize, Elements

The district court correctly defined direct evidence of an antitrust conspiracy as evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted. With direct evidence the factfinder is not required to make inferences to establish facts.

Antitrust & Trade Law > Procedural Matters

Evidence > Types of Evidence > Circumstantial Evidence

Evidence > Inferences & Presumptions > Inferences

HN32[] Antitrust & Trade Law, Procedural Matters

Circumstantial evidence must tend to exclude the possibility of independent action. This standard requires an antitrust plaintiff to show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed plaintiff.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Types of Evidence > Circumstantial Evidence

Evidence > Inferences & Presumptions > Inferences

HN33[] Sherman Act, Claims

One cannot infer a conspiracy if the defendants had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations. And when considering circumstantial evidence that is just as consistent with unilateral action as with concerted action, it does not, standing alone, support an inference of antitrust conspiracy.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN34[] Inequitable Conduct, Anticompetitive Conduct

A reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects. A reverse payment if otherwise unexplained likely seeks to prevent the risk of competition.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN35[] Sherman Act, Claims

The rule of reason is described as calling for a holistic assessment of the parties' evidence to determine whether a challenged practice restrains trade unreasonably thus violating the Sherman Act, *15 U.S.C.S. § 15(a)*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN36[] Exclusive & Reciprocal Dealing, Exclusive Dealing

An exclusive dealing arrangement is a contract between a manufacturer and a buyer that forbids the buyer from purchasing the contracted good from any other seller or that requires the buyer to take all of its needs in the contract good from that manufacturer.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN37[] Exclusive & Reciprocal Dealing, Exclusive Dealing

An exclusive dealing arrangement is described as one that entails a commitment by a buyer to deal only with a particular seller. Such an agreement need not specifically require the buyer to forgo other supply sources if the practical effect of the agreement is the same. Even though a contract does not contain specific agreements not to use the goods of a competitor, if the practical effect is to prevent such use, it comes within the prohibition against exclusivity. The antitrust vice of these arrangements is the foreclosure of part of the market in which the seller competes by taking away the freedom of the buyer to choose from the products of competing traders in the seller's market. The primary antitrust concern with exclusive dealing arrangements is that they may be used by a monopolist to strengthen its position, which may ultimately harm competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN38[] Exclusive & Reciprocal Dealing, Exclusive Dealing

An exclusionary contract doesn't violate the antitrust laws simply because it excludes competitors. Exclusive dealing agreements are often entered into for entirely procompetitive reasons, and generally pose little threat to competition. It is widely recognized that in many circumstances exclusive dealing arrangements may be highly efficient, to assure supply, price stability, outlets, investment, best efforts or the like—and pose no competitive threat at all. On the other hand, exclusive dealing can have adverse economic consequences by allowing one supplier of goods or services unreasonably to deprive other suppliers of a market for their goods. Also, exclusive dealing arrangements are of special concern when imposed by a monopolist. Behavior that otherwise might comply with ***antitrust law*** may be impermissibly exclusionary when practiced by a monopolist.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN39[] Exclusive & Reciprocal Dealing, Exclusive Dealing

Because exclusive dealing arrangements may actually enhance competition, they are not deemed per se illegal. Instead, courts apply the rule of reason to determine the legality of exclusive dealing arrangements. The U.S. Court of Appeals for the Eleventh Circuit has joined the consensus that exclusive dealing arrangements are reviewed under the rule of reason. Thus, to prevail, an exclusive dealing claim plaintiff must prove it probable that performance of the contract will foreclose competition in a substantial share of the line of commerce affected. A plaintiff bringing an antitrust claim based on an exclusive dealing contract must allege and prove that a particular arrangement unreasonably restricts the opportunities of the seller's competitors to market their product.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN40[] **Clayton Act, Claims**

Although Tampa Elec. Co. v. Nashville Coal Co. involved a Clayton Act claim, courts also apply its analysis to exclusive dealing claims asserted under the Sherman Act because each statute includes an anticompetitive conduct element, although each statute articulates that element in a slightly different way. In substance, the Tampa Elec. Co. v. Nashville Coal Co. standard for Clayton Act, *15 U.S.C.S. § 3* claims differs very marginally, if at all, from the fact-intensive rule-of-reason analysis that applies to the case under Sherman Act, *15 U.S.C.S. § 1*. Tampa Elec. Co. v. Nashville Coal Co. applies to Sherman Act cases even though it was decided under Clayton Act, *15 U.S.C.S. § 3*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN41[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

To determine substantiality in a given case by weighing the probable effect of the contract on the relevant area of effective competition, taking into account the relative strength of the parties, the proportionate volume of commerce involved in relation to the total volume of commerce in the relevant market area, and the probable immediate and future effects which pre-emption of that share of the market might have on effective competition therein.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN42[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

No set formula exists for evaluating the legality of an exclusive dealing agreement, but listed the factors courts consider when making this determination. They include: (1) whether the defendant has significant market power; (2) whether there is substantial market foreclosure; (3) whether the contract's duration is sufficient to prevent meaningful competition by rivals; (4) an analysis of likely or actual anticompetitive effects considered in light of any procompetitive effects; (5) whether defendant engaged in coercive behavior; (6) the ability of customers to terminate the agreements; and (7) the use of exclusive dealing by competitors of the defendant.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN43[] Exclusive & Reciprocal Dealing, Exclusive Dealing

Exclusive dealing will generally only be unlawful where the market is highly concentrated, the defendant possesses significant market power, and there is some element of coercion present.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN44[] Exclusive & Reciprocal Dealing, Exclusive Dealing

The court couldn't ignore the demands of the marketplace in which the exclusive agreements arose because if retailers have made supplier exclusivity a barrier to entry, one cannot bring an antitrust claim against a supplier for acquiescing to that requirement. Retailers and manufacturers like exclusive deals implies that they serve their interests and when the consumers favor a product or practice, and only rivals squawk, the most natural inference is that the complained-of practice promotes rather than undermines competition, for what helps consumers often harms other producers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN45[] Exclusive & Reciprocal Dealing, Exclusive Dealing

Short-term exclusive dealing arrangements present little threat to competition. The short duration and easy terminability of exclusivity agreements negates substantially their potential to foreclose competition. Discounts conditioned on exclusivity in relatively short-term contracts are rarely problematic. This is so because while a dominant firm's ongoing policy of offering discounts in exchange for exclusivity gives buyers incentives to stay with the same firm, any above-cost discount can be matched by an equally efficient firm. And, even an exclusive-dealing contract covering a dominant share of a relevant market need have no adverse consequences if the contract is let out for frequent rebidding.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN46[] Per Se Rule & Rule of Reason, Sherman Act

There are no exclusionary effects from contracts that expire every year or two thus giving other competitors a shot at obtaining the next contract by outbidding defendant. The short duration, i.e., one year terms and easy terminability of the agreements, i.e., 60 days' written notice negate substantially their potential to foreclose competition because a competing manufacturer need only offer a better product or a better deal to acquire their services.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN47[] Exclusive & Reciprocal Dealing, Exclusive Dealing

As already explained, an exclusive contract does not violate the antitrust laws unless it is probable that performance of the contract will foreclose competition in a substantial share of the line of commerce affected. This type of foreclosure occurs when the opportunities for other traders to enter into or remain in the market are significantly limited by the exclusive dealing arrangements.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN48[] Attempts to Monopolize, Elements

Traditionally a foreclosure percentage of at least 40% has been a threshold for liability in exclusive dealing cases. The recent decisions uniformly favor defendants where foreclosure levels are 40 percent or less, and so it is fair to say that foreclosure in excess of that amount is a threshold requirement where foreclosure is the asserted basis of the antitrust violation. But some courts have found that a lesser degree of foreclosure is required when the defendant is a monopolist. A monopolist's use of exclusive contracts may give rise to a *15 U.S.C.S. § 2* violation even though the contracts foreclose less than the roughly 40% or 50% share usually required in order to establish a *15 U.S.C.S. § 1* violation. Courts have found liability in some cases even when the amount of foreclosure is zero and if price, output, quality, choice, or innovation have been harmed, the lack of percentage foreclosure is no defense.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Discharge & Termination

HN49[] Exclusive & Reciprocal Dealing, Exclusive Dealing

The relevant question when evaluating foreclosure is always what percentage of the market is effectively unrestricted during a specific time period. The unrestricted set includes: (a) those dealers who are not bound by exclusive-dealing arrangements at all; plus, (b) those dealers whose contracts will expire during that time period in any event; and (c) those dealers whose contracts have termination clauses permitting them to sever existing arrangements during that time period and who realistically can do so.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN50[] Attempts to Monopolize, Elements

The Supreme Court expressly has approved competition based on price, recognizing that low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. The exclusionary effect of prices above a relevant measure of cost reflects the lower cost structure of the alleged predator, and so represents competition on the merits, or is beyond the practical ability of a judicial tribunal to control without courting intolerable risks of chilling legitimate price-cutting. Given this economic reality, the Supreme Court has established two prerequisites to recovery on claims of predatory pricing. First, a plaintiff seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs. And second, a plaintiff must demonstrate that the competitor had a dangerous probability of recouping its investment in below-cost prices. This two-prong test is known as the price-cost test.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN51[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

A plaintiff's characterization of its claim as an exclusive dealing claim does not take the price-cost test off the table. Instead, the price-cost test still may apply because contracts in which discounts are linked to purchase volume or market share targets are frequently challenged as de facto exclusive dealing arrangements on the grounds that the discounts induce customers to deal exclusively with the firm offering the rebates. So, when price is the clearly predominant mechanism of exclusion, the price-cost test tells us that, so long as the price is above-cost, the procompetitive justifications for, and the benefits of, lowering prices far outweigh any potential anticompetitive effects.

Governments > Legislation > Statute of Limitations > Tolling

HN52[] **Statute of Limitations, Tolling**

Whether plaintiffs diligently pursued their claims, thus permitting them to avail themselves of the various tolling doctrines, is a factual issue that the jury must decide at trial. The question of whether a plaintiff should have discovered the basis of his suit under the doctrine of equitable tolling does not lend itself to determination as a matter of law.

Governments > Legislation > Statutory Remedies & Rights

HN53[] **Legislation, Statutory Remedies & Rights**

Restitution is the only monetary remedy authorized by that statute.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Contracts Law > Remedies > Restitution

Torts > Business Torts > Unfair Business Practices > Remedies

Civil Procedure > Preliminary Considerations > Equity > Relief

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN54[] Trade Practices & Unfair Competition, State Regulation

The case law is clear that restitution under the (Cal.) Unfair Competition Law (UCL) does not include remedies at law; instead, it only provides for equitable remedies. Equitable remedies, injunctive relief, restitution, and civil penalties are the only remedies available under the UCL. *Cal. Bus. & Prof. Code § 17200* is an equitable action, and restitution is an equitable remedy. Restitution is ordinarily a substitute for rather than a form of damages.

Civil Procedure > Pretrial Matters > Conferences > Pretrial Orders

HN55[] Conferences, Pretrial Orders

A pretrial order should be liberally construed to cover any of the legal or factual theories that might be embraced by its language. But, a district court may more strictly construe a pretrial order when that order has been refined over time, properly drawn, and drafted with substantial specificity.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Pretrial Matters > Conferences > Pretrial Orders

HN56[] Judges, Discretionary Powers

The pretrial order is the controlling document for trial. Claims not included in the pretrial order are waived. The decision to exclude facts or issues as not found in the pretrial order is committed to the trial court's sound discretion.

Civil Procedure > Preliminary Considerations > Jurisdiction > Subject Matter Jurisdiction

HN57[] Jurisdiction, Subject Matter Jurisdiction

Subject-matter jurisdiction, because it involves a court's power to hear a case, can never be forfeited or waived. Instead, the Federal Rules require that the court must dismiss the action if it determines at any time that it lacks subject-matter jurisdiction. *Fed. R. Civ. P. 12(h)(3)*.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Parties

Constitutional Law > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Same Case & Controversy

HN58[] Supplemental Jurisdiction, Pendent Parties

18 U.S.C.S. § 1965 establishes nationwide service of process for RICO claims. The concept of pendent personal jurisdiction which exists when a court possesses personal jurisdiction over a defendant for one claim but lacks an independent basis for personal jurisdiction over the defendant for another claim that arises out of the same nucleus of operative fact. And supplemental jurisdiction presupposes the existence of a case, already properly before the court, to which the other claims may be attached. In other words, supplemental jurisdiction does not create original jurisdiction, it merely sweeps other claims under the federal court's jurisdictional rug.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Remedies

Securities Law > RICO Actions > Remedies

Civil Rights Law > Protection of Rights > Conspiracy Against Rights > Private Conspirators

Civil Rights Law > ... > Procedural Matters > Costs & Attorney Fees > Statutory Attorney Fee Awards

HN59[] **Racketeer Influenced & Corrupt Organizations, Remedies**

18 U.S.C.S. § 1962(d) makes it unlawful for any person to conspire to violate *18 U.S.C.S. 1962(c)*. *18 U.S.C.S. § 1962(d)*. RICO provides a private civil cause of action for those who are injured by violations of *18 U.S.C.S. § 1962* and allows recovery of treble damages, costs, and attorney's fees. *18 U.S.C.S. § 1964(c)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

Securities Law > RICO Actions > Elements of Proof > Definition of Racketeering Activity

HN60[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

To prove a violation of *18 U.S.C.S. § 1962(c)*, a plaintiff must establish four elements: (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity. The word racketeering tends to evoke images of mobsters and organized criminals, and true enough, RICO, at least initially was an aggressive initiative to supplement old remedies and develop new methods for fighting crime. But the plain language of RICO defines racketeering far more broadly in a way that allows the statute to reach both legitimate and illegitimate businesses. Indeed, among many other qualifying acts, RICO defines a racketeering activity as any act which is indictable under the federal statute outlawing wire fraud, a crime that any modern business could commit. Also, the Supreme Court has instructed that RICO is to be read broadly.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Securities Law > RICO Actions > Elements of Proof > Definition of Racketeering Activity

HN61[] **Racketeer Influenced & Corrupt Organizations, Claims**

Proving a RICO violation requires more than racketeering activity alone. To prevail on a RICO claim, a plaintiff must establish: (1) that the defendant violated *18 U.S.C.S. § 1962*; (2) that the plaintiff's business or property was injured; and (3) that the defendant's violation is the cause of that injury.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Evidence > Burdens of Proof > Allocation

HN62[] **Racketeer Influenced & Corrupt Organizations, Claims**

The RICO statute's by reason of requirement demands that a RICO plaintiff show the defendant's violation not only was a but for cause of his injury, but was the proximate cause as well. A RICO claim requires plaintiff to show that a RICO predicate offense not only was a but for cause of his injury, but was the proximate cause as well. Sufficiently establishing the element of causation, both actual and proximate, is crucial to proving any violation of RICO.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN63[] **Racketeer Influenced & Corrupt Organizations, Claims**

When discussing the RICO causation requirement, the compensable injury resulting from a violation of *18 U.S.C.S. § 1962(c)* necessarily is the harm caused by the predicate acts.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN64[] **Racketeer Influenced & Corrupt Organizations, Claims**

Civil RICO requires a plaintiff to show that a RICO predicate offense not only was a but for cause of his injury, but was the proximate cause as well.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

HN65[] **Claims, Fraud**

A RICO plaintiff, to allege a plausible predicate act, need not allege that the mailings or the wire communications themselves were fraudulent, instead, he needs only allege that they were incident to an essential part of a fraudulent scheme.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

HN66[] **Claims, Fraud**

In the context of alleging a plausible predicate act in RICO, a plaintiff need only show use of the mail in furtherance of a scheme to defraud and an injury proximately caused by that scheme.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN67[] **Racketeer Influenced & Corrupt Organizations, Claims**

A RICO plaintiff need not establish first-party reliance to satisfy the causation requirement. In most cases, the plaintiff will not be able to establish even but-for causation if no one relied on the misrepresentation. RICO plaintiffs must prove, at a minimum, indirect reliance because, logically, a plaintiff cannot even establish but-for causation if no one relied on the defendant's alleged misrepresentation. RICO plaintiffs must prove, at a minimum, indirect reliance because, logically, a plaintiff cannot even establish but-for causation if no one relied on the defendant's alleged misrepresentation.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Evidence > Burdens of Proof > Preponderance of Evidence

HN68[] Racketeer Influenced & Corrupt Organizations, Claims

An inference of reliance does not shift the burden of proof at trial on the element of RICO causation or any other elements of the claim plaintiffs will still have to prove RICO causation by a preponderance of the evidence to win on the merits.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN69[] Racketeer Influenced & Corrupt Organizations, Claims

By its terms, 18 U.S.C.S. § 1962(d) requires that a plaintiff must first allege an independent violation of 18 U.S.C.S. § 1962(a), (b), or (c), in order to plead a conspiracy claim under 18 U.S.C.S. § 1962(d). And, if a plaintiff has no viable claim under 18 U.S.C.S. § 1962(a), (b), or (c), then its 18 U.S.C.S. § 1962(d) conspiracy claim fails as a matter of law.

Judges: Daniel D. Crabtree, United States District Judge.

Opinion by: Daniel D. Crabtree

Opinion

[*930] **MEMORANDUM AND ORDER**

This case involves a certified class action brought by consumers and third-party payors of the EpiPen. They allege that the Mylan and Pfizer defendants, who manufacture and sell the EpiPen, violated certain state antitrust laws and the federal civil RICO statute. Doc. 2169 at 42, 44-45 (Pretrial Order ¶¶ 4.a., **[**26]** 4.d.).

This matter comes before the court on the summary judgment motion filed by the Mylan defendants (Doc. 2141).[1] The Mylan defendants seek summary judgment against plaintiffs' remaining claims: (1) state antitrust conspiracy and monopolization **[*931]** claims asserted under certain state laws;[2] and (2) RICO claims asserted under *18 U.S.C. § 1962(c)* & *(d)*. Doc. 2169 at 42, 44-45 (Pretrial Order ¶¶ 4.a., 4.d.).

The court has considered the parties' thorough and well-presented arguments. And, the court now is prepared to decide the motion for summary judgment.[3]

I. Undisputed Facts

The following facts are either uncontroverted, or, where genuinely controverted, are viewed in the light most favorable to the consumer class plaintiffs, the non-moving party opposing summary judgment. *Scott v. Harris, 550 U.S. 372, 378-80, 127 S. Ct. 1769, 167 L. Ed. 2d 686 (2007)*.

The Use of EAI Drug Devices to Treat Anaphylaxis

---

[1] The named defendants in this case are: Mylan N.V., Mylan Specialty L.P., Mylan Pharmaceuticals Inc., and Heather Bresch (collectively "Mylan") and Pfizer, Inc., King Pharmaceuticals, Inc. (n/k/a King Pharmaceuticals LLC), and Meridian Medical Technologies, Inc. (collectively "Pfizer"). Doc. 2169 at 1 (Pretrial Order).

This Order rules just the summary judgment motion filed by the Mylan defendants (Doc. 2141). Thus, the court's references to "defendants" in this Order refer only to the Mylan defendants unless specifically noted that the term is meant to refer to other named defendants in this action.

[2] Plaintiffs assert their state antitrust claims under the laws of the following states: Alabama, California, Florida, Hawaii, Illinois, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New York, North Carolina, Tennessee, and Utah. Doc. 2169 at 2 n.3, 44-45 (Pretrial Order ¶¶ 1.d., 4.d.).

[3] Defendants' summary judgment motion asks "that a hearing be set for oral argument" on the motion "if the Court believes that would be helpful." Doc. 2141 at 2. Our court's local rule provides: "The court may set any motion for oral argument or hearing at the request of a party or on its own initiative." *D. Kan. Rule 7.2*. The court carefully has reviewed the parties' written submissions. And, the parties' papers have explained their positions quite effectively. The court finds that oral argument will not assist its work. Also, it concludes that ordering oral argument here would contradict *Fed. R. Civ. P. 1*. So, the court denies defendants' request to set the matter for oral argument.

Also, the court enters this Order as a publicly-available document on the court's docket. The court recognizes that the parties have moved for leave to file under seal portions of their summary judgment briefs as well as many of the exhibits submitted either supporting or opposing the summary judgment motion. But, ***HN1***[] the public enjoys a "common-law right of access" to judicial records. *Nixon v. Warner Communications, Inc., 435 U.S. 589, 599, 98 S. Ct. 1306, 55 L. Ed. 2d 570 (1978)*; ***United States v. Bacon, 950 F.3d 1286, 1292 (10th Cir. 2020)***. A litigant can rebut the "strong presumption in favor of public access" when "countervailing interests heavily outweigh the public interests in access to the judicial record." ***Bacon, 950 F.3d at 1293*** (citations and internal quotation marks omitted). The court finds that none of the information in this Order qualifies for sealing under the governing legal standard for several reasons. *First*, ***HN2***[] the court's summary judgment analysis relies on the factual information submitted by the parties to determine the litigants' rights; so, the public has a strong interest in accessing the information. *See* *Riker v. Fed. Bureau of Prisons, 315 F. App'x 752, 755 (10th Cir. 2009)* ("Especially 'where documents are used to determine litigants' substantive legal rights, a strong presumption of access attaches.'" (quoting *Lugosch v. Pyramid Co. of Onondaga, 435 F.3d 110, 121 (2d Cir. 2006)*)). *Second*, a good portion of the factual information already is publicly-available through other sources. *And third*, most of this information is quite stale—ranging in date from 2007 to 2017. The court finds that the public's right to access the entire contents of this Order to understand the summary judgment facts and the court's analysis of plaintiffs' antitrust claims and RICO claims outweighs any privacy interest that the parties assert over the information.

Anaphylaxis is a serious allergic reaction that can be life-threatening if not promptly and properly treated. Doc. 2165-1 at 2 (Defs.' Ex. 3).[4] Epinephrine is the only appropriate first-line treatment for anaphylaxis. Doc. 2142-5 at 8-9 (Defs.' Ex. 5). **[*932]** An epinephrine auto-injector ("EAI") is a device used to self-deliver a controlled dose of epinephrine. *Id.* at 9. EAIs have **[**27]** been available in the U.S. since the 1980s, when the EpiPen EAI first was approved by the FDA and marketed to consumers. Doc. 2169 at 4 (Pretrial Order ¶ 2.a.19.). But still, by 2007, fewer than one million of the 43 million patients who are at risk for anaphylaxis had access to an EAI. *Reviewing the Rising Price of EpiPens: Hearing Before the Comm. on Oversight and Gov't Reform H.R.*, 114th Cong. 17 (2016) (statements of Heather Bresch, CEO of Mylan), https://docs.house.gov/meetings/GO/GO00/20160921/105373/HHRG-114-GO00-Transcript-20160921.pdf (hereinafter, "Bresch Statements").[5]

Mylan Acquires the Rights To Market and Sell the EpiPen

In 2007, Mylan Pharmaceuticals, Inc. acquired Dey Pharma L.P. ("Dey"), which later was renamed Mylan Specialty. Doc. 2169 at 3 (Pretrial Order ¶¶ 2.a.7-8.). Dey had "the exclusive right and license to market, distribute and sell" EpiPen Auto-Injector in the United States under a Supply Agreement with Meridian Medical Technologies, Inc. ("Meridian"),[6] which manufactures EpiPen products. Doc. 2142-6 at 4, 6, 35 (Defs.' Ex. 7). So, since 2007, Mylan Specialty has marketed and sold EpiPen devices, which Meridian supplies under the Supply Agreement. Doc. **[**28]** 2169 at 3 (Pretrial Order ¶¶ 2.a.7., 2.a.11., 2.a.12.); *see also* Docs. 2142-6, 2142-7, 2142-8 (Defs.' Exs. 7, 8, & 9).

The 2010 Supply Agreement established a "Joint Commercial Committee" ("JCC") designed to streamline "distribution of EpiPen products." Doc. 2142-7 at 29 (Defs.' Ex. 8). The Agreement obligated Meridian to supply Mylan with the quantities of EpiPen products Mylan requested, for which Mylan compensated Meridian on a per-unit basis. *Id.* at 10, 17, & 42-44. Also, it requires Meridian to "prosecute and maintain any patents or patent applications" for EpiPen products. *Id.* at 27. Meridian held the "New Drug Application" ("NDA") for EpiPen and was thus responsible for filing advertising and promotional materials with the FDA until July 2013, when Pfizer transferred the NDA to Mylan. *See generally* Doc. 2142-10 (Defs.' Ex. 11).

As Mylan developed its branding strategy for EpiPen, it recognized that anaphylaxis was "[h]ighly prevalent but under-recognized and undertreated," that "[o]ne out of 25 people is at risk for anaphylaxis," that "1,500 people die from anaphylaxis each year," and that "5 out of 6 people at risk for anaphylaxis have not been prescribed an epinephrine **[**29]** injector[.]" Doc. 2142-11 at 7-8 (Defs.' Ex. 12).[7]

---

[4] Plaintiffs don't controvert this statement of fact, but they argue that this exhibit is inadmissible hearsay for which no exception applies. Doc. 2190-1 at 20, 77; *see also* Doc. 2226-3 at 2 (discussing "SMF ¶ 1"). Defendants respond that the exhibit—a scholarly medical article—is admissible under the residual hearsay exception of *Fed. R. Evid. 807*. Doc. 2226-1 at 21. Even if defendants' cited exhibit doesn't qualify for admission under *Rule 807*, the parties have stipulated to the following factual statement that contains information almost identical to the fact supported by defendants' summary judgment exhibit: "Anaphylaxis is a life-threatening allergic reaction that can occur rapidly after exposure to an allergen." Doc. 2169 at 3 (Pretrial Order ¶ 2.a.14.).

[5] Plaintiffs have submitted the hearing's transcript as part of the summary judgment record. Doc. 2207-17 (Pls.' Ex. 349).

[6] Meridian now is a subsidiary of Pfizer, Inc. Doc. 2169 at 3 (Pretrial Order ¶ 10). Pfizer acquired King Pharmaceuticals LLC ("King") and Meridian in 2011. *Id.* And now, Meridian and King are indirect wholly-owned subsidiaries of Pfizer, Inc. *Id.* (Pretrial Order ¶¶ 2.a.6., 2.a.10.). This Order refers to Pfizer, Meridian, and King collectively as "Pfizer" unless otherwise noted.

[7] Plaintiffs assert that this exhibit constitutes inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. Defendants respond that this document is admissible under the business records exception to hearsay under *Fed. R. Evid. 803(6)*. Doc. 2226-1 at 21. Defendants have the better argument because this exhibit—an internal Mylan document—appears to qualify as a business record under the hearsay exception of *Fed. R. Evid. 803(6)*.

[*933] Mylan developed a marketing strategy designed to expand anaphylaxis awareness by focusing on schools. Doc. 2142-12 at 77 (Defs.' Ex. 13).[8] When Mylan acquired Dey, some state laws barred schools from keeping EAIs not prescribed to a particular child and prohibited school personnel from administering an EAI to a child who did not have a prescription, even in an emergency. *Id.* Mylan cites two examples where these prohibitions produced tragic and preventable consequences. *See* Noreen S. Ahmed-Ullah, *Epinephrine Bill Sparked By Death of CPS Student Passes Legislature*, Chi. Trib., May 18, 2011, https://bit.ly/2ZU3gSv (describing the death of a seventh-grader who had an anaphylactic episode after eating food served at a classroom party and didn't have access to epinephrine); *see also* Emma Brown, *Virginia First-grader Ammaria Johnson Dies After Allergic Reaction*, Wash. Post, Jan. 5, 2012, https://wapo.st/2Ze2roH (reporting the death of a first-grader who had an allergic reaction at school and didn't have access to epinephrine).[9] So, Mylan worked to pass legislation in every state allowing schools to maintain **[*934]** epinephrine not prescribed to a particular **[**30]** student and permitting school personnel to administer epinephrine to anyone experiencing an anaphylactic emergency. Doc. 2142-12 at 77 (Defs.' Ex. 13). Forty-eight states adopted this legislation, and in 2013, President Obama signed the School Access to Emergency Epinephrine Act, which encouraged schools to keep epinephrine (whether an EpiPen or some other EAI) on-hand.[10] Plaintiff's expert, allergist Dr. Jay Portnoy, agreed that this legislation providing access to epinephrine in schools is a "good thing." Doc. 2165-4 at 18 (Defs.' Ex. 14) (Portnoy Dep. 139:7-12). Also, several named plaintiffs in this lawsuit agree this legislation was a "good idea." *See, e.g.*, Doc. 2165-5 at 7 (Defs.' Ex. 15) (Bowersock Dep. 107:8-23); Doc. 2165-6 at 3-4 (Defs.' Ex. 17) (Wemple Dep. 237:25-238:6); Doc. 2165-7 at 8-9 (Defs.' Ex. 18) (Beaulieu Dep. 102:14-103:14).

---

[8] Like the exhibit discussed in the preceding footnote, plaintiffs assert that defendants' Exhibit 13 is inadmissible hearsay. Doc. 2190-1 at 77. Indeed, plaintiffs assert that more than 150 of defendants' exhibits are inadmissible hearsay. *See id.* Defendants respond that Exhibit 13—along with hundreds of others of their summary judgment exhibits—are admissible under the business records exception to the hearsay rule under *Fed. R. Evid. 803(6)*. Doc. 2226-1 at 21; *see also* Doc. 2227-1 at 11-12 (Cuthbertson Decl.). Each of these exhibits that defendants cite as admissible under *Fed. R. Evid. 803(6)* are internal Mylan records. For the same reasons discussed above, *supra* note 7, the court finds that Exhibit 13—as well as the other, challenged exhibits that are internal Mylan business records—are admissible under *Fed. R. Evid. 803(6)*'s business records exception to the hearsay rule.

Also, the court finds plaintiffs' blanket hearsay objections to Mylan documents disingenuous. Plaintiffs themselves rely on many Mylan-produced business records to support their asserted summary judgment facts. For example, plaintiffs assert a hearsay objection to defendants' Exhibit 100. *See* Doc. 2190-1 at 77 (objecting to defendants' Exhibit 100 (Doc. 2167-2)). And, with their blanket hearsay objection, plaintiffs assert: "At the very least, *the Court should not consider any of the exhibits and other documents specifically identified in this paragraph* because Defendants failed to meet their burden of showing the documents' admissibility at trial." *Id.* (emphasis added). Incredibly, while plaintiffs ask the court to ignore defendants' Exhibit 100 (and hundreds of other documents defendants submitted as summary judgment exhibits), plaintiffs also cite the very same document to support one of their summary judgment facts. *See* Doc. 2190-1 at 69 (Statement of Additional Material Fact ¶ 147) (citing Pls.' Ex. 322 (Doc. 2207-14 at 2-15)). This is not the only example. The court identifies more in footnotes below. Plaintiffs provide no explanation for why they contend the court should consider their proffered exhibits as admissible evidence under the Federal Rules of Evidence but simultaneously preclude defendants from offering the very same evidence on summary judgment. The court is unimpressed with plaintiffs' tactic. The only thing it has accomplished is complicating the court's work.

[9] Defendants cite these news reports, but don't attach them as exhibits to their summary judgment motion. Plaintiffs complain that these two news reports—along with some 56 other documents that defendants have cited to support their summary judgment facts—aren't attached as exhibits to their summary judgment motion. Doc. 2190-1 at 76-77. And, plaintiffs argue that the unattached exhibits are inadmissible hearsay for which no exception applies. *Id.* To the extent plaintiffs challenge defendants' citation to these news articles because they aren't attached as summary judgment exhibits, *see id*. at 76-77, the court rejects that challenge because plaintiffs also don't controvert the summary judgment facts cited in this statement of fact, *see id*. at 20. Also, the court rejects plaintiffs' hearsay challenge because defendants don't offer these news articles to prove the truth of the matters asserted. Instead, they offer them to show the information—true or not—that Mylan considered when deciding how to sell and market the EpiPen. Thus, these exhibits don't qualify as hearsay under *Fed. R. Evid. 801(c)*. *See infra* n.12.

[10] The citation defendants provide for this statement of fact is no longer available online, but plaintiffs don't controvert this fact. So, the court accepts it for this summary judgment motion.

In August 2012, Mylan launched the EpiPen4Schools® Program, which made free EpiPen devices available—"with no strings attached"—to K-12 schools across the United States. Doc. 2143-3 **[**31]** at 10-11 (Defs.' Ex. 21) (Bresch Dep. 129:6-130:24); *see also* Doc. 2142-5 at 25-26 (Defs.' Ex. 5). By 2017, Mylan had donated more than one million EAIs through this program. Doc. 2142-5 at 25 (Defs.' Ex. 5). Patients have used these donated devices more than 2,000 times to treat anaphylaxis in schools, accounting for up to 60% of the EAIs used in the participating schools. *Id.* Mylan's costs associated with this program totaled $71 million in the first four years alone. Doc. 2143-4 at 2 (Defs.' Ex. 22).

Mylan implemented another marketing strategy in October 2009, when it launched the "Next Generation Auto-injector ('NGA')." *Dey Launches and Unveils Next-Generation, Needle-Protected EpiPen(R) (Epinephrine) Auto-Injector with Enhanced Patient-Friendly Features*, Mylan (Oct. 26, 2009), https://bit.ly/38HRzCD.[11] The NGA had several new features—including built-in needle protection—which made it the first EAI with no exposed needle before and after use. *See id.*; *see also* Doc. 2143-5 at 2 (Defs.' Ex. 23). Other new features included an ergonomically designed barrel to prevent the device from rolling out of reach during an emergency, a flip-top case for single-handed removal, and bright orange **[**32]** colors and arrows to help identify quickly the needle end of the device and to make the product more usable for people who are color-blind. Doc. 2143-5 at 2-3 (Defs.' Ex. 23); Doc. 2143-6 at 2-3 (Defs.' Ex. 25); Doc. 2143-8 at 4, 7 (Defs.' Ex. 27).

EpiPen Pricing

Mylan reported in a securities filing that during 2008—the first full year after it acquired Dey—the net product profitability of EpiPen was $1 per device, and in 2009 that number increased to $2. Mylan N.V., Current Report (Form 8-K), Ex. 99.1 (Sept. 26, 2016), https://www.sec.gov/Archives/edgar/data/1623613/000119312516719397/d265624dex991.htm. A Mylan executive **[*935]** testified that the EpiPen franchise was "very undervalued" when Mylan acquired its rights. Doc. 2143-11 at 5 (Defs.' Ex. 30) (Graybill Dep. 71:10-12). And, Joshua Parks, defendants' pricing expert, opines that as late as 2009, EpiPen products likely were "not . . . sufficiently profitable to justify [their] continued promotion at a major drug company." Doc. 2143-12 at 32 (Defs.' Ex. 31) (Parks Expert Report ¶ 72).

Between 2009 to 2016, Mylan Specialty periodically increased the EpiPen's Wholesale Acquisition Costs ("WAC"). Doc. 2143-14 at 5 (Defs.' Ex. 33) (Graham Dep. **[**33]** 67:5-10); Doc. 2143-12 at 16-28 (Defs.' Ex. 31) (Parks Expert Report ¶¶ 33-63). The WAC is a list price that manufacturers charge wholesalers. Doc. 2143-12 at 15-16 (Defs.' Ex. 31) (Parks Expert Report ¶ 32). The WAC is not the price that consumers or health plans pay for pharmaceutical products. *Id.* Mylan Specialty's largest WAC increase for EpiPen products (on a percentage basis) occurred in October 2009, when Mylan Specialty launched the Next Generation Auto-injector. *Id.* at 16 (Parks Expert Report ¶ 34). EpiPen's WAC increased by 20.1%. *Id.*; *see also* Doc. 2143-13 at 2 (Defs.' Ex. 32). Mylan Specialty's President testified that Mylan—not Pfizer—made EpiPen pricing decisions unilaterally. Doc. 2142-9 at 10 (Defs.' Ex. 10) (Graham Dep. 103:12-17).

Mylan CEO Heather Bresch's Congressional Testimony

In September 2016, Mylan CEO Heather Bresch testified before the House Committee on Oversight and Government reform. Bresch Statements, 114th Cong. at 17-22. Ms. Bresch testified about Mylan's efforts to improve access to EAIs. *Id.* at 17-18. She explained:

> Before Mylan acquired the company that owned EpiPen in 2007, fewer than 1 million of the 43 million people at risk had access to an epinephrine **[**34]** auto-injector. At the same time, it was estimated that anaphylaxis was

[11] This fact is tied to another public record—a press release—that defendants didn't attach as a summary judgment exhibit. To the extent plaintiffs object to this citation, the court rejects that objection. This press release is publicly available online, and likely qualifies as a Mylan business record that is admissible under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule.

> causing 1,500 deaths annually. We've read stories of children dying at school because they did not have access to an epinephrine auto-injector or due to a lack of education about the need. We saw this as an unacceptable and largely preventable health problem.
>
> We've worked diligently and invested to enhance EpiPen and make it more available. In fact, we have invested more than $1 billion in these efforts over the last few years and have succeeded on many fronts. We put an improved EpiPen device on the market in 2009. We now reach 80 percent more patients. And today, approximately 85 percent of EpiPen patients pay less than $100 for two and a majority less than $50.

Id. at 17-18.

Ms. Bresch also testified about the EpiPen4Schools® program and explained how Mylan had used this program to donate free EpiPens "with no strings attached." *Id.* at 18. And, Ms. Bresch testified that the $608 WAC per two-pack was not the actual "pricing of EpiPens" or what Mylan profited from each EpiPen sale. *Id.* at 18, 21. She explained that Mylan's actual profit per EpiPen device is "approximately $50 per pen." *Id.* at 21. Also, Ms. Bresch **[**35]** testified, "[o]ver the last decade, Mylan's medicines have reduced the U.S. healthcare costs by approximately 180 billion." *Id.* at 17.

As a supplement to Ms. Bresch's testimony, Mylan provided Congress a profitability analysis for EpiPen that applied a 37.5% tax rate. Doc. 2208-20 at 2 (Pls.' Ex. 353). Mylan's securities filings show that Mylan had a negative effective tax rate in the U.S. in 2015 and 2016. Doc. 2207-19 at 142 (Pls.' Ex. 352). Following the congressional hearing, 17 members of the United States Senate noted that Ms. Bresch's testimony about EpiPen profits was based on **[*936]** "calculations [that] included an *undisclosed* 37.5% tax rate—which reduced [Mylan's] reported profits by 60%." Doc. 2205-7 at 2 (Pls.' Ex. 354). Using the 37.5% tax rate to calculate Mylan's profits reduced its annual profits by $264 million. Doc. 2207-22 at 3 (Pls.' Ex. 356).

Of the "one billion dollars" that Ms. Bresch testified Mylan had invested to enhance the EpiPen and make it more available, $879 million was spent on marketing and selling the EpiPen. Doc. 2194-17 at 9, 16 (Pls.' Ex. 118). And, a letter signed by 17 Senators noted that "Mylan's My EpiPen Savings Card and Patient Assistance Program **[**36]** do not help the vast majority of EpiPen users." Doc. 2205-7 at 3 (Pls.' Ex. 354). The 17 Senators also criticized Ms. Bresch for her "lack of information and lack of clarity" in her September 12, 2016 response to the Senators' letter addressing EpiPen price increases, as well as her "insistence that [she was] not aware of the basic facts about sale of [Mylan's] own drug[.]" *Id.* at 2.

Before Ms. Bresch gave her testimony to Congress, Mylan had issued a press release on August 24, 2016. Doc. 2206-2 (Pls.' Ex. 3). The press release quoted Ms. Bresch as stating: "Patients deserve . . . price transparency[.]" *Id.* at 2. And, Ms. Bresch suggested Mylan was "addressing" this "problem" with its "actions" that day. *Id.* The press release also asserted that 80% of patients paid "nothing out of pocket" for EpiPen products. *Id.*

Ms. Bresch's compensation from Mylan includes a "long-term incentive" that compensates her based on the company's performance using "several metrics" including "earnings." Doc. 2194-9 at 3 (Pls.' Ex. 109) (Bresch Dep. 43:13-45:7).

The Medical Guidance about Repeat Doses of Epinephrine

In December 2010, the National Institute of Allergy and Infectious Diseases ("NIAID")—a division **[**37]** of the National Institutes of Health ("NIH"), who conducts and supports research relating to infectious, immunologic, and allergic diseases—published "Guidelines for the Diagnosis and Management of Food Allergy in the US: Report of the NIAID-Sponsored Expert Panel" ("NIAID Guidelines"). Doc. 2165-10 at 6 (Defs.' Ex. 34).[12] Dr. Anthony Fauci—

---

[12] Plaintiffs assert that this exhibit is inadmissible hearsay for which no exception applies. Doc. 2190-1 at 20. Plaintiffs make this same objection to more than 40 of defendants' exhibits—many of which are scholarly medical articles. *Id.* Defendants respond that each exhibit is admissible under the residual hearsay exception of *Fed. R. Evid. 807*. Doc. 2226-1 at 21. ***HN3***[] *Rule*

Director of NIAID—explained that **[*937]** "[t]he Guidelines were developed over a 2-year period through the combined efforts of an Expert Panel and Coordinating Committee representing 34 professional organizations, federal agencies, and patient advocacy groups." *Id.* at 5. Each member of the Expert Panel was vetted by the NIAID for financial conflicts of interest and approved by the Coordinating Committee. *Id.* at 7.

The NIAID Guidelines assert that "repeated dosing" of epinephrine "may be required" to treat anaphylaxis. *Id.* at 41. The Guidelines describe that "[r]eports of patients receiving epinephrine for food-induced or nonfood-induced anaphylaxis note that as high as 10% to 20% of individuals who receive epinephrine will require more than 1 dose before **[**38]** recovery of symptoms." *Id.* And, the NIAID Guidelines explain, "it is impossible to predict the severity

---

807(a) provides an exception permitting the admission of hearsay evidence if "(1) the statement is supported by sufficient guarantees of trustworthiness . . . and (2) it is more probative on the point for which it is offered than any other evidence that the proponent can obtain through reasonable efforts." Fed. R. Evid. 807(a). The parties haven't provided the court enough information here to determine whether the scholarly medical articles at issue satisfy both requirements of Rule 807's residual exception. And, as our court has noted before, "***HN4***[] scholarly articles, standing alone, contain inadmissible hearsay and have limited utility under the Federal Rules of Evidence." *In re Universal Serv. Fund Tel. Billing Pracs. Litig., No. 02-MD-1468-JWL, 2008 U.S. Dist. LEXIS 34542, 2008 WL 1884125, at *2 (D. Kan. Apr. 25, 2008)*.

Nevertheless, the court considers the scholarly articles because they aren't hearsay evidence in the context of this summary judgment motion. ***HN5***[] The Federal Rules of Evidence define hearsay as "a statement that: (1) the declarant does not make while testifying at the current trial or hearing; and (2) a party offers in evidence *to prove the truth of the matter asserted in the statement*." Fed. R. Evid. 801(c). But, statements that are offered for purposes other than proving the truth of the matter asserted don't count as hearsay. *See, e.g., Faulkner v. Super Valu Stores, Inc., 3 F.3d 1419, 1434-35 (10th Cir. 1993)* (holding that statements about job applicants' bad conduct wasn't hearsay because they weren't offered to prove the truth of the matter asserted but instead offered to establish the employer's state of mind when it decided not to hire applicants); *Allen v. Montgomery, 728 F.2d 1409, 1412 (11th Cir. 1984)* (recognizing that newspaper articles about jury sequestration during a criminal trial "were not objectionable as hearsay because they were not offered to prove the truth of the matter asserted—that the jury stayed with the sheriff" but instead were offered "to establish . . . pretrial publicity"); *Eaton v. Harsha, 505 F. Supp. 2d 948, 952-53 nn. 4 & 6 (D. Kan. 2007)* (Robinson, J.) (finding that statements made to a police chief by members of the public who had complained that two police officers had made offensive and racially insensitive comments were not hearsay because statements weren't offered to prove the truth of the matters asserted by the complaints—*i.e.*, that the police officers' comments were offensive and racially insensitive—but instead to show that the police chief had received complaints from community members). In short, a statement that is offered to show its effect on the listener isn't hearsay because it isn't offered to prove the truth of the matter asserted—*i.e.*, to prove the truth of the contents of the declarant's statement—but instead is offered to prove how the statement affected the person who heard the statement. *See United States v. Smalls, 605 F.3d 765, 785 n.18 (10th Cir. 2010)* (holding that statements weren't inadmissible hearsay when "they are not offered to prove the truth of the matter asserted, but rather are offered to establish their effect on [the listener] and provide context for his statement"); *see also Schindler v. Seiler, 474 F.3d 1008, 1010 (7th Cir. 2007)* (explaining that "a statement offered to show its effect on the person who heard the statement is not hearsay" (citing *United States v. Robinzine, 80 F.3d 246, 252 (7th Cir. 1996)*)).

Here, defendants don't offer the scholarly articles to prove that their contents are true. Instead, defendants offer them as evidence of the relevant medical guidance about anaphylaxis and the proper treatment for that condition that Mylan asserts it considered when marketing and selling the EpiPen. To illustrate the principle, defendants don't offer the NIAID Guidelines to prove the truth of the Guidelines' contents about appropriate treatment of anaphylaxis or the number of epinephrine doses required to treat an anaphylactic reaction. Instead, defendants offer the NIAID Guidelines to show how they affected Mylan and its decision to discontinue selling single EpiPens and switch to selling EpiPens exclusively in a 2-Pak. So, because defendants don't offer the NIAID Guidelines to prove the truth of the matter asserted, the exhibit isn't hearsay. And, plaintiffs provide no other reason to exclude it from the summary judgment evidence.

Moreover, the court observes that plaintiffs object to many of defendants' exhibits as inadmissible hearsay, but then they turn around and rely on those same documents to support their statements of additional material facts. *Compare* Doc. 2190-1 at 77 (objecting to defendants' Exhibits 34, 36, 38-48 as inadmissible hearsay) *with id*. at 39 (relying on defendants' Exhibits 34, 36, 46, 47, & 48 to support plaintiffs' Statement of Additional Material Fact ¶ 12). Plaintiffs' blanket hearsay objections—which the court has attempted to address thoroughly in this order—have increased the court's work substantially. And, plaintiffs' practice of objecting to exhibits that they also rely on as summary judgment evidence appears to contravene Rule 1's directive to the parties to "employ[ ]" the Federal Rules of Civil Procedure—including Rule 56—"to secure the just, speedy, and inexpensive determination of every action and proceeding." Fed. R. Civ. P. 1.

of any subsequent reactions with accuracy." *Id.* at 43. So, the NIAID Guidelines recommend **[*938]** that "[a]ll patients experiencing anaphylaxis should be provided directly with an epinephrine auto injector or, if this is not possible, with a prescription (recommended prescription is for 2 doses of epinephrine), and advised to fill it immediately." *Id.*; *see also id*. at 40 (recommending as therapy for patient at discharge an EAI "prescription (2 doses) and instructions").

But also, the NIAID Guidelines "did not specifically address whether, let alone recommend that, all patients should carry two doses of epinephrine at all times." Doc. 2206-3 at 11 (Pls.' Ex. 5) (Portnoy Expert Report ¶ 24). The NIAID Guidelines "are specific to food allergy and were intended for use by health care professionals." *Id.* (citation, internal quotation marks, and ellipses omitted); *see also* Doc. 2165-10 at 9 (Defs.' Ex. 34) ("The Guidelines are intended to assist health care professionals in making appropriate decisions about patient care in the United States."). Internally, Mylan recognized that the "NIAID guidelines **[**39]** are food specific[,]" but noted World Allergy Organization "guidelines are being published soon" that "will have a similar message" and will be "better to leverage[.]" Doc. 2193-15 at 11 (Pls.' Ex. 96).

Then, in February 2011, the World Allergy Organization ("WAO") published another set of anaphylaxis guidelines. Doc. 2165-11 at 2 (Defs.' Ex. 36). The WAO Guidelines state that "up to 23% of adults" will need "more than one epinephrine injection" for anaphylaxis and that "more than 2 doses are occasionally required." *Id.* at 23, 26. So, the WAO Guidelines suggest that medical providers "consider prescribing more than one epinephrine auto-injector." *Id.* at 26.

Plaintiffs' expert testified that it's "very hard to predict" whether "somebody with a food allergy" will need more than one dose of epinephrine. Doc. 2165-4 at 8 (Defs.' Ex. 14) (Portnoy Dep. 70:7-16). Medical researchers have identified various factors that may put patients at greater risk of needing more than one dose, but they have not identified any particular type of patient for whom a single dose is necessarily sufficient. *See, e.g.*, Doc. 2165-12 at 2 (Defs.' Ex. 38); Doc. 2165-13 at 2 (Defs.' Ex. 39); Doc. 2165-14 at 2 (Defs.' **[**40]** Ex. 40); Doc. 2165-15 at 2, 5-9 (Defs.' Ex. 41). But, both plaintiffs and defendants' experts opine that "a majority of patients will not need a second dose." Doc. 2190-7 at 3 (Pls.' Ex. 7) (Blaiss Dep. 27:12-16) (agreeing with Dr. Portnoy's conclusion that a majority of patients won't need a second dose).

Some patients whose initial experience with anaphylaxis is mild later may experience life-threatening anaphylaxis. Doc. 2165-10 at 19 (Defs.' Ex. 34). For example, one study of children "diagnosed with clinical hypersensitivity to peanut prior to the age of 4 years" found that of "patients who had an initial reaction that was not life-threatening and had a subsequent reaction, 44% (19 of 43) had potentially life-threatening reactions during at least 1 of these subsequent reactions." *Id.* Also, some patients may require more than one dose of epinephrine for a variety of reasons: some might require a repeat dose to treat a severe allergic reaction, Doc. 2165-10 at 41 (Defs.' Ex. 34); others might experience a biphasic reaction which is the "complete clinical resolution of initial symptoms followed by onset of late-phase symptoms," Doc. 2165-17 at 2 (Defs.' Ex. 43);[13] some might have received **[**41]** an improperly administered first dose, Doc. 2165-18 at 2-7 (Defs.' Ex. 44); Doc. 2165-4 at 14-15 **[*939]** (Defs.' Ex. 14) (Portnoy Dep. 83:25-84:12); other patients with high body mass sometimes require more than one standard dose of epinephrine, Doc. 2143-16 at 21 (Defs.' Ex. 37) (Blaiss Expert Report ¶ 7.1); and some patients with certain mast cell diseases are at greater risk of severe anaphylaxis, which may require two doses to treat, Doc. 2165-19 at 6 (Defs.' Ex. 45).

Some medical guidance has recommended that patients at risk for anaphylaxis should carry two EAIs. *See* Doc. 2165-20 at 9 (Defs.' Ex. 46) ("Therefore, patients need to be prepared for possible recurrent anaphylaxis and should be given 2 auto-injectable epinephrine devices to carry with them at all times."); *see also* Doc. 2165-21 at 9 (Defs.' Ex. 47) ("Because anaphylactic episodes might require more than 1 dose of epinephrine, all patients should carry 2" EAIs.). But, none of the guidance mandates carrying two EAIs as "a medical necessity for patients at risk for anaphylaxis." Doc. 2190-7 at 4 (Pls.' Ex. 7) (Blaiss Dep. 40:13-25).

---

[13] The "reported incidence of biphasic anaphylactic reactions varies from 1% to 20%" but typically are "mild, tend to be self-limited, and have not required additional epinephrine." Doc. 2164-17 at 2, 7 (Defs.' Ex. 43).

In 2017, the American Academy of Pediatrics ("AAP") published a Clinical Report stating that "[t]wo **[**42]** epinephrine autoinjectors should be available at all times, because a second administration may be needed if there is not a quick or adequate response to the first dose of epinephrine." Doc. 2165-22 at 5 (Defs.' Ex. 48). The Report also contains a disclaimer that the "guidance in this report does not indicate an exclusive course of treatment or serve as a standard of medical care." *Id.* at 2.

The EpiPen 2-Pak

Starting in 2001, Dey (and later Mylan) sold EpiPen devices in two-packs and single-packs. Doc. 2143-3 at 12 (Defs.' Ex. 21) (Bresch Dep. 204:6-15). Some patients purchased EpiPens in two-packs or multiple single-packs per year (during the period when single-packs still were available). Doc. 2143-17 at 58 (Defs.' Ex. 49) (Johnson Report ¶ 84). Defendants' expert opines that consumers, before Mylan discontinued the EpiPen single-pack, "were opting to purchase, and doctors were prescribing, an increasing proportion of EpiPen two-pack products at a time." *Id.*

On November 24, 2010, Bruce Foster, a Senior Director at Mylan, emailed Ron Graybill, a Mylan Vice President, with a proposal to eliminate single-pack EpiPen sales. Doc. 2190-14 at 2 (Pls.' Ex. 15). The proposal provided two reasons **[**43]** for the elimination: (1) it would "double the revenue" per prescription, and (2) Mylan had a "[s]trong potential generic defense[.]" *Id.* at 5. It never mentioned medical guidance or patient safety as rationale for the strategy. *Id.* Mr. Graybill responded that the proposal was a "[g]reat idea" and recognized the potential to "double" sales. Doc. 2193-13 at 2 (Pls.' Ex. 94).

On January 6, 2011, a Mylan Project Manager emailed Bruce Foster about his "(genius) idea of removing the EpiPen single pack off the market" and working with him to manage the project in the coming year. Doc. 2193-14 at 2 (Pls.' Ex. 95). While Mr. Foster initially presented the idea of eliminating the EpiPen single-pack from the market, he didn't have authority to make that decision within Mylan. Doc. 2143-21 at 7 (Defs.' Ex. 53) (Foster Dep. 410:9-18); Doc. 2143-14 at 10 (Defs.' Ex. 33) (Graham Dep. 191:8-19). But, later that month—in January 2011—Mylan put together a working group consisting of regulatory, medical, legal, and business personnel to consider "removing the single-pack EpiPen off the market[.]" Doc. 2143-19 at 5-6 (Defs.' Ex. 51). Mylan referred to the working group as "Project X2" or "Project Times **[**44]** Two." *Id.* at 4; *see also* Doc. 2143-21 at 3 (Defs.' Ex. 53) (Foster Dep. 28:19-20). No Pfizer employees were members of the Project X2 working group. Doc. 2165-23 at 4 (Kashtan Dep. 51:10-12).

[*940] On January 12, 2011, Mylan Manager Ivona Kopanja scheduled a Project X2 meeting. Doc. 2193-16 at (Pls.' Ex. 97). She explained the "purpose of the meeting is to evaluate EpiPen's opportunity around eliminating the single pack." *Id.* A presentation for the January 25, 2011 meeting noted the "compelling financial upside" for eliminating single EpiPen sales. Doc. 2190-12 at 6 (Pls.' Ex. 13). The presentation reported that the move to eliminate single EpiPens from the market could "[i]ncrease revenue by $81 million and gross profit by $41 million annually." *Id.* at 11. Also, the presentation noted that EpiPen was "still flying under the radar," such that the "[c]ombination of aggressive price increases plus sizing-up" that "may upset some payers" could be "smooth[ed] over" by "enhanced rebating" to "maintain preferred formulary position[.]" *Id.* at 16.

In a March 2011 email, Ms. Kopanja asked Project X2 Team member and Medical Director Ray Wolf: "I know that you were working on creating a 'medical' rationale **[**45]** for Project X2?" Doc. 2194-2 at 2 (Pls.' Ex. 102). In response, Mr. Wolf referenced the NIAID Guidelines, provided citations to medical literature, and noted that up "to 20% of patients have been reported to require a second dose of epinephrine, either due to ongoing symptoms or a biphasic reaction." Doc. 2226-7 at 2 (Defs.' Ex. 378).

In an April 2011 email, Mylan COO W. Lloyd Sanders reported internal concerns that removing single EpiPens from the market was "inconsistent with the guidelines." Doc. 2194-3 at 2 (Pls.' Ex. 103). But, after Mylan CEO Heather Bresch "learned that the co-pay that 'most' patients pay is the same for a single as it is for a two-pack, she became VERY motivated to pull the singles[.]" *Id.*

In minutes from later meetings of the Project X2 Team, Mylan cited the medical guidance advising that patients at risk for anaphylaxis carry two EAIs at all times as the "medical rationale" for discontinuing single-pack EpiPen sales. Doc. 2143-22 at 2 (Defs.' Ex. 55); Doc. 2143-23 at 5 (Defs.' Ex. 56). But, as Pfizer pointed out, the medical guidelines didn't include language about carrying two EAIs "at all times." Doc. 2190-11 at 2 (Pls.' Ex. 12). In 2010, about 75% of retail **[**46]** EpiPen devices were sold as two-packs, while an additional 11% of retail devices were sold as two or more single-packs together. Doc. 2143-24 at 5 (Defs.' Ex. 57). At the time, retail pens comprised 87% of all EpiPen sales. *Id.* But, in the non-retail market, single-pack sales made up 80% of sales. *Id.*

When making its decision to discontinue selling EpiPen single-packs, Mylan considered feedback from various stakeholders, including healthcare providers, pharmacists, and consumers; wholesalers, retail chains, and payors; and key opinion leaders in the medical field. Doc. 2143-24 at 10-17 (Defs.' Ex. 57); Doc. 2143-25 at 12, 14 (Defs.' Ex. 58). Also, Mylan considered the potential financial effect on its business if it eliminated single EpiPen sales. Doc. 2143-23 at 9-17 (Defs.' Ex. 56). As noted, the initial proposal for eliminating single EpiPens recognized that such action would "double the revenue" per prescription and that Mylan had a "[s]trong potential generic defense[.]" Doc. 2190-14 at 5 (Pls.' Ex. 15). And, Mylan projected that eliminating the single-pack would increase its net revenue by $43.9M and Pfizer's net revenue by $15.9M in 2011 alone. Doc. 2190-10 at 26 (Pls.' Ex. 11). **[**47]**

The working group also considered the financial effect for customers. Doc. 2143-24 at 6 (Defs.' Ex. 57). It found that about 76% of consumers would receive two devices—instead of just one—for a single average co-pay of $25. *Id.* But, about 16% of customers with co-insurance would pay $32 instead of $16. *Id.* And, customers paying cash would have their costs increase **[*941]** from $85 to $170 per EpiPen purchase. *Id.* The working group also proposed developing a coupon program to mitigate increased prices faced by some customers. Doc. 2143-25 at 20 (Defs.' Ex. 58).

In May 2011, the working group recommended selling EpiPen devices exclusively in packages of two—which Mylan later named the 2-Pak. *See* Doc. 2143-22 at 2-3 (Defs.' Ex. 55); *see also* Doc. 2169 at 7 (Pretrial Order ¶ 2.a.54.) (referring to the product as the "2-Pak"). The Project X2 Team's meeting minutes note as an "[a]dded medical rationale" that as "many as 10-20% of individuals who receive epinephrine will require more than 1 dose before resolution of symptoms." *Id.* at 2. The minutes also reflect that the Team made the decision to "deplete 1 pak inventory in market" instead of "re-packag[ing]" the inventory. *Id.* And, the minutes note **[**48]** the following as a "message point[ ]" explaining the reason why the 2-Pak conversion took effect only in the U.S. is that there are "[n]o international guidelines[.]" *Id.*

Several Mylan witnesses testified that the decision to sell EpiPen devices exclusively in the 2-Pak was driven by medical guidance. *See* Doc. 2143-3 at 14-15 (Defs.' Ex. 21) (Bresch Dep. 211:14-212:3) (Mylan's CEO testifying that that decision was "based on guidelines that people should have two doses immediately available if you went into anaphylactic shock"); *see also* Doc. 2143-14 at 7-8 (Defs.' Ex. 33) (Graham Dep. 160:19-161:2) (Mylan's corporate representative testifying that the decision "aligned with the guidelines of the world's smartest people in the area of treating allergies"). But, internally, Mylan recognized that the "WAO guidelines do not directly suggest 2 doses[.]" Doc. 2194-4 at 5 (Defs.' Ex. 104). And, on May 21, 2011, Mylan COO W. Lloyd Sanders emailed Heather Bresch stating that the WAO Guidelines "do not explicitly call for 2 epinephrine auto-injectors[.]" Doc. 2194-5 at 3 (Defs.' Ex. 105). Also, Ivona Kopanja noted it was "odd" to cite the WAO Guidelines as medical rationale and it "begs the question **[**49]** of why [Mylan is] not doing this ex-US." Doc. 2194-6 at 3 (Defs.' Ex. 106). Mylan recognized that "[a]nytime [it] reference[s] the NIAID food allergy guidelines as the reason" for the 2-Pak conversion, it "can only speak in terms of food-induced anaphylaxis." Doc. 2194-10 at 2 (Defs.' Ex. 110); *see also* Doc. 2194-12 at 2 (Defs.' Ex. 112) (Mylan public relations manager noting that "NIAID guidelines . . . only addresses food allergies" and recommending citing to the WAO Guidelines as medical rationale). According to Mylan's records, about 40% of people at risk for anaphylaxis have a food allergy. Doc. 2194-11 at 3 (Defs.' Ex. 111) (identifying "28M 'at risk' for anaphylaxis" with 11M due to food allergies).

In a June 2011 email, a Mylan public relations manager posed a list of Project X2 "Q&A," which included the question: "Is this change being driven in part to increase sales?" Doc. 2195-6 at 4 (Pls.' Ex. 126). The manager noted: "We don't need to reveal the true answer to these questions[.]" *Id.* Another proposed question was: "What should a patient do if they have an odd number of pens and cannot replenish to an even amount because they can't purchase a single EpiPen?" Doc. 2190-13 **[**50]** at 5 (Pls.' Ex. 14). Mylan chose to "delete the question" from the final version of the "Q&A." *Id*; *see also* Doc. 2195-8 (Pls.' Ex. 128). Mylan also removed questions about the percentages of prescriptions and purchases of EpiPen single packs and 2-Paks. *Compare* 2190-13 at 7 (Pls.' Ex. 14) (questions 30 & 31), *with* Doc. 2195-8 (Pls. Ex. 128). Also, in 2011, Bruce Foster emailed Lloyd Sanders suggesting that Mylan "package" the 2-Pak conversion as part of a "bigger program" so that "it goes over better[.]" Doc. 2195-14 at 2 (Pls.' Ex. 134).

[*942] In a June 21, 2011 email, Mylan Vice President Ron Graybill reported that Heather Bresch "wanted to implement" Project X2's initiative of removing single EpiPens from the market "ASAP." Doc. 2193-18 at 2 (Pls.' Ex. 99). Then, in July 2011, Mylan informed Pfizer of its decision to stop selling EpiPen single-packs, explaining that the decision "aligns [with] NIAID guidelines [which] recommend that patients at risk for anaphylaxis have immediate access to two doses of epinephrine at all times." Doc. 2143-25 at 5 (Defs.' Ex. 58). Mylan told Pfizer that EpiPen's revenue is "'below the radar' for most managed care organizations" but if "managed care organizations **[**51]** do raise concerns," Mylan had reserved "1.5% of all revenue . . . as rebates[.]" *Id.* at 16. Mylan prepared a presentation about Project X2 to provide at the July 14, 2011 JCC meeting. Doc. 2195-5 at 3 (Pls.' Ex. 125). But, the meeting minutes for that date reflect that the "2 Pack Conversion was the only topic that the JCC was not able to review." Doc. 2143-29 at 18 (Defs.' Ex. 62).

Meridian's General Manager testified that the decision to withdraw the single-pack was "Mylan's alone" and that Pfizer did not have any right to reject Mylan's decision. Doc. 2143-31 at 9-10 (Defs.' Ex. 64) (Handel Dep. 376:20-377:19). But, in some Pfizer communications about the proposal to eliminate EpiPen single-packs, a Pfizer executive stated that they did not "have agreement to [discontinue] the single-injector[;]" "such decisions need to be vetted" through the "JCC[;]" and "Pfizer/Meridian cannot approve this piece until the manufacturing issues are resolved and there is commercial alignment around this change." Doc. 2190-16 at 2, 4 (Pls.' Ex. 17). Early on in Project X2, Mylan understood that it "need[ed] to bring Meridian in the loop soon" about the proposal to eliminate single EpiPens because the **[**52]** project involved "a significant manufacturing/packing component." Doc. 2195-1 at 3 (Pls.' Ex. 121). And, in May 2011, Mylan approached Meridian with the "2 Pack Conversion" proposal noting that Mylan "believes EpiPen is a $1B brand." Doc. 2195-2 at 3 (Defs.' Ex. 122). In July 2011, Lloyd Sanders reported to Heather Bresch that Pfizer was "completely on board" with the 2-Pak conversion and "will rapidly push through [the] talking points." Doc. 2195-4 at 2 (Pls.' Ex. 124). Heather Bresch testified that Mylan didn't "persuade[ ] Pfizer on anything" and instead Pfizer was Mylan's "partner in the product." Doc. 2194-9 at 5 (Pls.' Ex. 109) (Bresch Dep. 227:9-228:19).

Pfizer "charged Mylan for EpiPen units" and "earned a 2% royalty on Mylan's profits." Doc. 2194-1 at 5 (Pls.' Ex. 101) (Handle Dep. 391:22-392:9). Pfizer recognized that its "revenue growth is largely driven by volume" and that the "majority of [its] growth comes from increases in the number of units sold to Mylan." Doc. 2194-14 at 8-9 (Pls.' Ex 115) (Muma Dep. 73:12-75:23, 80:1-13). And, Pfizer forecasted that the switch to the 2-Pak "could add approximately 15 percent to the current EpiPen annual sales figure (approximately **[**53]** $280 million)[.]" *Id.* at 12-13 (Muma Dep. 98:18-101:24).

In August 2011, Mylan stopped selling EpiPen single-packs in the United States and began selling EpiPen devices exclusively in packages of two. Doc. 2169 at 7 (Pretrial Order ¶¶ 2.a.54., 2.a.56.). After that switch, patients no longer could purchase a single EpiPen. Doc. 2193-19 at 4-5 (Graham Dep. 92:16-93:1). Patients only could purchase EpiPens in a 2-Pak. *Id.*; *see also id*. at 4-7 (Graham Dep. 171:8-23).

Mylan prepared communications to send to wholesalers, payors, pharmacists, and others about its conversion to the EpiPen 2-Pak. Doc. 2195-9 (Pls.' Ex. 129); Doc. 2195-10 (Pls.' Ex. 130); Doc. 2196-11 (Pls.' Ex. 131). An internal Mylan communication noted, "in advance of the public **[*943]** announcement on Aug. 24, [Mylan] proactively communicated to health care professionals, customers, wholesalers, pharmacists, payers and advocacy groups to inform them of" the 2-Pak switch, along with "the rationale for this change." Doc. 2195-11 at 2 (Pls.' Ex. 131). Mylan made the communications by "letters, emails and conference calls." *Id.* Also, Mylan concluded it didn't "need to call/write FDA" about the 2-Pak conversion. Doc. 2195-13 at 2 (Pls.' **[**54]** Ex. 133). A Mylan Vice President noted "it's not necessary and will raise more questions than we have answers." *Id.* at 9.

On August 15, 2011, Mylan's Director of Sales Training emailed a presentation titled "Project X2 Training" to Ron Graybill who then sent it to other Mylan employees. Doc. 2195-10 at 2 (Pls.' Ex. 130). The presentation cited the NIAID and WAO Guidelines as "rationale" for Mylan's switch to the 2-Pak. *Id.* at 10. It instructed the sales team to "be sure to speak to the medical rationale" and then mention the 2-Pak switch "at the end of the call" because "[i]t is critical to position this news in a secondary position." *Id.* at 12.

Mylan sells EpiPens in single packs in every country in the world except the United States and France. Doc. 2194-15 at 10 (Pls.' Ex. 116). When defendants solicited Pfizer Canada to introduce the 2-Pak in Canada, its "key opinion leaders" "push[ed] back" and reported they did "not plan to force patients to a 2 Pak." Doc. 2194-19 at 2 (Defs.' Ex. 120); Doc. 2194-14 at 6 (Defs.' Ex. 115) (Muma Dep. 63:15-65:3). In Canada, where "Pfizer Canada Inc. is the exclusive distributor of EpiPen devices[,]" it "markets and sells EpiPen devices in single-unit **[**55]** packages because it has determined that marketing or selling EpiPen devices in other package configurations would not be commercially viable in the Canadian market." Doc. 2194-16 at 18 (Defs.' Ex. 117).

Mylan's 2-Pak Press Release

On August 24, 2011, Mylan issued a press release titled "Dey Pharma to Offer EpiPen 2-Pak® and EpiPen Jr 2-Pak® Exclusively." Doc. 2169 at 7 (Pretrial Order ¶ 2.a.55.); *see also* Doc. 2206-16 (Pls.' Ex. 135). The press release referenced, quoted from, and cited to the NIAID and WAO Guidelines. Doc. 2206-16 at 2-5 (Pls.' Ex. 135). Also, it quoted Mylan's then-President Heather Bresch and Dr. Phillip Lieberman, Clinical Professor of Medicine and Pediatrics at the University of Tennessee College of Medicine and a member of the NIAID expert panel. *Id.* at 2-3. The press release stated, "The decision to exclusively offer the EpiPen 2-Pak, which contains two single EpiPen Auto-Injectors, aligns with [the NIAID] guidelines, as well as with the [WAO] anaphylaxis guidelines which recommend that physicians consider prescribing more than one epinephrine auto-injector." *Id.* at 2. The press release did not state that either set of Guidelines imposed any requirements for EpiPen **[**56]** packaging.

Dr. Lieberman testified that "in [his] mind" "there's no option" but to prescribe two doses of epinephrine, "based upon what [he] would consider what is ethical as a physician." Doc. 2165-24 at 3-4 (Defs.' Ex. 66) (Lieberman Dep. 47:10-48:6). He consistently has prescribed two-packs for his patients since the 1970s. *Id.* at 4 (Lieberman Dep. 48:8-15). And, he told Mylan that it was a "'good idea'" to sell EpiPen devices exclusively in packages of two. Doc. 2144-1 at 2 (Defs' Ex. 67).[14] But, Dr. Lieberman also testified that he never advised **[*944]** Mylan to start selling the EpiPen exclusively in the 2-Pak, that he agrees with the FDA that "[w]hether a patient requires one or two doses is at the discretion of the prescriber and the patient or caregiver," and his decision "in [his] personal practice" to prescribe all patients two doses is "a philosophical decision, and it's debatable." Doc. 2190-9 at 3-5 (Pls.' Ex. 10) (Lieberman Dep. 45:6-9, 66:20-67:2, 101:7-19) (internal quotation marks omitted). Some physicians testified that they use their judgment to determine whether to prescribe EpiPen (or competing) devices based on a variety of factors, including the patient's medical history **[**57]** and the physician's product preferences. Doc. 2165-4 at 91 (Defs.' Ex. 14) (Portnoy Dep. 91:1-16); Doc. 2165-24 at 6 (Defs.' Ex. 66) (Liberman Dep. 79:14-25) (explaining reasons why he would prescribe Auvi-Q instead of EpiPen).

In the weeks leading up to the August 24 2-Pak press release, Mylan and Pfizer executives, including Heather Bresch, sent emails with edits to the language of the 2-Pak press release. *See, e.g.*, Doc. 2190-11 (Pls.' Ex. 12); Doc. 2195-17 (Pls.' Ex. 139). Ms. Bresch, Pfizer, and then Mylan CEO Robert Coury approved the 2-Pak press release. Doc. 2195-15 at 2 (Pls.' Ex. 137); Doc. 2195-16 at 2 (Pls.' Ex. 138). On August 24, 2011, Mylan emailed the 2-Pak press release to more than 100 Mylan employees. Doc. 2206-17 (Pls.' Ex. 136).

---

[14] Plaintiffs object that this exhibit contains inadmissible hearsay. Doc. 2190-1 at 77. Defendants respond that it qualifies as a business record under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule. Doc. 2226-1 at 21. They also argue that it doesn't qualify as hearsay because defendants don't offer the exhibit to prove the truth of the matter asserted. *Id.* The court agrees with defendants on the latter point. Defendants don't offer this exhibit to prove that it was a "good idea" to sell EpiPens exclusively in a 2-Pak. Instead, they offer it to show what Dr. Lieberman—as a member of the NIAID expert panel—told Mylan about its decision to discontinue selling single EpiPens.

None of the named plaintiffs testified that he or she saw the August 2011 press release before becoming involved in this litigation. *See* Doc. 2142-1 at 34 & n.110 (Defs.' Mem.) (citing named plaintiffs' deposition testimony).[15] And, no named plaintiff testified that he or she relied on any statements by defendants when purchasing EpiPen devices. *Id.*

Many of the named plaintiffs purchased 2-Paks or multiple single-packs before 2011. Doc. 2144-16 **[**58]** at 2-8 (Defs.' Ex. 102 (citing Defs.' Ex. 102-A)).[16] At least 11 named plaintiffs purchased multiple devices in a single transaction while the single-pack was available. *Id.* Also, several named plaintiffs testified that they prefer to have more than one EpiPen device at any given time. *Id.* For example, named plaintiff Stacee Svites testified, "I have to have two packs. I mean, I have to carry two. I've known it all along." Doc. 2144-9 at 4 (Defs.' Ex. 90) (Svites Dep. 148:4-8). **[*945]** Also, plaintiff Angie Nordstrum testified that she wanted to purchase two EAI devices "because that's what I was advised as medically necessary." Doc. 2166-1 at 5 (Defs.' Ex. 70) (Nordstrum Dep. 132:17-20). And, plaintiff Lorraine Wight testified: "We were told by our doctors that we needed to have a minimum of two." Doc. 2144-1 at 6-7 (Defs.' Ex. 92) (Wight Dep. 141:17-142:7). Plaintiffs' expert, Meredith Rosenthal, testified that 62-68% of patients were not "forced" to buy EpiPen 2-Paks. Doc. 2166-17 at 15-16 (Defs.' Ex. 96) (Rosenthal Dep. 197:12-198:2).

Effects of the 2-Pak Switch

On August 24, 2011, Harry Jordan, Mylan's Director of National Accounts, emailed Bruce Foster and Ron Graybill, giving Mr. Foster **[**59]** "some major kudos for coming up with" the 2-Pak conversion idea and "Ron for seeing it through." Doc. 2195-18 at 3 (Pls.' Ex. 140). Mr. Graybill then emailed Mr. Jordan asking where was his "idea to bring $50 million per year to the bottom line?" *Id.* at 2. Mr. Graybill responded: "Why don't we just have an EpiPen 6 pack. . . . We can charge $450. Heck with 50 million. How about 150 million to the bottom line." *Id.* In January 2012, Mylan named Bruce Foster as the "President's Circle Winner for 2011." Doc. 2196-4 at 2 (Pls.' Ex. 146). Ron Graybill noted that Mr. Foster had "proposed and helped implement the idea to remove the EpiPen single pack from the market" which "resulted in an increase in sales of over $20 million in 2011, should increase sales in 2012 by over $50 million and will continue to have a similar positive impact in 2013 and beyond." *Id.*

In October 2011, Lloyd Sanders emailed Heather Bresch to propose raising the EpiPen price. Doc. 2196-2 at 2 (Pls.' Ex. 144). He reported that Mylan had implemented the 2-Pak switch without "ANY issues" and "no backlash" by payors. *Id.* He forecasted that the price increase would produce "$5.5M-$6.0M and it all drops to the bottom line." **[**60]** *Id.*

The switch to the 2-Pak "resulted in an increase in sales of over $20 million" for Mylan in 2011. Doc. 2196-4 at 2 (Pls.' Ex. 146). Between 2010 (when EpiPen single packs still were available) and 2012 (after the switch to the 2-Pak), Mylan's net sales increased from $278.6 million to $623.3 million and Pfizer's EpiPen revenue increased from $142 million to $225 million. Doc. 2196-6 at 4-5 (Pls.' Ex. 148). Pfizer attributed the majority "of growth" to "increases in number of units sold to Mylan." *Id.* at 3.

---

[15] One plaintiff, Donna Dvorak, when asked whether she had seen the press release, testified, "I think I have[,]" but she wasn't "sure when [she] first saw" it, and she testified that she didn't "think that [the press release] would have influenced" her decision to purchase an EpiPen. Doc. 2144-3 at 9 (Defs.' Ex. 73) (Dvorak Dep. 340:2-22).

[16] Plaintiffs assert defendants' Exhibit 102 is inadmissible hearsay. Doc. 2190-1 at 77. Defendants respond that: (1) the exhibit's contents aren't hearsay under *Fed. R. Evid. 801(c)(2)*'s definition of hearsay; and (2) the contents qualify as an admission by a party opponent under *Fed. R. Evid. 801(d)(2)*. Doc. 2226-1 at 21. Exhibit 102 is a summary of each plaintiff's EAI purchasing history and deposition testimony about purchasing EAIs with citations to the supporting evidence which is attached to Exhibit 102 as Exhibits 102-A-102-Z. *See* Doc. 2144-16 at 14-177. Exhibit 102 accurately cites the supporting exhibits, which plaintiffs don't challenge as inadmissible on summary judgment. So, the court considers the evidence summarized in Exhibit 102 because the supporting exhibits accurately support the evidence presented in summary fashion. And, ***HN6***[] under *Fed. R. Evid. 1006*, a summary is admissible "to prove the content of voluminous writings . . . that cannot be conveniently examined in court."

In February 2017, Mylan received a letter from the FDA confirming that Mylan still was authorized to sell single EpiPen devices, recognizing that Mylan currently was selling the EpiPen only in a 2-Pak, and noting that the "number of patients reported to require more than one dose of epinephrine for treatment of anaphylaxis is generally quoted as approximately 12-36%." Doc. 2144-14 at 2 (Defs.' Ex. 98).[17] The letter also recognized that, **[*946]** by selling EpiPen exclusively as a 2-Pak, "patients are unable to obtain a single dose even if their health care practitioner determines a single dose is appropriate or the patient needs to replace one used dose." *Id.* The letter noted that "the approved **[**61]** labeling does not recommend that patients be prescribed two doses" and "[w]hether a patient requires one or two doses is at the discretion of the prescriber and the patient or caregiver." *Id.* at 2-3. And, the FDA told Mylan that offering the EpiPen in both single packs and the 2-Pak would "provide patients and caregivers greater options and in turn access to care when only a single dose is necessary." *Id.* at 3.

