[14] While the Supreme Court, unlike the Tenth Circuit, did not rely on the essential facilities doctrine, the case is concerned with a vertical integration and is often cited in lower court cases involving alleged essential facilities. See, e.g., Areeda & Hovenkamp, § 772c at 182.

[15] The Court is aware of the intent behind the leased access provisions, *47 U.S.C. § 532 (2002)* where: "Leased access is aimed at assuring that cable channels are available to enable program suppliers to furnish programming when the cable operator may elect not to provide that service as part of the program offerings he makes available to subscribers." S.Rep.No. 102-92, at 29 (quoting H.R.Rep.No. 98-934, at 47 (1984)). Nevertheless, the key question remains whether forcing YES to lease a system for which Cablevision pays its affiliates constitutes a competitive injury accompanied by high entry barriers such that competition in the marketplace is impaired. Absent such impairment, it could very well be that YES is simply an unintegrated rival whose injury reflects nothing more than Cablevision's ability to reduce its costs without the concomitant injury to competition. However, for the purposes of this motion, YES' allegation that Cablevision has refused to deal in terms which are reasonable in order to keep its monopolistic position from eroding is taken as true .

1081, 1133 (7th Cir. 1983). This Court, however, cannot resolve this issue on the merits at this stage of the litigation. See, e.g., Law Offices of Curtis V. Trinko, 294 F.3d at 326 **HN34**[] (finding that whether facility is essential and/or what constitutes reasonable access are "issues of fact that cannot be resolved on this motion to dismiss."). Cf. Ideal Dairy Farms v. John Labatt, Ltd., 90 F.3d 737, 748 (3d Cir. 1996)(finding, on summary judgment, no denial to essential facility where defendant charged plaintiff prices significantly above market); Florida Mun. Power Agency v. Florida Power and Light Co., 81 F. Supp. 2d 1313 (M.D.Fla. 1999)(finding, on summary judgment, essential facility not violated where Defendant provided access, but not on plaintiff's desired terms).

[43]** In light of such clear precedent, Cablevision's reliance on International Audiotext v. American Telephone & Telegraph Co., 62 F.3d 69 (2d Cir. 1995) is unavailing. There, the Second Circuit found that the essential facility doctrine was not implicated because the case did not involve a facility, but a service, specifically, a phone company's "billing services". Id. at 71. That is not the case here, where there is no law to support Cablevision's allegations that its distribution network is not a facility or that the fact YES is seeking to sell its service (and thus forcing Defendant to buy) makes the claim non-cognizable under the essential facilities doctrine. [16] **[**44]** Further, **HN35**[] the direction of payment **[*676]** (i.e. liability attaches only where a plaintiff must pay for access to a facility not vice versa) plays no part in determining the applicability of the doctrine, except in the determination of reasonableness of the access arrangement. Said determination, as discussed above, cannot be made at this stage of the litigation. [17] Accordingly, Cablevision's request to dismiss Count III is DENIED.

[45]** D. Tying Claim and FCC Violations

YES alleges that Cablevision is bundling its Internet service with its video programming services at discounted prices to increase switching costs for subscribers who might consider switching to DBS (or other MVPD operators) and that Internet service, thus, is the tying [18] product. See Compl. PP14,41. Cablevision argues that YES' "tying claim" should be dismissed for lack of standing and for failure to plead a required element of the claim. Def. Mem. Law at 21-3,29. Cablevision further asserts that YES "can neither directly bring a claim to enforce these FCC regulations nor indirectly adopt these regulations as a standard to be applied in determining its antitrust claims."

---

[16] **Simply re-characterizing YES' attempted access claim as an attempt to sell a service cannot result in a dismissal where YES' allegations meet the threshold requirements under the essential facilities doctrine and YES is entitled to all facts construed in its favor at this juncture. That is not to say, however, that the record at summary judgment would not permit this Court to find the essential facilities doctrine unavailable because the distribution system cannot be fairly characterized as a "facility" or where the mode of access offered by Cablevision is not so patently unreasonable by industry standards to constitute a "denial."**

[17] **Defendant relies on Paladin Assocs., Inc. v. Montana Power Co., 97 F. Supp. 2d 1013, 1038 (D.Mont. 2000) for the proposition that the essential facilities doctrine is unavailable to a plaintiff seeking "preferential treatment" over its competitors. Paladin, however, found simply, after discovery was conducted, that plaintiff failed to sustain a "denial to facility" claim since it was engaged in an active contract with defendant, though on terms not to its liking. Id. at 1038. Those facts are clearly not mirrored here, where plaintiff alleges a denial associated with Cablevision's status as a vertically integrated monopolist in the cable distribution market. Further, Paladin is of limited value because it involved a combination in restraint of trade, not single firm conduct. As such, HN36[] Sherman Act ramifications are quite different for combinations versus individuals. See Copperweld, 467 U.S. 752 at 767-69, 774-77, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (while a combination may be liable for effecting a mere restraint of trade, for a single firm to be liable there generally must be either monopolization or the threat of monopolization).**

[18] **Proof of a tying arrangement generally requires evidence that the supplier's sale of the tying product is conditioned upon the unwilling purchase of the tied product from the supplier or an unwilling promise not to purchase the tied product from any other supplier. See, e.g., Jefferson Parish, 466 U.S. 2 at 12, 80 L. Ed. 2d 2, 104 S. Ct. 1551 ("The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms."); Wells Real Estate, 850 F.2d 803 at 814 ("Tying arrangements involve the use of leverage over the market for one product ... to coerce purchases of a second product....").**

Def. Mem. Law at 30. YES responds that YES is not bringing a "tying claim," or a claim to enforce FCC regulations (Pl.'s Mem. Law at 33) and accordingly, it appears that the only issue for the Court to decide at this juncture is whether to strike any allegation of tying or FCC violations from the Complaint as irrelevant. YES treats Cablevision's motion as a motion to strike pursuant to *Fed. R. Civ. P. 12(f)* and argues a determination of relevance at this stage would be **[**46]** premature. Cablevision treats the allegations as "abandoned claims" and argues they should be stricken under *Fed.R.Evid. 404(b)* as impermissible character evidence.

HN37[] When sought to expunge irrelevant **[**47]** factual matters, a strike motion will not be granted unless those matters have no clear bearing on the issues in dispute. *Reiter's Beer Distributors, Inc. v. Schmidt Brewing Co., 657 F. Supp. 136, 143 (E.D.N.Y. 1987)*. Accordingly, a motion to **[*677]** strike will be granted if the disputed matter "is irrelevant under any state of facts which could be proved in support of the claims being advanced." Id.

While the Court is skeptical that bald allegations of tying in another product/geographic market would have any relevance to the issues here (including Defendant's intent), it is a question better left to more advanced stages of this lawsuit. Indeed, the only Second Circuit case cited by Defendant was a determination made at trial, where the Court had the benefit of a developed record in order to analyze whether the proffered evidence was improper "character" evidence or evidence which properly went to intent or pattern. See *United States Football League v. National Football League, 842 F.2d 1335, 1371 (2d Cir. 1988)* (assessing relevance of prior antitrust judgments at trial) [19] .

[48]** The Plaintiff capitulates that the alleged FCC violations do not comprise an independent cause of action, but merely informs the standard of competitive conduct. Pl.'s Mem. Law at 34. There is no allegation in the Complaint that the FCC has determined that any violation has occurred. The Court is also aware that the FCC standards are not amendments to the existing federal antitrust laws. ***HN38***[] In the absence of relevant authority to the contrary, however, the standards developed by this industry's regulatory agency (i.e. the FCC), while not binding or necessarily persuasive authority, may be relevant. See, e.g., *Int'l Audiotext Network, Inc., 893 F. Supp. at 1212* (noting ***HN39***[] court may take judicial notice of materials publicly filed by or with the Federal Communication Commission as "giving an indication of the nature of relevant practices in and policies affecting the…business.")(citing *Kramer v. Time Warner, Inc., 937 F.2d 767, 773 (2d Cir. 1991))*.

Accordingly, Defendant's motions to strike are DENIED at this time.

E. Donnelly Act

HN40[] The Donnelly Act, *N.Y. Gen. Bus. Law § 340*, proscribes that "every contract, agreement, arrangement or combination **[**49]** whereby a monopoly…is or may be established or maintained, or whereby competition…may be restrained" is illegal. *N.Y. Gen. Bus. Law § 340(1)*. The Act was closely patterned after the Sherman Act and has been narrowly construed to encompass only those causes of action falling within the Sherman Act. See *State v. Mobil Oil Corp., 38 N.Y.2d 460, 381 N.Y.S.2d 426, 427, 344 N.E.2d 357 (1976)*(concluding that price discrimination claim falls outside the ambit of the Sherman Act and therefore, the Donnelly Act); see also *Great Atlantic & Pacific Tea Co., Inc. v. Town of East Hampton, 997 F. Supp. 340 (E.D.N.Y. 1998)*(finding Donnelly Act is modeled after the Sherman Antitrust Act and is generally **[*678]** interpreted in accordance with federal precedent). ***HN41***[] A party asserting a violation of the Donnelly Act must (1) identify the relevant product market, (2) describe the nature and

---

[19] **Comparisons of the instant matter to the other cases cited by Defendant are misplaced. 3 Penny Theater Corp. v. Plitt Theatres, Inc., 1985 WL 5138, at *1 (N.D.Ill. November 25, 1985), struck almost 30-year-old antitrust convictions, where the Plaintiff admitted it was relevant to the claims only to establish defendants' 'corporate character'. *Tivoli Realty v. Paramount Pictures, 80 F. Supp. 800, 804 (D.C.Del. 1948)*, struck a paragraph in the Complaint alleging the violation of another judicial decree as immaterial, but denied the striking request as to paragraphs which "furnished background material as to the nature, extent and character of the alleged conspiracy." In re Potash, 1994 WL 1108312 at *6 (D.Minn. 1994) found that any potential relevance of the allegations of decades-old previous misconduct was substantially outweighed by their likelihood for prejudice. Further, the Potash Court declined to strike a description of conduct which was in close proximity to the Plaintiff's claims and "provided a setting for the events which, the Plaintiffs contend, spawned the conduct that they assert as unlawful." *Id. at *7*.**

effects of the purported conspiracy, (3) allege how the economic impact of that conspiracy is to restrain trade in the market in question, and (4) show a conspiracy or reciprocal relationship between two or more entities. *Great Atlantic & Pacific Tea Co., Inc., 997 F. Supp. at 352*. **[**50]**

Cablevision argues that the Donnelly Act cannot be implicated, absent allegations of conduct between one or more actors (hence, the "arrangement" and "combination"), and as such, cannot apply to YES' allegations of single firm, vertical conduct. Def.'s Mem. Law at 29-30; Reply at 14-15. YES responds that the Act is broad enough to prohibit "vertical restraints" and that, regardless, YES alleges a "combination and arrangement between Cablevision and its affiliate MSG LP…as well as supporting acts that seek to restrain competition…" Pl.'s Mem. Law at 28-30.

HN42[] The Supreme Court has found that a parent corporation and its wholly-owned subsidiary are incapable of conspiring with each other due to a presumed unity of purpose. See *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*. The central issue is whether an alleged conspiracy between Cablevision and its affiliated MSG LP (which owns MSG and FSNY sports networks) constitutes a "combination and arrangement" sufficient to fall under the Donnelly Act. [20] While YES devotes much of the Complaint to alleging that Cablevision is a vertically integrated entity which utilizes **[**51]** its subsidiaries (i.e. CSC Holdings) and its controlling interest in its affiliates as a single force to eject YES from several related markets [21] **[**52]** , here, Cablevision argues that they are indeed separate entities: "With less than 47% ownership of MSG and FSNY, [Cablevision] does not have sufficient ownership to fall either under Copperweld or outside the scope of New York's Donnelly Act." Pl.'s Mem. Law at 30. YES cannot have it both ways. [22] Indeed, the Copperweld inquiry is more substantively about determining whether there existed control and a so-called "unity of purpose" rather than the establishment of any magic number percentage of ownership. See generally *Copperweld at 767-778*.

More importantly, ***HN43***[] conclusory allegations of conspiracy are legally insufficient to make out a violation of the Donnelly Act. *Sands v. Ticketmaster-New York, Inc., 207 A.D.2d 687, 616 N.Y.S.2d 362, 364* (1st Dep't 1994). Plaintiff alleges no facts to suggest that Cablevision's refusal to carry YES on reasonable, nondiscriminatory terms (Compl. P167-168) or "control" of the Knicks and Rangers (Compl. PP8,48, 162), was the product of a conspiracy or reciprocal arrangement, as opposed to a unilateral act by Cablevision that may have inured to the benefit of FSNY and MSG. *Great Atlantic & Pacific Tea Co., Inc., 997 F. Supp. at 352* (finding plaintiff's **[*679]** conclusory allegation regarding conspiracy insufficient to state a claim).

Plaintiffs relies on *Anheuser-Busch, Inc. v. Abrams, 71 N.Y.2d 327, 525 N.Y.S.2d 816, 819, 520 N.E.2d 535 (N.Y. 1988)* for the proposition that "vertical restraints on trade if demonstrated **[**53]** to be unreasonable" clearly fall under the Donnelly Act. Pl.'s Mem. Law at 28. Anheuser-Busch, however, is a case involving purportedly illegal agreements to eliminate intrabrand competition, made between two separate economic entities, beer brewers and designated wholesalers in a given territory, "not to sell the brewer's products outside that territory or to anyone inside the territory who would resell the products elsewhere." *525 N.Y.S.2d at 818*. As such, these agreements, which operated to restrain trade vertically, clearly fell under the Donnelly Act. Anheuser-Busch, however, has no application here where the allegations relate to a network of subsidiaries and affiliates created by one vertically integrated corporation. Further, reliance on People v. Schwartz is also misplaced, where the state court did not need to decide the issue of Copperweld's applicability "because the indictment charges conspiracy with two people…and this second person has no relationship with defendant or his corporation." People v. Schwartz, Index No. 1557/86, 1986 WL 55321 (N.Y.Sup.Ct. Oct. 17, 1986).

Accordingly, Defendant's motion to dismiss the Donnelly Act claim **[**54]** (Count VIII) is GRANTED.

---

[20] **YES' vague and conclusory allegation of coercion as to some "national non-networked advertising cooperative" is a wholly insufficient basis for a Donnelly Act claim.**

[21] **YES alleges: "Cablevision has owned a majority interest in FSNY for many years; in 1995, after several years of effort, Cablevision acquired a 50% interest in MSG, and acquired a controlling interest in 1997" Compl. P7.**

[22] **Notably, YES did not bring a claim of federal antitrust conspiracy under *§ 1* of the Sherman Act, *15 U.S.C. § 1*.**

III. CONCLUSION

For the reasons stated above, the Court denies Defendant's motion to dismiss with the exception of Defendant's motion as to Count VIII, the Donnelly Act claim, which is granted.

Plaintiff shall file an amended complaint in accordance with this Opinion (see n.12 supra) by September 24, 2002. Defendant shall respond by October 14, 2002.

SO ORDERED.

HN1[] **Standards of Review, Abuse of Discretion**

The appellate court reviews a district court's grant of class certification under an abuse of discretion standard. Regarding the standard of review applicable to class action decisions, the appellate court must decide whether the *Fed. R. Civ. P. 23(a)* prerequisites have been met, whether the district court correctly identified the issues involved and which are common, and whether it properly identified the comparative fairness and efficiency criteria. If the district court's analysis on these points is correct, then, it is fair to say that the appellate court will ordinarily defer to its exercise of discretion embodied in the findings on predominance and superiority.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN2[] **Remedies, Damages**

Under the "Bogosian short-cut," if a nationwide conspiracy is proven, the result of which was to increase prices to a class of plaintiffs beyond the prices which would obtain in a competitive regime, an individual plaintiff could prove fact of damage simply by proving that the free market prices would be lower than the prices paid and that he made some purchases at the higher price. If the price structure in the industry is such that nationwide the conspiratorially affected prices at the wholesale level fluctuated within a range which, though different in different regions, was higher in all regions than the range which would have existed in all regions under competitive conditions, it would be clear that all members of the class suffered some damage, notwithstanding that there would be variations among all dealers as to the extent of their damage. The burden of proving the fact of damage under *§ 4* of the Clayton Act, codified at *15 U.S.C.S. § 15*, is satisfied by proof of some damage flowing from the unlawful conspiracy. Under these circumstances, proof on a common basis would be appropriate. Even if the variation in price dynamics among regions or marketing areas were such that in certain areas the free market price would be no lower than the conspiratorially affected price, it might be possible to designate subclasses to conform with these variations.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN3[] **Private Actions, Remedies**

The court does not require plaintiffs to have selected a particular econometric model for demonstrating impact (or proving damages) at the class certification stage.

Governments > Courts > Judicial Precedent

HN4[] **Courts, Judicial Precedent**

The judicial process distinguishes discrete functions in the appellate decisional process: (1) finding or choosing (or creating) the law where the dispute is over the choice of the controlling legal precept; (2) if there is no dispute as to its selection, a disagreement over its interpretation; and (3) where there is agreement on the precept and its interpretation, the sole question is the application of the law to the facts, which is described as application of the abstract grounds of decision to the facts of the particular case.

Governments > Courts > Judicial Precedent

HN5[] **Courts, Judicial Precedent**

The process of justifying a court's decision always requires application of a legal precept to a particular factual situation. The application may be purely mechanical, as it is in most cases. If the facts are similar to those in an earlier case announcing a rule of law, the doctrine of precedent becomes operative. Where there is no quarrel over the choice and interpretation of the legal precept, the root controversy usually is traced to a value judgment of whether there is sufficient similarity between the fact situations under comparison. The scope of a rule of law, and therefore its meaning, depends upon a determination of what facts will be considered similar. The finding of similarity or difference is the key step in the legal process. To predict a court's actions in a precept-application controversy, therefore, requires a prediction of what facts in the compared cases a given court, at a given time, will deem either material or insignificant. The facts considered material are "adjudicative facts," described as facts relevant in deciding whether a given general proposition is or is not applicable to a particular situation.

Governments > Courts > Judicial Precedent

HN6[] **Courts, Judicial Precedent**

For a party to prevail on an argument based upon a prior case, the party must demonstrate that the facts in the prior case are substantially similar to the facts in the case at bar, what logicians call inductive reasoning by analogy, or reasoning from one particular case to another. To draw an analogy between two entities is to indicate one or more respects in which they are similar and thus argue that the legal consequence attached to one set of particular facts may apply to a different set of particular facts because of the similarities in the two sets. Because a successful analogy is drawn by demonstrating the resemblances or similarities in the facts, the degree of similarity is always the crucial element. You may not conclude that only a partial resemblance between two entities is equal to a substantial or exact correspondence.

Governments > Courts > Judicial Precedent

HN7[] Courts, Judicial Precedent

In the context of the doctrine of precedent, logicians teach that one must always appraise an analogical argument very carefully. Several criteria may be used: (1) the acceptability of the analogy will vary proportionally with the number of circumstances that have been analyzed; (2) the acceptability will depend upon the number of positive resemblances (similarities) and negative resemblances (dissimilarities); or (3) the acceptability will be influenced by the relevance of the purported analogies.

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > General Overview

HN8[] Antitrust & Trade Law, Clayton Act

Clayton Act lawsuits by persons who are not direct purchasers from the defendant antitrust violator are banned.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN9[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

An agreement on output also equates to a price-fixing agreement. If firms restrict output directly, price will rise in order to limit demand to the reduced supply. Reducing output, and dividing markets have the same anticompetitive effects.

Antitrust & Trade Law > Clayton Act > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

HN10[] Antitrust & Trade Law, Clayton Act

Any action to enforce any cause of action under *15 U.S.C.S. §§ 15*, *15a*, or *15c* shall be forever barred unless commenced within four years after the cause of action accrued. *15 U.S.C.S. § 15b*.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > General Overview

Governments > Legislation > Statute of Limitations > Tolling

HN11[] Tolling of Statute of Limitations, Fraud

Although 15 U.S.C.S. § 15b mandates a four-year statute of limitations for civil antitrust actions, it is well established that the doctrine of fraudulent concealment tolls the limitation period when a plaintiff's cause of action has been obscured by the defendant's conduct. In order to establish the applicability of the doctrine, an antitrust plaintiff must show three things: (1) fraudulent concealment; (2) failure on the part of the plaintiff to discover his cause of action notwithstanding such concealment; and (3) that such failure to discover occurred notwithstanding the exercise of due care on the part of the plaintiff. Where an action implicating fraudulent concealment is sought to be brought in a class posture, the court must decide whether the required elements of proof are too individualized to permit such treatment.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Governments > Legislation > Statute of Limitations > Tolling

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN12[] Prerequisites for Class Action, Predominance

The question of concealment by an antitrust defendant is a common question, subject to being uniformly resolved on behalf of all members of the class. However, the question of discovery of the cause of action by a plaintiff presents an individual question. Similarly, the issue of due diligence seemingly raises an individual question. Thus, the broad issue of fraudulent concealment presents both common and individual issues; therefore, the determination whether an antitrust action involving fraudulent concealment may proceed as a class action turns upon which aspect of the issue may be considered to predominate.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Governments > Legislation > Statute of Limitations > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN13[] Class Actions, Certification of Classes

Although a necessity for individualized statute-of-limitations determinations invariably weighs against class certification under Fed. R. Civ. P. 23(b)(3), any per se rule that treats the presence of such issues as an automatic disqualifier is rejected. In other words, the mere fact that such concerns may arise and may affect different class members differently does not compel a finding that individual issues predominate over common ones. As long as a sufficient constellation of common issues binds class members together, variations in the sources and application of statutes of limitations will not automatically foreclose class certification under Rule 23(b)(3). Predominance under Rule 23(b)(3) cannot be reduced to a mechanical, single-issue test. The inquiry necessarily focuses on defendants' conduct, that is, what defendants did rather than what plaintiffs did.

Opinion by: ALDISERT

Opinion

[*148] OPINION OF THE COURT

ALDISERT, Circuit Judge:

This appeal by manufacturers of linerboard [1] **[**5]** requires us to decide if the district court erred in granting two motions for class certification by groups of plaintiffs who brought ***antitrust law*** suits alleging that the linerboard manufacturers engaged in a continuing combination and conspiracy in unreasonable restraint of trade and commerce in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. Appellants contend that plaintiffs failed to establish **[**4]** that the putative class met the requirements of *Rule 23(b)(3), Federal Rules of Civil Procedure*, which compel the court to:

> find[] that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. [2]

Appellants are represented through briefs and oral argument by two groups of manufacturers, the "International Paper Appellants" [3] and the "Georgia Pacific Appellants." [4]

After individual law suits were filed in the Northern District of Illinois and the Eastern District of Pennsylvania, [5] the cases were transferred by the Judicial Panel on Multidistrict Litigation to the Eastern District of Pennsylvania for coordinated and consolidated pretrial proceedings.

[6]** The district court established two classes:

> All persons in the United States who purchased corrugated containers directly from any Defendant at any time during the period October 1, 1993 through November 30, 1995, but excluding Defendants, their respective parents, subsidiaries **[*149]** and affiliates and federal, state and local governmental entities and political subdivisions.
>
> * * * *
>
> All individuals and entities who purchased corrugated sheets in the United States directly from any of the defendants during the class period from October 1, 1993 through November 30, 1995, excluding the defendants, their co-conspirators, and their respective parents, subsidiaries and affiliates, as well as any government entities.

In re Linerboard Antitrust Litig., 203 F.R.D. 197, 203 (E.D. Pa. 2001) (emphasis added). These classes are presented before us as the "Box Appellees" and the "Sheet Appellees."

The district court concluded that the putative classes met the requirements of *Rule 23(a)* and noted that:

> there is an overlap between the predominance requirement of *Rule 23(b)(3)* and the prerequisite of *Rule 23(a)(2)* that common questions exist. "The courts have **[**7]** repeatedly focused on the liability issues, in contrast to damage questions, and, if they found issues were common to the class, have held that *Rule 23(b)(3)* was satisfied." 4 NEWBERG ON CLASS ACTIONS, § 18-26.

---

[1] Linerboard includes any grade of paperboard suitable for use in the production of corrugated sheets, which are in turn used in the manufacture of corrugated boxes and for a variety of industrial and commercial applications. Corrugated sheets are made by gluing a fluted sheet which is not made of linerboard, known as the corrugating medium, between facing sheets of linerboard; corrugated sheets are also referred to as containerboard. Appellants are major integrated manufacturers and sellers of linerboard, corrugated sheets and corrugated boxes.

[2] In the posture of the case presented to us, Appellants are not ipsis verbis challenging the district court's determination that the putative classes met the requirements of *Rule 23(a)*.

[3] International Paper Co., Weyerhaeuser Paper Co., Gaylord Container Corp., Union Camp Corp., Tenneco Inc., Tenneco Packaging Corp. of America.

[4] Georgia-Pacific Corp., Temple-Inland Inc., Jefferson-Smurfit Corp., Stone Container Corp. and Smurfit-Stone Container Corp.

[5] A detailed history of the litigation, and action of the Judicial Panel on Multi-District Litigation for coordinating and consolidating pre-trial proceedings, is set forth in *In re Linerboard Antitrust Litig., 203 F.R.D. 197 (E.D. Pa. 2001)*.

Id. at 214.

The court then decided that the putative classes had met the requirements of Rule 23(b). The court determined first, that plaintiffs presented sufficient evidence to support claims that the conspiracy to raise the price of linerboard correspondingly raised the price of corrugated products. It went on to "conclude[] that plaintiffs' allegations regarding impact, like their allegations regarding conspiracy, will focus the inquiry on defendants' actions, not on individual questions relating to particular class members." Id. at 220.

I.

The International Paper Appellants argue that the district court erred in holding that Appellees have sufficiently demonstrated that they will be able to prove common impact at trial. In support of this major premise, they contend that the court erred in applying a legal presumption of impact and failing to apply rigorous scrutiny to plaintiffs' proffered impact evidence. They contend also that the **[**8]** court erred in ignoring the individual issues raised by plaintiffs' claim of fraudulent concealment.

For their part, the Georgia Pacific Appellants argue that the district court erred because here the existence of injury, and hence potential liability, requires an inherently individualized inquiry. Similarly, they argue that the court erred in certifying classes because the existence of fraudulent concealment also requires an inherently individualized inquiry.

HN1[] We review a district court's grant of class certification under an abuse of discretion standard. Newton v. Merrill Lynch, Pierce, Fenner & Smith, 259 F.3d 154, 165-166 (3d Cir. 2001).

> In Katz v. Carte Blanche Corp., 496 F.2d 747, 756-757 (3d Cir. 1974) (in banc), we articulated the standard of review applicable to class action decisions. We must decide whether the 23(a) prerequisites have been met, whether the district court correctly identified the issues involved and which are common, and whether it properly identified the comparative fairness and efficiency criteria. If the court's analysis on these points is correct, then, "it is fair to say that we will ordinarily defer to its exercise **[**9]** of discretion" embodied in the **[*150]** findings on predominance and superiority. Id.

Bogosian v. Gulf Oil Corp., 561 F.2d 434, 448 (3d Cir. 1977).

The district court had jurisdiction pursuant to 28 U.S.C. §§ 1331 and 1337(a). Pursuant to Rule 23(f), Federal Rules of Civil Procedure, Appellants timely petitioned this court for permission to appeal the district court's September 4, 2001, Order. We granted the petition and allowed the appeal by an order dated December 18, 2001, and now affirm.

II.

In presenting their theory of antitrust liability, Appellees averred that even though demand for linerboard was strong and rising between 1989 and 1992, the manufacturers' prices for linerboard had fallen; that the manufacturers attempted to increase prices during 1991, 1992 and the first half of 1993, but the price increase announcement did not "stick" and, therefore, the manufacturers had to rescind them. It was at this point in September 1993, plaintiffs allege, that Roger Stone, president of Stone Container Corporation, the largest corrugated paper manufacturer, reported that "the past five years have been the only five-year period (going back as far **[**10]** as the 1920's) when the containerboard industry has had consistently declining prices. It's never happened before, never happened in the depression, but it's happened these last five years." App. at 710.

According to plaintiffs, declining prices were attributed to excess inventory or inventory overhang. They also maintained that Stone Container masterminded a two-fold plan among the manufacturers to lower the industry inventory to a five-week supply for a 2.5 million ton threshold, in order to implement price increases. The Packaging Corporation of America stated in the fall of 1993:

> Weakness in containerboard pricing during the first half of 1993 was more supply-related than demand-related. Earlier this year, industry inventories of containerboard hovered above 2.9 [million] tons and nearly [six] weeks of supply, above the 2.5-2.6 [million] tons and 5.0-5.2 week range usually required to sustain a price increase.

App. at 1553.

The plan was two-fold. First, the manufacturers would close their mills for "market downtime," thereby reducing industry inventory at mills and box plants. Second, Stone would purchase inventory from other manufactures while idling its own **[**11]** mills. In implementing this conspiracy, during late June and early July 1993, Roger Stone conducted a telephone survey of his competitors. He coordinated the industry-wide downtime and agreed to have his company purchase a significant volume of linerboard from its competitors rather than meet the requirements from its own production. Stone took downtime of approximately 180,000 tons of containerboard by shutting six of its mills during the following weeks and months.

The manufacturers closed their mills between July and December. By October 1993, they had concerted their actions and had lowered total inventories to the desired level of less than a five-week supply. A total of 435,000 tons had been withdrawn from the market. Inventory reached "a twenty-year low in terms of weeks of supply . . . ." App. at 733. In October 1993, Appellants successfully increased their prices for containerboard and boxes for the first time in more than two years. Each raised its container prices by an identical amount. Subsequently, the major manufacturers continued their pattern of taking substantial **[*151]** downtime and implementing price increases. In late November, less than two months after the successful **[**12]** October 1 price increase, Stone announced another $ 30 per ton increase to be effective on January 1, 1994, even though analysts were not expecting another attempt to raise containerboard prices until February or March of that year. Other manufacturers joined, and the price increase became effective in March 1994.

In April 1994, Appellants justified another containerboard price increase citing low inventory. Between the summer of 1993 and March 1995, seven containerboard price increases were implemented in the industry. Linerboard prices in the eastern United States rose in six consecutive escalations from a low of around $ 270 to $ 290 per ton in the third quarter of 1993 to $ 530 per ton by April 1995. Plaintiffs allege that the roughly 90% recovery in prices resulted in a sharp resurgence in industry profitability as the containerboard increases were passed through in the form of finished box prices. Even the most debt-laden industry players had returned to profitability by the fourth quarter of 1994. App. at 1265.

Thus, plaintiffs' theory of antitrust liability is based on poly-syllogisms: (1) Prices in the marketplace are controlled by the economic laws of supply and demand, **[**13]** to wit, if a product is in short supply, the price will increase. During the period in question, linerboard was in short supply. Therefore, during this period, the price of linerboard increased. (2) Closing down production will create a shortage in supply and a corresponding price increase. The linerboard manufacturers closed down production. Therefore, the linerboard manufacturers created a shortage in supply and a price increase.

III.

We address first, the contention that the court erred in applying a presumption of impact, in order to demonstrate that questions of law and fact common to the members of the class predominate over any questions affecting only individual members. The district court did apply such a presumption, relying on the oft-quoted statement in Bogosian, familiarly described as ***HN2***[] the "Bogosian short-cut": [6]

> If, in this case, a nationwide conspiracy is proven, the result of which was to increase prices to a class of plaintiffs beyond the prices which would obtain in a competitive regime, an individual plaintiff could prove fact of damage simply by proving that the free market prices would be lower than the prices paid and that he made some purchases **[**14]** at the higher price. If the price structure in the industry is such that nationwide the conspiratorially affected prices at the wholesale level fluctuated within a range which, though different in

[6] See Affidavit of Dr. Robin Cantor, App. at 608-629.

> different regions, was higher in all regions than the range which would have existed in all regions under competitive conditions, it would be clear that all members of the class suffered some damage, notwithstanding that there would be variations among all dealers as to the extent of their damage. "[The] burden of proving the fact of damage under § 4 of the Clayton Act is satisfied by . . . proof of some damage flowing from the unlawful conspiracy . . . ." *Zenith Radio Corp. v. Hazeltine Research, Inc. 395 U.S. 100, 114 n.9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*. Under these circumstances, proof on a common basis would be appropriate. Even if the variation in price dynamics among regions or marketing **[*152]** areas were such that in certain areas the free market price would be no lower than the conspiratorially affected price, it might be possible to designate subclasses to conform with these variations. See *In re Antibiotic Antitrust Actions, 333 F. Supp. 278, 281 (S.D.N.Y. 1971)*.

Bogosian, 561 F.2d 434, 455 (3d Cir. 1977) **[**15]** (emphasis omitted). [7]

Appellants challenge the following determination of the district court:

> Plaintiffs **[**16]** have shown that they plan to prove common impact by introducing generalized evidence which will not vary among individual class members. For example, plaintiffs contend that even though prices may have varied among regions, the alleged conspiracy caused these prices to rise throughout the country. Although the prices for corrugated sheets and boxes may have increased due to demand, because defendants allegedly conspired to reduce production of linerboard, the price was higher than it would have been under competitive conditions. Such allegations, supported by the evidence presented, are of the kind contemplated by the Third Circuit in Bogosian and Newton. See also, Lumco Indus.,[*Inc. v. Jeld-Wen, Inc., 171 F.R.D. 168, 173 (E.D. Pa. 1997)]*.
>
> The Court recognizes that defendants dispute plaintiffs' allegations. However, at the class certification stage, "the Court need not concern itself with whether Plaintiffs can prove their allegations regarding common impact; the Court need only assure itself that Plaintiffs' attempt to prove their allegations will predominantly involve common issues of fact and law." Lumco Indus., 171 F.R.D. at 174. "Plaintiffs need only make **[**17]** a threshold showing that the element of impact will predominantly involve generalized issues of proof, rather than questions which are particular to each member of the plaintiff class." Id. (citing *In re Disposable Contact Lens Antitrust Litig., 170 F.R.D. 524 (M.D. Fla. 1996))*. Therefore, the Court concludes that plaintiffs' allegations regarding impact, like their allegations regarding conspiracy, will focus the inquiry on defendants' actions, not on individual questions relating to particular plaintiff class members.

Linerboard, 203 F.R.D. at 220.

A strong argument can be made that the Bogosian concept of presumed impact was properly applied here. The economic laws of supply and demand run in tandem with the tenets of logic. A reduction in supply will cause prices to rise. A deliberate cut in supply, as alleged here, is a deliberate interference with market forces. Coincident with this interference with the normal market forces, linerboard prices in the eastern United States rose in six consecutive price increases, from a low of around $ 270 to $ 290 per ton in third quarter 1993 to $ 530 per ton by

---

[7] The panel was unanimous on this point. The dissent would have affirmed the grant of summary judgment, contending that plaintiffs had six years of discovery in order to decide on a theory of liability and should not have been given additional time to do so.

> This is not a pro se case. Plaintiffs' counsel are competent, experienced and, in fact, nationally renowned attorneys in the antitrust field . . . In my view [after six years], this case has long since passed the stage where anyone concerned--parties, lawyers, or judges--should have to speculate as to the theory of the litigation . . . Moreover, until the theory of the case is settled, it will not be known which facts are "relevant" facts. Facts are only relevant insofar as they support a valid legal theory.

Bogosian, 561 F.2d at 457 (Aldisert, J., dissenting).

April 1995. Reduced to its essence, what Appellants **[**18]** say is that there is no correlation between the reduction in supply of linerboard and the subsequent **[*153]** price increases. What they really contend is that plaintiffs' argument is anchored on the familiar fallacy of post hoc propter hoc, the fallacy of inferring causation from temporal succession only, a reasoning from what happens in sequence is merely an assumption of a causal connection.

The post hoc accusation is trumped, however, by the laws of economics. If the facts do, in fact, support plaintiffs' theory that "an individual plaintiff could prove fact of damage simply by proving that the free market prices would be lower than the prices paid and that he made some purchases at the higher price[,]" *Bogosian, 561 F.2d at 455*, this would be a demonstration of the laws of supply and demand at work.

IV.

But there is more to this case than exclusive reliance on the presumed impact theory. The district court used a belt and suspenders rationale to support its conclusion that the putative class had met its burden of showing impact. In addition to relying on the Bogosian short cut, it credited the testimony of plaintiffs' experts, opinions that were supported by charts, studies **[**19]** and articles from leading trade publications. These experts suggested that advanced econometric models could be effectively prepared to establish class-wide impact.

A.

In reaching its decision, the district court made note of plaintiffs' expert Dr. John Beyer, who presented two possible means of assessing impact on a class-wide basis--multiple regression analysis, and the benchmark or yardstick approach, which he described as methods of showing "an antitrust impact by generalized proof." Affidavit of Dr. John C. Beyer, App. at 673-675. See also, *In re Plastic Cutlery Antitrust Litig., 1998 U.S. Dist. LEXIS 3628*, No. CIV. A. 96- CV-728, 1998 WL 135703, at *7 (E.D. Pa. Mar. 20, 1998); *In re Flat Glass Antitrust Litig., 191 F.R.D. 472, 485-486 (W.D. Pa. 1999)* (identifying multiple regression analysis as a method of proving impact).

Dr. Beyer made an extensive empirical investigation into the behavior of linerboard and corrugated box prices over time, which proved a basis for his opinion of common impact. He stated that he had studied the structure of the industry, including Appellants' market power, geographical overlap, the fungible nature of the products, the inelastic demand and lack **[**20]** of a substitute. He found that "corrugated container prices are strongly influenced by linerboard prices." Because of these industry characteristics "all class members would be impacted by higher corrugated container prices." App. at 672.

Significantly, Dr. Beyer stated that he found that linerboard and corrugated box prices were closely correlated. He concluded that linerboard transaction prices, as well as corrugated containerboard prices, behaved similarly over time across different regions of the country and across different types of linerboard. These findings, sometimes referred to as "structure in pricing," demonstrated to Dr. Beyer that "despite any variations in particular boxes or customers, prices for all corrugated containers would have responded over time to linerboard price increases in a similar manner . . . ." Id. Based on this qualitative analysis, he concluded that the "alleged conspiracy would have had a common, class-wide impact, and that all purchasers of corrugated containers would have paid a higher price as a result of the conspiracy." *Id. at 673*. We deem his conclusion to be significant because it was supported by charts and studies.

[*154] In discussing these feasible **[**21]** approaches, which could be used to provide quantitative methods for corroborating his opinion on impact and for estimating damages, he suggested as a potential benchmark, the potential prices charged for linerboard during a competitive period when there would be no effects of the conspiracy. He explained that the necessary data was available to do the analysis and described the types of data he would use. He discussed also a multiple regression model "to isolate the effects of various influences on corrugated container prices, thereby allowing a determination of the impact of any one of the variables, including, in this case, the impact of the conspiracy." *Id. at 674*.

B.

The plaintiffs also presented an affidavit of Dr. Robin C. Cantor who stated that "based on my analysis of the pricing data and company records, I conclude that the alleged unlawful conduct to raise linerboard prices would have impacted all members of the proposed class through higher corrugated sheet prices." App. at 612. We deem this conclusion to also be extremely significant.

Such a conclusion was supported by relevant data. For example, she indicated that the containerboard industry is relatively concentrated **[**22]** and that during the relevant period, 77 percent of linerboard and 71 percent of the "corrugated medium" was produced by the top ten firms and that overall, 73 percent of containerboard production was concentrated in the top ten firms. *Id. at 614*. She also indicated that benchmark prices are published weekly in a number of sources including "The Yellow Sheet," "Pulp and Paper Week" and "Pulp & Paper's North American Fact Book," and that "according to a Weyerhaeuser document, 'linerboard is the industry's indicator price.'" *Id. at 619*. Dr. Cantor recognized that "corrugated boxes are the most popular shipping containers in the world. Over 90 percent of all products in the United States are shipped in corrugated cardboard boxes." *Id. at 623* (quoting the American Forest and Paper Association website). Emphasizing this dominance over the shipping industry, Dr. Cantor remarked that:

> the market began to turn in the third quarter of 1993 when containerboard producers announced an estimated 400,000 tons of downtime to reduce linerboard and medium inventories just as box shipments began to pick up. [(quoting Linerboard: Prices Soar to Record Levels as Shortage Condition Prevail, PULP **[**23]** & PAPER WEEK, Vol. 69, No. 1 at 13).] The industry is gradually responding to the soft linerboard market by announcing significant downtime to be taken in the third quarter. Announcements to date of downtime by Stone, Temple-Inland, Union Camp, IP and [Packaging Corporation of America] amount to roughly 300,000-350,000 tons of production or 5.4% of the industry's capacity during the three month period." [(quoting Linerboard Markets--Industry Report, Donaldson, Lufkin & Jenrette Securities, August 10, 1993).]

App. at 626.

She also indicated that there are several accepted statistical or mathematical approaches that could be used to determine the percentage or absolute overcharge due because of the effect of a conspiracy to manipulate prices. App. at 628. She suggested that "benchmarking," which uses "competitive prices for other comparable products to estimate the pattern of prices but-for the alleged misconduct[,]" could be effectively employed in this situation. Id. Another proffered model would "compare[] prices during non-conspiratorial **[*155]** periods with product prices during the alleged conspiracy," and yet a third approach would use revenue, production and profit data **[**24]** to derive prices that are consistent with "yardstick" competitive performance levels.

Most significantly, she concluded:

> In sum, containerboard and corrugated sheet products exhibit sufficient characteristics and their sale and production exhibit sufficient economic conditions to control for product variations in a price analysis. In combination, these characteristics and conditions indicate that a price-fixing conspiracy would have a common impact on all members of the proposed class and that feasible methods can be used to estimate damages reliably on a class-wide basis.

App. at 629.

C.

Based on the foregoing, we conclude that the district court did not err in determining that plaintiffs showed that they could establish injury on a class-wide basis. Plaintiffs produced affidavits of expert witnesses, Dr. Beyer and Dr. Cantor, who effectively utilized supporting data, including charts and exhibits, to authenticate their professional opinions that all class members would incur such damages. We decide that this was not a case where plaintiffs relied solely on presumed impact and damages.

In commenting on plaintiffs' submissions, the district court referred to the teachings **[**25]** of Newton for the proposition that ***HN3***[] this court does not require plaintiffs to have selected a particular econometric model for demonstrating impact (or proving damages) at the class certification stage. In *In re Corrugated Container Antitrust*

Litig., 80 F.R.D. 244 (S.D. Tex. 1978), the identical situation was presented to that court where plaintiff had identified two generally accepted methodologies, which he planned on using to determine impact and damages. Relying heavily on Bogosian, the court accepted that contention and certified the class. *Id. at 251-252*. Without explicitly so stating, the district court, like the Corrugated Container court, did not require the experts to pick one particular method over another at the class certification stage, recognizing that the certification stage is early in the overall litigation process. *Linerboard, 203 F.R.D. at 219*.

Accordingly, we reject the contention that plaintiffs did not demonstrate that sufficient proof was available, for use at trial, to prove antitrust impact common to all the members of the class.

V.

A significant portion of Appellants' briefing, and a major emphasis at oral argument, **[**26]** was that the factual allegations alleged here track precisely the factual scenario in Newton, and therefore, the district court erred in not following the holding of Newton and denying class certification. At oral argument, counsel for Appellants referred to Newton as "providing the guide for resolution in this case" and referred to a single sentence contained therein that constituted, in his formulation, a "teaching that holds with respect to both of our submissions today." [8] That passage reads as follows: "If **[*156]** proof of the essential elements of the cause of action requires individual treatment, the class certification is unsuitable." *Newton, 259 F.3d at 172* (citing *Binder v. Gillespie, 184 F.3d 1059, 1063-1066 (9th Cir. 1999)* (upholding class decertification where presumption of reliance and loss unavailable), cert. denied, *528 U.S. 1154, 145 L. Ed. 2d 1070, 120 S. Ct. 1158 (2000))*.

[27]** We have several problems with this argument. In and of itself, the quotation can be interpreted as the obverse of *Rule 23(b)(3), Federal Rules of Civil Procedure*, in the sense that "if any questions affecting individual members" predominate over "questions of law and fact," class certification is unsuitable. Clearly, if proof of the essential elements of the cause of action require individual treatment, then there cannot be a predominance of "questions of law and fact common to the members of the class."

Equally important, the quotation at issue must be considered in the precise context in which it was used in Newton. It formed the final sentence of a paragraph in which we discussed permissible presumptions proof of reliance and injury in securities cases. Having cited a number of cases upholding presumptions of reliance in *Rule 10b-5* claims, we stated that where a presumption of reliance and loss was not available, as in Binder, it would be necessary for each plaintiff to prove the essential elements of the cause of action, and, if so, class certification would be unsuitable. *Newton, 259 F.3d at 172*. In Binder, the court affirmed the denial of class certification, stating **[**28]** that "the district court reasoned that the class would have to satisfy the reliance element through a presumption; otherwise individual questions of reliance would predominate over questions common to the class." *Binder, 184 F.3d at 1063*.

A.

8

> Counsel: Let me, if I may, begin with this Court's decision in Newton, which we believe provides the guide for resolution in this case.
>
> * * * *
>
> And I would like to guide the Court . . . to the language in Newton. And if you will indulge me, I'm going to quote one sentence. . . . If proof, if proof of the essential elements of the cause of action requires individual treatment, then class certification is unsuitable.
>
> Now, that teaching holds with respect to both our submissions today. [Co-counsel] has been speaking about causation or impact or injury. It also goes to proof of the essential elements of fraudulent concealment, the second part of our submission today.

Transcript of Oral Argument in In re Linerboard Antitrust Litig., No. 01-4353 (before the Court of Appeals for the Third Circuit, recorded in Philadelphia, Pennsylvania, July 19, 2002, at 16-17).

We consider it useful to identify the precise flashpoint of controversy at stake in Newton. Roscoe Pound taught us that *HN4*[] the judicial process distinguishes discrete functions in the appellate decisional process: (1) finding or choosing (or creating) the law where the dispute is over the choice of the controlling legal precept; (2) if there is no dispute as to its selection, a disagreement over its interpretation; and (3) where there is agreement on the precept and its interpretation, the sole question is the application of the law to the facts, which Pound described as "application of the abstract grounds of decision to the facts of the particular case." [9] The precise holding in Newton was that the facts common to the members of the class did not predominate. No new legal precept was created; no new nuance of interpretation was forthcoming. It was merely the application of ruling case law in this court to the facts of that case. **[**29]**

HN5[] The process of justifying a court's decision always requires application of a legal precept to a particular factual situation. The application may be purely mechanical, as it is in most cases. If the facts are similar to those in an earlier case announcing **[*157]** a rule of law, the doctrine of precedent becomes operative. Where there is no quarrel over the choice and interpretation of the legal precept, here *Rule 23(b)(3)*, the root controversy usually is traced to a value judgment of whether there is sufficient similarity between the fact situations under comparison. Edward R. Levi amply described this kind of assessment when he stated: "the scope of a rule of law, and therefore its meaning, depends upon a determination of what facts will be considered similar. . . . The finding of similarity or difference is the key step in the legal process." [10] To predict a court's actions in a precept-application controversy, therefore, **[**30]** requires a prediction of what facts in the compared cases a given court, at a given time, will deem either material or insignificant. The facts considered material are "adjudicative facts," described by Hart and Sacks as "facts relevant in deciding whether a given general proposition is or is not applicable to a particular situation." [11]

B.