Plaintiffs' expert asserts that "patients should have the ability to purchase only one" EpiPen because "it is not always medically necessary for every patient who uses EAIs to purchase or carry two doses[.]" Doc. 2206-3 at 17 (Pls.' Ex. 5) (Portnoy Expert Report ¶ 45). And, he opines, **[**62]** "the unavailability of a one-pack interferes with patient choice and with the provider's ability to exercise and implement medical judgment." *Id.*

The packaging of every EpiPen device contains the following FDA-approved instructions about the second dose: "With severe persistent anaphylaxis, repeat injections with an additional EpiPen or EpiPen Jr may be necessary." *Label: EPIPEN-epinephrine injection EPIPEN JR-epinephrine injection*, U.S. Nat'l Library of Medicine, https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=7560c201-9246-487c-a13b-6295db04274a (Updated Dec. 29, 2020).

Patent Litigation with Teva

EAIs may not be sold in the United States absent FDA approval. Doc. 2169 at 4 (Pretrial Order ¶ 2.a.18.). To secure FDA approval, a new generic drug product must submit an Abbreviated New Drug Application ("ANDA") proposing that the FDA approve the new product for sale and marketing in the United States. *New Drug Application*, FDA (last updated June 10, 2019), https://www.fda.gov/drugs/types-applications/new-drug-application-nda. In the context of an ANDA, the FDA sometimes uses the phrases "Reference Listed Drug" ("RLD") and "innovator drug" to refer to the branded product to which **[**63]** the FDA will compare the proposed generic. *Drugs@FDA Glossary*, FDA, https://www.accessdata.fda.gov/scripts/cder/daf/index.cfm?event=glossary.page (last visited May 3, 2020).

---

[17] Plaintiffs object that this exhibit is inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. Defendants respond that this letter from the FDA is a public record that qualifies for admission under *Fed. R. Evid. 803(8)*'s exception to the hearsay rule. Doc. 2226-1 at 21. ***HN7***[] *Rule 803(8)*'s public records exception to the hearsay rule defines a public record as:

> A record or statement of a public office if: (A) it sets out: (i) the office's activities; (ii) a matter observed while under a legal duty to report, but not including, in a criminal case, a matter observed by law enforcement personnel; or (iii) in a civil case or against the government in a criminal case, factual findings from a legally authorized investigation; and (B) the opponent does not show that the source of the information or other circumstances indicate a lack of trustworthiness.

Fed. R. Evid. 803(8). The advisory committee's notes explain that the "[j]ustification for the exception is the assumption that a public official will perform his duty properly and the unlikelihood that he will remember details independently of the record." *Fed. R. Evid. 803* advisory committee's note to *Paragraph (8)*. And, cases "illustrating the admissibility of records of the office's or agency's own activities are numerous." *Id.* The court agrees that defendants' Exhibit 98 falls within the public records exception to the hearsay rule because it is a record of a public office—the FDA—setting out its activities and plaintiffs have marshaled no circumstances "indicat[ing] a lack of trustworthiness" with the document. *Fed. R. Evid. 803(8)*.

Also, once again, plaintiffs object to an exhibit that they then turn around and cite as an exhibit supporting their own asserted summary judgment facts. *See* Doc. 2190-1 at 42 (Statement of Additional Material Fact ¶ 24 (citing Pls.' Ex. 22)). Plaintiffs' Exhibit 22 is the very same document as defendants' Exhibit 98—all the way down to the Bates numbering. Again, plaintiffs' cat-and-mouse tactics—asserting blanket evidentiary objections to defendants' summary judgment exhibits while relying themselves on the same exhibits—is unimpressive advocacy.

Since 1984, the Hatch-Waxman Amendments (the "*Hatch-Waxman Act*") have provided a framework for the FDA to evaluate ANDA applications while also allowing generic manufacturers to challenge patents associated with RLDs. *Patent Certifications and Suitability Petitions*, FDA **[*947]** (last updated Apr. 22, 2021), https://www.fda.gov/drugs/abbreviated-new-drug-application-anda/patent-certifications-and-suitability-petitions.

HN8[] Under the Hatch-Waxman Act, all ANDA applicants, and certain NDA applicants, must make certifications for patents associated with their RLD counterparts, including a "Paragraph IV certification," which is a certification by the applicant that, "in the opinion of the applicant," the relevant patent is "invalid or will not be infringed by" the new proposed generic product. *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*; *id.* *§ 355(b)(2)(A)(iv)*. Any applicant filing a Paragraph IV certification must notify the holder of the relevant patent and the holder of the approved drug application who claims that patent. *21 U.S.C. § 355(j)(2)(B)(iii)(II)*; *id.* *§ 355(b)(3)(C)*. Once a patent holder receives a Paragraph IV certification, **[**64]** it may file an infringement suit within 45 days, triggering an automatic 30-month stay of FDA approval of the ANDA. *21 U.S.C. § 355(j)(5)(B)(iii)*; *id.* *§ 355(c)(3)(C)*.

In 2007, Teva filed ANDA 90-0589 to develop a generic EAI. Doc. 2144-15 at 2 (Defs.' Ex. 101).[18] Teva submitted additional information to the FDA in May, June, and November 2008. Doc. 2201-3 at 2 (Pls.' Ex. 252). And, the FDA found Teva's application "acceptable for filing" on November 21, 2008. *Id.* Plaintiffs' expert, Dr. Carl Peck, who is a former Director of the FDA's Center for Drug Evaluation and Research, asserts that the "FDA could have sent Teva a 'refuse to receive' letter in early 2008 since the ANDA was not 'substantially complete' and required additional information/data." Doc. 2191-7 at 20 (Pls.' Ex. 30) (Peck Expert Report ¶ 40). But, he asserts that "the FDA proactively worked directly with Teva to enable the Teva ANDA to be substantially complete for filing." *Id.*

With its ANDA, Teva's goal was to develop and secure approval for a generic product that the FDA would consider "A-rated" to the EpiPen EAI.[19] Doc. 2144-7 at 11 (Defs' Ex. 103) (Weisman Expert Report ¶ 35); *see also* Doc. 2144-18 at 2 (Defs.' Ex. 104) (Teva email explaining that without **[**65]** an "A-rating," Teva "would then be required to have a sales team dedicated to training and education of the use of our device/product").

On May 1, 2009, the FDA sent Teva a deficiency letter. Doc. 2203-7 at 2 (Pls.' Ex. 299). In response, Teva submitted amendments to its application on May 22, 2009 and June 12, 2009. *See id.* at 2-153; *see also* Doc. 2203-8 at 2 (Pls.' Ex. 300) (referring to "May 23 and June 12, 2009 amendments"). On June 4, 2009, the FDA sent Teva another deficiency letter. Doc. 2203-9 at 2 (Pls.' Ex. 301). Teva responded with an amendment to its ANDA, but not until October 11, 2010. *Id.* On July 6, 2009, the FDA sent another deficiency letter to Teva. Doc. 2203-10 at 2 (Pls.' Ex. 302). On **[*948]** September 8, 2009, Teva responded with another amendment to its ANDA. *Id.* Dr. Peck opines that this part of the FDA's review process "proceeded in a timely manner" and "the FDA's review times were generally consistent with its review times as reported by the Inspector General's 2008 report and also not far afield from the statutory mandate of 180 days." Doc. 2191-7 at 20 (Pls.' Ex. 30) (Peck Expert **[**66]** Report ¶¶ 40-41).

When Teva submitted its ANDA, Pfizer's subsidiary Meridian held a patent on the auto-injector component of the branded EpiPen product. Doc. 2167-3 (Defs.' Ex. 105) (the '012 Patent).[20] To secure approval of its ANDA, Teva

---

[18] The court rejects plaintiffs' objection that defendants' Exhibit 101 is inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. As defendants have shown, documents produced by Teva qualify for admission as business records under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule. Doc. 2226-1 at 21 & n.35; *see also* Doc. 2227-1 at 15-17 (Savage Decl. Concerning Teva Docs.). For the same reasons, the court rejects plaintiffs' objections to defendants' Exhibits 104, 106, 108, 114, 117-28, 131-33, 144-52, 159-60, & 163. All of these exhibits consist of Teva-produced business records that qualify for admission under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule.

[19] An A-rating (sometimes referred to as "AB" or "AP" in the context of injectable products) signifies that two products are "therapeutically equivalent" and can be substituted for one another at the pharmacy counter. *Approved Drug Products with Therapeutic Equivalence Evaluations ("Orange Book Preface")*, FDA at ¶ 1.7 (last updated Jan. 21, 2021), https://www.fda.gov/drugs/development-approval-process-drugs/orange-book-preface.

[20] Plaintiffs dispute that the '012 Patent was a valid patent. But, that dispute doesn't controvert the undisputed fact that Meridian held the '012 Patent when Teva filed its ANDA. *See* *United States v. You, No. 2:19-CR-14, 2021 U.S. Dist. LEXIS 74813, 2021*

had to demonstrate that its device was "equivalent to" the EpiPen. Doc. 2167-2 at 6 (Defs.' Ex. 100); *see also id.* at 14. At the same time, however, Teva could not just copy the EpiPen without infringing on patents held by Pfizer's subsidiaries. Doc. 2144-19 at 9-10 (Defs.' Ex. 106). To avoid infringing these patents, Teva's proposed generic product for which it sought FDA approval included a different auto-injector than EpiPen. Doc. 2144-20 at 2 (Defs.' Ex. 108); Doc. 2145-1 at 20-26 (Defs' Ex. 109).

In July 2009, consistent with the Hatch-Waxman Act, Teva notified King and Meridian that it had filed ANDA 90-0589 to market a generic version of EpiPen Auto-Injector and had submitted a Paragraph IV certification. Complaint ¶ 17, *King Pharms., Inc. v. Teva Parenteral Meds., Inc.*, No. 1:09-cv-00652-GMS (D. Del. Aug. 28, 2009), ECF No. 1 at 4. Then, on August 28, 2009, King and Meridian sued **[**67]** Teva in the District of Delaware to enforce U.S. Patent No. 7,449,012B2 (the "'012 Patent"). *See generally id.* Mylan and Pfizer entered a Common Interest Agreement in connection with the EpiPen patent litigation against Teva. Doc. 2201-4 at 2 (Pls.' Ex. 253).

In 2007, King Pharmaceuticals, Inc. submitted a citizen petition[21] (the "King Petition") to the FDA asking it to apply certain standards to ANDAs for proposed EAI products. Doc. 2167-1 at 2 (Defs.' Ex. 99) (describing King Petition in FDA response letter).[22] Specifically, it **[*949]** asked the FDA to "[d]ecline to approve" any ANDA "unless it has been demonstrated that the proposed auto-injector is . . . 'the same' as the auto-injected in the refence listed drug (RLD)[.]" *Id.*

The FDA responded to the King Petition on July 29, 2009. *Id.* The response recognized that an ANDA must "ensure that its performance characteristics and critical design attributes will result in a product that will perform the same as the RLD[,]" but "[t]his does not mean, however, that all design features of the autoinjector in the ANDA and its RLD must be exactly the same." *Id.* at 7. Also, the FDA's letter stated, for emergency use products like EAIs, "it is particularly important to ensure that patients in **[**68]** an emergency situation can use the product safely and effectively in accordance with instructions provided for the RLD without additional physician intervention or retraining[.]" *Id.* The FDA further explained that if it were to determine that the auto-injector constituent of a product proposed in an ANDA is not the "same as" the auto-injector constituent of the RLD, "FDA will refuse to approve the ANDA." *Id.* at 7-8. But, the FDA did note that some "design differences may be acceptable as long as they do not significantly alter product performance or operating principles and do not result in impermissible differences in labeling." *Id.* The FDA's letter also explained: "Clinical usability or human factor studies may also be required," and such studies "are beyond the scope of studies that can be reviewed and approved in an ANDA." *Id.* at 8. And, the FDA stated: "For products that require physician training before unsupervised patient use, differences in operation that require retraining prior to use are not expected to be acceptable in an ANDA." *Id.* at 11-12. In addition to the

---

*WL 1539579, at *3 (E.D. Tenn. Apr. 19, 2021)* ("***HN9***[] The fact that some patents might not be valid does not affect the fact that a patent filed with the United States Patent and Trademark Office remains part of the public record.").

Also, plaintiffs object that defendants' Ex. 105 is inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. The court disagrees. The '012 Patent itself likely doesn't qualify as hearsay because defendants don't offer the '012 Patent to prove any of its contents, but even if they did, the '012 Patent is a public record that qualifies for admission under *Fed. R. Evid. 803(8)*. *See* *Hay & Forage Indus. v. New Holland N. Am., Inc., 25 F. Supp. 2d 1170, 1175 n.2 (D. Kan. 1998)* (holding that ***HN10***[] patents were admissible evidence because "the documents offered are not hearsay" when they were offered "not to prove the truth of any of the matters which they assert, but rather to prove that various patents use" a particular term, but in "any event, even if the patents were hearsay, they would be subject to the public records exception to the hearsay rule" (citing *Fed. R. Evid. 803(8)*)). *Cf.* *SB IP Holdings, LLC v. Vivint Smart Home, Inc., No. 4:20-cv-886, 2021 U.S. Dist. LEXIS 82871, 2021 WL 1721715, at *1 (E.D. Tex. Apr. 30, 2021)* ("Courts routinely take judicial notice of patents, prosecution history, and patent applications.").

[21] ***HN11***[] A citizen petition is a document that anyone may submit to the FDA asking it "to issue, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action." *21 C.F.R. § 10.25(a)*.

[22] Again, plaintiffs object to this exhibit as inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. Defendants respond that this FDA response letter is a public record that qualifies for admission under *Fed. R. Evid. 803(8)*'s exception to the hearsay rule. Doc. 2226-1 at 21. The court agrees. Defendants' Exhibit 99 falls within the public records exception to the hearsay rule in *Fed. R. Evid. 803(8)* because it is a record of a public office setting out its activities and plaintiffs have not shown any circumstances indicating a lack of trustworthiness with the document.

Citizen Petition, Meridian's Director of Regulatory Affairs, Dr. Thomas G. Fruend, wrote letters to the FDA on **[**69]** December 5, 2012 and May 7, 2013, about Teva's pending ANDA. Doc. 2204-3 at 2-7 (Pls.' Ex. 324).

In December 2009, Dey submitted a citizen petition (the "Dey Petition") asking the FDA to apply certain conditions to its approval of a generic EAI. Doc. 2167-2 at 2 (Defs.' Ex. 100) (describing Dey Petition in FDA response letter).[23] Specifically, Dey asked that the FDA "[d]ecline to approve any ANDA . . . and decline to assign an 'AB' rating for a generic product that is not the same as the currently marketed EpiPen auto-injector[.]" *Id.* Also, Dey asked that the FDA "[d]etermine that generic versions of EpiPen auto-injector must have the same design, operation, and function of the RLD[.]" *Id.* at 8. King and Meridian employees provided comments and input on Dey's Citizen Petition. Doc. 2204-2 at 2 (Pls.' Ex. 323).

[*950] On May 27, 2010, the FDA denied Dey's Citizen Petition. Doc. 2167-2 at 2 (Defs.' Ex. 100). In its response to the Dey Petition, the FDA noted that the "King Petition response specifically addressed situations such as the one the [Dey] Petition addresses" and that "there is no requirement in the Act, implementing regulations, guidance, or Agency precedent that would mandate as narrow **[**70]** an interpretation of sameness as [Dey] would have the [FDA] adopt." *Id.* at 9-10. The letter also recognized that because EAIs are emergency-use products, the FDA must use "particular vigilance" in ensuring product safety. *Id.* at 9.

On November 1, 2010, Teva submitted a Paragraph IV certification concerning an additional Pfizer EpiPen patent: U.S. Patent No. 7,794,432B2 (the "'432 Patent"). First Amended Complaint ¶ 21, *King Pharms., Inc. v. Teva Parenteral Meds., Inc.*, No. 1:09-cv-00652-GMS (D. Del. Nov. 11, 2010), ECF No. 37-1 at 5. On November 11, 2010, King and Meridian amended their Complaint in the Delaware suit against Teva to enforce the second patent. *See generally id.* Both the '012 and '432 Patents are listed in the FDA Orange Book and expire in September 2025. Doc. 2169 at 4 (Pretrial Order ¶ 2.a.27.).

As the patent litigation progressed, Teva continued to pursue FDA approval of its generic EAI. *See, e.g.*, Doc. 2145-2 at 2-4 (Defs.' Ex. 113) (correspondence between Teva and the FDA about the ANDA application).[24] In March 2010, the FDA sent Teva a "bioequivalence" deficiency letter. *Id.* In an internal e-mail, the Teva project manager overseeing the product stated that this deficiency was primarily concerned with the fact that the Teva **[**71]** device was not "similar enough" to the RLD, *i.e.*, the EpiPen and EpiPen Jr Auto-Injectors. Doc. 2145-3 at 3 (Defs.' Ex. 114).

Then, in February 2011, the FDA cited differences between Teva's EAI and EpiPen in a "labeling deficiency" letter. Doc. 2145-4 (Defs.' Ex. 115).[25] Among other comments, the FDA noted that Teva's proposed device instructions did "not read the same as the innovator" and were "difficult to follow and to ensure that the sequence of steps match the innovator." *Id.* at 4. Thus, the FDA predicted that the proposed instructions "may present confusion for customers that have used the innovator's product." *Id.*

---

[23] The court rejects plaintiffs' objection that defendants' Exhibit 100 is inadmissible hearsay to which no exception applies. The court finds that this document arguably qualifies for admission under *Fed. R. Evid. 803(8)*'s public record exception to the hearsay rule. Also, it qualifies as a business record under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule. And, plaintiffs have submitted the exact same document as part of an exhibit supporting their own asserted summary judgment facts. Doc. 2190-1 at 69 (Statement of Additional Material Fact ¶ 147) (citing Pls.' Ex. 322 (Doc. 2207-14 at 2-15)). This ploy is no more impressive than plaintiffs' other similar attempts to enforce a "heads I win, tails you lose" paradigm.

[24] The court rejects plaintiffs' objection to defendants' Exhibit 113 as inadmissible hearsay to which no exception applies. Doc. 2190-1 at 20. Defendants assert that this exhibit doesn't qualify as hearsay because it's not offered to prove the truth of the matter asserted. Doc. 2226-1 at 21. The court agrees. Defendants don't offer this exhibit to prove the truth of any of its contents. Instead, it is offered to show that Teva was communicating with the FDA about its ANDA for its proposed generic EAI. So, this exhibit isn't inadmissible hearsay under *Fed. R. Evid. 801(c)*.

[25] The court rejects plaintiffs' objection to defendants' Exhibit 115 as inadmissible hearsay to which no exception applies. Doc. 2190-1 at 20. Defendants assert that this exhibit qualifies as a public record subject to *Fed. R. Evid. 803(8)*'s exception to the hearsay rule. Doc. 2226-1 at 21. The court agrees for the same reasons discussed *supra* note 17.

In a March 2011 internal e-mail exchange, Teva personnel discussed these and other deficiency communications that the FDA had sent to Teva, including a chemistry deficiency that requested "stability data" for the stability of the epinephrine inside Teva's device. Doc. 2145-3 at 3 (Defs.' Ex. 114). The Teva correspondence concluded with a March 15, 2011 e-mail stating: "This product needs a reformulation as well as a new device." *Id.*

Also in March 2011, Teva and Pfizer discussed in an email titled "Fre 408: couple of things" setting up a phone call to **[*951]** discuss the **[**72]** Teva/EpiPen patent infringement litigation. Doc. 2203-11 at 2 (Pls.' Ex. 304).

On May 17, 2011, Teva received another deficiency letter from the FDA. Doc. 2145-5 at 2 (Defs.' Ex. 116).[26] This letter asked Teva to "conduct a design validation (human factors) study" and stated that the FDA "recommend[s] that you submit a draft of the test protocol before you implement it for our review and feedback to ensure that your methods will be acceptable." *Id.* at 3. A human factors study is a study "conducted with representative users to assess[,]" among other things, "the ability of the user" to operate the device safely and effectively. Doc. 2144-17 at 10 (Defs.' Ex. 103) (Weisman Expert Report ¶ 30).

On the same day—May 17, 2011—Teva's "epinephrine core team" met. Doc. 2145-6 at 2 (Defs.' Ex. 117). The meeting minutes reflect that Teva's device manufacturer had received a warning letter from the FDA, and Teva was in the process of evaluating potential alternative manufacturing sites. *Id.* at 3-5. The minutes also note that "[n]o [epinephrine] batches made so far have met shelf life requirements." *Id.* at 2. Also, Teva experienced additional manufacturing problems with needle corrosion, needle **[**73]** separation, fill volume, dosage delivery, stopper placement, and impurities. Docs. 2145-7-2145-14 (Defs.' Exs. 118-125).

In the summer of 2011, Teva decided to amend and resubmit its ANDA with changes to both the epinephrine formulation and the device itself. Doc. 2145-15 at 8 (Defs.' Ex. 126). In a September 8, 2011 internal e-mail, Cory Wohlbach, the Teva regulatory affairs employee assigned to the epinephrine project, estimated that the "probability of success for the approval of the Epinephrine drug product is around 60%." Doc. 2144-20 at 2 (Defs.' Ex. 108). Mr. Wolhbach explained that "differences in the RLD device [EpiPen] to the [Teva] device . . . add[ ] to the complexity of the approval." *Id.* He noted the two devices "are not exactly the same[,]" and because "[e]pinephrine is a rescue product, similarities between the RLD and the [Teva] devices are critical." *Id.* In January 2012, Teva informed Pfizer that "it is modifying its proposed epinephrine auto-injector and that it intends to submit an amendment to its ANDA after the trial in this matter." Proposed Joint Pretrial Order, Ex. 21 ¶ 2, *King Pharms., Inc. v. Teva Parenteral Meds., Inc.*, No. 1:09-cv-00652-GMS (D. Del. Jan. **[**74]** 24, 2012), ECF No. 142-1 at 291.

Teva began testing new batches of its product in December 2011, but at an April 17, 2012 meeting, it was reported that these batches had failed because of a "needle separation issue." Doc. 2145-16 at 3 (Defs.' Ex. 127). Also, Teva meeting minutes from February 10, 2012 reported "several technical issues" that occurred "during testing of the Epinephrine stability batches[.]" Doc. 2145-17 at 2 (Defs.' Ex. 128). Six days later, on February 16, 2012, the EpiPen bench trial began. Day 1 of Trial Transcript, *King Pharms., Inc. v. Teva Parenteral Meds., Inc.*, No. 1:09-cv-00652-GMS (D. Del. July 25, 2012), ECF No. 150 at 1 (transcript dated "Thursday, February 16, 2012").

Settlement of the Teva Patent Litigation

After Pfizer rested its case-in-chief in the bench trial, Teva moved for judgment as a matter of law. Day 2 of Trial Transcript, *King Pharms., Inc. v. Teva Parenteral* ***[*952]*** *Meds., Inc.*, No. 1:09-cv-00652-GMS (D. Del. July 25, 2012), ECF No. 151 at 140-64 (Tr. 363:12-387:2). The presiding Judge, The Honorable Gregory M. Sleet, denied the motion. *Id.*

During the trial, Pfizer and Teva simultaneously engaged in settlement negotiations in Judge Sleet's chambers. Day **[**75]** 4 of Trial Transcript, *King Pharms., Inc. v. Teva Parenteral Meds., Inc.*, No. 1:09-cv-00652-GMS (D. Del.

---

[26] The court rejects plaintiffs' objection to defendants' Exhibit 116 as inadmissible hearsay to which no exception applies. Doc. 2190-1 at 20. Defendants assert that this exhibit qualifies as a public record subject to Fed. R. Evid. 803(8)'s exception to the hearsay rule. Doc. 2226-1 at 21. The court agrees for the same reasons discussed *supra* n.17.

July 25, 2012), ECF No. 154 at 85 (Tr. 750:1-11). On March 9, 2012, at the end of the fourth and last day of trial, Judge Sleet told the parties that he would hold off on issuing an opinion for "as long as it takes—and I really mean that, as long as it takes" to allow the parties to pursue settlement negotiations. *Id.* Pfizer and Teva continued settlement talks through March and April 2012. Letter to The Honorable Gregory M. Sleet, *King Pharms., Inc. v. Teva Parenteral Meds., Inc.*, No. 1:09-cv-00652-GMS (D. Del. Mar. 30, 2012), ECF No. 144.

At the same time, Teva's regulatory team "d[id] not believe FDA would approve the product." Doc. 2145-20 at 3 (Defs.' Ex. 131) (noting in April 3, 2012 meeting minutes that that the FDA likely wouldn't approve the product even if Teva "highlight[ed] [its] intent to amend the application"). The position of Teva's Quality Team was: "With a critical defect such as this (needle dislodgement) the amendment should not be filed and new syringes should not be ordered or new batches made until root cause has been identified and corrective and preventative **[**76]** actions put in place[.]" *Id.* Then President and CEO of Teva-Americas William Marth acknowledged in an April 2012 internal e-mail that "[t]he product is challenging[.]" Doc. 2145-21 at 2 (Defs.' Ex. 132). Mr. Marth was willing to negotiate "any date in 2016 or earlier." Doc. 2145-22 at 2 (Defs.' Ex. 133).

Also, while the Teva litigation was pending, two additional EpiPen patents were pending approval by the U.S. Patent and Trademark Office ("USPTO"). Doc. 2146-1 at 2 (Defs.' Ex. 134); Doc. 2146-2 at 4 (Defs.' Ex. 135);[27] *see also* Doc. 2169 at 5-6 (Pretrial Order ¶¶ 2.a.38., 2.a.39.). In December 2010, the application for what would become U.S. Patent No. 8,870,827 (the "'827 Patent") was made publicly available. Doc. 2146-1 at 2 (Defs.' Ex. 134). Then, in October 2014, the USPTO issued the '827 Patent. *Id.* In November 2011, the USPTO issued another EpiPen-related patent, U.S. Patent No. 8,048,035 ("'035 Patent"). Doc. 2146-2 at 4 (Defs.' Ex. 135). The disputes at issue in the Teva litigation did not involve either the '827 and '035 Patents. Days 1-4 of Trial Transcript, *King Pharms., Inc. v. Teva Parenteral Meds., Inc.*, No. 1:09-cv-00652-GMS (D. Del. July 25, 2012), ECF Nos. 150-51, 153-54. These two patents do not expire until 2025. Doc. 2169 at 4 (Pretrial Order ¶ 2.a.27.) (explaining that **[**77]** the EpiPen Device Patents expire in 2025).

On April 26, 2012, Pfizer and Teva executed a binding term sheet that granted Teva a license to launch its EAI by June 22, 2015, subject to FDA approval. Doc. 2146-3 at 14-20 (Defs.' Ex. 136). The term sheet did not include any monetary payment between Pfizer and Teva. *Id.* The draft settlement agreements exchanged by the parties never proposed a licensed entry date earlier than June 2015. Doc. 2145-18 **[*953]** at 7-9 (Defs.' Ex. 129) (Myers Dep. 93:15-95:11).

On July 20, 2012, Pfizer and Teva executed the final Settlement and License Agreement to resolve the EpiPen litigation. Doc. 2146-3 at 2-29 (Defs.' Ex. 136). On that same date, Mylan executed a Covenant Not to Sue Teva with respect to any patents in the ownership or control of Mylan. *Id.* at 28-29. By settling, the parties to the Teva litigation avoided litigation risk and millions of dollars in expected litigation costs. Doc. 2146-5 at 74-75 (Defs.' Ex. 138) (Torrance Expert Report ¶ 146).

Mylan was not a signatory to the binding term sheet or the Settlement and License Agreement. Doc. 2146-3 at 10-12, 19-20 (Defs.' Ex. 136). But, as discussed, Mylan signed a Form of Covenant Not to Sue **[**78]** and Mutual Releases, which was attached to the settlement agreement. *Id.* at 24-29. A Mylan witness testified that Mylan signed the covenant "to appease Teva" though Mylan "didn't think [it] was necessary given that these weren't [Mylan's] patents." Doc. 2146-6 at 6-7 (Defs.' Ex. 139) (Jenkins Dep. 116:13-117:5).

Mylan witnesses testified that Mylan received updates from Pfizer about the Teva litigation, including during trial and settlement negotiations, but as one witness put it, Mylan "played no active role in the case itself." Doc. 2146-7 at 5-6 (Defs.' Ex. 140) (Ondos Dep. 63:23-64:2); *see also* Doc. 2146-6 at 6 (Defs.' Ex. 139) (Jenkins Dep. 116:13-

---

[27] The court rejects plaintiffs' objections to defendants' Exhibits 134 and 135 as inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. Exhibit 134 is a patent which likely doesn't qualify as hearsay because defendants don't offer the '827 Patent to prove any of its contents. But even if they had offered the exhibit to prove the truth of its contents, the '827 Patent is a public record that qualifies for admission under *Fed. R. Evid. 803(8)*. *See supra* n.20. And Exhibit 135 is a Mylan business record that qualifies for admission under *Fed. R. Evid. 803(6)*'s business records exception.

25) (testifying that "Pfizer was the party responsible for the negotiation and settlement" and that "[u]ltimately it was their call whether to settle or not settle"). Some witnesses testified that Mylan had no decision-making rights in the litigation. Doc. 2146-7 at 4 (Defs.' Ex. 140) (Ondos Dep. 60:14-23); Doc. 2145-18 at 13 (Defs.' Ex. 129) (Myers Dep. 127:2-12). One witness testified that Mylan didn't provide any legal or business advice to Pfizer about the settlement, including the agreed licensing date for the Teva generic found **[**79]** in the binding term sheet. Doc. 2146-6 at 3-5 (Defs.' Ex. 139) (Jenkins Dep. 96:6-9, 99:1-8, 15:1-8); Doc. 2145-18 at 20 (Defs.' Ex. 129) (Myers Dep. 209:7-14). Also, Pfizer's counsel testified that it didn't need Mylan's consent to settle the litigation. Doc. 2145-18 at 7-9 (Defs.' Ex. 129) (Myers Dep. 208:18-20).

But, in email correspondence dated March 8, 2012 (the day before the last day of the Teva/EpiPen bench trial), William Marth noted that he had "talked to Heather yesterday throughout the afternoon and evening about settlement" and that "[s]he (Heather) wants to give [Teva] a 2018 entry date but would likely agree to 2017." Doc. 2201-21 at 2 (Pls.' Ex. 255). Also, Mylan and Pfizer's Supply Agreement requires the parties to notify each other of potential infringement and "jointly determine in good faith the appropriate course of action[.]" Doc. 2201-7 at 27 (Pls.' Ex. 256). And, several documents reference that Mylan's lawyers spoke with Teva and Pfizer about the settlement. Doc. 2201-11 at 2 (Pls.' Ex. 260) (explaining that Mylan General Counsel had called Teva "to ask if there is anything we can do to get Epi back on track"); Doc. 2201-13 at 2 (Pls.' Ex. 262) (stating that **[**80]** Teva had called Mylan's Deputy General Counsel and "relayed the following proposal: epipen in 2014 and nuvigil in 2018"); Doc. 2201-14 at 2 (Pls.' Ex. 263) (scheduling telephone conference with Teva, Mylan, and Pfizer); Doc. 2201-22 at 3 (Pls.' Ex. 266) (Haggerty Dep. 78:8-24) (Mylan's General Counsel testifying that he can't confirm or dispute entries on a privilege log showing that he spoke with Pfizer about the EpiPen litigation 56 times in March and April 2012).

On April 26, 2012, Mylan and Pfizer issued a joint press release announcing that "Meridian Medical Technologies, a Pfizer subsidiary, has entered into a settlement **[*954]** agreement with Teva that will resolve pending patent litigation related to [the Teva/EpiPen litigation]." Doc. 2146-9 at 2 (Defs.' Ex. 142).[28] The press release doesn't say that Mylan was a party to the suit or settlement. *Id.* Mylan's Nina Devlin drafted the press release. Doc. 2201-20 at 2-4 (Pls.' Ex. 269). And, others within Mylan reviewed and provided comment on the press release. Doc. 2202-2 at 2 (Pls.' Ex. 271); Doc. 2202-3 at 2 (Pls.' Ex. 272); Doc. 2202-1 at 2-3 (Pls.' Ex. 270). Also, several months after the settlement, in a July 2012 earnings call, Heather **[**81]** Bresch commented that "the runway was absolutely clear . . . through 2015, through *our settlement* with Teva[.]" Doc. 2207-4 at 12 (Pls.' Ex. 273) (emphasis added).

The settlement agreement gave Teva a license to all issued patents and a covenant not to sue based on any current or future patents covering EpiPen devices (including the '035 Patent not at issue in the litigation, and any future patents like the '827 Patent). Doc. 2146-3 at 3, 14-15 (Defs.' Ex. 136). It did not contain any monetary payment. *See generally id.*

Plaintiffs' expert Dr. Carl Peck testified that he has no opinion whether the settlement agreement caused any delay in Teva's product development or FDA approval. Doc. 2142-3 at 9 (Defs.' Ex. 1) (Peck Dep. 115:14-116:2) (testifying that he was not giving a "casual explanation" for why it took Teva so long to achieve FDA approval). Also, he testified that Teva's generic device did not satisfy the requirements for FDA approval until around August 2018. *Id.* at 12 (Peck Dep. 121:9-11); *see also* Doc. 2191-7 at 8 (Pls.' Ex. 30) (Peck Expert Report ¶ 16). But, he also opines about the issue "whether the FDA caused delays in the review and approval of [Teva's] ANDA[,]" concluding "based **[**82]** on [his] independent review and analysis of materials identified in [his] report, [his] expertise, and [his] knowledge of the FDA drug-approval process . . . that these delays were not due to the FDA's conduct or inaction." Doc. 2191-7 at 8 (Pls.' Ex. 30) (Peck Expert Report ¶ 17).

---

[28] Plaintiffs object that this exhibit is inadmissible hearsay for which no exception applies. Doc. 2190-1 at 77. But, plaintiffs don't controvert the statement of fact that relies on it. *Id.* at 20; *see also* Doc. 2226-3 at 34 (discussing "SMF ¶ 93"). And, as defendants respond, Exhibit 142 is admissible because it's not hearsay. Doc. 2226-1 at 21. Defendants don't offer the press release to prove the truth of the matter of any of the contents in the press release. And, even if it is hearsay, the Mylan press release likely qualifies as a business record subject to *Fed. R. Evid. 803(6)*'s exception to the hearsay rule.

Teva's Continued Attempts to Secure FDA Approval

As defendants' expert testified, Teva is a large, sophisticated pharmaceutical company "skilled in the art" of drug development. Doc. 2203-6 at 3-4 (Pls.' Ex. 298) (Weisman Dep. 42:24-45:6). Internal Teva documents from late 2011 and early 2012 projected that Teva would launch its generic EAI by 2014. Doc. 2203-20 at 5 (Pls.' Ex. 317); Doc. 2203-21 at 3-5 (Pls.' Ex. 318).

On July 31, 2013, Teva sent a letter to the FDA responding to a deficiency letter dated March 29, 2010—more than three years earlier. Doc. 2203-13 at 2 (Pls.' Ex. 309). On August 29, 2013, Teva submitted its first human factors study to the FDA—responding to the FDA's deficiency letter of May 17, 2011. Doc. 2146-11 at 2-5 (Defs.' Ex. 144). Earlier, in January 2012, Teva had submitted a draft protocol for this study to the FDA and requested feedback "within one month to enable Teva to proceed **[**83]** with the study and promptly respond to the rest of requests contained in the deficiency letter." Doc. 2146-12 at 2 (Defs.' Ex. 145). More than one and a half years later, and after Teva followed up at least three times, the FDA still had not **[*955]** provided feedback about the protocol. Doc. 2146-13 at 2 (Defs.' Ex. 146); Doc. 2146-14 at 1-2 (Defs.' Ex. 147); *see also* Doc. 2142-3 at 34 (Defs' Ex. 1) (Peck Dep. 208:6-10) (agreeing that Teva "went ahead and did the human factors study even though FDA had not yet gotten back to it about the draft protocol").

In 2013, Teva discovered that when the device "was dropped without the safety cap, [it] had a tendency to fire, yet it wasn't evident to the end user that the device had in fact fired." Doc. 2146-15 at 2 (Defs.' Ex. 148). So, Teva had to redesign its device again "so that the user clearly knows the device has been fired[.]" *Id.* Teva recognized that the device, "being a life saving product[,]" made it "critical [for Teva] to make this change." *Id.*

Teva recognized that "a new Human factor study will be required for this device modification[.]" *Id.* at 3. In 2014, Teva completed a new human factors study. Doc. 2146-16 at 2 (Defs.' Ex. 149). That **[**84]** same year, an internal Teva document estimated the net present value of the EpiPen generic at $193 million—$70 million more than any other product Teva was working to develop. Doc. 2146-17 at 4 (Defs.' Ex. 150).

As it worked to secure FDA approval, Teva implemented a "Tiger Team" to work on its generic EAI. Doc. 2205-1 at 7 (Pls.' Ex. 344); Doc. 2205-2 at 2-3 (Pls.' Ex. 345). One Teva communication defined a "Tiger Team" as "a group of experts assembled to solve a crisis or to have a reliable/predictable performance on important projects and/or tasks with high priorities." Doc. 2205-2 at 3 (Pls.' Ex. 345). In May 2014, Rosario Lobrutto asked for "more resources (and the right resources/best experts) to address current issues[.]" Doc. 2205-3 at 3 (Pls.' Ex. 346). She asked for 8.5 additional persons "to backfill the resource gaps[.]" Doc. 2205-4 at 7 (Pls.' Ex. 347). Teva agreed to "reallocate [its] existing resources from agreed upon other projects (with portfolio) to Epi[.]" *Id.* at 4.

On August 1, 2014, Teva responded to the FDA's deficiency letter dated February 2, 2011. Doc. 2203-18 at 2 (Pls.' Ex. 314). On December 30, 2014, Teva submitted an amended ANDA to the FDA that one Teva **[**85]** executive described as "basically . . . a completely new ANDA." Doc. 2146-18 at 2 (Defs.' Ex. 151). Teva's submission stated that it was prepared in response to the FDA's March, 2, 2010 deficiency letter. Doc. 2146-19 at 2 (Defs.' Ex. 152). Also, this response explained that Teva had "changed the site of the drug product manufacture/testing . . . and device assembly[,]" "changed the formulation" of epinephrine, and "changed the device to improve the design to ensure the user will not be presented with a device that has delivered the drug product but has not engaged the safety guard." *Id.* Teva asked the FDA to review its ANDA on an "expedited" basis. *Id.* Dr. Peck asserts that Teva could have requested "expedited review" as early as "April 2012" when the Teva/EpiPen litigation settled because "by that time . . . there were no blocking patents or exclusivities based on the Agreement." Doc. 2191-7 at 15-16 (Pls.' Ex. 30) (Peck Expert Report ¶¶ 33-34). Defendants' expert, Dr. Steven M. Weisman, agreed that Teva "theoretically could have requested expedited review at any point in time; however, [Teva] didn't have an application . . . that was likely to be approved within that time frame, **[**86]** so that would have certainly frustrated the FDA and not have been an appropriate request." Doc. 2203-6 at 5 (Pls.' Ex. 298) (Weisman Dep. 289:17-25). Also, Dr. Weisman testified that Teva had "deficiencies throughout a large part of the development program that weren't entirely addressed until the complete response in 2014." *Id.* at 6 (Pls.' Ex. 298) (Weisman Dep. 309:13-20).

[*956] Also, Dr. Peck opines that when "Teva finally did submit its major amendment" on December 30, 2014, "as Teva was aware, the FDA would have reviewed it under the more stringent data requirements that went into effect in mid-2014." Doc. 2191-7 at 26 (Pls.' Ex. 30) (Peck Expert Report ¶ 56.d.). Dr. Peck explains that "a new standard policy went into effect on June 20, 2014, under which generic drugs now had to follow ICH drug product stability requirements in their ANDA filings[,]" where "both ANDAs and NDAs had the same CMC requirements for approval." *Id.* at 17 (¶ 37). Before June 2014, "generics only had to file minimal CMC data." *Id.*

Defendants did not know about the interactions between Teva and the FDA. Doc. 2143-14 at 11 (Defs.' Ex. 33) (Graham Dep. 318:21-25). So, Mylan wouldn't have known that the FDA had asked **[**87]** Teva to conduct a human factors study. *Id.*; *see also* Doc. 2146-20 at 20 (Defs.' Ex. 153) (Peck Rebuttal Expert Report ¶ 43).

On January 16, 2015, Mylan Specialty submitted a citizen petition to the FDA about the Teva ANDA. Doc. 2146-21 (Defs.' Ex. 154).[29] The citizen petition asked the FDA to "refrain from approv[ing] the Teva ANDA unless . . . the agency concludes that the proposed product is the 'same as' the EpiPen auto-injector." *Id.* at 2. Also, Mylan's citizen petition noted that "[p]ublicly available (and recently confirmed) information indicates that the design and operating principles of the Teva proposed product differ significantly from those of the EpiPen® auto-injector." *Id.* at 3. Based on these differences, the petition stated that Teva should provide, "at a minimum, very carefully designed human factors studies that would demonstrate the Teva product's safety and effectiveness and its comparability to the EpiPen® auto-injector." *Id.* at 4.

On April 28, 2015, Mylan Specialty submitted a supplement to its January 16, 2015 citizen petition. Doc. 2167-8 (Defs.' Ex. 155). It included a report from a study that Mylan cited as further support for its argument that the FDA should **[**88]** require Teva to submit a human factors study. Doc. 2147-1 (Defs.' Ex. 156). On June 15, 2015, the FDA "den[ied] without comment" Mylan's citizen petition. Doc. 2147-2 at 2 (Defs.' Ex. 157).[30]

After the FDA denied Mylan's citizen petition, Mylan's counsel sent a letter to the FDA. Doc. 2206-9 (Pls.' Ex. 38). Among other things, the correspondence noted that "Mylan is considering its options for seeking judicial review of FDA's decision" due to "the lack of guidance and clarity from the Agency on how it is ensuring sameness[.]" *Id.* at 12.

Plaintiffs' expert Dr. Peck testified that he was not offering an opinion whether Mylan Specialty's citizen petition caused **[*957]** any delay in Teva's FDA approval process, but he agreed that "citizen petitions rarely delay generic drug approvals." Doc. 2142-3 at 66 (Defs.' Ex. 1) (Peck Dep. 346:14-17). However, in his Rebuttal Expert Report, Dr. Peck describes how citizen petitions may delay generic entry, and he cites an empirical study. Doc. 2191-3 at 18-19 (Pls.' Ex. 25) (Peck Rebuttal Expert Report ¶¶ 38-41) (citing an empirical study that analyzed citizen petitions filed close to the approval date of generic drug applications).

On February 23, 2016, the FDA **[**89]** issued a "complete response letter"[31] denying Teva's ANDA application. Doc. 2147-3 (Defs.' Ex. 158). The complete response letter cited "MAJOR" deficiencies with product quality, bioequivalence, microbiology, and labeling. *Id.* at 11. The FDA also criticized Teva's human factors study, stating:

---

[29] The court rejects plaintiffs' objection to Exhibit 154—as well as Exhibits 155 and 156—based on inadmissible hearsay. Doc. 2190-1 at 77. As defendants correctly argue, these exhibits don't qualify as hearsay under *Fed. R. Evid. 801(c)(2)*'s definition of hearsay evidence because defendants don't offer the exhibits to prove the truth of the matters asserted in the documents. Instead, they offer the exhibits to show that Mylan communicated with the FDA about Teva's ANDA. Also, again, the court notes that plaintiffs have objected to defendants' Exhibit 154, but yet plaintiffs rely on the very same document—plaintiffs' Exhibit 325—as support for one of their summary judgment facts. Doc. 2190-1 at 70 (plaintiffs' Statement of Additional Material Fact ¶ 152 (citing Pls.' Ex. 325 (Doc. 2204-4))).

[30] The court rejects plaintiffs' objection to Exhibit 157—as well as Exhibits 158 and 160—based on inadmissible hearsay. Doc. 2190-1 at 77. As defendants correctly argue, these exhibits are public records that qualify for admission under *Fed. R. Evid. 803(8)*'s exception to the hearsay rule.

> The human factors study data that you provided with respect to your proposed epinephrine auto-injector (AJE) device, which differs in a critical design attribute from EpiPen (use of a twist-off cap rather than a removable carrier tube), is insufficient to support a conclusion that your product can be substituted for EpiPen without additional training or physician intervention before use of the AJE.

Id. at 7.

Teva never re-performed its human factors study. Doc. 2191-3 at 7-8 (Pls.' Ex. 25) (Peck Rebuttal Expert Report ¶ 14) (recognizing that Teva's last human factors study "was completed years before the Human Factors Guidance was issued"). But, on August 15, 2018, the FDA alerted Teva that it had found its 2014 Teva human factors study adequate—the same study it had rejected in the 2016 complete response letter. Doc. 2147-4 at 2-3 (Defs.' Ex. 159).

The next day, August 16, 2018, the FDA approved Teva's **[**90]** ANDA. Doc. 2147-5 at 2 (Defs.' Ex. 160). The FDA approval letter noted that it had found Teva's generic EAI "therapeutically equivalent to the referenced listed drug (RLD), EpiPen Jr. Auto-Injector, 0.12 mg and EpiPen Auto-Injector, 0.3 mg, of Mylan Specialty L.P. (Mylan)." *Id.*

The FDA issued a press release announcing the approval. *FDA Approves First Generic Version of EpiPen*, FDA (Aug. 16, 2018), https://www.fda.gov/news-events/press-announcements/fda-approves-first-generic-version-epipen. It noted: "The development of generic combination products" like an EAI "can be more challenging than typical drug products." *Id.*

Although Teva received FDA approval in August 2018, the company did not launch its generic EAI at that time. Instead, it launched the 0.3 mg strength product (corresponding to EpiPen Auto-Injector in limited quantity) on November 27, 2018, and the 0.15 mg strength (corresponding to EpiPen Jr Auto-Injector) on August 20, 2019. *See Teva's Generic Version of EpiPen® Auto-Injector 0.3mg Now Available in Limited Quantity in the United States*, Business Wire (Nov. 27, 2018), https://www.businesswire.com/news/home/20181127005573/en/Teva%E2%80%99s-Generic-Version-EpiPen%C2%AE%C2%A0-Epinephrine-Injection-USP; **[**91]** *see also Teva Announces Availability of a Generic Equivalent of EpiPen Jr® Auto-Injector, 0.15mg in the United States*, Business Wire (Aug. 20, 2019), https://www.businesswire.com/news/home/20190820005419/en/Teva-Announces-Availability-Generic-Equivalent-EpiPen-Jr%C2%AE.[32]

[*958] Plaintiff's expert, Dr. Carl Peck, calculates that it took Teva "9 years and 9 months" to secure FDA approval. Doc. 2191-7 at 26-27 (Pls.' Ex. 30) (Peck Expert Report ¶ 58 & Table 2). He measures that time starting on November 21, 2008—when the FDA accepted Teva's ANDA for filing—and ending on August 16, 2018—the date the FDA approved Teva's generic. *Id.* Dr. Peck compared the time it took Teva to secure FDA approval to those of other EAI manufacturers, and he opines that "none have required the lengthy time for review and approval exhibited by the Teva generic EAI." *Id.* at 26 (¶ 58). He asserts that "the other EAIs all were subject to the more stringent NDA standards (as opposed to ANDA standards)" yet "most were approved in 2-3 years, while the longest review and approval time was 6.5 years from initial filing." *Id.*

Also, Dr. Peck reviewed the approval time for other auto-injector products. *Id.* at 27-28 (¶ 59 & **[**92]** Table 3); *see also* Doc. 2191-3 at 16-17 (Peck Rebuttal Expert Report ¶ 35 & Table 3). He notes that with other auto-injector products that "[a]gain, none have required the lengthy time for review and approval exhibited by the Teva generic epinephrine autoinjector." Doc. 2191-7 at 27 (¶ 59). Instead, the approval time for other auto-injector products has

---

[31] A complete response letter is a letter the FDA sends to an applicant "if the agency determines that [it] will not approve the application or abbreviated application in its present form[.]" *21 C.F.R. § 314.110(a)*.

[32] To the extent plaintiffs challenge defendants' citation to these news articles because they aren't attached as summary judgment exhibits, *see* Doc. 2190-1 at 76-77, the court rejects that challenge because plaintiffs don't controvert the summary judgment facts cited in this statement of fact, *see* Doc. 2190-1 at 20.

ranged from six months to 69 months. *Id.* at 28 (Table 3). Dr. Peck asserts that this data shows "autoinjectors are common, their technology is well-developed, and that all of the autoinjectors on the market today were reviewed and approved in less than half the time of the Teva EAI." Doc. 2191-3 at 16 (¶ 35). Also, "at least six of the EAIs" that Dr. Peck lists "required an HFS[,]" which, he asserts, "shows that Teva had the same opportunity as other EAI manufacturers to develop and prosecute ANDA and NDA injectable products within a reasonable time period." *Id.*

Last, Dr. Peck reviewed other Teva injectable products and opines that "on average, they were approved in under 30 months." Doc. 2191-7 at 29 (¶ 60 & Table 4). He notes that "the longest submission to approval time" for the other Teva injectable products "was 48 months or about **[**93]** one half the time" that it took Teva to secure approval of its generic EAI. *Id.* at 29 (¶ 60).

Dr. Peck opines that "the FDA review and guidance did not delay the approval of Teva's application." *Id.* at 9 (¶ 18). "On the contrary," he asserts, "the evidence confirms that the FDA treated this as a priority application and was responsive well within the metrics for review time of the application." *Id.* But, he opines that "Teva 'dropped the ball' in the 2011-2014 time frame by not pursuing the application aggressively or responding to the FDA[.]" *Id.* at 25 (¶ 56(c)). Based on his review of Teva's communications with the FDA, he concludes that "it is reasonable to expect that the FDA would have completed its review and approval of Teva's EAI application by 2014 . . . if not earlier—had Teva been responsive to the FDA's requests in prosecuting its application." *Id.* at 10 (¶ 21).

Cephalon's Lawsuit Against Mylan Involving Unrelated Drug Nuvigil

On December 11, 2009, pharmaceutical company Cephalon, Inc. filed a lawsuit in the District of Delaware alleging patent infringement against Mylan based on Mylan's ANDA to manufacture and sell a generic version of the pharmaceutical product Nuvigil (armodafinil). **[**94]** *See generally*, **[*959]** Complaint, *Cephalon, Inc. v. Mylan Pharms., Inc.*, No. 1:09-cv-00954 (D. Del. Dec. 11, 2009), ECF No. 1. Nuvigil is a "prescription drug" used to "improve wakefulness in patients with excessive sleepiness[.]" *Id.* at 1. Cephalon sued six other generic manufacturers, along with Mylan, who were seeking ANDA approval to manufacture and sell armodafinil tablets. *See* Transfer Order at Schedule A, *In re: Armodafinil Patent Litig.*, No. 1:10-md-02200 (D. Del. Dec. 8, 2010), ECF No. 1. In December 2010, the Judicial Panel on Multi-District Litigation consolidated the cases into a multidistrict litigation in the District of Delaware before Judge Sleet. *Id.* In this MDL, the Nuvigil defendants advanced similar defenses and relied on the same experts. *See* Doc. 2147-6 at 50-51 (Defs.' Ex. 161) (Folsom Rebuttal Expert Report ¶ 142).

In October 2011, while the Nuvigil litigation was pending, Teva acquired Cephalon.[33] *Press Release Details: Teva Completes Acquisition of Cephalon*, Teva Pharm. (Oct. 14, 2011), https://ir.tevapharm.com/news-and-events/press-releases/press-release-details/2011/Teva-Completes-Acquisition-of-Cephalon/default.aspx.

As discussed above, after Teva filed the Nuvigil **[**95]** lawsuits, the Hatch-Waxman Act triggered a 30-month stay for each Nuvigil defendant's ANDA, meaning the FDA couldn't finally approve those ANDAs while the Nuvigil litigation was ongoing. *21 U.S.C. § 355(j)(5)(B)(iii)*; *Id.* *§ 355(c)(3)(C)*. But, during the 30-month stay, the FDA tentatively had approved Mylan's ANDA, Doc. 2147-7 at 2 (Def's Ex. 162), which meant that the ANDA met substantive requirements for final approval, *ANDA Submissions-Amendments and Requests for Final Approval to Tentatively Approved ANDAs Guidance for Industry*, FDA (Sept. 2020), https://www.fda.gov/media/119718/download. Mylan's stay was set to expire on May 3, 2012, which meant that the FDA potentially could have granted final approval on that day. Letter to Judge Sleet, *In re: Armodafinil Patent Litig.*, No. 1:10-md-02200 (D. Del. Mar. 13, 2012), ECF No. 225 at 1-2. Teva asserted in a brief seeking a temporary restraining order and a preliminary injunction, filed in the Nuvigil litigation that: "Other than this patent litigation, there are likely to be no legal impediments to Mylan's launching of its products on or after May 3[, 2012]." Plaintiffs' Memorandum of Law in Support of Their Motion for a Temporary Restraining Order and Preliminary

[33] Cephalon continued to litigate the Nuvigil litigation as Cephalon even after Teva acquired it. The parties refer to Cephalon as Teva going forward, and the court adopts that convention.

Injunction **[**96]** at 1, *In re: Armodafinil Patent Litig.*, No. 1:10-md-02200 (D. Del. Apr. 10, 2012), ECF No. 270 at 5. In contrast, the FDA never granted tentative approval to Teva's ANDA for a generic EAI while the Teva/EpiPen litigation was pending. *See* Doc. 2147-3 (Defs.' Ex. 158) (explaining the deficiencies with Teva's ANDA identified in the FDA's February 23, 2016 complete response letter).

Mylan refused to agree to forgo launching its product on May 3, 2012. Letter to Judge Sleet at 1, *In re: Armodafinil Patent Litig.*, No. 1:10-md-02200 (D. Del. Mar. 13, 2012), ECF No. 225 at 1. And, on March 30, 2012, as the parties were in settlement negotiations, Mylan rejected Teva's request to extend the stay until May 15, 2012. Doc. 2147-8 at 2 (Defs.' Ex. 163). The next day, Teva sent a draft term sheet to Mylan. Doc. 2147-9 at 2 (Defs.' Ex. 164); Doc. 2147-10 at 2-11 (Defs.' Ex. 165).[34]

[*960] On April 26, 2012, Mylan and Teva executed a binding term sheet to resolve the claims against Mylan in the Nuvigil litigation. Doc. 2147-11 at 2-18 (Defs.' Ex. 166). As already discussed, this was the same day that Pfizer and Teva executed a binding term sheet that resolved the Teva/EpiPen litigation. Doc. 2146-3 at 14-20 **[**97]** (Defs.' Ex. 136).

Under the agreement to resolve the Nuvigil litigation, Mylan acquired the right to launch certain armodafinil products on June 1, 2016 (50mg, 150mg, and 250mg strength tablets) and others on June 1, 2019 (100mg and 200mg strength tablets) without infringing Teva's patents, which were set to expire in 2024. Doc. 2147-11 at 3-4, 6-7; *see also* Doc. 2147-16 at 3 (Defs.' Ex. 171) (listing the Nuvigil patents' 2024 expiration dates).[35] The settlement did not include any monetary payment between Mylan and Teva. *See generally* Doc. 2147-11 (Defs.' Ex. 166). By settling, both Mylan and Teva avoided litigation risk and millions of dollars in expected litigation costs. Doc. 2146-5 at 103 (Defs.' Ex. 138) (Torrance Expert Report ¶ 214). Pfizer, King, and Meridian were not parties to the Nuvigil MDL or settlement. *See generally* Doc. 2147-11 (Defs.' Ex. 166).

The other defendants in the Nuvigil MDL went to trial in July 2012 and didn't prevail. Memorandum at 1, *In re: Armodafinil Patent Litig.*, No. 1:10-md-02200 (D. Del. Mar. 30, 2013), ECF No. 329 at 1; *see also* Doc. 2147-12 at 13 (Defs.' Ex. 167) (admitting in response to defendants' request for admission that "Mylan's non-settling **[**98]** codefendants . . . did not prevail at trial"). The non-prevailing defendants appealed. Notices of Appeal, *In re: Armodafinil Patent Litig.*, No. 1:10-md-02200 (D. Del. Mar. 30, 2013), ECF Nos. 331, 332, 334, & 336. While the appeal was pending, the parties settled. *See* Doc. 2202-4 (Pls.' Ex. 274); Doc. 2202-5 (Pls.' Ex. 275); Doc. 2202-6 (Pls.' Ex. 276); Doc. 2202-7 (Pls.' Ex. 277).

The draft agreements granted defendants a "License Effective Date" for their generic Nuvigil products that was at least 180 days after Mylan's first sale of a generic product. *See* Doc. 2202-4 at 5 (Pls.' Ex. 274); Doc. 2202-5 at 3 (Pls.' Ex. 275); Doc. 2202-6 at 3 (Pls.' Ex. 276); Doc. 2226-10 at 3 (Defs.' Ex. 381). And, some of the draft settlement agreements required Teva to pay defendants for their legal fees. *See* Doc. 2202-4 at 6 (Pls.' Ex. 274); Doc. 2202-5 at 5 (Pls.' Ex. 275); Doc. 2202-6 at 6 (Pls.' Ex. 276).

Then President and CEO of Teva-Americas William Marth had discussions with Heather Bresch about both the Teva/EpiPen settlement and the Nuvigil settlement. *See* Doc. 2201-21 at 2 (Pls.' Ex. 255) (explaining that Mr. Marth had "talked to Heather . . . about settlement" of the EpiPen litigation and **[**99]** that "[s]he (Heather) wants to give us a 2018 entry date but would likely agree to 2017" and noting that "[j]ointly but not directly connected is the Nuvigil litigation" where Mr. Marth "offered a 2018 entry date"); *see also* Doc. 2202-20 at 2 (Pls.' Ex. 278) (stating in

---

[34] The court rejects plaintiffs' objection to Exhibits 164 and 165 based on inadmissible hearsay. Doc. 2190-1 at 77. As defendants correctly argue, these exhibits don't qualify as hearsay under *Fed. R. Evid. 801(c)(2)*'s definition of hearsay because defendants don't offer the exhibits to prove the truth of the matters asserted in the documents. Instead, they offer the exhibits to show Mylan and Teva exchanged a binding term sheet.

[35] The court rejects plaintiffs' objection to Exhibit 171 based on inadmissible hearsay. Doc. 2190-1 at 77. As defendants correctly argue, this letter from the FDA qualifies as a business record under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule. Also, this exhibit—a letter from the FDA—likely is a public record that qualifies for admission under *Fed. R. Evid. 803(8)*'s exception to the hearsay rule.

first email that "Bill [Marth] got a call from **[*961]** Heather at Mylan" and asking what "exactly did we propose re epi and nuvigil?" and responding in another email with "2014 for epi and 2018 for nuvigil. No months specified."); Doc. 2202-9 at 2 (Pls.' Ex. 279) (sending the Nuvigil term sheet and discussing changes that were "agreed to between Heather and Mr. Marth"). Also, other Mylan and Teva employees discussed the EpiPen and Nuvigil settlements in the same communications. *See* Doc. 2201-13 at 2 (Pls.' Ex. 262) (stating that Teva had called Mylan's Deputy General Counsel and "relayed the following proposal: epipen in 2014 and nuvigil in 2018"); *see also* Doc. 2202-13 at 2 (Pls.' Ex. 283) (noting that "the signed Nuvigil deal was" complete and "language w Pfizer on Epipen is done"); Doc. 2201-20 at 2 (Pls.' Ex. 269) (Mylan employees emailing with the subject line "Epipen—Teva/Potential Settlement" and attaching a "Nuvigil **[**100]** Settlement DRAFT").

On April 30, 2012, Mylan issued a press release announcing the Nuvigil settlement.[36] On May 10, 2012, Mylan's outside counsel sent a letter to the FTC and DOJ providing copies of the Nuvigil Settlement and EpiPen Settlement agreements. Doc. 2147-13 at 2 (Defs.' Ex. 168). The letter stated: "While Mylan does not believe it is required to file the EpiPen Settlement in connection with the Nuvigil Settlement, it nonetheless files this agreement as a potentially 'related' agreement solely out of an abundance of caution." *Id.* Mylan's 30(b)(6) witness testified that it submitted the settlements to the FTC and DOJ "solely out of an abundance of caution. We certainly don't believe they actually are related." Doc. 2146-6 at 10 (Defs.' Ex. 139) (Jenkins Dep. 136:23-137:23).

On July 3, 2012, the FTC responded, stating that while it reserved the right to investigate, "nothing in this letter should be construed to indicate that a violation of law has occurred." Doc. 2147-14 at 2 (Defs.' Ex. 169).[37] But, the FTC noted that its "Bureau of Competition is concerned that the Teva-Mylan agreement on [another drug product,] generic Provigil[,] may be related to delayed generic **[**101]** Nuvigil entry and/or delayed generic EpiPen entry." *Id.*

A few years later, in May 2015, the FTC announced that it had "entered into a landmark settlement with Cephalon, Inc. and its parent company, Teva . . . to resolve its action against Cephalon for illegally monopolizing the market for the sale of its blockbuster sleep-disorder drug Provigil." Doc. 2207-5 at 2 (Pls.' Ex. 295). The FTC said it "was prepared to prove that Cephalon paid four generic competitors to abandon their challenges to Cephalon's Provigil patent and stay off the market for six years in violation of the antitrust laws, resulting in significantly higher prices for the drug and substantial consumer harm." *Id.* Then, in February 2017, Mylan "agreed to pay $96.5 million to settle claims by **[*962]** drug purchasers that it delayed launching a generic version of Cephalon Inc.'s narcolepsy drug Provigil in exchange for payment from Cephalon." Doc. 2207-6 at 2 (Pls.' Ex. 296). And, in January 2017, Mylan reported that it had "received a 'preliminary' inquiry from" the FTC "asking about the company's commercial practices for its EpiPen severe-allergy treatments." Doc. 2207-7 at 2 (Pls.' Ex. 297). As of August 2019, the FTC investigation **[**102]** still was pending. Doc. 2191-15 at 5 (Pls.' Ex. 44) (Ondos Dep. 89:14-17).

The Pfizer attorneys who handled the EpiPen litigation testified that they never had heard of the Nuvigil litigation, or even the Nuvigil product, until after the present lawsuit was filed. Doc. 2145-18 at 16-17 (Defs.' Ex. 129) (Myers Dep. 205:16-206:7) (testifying that the "first time [he] heard of Nuvigil" was in "connection with" this lawsuit); Doc. 2146-8 at 5 (Defs.' Ex. 141) (Rennecker Dep. 164:8-13) (testifying that he "never heard of Nuvigil prior to this litigation"). Also, they testified that they were not aware of anyone at Pfizer who had any involvement with the Nuvigil litigation and that the Nuvigil litigation was not discussed in any joint Pfizer-Mylan telephone conferences. Doc. 2145-18 at 12 (Defs.' Ex. 129) (Myers Dep. 115:4-13); Doc. 2146-8 at 6-7 (Defs.' Ex. 141) (Rennecker Dep.

---

[36] The citation defendants provide for this statement of fact is no longer available online, but plaintiffs don't controvert this statement of fact. *See* Docs. 2142-1 at 50, 2190-1 at 20; *see also* Doc. 2226-3 at 40 (discussing "SMF ¶ 118"). So, the court accepts it for purposes of this summary judgment motion.

[37] The court rejects plaintiffs' objection to Exhibit 169 based on inadmissible hearsay. Doc. 2190-1 at 77. As defendants correctly argue, this letter from the FDA qualifies as a public record that is admissible under *Fed. R. Evid. 803(8)*'s exception to the hearsay rule. Also, plaintiffs quote language from this letter to support one of their own statements of fact. Doc. 2190-1 at 63 (plaintiffs' Statement of Additional Material Fact ¶ 118). While the court understands that some hearsay issues can turn on the identity of the offering party, *see Fed. R. Evid. 801(d)(2)*, that isn't the case here. Plaintiffs have used the same FDA letter to support their facts, but also they object to defendants using it. This tact is not impressive.

167:10-18, 168:4-7). Some Mylan witness likewise testified that the Nuvigil and EpiPen settlements were independent, and that Mylan played no role in directing or managing the Teva/EpiPen litigation or settlement. Doc. 2146-7 at 89-90 (Defs.' Ex. 140) (Ondos Dep. 89:18-90:9) (testifying that "both lawsuits had separate, **[**103]** independent tracks and negotiations" and "their terms were not linked"); *see also id.* at 3-4 (Ondos Dep. 59:17-60:23) (testifying that Mylan had no "decisionmaking right" in the Teva/EpiPen litigation); Doc. 2150-1 at 3-4 (Def's Ex. 174) (Bresch Dep. 57:17-58:23) (testifying that "even though the settlements occurred on the same date" there "was no linkage between EpiPen and Nuvigil").

Other Patent Litigation

In 2011, Pfizer—through its subsidiaries—filed a patent infringement lawsuit against Intelliject after it sought to secure FDA approval to market "e-cue," the predecessor to competing EAI, Auvi-Q. Complaint, *King Pharms. Inc. v. Intelliject Inc.*, No. 1:11-cv-00065-GMS (D. Del. Jan. 19, 2011), ECF No. 1. Pharmaceutical company Sanofi-Aventis later secured the rights to the Auvi-Q device. Doc. 2169 at 6 (Pretrial Order ¶ 2.a.46.). After that acquisition of rights, Sanofi executed a settlement with Pfizer to resolve the case. Doc. 2191-16 at 2 (Pls.' Ex. 45). Mylan wasn't a party to the agreement, but yet, Mylan drafted the press release announcing the settlement and the initial draft didn't include references to Pfizer's involvement. *See id.* ("Mylan [and Pfizer] Announce Epinephrine **[**104]** Auto-Injector Settlement Agreement"). The agreement allowed Sanofi to launch "e-cue" in November 2012. *Id.*

EAIs in the United States

When Mylan acquired Dey in 2007, another branded EAI called Twinject was available for purchase in the United States in both .3mg and .15mg doses. Doc. 2150-3 at 9 (Defs.' Ex. 176).[38] Twinject's name is a reference to the fact that each device contained two doses. *Id.* at 6. It was removed from the market in 2012. Doc. 2150-4 at 12 (Defs.' Ex. 177). Another branded product, **[*963]** Adrenaclick, secured FDA approval under a modified version of the Twinject NDA and launched in 2009 in both .3mg and .15mg doses. Doc. 2150-3 at 9 (Defs.' Ex. 176). In 2010, an authorized generic to the Adrenaclick product became available in both .3mg and .15mg doses. *Id.*; *see also* Doc. 2150-5 (Defs.' Ex. 178); Doc. 2150-6 (Defs.' Ex. 179).

In January 2013, Sanofi launched a branded EAI called Auvi-Q. Doc. 2169 at 6 (Pretrial Order ¶ 2.a.46.). In October 2015, Sanofi issued a Class I voluntary recall of all Auvi-Q devices in the United States. *Id.* (Pretrial Order ¶ 2.a.47.).

Some named plaintiffs continued to purchase EpiPens after filing this lawsuit. Doc. 2144-16 at 11-13 (Defs.' **[**105]** Ex. 102) (citing Defs.' Ex. 102-A). And, some named plaintiffs testified that they purchased EpiPen products even though a generic or other alternative was available for purchase. *Id.*

Sale of Pharmaceutical Products in the United States

Pharmaceutical manufacturers sell prescription drugs through a multi-step distribution chain—from manufacturer to wholesaler to pharmacy to patient. Doc. 2150-9 at 14-18 (Defs.' Ex. 182) (Navarro Expert Report ¶ 23). For patients with insurance, the price at the pharmacy depends on the terms of their insurance coverage, among other factors. *Id.* at 20, 29-30 (¶¶ 36, 51). Uninsured patients generally pay the price set by the pharmacy, although patients can lower the pharmacy price by using discount cards and coupons. *Id.* at 19-20 (¶ 35).

---

[38] The court rejects plaintiffs' objection to Exhibit 176—as well as Exhibits 177, 178, 179, 180, & 181—based on plaintiffs' argument that the documents are inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. These documents produced by Mylan qualify for admission as business records under Fed. R. Evid. 803(6)'s exception to the hearsay rule. Doc. 2226-1 at 21; *see also* Doc. 2227-1 at 11-12 (Cuthbertson Decl.).

The term "formulary" refers to a published list of prescription drugs covered by a health plan. *Id.* at 28 (¶ 48). Another name for a "formulary" is a "preferred drug list." *Id.* Pharmacy Benefit Managers ("PBMs") develop, manage, and administer prescription drug benefit programs for commercial payors and other insurance programs, including Medicare and Medicaid. *Id.* at 12 (¶ 18). Among other things, PBMs create formularies **[**106]** for insurance companies and payors. *Id.* at 28 (¶¶ 48-71).

Formularies organize drugs by therapeutic category and are designed to include a selection of medicines to satisfy the needs of insured customers. *Id.* at 29 (¶¶ 49-50). Formularies change over time as drugs enter or leave the market, and as new data becomes available. *Id.* (¶ 49). Formularies also use different levels of "control," referring to how strictly the plan enforces the list of covered drugs. *Id.* at 32-33 (¶ 57). With an "open" or "low control" plan design, a health plan typically covers many (sometimes all) of the drugs on the formulary, or covers at least some portion of the cost of drugs that are not included on the formulary. *Id.* In contrast, with a "closed" or "high control" plan design, a health plan typically covers only the products listed on the formulary. *Id.*

PBMs typically develop standard formularies, giving their clients options from which to choose. Doc. 2150-11 at 25, 35 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 190:2-21, 273:5-19). Also, some PBMs allow health-plan and large-employer clients to customize drug formularies. Doc. 2150-10 at 5-6 (Defs.' Ex. 183) (Anderson (CVS) Dep. 67:15-68:7); Doc. 2150-11 at **[**107]** 35 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 273:5-19). Some of the largest PBMs maintain hundreds or thousands of formularies. Doc. 2150-10 at 3-4 (Defs.' Ex. 183) (Anderson (CVS) Dep. 35:17-36:5); Doc. 2150-11 at 18 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 178:5-20); Doc. 2150-12 at 3 (Defs.' Ex. 185) (Rogers (OptumRx) Dep. 36:7-21).

Also, PBMs use "Utilization Management" techniques—such as copayments and tiering, step edits, prior authorization, and benefit exclusion—to incentivize the use of one drug over another. Doc. 2150-9 at 33-37 (Defs.' Ex. 182) (Navarro Expert **[*964]** Report ¶¶ 58-60). Payors use these techniques to encourage patients to use more cost-effective products. *Id.* at 36 (¶ 59). They also use these tools to negotiate lower prices from manufacturers by offering preferred formulary placement in exchange for greater rebates. *See* Doc. 2150-16 at 3 (Defs.' Ex. 189) (Stein (Humana) Dep. 210:1-8); *see also* Doc. 2150-11 at 28 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 197:7-18).

The use of copayments and tiering involves a payor requiring patients to pay a portion of the cost for a prescription drug, either a fixed-dollar copayment or a percentage-based coinsurance. Doc. 2150-9 at 29-30 (Defs.' **[**108]** Ex. 182) (Navarro Expert Report ¶ 51). The most common formularies have three or more "tiers" with increasing copayments. *Id.* Copayment differentials encourage patients to purchase lower-tier drugs, *e.g.*, to purchase a preferred Tier 2 brand over a non-preferred Tier 3 brand. *See, e.g.*, Doc. 2150-17 at 5-7 (Defs.' Ex. 190) (Kronberg (Cigna) Dep. 58:17-60:4); Doc. 2150-12 at 10 (Defs.' Ex. 185) (Rogers (OptumRx) Dep. 43:13-24).

A "step edit" or "step therapy" requirement usually requires a patient to fill a prescription for a preferred drug before the plan will reimburse for purchasing a branded alternative. Doc. 2150-9 at 35 (Defs.' Ex. 182) (Navarro Expert Report ¶ 58(c)); *see also* Doc. 2197-12 at 3 (Pls.' Ex. 176) (Brodeur Dep. 32:7-13) (explaining that a step edit requires a patient "to have the trial or failure or a reason [the patient] can't take the" preferred drug before the payor will cover the alternative drug).

Prior authorization requirements mean a plan will cover a drug product only if the patient's physician formally requests the payor to approve coverage. *Id.* at 35-36 (¶ 59(d)). Each payor determines the approval criteria for a prior authorization. *Id.* If a Tier 3 drug **[**109]** has a prior authorization requirement, the patient must secure that authorization and then pay the Tier 3 copayment. *Id.*

A benefit exclusion excludes a drug from coverage altogether. *Id.* at 34 (¶ 58(a)). Since 2012, payors increasingly have excluded drugs from coverage (rather than covering them on a higher copay tier), sometimes covering only one branded product per therapeutic class of drugs. *Id.* at 53-54 (¶¶ 95-97).

A PBM's ability to promote or prefer drugs to prescribers and patients gives it leverage when negotiating price discounts from branded drug manufacturers. *Id.* at 52 (¶ 89). Manufacturers set a WAC (or list price) for their prescription drugs. *Id.* at 13-14 (¶ 22). But, they also may offer retrospective rebates to PBMs. *Id.* at 45 (¶¶ 75-77). A retrospective rebate is what a manufacturer pays to a PBM after the PBM reimburses a pharmacy for the balance of the cost of a prescription drug that the pharmacy sold to an insured consumer. *Id.* Defendants' expert opines that "most of the rebate value (approximately 90%) paid to PBMs is transferred back to the purchaser or insured individual to reduce pharmacy costs." *Id.* at 52 (¶ 90). Rebates are common in the pharmaceutical industry. **[**110]** *Id.* at 45-46 (¶ 78).

Many PBMs solicit rebates from manufacturers by inviting manufacturers to fill out "bid grids." *Id.* at 55 (¶ 98). A bid grid is a table with blank cells corresponding to different levels of control. *Id.* at 56-57 (¶ 100 & Fig. 6). Manufacturers fill out the blank cells of the bid grid with rebate percentages that represent their bids for various formulary placements. *Id.* Often, after submitting a bid grid with proposed rebate percentages, the manufacturers and PBMs enter negotiations where the PBMs try to secure the highest possible rebates, sometimes by pitting competing manufacturers against each other. *See, e.g.*, Doc. **[*965]** 2150-11 at 6-7 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 119:18-120:8) (testifying about how Express Scripts, Inc. "continu[es] to try to push rebates up" with manufacturers); Doc. 2150-15 at 12 (Defs.' Ex. 188) (Hall (Prime) Dep. 58:12-17) (testifying how the entry of a competing drug gave Prime "the opportunity . . . to renegotiate improved rates"); Doc. 2150-19 at 5 (Defs.' Ex. 192) (Minton (Anthem) Dep. 75:1-14) (testifying about how Anthem goes "back to the manufacturers to press" for higher rebates).

If negotiations are successful, PBMs and manufacturers **[**111]** enter rebate agreements. *See e.g.*, Doc. 2152-1 at 2-5 (Defs.' Ex. 201) (Mylan/ESI Rebate Agreement); Doc. 2152-2 at 2-22 (Defs.' Ex. 202) (Mylan/CVS Agreement). Often, the rebate agreements contain a menu of options from which a PBM's clients can choose. *See e.g.*, Doc. 2152-1 at 4-5 (Defs.' Ex. 201); Doc. 2152-2 at 19-21 (Defs.' Ex. 202). As one example, in 2015, Mylan and Express Scripts, Inc. ("ESI") entered a Rebate Agreement that contained a menu of rebate opinions. Doc. 2152-5 at 4 (Defs.' Ex. 205). This Agreement memorialized Mylan's offer of up to a 50.625% rebate for exclusive position for EpiPen. *Id.* But, Mylan also offered up to 40.625% for 1-of-2 placement, meaning that health plans could access both EpiPen and competing EAI Auvi-Q and still realize about 80% of the discount that Mylan offered for exclusivity. *Id.* So, depending on what the payor preferred, it could select EpiPen as the exclusive product for a 10% increase in the rebate Mylan was offering. *Id.* Or, it could offer both products and receive the 40.635% rebate.

Mylan's rebate agreements with payors typically specified a term of three years or less. Doc. 2152-8 at 2, 9 (Defs.' Ex. 208) (Mylan/MedImpact Rebate Agreement **[**112]** with two year term); Doc. 2152-9 at 2 (Defs.' Ex. 209) (Mylan/Aetna Rebate Agreement with two year term); Doc. 2152-10 at 2-3 (Defs.' Ex. 211) (Mylan/OptumRx Rebate Agreement with two year term); Doc. 2192-8 at 11 (Pls.' Ex. 57) (Mylan/CVS Rebate Agreement with three year term). And, PBMs typically renegotiate their rebate agreements at least annually. *See* Doc. 2150-16 at 6 (Defs.' Ex. 189) (Stein (Humana) Dep. 228:1-5) (testifying that rebates were renegotiated annually); *see also* Doc. 2150-11 at 23-24 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 185:24-186:22). Also, Sanofi's rebate agreements typically "were annual contracts" and sometimes were renegotiated midterm. Doc. 2152-11 at 3-4 (Defs.' Ex. 212) (Borneman Dep. 28:9-29:17). Most of Mylan's rebate agreements with payors allowed termination without cause on 90 days' notice or less. *See, e.g.*, Doc. 2152-8 at 9 (Defs.' Ex. 208) (Mylan/MedImpact Rebate Agreement with 90 days' notice provision); Doc. 2152-12 at 5 (Defs.' Ex. 213) (Mylan/Aetna Rebate Agreement with 90 days' notice provision); Doc. 2155-1 at 3 (Defs.' Ex. 215) (Mylan/CIGNA Rebate Agreement with 60 days' notice provision).