HN6[] For Appellants' argument to prevail, therefore, they must demonstrate that the facts in Newton are substantially similar to the facts in the case at bar, what logicians call inductive reasoning by analogy, or reasoning from one particular case to another. To draw an analogy between two entities is to indicate one or more respects in which they are similar and thus argue that the legal consequence attached to one set of particular facts may apply to a different set of particular facts because **[**31]** of the similarities in the two sets. Because a successful analogy is drawn by demonstrating the resemblances or similarities in the facts, the degree of similarity is always the crucial element. You may not conclude that only a partial resemblance between two entities is equal to a substantial or exact correspondence.

HN7[] Logicians teach that one must always appraise an analogical argument very carefully. Several criteria may be used: (1) the acceptability of the analogy will vary proportionally with the number of circumstances that have been analyzed; (2) the acceptability will depend upon the number of positive resemblances (similarities) and negative resemblances (dissimilarities); or (3) the acceptability will be influenced by the relevance of the purported analogies. IRVING M. COPI & KEITH BURGESS-JACKSON, INFORMAL LOGIC 166 (3d ed. 1996); Arthur L. Goodheart, Determining the Ratio Decidendi of a Case, 40 YALE L.J. 161, 179 (1930); JOHN H. WIGMORE, WIGMORE'S CODE OF THE RULES OF EVIDENCE IN TRIALS AT LAW 118 (3d ed. 1942); JOHN STUART MILL, A SYSTEM OF LOGIC RATIOCINATIVE AND INDUCTIVE 98-142 (8th ed. 1916) ("Two things resemble each other in one or more respects; a **[**32]** certain proposition is true of one; therefore it is true of the other.").

For Appellants to draw a proper analogy, they had the burden in the district court, as they do here, of showing that the similarities in the facts of the two cases outweigh the differences. They cannot do so, for two significant reasons. First, in Newton it was clear that not all members of the putative class sustained injuries; here, all members sustained injuries because of the artificially increased prices. Secondly, in Newton there were hundreds of

---

[9] Roscoe Pound, The Theory of Judicial Decision, 36 HARV. L. REV. 940, 950-951 (1923).

[10] Edward H. Levi, Introduction to Legal Reasoning, 15 U. Chi. L. Rev. 501, 501-504 (1948)

[11] HENRY HART & ALBERT SACKS, THE LEGAL PROCESS 384 (tent. ed. 1958).

millions of stock transactions involved, thus making the putative class extremely unmanageable; here, an astronomical number of transactions is not present. The classes are manageable.

We reversed the district court's determination of class certification in Newton because **[*158]** it involved a putative securities class action in which purchasers of stocks charged that their broker-dealers breached their duty to execute trades on the most favorable terms reasonably available. *Newton, 259 F.3d at 161-163*. The gravamen of the complaint was that their brokers could have received a better price for securities had they used a computer system other than the central **[**33]** National Best Bid and Offer system ("NBBO"). The evidence disclosed that on some occasions, the NBBO price was better than on other computer systems, at times, the prices were the same, and at other times, the NBBO price was worse than on other systems. *Id. at 177-180*. Under those circumstances, we concluded that not every class member was injured by the failure of the brokers to find the best possible price. *Id. at 187-188*.

Critical to our determination of whether class certification was proper, we noted that in determining how to execute a client's order, a broker-dealer must take into account order size, trading characteristics of the security, speed of execution, clearing costs, and the cost and difficulty of executing an order in a particular market. Id. We were very specific in this respect:

> These factors would appear to vary from class member to class member and, for each class member, from trade to trade. Whether a class member suffered economic loss from a given securities transaction would require proof of the circumstances surrounding each trade, the available alternative prices, and the state of mind of each investor at the time the trade **[**34]** was requested. This Herculean task, involving hundreds of millions of transactions, counsels against finding predominance.
> * * * *
> The alleged injuries in Newton arise out of the execution of hundreds of millions of trades, not a single act of fraudulent conduct. The distinct facts among the hundreds of thousands of plaintiffs involving hundreds of millions of trades will determine whether securities violations occurred. Because plaintiffs' claims will require an economic injury determination for each trade, we hold the putative class fails to satisfy the predominance requirement.

Id. at 187, 190.

Contrasting the Newton facts with those in the case at bar, here there was no evidence that the individuals and entities who purchased corrugated containers or corrugated sheets from Appellants during the relevant two-year period had participated in hundreds of millions of commercial transactions. More important, the Newton court was staring a situation in the face where they would necessarily examine every stock purchase or sale because not every member of the putative class was injured. By direct contrast, with certain limited exceptions relating to purchasers **[**35]** whose contracts were tied to a factor independent of the price of linerboard, all purchasers of corrugated sheets and boxes were injured. They were all affected by the increased price of linerboard that reflected in the price paid by plaintiffs.

For the foregoing reasons, we conclude that we cannot accept the analogue so vigorously urged by Appellants because the negative resemblances (dissimilarities) between Newton and the case at bar seriously outweigh the positive resemblances (similarities).

VI.

The Court's decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, ***HN8***[] bans Clayton Act lawsuits by persons who are not direct **[*159]** purchasers from the defendant antitrust violator. Appellants argue that the district court should have denied class certification, under the teachings of Illinois Brick, because members of the proposed classes purchased corrugated sheets or boxes, of which linerboard was a mere ingredient, and did not purchase linerboard per se. Appellees respond, as they did in the district court, that the facts here come within the purview of our decision and rationale in *In re Sugar Indus. Antitrust Litig., 579 F.2d 13 (3d Cir.*

1978), **[**36]** in which we held that the purchasers of candy made by the sugar manufacturers were not barred from bringing suit under the *§ 1* of the Sherman Act, *15 U.S.C. § 1*, and *§ 4* of the Clayton Act, *15 U.S.C. § 15*.

We posed the question succinctly: Does Illinois Brick bar suit by a plaintiff who purchases directly from the alleged offender, but buys a product which incorporates the price-fixed product as one of its ingredients? We held that there was no bar.

Our reasoning began with an explication of the rationale behind Illinois Brick:

> The Court grounded its conclusion on several bases, including the possibility of exposing the defendant to multiple liability and the evidentiary complexities that would arise in apportioning the overcharge among those in the chain who had suffered injury. The Court also expressed concern that if the direct purchaser could not make a full recovery of the overcharge, the wrongdoer would be able to keep some of the fruits of its illegality. Based on this reasoning, the Court held that the plaintiff, which purchased a completed building, was not permitted to sue the manufacturer of concrete block which had **[**37]** been incorporated into the structure.

In re Sugar, 579 F.2d at 17.

We then explained why this rule would not apply to the purchasers of candy made with the price-fixed sugar:

> As the defendants here point out, the product which plaintiff purchased competes not with sugar, but with other candy, and more than one ingredient determines the price. To this extent, there will be some additional complications underlying the damage claims. However, this must not be allowed to obscure the fact that the plaintiff did purchase directly from the alleged violator. True, the price-fixed commodity had been combined with other ingredients to form a different product. But just as the sugar sweetened the candy, the price-fixing enhanced the profits of the candy manufacturers. The situation is the same as if the general contractor which sold the building to the plaintiff in Illinois Brick were the manufacturer of the concrete block which went into the structure. In that situation, the concern which the Supreme Court expressed about the proration of overcharge among a number of entities in the chain would not have been present.
>
> Nor is that problem of allocation among various **[**38]** distributors present in the case sub judice. Plaintiff is a direct purchaser and, therefore, entitled to recover the full extent of the overcharge.

579 F.2d at 17-18.

In the case at bar, the district court met this issue head-on, and we agree completely with its analysis. It emphasized that the putative class plaintiffs purchased corrugated sheets or boxes directly from Appellants, and, like the candy in In re Sugar, which contained allegedly price-fixed sugar, the corrugated sheets and boxes contain linerboard that was subject to an agreement on output, which is equivalent to a price-fixing agreement. Accordingly, the putative class members are direct purchasers and are entitled to recover the full **[*160]** amount of any overcharge. See *Gen. Leaseways v. Nat'l Truck Leasing Ass'n, 744 F.2d 588, 594-595 (7th Cir. 1984)* ***HN9***[] ("An agreement on output also equates to a price-fixing agreement. . . . [If] firms restrict output directly, price will . . . rise in order to limit demand to the reduced supply. . . . Reducing output, and dividing markets have the same anticompetitive effects.").

VII.

This is not a securities case. It is an antitrust case involving allegations **[**39]** that several United States manufacturers of linerboard engaged in a continuing combination and conspiracy in unreasonable restraint of trade and commerce in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. It is well settled that ***HN10***[] "any action to enforce any cause of action under *section 15*, *15a*, or *15c* . . . shall be forever barred unless commenced within four years after the cause of action accrued." *15 U.S.C. § 15b*.

Appellants contend that Appellees' claims are timed-barred because most of the class period--from October 1993 to November 1995--ended more than four years before the filing of the sheet and box complaints in May 1999. Appellees agree on the time period, but respond that the four-year statute of limitations should be tolled under the doctrine of fraudulent concealment because they had no knowledge of the alleged conspiracy or of any facts that might have led to the discovery thereof in the exercise of reasonable diligence. They contend that it was not until approximately February 25, 1998, when the Federal Trade Commission issued a press release, a complaint and a proposed consent decree against Appellant Stone Container **[**40]** Corporation, describing certain facets of anti-competitive conduct, that they became aware of Appellants' misadventures.

A.

HN11[] Although *§ 15b* mandates a four-year statute of limitations for civil antitrust actions, it is well established that the doctrine of fraudulent concealment tolls the limitation period when a plaintiff's cause of action has been obscured by the defendant's conduct.

> In order to establish the applicability of the doctrine, an antitrust plaintiff must show three things: (1) fraudulent concealment; (2) failure on the part of the plaintiff to discover his cause of action notwithstanding such concealment; and (3) that such failure to discover occurred [notwithstanding] the exercise of due care on the part of the plaintiff.

70 A.L.R. FED. 498 (1984).

Where an action implicating fraudulent concealment is sought to be brought in a class posture, we must decide whether the required elements of proof are too individualized to permit such treatment.

"It generally has been recognized that *HN12*[] the question of concealment by [an] antitrust defendant is a common question, subject to being uniformly resolved on behalf of all members of the class." **[**41]** *In re Flat Glass, 191 F.R.D. at 487* (citing *In re NASDAQ Market-Makers Antitrust Litig., 169 F.R.D. 493, 519 (S.D.N.Y. 1996)*; *In re Fine Paper Antitrust Litig., 82 F.R.D. 143, 154-155 (E.D. Pa. 1979))*. "However, the question of discovery of the cause of action by a plaintiff presents an individual question." Id. "Similarly, the issue of due diligence seemingly raises an individual question." Id. "Thus, the broad issue of fraudulent concealment presents both common and individual issues; therefore, the determination whether an antitrust action involving fraudulent concealment may proceed as a class action turns **[*161]** upon which aspect of the issue may be considered to predominate." Id. (citing *Hedges Enters., Inc. v. Cont'l Group, Inc., 81 F.R.D. 461, 476 (E.D. Pa. 1979))*.

The cumulative experience of the judiciary has not been uniform in this regard. Some courts have regarded the issue of concealment to predominate, and have held that class certification is permissible, even though some individual questions are present. Other courts have considered individual questions to be too pervasive to permit it to be handled as a class matter. In **[**42]** this judicial circuit, there has been a division of authority, with some cases supporting each view. [12]

[43]** B.

Appellants argue that common issues of proof do not predominate with respect to the fraudulent concealment issue and that therefore a class action is not the appropriate vehicle for deciding Appellees' claims. International Paper Appellant's Brief at 38-43. They suggest that fraudulent concealment involves a "two-pronged" inquiry--a concealment by the defendant and plaintiff's actual knowledge of it or failure to use due care to discover it--and cannot be established unless both prongs are satisfied. In asserting their position, they rely on the language of the Court of Appeals for the Fourth Circuit: "when the defendant's affirmative defenses (such as . . . the statute of

---

[12] In some cases, the courts held that common questions predominated, and that class actions therefore were permissible. See *In re Flat Glass, 191 F.R.D. 472 (W.D. Pa. 1999)*; *In re Sugar Indus. Antitrust Litig., 73 F.R.D. 322 (E.D. Pa. 1976)*; *Hedges Enters., Inc. v. Cont'l Group, Inc., 81 F.R.D. 461 (E.D. Pa. 1979)*; *In re Fine Paper Antitrust Litig., 82 F.R.D. 143 (E.D. Pa. 1979)*; *In re Glassine & Greaseproof Paper Antitrust Litig., 88 F.R.D. 302 (E.D. Pa. 1980)*. On the other hand, other Third Circuit District Court cases have expressed the view that questions relating to fraudulent concealment in antitrust class actions do not present sufficiently common issues as to permit class action treatment. See *Chevalier v. Baird Sav. Ass'n, 72 F.R.D. 140 (E.D. Pa. 1976)*; *In re Anthracite Coal Antitrust Litig., 78 F.R.D. 709 (M.D. Pa. 1978)*; *Wolfson v. Artisans Sav. Bank, 83 F.R.D. 547 (D. Del. 1979)*; *Susquehanna v. H & M, Inc., 98 F.R.D. 658 (M.D. Pa. 1983)*.

limitations) may depend on facts peculiar to each plaintiff's case, class certification is erroneous." Broussard v. Meineke Disc. Muffler Shops, Inc., 155 F.3d 331, 342 (4th Cir. 1998) (alteration in original) (internal quotation marks omitted); see also, Chevalier v. Baird Sav. Ass'n, 72 F.R.D. 140 (E.D. Pa. 1976); In re Anthracite Coal Antitrust Litig., 78 F.R.D. 709 (M.D. Pa. 1978); Krehl v. Baskin-Robbins Ice Cream Co., 78 F.R.D. 108 (C.D. Cal. 1978). **[**44]**

They argue that a number of Appellees are barred from asserting a fraudulent concealment defense to the statute of limitations because they either had prior knowledge of the conspiracy, or did not act with the requisite due diligence, emphasizing that this sort of inquiry is highly personal and is susceptible only to individualized proof and, therefore, inappropriate for class treatment. [13]

[45] [*162]** To be sure, certain determinations involving the fraudulent concealment defense to the statute of limitations will require individualized proof, which might vary among the assorted Appellees. However, most courts have refused to deny class certification simply because there will be some individual questions raised during the proceedings. In rejecting the rationale in Broussard, the Court of Appeals for the First Circuit determined:

> ***HN13***[] Although a necessity for individualized statute-of-limitations determinations invariably weighs against class certification under Rule 23(b)(3), we reject any per se rule that treats the presence of such issues as an

[13] Appellants introduced evidence that "each of the five named plaintiffs stands in a unique position with respect to fraudulent concealment that will have to be individually adjudicated if that plaintiff is to recover." International Paper Appellant's Brief at 46. They refer to Lisa Garrett, president of Garrett Paper, who testified that she was "sure" that something illegal was afoot when Garrett Paper's prices for corrugated boxes increased during the alleged class period, that she "plain as day told [her] salesman that" Appellants were fixing prices, and that she knew such activity was illegal. International Paper Appellant's Brief at 46-47.

Similarly, Appellants contend that Appellee Oak Valley was also aware of the price increases and allegedly told Stone Container that "you'd better lower your box prices," though Oak Valley is uncertain whether that conversation took place during the class period. International Paper Appellant's Brief at 47. They emphasize that Oak Valley testified that it "accepted the increases in the matter of course and never really questioned it." Id. They assert also that although Local Baking now says it had no knowledge during the alleged class period of changes in the average market price for corrugated products, or of any downtime taken by linerboard manufacturers, Local Baking has testified that it was told by Appellant Stone Container that prices were increasing because of a decrease in linerboard. They refer to the testimony of David Halper, president of Alfred I. Halper Corrugated Box Co., Inc., who testified that he was aware of the increased prices that Appellants had charged Halper during the class period, and that he had even complained to Appellants about the increases. Appellants argue that Halper has no greater knowledge today about the existence of a conspiracy than he did during the alleged class period.

Finally, they note that General Refractories sold all of its operating assets in 1994, in the middle of the class period and years before any complaint was ever filed in this case. They state that there were no communications, other than invoices, between Appellants and General Refractories during the class period, and that General Refractories could not identify any facts discovered after the class period that led to filing its complaint, and in particular none that led to the naming of entities other than Stone Container as defendants. International Paper Appellant's Brief at 48-49. And, in contrast to Garrett Paper and Halper, Appellants contend that General Refractories does not appear to have had any suspicion of wrongdoing during the alleged class period based on price increases for corrugated sheets.

It is Appellants' case that the factual complexities relating to these five named plaintiffs underscores the inherently individualized nature of a fraudulent concealment analysis. Appellants insist that the named Appellees would have to prove, among other things: (1) that Garrett Paper's conceded awareness of alleged illegality does not qualify as actual "discovery;" (2) that Garrett Paper's considered inaction in the face of such awareness qualifies as "due diligence;" (3) that Garrett Paper's asserted small size excuses its inaction; (4) that none of the other named Appellees knew or had reason to know about the alleged illegality in the exercise of due diligence, even though some of them complained about the price increases whereas others were not even aware of those increases; (5) that something was "fraudulently concealed" from all putative class members, even though some of them have conceded that they are aware of no more incriminating facts now than they were during the alleged conspiracy; (6) that unique relationships do not affect the due-diligence inquiry; (7) that named Appellees who claimed not to have known of Stone Container's downtime exercised "due" diligence, when such downtime was widely publicized in the industry at the time; (8) that General Refractories, which went out of business in the middle of the class period, is held to a due-diligence standard even after that point; and (9) that alleged oral misrepresentations made to some named Appellees but not others, regarding the reasons for the price increases does not affect the due-diligence analysis. ***Id. at 49-50***.

> automatic disqualifier. In other words, the mere fact that such concerns may arise and may affect different class members differently does not compel a finding that individual issues predominate over common ones. As long as a sufficient constellation of common issues binds class members together, variations in the sources and application of statutes of limitations will not automatically foreclose class certification under *Rule 23(b)(3)*. See 5 JAMES WM. MOORE ET AL., MOORE'S FEDERAL PRACTICE P 23.46[3] (3d ed. 1999). Predominance **[**46]** **[*163]** under *Rule 23(b)(3)* cannot be reduced to a mechanical, single-issue test.

Waste Mgmt. Holdings, Inc. v. Mowbray, 208 F.3d 288, 296 (1st Cir. 2000). We accept this reasoning as more persuasive than that espoused by the Court of Appeals for the Fourth Circuit in Broussard.

Notwithstanding the individual determinations that will undoubtedly arise at trial, common issues of concealment predominate here because "the inquiry necessarily focuses on defendants' conduct, that is, what defendants did rather than what plaintiffs did." *In re Flat Glass, 191 F.R.D. at 488*. Key questions will not revolve around whether Appellees knew that the prices paid were higher than they should have been or whether Appellees knew of the alleged conspiracy among Appellants. Instead, the critical inquiry will be whether "defendants successfully concealed the existence of the alleged conspiracy, which proof will be common among the class members in each class." Id. [14] It is the fact of concealment that is the polestar in an analysis of fraudulent concealment. It is the camouflage that demands attention, the cover up, the acts of obscuring or masking. These allegations of proof are **[**47]** all common to the defendants, not the plaintiffs. It is not the conspiracy of the defendant that is relevant on the issue of tolling the statute of limitations, it is the act of concealing the conspiracy.

C.

Moreover, any individualized facts of fraudulent concealment may be adjudicated **[**48]** in the same fashion and at the same time as individual damages issues. As a leading treatise on class actions explains: "Challenges based on the statute of limitations, fraudulent concealment, releases, causation, or reliance have usually been rejected and will not bar predominance satisfaction because those issues go to the right of a class member to recover, in contrast to underlying common issues of the defendant's liability." NEWBERG & CONTI, NEWBERG ON CLASS ACTIONS § 4.26 (3d ed.)

Many courts faced with similar circumstances have certified class status with the expectation that individual questions concerning fraudulent concealment can be resolved at a later damages phase. See *In re Flat Glass, 191 F.R.D. at 488* (citing *In re Fine Paper, 82 F.R.D. at 154-155*) ("Bifurcation of this litigation into liability and damage segments remains an option if the predominating elements of the question of fraudulent concealment do not prove susceptible to generalized proof."). See also, *In re Indus. Diamonds Antitrust Litig., 167 F.R.D. 374, 385 (S.D.N.Y. 1996)* (Individualized issues raised in fraudulent concealment should be considered when court addresses **[**49]** each putative class member's damage claim.); *Town of New Castle v. Yonkers Contracting Co., 131 F.R.D. 38, 43 (S.D.N.Y. 1990)* (holding that individualized claims and defenses on statute of limitations issue can be adjudicated in separate determinations of damages).

Accordingly, we hold that common issues of fraudulent concealment predominate.

[*164] * * * *

We have considered all contentions presented by the parties and conclude that no further discussion is necessary.

The judgment of the district court will be affirmed.

---

[14] See, e.g., *Abramovitz v. Ahern, 96 F.R.D. 208, 218 (D. Conn. 1982)* (issue of whether fraudulent concealment would toll the statute of limitations was common to all class members); *In re Plywood Antitrust Litig., 76 F.R.D. 570, 586 (E.D. La. 1976)* ("fraudulent concealment issues appear to be generally common to all members in each class"); *In re Sugar, 73 F.R.D. at 348*; *In re Fine Paper, 82 F.R.D. at 154-155* ("The key question on the issue of fraudulent concealment will relate to whether defendants successfully concealed the existence of the alleged conspiracy, and the proof of this contention [what defendants did] will necessarily be common among the class members.").

Opinion by: CAROL M. HANSEN

Opinion

[512]** OPINION BY CAROL M. HANSEN, Presiding Judge:

[*P1] Plaintiff, Jonathan C. Major, purchased a Windows 98 operating system from Office Depot in Tulsa County. Upon installing this system on his computer, Major was required to register his ownership as an end user licensee of the system. He later purchased a new computer from Gateway in January of 2000. Windows 98 was pre-installed on that computer. Before using the system, he was again required to **[***2]** register with Microsoft.

[*P2] Major originally filed this action against Defendant Microsoft in Tulsa County, Oklahoma, district court seeking damages for its violation of the Oklahoma Antitrust Reform Act. *79 O.S. Supp. 2000 §§ 201 et seq.* The trial court granted Microsoft's motion to dismiss, but allowed Major to replead. Major filed an amended petition seeking similar damages but including violations of the Oklahoma Uniform Commercial Code, *12A O.S. Supp. 2000 § 2-302*, and the Oklahoma Consumer Protection Act, *15 O.S. Supp. 2000 §§ 751 et seq.*

[*P3] After removal to federal court and return to Oklahoma, the trial court dismissed the action pursuant to Microsoft's renewed motion to dismiss. Major now appeals the dismissal.

[*P4] Microsoft is a for-profit corporation, organized and existing under the laws of the State of Washington. It focuses primarily on developing and licensing computer software. It markets and licenses its Windows 98 operating system for Intel-based personal computers throughout the United States, including the State of Oklahoma. Major complained Microsoft possessed monopoly power, including **[***3]** the power to control price and to exclude competition. He alleged Microsoft had unlawfully sought to acquire, maintain and expand its monopoly power by anticompetitive and unreasonable exclusionary conduct. As a result, Microsoft knowingly and intentionally licensed its Windows 98 operating system for Intel-based personal computers, without regard to competition, at a monopoly price in excess of that which Microsoft would have been able to charge in a competitive market. Therefore, Major claims all members of the class similarly situated are entitled to damages according to proof as to the difference between a competitive price and the unlawful monopoly price that they incurred as end user licensees.