Mylan's rebate agreements generally reserve to PBMs **[**113]** the right to alter their commercial formularies at any time. *See* Doc. 2155-2 at 4 (Defs.' Ex. 216) (Mylan/ESI rebate agreement) ("Nothing in this Agreement shall be construed to limit the ability of ESI or any ESI Client to remove a Product from formulary."); *see also* Doc. 2155-3 at 8 (Defs.' Ex. 217) (Mylan/CVS rebate agreement containing similar language); Doc. 2155-4 at 8 (Defs.' Ex. 218) (Mylan/OptumRx rebate agreement containing similar language); Doc. 2155-5 at 7 (Defs.' Ex. 219) (Mylan/Prime rebate agreement containing similar language). And, Mylan has renegotiated its rebate agreement with a PBM during a contract term when the PBM initiated negotiations as a way to seek better rebates. *See, e.g.*, Doc. 2150-10 at 34-37 (Defs.' Ex. 183) (Anderson (CVS) Dep. 231:2-234:3) (describing **[*966]** how CVS asked Sanofi and Mylan for better rebate offers mid-contract term).

Pfizer asserts that neither it nor its subsidiaries played any role in negotiating contracts, rebates, formulary placement, or discounts with wholesalers, payors, PBMs, or other industry partners. Doc. 2143-31 at 3, 6-8 (Defs.' Ex. 64) (Handel Dep. 138:9-12, 151:10-153:5); *see also* Doc. 2155-6 at 3 (Defs.' Ex. 220). Mylan's **[**114]** CEO Heather Bresch testified that she was not involved in the "day to day" negotiations and contract strategies with PBMs. Doc. 2143-3 at 17 (Defs.' Ex. 21) (Bresch Dep. 316:19-317:17). But Mylan documents show that Ms. Bresch was involved in discussions about EpiPen formulary placements and exclusions as Mylan negotiated these terms with PBMs. Doc. 2206-13 at 2 (Pls.' Ex. 61); Doc. 2206-14 at (Pls.' Ex. 62).

Sanofi Launches Auvi-Q

In 2013, Sanofi's revenue exceeded $43 billion. *See* Sanofi, Annual Report pursuant to *Section 13* or *15(d)* of the Securities Exchange Act of 1934, at 2-3 (Form 20-F) (Mar. 6, 2014), https://www.sec.gov/Archives/edgar/data/1121404/000104746914001951/a2217900z20-f.htm (reporting almost $44 billion, calculated using average exchange rate for 2013). Around the same time, Mylan's revenue was less than $7 billion. *See* Mylan Inc., Annual Report pursuant to *Section 13* or *15(d)* of the Securities Exchange Act of 1934, at 46 (Form 10-K) (Feb. 27, 2014), https://www.sec.gov/Archives/edgar/data/69499/000006949914000007/myl10k_20131231xdoc.htm (listing "Total revenues" as more than $6.9 billion).

In 2009, Sanofi secured a license to market and sell Auvi-Q. Doc. 2155-8 (Defs.' Ex. 222).[39] And, in January **[**115]** 2013, Sanofi launched Auvi-Q in the U.S. Doc. 2169 at 6 (Pretrial Order ¶ 2.a.46.). The Auvi-Q was the first and only EAI drug device with audiovisual cues to guide patients how to administer epinephrine. Doc. 2206-18 at 2-3 (Pls.' Ex. 150).

Mylan's Response to Auvi-Q

Before Auvi-Q's launch, Mylan internally referred to EpiPen as having "100% market share." Doc. 2192-17 at 3 (Pls.' Ex. 68). Mylan recognized there was a "strong interest" in Auvi-Q "due to is size shape and advanced technology." Doc. 2196-8 at 3 (Pls.' Ex. 151). And, Pfizer recognized that Auvi-Q posed "a significant threat to [its] EpiPen business." Doc. 2196-15 at 2 (Pls.' Ex. 158); *see also* Doc. 2196-10 at 3 (Pls.' Ex. 153) ("Auvi-Q represents a significant threat to EpiPen market share[.]").

So, Mylan decided to implement a "proactive" response to Auvi-Q that included using "[e]xclusivity language" in rebate agreements. Doc. 2196-19 at 35 (Pls.' Ex. **[*967]** 162). One Mylan employee suggested "only pay[ing] rebates if a client is willing to exclude Auvi[-]Q." Doc. 2206-19 at 2 (Pls.' Ex. 165). Mylan also proposed a strategy of using prior authorization and step edits against Auvi-Q. Doc. 2197-10 at 34 (Pls.' **[**116]** Ex. 174). Mylan referred to these strategies as "high controls." Doc. 2197-16 at 10 (Pls.' Ex. 180). Plaintiffs' expert opines that Mylan's use of "all three of these restrictive coverage statuses [*i.e.*, exclusive rebating, prior authorization, and step edits] significantly restrained the usage of rival EAIs." Doc. 2193-4 at 82 (Pls.' Ex. 85) (Elhauge Expert Report ¶ 155).

---

[39] Once again, plaintiffs assert an objection to defendants' exhibit offered as evidentiary support for this factual statement. Defendants' Exhibit 222 is Sanofi's License and Development Agreement with Intelliject that granted Sanofi the right to market and sell Auvi-Q. Plaintiffs assert this Agreement is inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. Defendants respond that this document qualifies as a business record that is admissible under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule. Doc. 2226-1 at 21. The court agrees. This document was produced by Sanofi. *See generally* Doc. 2155-8 (Sanofi Bates-numbered document). It's an Agreement that it entered in the course of its business. And, it likely qualifies as a business record that is admissible under the exception to the hearsay rule. *Fed. R. Evid. 803(6)*. Also, because this exhibit is a contract, it isn't hearsay because it has independent legal significance. *See* *Kepner-Tregoe, Inc. v. Leadership Software, Inc., 12 F.3d 527, 540 (5th Cir. 1994)* ("***HN12***[] Signed instruments such as wills, contracts, and promissory notes are writings that have independent legal significance and are not hearsay." (citation and internal quotation marks omitted)). The court rejects plaintiffs' objection as utterly baseless.

Some PBMs testified that EAIs were not "historically managed aggressively" before Auvi-Q's launch. Doc. 2192-5 at 6 (Pls.' Ex. 54) (Minton (Anthem) Dep. 279:3-13); *see also* Doc. 2192-13 at (Pls.' Ex. 64) (Jan (Horizon) Dep. 143:23-144:2) (testifying that rebates weren't restrictive in the EAI class before 2013). Other witnesses recognized that the EAI market was "unique" but they provided different reasons for that conclusion. Doc. 2192-1 at 4 (Pls.' Ex. 50) (Eaton Dep. 122:13-123:25) (testifying that the EAI was "unique" because "patients get one prescription per year" and the product involves "a life-and-death situation" so "people are adamant [and] want to get [the] prescription filled"); Doc. 2192-2 at 3 (Pls.' Ex. 51) (Rogers Dep. 333:5-9) (testifying that the EAI category was "unique" because "market share for **[**117]** EpiPen was so dominant"); Doc. 2194-9 at 6 (Pls.' Ex. 109) (Bresch Dep. 248:3-18) (testifying that the EAI market was "unique" because it had a need to "expand the market"); Doc. 2197-6 at 3 (Pls.' Ex. 170) (Loreaux Dep. 213:12-214:15) (testifying that the EAI market was "unique" because it "predominately had one market player [with] nearly a hundred percent of the market share").

Before 2013, Mylan typically offered rebates below 10 percent. *See* Doc. 2155-9 at 5 (Defs.' Ex. 224);[40] *see also* Doc. 2197-7 at 3-4 (Pls.' Ex. 171) (Foster Dep. 212:17-213:8) (testifying that Mylan rebates were in the range of "3 to 5 percent"); Doc. 2197-8 at 3 (Pls.' Ex. 172) (Jordan Dep. 39:2-8) (testifying that, in 2011, Mylan rebates were in the single digits).

As Auvi-Q prepared to launch, Mylan implemented a strategy to "negotiate, where possible, language requiring plans to put EpiPen in sole preferred position and no restrictions." Doc. 2197-17 at 4 (Pls.' Ex. 181) (Korczynski Dep. 254:3-10). Mylan also sought to require prior authorizations and step edits. Doc. 2197-19 at 2 (Pls.' Ex. 183). Mylan told PBMs that, if they wanted to secure larger rebates, Mylan would require restrictions **[**118]** on Auvi-Q. Doc. 2197-13 at 3 (Pls.' Ex. 177) (Willing Dep. 63:17-25).

Mylan sought to "hammer Sanofi at launch." Doc. 2197-20 at 4 (Pls.' Ex. 184). Mylan proposed "strategic imperatives" that would "[p]reemptively blunt adoption of new entrants (branded and generic)[.]" Doc. 2198-1 at 132 (Pls.' Ex. 185). Robert Coury, then Mylan's CEO, instructed the **[*968]** marketing team to "pre-empt any new market entry[.]". Doc. 2198-2 at 2 (Pls.' Ex. 186). And, Mylan's Director of National Accounts expressed a desire to "block further competition." Doc. 2198-3 at 3 (Pls.' Ex. 187); *see also* Doc. 2206-20 at 2 (Pls.' Ex. 189) (discussing Mylan's efforts of "locking [Auvi-Q] out").

Also in anticipation of Auvi-Q's launch, Mylan increased the WAC price on the EpiPen several times. *See* Doc. 2198-16 at 15 (Pls.' Ex. 202) (recommending an "increase" of EpiPen's "WAC price [by] 19.9%" because there was an opportunity to "[g]ain incremental revenue on current volume before competition comes to market"); Doc. 2199-4 at 7 (Pls.' Ex. 210) (recommending "an immediate price increase on EpiPen, the size" of which "should depend on the launch timing of" Auvi-Q); Doc. 2199-5 at 16 (Pls.' Ex. 211) (noting that EpiPen price **[**119]** increases "now will elevate the overall market price giving the ability to take a discount off a higher WAC"). EpiPen's WAC price rose from a little over $100 for two EpiPens in 2007 to more than $600 for two EpiPens in 2016. Doc. 2199-6 at 2 (Pls.' Ex. 212). When one PBM complained that the EpiPen price increases were "not sustainable or acceptable[,]" a Mylan executive commented that a "reason for the higher WAC is these massive rebates" Mylan was paying. Doc. 2199-7 at 2 (Pls.' Ex. 213).

Mylan told various PBMs, including ESI, MedImpact, and Humana, that it would offer higher rebates but conditioned those rebates on excluding or restricting Auvi-Q from their formularies. *See* Doc. 2198-6 at 2 (Pls.' Ex. 191) (discussing with ESI that Mylan would not offer more rebates unless ESI was willing to block or restrict Auvi-Q); *see also* Doc. 2198-11 at 3 (Pls.' Ex. 197) (discussing that MedImpact cannot have access to rebates unless it controls

---

[40] It's like a broken record. Plaintiffs assert an objection to defendants' Exhibit 224 based on inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. Yet, plaintiffs also don't dispute this statement of fact. *Id.* at 20; *see also* Doc. 2226-3 at 52 (discussing "SMF ¶ 156"). Defendants respond that this document qualifies as a business record that is admissible under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule. Doc. 2226-1 at 21. The court agrees. As defendants have shown, this document, produced by Mylan, qualifies for admission as a business record under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule. Doc. 2226-1 at 21; *see also* Doc. 2227-1 at 11-12 (Cuthbertson Decl.). The court thus overrules this objection, yet another of plaintiffs' meritless and needless evidentiary objections.

the EAI class); Doc. 2198-12 at 2 (Pls.' Ex. 198) (offering Humana "more rebate" if it makes EpiPen "1 of 1 and block[s] competitors"). As plaintiffs' expert explains, the "PBM industry is highly concentrated" and the "large PBMs generally offer the **[**120]** same set of pharmacy benefit formularies to many different insurers," so, as a consequence, "a single contract between a manufacturer and a PBM can affect the pharmacy benefit formularies of many different insurers." Doc. 2193-4 at 81 (Pls.' Ex. 85) (Elhauge Expert Report ¶ 153).

By mid-November 2013, Mylan reported that its "[m]ajor wins have resulted in Auvi-Q not being covered or requiring patients to try EpiPen before Auvi-Q in about 20% (87 million) of the US population." Doc. 2199-1 at 4 (Pls.' Ex. 207). One of Mylan's consultants commented that Mylan would "go down in pharma history" because Auvi-Q was offering a "better mousetrap" but was "at 7% share 1 year post launch—unheard of." Doc. 2199-2 at 2 (Pls.' Ex. 208). By June 2015, Mylan's Pricing Committee had approved Mylan offering rebates in the range of 50% to 60% off the EpiPen WAC for the largest PBMs and up to 30% for specifically targeted managed care accounts, conditioned on exclusive or preferred formulary coverage for EpiPen. Doc. 2199-3 at 2-5 (Pls.' Ex. 209).

After Auvi-Q entered the market, Mylan trained its sales force to understand "the 'spillover' effect[,]" meaning that in territories where Mylan was preferred **[**121]** on a majority of plans, the sales force should "emphasize the preferred plans[.]" Doc. 2199-9 at 2 (Pls.' Ex. 215); *see also* Doc. 2197-7 at 5 (Pls.' Ex. 171) (Foster Dep. 278:1-9) (explaining that the "concept of spillover typically refers to when a doctor is used to writing [a] product" because the manufacturer has "strong formulary positions" and "then it tends to have a spillover effect where the doctor just gets patterned into" **[*969]** prescribing the product). And, Mylan's sales force sought to "leverage EpiPen's superior formulary coverage" when competing against Auvi-Q. Doc. 2199-12 at 2 (Pls.' Ex. 218) (urging team to "put Sanofi out of business!"); *see also* Doc. 2197-15 at 8 (Pls.' Ex. 179) (noting in an email that recent "wins are HUGE!" and Mylan should "leverage them beyond belief!").

Mylan also listed as one of its "Message Areas with the most expansion potential" as "anti-competitive messages" about Auvi-Q. Doc. 2199-10 at 9 (Pls.' Ex. 216). It noted that "[b]undling of anticompetitive messages can move physicians, even if individual anticompetitive messages may not[.]" *Id.* at 11; *see also* Doc. 2199-11 at 6 (Pls.' Ex. 217) (suggesting that physicians "need to hear anticompetitive **[**122]** messages" about Auvi-Q).

Mylan marketed to physicians that EpiPen was "preferred" on many health plans while Auvi-Q was restricted. Doc. 2200-1 at 3 (Pls.' Ex. 227) (stating for "the 95 million patients in these major plans," EpiPen "is the preferred brand"). Mylan's marketing materials noted that "[h]ealth plans and PBMs make formulary decisions based on internal clinical and financial recommendations." *Id.* In one email, Mylan noted that "[f]rom a clinical perspective the plans have 'spoken' by selecting EpiPen over Auvi-[Q]" and encouraged sales people to "understand and leverage that [message] with their customers." Doc. 2199-9 at 2 (Pls.' Ex. 215). But, Mylan is not aware of any payor who chose EpiPen over Auvi-Q based on "clinical or superiority" reasons because that's not information that payors share with Mylan. Doc. 2200-3 at 3 (Pls.' Ex. 229) (Graham Dep. 179:15-21). And, as Mylan's expert testified, he is unaware of any PBM or payor refusing to cover Auvi-Q for "clinical reasons" because "both products have the same amount of epinephrine and [are] deemed bioequivalent by the FDA." Doc. 2200-4 at 3 (Pls.' Ex. 230) (Zieziula Dep. 26:13-20).

Also, Mylan funded and presented a **[**123]** study titled: "Auvi-Q Versus EpiPen Auto-Injectors: Failure to Demonstrate Bioequivalence of Epinephrine Delivery Based on Partial Area Under the Curve." Doc. 2200-5 at 3-5 (Pls.' Ex. 231). But, Mylan also recognized that the FDA had reviewed Auvi-Q and concluded that the epinephrine "demonstrat[ed] bioequivalence" with the epinephrine in EpiPen. *Id.* at 31.

Pfizer was apprised of Mylan's strategies for competing against Auvi-Q through its participation in the JCC. *See* Doc. 2199-14 at 89 (Pls.' Ex. 220) (JCC presentation discussing "a pre-emptive and launch action plan for future competition"). Also, Pfizer learned through its participation in the JCC about Mylan's success in blocking Auvi-Q from formulary access. Doc. 2199-15 at 44 (Pls.' Ex. 221) (JCC presentation discussing competitive intelligence about Auvi-Q and noting that "[m]ajor wins have resulted in Auvi-Q not being covered or requiring patients to try EpiPen before Auvi-Q in about 31% (93 million in the US population)").

Pfizer "raised concerns about EpiPen pricing" with Mylan. Doc. 2199-19 at 2 (Pls.' Ex. 225). Meridian's General Manager and President testified that he "didn't think" it "was an accurate description for the **[**124]** cost drivers" of EpiPen to say that the "wholesale price has changed over time to better reflect the multiple important product features and the value the product provides." Doc. 2194-1 at 3 (Pls.' Ex. 101) (Handel Dep. 163:15-164:22).

Sanofi's Rebate Agreements with PBMs

Sanofi's pricing strategy was to launch Auvi-Q at parity with EpiPen and then price at a premium because Sanofi felt that it "had the better product." *See also* Doc. 2150-24 at 3-4, 12 (Defs.' Ex. 197) (Viehbacher Dep. 93:14-94:6, 210:8-16). In January 2013, Sanofi launched **[*970]** Auvi-Q at a WAC of $241.00 per two-pack—just slightly above the $240.66 WAC for an EpiPen two-pack. Doc. 2143-13 at 2 (Defs.' Ex. 32).[41]

In July 2013, Mylan increased the WAC for EpiPen devices by 9.9%. Doc. 2157-1 at 3 (Defs.' Ex. 225). Sanofi adopted a "fast follower strategy," where it quickly followed any EpiPen WAC increases by raising the Auvi-Q WAC even higher. Doc. 2157-2 at 5 (Defs.' Ex. 226).[42] Sanofi increased Auvi-Q's WAC six times during the 33 months it marketed Auvi-Q, maintaining a premium over EpiPen for most of the period. Doc. 2157-3 at 3 (Defs.' Ex. 227).

Sanofi initially decided that it would not compete **[**125]** with Mylan on price, instead pursuing a "Mix of T2 and T3 access (not T2 at all cost)." Doc. 2157-4 at 5 (Defs.' Ex. 228). Sanofi's Vice President in charge of Auvi-Q, Bryan Downey, testified that Sanofi was "not planning for a lot of tier two access" for Auvi-Q and was "perfectly fine with tier two or tier three" placement for Auvi-Q. Doc. 2157-5 at 5-6 (Defs.' Ex. 229) (Downey Dep. 8:8-9:7). The head of Sanofi's allergy division agreed that Sanofi was "trying to really negotiate . . . for tier three coverage." Doc. 2157-7 at 3 (Defs.' Ex. 231) (Barry Dep. 156:2-12). And Sanofi's former Head of North America testified that Sanofi's strategy for Auvi-Q was to "get[] Tier 3 access so patients would have the product available versus going to Tier 2." Doc. 2157-8 at 3-4 (Defs.' Ex. 232) (Whitaker Dep. 45:16-46:3).

Sanofi's initial contracting guidelines for Auvi-Q rebates were "pretty small"—in the range of 3-10% for Tier 2. Doc. 2157-10 at 3-4 (Defs.' Ex. 234) (Denney Dep. 99:25-100:13). But, Sanofi's account executives reported that PBMs and payors were rejecting offers in this range as "not competitive" and even "laughable." *See, e.g.*, Doc. 2157-12 at 2 (Defs.' Ex. 236) (explaining **[**126]** Auvi-Q offer rejected by PBM as "inadequate"); Doc. 2157-13 at 2 (Defs.' Ex. 237) (informing Sanofi that its offer to PBM was "not competitive"); Doc. 2157-14 at 2 (Defs.' Ex. 238) (reporting that PBM called Auvi-Q offer "'laughable'"). Within a few months of launch, Mr. Downey questioned whether Sanofi was "being aggressive enough." Doc. 2157-15 at 3 (Defs.' Ex. 239).

PBMs' Coverage Decisions

---

[41] The court rejects plaintiffs' objection to defendants' Exhibit 32—as well as their objection to Exhibit 225 cited in the first sentence of the next paragraph—based on inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77. Plaintiffs don't dispute these statements of fact. *Id.* at 20; *see also* Doc. 2226-3 at 52 (discussing "SMF ¶¶ 156-157"). And, in any event, defendants correctly explain that these Mylan-produced documents qualify as business records that are admissible under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule. Again, the court is perplexed by plaintiffs' purposeless objection tactics.

[42] Plaintiffs object to defendants' Exhibits 226 and 227 as inadmissible hearsay to which no exception applies. Doc. 2190-1. But, plaintiffs also don't dispute the factual statements that the exhibits support. *Id.* at 20; *see also* Doc. 2226-3 at 52-53 (discussing "SMF ¶ 158"). Nevertheless, defendants correctly explain that these Sanofi-produced documents qualify as business records that are admissible under *Fed. R. Evid. 803(6)*'s exception to the hearsay rule. For the same reasons, the court rejects all of plaintiffs' other objections to Sanofi-produced documents as inadmissible hearsay because the Sanofi documents qualify as business records that fall outside the definition of hearsay under *Fed. R. Evid. 803(6)*. Also, plaintiffs' objections fail the sincerity standard because plaintiffs themselves rely on Sanofi-produced business records as summary judgment evidence to support their own factual statements. *See, e.g.*, Doc. 2190-1 at 34 (citing Doc. 2192-12 (Pls.' Ex. 63) (Sanofi-produced internal email)).

When Auvi-Q launched, many PBMs and commercial insurers determined that either EpiPen or Auvi-Q devices **[*971]** were clinically adequate to treat anaphylaxis. *See, e.g.*, Doc. 2157-16 at 4 (Defs.' Ex. 240) (noting that ESI's Pharmacy & Therapeutics ("P&T") review committee had recommended Auvi-Q as an "optional" treatment for anaphylaxis); Doc. 2157-17 at 22 (Defs.' Ex. 241) (explaining that CVS had identified Auvi-Q and EpiPen as part of a "[t]herapeutically interchangeable class"); Doc. 2157-18 at 13 (Defs.' Ex. 242) (stating that Prime would choose "one epinephrine product" to cover); Doc. 2159-1 at 20 (Defs.' Ex. 243) (asserting that UnitedHealthcare's P&T committee "determined Auvi-Q to be therapeutically equivalent . . . to EpiPen"); Doc. 2159-2 at 5-6 (Defs.' Ex. 244) (Shia (Kaiser) Dep. 95:14-96:7) **[**127]** (testifying that Kaiser determined the "clinical efficacy would be the same" for Auvi-Q and EpiPen).[43] *But see* Doc. 2192-13 at 3 (Pls.' Ex. 64) (Jan (Horizon) Dep. 56:11-57:10) (testifying that Auvi-Q and EpiPen were "clinically . . . the same" but noting a "preference" for Auvi-Q because of its "convenience" and because it was a "more-consumer-friendly device").

Several large PBMs and payors told both Sanofi and Mylan that they might cover or prefer only one EAI product on their formularies. *See, e.g.*, Doc. 2159-3 at 3 (Defs.' Ex. 245) (stressing the "need to raise the level of importance with the brand team around CVS Caremark's plan to review the [EAI] class and choose an exclusive product"); Doc. 2159-4 at 2 (Defs.' Ex. 246) (reporting that Kaiser has "suggested that [it] only want[s] one product" and "there has been discussion of replacing Epi-Pen"); Doc. 2159-5 at 2 (Defs.' Ex. 247) (reporting that "MedImpact likes the Auvi-Q product but wishes to have only one product in the category"); Doc. 2159-6 at 2 (Defs.' Ex. 248) (reporting that OptumRx asked whether Mylan was "interested in a guaranteed exclusive position for EpiPen in exchange for the addition of 10% price protection"). **[**128]**

For example, in late 2012, OptumRx warned Mylan that "EpiPen is at risk" if it didn't offer price protection because the PBM was "well aware of the price increases Mylan [had] taken." Doc. 2159-7 at 3 (Defs.' Ex. 249). OptumRx also gave Mylan an example where "the benefit exclusion can be flipped to exclude the prominent brand." *Id.* About a month later, OptumRx told Mylan that it expected Sanofi to make a "strong rebate offer to gain coverage and potentially displace EpiPen[,]" so it was seeking a "competitive bid" from Mylan "to maintain [its] current positioning." Doc. 2159-8 at 2 (Defs.' Ex. 250). In early 2013, Cigna told Mylan that it "can use tier differential and step therapy" with the EAI class and that it was "looking for an offer for exclusive epinephrine positioning." Doc. 2159-9 at 2 (Defs.' Ex. 251).

But not all PBMs sought to manage the EAI class by excluding products from coverage. *See* Doc. 2192-13 at 3 (Pls.' Ex. 64) (Jan (Horizon) Dep. 56:11-57:23) (testifying that Auvi-Q and EpiPen both were offered on the "preferred tier" of the formulary); *see also* Doc. 2192-5 at 6 (Pls.' Ex. 54) (Minton (Anthem) Dep. 280:1-25) (testifying that Anthem was willing to cover multiple **[**129]** EAIs and not "seeking out exclusive offers"). And, some PBMs expressed concern about excluding EpiPen because of its large market share. *See* Doc. 2198-14 at 2 (Pls.' Ex. 200) (noting that, if forced to switch to Auvi-Q, patient disruption at Optum "would be really significant"); Doc. 2198-15 at 2 (Pls.' Ex. 201) **[*972]** (recognizing that, at MedImpact, it "would be very difficult for Sanofi to neutralize that savings advantage given [EpiPen's] current share"); Doc. 2192-5 at 7 (Pls.' Ex. 54) (Minton (Anthem) Dep. 292:22-293:5) (testifying that Mylan's market share had an impact in Anthem's decision to accept Mylan's offer because "the more share [Mylan] had, the more the rebate was attributable to that share" and "the value of selecting that scenario where [Anthem] would edit Auvi-Q was increased").

Also, Mylan recognized that PBMs would be "heavily impacted" if they worked against Mylan because of the large amount of administrative fees Mylan had paid them. Doc. 2198-16 at 15 (Pls.' Ex. 202). And, at least one PBM recognized that "with EpiPen's presence in the market and being established . . . there's basically going to be no way you could get everybody off of EpiPen" because that would require **[**130]** "mov[ing] at least 60 percent of [the] market share just to break even." Doc. 2192-20 at 65 (Pls.' Ex. 71).

---

[43] The court rejects plaintiffs' objections to all of these third-party produced documents as inadmissible hearsay to which no exception applies. Doc. 2190-1 at 77 (objecting to defendants' Exhibits 235 through 243). Defendants assert that these documents—produced by PBMs—qualify as business records subject to *Fed. R. Evid. 803(6)*'s hearsay exception. Doc. 2226-1 at 21. The court agrees and thus overrules plaintiffs' objections.

When Auvi-Q launched in January 2013, many PBMs, including ESI, CVS, Prime, Aetna, and Cigna—covered Auvi-Q on Tier 3 by default before any review by their P&T Committees. Doc. 2157-4 at 17-18 (Defs.' Ex. 228). However, United, following its standard policy "not [to] cover new products . . . with the same active ingredients as other covered products" before P&T review, did not cover Auvi-Q at launch. Doc. 2150-13 at 10 (Defs.' Ex. 186) (Etemad (United) Dep. 84:9-16); *see also* Doc. 2159-8 at 2 (Defs.' Ex. 250).

PBMs and payors then solicited rebate offers from Mylan and Sanofi, giving them the opportunity to compete through rebates or other discounts, and with some payors suggesting a willingness to exclude or place restrictions on one of the products. *See, e.g.*, Doc. 2159-3 at 3 (Defs.' Ex. 245) (discussing "CVS Caremark's plan to review the [EAI] class and choose an exclusive product"); Doc. 2159-11 at 2 (Defs.' Ex. 253) (noting in CVS's bid solicitation letter to Mylan the availability of "exclusion opportunities"); Doc. 2159-13 at 5 (Defs.' Ex. 255) (explaining that OptumRx **[**131]** "intends to manage the products" in the EAI class "using a combination of tier placement and product exclusion"); Doc. 2160-1 at 2 (Defs.' Ex. 257) (explaining MedImpact was "looking for a 1 or 1 offer for the" EAI class); Doc. 2159-9 at 2 (Defs.' Ex. 251) (asserting that Cigna was "looking for an offer for exclusive epinephrine positioning"). When payors asked for non-exclusive rebate offers—or several rebate options—Mylan provided them. *See, e.g.*, Doc. 2152-1 at 4 (Defs.' Ex. 201) (providing several rebate offers to ESI but also providing "no bid" for several categories); Doc. 2152-2 at 19 (Defs.' Ex. 202) (same to CVS); Doc. 2160-3 at 2 (Defs.' Ex. 260) (same to OptumRx); Doc. 2160-4 at 5, 7 (Defs.' Ex. 261) (same to Prime); Doc. 2160-5 at 2-5 (Defs.' Ex. 262) (same to MedImpact).

Several PBMs testified that, after negotiating with both Mylan and Sanofi, each PBM and payor made its own independent formulary determinations for the EAI class and that Mylan never threatened to cut off EpiPen supply based on a PBMs' formulary decisions.[44] *See, e.g.*, Doc. 2160-7 **[*973]** at 3-5 (Defs.' Ex. 264) (Cunico (Presbyterian) Dep. 148:17-150:24, 178:21-179:5); Doc. 2150-16 at 8-10 (Defs.' Ex. 189) (Stein **[**132]** (Humana) Dep. 282:7-284:2); Doc. 2160-6 at 3-4 (Defs.' Ex. 263) (Brodeur (Aetna) Dep. 130:3-131:7); Doc. 2150-15 at 28 (Defs.' Ex. 188) (Hall (Prime) Dep. 150:11-25); Doc. 2152-13 at 6-7 (Defs.' Ex. 214) (Vargo (Aetna) Dep. 130:17-131:9); Doc. 2150-11 at 30-34 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 204:4-211:23); Doc. 2150-19 at 141 (Defs.' Ex. 192) (Minton (Anthem) Dep. 141:19-24). With the PBMs that chose to cover Auvi-Q, Mylan still paid rebates to those PBMs which covered both EpiPen and Auvi-Q. *See, e.g.*, Doc. 2152-2 at 2-22 (Defs.' Ex. 202) (Mylan/CVS Agreement); Doc. 2152-4 at 2-5 (Defs.' Ex. 204).

Three PBMs—CVS, Prime, and Cigna—never restricted or excluded Auvi-Q, covering it on Tier 2 or Tier 3 without restriction. Doc. 2150-10 at 9-13 (Defs.' Ex. 183) (Anderson (CVS) Dep. 112:12-116:23); Doc. 2150-15 at 16-17, 23-24 (Defs.' Ex. 188) (Hall (Prime) Dep. 110:22-111:9, 129:24-130:7); Doc. 2150-17 at 18-22 (Defs.' Ex. 190) (Kronberg (Cigna) Dep. 79:3-83:8). Also, with MedImpact, EpiPen had an exclusive Tier 2 position with a step-edit placed on Auvi-Q on MedImpact's three standard commercial formularies, but MedImpact's custom clients remained **[**133]** eligible for rebates from Sanofi if they covered Auvi-Q. Doc. 2160-9 at 2 (Defs.' Ex. 266). For example, MedImpact client University of Michigan added Auvi-Q in a Tier 2 position. Doc. 2160-10 at 2 (Defs.' Ex. 267). Also, on open plans—about 15% of MedImpact's clients—Auvi-Q had equal preferred positioning with EpiPen. Doc. 2160-9 at 2 (Defs.' Ex. 266).

PBMs made different decisions about how they would cover EpiPen and Auvi-Q. For example, Blue Cross Blue Shield of California covered both EpiPen and Auvi-Q on the preferred brand tier. Doc. 2160-11 at 2 (Defs.' Ex. 268). Humana covered EpiPen on the preferred tier, and Auvi-Q as non-preferred. *See* Doc. 2160-12 at 3 (Defs.' Ex.

---

[44] Plaintiffs attempt to controvert the statement that Mylan never threatened to cut off supply by citing two Mylan documents. But neither document, even when construed in plaintiffs' favor, suggests that Mylan threatened to cut off supply of EpiPens. *See* Doc. 2192-17 at 2-3 (Pls.' Ex. 68) (listing as a "talking point" for a meeting with MedImpact that "Mylan will terminate its current contract if MedImpact implements a step edit *against EpiPen*[,]" meaning that Mylan will withdraw its current rebates if the PBM imposed a restriction on EpiPen but never saying anything about cutting off EpiPen supply (emphasis added)); Doc. 2192-18 at 2 (Pls.' Ex. 69) (informing OptumRx that "[i]f for some reason, [OptumRx/UnitedHealthcare] decides *to exclude EpiPen* in 2014, we will not pay any enhanced rebates in 2013[,]" but never mentioning that Mylan would cut off EpiPen supply (emphasis added)).

269); *see also* Doc. 2160-16 at 3 (Defs.' Ex. 270). Presbyterian Health covered Auvi-Q on the preferred tier and EpiPen as non-preferred. Doc. 2160-14 at 2 (Defs.' Ex. 271).[45] Anthem/Wellpoint covered EpiPen as the preferred brand and placed a restriction on Auvi-Q. Doc. 2161-1 at 2 (Defs.' Ex. 274). Kaiser Permanente chose to cover only just one device and selected EpiPen.[46] Doc. 2161-5 at 3-4 (Defs.' Ex. 278). And, Geisinger Health Plan restricted EpiPen in favor of Auvi-Q. Doc. 2161-6 at 2 (Defs.' Ex. 279).

By **[**134]** the beginning of 2014, Sanofi recognized that Mylan's "very aggressive approach on pricing to try to exclude Auvi-Q" was affecting Auvi-Q's sales, so "it became clear" to Sanofi that it had "no choice but to try to gain access to the marketplace by significantly discounting" Auvi-Q. Doc. 2150-24 at 5-6 (Viehbacher Dep. 121:18-122:10). In January 2014, Sanofi's CEO suggested "mak[ing] an offer that kicks [Mylan] off a formulary. If Mylan knows we can be aggressive it may help." Doc. **[*974]** 2161-7 at 2 (Defs.' Ex. 280). Sanofi's Head of North America agreed that Sanofi should "get aggressive." Doc. 2161-8 at 2 (Defs.' Ex. 281).

Sanofi succeeded in reversing its exclusion from ESI's national formulary. Doc. 2161-10 at 2 (Defs.' Ex. 283). As part of its negotiations with ESI to achieve coverage for Auvi-Q, Sanofi offered additional rebates on its insulin drug Lantus. *See* Doc. 2192-23 at 3 (Pls.' Ex. 74); *see also* Doc. 2192-14 at 2 (Pls.' Ex. 75). As a Sanofi witness testified, the Lantus offers were an "unprecedented" and "desperate move" by Sanofi to secure more formulary access for Auvi-Q. Doc. 2192-4 at 3 (Pls.' Ex. 53) (Borneman Dep. 138:18-139:17).

ESI then approached Mylan for a better rebate **[**135]** offer, and initially, Mylan offered just a 2% enhancement. Doc. 2161-9 at 8 (Defs.' Ex. 282). ESI responded by telling Mylan that it would switch to covering Auvi-Q as a preferred product in 2015. *Id.* ESI then gave Mylan an ultimatum: Either offer a 45% rebate to share Tier 2 with Auvi-Q or offer a 58% rebate to remain exclusive. *Id.* Mylan responded by offering a 45% rebate to share Tier 2 with Auvi-Q but offered just a 55% rebate to remain exclusive. Doc. 2161-11 at 3 (Defs.' Ex. 284). ESI accepted Mylan's 45% rebate offer and covered both EpiPen and Auvi-Q on its main formulary in 2015. Doc. 2161-10 at 2 (Defs.' Ex. 283). But, it excluded EpiPen on its High Performance formulary in favor of Auvi-Q. Doc. 2161-12 at 3 (Defs.' Ex. 285).

Sanofi had success with Aetna too. It offered Aetna a 65% rebate for exclusivity for 2015. Doc. 2161-13 at 2 (Defs.' Ex. 286). Aetna then used Sanofi's offer to push Mylan to offer a 45% rebate for EpiPen to be co-preferred on Tier 2. Doc. 2161-14 at 2 (Defs.' Ex. 287). Ultimately, Sanofi agreed to a 30% rebate for Auvi-Q to be co-preferred on Tier 2 (a lower rebate than Mylan for the same access). Doc. 2162-1 at 7-9 (Defs.' Ex. 289). Aetna then made **[**136]** EpiPen and Auvi-Q co-preferred on its value and premier formularies effective January 1, 2015. Doc. 2162-3 at 2 (Defs.' Ex. 291).

Also, Sanofi improved its coverage at CVS by offering rebates of 40% for unrestricted coverage, 50% for exclusive preferred coverage, and 65% for exclusive formulary coverage with EpiPen and Adrenaclick excluded. Doc. 2162-4 at 19-20 (Defs.' Ex. 292).[47] The parties memorialized the rebate menu in a rebate agreement effective July 1, 2014, through December 31, 2015. Doc. 2162-5 at 2-28 (Defs.' Ex. 293). With this offer, Sanofi not only secured co-preferred Tier 2 formulary coverage for Auvi-Q on CVS's Preferred Drug List, but it also became the sole preferred drug (with EpiPen excluded) on CVS's Value Based Formulary beginning July 1, 2014, and CVS's Advanced Control Formulary beginning October 1, 2014. Doc. 2162-6 at 2 (Defs.' Ex. 294). And, CVS then used this offer to persuade Mylan to offer increased rebates to avoid exclusion on its Preferred Drug List. Doc. 2162-7 at 3-4 (Defs.' Ex. 295); Doc. 2162-8 at 6 (Defs.' Ex. 296); Doc. 2162-9 at 3-5 (Defs.' Ex. 297). CVS continued to exclude EpiPen

---

[45] Sanofi offered 25% rebates to Presbyterian Health, Doc. 2160-15 at 3 (Defs.' Ex. 272), while Mylan offered 15.5% rebates, Doc. 2160-16 at 2 (Defs.' Ex. 273).

[46] A Kaiser Permanente witness testified that the company usually contracts for one drug and it solicits up-front discounts instead of rebates. Doc. 2159-2 at 3-4, 14-15 (Defs.' Ex. 244) (Shia (Kaiser) Dep. 82:14-83:3, 264:14-265:19). The witness further testified that when it chose to stay with EpiPen Auvi-Q launched because Mylan offered "the better price." *Id.* at 7-9 (Defs.' Ex. 244) (Shia (Kaiser) Dep. 106:11-108:1).

[47] The percentages include base rebates, incremental rebates, and a 4% administrative fee.

devices on the Value Based Formulary and Advanced Control Formulary **[**137]** until Sanofi recalled Auvi-Q from the market. Doc. 2162-12 at 2-3 (Defs.' Ex. 300); *see also* Doc. 2150-10 at 38-39 (Anderson (CVS) Dep. 252:16-253:22).

Sanofi also maintained coverage it had previously secured at Prime and Cigna, among others. Doc. 2162-13 at 7 (Defs.' Ex. 301). An August/September 2014 internal **[*975]** Sanofi document recognized the advances it had made in coverage by stating, "Thanks for Your Tremendous Efforts to Recapture and Secure Access[,]" and then listing "Great Recent Auvi-Q Decisions" with 10 PBMs. *Id.*

But Sanofi wasn't able to secure favorable coverage with every PBM in 2015. For example, United gave Sanofi the opportunity to renegotiate. Doc. 2162-14 at 3 (Defs.' Ex. 302). United expressly requested an offer for exclusive coverage, and it told Sanofi its target rebate was 60%. *Id.* Sanofi did not make an exclusive offer, offering instead a lower rebate (35%) for coverage at any tier. Doc. 2162-15 at 5 (Defs.' Ex. 303). In contrast, Mylan offered a higher rebate (37%) for exclusive coverage and maintained its exclusive position. Doc. 2163-1 at 10 (Defs.' Ex. 304).

Similarly, in March 2014, Sanofi approached MedImpact about removing a step-edit on Auvi-Q. Doc. 2163-2 **[**138]** at 3 (Defs.' Ex. 305). MedImpact told Sanofi it "would need to offer a discount in the upper 30s to low 40s . . . to even open the conversation." *Id.* at 2. And, MedImpact recognized that it "would be very difficult for Sanofi to neutralize that [EpiPen] savings advantage given [EpiPen's] current share." *Id.* at 2. Sanofi declined to offer the requested discount. Doc. 2163-3 at 2 (Defs.' Ex. 306); Doc. 2163-4 at 2 (Defs.' Ex. 307).

A 2016 Pfizer email identified the "cost of goods sold" for an EpiPen 2-Pak as $18.32. Doc. 2193-9 at 2 (Pls.' Ex. 90). Mylan never sold EpiPen devices at a price below production costs. Doc. 2163-5 at 9-10, 39-55 (Defs.' Ex. 308) (Willig Expert Report ¶¶ 14, 89-122) (concluding that "Mylan's prices, taking full account of rebates and price protection, were above an appropriate measure of its cost" in analysis of PBM contracts).[48] Also, there is no evidence that a PBM or payor ever excluded Sanofi when it offered a lower per-unit price than Mylan. *See id.* at 64 (¶ 142) (emphasizing that plaintiffs' expert had failed to identify "a single instance where Auvi-Q was offered at a lower net price per unit than EpiPen" and still "a plan 'restricted' Auvi-Q on its formulary"). **[**139]** There are, however, examples where Sanofi offered higher rebates and price protection to PBMs, but it was unable to secure exclusivity for Auvi-Q over EpiPen. *See, e.g.*, Doc. 2193-1 at 4 (Defs.' Ex. 82) (showing Sanofi's offer to ESI of a 60.625% rebate with 10% price protection for exclusivity); *see also* Doc. 2193-3 at 2 (showing Sanofi offer Aetna 65% rebates for exclusive coverage compared to Mylan's 55% exclusive offer).

Prof. Elhauge performed an analysis showing the percentage of Auvi-Q foreclosure to consumers—both insured and uninsured. Doc. 2192-6 at 90 (Pls.' Ex. 55) (Elhauge Reply Expert Report Fig. 104). His analysis shows that, in 2013, about 80% of consumers had access to Auvi-Q. *Id.* In 2014, that number fell to around 65%, but it grew again in 2015, to about 69%, meaning that Auvi-Q was foreclosed from about 31% of consumers. *Id.* In Canada, where Auvi-Q had access equal to EpiPen, Auvi-Q reached a 30% market share **[*976]** within at least three years of launch. Doc. 2200-12 at 4 (Pls.' Ex. 240) (Fairest Dep. 236:20-237:24); Doc. 2200-13 at 2 (Pls.' Ex. 241).

PBM Negotiations

---

[48] Plaintiffs try to controvert this fact by citing their own expert's opinion that Mylan's rebate agreements violate the discount attribution test. Doc. 2192-6 at 237-38, 247-50 (Pls.' Ex. 55) (Elhauge Reply Expert Report ¶¶ 402, 419-22). As Prof. Elhauge explains, the discount attribution test "shows that [Mylan's rebate agreements] have the potential to force an equally efficient rival to exit the market." *Id.* at 237-38 (¶ 402). And, applying that test to rebate agreements at issue here, he concludes that "many or most of Mylan's agreements did in fact fail the discount attribution test by resulting in below-cost incremental prices." *Id.* But, as defendants correctly explain, Prof. Elhauge's analysis isn't evidence that Mylan sold an EpiPen device at a price below its production cost.

Pfizer played no role in PBM negotiations.[49] Several PBMs testified that their negotiations with Mylan **[**140]** were "spirited" and even "contentious." *See, e.g.*, Doc. 2150-11 at 30-31 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 207:7-208:8); Doc. 2150-16 at 7 (Defs.' Ex. 189) (Stein (Humana) Dep. 229:1-4). PBMs and drug manufacturers have "competing priorities" where the manufacturer is trying to secure the lowest rebates but also with favorable formulary position while PBMs are trying to secure larger rebate offers on drug products. Doc. 2150-11 at 29 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 206:2-20); Doc. 2150-16 at 7 (Defs.' Ex. 189) (Stein (Humana) Dep. 229:6-13); Doc. 2150-10 at 29-30 (Defs.' Ex. 183) (Anderson (CVS) Dep. 209:21-210:1). Several PBMs and payors testified that they never conspired with Mylan to exclude Auvi-Q. Doc. 2150-11 at 30-31 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 207:7-208:8); Doc. 2150-16 at 7 (Defs.' Ex. 189) (Stein (Humana) Dep. 229:14-17); Doc. 2159-2 at 10 (Shia (Kaiser) Dep. 154:3-9).

Some PBMs and payors testified that they used exclusivity to extract higher rebates from both Mylan and Sanofi. *See, e.g.*, Doc. 2150-14 at 6-7, 9 (Defs.' Ex. 187) (Ayers (MedImpact) Dep. 150:18-151:2, 162:1-22) (agreeing that MedImpact sought "to create the perception within Mylan" that **[**141]** Auvi-Q "could be a formidable challenger" to EpiPen in order "to induce Mylan to provide a larger rebate[,]" and that MedImpact asked both Sanofi and Mylan for 1-of-1 (exclusive position) proposals); Doc. 2150-19 at 7 (Defs.' Ex. 192) (Minton (Anthem) Dep. 281:17-25) (testifying that Auvi-Q was "the highest costing product" and Anthem was "looking to see how we could bring down a cost in the class by making EpiPen more preferred").

Several payors testified that—despite EpiPen's market share—they could have excluded EpiPen because they could shift product use from EpiPen to Auvi-Q. *See, e.g.*, Doc. 2150-17 at 26-27 (Defs.' Ex. 190) (Kronberg (Cigna) Dep. 148:19-149:14) (testifying that "people will be okay with moving" products when "they're clinically equivalent"); Doc. 2150-13 at 13 (Defs.' Ex. 186) (Etemad (United) Dep. 115:21-23) (testifying that "it was a possibility to exclude" EpiPen from coverage); Doc. 2159-2 at 10-11 (Shia (Kaiser) Dep. 260:36-261:13) (testifying that "it would not be difficult" to move consumers from "one branded EAI device to another branded EAI device"). ESI implemented a strategy that sought "to make the product that has lots of market share [*i.e.*, EpiPen] **[**142]** feel threatened" by potential exclusion "to get the lowest net cost." Doc. 2150-11 at 12 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 154:18-24). Sanofi reported internally that "Aetna believe[d] Auvi-Q would see an 80% shift of utilization from Epi-Pen in [Year] 1" if Aetna accepted Sanofi's exclusive offer. Doc. 2161-13 at 3 (Defs.' Ex. 286).

CVS serves as an example of a PBM who successfully shifted patients to Auvi-Q after it excluded EpiPen from its Advanced Control Formulary ("ACF"). Doc. 2163-11 at 2-3 (Defs.' Ex. 314). On this plan, EpiPen's market share went from 92% in Q4 2014 to 0.2% by Q2 2015. *Id.* CVS told Mylan in 2015 that its market share on that formulary was "all but gone." *Id.* at 3. CVS also noted that EpiPen's market share on CVS's Value Based **[*977]** Formulary was "still holding share." *Id.* But, it warned Mylan that it "view[ed] the ACF as a trial balloon" and that there had "been no noise or complaints . . . which would indicate not a big deal excluding epipen." *Id.* Mylan confirmed that EpiPen utilization on the plans that adopted the CVS Value Formulary, including plans of large corporations like Comcast and Home Depot, "completely disappeared in Q4 2014," necessitating an enhanced **[**143]** rebate offer to "reverse the exclusion." Doc. 2163-12 at 11-12 (Defs.' Ex. 315). CVS projected that EpiPen's share, if CVS excluded EpiPen in favor of Auvi-Q on its national template formulary, would drop from 66% to 7%, with Auvi-Q's share increasing from 10% to 75%. Doc. 2163-13 at 3 (Defs.' Ex. 316). West Virginia's Medicaid program also shifted 90% of its market share to Auvi-Q in just two quarters. Doc. 2163-14 at 2 (Defs.' Ex. 317). Also, some PBMs testified about past success in other markets shifting patient volume from market leading drugs to upstart competitors for other products. *See, e.g.*, Doc. 2150-10 at 26-28 (Defs.' Ex. 183) (Anderson (CVS) Dep. 200:18-202:1); Doc. 2150-11 at 26-27 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 191:21-192:15).

As an ESI witness testified, the increased rebates ESI negotiated from Mylan and Sanofi produced lower net prices for EAI devices. Doc. 2150-11 at 13 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 155:7-11) (testifying that, by 2015, ESI was "highly effective in making this a very competitive class and bringing the rates down, lowering that cost, both for our plans and ultimately for many members").

---

[49] Plaintiffs don't dispute this fact. Doc. 2190-1 at 20 (noting that defendants' SMF ¶ 179 is undisputed).

Sanofi Recalls Auvi-Q and Returns Its Rights

In the **[**144]** summer of 2015, Sanofi learned that some of its Auvi-Q devices may fail to inject epinephrine. Doc. 2163-15 at 2 (Defs.' Ex. 318); Doc. 2163-16 at 4-6 (Defs.' Ex. 319). On October 22, 2015, the FDA conducted a surprise inspection at Sanofi's manufacturing facility. Doc. 2163-17 at 2-4 (Defs.' Ex. 320). A few days later, Sanofi issued a Class I voluntary recall of all Auvi-Q devices in the United States and discontinued Auvi-Q manufacturing operations. Doc. 2169 at 6 (Pretrial Order ¶ 2.a.47.). The FDA reserves a Class I recall for cases involving "a reasonable chance that a product will cause serious health problems or death." *What is a Medical Device Recall*?, FDA (current as of Sept. 26, 2018), https://www.fda.gov/medical-devices/medical-device-recalls/what-medical-device-recall. In a letter to the FDA, Sanofi explained that its recall was "[b]ased on the complexity of the Auvi-Q device (27 components, including an audio device) and the occurrence of three distinct potential quality events over the past four months." Doc. 2164-1 at 3 (Defs.' Ex. 322).

Sanofi considered renegotiating its contract rights with kaléo. Doc. 2200-15 at 4-28 (Pls.' Ex. 243). In a presentation discussing that **[**145]** strategy, Sanofi noted that when it "signed the deal 5 years ago, the market was quite different and neither company anticipated the managed care response or the aggressive tactics that Mylan would employ." *Id.* at 7; *see also* Doc. 2200-16 at 3 (Pls.' Ex. 244) (assuming that Auvi-Q would have strong formulary access at launch).

On December 7, 2015, Sanofi advised kaléo it would return the rights for Auvi-Q and terminate the license agreement. Doc. 2164-2 at 3-7 (Defs.' Ex. 323) (Barry Dep. 21:8-25:3). On February 24, 2016, Sanofi and kaléo signed a termination agreement. Doc. 2164-3 at 2 (Defs.' Ex. 324). Sanofi's then-Head of Global Commercial Operations testified that "the recall was the single and only reason" that Sanofi returned its rights to Auvi-Q. Doc. 2163-6 at 5-6 **[*978]** (Defs.' Ex. 309) (Guenter Dep. 327:23-328:6). Also, he testified:

> So the only reason why [Sanofi] decided to [return the Auvi-Q rights] was a potential relaunch after whatever it would be, 12, 15 months, would have been a very, very costly endeavor because we would anticipate that Mylan would of course be at least as aggressive in the second potential relaunch period as compared to the first. So that's what made us **[**146]** decide that given the recall of the product that it didn't make economic sense to relaunch the product.

Doc. 2193-6 at 5 (Pls.' Ex. 87) (Guenter Dep. 358:17-359:15); *see also* Doc. 2200-17 at 4-5 (Pls.' Ex. 245) (Barry Dep. 37:24-38:14) (testifying that after "[c]onsidering the market environment" and "the behaviors of the competitor, and assuming that there was a likelihood that [Mylan] would continue to try to blunt our launch in terms of using their lion's share of the market inappropriately and the level of investment that would be required to achieve a relaunch," Sanofi "determined that based on the pro forma of the general medicines team that it would be best to put those investments somewhere else and then . . . transition the product back to" kaléo).

Shortly after Sanofi removed Auvi-Q from the market in October 2015, Mylan "took a 14.9% WAC increase on" November 21, 2015, "increasing the WAC/pen to $264.85." Doc. 2200-21 at 3 (Pls.' Ex. 249). And, Mylan began "evaluating all contracts (both with the States and Payors) now that Auvi-Q [had] exited the market" and "working [to] improve these rates for 2016[.]" *Id.* In negotiations with a PBM, Mylan's Bruce Foster noted that Mylan **[**147]** was "hoping to reduce [its] average rebate percentage" based on a "directive [that came] down from the very top leadership at Mylan." Doc. 2201-1 at 2 (Pls.' Ex. 250). As PBM Magellan recognized, now that "EpiPen is the only game in town[,]" Mylan didn't "need to be as aggressive with rebates to compete. It's that simple." Doc. 2201-2 at 2 (Pls.' Ex. 251).

In February 2017, kaléo reintroduced Auvi-Q in the United States. Doc. 2169 at 6 (Pretrial Order ¶ 2.a.48.). It offered Auvi-Q at a WAC of $4,500. Matthew Herper, *In Rube Goldberg Price Scheme, EpiPen Competitor Auvi-Q To Be Free For Patients, $4,500 For Their Insurers*, Forbes (Jan. 19, 2017), https://www.forbes.com/sites/matthewherper/2017/01/19/epipen-competitor-auvi-q-to-be-free-for-most-patients-but-cost-4500-for-insurers-in-rube-goldberg-scheme/#3ea207ae3fe6.[50]

Mylan Enters Settlement Agreement with DOJ

In 2017, Mylan agreed to pay $465 million to the Department of Justice to resolve claims that it knowingly misclassified the EpiPen as a generic drug to avoid paying rebates owed to Medicaid. Doc. 2207-3 at 2 (Pls.' Ex. 238). "The claims settled by [the] agreement [were] allegations only, and there [was] no determination **[**148]** of liability." *Id.* But, at least one payor recognized that Mylan was paying lower rebates on Medicaid plans based on its classification of EpiPen as a generic. *See* Doc. 2200-11 at 3 (Pls.' Ex. 239) (noting that "[e]very data point we have suggest[s] **[*979]** the Epipen is a brand (because it is); however; [Mylan has] been paying federal rebates at 13% of AMP as if it was a generic" and recognizing that "[i]f CMS requires Mylan to recalculate their rebates to reflect a branded status as we are expecting, the federal rebate has the potential to increase drastically").

II. Summary Judgment Standard

The standard for deciding summary judgment under *Federal Rule of Civil Procedure 56* is well-known. ***HN13***[] Summary judgment is appropriate if the moving party demonstrates that "no genuine dispute" exists about "any material fact[,]" and the moving party is "entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*; *see also* *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. When the court applies this standard, it views the evidence and draws reasonable inferences in the light most favorable to the non-moving party. *Scott v. Harris, 550 U.S. 372, 378, 127 S. Ct. 1769, 167 L. Ed. 2d 686 (2007)*. An issue of "material fact is 'genuine' . . . if the evidence is such that a reasonable jury could return a verdict for the nonmoving party" on that issue. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. And, an issue of fact is "material" **[**149]** if it has the ability to "affect the outcome of the suit under the governing law[.]" *Id.*

HN14[] The party moving for summary judgment bears the initial burden of showing "the basis for its motion." *Celotex, 477 U.S. at 323*; *Kannady v. City of Kiowa, 590 F.3d 1161, 1169 (10th Cir. 2010)* (explaining that the moving party bears "'both the initial burden of production on a motion for summary judgment and the burden of establishing that summary judgment is appropriate as a matter of law'" (quoting *Trainor v. Apollo Metal Specialties, Inc., 318 F.3d 976, 979 (10th Cir. 2002)*)). A summary judgment movant can satisfy this burden by demonstrating "there is an absence of evidence to support the nonmoving party's case." *Celotex, 477 U.S. at 325*; *see also* *Kannady, 590 F.3d at 1169* (explaining that the moving party, to meet its summary judgment burden, "need not negate the non-movant's claim, but need only point to an absence of evidence to support the non-movant's claim" (citation and internal quotation marks omitted)).

HN15[] If the moving party satisfies its initial burden, the non-moving party "must set forth specific facts showing that there is a genuine issue for trial." *Anderson, 477 U.S. at 250* (citation and internal quotation marks omitted); *see also* *Kannady, 590 F.3d at 1169* ("If the movant carries [the] initial burden, the nonmovant may not rest on its pleadings, but must bring forward specific facts showing a genuine issue for trial [on] those dispositive **[**150]** matters for which it carries the burden of proof." (citation and internal quotation marks omitted)). To satisfy this requirement, the nonmoving party must "go beyond the pleadings and by [its] own affidavits, or by the depositions, answers to interrogatories, and admissions on file, designate specific facts showing that there is a genuine issue for trial." *Celotex, 477 U.S. at 324* (citation and internal quotation marks omitted). When deciding whether a party has

[50] As noted previously, *see supra* note 9, plaintiffs assert a blanket objection to documents that defendants cite as summary judgment evidence but which they didn't submit as exhibits to their summary judgment motion. Doc. 2190-1 at 76-77. The above-cited *Forbes* article is one of the citations to which plaintiffs object. *Id.* at 77 n.439 (asserting that the court can't consider the citation in defendants' footnote 429). But, plaintiffs also don't dispute defendants' factual assertion that defendants support with the exhibit. *See* Doc. 2190-1 at 20 (noting that plaintiffs don't dispute defendants' SMF ¶ 188). So, the court includes the above-recited fact because plaintiffs don't controvert it.

shouldered its summary judgment burden, "the judge's function" is not "to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial." Anderson, 477 U.S. at 249.

HN16[] Summary judgment is not a "disfavored procedural shortcut[.]" Celotex, 477 U.S. at 327. Instead, it is an important procedure "designed 'to secure the just, speedy and inexpensive determination of every action.'" *Id.* (quoting Fed. R. Civ. P. 1).

[*980] Just recently, our Circuit[51] has reiterated that "'HN17[] summary judgment should be used sparingly in antitrust cases[.]'" N.M. Oncology & Hematology Consultants, Ltd. v. Presbyterian Healthcare Servs., 994 F.3d 1166, 1174 (10th Cir. 2021) (quoting Bell v. Fur Breeders Agric. Co-op., 348 F.3d 1224, 1229 (10th Cir. 2003)). But still, a court must apply "'the usual rules governing summary judgment'" to antitrust cases. *Id.* (quoting Bell, 348 F.3d at 1229); *see also* id. at 1172 (affirming trial court's decision granting summary judgment against plaintiff's Sherman Act § 2 claims because **[**151]** plaintiff "failed to establish that Defendants had engaged in exclusionary or anticompetitive conduct"). Like "any Rule 56 motion," an antitrust plaintiff "has the burden 'to set forth specific facts showing that there is a genuine issue for trial.'" *Id.* (quoting In re Rumsey Land Co., 944 F.3d 1259, 1270 (10th Cir. 2019)). And, as the Supreme Court has recognized, "[s]ummary judgments have a place in the antitrust field" because "[s]ome of the law in this area is so well developed that [when] the gist of the case turns on documentary evidence, the rule at times can be divined without a trial." White Motor Co. v. United States, 372 U.S. 253, 259, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963); *see also* SEC v. Geyser Mins. Corp., 452 F.2d 876, 881 (10th Cir. 1971) (explaining that "even in antitrust litigation, if the pertinent area of law is well developed and the case turns on documentary evidence, disposition by summary judgment may be appropriate" (citing White Motor Co., 372 U.S. at 259)).

With this governing legal standard explained, the court now turns to defendants' arguments supporting summary judgment against plaintiffs' claims.

III. Analysis

Defendants move for summary judgment against plaintiffs' two claims—one asserting antitrust claims violations and the other claiming RICO violations. The court addresses defendants' summary judgment arguments, below. *First*, the court addresses whether the summary judgment facts **[**152]** present any triable issue for plaintiffs' antitrust claims. *Second*, the court decides whether the undisputed facts warrant summary judgment against plaintiffs' RICO claims.

A. Antitrust Claims

Plaintiffs assert state antitrust conspiracy and monopolization claims under certain state laws. Doc. 2169 at 42, 44-45 (Pretrial Order ¶¶ 4.a., 4.d.).

Generally, HN19[] an antitrust conspiracy requires the plaintiff to establish: "(1) concerted action in the form of a contract, combination, or conspiracy, and (2) an unreasonable restraint of trade." Systemcare, Inc. v. Wang Lab.

---

[51] Our court has held that "HN18[] an MDL transferee court applies the law of the circuit in which it sits." In re: Syngenta AG Mir 162 Corn Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 135658, 2016 WL 5481997, at *1 n.1 (D. Kan. Sept. 29, 2016). Although the Tenth Circuit hasn't addressed this question, our court has explained that this "ruling is consistent with the rule followed by a number of circuit courts that have considered the question." *Id.* (first citing Murphy v. FDIC, 208 F.3d 959, 965-66 (11th Cir. 2000); then citing In re U.S. Dep't of Defense & U.S. EPA Final Rule, 817 F.3d 261, 272 (6th Cir. 2016)); *see also* AER Advisors, Inc. v. Fid. Brokerage Servs., LLC, 921 F.3d 282, 288-89 (1st Cir. 2019) (joining every Circuit that has considered the issue by holding that "the transferee court applies its own Circuit's cases on the meaning of federal law"); In re Takata Airbag Prods. Liab. Litig., 464 F. Supp. 3d 1291, 1300 (S.D. Fla. 2020) ("Questions of federal law in cases transferred under 28 U.S.C. Section 1407 are governed by the clearly settled law of the transferee court's circuit.").

Corp., 117 F.3d 1137, 1139 (10th Cir. 1997) (citing 15 U.S.C. § 1); *see also* Bushnell Corp. v. ITT **[*981]** Corp., 973 F. Supp. 1276, 1285 (D. Kan. 1997) (Lungstrum, J.) (citing 15 U.S.C. § 1).[52] And, to prevail on a monopolization claim, a plaintiff must prove: (1) defendants have "monopoly power in a properly defined relevant market;" and (2) that defendants "willfully acquired or maintained this power by means of anticompetitive conduct." United States v. AMR Corp., 335 F.3d 1109, 1113 (10th Cir. 2003) (citing 15 U.S.C. § 2 (further citation omitted)).

Here, plaintiffs allege two theories to support their conspiracy and monopolization claims under the antitrust laws. *First*, they allege that defendants entered a "reverse payment" settlement that unlawfully delayed generic competition from entering the market and competing against the EpiPen. *Second*, they allege that defendants **[**153]** foreclosed competition by entering unlawful exclusive dealing arrangements in the form of Mylan's rebate agreements with PBMs. Defendants challenge both theories on summary judgment. The court addresses each theory, in turn, below.

1. Generic Delay Theory

Plaintiffs' first antitrust theory asserts that defendants and Teva entered settlement agreements in "tandem" that resolved the EpiPen and Nuvigil patent litigations. Doc. 2169 at 16 (Pretrial Order ¶ 3.a.1.b.). Plaintiffs contend that "[n]either settlement, viewed independently, was economically rational[,]" but "through the tandem EpiPen and Nuvigil settlements, Mylan and Teva guaranteed that they would both profit by limiting competition in their respective monopoly marketplaces rather than compete." *Id.* Plaintiffs assert that the settlements "effectively precluded generic competition for at least 3 years" in the EAI market and "allowed Mylan to raise the EpiPen's price without fear of generic competition and ensured that Pfizer and Mylan would continue to share millions of dollars in unlawful monopoly profits." *Id.*

The Supreme Court has recognized that ***HN20***[] a patent settlement involving a "large [and] unjustified reverse payment" can **[**154]** violate the antitrust laws if its "objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market" because that objective is "the very anticompetitive consequence that underlies the claim of antitrust unlawfulness." FTC v. Actavis, Inc., 570 U.S. 136, 157-58, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013). But here, defendants assert, plaintiffs' antitrust claims premised on a generic delay theory cannot survive summary judgment for four reasons. Defendants say that the undisputed summary judgment facts establish that: (1) the EpiPen settlement never caused any delay in Teva's generic entry; (2) the EpiPen and Nuvigil settlements were independent and lawful settlements; (3) the summary judgment evidence doesn't support a triable issue whether defendants made a "reverse payment"; and (4) both the EpiPen and Nuvigil settlements were procompetitive.

Below, the court addresses all four arguments. Before turning to them, however, the court recognizes that defendants' arguments call on the court to analyze and consider the underlying facts of the EpiPen and Nuvigil patent litigation and eventual settlements. When presented with a **[*982]** similar scenario involving a reverse payment settlement **[**155]** claim, the Eleventh Circuit's Judge Carnes observed the work of "deciding a patent case within an antitrust case about the settlement of the patent case" is something he called "a turducken task."[53] FTC v. Watson Pharms., Inc., 677 F.3d 1298, 1315 (11th Cir. 2012). But, on appeal, the Supreme Court disagreed, finding that "an antitrust action" based on a reverse payment settlement "is likely to prove more feasible

[52] Although plaintiffs assert their antitrust claims under particular state laws, they ask the court to evaluate them "under the same legal standards as Sherman Act Section One (Conspiracy)" and "Sherman Act Section Two (Monopolization)[.]" Doc. 2169 at 43 (Pretrial Order ¶¶ 4.b.3.-4.). Defendants agree for "the purpose of summary judgment." Doc. 2142-1 at 69 n.431. So, consistent with the parties' agreement, the court evaluates plaintiffs' antitrust claims on summary judgment under the legal standards that apply to the Sherman Act.

[53] For those who don't recall John Madden's telestrated explanation on Thanksgiving Day broadcasts of NFL games, a turducken is a deboned chicken stuffed inside a deboned duck, the two then stuffed inside a deboned turkey. The British sometimes replace the turkey with a goose, producing a gooducken. Will Iredale, *Three in One Bird is Big This Christmas*, Times (London), Nov. 21, 2004, https://www.thetimes.co.uk/article/three-in-one-bird-is-big-this-christmas-8569w2jppgg.

administratively than the Eleventh Circuit believed." Actavis, 570 U.S. at 157. **HN21**[] In reverse payment settlement claims, the Supreme Court ruled, "it is normally not necessary to litigate patent validity to answer the antitrust question (unless, perhaps, to determine whether the patent litigation is a sham)." *Id.* (citation omitted). Following that guidance from the Supreme Court, the court now endeavors to decide this question: Does this case's summary judgment facts present a triable question whether defendants violated the antitrust laws by entering into a reverse payment settlement to resolve the EpiPen litigation with Teva?

a. Whether EpiPen Settlement Delayed Teva's Generic Entry

First, defendants argue, plaintiffs' generic delay claims fail because the summary judgment facts present no triable issue of causation. More specifically, **[**156]** defendants contend that no reasonable jury could find or infer from the undisputed summary judgment facts that the EpiPen settlement caused any delay in the entry of Teva's competing generic EAI.

HN22[] The Sherman Act requires an antitrust plaintiff to show that its injury was caused "by reason of" the defendant's anticompetitive conduct. 15 U.S.C. § 15(a); *see also* Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509, 1519 n.12 (10th Cir. 1984) ("Of course, the fact of injury and damages suffered *by reason of a violation of the antitrust laws* must also be shown for a private litigant to recover on a claim of monopolization." (emphasis added)). Thus, "to recover under the antitrust laws[,]" an antitrust plaintiff must "establish that defendant's unlawful conduct caused plaintiff injury in its business or property." Aspen Highlands, 738 F.2d at 1522-23; *see also* Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977) (explaining that an antitrust plaintiff "must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful").

HN23[] An antitrust plaintiff cannot shoulder its burden to prove an antitrust violation if the injury is "attributable to its lack of desire, its limited production capabilities, or to other factors independent of [the alleged] unlawful conduct[.]" Zenith Radio Corp. v. Hazeltine Rsch., Inc., 395 U.S. 100, 126-27, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969). But, at **[**157]** the same time, an antitrust plaintiff need not show that defendant's conduct was the exclusive cause of plaintiff's injury. Id. at 114 n.9 (A "plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury[.]"). Instead, it "is enough that the illegality is shown to be a *material cause* of the injury[.]" *Id.* (emphasis added); *see also* In re **[*983]** Actos End-Payor Antitrust Litig., 848 F.3d 89, 97 (2d Cir. 2017) ("An antitrust plaintiff must show that a defendant's anticompetitive act was a 'material' and 'but-for' cause of plaintiff's injury, although not necessarily the sole cause.").

HN24[] A "material cause" is "often interpreted as proximate cause" of an antitrust violation. In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-md-02503, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *13 (D. Mass. Jan. 25, 2018); *see also* In re Flonase Antitrust Litig., 798 F. Supp. 2d 619, 627 (E.D. Pa. 2011) ("An antitrust violation is a 'material cause' of an injury if it is a proximate cause of that injury." (citation omitted)). "The doctrine of proximate cause in the antitrust context considers whether the alleged injury is too remote to be fairly attributed to the asserted antitrust violation." In re Flonase Antitrust Litig., 798 F. Supp. 2d at 627.

As our Circuit has explained,**HN25**[] an antitrust plaintiff demonstrates "proximate cause" by showing "'there is a causal connection between an antitrust violation and an injury sufficient to establish the violation as a substantial factor in the occurrence **[**158]** of damage.'" Motive Parts Warehouse v. Facet Enters., 774 F.2d 380, 389 (10th Cir. 1985) (quoting Reibert v. Atl. Richfield Co., 471 F.2d 727, 731 (10th Cir. 1973)). But, if "an independent cause fully accounts for the plaintiff's alleged injury[,]" then that intervening, independent cause "breaks the causal connection between the alleged antitrust violation and the plaintiff's injury." In re Flonase Antitrust Litig., 798 F. Supp. 2d at 627 (citation and internal quotation marks omitted). "'Proximate cause and intervening cause are usually issues for the jury to decide.'" Id. at 628 (quoting Wortley v. Camplin, 333 F.3d 284, 295 (1st Cir. 2003)); *see also* In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *13 ("[C]ausation is generally a question best left for the jury to decide.").

Defendants argue that the summary judgment facts here present no triable issue of causation. That is, defendants argue, plaintiffs haven't adduced any evidence from which a jury rationally could find or infer that, but for the Teva/EpiPen settlement, Teva would have launched its generic EAI before June 2015—the date the settlement agreement allowed Teva to launch its generic product. Instead, defendants contend, the undisputed facts establish, as a matter of law, that other, intervening causes prevented Teva from launching its product before the settlement's agreed-to generic entry date. Defendants assert three reasons why this is so: (a) Teva didn't have FDA approval of its generic EAI by that date, (b) Teva **[**159]** had difficulties developing its generic EAI, and (c) other EpiPen patents would have blocked Teva's entry into the market without a settlement. The court considers these three arguments in subsections i, ii, and iii, following.

i. Teva's FDA Approval

First, defendants assert that plaintiffs present no triable issue whether the Teva/EpiPen settlement delayed generic entry because it's undisputed that Teva didn't secure FDA approval to launch its product by the settlement's agreed-to entry date of June 22, 2015. It's undisputed that the Teva/EpiPen settlement agreement granted Teva a license to launch its EAI by June 22, 2015, subject to FDA approval. Doc. 2146-3 at 14-20 (Defs.' Ex. 136). Also, the summary judgment facts establish that Teva didn't secure FDA approval for its generic until August 2018—more than three years after the settlement's agreed-to generic entry date. Doc. 2147-5 at 2, 6 (Defs.' Ex. 160). So, defendants argue, the FDA's independent action **[*984]** of withholding approval of Teva's generic until 2018 was an intervening and independent cause that breaks any causal chain between the EpiPen settlement and Teva's generic entry.

For support, defendants cite the summary judgment **[**160]** facts showing that the FDA repeatedly expressed concerns about Teva's generic EAI by sending Teva deficiency letters. In one letter, dated May 17, 2011, the FDA told Teva that it must conduct a human factors study and the same letter recommended Teva submit a draft of its test protocol before implementing the study so that the FDA could review and provide feedback. Doc. 2145-5 at 2-3 (Defs.' Ex. 116). In January 2012, Teva sent its draft protocol and requested feedback within one month of the letter's date so that it could proceed with the study. Doc. 2146-12 at 2 (Defs.' Ex. 145). More than a year and a half later, the FDA still never had provided Teva any feedback, as requested. Doc. 2146-13 at 2 (Defs.' Ex. 146); Doc. 2146-14 at 1-2 (Defs.' Ex. 147). So, on August 29, 2013, Teva, without any feedback from the FDA on Teva's draft protocol, submitted its first human factors study to the FDA—in response to the deficiency letter the FDA had sent Teva on May 17, 2011. Doc. 2146-11 (Defs.' Ex. 144). And, in 2014, Teva completed a new human factors study. Doc. 2146-16 at 2 (Defs.' Ex. 149). Then, on February 23, 2016, the FDA issued a complete response letter denying Teva's ANDA application **[**161]** and citing "MAJOR" deficiencies with Teva's generic EAI, including, among other things, deficiencies with the human factors study. Doc. 2147-3 at 7, 11 (Defs.' Ex. 158). Teva never re-performed its human factors study. Doc. 2191-3 at 7-8 (Pls.' Ex. 25) (Peck Rebuttal Expert Report ¶ 14). But then, in August 2018, the FDA changed its position telling Teva that it had found the 2014 Teva human factors study adequate—the same study it had rejected in the 2016 complete response letter. Doc. 2147-4 at 2-3 (Defs.' Ex. 159). And, the very next day, the FDA approved Teva's ANDA. Doc. 2147-5 at 2 (Defs.' Ex. 160).

Defendants assert that these independent actions taken by the FDA—*i.e.*, first rejecting Teva's ANDA and then granting approval of its generic product in August 2018—qualify as intervening causes that "'cut[] off' the 'requisite chain of causation' and doom Plaintiffs' generic delay claims." Doc. 2142-1 at 72 (quoting *In re Wellbutrin XL Antitrust Litig., 133 F. Supp. 3d 734, 768 (E.D. Pa. 2015)*).

Plaintiffs disagree. Plaintiffs assert that, but for the EpiPen settlement, Teva would have entered the EAI market in either March 2014 or January 2015—months before the settlement's agreed-to licensing date. Doc. 2169 at 16, 55 (Pretrial Order ¶¶ 3.a.1.b., 5.a.B.). **[**162]** And, they cite several summary judgment facts from which, they contend, a reasonable jury could find that defendants' actions—through an allegedly unlawful reverse payment settlement with Teva—were the "but for" cause of Teva's delay in securing FDA approval of its generic, thereby resulting in an approval date beyond the settlement's agreed-to launch date of June 2015.

First, plaintiffs cite Teva's internal documents from late 2011 and early 2012 showing that it projected that it would launch its generic EAI by 2014. Doc. 2203-20 at 5 (Pls.' Ex. 317); Doc. 2203-21 at 3-5 (Pls.' Ex. 318). Defendants respond that these internal projections are nothing more than predictions made before Teva encountered various development issues with its product. So, defendant argue, plaintiffs can't rely on this evidence to avoid summary judgment because it's just speculative. *See* *Pioneer Ctrs. Holding Co. Emp. Stock Ownership Plan & Tr. v. Alerus Fin., N.A., 858 F.3d 1324, 1334 (10th Cir. 2017)* (explaining that, ***HN26***[] to avoid summary judgment, **[*985]** the non-moving party must adduce evidence that is "based on more than mere speculation, conjecture, or surmise" (citation and internal quotation marks omitted)). If these internal projections were the only evidence plaintiffs adduced to show that Teva could have launched its generic **[**163]** EAI on an earlier date, the court might side with defendants' argument. But, there's far more than just these projections.

Second, plaintiffs offer the analysis of their expert, Dr. Carl Peck, who reviewed Teva's communications with the FDA. Dr. Peck opines that Teva slowed its responsiveness to the FDA's requests during "the 2011-2014 time frame by not pursuing its application aggressively or responding to the FDA[.]" Doc. 2191-7 at 25 (Pls.' Ex. 30) (Peck Expert Report ¶ 56(c)). Based on his analysis of the communications, Dr. Peck concludes that "it is reasonable to expect that the FDA would have completed its review and approval of Teva's EAI application by 2014 . . . if not earlier—had Teva been responsive to the FDA's requests in prosecuting its application." *Id.* at 10 (P 21). Importantly, plaintiffs assert, the 2011-14 time period corresponds with the time when Pfizer and Teva commenced settlement negotiations and eventually agreed to resolve the EpiPen litigation through an agreement that, among other terms, granted Teva a license to launch its EAI by June 22, 2015. *See* Doc. 2146-3 at 14-20 (Defs.' Ex. 136) (binding term sheet executed on April 26, 2012); *see also id.* at 2-29 **[**164]** (final Settlement and License Agreement executed on July 20, 2012).

Indeed, the summary judgment facts establish that Teva initially responded to the FDA's requests for information within a few weeks or months. *See* 2203-7 at 2 (Pls.' Ex. 299) (Teva's May 22, 2009 response to FDA's May 1, 2009 deficiency letter); Doc. 2203-10 at 2 (Pls.' Ex. 302) (Teva's September 8, 2009 ANDA amendment responding to FDA's July 6, 2009 deficiency letter). But then, during the 2011-14 time frame, Teva took noticeably longer to respond to the FDA's requests. *See* Doc. 2203-13 at 2 (Pls.' Ex. 309) (Teva's July 31, 2013 letter responding more than three years later to FDA's March 29, 2010 deficiency letter); Doc. 2203-18 at 2 (Pls.' Ex. 314) (Teva's August 1, 2014 letter responding more than three years later to FDA's February 2, 2011 deficiency letter); Doc. 2146-19 at 2 (Defs.' Ex. 152) (Teva's December 30, 2014 amended ANDA submitted in response to the FDA's deficiency letter sent more than four years earlier on March, 2, 2010).