[*P5] In 1977, the United States Supreme Court decided the case of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707*. That decision studied the issue of standing to sue for treble damages under the Clayton Act, *15 U.S.C.A. § 15 (1976)*. In *Illinois Brick,* the State of Illinois brought suit against concrete block manufacturers alleging price fixing in violation of § 4 of the Clayton Act. That section provides **[***4]** ***HN1***[] "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may bring suit to recover damages sustained by him." The Court held the state, as an indirect purchaser, did not have standing to pursue the action because it did not buy concrete blocks directly from the manufacturers, and thus was not the party "injured in his business or property within the meaning of section 4 of the Clayton Act" The Court drew a line at which the law will not permit remote antitrust claims to be asserted. This bright line has become known **[**513]** as the "indirect-purchaser rule. [1]

[1] Hundreds of state and federal cases, too numerous to mention, have Cited *Illinois Brick.*

[*P6] Ten years later the United States Supreme Court clarified its ruling in *Illinois Brick in* *California v. ARC Am. Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86*. It held that ***HN2***[] nothing in federal antitrust legislation prevented the states from allowing indirect purchasers to bring antitrust **[***5]** actions under state statutes. The Court stated the statutes of Alabama, California and Minnesota (the plaintiffs expressly allowed indirect purchasers to sue. That decision, however, did not create a cause of action for indirect purchasers, but rather merely authorized the states to provide a cause of action for indirect purchasers based on their states' antitrust laws. It concluded Congress had not preempted the field of ***antitrust law***, but rather intended the federal antitrust laws to supplement, not displace, state antitrust remedies. *See,* *Comes v. Microsoft Corporation, 646 N.W.2d 440 (Iowa. 2002)* and cases cited therein. [2] Since that time other jurisdictions have interpreted their state antitrust laws to give standing to indirect purchasers. *Bunker's Glass Company v. Pilkington, 202 Ariz. 481, 47 P.3d 1119 (Ariz. App. 2002)*.

[*P7] **[***6]** ***HN3***[] *Section 205* of the Oklahoma Antitrust Reform Act, provides that any person who is injured in his or her business or property by a violation of the act may obtain appropriate injunctive or other equitable relief and monetary damages and shall recover threefold the damages sustained, and the cost of suit, including a reasonable attorney fee. This is almost identical to the language of the federal act quoted above.

[*P8] Oklahoma Legislature has spoken. The controlling section of the Oklahoma Act is the final section, *§ 212*. That section states:

> ***HN4***[] The provisions of this act shall be interpreted in a manner consistent with Federal ***Antitrust Law*** *15 U.S.C., Section 1 et seq.* and the case law applicable thereto.

[*P9] Accordingly, under *§ 212*, we are required to apply the holdings of *Illinois Brick* to the present appeal.

[*P10] Major does not actively argue this Court should not follow *Illinois Brick.* In his briefs at trial Major makes two arguments in defense to Microsoft's motion to dismiss. He claims because he was required to register as an end user licensee, he is a direct purchaser, not an indirect one. He argues he suffered a unique injury **[***7]** as a direct result of Microsoft's practices. He further points out *Illinois Brick* provides for three exceptions to the indirect purchaser rule: (a) Vertical Price-Fixing Conspiracy, (Microsoft in conjunction with Compac, Dell and NEC); (b) an Ownership or Control exception; and, (c) the cost-plus contract exception. He also argues the trial court erroneously dismissed his claims under the Uniform Commercial Code, *12A O.S. Supp. 2000 § 2-302*, and the Oklahoma Consumer Protection Act.

[*P11] The trial court in its journal entry dismissing Major's case, attached and incorporated herein, made a detailed legal analysis of these claims. We see no reason to repeat that analysis here. ***HN5***[] Rule 1.202, Oklahoma Supreme Court Rules, 12 O.S. Supp. 2000, Ch. 15 App. provides that in any case in which the court determines after argument or submission on the briefs that no reversible error of law appears, and (d) the opinion or findings of fact and conclusions of law of the trial court adequately explains the decision, the court may affirm by an opinion citing this rule. We have examined the record, more particularly the briefs of the parties in the trial **[***8]** court, and hold the trial court should be affirmed under this rule.

[*P12] AFFIRMED.

ADAMS, J. AND MITCHELL, J. CONCUR.

[514]** EXHIBIT "A"

IN THE DISTRICT COURT IN AND FOR TULSA COUNTY

---

[2] *Comes,* in a footnote, refers to *In re Microsoft Corporation Antitrust Litigation, 127 F. Supp. 2d 702 (D. Md. 2001)*. That decision held the plaintiffs as indirect purchasers were barred from bringing claims for alleged overcharges under federal law, pursuant to *Illinois Brick,* but reserved comment on whether *Illinois Brick* was incorporated into the state law of a number of states.

STATE OF OKLAHOMA

JONATHAN C. MAJOR, on his own behalf and on behalf of those similarly situated, Plaintiff, vs. MICROSOFT CORPORATION, a Washington Corporation, Defendant.

Case No. CJ-2000-1704

May 24, 2002, Filed

ORDER

This matter comes before the Court on the Renewed Motion to Dismiss of defendant Microsoft Corporation ("Microsoft").

On November 17, 2000; this Court entered an order dismissing the original Petition: The Court concluded that the claims as originally pled were barred by the rule of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, barring antitrust damage claims by indirect purchasers. However, the Court granted plaintiff Jonathan C. Major ("Major") the opportunity to replead and, on December 14, 2000, Major filed his First Amended Petition. On January 12, 2001, Microsoft removed the case to the United States District Court for the Northern District of Oklahoma. The Judicial Panel on Multidistrict Litigation then issued **[***9]** a Conditional Transfer Order, transferring the case to the United States District Court for the District of Maryland, for consolidation with all other federal court putative class action antitrust actions pending against Microsoft. The U.S. District Court for the Northern District of Oklahoma subsequently remanded the case to this Court, and Microsoft filed its Renewed Motion to Dismiss.

In his First Claim for Relief in the First Amended Petition, Major claims Microsoft has violated Oklahoma's Antitrust Reform Act, *79 O.S. §§ 201, et seq.* by monopolizing trade and commerce relating to operating systems for Intel-based personal computers within the State of Oklahoma. Major further alleges Microsoft has conspired with distributors to fix prices for its Windows 98 operating system at an unlawful monopoly price. In his Second Claim for Relief, Major and the putative class claim entitlement to a modification of the price provisions of their contracts for the purchase and use of Windows 98 under the "unconscionability" section of the Oklahoma Uniform Commercial Code ("UCC"), *12A O.S. § 2-302*. In his Third Claim for Relief, Major **[***10]** contends that Microsoft's conduct and business practices constitute unfair and deceptive business practices as those terms are defined in the Oklahoma Consumer Protection Act ("CPA"), *15 O.S. §§ 751, et seq.* and that he and each member of the putative class is entitled to recover damages therefor.

A motion to dismiss for failure to state a cause of action will not be sustained unless it should appear without doubt that the plaintiff can prove no set of facts in support of the claim for relief. *12 O.S. § 2012*, Committee Comment; *Brock v. Thompson, 1997 OK 127, P7, 948 P.2d 279, 284*. Under most circumstances a plaintiff's petition is only dismissible for want of a cognizable legal theory of liability or for insufficient facts under the advanced theory. *Lockhart v. Loosen, 1997 OK 103, P5, 943 P.2d 1074, 1078*. A petition must not be dismissed for failure to state a legally cognizable claim unless the allegations indicate beyond any doubt that the litigant can prove no set of facts which would entitle him to relief. *Frazier v. Bryan Memorial Hospital Authority, 1989 OK 73, P13, 775 P.2d 281, 287*. **[***11]**

This Court previously ruled that the Illinois Brick direct purchaser rule was incorporated into Oklahoma law when Oklahoma enacted its Antitrust Reform Act (the "Act") in 1998. Federal antitrust statutes were adopted almost verbatim. The Oklahoma legislature manifested its clear intent to harmonize the Act with federal ***antitrust law*** when it enacted *§ 212*, which states:

> The provisions of this act shall be interpreted in a manner consistent with Federal ***Antitrust Law*** *15 U.S.C., Section 1 et seq.* and the case law applicable thereto.

Oklahoma has chosen not to legislatively overturn the direct purchaser rule. Therefore, this Court concluded - and again concludes - that the Illinois Brick direct purchaser rule is controlling law in Oklahoma. [1]

[*12]** **[**515]** The Court rejected - and again rejects - Major's argument that the End User Licensing Agreement ("EULA") made Major a direct purchaser by giving him a direct contractual relationship with Microsoft. The EULA does not make Major or those similarly situated "direct buyers." Major did not purchase his product directly from Microsoft. The Court concludes that the relationship established through the EULA between Microsoft and the end user is insufficient to make the end user a direct purchaser for the purposes of Illinois Brick, See, e.g. *Minuteman, L.L.C. v. Microsoft Corp.,795 A.2d 833, 147 N.H. 634 (N.H. 2002)*; *Siena v. Microsoft Corp.796 A.2d 461, 2002 WL 971877 (R.I. 2002)*; *Vacco v. Microsoft Corp. 793 A.2d 1048, 260 Conn. 59 (Conn. 2002)*; and *Pomerantz v. Microsoft Corp., 50 P.3d 929, 2002 WL 926997 (Colo. App. 2002)*.

Major asserts three exceptions to the Illinois Brick direct purchaser rule: 1) a vertical price-fixing conspiracy exception; 2) the control exception, applicable to purchases from an entity owned or controlled by the antitrust violator; **[***13]** and 3) the cost-plus contact exception.

1. Vertical Price-Fixing Conspiracy.

Major alleges that Microsoft entered into "a Vertical price-fixing conspiracy" with the three largest PC manufacturers - Compaq, Dell and NEC. First Amended Petition, P50.

Illinois Brick does not mention a "vertical conspiracy" exception. Judge Posner, writing for a Seventh Circuit panel, wrote that "Utilicorp implies that the only exceptions to the Illinois Brick doctrine are those stated in Illinois Brick itself." In re Brand name *Prescription Drugs Antitrust Litigation, 123 F.3d 599, 605 (7th Cir. 1997)*.

Even if one assumes a vertical price-fixing conspiracy exception is cognizable, it applies only to one who purchases an overpriced good from a member of the price-fixing conspiracy, as such an individual arguably bears the overcharge directly and the policy factors underlying Illinois Brick are not at issue. *In re Mid-Atlantic Toyota Antitrust Litigation. 516 F. Supp. 1287, 1294-5 (D.Md. 1981)*. In this case, Major alleges he purchased a copy of Windows 98 from Office Depot and a computer with Windows 98 preinstalled from Gateway. Major does **[***14]** not allege a purchase from a member of the conspiracy; his allegations are insufficient to avoid the direct purchaser rule.

Alternatively and in addition, Major's First Amended Petition fails because he has not joined the alleged co-conspirators. See, e.g., *McCarthy v. Recordex Service, Inc., 80 F.3d 842, 854-55 (3rd Cir. 1996)*. The narrow exception to the rule requiring joinder, set forth in *Lowell v. American Cyanamid Co., 177 F.3d 1228 (11th Cir. 1999)*, is inapplicable here. In Lowell no problems of double recovery were present because only one illegal act (the vertical conspiracy) was present and only one set of potential plaintiffs existed. Here, Major alleges a separate antitrust violation - monopolization of the market for Windows 98 - which potentially caused injury to direct purchasers other than the alleged co-conspirators. Thus, this case presents problems of double recovery to which the Illinois Brick doctrine is applicable.

Alternatively and in addition, Major has failed to allege a vertical conspiracy to fix prices at which Major and the putative class purchased the products (the PCs) sold by the original equipment manufacturers **[***15]** ("OEMs").

---

[1] Under Illinois Brick, indirect purchasers lack standing to proceed. The rationale behind the rule, as explained by the United States Supreme Court, is that "the direct purchaser rule serves, in part, to eliminate the complications of apportioning overcharges between direct and indirect purchasers." *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 208, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*. It also "serves to eliminate multiple recoveries." Id., at *497 U.S. 199, 212, 111 L. Ed. 2d 169, 110 S. Ct. 2807*. Finally, the rule provides the direct purchasers, those in the best position to observe an alleged violator's conduct, with incentives to bring private antitrust actions and thus promotes the vigorous enforcement of the antitrust laws. *Id. at 214-215*. The Court recognizes that its decision in Illinois Brick often denies relief to consumers who have paid inflated prices because of their status as indirect purchasers. *Utilicorp, 497 U.S. at 211-212*.

2. The Ownership or Control Exception. .

The Court in Illinois Brick noted, in a footnote, that in some situations an indirect purchaser might be permitted to maintain an antitrust action "where the direct purchaser [in this case the OEMs and/or distributors of upgrade CD ROMS] is owned or controlled by its customer." *Illinois Brick, 431 U.S. at 736 n. 16, 97 S. Ct. at 2070 n. 16, 52 L. Ed. 2d at 719 n. 16*. Courts have narrowly construed this exception and limited it to relationships involving such functional economic **[**516]** or other unity between the direct purchaser and either the defendant or the indirect purchaser that there effectively has been only one sale. *Jewish Hospital Ass'n v. Stewart Mech. Enterp., Inc., 628 F.2d 971, 975 (6th Cir. 1980)*. The Seventh Circuit has limited the control exception to situations where a defendant controls the direct purchasers "through interlocking directorates, minority stock ownership, loan agreements that subject the wholesalers to the manufacturers' operating control, trust agreements, and other modes of control separate from ownership of a majority of the wholesalers' common stock." In **[***16]** re Brand name *Prescription Drugs Antitrust Litigation, 123 F.3d 599, 605 (7th Cir. 1997)*. Another federal court has held that "to fall within the realm of the [ownership or control] exception to the general rule of Illinois Brick, [the indirect purchaser] must show that [a party] owns or exerts such significant control over (the direct purchaser] as to be virtually the same entity." *Fisher v. Wattles, 639 F. Supp. 7, 9 (M.D. Pa. 1985)*.

In the present case, Major has alleged that Microsoft dictates *the price that it charges OEMs* for Windows depending upon the degree to which the individual OEMs have complied with Microsoft's wishes in pursuing its "jihad" in the "browser war." First Amended Petition, P61. Major does not allege that Microsoft owns or directly controls the OEMs and distributers of upgrade CD ROMS or that Microsoft controls or determines the pricing of Windows 98 by resellers. In short, Major has not alleged such functional economic or other unity that there effectively has been only one sale. *Pomerantz v. Microsoft Corp.,50 P.3d 929, 2002 WL 926997* at *7 (Colo. App. 2002). Absent such an allegation, **[***17]** the rationale behind Illinois Brick clearly applies - the finder of fact would have to apportion the alleged overcharge between the OEMs and the indirect purchasers. "That's just what the Supreme Court in … Illinois Brick … told the federal courts not to do." In re Brand name *Prescription Drugs Antitrust Litigation, 123 F.3d 599, 606 (7th Cir. 1997)*. Unless the alleged control extends to the price charged for operating systems or computers, the "problems of proving the amount of the pass-on remain undiminished." *Jewish Hospital, 628 F.2d at 975*. Accordingly, the "control" exception to the Illinois Brick rule does not save the First Amended Petition.

3. The Pre-Existing Cost-Plus Contract Exception.

In Illinois Brick, the Supreme Court observed:

> In a [pre-existing cost-plus contract] situation, the [direct] purchaser is insulated from any decrease in its sales as a result of attempting to pass on the overcharge, because its customer is committed to buying a fixed quantity regardless of price. The effect of the overcharge is essentially determined in advance, without reference to the interaction of supply and demand **[***18]** that complicates the determination in the general case. *431 U.S. at 736*.

Plaintiff alleges, on information and belief, that OEMs and distributors "have passed all of Microsoft's monopoly price on to Plaintiff and the Class" and, as such, the transaction is "the functional equivalent of a cost-plus contract." Amended Petition, P69. Plaintiff does not allege a pre-existing cost-plus contract. If a seller's recovery of costs equates to a "pre-existing cost-plus contract," the exception to Illinois Brick would swallow the rule. As the Supreme Court explained in *Kansas v. Utilicorp. 497 U.S. 199, 218, 110 S. Ct. 2807, 2817-18, 111 L. Ed. 2d 169 (1990)*, where utilities were required by law to pass on all of their costs, "we might allow indirect purchasers to sue only when, by hypothesis, the direct purchaser will bear no portion of the overcharge and otherwise suffer no injury." The Supreme Court held that even where a utility raised its prices to cover its costs, the Court could not ascertain its precise injury because the utility's customers made no commitment to purchase any particular quantity of gas and the utility itself had no guarantee of **[***19]** any particular profit. The utility could claim injury as a consequence of elasticity of demand - the decreased volume of sales caused by the higher prices the utility had to charge. The Court went farther to state that "even if the utility customers **[**517]** had a highly inelastic demand for natural gas…the need to inquire into the precise operation of market forces would negate the simplicity and certainty that could justify a cost-plus contract exception." If the legally required pass-on in Utilicorp did not qualify as a cost-plus contract, Major's conclusory allegations of pass-on cannot do so.

4. Plaintiff's Claims of Unique and Direct Injury.

Major argues he has standing because Microsoft has caused him to suffer unique injury as a direct result of its practices. Specifically, Major alleged that end-users "were deprived of the benefits of competition including, but not limited to, technological innovation, market choice, product variety, and substitutable supply, and were forced to purchase multiple copies of Windows." P80, First Amended Petition. Major also alleges that the illegal tie-in of Internet Explorer to the operating system resulted in multiple injuries to all Windows **[***20]** 98 purchasers. Such injuries include: loss of speed and memory caused by the technological tie; loss of operating system stability and increased susceptibility to viruses or security breaches; and deprivation of consumer choice. The MDL Court assigned to Microsoft antitrust litigation has rejected claims for injury to the market as a whole, including the alleged denial of better, technologically superior products. *In re Microsoft Corp. Antitrust Litigation, 127 F. Supp. 2d 702, 710-711 (D.Md. 2001)*. The MDL Court held that consumer allegations of denial of the benefit of technologically superior products and competition are allegations of "a generalized societal harm and, under well-established principles, the suffering of such damage is insufficient to confer standing." *Id. at 711* see also *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 340 n. 8, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)* ("The antitrust injury requirement cannot be met by broad allegations of harm to the "market" as an abstract entity").

Major's claim of "performance degradation" resulting from the tie-in of Internet Explorer is simply a claim that he **[***21]** should have obtained more than he did and that Microsoft charged too much for the product. The measure of damages is the amount of the overcharge, and the problems identified in Illinois Brick persist.

5. Major's Claim for Modification of an Unconscionable Contract Term.

Section 2-302 of the Uniform Commercial Code is not a basis for affirmative relief. *Cowin Equip. Co. v. General Motors Corp., 734 F.2d 1581, 1582 (11th Cir. 1984)*; *Best v. United States Nat'l Bank,78 Ore. App. 1, 714 P.2d 1049, 1055-1056 (Ore. App. 1986)* (surveying cases in numerous states that *§ 2-302* is not a basis for an award of damages).

6. Major's Claim Under the Oklahoma Consumer Protection Act.

Major's claims under the Oklahoma Consumer Protection Act ("CPA") are predicated on the same factual allegations underlying Major's antitrust claim. As set forth above, the Oklahoma legislature has expressed the clear intention that Oklahoma's antitrust laws be interpreted in a manner consistent with federal ***antitrust law***. Microsoft contends that indirect purchasers whose claims are barred under the antitrust laws should not be permitted to assert a claim under the **[***22]** CPA for the same allegedly anticompetitive conduct.

Upon consideration of the arguments an authorities presented by the parties, this Court concludes that the CPA should not extend to anticompetitive conduct and that Major should not be permitted under the law to avoid the United States Supreme Court's policy choices expressed in Illinois Brick by recasting his claims of anticompetitive conduct as a Consumer Protection Act claim. This particular issue must obviously be resolved by our appellate courts. Courts in other states have refused to permit an end-run around Illinois Brick by permitting other statutory claims upon the same factual allegations underlying the state antitrust claim. Vacco v. Microsoft, *260 Conn. 59, 793 A.2d 1048, 2002 WL 519752 (Conn. 2002)*; *Blewett v. Abbott Laboratories, 86 Wn. App. 782, 938 P.2d 842 (Wash. App. 1997)* ("[This is the same claim with a different label.... We will not interpret the **[**518]** state ***antitrust law*** in a manner that 'rewards creative pleading at the expense of consistent application of legal principles.'")

For the reasons set forth above, Defendant's Renewed Motion to Dismiss is granted.

IT IS SO **[***23]** ORDERED this 24th day of May, 2002.

HN6[] Appeals, Standards of Review

In a Fed. R. Civ. P. 12(b)(1) appeal, the appellate court reviews only whether the allegations on the face of the complaint, taken as true, allege facts sufficient to invoke the jurisdiction of the district court.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN7[] Subject Matter Jurisdiction, Jurisdiction Over Actions

Challenges to subject matter jurisdiction under Fed. R. Civ. P. 12(b)(1) may be "facial" or "factual." Facial attacks contest the sufficiency of the pleadings, and the trial court must accept the complaint's allegations as true. In contrast, a trial court considering a factual attack accords plaintiff's allegations no presumption of truth. In a factual attack, the court must weigh the evidence relating to jurisdiction, with discretion to allow affidavits, documents, and even limited evidentiary hearings. Where the challenge to the district court's jurisdiction was a factual one under Fed. R. Civ. P. 12(b)(1), the appellate court is not confined to the allegations in the complaint (nor is the district court) and can look beyond the pleadings to decide factual matters relating to jurisdiction.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

International Trade Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **International Aspects, Foreign Trade Antitrust Improvements Act**

Section 402 of the Foreign Trade Antitrust Improvements Act provides: The Sherman Act shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless -- (1) such conduct has a direct, substantial, and reasonably foreseeable effect -- (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or (B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and (2) such effect gives rise to a claim under the provisions of the Sherman Act other than this section. If the Sherman Act applies to such conduct only because of the operation of paragraph (1)(B), then the Sherman Act shall apply to such conduct only for injury to export business in the United States. *15 U.S.C.S. § 6a*.

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN9[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The Foreign Trade Antitrust Improvements Act is described as "inelegantly phrased." In rather convoluted language, the Foreign Trade Antitrust Improvements Act introduces two requirements that must be satisfied for a plaintiff to state a valid antitrust claim regarding conduct involving trade or commerce with foreign nations. The first is whether the conduct in fact involves trade or commerce (other than import trade or import commerce) with foreign nations, as those terms are understood under the statute. *15 U.S.C.S. § 6a*. The second evaluates whether defendants' conduct has a direct, substantial, and reasonably foreseeable anticompetitive effect on United States commerce and whether that conduct "gives rise" to a Sherman Act claim. *15 U.S.C.S. § 6a(1)-(2)*. The first inquiry focuses on defendants' conduct, while the second inquiry focuses on the geographical effect of that conduct.

Governments > Legislation > Interpretation

HN10[] **Legislation, Interpretation**

Absent a clearly expressed legislative intention to the contrary, statutory language must ordinarily be regarded as conclusive.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

International Trade Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] International Aspects, Foreign Trade Antitrust Improvements Act

The plain language of the Foreign Trade Antitrust Improvements Act does not limit its scope to "export" or "wholly foreign" commerce. Instead, it addresses whether defendants' conduct involves trade or commerce (other than import trade or import commerce) with foreign nations. *15 U.S.C.S. § 6a*.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

International Trade Law > General Overview

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

International Law > Authority to Regulate > General Overview

HN12[] International Aspects, Foreign Trade Antitrust Improvements Act

The first inquiry, regarding the two requirements that must be satisfied for a plaintiff to state a valid antitrust claim regarding conduct involving trade or commerce with foreign nations, derives from *15 U.S.C.S. § 6a* of the Foreign Trade Antitrust Improvements Act. The court must determine whether the conduct plaintiffs describe is trade or commerce with foreign nations or import trade or commerce with foreign nations. Stated differently, under the Foreign Trade Antitrust Improvements Act, the Sherman Antitrust Act applies to conduct "involving" import trade or import commerce with foreign nations, provided other jurisdictional hurdles are cleared.

Business & Corporate Compliance > ... > Insurance Company Operations > Conducting Business > Foreign Insurers

HN13[] International Aspects, Commerce With Foreign Nations

The phrase "trade or commerce with foreign nations" includes transactions between foreign and domestic commercial entities, not just transactions involving a foreign sovereign. Generally, the conduct must involve a

United States purchaser or seller. But where conduct allegedly violating the Sherman Act is directed at the competitiveness of a foreign market, such conduct involves "foreign trade or commerce."

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

International Trade Law > General Overview

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Jurisdiction

International Law > Authority to Regulate > General Overview

HN14[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The initial sentence of *15 U.S.C.S. § 6a*, along with its "import trade or commerce" parenthetical, provides that the ***antitrust law*** shall apply to conduct "involving" import trade or commerce with foreign nations (provided, of course, that jurisdiction is found to exist under the Sherman Act itself).

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Trade Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **International Aspects, Foreign Trade Antitrust Improvements Act**

Since the Foreign Trade Antitrust Improvements Act (FTAIA) clearly states that the Sherman Act is not applicable to trade or commerce other than import trade or import commerce, the Sherman Act continues to apply to import trade and import commerce, thereby rendering the FTAIA's requirement of a direct, substantial, and reasonably foreseeable effect inapplicable to an action alleging an impact on import trade and import commerce.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

International Trade Law > International Commerce & Trade > Exports & Imports > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

International Trade Law > General Overview

HN16[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The dispositive inquiry is whether the conduct of defendants, not plaintiffs, involves "import trade or commerce." The Foreign Trade Antitrust Improvements Act does not define the term "import," but the term generally denotes a product (or perhaps a service) has been brought into the United States from abroad.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Trade Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The statutory term "involving" has a precise meaning. Regarding the comparison between the "import trade or commerce" language with another provision of *15 U.S.C.S. § 6a*: Admittedly, the Foreign Trade Antitrust Improvements Act differentiates between conduct that "involves" such import commerce, and conduct that directly, substantially, and foreseeably affects such commerce. To give the latter provision meaning, the former must be given a relatively strict construction.

Antitrust & Trade Law > Sherman Act > Claims

International Law > Authority to Regulate > Anticompetitive Activities

International Trade Law > General Overview

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > Sherman Act > General Overview

HN18[] **Sherman Act, Claims**

Generally, federal antitrust laws do not extend to protect foreign markets from anticompetitive effects and do not regulate the competitive conditions of other nations' economies. But it is well established by now that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States.

Antitrust & Trade Law > Sherman Act > General Overview

International Law > Authority to Regulate > Anticompetitive Activities

HN19[] **Antitrust & Trade Law, Sherman Act**

The geographic target of the alleged anticompetitive conduct matters greatly. There is a distinction between anticompetitive conduct directed at foreign markets that only affects the competitiveness of foreign markets and anticompetitive conduct directed at foreign markets that directly affects the competitiveness of domestic markets. The antitrust laws apply to the latter sort of conduct and not the former.

Antitrust & Trade Law > Sherman Act > General Overview

HN20[] Antitrust & Trade Law, Sherman Act

United States antitrust laws only apply when a price-fixing conspiracy affects the domestic economy.

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN21[] Class Actions, Appellate Review

It is the general rule that issues raised for the first time at the appellate level will not be reviewed.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Opinion by: SCIRICA

Opinion

[*296] OPINION OF THE COURT

SCIRICA, Circuit Judge.

At issue in this proposed class action is the extraterritorial scope of the Sherman Antitrust Act and its application in this case. The putative plaintiff class comprises certain foreign travel agents located outside the United States who allege major United States air carriers and their trade association illegally conspired to lower their sales commissions. The District Court held the Foreign Trade Antitrust Improvements Act, *15 U.S.C. § 6a*, deprived it of subject matter jurisdiction, barring plaintiffs' claim. We will affirm.

I.

The major United States air carriers have delegated the licensing of travel agents to their trade association, the International Air Transport Association (IATA). [1] All travel agents must have an IATA license to access reservation

---

[*] The Honorable Jane A. Restani, Judge, United States Court of International Trade, sitting by designation.

[1] IATA was founded in 1945 by the then-major global airlines, with the goals of promoting international air transportation and providing a means for collaboration. Section 412(b) of the Federal Aviation Act required the Civil Aeronautics Board to approve any agreement by air carriers it did not find "adverse to the public interest" or "in violation of the act." See Federal Aviation Act of 1958, 49 U.S.C. § 1382, amended by International Air Transportation Act of 1979, Pub. L. No. 96-192, 94 Stat. 35 (1979); see also CAB Order 80-4-113, Apr. 15, 1980 (describing the statute). In addition, § 414 of the Federal Aviation Act required the CAB to immunize from the antitrust laws transactions specifically approved or necessarily contemplated by an order of approval under § 412, provided such immunity was found to be required in the public interest. Id. Before the passage of the Airline Deregulation Act of 1978, such immunity attached automatically under § 414 upon approval. Id.

The CAB approved the organization of IATA in 1946 and granted indefinite approval to the IATA in 1955, after several one-year temporary approvals. IATA Traffic Conference Resolution, 6 CAB 639 (1945); CAB Order E-9305, June 15, 1955. Prior to 1979, agreements affecting foreign air transportation were approved and immunized by the CAB under broad public interest standards. After the passage of the Airline Deregulation Act, IATA amended its agreement, replacing its "Provisions for the Conduct of the IATA Traffic Conferences." See CAB Order 80-4-113 (describing the amendment).

The government has continued, more recently in the form of the Department of Transportation, to exercise regulatory oversight over the Provisions for the Operation of IATA Traffic Conferences. See generally DOT Order 88-3-67, Mar. 31, 1988.

systems of United States-based airlines. In order to make a customer reservation, a travel agent can only enter the airline's electronic system with an IATA number. The travel agent's commission is automatically **[**3]** computed from a database in the airline's electronic system.

[4]** The Passenger Tariff Coordinating Conference is an IATA committee of airline company representatives who determine and fix the commission rates for travel **[*297]** agents. At the July 1999 Passenger Tariff Coordinating Conference meeting in Montreal, Canada, the Conference reduced commissions paid to IATA-accredited agents in Central America and Panama to a flat seven-percent rate. Previous commission rates had varied from country to country and ranged as high as eleven percent.

On December 27, 1999, Grupo Taca, an alliance of the principal Central American airlines (and not a party to this suit), announced it would pay Central American travel agents only six-percent commissions. The next day, American Airlines announced it would pay six-percent commissions on tickets sold in Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama. Soon thereafter, Continental Airlines, United Airlines, and Delta Airlines followed suit.

Defendants American Airlines, Delta Airlines, and United Airlines are members of the Passenger Tariff Coordinating Conference. Defendant Continental Airlines is not. None of the airline defendants' representatives attended the 1999 Passenger Tariff Coordinating **[**5]** Conference meeting in Montreal. The minutes of the meeting reflect that "U.S.-based TC [Tariff Commission] Members were prohibited by their authorities from participating in such discussions and . . . were therefore not present for this part of the Agenda." The complaint alleges that during the Montreal meeting, an unidentified Passenger Tariff Coordinating Conference member proposed the reduction in commissions because new technology had streamlined the travel agents' traditional ticket-selling functions.

The named plaintiffs are two San Jose, Costa Rica travel agencies and two Managua, Nicaragua travel agencies, who filed suit on behalf of a class of similarly situated travel agencies. The complaint alleged that four major United States air carriers -- American Airlines, Continental Airlines, Delta Airlines, and United Airlines -- and IATA violated the Sherman Antitrust Act by conspiring to lower travel agents' commissions, a form of horizontal price fixing constituting a per se violation of the antitrust laws. See *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223-26, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*. All four airline defendants are based in the United **[**6]** States, providing air passenger service between United States cities and locations within Latin America and the Caribbean (and elsewhere).

Plaintiffs contend defendants implemented the conspiracy in December 1999, when they began paying the lower six-percent commissions. The reduced commissions allegedly affected United States commerce because reservations on the four defendant airlines account for a substantial portion of the business of Latin American and Caribbean travel agents. The complaint alleges the Passenger Tariff Coordinating Conference meeting in Montreal disguised a pre-arranged agreement by United States air carriers to create the illusion of non-involvement in the reduction of commission rates, in an attempt to avoid antitrust liability under United States laws. Plaintiffs contend defendants assisted in planning this agenda, were aware the vote would be taken and endorsed the reduced rates. Plaintiffs claim the loss of substantial commissions, causing one member of the proposed class to close its business. They request treble damages.

The District Court dismissed the action under *Fed. R. Civ. P. 12(b)(1)*, holding, "Plaintiffs aver nothing from which this Court could **[**7]** find that Defendants' purported conspiracy caused any injury which was felt in the U.S. or which affected the American economy in any way." *Turicentro, S.A. v. Am. Airlines, Inc., 152 F. Supp. 2d 829, 834 (E.D. Pa. 2001)*. The **[*298]** District Court did not address defendants' other arguments in support of dismissal. We must determine whether the District Court erred in finding the Foreign Trade Antitrust Improvements Act deprived it of subject matter jurisdiction.

II.

We have jurisdiction under *28 U.S.C. § 1291*.

III.

HN1[] Federal jurisdiction obtains for "any civil action or proceeding arising under any Act of Congress regulating commerce or protecting trade and commerce against restraints and monopolies." *28 U.S.C. § 1337(a)*. HN2[] The Sherman Antitrust Act regulates "restraints and monopolies." *Sections 1* and *2* of the Act provide:

> HN3[] Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal . . . . Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other **[**8]** person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony . . . .

15 U.S.C. §§ 1, *2*. [2]

Federal courts have often disagreed about the extraterritorial scope of the Sherman Act. Various judicial constructions of the Act were developed over the last century. See *Den Norske Stats Oljeselskap AS v. HeereMac VOF et al., 241 F.3d 420, 423-24 (5th Cir. 2001)* ("Statoil") ("The history of this body of case law is confusing and unsettled."). *Am. Banana Co. v. United Fruit Co., 213 U.S. 347, 53 L. Ed. 826, 29 S. Ct. 511 (1909)* (Holmes, J.), was the first time the Supreme Court considered the extraterritorial application of the Sherman Act, holding it did not apply to conduct occurring **[**9]** outside United States borders. *Id. at 357-58*. Over time, the Supreme Court altered its approach, holding plaintiffs could bring Sherman Act claims against foreign defendants, provided some of defendants' conduct occurred within the United States. See, e.g., *United States v. Sisal Sales Corp., 274 U.S. 268, 275-76, 71 L. Ed. 1042, 47 S. Ct. 592 (1927)*.

In 1945, the Court of Appeals for the Second Circuit established an "effects test" to determine whether there was antitrust jurisdiction over foreign conduct. See *United States v. Aluminum Corp. of Am., 148 F.2d 416, 443-44 (2d Cir. 1945)* (Hand, J.). Aluminum Corp. held that a federal court had jurisdiction over the conduct of a foreign corporation where the conduct was intended to, and did in fact, affect United States commerce. *Id. at 443* ("We should not impute to Congress an intent to punish all whom its courts can catch, for conduct which has no consequences within the United States." (citation omitted)). Over the next half-century, the "effects test," despite its apparent simplicity, proved difficult to apply in many Sherman Act cases. Considerations of international comity, not **[**10]** expressly considered in Aluminum Corp., occasionally entered the analysis of later courts. See, e.g., *Am. Rice, Inc. v. Ark. Rice Growers Co-op. Ass'n, 701 F.2d 408, 413-16 (5th Cir. 1983)*; *Timberlane Lumber Co. v. Bank of Am., 549 F.2d 597, 613-15 (9th Cir. 1976)*.

Legislating on this background, Congress in 1982 enacted Title IV of the Export Trading Company Act -- known as the **[*299]** Foreign Trade Antitrust Improvements Act -- to facilitate domestic exports and to clarify the application of United States antitrust laws to foreign conduct. The Foreign Trade Antitrust Improvements Act encourages United States exports by facilitating the formation of export trading companies and by exempting certain export transactions from the antitrust laws. *15 U.S.C. § 4001(b)*; *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 796 n.23, 125 L. Ed. 2d 612, 113 S. Ct. 2891 (1993)* ("The FTAIA was intended to exempt from the Sherman Act export transactions that did not injure the United States economy . . . ."). The Foreign Trade Antitrust Improvements Act also promotes the "certainty in assessing the applicability of American ***antitrust law*** to **[**11]** international business transactions and proposed transactions." H.R. REP. NO. 97-686 (1982), reprinted in 1982 U.S.C.C.A.N. 2494. [3]

---

[2] HN4[] *15 U.S.C. § 4* provides, "The several district courts of the United States are invested with jurisdiction to prevent and restrain violations of [the Sherman Act]."

[3] As the United States Court of Appeals for the Fifth Circuit has observed, "The federal courts have generally disagreed as to the extraterritorial reach of the antitrust laws . . . . However, as far as this appeal is concerned, our work is simplified by Congress' passage in 1982 of the FTAIA, which specifically exempts certain foreign conduct from the antitrust laws." *Statoil, 241 F.3d at 423-24*.

Although passed two decades ago, few federal courts have had occasion to apply the Foreign Trade Antitrust Improvements Act. In one such case, we held the Act demonstrated Congress's intent to exempt from the Sherman Act export transactions not injuring the United States economy, thereby relieving exporters from a competitive disadvantage in foreign trade. *Carpet Group Int'l v. Oriental Rug Imps. Ass'n, 227 F.3d 62, 71 (3d Cir. 2000)*; see also H.R. REP. NO. **[**12]** 97-290 (1982), reprinted in 1982 U.S.C.C.A.N. 1234 ("It is the purpose of this act to increase United States exports of products and services by . . . modifying the application of the antitrust laws to certain export trade."). In Carpet Group, we held defendants' conduct controlled the inquiry over subject matter jurisdiction. *227 F.3d at 73* ("The crux of [plaintiffs'] case involves [defendants'] conduct in the United States, not conduct abroad. We hold that these activities are not the type of conduct Congress intended to remove from our antitrust jurisdiction when it enacted the FTAIA."); see also *Caribbean Broad. Sys., Ltd. v. Cable & Wireless PLC, 331 U.S. App. D.C. 226, 148 F.3d 1080, 1086-87 (D.C. Cir. 1998)* (alleged injury to advertisers in the United States satisfied the Foreign Trade Antitrust Improvements Act, regardless of the geographic location of the supplier plaintiffs).

In Carpet Group, we addressed the applicability of the Foreign Trade Antitrust Improvements Act before considering general subject matter jurisdiction under the *Sherman Antitrust Act. 227 F.3d at 69*. We will employ a similar approach here. If the Foreign Trade **[**13]** Antitrust Improvements Act does not bar this suit, then it will be necessary to address subject matter jurisdiction under the Sherman Act.

Plaintiffs contend there is subject matter jurisdiction and the Foreign Trade Antitrust Improvements Act does not bar their claim. As noted, the District Court dismissed plaintiffs' claim under *Fed. R. Civ. P. 12(b)(1)*, holding:

> Assuming as true that the alleged conspiracy and the actions taken in furtherance thereof did occur within United States commerce, the plaintiffs aver nothing from which this Court could find that Defendants' purported conspiracy caused any injury which was felt in the U.S. or which affected the American economy in any way.

[*300] *152 F. Supp. 2d at 834*. ***HN5***[] We exercise plenary review over this legal conclusion. *Gould Elec., Inc. v. United States, 220 F.3d 169, 176 (3d Cir. 2000)*. ***HN6***[] In this *Rule 12(b)(1)* appeal, "we review only whether the allegations on the face of the complaint, taken as true, allege facts sufficient to invoke the jurisdiction of the district court." *Licata v. United States Postal Serv., 33 F.3d 259, 260 (3d Cir. 1994)*; see also *Mortensen v. First Fed. Sav. & Loan Ass'n, 549 F.2d 884, 891 (3d Cir. 1977)* **[**14]** (when considering a "facial" attack under *Rule 12(b)(1)*, "the court must consider the allegations of the complaint as true"). [4]

[15]** IV.

HN8[] Section 402 of the Foreign Trade Antitrust Improvements Act provides:

> [The Sherman Act] shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless --
> (1) such conduct has a direct, substantial, and reasonably foreseeable effect --
> (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or

---

[4] ***HN7***[] Challenges to subject matter jurisdiction under *Rule 12(b)(1)* may be "facial" or "factual." Facial attacks, like this one, contest the sufficiency of the pleadings, and the trial court must accept the complaint's allegations as true. *NE Hub Partners, L.P. v. CNG Transmission Corp., 239 F.3d 333, 341 & n.7 (3d Cir. 2001)*. In contrast, a trial court considering a factual attack accords plaintiff's allegations no presumption of truth. In a factual attack, the court must weigh the evidence relating to jurisdiction, with discretion to allow affidavits, documents, and even limited evidentiary hearings. Accord *Garcia v. Copenhaver, Bell & Assocs., 104 F.3d 1256, 1260-61 (11th Cir. 1997)*; *Ohio Nat'l Life Ins. Co. v. United States, 922 F.2d 320, 325 (6th Cir. 1990)*; *Oaxaca v. Roscoe, 641 F.2d 386, 391 (5th Cir. 1981)*. In *Cestonaro v. United States, 211 F.3d 749 (3d Cir. 2000)*, we said, "Because the government's challenge to the District Court's jurisdiction was a factual one under *Fed. R. Civ. P. 12(b)(1)*, we are not confined to the allegations in the complaint (nor was the District Court) and can look beyond the pleadings to decide factual matters relating to jurisdiction." *Id. at 752* (citation omitted).

(B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and
(2) such effect gives rise to a claim under the provisions of [the Sherman Act] other than this section.
If [the Sherman Act] applies to such conduct only because of the operation of paragraph (1)(B), then[the Sherman Act] shall apply to such conduct only for injury to export business in the United States.

15 U.S.C. § 6a (1997).

As noted, the central issue on appeal is whether the Foreign Trade Antitrust Improvements Act bars subject matter jurisdiction in this Sherman Antitrust Act case. Therefore, our primary task is one of statutory interpretation. **[**16]** Cf. *United States v. Knox, 32 F.3d 733, 744 (3d Cir. 1994)*. ***HN9***[] We have described the Foreign Trade Antitrust Improvements Act as "inelegantly phrased." *Carpet Group, 227 F.3d at 69* (quoting *United States v. Nippon Paper Indus. Co., 109 F.3d 1, 4 (1st Cir. 1997))*. In rather convoluted language, the Foreign Trade Antitrust Improvements Act introduces two requirements that must be satisfied for a plaintiff to state a valid antitrust claim regarding "conduct involving trade or commerce . . . with foreign nations." [5] **[**17]** The first is whether the conduct in fact involves "trade or commerce (other than import trade or import commerce) with foreign nations," as **[*301]** those terms are understood under the statute. *15 U.S.C. § 6a*. The second evaluates whether defendants' conduct has "a direct, substantial, and reasonably foreseeable" anticompetitive effect on United States commerce and whether that conduct "gives rise" to a Sherman Act claim. Id. *§ 6a(1)-(2)*. The first inquiry focuses on defendants' conduct, while the second inquiry focuses on the geographical effect of that conduct. [6]

[18]** A.

HN12[] The first inquiry derives from *§ 6a* of the Foreign Trade Antitrust Improvements Act: "[The Sherman Act] shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless . . . ." We must determine whether the conduct plaintiffs describe is "trade or commerce with foreign

---

[5] Whether plaintiffs are United States citizens is irrelevant to our inquiry. *15 U.S.C. § 15* ("Suits by persons injured") provides jurisdiction for damage claims brought by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws . . . ." Id. The legislative history of the Export Trading Company Act states, "Foreign purchasers should enjoy the protection of our antitrust laws in the domestic marketplace, just as our citizens do. Indeed, to deny them this protection could violate the Friendship, Commerce and Navigation treaties this country has entered into with a number of foreign nations." H.R. REP. NO. 97-686, reprinted in 1982 U.S.C.C.A.N. 2495. *And in Pfizer, Inc. v. India, 434 U.S. 308, 54 L. Ed. 2d 563, 98 S. Ct. 584 (1978)*, the Supreme Court held that allowing foreign plaintiffs to enforce United States antitrust laws helped compensate victims while deterring future violations. *Id. at 314-15*.

[6] Plaintiffs contend the Foreign Trade Antitrust Improvements Act's principal purpose was to reduce the growing United States trade deficit. For this reason, they suggest the Foreign Trade Antitrust Improvements Act does not bar their suit because their claim involves neither "export" nor "wholly foreign" commerce, the only types of activity covered by the statutory language. Because defendants, United States companies, allegedly colluded within the United States to fix prices paid in United States dollars, plaintiffs maintain the conduct at issue cannot be described as "export commerce" or "wholly foreign commerce."

We disagree. Shreds of the Foreign Trade Antitrust Improvements Act's legislative history can be interpreted as supporting plaintiffs' argument relating to the statute's purpose. E.g., H.R. REP. NO. 97-686, reprinted in 1982 U.S.C.C.A.N. 2499 (employing the "export or purely foreign commerce" language. But as noted, the legislative history contains other justifications for the Act as well. E.g., id., reprinted in 1982 U.S.C.C.A.N. 2494 (noting the Foreign Trade Antitrust Improvements Act's "promotion of certainty in assessing the applicability of American ***antitrust law*** to international business transactions and proposed transactions"). It would therefore appear that the text of the Act demonstrates more than one purpose. More importantly, the Supreme Court has held that ***HN10***[] "absent a clearly expressed legislative intention to the contrary, [statutory] language must ordinarily be regarded as conclusive." *Escondido Mut. Water Co. v. La Jolla, Rincon, San Pasqual, Pauma & Pala Band of Mission Indians, 466 U.S. 765, 772, 80 L. Ed. 2d 753, 104 S. Ct. 2105 (1984)* (quotation and citations omitted). ***HN11***[] The plain language of the statute does not limit its scope to "export" or "wholly foreign" commerce. Instead, it addresses whether defendants' conduct "involves trade or commerce (other than import trade or import commerce) with foreign nations." *15 U.S.C. § 6a*. We must, of course, apply the plain text of the statute.

nations" or "import trade or commerce with foreign nations." [7] Stated differently, under the Foreign Trade Antitrust Improvements Act, the Sherman Antitrust Act applies to conduct "involving" import trade or import commerce with foreign nations, provided other jurisdictional hurdles are cleared. Carpet Group, 227 F.3d at 69.

1.

HN13[] The phrase "trade or commerce with foreign nations" includes transactions **[*302]** between foreign and domestic commercial entities, not just transactions involving a foreign sovereign. See, e.g., Hartford Fire Ins., 509 U.S. at 796 (Sherman Act applicable to London **[**19]** insurers engaging in unlawful conspiracies to affect United States markets); see also United States v. Holliday, 70 U.S. 407, 417, 18 L. Ed. 182 (1866) ("Commerce with foreign nations, without doubt, means commerce between citizens of the United States and citizens or subjects of foreign governments, as individuals."). Generally, the conduct must involve a United States purchaser or seller. Cf. Statoil, 241 F.3d at 426; In re Copper Antitrust Litig., 117 F. Supp. 2d 875, 882 (W.D. Wisc. 2000) ("The term 'commerce . . . with foreign nations' generally refers to transactions in which a foreign seller deals with an American purchaser, or vice versa . . . ." (citations omitted)). [8] But where conduct allegedly violating the Sherman Act is directed at the competitiveness of a foreign market, such conduct involves "foreign trade or commerce." See Kruman v. Christie's Int'l PLC, 284 F.3d 384, 395 (2d Cir. 2002) ("When there is conduct directed at reducing the competitiveness of a foreign market . . . such conduct involves foreign trade or commerce, regardless of whether some of the conduct occurred in the United States.").