Plaintiffs argue that it's wrong for defendants to focus on the FDA's initial rejection and later acceptance of Teva's human factors study as an intervening cause that breaks the **[**165]** causal chain. As discussed, Teva submitted its first human factors study more than two years after the FDA had requested it. Doc. 2146-11 at 2-5 (Defs.' Ex. 144) (Teva's August 29, 2013 response to the FDA's May 17, 2011 deficiency letter). Defendants argue Teva was waiting to submit the study until after the FDA provided feedback on its draft protocol, and when Teva still hadn't received that feedback by August 2013, it submitted the human factors study anyway. Then, the FDA rejected the human factors study in 2016, but later accepted the same study in 2018 when it approved Teva's ANDA. But, as defendants concede, it wasn't just the deficient human factors study that the FDA identified in its February 23, 2016 denial of Teva's ANDA application as a deficiency with Teva's proposed generic EAI. The letter also identified "MAJOR" deficiencies with product quality, bioequivalence, microbiology, and labeling. Doc. 2147-3 at 11 (Defs.' Ex. 158). Plaintiffs argue, it wasn't until Teva cured those other deficiencies by 2018 that the FDA approved Teva's ANDA. As Dr. Peck opines, **[*986]** "Teva submitted an application that had a sufficient HFS in 2013 and 2014" but "the ANDA ultimately was not approved **[**166]** until 2018 because further review on other parts of the applications was required based on Teva's other submissions." Doc. 2191-3 at 9 (Pls.' Ex. 25) (Peck Rebuttal Expert Report ¶ 16).

Plaintiffs argue that a reasonable jury could find or infer from the summary judgment facts that Teva did not act diligently in responding to each of the deficiencies that the FDA identified which, in turn, delayed FDA approval until 2018. The court agrees. Ultimately, a jury might accredit defendants' position that the FDA's actions were an intervening cause that cuts off the causal chain between the EpiPen settlement and Teva's delayed generic entry.

But the court cannot find that the summary judgment facts require that finding as a matter of law. Instead, a reasonable jury also could find or infer from Teva's fluctuating responsiveness to the FDA's requests—and Dr. Peck's opinion that its responsiveness slowed between 2011-14, thereby delaying FDA approval—that the EpiPen settlement delayed Teva's efforts to secure FDA approval, which, in turn, delayed its launch of a generic EAI to compete with EpiPen.

Third, plaintiffs argue that a jury could infer that the EpiPen settlement delayed Teva's generic **[**167]** entry based on Dr. Peck's analysis comparing the "9 years and 9 months" it took Teva to secure FDA approval to the time it took other EAIs to achieve FDA approval. Doc. 2191-7 at 26-27 (Pls.' Ex. 30) (Peck Expert Report ¶ 58 & Table 2) (concluding that "none [of the other EAIs] have required the lengthy time for review and approval exhibited by the Teva generic EAI" but instead "most were approved in 2-3 years, while the longest review and approval time was 6.5 years from initial filing"). Also, Dr. Peck's analysis shows that Teva's approval time for its generic exceeded the approval times for other auto-injector products and other Teva injectable products. *See id.* at 27-28 (P 59 & Table 3) (concluding that approval time for other auto-injector products has ranged from six months to 69 months); *see also id.* at 29 (P 60 & Table 4) (concluding that other Teva injectable products "on average . . . were approved in under 30 months"). The court recognizes that defendants dispute that these other products are proper comparisons to the Teva generic. At trial, defendants can cross-examine Dr. Peck and attack his opinions with contrary evidence. And, in the end, the trier of fact might not **[**168]** find Dr. Peck's analysis credible or germane to the causation analysis. But, the court can't make that finding on summary judgment.

Fourth, plaintiffs assert that a reasonable jury could infer from the summary judgment facts that Teva knew the EpiPen settlement did not permit it to enter the market for more than three years after Teva had settled the litigation in 2012, which, in turn, reduced Teva's incentive to continue pursuing the ANDA actively. Defendants assert that—after the settlement—the ball was in Teva's court to secure FDA approval. And, to the extent Teva delayed its FDA approval efforts, defendants can't be held responsible for it. Also, defendants argue, it wasn't foreseeable to them that the EpiPen settlement would delay Teva's FDA approval until 2018. Again, a reasonable jury might agree with defendants' assessment of the summary judgment facts here. But, an equally reasonable jury might conclude that defendants' actions—by settling the EpiPen litigation and agreeing to a 2015 generic entry date—caused Teva to slow its efforts to secure FDA approval during the 2011-14 time frame which, in turn, delayed the FDA's approval until 2018. So, the court cannot find—as a matter **[**169]** of law—that either the FDA's actions or Teva's efforts to **[*987]** secure FDA approval serve as an intervening or unforeseeable cause that breaks the requisite chain of causation. *See In re Flonase Antitrust Litig., 798 F. Supp. 2d 619, 628 (E.D. Pa. 2011)* ("***HN27***[] Whether conduct constitutes intervening conduct that breaks the chain of causation and whether intervening conduct is a foreseeable consequence of a defendant's actions are questions of fact to be submitted to the jury" (citing *Marshall v. Mintz, 386 F.2d 415, 416 (5th Cir. 1967)*).

Last, plaintiffs contend that a reasonable jury could find that Mylan submitted a sham Citizen Petition to the FDA and such a jury also could infer that the sham Citizen Petition delayed Teva's FDA approval.[54] Defendants disagree. They contend that the filing of the Citizen Petition can't subject them to antitrust liability under the *Noerr-Pennington* doctrine. ***HN28***[] The *Noerr-Pennington* doctrine "exempts from antitrust liability any legitimate use of

[54] Defendants argue that plaintiffs' assertions about the Citizen Petition have no connection to the EpiPen settlement which, under plaintiffs' theory, produced the generic delay. Doc. 2142-1 at 74 n.438. So, defendants argue, the Citizen Petitions can't present a triable issue whether the settlement delayed generic entry. *Id.* But, defendants ignore that plaintiffs have alleged that defendants engaged in a "scheme . . . to stifle all generic competition in the EAI market." Doc. 2169 at 15 (Pretrial Order P 3.a.1.b.). And, they allege that defendants' scheme included both (1) entering unlawful reverse payment settlements, and (2) "filing a baseless Citizen Petition and a supplement mere weeks before the entry date agreed upon in the settlement." *Id.* at 15-17 (Pretrial Order ¶ 3.a.1.b.). Also, plaintiffs assert their argument about the Citizen Petition in response to defendants' contention that the FDA's actions constitute an intervening and independent cause of the generic delay cutting off any causal connection between the EpiPen settlement and the delayed generic entry. As discussed in the above-section, plaintiffs present a triable issue whether the Citizen Petition delayed Teva's FDA approval. So, because a reasonable jury could find from the summary judgment facts that defendants' actions caused delay in the FDA's approval, the court can't find as a matter of law that the FDA's approval—which didn't come until 2018—was an *independent* and intervening cause of the generic delay.

the political process by private individuals, even if their intent is to eliminate competition." Tal v. Hogan, 453 F.3d 1244, 1259 (10th Cir. 2006) (citation and internal quotations marks omitted). But *Noerr-Pennington* immunity does not apply to "sham" activities. Pro. Real Est. Invs., Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993). Petitioning the government is a "sham" activity if: (1) it is "objectively baseless in the sense that no reasonable litigant could **[**170]** realistically expect success on the merits[,]" and (2) it "use[s] the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon." *Id.* (citations and internal quotation marks omitted).

Defendants assert that the Citizen Petition wasn't objectively baseless because it suggested the FDA should require Teva to perform a human factors study—something that the FDA also required of Teva. *Compare* Doc. 2146-21 at 4 (Defs.' Ex. 154) (Mylan's Citizen Petition asking the FDA to require "at a minimum, very carefully designed human factors studies that would demonstrate the Teva product's safety and effectiveness and its comparability to the EpiPen® auto-injector"), *with* Doc. 2145-5 at 3 (Defs.' Ex. 116) (FDA letter to Teva asking it to "conduct a design validation (human factors) study"). But, plaintiffs argue, a reasonable jury could disagree with that conclusion because the FDA denied Mylan's Citizen Petition "without comment[.]" Doc. 2147-2 at 2 (Defs.' Ex. 157). Also, plaintiffs argue, a rational trier of fact could find or infer that the Mylan's Citizen Petition was objectively baseless because, as Dr. Peck opines, it **[*988]** "contained no new information **[**171]** for the FDA to consider" and didn't "raise novel concerns[.]" Doc. 2191-3 at 21 (Pls.' Ex. 25) (Peck Rebuttal Expert Report ¶ 44). Instead, Dr. Peck opines, the Citizen Petition "simply reiterated the same issues identified by the FDA in its responses to the King and Dey [Citizen Petitions] in 2009 and 2010, respectively." *Id.* Dr. Peck further opines that the Citizen Petition was one of several "inappropriate" actions taken by defendants that "occupied a great deal of time at the FDA[.]" Doc. 2191-7 at 34 (Pls.' Ex. 30) (Peck Expert Report ¶ 71). And, he describes the filing of the Citizen Petition as an "anticompetitive tactic[ ]" that "burden[ed] the agency, if not also delay[ed] approval." *Id.* (Peck Expert Report ¶ 72). Plaintiffs also assert that a reasonable jury could infer from the timing of the Citizen Petition that defendants intended for it to delay generic approval because Mylan submitted the Citizen Petition to the FDA on January 6, 2015, just six months before Teva was permitted to enter the EAI market under the EpiPen settlement agreement. The court agrees that these summary judgment facts together present a triable issue whether the Citizen Petition was objectively baseless, **[**172]** and thus a sham activity.[55]

Defendants also argue that the summary judgment facts establish that the Citizen Petition caused no delay in Teva's application. For support, they cite the FDA's Report to Congress for fiscal year 2018, arguing that it confirms that Mylan's Citizen Petition caused no delay in the FDA's approval of the Teva generic. The FDA's 2018 Report states, "No approvals for ANDAs . . . were delayed because of a [Citizen Petition] in this reporting period." Report to Congress: 11th Annual Report on Delays in Approvals of Applications Related to Citizen Petitions and Petitions for Stay of Agency Action for Fiscal Year 2018, at 1 (Feb. 11, 2020), available at https://www.fda.gov/media/135628/download. As discussed in the court's contemporaneously-filed Order ruling defendants' Motion to Exclude the Testimony and Report of Dr. Peck, the FDA's Report isn't clear whether this statement means no FDA approvals in 2018 (which would include the approval of Teva's generic EAI) were delayed because of a Citizen Petition, or whether it means that no Citizen Petitions filed in 2018 (which wouldn't include the

---

[55] Defendants assert that, because the Citizen Petition's contents are undisputed, the question whether the Citizen Petition is objectively baseless is a question of law for the court to decide. Doc. 2226-1 at 26 & n.50. The court disagrees. **HN29**[] The question "[w]hether petitioning activity is a sham is generally [one] for the jury." In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., 64 F. Supp. 3d 665, 689 (E.D. Pa. 2014) (citing In re Flonase Antitrust Litig., 795 F. Supp. 2d 300, 310 (E.D. Pa. 2011)); *see also* Catch Curve, Inc. v. Venali, Inc., 519 F. Supp. 2d 1028, 1037 (C.D. Cal. 2007) ("'[W]hether something is a genuine effort to influence governmental action, or a mere sham, is a question of fact.'" (quoting Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, Inc., 690 F.2d 1240, 1253 (9th Cir. 1982)). A court can rule the objectively baseless question as a matter of law where "there is no dispute over the predicate facts of the underlying . . . proceeding[.]" Pro. Real Est. Invs., Inc., 508 U.S. at 63. But, here, there is a dispute about the predicate facts of the underlying proceeding—namely, whether Mylan's Citizen Petition raised issues that the FDA already had received and rejected in other Citizen Petitions, whether it occupied the FDA's time thus delaying the approval process, and whether the timing of the filing in January 2015 supports a finding or inference that defendants submitted the Citizen Petition as a way to delay Teva's generic entry as the settlement's agreed-to entry date approached. The court can't make that determination as a matter of law on these facts. It's a jury question.

2015 Citizen Petition) delayed any FDA approval. Thus, the court **[**173]** can't find, as a matter of law, that the Report conclusively establishes that Mylan's Citizen **[*989]** Petition never delayed the FDA's approval of the Teva generic.

Also, defendants argue that no reasonable jury could find that the Citizen Petition delayed FDA approval when the FDA denied the Petition "without comment" in June 2015, Doc. 2147-2 at 2 (Defs.' Ex. 157), but then didn't approve the Teva generic until 2018. A reasonable jury might adopt the inference that this argument presupposes. But, a reasonable jury also might find Dr. Peck's opinions credible and agree with his conclusions that the Citizen Petition took time and resources from the FDA, thus burdening the agency and likely delaying approval. So, the court agrees with plaintiffs. Genuine issues of fact exist whether the filing of the Citizen Petition delayed Teva's FDA approval.

In sum, the court finds that plaintiffs have adduced sufficient evidence from which a reasonable jury could conclude that the EpiPen settlement delayed generic entry by slowing Teva's efforts to secure FDA approval before the settlement's agreed-to entry date of June 22, 2015. And, from those facts, a reasonable jury also could conclude that the FDA's **[**174]** actions in refusing to approve the Teva generic until 2018 aren't an intervening cause breaking the requisite chain of causation between the EpiPen settlement and delayed generic entry. *See* *In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d 231, 287-89 (D. Mass. 2014)*, *aff'd* 842 F.3d 34 (1st Cir. 2016) (denying summary judgment motion on causation grounds based on the argument that a pharmaceutical company's failure to achieve FDA approval for its generic was "the sole and direct cause of [the] failure to enter the generic Nexium market" because plaintiffs "marshaled sufficient evidence in the record to demonstrate genuine and material factual disputes" allowing "a reasonable juror to conclude that [pharmaceutical company] was well on its way to obtaining tentative approval" of its generic product but "since slowed its progress in response to the terms of its settlement"). *Cf.* *In re Flonase Antitrust Litig., 798 F. Supp. 2d at 629-33* (denying summary judgment against antitrust claims because, among other things, plaintiffs presented sufficient evidence to raise genuine issues of material fact whether the FDA's deficiency notices sent to a potential competing generic were "indeed proximately caused by, or was the foreseeable consequences of, [defendant's] alleged antitrust violations[,]" and thus not "an intervening cause of [the] delayed entry **[**175]** into the market that severs the causal chain beginning with [defendant's] conduct"). So, the court finds here that the summary judgment facts don't permit the court to conclude—as a matter of law—that Teva's failure to secure FDA approval until 2018 was an intervening cause breaking the chain of causation and warranting summary judgment against plaintiffs' antitrust claims premised on their generic delay theory.

ii. Teva's Challenges Developing the Product

Next, defendants assert that the summary judgment facts establish that Teva faced continuous setbacks in its efforts to develop its generic EAI. And, defendants argue, these development issues were another independent and intervening cause of the generic's delay that breaks any chain of causation linking the EpiPen settlement and any delayed generic entry.

For support, defendants rely on summary judgment facts showing that shortly after the settlement—in 2013—Teva discovered that its device had a tendency to fire when dropped but didn't indicate to end users that the device already had dispensed the epinephrine. Doc. 2146-15 at 2 (Defs.' Ex. 148). So, Teva had to redesign its device to correct the problem. *Id.* After **[*990]** making these changes, **[**176]** on December 30, 2014, Teva submitted an amended ANDA to the FDA that one Teva executive described as "basically . . . a completely new ANDA[.]" Doc. 2146-18 at 2 (Defs.' Ex. 151). Teva's submission explained that, among other changes, Teva had "changed the site of the drug product manufacture/testing . . . and device assembly[,]" "changed the formulation" of epinephrine, and "changed the device to improve the design to ensure the user will not be presented with a device that has delivered the drug product but has not engaged the safety guard." Doc. 2146-19 at 2 (Defs.' Ex. 152). After submitting the amended ANDA in December 2014, the agreed entry date of June 22, 2015 passed without the FDA acting on Teva's application. Then, in February 23, 2016, the FDA issued a complete response letter explaining that it couldn't approve Teva's ANDA application "in its present form" and citing "MAJOR" deficiencies with Teva's generic device. Doc. 2147-3 at 2, 11 (Defs.' Ex. 158). It took two and a half more years for Teva to correct those problems and finally achieve FDA approval in August 2018. Doc. 2147-4 at 2-3 (Defs.' Ex. 159). Defendants assert that these summary judgment facts establish that **[**177]** Teva's product development issues were the intervening cause of the failure to secure FDA approval until 2018. And thus, defendants contend, no causal connection exists between the EpiPen settlement and any delayed generic entry by Teva.

Plaintiffs disagree. Plaintiffs argue that a reasonable jury could infer from the summary judgment facts that the EpiPen settlement caused Teva to slow its efforts to develop its EAI product and correct product development issues which, in turn, produced a delay in Teva achieving FDA approval. Plaintiffs assert that a jury could infer that Teva—which, as defendants' expert testified, is a large, sophisticated pharmaceutical company "skilled in the art" of drug development—had the resources to develop its product much faster than it did. Doc. 2203-6 at 3-4 (Pls.' Ex. 298) (Weisman Dep. 42:24-45:6). Instead, plaintiffs argue, Teva internal documents support a finding or inference that the company didn't make the development of its product a priority during the 2011-13 time frame. Plaintiffs assert that Teva's development meetings were sparsely attended by team members. *See* Doc. 2204-6 at 2 (Pls.' Ex. 329) (May 1, 2012 meeting attended by three out of **[**178]** 18 team members); Doc. 2204-8 at 2 (Pls.' Ex. 331) (June 12, 2012 meeting attended by two out of 16 team members); Doc. 2204-14 at 2 (Pls.' Ex. 337) (November 13, 2012 meeting attended by four out of 16 team members); Doc. 2204-16 at 2 (Pls' Ex. 339) (January 9, 2013 meeting attended by 3 out of 16 team members). Also, plaintiffs argue, the meeting minutes show that Teva failed to take any action on a needle separation issue for at least seven months. *Compare* Doc. 2204-17 at 4 (Pls.' Ex. 340) (April 2012 minutes noting needle separation issue), *with* Doc. 2204-18 at 4 (Pls.' Ex. 341) (November 2012 meeting listing the issue still outstanding). Also, the minutes show that Teva failed to update its quality agreement with the device's manufacturer for two years. *Compare* Doc. 2204-19 at 5 (Pls.' Ex. 342) (March 2011 minutes describing efforts to update to the agreement), *with* Doc. 2204-20 at 5 (Pls.' Ex. 343) (April 2013 minutes showing that agreement updates still in process). But then, in May 2014, with about a year left before the June 2015 agreed-to entry date approached, Teva implemented a "Tiger Team" to work on its generic EAI and began allocating more resources to the project with **[**179]** additional employees. Doc. 2205-1 at 7 (Pls.' Ex. 344); Doc. 2205-2 at 2-3 (Pls.' Ex. 345); Doc. 2205-4 at 4, 7 (Pls.' Ex. 347). Plaintiffs assert that a reasonable jury could infer from these facts that Teva procrastinated in its effort to secure FDA **[*991]** approval until the settlement's agreed-upon date grew nearer. And, plaintiffs argue, a reasonable jury could find or infer that the EpiPen settlement caused that procrastination which, in turn, prevented Teva from securing FDA approval at an earlier date.

The court agrees with plaintiffs. A reasonable jury could infer from these facts that the EpiPen settlement caused Teva to delay its efforts to develop its product and that these delays were a foreseeable consequence of defendants entering a settlement agreement in 2012 that required Teva to wait until 2015 to launch its generic product. Equally, a jury might reach the opposite conclusion. As defendants argue, Teva's actions developing its product were entirely within Teva's control and defendants played no role in Teva's product development. So, a jury might conclude that any delay in the FDA approval process falls squarely on Teva, making Teva's actions (or inactions) an intervening **[**180]** cause that breaks the causal chain between defendants' settlement of the EpiPen litigation and Teva's generic entry date. But, on these summary judgment facts, the court can't make that finding as a matter of law. So, the court rejects defendants' argument that Teva's failure to develop its product was an intervening cause that precludes a finding that the EpiPen settlement caused Teva's delayed generic entry.

iii. Blocking By Other EpiPen Patents

Last, defendants argue—even if Teva had solved its product development issues and secured FDA approval before June 2015—Pfizer's other EpiPen patents provide another independent and intervening cause precluding a finding of causation between the EpiPen settlement and any delayed generic entry. Defendants contend that these EpiPen patents would have blocked Teva's launch of a generic product in the "but for" world where there was no settlement. Defendants correctly assert that "to withstand summary judgment," plaintiffs "must point to evidence affirmatively showing that [Teva] could have launched" its generic. *In re Wellbutrin XL Antitrust Litig. Indirect Purchaser Class, 868 F.3d 132, 166 (3d Cir. 2017)*. "It is not enough" to show that Teva "wanted to launch its drug[.]" *Id. at 165*. ***HN30***[] Plaintiffs "must also show that the launch would have been legal" **[**181]** because "if the launch were stopped because it was illegal, then the [antitrust] injury (if it could still be called that) would be caused not by the settlement but by the patent laws prohibiting the launch." *Id.*; *see also* *In re Namenda Indirect Purchaser Antitrust Litig., No. 1:15-cv-6549 (CM) (RWL), 2021 U.S. Dist. LEXIS 110081, 2021 WL 2403727, at *26 (S.D.N.Y. June 11, 2021)* (explaining if generic drug manufacturer "had won the [patent] challenge, it could have launched its version of generic Namenda IR earlier than when generics launched in the real world[,]" but if the generic manufacturer "lost the patent challenge, then the date of its generic entry in the but-for world would have been the same as in the real world" which "mean[s] that [defendant's] actions did not depress competition").

It's undisputed that Pfizer owns four patents covering EpiPen devices that expire in 2025. Doc. 2169 at 4 (Pretrial Order ¶ 2.a.27.). Only two of those patents—the '012 and '432 Patents—were at issue in the Teva/EpiPen litigation. First Amended Complaint, *King Pharms., Inc. v. Teva Parenteral Meds., Inc.*, No. 1:09-cv-00652-GMS (D. Del. Nov. 11, 2010), ECF No. 37-1. Neither one of the other two patents—the '827 Patent nor the '035 Patent—was in dispute in the Teva/EpiPen litigation. Days 1-4 of Trial Transcript, *King Pharms., Inc. v. Teva Parenteral Meds., Inc.*, No. 1:09-cv-00652-GMS **[**182]** (D. Del. July 25, 2012), ECF Nos. 150-51, 153-54. But, with the EpiPen settlement, Teva secured a license to all issued patents and a covenant **[*992]** not to sue based on any current or future patents covering EpiPen devices (which would include the '035 and '827 Patents). Doc. 2146-3 at 3, 14-16 (Defs.' Ex. 136).

Defendants argue that, in a "but for" world with no settlement, Teva would have had to overcome the '827 and '035 Patents to launch its generic product. And, defendants assert, plaintiffs offer no evidence showing that Teva could have launched its generic product without infringing the blocking patents—the '827 and '035 Patents—had Teva not settled the EpiPen litigation. So, defendants contend, the summary judgment facts establish that the blocking patents are an independent and intervening cause of any alleged generic delay.

Plaintiffs respond with their own "but for" scenario. Plaintiffs argue that defendants' "but for" world wrongly assumes continued litigation instead of settlement. But, in plaintiffs' "but for" world, defendants and Teva would have settled the EpiPen litigation independently from the Nuvigil litigation and without joint delayed entry dates for both drug products. Plaintiffs support this theory with the opinion **[**183]** of their expert, Prof. Einer Elhauge. He opines that, had the parties not traded the EpiPen settlement for the Nuvigil settlement, the economically rational "but for" settlement of the EpiPen litigation would have allowed a March 14, 2014 entry date for Teva's generic EAI. Doc. 2192-6 at 9-10 (Pls.' Ex. 55) (Elhauge Reply Expert Report ¶ 3). And, plaintiffs assert, a reasonable jury could infer that the economically rational "but for" settlement would have granted Teva a covenant not to sue based on any current or future EpiPen patents—like the actual agreement did. So, plaintiffs contend, Teva could have launched its generic EAI in this "but for" world without infringing the blocking patents.

Defendants' Reply argues that the summary judgment record contains no evidence suggesting that the parties considered or even discussed an alternative generic entry date. And, defendants argue, Prof. Elhauge's opinion offers only speculation, which isn't evidence sufficient to preclude summary judgment. Doc. 2226-1 at 26 n.53 (quoting *Eisai, Inc. v. Sanofi Aventis U.S., LLC, 821 F.3d 394, 407 (3d Cir. 2016)* (concluding that Prof. Elhauge's "assumption cannot serve as a substitute for actual evidence at the summary judgment stage")). The court disagrees with defendants' **[**184]** proposition.

As the court has explained in its contemporaneously-filed Order denying defendants' Motion to Exclude the Testimony and Report of Prof. Elhauge, it finds Prof. Elhauge's reverse payment analysis sufficiently reliable and scientifically sound to qualify for admission as evidence. Prof. Elhauge has provided a rational basis for his analysis's assumptions based on his review of documentary and economic evidence. And, consistent with other courts who have considered Prof. Elhauge's proffered expert testimony in pay-for-delay cases, the court finds Prof. Elhauge's analysis qualifies as admissible expert opinion. *See, e.g.,* *In re Namenda Direct Purchaser Antitrust Litig., 331 F. Supp. 3d 152, 174 (S.D.N.Y. 2018)* (rejecting defendants' arguments that Prof. Elhauge's reverse payment opinions "are speculative, internally inconsistent, and contradicted by the evidence" because those challenges were "appropriate subjects for cross-examination"); *In re Androgel Antitrust Litig. (No. II), No. 1:09-MD-2084-TWT, 2018 U.S. Dist. LEXIS 99716, 2018 WL 2984873, at *17 (N.D. Ga. June 14, 2018)* (holding that any "criticism" defendants had about Prof. Elhauge's "methodologies or conclusions are best handled through cross-examination and the production of contrary evidence"); *United Food & Com. Workers Loc. 1776 & Participating **[*993]** Emp'rs Health & Welfare Fund v. Teikoku Pharma USA, 296 F. Supp. 3d 1142, 1186-88 (N.D. Cal. 2017)* (denying motion to exclude Prof. Elhauge's reverse payment opinions after finding that **[**185]** "both the components of his model (estimating parties' bargaining strengths and expectations of patent strength) and the assumptions that go with it (the parties' own pre-settlement forecasts) are consistent with accepted economic theory and well-established principles").

Defendants' attacks calling his analysis speculative are arguments that go to the credibility of Prof. Elhauge's opinion. On summary judgment, the court can't make this credibility determination or weigh Prof. Elhauge's opinion against other summary judgment facts. Instead, the court must consider the evidence in the light most favorable to plaintiffs, as the non-moving party. So, the court finds, Prof. Elhauge's opinion presents a triable issue of fact whether—in a "but for" world—Teva could have launched its generic product before the agreed-to generic entry date and without infringing the blocking patents (the '827 and '035 Patents). Thus, the court can't find—as a matter of law—that the blocking patents are an independent and intervening cause of any alleged generic delay that warrants summary judgment against plaintiffs' antitrust claims premised on a generic delay theory.

b. Independence of the EpiPen and Nuvigil Settlements

[**186] *Second*, defendants argue that plaintiffs' generic delay claims can't survive summary judgment because the undisputed summary judgment facts establish the EpiPen and Nuvigil settlements were independent and lawful settlements. Thus, defendants contend, the summary judgment facts present no triable issue whether defendants violated the antitrust laws by entering an unlawful pay-for-delay settlement agreement.

Defendants' argument here is two-fold. Defendants' first argument asserts that plaintiffs' antitrust claims are premised on a novel theory alleging that defendants traded the EpiPen settlement (with an agreed-to June 2015 date for Teva's generic EAI to enter the market) in exchange for the Nuvigil settlement (with an agreed 2016 date for Mylan to launch its generic Nuvigil product). It's undisputed that the EpiPen settlement agreement contained no monetary payment. Doc. 2146-3 at 3, 14-15 (Defs.' Ex. 136). Defendants argue, such an agreement is presumptively lawful under *FTC v. Actavis*. *570 U.S. 136, 158, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)* (explaining that the *Actavis* holding "does not prevent litigating parties from settling their lawsuit" because they may "settle in other ways, for example, by allowing the generic manufacturer to **[**187]** enter the patentee's market prior to the patent's expiration, without the patentee paying the challenger to stay out prior to that point").

But, plaintiffs respond by citing cases where courts have held that pay-for-delay settlements don't require a monetary payment in the actual settlement agreement when other evidence suggests that the parties to the litigation exchanged some form of consideration in separate, side agreements. *See, e.g., In re Lipitor Antitrust Litig., 868 F.3d 231, 258 (3d Cir. 2017)* (holding that settlement agreement was "properly subject to antitrust scrutiny" where plaintiffs alleged plausibly that, while pharmaceutical company Ranbaxy gave Pfizer $1 million, Pfizer's agreement to release its claims involving the drug Accupril was made "[i]n exchange for Ranbaxy's agreement to delay its launch of" another drug product, Lipitor, and "not in exchange for the $1 million" (internal quotation marks omitted)); *In re Namenda Direct Purchaser Antitrust Litig., 331 F. Supp. 3d 152, 198-99 (S.D.N.Y. 2018)* (finding genuine issue of **[*994]** fact existed whether an amendment to agreement involving the drug Lexapro was a "side-deal" and part of an agreement to settle the parties' patent dispute over separate drug Namenda); *In re Androgel Antitrust Litig. (No. II), No. 1:09-MD-2084-TWT, 2018 U.S. Dist. LEXIS 99716, 2018 WL 2984873, at *4, 10 (N.D. Ga. June 14, 2018)* (concluding that, where pharmaceutical companies entered **[**188]** settlement agreements to resolve patent infringement claims and, on the same day, also entered business promotion agreements with profit sharing provisions, plaintiffs' generic delay claims survived summary judgment because plaintiffs had offered "significant evidence from the negotiation of the [patent litigation] settlements to suggest that the services [contracted for in the business promotion agreements] were merely an afterthought to the Defendants, the proverbial lipstick on the pig that was the delay in generic entry[,]" and plaintiffs' experts would "testify that the side agreements did not make much business sense on their own"); *In re Opana ER Antitrust Litig., 162 F. Supp. 3d 704, 718 (N.D. Ill. 2016)* (rejecting defendants' attempt "to assess the components of the [patent litigation] settlement in piecemeal fashion" and instead finding that plaintiffs plausibly had alleged "when taken as a whole, the total payment" received under several, different agreements was "large and unjustified" and thus pleaded a plausible generic delay claim); [King Drug Co. of Florence, Inc. v. Cephalon, Inc., 88 F. Supp. 3d 402, 408-09, 418 (E.D. Pa. 2015)] (finding that the court should consider "the entirety of the reverse payment" made under multiple agreements between the settling parties and concluding that plaintiffs had "presented sufficient evidence to create **[**189]** a genuine dispute . . . whether the reverse payments exceeded litigation costs and were large enough to induce the Generic Defendants to drop their patent challenge and stay off of the market"); [In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 752 (E.D. Pa. 2014)] (declining defendants' invitation to "examin[e] each of the three settlement agreements in isolation" and, instead, concluding "the Licensing Agreement must be read in conjunction with the Co-Promotion and Manufacturing Agreements executed that same day" to determine whether plaintiffs plausibly had alleged an unlawful reverse payment settlement).

Defendants say that none of plaintiffs' cited cases apply here. Each case, they argue, still involved a monetary payment—either found in the actual settlement agreement or a side agreement. And, defendants assert, plaintiffs offer no cases where, as here, the alleged reverse payment settlement contains no monetary payment but, instead, is premised on the value offered by settling another and different lawsuit. This is a distinction that makes no difference. Here, like the scenarios in other lawsuits, plaintiffs allege that defendants settled the EpiPen case in exchange for the pecuniary value that the Nuvigil settlement offered Teva. Even though plaintiffs **[**190]** haven't provided a case where a court has permitted a generic delay claim premised on a theory that the parties traded settlements in two cases, it would make little sense for the court to preclude this theory simply because the value traded in the settlement didn't include a monetary payment. If the court were to reach that conclusion, the parties to an unlawful reverse payment settlement could avoid antitrust liability so long as they crafted their agreements as exchanging something of value that was delivered by something other than a monetary payment. Nothing in the case law or related antitrust literature embraces defendants' view that money—and money alone—can support reverse payment liabilities.

[*995] Also, and as plaintiffs argue, even defendants' expert recognizes that a reverse payment settlement involves the payment of "some form of compensation to the generic manufacturer" which "can be in the form of cash payments or through a payment associated with some other business transaction (e.g., a cross-licensing agreement) where the brand-name manufacturer might allegedly 'overpay' the generic manufacturer or the generic manufacturer might allegedly 'underpay' the brand-name manufacturer." **[**191]** Bret Dickey, Jonathan Orszag, & Laura Tyson, *An Economic Assessment of Patent Settlements in the Pharmaceutical Industry*, 19 Annals Health L. 367, 385 (2010). Again, plaintiffs allege here that the two settlements entered in "tandem" produced a reverse payment settlement where defendants overpaid Teva in the Nuvigil settlement. Doc. 2169 at 16 (Pretrial Order ¶ 3.a.1.b.) ("Neither settlement, viewed independently, was economically rational."). The court can find no reason to preclude plaintiffs' theory simply because the alleged overpayment was compensation in the form of the value that the Nuvigil settlement provided Teva—and not compensation in the form of money. The court rejects defendants' first argument seeking summary judgment based on the alleged independence of the EpiPen and Nuvigil settlements.

Defendants' second argument asserts that the summary judgment record contains no evidence from which a jury could infer that defendants agreed to trade the EpiPen settlement for the Nuvigil settlement. Plaintiffs disagree. Plaintiffs argue that they have adduced direct evidence of such an agreement. For support, plaintiffs cite two internal Teva documents discussing settlement of both the EpiPen and Nuvigil settlements. **[**192]** *See* Doc. 2201-13 at 2 (Pls.' Ex. 262) (stating that Teva had called Mylan's Deputy General Counsel and "relayed the following proposal: epipen in 2014 and nuvigil in 2018" and "also raised formoterol, which is another of [Mylan's] products [that Teva was] challenging with trial later this year, and threw out a 2018 date"); *see also* Doc. 2202-20 at 2 (Pls.' Ex. 278) (stating in first email that "Bill [Marth] got a call from Heather at Mylan" and asking what "exactly did we propose re epi and nuvigil?" and responding in another email with "2014 for epi and 2018 for nuvigil. No months specified"). While each communication references negotiations and proposed terms to settle the two separate lawsuits, nothing in them references—explicitly—an agreement to trade one settlement for the other. Instead, a factfinder would have to infer from these communications that the parties, by discussing the two settlements together, entered an agreement to trade one settlement for the other. Thus, these two documents don't capture direct evidence of an agreement. *See* [Llacua v. W. Range Assoc., 930 F.3d 1161, 1177 (10th Cir. 2019)] (explaining that***HN31***[] the district court "correctly defined direct evidence" of an antitrust conspiracy as "'evidence that is explicit and requires **[**193]** no inferences to establish the proposition or conclusion being asserted. With direct evidence the factfinder is not required to make inferences to establish facts.'" (quoting *Champagne Metals v. Ken-Mac Metals, Inc., 458 F.3d 1073, 1083 (10th Cir. 2006)*)).

But, plaintiffs also assert that they have adduced circumstantial evidence of an agreement to trade the two settlements. Our Circuit has explained, ***HN32***[] circumstantial evidence "must 'tend[ ] to exclude the possibility' of independent action." *Llacua, 930 F.3d at 1179* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 554, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). This standard requires an antitrust plaintiff to "show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed" plaintiff. **[*996]** *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

But, ***HN33***[] one cannot infer a conspiracy if "the defendants 'had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations.'" *Llacua, 930 F.3d at 1179-80* (quoting *Matsushita, 475 U.S. at 596*). And when considering "circumstantial evidence [that] is just 'as consistent with' unilateral action as with concerted action, it 'does not, standing alone, support an inference of antitrust conspiracy.'" *Id. at 1180* (quoting *Matsushita, 475 U.S. at 588* (further citations omitted)).

Defendants argue that plaintiffs haven't shouldered their burden here to adduce circumstantial evidence that "tend[s] **[**194]** to exclude the possibility" that the EpiPen and Nuvigil settlements were independent actions. *Twombly, 550 U.S. at 554*. Defendants assert that nothing in the language of the EpiPen or Nuvigil settlements connects one to the other. Defendants also cite deposition testimony from defendants' witnesses who testified that there never was any agreement to trade the EpiPen settlement for the Nuvigil settlement. Plaintiffs respond, arguing that the summary judgment record contains plenty of documents from which a jury could infer just the opposite of what defendants' witnesses testified.

To support their argument that they have adduced circumstantial evidence presenting a triable issue that the two settlements were connected to each other, plaintiffs cite the following summary judgment facts:

(1) the parties signed the two binding term sheets agreeing to settle the two lawsuits on the very same day—April 26, 2012; Doc. 2146-3 at 14-20 (Defs.' Ex. 136) (EpiPen settlement); Doc. 2147-11 at 2-18 (Defs.' Ex. 166) (Nuvigil settlement);

(2) internal Teva emails show that Mylan CEO Heather Bresch and Teva CEO Bill Marth negotiated simultaneously the EpiPen and Nuvigil settlements, even though Mylan wasn't a party to the EpiPen **[**195]** litigation; Doc. 2201-21 at 2 (Pls.' Ex. 255) (explaining that Mr. Marth had "talked to Heather . . . about settlement" of the EpiPen litigation and that "[s]he (Heather) wants to give us a 2018 entry date but would likely agree to 2017" and noting that it was "[j]ointly but not directly connected" to "the Nuvigil litigation" where Mr. Marth "offered a 2018 entry date"); Doc. 2202-20 at 2 (Pls.' Ex. 278) (stating "Bill [Marth] got a call from Heather at Mylan" and asking what "exactly did we propose re epi and nuvigil?"); Doc. 2202-9 at 2 (Pls.' Ex. 279) (sending the Nuvigil term sheet and discussing changes that were "agreed to between Heather and Mr. Marth");

(3) Heather Bresch told Pfizer employees that the EpiPen settlement would include an entry date of June 2015; Doc. 2205-8 at 2 (Pls.' Ex. 360);

(4) internal emails show that the parties discussed, negotiated, and resolved the two cases together; Doc. 2201-13 at 2 (Pls.' Ex. 262) (stating that Teva had called Mylan's Deputy General Counsel and "relayed the following proposal: epipen in 2014 and nuvigil in 2018"); Doc. 2202-13 at 2 (Pls.' Ex. 283) (noting that "the signed Nuvigil deal was" complete and "language w Pfizer on Epipen **[**196]** is done"); Doc. 2201-20 at 2 (Pls.' Ex. 269) (Mylan employees emailing with the subject line "Epipen—Teva/Potential **[*997]** Settlement" and attaching a "Nuvigil Settlement DRAFT");

(5) Mylan signed a covenant not to sue Teva in the EpiPen settlement even though Mylan wasn't the patent holder or a formal party to the litigation; Doc. 2146-3 at 28-29 (Defs.' Ex. 136);

(6) Mylan submitted both settlements to the FTC describing them as "potentially 'related'"; Doc. 2147-13 at 2 (Defs.' Ex. 168);

(7) Mylan's outside counsel emailed Mylan about the FTC letter and referred to the "Nuvigil and EpiPen settlement" using the singular noun "settlement" instead of referring to two, separate agreements; Doc. 2203-5 at 2 (Pls.' Ex. 294);[56] and

(8) Prof. Elhauge's economic analysis showing that each of the EpiPen and Nuvigil settlements, standing alone, were economically irrational for the generic entrant, and, taken together, the settlements produced greater profits than the parties could have achieved by not linking the settlements; Doc. 2193-4 at 43, 45-46, 51-55 (Pls.' Ex. 85) (Elhauge Expert Report ¶¶ 79, 85-86, 98-104 & Table 1); Doc. 2192-6 at 30-31, 36-37 (Pls.' Ex. 55) (Elhauge Reply Expert Report ¶¶ 44, **[**197]** 57).[57]

Defendants, of course, disagree. They repeatedly assert that these facts merely show that the parties negotiated the two **[*998]** settlements around the same time and coincidentally signed the two binding term sheets on the same day, but those facts don't exclude the possibility of independent action. And, they argue, the court should grant summary judgment like the Pennsylvania federal court did in *King Drug Co. of Florence, Inc. v. Cephalon, Inc., Nos. 2:06-cv-1797, 2:06-cv-1833, 2:06-cv-2768, 2014 U.S. Dist. LEXIS 84818, 2014 WL 2813312, *14 (E.D. Pa. June 23, 2014)*.

There, plaintiffs alleged that pharmaceutical company "Cephalon entered into four bilateral agreements to settle the then-pending patent infringement litigation against" four competing generic companies. *Id.* Plaintiffs alleged the four agreements were unlawful reverse payment settlements that violated the antitrust laws. *2014 U.S. Dist. LEXIS 84818, [WL] at *4*. The "agreements contained identical entry dates and contingent launch provisions, and also had substantially similar structures." *2014 U.S. Dist. LEXIS 84818, [WL] at *14*. But, the court found that summary judgment was warranted because "the circumstantial evidence" surrounding the four agreements didn't "support an inference of concerted, as opposed to independent, action." *Id.* Among other things, **[**198]** the court found that the summary judgment facts established that "the settlement agreements with the Generics were economically beneficial[,]" and there was "no comparable evidence that the Generic Defendants were dependent on the universal

---

[56] Defendants respond to plaintiffs' citation to this summary judgment fact, arguing that it is a "typo in an email subject line" that is "not evidence." Doc. 2226-3 at 93. Assuming Mylan can adduce evidence to this effect, Mylan can argue that this email's subject line contains a simple typo. And a reasonable juror might accredit that inference. But, on this motion, the court must construe the evidence in plaintiffs' favor, and a reasonable trier of fact also might infer that it wasn't a typo and the author meant to refer to the two as one, single agreement that resolved both cases. The court must leave that determination to the jury. It's not a proper question for the court to resolve on summary judgment.

[57] Defendants assert that Prof. Elhauge's opinion doesn't preclude summary judgment because expert opinion cannot create a triable issue of fact about the existence of a conspiracy. For support, defendants cite a case that prohibited experts from opining on the "ultimate issue" whether a conspiracy existed because experts may not testify about legal conclusions. *See Hyland v. HomeServices of Am., Inc., 771 F.3d 310, 322 (6th Cir. 2014)* (affirming trial court's decision precluding expert from testifying "to their ultimate opinions that a price-fixing conspiracy existed"). And, they cite another case where the experts' opinions failed to support an inference of conspiracy because the opinions didn't exclude the possibility of independent action. *See* ***Dahl v. Bain Cap. Partners, LLC, 937 F. Supp. 2d 119, 137 n.17 (D. Mass. 2013)*** (holding that "experts' ultimate conclusions do not provide a permissible inference under the controlling case law").

Those cases don't apply here. Prof. Elhauge isn't offering an expert opinion on the ultimate legal issue whether a conspiracy existed. Instead, he is offering his opinion, as an expert in antitrust economics, whether the EpiPen and Nuvigil settlements made economic sense for the parties. That kind of evidence is proper expert opinion which the jury can consider and weigh to determine whether it supports the existence of an antitrust conspiracy and excludes the possibility that the two settlements were independent actions.

Also, defendants attack Prof. Elhauge's opinion because, they contend, his analysis shows that the Nuvigil settlement, standing alone, was profitable for Mylan. The court has addressed this argument comprehensively in its Order ruling defendants' Motion to Exclude Prof. Elhauge's expert opinions. As that Order explains, Prof. Elhauge provides a reliable basis for the opinions offered in his original Expert Report and Reply Report. And, any challenges that defendants assert against them go to the weight that the trier of fact should assign to those opinions.

agreement to make the settlements economically attractive." *2014 U.S. Dist. LEXIS 84818, [WL] at *12*. Instead, "the settlements seemed to offer the best of both worlds: an end to costly litigation, combined with lucrative business deals and an assurance that each Generic Defendant would not be disadvantaged regarding the entry of generic Provigil." *Id.*

Defendants assert that this case presents similar summary judgment facts. Defendants argue that this case's summary judgment record lacks any evidence that the agreements were dependent on one another. And, they contend, the summary judgment facts establish that the settlements made independent economic sense for all parties.

A reasonable trier of fact might agree with defendants' assessment of these facts. But, a reasonable jury also might reach the opposite conclusion, finding that the facts, taken together, "'tend[ ] to exclude the possibility' of independent action." *Llacua, 930 F.3d at 1179* (quoting *Twombly, 550 U.S. at 554*). A rationale trier of fact could infer as much from the **[**199]** communications among Mylan, Pfizer, and Teva which discussed the two settlements together and produced two binding term sheets signed the very same day—along with the fact that plaintiffs' expert opines that these settlements were not economically rational for the generic entrant (should the jury find this expert opinion credible). Thus, the court finds, the summary judgment facts here support an "inference of conspiracy" that "is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed" plaintiff. *Matsushita, 475 U.S. at 588*; *see also* *In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d 231, 256 (D. Mass. 2014)* (denying summary judgment where the summary judgment facts suggested that defendants "possessed strong motives to coordinate the actions they took[,]" and "[i]n conjunction with the interdependence of the agreements themselves, these factors are consistent with the existence of a single agreement, tend to exclude the possibility of independent action, and adequately support a reasonable inference of conspiracy"). And so, the court denies summary judgment based on defendants' argument that the EpiPen and Nuvigil settlements were independent from one another.

[*999] c. "Unexplained" Reverse Payment

Third, defendants argue that **[**200]** plaintiffs' antitrust claims can't survive summary judgment because the undisputed summary judgment facts present no triable issue whether defendants made any "unexplained" reverse payment to settle the EpiPen litigation that violated the antitrust laws. As the Supreme Court has articulated, "***HN34***[ ] a reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects[.]" *FTC v. Actavis, 570 U.S. 136, 158, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; *see also* *id. at 157* (recognizing that a reverse payment "(if otherwise unexplained) likely seeks to prevent the risk of competition"). Defendants make two arguments that plaintiffs can't satisfy *Actavis*'s requirement of proving an "unexplained" reverse payment settlement.

Defendants' first argument asserts that the summary judgment facts establish no "reverse payment" occurred here. Defendants argue that it's undisputed that neither the EpiPen nor Nuvigil settlement agreement contained any monetary payment to Teva. *See generally* Doc. 2146-3 (Defs.' Ex. 136) (EpiPen settlement) & Doc. 2147-11 (Defs.' Ex. 166) (Nuvigil settlement). So, they contend, defendants never made any "reverse payment." For reasons already discussed, *see supra* Part III.A.1.b., the court won't foreclose plaintiffs' **[**201]** generic delay theory simply because the "value" Teva allegedly derived from the settlements didn't include a monetary payment. As explained, plaintiffs have adduced sufficient evidence supporting a triable issue whether defendants made an unlawful reverse payment in the EpiPen settlement in the form of overpaying Teva for its settlement of the Nuvigil litigation.

Also, defendants argue, the summary judgment facts present no triable issue whether the Nuvigil settlement overcompensated Teva. They argue Teva had a strong position in the Nuvigil litigation, demonstrated by the fact that the other defendants in the Nuvigil MDL—in effect, Teva's co-defendants—lost at trial. Memorandum at 1, *In re: Armodafinil Patent Litig., 939 F. Supp. 2d 456 (D. Del. 2013)*, ECF No. 329 at 1. And, they assert, Mylan benefited from the Nuvigil settlement because it granted Mylan the license to enter the generic Nuvigil market in 2016—eight years before the Nuvigil patents expired. Doc. 2147-11 at 3-4, 6-7 (Defs.' Ex. 166) (Nuvigil settlement); Doc. 2147-16 at 3 (Defs.' Ex. 171) (Nuvigil patents' 2024 expiration dates). Thus, defendants assert, no reasonable factfinder could infer from these facts that **[**202]** the Nuvigil settlement overcompensated Teva and thus constitutes a "reverse payment."

Plaintiffs respond, arguing that this description of the summary judgment evidence is defendants' "preferred resolution of the facts"—but not what the court can consider on summary judgment. Doc. 2190-1 at 91. The court agrees.

Viewing the facts in plaintiffs' favor, a jury could infer from the analysis offered by plaintiffs' experts—should the jury find their opinions credible—that the Nuvigil settlement overcompensated Teva. Prof. Elhauge opines that the Nuvigil settlement produced a $467 million gain for Teva compared to a "but for" settlement and a $547 million gain compared to continued litigation. Doc. 2192-6 at 27-29 (Pls.' Ex. 55) (Elhauge Reply Expert Report ¶ 40 & Table 1). And, Prof. Torrance asserts that Teva had just a 20% (± 10%) chance of winning the Nuvigil case had it gone to final judgment. Doc. 2146-5 at 101 (Defs.' Ex. 138) (Torrance Expert Report ¶ 207) (opining that "a reasonable, competent, and experienced patent attorney would estimate a probability of about 80% ± 10% that Mylan would not have been liable for patent infringement"). Even though the **[*1000]** other MDL defendants (effectively, **[**203]** Teva's co defendants) lost to Teva at trial, Prof. Torrance opines that Teva likely would have lost on appeal to the Federal Circuit. *Id.* at 100 (¶ 204). Plaintiffs assert that a jury could infer that Teva also thought it may lose on appeal based on the fact that Teva settled with the MDL defendants while the Nuvigil lawsuit was on appeal. Doc. 2202-4 (Pls.' Ex. 274); Doc. 2202-5 (Pls.' Ex. 275); Doc. 2202-6 (Pls.' Ex. 276); Doc. 2202-7 (Pls.' Ex. 277). And, in three of the four settlements, Teva agreed to pay the settling defendants millions of dollars in legal fees. *See* Doc. 2202-4 at 6 (Pls.' Ex. 274); Doc. 2202-5 at 5 (Pls.' Ex. 275); Doc. 2202-6 at 6 (Pls.' Ex. 276).

A reasonable jury could infer from the expert opinion evidence that Teva didn't have a strong chance of prevailing in the Nuvigil litigation, and so, Mylan's agreement to delay entry into the generic Nuvigil market until 2016 represented valuable compensation amounting to a reverse payment settlement made in exchange for the EpiPen settlement. Thus, the court finds, a jury could find or infer that defendants made a reverse payment to Teva. Summary judgment isn't warranted on defendants' first argument.

Defendants' second **[**204]** argument asserts that the summary judgment facts present no genuine issue whether the EpiPen and Nuvigil settlements involved an "unexplained" reverse payment. Defendants argue that the EpiPen settlement provided value to Teva because it gave Teva a license to the EpiPen patents and allowed it to enter the generic EAI market by 2015. And, defendants contend, the Nuvigil settlement's value to Teva was avoiding litigation risk and saving millions of dollars in continued litigation costs. Plaintiffs respond, arguing that defendants' version of the facts isolates the two settlements without considering the summary judgment facts that—as already discussed—allow a reasonable jury to infer that the two settlements were dependent on one another. And, plaintiffs argue, a reasonable jury could infer from those facts that the EpiPen settlement involved an "unexplained" reverse payment settlement because, as plaintiffs' expert opines, neither settlement was economically rational for the generic entrant, and, taken together, the settlements produced greater profits than the parties could have achieved by not linking the settlements. Doc. 2193-4 at 43, 45-46, 51-55 (Pls.' Ex. 85) (Elhauge Expert **[**205]** Report ¶¶ 79, 85-86, 98-104 & Table 1); Doc. 2192-6 at 30-31, 36-37 (Pls.' Ex. 55) (Elhauge Reply Expert Report ¶¶ 44, 57). From these summary judgment facts, a jury could infer that the EpiPen settlement involved an "unexplained" reverse payment sufficient to support an antitrust violation based on a pay-for-delay settlement. So, the court denies summary judgment on defendants' argument that the summary judgment facts present no triable issue whether the EpiPen and Nuvigil settlements involved an "unexplained" reverse payment.

d. Procompetitive Effects of the Settlements

Fourth and *last*, defendants argue that summary judgment is warranted against plaintiffs' antitrust claims premised on a generic delay theory because the summary judgment facts establish that the EpiPen and Nuvigil settlements were procompetitive and thus didn't violate the antitrust laws. Defendants correctly explain that alleged reverse payment settlements are subject to a rule of reason analysis. *FTC v. Actavis, 570 U.S. 136, 159, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. Our Circuit has described ***HN35***[] the rule of reason as "call[ing] for a holistic assessment of the parties' evidence" to determine "whether a challenged practice restrains trade unreasonably" thus violating the Sherman Act. *Buccaneer Energy (USA) Inc. v. Gunnison* **[*1001]** *Energy Corp., 846 F.3d 1297, 1310 (10th Cir. 2017)*. **[**206]** Defendants assert that plaintiffs fail their summary judgment burden to adduce evidence presenting a triable issue whether the EpiPen and Nuvigil settlements had a "significant anticompetitive effect." *Id.* To the contrary, defendants contend, the EpiPen and Nuvigil settlements were procompetitive because they allowed generic manufacturers to enter the generic EAI and Nuvigil markets many years before the EpiPen and Nuvigil patents expired.

Plaintiffs respond, arguing that the rule of reason applies only to a single reverse-payment patent settlement, like the one at issue in *Actavis*. But here, where defendants and Teva allegedly entered reverse payment settlements agreeing not to compete in each other's markets, plaintiffs assert that defendants entered a horizontal market allocation agreement. This kind of arrangement is a per se violation of the antitrust laws. *See* *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S 332, 348, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)* (holding that agreements that "are horizontal and fix maximum prices" don't "escape *per se* condemnation" under the antitrust laws). The court need not decide which test applies to the alleged reverse payment settlements at issue here because plaintiffs' generic delay claim survives summary judgment whether it's a per se **[**207]** violation or subject to the rule of reason test.

As plaintiffs correctly assert, defendants' argument—*i.e.*, the settlements didn't have an anticompetitive effect—assumes that the procompetitive benefits of allowing generic entrants to enter the market many years earlier than the branded products' patents were set to expire are realized only by the reverse payment settlement. Plaintiffs contend, a no-payment settlement in a "but for" world would have accomplished the same pro-competitive benefits. And, they argue, generic entry would have occurred sooner because the settlements never would have included a "pay for delay." Indeed, the summary judgment facts support a reasonable inference that the parties to the EpiPen and Nuvigil settlements, by negotiating the two settlements together and agreeing to future generic entry dates for both products simultaneously, traded one settlement generic entry date for another. And, a jury could infer that these summary judgment facts "'tend[ ] to exclude the possibility' of independent action." *Llacua, 930 F.3d at 1179* (quoting *Twombly, 550 U.S. at 554*).

Also, defendants' argument that the settlements had procompetitive effects assumes that the generic entrants had a generic product that infringed **[**208]** the branded product, and thus the generic entrants would have lost their patent infringement lawsuits and thus couldn't have entered the market until the branded products' patents expired. Plaintiffs have adduced evidence from which a jury could infer that the generic entrants had a strong chance of prevailing at trial. Thus, a jury could find that the settlements didn't make economic sense from the perspective of the generic entrants. Like the facts presented in *In re Nameda Direct Purchaser Litigation*, the court cannot conclude on these summary judgment facts, as a matter of law, "[w]hether the settlement agreements were anticompetitive or procompetitive" because that determination "will depend on several complex factual questions that cannot be decided on summary judgment." *No. 15 Civ. 7488 (CM), 2017 U.S. Dist. LEXIS 83446, 2017 WL 4358244, at *19 (S.D.N.Y. May 23, 2017)*. So, the court declines to grant summary judgment based on the alleged procompetitive effects of the EpiPen and Nuvigil settlements.

e. Conclusion

For reasons discussed, the court declines to enter summary judgment against plaintiffs' antitrust claims premised on **[*1002]** their generic delay theory for any of the four arguments defendants assert seeking dismissal. Plaintiffs' generic delay claims thus survive summary judgment **[**209]** and will proceed to trial.

2. Rebate Agreements with Exclusivity Provisions

Next, defendants argue that the summary judgment facts fail to present a genuine issue whether defendants foreclosed branded competition through Mylan's use of exclusive rebate agreements. Defendants' argument here seeks summary judgment against plaintiffs' antitrust claims premised on a theory that defendants engaged in a scheme to block a competing EAI—Sanofi's Auvi-Q—from the market. Doc. 2169 at 17 (Pretrial Order ¶ 3.a.1.c.).

Plaintiffs allege that defendants violated the antitrust laws by conditioning rebates paid to PBMs on their agreement to block Auvi-Q (and other competing EAIs) from formulary placement. *Id.* And, they contend, defendants succeeded in their "exclusionary contracting strategy" by excluding Auvi-Q from PBM formulary coverage and by forcing Sanofi to decide not to return Auvi-Q to the market. *Id.* at 18.

Defendants offer two reasons why this antitrust theory fails on summary judgment. *First*, defendants argue, the undisputed facts present no triable issue whether Mylan's rebate agreements with PBMs were unlawful "exclusive dealing" contracts. *Second*, defendants contend, Mylan always offered **[**210]** prices for the EpiPen that were above cost. And, they say, that practice doesn't violate the antitrust laws because price discounts at above-costs prices are procompetitive. The court takes each argument, in turn.

a. Whether the Rebate Contracts are Unlawful Exclusive Dealing Contracts

Defendants argue that the summary judgment facts present no triable issue whether Mylan's rebate contracts are unlawful exclusive dealing contracts that subject them to liability under the antitrust laws.

HN36[] An exclusive dealing arrangement is "a contract between a manufacturer and a buyer that forbids the buyer from purchasing the contracted good from any other seller or that requires the buyer to take all of its needs in the contract good from that manufacturer." XI Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1800a, at 3 (4th ed. 2018); *see also* *Perington Wholesale, Inc. v. Burger King Corp., 631 F.2d 1369, 1374 (10th Cir. 1979)* (describing***HN37***[] an exclusive dealing arrangement as one that "entails a commitment by a buyer to deal only with a particular seller"). Such an agreement "need not specifically require the buyer to forgo other supply sources if the practical effect [of the agreement] is the same." *Perington Wholesale, 631 F.2d at 1374*; *see also* *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 326, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)* ("[E]ven though a contract does not contain specific agreements **[**211]** not to use the (goods) of a competitor, if the practical effect . . . is to prevent such use, it comes within" the prohibition against exclusivity (citation and internal quotation marks omitted)). "The antitrust vice of these arrangements is the foreclosure of part of the market in which the seller competes by taking away the freedom of the buyer to choose from the products of competing traders in the seller's market." *Perington Wholesale, 631 F.2d at 1374*; *see also* *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 270 (3d Cir. 2012)* ("The primary antitrust concern with exclusive dealing arrangements is that they may be used by a monopolist to strengthen its position, which may ultimately harm competition." (citation omitted)).

But, ***HN38***[] an exclusionary contract doesn't violate the antitrust laws simply because it **[*1003]** excludes competitors. Indeed, "[e]xclusive dealing agreements are often entered into for entirely procompetitive reasons, and generally pose little threat to competition." *ZF Meritor, 696 F.3d at 270* (citation omitted); *see also* *Race Tires Am., Inc. v. Hoosier Racing Tire Corp., 614 F.3d 57, 76 (3d Cir. 2010)* ("'[I]t is widely recognized that in many circumstances [exclusive dealing arrangements] may be highly efficient—to assure supply, price stability, outlets, investment, best efforts or the like—and pose no competitive threat at all.'" (quoting *E. Food Servs., Inc. v. Pontifical Cath. Univ. Servs. Ass'n, Inc., 357 F.3d 1, 8 (1st Cir. 2004)*)). On the other hand, "[e]xclusive **[**212]** dealing can have adverse economic consequences by allowing one supplier of goods or services unreasonably to deprive other suppliers of a market for their goods[.]" *ZF Meritor, 696 F.3d at 270* (citations and internal quotation marks omitted). Also, "[e]xclusive dealing arrangements are of special concern when imposed by a monopolist." *Id. at 271* (citing *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 187 (3d Cir. 2005)* ("Behavior that otherwise might comply with ***antitrust law*** may be impermissibly exclusionary when practiced by a monopolist.")).

So, ***HN39***[] because exclusive dealing arrangements "may actually enhance competition, . . . they are not deemed per se illegal." *Perington Wholesale, 631 F.2d at 1374* (citing *Tampa Elec., 365 U.S. at 333*). Instead, courts apply the rule of reason to determine the legality of exclusive dealing arrangements. *ZF Meritor, 696 F.3d at 271* (citing *Tampa Elec., 365 U.S. at 327*); *see also* *McWane, Inc. v. FTC, 783 F.3d 814, 835 (11th Cir. 2015)* (explaining that the Eleventh Circuit "has joined the consensus that exclusive dealing arrangements are reviewed under the rule of reason" (citation and internal quotation marks omitted)). Thus, to prevail, an exclusive dealing claim plaintiff must prove "it probable that performance of the contract will foreclose competition in a substantial share of the line of commerce affected." Tampa Elec., 365 U.S. at 327;[58] *see also* Perington Wholesale, 631 F.2d at 1374 (explaining that a plaintiff bringing an antitrust claim based on an exclusive dealing contract "must **[**213]** allege and prove that a particular arrangement unreasonably restricts the opportunities of the seller's competitors to market their product").

Here, defendants assert, Mylan's rebate contracts—ones that conditioned rebates to PBMs on excluding Auvi-Q from coverage—don't violate the antitrust laws because they didn't foreclose competition substantially in the EAI market. To decide this question, the Supreme Court has instructed lower courts "***HN41***[] [t]o determine substantiality **[*1004]** in a given case" by "weigh[ing] the probable effect of the contract on the relevant area of effective competition, taking into account the relative strength of the parties, the proportionate volume of commerce involved in relation to the total volume of commerce in the relevant market area, and the probable immediate and future effects which pre-emption of that share of the market might have on effective competition therein." Tampa Elec., 365 U.S. at 329.

When considering whether the specific contract at issue in *Tampa Electric* tended to foreclose a substantial volume of competition, the Supreme Court considered several factors. Id. at 334-35. They included whether the market includes a seller **[**214]** with a dominant position, whether the market has "myriad outlets with substantial sales volume," the prevalence of exclusive contracts in the industry, the duration of the contract, and any pro-competitive justifications for the contract. *Id.* More recently, the Third Circuit recognized that "***HN42***[] no set formula" exists "for evaluating the legality of an exclusive dealing agreement," but listed the factors courts consider when making this determination. ZF Meritor, 696 F.3d at 271-72. They include: (1) whether the defendant has "significant market power[;]" (2) whether there is substantial market foreclosure; (3) whether the contract's duration is "sufficient . . . to prevent meaningful competition by rivals[;]" (4) "an analysis of likely or actual anticompetitive effects considered in light of any procompetitive effects[;]" (5) whether defendant "engaged in coercive behavior[;]" (6) "the ability of customers to terminate the agreements[;]" and (7) the "use of exclusive dealing by competitors of the defendant[.]" *Id.* (citations omitted).

Other courts also have considered many of these same factors when called to decide if an exclusive dealing arrangement "substantially" forecloses competition and thus violates the antitrust **[**215]** laws. *See* Methodist Health Servs. Corp. v. OSF Healthcare Sys., 859 F.3d 408, 410-11 (7th Cir. 2017) (affirming summary judgment against exclusive dealing claim based on exclusivity contracts between a hospital and insurers where contracts at issue were only two or three years' duration, plaintiff also had entered exclusive dealing arrangements with insurers, and there was no evidence that the contracts had "a significant exclusionary effect"); McWane, Inc. v. FTC, 783 F.3d 814, 837-42 (11th Cir. 2015) (affirming FTC's order prohibiting exclusive dealing contracts after concluding that the evidence supported the FTC's finding that the contracts foreclosed competition, injured competition, and had no procompetitive justifications); NicSand, Inc. v. 3M Co., 507 F.3d 442, 454 (6th Cir. 2007) (affirming dismissal of exclusive dealing claim where all but one competitor used the same exclusive contracts and the contracts didn't create a barrier to market entry).

[58] *Tampa Electric* decided a Clayton Act claim and concluded that the contract at issue didn't "tend to foreclose a substantial volume of competition." 365 U.S. at 335. After reaching that conclusion, the Court found it "need not discuss the respondents' further contention that the contract also violates § 1 and § 2 of the Sherman Act, for if it does not fall within the broader proscription of § 3 of the Clayton Act it follows that it is not forbidden by those of the former." *Id.* (citation omitted). ***HN40***[] Although *Tampa Electric* involved a Clayton Act claim, courts also apply its analysis to exclusive dealing claims asserted under the Sherman Act because each statute "include[s] an anticompetitive conduct element, although each statute articulates that element in a slightly different way." ZF Meritor, 696 F.3d at 269 n.9; *see also* id. at 327 n.26 (Greenberg, J., dissenting) ("In substance, the *Tampa Electric* standard for Clayton Act Section 3 claims differs very marginally, if at all, from the fact-intensive rule-of-reason analysis that applies to this case under Section 1 of the Sherman Act."); Dos Santos v. Columbus-Cuneo-Cabrini Med. Ctr., 684 F.2d 1346, 1352 n.11 (7th Cir. 1982) (noting that *Tampa Electric* applies to Sherman Act cases even though it was decided under § 3 of the Clayton Act).

Defendants assert that the summary judgment facts here present no triable issue whether Mylan's rebate contracts substantially foreclosed competition. Specifically, they argue that five of the factors articulated by *ZF Meritor*[59] establish—as a matter of law—that Mylan's rebate contracts with PBMs don't violate the antitrust **[*1005]** laws. The court considers these five factors,[60] below, in the same order defendants present them in their papers.

i. Factor #5: Coercion

Defendants first argue that the summary judgment facts present no triable issue of coercion. As the Third Circuit has explained, "***HN43***[] [e]xclusive dealing will generally only be unlawful where the market is highly concentrated, the defendant possesses significant market power, *and there is some element of coercion present*." *ZF Meritor, 696 F.3d at 284* (emphasis added). Defendants assert there is no coercion here because the summary judgment record lacks any evidence that Mylan threatened to cut off its supply of EpiPens if a PBM refused to agree to exclude competing EAIs. The court agrees that the facts here differ markedly from those presented in cases where courts have found evidence of unlawful exclusive dealing based on a defendant's coercive conduct.

In those cases, defendants threatened to stop supplying their products which, in turn, gave customers no choice but to agree to exclusivity provisions because, otherwise, they wouldn't have access to defendants' products. *See, e.g., McWane, 783 F.3d at 834* (finding that threat to cut off rebates and supply to buyers unless they purchased all pipe fittings was unreasonable because it was "unilaterally **[**217]** imposed by fiat upon all [buyers]" and "resulted in no competition to become the exclusive supplier and no discount, rebate, or other consideration offered in exchange for exclusivity" (citation and internal quotation marks omitted)); *ZF Meritor, 696 F.3d at 285* (concluding "there was evidence [defendant] leveraged its position as a supplier of necessary products to coerce [buyers] into entering" exclusive contracts because "many of the terms of the [contracts] were unfavorable to the [buyers] and their customers, but [the buyers] agreed to such terms because without [defendant's products], the [buyers] would be unable to satisfy customer demand"); *Dentsply, 399 F.3d at 190, 196* (finding that defendant's practice of "threaten[ing] to sever access not only to its [artificial teeth], but to other dental products as well" if a tooth supplier offered competing products "impose[d] an 'all-or-nothing' choice on" suppliers and evidence that suppliers "have chosen not to drop [defendant's] teeth in favor of a rival's brand demonstrates that they have acceded to heavy economic pressure").

That's not what happened here. As defendants correctly assert, the summary judgment record contains no evidence of any threats by Mylan to cut off payors' access **[**218]** to EpiPen if they refused to enter exclusive agreements.[61] Instead, the summary **[*1006]** judgment facts show that PBMs and payors solicited rebate offers

---

[59] The Tenth Circuit hasn't articulated a set of factors that a court should consider when analyzing an exclusive dealing arrangement, like the Third Circuit provided in ***[**216]*** *ZF Meritor*. But, the *ZF Meritor* factors include the same factors that the Supreme Court's *Tampa Electric* opinion instructed courts to consider and that other Circuit courts have considered in their analysis of exclusive dealing contracts. The court predicts that the Tenth Circuit, if presented with this question, would apply the *ZF Meritor* factors to Mylan's rebate contracts to determine whether they substantially foreclose competition. Thus, the court applies those factors in its analysis here.

[60] The five factors addressed by defendants' motion are Factors #2, #3, #5, #6, and #7 from *ZF Meritor*. The parties never address the remaining factors (#1 and #4) or how the summary judgment facts support or preclude a finding that the Mylan rebate contracts are unlawful exclusive dealing arrangements under these remaining factors. Several times, plaintiffs call Mylan a "monopolist" but never in the context of *ZF Meritor's* first factor—*i.e.*, whether the defendant has significant market power. But, even if the summary judgment facts establish that Mylan had significant market power, this factor "is not dispositive." *Eisai, Inc. v. Sanofi-Aventis U.S., LLC, No. 08-4168 (MLC), 2014 U.S. Dist. LEXIS 46791, 2014 WL 1343254, at *34 (D.N.J. Mar. 28, 2014)* (concluding that Sanofi's "significant market power" which was "81% to 92% during the relevant period" was "not dispositive" of the question whether the contracts at issue were unlawful exclusive dealing arrangements). So, the court finds the two remaining factors neutral to its analysis whether a reasonable jury could find or infer an unlawful exclusive dealing arrangement under the summary judgment facts here.

from both Mylan and Sanofi, giving them opportunity to compete through rebates or other discounts, and that some payors suggesting a willingness to exclude or place restrictions on one of the products. *See, e.g.*, Doc. 2159-3 at 3 (Defs.' Ex. 245) (discussing "CVS Caremark's plan to review the [EAI] class and choose an exclusive product"); Doc. 2159-13 at 5 (Defs.' Ex. 255) (explaining that OptumRx "intends to manage the products" in the EAI class "using a combination of tier placement and product exclusion"); Doc. 2159-9 at 2 (Defs.' Ex. 251) (asserting that Cigna was "looking for an offer for exclusive epinephrine positioning"). In response, Mylan often offered PBMs a menu of options from which a PBM's clients could choose and which offered higher rebates in exchange for more fulsome exclusive formulary positioning. *See e.g.*, Doc. 2152-1 at 4-5 (Defs.' Ex. 201); Doc. 2152-2 at 19-21 (Defs.' Ex. 202); Doc. 2152-5 at 4 (Defs.' Ex. 205). And, in the end, PBMs made different decisions about how they would cover EpiPen and Auvi-Q—some covered both **[**219]** EpiPen and Auvi-Q on the preferred brand tier; some covered EpiPen on the preferred tier, and Auvi-Q as non-preferred; some covered Auvi-Q on the preferred tier and EpiPen as non-preferred; some covered EpiPen and restricted Auvi-Q; and some restricted EpiPen in favor of Auvi-Q.

Plaintiffs respond that Mylan's increased rebates after Auvi-Q entered the market manifest coercion. Indeed, the summary judgment facts establish that, before 2013, Mylan typically offered rebates below 10 percent. *See* Doc. 2155-9 at 5 (Defs.' Ex. 224); *see also* Doc. 2197-7 at 3-4 (Pls.' Ex. 171) (Foster Dep. 212:17-213:8). But, as Auvi-Q prepared to launch, Mylan implemented a strategy offering PBMs larger rebates but conditioned them on agreements to restrict or exclude Auvi-Q from formulary coverage. Doc. 2197-17 at 4 (Pls.' Ex. 181) (Korczynski Dep. 254:3-10); Doc. 2197-19 at 2 (Pls.' Ex. 183); Doc. 2197-13 at 3 (Pls.' Ex. 177) (Willing Dep. 63:17-25); Doc. 2199-3 at 2-5 (Pls.' Ex. 209) (showing that by June 2015, Mylan's Pricing Committee had approved rebates in the range of 50% to 60% for the largest PBMs and up to 30% for specifically targeted managed care accounts **[**220]** conditioned on exclusive or preferred formulary coverage for EpiPen). As defendants correctly argue, the summary judgment facts establish that Auvi-Q's entry into the market gave PBMs leverage to seek higher rebate offers both from Mylan and Sanofi, and many times they solicited rebate offers conditioned on restrictions or exclusivity. And, when Sanofi responded by offering more aggressive rebates, it often succeeded in securing better formulary placement for Auvi-Q. *See* Doc. 2161-10 at 2 (Defs.' Ex. 283) (reversing exclusion with ESI); Doc. 2162-3 at 2 (Defs.' Ex. 291) (achieving co-preferred status on Aetna's value and premier formularies); Doc. 2162-5 at 2-28 (Defs.' Ex. 293) (improving coverage with CVS); Doc. 2162-6 at 2 (Defs.' Ex. 294) (same).

These undisputed facts suggest that the exclusive offers promoted competition in the EAI market—something the antitrust laws encourage. *See, e.g., NicSand, Inc. v. 3M Co., 507 F.3d 442, 454 (6th Cir. 2007)* **[*1007]** (finding that ***HN44***[] the court couldn't "ignore the demands of the marketplace in which these [exclusive agreements] arose" because "[i]f *retailers* have made supplier exclusivity a barrier to entry, one cannot bring an antitrust claim against a *supplier* for acquiescing to that requirement"); *Menasha Corp. v. News Am. Mktg. In-Store, Inc., 354 F.3d 661, 663 (7th Cir. 2004)* ("That **[**221]** retailers and manufacturers *like* exclusive deals implies that they serve [their] interests" and "[w]hen the consumers favor a product or practice, and only rivals squawk, the most natural inference is that the complained-of practice promotes rather than undermines competition, for what helps consumers often harms other producers[.]"). Thus, plaintiffs present no triable issue of coercion based on Mylan's increasing rebates after Auvi-Q entered the market.[62]

---

[61] As discussed, *supra* note 44, plaintiffs' citations to two Mylan documents won't support a finding or inference that Mylan ever threatened to cut off EpiPen supply. Instead, the documents showed that Mylan threatened to withdraw discounts if payors restricted or excluded EpiPen—but not if payors refused to exclude Auvi-Q. *See* Doc. 2192-17 at 2-3 (Pls.' Ex. 68) (listing as a "talking point" for a meeting with MedImpact that "Mylan will terminate its current contract if MedImpact implements a step edit *against EpiPen*" (emphasis added)); Doc. 2192-18 at 2 (Pls.' Ex. 69) (informing OptumRx that "[i]f for some reason, [OptumRx/UnitedHealthcare] decides *to exclude EpiPen* in 2014, we will not pay any enhanced rebates in 2013" but never mentioning that Mylan would cut off EpiPen supply (emphasis added)).

[62] Plaintiffs also assert two arguments that PBMs had an incentive to agree to exclusivity restrictions in exchange for higher rebates. They base these arguments on (1) the collective effects that such agreements have on raising market-wide prices, thus producing greater profits for PBMs, and (2) the agreements' bundling of incontestable and contestable demand. Doc. 2190-1 at 98-99. But these arguments don't assert that *defendants* engaged in any coercive behavior by offering rebates conditioned on

To the contrary, defendants assert that it's not coercion to offer higher discounts in exchange for better formulary placement. To support this argument, they rely on Eisai, Inc. v. Sanofi Aventis U.S, LLC, 821 F.3d 394 (3d Cir. 2016). In *Eisai*, the distributor of anticoagulant drug Fragmin sued Sanofi—the seller of Lovenox, a competing anticoagulant drug. Id. at 399. During the relevant time frame, Lovenox held the largest share of the anticoagulant drug market with 81.5% to 92.3% market share. *Id.* Fragmin held the second largest market share with 4.3% to 8.2% of the market. *Id.* Plaintiff sued Sanofi for antitrust violations, arguing that its Lovenox contracts with hospitals were unlawful exclusive dealing arrangements. Id. at 399-400. Under Sanofi's contracts, hospitals "received price discounts based on the **[**222]** volume of Lovenox they purchased and their market-share calculation tied to their purchases of [other, competing] anticoagulant drugs." Id. at 400. The contracts provided that if the hospital's purchases of Lovenox were below 75% of its total purchases of anticoagulant drugs, then the hospital received a flat 1% discount for its Lovenox purchases. *Id.* But, if the hospital's total purchases of Lovenox increased above the 75% market share threshold, the contract required Sanofi to pay increasingly higher rebates based on a combination of the total volume purchased and the market share. *Id.* These loyalty discounts ranged from 9% to 30% of Lovenox's wholesale price. *Id.* The Sanofi contracts did not obligate the hospitals to purchase any certain quantities of Lovenox. *Id.* They simply provided that a hospital only could receive the flat 1% discount if its total purchases didn't surpass the 75% market share threshold. *Id.* Also, the contract included formulary access clauses. *Id.* These clauses, the Third Circuit held, didn't prevent hospitals from offering other anticoagulant drugs on their formularies. *Id.* But they did prohibit them from favoring other anticoagulant drugs over Lovenox on their formularies. **[**223]** *Id.* And, the penalty for non-compliance was that the hospital's discount dropped to the 1% discount level. *Id. Eisai* concluded that Sanofi never limited the hospitals' access to Lovenox. *Id.*

[*1008] Under these summary judgment facts, the Third Circuit concluded that plaintiff had failed "to demonstrate that hospitals were foreclosed from purchasing competing drugs as a result of Sanofi's conduct." Id. at 407. So, it affirmed the district court's decision granting summary judgment against plaintiff's antitrust claims. Id. at 399, 410. The Third Circuit noted that hospitals never risked penalties or supply shortages for terminating their rebate contracts or violating their terms. Id. at 406. Instead, not meeting the 75% market share threshold or not complying with the formulary access clause had just one consequence: the hospital received the base 1% discount instead of higher rebates. *Id.* The Third Circuit found that "the threat of a lost discount is a far cry from the anticompetitive conduct" that the Circuit had condemned in *ZF Meritor* and *Dentsply.* Id. at 407. And so, plaintiff had failed to identify any summary judgment evidence of harm to competition similar to that at issue in those other Third Circuit cases. *Id.*

Similarly, the rebate **[**224]** contracts here imposed no penalties or supply shortages against a payor who chose to cover Auvi-Q. Instead, like *Eisai*, the only consequence for payors who rejected Mylan's exclusive offers was losing access to greater discounts. Plaintiffs try to distinguish *Eisai*, arguing its discounts differ from Mylan's rebate contracts because the contracts at issue in *Eisai* didn't use rebates to secure exclusivity. That doesn't matter. The result is the same whether rebates are paid based on a high market share discount or exclusivity—*i.e.*, the contracts reward buyers for excluding rivals by giving them the highest discounts. In both instances, however, customers remain "free to switch to a different product in the marketplace" and if they "choose not to do so" because, for example, they want access to a higher discount, then "competition has not been thwarted." Id. at 403; *see also* Race Tires Am., 614 F.3d at 79 (finding that when tire suppliers offered exclusive contracts, "it is no more an act of coercion . . . than it is for such suppliers to offer the lowest tire prices").