[20]** The complaint alleges a conspiracy between four domestic airlines and their trade association to fix commissions paid to foreign travel agents located outside the United States. Defendants' alleged conduct was directed at reducing the competitiveness of Costa Rican, Nicaraguan, and similarly situated foreign travel agents, all of whom were foreign-based. Therefore, the complaint properly alleges trade or commerce with foreign commercial entities. [9]

[21]** 2.

Next we consider whether defendants' conduct involves "trade or commerce with foreign nations" that is "import trade or import commerce." If so, plaintiffs' claims could still be cognizable under the Sherman Act, because the Foreign Trade Antitrust Improvements Act only removes certain non-import commerce from federal antitrust jurisdiction. See Carpet Group, 227 F.3d at 69 **HN14**[] ("The initial sentence of Section 6a, along with its 'import trade or commerce' parenthetical, provides that the ***antitrust law*** shall apply to conduct 'involving' import trade or commerce with foreign nations (provided, of course, that jurisdiction is found to exist under the Sherman Act itself)."). In Carpet Group, we held, **HN15**[] "Since the FTAIA clearly states that the Sherman Act is not applicable to trade or commerce other than import trade or import commerce, the Sherman Act continues to apply to import trade and import commerce, thereby rendering the FTAIA's requirement of a direct, substantial, and reasonably foreseeable effect inapplicable to an action alleging **[*303]** an impact on import trade and import commerce." Id. at 72 (quoting 54 Am. Jur. 2d § 18, at 77)). [10]

---

[7] Of course, the conduct need not necessarily be one or the other.

[8] Article I, Section 8 of the United States Constitution gives Congress the authority to regulate interstate commerce and "commerce with foreign nations."

[9] Moreover, plaintiffs' argument is undermined by their pleadings. Section One of the Sherman Act, on which plaintiffs base their claims, prohibits "trade or commerce among the several States, or with foreign nations." 15 U.S.C. § 1. The complaint does not allege trade or commerce "among the several States." Therefore, to be cognizable, plaintiffs' allegations must depict a restraint of "trade or commerce with foreign nations." Plaintiffs cannot argue their allegations do not encompass "trade or commerce . . . with foreign nations" for Foreign Trade Antitrust Improvements Act purposes without sacrificing their ultimate statutory claim under the Sherman Act.

[10] Plaintiffs contend our holding in Carpet Group established a general rule that if defendants' alleged conduct is "based" in the United States, the Foreign Trade Antitrust Improvements Act is no bar to federal antitrust jurisdiction. But Carpet Group provides

[22]** ***HN16***[] The dispositive inquiry is whether the conduct of defendants, not plaintiffs, involves "import trade or commerce." *Id. at 71-72*. The Foreign Trade Antitrust Improvements Act does not define the term "import," but the term generally denotes a product (or perhaps a service) has been brought into the United States from abroad. See, e.g., Webster's Third New International Dictionary (1986) (defining an "import" as "something (as an article of merchandise) brought in from an outside source (as a foreign country)"); Black's Law Dictionary (6th ed. 1990) (defining an "import" as a "product manufactured in a foreign country, and then shipped to and sold in this country"). The travel agent plaintiffs contend the airlines "imported" their services for the purpose of selling airplane tickets. But the complaint alleges that defendants -- the four air carriers and their trade association -- only set the rates that foreign-based travel agents could charge for their services. Defendants did not directly bring items or services into the United States. Therefore, they cannot be labeled "importers." Nor have they engaged in "import trade or commerce."

In Kruman, defendants' conspiracy **[**23]** was "directed at controlling the prices they charged for their services in foreign auctions." *284 F.3d at 395*. The Court of Appeals for the Second Circuit found defendants' conduct did not involve "import trade or commerce":

> The relevant inquiry is whether the conduct of the defendants -- not the plaintiffs -- involves import trade or commerce. The plaintiffs did not describe conduct by the defendants that was directed at an import market. To the contrary, the defendants' conspiracy appears to have been directed at controlling the prices they charged for their services in foreign auctions. As the district court aptly observed, the commerce that is the focus of this case is the charging of fixed commissions on the purchase and sale of goods at foreign auctions, not the trade in and subsequent movement of the goods that were purchased and sold.

Id. (quotations and citations omitted). That "some of the goods purchased in those auctions may ultimately have been imported by individuals into the United States" was immaterial to determining if defendants were involved in "import trade or import commerce." *Id. at 395-96*. In this respect, the facts **[**24]** here are similar. The alleged conspiracy in this case was directed at commission rates paid to foreign travel agents based outside the United States. That some of the services plaintiffs offered were purchased by United States customers is not dispositive under this inquiry. Defendants were allegedly involved only in unlawfully setting extra-territorial commission rates. Their actions did not directly increase or reduce imports into the United States.

HN17[] The statutory term "involving" has a precise meaning. [11] In Carpet Group, we **[*304]** compared the "import trade or commerce" language with another provision of the statute:

> Admittedly, the FTAIA differentiates between conduct that "involves" such [import] commerce, and conduct that "directly, substantially, and foreseeably" affects such commerce. To give the latter provision meaning, the former must be given a relatively strict construction.

227 F.3d at 72. Unlike in Carpet Group, where the defendant association identified itself as an organization of "rug importers," none of the airline defendants or the IATA self-identifies as an "importer" here. Id. Nor, under the terms of the statute, were defendants "involved" **[**25]** in any of plaintiffs' "exporting activity."

Nor do we agree with plaintiffs' contention that a foreign travel agent's access to a computer system based in the United States "transforms" "foreign commerce" into "import commerce." Again, our focus remains on the conduct of defendants, not plaintiffs, rendering this argument extraneous. But we note that under plaintiffs' interpretation, a legion of activities transacted by foreign merchants with some connection to instruments in the United States economy -- a telephone, a fax machine, an Internet connection -- would constitute "import commerce."

---

no such bright line. In Carpet Group the defendants' "import" activity was clear: "Plaintiffs charge that Defendants engaged in a course of activity designed to ensure that only United States importers, and not United States retailers, could bring oriental rugs manufactured abroad into the stream of American commerce." *227 F.3d at 72*. To that extent, the facts of Carpet Group are clearly distinguishable.

[11] As noted, *15 U.S.C. § 6a* provides:"[The Sherman Act] shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless . . . ."

Although defendants paid commissions in United States dollars, neither the payments nor their calculations on computers based in the United States are properly considered "imports." No items or services **[**26]** were brought into the United States by the payments alone. Nor can plaintiffs demonstrate that defendants' conduct reduced imports of goods or services into the United States. Therefore, defendants were not involved in "import trade or import commerce," but rather were engaged in "conduct involving trade or commerce (other than import trade or import commerce) with foreign nations." *15 U.S.C. § 6a*.

B.

As we have stated, the Foreign Trade Antitrust Improvements Act bars plaintiffs' claim unless defendants' conduct has "a direct, substantial, and reasonably foreseeable" anticompetitive effect on United States commerce, and that conduct "gives rise" to a Sherman Act claim. [12] *15 U.S.C. § 6a(1)-(2)*. We turn now to this second aspect of the statutory analysis.

[27]** 1.

Plaintiffs allege defendants' conduct has substantially reduced their business values, forcing at least one member of the putative class out of business. But the District Court found the complaint contained no allegations amounting to any "effect" on United States commerce, failing to satisfy the requirements of *15 U.S.C. § 6a(1)(A)*. *152 F. Supp. 2d at 834*.

We agree. The "direct, substantial, and reasonably foreseeable effect" test was intended to serve as "a simple and straightforward clarification of existing American law." H.R. REP. NO. 97-686, reprinted in 1982 U.S.C.C.A.N. 2487-88. The House Judiciary Committee Report accompanying **[*305]** the Foreign Trade Antitrust Improvements Act stated: "Since Judge Learned Hand's opinion in *United States v. Aluminum Co. of America, 148 F.2d 416, 443-44 (2d Cir. 1945)*, it has been relatively clear that it is the situs of the effects, as opposed to the conduct, that determines whether United States ***antitrust law*** applies." H.R. REP. NO. 97-686, reprinted in 1982 U.S.C.C.A.N. 2490.

The Foreign Trade Antitrust Improvements Act's emphasis on the geographical "effect" of allegedly illegal conduct reiterates **[**28]** longstanding antitrust principles. [13] Above all, the United States antitrust laws strive to maintain competition in our domestic markets. See 1 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** 4 (2000) ("The general goal of the antitrust laws is to promote 'competition' . . . ."). ***HN18***[] Generally, federal antitrust laws do not extend to protect foreign markets from anticompetitive effects and "do not regulate the competitive conditions of other nations' economies." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 582, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* (citations omitted); see also *Statoil, 241 F.3d at 421* (applying Matsushita to an Foreign Trade Antitrust Improvements Act claim). But it is "well established by now that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States." *Hartford Fire Ins., 509 U.S. at 796*.

[29]** ***HN19***[] The geographic target of the alleged anticompetitive conduct matters greatly. As the Court of Appeals for the Second Circuit recently observed, "There is a distinction between anticompetitive conduct directed at foreign markets that only affects the competitiveness of foreign markets and anticompetitive conduct directed at foreign markets that directly affects the competitiveness of domestic markets. The antitrust laws apply to the latter sort of conduct and not the former." *Kruman, 284 F.3d at 393*.

---

[12] The Supreme Court's opinion in Pfizer does not alter our analysis, because it preceded the enactment of the Foreign Trade Antitrust Improvements Act by four years. Moreover, the holding in Pfizer is cabined to the question of whether a foreign government qualified as a "person" under the *Sherman Act. 434 U.S. at 320* (holding "that a foreign nation otherwise entitled to sue in our courts is entitled to sue for treble damages under the antitrust laws to the same extent as any other plaintiff").

[13] To reiterate, while the analysis of the "trade or commerce (other than import trade or import commerce) with foreign nations" prong focuses exclusively on defendants' conduct, the analysis of the "direct, substantial, and reasonably foreseeable" prong focuses exclusively on the geographical effect of defendants' conduct.

Plaintiffs claim that collusion by United States air carriers to fix commissions paid to foreign travel agents satisfies the statutory language. But that allegation does not characterize an "effect" on United States commerce. The alleged collusion is the reason for the lawsuit. It does not designate the geographical effect of defendants' allegedly illegal activity. That certain activities might have taken place in the United States is irrelevant if the economic consequences are not felt in the United States economy. Fixing the commissions paid foreign travel agents might constitute an illegal conspiracy. [14] But this conspiracy only targets the commissions foreign travel **[**30]** agents would receive for work performed outside the United States. ***HN20***[] United States antitrust laws only apply when a price-fixing conspiracy affects the domestic economy. Cf. *Statoil, 241 F.3d at 427-28* (rejecting plaintiffs' attempt to equate "effect" and "conduct" in this context as "not true to the plain language of the FTAIA" and an overly "expansive reading of the antitrust laws" never intended **[*306]** by Congress). Several antitrust actions have been dismissed on analogous grounds. See, e.g., *Matsushita, 475 U.S. at 582 n.6* ("The Sherman Act does reach conduct outside our borders, but only when the conduct has an effect on American commerce.") (citation omitted) *In re Copper Antitrust Litig., 117 F. Supp. 2d at 887* ("It is irrelevant that some of defendants' conduct took place in the United States. It was not the conduct that caused plaintiffs' injuries."); *Liamuiga Tours v. Travel Impressions, Inc., 617 F. Supp. 920, 924 (E.D.N.Y. 1985)* (dismissing a plaintiff service operator's claim against an American wholesale tour operator operating in St. Kitts, where all "effects" from the conspiracy were felt outside the United States). Therefore, **[**31]** plaintiffs cannot state a cognizable Sherman Act claim, given the plain text of the Foreign Trade Antitrust Improvements Act. [15]

[32]** We do not reach plaintiffs' contentions, first raised on appeal, that defendants' conduct could have affected travel agencies and travelers based in the United States. See *United Parcel Serv., Inc. v. Int'l Bhd. Of Teamsters, Chauffeurs, Warehousemen & Helpers of Am., Local Union No. 430, 55 F.3d 138, 140 n.5 (3d Cir. 1995)* ***HN21***[] ("It is the general rule that issues raised for the first time at the appellate level will not be reviewed.") (citations omitted). The complaint only sought class certification for "all IATA-accredited travel agents in Latin America and the Caribbean, excluding any travel agencies owned in whole or in part by defendants to this litigation, or their affiliates or subsidiaries." That plaintiffs now seek to include United States companies or tourists in the class cannot alter our jurisdictional analysis, because those claims were first raised on appeal. Cf. *Kauffman v. Dreyfus Fund, Inc., 434 F.2d 727, 734-36 (3d Cir. 1970)*.

Nor need we remand these proceedings to allow plaintiffs to demonstrate "newly discovered effects" on United States commerce. Though they had ample notice of possible deficiencies in their complaint, plaintiffs made **[**33]** no attempt to amend before the District Court ruled on the motion to dismiss. Moreover, the District Court appropriately considered the possible "effects" of defendants' actions, and how they impacted its jurisdiction. Given these circumstances, we will not grant leave to amend.

2.

Even if plaintiffs identified a "direct, substantial, and reasonably foreseeable" anticompetitive effect on United States commerce, they would need to demonstrate the anticompetitive effect "gives rise to a claim" under the Sherman Act. *15 U.S.C. § 6a(2)*. We will not consider this element. But we note the meaning of *15 U.S.C. § 6a(2)* has split two of our sister circuits. In Statoil, the Court of Appeals for the Fifth Circuit, in a divided opinion, held:

---

[14] The Foreign Trade Antitrust Improvements Act's legislative history provides, "The full committee added language to the Sherman and FTC Act amendments to require that the 'effect' providing the jurisdictional nexus must also be the basis for the injury alleged under the antitrust laws." H.R. REP. NO. 97-686, reprinted in 1982 U.S.C.C.A.N. 2496-97.

[15] The travel agents were permanently located outside the United States, where they performed services for travelers based in their countries and elsewhere, including the United States. In this sense, the facts here are distinguishable from those described in the dissenting opinion in Statoil: "The claim is that defendants allocated the market for hundreds of millions of dollars of commerce -- an allegation that placed United States markets at the mercy of monopoly charges in an industry vital to national security. The charged conspiracy was no foreign cabal whose secondary effects only lapped at United States shores." *241 F.3d at 431* (Higginbotham, J., dissenting).

> Based on the language of *Section 2* of the FTAIA, the effect on United States commerce -- in this case, the higher prices paid by United States companies for heavy-lift services in the Gulf of **[*307]** Mexico -- must give rise to the claim that Statoil asserts against the defendants. That is, Statoil's injury must stem from the effect of higher prices for heavy-lift services in the Gulf.

241 F.3d at 427; **[**34]** see also *Matsushita, 475 U.S. at 584 n.7* ("However one decides to describe the contours of the asserted conspiracy -- whether there is one conspiracy or several -- respondents must show that the conspiracy caused them an injury for which the antitrust laws provide relief."). But in Kruman, the Court of Appeals for the Second Circuit, without referencing Statoil, reached the contrary conclusion:

> [A] violation of the Sherman Act is not predicated on the existence of an injury to the plaintiff. . . . Rather than require that the domestic effect give rise to an injury that would serve as the basis for a Clayton Act action, subsection 2 of the FTAIA only requires that the domestic effect violate the substantive provisions of the Sherman Act.

284 F.3d at 399-400. We need not take sides in this dispute. Plaintiffs have failed to allege a "direct, substantial, and reasonably foreseeable effect" on United States commerce. *15 U.S.C. § 6a(1)*. We reserve consideration on this element.

For these reasons, plaintiffs' claims are barred by the Foreign Trade Antitrust Improvements Act. Therefore, they may not state a cognizable Sherman **[**35]** Act claim.

V.

Defendants also contend plaintiffs lack standing under United States antitrust laws, a proposition not squarely addressed by the District Court. [16] This argument implicates many of the same issues as the jurisdictional analysis under the Foreign Trade Antitrust Improvements Act. And for the reasons noted, we likewise find plaintiffs lack antitrust standing. See *Assoc. Gen. Contractors, Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535-45, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* (holding ***HN22***[] the standing inquiry in antitrust cases is dependent on the finding of subject matter jurisdiction).

HN23[] To sue under the United States antitrust laws, plaintiffs must have suffered an injury the antitrust laws were intended to prevent, and the injury must flow from that which makes the defendants' acts unlawful. *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 111-13, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*; **[**36]** *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 487, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*; *Steamfitters Local Union No. 420 Welfare Fund v. Philip Morris, Inc., 171 F.3d 912, 927 (3d Cir. 1999)*; *Int'l Raw Materials, Inc. v. Stauffer Chem. Co., 978 F.2d 1318, 1328 (3d Cir. 1992)*; see also *Pfzizer, 434 U.S. at 314* ("Congress' foremost concern in passing the antitrust laws was the protection of Americans. . . .").

Plaintiffs' injuries occurred exclusively in foreign markets. They are not of the type Congress intended to prevent through the Foreign Trade Antitrust Improvements Act or the Sherman Act. Cf. *In re Microsoft Corp. Antitrust Litig., 127 F. Supp. 2d 702, 716 (D. Md. 2001)* ***HN24***[] ("a plaintiff who has not participated in the U.S. domestic market may not bring a Sherman Act claim under the FTAIA"). Unlike in Carpet Group, where the plaintiffs' harm was "inextricably intertwined with the defendants' wrongdoing," *227 F.3d at 77* (quotation and citations omitted), the conduct at issue here was not directly related to the United States marketplace.

[*308] VI.

Defendant IATA urges us to affirm on the basis **[**37]** of its alleged statutory immunity under Sections 412 and 424 of the Federal Aviation Act, *49 U.S.C. §§ 41308-41309*. The Act allows the Secretary of Transportation to "exempt a person affected by the order from the antitrust laws to the extent necessary to allow the person to proceed with the

---

[16] For this reason, undoubtedly, the issue has not been extensively briefed by the parties.

transaction specifically approved by the order and with any transaction necessarily contemplated by the order." Id. *§ 41308(b)*. Because we need address only the jurisdictional issues, we will not address this matter.

VII.

For the foregoing reasons we will affirm the judgment of the District Court. The Foreign Trade Antitrust Improvements Act acts as a bar to plaintiffs' proposed Sherman Antitrust Act class action.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN1[] **Market Definition, Relevant Market**

The first step in analyzing a monopoly claim is to define the relevant market in which the defendant was operating. The relevant market inquiry has two components: geographic market and product market.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN2[] **Market Definition, Relevant Market**

The market power query begins with the determination of the relevant market, that is, a market relevant to the legal issue before the court. The market which one must study to determine when a producer has monopoly power will vary with the part of commerce under consideration. The tests are constant. That market is composed of products that have reasonable interchangeability for the purposes for which they are produced--price, use and qualities considered. A court also looks to the geographic reach of the group of sales or sellers to determine the relevant market. Further, because the ability of consumers to turn to other suppliers restrains a firm from raising prices above the competitive level, the definition of the relevant market rests on a determination of available substitutes.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN3[] **Regulated Practices, Market Definition**

To define a market in product and geographic terms in an antitrust action is to say that if prices were appreciably raised or volume appreciably curtailed for the product within a given area, while demand held constant, supply from other sources could not be expected to enter promptly enough and in large enough amounts to restore the old price and volume.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN4[] **Regulated Practices, Market Definition**

By defining the relevant market in an antitrust action, a court identifies the firms that compete with each other. Plugged into the market power inquiry, the court may then determine whether the alleged anticompetitive activity restrained trade, that is, raised price or reduced output.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN5[] **Regulated Practices, Market Definition**

It is well settled that defining the relevant market in an antitrust action is an issue of fact, but an appellate court reviews a district court's grant of summary judgment on that issue de novo.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN6[] **Summary Judgment, Burdens of Proof**

Where the nonmoving party will bear the burden of proof at trial on a dispositive issue, that party must go beyond the pleadings and designate specific facts so as to make a showing sufficient to establish the existence of an element essential to that party's case in order to survive summary judgment.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN7[] **Regulated Practices, Market Definition**

The basic relevant product market test in an antitrust action is "reasonable interchangeability." Interchangeability may be measured by, and is substantially synonymous with, cross-elasticity. A market is elastic if demand goes down as price goes up. A market is cross-elastic if rising prices for product A cause consumers to switch to product B.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN8[] **Relevant Market, Product Market Definition**

In determining the relevant product market in an antitrust case, reasonable interchangeability does not depend upon product similarity. Many courts have addressed the situation where two or more products or services have similar functions but different physical characteristics. These cases make clear that the relevant inquiry remains whether the differences in type render the products poor substitutes and that the resolution of this question depends on the evidence in the case.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

"Monopsony" is a condition of the market in which there is but one buyer for a particular commodity.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Remedies, Damages**

The United States Supreme Court's treatment of monopsony cases strongly suggests that suppliers are protected by antitrust laws even when the anti-competitive activity does not harm end-users. It is clear that the anti-competitive buyer's price-fixing agreement is the sort of combination condemned by the Sherman Act, even though the price-fixing was by purchasers, and the persons specially injured under the treble damage claim are sellers, not customers or consumers. The statute does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers. Nor does it immunize the outlawed acts because they are done by any of these. The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN11[] Regulated Practices, Market Definition

Antitrust laws apply not only to restraints on output markets, but to input markets as well, including both labor and input commodities.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN12[] Regulated Practices, Price Fixing & Restraints of Trade

While antitrust prosecutions for restraints on input markets are relatively rare, this is explained by the fact that restraints on input markets arise only in the unusual circumstance of an effective monopsony--a single purchaser, or a group of purchasers acting in concert. And monopsony in turn arises only when the resource is uniquely valuable in its current use, so that even if the price is depressed by monopsony, sellers are unable to find alternative buyers.

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] Antitrust & Trade Law, Sherman Act

Even proceeding from the premise that antitrust laws aim only at protecting consumers, monopsonies fall under antitrust purview because monopsonistic practices will eventually adversely affect consumers.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN14[] Standards of Review, Abuse of Discretion

Admissibility of evidence under the Noerr-Pennington doctrine is reviewed for abuse of discretion.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN15[] **Antitrust & Trade Law, Exemptions & Immunities**

The Noerr-Pennington doctrine is rooted in the *First Amendment*. The Noerr-Pennington doctrine provides general immunity from antitrust liability under the Sherman Act to private parties who petition the government for redress of grievances, notwithstanding the anti-competitive purpose or consequences of their petitions. However, Noerr-Pennington does not bar the introduction of all evidence within its scope. It would of course still be within the province of the trial judge to admit this evidence, if he deems it probative and not unduly prejudicial, if it tends reasonably to show the purpose and character of the particular transactions under scrutiny.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Civil Procedure > Appeals > Standards of Review > De Novo Review

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN16[] **Exemptions & Immunities, Parker State Action Doctrine**

State action immunity in an antitrust action is a question of law, which an appellate court reviews de novo.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN17[] **Exemptions & Immunities, Parker State Action Doctrine**

In the antitrust context, state-action immunity is disfavored, much as are repeals by implication.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN18[] **Exemptions & Immunities, Parker State Action Doctrine**

Private parties regulated by the state must show two elements in order to demonstrate that they are entitled to state action immunity in an antitrust action. First, the challenged restraint must be one clearly articulated and affirmatively expressed as state policy, and second, the policy must be actively supervised by the state. To meet the first prong, the state policy does not have to compel the private party to engage in anticompetitive conduct. If the state policy expressly permits, but does not compel, anticompetitive conduct, the private party may still qualify for state action immunity. The second prong mandates that the state exercise ultimate control over the challenged anticompetitive conduct.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

HN19[] **Standards of Review, Abuse of Discretion**

An appellate court reviews a district court's refusal to give a particular instruction for abuse of discretion. The appellate court does not decide whether the instructions are flawless, but whether the jury was misled in any way and whether it had an understanding of the issues and its duty to decide those issues. So long as the charge as a whole adequately states the law, the refusal to give a particular requested instruction is not grounds for reversal.