The court thus holds that the summary judgment facts present no triable issue whether Mylan's exclusive rebate agreements coerced payors into accepting their **[**225]** terms. Like *Eisai*, Mylan motivated payors to agree to exclusivity by offering them higher discounts but they never "foreclosed [payors] from purchasing competing drugs . . . ." Eisai, 821 F.3d at 407.

---

exclusivity. Instead, they simply assert incentives explaining why a PBM would agree to exclusivity in exchange for higher rebates. The court addresses plaintiffs' incontestable demand theory in greater detail when considering Factor #2 (substantial market foreclosure). But, these two arguments don't present a triable issue on the coercion factor.

ii. Factors #3 & #6: Contract Duration and Terminability

Defendants next assert that the summary judgment facts present no triable issue whether the duration and terminability of Mylan's rebate contracts foreclose competition. As courts and commentators have recognized, "**HN45**[] short-term" exclusive dealing arrangements "present little threat to competition." *ZF Meritor, 696 F.3d at 286*; *see also* *Omega Env't, Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1163 (9th Cir. 1997)* (concluding "the short duration and easy terminability" of exclusivity agreements "negate[s] substantially their potential to foreclose competition"); XI Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1807b1, at 138 (4th ed. 2018) ("Discounts conditioned on exclusivity in relatively short-term contracts are rarely problematic."). This is so because while "a dominant firm's ongoing policy of offering discounts in exchange for exclusivity gives buyers incentives to stay with the same firm[,] any above-cost discount can be matched by an equally efficient firm." XI Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1807b1, at 138. And, "[e]ven an exclusive-dealing **[**226]** contract covering a dominant share of a relevant market need have no adverse consequences if the contract is let out for frequent rebidding." XI Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1802g2, at 101.

[*1009] Defendants assert that the summary judgment facts here establish that Mylan's rebate contracts were short-term and easily terminable. Thus, defendants argue, the rebate contracts never prevented payors from making formulary changes. The court agrees. The undisputed summary judgment facts show that many of Mylan's rebate agreements had terms of just two or three years. Doc. 2152-8 at 2, 9 (Defs.' Ex. 208) (two years); Doc. 2152-9 at 2 (Defs.' Ex. 209) (two years); Doc. 2152-10 at 2-3 (Defs.' Ex. 211) (two years); Doc. 2192-8 at 11 (Pls.' Ex. 57) (three years). And, PBMs typically renegotiated their rebate agreements at least annually. *See* Doc. 2150-16 at 6 (Defs.' Ex. 189) (Stein (Humana) Dep. 228:1-5); *see also* Doc. 2150-11 at 23-24 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 185:24-186:22).

Also, most of Mylan's rebate agreements with payors allowed either party to terminate the agreement without cause on 90 days' notice or less. *See, e.g.*, Doc. 2152-8 at 9 (Defs.' Ex. 208); Doc. 2152-12 at 5 (Defs.' **[**227]** Ex. 213); Doc. 2155-1 at 3 (Defs.' Ex. 215). And, Mylan's rebate agreements generally reserve to PBMs the right to alter their commercial formularies at any time. *See* Doc. 2155-2 at 4 (Defs.' Ex. 216); *see also* Doc. 2155-3 at 8 (Defs.' Ex. 217); Doc. 2155-4 at 8 (Defs.' Ex. 218); Doc. 2155-5 at 7 (Defs.' Ex. 219).

The summary judgment record also shows that payors actually invoked these terminability provisions, initiating rebate negotiations mid-contract. Doc. 2150-10 at 34-37 (Defs.' Ex. 183) (Anderson (CVS) Dep. 231:2-234:3) (describing how CVS asked Sanofi and Mylan for better rebate offers mid-contract term); Doc. 2152-11 at 3-4 (Defs.' Ex. 212) (Borneman Dep. 28:9-29:17) (testifying that Sanofi's rebate agreements typically "were annual contracts" and sometimes were renegotiated midterm). Indeed, it's undisputed that Sanofi renegotiated its 2013 and 2014 formulary coverage with payors, and in some cases, achieved better coverage for Auvi-Q when it made stronger rebate offers. As discussed above, Sanofi successfully reversed its exclusion from ESI's national formulary in 2015, achieved co-preferred status with Aetna on its value and premier formularies, and improved its coverage **[**228]** with CVS by securing co-preferred Tier 2 formulary coverage for Auvi-Q on CVS's Preferred Drug List and exclusive coverage on CVS's Value Based and Advanced Control Formularies. Doc. 2161-10 at 2 (Defs.' Ex. 283); Doc. 2162-3 at 2 (Defs.' Ex. 291); Doc. 2162-5 at 2-28 (Defs.' Ex. 293); Doc. 2162-6 at 2 (Defs.' Ex. 294).

Also, the undisputed facts show that Sanofi had the opportunity in 2014 to renegotiate with payors OptumRx/UnitedHealthcare and MedImpact for better coverage on their formularies for 2015. Doc. 2162-14 at 3 (Defs.' Ex. 302); Doc. 2163-2 at 3 (Defs.' Ex. 305). Both payors sought offers with increased discounts, but Sanofi, when it came to OptumRx/UnitedHealthcare, made an offer that was less competitive than Mylan's. Doc. 2162-15 at 5 (Defs.' Ex. 303); Doc. 2163-1 at 10 (Defs.' Ex. 304). And with MedImpact, Sanofi declined to make the offer MedImpact had requested. Doc. 2163-3 at 2 (Defs.' Ex. 306); Doc. 2163-4 at 2 (Defs.' Ex. 307).

Courts have found that exclusionary contracts of similar duration and terminability as the rebate agreements at issue here don't produce "a significant exclusionary effect." *Methodist Health Servs. Corp. v. OSF Healthcare Sys., 859 F.3d 408, 409-410 (7th Cir. 2017)* (finding **HN46**[] no exclusionary effects from contracts that expire "every **[**229]** year or two" thus "giving other [competitors], such as [plaintiff], a shot at obtaining the next contract by outbidding [defendant]"); *see also* Omega Env't, 127 F.3d at 1163-64 (concluding that the "the short duration [*i.e.*, one year terms] and easy **[*1010]** terminability of these agreements [*i.e.*, 60 days' written notice] negate substantially their potential to foreclose competition" because "a competing manufacturer need only offer a better product or a better deal to acquire their services"); Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 237-38 (1st Cir. 1983) (affirming summary judgment against Sherman Act § 2 claim for "exclusionary" practices and finding that preclusive agreements that "lasted about two years" were reasonable). In fact, some courts have found that short-term exclusivity agreements "may actually encourage, rather than discourage, competition, because the incumbent and other, competing [sellers] have a strong incentive continually to improve the care and prices they offer in order to secure the exclusive positions." Balaklaw v. Lovell, 14 F.3d 793, 799 (2d Cir. 1994).

Plaintiffs disagree, citing several cases for the proposition that even contracts of short duration and easy terminability can restrain competition. Doc. 2190-1 at 100-01. The cited cases differ, though, because their facts presented questions whether the practical **[**230]** effect of the contracts rendered the duration and terminability of the agreement meaningless. For example, in *ZF Meritor*, the court found that the exclusive agreements at issue presented a threat to competition because they lasted for five years, effectively "lock[ing] up over 85% of the market[,]" and the agreements' termination provisions were "essentially meaningless" because defendant "had assured that there would be no other supplier that could fulfill the [buyers'] needs or offer a lower price." 696 F.3d at 287. Also, the record included evidence that "many of the terms of the [contracts] were unfavorable to the [buyers] and their customers, but that the [buyers] agreed to such terms because without [defendant's] transmissions, the [buyers] would be unable to satisfy customer demand." Id. at 285; *see also* McWane, Inc. v. FTC, 783 F.3d 814, 833-34 (11th Cir. 2015) (rejecting argument that short-term agreements were reasonable restraints on competition because the "practical effect" of exclusive dealing arrangement that required buyers to purchase all pipe fittings from defendant or lose rebates and access to defendants' supply "was to make it economically infeasible for distributors to . . . switch" to another competitor (citation and internal quotation marks **[**231]** omitted)); United States v. Dentsply, Int'l, Inc., 399 F.3d 181, 193-94 (3d Cir. 2005) (finding that "in spite of the legal ease with which the relationship can be terminated, the [buyers] have a strong economic incentive to continue" purchasing defendant's product because "the economic elements involved—the large share of the market held by [defendant] and its conduct excluding competing manufacturers—realistically make the arrangements" unlawful exclusionary contracts); Minn. Mining & Mfg. Co. v. Appleton Papers, Inc., 35 F. Supp. 2d 1138, 1144 (D. Minn. 1999) (holding that "genuine issues of fact [existed] whether [defendant's] agreements are actually terminable at will" because plaintiff had "produced evidence that [defendant's] sole-sourcing agreements often include incentives that have the practical effect of tying up [competition] over a period of several years").[63]

[*1011] In contrast here, the summary judgment facts present no triable issue whether the practical effects of Mylan's rebate agreements—despite their short duration and termination provisions—threatened competition. Just the opposite, the summary judgment facts establish that payors frequently renegotiated rebate contracts with manufacturers, invoked their early termination provisions, and made changes to formulary coverage and rebate percentages. Also, this summary judgment **[**232]** record includes no facts from which a jury could infer that the practical effects of the rebate agreements made it so payors "were not free to walk away from the agreements and purchase products from the supplier of their choice." ZF Meritor, 696 F.3d at 287 (citing Dentsply, 399 F.3d at 194). Instead, the summary judgment record provides several examples where payors renegotiated formulary coverage

[63] Plaintiffs also cite several Supreme Court cases purportedly "condemn[ing] exclusionary agreements even if they are terminable." Doc. 2190-1 at 100-01. But those cases just mention the contract terms in passing without significant analysis whether the terminability provisions produced an exclusionary effect, and the cases turned, instead, on other facts that produced a foreclosure of competition. *See* FTC v. Brown Shoe Co., 384 U.S. 316, 318-19, 86 S. Ct. 1501, 16 L. Ed. 2d 587 & n.2 (1966) (reciting a provision of the agreement that refused to grant certain benefits to shoe retailers who "are dropped or voluntarily withdraw from the" program but, in another part of the opinion, discussing the facts that supported the finding "that the franchise program effectively foreclosed Brown's competitors from selling to a substantial number of retail shoe dealers"); *see also* Standard Oil Co. v. United States, 337 U.S. 293, 296, 314, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949) (concluding that, although a requirements contract lasted only a year and was terminable with 30 days' notice, "the affected proportion of retail sales of petroleum products is substantial" and the contracts presented "a potential clog on competition" that "would impede a substantial amount of competitive activity").

with both Mylan and Sanofi in an effort to secure greater rebates for customers—*i.e.*, as ESI, Aetna, and CVS did with their 2015 formulary coverage decisions.

In sum, the court concludes that the duration and terminability of Mylan's rebate contracts at issue here present no triable issue whether these contract provisions produced significant exclusionary effects.

iii. Factor #7: Use of Exclusive Dealing Contracts by Competitors

Defendants argue that use of exclusive dealing contracts by competitors in the EAI industry precludes a jury from finding or inferring that Mylan's rebate contracts were unlawful exclusive dealing arrangements. Indeed, the undisputed facts overwhelmingly show that Mylan's competitor in the EAI market—Sanofi—made offers conditioning higher rebates on a payor's agreement to restrict or exclude EpiPen. Doc. 2161-7 at 2 **[**233]** (Defs.' Ex. 280) (Sanofi's CEO suggesting that Sanofi make "an offer that kicks [Mylan] off a formulary"); Doc. 2161-12 at 3 (Defs.' Ex. 285) (showing Sanofi achieved exclusive coverage with ESI formulary); Doc. 2161-13 at 2 (Defs.' Ex. 286) (showing Sanofi offered Aetna a 65% rebate for exclusivity for 2015); Doc. 2162-4 at 19-20 (Defs.' Ex. 292) (showing that Sanofi offered CVS higher rebates conditioned on exclusive formulary placement).

Also, the summary judgment facts establish that use of exclusive dealing contracts is common in the pharmaceutical industry. *See* Doc. 2150-9 at 33-37 (Defs.' Ex. 182) (Navarro Expert Report ¶¶ 58-60) (explaining that PBMs use "Utilization Management" techniques—such as copayments and tiering, step edits, prior authorization, and benefit exclusion—to incentivize the use of one drug over another); Doc. 2150-16 at 3 (Defs.' Ex. 189) (Stein (Humana) Dep. 210:1-8); Doc. 2150-11 at 28 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 197:7-18). And, PBMs use exclusive rebating practices as a way to negotiate lower prices from manufacturers by offering preferred formulary placement in exchange for greater rebates. Doc. 2150-16 at 3 (Defs.' Ex. 189) (Stein (Humana) **[**234]** Dep. 210:1-8); *see also* Doc. 2150-11 at 28 (Defs.' Ex. 184) (Kautzner (ESI) Dep. 197:7-18). Indeed, the summary judgment facts show some PBMs encouraged use of exclusive **[*1012]** dealing contracts specifically by soliciting Mylan and Sanofi for exclusive offers. Doc. 2159-3 at 3 (Defs.' Ex. 245) (discussing "CVS Caremark's plan to review the [EAI] class and choose an exclusive product"); Doc. 2159-11 at 2 (Defs.' Ex. 253) (noting in CVS's bid solicitation letter to Mylan the availability of "exclusion opportunities"); Doc. 2159-13 at 5 (Defs.' Ex. 255) (explaining that OptumRx "intends to manage the products" in the EAI class "using a combination of tier placement and product exclusion"); Doc. 2160-1 at 2 (Defs.' Ex. 257) (explaining MedImpact was "looking for a 1 of 1 offer for the" EAI class); Doc. 2159-9 at 2 (Defs.' Ex. 251) (asserting that Cigna was "looking for an offer for exclusive epinephrine positioning"). Based on these facts, defendants assert that Mylan's use of exclusive rebate contracts isn't "some anticompetitive scheme devised by Mylan; it is the way the entire pharmaceutical industry works." Doc. 2142-1 at 92.

Plaintiffs respond, arguing it's not proper to consider other drug **[**235]** markets, and instead, the court must confine its analysis to the EAI market. *Roxul USA, Inc. v. Armstrong World Indus., Inc., No. 17-1258, 2019 U.S. Dist. LEXIS 37926, 2019 WL 1109868, at *11 (D. Del. Mar. 8, 2019)* ("We are not similarly persuaded by the parties' reliance on guidance from other markets and involving other competitive strategies."). And, in the proper context of examining just the EAI market, plaintiffs contend, the undisputed facts show that Mylan didn't offer rebate contracts that conditioned higher rebates for EpiPen based on exclusivity until after Sanofi launched Auvi-Q. *Compare* Doc. 2155-9 at 5 (Defs.' Ex. 224) (showing that Mylan was offering up to 8% rebates in 2011), *with* Doc. 2199-3 at 2-5 (Pls.' Ex. 209) (showing that by June 2015, Mylan's Pricing Committee had approved rebates in the range of 50% to 60% for the largest PBMs and up to 30% for specifically targeted managed care accounts conditioned on exclusive or preferred formulary coverage for EpiPen). But, as defendants correctly argue, these facts actually demonstrate increased competition. As competitor Auvi-Q prepared to enter the market, Mylan recognized that it posed a threat to EpiPen; so, Mylan devised a contracting strategy that rewarded PBMs with higher rebates in exchange for their agreement to give EpiPen exclusive formulary **[**236]** placement over Auvi-Q.[64] *See* Doc. 2197-17 at 4 (Pls.' Ex.

---

[64] Plaintiffs assert that Mylan's rebate contracts didn't actually represent price competition because it's undisputed that EpiPen prices rose during the relevant time period. And, plaintiffs contend, Mylan's rebating practices caused the price increase because

181) (Korczynski Dep. 254:3-10); Doc. 2197-19 at 2 (Pls.' Ex. 183); Doc. 2197-13 at 3 (Pls.' Ex. 177) (Willing Dep. 63:17-25).

In sum, the summary judgment facts present no question whether competitors in the industry used exclusive contracts. To the contrary, the summary judgment facts show that exclusive contracts are "a normal competitive tool within the [EAI drug] industry." *Concord Boat Corp. v.* ***[*1013]*** *Brunswick Corp., 207 F.3d 1039, 1062 (8th Cir. 2000)*.

iv. Factor #2: Substantial Market Foreclosure

Last, defendants argue that Mylan's exclusive rebate contracts didn't foreclose substantial market share. ***HN47***[] As already explained, an exclusive contract doesn't violate the antitrust laws unless it is "probable that performance of the contract will foreclose competition in a substantial share of the line of commerce affected." *Tampa Elec., 365 U.S. at 327*. This type of foreclosure occurs when "'the opportunities for other traders to enter into or remain in [the] market [are] significantly limited'" by the exclusive dealing arrangements. *United States v. Microsoft Corp., 253 F.3d 34, 69, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (quoting *Tampa Elec., 365 U.S. at 328*).

HN48[] "Traditionally a foreclosure percentage of at least 40% has been a threshold for liability in exclusive dealing cases." *McWane, Inc. v. FTC, 783 F.3d 814, 837 (11th Cir. 2015)*; *see also* Jonathan M. Jacobson, *Exclusive Dealing, "Foreclosure,"* ***[**237]*** *and Consumer Harm*, 70 Antitrust L.J. 311, 362 (2002) ("The recent decisions uniformly favor defendants where foreclosure levels are 40 percent or less, and so it is fair to say that foreclosure in excess of that amount is a threshold requirement where foreclosure is the asserted basis of the antitrust violation."). But "some courts have found that a lesser degree of foreclosure is required when the defendant is a monopolist." *McWane, 783 F.3d at 837* (citing *Microsoft, 253 F.3d at 70*); *see also Microsoft, 253 F.3d at 70* (stating in *dicta* that "a monopolist's use of exclusive contracts . . . may give rise to a *§ 2* violation even though the contracts foreclose less than the roughly 40% or 50% share usually required in order to establish a *§ 1* violation"); Jacobson, *supra*, 70 Antitrust L.J. at 311-12, 362-63 (recognizing that "[c]ourts have found liability in some cases even when the amount of 'foreclosure' is zero" and "if price, output, quality, choice, or innovation have been harmed, the lack of percentage foreclosure is no defense").

Defendants argue that the summary judgment facts fail to support any triable issue of foreclosure. Defendants cite summary judgment evidence showing that Auvi-Q never was excluded from certain PBMs' formularies, including CVS, Prime, and Cigna, who covered Auvi-Q on Tier 2 or Tier 3 without restriction. **[**238]** Doc. 2150-10 at 9-13 (Defs.' Ex. 183) (Anderson (CVS) Dep. 112:12-116:23); Doc. 2150-15 at 16-17, 23-24 (Defs.' Ex. 188) (Hall (Prime) 110:22-111:9, 129:24-130:7); Doc. 2150-17 at 18-22 (Defs.' Ex. 190) (Kronberg (Cigna) Dep. 79:3-83:8). Also, defendants assert, rebate agreements gave payors the ability to switch their formularies to cover any combination of EpiPen and Auvi-Q at any time. *See, e.g.*, Doc. 2155-2 at 4 (Defs.' Ex. 216) (Mylan/ESI rebate agreement) ("Nothing in this Agreement shall be construed to limit the ability of ESI or any ESI Client to remove a Product from formulary."). And, the terminability provisions allowed competing drug providers to renegotiate their formulary placement at any time. So, defendants argue, these facts show that the exclusionary rebate contracts produced no substantial foreclosure.

Plaintiffs respond, citing their expert's analysis showing the percentage of Auvi-Q foreclosure to consumers—both insured and uninsured. Doc. 2192-6 at 90 (Pls.' Ex. 55) (Elhauge Reply Expert Report Fig. 104). Prof. Elhauge performed an analysis that shows, in 2013, about 80% of consumers had access to Auvi-Q. *Id.* In 2014, that

---

it was the price increases that, in turn, allowed Mylan to offer higher rebates to payors. But this argument ignores summary judgment evidence showing that rebate contract negotiations consisted of more than negotiations over rebate percentages. They also included negotiations over contract terms governing WAC prices and price protection. *See* Doc. 2159-6 at 2 (Defs.' Ex. 248) (reporting that OptumRx asked whether Mylan was "interested in a guaranteed exclusive position for EpiPen in exchange for the addition of 10% price protection"); *see also* Doc. 2159-7 at 3 (Defs.' Ex. 249) (warning to Mylan by OptumRx that "EpiPen is at risk" if it didn't offer price protection because the PBM was "well aware of the price increases Mylan [had] taken"); Doc. 2193-1 at 4 (Defs.' Ex. 82) (showing Sanofi's offer to ESI of a 60.625% rebate with 10% price protection for exclusivity).

number fell to around 65%, but it grew **[**239]** again in 2015, to about 69%, meaning that Auvi-Q was foreclosed from about 31% of consumers. *Id.* Plaintiffs argue that Prof. Elhauge's foreclosure percentages support **[*1014]** a reasonable inference that Mylan's exclusive rebate contracts produced substantial market foreclosure. The court disagrees. These calculated foreclosure percentages alone don't suffice to create a triable issue of foreclosure when considered alongside the rest of the summary judgment evidence.

As discussed extensively above, the summary judgment facts show that Mylan's rebate contracts were short in duration and easily terminable. It's also undisputed that payors renegotiated contracts with Mylan, Sanofi, and other drug suppliers regularly, typically on an annual basis. As Professors Areeda and Hovenkamp explain,

> ***HN49***[] The relevant question [when evaluating foreclosure] is always what percentage of the market is effectively "unrestricted" during a specific time period. The unrestricted set includes (a) those dealers who are not bound by exclusive-dealing arrangements at all; plus (b) those dealers whose contracts will expire during that time period in any event; and (c) those dealers whose contracts have termination clauses **[**240]** permitting them to sever existing arrangements during that time period and who realistically can do so.

XI Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1802g2, at 102.

Here, the summary judgment facts show that payors could invoke the contracts' termination provisions, and they actually renegotiated their rebate percentages often to secure better pricing from drug manufacturers in exchange for better formulary positions. And, the summary judgment facts establish that Sanofi did the same thing. Once Sanofi decided to pursue a more aggressive rebate strategy for 2015, it had success securing better formulary placement for Auvi-Q. This success tracks with Prof. Elhauge's analysis showing that Auvi-Q's foreclosure percentage steadily decreased in 2015, as Auvi-Q achieved better formulary coverage in response to its more aggressive rebating offers. This trend also shows that Sanofi's more aggressive rebating strategy—one that, like Mylan's, offered higher rebates in exchange for exclusivity—increased competition in the market. And, increased competition is encouraged by the antitrust laws. Indeed, the summary judgment facts show that both Sanofi and Mylan offered higher rebates to payors conditioned **[**241]** on restrictions or exclusivity. And, when Mylan and Sanofi did so, they had success in achieving better formulary placement for their competing EAI products. From these facts, no reasonable factfinder could find or infer that Auvi-Q was foreclosed from a substantial share of the market.

Under similar facts, courts have refused to find a triable issue of substantial foreclosure. *See, e.g.,* *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 997 (9th Cir. 2010)* (affirming summary judgment against Sherman Act claims because evidence showed that "[a]ny customer subject to one of [defendant's] market-share discount agreements could choose at anytime to forego the discount offered by [defendant] and purchase from a generic competitor[,]" so the "agreements at issue here did not fore-close [defendant's] customers from competition because a competing manufacturer needed only offer a better product or a better deal to acquire their business" (citations, internal quotation marks, and internal brackets omitted)); *Eisai Inc. v. Sanofi-Aventis U.S., LLC, No. 08-4168 (MLC), 2014 U.S. Dist. LEXIS 46791, 2014 WL 1343254, at *34-35 (D.N.J. Mar. 28, 2014)* (holding that Sanofi's market share discount contracts didn't foreclose competition in the market because the summary judgment evidence showed that the contracts "were terminable at any time by any party for any reason upon thirty days' written notice" **[**242]** and plaintiff's market **[*1015]** share grew during the relevant time period, which "indicate[d] that customers could walk away from the [Sanofi] discounts when they so desired, and they did").

Plaintiffs also assert that the EAI market's "concentrated channels of distribution and spillover effects" present a triable issue of substantial market foreclosure. Doc. 2190-1 at 96. It is undisputed that Mylan recognized the spillover effects that EpiPen's exclusionary contracts might produce. Doc. 2199-9 at 2 (Pls.' Ex. 215) (showing that Mylan trained its sales force to understand "the 'spill over' effect[,]" meaning that in territories where Mylan was preferred on a majority of plans, the sales force should "emphasize the preferred plans[.]"); *see also* Doc. 2197-7 at 5 (Pls.' Ex. 171) (Foster Dep. 278:1-9) (explaining that the "concept of spillover typically refers to when a doctor is used to writing [a] product" because the manufacturer has "strong formulary positions" and "then it tends to have a spillover effect, where the doctor just gets patterned into" prescribing the product).

Defendants respond to plaintiffs' "spillover" effects argument, asserting that plaintiffs provide no legal support for **[**243]** their theory that the court can consider "spillover" effects in the analysis whether substantial market foreclosure exists. And, defendants contend, evidence that some physicians preferred EpiPen doesn't permit plaintiffs to inflate their foreclosure percentages. That is especially true where, as here, plaintiffs never quantify the degree of this purported spillover into a market foreclosure percentage. And as the antitrust plaintiffs, they shoulder the burden of proof to marshal evidence supporting a genuine issue of foreclosure. Without any evidence showing the quantity of foreclosure attributable to any alleged "spillover" effect, the court can't find that a genuine issue about foreclosure exists on that basis.

In sum, the court holds that the summary judgment facts here present no triable issue whether Mylan's exclusive rebate contracts produced substantial market foreclosure.

v. Conclusion

After considering the *ZF Meritor* factors, the court finds that no reasonable jury could find or infer from the summary judgment facts that: (1) Mylan's exclusive rebate contracts coerced payors into accepting their terms; (2) the contracts' terms governing duration and terminability produced exclusionary **[**244]** effects; (3) competitors in the EAI industry didn't use exclusive rebate contracts, and instead, the use of exclusive rebate contracts was limited just to Mylan; or (4) the contracts produced substantial market foreclosure. Each of these factors favors a finding that the summary judgment facts present no triable issue that Mylan's rebate contracts foreclosed competitors from a substantial share of the market. Applying a rule of reason analysis, the summary judgment facts establish that Mylan's exclusive contracts were relatively short in duration and easily terminable, they were not the product of any unlawful coercion on Mylan's part, and they didn't foreclose Sanofi from competing in the EAI drug market. The court thus concludes under a rule of reason analysis that plaintiffs haven't shouldered their burden to present a triable issue whether Mylan's exclusive rebate contracts violated the Sherman Antitrust Act. So, the court grants summary judgment against plaintiffs' antitrust claims premised on their exclusive dealing theory.

b. Pricing Above Cost

Defendants assert a second argument supporting their summary judgment motion against plaintiffs' exclusive dealing claims. Defendants **[**245]** argue that the summary judgment facts establish that Mylan always offered prices for the EpiPen that **[*1016]** were above cost. And, that practice, defendants say, means they didn't violate the antitrust laws because price discounts at above-costs prices are procompetitive.

HN50[] The Supreme Court expressly has approved competition based on price, recognizing that "[l]ow prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition[.]" *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 223, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (citation and internal quotation marks omitted). The Supreme Court has noted "the exclusionary effect of prices above a relevant measure of cost . . . reflects the lower cost structure of the alleged predator, and so represents competition on the merits, or is beyond the practical ability of a judicial tribunal to control without courting intolerable risks of chilling legitimate price-cutting." *Id.* The Supreme Court thus has refused to "hold that the antitrust laws protect competitors from the loss of profits due to such price competition" because such a ruling "would, in effect, render illegal any decision by a firm to cut prices in order to increase market share." *Id.* (citation and **[**246]** internal quotation marks omitted). And, the "antitrust laws require no such perverse result." *Id.* (citation and internal quotation marks omitted).

Given this "economic reality," the Supreme Court has "established two prerequisites to recovery on claims of predatory pricing." *Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., Inc., 549 U.S. 312, 318, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)*. "'First, a plaintiff seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs.'" *Id.* (quoting *Brooke Grp., 509 U.S. at 222*). And second, "a plaintiff must demonstrate that 'the competitor had . . . a dangerous probabilit[y] of recouping its investment in below-cost prices.'" *Id. at 318-19* (quoting *Brooke Grp., 509 U.S. at 224*).

This two-prong test "is known as the price-cost test." *Eisai, Inc. v. Sanofi Aventis U.S., LLC, 821 F.3d 394, 408 (3d Cir. 2016)*.

The Third Circuit addressed the question whether the price-cost test applies to an alleged anticompetitive rebate program in *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254 (3d Cir. 2012)*.[65] *ZF Meritor* recognized that "**HN51**[] a plaintiff's characterization of its claim as an exclusive dealing claim does not take the price-cost test off the table." *Id. at 275*. Instead, the price-cost test still may apply because "contracts in which discounts are linked to purchase (volume or market share) targets are frequently challenged as *de facto* exclusive dealing arrangements on **[**247]** the grounds that the discounts induce customers to deal exclusively with the firm offering the rebates." *Id.* So, "when price is the clearly predominant mechanism of exclusion, the price-cost test tells us that, so long as the price is above-cost, the procompetitive justifications for, and the benefits of, lowering prices far outweigh any potential anticompetitive effects." *Id.*

But, *ZF Meritor* nonetheless refused to apply the price-cost test in that case because plaintiffs "did not rely solely on the exclusionary effect of [defendant's] prices" to support their exclusive dealing claim. *Id. at 277*. Instead, plaintiffs "highlighted a number of anticompetitive provisions" in **[*1017]** the exclusive dealing agreements, including plaintiffs' allegation that defendant "used its position as a supplier of necessary products to persuade [customers] to enter into agreements imposing *de facto* purchase requirements of roughly 90% for at least five years, and that [defendant] worked in concert with [customers] to block customer access to Plaintiffs' products, thereby ensuring that Plaintiffs would be unable to build enough market share to pose any threat to [defendant's] monopoly." *Id.* The Third Circuit thus **[**248]** concluded that "price itself was not the clearly predominant mechanism of exclusion," and so, the price-cost test did not apply to preclude plaintiffs' exclusive dealing claim in that case. *Id.*

Applying *ZF Meritor*, other courts also have refused to apply the price-cost test to exclusive dealing claims when price itself was not the clearly predominant mechanism of exclusion. *See, e.g., Dial Corp. v. News Corp., 165 F. Supp. 3d 25, 32 (S.D.N.Y. 2016)* (denying summary judgment against plaintiffs' exclusive dealing claim and holding that the price-cost test did not apply because price was not the "clearly predominant method of exclusion" but, instead, "the length of the exclusive contracts and their staggered terms may also foreclose competition"); *UniStrip Techs., LLC v. LifeScan, Inc., 153 F. Supp. 3d 728, 737-38 (E.D. Pa. 2015)* (holding that the price-cost test did not apply to plaintiff's exclusive dealing claim because plaintiff's Complaint never alleged that price was defendants' means of exclusion; instead, plaintiff based its exclusive dealing claim on defendants' allegedly anticompetitive predatory conduct through exclusive dealing arrangements preventing competitors from entering the market).

Here, defendants contend that the price-cost test applies because, unlike the facts at issue in *ZF Meritor*, this case's summary judgment **[**249]** facts establish that price was the clearly predominant mechanism of exclusion. And, defendants argue, the undisputed facts establish that Mylan priced EpiPen above cost. *See* Doc. 2163-5 at 9-10, 39-55 (Defs.' Ex. 308) (Willig Expert Report ¶¶ 14, 89-122) (concluding that "Mylan's prices, taking full account of rebates and price protection, were above an appropriate measure of its cost" in analysis of PBM contracts). Plaintiffs disagree. They assert that the price-cost test applies only when price is the predominant method of exclusion. But here, plaintiffs contend, their unlawful exclusive dealing claims are based on Mylan's rebating practices—not price—so their claims aren't subject to the price-cost test.

In the end, the court need not decide this issue. Confronted with a similar argument by a defendant seeking to apply the price-cost test to market share discount contracts it had offered customers, the Third Circuit declined to consider "when, if ever, the price-cost test applies to this type of claim." *Eisai, 821 F.3d at 409*. It instead considered whether the contracts at issue were unlawful exclusive dealing arrangements under a rule of reason analysis. *Id.* The Third Circuit "concluded that [plaintiff's] **[**250]** claims [were] not substantiated and that they

---

[65] The parties do not cite and the court's own research has not located any case where the Tenth Circuit has considered whether the price-cost test applies to an exclusive dealing claim based on a discount or rebate program. The court predicts, if presented with the question, the Tenth Circuit would find *ZF Meritor*'s reasoning persuasive and apply it to the facts presented here.

fail[ed] a rule of reason analysis[.]" *Id.* As a consequence, the Third Circuit decided that it need not consider whether the price-cost test applied.[66] *Id.*

[*1018] Likewise, here, the court already has analyzed plaintiffs' exclusive dealing claims under a rule of reason analysis. That analysis has led the court to conclude that the summary judgment facts present no triable issue whether Mylan's rebate contracts violate the Sherman Antitrust Act. So, the court need not decide whether the price-cost test applies to preclude plaintiffs' antitrust claims. The court thus declines to decide whether summary judgment is warranted for this second reason—*i.e.*, whether the price-cost test applies to plaintiffs' antitrust claims and whether plaintiffs' claims fail under that test because Mylan never priced the EpiPen below its costs.

3. Antitrust Damages

Defendants next argue, if the court doesn't grant summary judgment against plaintiffs' antitrust claims, it should limit plaintiffs' antitrust damages. They provide four reasons.

First, defendants argue that certain state antitrust statutes have two or three year statutes of limitations that **[**251]** bar any of plaintiffs' claims premised on conduct falling outside the statute of limitations period. Plaintiffs first filed their state law antitrust claims on January 9, 2017. Amended Class Action Complaint, *Huston v. Mylan, N.V.*, No. 16-2796-JWL (D. Kan. Jan. 9, 2017), ECF No. 6. So, defendants argue, the court must preclude plaintiffs from recovering any damages incurred two years before that date—before January 9, 2015—under Alabama law. *See* *Ala. Code § 6-2-38(l)* (codifying two year statute of limitations for all "actions for any injury to the person or rights of another not arising in contract"). And, defendants argue, it must preclude plaintiffs from recovering any damages incurred three years before they filed their state law antitrust claims—before January 9, 2014—under Kansas, Mississippi, and Tennessee law.[67] *See* *Four B Corp. v. Daicel Chem. Indus., Ltd., 253 F. Supp. 2d 1147, 1156 (D. Kan. 2003)* (applying *Kan. Stat. Ann. § 60-512(2)*'s three-year limitation period to Kansas Restraint of Trade Act claims); *see also* *Miss. Code Ann. § 15-1-49* (providing three year statute of limitations for all "actions for which no other period of limitation is prescribed"); *State ex rel. Leech v. Levi Strauss & Co.*, No. 79-722-III, 1980 WL 4696, at *3 (Tenn. Ch. Sept. 25, 1980) (concluding private antitrust suit for injury or damage "sounds in tort" and "is subject to the three year statute of limitation in" *Tenn. Code Ann. § 28-3-105*).

Plaintiffs respond, invoking the doctrines **[**252]** of fraudulent concealment, equitable tolling, and the discovery rule. *See* *Aldrich v. McCulloch Props., Inc., 627 F.2d 1036, 1042 (10th Cir. 1980)* (explaining that facts supporting a finding or inference of "affirmative conduct to conceal the fraud" invokes "the doctrine of equitable tolling"); *see also* *Allred v. Chynoweth, 990 F.2d 527, 530 (10th Cir. 1993)* (discussing Utah's application of "the discovery rule to toll **[*1019]** the statute of limitations" and explaining that it "estop[s]" defendant "from relying on the statute of limitations as a defense to the action" when defendant "misleads the plaintiff or causes a delay in the bringing of a

---

[66] At the district court level, however, the New Jersey federal court concluded "that price was the predominant mechanism of exclusion" of the market share discount contracts at issue, and "thus, the price-cost" test applied. *Eisai Inc. v. Sanofi-Aventis U.S., LLC, No. 08-4168 (MLC), 2014 U.S. Dist. LEXIS 46791, 2014 WL 1343254, at *30 (D.N.J. Mar. 28, 2014)* (citations and internal quotation marks omitted). The court explained that under the price-cost test, "so long as the price is above-cost, the procompetitive justifications for, and the benefits of, lowering prices far outweigh any potential anticompetitive effects." *Id.* (citations and internal quotation marks omitted). Because it was undisputed that defendant Sanofi never sold its drug below its costs to produce the product, the New Jersey district court held that plaintiff couldn't "recover under the antitrust laws, and summary judgment must be granted in favor of Sanofi." *Id.* The New Jersey court also applied a rule of reason analysis to the plaintiff's exclusive dealing claims and concluded the "result would be the same." *Id.; see also* *2014 U.S. Dist. LEXIS 46791, [WL] at *30-36*.

[67] These statute of limitations arguments are mooted by the courts' other conclusions about antitrust damages. As discussed, plaintiffs don't assert any damages claim based on their generic delay theory before March 14, 2014—the date when (according to plaintiffs' theory) Teva would have launched its generic EAI "but for" the alleged unlawful reverse payment settlement. And, the court dismisses plaintiffs' Tennessee state law claims because there is no properly named plaintiff who asserts claims under that state's laws.

cause of action" (citation and internal quotation marks omitted)). Plaintiffs argue that these doctrines toll the limitations periods through August 2016—when Congress announced its investigation of EpiPen pricing and thus putting plaintiffs on notice of defendants' alleged unlawful activity.

Defendants disagree that these doctrines save plaintiffs' claims from the statutes of limitations bar. Defendants assert that these doctrines don't apply here because plaintiffs can't show they diligently pursued their causes of action. *See* Crowe v. Servin, 723 F. App'x 595, 597 (10th Cir. 2018) ("A litigant seeking equitable tolling must show (1) that [s]he has been pursuing [her] rights diligently, and (2) that some extraordinary circumstances **[**253]** stood in [her] way." (citation and internal quotation marks omitted)); *In re Urethane Antitrust Litig., 913 F. Supp. 2d 1145, 1158 (D. Kan. 2012)* (explaining "doctrine of fraudulent concealment" requires showing "(1) the use of fraudulent means by the conspirators; (2) successful concealment from plaintiffs; and (3) that plaintiffs did not know or by the exercise of due diligence could not have known that they might have had a cause of action" (citation omitted)). For example, defendants assert that the April 2012 public announcement by Teva and Pfizer about the EpiPen patent litigation put plaintiffs on notice of their generic delay claims. And thus, they argue, the limitations clock began running in 2012.

Plaintiffs respond, arguing that the summary judgment facts present a triable issue whether they had the means to discover defendants' unlawful actions before 2016 and whether defendants concealed their actions by entering a reverse payment settlement and issuing misleading press releases. The court agrees with plaintiffs. It can't decide this issue on summary judgment. ***HN52***[] Whether plaintiffs diligently pursued their claims, thus permitting them to avail themselves of the various tolling doctrines, is a factual issue that the jury must decide at trial. *See* ***[**254]*** *Aldrich, 627 F.2d at 1042* ("The question of whether a plaintiff should have discovered the basis of his suit under the doctrine of equitable tolling does not lend itself to determination as a matter of law."); *In re Urethane Antitrust Litig., 913 F. Supp. 2d at 1163* (holding that the "evidence [was] sufficient at least to create a fact question on the issue of fraudulent concealment," so defendant was "not entitled to summary judgment on its statute-of-limitations defense"). Thus, the court declines to limit plaintiffs' antitrust damages on statute of limitations grounds.

Second, defendants argue that the court should limit plaintiffs' generic delay claims to the period between March 14, 2014 to June 22, 2015. The beginning date is the "but for" generic entry date that plaintiffs' expert calculates as the generic entry date produced by an economically rational "but for" settlement in the EpiPen litigation. Plaintiffs respond that defendants' argument is "moot" because plaintiffs' expert doesn't calculate any damages before the March 24, 2014 "but for" generic entry date. Doc. 2190-1 at 106. Because plaintiffs have conceded that they don't offer any evidence of generic delay damages before March 14, 2014, the court grants summary judgment against any claim for generic **[**255]** delay damages before that date.

The end date of the permissible damages period, according to defendants, is June 22, 2015—*i.e.*, the license date that the EpiPen settlement agreement granted Teva. Defendants argue that plaintiffs can't recover any damages after that date because the summary judgment evidence **[*1020]** presents no triable issue whether defendants caused Teva's failure to launch by the settlement's agreed-to generic entry date. The court already addressed this argument in considerable detail when it discussed the causation requirement for plaintiffs' antitrust claims. As the court held, the summary judgment facts, construed in plaintiffs' favor, present a jury question whether defendants caused Teva to delay its efforts to develop its product and whether the delay was a foreseeable consequence of defendants entering a settlement agreement in 2012 that required Teva to wait until 2015 to launch its generic product. So, the court won't grant summary judgment limiting the end date of plaintiffs' damages period to the EpiPen settlement's agreed-to generic entry date.

Third, defendants assert that plaintiffs cannot recover any damages under California's Unfair Competition Law ("UCL"), **[**256]** *Cal. Bus. & Prof. Code §§ 17200-17210*. Defendants correctly argue that "***HN53***[] restitution is the only monetary remedy authorized" by that statute. *Clark v. Superior Ct., 50 Cal. 4th 605, 112 Cal. Rptr. 3d 876, 235 P.3d 171, 176 (Cal. 2010)*. But, defendants contend, plaintiffs never assert any claim for restitution in the Pretrial Order. *See generally* Doc. 2169 (Pretrial Order). Instead, plaintiffs assert that they "seek damages (trebled where appropriate), attorneys' fees, and costs;" and they contend they "are entitled to seek statutory damages, treble damages, and attorneys' fees and costs under various state antitrust laws." *Id.* at 52 (Pretrial Order ¶ 5.a.)

(citing California's Cartwright Act, Cal. Bus. & Prof. Code § 16750, but omitting reference to California's UCL, Cal. Bus. & Prof. Code § 17200).

Plaintiffs disagree, arguing that the Pretrial Order's assertion that plaintiffs are entitled to damages, generally, suffices to assert a restitution claim and put defendants on notice that plaintiffs are seeking restitution under California law for their claims based on alleged violations of California's UCL. They contend that restitution is a form of damages recoverable by class action plaintiffs. *See* Pulaski & Middleman, LLC v. Google, Inc., 802 F.3d 979, 986 (9th Cir. 2015) (explaining that "restitution is available on a classwide basis once the class representative makes the threshold showing of liability under the UCL"). But, **HN54**[] the case law is clear that restitution under **[**257]** the UCL does not include remedies at law (*i.e.*, actual damages); instead, it only provides for equitable remedies. *See* Adir Int'l, LLC v. Starr Indem. & Liab. Co., 994 F.3d 1032, 1043 (9th Cir. 2021) ("Equitable remedies (injunctive relief, restitution, and civil penalties) are the only remedies available under" the UCL (citing Cal. Bus. & Prof. Code §§ 17200-17210)); *see also* Woo v. Home Loan Grp., L.P., No. 07-CV-0202-H(POR), 2007 U.S. Dist. LEXIS 98521, 2007 WL 6624925, at *4 (S.D. Cal. July 27, 2007) (explaining "§ 17200 is an equitable action, and restitution is an equitable remedy" (citing Cortez v. Purolator Air Filtration Prods. Co., 23 Cal. 4th 163, 96 Cal. Rptr. 2d 518, 999 P.2d 706, 715 (Cal. 2000)); Cummings v. Connell, No. CIVS992176WBS DAD, 1999 U.S. Dist. LEXIS 21971, 1999 WL 1256772, at *5 n.4 (E.D. Cal. Dec. 20, 1999) ("Restitution is ordinarily a substitute for *rather than a form of damages*." (emphasis added)).

Here, the Pretrial Order asserts no claim for restitution or any other form of equitable relief. Instead, it "seek[s] damages (trebled where appropriate), attorneys' fees, and costs;" and it states explicitly that plaintiffs "do not seek any other forms of relief." Doc. 2169 at 52 (Pretrial Order ¶ 5.a.).

Our Circuit has instructed that "**HN55**[] a pretrial order should be liberally construed to cover any of the legal or factual theories that might be embraced by [its] **[*1021]** language." Koch v. Koch Indus., Inc., 203 F.3d 1202, 1220 (10th Cir. 2000) (citation and internal quotation marks omitted). But, "a district court may more strictly construe a pretrial order when that order has been refined over time, properly drawn, and drafted with substantial specificity." *Id.* (citations omitted). Here, the parties previously asserted **[**258]** that they engaged in "diligent efforts" to prepare the Pretrial Order, "meeting and conferring and exchanging drafts" of it in the days leading up to the court's deadline for submitting it. Doc. 2072 at 1. The parties asked the court for a four-day extension of time to submit their proposed Pretrial Order, which Judge James granted. *See id.; see also* Doc. 2073. The parties then submitted an 80-page proposed Pretrial Order to the court. It contained signature blocks for five lawyers from five different law firms who represent plaintiffs. Then, at the Final Pretrial Conference, six lawyers appeared on plaintiffs' behalf. Doc. 2169 at 1. After that conference, the court filed the 64-page operative Pretrial Order (Doc. 2169) that contains no claim by plaintiffs for restitution under California's UCL, Cal. Bus. & Prof. Code § 17200. Because plaintiffs didn't include a restitution claim in the Pretrial Order—one that was "refined over time, properly drawn, and drafted with substantial specificity"—the court grants summary judgment against any restitution claim under the UCL. Koch, 203 F.3d at 1220, 1222 (finding that the district court "did not abuse its discretion when it construed a properly drawn, refined, and specific pretrial order as excluding **[**259]** any accounting claims" not specified in the Pretrial Order); *see also* Sunderman v. Westar Energy, Inc., 520 F. Supp. 2d 1269, 1278 (D. Kan. 2007) ("**HN56**[] The pretrial order is the controlling document for trial. . . . Claims not included in the pretrial order are waived."); Lewis v. Glickman, No. 98-4154-SAC, 2000 U.S. Dist. LEXIS 23221, 2000 WL 1863407, at *1 (D. Kan. Nov. 1, 2000) ("The decision to exclude facts or issues as not found in the pretrial order is committed to the trial court's sound discretion." (citation omitted)).

Fourth, defendants argue that plaintiffs' claims asserted under Tennessee law fail for lack of subject matter jurisdiction. The only named plaintiff asserting state ***antitrust law*** violations under Tennessee law is April Sumner. Doc. 60 at 21 (Consolidated Class Action Compl. ¶ 54). But, defendants contend, Ms. Sumner is not a named plaintiff in any underlying case transferred to become part of this MDL. And thus, her participation in this case is "an end run around the proper procedural framework that governs MDL proceedings[.]" In re FCA US LLC Monostable Elec. Gearshift Litig., No. 16-md-02744, 2017 U.S. Dist. LEXIS 216672, 2017 WL 6402992, at *4 (E.D. Mich. Mar. 21, 2017), *reconsideration denied*, No. 16-md-02744, 2017 U.S. Dist. LEXIS 221143, 2017 WL 6402991 (E.D. Mich. Mar. 23, 2017). As the Michigan federal court explained, an MDL proceeding isn't "an environment that can spawn fresh actions by new plaintiffs" because that "is at odds with" the framework established by 28 U.S.C. § 1407. 2017 U.S. Dist. LEXIS 216672, [WL] at *3. In particular, "newly-named plaintiffs who have never filed any lawsuit anywhere, in any court," don't **[**260]** have a case in any "transferor court from which [the transferee court] could inherit its authority over their claims." *Id.* (citation and internal quotation marks omitted). So, defendants argue, the court must dismiss Ms. Sumner's claims for lack of subject matter jurisdiction. *See* In re Mortg. Elec. Registration Sys. (MERS) Litig., No. MD-09-02119-PHX-JAT, 2016 U.S. Dist. LEXIS 95898, 2016 WL 3931820, at *7 (D. Ariz. July 21, 2016) (holding that the court "must dismiss [newly-added MDL plaintiff's] claims for lack of subject-matter jurisdiction" because they "were not transferred to this court through proper MDL procedures but, rather, were simply added by fiat[,]" and thus, the claims "have no **[*1022]** home federal court to which this Court may eventually remand them" (citations and internal quotations omitted)); In re Packaged Ice Antitrust Litig., No. 08-MDL-1952, 2011 U.S. Dist. LEXIS 150426, 2011 WL 6178891, at *9 (E.D. Mich. Dec. 12, 2011) (dismissing newly named plaintiffs to consolidated amended complaint in an MDL proceeding because the amendment "ignored basic Article III principles and . . . bypassed the appropriate MDL process for consolidation of these plaintiffs' claims"); In re Farmers Ins. Exch. Claims Representatives' Overtime Pay Litig., MDL No. 33-1439, 2008 U.S. Dist. LEXIS 90136, 2008 WL 4763029, at *5 (D. Or. Oct. 28, 2008) (dismissing four state law claims because there is "no authority for this court, as an MDL transferee court, to exercise subject matter jurisdiction over state law claims not transferred by the MDL Panel").

Plaintiffs disagree. They argue that defendants waived this argument by conceding subject matter **[**261]** and personal jurisdiction in the Pretrial Order. Doc. 2169 at 2 (Pretrial Order ¶¶ 1.a. & 1.b.). But, "***HN57***[] subject-matter jurisdiction, because it involves a court's power to hear a case, can never be forfeited or waived." Arbaugh v. Y&H Corp., 546 U.S. 500, 514, 126 S. Ct. 1235, 163 L. Ed. 2d 1097 (2006) (citation and internal quotation marks omitted). Instead, the Federal Rules require that the court "must dismiss the action" if it "determines at any time that it lacks subject-matter jurisdiction[.]" Fed. R. Civ. P. 12(h)(3).

Plaintiffs also assert that they have a right to file their RICO claims directly in this court and assert state law antitrust claims as supplemental claims. The court disagrees. The cases plaintiffs cite to support this argument don't address the court's subject matter jurisdiction in an MDL proceeding, but instead address questions about personal jurisdiction. *See* Cory v. Aztec Steel Bldg., Inc., 468 F.3d 1226, 1231 (10th Cir. 2006) (holding that ***HN58***[] 18 U.S.C. § 1965 establishes nationwide service of process for RICO claims); *see also* United States v. Botefuhr, 309 F.3d 1263, 1272 (10th Cir. 2002) (discussing the concept of "pendent personal jurisdiction" which "exists when a court possesses personal jurisdiction over a defendant for one claim" but "lacks an independent basis for personal jurisdiction over the defendant for another claim that arises out of the same nucleus of operative fact"). And, as Judge Vance has **[**262]** observed, "[s]upplemental jurisdiction presupposes the existence of a case, already properly before the court, to which the 'other claims' may be attached." Dorsey v. Mfrs. Life Ins. Co., No. Civ. A. 97-2389, 1997 U.S. Dist. LEXIS 18401, 1997 WL 703354, at *3 (E.D. La. Nov. 10, 1997) "In other words, supplemental jurisdiction does not create original jurisdiction, it merely sweeps 'other claims' under the federal court's jurisdictional rug." *Id.* Here, Ms. Sumner's claims don't properly "arise out of supplemental jurisdiction" because she "never filed a suit of [her] own nor had any suit pending[,]" thus the court can't "consolidate [her] suit with the multidistrict litigation" and "this transferee court 'does not have subject matter jurisdiction to adjudicate an action that is lacking in original federal jurisdiction.'" In re Mortg. Elec. Registration Sys. (MERS) Litig., 2016 U.S. Dist. LEXIS 95898, 2016 WL 3931820, at *8 (quoting Dorsey, 1997 U.S. Dist. LEXIS 18401, 1997 WL 703354, at *3).

Because April Sumner is not a named plaintiff in any underlying case transferred to this MDL, the court dismisses Ms. Sumner's claims because the court lacks subject matter jurisdiction over them. For the same reasons, it dismisses the claims asserted by Donna Anne Dvorak, Michael Gill, and Landon Ipson.[68] And, because it **[*1023]** dismisses Ms. Sumner's claims and no other plaintiff asserts claims for antitrust violations under Tennessee law, the court dismisses the Tennessee ***antitrust law*** **[**263]** claims without prejudice. *See* Doc. 1292 at 3 (dismissing plaintiffs' claims asserted under the West Virginia law because the Class Complaint no longer included any named plaintiff who resides in West Virginia).

[68] The dismissal of these other plaintiffs doesn't require the court to dismiss any pending claims. Other properly named plaintiffs assert the same claims that these plaintiffs have asserted.

4. Conclusion

For reasons explained, the court grants summary judgment against plaintiffs' antitrust claims and denies it in part. The court grants summary judgment against plaintiffs' claims premised on unlawful exclusive dealing. And, the court denies summary judgment against plaintiffs' claims premised on a generic delay claim.

Also, the court grants in part summary judgment against some of plaintiffs' damages claims. Specifically, the court grants summary judgment against: (1) any antitrust damages premised on a generic delay theory occurring before March 14, 2014; (2) any restitution claim under California's Unfair Competition Law, *Cal. Bus. & Prof. Code §§ 17200-17210*; (3) plaintiffs' Tennessee ***antitrust law*** claims; and (4) any claims asserted by plaintiffs April Sumner, Donna Anne Dvorak, Michael Gill, and Landon Ipson. The court denies defendants' arguments seeking summary judgment against plaintiffs' antitrust damages claims in all other respects.

Now, the court turns to consider defendants' arguments against **[**264]** plaintiffs' RICO claims.

B. RICO Claims

Plaintiffs assert RICO claims under *18 U.S.C. § 1962(c)* & *(d)*. Doc. 2169 at 42, 44-45 (Pretrial Order ¶¶ 4.a., 4.d.). *Subsection 1962(c) of RICO* makes it:

> unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

18 U.S.C. § 1962(c). ***HN59***[] *Subsection 1962(d)* makes it "unlawful for any person to conspire to violate" *subsection 1962(c)*. *Id.* *§ 1962(d)*. RICO provides a private civil cause of action for those who are injured by violations of *§ 1962* and allows recovery of treble damages, costs, and attorney's fees. *Id.* *§ 1964(c)*.

HN60[] To prove a violation of *§ 1962(c)*, a plaintiff must establish four elements: "(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity." *CGC Holding Co., LLC v. Hutchens, 974 F.3d 1201, 1210 (10th Cir. 2020)*. As our Circuit recently has explained:

> The word racketeering tends to evoke images of mobsters and organized criminals, and true enough, RICO—at least initially—"was an aggressive initiative to supplement old remedies and develop new methods for fighting crime." But the plain language of RICO defines racketeering far more broadly in a way that allows **[**265]** the statute to "reach both legitimate and illegitimate" businesses. Indeed, among many other qualifying acts, RICO defines a racketeering activity as "any act which is indictable under" the federal statute outlawing wire fraud—a crime that any modern business could commit.

Id. at 1210-11 (first quoting *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 498, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)*; then quoting *Sedima, 473 U.S. at 499*; then quoting *18 U.S.C. § 1961(1)(B)*). Also, the Supreme Court has instructed that "RICO is to be read broadly." *Sedima, 473 U.S. at 497*.

HN61[] "But proving a RICO violation requires more than racketeering activity alone." *CGC Holding Co., 974 F.3d at 1211*. To prevail on a RICO claim, a plaintiff **[*1024]** must establish: "(1) that the defendant violated *§ 1962*; (2) that the plaintiff's business or property was injured; and (3) that the defendant's violation is the cause of that injury." *Safe Sts. All. v. Hickenlooper, 859 F.3d 865, 881 (10th Cir. 2017)* (citations omitted).

Here, plaintiffs allege that defendants "joined together in an association-in-fact enterprise and used the interstate mails and wires in furtherance of" their scheme to raise EpiPen prices. Doc. 2169 at 9-10 (Pretrial Order ¶ 3.a.1.). Plaintiffs assert that defendants' scheme included: (1) withdrawing the EpiPen single pack from the EAI market and requiring customers to purchase EpiPens exclusively in the 2-Pak based on a false medical rationale; (2) stifling generic competition **[**266]** through pay-for-delay settlements; and (3) foreclosing branded competition from Auvi-Q by entering exclusive rebate contracts with payors. *Id.* at 9.

Plaintiffs allege that defendants made certain fraudulent statements or omissions through the mail and wires to further their pricing scheme including: (1) issuing a fraudulent press release on August 24, 2011, that announced Mylan no longer would sell individual EpiPens in the United States in an effort to align with medical guidelines; (2) issuing a press release in April 2012, announcing the settlement of the EpiPen patent litigation with Teva; and (3) using telephone calls and email to effectuate their exclusive rebate contracts. *Id.* at 13, 16, 18.

Defendants argue that plaintiffs' RICO claims fall short of presenting any genuine issues for trial for several reasons. They argue the court thus should grant summary judgment because the summary judgment facts present no triable issue whether: (1) defendants participated in the conduct of a RICO enterprise; (2) defendants committed any predicate acts sufficient to support a RICO claim; (3) any alleged predicate act caused plaintiffs any harm; (4) defendants conspired to violate RICO; (5) **[**267]** the statute of limitations bars plaintiffs' RICO claims; and (6) Heather Bresch—individually—is liable for violating RICO.

For reasons explained below, the court concludes that the summary judgment record presents no triable issue whether any of defendants' alleged predicate acts caused plaintiffs to sustain injury. So, plaintiffs' RICO claims fail the causation element. And, the court grants summary judgment against the RICO claims for this reason. The court explains how it reaches this conclusion, below.

1. Causation

Defendants assert that no genuine dispute exists whether any of the alleged RICO predicate acts caused plaintiffs any harm. Thus, defendants argue, plaintiffs cannot show they sustained injury "by reason of a violation of *section 1962*[,]" as *18 U.S.C. § 1964(c)* requires for a plaintiff to prevail on a RICO claim.

The Supreme Court has held that ***HN62***[] the RICO statute's "'by reason of'" requirement demands that a RICO plaintiff show "the defendant's violation not only was a 'but for' cause of his injury, but was the proximate cause as well." *Holmes v. Sec. Inv. Prot. Corp., 503 U.S. 258, 265, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)* (quoting *18 U.S.C. § 1964(c)*); *see also Hemi Grp., LLC v. City of N.Y.C., 559 U.S. 1, 9, 130 S. Ct. 983, 175 L. Ed. 2d 943 (2010)* (explaining a RICO claim requires plaintiff "to show that a RICO predicate offense 'not only was a "but for" cause of his injury, but was the proximate **[**268]** cause as well'" (quoting *Holmes, 503 U.S. at 268*)). "Sufficiently establishing the element of causation—both actual and proximate—is crucial to proving any violation of RICO." *CGC Holding Co., LLC v. Broad & Cassel, 773 F.3d 1076, 1088 (10th **[*1025]** Cir. 2014)* (citing *Bridge v. Phoenix Bond & Indem. Co., 553 U.S. 639, 656-60, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008)*).

Defendants assert that plaintiffs can't present a triable issue about either "but for" causation or proximate causation. The court agrees with defendants on "but for" causation. As explained, no reasonable trier of fact could find or infer from the summary judgment facts that, "but for" defendants' alleged misstatements and omissions made in any of the underlying predicate acts, plaintiffs wouldn't have sustained any harm. The court explains why, below.

a. "But For" Causation

Defendants assert two separate and independent arguments supporting summary judgment against plaintiffs' RICO claims for failing to present summary judgment facts supporting a triable issue of "but for" causation. The court addresses the two distinct arguments, separately, below.

i. Plaintiffs' Alleged Harm is the Same Without the Alleged Predicate Acts

Defendants' first argument on the "but for" causation requirement asserts that plaintiffs can't present a triable issue of causation because the summary judgment record shows plaintiffs would have sustained **[**269]** the same harm if defendants never committed any of the alleged RICO predicate acts. For support, they cite the Fourth Circuit's opinion in *Walters v. McMahen, 684 F.3d 435 (4th Cir. 2012)*.

This case involved RICO claims asserted by a group of hourly-wage employees who alleged their employers' corporate managers and others had conspired to hire aliens not authorized to work in the United States so that the company could reduce labor costs. *Id. at 437*. ***HN63***[] When discussing the RICO causation requirement, the Fourth Circuit explained that the "compensable injury resulting from a violation of *18 U.S.C. § 1962(c)* necessarily is the harm *caused by the predicate acts*[.]" *Id. at 444* (emphasis added) (citing *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 457, 126 S. Ct. 1991, 164 L. Ed. 2d 720 (2006)*). The *Walters* plaintiffs had alleged that defendants committed RICO predicate acts through "the fraudulent use of identification documents and the false attestations placed on the I-9 forms[.]" *Id.* But, the Fourth Circuit found, it wasn't these alleged RICO violations "that has caused the harm suffered by the plaintiffs" because "such actions [did] not directly impact the plaintiffs' wage levels." *Id.* And, the court explained, the lack of causation "becomes obvious by removing the false attestation acts[.]" *Id.* That is, if the employer "engaged in the hiring of unauthorized aliens **[**270]** without the hiring clerks' fraudulent completion of the I-9 forms, such as by paying the unauthorized employees in cash and not reporting their employment to the United States government, the alleged injury suffered by the plaintiffs *would be the same*[.]" *Id.* (emphasis added). Thus, the Fourth Circuit held, plaintiffs' RICO claims failed as a matter of law because there was "no direct relationship between the injury asserted and the predicate act alleged." *Id.* (citing *Hemi Grp., 559 U.S. at 9-10*).

Defendants argue the same reasoning applies here. They contend that plaintiffs would have sustained the same harm—*i.e.*, paying higher prices for EpiPen—even if defendants never made the alleged false and misleading statements or omissions in the underlying RICO predicate acts. Thus, defendants argue, the alleged RICO predicate acts can't supply the requisite "but for" cause of plaintiffs' purported injuries. Plaintiffs disagree for two reasons.

First, they assert that RICO doesn't require them to prove that the *predicate acts* caused their injuries. Instead, plaintiffs argue, they only need to present a **[*1026]** genuine issue whether defendants' fraudulent EpiPen *pricing scheme* caused their injuries. But plaintiffs' argument isn't **[**271]** faithful to binding precedent. Instead, the Supreme Court has made it clear that "***HN64***[] civil RICO" requires a plaintiff "to show that *a RICO predicate offense* not only was a 'but for' cause of his injury, but was the proximate cause as well." *Hemi Grp., 559 U.S. at 9* (emphasis added and citation and internal quotation marks omitted);[69] *Bridge, 553 U.S. at 658-59* (recognizing if the Cook County, Illinois Treasurer's Office "had not accepted petitioners' false attestations of compliance with the [County's] Single, Simultaneous Bidder Rule," prohibiting simultaneous bidding at public tax lien actions—*i.e.*, the alleged RICO predicate acts—"and as a result had not permitted petitioners to participate in the auction, respondents' injury would never have materialized"); *Anza, 547 U.S. at 457* ("The Court has indicated the compensable injury flowing from a violation of that [RICO] provision 'necessarily is the harm *caused by predicate acts* sufficiently related to constitute a pattern, *for the essence of the violation is the commission of those acts* in connection with the conduct of an enterprise.'" (emphasis added) (quoting *Sedima, 473 U.S. at 497*); *Holmes, 503 U.S. at 268* (explaining plaintiff must show "the defendant's [RICO] *violation* not only was a 'but for' cause of his injury, but was the proximate cause as **[**272]** well" (emphasis added)).

Plaintiffs urge the court to ignore these requirements for establishing "but for" causation. Instead, they contend, on summary judgment the court only "considers evidence of the entire 'fraudulent scheme'—not merely the use of the mails or wires, which don't have to be fraudulent and only have to further the scheme in some way." Doc. 2190-1 at 122. But, to support this argument, plaintiffs rely on cases discussing either RICO's predicate act requirement or the

---

[69] Plaintiffs correctly assert that this language comes from *Hemi Group*'s plurality opinion. But, as the First Circuit has recognized, *Hemi Group* "produced a 4-1-3 decision with no majority on the *proximate cause question*." *In re Neurontin Mktg. & Sales Pracs. Litig., 712 F.3d 21, 38 n.12 (1st Cir. 2013)* (emphasis added). The *Hemi Group* plurality opinion's recitation of the "but for" causation standard is consistent with other governing Supreme Court precedent.

proximate cause requirement—not the "but for" causation requirement. *See* [Sorensen v. Polukoff, 784 F. App'x 572, 578 (10th Cir. 2019)] (explaining that**HN65**[] a RICO plaintiff, to allege a plausible predicate act, "need not allege that the mailings or the wire communications themselves were fraudulent[,]" instead, "he needs only allege that they were 'incident to an essential part' of a fraudulent scheme" (quoting [Bridge, 553 U.S. at 639])); [Safe Sts. All. v. Hickenlooper, 859 F.3d 865, 890-91 (10th Cir. 2017)] (discussing RICO proximate cause requirement and finding no "intermediary breaks the causal chain . . . between the enterprise's" actions and plaintiffs' "injury" because defendants'"criminal cultivation of marijuana"—the RICO predicate act—caused all "alleged injuries"); [Wallace v. Midwest Fin. & Mortg. Servs., Inc., 714 F.3d 414, 419-20 (6th Cir. 2013)] ("**HN66**[] A plaintiff need only show **[**273]** use of the mail in furtherance of a scheme to defraud and an injury *proximately caused* by that scheme. Thus, the appropriate inquiry in this case is not whether [plaintiff] actually relied on the allegedly inflated appraisal, but whether the fraudulent scheme furthered by that appraisal *proximately caused* his financial injuries." (emphasis added)); [In re Neurontin Mktg. & Sales Pracs. Litig., 712 F.3d 21, 37 (1st Cir. 2013)] (rejecting defendants' argument that "its supposed misrepresentations **[*1027]** went to prescribing doctors, and so the causal link to [plaintiff] must have been broken" because plaintiff satisfied "the proximate cause requirement" by coming forward with evidence that its "injury was a foreseeable and natural consequence of" defendants' actions (citation and internal quotation marks omitted)).[70]

Here, the alleged RICO predicate offenses are use of the mail and wires to further defendants' EpiPen pricing scheme and corrupting an official proceeding in a pattern of racketeering activity. Doc. 2169 at 42 (Pretrial Order ¶ 4.a.). Under the governing legal standard, plaintiffs must identify a genuine issue for trial whether defendants' use of the mail and wires to further the EpiPen pricing scheme or their corruption of an official proceeding **[**274]** was the "but for" cause of plaintiffs' injuries—*i.e.*, paying inflated prices for EpiPen. They haven't discharged this burden.

Second, plaintiffs assert, even under defendants' standard for proving "but for" RICO causation, the summary judgment facts here present a triable issue whether, "but for" defendants' false representations and omissions, plaintiffs would have sustained harm. They contend the alleged RICO predicate acts were "integral" to defendants' pricing scheme. But, they don't come forward with admissible evidence presenting a triable issue of that assertion. Instead, as the following paragraphs explain, plaintiffs have adduced no evidence capable of supporting a finding that defendants' use of the mail and wires or their alleged corruption of an official proceeding was the "but for" cause of plaintiffs' alleged injuries.

For plaintiffs' first RICO theory—the 2-Pak switch—the alleged predicate acts are defendants' use of the mail and wires to disseminate misleading information about the reasons for the withdrawal of single EpiPens and the switch to selling the EpiPen exclusively in a 2-Pak. Specifically, plaintiffs allege that defendants provided a false rationale for the **[**275]** decision—*i.e.*, citing the medical guidance—when the true reason for the switch was to increase EpiPen profits. But, plaintiffs premise none of their alleged damages on any of defendants' *alleged statements* about the 2-Pak switch. Instead, Prof. Rosenthal calculates plaintiffs' damages based on the increase in the number of EpiPens purchased by consumers. Doc. 2164-4 at 31-32 (Defs.' Ex. 325) (Rosenthal Expert Report ¶ 72) (calculating damages "due to the withdrawal of the single-pen **[*1028]** packaging" and not alleged misstatements about the 2-Pak switch). Defendants argue plaintiffs would have sustained these same damages if defendants

---

[70] Plaintiffs also cite the court's Order granting in part the class certification motion, asserting that the court held "the plaintiff need not be the victim of the predicate acts" to prevail on a RICO claim. Doc. 2190-1 at 122 n.634. And, elsewhere, plaintiffs' Response asserts that the court's Order ruling the class certification motion explained "how Plaintiffs had demonstrated RICO causation on each of the three schemes to defraud" and made "a number of legal rulings that apply to the legal issues at summary judgment." Doc. 2190-1 at 120. The court disagrees with plaintiffs' application of the certification Order. As the court noted in that Order, the court was required to "'accept the substantive allegations of the complaint as true'" when determining "whether plaintiffs have met their burden of affirmatively demonstrating compliance with [Rule 23]'s requirements[.]" Doc. 2018-1 at 5 n.2 (quoting [Shook v. El Paso Cnty., 386 F.3d 963, 968 (10th Cir. 2004)]). And, the court's Order never considered the merits of the "but for" causation requirement necessary to support plaintiffs' RICO claims. *See generally id.* But now, because the case has arrived at the summary judgment stop of its progress to trial, the court can't just accept plaintiffs' allegations as true. Instead, plaintiffs bear a summary judgment burden to come forward with admissible proof of a genuine factual question whether plaintiffs would have sustained any injury "but for" defendants' alleged RICO predicate acts. Plaintiffs haven't made that showing.

never had issued any statements about the switch to the 2-Pak—*i.e.*, after the 2-Pak switch, class members still would have purchased the same number of pens because the elimination of the single pack—not defendants' statements—caused the alleged harm.

Plaintiffs respond, arguing that the 2-Pak press release—and the false medical rationale it allegedly provided—was essential to the EpiPen pricing scheme because it provided a "smokescreen" and avoided market "backlash" from the decision to remove single EpiPens from the market. Doc. 2190-1 at 122. Plaintiffs cite **[**276]** various Mylan documents to support this theory, but none of them can support a reasonable finding or inference that, "but for" Mylan's public statements about the 2-Pak, defendants would not have succeeded in implementing the EpiPen pricing scheme that produced plaintiffs' injuries. For instance, plaintiffs cite a statement from an internal Mylan document dated before Mylan's switch to the 2-Pak that referenced a desire to keep EpiPen revenue "'below the radar' for most managed care organizations[,]" but if "managed care organizations do raise concerns" about the 2-Pak switch, Mylan had reserved "1.5% of all revenue . . . as rebates[.]" Doc. 2143-25 at 16 (Defs.' Ex. 58). Also, plaintiffs cite an email sent several weeks after the 2-Pak switch stating that Mylan had implemented the 2-Pak switch without "ANY issues" and received "no backlash" from payors. Doc. 2196-2 at 2 (Pls.' Ex. 144). Neither of these statements connects Mylan's public statements about the 2-Pak switch to Mylan's purported success avoiding scrutiny or objection to the 2-Pak switch. This conclusion is bolstered by the fact—discussed more fully below—that plaintiffs haven't come forward with any evidence showing that **[**277]** *anyone* relied on defendants' alleged misstatements or omissions about the reasons for the 2-Pak switch and the medical justification that defendants used to support that decision. As defendants correctly argue, none of this evidence can support a reasonable finding or inference that the 2-Pak public statements were "integral" to defendants' pricing scheme. Thus, the undisputed summary judgment facts lead the court to conclude that no reasonable jury could find or infer that plaintiffs wouldn't have sustained their alleged injuries "but for" the public statements made about the reason for the 2-Pak switch.

For plaintiffs' second RICO theory—generic delay—defendants assert a similar argument. They correctly explain that plaintiffs don't seek any damages caused by any purported public misstatements about patent litigation settlements. Instead, Prof. Rosenthal calculates plaintiffs' damages based on the "but for" date that a generic competitor would have entered the market absent the pay-for-delay settlement. Doc. 2164-4 at 27-31 (Defs.' Ex. 325) (Rosenthal Expert Report ¶¶ 61-71). Defendants assert that plaintiffs would have sustained the same purported damages with or without defendants' **[**278]** press release announcing the EpiPen patent litigation settlement.[71] Thus, they contend, the alleged mail and wire fraud can't supply the requisite "but for" causation to support plaintiffs' RICO claims.

Again, plaintiffs disagree. And yet again, they argue the false press release about the EpiPen settlement was "integral" to defendants' fraudulent pricing scheme because it provided the "essential cover for **[*1029]** their scheme to stifle competition[.]" Doc. 2190-1 at 123. So, plaintiffs reason, a jury could infer that the press release was necessary to the scheme because Mylan and Pfizer devoted time and resources to crafting and disseminating it over the wires. This characterization stretches the summary judgment facts far too far. The summary judgment record simply doesn't include any facts from which a jury could find or infer that the press release provided necessary "cover" for defendants to proceed with their scheme to delay generic competition. This conclusion is supported by the fact—as later discussed—that the summary judgment record is devoid of evidence showing that anyone relied on the press release announcing the EpiPen patent settlement. In short, plaintiffs' "cover" argument is **[**279]** no more than an ipse dixit assertion by counsel that finds no foundation or footing in the facts. The summary judgment facts can't support a reasonable finding or inference that, "but for" the press release announcing the EpiPen patent settlement, plaintiffs wouldn't have sustained the damages incurred because of defendants' purportedly unlawful reverse payment settlement.

Defendants argue that plaintiffs' third RICO theory—the Auvi-Q foreclosure theory—fails for a more basic reason. They contend that plaintiffs have no RICO damages model tied to any alleged brand foreclosure, much less any damages model calculating any damages from defendants' statements about Mylan's rebating practices or other

---

[71] Also, defendants note that no court ever has found a reverse payment settlement allegation sufficient to support a RICO claim.

branded competition. *See* Doc. 2164-4 at 3 (Defs.' Ex. 325) (Rosenthal Expert Report ¶ 1) (explaining that Prof. Rosenthal offers a RICO damages model for generic delay and 2-Pak damages but not Auvi-Q foreclosure); *see also* Doc. 2146-4 at 4 (Defs.' Ex. 137) (Elhauge Dep. 38:12-14) (testifying that Prof. Elhauge didn't "evaluate RICO damages"). Plaintiffs respond that Prof. Elhauge's analysis shows a cause-and-effect relationship between Mylan's use of exclusive rebate contracts and plaintiffs' **[**280]** injuries in the form of paying higher EpiPen prices. But, this argument ignores Prof. Elhauge's explicit testimony. He testified that he's not opining about RICO damages. Thus, plaintiffs haven't come forward with any evidence showing that defendants' alleged statements about Mylan's rebating practices caused plaintiffs to sustain RICO damages.[72]

In sum, the court holds the summary judgment facts present no triable issue whether defendants' alleged predicate RICO acts were the "but for" cause of plaintiffs' injuries. The court thus grants summary judgment against plaintiffs' RICO claims because plaintiffs haven't presented a triable issue of "but for" causation.

ii. No Triable Issue of Reliance

The court also grants summary judgment against plaintiffs' RICO claims for a second and independent reason. Defendants argue that the summary judgment record fails to support a finding or inference of reliance sufficient to satisfy the RICO causation element. As explained, below, the court agrees with them.

a. No Triable Issue Whether Anyone Relied on the Alleged Predicate Acts

Defendants assert that the summary judgment record is devoid of evidence showing that anyone relied on defendants' alleged **[**281]** misrepresentations in or omissions **[*1030]** from the RICO predicate acts. The Supreme Court has explained that ***HN67***[] a RICO plaintiff need not establish "first-party reliance" to satisfy the causation requirement. *Bridge, 553 U.S. at 657-58*. Nevertheless, "a RICO plaintiff who alleges injury 'by reason of' a pattern of mail fraud" likely can't "prevail without showing that *someone* relied on the defendant's misrepresentations." *Id. at 658*. The Supreme Court has observed that in "most cases, the plaintiff will not be able to establish even but-for causation if no one relied on the misrepresentation." *Id.*; *Painters & Allied Trades Dist. Council 82 Health Care Fund v. Takeda Pharms. Co. Ltd., 943 F.3d 1243, 1259 (9th Cir. 2019)* (explaining that RICO plaintiffs must prove, at a minimum, indirect reliance "because, logically, a plaintiff cannot even establish but-for causation if *no one* relied on the defendant's alleged misrepresentation").

Plaintiffs respond, arguing that *In re Neutrontin* and *In re Celexa & Lexapro* foreclose defendants' arguments about reliance. They assert both cases permit them to proceed on their RICO claims with evidence supporting an inference of reliance.

The faith plaintiffs attach to these two cases is misplaced. In both cases, plaintiffs came forward with evidence of first-party reliance by *someone*—even if it wasn't plaintiffs who had **[**282]** relied directly on the alleged misrepresentations. *See* *In re Neurontin Mktg. & Sales Pracs. Litig., 712 F.3d 21, 40-41 (1st Cir. 2013)* (holding plaintiff presented "ample evidence" of reliance where summary judgment facts showed plaintiff "received [defendant's] misrepresentations through [defendant's] contacts" with plaintiffs' Drug Information Service ("DIS") "which disseminated information throughout [plaintiff's] organization" and that plaintiffs' "physicians received and acted upon [defendant's] misrepresentations, both through information sent through the DIS and information provided to them at [defendant's] events"); *see also id.* at 31 (noting evidence that plaintiff's "physicians attended conferences where Neurontin was promoted for off-label uses, and after one such conference, in May 1999, new starts of Neurontin increased by 62%"); *see also* *Painters & Allied Trades Dist. Council 82 Health Care Fund, 915 F.3d 1, 13 (1st Cir. 2019)* (concluding that plaintiff presented sufficient evidence of RICO causation to survive

---

[72] This theory also fails for other reasons the court already has addressed. Simply, the summary judgment facts don't present any triable issues whether Mylan's rebating practices unlawfully restrained competition. Thus, any alleged misrepresentations about Mylan's rebating practices didn't cause plaintiffs to sustain any damages.

summary judgment where defendant's off-label marketing to physicians caused, according to plaintiff's experts, "76% and 54% of all pediatric prescriptions of Celexa and Lexapro, respectively" and defendant's "sales representatives called or visited at least two physicians who subsequently ordered pediatric prescriptions of Celexa **[**283]** and Lexapro").

Here, in contrast, plaintiffs present no evidence that anyone—not plaintiffs, not physicians, not third-payor payors, nor anyone else in the supply chain—relied on defendants' alleged misstatements or omissions about the 2-Pak switch, the EpiPen patent litigation settlement, or Mylan's use of exclusive rebate contracts. Indeed, none of the named plaintiffs testified that he or she had read the August 2011 press release announcing the 2-Pak switch before becoming involved in this litigation. *See* Doc. 2142-1 at 34 & n.110 (Defs.' Mem.) (citing deposition testimony of 34 of the named plaintiffs). And, no named plaintiff testified that he or she had relied on any statements by defendants when purchasing EpiPen devices. *Id.* Thus, the undisputed summary judgment facts here differ materially from those in *In re Neutrontin* and *In re Celexa & Lexapro*. They present no triable issue whether anyone relied on defendants' alleged misstatements or omissions sufficient to support the "but for" causation element of their RICO claims.

[*1031] b. No Inference of Reliance

Plaintiffs assert that they still can prevail on proving RICO causation by showing an inference of causation with statistical aggregate **[**284]** data from their expert, Prof. Rosenthal. Defendants respond that no court ever has found that an inference of reliance suffices to prove, on the merits, that a defendants' alleged misrepresentations were the "but for" cause of classwide RICO injury. The court also has found no authority supporting plaintiffs' argument that an inference of reliance based on statistical evidence—alone—can prove at the merits stage the "but for" causation element of a RICO claim. Defendants thus assert that the law requires plaintiffs to show that someone in the causal chain relied on the statements asserted in the predicate acts. And, here, plaintiffs have adduced no evidence of any such reliance. So, the court can grant summary judgment for this reason as well.

But, even if plaintiffs could shoulder their burden to prove RICO causation in the form of an inference of reliance, the summary judgment facts here can't support such an inference. As defendants correctly explain, ***HN68***[] an inference of reliance "does not shift the burden of proof at trial on the element of RICO causation (or any other elements of the claim)—plaintiffs will still have to *prove* RICO causation by a preponderance of the evidence to win **[**285]** on the merits." *CGC Holding Co., LLC v. Broad & Cassel, 773 F.3d 1076, 1093 (10th Cir. 2014)*. Here, defendants assert the summary judgment facts rebut any inference of reliance. Thus, they argue, plaintiffs' RICO claims can't survive summary judgment.

For plaintiffs' 2-Pak theory, defendants assert that Prof. Rosenthal has determined that 62%-68% of patients were not "forced" to buy 2-Paks. Doc. 2166-17 at 15-16 (Defs.' Ex. 96) (Rosenthal Dep. 197:12-198:2). And, they cite the deposition testimony of the named plaintiffs where many testified that they had purchased 2-Paks or multiple single-packs before 2011. Doc. 2144-16 at 2-8 (Defs.' Ex. 102 (citing Defs.' Ex. 102-A)). Also, at least 11 named plaintiffs purchased multiple devices in a single transaction while the single-pack was available. *Id.* And, several named plaintiffs testified that they prefer to have more than one EpiPen device at any given time. *Id.* Defendants assert that this evidence forecloses a reasonable jury from inferring reliance.

Plaintiffs respond, arguing that the court should consider Prof. Rosenthal's analysis of the percentage of consumers injured by defendants' actions when *combining* injury caused by the 2-Pak switch *or* generic delay. Also, plaintiffs argue, the court credited Prof. **[**286]** Rosenthal's analysis at class certification and it should do the same here again. But, plaintiffs' argument misapprehends the difference separating certification proceedings from substantive decisions on the merits. They mistakenly equate the court's consideration of Prof. Rosenthal's opinion on class certification with the court's consideration of her opinion in light of the summary judgment record. The summary judgment facts establish that Prof. Rosenthal opines that 62%-68% of patients were not "forced" to buy 2-Paks. From this evidence and the deposition testimony of named plaintiffs, no reasonable jury could infer reliance on defendants' alleged misrepresentations about the switch to the 2-Pak.

For plaintiffs' generic delay theory, defendants argue that the summary judgment record can't support an inference of reliance when there is no evidence that plaintiffs sustained any injury from a press release about the EpiPen settlement with Teva. Also, they cite the named plaintiffs' deposition testimony where some plaintiffs testified they continued to purchase EpiPens **[*1032]** after filing this lawsuit. Doc. 2144-16 at 11-13 (Defs.' Ex. 102) (citing Defs.' Ex. 102-A). And, some named plaintiffs **[**287]** testified that they purchased EpiPen products even though a generic or other alternative was available for purchase. *Id.* Plaintiffs argue that this individual testimony presents a fact issue that the jury must weigh against common evidence of RICO causation, and the court can't grant summary judgment on this basis. The court disagrees.

The only common evidence of RICO causation for the generic delay theory that plaintiffs identify is Prof. Rosenthal's opinion that consumers sustained a "loss of choice." Prof. Rosenthal opines that each class member sustained classwide injury from defendants' alleged misconduct. Doc. 2191-18 at 52 (Pls.' Ex. 47) (Rosenthal Oct. 31, 2019 Expert Report ¶ 118). And, as part of this opinion, Prof. Rosenthal opines that each allegation of misconduct "deprived class members of choice[.]" *Id.* (¶ 119). She describes this "loss of choice" as "[l]osing the choice to purchase a single pen, a generic EpiPen, or another brand[.]" *Id.* But, she never quantifies how many class members sustained a "loss of choice." Indeed, those class members who chose to purchase branded EpiPen products over a generic sustained no loss of choice. And, plaintiffs concede that Prof. Rosenthal's **[**288]** "loss of choice" opinion is not a measure of damages. Doc. 2183-1 at 20. Thus, no reasonable jury could infer reliance on defendants' statements about the EpiPen patent settlement based simply on Prof. Rosenthal's abstract "loss of choice" opinion. Instead, viewing the summary judgment facts as a whole and in the light most favorable to plaintiffs, a reasonable jury can't infer reliance where the summary judgment record presents no evidence that any class member sustained damage from the press release about the EpiPen settlement. This is especially true because some class representatives testified that they continued to purchase EpiPens even though a generic product was available.

On the Auvi-Q foreclosure theory, defendants again argue that plaintiffs offer no expert damages analysis of their RICO damages for this foreclosure theory. And thus, they haven't come forward with any evidence supporting an inference of reliance under this RICO theory. For the same reasons discussed in the subsection above, the court finds that plaintiffs have failed to present a triable issue whether they sustained RICO damages based on the alleged Auvi-Q foreclosure theory. The summary judgment record thus **[**289]** lacks evidence permitting an inference of reliance to support plaintiffs' RICO claims under the Auvi-Q foreclosure theory.

In sum, the court concludes that the case law doesn't permit plaintiffs' RICO claims to survive summary judgment simply by coming forward with evidence supporting an inference of reliance when the record is devoid of any evidence showing that at least someone in the causal chain relied on the alleged misrepresentation. But, even if an inference of reliance presented a triable issue of RICO "but for" causation, plaintiffs haven't come forward with summary judgment evidence from which a reasonable fact finder could infer reliance. So, the court grants summary judgment against plaintiffs' RICO claims for this second and independent reason: plaintiffs have failed to present a triable issue of reliance as required to support a finding of RICO "but for" causation.

2. RICO Conspiracy Claim

Defendants argue that plaintiffs' RICO conspiracy theory claim fails as a matter of law because their substantive RICO claim under *§ 1962(c)* fails on summary judgment. They are correct. As our Circuit has explained, "***HN69***[] [b]y its terms, *§ 1962(d)* requires that a plaintiff must **[*1033]** first allege an independent violation **[**290]** of *subsections (a)*, *(b)*, or *(c)*, in order to plead a conspiracy claim under *subsection (d)*." *Tal v. Hogan, 453 F.3d 1244, 1270 (10th Cir. 2006)* (citation omitted). And, if "a plaintiff has no viable claim under *§ 1962(a)*, *(b)*, or *(c)*, then its *subsection (d)* conspiracy claim fails as a matter of law." *Id.* (citations omitted). As the court already has concluded, summary judgment is warranted against plaintiffs' *§ 1962(c)* claim. And, because the court has concluded plaintiffs have no viable *§ 1962(c)* RICO claim, plaintiffs' *§ 1962(d)* RICO conspiracy claim also fails as a matter of law. The court thus grants summary judgment against plaintiffs' RICO conspiracy claim.

3. Conclusion

For reasons explained, the court grants summary judgment against plaintiffs' RICO claims.

IV. Conclusion

For the above reasons, the court grants the Mylan defendants' motion for summary judgment in part and denies it in part. The court grants summary judgment against:

• plaintiffs' antitrust claims based on the theory that Mylan's exclusive rebate contracts are unlawful exclusive dealing arrangements because the summary judgment facts present no triable issue whether the contracts foreclose a substantial share of competition to violate the antitrust laws;

• any antitrust damages premised on a generic delay theory occurring before March 14, 2014 because **[**291]** plaintiffs have failed to adduce any summary judgment evidence supporting a triable issue of damages before that date;

• any restitution claim under California's Unfair Competition Law, *Cal. Bus. & Prof. Code §§ 17200-17210*, because plaintiffs have not asserted a restitution claim in the Pretrial Order;

• plaintiffs' Tennessee ***antitrust law*** claims because the court lacks subject matter jurisdiction over them, and thus must dismiss them without prejudice;

• any claims asserted by plaintiffs April Sumner, Donna Anne Dvorak, Michael Gill, and Landon Ipson because these plaintiffs are not named plaintiffs in any underlying case transferred to this MDL; and

• plaintiffs' RICO claims.

The court denies the Mylan defendants' summary judgment motion in all other respects.

IT IS THEREFORE ORDERED BY THE COURT THAT the Mylan defendants' Motion for Summary Judgment (Doc. 2141) is granted in part and denied in part.

IT IS SO ORDERED.

Dated this 23rd day of June, 2021, at Kansas City, Kansas.

Governments > Local Governments > Property

Transportation Law > Private Vehicles > Towing

HN1[] **Local Governments, Property**

Wis. Stat. § 342.40(1m) defines abandoned vehicles and authorizes municipalities to designate vehicles as such. In addition to authorizing removal, Wisconsin law permits municipalities to dispose vehicles covered by the statute, for example, through sale or donation (subject to certain notification, impoundment, and procedural requirements). *§ 342.40(2)*, *(3)(c)* (authorizing sale or donation after procedures satisfied).

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN2[] Standards of Review, De Novo Review

In reviewing a motion to dismiss, courts of appeal accept all well-pleaded facts as true and draw reasonable inferences in plaintiffs' favor. A *Fed. R. Civ. P. 12(b)(6)* dismissal turns on a question of law, which courts review de novo.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN3[] Standards of Review, Abuse of Discretion

Although generally, denials of leave to amend are reviewed for abuse of discretion, where the district court denies leave to amend on futility grounds, appellate courts review the underlying legal basis de novo.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN4[] Sherman Act, Claims

Sherman Act § 1 prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. The Sherman Act is designed to protect consumers from injury that results from diminished competition, and therefore a claim brought under the Act must allege both injury to the plaintiff and to the market. To state a claim for relief under *§ 1*, a plaintiff must show the following three prongs: (1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in a relevant market; and (3) an accompanying injury.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN5[] Sherman Act, Claims

To survive a motion to dismiss, Twombly requires that the existence of an agreement that violates Sherman Act *§ 1* be pleaded plausibly through allegations of fact. Such allegations usually take one of two forms: (1) direct allegations of an agreement, like an admission by a defendant that the parties conspired; or (2) more often, circumstantial allegations of an agreement, which are claimed facts that collectively give rise to a plausible inference that an agreement existed. The task before any plaintiff is thus to find and produce evidence that reveals coordination or agreement.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN6[] Sherman Act, Claims

The inability to state a claim for relief on any one of the three Sherman Act *§ 1* prongs ends a court's inquiry on a motion to dismiss because a plaintiff must prove three elements to succeed under Sherman Act *§ 1*.

Antitrust & Trade Law > Sherman Act > Scope

Contracts Law > Defenses > Illegal Bargains

HN7[] Antitrust & Trade Law, Sherman Act

Every contract is a restraint of trade, and the Sherman Act was intended to prohibit only unreasonable restraints of trade. *Sherman Act § 1* is not interpreted to proscribe all contracts, only unreasonable restraints.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] Per Se Rule & Rule of Reason, Per Se Violations

Courts draw on several analytical frameworks to assess whether a contract amounts to an unreasonable restraint of trade: among them, the per se, rule of reason, and quick look analyses. All of these methods of analysis are meant to answer the same question: whether or not the challenged restraint enhances competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN9[] Per Se Rule Tests, Manifestly Anticompetitive Effects

Courts may dispense with the rule of reason inquiry under Sherman Act *§ 1* if the restraint falls into a certain subset of agreements, known as per se violations. Per se violations are actions where the nature and necessary effects that result are so plainly anticompetitive that an in-depth analysis of their illegality is unnecessary. In those cases, an unreasonable restraint is conclusively presumed once the first is proved, because the probability that these practices are anticompetitive is so high.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN10[] **Scope, Monopolization Offenses**

Both horizontal price fixing and bid rigging are presumptively unlawful under Sherman Act *§ 1*. Price-fixing agreements between two or more competitors, otherwise known as horizontal price-fixing agreements, fall into the category of arrangements that are per se unlawful. Horizontal price fixing and output limitation are classic examples of behavior that is considered anticompetitive per se. Bid rigging is a form of horizontal price fixing.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN11[] **Per Se Rule & Rule of Reason, Per Se Violations**

A Sherman Act combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price in the marketplace is illegal per se. While horizontal price fixing warrants a per se presumption of unreasonableness, that presumption does not attach to all forms of price fixing.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN12[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

A per se rule of unlawfulness is inappropriate for judging vertical price restraints. Vertical price restraints are to be judged according to the rule of reason. Unlike horizontal agreements between competitors, vertical exclusive distributorships are presumptively legal. Courts are cautious about importing relaxed standards of proof from horizontal agreement cases into vertical agreement cases because to do so might harm competition and frustrate the very goals that ***antitrust law*** seeks to achieve.

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

HN13[] **Antitrust, Horizontal Mergers**

Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints, while those imposed by agreement between firms at different levels of distribution have been denominated as vertical restraints.

Public Contracts Law > Bids & Formation > Competitive Proposals

HN14[] **Bids & Formation, Competitive Proposals**

Bid rigging is a form of price fixing in which bidders agree to eliminate competition among them, as by taking turns being the low bidder. Although the United States Court of Appeals for the Seventh Circuit has defined bid rigging loosely, most of its caselaw appears to treat bid rigging as a synonym for bid rotation.

Public Contracts Law > Bids & Formation > Competitive Proposals

HN15[] **Bids & Formation, Competitive Proposals**

In the criminal context, the United States Court of Appeals for the Seventh Circuit has rejected the argument that bid rigging includes all forms of collusion in a bidding process.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN16[] **Per Se Rule & Rule of Reason, Per Se Violations**

A plaintiff's failure to state a per se illegal antitrust claim does not necessarily prove fatal to his case if he can state a claim under the rule of reason, or otherwise show the unreasonableness of the restraint.

Civil Procedure > Appeals > Appellate Briefs

HN17[] **Appeals, Appellate Briefs**

It is not the court's responsibility to research the law and construct the parties' arguments for them.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN18[] **Reviewability of Lower Court Decisions, Preservation for Review**

The absence of any supporting authority or development of an argument constitutes a waiver on appeal.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN19[] **Amendment of Pleadings, Leave of Court**

Although *Fed. R. Civ. P. 15(a)(2)* directs courts to freely give leave to amend when justice so requires, courts may deny a proposed amended pleading if the amendment would be futile.

Counsel: Rodney Barnett, Petitioner, Pro se, Grady, AR.

Judges: Before FLAUM, SCUDDER, and KIRSCH, Circuit Judges.

Opinion by: FLAUM

Opinion

[*700] FLAUM, *Circuit Judge*. This case is about the scrap metal recycling business—the collection and processing of ferrous (iron-based) and nonferrous metals. Plaintiffs-appellants, an assortment of companies that tow or recycle used cars, allege that defendants-appellees, the City of Milwaukee ("the City") and its subcontractor, engaged in anticompetitive behavior to self-allocate towing services and abandoned vehicles, a primary input in that industry.

Among other claims, plaintiffs allege that a contract the City entered into with one of the area's largest recycling providers, defendant-appellee Miller Compressing Co., violates *§ 1* of the *Sherman Act, 15 U.S.C. § 1 et seq.* Plaintiffs assert that the contract provided direct evidence of an agreement to restrain trade. We agree **[**2]** with the district court's judgment that plaintiffs failed to state a claim upon which relief could be granted because they did not plead an unreasonable restraint on trade, and we therefore now affirm.

I. Background

A. Factual Background

Always Towing & Recovery, Inc., Apys Cars, Inc., Brew City Towing, LLC, SP Towing, LLC, and Adams Recycling, LLC (collectively, "plaintiffs") are among the various players, both private and public, that tow, sell, and buy vehicles for scrap recycling in and around Milwaukee. The City undertakes various roles—regulating that process, as well as citing, towing, and disposing of abandoned and unlawfully parked vehicles.

Plaintiffs allege that the City, its various subdivisions, and a Milwaukee-area recycling provider called Miller Compressing conspired to improperly divert scrapped vehicles and allocate towing services through a decades-long exclusive contract. Plaintiffs further allege that the City and Miller Compressing reinforced their market positions through a conspiracy to regulate private tow truck companies along the way.

In light of these allegations, the intersection of laws governing the removal of unlawfully parked vehicles on the one hand and **[**3]** the ways in which the City and various players dispose of such vehicles on the other is therefore relevant to this case. We will thus proceed by briefly describing the regulatory backdrop and the City's enforcement actions against plaintiffs before turning to the City's disposal of vehicles and the contract central to this appeal.

Regarding the City's regulatory role, by plaintiffs' account, the City has not only enacted, but also enforced regulations to prevent plaintiff towing companies from performing private and public tows. Plaintiffs take issue with the City's enactment of various ordinances that govern the towing of unlawfully parked vehicles. For example, during the period relevant to this case, the Milwaukee Common Council approved a series of laws that require a City-issued license to tow vehicles from certain areas, that obligate towing companies to provide various notices, and that cap maximum charges imposed on vehicle owners who have illegally parked or abandoned their vehicles. *See generally* A Substitute Ordinance Relating to the Licensing and Regulation of Recycling, Salvaging and **[*701]** Towing Businesses and Activities, No. 141893 (codified as amended at Milwaukee, Wis., 1 **[**4]** Reg. Ordinances, ch. 93 *et seq.*, Recycling, Salvaging and Towing Regulations (2021)). In plaintiffs' view, the City has also enforced these laws to squeeze them out of the market. To illustrate these allegations, we note that plaintiffs challenge the City's denial (or nonrenewal) of licenses to three of the four plaintiff towing companies named in this case: Apys Cars, Inc., SP Towing, LLC, and Brew City Towing, LLC.

Regarding the City's disposal role, plaintiffs also call into question the City's approach to vehicle towing and its sale of statutorily defined "abandoned" vehicles. *See* *Wis. Stat. § 342.40(1m)* (defining abandoned vehicles and authorizing municipalities to designate as such). ***HN1***[] In addition to authorizing removal, Wisconsin law permits municipalities to dispose vehicles covered by the statute, for example, through sale or donation (subject to certain notification, impoundment, and procedural requirements). *See id.* *§ 342.40(2)*, *(3)(c)* (authorizing sale or donation after procedures satisfied). Plaintiffs' allegations focus on two aspects of the City's procedures. First, plaintiffs allege that the City improperly denied Apys Cars's bid for a subcontract to perform some of the City's tows from public property to a **[**5]** City-operated lot. However, plaintiffs also concede that the City informed Apys Cars that although it had submitted the lowest bid, further due diligence later revealed that Apys Cars lacked the financial wherewithal to carry out the contract.

Second, and at the heart of this appeal, plaintiffs claim the City improperly promised to sell a significant portion of its abandoned vehicle inventory to just one company: Miller Compressing. Plaintiffs allege that the Miller Compressing-City arrangement dates back to 1996 or 1997. The Complaint noted that Nick Adams, current owner of plaintiff Adams Recycling, witnessed the parties enter (some version of) this deal. Further, they allege that by 2003, the City entered a formal contract with Miller Compressing ("the 2003 Contract") that is intended to remain in effect through 2023.

The services, price, quantity, and duration of the 2003 Contract are also relevant. As to services, the City agreed to sell Miller Compressing a percentage of scrapped vehicles at a fixed cost and to pay Miller Compressing to evacuate fluid from cars and tow vehicles to Miller's facilities. As to price, Miller Compressing thus committed to purchase scrap vehicles at **[**6]** a set price (subject to certain price indexing) less costs for transporting and removing fluids and refrigerants from the vehicles. As to quantity, the City promised to provide Miller Compressing a certain percentage of its scrap vehicles for specific periods (at least 80% of those disposed in a calendar year, 75% of those disposed in a calendar month, and 80% of those disposed from January 1 through September 30 in a calendar year, in addition to 98% of health-nuisance tows disposed of in a year). Finally, regarding duration, the 2003 Contract lasted for seven years with the possibility of a three-year extension, and in 2009, the parties renewed their agreement through October 2023. Plaintiffs also allege that the City earned more than $5 million in revenue through this arrangement between 2004 and 2009 alone.

Beyond the exclusive terms of the 2003 Contract, plaintiffs claim the deal circumvents certain requirements the City faces in the sale of vehicles and procurement of towing services. For example, they contend that the City must auction its abandoned vehicle inventory through a public system called "J-BID" but that the 2003 Contract bypasses that process. Miller **[*702]** Compressing either **[**7]** does not bid on J-BID inventory or (if it does place bids) does not place the highest bids, but Miller nevertheless obtains the vehicles. Plaintiffs also allege that the City evaded the City's own generic procurement obligations by entering into the agreement with Miller Compressing without issuing a public solicitation for bids.

B. Procedural Background

Plaintiffs filed suit in federal district court against the City, the Milwaukee Department of Public Works, the Milwaukee City Tow Lot, and the Milwaukee Police Department (collectively, "City defendants"). Plaintiffs alleged that City defendants violated *§§ 1* and *2* of the *Sherman Act, 15 U.S.C. § 1 et seq.*, and the *Clayton Act, 15 U.S.C.*

§ 12 et seq., and committed tortious interference with contract under Wisconsin common law. The City moved to dismiss all counts of the complaint.

Plaintiffs then moved for and were granted leave to file the operative first amended complaint ("the Complaint"). In addition to the previously filed claims, the Complaint added Miller Compressing as a defendant and alleged that Miller Compressing entered into an agreement with the City in violation of § 1 of the Sherman Act. The Complaint also alleged two additional counts against City defendants and Miller Compressing for violations **[**8]** of the Federal Trade Commission Act, 15 U.S.C. § 45, and the Pollution Prevention Act, 42 U.S.C. § 13101. Finally, plaintiffs attached to the Complaint an unexecuted copy of the 2003 Contract.

City defendants and Miller Compressing each moved to dismiss the Complaint under Federal Rule of Civil Procedure 12(b)(6) for failure to state a claim upon which relief can be granted. The district court granted both motions on all federal counts and released supplemental jurisdiction over the state law claims. Most relevant to this appeal, the district court premised its dismissal of plaintiffs' § 1 Sherman Act claim on the failure to allege a plausible antitrust agreement or conspiracy under the pleading standards articulated in Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007), and Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009). The district court then dismissed all the federal claims with prejudice because it reasoned that any further amendment would be futile.

Plaintiffs timely appealed.

II. Discussion

On appeal, plaintiffs assert that the Complaint stated a cognizable claim for relief under § 1 of the Sherman Act. ***HN2***[] In reviewing a motion to dismiss, we accept all well-pleaded facts as true and draw reasonable inferences in plaintiffs' favor. *See* Agnew v. NCAA, 683 F.3d 328, 334 (7th Cir. 2012). A Rule 12(b)(6) dismissal turns on a question of law, which we review de novo. *Id.*

Plaintiffs also assert in the alternative that the district court erred **[**9]** by dismissing their claims with prejudice. ***HN3***[] Although "[g]enerally, denials of leave to amend are reviewed for abuse of discretion," Int'l Union of Operating Eng'rs, Loc. 139 v. Daley, 983 F.3d 287, 294 (7th Cir. 2020) (quoting Runnion ex rel. Runnion v. Girl Scouts of Greater Chi. & Nw. Ind., 786 F.3d 510, 524 (7th Cir. 2015)), the district court here denied leave to amend on futility grounds. Accordingly, we review the underlying legal basis de novo. *Id.* ("[R]eview of futility-based denials includes *de novo* review of the legal basis for the futility." (internal quotation marks and citation omitted)).

[*703] A. § 1 Sherman Act Claim

Plaintiffs primarily bring this suit under § 1 of the Sherman Act. ***HN4***[] Section 1 prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *See* Agnew, 683 F.3d at 334 (alteration in original) (quoting 15 U.S.C. § 1). The Sherman Act is designed "to protect consumers from injury that results from diminished competition," and therefore a claim brought under the Act must allege both "injury to [the plaintiff]" and "to the market." Id. at 334-35 (quoting Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1107 (7th Cir. 1984)). To state a claim for relief under § 1, a plaintiff must show the following three prongs: "(1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in [a] relevant market; and (3) an accompanying injury." Id. at 335 (alteration in original) (quoting Denny's Marina, Inc. v. Renfro Prods., Inc., 8 F.3d 1217, 1220 (7th Cir. 1993)).

HN5[] To survive a motion **[**10]** to dismiss, *Twombly* requires that the existence of an agreement that violates § 1 of the Sherman Act "be pleaded plausible through allegations of fact." Alarm Detection Sys., Inc. v. Village of Schaumburg, 930 F.3d 812, 827 (7th Cir. 2019). "Such allegations usually take one of two forms: (1) direct allegations of an agreement, like an admission by a defendant that the parties conspired; or (2) more often, circumstantial allegations of an agreement, which are claimed facts that collectively give rise to a plausible inference that an agreement existed." *Id.* "The task before any plaintiff is thus to find and produce evidence that reveals coordination or agreement ... ." *Kleen Prods. LLC v. Ga.-Pac. LLC, 910 F.3d 927, 936 (7th Cir. 2018)*.

The district court here determined that the Complaint failed to state a claim for relief under *§ 1* of the Sherman Act. In reaching its conclusion, the district court relied on two reasons. First, the court focused on plaintiffs' allegations regarding the City's enactment of certain licensing requirements, notifications, and fees in 2015 and its subsequent denial of licenses to plaintiffs. The court concluded that plaintiffs had not plausibly linked the alleged circumstantial evidence to an agreement between the City and Miller Compressing to create an injurious regulatory scheme.

Second, the district court shifted **[**11]** to the 2003 Contract and reasoned that this agreement did not give rise to a plausible inference that City defendants and Miller Compressing conspired to control the recycling, towing, and salvaging market. The district court explained that, at most, one could infer from the 2003 Contract that the City violated its procurement obligations, rather than ***antitrust law*** but "[n]one of these alleged facts ... collectively give rise to a plausible inference that an agreement existed between the City and Miller Compressing to unlawfully control the recycling, towing, and salv[ag]ing marke[t] in Milwaukee."

On appeal, plaintiffs do not appear to challenge both the district court's bases for dismissing the *§ 1* claim.[1] Instead, they **[*704]** focus on the district court's conclusion regarding the 2003 Contract. In their view, the district court misapplied the *Twombly* standard to the 2003 Contract. The Complaint presented the 2003 Contract as *direct evidence* that Miller Compressing and City defendants entered a contract to restrain trade but that the district court treated the 2003 Contract as *circumstantial evidence*. Stated differently, plaintiffs assert that there is no need to draw any inferences from the **[**12]** contract to satisfy the Sherman Act framework: the contract itself is the unlawful agreement.

There is no question that plaintiffs alleged a contract between Miller Compressing and the City. However, plaintiffs have not carried their burden to show a "resultant unreasonable restraint of trade in [a] relevant market," *see Agnew, 683 F.3d at 335*, through the 2003 Contract. ***HN6***[] The inability to state a claim for relief on any one of the three prongs ends our inquiry because "a plaintiff must prove three elements to succeed under *§ 1* of the Sherman Act," and thus dismissal was appropriate. *Id.*

HN7[] "[E]very contract is a restraint of trade, and as [the Supreme Court] ha[s] repeatedly recognized, the Sherman Act was intended to prohibit *only* unreasonable restraints of trade." *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 98, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* (emphasis added); *see also Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (explaining that the Court has never interpreted *§ 1* to proscribe all contracts, "only unreasonable restraints" (citation omitted)).

HN8[] We draw on several analytical frameworks to assess whether a contract amounts to an unreasonable restraint of trade: among them, the per se, rule of reason, and quick look analyses. *See Agnew, 683 F.3d at 335-37*. "All of these methods of analysis are meant to answer the same question: 'whether or not the challenged **[**13]**

[1] Plaintiffs do not clarify whether they intend to challenge the district court's first basis for concluding that the *§ 1* Sherman Act claim was not satisfied. As noted above, the district court's first reason was that plaintiffs' circumstantial evidence—for example, the enactment and enforcement of the towing licenses—did not raise a plausible inference that the City and Miller Compressing conspired to enact the City's regulatory scheme. However, plaintiffs do not develop any argument regarding that circumstantial evidence on appeal.

Even if plaintiffs had raised and developed the argument that this regulatory conduct constituted an agreement, the circumstantial evidence would not have been dispositive to this appeal. We agree with the district court's well-supported view that the regulatory conduct here is insufficient circumstantial evidence to plead a plausible agreement for *§ 1* of the Sherman Act. In this case, plaintiffs' allegations did not "tend[] to exclude the possibility' that the [City] acted independently" of Miller Compressing to enact ordinances and regulate plaintiffs. *See Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

restraint enhances competition.'" *Id. at 335* (quoting *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 780, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*).

HN9[] We may dispense with the rule of reason inquiry if the restraint falls into a certain subset of agreements, known as "per se" violations. "*Per se* violations are actions where the nature and necessary effects that result are so plainly anticompetitive that an in-depth analysis of their illegality is unnecessary." *Tri-Gen Inc. v. Int'l Union of Operating Eng'rs, Loc. 150, 433 F.3d 1024, 1032 (7th Cir. 2006)*. In those cases, an unreasonable restraint "is conclusively presumed once the first is proved," *see Omnicare, Inc. v. UnitedHealth Grp., Inc., 629 F.3d 697, 705-06 (7th Cir. 2011)*, because "the probability that these practices are anticompetitive is so high," *NCAA, 468 U.S. at 100*.

HN10[] Both horizontal price fixing and bid rigging are presumptively unlawful under *§ 1* of the Sherman Act. *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* ("Price-fixing agreements between two or more competitors, otherwise known as horizontal price-fixing **[*705]** agreements, fall into the category of arrangements that are *per se* unlawful."); *Agnew, 683 F.3d at 336* ("Horizontal price fixing and output limitation are classic examples of behavior that is considered anticompetitive per se."); *United States v. Fenzl, 670 F.3d 778, 780 (7th Cir. 2012)* (explaining that bid rigging is a form of horizontal price fixing).

On appeal, plaintiffs maintain that the 2003 Contract amounts to a per se unlawful agreement and therefore is an unreasonable restraint under *§ 1* of the Sherman Act. They advance several **[**14]** theories, among them that the contract represents (1) horizontal price fixing, and (2) bid rigging. As we will elaborate below, the 2003 Contract does not fall into either of these per se categories and plaintiffs have waived any arguments under the remaining analytical frameworks available to plead the 2003 Contract's unreasonableness (i.e., rule of reason, quick look). Therefore, plaintiffs fail to show an unreasonable restraint of trade to state a claim for relief under *§ 1* of the Sherman Act.

a. Horizontal Price Fixing

HN11[] We begin with price fixing. "A Sherman Act combination 'formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price' in the marketplace is illegal *per se*." *Tri-Gen, 433 F.3d at 1032* (quoting *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*). While horizontal price fixing warrants a per se presumption of unreasonableness, *see id*; *Texaco, 547 U.S. at 5*, that presumption does not attach to all forms of price fixing.

For example, as relevant here, the Supreme Court has held that certain vertical price restraints do not receive per se treatment. *See Leegin, 551 U.S. at 899, 907* (holding that "***HN12***[] a per se rule of unlawfulness" is inappropriate for "judg[ing] vertical price restraints" and overruling cases to the contrary). "Vertical price restraints **[**15]** are to be judged according to the rule of reason." *Id. at 907*; *see also Republic Tobacco Co. v. N. Atl. Trading Co., 381 F.3d 717, 736 (7th Cir. 2004)* ("Unlike horizontal agreements between competitors, vertical exclusive distributorships (like in this case) are presumptively legal."). We are "cautious about importing relaxed standards of proof from horizontal agreement cases into vertical agreement cases" because "[t]o do so might harm competition and frustrate the very goals that ***antitrust law*** seeks to achieve." *Republic Tobacco Co., 381 F.3d at 737*. We accordingly must ask: Does the 2003 Contract constitute horizontal price fixing such that the per se presumption applies?

We conclude that the answer to that question is no: the multiyear contract between Miller Compressing and the City imposed a vertical restraint on competition, not a horizontal one. ***HN13***[] "Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints," while "those imposed by agreement between firms at different levels of distribution [have been denominated] as vertical restraints." *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*. Through the 2003 Contract, Miller Compressing agreed to charge the City to transport and recycle the metal, and the City agreed to sell scrapped vehicles to Miller Compressing. Read in that light, the parties' **[**16]** relationship is not that of horizontal competitors but rather of a seller (the City sells Miller vehicles) and buyer/service provider (Miller Compressing delivers its purchases from the City tow lot to its facilities and performs evacuation); their contract thus represents a vertical **[*706]** restraint. *See Brillhart v. Mut. Med. Ins., Inc., 768 F.2d 196, 199 (7th Cir. 1985)* (observing that agreements "between ... the buyer ... and ... the sellers" are "really vertical, rather than horizontal"); *see also Valley Liquors, Inc. v. Renfield Imps., Ltd., 822 F.2d 656, 660 n.5 (7th Cir. 1987)* ("Alleged price fixing between a manufacturer and distributors, however, is more properly termed a 'vertical' conspiracy."). Accordingly, the arrangement between the City and Miller Compressing is not per se unreasonable on the basis of horizontal price fixing. *See Republic Tobacco Co., 381 F.3d at 737*.

b. Bid Rigging

Plaintiffs' second theory for why the 2003 Contract was per se unlawful—that the 2003 Contract between the City and Miller Compressing circumvented the J-BID system in a manner giving rise to bid rigging—also cannot rescue plaintiffs' case. ***HN14***[] "[B]id rigging" is "a form of price fixing in which bidders agree to eliminate competition among them, as by taking turns being the low bidder." *Fenzl, 670 F.3d at 780*. Although we have defined bid rigging loosely, most of our caselaw appears to treat bid rigging as **[**17]** "a synonym for bid rotation." *See United States v. Heffernan, 43 F.3d 1144, 1146 (7th Cir. 1994)* (interpreting U.S. Sentencing Guidelines' definition of bid rigging and collecting cases in the criminal antitrust context).

Plaintiffs here cannot establish a bid rigging claim for two reasons. First, defendants are not competitors for scrapped vehicles within the J-BID system: the City sells the vehicles, and Miller Compressing and others purchase them. Second, even if they were competitors, at most the City and Miller Compressing interfered with the bid process, rather than rotated the bids. Plaintiffs do not point to, nor could we locate, a case in the civil context that defines bid rigging so broadly. ***HN15***[] In the criminal context, however, we have rejected the argument that bid rigging "includes all forms of collusion in a bidding process." *See id.* Plaintiffs gesture toward a similar argument here; they allege that the City and Miller Compressing engaged in, as we framed it in *Heffernan*, "some ... kind of interference with the integrity of a bidding system," by permitting Miller Compressing to obtain vehicles without bidding. *See id.* (rejecting this broader definition). Given our circumscribed view and without the need to further define what does constitute **[**18]** bid rigging, it is clear this alleged interference with J-BID does not amount to a per se unreasonable trade restraint.

c. Waiver

In sum, plaintiffs have failed to show the 2003 Contract amounts to horizontal price fixing or bid rigging. Having determined that plaintiffs cannot demonstrate that the City and Miller Compressing's conduct is per se unlawful,[2] we would traditionally assess whether plaintiffs nonetheless state a legal claim under the rule of reason framework. ***HN16***[] As we have explained, "a plaintiff's failure to state a *per se* illegal antitrust claim does not necessarily prove fatal to his case if he can state a claim under the rule of reason," or otherwise show the unreasonableness of the restraint. *Carl Sandburg Vill. Condo.* ***[*707]*** *Ass'n No. 1 v. First Condo. Dev. Co., 758 F.2d 203, 210 (7th Cir. 1985)*.

However, plaintiffs have waived their rule of reason and other arguments. Plaintiffs at most make only brief reference to the unreasonableness of the 2003 Contract in their reply brief without citing any controlling authority. ***HN17***[] "It is not the court's responsibility to research the law and construct the parties' arguments for them." *Econ. Folding Box Corp. v. Anchor Frozen Foods Corp., 515 F.3d 718, 721 (7th Cir. 2008)*.

---

[2] In passing, plaintiffs also refer to output limitations or market allocation as per se unlawful violations of *§ 1* of the Sherman Act. Even if those arguments were not waived, any agreement to allocate or restrain output is, again, the product of vertical agreement and therefore likely not presumptively unlawful under the Sherman Act. *See, e.g., Cont'l T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 59, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* (vertical nonprice restraints judged under rule of reason analysis).

Therefore, plaintiffs did not plead sufficient facts to support that the 2003 Contract is per se unlawful and have otherwise waived any argument **[**19]** that this agreement constituted an unreasonable restraint on trade. Accordingly, we hold that plaintiffs' pleadings fail to carry their burden. Plaintiffs cannot state a claim without satisfying all three prongs of the *§ 1* framework, so we need not proceed any further. *See Agnew, 683 F.3d at 335, 338 n.4*. Plaintiffs cannot state a claim for relief under *§ 1* of the Sherman Act and summary dismissal was appropriate.

B. Remaining Claims

We briefly address plaintiffs' remaining claims. The district court dismissed the other federal counts in the Complaint, which alleged that defendants violated *§ 5* of the *Federal Trade Commission Act* (*15 U.S.C. § 45*), *§ 1301* of the *Pollution Prevention Act* (*42 U.S.C. § 13101*), *§ 2* of the *Sherman Act* (*15 U.S.C. § 2*), and the Clayton Act (*15 U.S.C. § 12, et seq.*).

Plaintiffs have waived all these federal claims on appeal. Plaintiffs frame the issues before us with only sweeping references to "an antitrust claim" and "antitrust laws," and they do not develop any argument as to how the City and Miller Compressing's conduct amounted to a monopoly for purposes of claims brought under *§ 2* of the Sherman Act or the Clayton Act. Meanwhile, plaintiffs do not frame the issues in this case as involving Federal Trade Commission Act or Pollution Prevention Act claims (nor do they develop them in **[**20]** their briefing). ***HN18***[] "As we have repeatedly held, '[t]he absence of any supporting authority or development of an argument constitutes a waiver on appeal.'" *Silk v. Bd. of Trs., Moraine Valley Cmty. Coll., Dist. No. 524, 795 F.3d 698, 709 (7th Cir. 2015)* (alteration in original) (quoting *Kramer v. Banc of Am. Sec., LLC, 355 F.3d 961, 964 n.1 (7th Cir. 2004)*).

C. Leave to Amend

HN19[] Finally, plaintiffs assert that the district court erred by refusing to grant leave to amend. "Although *Federal Rule of Civil Procedure 15(a)(2)* directs courts to 'freely give leave [to amend] when justice so requires,' courts may deny a proposed amended pleading if the amendment would be futile." *Int'l Union of Operating Eng'rs, 983 F.3d at 296* (alteration in original).

In this case, plaintiffs have not carried their initial burden to state a claim for relief under *§ 1* of the Sherman Act. Plaintiffs have also already received an opportunity to remedy these deficiencies when the district court granted leave to amend the original complaint. That plaintiffs subsequently amended but nonetheless proved unable to adequately plead a claim "indicates the futility of granting further leave to amend." *See id.* Dismissal with prejudice was thus appropriate.

III. Conclusion

For the foregoing reasons, we AFFIRM the decision of the district court.

Prior History: House v. NCAA, 2021 U.S. Dist. LEXIS 206712 (N.D. Cal., Feb. 25, 2021)

Core Terms

student-athletes, sports, sub-class, athletes, relevant market, broadcasting, Licensing, compete, consumer demand, procompetitive, Damages, conferences, rights, in house, settlement, schools, anti trust law, injunctive relief, rule of reason, football, claim for damages, motion to dismiss, Plaintiffs', antitrust, subject to dismissal, goods and services, legal theory, allegations, bundle, limits

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A complaint must contain a short and plain statement of the claim showing that the pleader is entitled to relief. Fed. R. Civ. P. 8(a). The plaintiff must proffer enough facts to state a claim to relief that is plausible on its face. On a motion under Fed. R. Civ. P. 12(b)(6) for failure to state a claim, dismissal is appropriate only when the complaint does not give the defendant fair notice of a legally cognizable claim and the grounds on which it rests. A claim is facially plausible when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

In considering whether the complaint is sufficient to state a claim, the court will take all material allegations as true and construe them in the light most favorable to the plaintiff. The court's review is limited to the face of the complaint, materials incorporated into the complaint by reference, and facts of which the court may take judicial notice. However, the court need not accept legal conclusions, including threadbare recitals of the elements of a cause of action, supported by mere conclusory statements.

Governments > Courts > Judicial Precedent

HN3[] Courts, Judicial Precedent

Stare decisis binds today's court to yesterday's decisions. Insofar as there may be factual differences between the current case and the prior case, courts must determine whether those differences are material to the application of the rule or allow the precedent to be distinguished on a principled basis.

Contracts Law > Defenses > Illegal Bargains

HN4[] Defenses, Illegal Bargains

Antitrust decisions are particularly fact-bound. The Supreme Court has long emphasized that the Rule of Reason contemplates case-by-case adjudication. Continuing contracts in restraint of trade are typically subject to continuing reexamination, and even a judicial holding that a particular agreement is lawful does not immunize it from later suit or preclude its reexamination as circumstances change.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Civil Rights Law > Protection of Rights > Immunity From Liability > Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN5[] Noerr-Pennington Doctrine, Right to Petition Immunity

Pursuant to the Noerr-Pennington doctrine, private actors are immune from antitrust liability for petitioning the government, even when the private actors' motives are anticompetitive.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN6[] Clayton Act, Claims

A plaintiff suing for violations of federal ***antitrust law*** may recover damages if it can show: (1) actual injury caused by the antitrust violation; (2) the directness or indirectness of the injury, taking into account possible duplicative recoveries, complex apportionment, and alternative or superior plaintiffs; and (3) injury of the kind that the antitrust laws were intended to prevent. Antitrust injury does not arise for purposes of § 4 of the Clayton Act until a private party is adversely affected by an anticompetitive aspect of the defendant's conduct.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN7[] **Standing, Requirements**

To establish that plaintiffs have not alleged antitrust injury, defendants must show that plaintiffs' injuries are not of the type that the antitrust laws were intended to prevent.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Evidence > Burdens of Proof > Allocation

HN8[] **Standing, Requirements**

A plaintiff can show that it was injured in fact by alleging that it was deprived of the opportunity to receive compensation it otherwise would have received but for the challenged conduct. To make this showing, a plaintiff need not establish that it has a legal entitlement to the compensation in question.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN9[] **Sherman Act, Claims**

To establish a section 1 violation under the Sherman Act, a plaintiff must demonstrate three elements: (1) an agreement, conspiracy, or combination among two or more persons or distinct business entities; (2) which is intended to harm or unreasonably restrain competition; and (3) which actually causes injury to competition, beyond the impact on the claimant, within a field of commerce in which the claimant is engaged. An essential element of a Section 1 violation under the rule of reason is injury to competition in the relevant market. A relevant market encompasses notions of geography as well as product use, quality, and description. The geographic market extends to the 'area of effective competition where buyers can turn for alternative sources of supply. The product market includes the pool of goods or services that enjoy reasonable interchangeability of use and cross-elasticity of demand. Failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim.

Labor & Employment Law > Discrimination > Actionable Discrimination

HN10[] Discrimination, Actionable Discrimination

(***Antitrust law*** addresses employer conspiracies controlling employment terms precisely because they tamper with the employment market and thereby impair the opportunities of those who sell their services there.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN11[] Sherman Act, Claims

In an antitrust case under section 1 of the Sherman Act, 15 U.S.C.S. 1, to avoid dismissal at the pleading stage, plaintiffs are required to identify a relevant market and plead injury to competition within that market.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

HN12[] Class Actions, Compromise & Settlement

A settlement agreement may preclude a party from bringing a related claim in the future even though the claim was not presented and might not have been presentable in the class action, but only where the released claim is based on the identical factual predicate as that underlying the claims in the settled class action.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN13[] Preclusion of Judgments, Res Judicata

Res judicata bars a subsequent claim when there is: (i) an identity of claims between the prior and subsequent actions; (ii) a final judgment on the merits; and (iii) identity or privity between the parties.

Opinion by: CLAUDIA WILKEN

Opinion

[*808] ORDER GRANTING IN PART AND DENYING IN PART MOTIONS TO DISMISS

Now before the Court are Defendants'[1] motions to dismiss the complaint in two separate actions: (1) House v. National Collegiate Athletic Association, 4:20-cv-03919 (House); and (2) Oliver v. National Collegiate Athletic Association, 4:20-cv-04527 (Oliver). Plaintiffs[2] oppose the motions. For the reasons set forth below, the Court GRANTS Defendants' motion to dismiss Tymir Oliver's claims for injunctive relief, without leave to amend, and it otherwise DENIES the motions.

I. BACKGROUND

In House and Oliver, student-athletes[3] challenge a subset of NCAA rules that "prohibit student-athletes from receiving anything of value in exchange for **[**6]** the commercial use" of their names, images, and likenesses (NIL). House Compl. ¶¶ 5, 73-80, 267-89; Oliver Compl. ¶¶ 5, 55-62, 246-68. The challenged rules, among other things, prohibit student-athletes from endorsing any commercial product or service while they are in school, regardless of whether they receive any compensation for doing so (Division I Bylaw 12.5.2.1); prohibit student-athletes from receiving compensation for their NIL from outside employment (Division I Bylaws 12.4.1, 12.4.1.1, 12.4.2.3); and prohibit student-athletes from using their NIL to promote their own business ventures or engage in self-employment (Division I Bylaw 12.4.4). House Compl. ¶¶ 77-79; Oliver Compl. ¶¶ 59-61. The challenged rules also allegedly preclude student-athletes from benefitting financially from their social media posts, personal brands, viral videos depicting their athletic performances, apparel sponsorships, and other opportunities related to the use of their NIL. House Compl. ¶¶ 116-149; Oliver Compl. ¶¶ 98-130. The challenged rules also allegedly prohibit NCAA member conferences and schools from sharing the revenue they make from their broadcasting contracts with networks, marketing **[**7]** contracts with companies that make sports apparel, social medial sponsorships, and other commercial activities that involve the use of student-athletes' **[*809]** NIL. House Compl. ¶¶ 120-149, 237; Oliver Compl. ¶¶ 101-17, 216.

Plaintiffs aver that, absent the challenged rules, the NCAA and its member conferences and schools would allow student-athletes to take advantage of opportunities to profit from their NIL, and NCAA member conferences and schools would share with student-athletes the revenue they receive from third parties for the commercial use of student-athletes' NIL.

Plaintiffs define the relevant market as follows:

> The relevant market is the nationwide market for the labor of NCAA Division I college athletes. In this market, current and prospective athletes compete for roster spots on Division I athletic teams. NCAA Division I member

[1] Defendants are the National Collegiate Athletic Association (NCAA), Pac-12 Conference, The Big Ten Conference, The Big 12 Conference, Southeastern Conference, and Atlantic Coast Conference.

[2] The named plaintiffs in House are Sedona Price and Grant House, and the named plaintiff in Oliver is Tymir Oliver (collectively, Plaintiffs).

[3] Grant House is a current student-athlete at Arizona State University who competes in Division I swimming and diving. House Compl. ¶ 27. Sedona Price is a current student-athlete at the University of Oregon who competes in Division I women's basketball. Id. ¶ 39. Tymir Oliver is a student-athlete who competed in Division I football for the University of Illinois. Oliver Compl. ¶ 27. These athletes allege that they have not derived any personal profit from the use of their NIL in advertisements for their school teams, in their social media posts, or otherwise, as a result of the NCAA rules they challenge here.

> institutions compete to recruit and retain the best players by offering unique bundles of goods and services including scholarships to cover the cost of attendance, tutoring, and academic support services, as well as access to state-of-the-art athletic training facilities, premier coaching, medical treatment, and opportunities to compete at **[**8]** the highest level of college sports, often in front of large crowds and television audiences. In exchange, student-athletes must provide their athletic services and acquiesce in the use of their NILs by the NCAA and its members for commercial and promotional purposes. They also implicitly agree to pay any costs of attending college and participating in intercollegiate athletics that are not covered by their scholarships. . . . The NCAA and its members have the ability to control price and exclude competition in this market. All NCAA members have agreed to utilize and abide by the NCAA's bylaws, including the provisions detailed herein, which have been used by the NCAA and its members to fix the prices at which student-athletes are paid for their commercial licensing rights, including but not limited to individual and group licensing rights, and/or to foreclose student-athletes from exercising any such rights entirely. The NCAA and its members have the power to exclude from this market any member who is found to violate its rules. . . . Absent these nationwide restraints, Division I conferences and schools would compete amongst each other by allowing their athletes to take advantage **[**9]** of opportunities to utilize, license, and profit from their NILs in commercial business ventures and promotional activities and to share in the conferences' and schools' commercial benefits received from exploiting student-athletes' names, images, and likenesses. Conferences and schools would also compete for recruits by redirecting money that they currently spend on extravagant facilities and coaching salaries to marketing programs and educational resources designed to help their student-athletes develop and grow their personal brand value.

House Compl. ¶¶ 81-87; Oliver Compl. ¶¶ 63-70.

According to Plaintiffs, the rules they challenge cannot be justified on the basis that they are necessary to preserve consumer demand for college sports as a distinct product because any such procompetitive effect, to the extent that it exists, would fall outside of the scope of the relevant market and is therefore irrelevant to the Rule of Reason analysis. House Compl. ¶¶ 158-60, 179; Oliver Compl. ¶¶ 139-41, 160.

Alternatively, Plaintiffs allege that, to the extent that the preservation of consumer demand for college sports as a distinct product is deemed to be a procompetitive effect within the relevant **[**10]** market, the challenged rules are not necessary to **[*810]** achieve that effect because (1) the NCAA has granted more than 200 waivers since 2015 permitting student-athletes to use or profit from their NIL, and demand for college sports has not decreased as a result, House Compl. ¶¶ 224-27; Oliver Compl. ¶¶ 205-08; and (2) recent surveys suggest that consumer demand for college sports would not decrease if student-athletes were permitted to profit from their NIL, House Compl. ¶¶ 162-65; Oliver Compl. ¶¶ 143-46. Plaintiffs further aver that the NCAA recently changed its official policy on NIL compensation by supporting proposals that would permit student-athletes to receive NIL compensation to some degree. House Compl. ¶ 18; Oliver Compl. ¶ 18. According to Plaintiffs, these facts demonstrate that it is not the case, as Defendants represented in prior lawsuits, that permitting student-athletes to receive compensation for their NIL would irreparably damage demand for college sports. House Compl. ¶ 19; Oliver Compl. ¶ 19.

Plaintiffs allege that the challenged rules violate federal antitrust laws and the common law because they (1) fix at zero the amount that student-athletes may be paid for the **[**11]** licensing, use, and sale of their NIL; and (2) foreclose student-athletes from the market for licensing, use, and sale of their NIL. Plaintiffs assert claims for (1) conspiracy to fix prices in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*; (2) group boycott or refusal to deal in violation of *Section 1* of the Sherman Act; and (3) unjust enrichment. Plaintiffs assert these claims on their own behalf and on behalf of the following proposed class and sub-classes.

The "Declaratory and Injunctive Relief Class" is comprised of:

> All current and former student-athletes who compete on, or competed on, an NCAA Division I athletic team at any time between four (4) years prior to the filing of this Complaint and the date of judgment in this matter.

House Compl. ¶ 22 n.16; Oliver Compl. ¶ 22 n.16. Plaintiffs request an injunction permanently restraining Defendants from enforcing their alleged agreements to restrict the amount of NIL compensation that members of this proposed class can receive. Id.

The "Social Media Damages Sub-Class" is comprised of:

> All current and former student-athletes who compete on, or competed on, an NCAA Division I athletic team at a college or university that is a member of one of the Power Five **[**12]** Conferences, at any time between four (4) years prior to filing of this Complaint and the date of judgment in this matter.

House Compl. ¶ 23 n.17; Oliver Compl. ¶ 23 n.17. On behalf of this sub-class, Plaintiffs seek the social media earnings that members of this sub-class would have received absent Defendants' unlawful conduct. Id.

The "Group Licensing Damages Sub-Class" is comprised of:

> All current and former student-athletes who compete on, or competed on, an NCAA Division I men's or women's basketball team or an FBS football team, at a college or university that is a member of one the Power Five Conferences, at any time between four (4) years prior to the filing of this Complaint and the date of judgment in this matter.

House Compl. ¶ 23 n.18; Oliver Compl. ¶ 23 n.18. On behalf of this sub-class, Plaintiffs seek the share of game telecast group licensing revenue that members of this sub-class would have received absent Defendants' unlawful conduct. Id.

II. LEGAL STANDARD

HN1[] A complaint must contain a "short and plain statement of the claim showing **[*811]** that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*. The plaintiff must proffer "enough facts to state a claim to relief that is plausible on its face." **[**13]** *Ashcroft v. Iqbal, 556 U.S. 662, 697, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). On a motion under *Rule 12(b)(6)* for failure to state a claim, dismissal is appropriate only when the complaint does not give the defendant fair notice of a legally cognizable claim and the grounds on which it rests. *Twombly, 550 U.S. at 555*. A claim is facially plausible "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*.

HN2[] In considering whether the complaint is sufficient to state a claim, the court will take all material allegations as true and construe them in the light most favorable to the plaintiff. *Metzler Inv. GMBH v. Corinthian Colleges, Inc., 540 F.3d 1049, 1061 (9th Cir. 2008)*. The court's review is limited to the face of the complaint, materials incorporated into the complaint by reference, and facts of which the court may take judicial notice. *Id. at 1061*. However, the court need not accept legal conclusions, including threadbare "recitals of the elements of a cause of action, supported by mere conclusory statements." *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 555*).

III. DISCUSSION

Defendants argue that the complaints in House and Oliver are subject to dismissal with prejudice because (1) the complaints are barred under the doctrine of stare decisis in light of *O'Bannon v. Nat'l Collegiate Athletic Ass'n, 802 F.3d 1049 (9th Cir. 2015)* (O'Bannon II) and *In re Nat'l Collegiate Athletic Ass'n Grant-in-Aid Cap Antitrust Litig., 958 F.3d 1239 (9th Cir. 2020)*, aff'd sub nom. *Nat'l Collegiate Athletic Ass'n v. Alston, No. 20-512, 141 S. Ct. 2141, 2021 WL 2519036 (U.S. June 21, 2021)* (Alston II); (2) the claims **[**14]** of the "Group-Licensing Damages Sub-Class" fail as a matter of law because the members of that sub-class have no publicity rights in game broadcasts, and even if they did, Plaintiffs have not alleged injury to competition in the "Group Licensing Market" that was adjudicated in O'Bannon; and (3) the claims of named plaintiff Tymir Oliver fail as a matter of law because he lacks standing to seek injunctive relief as a former student-athlete, and because he released his damages claims in the Alston settlement.

The Court addresses each of these arguments in turn.

A. Stare Decisis

HN3[] "Stare decisis binds 'today's Court' to 'yesterday's decisions.'" *Alston II, 958 F.3d at 1253* (citation omitted). "'Insofar as there may be factual differences between the current case' and the prior case, courts 'must determine whether those differences are material to the application of the rule or allow the precedent to be distinguished on a principled basis.'" Id. (citation omitted).

HN4[] "Antitrust decisions are particularly fact-bound. The Supreme Court has long emphasized that the Rule of Reason 'contemplate[s]' 'case-by-case adjudication.'" Id. (quoting *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 899, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*). "Continuing contracts in restraint of trade" are "typically subject to continuing **[**15]** reexamination," and "even a judicial holding that a particular agreement is lawful does not immunize it from later suit or preclude its reexamination as circumstances change." Phillip Areeda & Herbert **[*812]** Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application, ¶ 1205c3 (4th ed. 2018).

Defendants argue that stare decisis compels the dismissal of House and Oliver because the Ninth Circuit "validated" in both O'Bannon II and Alston II the NCAA rules limiting student-athlete compensation that Plaintiffs now challenge in House and Oliver. Defendants contend that the claims asserted in House and Oliver are identical to the ones litigated in O'Bannon II, and that the claims in House and Oliver were also encompassed by the Alston litigation because the plaintiffs in Alston challenged the NCAA's entire compensation framework. See Mot. at 3-4.

As an initial matter, the Court is not persuaded by Defendants' contention that the present actions are subject to dismissal on the ground that the Ninth Circuit validated certain NCAA rules limiting NIL compensation in O'Bannon II and Alston II. The Ninth Circuit made clear in both O'Bannon II and Alston II that any holdings in **[**16]** those cases with respect to whether certain NCAA limits on student-athlete compensation could be enjoined as anticompetitive were based on, and limited to, the record presented in those cases. See. e.g., *Alston II, 958 F.3d at 1264* ("[T]his analysis reflects the judgment that limits on cash compensation unrelated to education do not, on this record, constitute anticompetitive conduct and, thus, may not be enjoined.") (emphasis added). The Ninth Circuit thus left open the possibility for reaching a different conclusion in future litigation to the extent that the parties present a different record. Indeed, the court of appeals recognized in both O'Bannon II and Alston II that, because the analysis demanded by the Rule of Reason requires the evaluation of "dynamic market conditions and consumer preferences" and is "inherently fact-dependent," "courts must continue to subject NCAA rules, including those governing compensation, to antitrust scrutiny." *Id. at 1254* (citing *O'Bannon II, 802 F.3d at 1064* ("The amateurism rules' validity must be proved, not presumed.")).

Here, Plaintiffs' allegations, which the Court must construe in their favor at this juncture, raise the reasonable inference that material differences exist between Oliver and House, on the **[**17]** one hand, and O'Bannon and Alston, on the other hand, that distinguish the former from the latter on a principled basis.

First, some of the rules that Plaintiffs challenge in House and Oliver were not challenged in O'Bannon or Alston. These rules include those prohibiting student-athletes from endorsing any commercial product or service while they are in school, regardless of whether they receive any compensation for doing so (Division I Bylaw 12.5.2.1); and prohibiting student-athletes from using their NIL to promote their own business ventures or self-employment (Division I Bylaw 12.4.4).

Second, the claims in House and Oliver are predicated on a different legal theory than the claims in O'Bannon II and Alston II and will therefore involve different facts. Defendants justified the challenged rules in O'Bannon and Alston on the basis that the rules were necessary to preserve consumer demand for college sports as a distinct product and were thus procompetitive. In O'Bannon and Alston, the Ninth Circuit credited this argument and the evidence that Defendants submitted in support of it and affirmed this Court's holding that the challenged rules could not be invalidated despite their anticompetitive **[**18]** effects because of their role in preserving consumer demand for college sports as a distinct product. *O'Bannon II, 802 F.3d at 1058-59, 1072-74*; *Alston II, 958 F.3d at 1257-60*. By contrast, in House and Oliver, Plaintiffs allege that this procompetitive **[*813]** justification cannot save the rules challenged here from being invalidated because any procompetitive effect that the rules may have on consumer demand for college sports falls outside of the relevant market and any such effect is, therefore, irrelevant to the Rule of Reason analysis.

This legal theory is based on Judge Milan Smith's concurrence in Alston II. There, Judge Smith stated that the scope of the inquiry at step two of the Rule of Reason analysis ought to exclude the consideration of any procompetitive effects in collateral markets in the absence of evidence that such an effect has a corollary impact in the relevant market. *Alston II, 958 F.3d at 1271*. Judge Smith explained that, because consumer demand for college sports is collateral to the market for student-athletes' labor, the Ninth Circuit had erred in O'Bannon II and Alston II in crediting at step two any procompetitive effect of the challenged rules in those cases on the preservation of demand for college sports without requiring the NCAA to show that this effect **[**19]** had a corollary impact on the market for student-athletes' labor:

> At Step Two, the court did not limit its consideration to the procompetitive effects of the compensation limits in the market for Student-Athletes' athletic services. Rather, it found that certain of the compensation limits are procompetitive because they drive consumer demand for college sports by distinguishing collegiate from professional athletics. *Id. at 1083*. In other words, the court found that limiting Student-Athletes' pay in the market for their services was justified because that restraint drove demand for the distinct product of college sports in the consumer market for sports entertainment. The court did not require that the NCAA prove that this impact on consumer demand had a corollary procompetitive impact on the market for Student-Athletes' services, that it "increase[d] output" or "'widen[ed]' the choices 'available to athletes.'" *O'Bannon II, 802 F.3d at 1072* (quoting Board of Regents, 468 U.S. at 102). The court did not require that the NCAA prove its compensation rules, within the defined market, "increase competition in the economic sense of encouraging others to enter the market to offer the product at lower cost." Smith, 593 F.2d at 1186. It was enough for the NCAA to meet its Step Two burden **[**20]** that it could show (however feebly) a procompetitive effect in a collateral market. . . . Under the Rule of Reason analysis we affirm today, so long as the NCAA cites consumer demand for college sports, we allow it to artificially suppress competition for collegiate athletes' services by limiting their compensation. Instead of requiring the NCAA to explain how those limits promote schools' competition for athletes, we leave Student-Athletes with little recourse under the antitrust laws. Student-Athletes are thus denied the freedom to compete and, in turn, "of compensation they would receive in the absence of the restraints." *Id. at 1068*. Our Rule of Reason framework has shifted toward this cross-market analysis without direct consideration or a robust justification. . . . Lacking a robust justification, I fear that our cross-market Rule of Reason analysis frustrates the very purpose of the antitrust laws, in this case to the great detriment of Student-Athletes. I hope our court will reconsider this issue in a case that squarely raises it.

Id.

In their motion, Defendants do not discuss the fact that Plaintiffs' claims in House and Oliver are predicated on a legal **[*814]** theory addressed in Judge Smith's **[**21]** concurrence in Alston II. This legal theory would require Defendants to proffer facts that they did not have to proffer in O'Bannon and Alston, namely facts showing that any procompetitive effect of the challenged rules on consumer demand for college sports as a distinct product has a procompetitive impact on the relevant market alleged in House and Oliver, which is the market for student-athletes' labor and the right to use their NIL.

Third, Plaintiffs allege new factual matter that post-dates O'Bannon II and Alston II. This new factual matter raises the inference that, to the extent that the preservation of consumer demand for college sports as a distinct product is deemed to be a procompetitive effect within the relevant market, the challenged rules are not necessary to achieve that effect. Specifically, Plaintiffs allege that, since O'Bannon II and Alston II, Defendants have admitted that restrictions on student-athlete compensation should be loosened or eradicated[4], thereby contradicting their prior

---

[4] Defendants argue that some of these statements were made in the context of their "lobbying efforts regarding potential legislative action," and for that reason, Plaintiffs cannot "impose antitrust liability on the NCAA" based on these statements in light of the Noerr-Pennington doctrine, see Mot. at 6; see also *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*. ***HN5***[] Pursuant to the Noerr-Pennington doctrine, "private actors are immune from antitrust liability for petitioning the government, even when the private actors' motives are anticompetitive." *Sanders v. Brown, 504 F.3d 903, 912 (9th Cir. 2007)* (citations omitted). Plaintiffs argue that the Noerr-Pennington doctrine does not preclude them from seeking to

representations in both O'Bannon and Alston that such restrictions were absolutely necessary to preserve consumer demand for college sports. See, e.g., House Compl. ¶¶ 14, 208. Plaintiffs **[**22]** also allege that surveys conducted since O'Bannon II and Alston II show that consumers of college sports support eliminating the limitations on student-athletes' ability to capitalize on their own NIL or would not stop consuming college sports if student-athletes were allowed to receive compensation for the use of their NIL. Id. ¶¶ 163-65. Plaintiffs further aver that, since O'Bannon II and Alston II, Defendants have granted hundreds of waivers to student-athletes to profit from or use their NIL in contravention of the rules challenged here, and consumer demand for college sports has not decreased. See id. ¶¶ 224-27 (alleging that student-athlete was granted a waiver to participate in television show Dancing with the Stars and to accept as much as $325,000 if she won). Additionally, Plaintiffs allege that new and potentially highly lucrative opportunities for capitalizing on student-athletes' NIL have emerged since O'Bannon II and Alston II, with social media being one of them. Id. ¶¶ 134-36, 229.

Fourth, because of the distinct factual and legal differences that exist between House and Oliver **[**23]** and O'Bannon and Alston, Plaintiffs here have proposed less restrictive alternatives that were not considered **[*815]** in the prior cases. One proposed less restrictive alternative here is to require the NCAA to permit its members to allow student-athletes to receive compensation from third parties for the use of their NIL. See House Compl. ¶¶ 21, 91, 175, 275.

In light of the foregoing, the Court concludes that material differences distinguish House and Oliver from *O'Bannon II* and *Alston II* on a principled basis. Accordingly, House and Oliver are not subject to dismissal on the basis of stare decisis.

B. Group-Licensing Damages Sub-Class

Defendants argue that the claims of the "Group Licensing Damages Sub-Class" are subject to dismissal for two reasons. First, Defendants argue that the proposed members of the sub-class have no publicity rights in broadcasts of football or basketball games, which precludes them from alleging the requisite injury to their "business or property" under the Clayton Act, *15 U.S.C. § 15(a)*. Second, Defendants contend that, even if the sub-class members had such rights, Plaintiffs cannot establish injury to competition because they have not alleged the same "Group Licensing Market" that **[**24]** was adjudicated in O'Bannon. Defendants argue that, because Plaintiffs' request for a share of broadcasting revenue here is "in all material respects identical" to the request for a share of broadcasting revenue in O'Bannon, Plaintiffs must allege injury to competition "in the relevant market for that claim," which Defendants contend is, and can only be, the "Group Licensing Market" defined and adjudicated in O'Bannon. See Reply at 4-5.

Section 4 of the Clayton Act provides:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

15 U.S.C. § 15(a).

HN6[] A plaintiff suing for violations of federal ***antitrust law*** may recover damages if it can show: (1) actual injury caused by the antitrust violation; (2) the directness or indirectness of the injury, taking into account possible duplicative recoveries, complex apportionment, and alternative or superior plaintiffs; and **[**25]** (3) injury of the kind that the antitrust laws were intended to prevent. See *Associated Gen. Contractors v. Cal. State Council of*

---

use the statements as party admissions to show that Defendants agree that the amateur nature of college sports would not be altered if certain NIL rights are granted to student-athletes. The Court finds that Defendants have not shown that the Noerr-Pennington doctrine precludes Plaintiffs from using the statements in question as party admissions to support their claims in this action, which arise from Defendants' alleged price-fixing by way of certain NCAA rules and not from Defendants' petitioning activities. Accordingly, the Noerr-Pennington doctrine does not preclude the Court from considering the statements in question as allegations of party admissions in the context of resolving the present motion to dismiss.

Carpenters, 459 U.S. 519, 534, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983). "Antitrust injury does not arise for purposes of § 4 of the Clayton Act . . . until a private party is adversely affected by an anticompetitive aspect of the defendant's conduct[.]" Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990) (citation omitted).

Defendants argue that, as a matter of law, Plaintiffs cannot establish that the members of the proposed "Group Licensing Damages Sub-Class" suffered antitrust injury because Plaintiffs must, but cannot, show that the members of the sub-class have rights of publicity in the use of their NIL "in live game broadcasts and archival game footage." Mot. at 7.

HN7[] To establish that Plaintiffs have not alleged "antitrust injury," Defendants must show that Plaintiffs' injuries are not of the type that the antitrust laws were intended to prevent. See Associated Gen. Contractors, 459 U.S. at 534; see also O'Bannon II, 802 F.3d at 1067 ("Although the NCAA purports to be making an antitrust-injury argument, it is mistaken. The NCAA has not contended that **[*816]** the plaintiffs' injuries are not "of the type the antitrust laws were intended to prevent."). Defendants have made no such showing.

Defendants argue that, because the members of the sub-class purportedly have no legal entitlement to broadcasting revenue **[**26]** by way of publicity rights in broadcasts, the members of the sub-class have suffered no injury, as the challenged rules do not deprive them of compensation that they would otherwise receive. This argument is not one about antitrust injury, but rather one about injury in fact. See O'Bannon II, 802 F.3d at 1067 (holding that "the NCAA has made a garden-variety standing argument" by contending that "the plaintiffs have not been injured in fact by the compensation rules because those rules do not deprive them of any NIL compensation they would otherwise receive").

HN8[] A plaintiff can show that it was injured in fact by alleging that it was deprived of the opportunity to receive compensation it otherwise would have received but for the challenged conduct. To make this showing, a plaintiff need not establish that it has a legal entitlement to the compensation in question. See id. at 1069 ("That the NCAA's rules deny the plaintiffs all opportunity to receive this compensation is sufficient to endow them with standing to bring this lawsuit.") (citing 13A Charles Alan Wright & Arthur R. Miller, Federal Practice and Procedure § 3531.4 (3d ed. 1998) ("[L]oss of an opportunity may constitute injury, even though it is not certain that any **[**27]** benefit would have been realized if the opportunity had been accorded.") (collecting cases)).

Here, Plaintiffs allege that, absent the challenged rules, "Division I conferences and schools would compete amongst each other by allowing their athletes to . . . share in the conferences' and schools' commercial benefits received from exploiting student-athletes names, images, and likenesses," which include broadcasting revenue. Oliver Compl. ¶¶ 63-70. These allegations are sufficient to raise the reasonable inference that competition among schools and conferences would increase in the absence of the challenged rules, and that this increased competition would incentivize schools and conferences to share their broadcasting and other commercial revenue with student-athletes even if the student-athletes lacked publicity rights in broadcasts. These allegations are sufficient to claim injury in fact at this juncture.

Defendants have not shown that a different conclusion is warranted. Defendants' reliance on non-binding authorities that suggest that student-athletes may not have a legal entitlement to broadcasts under the laws of some states is misplaced. See, e.g., Marshall v. ESPN Inc., 111 F. Supp. 3d 815, 826-27 (M.D. Tenn. 2015), aff'd sub nom. Marshall v. ESPN, 668 F. App'x 155 (6th Cir. 2016) (dismissing **[**28]** student-athletes' claims predicated on violations of their right of publicity under Tennessee law on the ground that "Tennessee recognizes no right of publicity in sports broadcasts"). Defendants cite these non-binding authorities to support the proposition that student-athletes cannot establish injury in fact because they do not have publicity rights in broadcasts. But, as discussed above, a plaintiff is not required to establish that it has a legal entitlement to the compensation in question to show that it was injured in fact by a restraint that prevented it from receiving the compensation. A plaintiff can establish injury in fact in this context merely by showing that the restraint deprived it of the opportunity to receive the compensation. Plaintiffs here have satisfied this standard; they have alleged facts from which the fact-finder could infer that, but for the challenged rules, schools and conferences would be willing to share their broadcasting revenue with the members of the sub-class even if **[*817]** they had no publicity rights in broadcasts, to the extent that doing so would help the schools and conferences compete with other schools and conferences for recruits. Accordingly, **[**29]** the claims of the sub-class are not subject to dismissal on the ground that Plaintiffs failed to plead injury in fact.

Defendants also argue that the claims of the sub-class at issue are subject to dismissal because Plaintiffs have not alleged facts showing that the challenged rules harm competition in the "Group Licensing Market" that was adjudicated in O'Bannon. Mot. at 11-12. This argument is premised on the theory that, because Plaintiffs here seek a share of broadcasting revenue just like the plaintiffs in O'Bannon sought a share of broadcasting revenue, then Plaintiffs are required to allege and rely on the same relevant market for group licenses adjudicated in O'Bannon, as the request for a share of broadcasting revenue in both actions is essentially "identical." See Reply at 4-5.

HN9[] "To establish a *section 1* violation under the Sherman Act, a plaintiff must demonstrate three elements: (1) an agreement, conspiracy, or combination among two or more persons or distinct business entities; (2) which is intended to harm or unreasonably restrain competition; and (3) which actually causes injury to competition, beyond the impact on the claimant, within a field of commerce in which the claimant is **[**30]** engaged[.]" *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 (9th Cir. 1988)* (citations omitted). "An essential element of a *Section 1* violation under the rule of reason is injury to competition in the relevant market." *All. Shippers, Inc. v. S. Pac. Transp. Co., 858 F.2d 567, 570 (9th Cir. 1988)* (citation omitted). A "relevant market"

> encompasses notions of geography as well as product use, quality, and description. The geographic market extends to the "'area of effective competition' . . . where buyers can turn for alternative sources of supply." The product market includes the pool of goods or services that enjoy reasonable interchangeability of use and cross-elasticity of demand.

Tanaka v. Univ. of S. California, 252 F.3d 1059, 1063 (9th Cir. 2001) (citations and internal quotation marks omitted). "Failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim." Id. (citation omitted).

Here, Plaintiffs have adequately pleaded a relevant market, as well as injury to competition in that market. Plaintiffs allege that the relevant market is the nationwide market for the labor of Division I college athletes, wherein Division I members compete with each other to purchase through bundles of goods and services student-athletes' labor and the right to use their NIL. Plaintiffs further allege that, because Division I members have overwhelming market power as a result of the absence **[**31]** of reasonable substitutes for the opportunities offered by Division I members, the challenged rules allow Division I members to suppress competition that would otherwise exist among them by artificially fixing the price of the bundle of goods and services offered to student-athletes. In the absence of the challenged rules, Plaintiffs allege, competition among Division I members would increase, resulting in an increase in the price of the bundle of goods and services that Division I members would offer to student-athletes. Plaintiffs allege that one of the ways in which Division I members could increase the price of the bundle of goods and services in the absence of the challenged rules would be to offer student-athletes a share of the revenue that Division I members derive from the licensing or commercializing of student-athletes' NIL. See House Compl. ¶¶ 81-87; Oliver Compl. ¶¶ 63-70.

[*818] The injury to competition that Plaintiffs allege here is the artificial suppression of the price of the bundle of goods and services that student-athletes can receive in exchange for their labor and the right to use their NIL within the nationwide labor market just described. ***HN10***[] This alleged injury is cognizable **[**32]** and sufficient to survive the present motion to dismiss. See *Atl. Richfield, 495 U.S. at 341* (noting that "price competition" in the relevant market is "in the interest of competition"); *United States v. eBay, Inc., 968 F. Supp. 2d 1030, 1039 (N.D. Cal. 2013)* ("***Antitrust law*** addresses employer conspiracies controlling employment terms precisely because they tamper with the employment market and thereby impair the opportunities of those who sell their services there.") (citation and internal quotation marks omitted).

Defendants contend that Plaintiffs are required to plead the same relevant market that formed the basis of some of the plaintiffs' claims in O'Bannon, and that their failure to do so means that Plaintiffs have not alleged injury to competition in a relevant market. Defendants, however, have cited no authority to support the proposition that Plaintiffs in House and Oliver are required to adopt the same market definition that another set of plaintiffs relied upon in a different case. ***HN11***[] To avoid dismissal at the pleading stage, Plaintiffs are required to "identify a relevant market" and plead injury to competition within that market. *Tanaka, 252 F.3d at 1063* (emphasis added). For the reasons discussed above, they have done so here. Plaintiffs are not required to do more.

This conclusion is not altered **[**33]** by the fact that the Court ruled after a bench trial in O'Bannon that the plaintiffs in that case had failed to show that the rules challenged there had harmed competition in a sub-market for group licenses. See *O'Bannon v. Nat'l Collegiate Athletic Ass'n, 7 F. Supp. 3d 955, 996-97 (N.D. Cal. 2014)*, aff'd in part, vacated in part, *802 F.3d 1049 (9th Cir. 2015)* (holding that the plaintiffs "failed to show that the challenged NCAA rules harm competition" in the sub-market for group licenses in which "television networks compete for the rights to telecast live FBS football and Division I basketball games" and could purchase the rights from Division I members or from student-athletes in the absence of the challenged rules). Defendants have not shown that the Court's post-trial analysis of the evidence presented in another case with respect to a market different from the one that Plaintiffs allege here is relevant to its determination of the present motions.

Accordingly, the Court denies Defendants' motion to dismiss the claims of the "Group Licensing Damages Sub-Class."