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN22[] **Standards of Review, Abuse of Discretion**

An appellate court reviews a district court's disposition of a motion for remittitur or new trial on damages for a manifest abuse of discretion. In order to establish an abuse of discretion, the party that moved unsuccessfully for a new trial on the basis of an excessive verdict carries the heavy burden of demonstrating that the verdict was clearly, decidedly, or overwhelmingly against the weight of the evidence. In applying the abuse of discretion standard, the appellate court is also mindful that absent an award so excessive or inadequate as to shock the judicial conscience and to raise an irresistible inference that passion, prejudice, corruption or other improper cause invaded the trial, the jury's determination of the fact is considered inviolate.

Civil Procedure > Remedies > Damages > General Overview

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN23[] **Remedies, Damages**

Even where a "persuasive" explanation of a jury's damages award indicates an award contrary to law, the possibility of a proper explanation, however slight the chance, will suffice to sustain the damages award.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN24[] **Private Actions, Remedies**

In an antitrust case, future damages may be recovered for past misconduct but not for future misconduct.

Civil Procedure > Remedies > General Overview

Civil Procedure > Appeals > Standards of Review > General Overview

HN25[] **Civil Procedure, Remedies**

The standard against which a district court's order must be judged is whether the relief represents a reasonable method of eliminating the consequences of the illegal conduct.

Opinion

[*1128] **EBEL**, Circuit Judge.

* The Honorable David K. Winder, Senior District Judge, United States District Court for the District of Utah, sitting by designation.

Southwestern Bell Telephone Company appeals from a jury verdict finding it guilty of monopolistic behavior in violation of Oklahoma state law and assessing damages of over $ 7 million, trebled to over $ 20 million. At issue is Southwestern Bell's domination of the Oklahoma pay phone market, a **[**2]** market it legally monopolized, under the oversight of the Oklahoma Corporation Commission (OCC), until November 1996. The plaintiffs are nine independent pay phone service providers whose efforts to compete with Southwestern Bell succeeded only in whittling down the latter's market share to roughly 80 percent after two years of competition. On appeal, Southwestern Bell challenges several aspects of the district court's rulings, most notably its definition of the relevant market. While we do not embrace the district court's analysis in its entirety, we nevertheless believe that the challenged rulings were proper, and we therefore **AFFIRM**.

BACKGROUND

In the decades up until November 1996, Southwestern Bell enjoyed a legal monopoly over the provision of pay phone services in the state of Oklahoma. As early as 1990, the Oklahoma legislature had decided to move from monopoly to competition in this market, but it entrusted the implementation of that transition to the OCC, which failed to end Southwestern Bell's monopoly until passage of the 1996 Telecommunications Act, *47 U.S.C. § 276(b)*, forced its hand. After a four-month rulemaking proceeding, the OCC **[**3]** authorized new pay phone providers in November 1996, subject to certain regulatory requirements.

Pay phone service providers ("PSPs") such as Southwestern Bell and the Plaintiffs typically do not own the land on which the pay phones are located. Rather, they make a deal with the party that owns the land ("location owner"): the PSP gets permission to place the pay phone on the location, and in exchange the location owner gets a commission, typically a percentage of the phone's receipts.

The Plaintiffs' evidence at trial showed that, prior to the Oklahoma legislature's 1990 decision to end its pay phone monopoly, Southwestern Bell had projected that it would lose 77 percent of its pay phone revenues in the first year of open competition. (The facts discussed here were disputed at trial and are presented in the light most favorable to the Plaintiffs.) In response, in 1991 Southwestern Bell undertook an intentional campaign to make entry into the Oklahoma pay phone market more difficult by attempting to secure every possible pay phone location through long-term contracts between Southwestern Bell and the location owners. This "lock up" campaign continued through 1996 and **[*1129]** accelerated **[**4]** dramatically with what Southwestern Bell termed "the Blitz" in 1995-96 on the eve of the coming of competition.

The contracts contained several provisions designed to freeze out Southwestern Bell's competitors, including automatic renewal terms and stiff penalties for early termination. [1] In addition to the lock up, Southwestern Bell employed several other measures to freeze out competition, including erecting a bureaucratic maze to discourage location owners who tried to terminate their contract, failing to remove its pay phones when requested to do so, and damaging the pay phone location when removing a phone. [2]

[5]** Southwestern Bell's anti-competitive actions were highly successful. Although its competitors offered better commissions to location owners and better phones at cheaper rates to customers, at the end of the second year of

---

[1] According to one witness, early termination fees could be as high as $ 7,200 on a location that might be paying the location owner only about $ 200 a year in commissions.

[2] By way of further example, many of Southwestern Bell's contracts called for a 50% reduction in the commissions payable by Southwestern Bell to the location owner if the location owner allowed competitive pay phones on its location alongside Southwestern Bell's pay phones. This was tantamount to precluding competitive pay phones because, in the unlikely event that the additional phones would increase total revenues for that location (there was evidence that Southwestern Bell would usually already have placed the optimal number of phones at a given location), the location owner would receive a much smaller percentage of those revenues. The damage Southwestern Bell did to the property when withdrawing its phones also made the property less attractive to providers of competitive pay phones.

competition Southwestern Bell retained more than 87 percent of the market, with no single competitor above 2.4 percent.

The Plaintiffs filed suit against Southwestern Bell claiming violations of federal and state ***antitrust law***. The district court issued four different written decisions, two pre-trial and two post-verdict. The first order, filed March 1, 2000, dealt with the relevant product market pursuant to cross-motions for summary judgment. The Plaintiffs argued that the relevant market was the provision of pay phone facilities and services to location owners. Southwestern Bell argued that the product market should be evaluated from the viewpoint of the end-user of the phone services and should therefore include both pay phones and cell phones, which Southwestern Bell argued were reasonably interchangeable at the end-user level. The district court did not address whether the market should be evaluated at the level of the location owners or at the level of the **[**6]** end-users, but it did rule that pay phones and cell phones were not reasonably interchangeable, and thus, that the market should be limited to pay phones. Ultimately, the jury instructions submitted by the district court defined the relevant market simply as "the provision of pay phone and pay phone related services" without differentiating whether it should be evaluated at the level of the location owners or at the level of the end-users. Southwestern Bell does not claim to have objected to this instruction, so it is clear that the parties allowed the jury to determine which set of customers should be used in evaluating monopoly power.

The second order, filed March 23, 2000, addressed various motions in limine, none at issue on appeal. The third order, filed January 31, 2001 (after the jury found Southwestern Bell liable for state antitrust violations but not liable for federal antitrust violations), rejected Southwestern Bell's motion for a new trial on the issue of **[*1130]** damages. The central contention addressed in that order was whether the damages awarded were based improperly on anticipated future illegal conduct. The fourth order, also filed January 31, 2001, rejected Southwestern **[**7]** Bell's motion for judgment as a matter of law or new trial. That motion argued, inter alia, that the jury improperly was allowed to consider Southwestern Bell's lobbying efforts before the OCC and its pre-November 1996 conduct, that the verdict failed to account for the temporary contractual nature of Southwestern Bell's market power, and that the verdict violated the state action doctrine. Southwestern Bell appeals the district court's resolution of all of these issues.

DISCUSSION

The district court had jurisdiction over the federal antitrust claims pursuant to *28 U.S.C. § 1337* and over the state antitrust claims pursuant to *28 U.S.C. § 1367*. We have jurisdiction under *28 U.S.C. § 1291*.

A. Relevant Product Market

HN1[] The first step in analyzing a monopoly claim is to define the relevant market in which the defendant was operating. See *Full Draw Prods. v Easton Sports, Inc., 182 F.3d 745, 756 (10th Cir. 1999)*; *SCFC ILC, Inc. v. Visa USA, Inc., 36 F.3d 958, 966 (10th Cir. 1994)*. The relevant market inquiry has two components: geographic market and product market. **[**8]** *Full Draw Prods., 182 F.3d at 756*. Only the latter is at issue in this appeal. Southwestern Bell contends that the relevant product market should include cell phones as well as pay phones, while the Plaintiffs argue that the market is limited to pay phones. The parties' underlying interests in this regard are conflicting: Southwestern Bell wishes to define the market as broadly as possible (which would make it more difficult for a jury to find that it exercised monopoly power), and the Plaintiffs wish to define the market as narrowly as possible (which would make it easier to find monopoly power). The parties filed cross-motions for summary judgment on market definition, and the court granted the Plaintiffs' motion, ruling that cell phones were not part of the relevant market.

We have previously explained the relevant product market analysis as follows:

> ***HN2***[] The market power query begins with the determination of the relevant market, that is, a market relevant to the legal issue before the court. The market which one must study to determine when a producer has monopoly power will vary with the part of commerce under consideration. The tests are constant. That

> market **[**9]** is composed of products that have reasonable interchangeability for the purposes for which they are produced--price, use and qualities considered. We also look to the geographic reach of the group of sales or sellers to determine the relevant market. Further, because the ability of consumers to turn to other suppliers restrains a firm from raising prices above the competitive level, the definition of the relevant market rests on a determination of available substitutes.
>
>> ***HN3***[] To define a market in product and geographic terms is to say that if prices were appreciably raised or volume appreciably curtailed for the product within a given area, while demand held constant, supply from other sources could not be expected to enter promptly enough and in large enough amounts to restore the old price and volume.
>
> Although these concepts provide a shorthand for rule of reason analysis, we **[*1131]** would be amiss to imply their application is necessarily facile. Each may be problematic:
>
>> There is no subject in ***antitrust law*** more confusing than market definition. One reason is that the concept, even in the pristine formulation of economists, is deliberately an attempt to oversimplify--for **[**10]** working purposes--the very complex economic interactions between a number of differently situated buyers and sellers, each of whom in reality has different costs, needs, and substitutes. . . .
>
> ***HN4***[] By defining the relevant market, however, we identify the firms that compete with each other. Plugged into the market power inquiry, we may then determine whether the alleged anticompetitive activity restrained trade, that is, raised price or reduced output.

SCFC ILC, Inc., 36 F.3d at 966 (internal quotation marks, citations, and alterations omitted). ***HN5***[] It is well settled that defining the relevant market is an issue of fact, *Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1220 (10th Cir. 1986)*, but we review the district court's grant of summary judgment on that issue de novo. *Simms v. Okla. ex rel. Dep't of Mental Health & Substance Abuse Servs., 165 F.3d 1321, 1326 (10th Cir. 1999)*.

Most of the district court's discussion of the relevant product market issue was devoted to explaining why Southwestern Bell's submissions on this issue (arguing that the relevant market included cell phones) were unpersuasive. However, **[**11]** although the inadequacies of Southwestern Bell's relevant market evidence do support the district court's denial of Southwestern Bell's motion for summary judgment on the relevant market issue (which denial Southwestern Bell does not challenge on appeal), they do not support the court's grant of summary judgment on the issue in favor of the Plaintiffs. Because the Plaintiffs had the burden of proof on the relevant market issue, *Tarabishi v. McAlester Reg'l Hosp., 951 F.2d 1558, 1569 n.15 (10th Cir. 1991)*, the Plaintiffs were obligated to make an affirmative showing of their proposed relevant market sufficient to sustain a reasonable jury finding. See *McKnight v. Kimberly Clark Corp., 149 F.3d 1125, 1128 (10th Cir. 1998)* ***HN6***[] ("Where the nonmoving party will bear the burden of proof at trial on a dispositive issue, that party must go beyond the pleadings and designate specific facts so as to make a showing sufficient to establish the existence of an element essential to that party's case in order to survive summary judgment." (internal quotation marks omitted)).

The district court's belief that the Plaintiffs had satisfied their burden was based on its **[**12]** view that certain consumers would not purchase cell phones no matter how much Southwestern Bell raised the rates for pay phone services. We do not believe that such an assertion, even assumed to be true, justifies excluding cell phones from the relevant product market (assuming for the moment that the product market has to be evaluated at the end-user level).

HN7[] The basic relevant product market test is "reasonable interchangeability." *SCFC, 36 F.3d at 966*. Interchangeability may be measured by, and is substantially synonymous with, cross-elasticity. *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*; *Westman Comm'n Co., 796 F.2d at 1221*. A market is elastic if demand goes down as price goes up. A market is cross-elastic if rising prices for product *A* cause consumers to switch to product *B*.

The district court held that, because "common sense" suggests that there exist some people (namely, poor people who use pay phones because they have no phone **[*1132]** service at home or work) who would not switch to cell phones if pay phone prices increased, therefore Southwestern Bell's definition **[**13]** of the relevant product market to include cell phones was illogical. The problem with that reasoning is that neither the court below nor the parties on appeal cite anything in the record to support a conclusion that the number of "non-cross-elastic" pay phone users was significant enough to render the market as a whole non-cross-elastic. (Indeed, neither the court below nor the parties in the briefing point to anything in the record to support the district court's conclusion that non-cross-elastic pay phone users exist at all, although surely some must.) Thus, this is not a case where the summary judgment movant (the Plaintiffs) alleged record-supported facts which the non-movant (Southwestern Bell) failed to rebut.

Therefore, the district court's belief that there are non-cross-elastic pay phone users does not provide a sufficient basis for granting summary judgment in favor of the Plaintiffs as to the scope of the relevant market. The remainder of the district court's stated basis for its ruling is equally unavailing:

> Although cell phones and pay phones perform similar functions, these items are not reasonably interchangeable. Local calls may be made on a pay phone for approximately **[**14]** thirty-five cents. A pay phone user does not need to make the financial or contractual commitment associated with cellular telephone service. A pay phone is stationary and available to anyone in the vicinity. In contrast, a cell phone is available only to those in possession of such equipment.

HN8[] Reasonable interchangeability does not depend upon product similarity, a point well summarized in the ABA's treatise on ***antitrust law***:

> Many courts have addressed the situation where two or more products or services have similar functions but different physical characteristics. These cases make clear that the relevant inquiry remains whether the differences in type render the products poor substitutes and that the resolution of this question depends on the evidence in the case. In du Pont, for example, the Court concluded that all flexible wrappings belonged in the same market, notwithstanding differences in burst strength, gas permeability, grease resistance, and other factors. The Court based its conclusion upon the extensive competition that existed between cellophane and other pliable wrappings, despite cellophane's physical advantages.

1 ABA Section of ***Antitrust Law***, **[**15]** ***Antitrust Law*** Developments 508 (4th ed. 1997). Although the product differences cited by the court below are all reasons that the jury might rely upon were it to find that the relevant market did not include cell phones, we cannot agree that such differences support summary judgment on this factual issue.

However, regardless of the interchangeability of pay phones and cell phones at the end-user level, there is no doubt that pay phones and cell phones are not interchangeable at the location-owner level, and that is the level where the Plaintiffs argued that Southwestern Bell has monopolized competition. In other words, the Plaintiffs argue that Southwestern Bell's interchangeability argument is wrongly directed at showing that cell phones and pay phones are interchangeable for end-users, but that is not the market where the Plaintiffs are complaining of Southwestern Bell's anti-competitive behavior. Rather, it is the location owners who define the market where the anti-competitive behavior took place - that is, the Plaintiff's claim that they compete with Southwestern Bell **[*1133]** for locations upon which to place their pay phones, and that is the market Southwestern Bell has monopolized.

[16]** Southwestern Bell insists that, despite the fact that it competes with the Plaintiffs in supplying pay phones to location owners, the end-user market for telephone services must still be considered. In support of this assertion, Southwestern Bell first argues that "market power must be identified from [the consumer's] perspective." The only support Southwestern Bell offers for this assertion is *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. But du Pont does not support the proposition for which it is cited; the Court there merely stated that "in considering what is the relevant market for determining the control of price and competition, no more definite rule can be declared than that commodities reasonably interchangeable by consumers for the same purposes make up that part of the trade or commerce, monopolization of which may be illegal." *Id. at 395* (internal quotation marks omitted). The reference to consumers makes perfect sense in du Pont given that the market at issue (sale of cellophane wrap and other flexible wrappings) indisputably was a consumer market. Although Southwestern **[**17]** Bell is correct that antitrust laws were "especially intended to serve consumers," that hardly suffices to prove that a monopolist may act with impunity so long as end-use consumer prices are unaffected. And, in any event, the Plaintiffs' antitrust theory was that the location owners were consumers of the placement of pay phone facilities on their locations, and that the price for such location placements was affected by Southwestern Bell's monopolistic conduct.

Southwestern Bell also argues that the relevant market should include the end-user market (and thus include cell phones) because pay phone service providers like Southwestern Bell are properly viewed as buyers rather than sellers in their relationships to location owners. That is, Southwestern Bell argues that the location owners are not "customers" of Southwestern Bell at all; Southwestern Bell argues that it is the customer of the location owners. [3]

[18]** Thus, Southwestern Bell attempts to characterize this action as a "monopsony" claim. [4] A monopsony, Southwestern Bell argues, is not actionable unless it "injures consumers by forcing up the price of the end product. Where the risk of that happening is slight or nonexistent, however, monopsony power per se does not create an antitrust concern." *Kamine/Besicorp Allegany L.P. v. Rochester Gas & Elec. Corp., 908 F. Supp. 1194, 1203 (W.D.N.Y. 1995)*. Thus, because the end-users' ability to switch from pay phones to cell phones prevented them from being harmed by Southwestern Bell's monopsony, [5] Southwestern Bell contends that its conduct is not actionable.

On its merits, **[**19]** Southwestern Bell's monopsony argument is unpersuasive. ***HN10***[] The **[*1134]** Supreme Court's treatment of monopsony cases strongly suggests that suppliers (under Southwestern Bell's theory of the market, the location owners) are protected by antitrust laws even when the anti-competitive activity does not harm end-users. In its leading monopsony case, the Supreme Court stated:

> It is clear that the [anti-competitive buyer's price-fixing] agreement is the sort of combination condemned by the [Sherman] Act, even though the price-fixing was by purchasers, and the persons specially injured under the treble damage claim are sellers, not customers or consumers.
>
> . . . .
>
> The statute does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers. Nor does it immunize the outlawed acts because they are done by any of these. The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated.

Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. 219, 235-36, 92 L. Ed. 1328, 68 S. Ct. 996 (1948) (citations omitted). In Mandeville Island **[**20]** Farms, the Court held that the plaintiff sugar beet growers had stated a valid monopsony claim under § 2 of the Sherman Act against a sugar beet buyer who colluded with other buyers to pay uniform prices for beets. Significantly, as the two dissenting justices observed, the plaintiffs' complaint did not allege that the defendants' actions affected end-user prices. *Id. at 247-48* (Jackson, J., dissenting).

Tenth Circuit case law also appears to reject the notion that a monopsony plaintiff must prove end-user impact. In *Reazin v. Blue Cross & Blue Shield of Kansas, Inc., 899 F.2d 951 (10th Cir. 1990)*, we rejected a monopsony

---

[3] The contracts themselves do not establish whether Southwestern Bell is more properly viewed as the buyer or seller, providing simply that the location owner, in exchange for prescribed commission payments, "hereby grants SWBT the right to install and maintain SWBT public pay telephone(s) and associated equipment . . . at the location specified herein," and that the phone remains the property of Southwestern Bell during the contract period.

[4] ***HN9***[] "Monopsony" is a "condition of the market in which there is but one buyer for a particular commodity." Black's Law Dictionary 1007 (6th ed. 1990).

[5] As stated earlier, at least on this record, the Plaintiffs have not yet demonstrated that cell phones and pay phones are not reasonably interchangeable at the end-user level.

defendant's argument that injury to sellers without injury to end-users is not cognizable antitrust injury. *Id. at 962*; cf. *Union Carbide & Carbon Corp. v. Nisley, 300 F.2d 561, 579-80 (10th Cir. 1961)* ("The prolonged existence of a price-fixing conspiracy [by buyers] in an integrated industry such as ours is proof of damages to those [parties] whose prices are directly affected thereby. In that respect, our case is noticeably akin to *Mandeville Island Farms v. American Crystal Sugar, 334 U.S. 219, 92 L. Ed. 1328, 68 S. Ct. 996*. **[**21]** "). This approach is consistent with the case law of other circuits. See *Khan v. State Oil Co., 93 F.3d 1358, 1361 (7th Cir. 1996)* (Posner, J.) ("This is a form of monopsony pricing, which is analytically the same as monopoly or cartel pricing and so treated by the law. E.g., Mandeville Island . . . ." (dicta)), vacated on other grounds, *522 U.S. 3, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)*; *United States v. Syufy Enters., 903 F.2d 659, 663 (9th Cir. 1990)* ("It is theoretically possible to have a middleman who is a monopolist upstream but not downstream . . . .").

An especially insightful analysis of relevant market analysis in monopsony cases comes from the Second Circuit. In *Todd v. Exxon Corp., 275 F.3d 191 (2d Cir. 2001)*, the plaintiffs were managerial, professional, and technical employees who brought a Sherman Act § 1 suit against fourteen major oil companies, alleging that the companies shared information about, and thereby artificially depressed, the salaries paid to such classes of employees. *Id. at 195*. The relevant market issue in Todd was slightly different than that at issue here, but the language used by the **[**22]** court in addressing that issue is directly relevant here. In Todd, the district court had held that the market proposed by the plaintiffs was over-inclusive to the extent that the plaintiffs had failed to show that the various **[*1135]** types of employees within the asserted relevant market (accountants, lawyers, engineers, etc.) were interchangeable with one another. *Id. at 201*. The Second Circuit rejected this conclusion:

> The market is not the market of competing sellers [the employees selling their services] but of competing buyers [the companies buying these services]. This market is comprised of buyers who are seen by sellers as being reasonably good substitutes. A greater availability of substitute buyers indicates a smaller quantum of market power on the part of the buyers in question.
>
> . . . . Plaintiff is right to urge that the proper focus is . . . the commonality and interchangeability of the buyers, not the commonality or interchangeability of the sellers. The question is not the interchangeability of, for example, lawyers with engineers. At issue is the interchangeability, from the perspective of a [managerial, professional, or technical] employee, **[**23]** of a job opportunity in the oil industry with, for example, one in the pharmaceutical industry.

Id. at 202 (citations omitted).

Opinions from other courts, as well as the writings of economists, reinforce this view. As Judge Wald summarized in a dissenting opinion:

> The Supreme Court has clearly held that ***HN11***[] antitrust laws apply not only to restraints on output markets, but to input markets as well, including both labor, [citation omitted], and input commodities, e.g., [Mandeville Island Farms] (sugar refiners' agreement to fix input prices paid for sugar beets violates Sherman Act, which "does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers" but instead "is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated"). See also *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)* (Sherman Act prohibits any "combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity" and agreements **[**24]** to make "purchases [of inputs] at or under the market are one species of [unlawful] price-fixing"); *American Tobacco Co. v. United States, 328 U.S. 781, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)* (applying ***antitrust law*** to restraints on input market for tobacco as well as output market for tobacco products); *Swift & Co. v. United States, 196 U.S. 375, 49 L. Ed. 518, 25 S. Ct. 276 (1905)* (same, for livestock inputs and meat outputs). Cf. *National Macaroni Mfr's Ass'n v. Federal Trade Comm'n, 345 F.2d 421, 426 (7th Cir. 1965)* (purpose and effect of agreement to fix composition of macaroni product was to depress input price of semolina, thereby violating Sherman Act).