C. Tymir Oliver's Claims

Defendants argue that the claims of named plaintiff Tymir Oliver must be dismissed because (1) he lacks standing to seek injunctive relief, as he is a former student-athlete; and (2) he lacks standing to seek damages **[**34]** because he was a member of the Division I FBS Football Settlement Class in Alston and released his claims for damages as part of that settlement.

Plaintiffs concede that Tymir Oliver lacks standing to seek injunctive relief. See Opp'n at 2 ("Defendants are right that as a former student-athlete he cannot seek injunctive relief"). In light of this concession, the Court grants Defendants' motion to dismiss Tymir Oliver's claims for injunctive relief, without leave to amend.

The Court now turns to the question of whether Tymir Oliver's claims for damages were released in the Alston settlement. The Court granted final approval to the settlement of the damages claims in Alston on December 6, 2017. Order and Final Judgment, Docket No. 746 at 2, Case No. **[*819]** 14-md-02541. It is undisputed that Tymir Oliver was a member of the Division I FBS Football Class as defined in the Alston settlement agreement, which included:

> All current and former NCAA Division I Football Bowl Subdivision ("FBS") football student-athletes who, at any time from March 5, 2010 through the date of Preliminary Approval of this Settlement [March 21, 2017], received from an NCAA member institution for at least one academic term **[**35]** . . . a Full Athletics Grant-In-Aid."

Id.; see also Oliver Compl. ¶¶ 27, 29 (alleging that Tymir Oliver was a "Division I student-athlete who competed for the University of Illinois men's football team" beginning in 2016 and that he received a full scholarship from the University of Illinois).

As part of the Alston settlement, the members of the Division I FBS Football Class released the following claims:

> [A]ny and all past, present and future claims, demands, rights, actions, suits, or causes of action, for monetary damages of any kind (including but not limited to actual damages, statutory damages, and exemplary or punitive damages), whether class, individual or otherwise in nature, known or unknown, foreseen or unforeseen, suspected or unsuspected, asserted or unasserted, contingent or non-contingent, under the laws of any jurisdiction, which Releasors or any of them, whether directly, representatively, derivatively, or in any other capacity, ever had, now have or hereafter can, shall or may have, arising out of or relating in any way to any of the legal, factual, or other allegations made in Plaintiffs' Actions, or any legal theories that could have been raised on the allegations **[**36]** in Plaintiffs' Actions. The Released Claims do not include claims solely for prospective injunctive relief and certain other claims expressly excluded from the release as set forth in the Settlement Agreement.

Order and Final Judgment at 11-12 (footnote omitted).

HN12[] "A settlement agreement may preclude a party from bringing a related claim in the future 'even though the claim was not presented and might not have been presentable in the class action,' but only where the released claim is 'based on the identical factual predicate as that underlying the claims in the settled class action.'" See *Hesse v. Sprint Corp., 598 F.3d 581, 590-91 (9th Cir. 2010)* (emphasis added).

Tymir Oliver's damages claims here are not based on the identical factual predicate as the damages claims in Alston. As discussed above, his claims are materially distinguishable from those in Alston because they are based on (1) challenges to some rules that were not challenged in Alston; (2) a legal theory that was not raised in Alston, which requires different facts from those litigated in Alston; and (3) new facts that post-date Alston. Accordingly, the Court cannot conclude at this juncture that Tymir Oliver's claims for damages were released via the Alston settlement.[5] The Court, **[**37]** therefore, denies Defendants' **[*820]** motion to dismiss Tymir Oliver's claims for damages.

CONCLUSION

For the foregoing reasons, the Court GRANTS, without leave to amend, Defendants' motion to dismiss Tymir Oliver's claims for injunctive relief. The Court otherwise DENIES Defendants' motions to dismiss.

IT IS SO ORDERED.

Dated: June 24, 2021

/s/ Claudia Wilken

CLAUDIA WILKEN

United States District Judge

End of Document

[5] In a footnote, Defendants argue in passing that Tymir Oliver's claims are barred by res judicata. **HN13**[] Res judicata bars a subsequent claim when there is: (i) an identity of claims between the prior and subsequent actions; (ii) a final judgment on the merits; and (iii) identity or privity between the parties. *Media Rights Techs., Inc. v. Microsoft Corp., 922 F.3d 1014, 1020-21 (9th Cir. 2019)* (internal citation omitted). In light of the distinct factual allegations and legal theories upon which Tymir Oliver's claims are predicated, as discussed above, the Court cannot conclude at this juncture that there is an identity of claims between the claims he asserts here and those in Alston. Accordingly, the Court cannot conclude at this stage that Tymir Oliver's claims are barred by res judicata.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

In considering a motion to dismiss for failure to state a claim pursuant to Fed. R. Civ. P. 12(b)(6), a district court may consider the facts alleged in the complaint, documents attached to the complaint as exhibits, and documents incorporated by reference in the complaint. A court should consider the motion by accepting all factual allegations as true and drawing all reasonable inferences in favor of the plaintiff. To withstand dismissal, a claimant must set forth enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

While a complaint attacked by a Fed. R. Civ. P. 12(b)(6) motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. To state a plausible claim, the complaint's factual allegations must be enough to raise a right to relief above the speculative level.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN9[] Remedies, Damages

However, Alaska has not passed a statute repealing Illinois Brick more generally, and as such, no court has construed Alaska's consumer protection statute, Alaska Stat. Ann. § 45.50.531(a), to permit claims based on alleged antitrust and monopolization conduct by indirect purchasers. To the contrary, the courts that have considered the matter have concluded that Alaska's consumer protection statute precludes plaintiffs from bringing claims as indirect purchasers even under a non-antitrust unfair practices theory. The court therefore declines to read the Alaska consumer protection statute to permit indirect purchaser standing, since no court has affirmatively found to the contrary, and since, under the current status of the law in Alaska, only the attorney general may sue for money damages on behalf of indirect purchasers as a result of antitrust violations.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN10[] Purchasers, Indirect Purchasers

Consistent with New Jersey's status as a state that follows Illinois Brick, the New Jersey Consumer Fraud Act, N.J. Stat. Ann. § 56.8-1 et seq. does not allow for a cause of action based on an anticompetitive scheme in violation of the Antitrust Act without any allegation of a direct or indirect statement or communication with any plaintiff. Consumer fraud claims may create precisely the risk of multiple recoveries, which Illinois Brick Co. v. Illinois (and parallel New Jersey decisions) seek to avoid.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN11[] Deceptive & Unfair Trade Practices, State Regulation

The Arizona Consumer Fraud Act (ACFA) prohibits persons from engaging in any deception, deceptive or unfair act or practice, fraud, false pretense, false promise, misrepresentation, or concealment, suppression or omission of any material fact with intent that others rely on such concealment, suppression or omission in connection with the sale or advertisement of consumer goods or services. Ariz. Rev. Stat. § 44-1522(A). The elements of a private cause of action under the Arizona Consumer Fraud Act are a false promise or misrepresentation made in connection with the sale or advertisement of merchandise and the hearer's consequent and proximate injury. Under the ACFA, an affirmative misrepresentation causes injury where the consumer actually relies on the statement, although the consumer's reliance does not need to be justifiable.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN13[] **State Regulation, Claims**

A claim under North Carolina's unfair or deceptive trade practices act, N.C. Gen. Stat. § 75-1.1, stemming from an alleged misrepresentation does indeed require a plaintiff to demonstrate reliance on the misrepresentation in order to show the necessary proximate cause. N.C. Gen. Stat. § 75-1.1 claims founded on fraud distill to analogous elements: detrimental reliance on deceptive information.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN14[] **Deceptive & Unfair Trade Practices, State Regulation**

The Supreme Court of Appeals of West Virginia has construed the West Virginia Consumer Credit and Protection Act, W.V. Stat. §§ 46a-1-101 et seq. (WVCCPA), and held that when consumers allege that a purchase was made because of an express or affirmative misrepresentation, the causal connection between the deceptive conduct and the loss would necessarily include proof of reliance on those overt representations and that where concealment, suppression or omission is alleged, and proving reliance is an impossibility, the causal connection between the deceptive act and the ascertainable loss is established by presentation of facts showing that the deceptive conduct was the proximate cause of the loss. In other words, the facts have to establish that but for the deceptive conduct or practice a reasonable consumer would not have purchased the product and incurred the ascertainable loss.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN15[] **Deceptive & Unfair Trade Practices, State Regulation**

Under the Illinois Consumer Fraud and Deceptive Business Practices Act, 815 IL Stat. §§ 505/1 et seq., proof of actual deception of a plaintiff is required, but such deception need not be direct between the defendant and the plaintiff. Instead, it is sufficient if the defendant deceives a third party, if the deception is made with the intention that it reach the plaintiff and influence his action and that it does reach him and that he does rely upon it, to his damage.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN16[] **Deceptive & Unfair Trade Practices, State Regulation**

A consumer may suffer actual damages from the defendant's deceptive statements if the consumer purchased a product as a result of the defendant's deception of another.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN17[] **Trade Practices & Unfair Competition, State Regulation**

To state a valid claim under the New Hampshire Consumer Protection Act, N.H. Rev. Stat. § 358-A:2, a plaintiff must demonstrate that the defendant engaged in an unfair method of competition or an unfair or deceptive act or practice in the conduct of any trade or commerce within this state. For purposes of the statute, a misrepresentation is made within-this-state when New Hampshire is the locus of the offending conduct, or, put differently, whenever a person receives a misrepresentation in the State of New Hampshire.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN18[] **Deceptive & Unfair Trade Practices, State Regulation**

A consumer protection claim based on a state statute that extends well beyond common-law fraud to cover a broad range of deceptive practices and does not require proof of the same essential elements (such as reliance) as common-law fraud is not subject to the pleading-with-particularity requirements of Fed. R. Civ. P. 9(b), but need only meet the notice-pleading requirements of Fed. R. Civ. P. 8(a).

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN19[] **Trade Practices & Unfair Competition, State Regulation**

With respect to the Colorado Consumer Protection Act, Colo. Rev. Stat. §§ 6-1-101 et seq., one element of a claim thereunder is that a defendant's conduct significantly impacts the public as actual or potential consumers of the defendant's goods, services, or property. To determine whether a challenged practice significantly impacts the public, Colorado courts consider: (1) the number of consumers directly affected by the challenged practice; (2) the relative sophistication and bargaining power of the consumers affected by the challenged practice; and (3) evidence that the challenged practice has previously impacted other consumers or has the significant potential to do so in the future.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN20[] **Private Actions, Private Attorneys General**

An individual may seek damages under the Minnesota Uniform Deceptive Trade Practices Act (MUDTPA), Minn. Stat. §§ 325D.43-.48 pursuant to Minnesota's private attorney general statute, Minn. Stat. § 8.31, so long as the cause of action benefits the public.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN21[] **Conspiracy to Monopolize, State Regulation**

In considering whether the challenged conduct standard has been met in analogous cases, federal courts have distinguished between pleadings in which a plaintiff has alleged intrastate conduct along with conduct throughout the United States, and pleadings that do not contain specific allegations of intrastate conduct along with allegations of conduct throughout the United States. In the latter type of cases, courts have held allegations under state antitrust statutes insufficient where the complaint alleges only that the conspiracy affects interstate commerce without describing the effects in a particular state or in discretely identifiable states.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN22[] **Complaints, Requirements for Complaint**

The antitrust laws of Arizona, Nevada, and Utah require a plaintiff to serve a copy of their complaint on the respective attorneys general of those states. Ariz. Rev. Stat. § 44-1415(A), (D); Nev. Rev. Stat. § 598A.210(3); Utah Code Ann. § 76-10-3109(9).

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN23[] **Remedies, Damages**

The Illinois Antitrust Act (the IAA) provides that no person shall be authorized to maintain a class action in any court of this State for indirect purchasers asserting claims under the IAA, with the sole exception of this State's Attorney General. 740 Ill. Comp. Stat. 10/7(2).

Governments > Courts > Judicial Precedent

HN24[] **Courts, Judicial Precedent**

When a fragmented Court decides a case and no single rationale explaining the result enjoys the assent of five Justices, the holding of the Court may be viewed as that position taken by those Members who concurred in the judgments on the narrowest grounds.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN25[] **Remedies, Damages**

The Illinois Antitrust Act's class action bar does not limit the substantive rights of an injured party in an individual action.

Antitrust & Trade Law > Consumer Protection

Governments > Courts > Rule Application & Interpretation

HN26[] **Antitrust & Trade Law, Consumer Protection**

The Illinois Antitrust Act's limitation is not contained in a generally applicable procedural rule but, rather, in the same paragraph of the same statute that creates the underlying substantive right.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN27[] **Purchasers, Direct Purchasers**

Under Montana law, lawsuits by indirect purchasers are barred pursuant to Illinois Brick Co. v. Illinois.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN28[] **Remedies, Damages**

Under the Utah Antitrust Act the UAA, a person who is a citizen of this state or a resident of this state can bring a claim. Utah Code Ann. § 76-10-3109(1)(a). The majority of courts that have been presented with this statute require at least one Utah citizen or resident be a named plaintiff. However, some courts have found that a class representative that is not a Utah citizen or resident may bring claims on behalf of absent class members who are citizens or residents of Utah.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN29[] **Remedies, Damages**

In the absence of any controlling authority, the Court adopts the majority approach and concludes that, to state a claim under the Utah Antitrust Act, there must be a named plaintiff who is a Utah citizen or resident. It is well-established that a member of a putative class is not a party to a lawsuit. A plaintiff is a party to the lawsuit.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN30[] **Types of Contracts, Quasi Contracts**

State law requirements under unjust enrichment law vary widely.

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > Applicability

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN31[] **Federal Common Law, Applicability**

Unjust enrichment is not a catch-all claim existing within the narrow scope of federal common law, and cobbling together the elements of a claim of unjust enrichment from the laws of the fifty states is no different from applying federal common law.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN32[] **Purchasers, Indirect Purchasers**

To give just one example of why the Indirect Purchaser Plaintiffs' failure to specifically address the factual requirements of an unjust enrichment claim under the various asserted laws matters, under New York law, a plaintiff claiming unjust enrichment must establish that the relationship between the parties is not too attenuated, meaning that the relationship must be one that could have caused reliance or inducement.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

Antitrust & Trade Law > Clayton Act > Penalties

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN33[] **Clayton Act, Claims**

In order to seek injunctive relief under § 16 of the Clayton Act, 5 U.S.C.S. § 26, a private plaintiff must allege threatened loss or damage of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN34[] **Amendment of Pleadings, Leave of Court**

The Court should freely give leave when justice so requires. Fed. R.Civ. P. 15(a)(2).

Opinion

[*231] DECISION AND ORDER

INTRODUCTION

Plaintiffs The Tripp Plating Works, Inc. ("Tripp") and Precious Plate, Inc. ("Precious Plate") (collectively the "Indirect Purchaser Plaintiffs") bring these putative class actions against defendants Olin Corporation, K.A. Steel Chemicals, Inc., Occidental Chemical Corporation, Westlake Chemical Corporation, Shintech Incorporated, and Formosa Plastics Corporation, U.S.A. (collectively, "Defendants"), alleging **[*232]** an anticompetitive conspiracy by Defendants to fix the price of caustic soda in the United States. (Dkt. 129)[1].

[1] Unless otherwise noted, all docket references herein refer to Civil Action No. 19-cv-00385 (the "Lead Action").

Presently before the Court is a motion filed by Defendants seeking dismissal of the following claims asserted by the Indirect Purchaser Plaintiffs: (1) consumer protection claims asserted under the laws of various states, as set forth more specifically below; (2) antitrust claims asserted under the laws of various states, as set forth more specifically **[**8]** below; and (3) unjust enrichment claims asserted under the laws of various states, as set forth more specifically below. (Dkt. 174)[2]. For the reasons that follow, Defendants' motion is granted in part and denied in part.

BACKGROUND

I. Factual Background

As noted above, the instant actions relate to a purported anticompetitive conspiracy by Defendants to fix the price of caustic soda in the United States. (Dkt. 129). The details of the alleged conspiracy are set forth at length in this Court's Decision and Order dated March 27, 2020, resolving several prior motions to dismiss (Dkt. 119), familiarity with which is assumed for purposes of this Decision and Order. The Indirect Purchaser Plaintiffs are New York corporations that "indirectly purchased Caustic Soda manufactured by one or more of the Defendants" during the relevant time period. (Dkt. 129 at ¶¶ 18-19).

II. Procedural Background

The Lead Action was filed on March 22, 2019 (Dkt. 1), and reassigned to the undersigned on May 8, 2019 (Dkt. 40). The Lead Action and various related putative class actions brought by direct purchasers of caustic soda were referred for the handling of non-dispositive pretrial matters to United States Magistrate **[**9]** Judge Michael J. Roemer (Dkt. 42), who entered a scheduling and case management order on May 17, 2019, consolidating the cases for pretrial purposes (Dkt. 49).

Tripp commenced its putative class action on July 25, 2019. (Civil Action No. 19-cv-00785 (the "Tripp Action"), Dkt. 1). Precious Plate commenced its putative class action on July 29, 2019. (Civil Action No. 19-cv-00990 (the "Precious Plate Action"), Dkt. 1). Both matters were referred to Judge Roemer for the handling of non-dispositive pretrial matters. (Tripp Action, Dkt. 8; Precious Plate Action, Dkt. 6). On September 19, 2019, Judge Roemer entered a Case Management Order (Tripp Action, Dkt. 11; Precious Plate Action, Dkt. 10) consolidating the Tripp Action and the Precious Plate Action into the Lead Action.

The Indirect Purchaser Plaintiffs filed a consolidated class action complaint on April 16, 2020. (Dkt. 129) (the "indirect purchaser complaint"). Defendants filed the instant motion to dismiss on May 28, 2020. (Dkt. 174). The Indirect Purchaser Plaintiffs filed their response on July 13, 2020 (Dkt. 195), and Defendants filed their reply on August 12, 2020 (Dkt. 202).

[*233] DISCUSSION

I. Legal Standard

---

[2] Defendants Shin-Etsu Chemical Co. Ltd. and Formosa Plastics Corporation have individually filed renewed motions to dismiss for lack of personal jurisdiction (Dkt. 230; Dkt. 288), which the Court grants in a separate Decision and Order filed contemporaneously herewith. Accordingly, all claims asserted against these defendants are dismissed without prejudice, and this Decision and Order does not consider the merits of the claims asserted against them.

HN1[] "In considering a motion to **[**10]** dismiss for failure to state a claim pursuant to *Rule 12(b)(6)*, a district court may consider the facts alleged in the complaint, documents attached to the complaint as exhibits, and documents incorporated by reference in the complaint." *DiFolco v. MSNBC Cable L.L.C., 622 F.3d 104, 111 (2d Cir. 2010)*. A court should consider the motion by "accepting all factual allegations as true and drawing all reasonable inferences in favor of the plaintiff." *Trs. of Upstate N.Y. Eng'rs Pension Fund v. Ivy Asset Mgmt., 843 F.3d 561, 566 (2d Cir. 2016)*. To withstand dismissal, a claimant must set forth "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Turkmen v. Ashcroft, 589 F.3d 542, 546 (2d Cir. 2009)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*).

HN2[] "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitle[ment] to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (internal quotations and citations omitted). "To state a plausible claim, the complaint's '[f]actual allegations must be enough to raise a right to relief above the speculative level.'" *Nielsen v. AECOM Tech. Corp., 762 F.3d 214, 218 (2d Cir. 2014)* (quoting *Twombly, 550 U.S. at 555*).

II. [11] The Indirect Purchaser Plaintiffs' Claims**

The indirect purchaser complaint sets forth the following claims: (1) violations of *§ 1 of the Sherman Act*, *15 U.S.C. § 1*; (2) "restraint of trade" in violation of the laws of Arizona, California, Connecticut, the District of Columbia, Illinois, Iowa, Kansas, Maine, Maryland, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin; (3) "unfair and deceptive trade practices" in violation of the laws of Alaska, Arkansas, Arizona, California, Colorado, Delaware, the District of Columbia, Florida, Georgia, Idaho, Illinois, Indiana, Kansas, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Utah, Vermont, Virginia, West Virginia, Wisconsin, and Wyoming; and (4) unjust enrichment "under the law of the District of Columbia and the laws of all states and territories in the United States, except Ohio and Indiana." (Dkt. **[**12]** 129 at 51-63). In addition to other forms of relief, the Indirect Purchaser Plaintiffs seek an injunction pursuant to *§ 16 of the Clayton Act*, *15 U.S.C. § 26*. (*Id.* at 6).

In their motion papers, Defendants seek dismissal of thirty-eight of the Indirect Purchaser Plaintiffs' state consumer protection claims, twenty-one of the Indirect Purchaser Plaintiffs' state law antitrust claims, all of the Indirect Purchaser Plaintiffs' unjust enrichment claims, and the Indirect Purchaser Plaintiffs' request for injunctive relief under *§ 16* of the Clayton Act. (Dkt. 174-1). However, in their further **[*234]** briefing, the parties narrowed their disputes regarding the state consumer protection claims. Specifically, in their opposition papers, the Indirect Purchaser Plaintiffs voluntarily withdrew their consumer protection claims asserted under the laws of Arkansas, Delaware, the District of Columbia, Georgia, Idaho, Indiana, Kansas, Louisiana, Maine, Massachusetts, Michigan, Mississippi, Missouri, Pennsylvania, Rhode Island, South Carolina, Virginia, Wisconsin, and Wyoming. (Dkt. 195 at 29 n. 12)[3]. In their reply papers, Defendants then indicated that they are no longer seeking dismissal of the Indirect Purchaser Plaintiffs' consumer **[**13]** protection claims asserted under the laws of Florida, Nebraska, New Mexico, New York, South Dakota, and Vermont. (Dkt. 202 at 12 n.2). The Court thus limits its consideration of the consumer

[3] In their reply papers, Defendants suggest that the Court should dismiss these withdrawn claims with prejudice. (Dkt. 202 at 12). The Court rejects this contention. **HN3**[] Pursuant to *Federal Rule of Civil Procedure 41(a)(1)(A)(i)*, a plaintiff may voluntarily dismiss a claim without prejudice before an opposing party serves either an answer or a motion for summary judgment. While the Indirect Purchaser Plaintiffs did not file a notice of dismissal as contemplated by *Rule 41*, they could have done so, and the Court finds no reason to punish the Indirect Purchaser Plaintiffs for their attempt to narrow the dispute by entering a dismissal with prejudice of the claims they have voluntarily withdrawn with prejudice.

protection claims to those arising under the laws of Alaska, Arizona, California, Colorado, Illinois, Minnesota, Montana, New Hampshire, New Jersey, North Carolina, North Dakota, Oregon, Utah, and West Virginia.

A. State Law Consumer Protection Claims

For the reasons discussed below, the Court finds that the Indirect Purchaser Plaintiffs' consumer protection claims asserted under the laws of Alaska, Arizona, California, Illinois, Montana, New Hampshire, New Jersey, North Carolina, Oregon, Utah, and West Virginia are subject to dismissal. The claims asserted under the laws of Colorado, Minnesota, and North Dakota will be permitted to proceed.

1. Status as Consumers under Montana and Utah Law

Defendants seek dismissal of the Indirect Purchaser Plaintiffs' claims under the *Montana Unfair Trade Practices and Consumer Protection Act, Mont. Code § 30-14-101 et seq.* (the "MUTPCPA"), and the *Utah Consumer Sales Practices Act, Utah Code § 13-11-4* (the "UCSPA"), on the basis that these statutes only protect "consumers." The Court agrees that dismissal of these claims is required.

HN4[] "The MUTPCPA **[**14]** enables a 'consumer' to bring an action for damages, *Mont. Stat. § 30-14-133(1)*, and defines 'consumer' as 'a person who purchases or leases goods, services, real property, or information primarily for personal, family, or household purposes,' *id*. *§ 30-14-102(1)*." *Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, No. 15 CIV. 6549 (CM), 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *46 (S.D.N.Y. Dec. 26, 2018)*. The Supreme Court of Montana has held that the purchase of goods "entirely for business purposes" does not "not come within the statutory definition of a purchase or lease of goods primarily for personal, family or household purposes." *Doll v. Major Muffler Centers, Inc., 208 Mont. 401, 410, 687 P.2d 48 (1984)*; *see also* *Sergeants Benevolent Ass'n, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *46* (dismissing claims under the MUTPCPA because the plaintiff was not a "consumer" within the meaning of the MUTPCPA); *In re Lidoderm Antitrust Litig., 103 F. Supp. 3d 1155, 1165 (N.D. Cal. 2015)* (dismissing **[*235]** claims under the MUTPCPA brought by indirect purchaser of Lidoderm patches because "[t]he statute excludes persons who buy goods for resale"). Here, the Indirect Purchaser Plaintiffs do not allege that they purchased caustic soda "primarily for personal, family, or household purposes." To the contrary, they allege that they (and the other members of the putative classes) purchased caustic soda from Defendants for "non-residential use." (Dkt. 129 at ¶ 9). The Court accordingly agrees with Defendants that the Indirect Purchaser Plaintiffs have not alleged a viable claim under the MUTPCPA.

HN5[] The **[**15]** UCSPA similarly "affords a cause of action only to a 'consumer.'" *Icon Health & Fitness, Inc. v. ConsumerAffairs.com, No. 1:16-CV-00168-DBP, 2018 U.S. Dist. LEXIS 37517, 2018 WL 1183372, at *5 (D. Utah Mar. 6, 2018)* (quoting *Utah Code § 13-11-19*). The UCSPA further defines a "consumer transaction" as:

> [A] sale, lease, assignment, award by chance, or other written or oral transfer or disposition of goods, services, or other property, both tangible and intangible (except securities and insurance) to, or apparently to, a person for: (i) primarily personal, family, or household purposes; or (ii) purposes that relate to a business opportunity that requires . . . the person described in *Subsection (2)(a)* to perform personal services on a continuing basis and in which the person described in *Subsection (2)(a)* has not been previously engaged.

Utah Code § 13-11-3(2)(a). As previously noted, the Indirect Purchaser Plaintiffs do not claim to have purchased caustic soda for "primarily personal, family, or household purposes," nor are there any facts in the indirect purchaser complaint to support the conclusion that the sales of caustic soda at issue were made "apparently to" a person for such purposes—to the contrary, the indirect purchaser complaint indicates that caustic soda is a "commodity chemical" that is sold and used for industrial purposes. **[**16]** (Dkt. 129 at ¶ 2). The Indirect Purchaser Plaintiffs further do not claim to have entered into an agreement to perform personal services for Defendants. These facts fail to plausibly allege a violation of the UCSPA.

2. Definition of "Good or Service" Under Oregon Law

Defendants' argument regarding the *Oregon Unfair Trade Practices Act, Or. Rev. Stat. § 646.605 et seq.* (the "OUTPA") is also related to the purposes for which the purchases were made. As relevant here, ***HN6***[] it is unlawful under the OUTPA to make "false or misleading representations of fact concerning the offering price of . . . real estate, goods, or services." *Or. Rev. Stat. § 646.608(1)(s)*; *see also* *Or. Rev. Stat. § 646.638*. The OUTPA further defines "real estate, goods or services" to mean "those that are or may be obtained primarily for personal, family or household purposes, or that are or may be obtained for any purposes as a result of a telephone solicitation." *Id.* *§ 646.605(6)(a)*.

As Defendants correctly point out, there is nothing in the indirect purchaser complaint suggesting that the Indirect Purchaser Plaintiffs or the members of the putative class obtained caustic soda "primarily for personal, family or household purposes." To the contrary, as already noted by the Court, there is an express allegation that the caustic **[**17]** soda at issue was obtained for "non-residential use." (Dkt. 129 at ¶ 9). There is further no indication that the sales of caustic soda were the result of a "telephone solicitation," which the OUTPA defines as "solicitation where a person, in the course of the person's business, vocation or occupation, uses a telephone or an automatic dialing-announcing device to initiate telephonic contact **[*236]** with a potential customer[.]" *Or. Rev. Stat. § 656.605(7)*. Accordingly, dismissal of the Indirect Purchaser Plaintiffs' claims under the OUTPA is warranted. *See* *F.D.S. Marine, LLC v. Shaver Transp. Co., No. 00-1245-ST, 2001 U.S. Dist. LEXIS 7787, 2001 WL 34045718, at *1 (D. Or. May 25, 2001)* (dismissing claims under the OUTPA because the services and goods at issue were "not generally and customarily used for personal, family, or household uses").

3. *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, and Consumer Protection Claims Under Alaska and New Jersey Law

The Court turns next to Defendants' arguments regarding the interaction between the Supreme Court's ruling in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, and the Indirect Purchaser Plaintiffs' claims brought under the consumer protection laws of Alaska and New Jersey. A brief discussion of the ruling in *Illinois Brick* and how it interacts with state law is thus necessary.

In *Illinois Brick*, the Supreme Court "held that ***HN7***[] direct purchasers may sue antitrust violators, but also ruled that **[**18]** indirect purchasers may not sue." *Apple Inc. v. Pepper, U.S. , 139 S. Ct. 1514, 1519, 203 L. Ed. 2d 802 (2019)*. The Supreme Court subsequently ruled in *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*, that state laws allowing for recovery by indirect purchasers are not preempted by federal law. *Id. at 105-06*. In other words, the federal "'indirect-purchaser rule' does not prevent indirect purchasers from recovering damages under state antitrust laws where the state laws otherwise allow it." *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 248 (D. Conn. 2015)*. Some states have opted to follow the rule set down in *Illinois Brick*, while others have passed laws expressly allowing for recovery by indirect purchasers. ***HN8***[] "[A]ny state that has not expressly passed *Illinois Brick* repealer legislation or interpreted its law in such a way as to override the rule of *Illinois Brick* is presumed to have decided to follow federal law, including the *Illinois Brick* limitation on indirect purchaser claims." *In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 413 (S.D.N.Y. 2011)*.

As another federal district court recently explained, Alaska has passed a statute that partially repeals *Illinois Brick*—*Alaska Stat. § 45.50.577(i)*, which allows the Alaska attorney general to "bring an antitrust claim for damages on behalf of indirect purchasers under Alaska's Restraint of Trade Act." *In re Humira (Adalimumab) Antitrust Litig., 465 F. Supp. 3d 811, 849 (N.D. Ill. 2020)*. ***HN9***[] However, Alaska has not passed a statute repealing *Illinois Brick* more generally, and as such, "no court has construed Alaska's **[**19]** consumer protection statute (*Alaska Stat. Ann. § 45.50.531(a)*) to permit claims based on alleged antitrust and monopolization conduct by indirect purchasers." *In re Lidoderm Antitrust Litig., 103 F. Supp. 3d 1155, 1163 (N.D. Cal. 2015)*. To the contrary, the courts that have considered the matter have concluded that Alaska's consumer protection statute "precludes plaintiffs from bringing claims as indirect purchasers even under a non-antitrust unfair practices theory." *In re Humira, 465 F. Supp. 3d at 849*; *see also* *In re Lidoderm, 103 F. Supp. 3d at 1163* (dismissing claims by indirect purchasers under the Alaska consumer protection statute "in light of the clear intent of the Alaska antitrust statute reserving to the Alaska Attorney General the ability to seek damages on behalf of indirect purchasers"); *In re Dynamic Random Access Memory (Dram) Antitrust Litig.,* ***[*237]*** *516 F. Supp. 2d 1072, 1108 (N.D. Cal. 2007)* ("[T]he court therefore declines to read the [Alaska consumer protection statute] to permit indirect purchaser standing, since no court has affirmatively found to the contrary, and since, under the current status of the law in Alaska, only the attorney general may sue for money damages on behalf of indirect purchasers as a result of antitrust violations."). The Court agrees with the analysis of the other courts who have considered this issue and accordingly dismisses the Indirect Purchaser Plaintiffs' consumer protection claims under the laws of Alaska.

As to New **[**20]** Jersey, that state "follow[s] federal ***antitrust law*** in interpreting [its] own antitrust statute, *see* *N.J.S.A. 56:9-18*, and under *Illinois Brick* . . . indirect purchasers . . . have no standing to assert a private right of action under the *New Jersey Antitrust Act*." *Wilson v. Gen. Motors Corp., 190 N.J. 336, 339, 921 A.2d 414 (2007)* (quotations and citations omitted). ***HN10***[] The Supreme Court of New Jersey has further held that, consistent with New Jersey's status as a state that follows *Illinois Brick*, the New Jersey Consumer Fraud Act, N.J.S.A. 56.8-1 *et seq.* (the "NJCFA"), does not allow for a cause of action based on "an anticompetitive scheme in violation of the Antitrust Act without any allegation of a direct or indirect statement or communication with any plaintiff." *Id. at 341*; *see also* *In re Relafen Antitrust Litig., 225 F.R.D. 14, 27 (D. Mass. 2004)* (noting that "consumer fraud claims may create precisely the risk of 'multiple recoveries,' which *Illinois Brick* (and parallel New Jersey decisions) seek to avoid").

Defendants argue that the Indirect Purchaser Plaintiffs have not alleged "communications with, or directed to, consumers," *Wilson, 190 N.J. at 341*, and so cannot maintain a claim under the NJCFA. The Court agrees. The only "communications" that the Indirect Purchaser Plaintiffs identify in opposition to Defendants' motion are information provided by Defendants to IHS Markit, an "industry analyst and consultant." **[**21]** (Dkt. 129 at 38-39). This information was then allegedly used by IHS Markit in its management of a caustic soda pricing index. (*Id.*). However, there is no allegation or suggestion in the indirect purchaser complaint that the information provided to IHS Markit was subsequently communicated to any consumer. To the contrary, the Indirect Purchaser Plaintiffs expressly allege that "[f]or purposes of calculating the indexed price [of caustic soda], IHS Markit operates confidentially and non-publicly[.]" (*Id.* at 39). On these facts, no reasonable trier of fact could conclude that Defendants had engaged in communications, whether direct or indirect with a consumer, including the Indirect Purchaser Plaintiffs. Accordingly, the Supreme Court of New Jersey's opinion in *Wilson* bars the Indirect Purchaser Plaintiffs' claims under the NJCFA.

4. Necessity of Pleading Reliance or Deception

The Court turns next to Defendants' arguments that the Indirect Purchaser Plaintiffs have not pled viable claims under the consumer protection laws of Arizona, California, North Carolina, and West Virginia because they have not alleged that they relied on any misrepresentation by Defendants. The Court notes as an **[**22]** initial matter that the Indirect Purchaser Plaintiffs concede that they have not pled reliance (*see* Dkt. 195 at 39 ("Plaintiffs here do not allege that Defendants' misrepresentation induced Plaintiffs to buy caustic soda.")). As such, the issue before the Court is whether these states' consumer protection laws require reliance as an element of a claim.

[*238] ***HN11***[] The *Arizona Consumer Fraud Act* (the "ACFA") "prohibits persons from engaging in 'any deception, deceptive or unfair act or practice, fraud, false pretense, false promise, misrepresentation, or concealment, suppression or omission of any material fact with intent that others rely on such concealment, suppression or omission' in connection with the sale or advertisement of consumer goods or services." *Cheatham v. ADT Corp., 161 F. Supp. 3d 815, 826 (D. Ariz. 2016)* (quoting *Ariz. Rev. Stat. § 44-1522(A)*). "The elements of a private cause of action under the Arizona Consumer Fraud Act are a false promise or misrepresentation made in connection with the sale or advertisement of merchandise and the hearer's consequent and proximate injury." *Naiman v. Alle Processing Corp., No. CV20-0963-PHX-DGC, 2020 U.S. Dist. LEXIS 218549, 2020 WL 6869412, at *5 (D. Ariz. Nov. 23, 2020)* (citation omitted). Under the ACFA, "[a]n affirmative misrepresentation causes injury where the consumer actually relies on the statement, although the consumer's reliance does not need to be justifiable." *In re Arizona Theranos, Inc., Litig., 256 F. Supp. 3d 1009, 1023 (D. Ariz. 2017)* (quotation **[**23]** omitted and emphasis added). Because proximate injury is an element of an ACFA claim, and because actual reliance is required to establish proximate injury, the Court agrees with Defendants that the ACFA claims must be dismissed.

The Court also agrees that the Indirect Purchaser Plaintiffs' claims under *California's Unfair Competition Law, Cal. Bus. & Prof. Code, §§ 17200 et seq.* (the "CUCL"), fail as a matter of law. ***HN12***[] The Supreme Court of California has held that the language of the CUCL "imposes an actual reliance requirement on plaintiffs prosecuting a private enforcement action under the [CUCL's] fraud prong." *In re Tobacco II Cases, 46 Cal. 4th 298, 326, 93 Cal. Rptr. 3d 559, 207 P.3d 20 (2009)*. While it is true, as the Indirect Purchaser Plaintiffs point out, that the *In re Tobacco II* court also held that "a presumption, or at least an inference, of reliance arises wherever there is a showing that a misrepresentation was material," *id. at 327*, any such presumption has been rebutted in this case because, as noted above, the Indirect Purchaser Plaintiffs concede that they did not rely on any misrepresentations by the Defendants in deciding to purchase caustic soda. (Dkt. 195 at 39-40 ("Plaintiffs here do not allege that Defendants' misrepresentation induced Plaintiffs to buy caustic soda. . . . Caustic soda is a **[**24]** commodity used in Plaintiffs' respective businesses—they have been buying caustic soda long before Defendants began making their misrepresentations.")). On these admitted facts, the Indirect Purchaser Plaintiffs cannot maintain a claim under the CUCL.

Similarly, the Supreme Court of North Carolina has held that ***HN13***[] a claim under North Carolina's unfair or deceptive trade practices act, *N.C. Gen. Stat. § 75-1.1*, "stemming from an alleged misrepresentation does indeed require a plaintiff to demonstrate reliance on the misrepresentation in order to show the necessary proximate cause." *Bumpers v. Cmty. Bank of N. Virginia, 367 N.C. 81, 88, 747 S.E.2d 220 (2013)*; *see also* *Topshelf Mgmt., Inc. v. Campbell-Ewald Co., 117 F. Supp. 3d 722, 730 (M.D.N.C. 2015)* ("*Section 75-1.1* claims founded on fraud distill to analogous elements: detrimental reliance on deceptive information."). The Indirect Purchaser Plaintiffs' concession that they did not rely on the purported misrepresentations by Defendants is thus fatal to their consumer protection claims asserted under North Carolina law.

The Court also agrees with Defendants with respect to the Indirect Purchaser **[*239]** Plaintiffs' West Virginia consumer protection claims. ***HN14***[] The Supreme Court of Appeals of West Virginia has construed the *West Virginia Consumer Credit and Protection Act, W.V. Stat. §§ 46a-1-101 et seq.* (the "WVCCPA"), and held that:

> When consumers allege that a purchase was made because of an express or affirmative misrepresentation, **[**25]** the causal connection between the deceptive conduct and the loss would necessarily include proof of reliance on those overt representations . . . [and that] where concealment, suppression or omission is alleged, and proving reliance is an impossibility, the causal connection between the deceptive act and the ascertainable loss is established by presentation of facts showing that the deceptive conduct was the proximate cause of the loss. In other words, the facts have to establish that 'but for' the deceptive conduct or practice a reasonable consumer would not have purchased the product and incurred the ascertainable loss.

White v. Wyeth, 227 W. Va. 131, 140, 705 S.E.2d 828 (2010). Here, the Indirect Purchaser Plaintiffs premise their consumer protection claims on express misrepresentations by Defendants (*see* Dkt. 195 at 39-40), and so they are required to demonstrate reliance. Moreover, even if the Indirect Purchaser Plaintiffs were premising their WVCCPA claims on an alleged omission or concealment by Defendants, they have not alleged facts suggesting that the claimed deception was a "but for" reason for a reasonable consumer to purchase the product—to the contrary, the Indirect Purchaser Plaintiffs have affirmatively alleged that the demand **[**26]** for caustic soda is "relatively inelastic" and that there are no viable substitutes for caustic soda in the various industries in which it is used. (*Id.* at 46). The Court accordingly finds that the Indirect Purchaser Plaintiffs' WVCCPA claims are subject to dismissal.

Defendants have made a related but distinct argument regarding the Indirect Purchaser Plaintiffs' claims under the *Illinois Consumer Fraud and Deceptive Business Practices Act, 815 IL Stat. §§ 505/1 et seq.* (the "ICFDBPA"). Specifically, Defendants contend that the Indirect Purchaser Plaintiffs have not alleged deception, as required to state a claim under the ICFDBPA. ***HN15***[] The Supreme Court of Illinois has explained that under the ICFDBPA, "proof of actual deception of a plaintiff is required," but such deception need not "be direct between the defendant and the plaintiff." *Shannon v. Boise Cascade Corp., 208 Ill. 2d 517, 525, 805 N.E.2d 213, 281 Ill. Dec. 845 (2004)*. Instead, it is sufficient if the defendant deceives a third party, if the deception is "made with the intention that it reach the plaintiff and influence his action and that it does reach him and that he does rely upon it, to his damage." *Id. at 526* (citation omitted and emphasis added).

The Court agrees that, under the standard set by the Supreme Court of Illinois in *Shannon*, the Indirect Purchaser Plaintiffs have not stated a viable claim under the **[**27]** ICFDBPA. As another federal district court has explained, the *Shannon* holding means that ***HN16***[] "a consumer may suffer actual damages from [the defendant's deceptive statements] if the consumer purchased a product as a result of the [defendant's] deception of another." *In re Bextra & Celebrex Mktg., Sales Pracs. & Prod. Liab. Litig., No. MDL 05-01699 CRB, 2007 U.S. Dist. LEXIS 49717, 2007 WL 2028408, at *3 (N.D. Cal. July 10, 2007)* (emphasis added). Again, the Indirect Purchaser Plaintiffs have conceded that they did not purchase caustic soda as a result of Defendants' claimed misrepresentations, and so they cannot satisfy the requirements of a claim under the ICFDBPA. *See* **[*240]** *Avery v. State Farm Mut. Auto. Ins. Co., 216 Ill. 2d 100, 199, 835 N.E.2d 801, 296 Ill. Dec. 448 (2005)* ("[I]n a case alleging deception under the [ICFDBPA], it is not possible for a plaintiff to establish proximate causation unless the plaintiff can show that he or she was, in some manner, deceived by the misrepresentation." (quotation omitted)).

5. Failure to Allege Intrastate Effects as Required by New Hampshire Law

HN17[] To state a valid claim under the *New Hampshire Consumer Protection Act, N.H. Rev. Stat. § 358-A:2* (the "NHCPA"), a plaintiff must demonstrate that the defendant engaged in an unfair method of competition or an unfair or deceptive act or practice in the conduct of any trade or commerce within this state." *Ortiz v. Sig Sauer, Inc., 448 F. Supp. 3d 89, 107 (D.N.H. 2020)* (quotations omitted). "For purposes of the statute, a misrepresentation is made 'within-this-state' **[**28]** when New Hampshire is the locus of the offending conduct, or, put differently, whenever a person receives a misrepresentation in the State of New Hampshire." *Id.* (quotation omitted). The Court agrees with Defendants that the Indirect Purchaser Plaintiffs have failed to alleged conduct within New Hampshire within the context of a claim under the NHCPA. *Precourt v. Fairbank Reconstruction Corp., 856 F. Supp. 2d 327 (D.N.H. 2012)*, is instructive. There, the plaintiff sought to assert a claim under the NHCPA based on the allegation that the defendant falsely "represented that its beef trim was fit for human consumption when shipping that beef to a New York company that was known to distribute its own products, incorporating [the defendant's] beef, within the State of New Hampshire." *Id. at 344*. The court dismissed the NHCPA claim, explaining that relevant case law provides "no support for the proposition that a seller may be liable for a misrepresentation about the quality of its goods not just in the place where that seller's buyer receives the misrepresentation but, also, in any location to which that buyer may later send the goods it received in conjunction with the initial seller's misrepresentation." *Id.*

In this case, as discussed above, the alleged misrepresentations **[**29]** were made to IHS Markit. The indirect purchaser complaint does not allege that any of these misrepresentations were made or received in New Hampshire. The fact that the Indirect Purchaser Plaintiffs (or members of the putative classes) may have subsequently purchased caustic soda in New Hampshire at allegedly inflated prices simply does not bring the claimed conduct within the ambit of the NHCPA. The Indirect Purchaser Plaintiffs' NHCPA claims must be dismissed.

6. Consumer Protection Claims Under Colorado, Minnesota, and North Dakota Law

In their opening memorandum of law, Defendants make the following arguments: (1) the Indirect Purchaser Plaintiffs have failed to comply with *Federal Rule of Civil Procedure 9(b)* in pleading their consumer protection claims under the laws of Colorado, Minnesota, and North Dakota; (2) the Indirect Purchaser Plaintiffs' claims under the *Colorado Consumer Protection Act, C.R.S. §§ 6-1-101 et seq.* (the "CCPA"), fail because they have not alleged unlawful conduct directed at consumers or significantly affecting the consuming public; and (3) the Indirect

Purchaser Plaintiffs have not alleged deceptive or fraudulent conduct as required under the consumer protection laws of Minnesota and North Dakota. The Court rejects these arguments, for the reasons **[**30]** discussed below.

[*241] The Court turns first to Defendants' argument regarding *Rule 9(b)*. The Second Circuit has held that ***HN18***[] a consumer protection claim based on a state statute that "extends well beyond common-law fraud to cover a broad range of deceptive practices" and "does not require proof of the same essential elements (such as reliance) as common-law fraud . . . is not subject to the pleading-with-particularity requirements of *Rule 9(b)*, but need only meet the . . . notice-pleading requirements of *Rule 8(a)*." *Pelman ex rel. Pelman v. McDonald's Corp., 396 F.3d 508, 511 (2d Cir. 2005)* (citations omitted and reversing district court's dismissal of claims under New York's consumer protection law for failure to comply with *Rule 9(b)*). The consumer protection laws of Colorado, Minnesota, and North Dakota all fall within this category, and so the Indirect Purchaser Plaintiffs were not required to comply with *Rule 9(b)* in asserting their claims under these statutes. *See, e.g., Rhino Linings USA, Inc. v. Rocky Mountain Rhino Lining, Inc., 62 P.3d 142, 148 (Colo. 2003)* (Supreme Court of Colorado holding that reliance is not required under the CCPA; it is sufficient that "the false representation had the capacity or tendency to deceive, even if it did not"); *Ford Motor Credit Co. v. Majors, No. A04-1468, 2005 Minn. App. LEXIS 448, 2005 WL 1021551, at *3 (Minn. Ct. App. May 3, 2005)* (the *Minnesota Uniform Deceptive Trade Practices Act, Minn. Stat. §§ 325D.43-.48* (the "MUDTPA") "define[s] violations based on conduct by the defendant and do[es] not require reliance by the plaintiff"); *State ex rel. Spaeth v. Eddy Furniture Co., 386 N.W.2d 901, 903 (N.D. 1986)* (Supreme Court **[**31]** of North Dakota distinguishing between common law fraud and claims under the North Dakota consumer fraud statute).

Defendants' arguments specific to the laws of Colorado, Minnesota, and North Dakota fare no better. ***HN19***[] With respect to the CCPA, as Defendants note, one element of a claim thereunder is that a defendant's conduct "significantly impacts the public as actual or potential consumers of the defendant's goods, services, or property." *R.W. Beck, Inc. v. E3 Consulting, LLC, 577 F.3d 1133, 1149 (10th Cir. 2009)* (quoting *Rhino Linings, 62 P.3d at 146-47*). "To determine whether a challenged practice significantly impacts the public, Colorado courts consider (1) the number of consumers directly affected by the challenged practice, (2) the relative sophistication and bargaining power of the consumers affected by the challenged practice, and (3) evidence that the challenged practice has previously impacted other consumers or has the significant potential to do so in the future." *Id.* (quotations omitted). In seeking dismissal of the Indirect Purchaser Plaintiffs' claims under the CCPA, Defendants have addressed none of these factors, and the Court does not find this fact-intensive inquiry appropriate for resolution on a motion to dismiss.

The Court further finds that the Indirect Purchaser Plaintiffs **[**32]** have adequately alleged deceptive conduct under the consumer protection laws of Minnesota and North Dakota. Defendants have made no meaningful argument in this regard, but have simply cited the relevant statutes and asserted without additional elaboration that the indirect purchaser complaint "fails to identify any conduct by Defendants that would meet the pleading requirements for unconscionable, deceptive, or fraudulent conduct[.]" (Dkt. 174-1 at 30). The Court disagrees. The indirect purchaser complaint alleges a great deal of deceptive conduct by Defendants, including the provision of false information to IHS Markit for the express purpose of manipulating the indexed price of caustic soda. Accepting these allegations as true, as it must at **[*242]** this stage of the proceedings, the Court finds no basis to dismiss the Indirect Purchaser Plaintiffs' Minnesota and North Dakota consumer protection claims. *See Dahl v. R.J. Reynolds Tobacco Co., 742 N.W.2d 186, 196 (Minn. Ct. App. 2007)* (the MUDTPA "provide[s] claims that are distinct from the common-law duty not to defraud" and "imposes broad duties not to deceive consumers"); *Ackre v. Chapman & Chapman, P.C., 2010 ND 167, 788 N.W.2d 344, 353 (N.D. 2010)* (whether or not an act is deceptive and therefore unlawful under the North Dakota consumer fraud statute is "generally a question of fact"). **[**33]**

The Court notes that Defendants have also argued that the Indirect Purchaser Plaintiffs cannot seek damages under the MUDTPA and cannot seek restitution under the CCPA. ***HN20***[] Defendants are incorrect with respect to the MUDTPA—an individual may seek damages under the MUDTPA pursuant to Minnesota's private attorney general statute, *Minn. Stat. § 8.31*, so long as the "cause of action benefits the public." *Tatone v. SunTrust Mortg., Inc., 857 F. Supp. 2d 821, 836 (D. Minn. 2012)* (citation omitted); *see also Weller v. Accredited Home Lenders, Inc., No. CIV. 08-2798 JRTSRN, 2009 U.S. Dist. LEXIS 26651, 2009 WL 928522, at *4 (D. Minn. Mar. 31, 2009)*. The

Indirect Purchaser Plaintiffs' allegations, accepted as true, support a plausible inference of benefit to the public in the event they are successful, because anticompetitive price fixing presents a public harm.

As to Defendants' contention that the CCPA does not allow for restitution, the basis for this position is unclear. Defendants cite *Colo. Rev. Stat. § 6-1-113(2)* (*see* Dkt. 174-1 at 42), but that statutory subsection states that it applies "[e]xcept in a class action." These actions are, of course, putative class actions. Because Defendants have failed to provide any further elaboration on this argument, the Court must reject it at this stage of the proceedings.

For all these reasons, the Court grants Defendants' motion to dismiss with respect to the consumer protection claims brought under the laws **[**34]** of Alaska, Arizona, California, Illinois, Montana, New Hampshire, New Jersey, North Carolina, Oregon, Utah, and West Virginia, and denies it with respect to the consumer protection claims brought under the laws of Colorado, Minnesota, and North Dakota.

B. State Law Antitrust Claims

The Court turns next to the Indirect Purchaser Plaintiffs' state law antitrust claims. Defendants seek dismissal of the antitrust claims brought under the laws of Arizona, Connecticut, the District of Columbia, Illinois, Kansas, Maine, Maryland, Michigan, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Oregon, South Dakota, Tennessee, Utah, and West Virginia. (Dkt. 174-1 at 42). For the reasons discussed below, the Court grants the motion to dismiss with respect to the antitrust claims asserted under the laws of Arizona, Connecticut, the District of Columbia, Maine, Maryland, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Mexico, North Carolina, North Dakota, Oregon, South Dakota, Utah, and West Virginia. The Indirect Purchaser Plaintiffs' Illinois, Kansas, Nevada, and Tennessee antitrust claims will be allowed to proceed.

1. Failure to Allege a Substantial [35] Effect on Intrastate Commerce**

Defendants argue that the Indirect Purchaser Plaintiffs have failed to state a viable claim under the antitrust laws of Arizona, Connecticut, the District of Columbia, Kansas, Maine, Maryland, **[*243]** Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Oregon, South Dakota, Tennessee, and West Virginia, because they have not alleged a substantial effect on intrastate commerce as required by those states' statutes. The Indirect Purchaser Plaintiffs do not contest that, in the relevant jurisdictions, an antitrust suit may be maintained only where the alleged anticompetitive conduct has had meaningful in-state effects. Instead, they argue that their allegation of a broad, nationwide price-fixing scheme is sufficient to support the inference of substantial impacts in every state.

As the Indirect Purchaser Plaintiffs concede in their opposition to Defendants' motion to dismiss, their factual allegations must support the inference that "the challenged conduct—though it may have originated out-of-state—likely [a]ffected commerce in-state, such as by causing residents to pay artificially inflated prices." (Dkt. 195 at 23). ***HN21***[] In considering **[**36]** whether this standard has been met in analogous cases, federal courts have distinguished between pleadings in which a plaintiff has alleged "intrastate conduct along with conduct throughout the United States," and pleadings that "do[] not contain specific allegations of 'intrastate' conduct along with allegations of conduct 'throughout the United States.'" *In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 408 (S.D.N.Y. 2011)* (citations omitted). In the latter type of cases, "courts have held allegations under state antitrust statutes insufficient where the complaint alleges only that the conspiracy affects interstate commerce without describing the effects in a particular state or in discretely identifiable states." *Jones v. Micron Tech. Inc., 400 F. Supp. 3d 897, 924 (N.D. Cal. 2019)* (dismissing claims asserted "under the antitrust statutes of Kansas, Michigan, Mississippi, New York, North Carolina, South Dakota, Tennessee, West Virginia, Wisconsin, and the District of Columbia" because the plaintiff alleged only a "national conspiracy" that resulted in inflated prices for the defendant's product throughout the United States); *see also* *In re Cast Iron Soil Pipe And Fittings Antitrust Litig., No. 1:14-MD-2508, 2015 U.S. Dist. LEXIS 121620, 2015 WL 5166014, at *26 (E.D. Tenn. June 24, 2015)* ("The Indirect Plaintiffs have not alleged any facts specific to the District of Columbia and fail to address how Defendants' actions have in any way affected intrastate commerce in **[**37]** the District of Columbia. Similar to the Consumer

Plaintiffs, these allegations are not sufficient to establish a connection within the District of Columbia. As the Downstream Purchasers' allegations under the states of Mississippi, Nevada, New York, North Carolina, South Dakota, Tennessee, Wisconsin, and West Virginia are similarly conclusory without addressing any connection between the individual state and the wrongful conduct, these allegations are also insufficient.").

Here, the Court finds that the Indirect Purchaser Plaintiffs have sufficiently alleged intrastate effects as to the following contested jurisdictions: Kansas, Nevada, and Tennessee. With respect to these three states, the Indirect Purchaser Plaintiffs have specifically alleged that one or more Defendants made sales of caustic soda therein. (Dkt. 129 at 10-11); *see* *In re Digital Music Antitrust Litigation, 812 F. Supp. 2d at 407* (allegations that the defendants "produced, licensed, distributed and/or sold Internet Music in . . . the listed states" sufficient to plead "intrastate conduct or substantial effects in the state" (internal quotation marks omitted)).

However, the Court agrees with Defendants that the Indirect Purchaser Plaintiffs have not adequately alleged intrastate **[**38]** effects in Arizona, Connecticut, the District **[*244]** of Columbia, Maine, Maryland, Michigan, Minnesota, Mississippi, Nebraska, New Mexico, North Carolina, North Dakota, Oregon, South Dakota, and West Virginia. The indirect purchaser complaint contains no specific allegations of sales of caustic soda in these states. Further, contrary to the Indirect Purchaser Plaintiffs' contentions, their factual allegations do not reasonably support the inference of impacts in every state. While it is true that the Indirect Purchaser Plaintiffs estimate that Defendants "produce at least 90% of the domestic supply of Caustic Soda" (Dkt. 129 at 17), they also allege that caustic soda is a "commodity chemical" used for industrial purposes (*id.* at 4) and that Defendants "have historically sold and currently sell" only to "hundreds of purchasers in the United States and elsewhere" (Dkt. 48). In other words, this is not a case involving a high-volume consumer good with many thousands of purchasers, such that a factfinder could reasonably assume that sales had been made in every state. *See* *In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 816 (N.D. Ill. 2017)* ("In light of the obvious fact that Broilers are purchased in substantial numbers throughout the United States, these allegations **[**39]** plausibly establish "substantial" intrastate effects. . . ."). On these allegations, the Indirect Purchaser Plaintiffs cannot maintain their antitrust claims under the laws of Arizona, Connecticut, the District of Columbia, Maine, Maryland, Michigan, Minnesota, Mississippi, Nebraska, New Mexico, North Carolina, North Dakota, Oregon, South Dakota, and West Virginia.

2. Failure to Give Notice to Attorneys General of Arizona, Nevada, and Utah

HN22[] The antitrust laws of Arizona, Nevada, and Utah require a plaintiff to serve a copy of their complaint on the respective attorneys general of those states. *See* *Ariz. Rev. Stat. § 44-1415(A)*, *(D)*; *Nev. Rev. Stat. § 598A.210(3)*; *Utah Code § 76-10-3109(9)*. Defendants contend that the Indirect Purchaser Plaintiff failed to provide the requisite notice, and so their antitrust claims based on these states' laws must therefore be dismissed. In opposition, Plaintiffs contend that (1) these state law notice requirements do not apply in federal court and (2) in any event, "[c]ontemporaneously with the filing of their individual complaints, and approximately eight months before they filed the operative Complaint, [the Indirect Purchaser] Plaintiffs sent notice letters to the attorney general of each state, thus substantively complying with the **[**40]** state statutes." (Dkt. 195 at 19). The Indirect Purchaser Plaintiffs have submitted the attorney declaration of Ryan Gellman confirming their assertion that they provided the requisite notice. (Dkt. 195-1) (the "Gellman Declaration"). In reply, Defendants urge the Court to disregard the Gellman Declaration, arguing that "[the Indirect Purchaser] Plaintiffs may not amend their Complaint by way of declaration or new assertions of fact in an opposition, and the Court generally may not consider documents outside of the Complaint." (Dkt. 202 at ¶ 25).

In light of the fact that the Indirect Purchaser Plaintiffs have in fact provided notice of their complaints to the attorneys general of Arizona, Nevada, and Utah, the Court will not dismiss the Indirect Purchaser Plaintiffs' claims on this basis, and thus need not and does not decide whether the state law notice requirements apply in federal court. Defendants' arguments regarding the amendment of pleadings and the documents the Court may consider on a *Rule 12(b)(6)* motion miss the mark. Defendants have cited no cases supporting the conclusion that a plaintiff is required to affirmatively plead compliance with these statutory notice requirements to state **[**41]** a **[*245]** plausible claim. To the contrary, the relevant statutory language is inconsistent with the imposition of such a pleading requirement, as all three statutes provide for notice to the attorney general simultaneous with or after the filing of the complaint. *See* Ariz. Rev. Stat. § 44-1415(A), (D); Nev. Rev. Stat. § 598A.210(3); Utah Code § 76-10-3109(9). It would be nonsensical to require a plaintiff to plead in a complaint that had not yet been filed that he had already provided a copy of that same document to the relevant attorney general at the same time or after it was filed. *See* Staley v. Gilead Scis., Inc., 446 F. Supp. 3d 578, 623 (N.D. Cal. 2020) (denying motion to dismiss state law antitrust claims for failure to comply with notice requirements because the plaintiffs had actually provided the requisite notice and were not required to plead the same to state a claim); In re Generic Pharms. Pricing Antitrust Litig., 368 F. Supp. 3d 814, 835 (E.D. Pa. 2019) ("Regardless of whether the relevant notice provisions are substantive or procedural, they do not alter the substantive elements of Plaintiffs' claims and are not a pleading requirement for the Complaints.").

3. Illinois' Bar on Indirect Purchaser Class Actions

HN23[] The Illinois Antitrust Act (the "IAA") provides that "no person shall be authorized to maintain a class action in any court of this State for indirect purchasers asserting claims under this Act, with the sole **[**42]** exception of this State's Attorney General." 740 Ill. Comp. Stat. 10/7(2). Defendants seek dismissal of the Indirect Purchasers Plaintiffs' IAA claims on this basis, while the Indirect Purchaser Plaintiffs argue that this state law requirement is procedural and does not apply in federal court pursuant to Shady Grove Orthopedic Assocs. v. Allstate Ins. Co., 559 U.S. 393, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010).

In *Shady Grove*, the Supreme Court "considered whether a New York law prohibiting class actions in any suit seeking penalties or statutory minimum damages precluded a federal court from exercising diversity jurisdiction over a class action." In re Digital Music Antitrust Litig., 812 F. Supp. 2d at 414. "A majority of the Court agreed that state class action provisions directly conflict with Rule 23, but the Court split on when Rule 23 preempts a conflicting state class action provision." Greene v. Gerber Prods. Co., 262 F. Supp. 3d 38, 59 (E.D.N.Y. 2017). The plurality opinion, authored by Justice Scalia, "found that Rule 23 preempts all state class action provisions," while Justice Stevens "concurred in the narrow holding that Rule 23 and [the relevant New York law] conflict, but agreed with the four-Justice dissent that there are some state procedural rules that federal courts must apply in diversity cases because they function as part of the State's definition of substantive rights and remedies." *Id.* (quotation omitted).

HN24[] "When a fragmented Court decides a case **[**43]** and no single rationale explaining the result enjoys the assent of five Justices, the holding of the Court may be viewed as that position taken by those Members who concurred in the judgments on the narrowest grounds." United States v. Alcan Aluminum Corp., 315 F.3d 179, 189 (2d Cir. 2003) (quoting Marks v. United States, 430 U.S. 188, 193, 97 S. Ct. 990, 51 L. Ed. 2d 260 (1977)). Accordingly, while "[t]he Second Circuit has not directly addressed whether Justice Stevens' opinion [in *Shady Grove*] controls, . . . the majority of district and circuit courts that have [considered the issue have] found Justice Stevens' concurring opinion controls because it provides the 'narrowest grounds' or the 'common denominator' of the majority position." Greene, 262 F. Supp. 3d at 59 (collecting cases). Here, both sides have **[*246]** applied Justice Stevens' concurrence in considering whether the IAA's limitation on class actions by indirect purchasers applies, and the Court does the same.

"Courts in this circuit have split as to whether the indirect purchaser class action bar in the IAA is procedural or substantive, under Justice Stevens' concurrence in *Shady Grove*." Sergeants Benevolent Ass'n, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *32. Having reviewed cases from both within and outside this Circuit, the Court is persuaded that the IAA's indirect class action bar is procedural. As the Court in *Sergeants Benevolent Ass'n* explained, ***HN25***[] the IAA's class action **[**44]** bar "does not limit the substantive rights of an injured party in an individual action" and "were the IAA to prohibit class actions altogether, the statute would read no differently than the New York class actions bar at issue in *Shady Grove*[.]" 2018 U.S. Dist. LEXIS 220574, [WL] at *32-33; *see also* In re Propranolol Antitrust Litig., 249 F. Supp. 3d 712, 728 (S.D.N.Y. 2017) ("[T]he Court is persuaded that this state procedural rule does not control in federal court, where Rule 23 sets the only relevant requirements to file a class action."); In re Aggrenox Antitrust Litig., No. 3:14-MD-2516 (SRU), 2016 U.S. Dist. LEXIS 104647, 2016 WL 4204478, at *6 (D. Conn. Aug. 9, 2016) ("I cannot square Shady Grove's allowance of a Rule 23 class action despite New York's class-action bar with the *dis* allowance of a *Rule 23* class action in the case of Illinois's class-action bar simply on the basis that Illinois's bar is narrower. It is narrower because its application is limited to indirect-purchaser antitrust claims, and that does tie it more specifically to particular substantive rights; but if New York's state-law bar is not a procedural rule that alters the scope of a substantive right or remedy, then the narrower scope of Illinois's state-law bar does not make it one that does." (emphasis in original)); *but see* *In re Digital Music Litig, 812 F. Supp. 2d at 416* ("Unlike the New York law at issue in *Shady Grove*, ***HN26***[] [the IAA's] limitation is not contained in a generally applicable procedural rule but, rather, in **[**45]** the same paragraph of the same statute that creates the underlying substantive right."); *In re Lipitor Antitrust Litig., 336 F. Supp. 3d 395, 417 (D. N.J. 2018)* (collecting cases holding that the IAA "is distinguishable from the New York law in *Shady Grove* and that it prohibits indirect purchaser class actions" even in federal court). The Court accordingly will not dismiss the Indirect Purchaser Plaintiffs' IAA claims on this basis.

4. Montana's Status as an *Illinois Brick* State

Defendants seek dismissal of the Indirect Purchaser Plaintiffs' claims under Montana's ***antitrust law***, contending that Montana follows *Illinois Brick*. The Court agrees. The Supreme Court of Montana has held that the relevant Montana statute was "modeled after the Sherman Act" and that Montana courts would accordingly give "due weight to the federal courts' interpretation of this type of alleged antitrust violation." *Smith v. Video Lottery Consultants, Inc., 260 Mont. 54, 58, 858 P.2d 11 (1993)*. Further, Montana has not passed an *Illinois Brick* repealer statue. ***HN27***[] Thus, under Montana law, "lawsuits by indirect purchasers are barred pursuant to *Illinois Brick*. . . ." *In re Static Random Access Memory (SRAM) Antitrust Litig., No. 07-MD-01819 CW, 2010 U.S. Dist. LEXIS 131002, 2010 WL 5094289, at *4 (N.D. Cal. Dec. 8, 2010)*; *see also* *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F.Supp.2d 1179, 1187 (N.D. Cal. 2009)*; *cf.* *Sergeants Benevolent Ass'n, 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *57* (dismissing unjust enrichment claim under Montana law on the basis that Montana is an *Illinois Brick* state). The Court grants the motion to dismiss with respect to the Montana antitrust **[**46]** claims.

[*247] 5. Lack of a Plaintiff from Utah

HN28[] "Under the Utah Antitrust Act [the "UAA"], 'a person who is a citizen of this state or a resident of this state' can bring a claim." *In re Effexor Antitrust Litig., 357 F. Supp. 3d 363, 393 (D.N.J. 2018)* (quoting *Utah Code § 76-10-3109(1)(a)* and original alteration omitted). "The majority of courts that have been presented with this statute require at least one Utah citizen or resident be a named plaintiff." *Id.* However, some courts have found that "a class representative that is not a Utah citizen or resident may bring claims on behalf of absent class members who are citizens or residents of Utah." *In re Zetia (Ezetimibe) Antitrust Litig., 400 F. Supp. 3d 418, 435 (E.D. Va. 2019)*.

HN29[] In the absence of any controlling authority, the Court adopts the majority approach and concludes that, to state a claim under the UAA, there must be a named plaintiff who is a Utah citizen or resident. It is well-established that a member of a putative class is not a party to a lawsuit, *see* *In re Oxford Health Plans, Inc. Sec. Litig., 244 F. Supp. 2d 247, 251 (S.D.N.Y. 2003)* ("A 'plaintiff' is a party to the lawsuit. Absent class members whose interests are represented by a Plaintiff are not parties to the lawsuit." (collecting cases)), and the plain language of the UAA states that a Utah citizen or resident must "bring" the action, *Utah Code § 76-10-3109(1)(a)*, not merely be benefited thereby. Accordingly, the Court dismisses the Indirect Purchaser Plaintiffs' **[**47]** claims under the UAA, as it is conceded that no named Plaintiff is a citizen or resident of Utah.

In sum, and for the foregoing reasons, the Court dismisses the antitrust claims asserted under the laws of Arizona, Connecticut, the District of Columbia, Maine, Maryland, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Mexico, North Carolina, North Dakota, Oregon, South Dakota, Utah, and West Virginia. The antitrust claims asserted under the laws of Illinois, Kansas, Nevada, and Tennessee will be permitted to proceed.

C. Unjust Enrichment Claims

Defendants seek dismissal of all the unjust enrichment claims asserted by the Indirect Purchaser Plaintiffs, for a variety of reasons. (*See* Dkt. 174-1 at 46-47). The Court need not and does not reach the majority of these arguments because it agrees with Defendants that the Indirect Purchaser Plaintiffs' conclusory allegations of unjust enrichment do not comply with the relevant pleading standards.

The Court finds the decision in *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224 (D. Conn. 2015)* instructive. As the court in *In re Aggrenox* explained, the indirect purchaser plaintiffs in that case, like the Indirect Purchaser Plaintiffs here, had "pleaded federal antitrust claims and the factual foundation **[**48]** for them," and then "merely allege[d] that those claims are also actionable . . . as unjust enrichment." *Id. at 255*. This sort of generic pleading does not satisfy *Federal Rule of Civil Procedure 8*, as interpreted by the Supreme Court in *Twombly* and *Iqbal. Id.* ("The indirect purchasers . . . have *listed* claims under very many state laws, but they have not truly pleaded claims under those laws sufficient to show their entitlement to recovery under them, as required by *Rule 8*. (emphasis in original)). The Indirect Purchaser Plaintiffs "cannot simply enumerate a long list of state-law claims for states where they might otherwise have no available antitrust recovery and rely on the defendants and the court to sort out whether or how those laws can act as surrogates for ***antitrust law***." *Id. at 255-56*. Indeed, ***HN30***[] "[s]tate law requirements under unjust enrichment law vary widely," *In re Packaged Ice Antitrust Litig., 779 F. Supp. 2d 642, 667* ***[*248]*** *(E.D. Mich. 2011)*, and the undifferentiated unjust enrichment claims set forth in the indirect purchaser complaint provide neither Defendants nor the Court with sufficient information to assess their adequacy *See also In re Wellbutrin XL Antitrust Litig., 260 F.R.D. 143, 167 (E.D. Pa. 2009)* (***HN31***[] "Unjust enrichment is not a catch-all claim existing within the narrow scope of federal common law," and "cobbling together the elements of a claim of unjust enrichment from the **[**49]** laws of the fifty states is no different from applying federal common law.").

HN32[] To give just one example of why the Indirect Purchaser Plaintiffs' failure to specifically address the factual requirements of an unjust enrichment claim under the various asserted laws matters, under New York law, a plaintiff claiming unjust enrichment must establish that the relationship between the parties is not "too attenuated," *Choi v. Tower Rsch. Cap. LLC, 890 F.3d 60, 69 (2d Cir. 2018)* (citation omitted), meaning that "[t]he relationship must be one that could have caused reliance or inducement." *Crescimanni v. Trovato, 162 A.D.3d 849, 851, 80 N.Y.S.3d 89 (2d Dep't 2018)*. The indirect purchaser complaint contains no factual allegations addressing this requirement of New York law, instead addressing only the generic elements of an unjust enrichment claim. This is the type of formulaic, conclusory pleading that *Twombly* and *Iqbal* are meant to eliminate. The Court accordingly agrees with Defendants that the Indirect Purchaser Plaintiffs' unjust enrichment claims should be dismissed.

D. Clayton Act Claim for Injunctive Relief

The Court turns finally to the viability of the Indirect Purchaser Plaintiffs' claim for injunctive relief under *§ 16* of the Clayton Act, 5 U.S.C. § 26. Relying on *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6 (1st Cir. 2008)* and *In re Nifedipine Antitrust Litig., 335 F. Supp. 2d 6 (D.D.C. 2004)*, Defendants argue that injunctive relief under the Clayton Act **[**50]** is not available because "Plaintiffs fail to plead any facts suggesting they face a real and immediate threat of continuing harm justifying the injunctive relief they seek." (Dkt. 174-1 at 57-58). The Court disagrees.

HN33[] "In order to seek injunctive relief under *§ 16*, a private plaintiff must allege threatened loss or damage of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful." *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (quotation omitted). Here, the Indirect Purchaser Plaintiffs have alleged that Defendants are engaged in an ongoing anticompetitive conspiracy that continues to result in artificially inflated prices for caustic soda. This is sufficient to allow the Indirect Purchaser Plaintiffs to proceed on their request for injunctive relief under *§ 16*. *See In re Generic Pharms. Pricing Antitrust Litig., 338 F. Supp. 3d 404, 457 (E.D. Pa. 2018)* (allowing indirect purchasers to bring claims for injunctive relief under *§ 16* where they alleged an ongoing conspiracy that increased the price of certain generic drugs); *In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d at 813* (allowing indirect purchasers to bring claims for injunctive relief under *§ 16* where they alleged price-fixing conspiracy related to broiler chickens).

The cases on which Defendants rely are distinguishable. In *In re New Motor Vehicles Canadian Exp. Antitrust* ***[**51]*** *Litig.*, the First Circuit explained that the wrongdoing alleged by the plaintiffs relied on the existence of a "'perfect storm' that allegedly precipitated massive arbitrage opportunities **[*249]** for selling Canadian cars in the United States" and that said "perfect storm" had "ceased long ago." *522 F.3d at 14*. Further, the plaintiffs had failed to "demonstrate whether or when prevailing conditions—primarily, exchange rates between Canada and the United States—might reasonably be expected once again to resemble those during the class period." *Id.* By contrast, in this case, there is no indication that there were external factors that combined to create a unique price-fixing opportunity, nor any reason to think that Defendants could not continue to engage in the misconduct alleged in the indirect purchaser complaint under present market conditions.

Similarly, in *In re Nifedipine Antitrust Litig.*, there existed a Federal Trade Commission consent order that had "disbanded the Distribution Agreement between the defendants and required the companies to take various steps to introduce competition to the market[.]" *335 F. Supp. 2d at 16*. The existence of this consent order eliminated any "real and immediate threat of future injury," **[**52]** and so the court dismissed the *§ 16* claim for injunctive relief. *Id.* Again, there are no comparable facts here, and so the opinion in *In re Nifedipine Antitrust Litig.* is inapposite. The Court finds no basis, at this stage of the proceedings, to dismiss the claim for injunctive relief under *§ 16* of the Clayton Act.

III. Leave to Amend

In their opposition papers, the Indirect Purchaser Plaintiffs state as follows:

> Should the Court grant any part of Defendants' partial motion to dismiss, the "usual practice" in the Second Circuit is to permit leave to replead to correct pleading deficiencies. *See* *Cortec Indus., Inc. v. Sum Holding L.P., 949 F.2d 42, 48 (2d Cir. 1991)*; *Frederick v. New York, 232 F. Supp. 3d 326, 335 (W.D.N.Y. 2017)* (Wolford, J.). ***HN34***[] The Court should "freely give leave when justice so requires." *Fed. R.Civ. P. 15(a)(2)*.

(Dkt. 195 at 17). To the extent this paragraph was intended to be a request for leave to amend, it "is not a proper motion for leave to amend, and fails to comply with the Local Rules of Civil Procedure with respect to the process for seeking to amend a pleading." *Wi3, Inc. v. Actiontec Elecs., Inc., 71 F. Supp. 3d 358, 363 (W.D.N.Y. 2014)* (explaining that, among other things, this District's Local Rules require the party seeking to amend a pleading to "identify the proposed amendments through the use of a word processing redline function or other similar markings" (quotations omitted)). The Court **[**53]** therefore exercises its discretion to deny this "cursory or boilerplate request[] . . ., made solely in a memorandum in opposition to a motion to dismiss." *Malin v. XL Capital, Ltd., 312 F. App'x 400, 402 (2d Cir. 2009)*.

However, the Court does believe that certain of the claims discussed above could potentially be appropriately pled. Specifically, the Court finds that the dismissal of the unjust enrichment claims and the antitrust claims under the laws of Arizona, Connecticut, the District of Columbia, Maine, Maryland, Michigan, Minnesota, Mississippi, Nebraska, New Mexico, North Carolina, North Dakota, Oregon, South Dakota, and West Virginia should be without prejudice to filing a proper motion for leave to amend.[4] Further, while **[*250]** the deadline for filing motions for leave to amend expired on March 31, 2021 (*see* Dkt. 256), the Court finds that good cause exists to make an exception to that deadline for the filing of such a motion. To the extent the Indirect Purchaser Plaintiffs wish to seek leave to amend the identified claims, they may file a motion seeking such relief within 45 days of the date of this Decision and Order, as set forth below.

---

[4] As discussed above, the Indirect Purchaser Plaintiffs have agreed to withdraw their consumer protection claims asserted under the laws of Arkansas, Delaware, the District of Columbia, Georgia, Idaho, Indiana, Kansas, Louisiana, Maine, Massachusetts, Michigan, Mississippi, Missouri, Pennsylvania, Rhode Island, South Carolina, Virginia, Wisconsin, and Wyoming. (*See* Dkt. 195 at 29 n. 12). While the dismissal of these claims is without prejudice, the Court's extension of the deadline for filing a motion for leave to amend does not apply to these claims.

CONCLUSION

For the reasons set forth above, the Court grants in part and denies in part Defendants' motion **[**54]** (Dkt. 174) for partial dismissal of the indirect purchaser complaint (Dkt. 129). Specifically, the Court rules as follows: (1) the Indirect Purchaser Plaintiffs' consumer protection claims asserted under the laws of Arkansas, Delaware, the District of Columbia, Georgia, Idaho, Indiana, Kansas, Louisiana, Maine, Massachusetts, Michigan, Mississippi, Missouri, Pennsylvania, Rhode Island, South Carolina, Virginia, Wisconsin, and Wyoming are withdrawn without prejudice; (2) the Indirect Purchaser Plaintiffs' consumer protection claims asserted under the laws of Alaska, Arizona, California, Illinois, Montana, New Hampshire, New Jersey, North Carolina, Oregon, Utah, and West Virginia are dismissed with prejudice; (3) the Indirect Purchaser Plaintiffs' ***antitrust law*** claims asserted under the laws of Arizona, Connecticut, the District of Columbia, Maine, Maryland, Michigan, Minnesota, Mississippi, Nebraska, New Mexico, North Carolina, North Dakota, Oregon, South Dakota, and West Virginia are dismissed without prejudice; (4) the Indirect Purchaser Plaintiffs' antitrust claims asserted under the laws of Montana and Utah are dismissed with prejudice; and (5) the Indirect Purchaser Plaintiffs' **[**55]** unjust enrichment claims are dismissed without prejudice. Defendants' motion to dismiss the indirect purchaser complaint is denied in all other respects.

The Indirect Purchaser Plaintiffs may file a motion to amend the unjust enrichment claims and the antitrust claims under the laws of Arizona, Connecticut, the District of Columbia, Maine, Maryland, Michigan, Minnesota, Mississippi, Nebraska, New Mexico, North Carolina, North Dakota, Oregon, South Dakota, and West Virginia within 45 days of the date of this Decision and Order, consistent with their obligations under *Federal Rule of Civil Procedure 11*. In the event the Indirect Purchaser Plaintiffs file such a motion, the Court will set a briefing schedule and any obligation on the part of the Defendants to answer the indirect purchaser complaint will be stayed. However, in the event that no motion for leave to amend is filed, Defendants shall answer the indirect purchaser complaint within 60 days of the date of this Decision and Order.

SO ORDERED.

/s/ Elizabeth A. Wolford

HN1[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

Section 13(b) of the Federal Trade Commission (FTC) Act authorizes FTC to seek an injunction against an entity that is violating or is about to violate the antitrust laws, including Section 2 of the Sherman Act. 15 U.S.C.S. § 53(b).

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

In evaluating a motion to dismiss under Fed. R. Civ. P. 12(b)(6), the Court must treat the complaint's factual allegations as true and must grant plaintiff the benefit of all inferences that can be derived from the facts alleged. Although detailed factual allegations are not necessary to withstand a Rule 12(b)(6) motion, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face, — that is, the facts alleged in the complaint must be enough to raise a right to relief above the speculative level. The Court need not accept as true, then, a legal conclusion couched as a factual allegation, nor inferences unsupported by the facts set out in the complaint. And it may consider not only the facts alleged in the complaint, but also any documents either attached to or incorporated in the complaint, and matters of which courts may take judicial notice.

HN3[] Actual Monopolization, Claims

The offense of monopoly maintenance under Section 2 of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. This second element is usually referred to by the shorthand of anticompetitive or exclusionary conduct.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN4[] Actual Monopolization, Claims

Monopoly power is the power to control prices or exclude competition, such that a firm is a monopolist if it can profitably raise prices substantially above the competitive level. Where a plaintiff can provide direct proof that a firm has in fact profitably done so, the existence of monopoly power is clear. Because such proof is rare, however, plaintiffs and courts usually search for indirect or circumstantial evidence of monopoly power by inferring it from a firm's possession of a dominant share of a relevant market. Because market power is meaningful only if it is durable, a plaintiff proceeding by the indirect method of providing a relevant market and share thereof must also show that there are barriers to entry into that market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN5[] **Attempts to Monopolize, Elements**

With respect to indirect proof of market power, that framework first requires the plaintiff to establish the relevant market in which the defendant firm allegedly has monopoly power. It then demands that a plaintiff establish that the defendant has a dominant share of that market protected by entry barriers.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN6[] **Relevant Market, Geographic Market Definition**

Although the definition of a relevant antitrust market is typically a factual rather than a legal inquiry, certain legal principles nevertheless govern. An antitrust market includes two components: the product market and the geographic market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN7[] **Relevant Market, Geographic Market Definition**

A relevant product market is a term of art in antitrust analysis, and is defined as all products reasonably interchangeable by consumers for the same purposes. Because the ability of consumers to turn to other suppliers restrains a firm from raising prices above the competitive level, the analysis of market power (which simply means the power to do just that) must use, as its denominator, all products roughly equivalent to another for the use to which they are put. In other words, courts look at whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other. At bottom, products that are sufficiently interchangeable compete with each other in the relevant legal sense.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN8[] **Relevant Market, Product Market Definition**

Cross-elasticity of demand is a measure of the degree to which the rise in the price of one good would tend to create a greater demand for other like goods. It is thus one measure of reasonable interchangeability. At the motion to dismiss stage, the FTC may permissibly plead that certain factors of both the service at issue and its potential substitutes — e.g., their price, use, and qualities — render them not reasonably interchangeable in the eyes of users.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN9[] **Relevant Market, Product Market Definition**

The market definition analysis looks to both whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN10[] **Actual Monopolization, Monopoly Power**

In antitrust cases, while courts typically evaluate market definition and market share separately, the two inquiries ultimately come together to produce the conclusion that matters: the defendant's market power. That point can be lost if courts compartmentalize the two issues and examine the sufficiency of a plaintiff's market-share showings without looking back to how convincingly, or how tenuously, the market has been defined.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN11[] **Actual Monopolization, Monopoly Power**

The existence of market power is at the heart of any monopolization claim. As the Supreme Court explained in Twombly, itself an antitrust case, a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN12[] **Actual Monopolization, Monopoly Power**

The central principle that governs refusal-to-deal claims is that, as a general matter, a monopolist has the right to refuse to deal with other firms, which includes the right to refuse to cooperate with rivals. That is because monopolists are both expected and permitted to compete like any other firm, and part of competing like everyone else is the ability to make decisions about with whom and on what terms one will deal. This general no-duty-to-deal rule holds even where a monopolist refuses to deal with its competitor merely in order to limit entry, — in other words, because it wants to prevent that rival from competing with it.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN13[] **Scope, Monopolization Offenses**

The rule declaring unilateral refusals to deal essentially per se lawful, or presumptively legal, rests on three overriding considerations of antitrust policy. First, and most importantly, firms may acquire monopoly power by establishing an infrastructure that renders them uniquely suited to serve their customers. Second, compelled sharing puts federal courts in the role of central planners, requiring them to pick and choose the applicable terms and conditions of the forced sharing they would order despite their being ill-equipped to assume this role. Finally, compelled sharing may actually provide opportunities for collusion between the monopolist and its rival or rivals. Collusion is the supreme evil of antitrust, and itself quite injurious to consumers and the competitive process alike.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN14[] **Anticompetitive & Predatory Practices, Predatory Pricing**

The general no-duty-to-deal rule does have a narrow-eyed needle of an exception, traceable to the Supreme Court's decision in Aspen Skiing. As the case has come to be understood, Aspen Skiing ran afoul of the Sherman Act — despite the general no-duty-to-deal rule — because it acted in a predatory fashion, which is to say it deliberately harmed itself (and consumers) in order to harm its competitor more.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal

HN15[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

Courts have accordingly coalesced around a three-part test for unlawful refusals to deal, drawn from Aspen Skiing's particular facts and aimed at sniffing out predation while avoiding over-inclusiveness. First, there must be a preexisting voluntary and presumably profitable course of dealing between the monopolist and rival with which the monopolist later refuses to deal. Second, the refusal to deal must involve products that the defendant already sells in the existing market to other similarly situated customers. Third, and most importantly, the monopolist's discontinuation of the preexisting course of dealing must suggest a willingness to forsake short-term profits to achieve an anti-competitive end, rather than to advance a valid business purpose.

Antitrust & Trade Law > Sherman Act > Claims

HN16[] **Sherman Act, Claims**

A monopolist has no duty to deal with its competitors, and a refusal to do so is generally lawful even if it is motivated by a desire to limit entry by new firms or impede the growth of existing ones. It follows that a firm's merely announcing its choice not to deal with competitors, whatever the motivation for doing so, cannot violate Section 2 of the Sherman Act.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal

HN17[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

To be actionable, an unlawful refusal-to-deal scheme would have to be made up of refusals that were themselves independent violations of the Aspen Skiing test.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN18[] Scope, Monopolization Offenses

To be actionable, a refusal to deal scheme of monopoly maintenance must involve specific instances in which that policy was enforced (i) against a rival with which the monopolist had a previous course of dealing; (ii) while the monopolist kept dealing with others in the market; (iii) at a short-term profit loss, with no conceivable rationale other than driving a competitor out of business in the long run.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

HN19[] Sherman Act, Claims

15 U.S.C.S. § 53(b) allows the FTC to bring suit in a district court of the United States to enjoin allegedly unlawful conduct only where it has reason to believe that any person, partnership, or corporation is violating, or is about to violate, any provision of law enforced by the FTC. 15 U.S.C.S. § 53(b). Section 2 of the Sherman Act is such a provision. Given § 53(b)'s requirement that the defendant is violating or is about to violate (not has violated) the antitrust laws, it contemplates relief that is prospective, not retrospective. Section 53(b) therefore does not permit the FTC to bring a claim based on long-past conduct without some evidence that the defendant is committing or is about to commit another violation.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN20[] Remedies, Injunctions

The Department of Justice has broad authority to seek injunctive relief in antitrust cases. 15 U.S.C.S. §§ 4, 25. And the FTC itself, "ever since its creation in 1914, has been authorized to enforce the law through its own administrative proceedings under Section 5(b) of the FTC Act. Section 5(b) allows the agency to conduct such a proceeding against person who has been or is violating the antitrust laws. 15 U.S.C.S. § 45(b). If it goes that route and prevails, the agency can then seek a court's help in enforcing its orders, including via monetary penalties, 15 U.S.C.S. § 57b, mandatory injunctions, and such other further and equitable relief as the court deems appropriate. § 45(l). Thus, if the FTC wants to address a past violation — where an entity has been violating the law — it must use Section 5(b). 15 U.S.C.S. § 45(b). Section 13(b), by contrast, mainly exists to address a specific problem, namely, that of stopping seemingly unfair practices (including antitrust violations) that are ongoing or about to occur from taking place until the Commission can complete an adjudication.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN21[] **Remedies, Injunctions**

With respect to 15 U.S.C.S. § 43(b), whatever the law tells the agency about what it must believe before it may file suit, for the agency to actually succeed, it must convince the court to agree with it that a violation is either ongoing or about to occur and that an injunction is warranted. It follows that the Fed. R. Civ. P. 8 requirement that the FTC must state a claim to the relief that it seeks that is plausible on its face requires the agency to make a plausible showing that the defendant is violating or is about to violate the antitrust laws.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN22[] **Actual Monopolization, Claims**

To the extent any scholarly commentary uses the term "conditional dealing," the phrase generally refers to actions such as tying or exclusive dealing. The key fact distinguishing such conduct from a standard refusal to deal is that it is not unilateral, but instead involves some assay by the monopolist into the marketplace that interferes with the relationship between rivals and third parties. Tying, for instance, occurs when a firm requires third parties to purchase a bundle of goods rather than just the ones they really want, thereby leveraging the monopolist's power in the "tying" product market to harm its competitors (who lose access to customers) in the "tied" product market. Exclusive dealing is similar: it refers to a monopolist's conditioning the sale of a product on the buyer's agreement not to deal with its competitors.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN23[] **Clayton Act, Claims**

The Supreme Court has clearly stated that the term "acquisition" as used in Section 7 of the Clayton Act — which prohibits purchases the effect of which may be substantially to lessen competition, or to tend to create a monopoly, 15 U.S.C.S. § 18 — does not refer to a discrete transaction but rather a status which continues until the transaction is undone. In other words, acquisition means both the purchase of rights in another company and the retention of those rights, such that Section 7's ban against certain acquisitions includes a ban against holding certain assets, not just obtaining them in the first place. The rule under Section 7 of the Clayton Act is that so long as an acquiring company continues to hold acquired assets, the Government may at any time argue that such company is violating Section 7.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Defenses

HN24[] **Clayton Act, Claims**

Just as the Government may proceed at any time that an acquisition may be said with reasonable probability to contain a threat that it may tend to create a monopoly, in violation of Clayton Act Section 7's proscription against transactions having that effect, so too it should be able to proceed against an acquisition whenever a threat of Sherman Act Section 2's prohibited effects is evident, — namely, that the acquisition is tending to destroy competition itself via means other than competition on the merits. It is well established that mergers may constitute one such means.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN25[] **Remedies, Injunctions**

An injunction under Section 13(b) of the FTC Act, 15 U.S.C.S. § 53(b), is a theoretically available remedy in a Sherman Act Section 2 challenge to long-ago mergers so long as the defendant still holds the purchased assets or stock.

Opinion

[*4] **MEMORANDUM OPINION**

At the time of the last great antitrust battle in our courthouse — between the United States and Microsoft — Mark Zuckerberg was still in high school. Only after his arrival at Harvard did he launch "The Facebook" from his dorm room. Nearly twenty years later, both federal and state regulators contend, in two separate **[**2]** actions before this Court, that Facebook is now the one violating the antitrust laws. The company, they allege, has long had a monopoly in the market for what they call "Personal Social Networking Services." And it has allegedly maintained that monopoly, in violation of *Section 2* of the *Sherman Act*, through two different kinds of actions: first, by acquiring firms that it believed were well positioned to erode its monopoly — most notably, Instagram and WhatsApp; and second, by adopting policies preventing interoperability between Facebook and certain other apps that it saw as threats, thereby impeding their growth into viable competitors. Both suits seek equitable relief from this conduct, including forced "divestiture or reconstruction of businesses" as well as orders not to undertake similar conduct in the future. See ECF No. 3 (Redacted Compl.) at 51-52. (The Court here cites a copy of the FTC's Complaint that has minor redactions to protect confidential business information, and it mentions certain redacted facts only with the parties' permission.)

Facebook now separately moves to dismiss both the State action and the FTC action. This Opinion resolves its Motion as to the FTC's Complaint, **[**3]** and the Court analyzes the States' largely parallel claims in its separate Opinion in No. 20-3589. Although the Court does not agree with all of Facebook's contentions here, it ultimately concurs that the agency's Complaint is legally insufficient and must therefore be dismissed. The FTC has failed to plead enough facts to plausibly establish a necessary element of all of its *Section 2* claims — namely, that Facebook has monopoly power in the market for Personal Social Networking (PSN) Services. The Complaint contains nothing on that score save the naked allegation that the company has had and still has a "dominant share of th[at] market (in excess of 60%)." Redacted Compl., ¶ 64. Such an unsupported assertion might (barely) suffice in a *Section 2* case involving a more traditional goods market, in which the Court could reasonably infer that market share was measured by revenue, units sold, or some other typical metric. But this case involves no ordinary or intuitive market. Rather, PSN services are free to use, and the exact metes and bounds of what even constitutes a PSN service — *i.e.*, which features of a company's mobile app or website are included in that definition and which are excluded — are hardly **[**4]** crystal clear. In this unusual context, the FTC's inability to offer any indication of the metric(s) or method(s) it used to calculate Facebook's market share renders its vague "60%-plus" assertion too speculative and conclusory to go forward. Because this defect could conceivably be overcome by re-pleading, however, the Court will dismiss only the Complaint, not the case, and will do so without prejudice to allow Plaintiff to file an **[*5]** amended Complaint. See *Ciralsky v. CIA., 355 F.3d 661, 666-67, 359 U.S. App. D.C. 366 (D.C. Cir. 2004)*.

To guide the parties in the event amendment occurs, this Opinion also explains two further conclusions of law. First, even if the FTC had sufficiently pleaded market power, its challenge to Facebook's policy of refusing interoperability permissions with competing apps fails to state a claim for injunctive relief. As explained herein (and in the Court's separate Opinion in the States' case), there is nothing unlawful about having such a policy in general. While it is possible that Facebook's implementation of that policy as to certain specific competitor apps may have violated *Section 2*, such finding would not change the outcome here: all such revocations of access occurred in 2013, seven years before this suit was filed, and the FTC lacks **[**5]** statutory authority to seek an injunction "based on [such] long-past conduct." *FTC v. Shire ViroPharma, Inc., 917 F.3d 147, 156 (3d Cir. 2019)*. Regardless of whether the FTC can amend its Complaint to plausibly allege market power and advance this litigation, then, the conduct it has alleged regarding Facebook's interoperability policies cannot form the basis for *Section 2* liability. Second, the agency is on firmer ground in scrutinizing the acquisitions of Instagram and WhatsApp, as the Court rejects Facebook's argument that the FTC lacks authority to seek injunctive relief against those purchases. Whether other issues arise in a subsequent phase of litigation is dependent on how the Government wishes to proceed.

Table of Contents

I. Background

A. Social Networking

At the dawn of our century, in the much earlier days of the internet, a number of websites began to offer what came to be known as "social networking" services. See Redacted Compl., ¶ 38. Friendster and Myspace, both launched in 2002, were among the earliest. Id. Although the precise definition of a "Personal Social Networking Service" is disputed (as that is the market in which Facebook has its alleged monopoly), it can be summarized here as one that enables users to virtually connect with others in their network and to digitally share their views and experiences by **[*6]** posting about them in a shared, virtual social space. Id., ¶ 40. For example, users might view and interact with a letter-to-the-editor-style post on politics by a neighbor, pictures from a friend's recent party, or a birth announcement for a newborn cousin. Id.

Perhaps because humans are naturally social, this new way of interacting became hugely popular. Although Myspace and Friendster had an early lead, by 2009 they had been surpassed by a new competitor. Id., ¶¶ 38, 41. Created at Harvard in 2004, "The Facebook," as it was initially called, was a social-networking service initially limited **[**7]** to college students. Id., ¶ 41. Within a few years, it had expanded to the general public (and dropped "The" from its name). Id. By at least 2011, it was the dominant player in personal social networking. Id., ¶ 62. Today, the FTC alleges, its flagship product, Facebook Blue, has hundreds of millions of users in the United States. Id., ¶ 3. The following details of Facebook's conduct are drawn from the FTC's Complaint, as the Court must consider its allegations true at this stage. The allegations are quite similar, though not identical, to those made by the States in the parallel case and recounted in the Court's companion Opinion.

B. Facebook Blue

Facebook Blue is what its millions of users think of when they think of "Facebook." Generally speaking, using Facebook Blue entails interacting with user-created content — *i.e.*, content created or shared by one's Facebook "friends," id., ¶¶ 40, 89 — or creating content oneself by posting. That is not all that users see or do, however. They may also, for instance, encounter "publisher-created content like news articles . . . and advertisements" in their "news feed." Id., ¶ 54; see also id., ¶¶ 44, 134. Such content can come in text, photo, **[**8]** or video form. Id., ¶ 54. In addition, Facebook users can play games or use other applications built either by Facebook or by third parties. Id., ¶¶ 97, 129. Facebook also offers other services beyond Facebook Blue to its users, such as Facebook Messenger, a free mobile-messaging service. Id., ¶¶ 37, 115.

Unlike most businesses, Facebook charges users no fee; instead, it makes money by selling advertising. Id., ¶¶ 43-51. By leveraging "the vast quantity of user data [it] collects," the company "allows advertisers to target different campaigns and messages to different groups of users." Id., ¶ 44; see also id., ¶ 4. Under this business model, as the Complaint puts it, Facebook "refrain[s] from charging a monetary price . . . to users, relying instead on monetizing user data and engagement through advertising." Id., ¶ 42. Put differently, users exchange their time, attention, and personal data, rather than money, for access to Facebook. That approach has been highly profitable: in 2019, for instance, global advertisers paid Facebook nearly $70 billion, and it made profits of more than $18 billion. Id., ¶¶ 4, 44. To be clear, although Facebook's data-collection and -use practices have **[**9]** been subject to increasing scrutiny, they are not the subject of this action.

C. Alleged Monopoly Maintenance

Instead, this suit alleges that Facebook has violated and is violating the antitrust laws, the focus of which, generally speaking, is to promote and ensure competition. After rising to become the "dominant personal social networking provider in the United States" around 2011, id., ¶ 62, Facebook allegedly made a fateful strategic pivot: rather than competing to provide the best product, it would instead protect its monopoly by leveraging its power to foreclose and forestall the rise of new competitors. Id., ¶¶ 5, 9. In particular, the **[*7]** company's executives saw a substantial threat to Facebook's dominance in the advent of mobile devices — first and foremost, smartphones — capable of accessing the internet. Id., ¶ 70. Although Facebook had mobile functionality, it had been built with websites and desktop or laptop computers in mind and thus "offered a relatively poor experience for mobile users" compared to newer competitors. Id.; see also id., ¶¶ 78-79. Zuckerberg and other Facebook executives fretted over the possibility that other apps might create attractive mobile-native features **[**10]** and then leverage those features into exponential user growth, end-running Facebook's established position. Id., ¶¶ 107-112. Even if such an app was not already providing social-network-like functionality, once it had a big enough base of users, it would still pose a potential threat to Facebook Blue. Id. Facebook executives feared fast-growing mobile-messaging services in particular, nervous that such apps could easily morph into direct competitors by adding social features.

In response to these perceived threats, the company allegedly used its monopoly power to eliminate or destroy competitors in order to maintain its market dominance. Id., ¶¶ 5-9. The FTC claims that this exclusionary conduct had "three main elements." Id., ¶¶ 9, 71. First (and second), Facebook reached deep into its very deep pockets to acquire Instagram and WhatsApp, two promising potential competitors, thereby preventing their emergence as serious rivals. Id., ¶ 71. (Attempts to purchase other competitors such as Snapchat and Twitter were rebuffed. Id., ¶ 73.) Third, it adopted and then enforced policies that blocked rival apps from interconnecting their product with Facebook Blue, thereby both (i) blunting the **[**11]** growth of potential competitors that might have used that interoperability to attract new users, and (ii) deterring other developers from building new apps or features or functionalities that might compete with Facebook, lest they lose access as well. Id., ¶¶ 23-26.

1. *Instagram*

Begin with Insta, as those in the know — *viz.*, our children — refer to it. Launched in late 2010, Instagram was an innovative photo-editing and -sharing app designed for the era of smartphones with built-in cameras. Id., ¶¶ 79-80. Plaintiff alleges that Instagram's photo-sharing app also qualifies as a PSN service, meaning that it was a direct competitor to Facebook Blue. Id., ¶ 63. From the get-go, Instagram's user base grew explosively, eventually attracting the attention of Facebook executives who feared that their own photo-sharing features paled in comparison. Id., ¶¶ 81-85. That disparity gave Instagram a chance to reach a large enough scale to be threatening as a new, mobile- and photo-first social network — whether the firm got there on its own or if, as worried Facebook, it were purchased by a large company like Google or Apple. Id., ¶ 86. After about eighteen months of watching Instagram's rise, Zuckerberg **[**12]** and his team eventually shifted from trying (and failing) to compete to instead trying to buy. Aiming to both neutralize Instagram as a competitor and "integrate" the "mechanics" of its popular photo-sharing features with Facebook Blue in order to forestall the growth of future Instagrams, id., ¶ 91, Zuckerberg offered to purchase the company for $1 billion in April 2012. Id., ¶ 95. Instagram's founders agreed. Id.

As required by the *Hart-Scott-Rodino Act, 15 U.S.C. § 18a*, the FTC reviewed the acquisition prior to closing to assess whether it posed anticompetitive concerns. Whereas most mergers are cleared quickly, in this instance the review took over four months. During that scrutiny, the agency took the rare step of "requir[ing] **[*8]** the submission [by the parties] of additional information or documentary material relevant to the proposed acquisition." *15 U.S.C. § 18a(e)(1)(A)*. Eventually, however, Facebook and Instagram satisfied the agency's concerns, and in August (over four months after the merger was announced), the Commission voted 5-0 to allow it to proceed without any challenge or conditions. See FTC, FTCCloses its Investigation into Facebook's Proposed Acquisition of Instagram Photo Sharing Program (Aug. 22, 2012), **[**13]** https://bit.ly/3bDa2mp. Although the FTC conveniently omits any mention of this review in its Complaint, the Court may take judicial notice of that public agency action. See *Pharm. Rsch. & Manufacturers of Am. v. U.S. Dep't of Health & Hum. Servs., 43 F. Supp. 3d 28, 33 (D.D.C. 2014)*; *Herron v. Fannie Mae, No. 10-943, 2012 U.S. Dist. LEXIS 206057, 2012 WL 13042852, at *1 (D.D.C. Mar. 28, 2012)*.

With Instagram safely in the fold, Facebook scaled back and eventually shut down its own mobile photo-sharing app. See Redacted Compl., ¶ 98. Internal emails cited by the Complaint reveal that it also fretted less about competition from other similar apps, since its ownership of Instagram meant it now "effectively dominate[d] photo sharing." Id., ¶ 99. As time went on, Facebook also limited Facebook Blue's promotion of the technically separate Instagram app and website, allegedly to avoid Instagram's "cannibalizing" user engagement on its flagship service. Id., ¶¶ 102-04. All this post-acquisition conduct, the FTC claims, confirms that Facebook's executives saw, and continue to see, Instagram as a significant competitive threat in the social-networking arena. Id., ¶ 102.

2. *WhatsApp*

The other high-profile acquisition Plaintiff focuses on here involves not a competitor in the PSN market, like Instagram, but a company that might quickly become one. As noted above, Facebook's executives saw mobile-native apps in **[**14]** general as a threat. They were particularly concerned with internet-based, so-called "over-the-top mobile messaging services" such as WhatsApp. Id., ¶ 107. Since 2011, OTT messaging services have grown astronomically in use while SMS or MMS messaging (the kind of classic texting that relies on cellular networks rather than internet) has stagnated. Id. Even though mobile messaging services did not directly compete with Facebook Blue (as they are not PSN services), Facebook feared that such apps might well become competitors in the future; given the ubiquity of text messaging in modern life, a widely adopted messaging app could leverage its network effects to transition into a "mobile-first social network" by adding functions such as "gaming platforms, profiles, and news feeds." Id., ¶ 111; see id., ¶¶ 108-112.

Facebook executives saw WhatsApp as the most potent threat among mobile-messaging services. Id., ¶ 113. Launched in 2009, it had approximately 450 million active users worldwide five years later and was growing exponentially thanks to its superior product. Id., ¶¶ 113-18. Zuckerberg and his team hoped that their Facebook

Messenger app, released in 2011, would compete. Id., ¶¶ 115-16. **[**15]** But as WhatsApp continued to thrive and expand, Facebook instead resolved to try to buy it. Id., ¶ 120. After being initially rebuffed in late 2012, id., ¶ 121, that tactic found success in February 2014, when the two companies agreed on a purchase price of $19 billion. Id. The transaction was also subject to Hart-Scott-Rodino Act pre-merger review, see *15 U.S.C. § 18a*, but the FTC, once again, did not block it.

Since acquiring WhatsApp, the agency alleges, Facebook has "kept [it] cabined to providing mobile messaging services rather than allowing" it to grow into a standalone **[*9]** PSN service. See Redacted Compl., ¶ 126. As with Instagram, Facebook has also limited its promotion of WhatsApp on its other services in the United States. Id. It follows, Plaintiff further claims, that "Facebook's monopolization" via both its WhatsApp and Instagram acquisitions "is ongoing," as it both "continues to hold and operate [the two companies], which neutralizes their direct competitive threats to Facebook," and "continues to keep them positioned to provide a protective 'moat' around its [PSN] monopoly." Id., ¶ 76.

3. *Interoperability Permissions*

a. Facebook Platform

Not long after it expanded to the general public, Facebook **[**16]** released "Facebook Platform," a set of tools that allowed software developers to create interoperability between their products and Facebook Blue. Id., ¶ 129. As initially launched, Platform "encouraged software developers to build an entire ecosystem of apps and tools" that would be displayed and used within the Facebook website itself. Id. Such apps "rang[ed] games and page design tools to video-sharing tools and e-marketing apps." Id. (The States' Complaint in the parallel case refers to these apps as "canvas" apps. See No. 20-3589, ECF No. 4 (State Redacted Compl.), ¶ 190.) Such apps would make money by allowing users to purchase virtual goods or items within the app on a "freemium" model or via ad sales.

Three years later, in 2010, Facebook added new functionalities to Platform that expanded its reach off the Facebook site itself. These tools — called application programming interfaces or APIs — created mechanisms for sharing data between Facebook and other, freestanding third-party apps. See Redacted Compl., ¶ 130. One important API that Facebook offered to developers was the "Find Friends" API, id., which enabled third-party apps to allow Facebook account holders to find and **[**17]** connect with Facebook friends within their separate apps, or to invite Facebook friends to join that app. Id. For instance, when first starting to use an independent chess app — *i.e.*, an app used separately as opposed to on the Facebook site itself — a user with a Facebook account could nonetheless search within the app for other Facebook friends already using it, or invite them to join via Facebook, all without leaving the app. Another API allowed Facebook users to sign into third-party websites or apps using their Facebook log-in credentials. Id., ¶¶ 144, 154.

Facebook went even further in that direction later in the year when it launched its Open Graph API. Id., ¶ 131. Open Graph allowed third-party apps and websites to essentially integrate pieces of Facebook within their own service; for instance, apps could install the famous "Like" button, which, if clicked, would share a user's "like" on the user's Facebook profile. Id. Users could do this without even navigating away from the third-party service. Id., ¶¶ 131, 134. A user reading an article on WashingtonPost.com, for instance, could now like an article directly on-site and further choose to post a link of the article to the **[**18]** user's Facebook profile. This sort of integration was, unsurprisingly, massively popular among app developers. "By July 2012, Open Graph was being used to share nearly one billion pieces of social data each day to Facebook Blue, giving Facebook substantially greater and richer information about its users and their online activities." Id., ¶ 132.

According to Plaintiff, Facebook benefited significantly from its Platform program and open APIs. The company garnered goodwill and continued to increase its growth and user engagement. Id., ¶¶ 133-34. It also obtained access to a massive new trove of off-site user data. Id., ¶ 134. **[*10]** Third-party app developers likewise gained, improving the quality of users' experience by integrating social functionality and benefiting from Facebook's sizeable network of highly engaged users. Id., ¶¶ 132-33. Users, too, presumably enjoyed the increased efficiency and convenience.

b. Conditioning Access

Nonetheless, Facebook eventually began to use the power of its Platform tools over the growth trajectory of nascent apps to "deter and suppress competitive threats to its personal social networking monopoly." Id., ¶ 136. Specifically, the FTC alleges, the company **[**19]** adopted policies under which its APIs would be "available to developers only on the condition that their apps" did not compete with Facebook Blue (or Facebook Messenger). Id. The company then enforced those policies against "apps that violated the[] conditions by cutting off their use of commercially significant APIs." Id.

Facebook announced the first iteration of these policies in July 2011, alerting developers that going forward, "Apps on Facebook [could] not integrate, link to, promote, distribute, or redirect to any app on any other competing social platform." Id., ¶ 139. This policy, by its terms, applied only to "[a]pps on Facebook" — *i.e*, the "canvas" apps described above that could only be accessed and used on the Facebook website itself. Id. Put differently, this initial policy did not affect the sort of freestanding, independent apps discussed above, such as our chess app or the Washington Post app. It was not until later that Facebook "imposed several other policies restricting" freestanding apps' "use of Facebook Platform, including [the] APIs" just discussed. Id., ¶ 141. The first of those additional policies, announced in 2012, prohibited developers from "us[ing] Facebook **[**20]** Platform to export [Facebook] user data into a competing social network without our permission." Id., ¶ 142. The next year, Facebook went further by instructing developers that their apps could "not use Facebook Platform to promote, or to export user data to, a product or service that replicates a core Facebook product or service without our permission." Id., ¶ 143.

Armed with these policies, Facebook then enforced them by cutting off API access to certain apps. As Plaintiff describes it, those cutoffs were "generally directed against apps in three groups." Id., ¶ 152. First, Facebook terminated the API access of promising apps that were directly competing with Facebook Blue by providing Personal Social Networking Services, such as Path, a feed-based sharing app that limited the number of friends a user could have to encourage more intimate sharing. Id., ¶ 153. Second, Facebook targeted "promising apps with some social functionality" but which were not yet full-fledged competitors to Facebook Blue. Id., ¶ 154. As examples, the Complaint provides Vine, a video-sharing app owned by Twitter to which Facebook shut down API access in January 2013, and Circle, a "local social network" that **[**21]** had its permissions revoked in December of that year. Id., ¶¶ 154-55. Last, "Facebook blocked mobile messaging apps from using commercially significant APIs"; at one point, in August 2013, it "undertook an enforcement strike against a number" of such apps "simultaneously." Id., ¶ 156.

Each of these revocations of access, the FTC alleges, significantly "hindered the ability of [the targeted] businesses to grow and threaten Facebook's personal social networking monopoly." Id., ¶ 157. During the period in which Circle had Facebook API access, for example, it was growing at a rate of 600,000-800,000 users per day; after losing its Facebook interconnections (particularly the Find Friends tool), however, its "daily new users dropped . . . to **[*11]** nearly zero." Id., ¶ 154. Facebook's actions also allegedly "alerted other apps that they would lose access . . . if they, too, posed a threat to Facebook's . . . monopoly," thereby deterring other apps from adding features or functionality that would attract the company's ire. Id., ¶ 158.

There is an important coda to this story, however: Facebook "removed its 'core functionality' restrictions" in December 2018. Id., ¶ 148 (emphasis added). Although the **[**22]** company has not reinstated the policies (or, according to the Complaint, revoked any apps' API access) since that time, the FTC alleges that Facebook "is likely to reinstitute such policies if [public] scrutiny passes." Id., ¶¶ 149, 172.

D. Procedural History

The FTC filed this action on December 9, 2020, asserting that the above conduct amounts to one count of monopoly maintenance under *Section 2* of the *Sherman Act*. Id., ¶¶ 169-73. Unlike the States, the agency does not also allege a violation of *Section 7* of the *Clayton Act*, which prohibits acquisitions that will substantially decrease competition. ***HN1***[] Plaintiff brings this suit under *Section 13(b) of the FTC Act*, which authorizes it to seek an injunction against an entity that "is violating" or "is about to violate" the antitrust laws, including *Section 2*. See *15 U.S.C. § 53(b)*. It hopes to procure an injunction aimed at preventing such conduct in the future as well as an order mandating "divestiture of assets, divestiture or reconstruction of businesses (including, but not limited to, Instagram and/or WhatsApp), and such other relief sufficient to restore the competition that would exist absent the conduct alleged in the Complaint." Redacted Compl. at 51.

This case was initially **[**23]** assigned to Judge Christopher R. Cooper of this district. As noted above, however, a number of State Plaintiffs filed a very similar suit against Facebook just before this action was filed. That case, No. 20-3589, was assigned to this Court. Pursuant to Local Rule 40.5(c)(2), which governs related cases, Judge Cooper was required to reassign this action to this Court because it presides over the earlier-filed State case. See No. 20-3590, Minute Order of Jan. 12, 2021.

Facebook has now moved to dismiss both actions. See ECF No. 56 (MTD FTC); No. 20-3589, ECF No. 114 (MTD States). While the cases could be consolidated, the Court believes that clarity will be enhanced by resolving the two Motions to Dismiss in separate, contemporaneously issued Opinions. As explained in its separate Opinion, it will grant the Motion to Dismiss the States' entire case. See Mem. Op., No. 20-3589. By contrast, the Court here will dismiss only the Complaint, not the case, leaving the agency the chance to replead if it believes it can successfully remedy the infirmities described below.

II. Legal Standard

Facebook moves to dismiss this action under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim upon which relief can be granted. See MTD FTC at 1. **[**24]** ***HN2***[] In evaluating such Motion to Dismiss, the Court must "treat the complaint's factual allegations as true . . . and must grant plaintiff 'the benefit of all inferences that can be derived from the facts alleged.'" *Sparrow v. United Air Lines, Inc., 216 F.3d 1111, 1113, 342 U.S. App. D.C. 268 (D.C. Cir. 2000)* (quoting *Schuler v. United States, 617 F.2d 605, 608, 199 U.S. App. D.C. 23 (D.C. Cir. 1979)*). Although "detailed factual allegations" are not necessary to withstand a *Rule 12(b)(6)* motion, *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face,'" **[*12]** *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*) — that is, the facts alleged in the complaint "must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*. The Court need not accept as true, then, "a legal conclusion couched as a factual allegation," *Trudeau v. FTC, 456 F.3d 178, 193, 372 U.S. App. D.C. 335 (D.C. Cir. 2006)* (quoting *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*), nor "inferences . . . unsupported by the facts set out in the complaint." Id. (quoting *Kowal v. MCI Commc'ns Corp., 16 F.3d 1271, 1276, 305 U.S. App. D.C. 60 (D.C. Cir. 1994)*). And it may consider not only "the facts alleged in the complaint," but also "any documents either attached to or incorporated in the complaint[,] and matters of which [courts] may take judicial notice." *Equal Emp't Opportunity Comm'n v. St. Francis Xavier Parochial Sch., 117 F.3d 621, 624, 326 U.S. App. D.C. 67 (D.C. Cir. 1997)*.

III. Analysis

HN3[] The offense of monopoly maintenance under *Section 2* of the *Sherman Act* "has two elements: '(1) the possession of monopoly power in the relevant market and (2) the willful . . . maintenance of that power as distinguished from **[**25]** growth or development as a consequence of a superior product, business acumen, or historic accident.'" *United States v. Microsoft Corp., 253 F.3d 34, 50, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*). This second element is usually referred to by the shorthand of "anticompetitive" or "exclusionary conduct." *Id. at 58*. Facebook, in seeking dismissal, contends that the Complaint does not allege facts establishing either element. The Court agrees that the first — the possession of monopoly power in the market for Personal Social Networking Services (as defined by the agency) — is not adequately pleaded here. No more is needed to conclude that the Complaint must be dismissed.

To promote clarity and efficiency going forward in the event Plaintiff amends its Complaint, however, the Court will also address two other issues in this Opinion. Both pertain to *Section 13(b) of the FTC Act*, which the agency relies on to seek an injunction here, and which authorizes such relief only where the defendant "is violating, or is about to violate," the antitrust laws. See *15 U.S.C. § 53(b)*. First, to the extent that Facebook's Platform-related conduct is actionable, it occurred nearly eight years ago, rendering an injunction under *Section 13(b)* unavailable as a matter of law. Second, and on the other hand, *Section 13(b)* does allow the FTC **[**26]** to challenge Facebook's acquisitions of Instagram and WhatsApp, contrary to the company's contention otherwise.

A. Monopoly Power

Begin with the linchpin of this Opinion: whether the FTC has plausibly alleged, as it must, that Facebook exercises monopoly power. ***HN4***[] As explained by the Circuit in Microsoft, monopoly power is the "the power to control prices or exclude competition," such that a firm is a monopolist "if it can profitably raise prices substantially above the competitive level." *253 F.3d at 51* (citations omitted). Where a plaintiff can provide direct proof that a "firm has in fact profitably done so, the existence of monopoly power is clear." Id. Because such proof is rare, however, plaintiffs and courts usually search for indirect or "circumstantial evidence" of monopoly power by inferring it from "a firm's possession of a dominant share of a relevant market." Id.; see also *Toys "R" Us, Inc. v. FTC, 221 F.3d 928, 937 (7th Cir. 2000)* (noting that market power can be proven **[*13]** "through direct evidence of anticompetitive effects" or, "more conventional[ly]," "by proving relevant product and geographic markets and by showing that the defendant's share exceeds [some] threshold"); S. *Pac. Commc'ns Co. v. Am. Tel. & Tel. Co., 740 F.2d 980, 1000, 238 U.S. App. D.C. 309 (D.C. Cir. 1984)* ("[C]ourts frequently approach the problem of measuring market power by **[**27]** defining the relevant product and geographic market and computing the defendant's market share. Monopoly power is then ordinarily inferred from a predominant share of the market."). Because "[m]arket power is meaningful only if it is durable," a plaintiff proceeding by the indirect method of providing a relevant market and share thereof must also show that there are "barriers to entry" into that market. *Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 762 F.3d 1114, 1123-25 (10th Cir. 2014)*; *Microsoft, 253 F.3d at 51* (explaining that defendant's "share of a relevant market" must be "protected by entry barriers," defined as "factors . . . that prevent new rivals from timely responding to an increase in price above the competitive level").

Although the FTC briefly suggests in its Opposition that it can offer direct proof of market power, see ECF No. 59 (FTC Opp.) at 8, it spends nearly its entire brief arguing why it has sufficiently pleaded indirect proof — *viz.*, that Facebook has a dominant share of a relevant product and geographic market (the United States market for Personal Social Networking Services) protected by entry barriers. Id. at 8-19. Because the agency thus makes no real direct-proof argument, the Court will analyze the Complaint's market-power allegations using the indirect framework. **[**28]** Again, that framework first requires the plaintiff to "establish[] the relevant market" in which the defendant firm allegedly has monopoly power. *Sky Angel U.S., LLC v. Nat'l Cable Satellite Corp., 947 F. Supp. 2d 88, 102 (D.D.C. 2013)* (quoting *Neumann v. Reinforced Earth Co., 786 F.2d 424, 429, 252 U.S. App. D.C. 11 (D.C. Cir. 1986)*). ***HN5***[] It then demands that a plaintiff establish that the defendant has a dominant share of that market protected by entry barriers. Id.; see, e.g., *FTC v. AbbVie Inc., 976 F.3d 327, 373-74 (3d Cir. 2020)* (above 60% market share sufficient); *Image Tech. Servs. v. Eastman Kodak Co., 125 F.3d 1195, 1206 (9th Cir. 1997)* ("Courts generally require a 65% market share to establish a prima facie case of market power."). As the Court explains below, it is the market-share step that trips up the FTC here.

1. *Market Definition*

a. Legal Framework

HN6[] Although the definition of a relevant antitrust market is typically a "factual" rather than a "legal" inquiry, certain "legal principles" nevertheless govern. *Newcal Indus., Inc. v. Ikon Off. Sol., 513 F.3d 1038, 1045 (9th Cir. 2008)*. An antitrust market includes "two components: the product market and the geographic market." *Sky Angel, 947 F. Supp. 2d at 102*. Because the parties do not dispute here that the geographic market — that is, "the terrain in which competition takes place," *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1071 (10th Cir. 2013)* — is the United States, see FTC Opp. at 10, the only issue is the "[t]he outer boundaries of [the relevant] product market" in which Facebook operates. *Sky Angel, 947 F. Supp. 2d at 102* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*).

HN7[] "A 'relevant product market' is a term of art in antitrust analysis," United States v. H&R Block, Inc., 833 F. Supp. 2d 36, 50 (D.D.C. 2011), and is defined as "all **[**29]** products reasonably interchangeable by consumers for the same purposes." Microsoft, 253 F.3d at 52. "Because the ability of **[*14]** consumers to turn to other suppliers restrains a firm from raising prices above the competitive level," id. at 51, the analysis of market power (which simply means the power to do just that) must use, as its denominator, all products "roughly equivalent to another for the use to which [they are] put." Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 437 (3d Cir. 1997) (citation omitted). "In other words, courts look at whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other." H&R Block, 833 F. Supp. 2d at 51 (citation omitted). At bottom, products that are sufficiently interchangeable compete with each other in the relevant legal sense. See Hicks v. PGA Tour, Inc., 897 F.3d 1109, 1120 (9th Cir. 2018).

Unsurprisingly, many "case[s] hing[e]" on this fight over what is included in this denominator. See, e.g., FTC v. Staples, Inc., 970 F. Supp. 1066, 1073 (D.D.C. 1997) (considering whether product market includes only "consumable office supplies" such as paper, pens, and post-it notes, or instead all office products, including computers, office furniture, and fax machines); H&R Block, 833 F. Supp. 2d at 50 (considering whether product market includes only "digital do-it-yourself tax preparation products" or instead includes "all tax preparation methods," **[**30]** including professional assistance and do-it-yourself using pen and paper); FTC v. Swedish Match, 131 F. Supp. 2d 151, 156 (D.D.C. 2000) (considering whether product market includes only loose-leaf chewing tobacco or instead also includes moist snuff).

b. Market-Definition Allegations

The market-definition inquiry in this case is somewhat unusual because, unlike familiar consumer goods like tobacco or office supplies, there is no obvious or universally agreed-upon definition of just what a personal social networking service is. As a result, to discharge its "burden to define the relevant market," Gross v. Wright, 185 F. Supp. 3d 39, 50 (D.D.C. 2016) (citation omitted), the FTC must do two things here. First, it must provide a definition of PSN services (which, obviously, would include at least Facebook Blue). Second, it must further explain whether and why other, non-PSN services available to the public either are or are not reasonably interchangeable substitutes with PSN services. Ultimately, that analysis should demonstrate that Facebook holds a dominant share of a market that includes such substitutes, if any.

On the first point, the agency explains that PSN services are "online services that enable and are used by people to maintain personal relationships and share experiences with friends, family, **[**31]** and other personal connections in a shared social space." Redacted Compl., ¶ 52. Such services are allegedly defined, and distinguished, by their having "[t]hree key elements." Id. "First, [they] are built on a social graph that maps the connections between users and their friends, family, and other personal connections." Id., ¶ 53. "Second, [they] include features that many users regularly employ to interact with personal connections and share their personal experiences in a shared [virtual] social space, including in a one-to-many 'broadcast' format." Id., ¶ 54. And "[t]hird, [they] include features that allow users to find and connect with other users, to make it easier for each user to build and expand their set of personal connections. The social graph also supports this feature by informing [the user] which [new] connections" might be available based on her existing network. Id., ¶ 55.

Having defined PSN services, Plaintiff then alleges that there are in fact no "other types of internet services" that are "adequate **[*15]** substitutes." Id., ¶ 57. It buttresses that conclusion by explaining why four different kinds of arguably comparable online services are not "reasonably interchangeable" **[**32]** with PSN services. Id., ¶ 58. First, "specialized social networking services" that "focus on professional . . . connections" (*e.g.*, LinkedIn) are not substitutes because they are designed for and used primarily by professionals for sharing professional content. Id., ¶ 58. They therefore would not be used, as PSN services are, to "maintain personal relationships and share experiences with friends, family, and other personal connections." Id., ¶ 52. The same is true, alleges the FTC, for "interest-based" social-networking services such as Strava (which relates to physical exercise). Id., ¶ 58. The agency also pleads that PSN services are not reasonably interchangeable with services that allow for consuming and sharing video or audio content, such as YouTube, Spotify, Netflix, or Hulu. Id., ¶ 59. That is because users of such services mostly consume such content passively or share content created by others (rather than content they have created), and such sharing, where it occurs, is not to the user's network of personal connections but rather to a general and wide audience of unknown users. Id. In such a setting, users do not usually "communicate with friends, family, and other personal **[**33]** connections," which is the hallmark of a PSN service. Id. Finally, Plaintiff explains that "mobile messaging services" cannot be substituted for PSN services because the former (i) lack a "shared social space" for interaction and (ii) do not employ a social graph to facilitate users' finding and "friending" other users they may know. Id., ¶ 60. Zuckerberg himself has colorfully explained one key difference in use that allegedly flows from these disparate features: a PSN service is "the digital equivalent of a town square," whereas a mobile messaging service is "the digital equivalent of [a] living room." Id.

According to the FTC, then, the relevant market here thus includes PSN services — such as Facebook Blue, Instagram, and Path, id., ¶¶ 63, 153 — and no other kinds of services.

c. Analysis

On this issue, Facebook contends that, for a number of reasons, Plaintiff's allegations regarding market definition fall short of the pleading-stage requirement that such "alleged product market . . . be plausible." *Sky Angel, 947 F. Supp. 2d at 103* (quoting *Todd v. Exxon Corp., 275 F.3d 191, 200 (2d Cir. 2001)*). While there are certainly bones that one could pick with the FTC's market-definition allegations, the Court does not find them fatally devoid of meat.

First, Facebook contends **[**34]** that the FTC's Complaint contains an internal contradiction: its market definition appears to exclude services like Circle and Vine, yet one of the core allegations in this case is that Facebook's revocation of API permissions from those apps was anticompetitive. See MTD FTC at 14-15. Both cannot be true, Defendant insists. As the FTC explains in response, though, the D.C. Circuit rejected exactly this argument in *Microsoft*. There, Microsoft argued that the district court had been wrong to exclude "middleware" software from the relevant product market for computer operating systems because much of the Government's *Section 2* case turned on "Microsoft's attempts to suppress middleware's threat to its operating system monopoly." *253 F.3d at 54*. The Circuit explained that "no contradiction exist[ed]," as middleware was still a "nascent" threat even though it was not yet competing directly in Microsoft's operating-system market, and "[n]othing in *§ 2* of the *Sherman Act* limits its prohibition to actions taken against **[*16]** threats that are already well-developed enough to serve as present substitutes." Id. So too here: actions taken against Vine and Circle may have been anticompetitive even though those firms were not **[**35]** Facebook Blue's competitors in a properly drawn product market.

Second, Defendant maintains, the FTC has neglected to allege any facts regarding the "cross-elasticity of demand between [PSN services] and [potential] substitutes for it." *Sky Angel, 947 F. Supp. 2d at 103* (citation omitted); see MTD FTC at 11-12. ***HN8***[] Cross-elasticity of demand is a measure of the degree to which "the rise in the price of [one] good] . . . would tend to create a greater demand for other like goods." *Queen City Pizza, 124 F.3d at 437-38* & n.6. It is thus one "measure of reasonable interchangeability." *Id. at 438 n.6*. There is no authority, however, supporting Facebook's argument that Plaintiff must plead specific facts regarding the price or non-price terms under which PSN-service users would switch (if ever) to alternatives. Instead, at this stage the FTC may permissibly plead that certain "factors" of both the service at issue and its potential substitutes — *e.g.*, their "price, use[,] and qualities" — render them not "reasonably interchangeable" in the eyes of users. *Tunis Bros. Co., Inc. v. Ford Motor Co., 952 F.2d 715, 722 (3d Cir. 1991)*; see, e.g., *RealPage, Inc. v. Yardi Sys., Inc., 852 F. Supp. 2d 1215, 1225 (C.D. Cal. 2012)* (denying motion to dismiss where complaint explained in qualitative terms why certain "conceivably interchangeable substitutes" were not "specialized to the needs" of defendant's customers); *CollegeNet, Inc. v. Common Application, Inc., 355 F. Supp. 3d 926, 958 (D. Or. 2018)* (same where complaint **[**36]** alleged that product's "distinct features" made it such that customers "would not turn to [alternatives] in response to" price increase); see also Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** vol. IIB, ¶ 531f, at 252 & n.24 (4th ed. 2014) (suggesting only that "some detail about lack of interchangeability should be given" in complaint). That is what the agency has done here, albeit in a somewhat lean fashion. See Redacted Compl., ¶¶ 58-60.

Defendant next directly takes aim at the FTC's allegation that users of PSN services would not switch, if prodded by a price increase or quality decrease in a PSN service, to other means of communicating and sharing with their personal connections that lack a "connection-finder" built on the user's social graph (the third leg of the agency's definition of a PSN). See MTD FTC at 17-19; see also ECF No. 62 (Reply FTC) at 7. That is implausible, Facebook contends, because it is "obvious that people" also know how to "connect and share with family and friends . . . via many [other] technologies," such as "email, messaging, photo-sharing, and video-chats." MTD FTCat 18 (internal quotation marks omitted). This argument asks the Court to engage **[**37]** in the sort of "deeply fact-intensive inquiry" that is improper at this stage. *E.I. du Pont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 443-44 (4th Cir. 2011)* (quoting *Todd, 275 F.3d at 200*). Although open to dispute, the agency's allegation that users view services with and without a social-graph-based connection-finder as fundamentally different and non-interchangeable is "at least . . . theoretically rational," *Bayer Schering Pharma AG v. Sandoz, Inc., 813 F. Supp. 2d 569, 577 (S.D.N.Y. 2011)* (citation omitted), and thus hardly "facially unsustainable," *RealPage, 852 F. Supp. 2d at 1224*, or "untenable on its face." *Suture Exp., Inc. v. Cardinal Health 200, LLC, 963 F. Supp. 2d 1212, 1222 (D. Kan. 2013)*. This is therefore not one of the "relatively rare" cases of a "glaring deficienc[y]" in the market-definition pleadings that renders dismissal **[*17]** at the 12(b)(6) stage appropriate. *Kolon Indus., 537 F.3d at 444*.

Facebook's final fruitless market-definition argument is that the Complaint impermissibly distinguishes PSN services from other possible substitutes based on their "primar[y] uses." MTD FTC at 19. The company asserts that the question is whether other services "can perform the same function[s]" as PSN services, not whether they are primarily used that way. Id. (quoting and adding emphasis to *Cupp v. Alberto-Culver USA, Inc., 310 F. Supp. 2d 963, 970 (W.D. Tenn. 2004)*). That misstates the law. ***HN9***[] The analysis looks to both "whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other." *H&R Block, 833 F. Supp. 2d at 51* (emphasis **[**38]** added); see also *United States v. Aetna Inc., 240 F. Supp. 3d 1, 19 (D.D.C. 2017)* (asking "whether there are other products offered to consumers which are similar in character or use, and how far buyers will go to substitute one commodity for another") (emphasis added). It is for this reason that pen-and-paper do-it-yourself tax prep and assisted tax prep could be outside the market for digital do-it-yourself tax-prep services despite both providing the same basic function, *H&R Block, 833 F. Supp. 2d at 54*, and that Medicare Advantage plans and Original Medicare plans could constitute distinct product markets despite both being capable of providing healthcare insurance to seniors. *Aetna, 240 F. Supp. 3d at 19, 41*. All Plaintiff must do at this stage is provide a "plausible explanation as to why" users would not switch, even if they technically could, from PSN services to other services if prompted by a price hike. *Todd, 275 F.3d at 200*; cf. *Concord Assocs., L.P. v. Ent. Properties Tr., 817 F.3d 46, 54 (2d Cir. 2016)* (requiring "a plausible basis for explaining why [a proffered distinction] makes the difference" to consumers). While the agency certainly could have provided more on that front, the fact that other services are not primarily used for the sort of personal sharing that is the hallmark of a PSN service seems a plausible reason why little switching would occur. Whether due to network effects or **[**39]** the norms around what sort of content is generally posted on different platforms, it is not a stretch to imagine that users are reluctant to share a highly personal milestone on LinkedIn or post a video of their child's first steps to YouTube.

2. *Market Share*

Although the Court therefore finds that the Complaint's allegations do enough to make out a plausible market for PSN services, that hardly ends the analysis. ***HN10***[] After all, while courts typically evaluate market definition and market share separately, the two inquiries ultimately come together to produce the conclusion that matters: the defendant's market power. See *Cupp, 310 F. Supp. 2d at 971, 975*. That point can be lost if courts "compartmentalize the two issues" and examine the sufficiency of a plaintiff's market-share showings without looking back to how convincingly, or "how tenuously," the market has been defined. See Areeda & Hovenkamp, ¶ 531, at 257. Particularly where "the market is idiosyncratically drawn," the treatise authors explain, findings or allegations as to a "particular 'market share' carr[y] much less meaning." Id.

This case, at least as pleaded by the FTC, exemplifies that principle. Although the Court, as just explained, finds the contours of **[**40]** the asserted product market plausible, the Complaint is undoubtedly light on specific factual allegations regarding consumer-switching preferences. Given that thin showing, and the fact that the PSN-services product market is somewhat "idiosyncratically drawn" to begin **[*18]** with, the Court must demand something more robust from Plaintiff's market-share allegations. As it happens, however, those allegations are even more tentative: the FTC alleges only that Facebook has "maintained a dominant share of the U.S. personal social networking market (in excess of 60%)" since 2011, see Redacted Compl., ¶ 64, and that "no other social network of comparable scale exists in the United States." Id., ¶ 3. That is it. These allegations — which do not even provide an estimated actual figure or range for Facebook's market share at any point over the past ten years — ultimately fall short of plausibly establishing that Facebook holds market power. Given that finding, the court need not address the issue of whether the FTC has sufficiently alleged entry barriers.

Off the bat, there is ample authority that the FTC's bare assertions would be too conclusory to plausibly establish market power in any context. **[**41]** See *Synthes, Inc. v. Emerge Med., Inc., No. 11-1566, 2012 U.S. Dist. LEXIS 140251, 2012 WL 4473228, at *11 (E.D. Pa. Sept. 28, 2012)* (allegation that defendant "is a monopoly . . . with over 50% market share" was a "threadbare recital unsupported by factual allegations [that] the Court need not accept . . . as true"); *Syncsort Inc. v. Sequential Software, Inc., 50 F. Supp. 2d 318, 330 (D.N.J. 1999)* ("Here, [plaintiff] recited in conclusory fashion that [defendant] 'controls the majority of the [relevant] market.' . . . [T]his single statement of market power in the pleadings . . . is an insufficient allegation of the possession of monopoly power."); *Korea Kumho Petrochemical v. Flexsys Am. LP, No. 07-1057, 2008 U.S. Dist. LEXIS 68559, 2008 WL 686834, at *9 (N.D. Cal. Mar. 11, 2008)* (holding that "[a]lthough [p]laintiff need not necessarily quantify [defendant's] market share with precision," allegation that defendant "domina[ted] . . . the [relevant] market" fell short of requirement to "assert some facts in support of its assertions of market power"); *EuroTec Vertical Flight Sols., LLC. v. Safran Helicopter Engines S.A.A., No. 15-3454, 2019 U.S. Dist. LEXIS 129084, 2019 WL 3503240, at *3 (N.D. Tex. Aug. 1, 2019)* (noting that bare allegation of "market share of over 50 percent" was "conclusory"); *Sherwin-Williams Co. v. Dynamic Auto Images, Inc., No. 16-1792, 2017 U.S. Dist. LEXIS 174303, 2017 WL 3081822, at *7 (C.D. Cal. Mar. 10, 2017)* ("[Claimants'] allegation that [firm] maintains a 'a stranglehold in the automotive paint industry' is . . . conclusory" and thus "lacks sufficient detail for the Court to plausibly infer . . . sufficient market power."). It is hard to imagine a market-share allegation that is much more conclusory than the FTC's here.

Even accepting that merely alleging market share "in excess of 60%" **[**42]** might sometimes be acceptable, it cannot suffice in this context, where Plaintiff does not even allege what it is measuring. Indeed, in its Opposition the FTC expressly contends that it need not "specify which . . . metrics . . . [or] 'method' [it] used to calculate Facebook's [market] share." FTC Opp. at 18. In a case involving a more typical goods market, perhaps the Court might be able to reasonably infer how Plaintiff arrived at its calculations — *e.g.*, by proportion of total revenue or of units sold. See U.S. Dep't of Justice & FTC, Horizontal Merger Guidelines § 5.2 (2010) (suggesting these to be the typical methods). As the above market-definition analysis underscores, however, the market at issue here is unusual in a number of ways, including that the products therein are not sold for a price, meaning that PSN services earn no direct revenue from users. The Court is thus unable to understand exactly what the agency's "60%-plus" figure is even referring to, let alone able to infer the underlying facts that might substantiate it.

[*19] Rather than undergirding any inference of market power, Plaintiff's allegations make it even less clear what the agency might be measuring. The overall **[**43]** revenues earned by PSN services cannot be the right metric for measuring market share here, as those revenues are all earned in a separate market — *viz.*, the market for advertising. See Redacted Compl., ¶ 164; see also, e.g., id., ¶ 101 (noting that prior to its acquisition, in addition to competing in the PSN services market, "Instagram also planned and expected to be an important advertising competitor" to Facebook). Percent of "daily users [or] monthly users" of PSN services — metrics the Complaint mentions offhandedly, see Redacted Compl., ¶¶ 3, 97 — are not much better, as they might significantly overstate or understate any one firm's market share depending on the various proportions of users who have accounts on multiple services, not to mention how often users visit each service and for how long.

What about the share of total time spent by users on PSN services? Plaintiff says nothing about that metric in its Complaint. And although it seems tenable at first glance, that metric may also be of limited utility. That is because at least some of the features offered by a Facebook or Instagram or Path are not, seemingly, part of those firms' PSN-services offerings as defined by the **[**44]** FTC; time spent on those apps or websites, accordingly, is not necessarily time spent on a PSN service. The Commission, for instance, expressly alleges that social-networking services based on "interest-based . . . connections" such as Strava are not, by its definition, PSN services. Id., ¶ 58. That definition of what is in the market, perhaps counterintuitively to Facebook users, would mean that time a user spends engaging with specific interest-based Facebook pages or groups may not qualify as time spent on a PSN service. The same problem arises when a user "passive[ly] consum[es]" "online video" on a PSN service. Id., ¶ 59. To the extent that, say, Instagram users spend their time on the site or app watching a comedy routine posted by the official page of a famous comedian, are they spending time on a PSN service? If not, as the Complaint suggests is the case, id., then time spent "on Facebook" or "on Instagram" bears an uncertain relationship to the actual metric that would be relevant: time spent using their PSN services in particular. Put another way, the uncertainty left open by the Complaint as to exactly which features of Facebook, Instagram, *et al.* do and do not constitute **[**45]** part of their PSN services, while not necessarily rendering the alleged PSN-services market implausible, compounds the trouble created by the FTC's vaguer-still allegations regarding Facebook's share of that market.

Nor do the difficulties stop there. Readers may well have noticed that the discussion to this point has consistently referred to Instagram and Facebook as examples of PSN services. That is because, outside of Path, Myspace, and Friendster, all of which seem to be long defunct or quite small, see id., ¶¶ 38, 41, 153, Plaintiff's Complaint does not identify any other providers of PSN services. Yet the FTC is apparently unwilling to allege that Facebook has ever (pre- or post-Instagram acquisition) had something like 85% or even 75% market share; instead it hedges by offering only that the number is somewhere north of 60%. The question naturally arises: which firms make up the remaining 30-40%? Cf. *Cupp, 310 F. Supp. 2d at 971* ("Without a[n] . . . accounting of the brands and suppliers to be included in the relevant market, the Court cannot determine [its] boundaries . . . . [and] is thus unable to assess Defendants' market power."); *Total Benefits Plan. Agency, Inc. v. Anthem Blue Cross & Blue Shield, 552 F.3d 430, 437 [*20] (6th Cir. 2008)* ("Without an explanation of the other insurance companies involved, **[**46]** and their products and services, the court cannot determine the boundaries of the relevant product market and must dismiss the case for failure to state a claim."). Although Plaintiff is correct that it is not required to identify every alleged competitor in its pleadings, its choice to identify essentially none is striking. Especially when combined with its refusal to offer any clue as to how it calculated its noncommittal market-share number, the Court cannot see how the Commission has "nudged [its market power] claims across the line from conceivable to plausible." *Twombly, 550 U.S. at 570*. Its "complaint must [therefore] be dismissed." Id.

The Court's decision here does not rest on some pleading technicality or arcane feature of ***antitrust law***. ***HN11***[] Rather, the existence of market power is at the heart of any monopolization claim. As the Supreme Court explained in *Twombly*, itself an antitrust case, "[A] district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed." *Id. at 558* (citations omitted). Here, this Court must exercise that power. The FTC's Complaint says almost nothing concrete on the key question of how much power Facebook **[**47]** actually had, and still has, in a properly defined antitrust product market. It is almost as if the agency expects the Court to simply nod to the conventional wisdom that Facebook is a monopolist. After all, no one who hears the title of the 2010 film "The Social Network" wonders which company it is about. Yet, whatever it may mean to the public, "monopoly power" is a term of art under federal law with a precise economic meaning: the power to profitably raise prices or exclude competition in a properly defined market. To merely allege that a defendant firm has somewhere over 60% share of an unusual, nonintuitive product market — the confines of which are only somewhat fleshed out and the players within which remain almost entirely unspecified — is not enough. The FTC has therefore fallen short of its pleading burden.

That said, because it believes that the agency may be able to "cure [these] deficiencies" by repleading, *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*, the Court will dismiss without prejudice only the Complaint, not the entire case, leaving Plaintiff "free to amend [its] pleading and continue the litigation." *Ciralsky, 355 F.3d at 666* (citation omitted) (explaining that dismissal without prejudice of the complaint, as opposed to the case **[**48]**, is not final). Whether and how the agency chooses to do so is up to it.

* * *

While the court could end here, it believes it profitable to provide some guidance to the parties should the case proceed. It thus offers some further legal analysis on two issues raised by the FTC's allegations. For ease of organization, that discussion will "analyze the various" components of the agency's *Section 2* claim — namely, the Platform-policies component and the acquisitions component — "individually," even though Plaintiff technically frames its challenge as an attack on Facebook's overall course of anticompetitive conduct. See *City of Groton v. Connecticut Light & Power Co., 662 F.2d 921, 928-29 (2d Cir. 1981)*. It begins by explaining why, in accord with its analysis in the parallel State case, even assuming that the FTC can establish market power here, its allegations as to Facebook's Platform-related conduct cannot be a basis for injunctive relief under *Section 13(b)*. It then offers the agency some consolation: assuming again that market power can be demonstrated, **[*21]** *Section 13(b)* does, *pace* Facebook, allow the FTC to seek injunctive relief based on the Instagram and WhatsApp acquisitions.

B. Platform Policies

By way of refresher, Plaintiff alleges that Facebook adopted and enforced a number **[**49]** of anticompetitive policies governing the use of its APIs. Most prominently, in 2013 it announced a policy of refusing to allow third-party, freestanding apps (like the chess app or the Washington Post app discussed above) to access those APIs if they "replicate[d] [Facebook's] core functionality" — *i.e.*, if they competed with Facebook Blue. See Redacted Compl., ¶¶ 136, 143. Facebook then enforced that policy against a number of freestanding apps, revoking API permissions after having previously offering them access. Id., ¶¶ 152-56. The FTC, like the States in the parallel action, see Mem. Op., No. 20-3589 at 22, contends that these actions represent unlawful "conditional dealing" or unlawful "refusal[s] to deal" with apps that had their API access revoked or blocked. See FTC Opp. at 31, 33.

This Court, however, agrees with Facebook's bottom-line contention that neither theory offers a viable basis for an injunction under *Section 13(b) of the FTC Act*. That result follows from three conclusions. First, under current antitrust doctrine, Facebook's general policy of refusing to provide API access to its competitors does not itself violate *Section 2*. Second, although specific instances in which **[**50]** Facebook revoked a competitor's API permissions (after previously providing it access) might have violated *Section 2*, the last alleged instance occurred in 2013, so there is no way in which Facebook "is violating" or "is about to violate" the antitrust laws, which is a necessary condition for an injunction under *Section 13(b)*. See *15 U.S.C. § 53(b)*. Third, and more prosaically, Plaintiff has failed to plead facts to support a "conditional dealing" theory. The Court looks at the first two together and then moves to the third.

For those who will consider this Opinion alongside the Court's companion Opinion in the State case, the following "legal framework" section is the same in both. The analysis that follows diverges somewhat given the different legal regimes governing suits by States and suits by the FTC, although the outcome is similar.

1. *Refusal to Deal*

a. Legal Framework

HN12[] The central principle that governs refusal-to-deal claims is that, as a general matter, a monopolist has "the right to refuse to deal with other firms," which includes the right to "refus[e] to cooperate with rivals." *Verizon Commc'ns Inc. v. L. Offs. of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*). That is because "[m]onopolists are both expected and permitted to compete like any other firm," and "[p]art of **[**51]** competing like everyone else is the ability to make decisions about with whom and on what terms one will deal." *Viamedia, Inc. v. Comcast Corp., 951 F.3d 429, 454 (7th Cir. 2020)* (citations omitted). This general no-duty-to-deal rule holds even where a monopolist refuses to deal with its competitor merely "in order to limit entry," *Trinko, 540 U.S. at 407* — in other words, because it wants to prevent that rival from competing with it. See, e.g., *Olympia Equip. Leasing Co. v. W. Union Tel. Co., 797 F.2d 370, 375-76 (7th Cir. 1986)* ("Today it is clear that a firm with lawful monopoly power has no general duty to help its competitors" and thus no duty "to extend a helping hand to new **[*22]** entrants [or] help [rivals] survive or expand . . . ."); *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1074 (10th Cir. 2013)* ("Even a monopolist generally has no duty to share . . . its intellectual or physical property with a rival."); *FTC v. Qualcomm Inc., 969 F.3d 974, 993 (9th Cir. 2020)* ("As the Supreme Court has repeatedly emphasized, there is no duty to deal under the terms and conditions preferred by a competitor's rivals.") (quoting *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 457, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*); *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1184 (9th Cir. 2016)* (rejecting argument that refusal to deal is unlawful because it was motivated by "intent to foreclose competition").

These decisions, to be clear, "are not premised on the view that [monopolist refusals to deal] are incapable of harming competition"; obviously, "refusals to aid new entrants can indeed" have that effect. See Daniel A. Crane, Does Monopoly **[**52]** Broth Make Bad Soup?, 76 Antitrust L.J. 663, 669 (2010). ***HN13***[] Rather, the rule declaring unilateral refusals to deal essentially "per se lawful," id. at 666, or "presumptive[ly] legal[]," *Novell, 731*

F.3d at 1073, rests on three overriding considerations of antitrust policy. First, and most importantly, "[f]irms may acquire monopoly power by establishing an infrastructure that renders them uniquely suited to serve their customers. Compelling such firms to share the source of their advantage is in some tension with the underlying purpose of ***antitrust law***, since it may lessen the incentive for the monopolist, the rival, or both to invest in those economically beneficial facilities." *Trinko, 540 U.S. at 407-08*. Put another way, already large and successful firms "might be deterred from investing, innovating, or expanding . . . with the knowledge [that] anything [they] creat[e] [they] could be forced to share," while "smaller [competitors] might be [similarly] deterred, knowing [they] could just demand the right to piggyback on [their] larger rival." *Novell, 731 F.3d 1073*. That equilibrium would hinder, rather than advance, consumer welfare. See *Olympia Equip. Leasing, 797 F.2d at 379* ("Consumers would be worse off if a firm with monopoly power had a duty to extend positive assistance to new entrants, or having extended it voluntarily a duty **[**53]** to continue it indefinitely."). Second, "compelled sharing puts federal courts in the role of central planners," requiring them to pick and choose the applicable terms and conditions of the forced sharing they would order "despite their being ill-equipped to assume this role." *Aerotec, 836 F.3d at 1183*. Finally, "compelled sharing may actually provide opportunities for collusion" between the monopolist and its rival or rivals. Id. Collusion is "the supreme evil of antitrust," *Trinko, 540 U.S. at 408*, and itself quite "injuri[ous] to consumers and the competitive process alike." *Novell, 731 F.3d at 1073*.

HN14[] Nevertheless, the general no-duty-to-deal rule does have a "narrow-eyed needle" of an exception, *id., at 1074*, traceable to the Supreme Court's decision in *Aspen Skiing*. In that case, the defendant owned three of the four ski resorts in the Aspen, Colorado, market (making it a monopolist), and it had long operated a joint venture with the fourth (a rival mountain) that provided a ticket good for all four. See *472 U.S. at 588-92*. That joint ticket was profitable for both parties and made customers happy. *Id. at 610*. The defendant Aspen Skiing, however, eventually terminated the joint ticket. Plaintiff Highlands "tried a variety of increasingly desperate measures to re-create the joint ticket," **[**54]** including eventually "offering to buy the defendant's tickets at retail price." *Trinko, 540 U.S. at 408-09*. Aspen Skiing refused to **[*23]** even accept those tickets at its resorts. According to the Court, based on these facts, the jury (which had found liability) could have reasonably concluded that Aspen Skiing "was not motivated by efficiency concerns and . . . was [instead] willing to sacrifice short-run benefits and consumer goodwill in exchange for a perceived long-run impact on its smaller rival." *472 U.S. at 610-11*. That, the Court held, was sufficient for *Section 2* liability.

As the case has come to be understood, Aspen Skiing ran afoul of the *Sherman Act* — despite the general no-duty-to-deal rule — because it acted in a predatory fashion, which is to say it deliberately harmed itself (and consumers) in order to harm its competitor more. Consider the analogy of a predatory pricing scheme, in which a firm prices its goods below its costs and below its rivals' costs with the goal of driving those rivals out of the market and leaving it standing alone; such a scheme works where the predatory firm takes advantage of its greater ability to withstand the losses caused by its below-cost pricing. See *Novell, 731 F.3d at 1075* (drawing this comparison); *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (explaining **[**55]** predatory-pricing doctrine). Aspen Skiing was doing something very similar. By terminating a profitable and customer-pleasing joint venture, and refusing to even recreate it by accepting vouchers bought at retail price, it was enduring short-term pain with the exclusive goal of driving its rival (which could not stand that pain) out of the market. The defendant thus lost the usual protection of the general no-duty-to-deal rule, since it had used its general right to choose with whom it deals "as part of a larger anticompetitive enterprise" — *i.e.*, an enterprise aimed at "harming competition," and therefore consumers, "by entrenching a dominant firm and enabling it to extract monopoly rents once the competitor is killed off." *Viamedia, 951 F.3d at 462* (quoting *Novell, 731 F.3d at 1075*) (cleaned up); see also Areeda & Hovenkamp vol. IIIB, ¶ 772d3, at 235.

The "larger anticompetitive enterprise" that characterizes an *Aspen Skiing* violation, crucially, cannot simply be an intent to harm — or, the flip side of the same coin, to avoid helping — a rival or rivals. "In concentrated markets the intent to maintain or improve one's own market position always entails the knowledge that rivals must suffer," and if ***antitrust law*** were to condemn **[**56]** every action taken by a monopolist with the "effect or purpose of limiting competition with itself," there would be little left to the rule that monopolists have no duty to aid their competitors. See Areeda & Hovenkamp, ¶ 772c2, at 220-21. That is why the Supreme Court has described *Aspen Skiing* as "at or near the outer boundary of *§ 2* liability," *Trinko, 540 U.S. at 399*, and "refused to extend liability to various other refusal to deal scenarios." *Novell, 731 F.3d at 1074*; but see *Steward Health Care Sys., LLC v. Blue Cross & Blue Shield of Rhode Island, 311 F. Supp. 3d 468, 483 (D.R.I. 2018)* (arguing that Trinko should not be read as "pulling back the reins on refusal-to-deal claims"). And that is why the touchstone for liability is the sort of predatory design described above: "where the only conceivable rationale or purpose" for the refusal to deal is "to sacrifice short-term benefits in order to obtain higher profits in the long run from the exclusion of competition." *Aerotec, 836 F.3d at 1184* (citation omitted).

Courts have accordingly coalesced around a three-part test for unlawful refusals to deal, drawn from Aspen Skiing's particular facts and aimed at sniffing out **[*24]** predation while avoiding over-inclusiveness. ***HN15***[] First, "there must be a preexisting voluntary and presumably profitable course of dealing between the monopolist and rival" with which the monopolist later **[**57]** refuses to deal. *Novell, 731 F.3d at 1074*; *Qualcomm, 969 F.3d at 993*. It was the absence of this preexisting relationship that doomed the plaintiffs in Trinko, as the Court upheld the dismissal of their Aspen Skiing claim at the pleading stage on that basis, despite their allegations that Verizon's refusal to deal with rivals was intended to, and did, blunt their growth. See *540 U.S. at 404-05, 407, 409*. Second, "the refusal to deal [must] involve[] products that the defendant already sells in the existing market to other similarly situated customers." *Qualcomm, 969 F.3d at 994*; see Areeda & Hovenkamp, ¶ 773d3, at 233 (defendant must be "selling [the] particular product or service to others but refu[sing] to sell that same product or service to" the rival) (citing *Trinko, 540 U.S. at 410*). Third, and most importantly, "the monopolist's discontinuation of the preexisting course of dealing must suggest a willingness to forsake short-term profits to achieve an anti-competitive end," *Novell, 731 F.3d at 1075*; see *Qualcomm, 969 F.3d at 993*, rather than to advance a valid business purpose. See also *Covad Commc' ns Co. v. Bell Atl. Corp., 398 F.3d 666, 675, 365 U.S. App. D.C. 78 (D.C. Cir. 2005)* (to prevail on refusal-to-deal claim, plaintiff "will have to prove [that defendant's] refusal to deal caused [defendant] short-term economic loss"). The cases, and the leading treatise, offer a demanding gloss on this prong of the test: *Qualcomm* requires the predatory motivation to be "the only conceivable **[**58]** rationale or purpose" for the otherwise inexplicable profit sacrifice, see *969 F.3d at 993*; Novell asks whether the cessation of dealing was "irrational but for its tendency to harm competition," *731 F.3d at 1076*; and Areeda & Hovenkamp look for "an unexplained, apparently irrational change in an established course of dealing." Areeda & Hovenkamp, ¶ 772d3, at 233.

b. Application

i. Facebook Policies

Applying these principles, it is clear off the bat that Facebook's adoption of a policy of not offering API access to competitors did not, standing alone, violate *Section 2*. ***HN16***[] As set out above, a monopolist has no duty to deal with its competitors, and a refusal to do so is generally lawful even if it is motivated, as Verizon's was in Trinko, by a desire "to limit entry" by new firms or impede the growth of existing ones. See *540 U.S. at 407*. It follows that a firm's merely announcing its choice not to deal with competitors, whatever the motivation for doing so, cannot violate *Section 2*. The FTC's core argument for why the policies themselves are unlawful — that their promulgation was intended to, and did, "change[] the incentives of third-party apps that relied upon the Facebook ecosystem [and thus] deterr[ed] them from including features and functionalities that might compete with Facebook," **[**59]** Redacted Compl., ¶ 25; see also id., ¶¶ 77, 137 — misses the boat. The central teaching of the cases discussed above is that Facebook had no antitrust duty to avoid creating that deterrent. See, e.g., *Olympia Equipment Leasing, 797 F.2d at 375* ("Today it is clear that a firm with lawful monopoly power has no general duty to help its competitors . . . by . . . pulling its competitive punches.").

Facebook's general policy of withholding API access from competitors, moreover, was plainly lawful to the extent it covered rivals with which it had no previous, voluntary course of dealing. (Other rivals are addressed in Section B.1.b.ii., **[*25]** *infra*.) Such prior history of dealing, recall, is a necessary element of an *Aspen Skiing* claim. That is yet another reason why the mere act of announcing or maintaining a general no-dealing-with-competitors policy cannot, in and of itself, violate *Section 2*; rather, the analysis must focus on particular acts. See Areeda & Hovenkamp, ¶ 773e, at 273 (explaining that *Aspen Skiing* violations are "visible and idiosyncratic event[s]"). Consider an example from the Complaint: citing its policies, in early 2013 Facebook blocked the API access of Vine, a new app it viewed as a competitor, mere hours after its launch. **[**60]** See Redacted Compl., ¶ 155. That decision was plainly lawful, per Trinko, because it was prospective: Facebook had not previously allowed Vine to access its APIs. Although the company was enforcing its "replicating core functionality" general policy against Vine, that fact makes no difference to the *Aspen Skiing* analysis; rather, whether the specific refusal to deal with Vine contravened Section 2 depends on the details of the refusal itself.