> Economists too have long recognized that market inefficiencies created by anticompetitive restraints on input markets can be as destructive of a free market economy (and therefore ultimately damaging to consumers) as restraints on output markets. See, e.g., ROGER D. BLAIR & JEFFREY L. HARRISON, MONOPSONY 36-43 (1993); see also *Mandeville Farms, 334 U.S. at 241-44* (describing how restraints on input market adversely affect output market). ***HN12***[] While antitrust **[**25]** prosecutions for restraints on input markets are relatively rare, this is explained by the fact that restraints on input markets arise only in the unusual circumstance of an effective monopsony--a single purchaser, or a group of purchasers acting in concert. And monopsony **[*1136]** in turn arises only when the resource is uniquely valuable in its current use, so that even if the price is depressed by monopsony, sellers are unable to find alternative buyers. RICHARD A. POSNER & FRANK H. EASTERBROOK, ANTITRUST 150 (1981) (monopsony can arise when "resources have substantially greater value in some uses than in others" so the "sole purchaser . . . will . . . be able to force the [seller] . . . to accept a monopsony price"); BLAIR & HARRISON, supra, at 43-44 (inelasticity of supply facilitates collusive monopsony). Thus, for example, in the Mandeville Island Farms case, the sugar refiners' monopsonistic price-fixing scheme was effective because growers could not easily find other buyers or profitably switch to other crops when refiners conspired to fix the price of sugar beets. See *334 U.S. at 240-42*. Nonetheless, according to the economists, there is a dead-weight loss **[**26]** associated with imposition of monopsony pricing restraints. Some producers will either produce less or cease production altogether, resulting in less-than-optimal output of the product or service, and over the long run higher consumer prices, reduced product quality, or substitution of less efficient alternative products. See, e.g., HERBERT HOVENKAMP, ECONOMICS AND FEDERAL ***ANTITRUST LAW*** § 1.2, at 17-18 (1985); BLAIR & HARRISON, supra, at 42-43, 72. So, ***HN13***[] even proceeding from the premise that antitrust laws aim only at protecting consumers, monopsonies fall under antitrust purview because monopsonistic practices will eventually adversely affect consumers.

Brown v. Pro Football, Inc., 311 U.S. App. D.C. 89, 50 F.3d 1041, 1061 (D.C. Cir. 1995) (Wald, J., dissenting) (emphasis omitted), aff'd, *518 U.S. 231, 135 L. Ed. 2d 521, 116 S. Ct. 2116 (1996)*. The two district court cases cited by Southwestern Bell - both of which contain language suggesting that harm to end-users is at least a relevant consideration in determining whether a monopsony is actionable under ***antitrust law***, see *Kamine/Besicorp Allegany L.P., 908 F. Supp. at 1203* **[**27]** (stating that, where there is little risk that monopsony "can injure consumers by forcing up the price of the end product . . . monopsony power per se does not create an antitrust concern"); *Addamax Corp. v. Open Software Found., Inc., 888 F. Supp. 274, 280 (D. Mass. 1995)* (noting that "only with control of a downstream market can the monopsonist decrease output and raise prices") - are inadequate to overcome the unmistakable import of the case law cited above.

Accordingly, we affirm the district court's summary judgment ruling excluding cellular phones from the relevant market definition. Location owners are the relevant customers for purposes of locating Southwestern Bell's pay phone facilities, and from the location owners' perspective, cellular phone services and pay phone services are not interchangeable.

B. Noerr-Pennington Doctrine

The district court allowed the Plaintiffs to introduce evidence regarding allegedly misleading statements that Southwestern Bell made to the OCC. Southwestern Bell argues that admission of such evidence violated its *First Amendment* right to petition the government, as embodied in the Noerr-Pennington doctrine. **[**28]** See *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*; *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*. The district court held, and the Plaintiffs argue on appeal, that the evidence was admissible because it was **[*1137]** offered, not for the improper purpose of showing that Southwestern Bell violated antitrust laws by misleading the OCC, but rather for the proper purpose of supporting the claim that Southwestern Bell acted for an improper monopolistic purpose (namely, showing that the pre-competition campaign to lock up the market in long-term contracts was done for monopolistic purposes). We conclude that the district court's admission of the evidence was not an abuse of discretion. See *U.S. Football League v. Nat'l Football League, 842 F.2d 1335, 1374 (2d Cir. 1988)* ***HN14***[] (reviewing admissibility of evidence under Noerr-Pennington doctrine for abuse of discretion).

The Plaintiffs argued to the jury at trial that Southwestern Bell, upon realizing that competition was coming soon, engaged in an all-out effort (referred to as the **[**29]** "Blitz") to lock as many location owners as possible into multi-year, automatically renewing contracts with unreasonable termination fees. Southwestern Bell argued that the Blitz was unrelated to the coming of competition, and was instead merely an effort to take advantage of new federal regulations allowing pay phone service providers to choose the long distance provider for the pay phone ("PIC rights"). The OCC, the state agency responsible for pay phone operations, considered ordering a "fresh look" rule that would have given location owners a window of time in which to void their existing contracts with Southwestern Bell in order to enter into a contract with another pay phone service provider. The state attorney general supported the fresh start, viewing it as an efficient alternative to fact-finding to determine whether Southwestern Bell was moving to lock up location owners in long term contracts.

Ultimately, the OCC decided against the fresh look, but during the course of its deliberations it submitted the following interrogatory to Southwestern Bell: "Please state whether Southwestern Bell Telephone is attempting to get all current pay-phone customers to sign a new contract. **[**30]** If so please state the reason." Southwestern Bell replied "No. . . . Southwestern Bell is not attempting to obtain new contracts from all site owners that are currently under contract, nor is Southwestern Bell attempting to obtain contracts from all site owners with whom Southwestern Bell does not have a current contract." In a draft answer to this question not submitted to the OCC, Southwestern Bell had drafted "Southwestern Bell Telephone has strived to secure a contract on all pay phones since 1988." The draft answer went on to say that Southwestern Bell's motivation to obtain long-term contracts was to enable it "to secure the placement long enough to protect the large investment." Southwestern Bell's cross-examination of the witness through whom this evidence was presented (Rick Chamberlain, formerly of the Oklahoma Attorney General's office) suggests that its position was that it was not then "attempting" to get "all" customers to sign a new contract, as some of its existing customers already under contract were not contacted during the "Blitz." In addition to objecting to the admission of the interrogatory response, Southwestern Bell argues generally that Chamberlain's testimony **[**31]** improperly allowed the jury to consider the fact that Southwestern Bell opposed the fresh look proposal.

HN15[] The Noerr-Pennington doctrine is rooted in the *First Amendment*. As we have explained previously, "the Noerr-Pennington doctrine provides general immunity from antitrust liability under the Sherman Act to private parties who petition the government for redress of grievances, notwithstanding the anti-competitive purpose or consequences of their petitions." *Cardtoons, L.C. v. Major **[*1138]** League Baseball Players Assoc., 208 F.3d 885, 894 (10th Cir. 2000)* (en banc). However, Noerr-Pennington does not bar the introduction of all evidence within its scope, as the Supreme Court recognized in footnote three of its Pennington decision: "It would of course still be within the province of the trial judge to admit this evidence, if he deemed it probative and not unduly prejudicial . . . if it tends reasonably to show the purpose and character of the particular transactions under scrutiny." *381 U.S. at 670 n.3*.

Southwestern Bell argued to the trial court prior to introduction of this evidence that, under the Noerr-Pennington doctrine, "what we **[**32]** told the Corporation Commission can't support any inference in the case and ought not come in at all." The district court rejected this argument, expressly relying on Pennington footnote three. After cross-examining Chamberlain, Southwestern Bell requested, and the court immediately issued over the Plaintiffs' objection, the following cautionary instruction to the jury:

> Every citizen, including the plaintiffs and Southwestern Bell, has a right under the Constitution to petition the government and be heard on issues pertaining to rule-making proceedings like that at the Corporation Commission. The exercise of that right is immune from scrutiny under the antitrust laws. Therefore, I instruct you that Southwestern Bell Telephone Company's exercise of its right to petition by participating in rule-making proceedings and advocating any position it chose at the Oklahoma Corporation Commission did not violate the antitrust laws.

Later, the jury was instructed without objection that it may consider the purpose or intent of the anti-competitive act (i.e., the lock up efforts), and its pretextual nature, in assessing its legality. Further, the jury was specifically reminded per **[**33]** jury instruction that Southwestern Bell's communications with the OCC "did not violate the antitrust laws," but that "you may consider this evidence if you find it tends to show the purpose and character of the transactions under scrutiny."

Southwestern Bell argues that introduction of the evidence from the OCC proceedings violated the Noerr-Pennington doctrine because it was offered for the sole purpose of convincing the jury to find an antitrust violation based on Southwestern Bell's interactions with the OCC. The Plaintiffs counter that the evidence was not offered to establish monopolistic liability based upon Southwestern Bell's interactions with the OCC, but rather to show that the "purpose" of the Blitz was to stifle competition, and that the explanation Southwestern Bell offered at trial (that the "Blitz" was to secure PIC rights) was pretextual. The Plaintiffs argue:

> In its opening statement and throughout trial, SWBT attempted to convince the jury that the Blitz was intended to secure 'PIC' long distance rights, not to preempt competition as Plaintiffs alleged. But SWBT's response to the OCC's factual inquiry does not contain any 'PIC' rights explanation for **[**34]** the Blitz. It also contradicted a 'draft' response in which SWBT admitted it had been attempting to get all its customers under contract for years. Finally, it contradicted testimony from SWBT management that, on the eve of competition, SWBT sent contract solicitation letters to all of its Oklahoma customers not already under contract. SWBT's response (and other evidence) proved SWBT's 'PIC' rights justification was pretextual, and the true purpose of the Blitz was predatory.

[*1139] Restated, the Plaintiffs' "purpose" rationale for the use of this evidence is that, if the true impetus for the Blitz had been to secure PIC rights, the Southwestern Bell would not have submitted a misleading response to the OCC interrogatory. Because the draft response suggests that Southwestern Bell was willing to disclose one innocent explanation for its contracting, the argument goes, it follows that Southwestern Bell also would have relied on the innocent PIC explanation if that had been a motivating factor, and the fact that it did not do so tends to prove that the PIC theory was a post-hoc pretext. This rationale for the evidence's admission falls within the scope of Pennington's footnote three. Whether **[**35]** or not the jury would have found the evidence persuasive on this point, such an inference certainly would have been permissible.

Assuming that there is some proper purpose for admitting Southwestern Bell's interrogatory response and draft response (along with testimony regarding the context of that exchange), Southwestern Bell argues that the evidence still was inadmissible under Pennington footnote three because the probative value did not outweigh the prejudice. We disagree. In light of the legitimate purpose underlying the evidence's admission and the cautionary jury instruction given by the district court, admission of the evidence was not an abuse of discretion. [6]

[**36] C. State Action Doctrine

Southwestern Bell argues that "the state action doctrine (or analogous principles of state law) bars any use of SWBT's pre-November 1996 contracts to prove antitrust violations." The district court rejected Southwestern Bell's state action arguments on the ground that the doctrine applies only to federal antitrust claims, not state antitrust claims for which Southwestern Bell was found liable here. ***HN16***[] State action immunity is a question of law, which we review de novo. See *Trigen-Okla. City Energy Corp. v. Okla. Gas & Elec. Co., 244 F.3d 1220, 1225* (10th Cir.), cert. denied, *534 U.S. 993, 151 L. Ed. 2d 377, 122 S. Ct. 459 (2001)*. The Supreme Court has stated ***HN17***[] in the antitrust context that "state-action immunity is disfavored, much as are repeals by implication." *FTC v. Ticor Title Ins. Co., 504 U.S. 621, 623, 119 L. Ed. 2d 410, 112 S. Ct. 2169 (1992)*.

We decline to address whether the state action doctrine applies to state antitrust claims. Even assuming that it does, the doctrine's requirements are not met under the circumstances of this case. ***HN18***[] Private parties regulated by the state must show two elements in order **[**37]** to demonstrate that they are entitled to state action

---

[6] Southwestern Bell's challenges to the other aspects of Chamberlain's testimony fall flat, as the only testimony potentially problematic under Noerr-Pennington - the fact that Southwestern Bell opposed the fresh look proposal - was elicited by Southwestern Bell during cross-examination. See *Whiteley v. OKC Corp., 719 F.2d 1051, 1055 (10th Cir. 1983)*.

immunity. "First, the challenged restraint must be one clearly articulated and affirmatively expressed as state policy, and second, the policy must be actively supervised by the State." *Trigen, 244 F.3d at 1226* (internal quotation marks omitted). To meet the first prong, "the state policy does not have to compel the private party to engage in anticompetitive conduct. If the state policy expressly permits, but does not compel, anticompetitive conduct, the private party may still qualify for state action immunity." Id. (emphasis added). Here, it is clear that no state policy expressly permitted Southwestern Bell to attempt to lock up customers contractually long beyond the November 1996 introduction of competition in an effort to stymie **[*1140]** that competition. As the Plaintiffs note, the Oklahoma legislature's 1990 decision to bring competition to the pay phone market (a decision not implemented until 1996) suggests an opposite state policy. The second prong "mandates that the State exercise ultimate control over the challenged anticompetitive conduct." Id. (internal quotation marks omitted). Here, the state **[**38]** likely was not even aware of the full extent of Southwestern Bell's lock up conduct, let alone exercising ultimate control over it. The state action immunity doctrine does not apply to this case. [7]

Southwestern Bell offers **[**39]** a cursory alternative argument that the Plaintiffs' claims are barred by the exclusivity of the OCC's jurisdiction. The only authority cited in support of this argument is Trigen. However, Trigen is obviously distinguishable. All of the state antitrust claims in Trigen involved a challenge to rates charged by a regulated utility with a continuing legal monopoly. *244 F.3d at 1228* (stating that "we construe all of Trigen's state law claims as collateral attacks on [Oklahoma Gas & Electric] filed rates"). The rates charged by the utility were determined by the OCC, not by the utility. Id. Trigen's conclusion that a challenge to the state-mandated rates charged by the utility amounted to an unlawful collateral attack was derived from the Oklahoma Constitution's requirement that an "appeal from an order of the OCC 'affecting the rates, charges, services, practices, rules or regulations of public utilities . . . shall be to the Supreme Court [of Oklahoma] only . . . .' *Okla. Const. art IX, § 20*." *Id. at 1228* (emphasis added, ellipses in original).

The exclusive jurisdiction of the OCC is not implicated here because, unlike the plaintiff **[**40]** in Trigen, the Plaintiffs are not challenging any order of the OCC, or any action by Southwestern Bell mandated by an order of the OCC. The OCC's refusal to impose the fresh look does not imply that it was endorsing Southwestern Bell's lock up campaign. To the contrary, the record suggests that the OCC's ignorance of the lock up campaign's scope may have contributed to its decision not to impose the fresh look. Although Southwestern Bell asserts that "plaintiffs chose not to appeal to the Oklahoma Supreme Court" the OCC's decision not to adopt the fresh look, Southwestern Bell fails to offer any basis for concluding that such an appeal from agency inaction was available. See *Okla. Const. art. 9, § 20*. In any event, the Plaintiffs are not complaining about anything the OCC did or did not do. They are complaining about anti-competitive unilateral activity by Southwestern Bell that was neither mandated, nor authorized, nor reviewed, nor even known about by the OCC. Accordingly, we conclude that Southwestern Bell's exclusive jurisdiction argument fails.

D. Market Power through Contracts

Southwestern Bell argues that the trial court improperly allowed the jury to **[**41]** consider the multi-year, automatically renewing contracts between Southwestern Bell **[*1141]** and the location owners as evidence of market power. It argues that its contract power was limited because the duration of the contracts from which that power derived was limited; such necessarily temporary control of a market cannot constitute monopoly, it argues. The district court rejected this argument:

---

[7] Cf. *Central Telecomm., Inc. v. TCI Cablevision, Inc., 800 F.2d 711 (8th Cir. 1986)*, where the Eighth Circuit rejected a cable provider's argument that "as a matter of law, it could not have possessed monopoly power because [the municipality] regulated price and entry in the cable television business." *Id. at 726*. The court recognized that TCI had the power to raise the price of premium channels without the approval of the municipality and that it "used its entrenched position and . . . various unethical or illegal practices . . . to exclude competition." Id. Of course, in the case before us, Southwestern Bell cannot even claim that its long-term contracts with coercive terms and its anti-competitive "Blitz" were regulated, or even known, by the OCC.

> Defendant bases its argument . . . on assumptions rejected by the jury. First, Defendant argues that entry into the pay phone market is easy. As noted by Plaintiffs, such an argument flies in the face of the testimony of numerous witnesses that Defendant's contract activities had imposed substantial barriers to making a profitable entry into the market. Plaintiffs' argument was bolstered by Defendant's own internal memos reflecting an intent to make it hard for competitors to take customers away from Defendant. Further, the very language of Defendant's contracts evidences a persistent control over the market. Weighing the evidence in favor of Plaintiffs as the Court must, there is clear support that Defendant's intent and the actual effect of the contracts was that they can last forever. Not **[**42]** only did Defendant impose significant restrictions on how the contract could be terminated, it also severely restricted who could terminate a contract. Moreover, Defendant's own internal memos reflect its intent that the contracts never terminated but had anniversary dates. This evidence was sufficient for the jury to find Defendant's contracts were more than temporary or transitory. Finally, the jury was presented evidence that even when Plaintiffs secured a location in which to place a pay phone, Defendant's actions of quoting high termination fees, removing equipment early, or failing to remove equipment, were directed at preventing the switch. Considering this evidence in the light most favorable to Plaintiffs, it is clear the jury acted reasonably in finding Defendant held a monopoly.

On appeal, Southwestern Bell merely reasserts that temporary contract power cannot constitute monopoly power, making no effort to challenge the district court's conclusion that the jury properly could have concluded that the contracts were meant to, and did, have a non-temporary (indeed nearly permanent) effect. That Southwestern Bell presented evidence from which the jury could have reached **[**43]** the contrary conclusion does not warrant reversal.

Southwestern Bell also argues that the district court erred in refusing to issue the following jury instruction:

> If the evidence demonstrates that the defendant's alleged restrictive, exclusionary or predatory conduct will necessarily be temporary, the defendant will not possess the degree of market power required for the monopolization or attempt to monopolize claim. An example of temporary conduct is conduct that is limited by the duration of a contract.

As given, Southwestern Bell argues, the instructions erroneously permitted the jury to premise monopoly liability on contract power, even if the jury did not accept the Plaintiffs' arguments about the non-temporary nature of the contracts.

HN19[] We review the court's refusal to give a particular instruction for abuse of discretion. *Coletti v. Cudd Pressure Control, 165 F.3d 767, 771 (10th Cir. 1999)*. "We do not decide whether the instructions are flawless, but whether the jury was misled in any way and whether it had an understanding of the issues and its duty to decide those issues. So long as the charge as a whole adequately states the law, the refusal **[**44]** to give a particular requested instruction is not grounds for reversal." **[*1142]** Id. (internal quotation marks, citations, and alteration omitted).

Although Southwestern Bell offered its alternative instruction, there is no indication that it objected to the instructions the court did offer. As such, we review the court's instructions for plain error. *United States v. Voss, 82 F.3d 1521, 1530 (10th Cir. 1996)* ***HN20***[] (applying plain error review where "defendants cite their own proffered instructions, [but] have not indicated a place in the record in which they objected to the court's instruction"); *Fed. R. Civ. P. 51* ("No party may assign as error the giving or the failure to give an instruction unless that party objects thereto before the jury retires to consider its verdict, stating distinctly the matter objected to and the grounds of the objection.").

We reject Southwestern Bell's challenge to the instructions, finding that the instructions as a whole were adequate to alert the jury to consider the duration of the effects of any anti-competitive contracts. The jury was told that, in determining "whether any of defendant's practices were predatory or exclusionary," it should **[**45]** consider various factors, including "the duration of any foreclosure of competition caused by [Southwestern Bell's] conduct."

Further, the district court properly rejected Southwestern Bell's proffered instruction, which by listing "conduct that is limited to the duration of the contract" as an example of "temporary conduct," would have misled the jury into believing that any anti-competitive conduct authorized by contract immunizes that conduct from state antitrust scrutiny. That tendered instruction further incorrectly assumed that contracts of any duration, even those contracts here that could be found to be essentially perpetual, should be considered "temporary" and thereby immune from the ***antitrust law***. Thus, the tendered instruction was misleading and incorrect (as well as unnecessary in light of the correct instructions that were given). Thus, refusing to give that instruction was not error. [8]

[46] E. Damages Based on Future Misconduct**

Southwestern Bell argues that the damages awarded below necessarily and impermissibly reflect an award of future damages flowing from future misconduct. The district court rejected this argument:

> Even if Defendant immediately ceased all anti-competitive practices following the verdict, the effects of its prior bad acts would continue. Defendant still holds numerous long-term contracts which affect future competition. There was no suggestion or evidence at trial that those contracts would cease to exist or be terminated by defendant. Additionally, there was evidence of the business growth Plaintiffs would have experienced if allowed to enter a healthy **[*1143]** market when it was newly opened if not for Defendant's conduct.

We agree that the jury's damages award is proper.

At trial, the Plaintiffs' damages model totaled over $ 27 million, while Southwestern Bell's damages model was under $ 1 million. The district court instructed the jury that it "may consider evidence relating to the profits each plaintiff has not received in the past, and will not receive in the future, because of defendant's past unlawful conduct" (emphasis **[**47]** added), and forbade the jury to award purely speculative damages. The jury, per general verdict form not objected to by either party, awarded damages of $ 7,465,450.

Southwestern Bell faces a steep uphill climb in attempting to overturn the jury's damages award. In addressing a challenge to a jury's damages award in an antitrust case, the Supreme Court held that ***HN21***[] the award "must be allowed to stand, unless all reasonable men, exercising an unprejudiced judgment, would draw an opposite conclusion from the facts." *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 566, 75 L. Ed. 544, 51 S. Ct. 248 (1931)*. This court has explained further that:

> ***HN22***[] We review a district court's disposition of a motion for remittitur or new trial on damages for a manifest abuse of discretion. . . .
>
> > In order to establish an abuse of discretion, the party that moved unsuccessfully for a new trial on the basis of an excessive verdict carries the heavy burden of demonstrating that the verdict was clearly, decidedly, or overwhelmingly against the weight of the evidence. In applying the abuse of discretion standard, we are also mindful that absent an award so excessive **[**48]** or inadequate as to shock the judicial conscience and to raise an irresistible inference that passion, prejudice, corruption or other improper cause invaded the trial, the jury's determination of the fact is considered inviolate.

Hynes v. Energy West, Inc., 211 F.3d 1193, 1206 (10th Cir. 2000) (quoting *Campbell v. Bartlett, 975 F.2d 1569, 1577 (10th Cir. 1992))*. We have said that, ***HN23***[] even where a "persuasive" explanation of the jury's damages award indicates an award contrary to law, the possibility of a proper explanation, "however slight the chance," will suffice to sustain the damages award. *United Phosphorus, Ltd. v. Midland Fumigant, Inc., 205 F.3d 1219, 1228*

[8] Southwestern Bell cites *Colorado Interstate Gas Co. v. Natural Gas Pipeline Co., 885 F.2d 683 (10th Cir. 1989)*, as support, but that case by no means forecloses the consideration of contractual activity in determining monopoly liability. In Colorado Interstate Gas, the potential monopolist's market power derived solely from a contract with a fixed expiration date, and the court found this to be an insufficient basis for monopoly liability under the circumstances in light of "the certainty that the market will return to the status quo at a predetermined date and the fact that [the alleged monopolist] has no power to prevent the erosion of its market share." *Id. at 697 n.24*. By contrast, Southwestern Bell's liability was based on a whole system of contracts with exclusionary terms (including provisions that the district court found could cause many of them, in fact, to last forever), as well as an abundance of other anti-competitive conduct.

(10th Cir. 2000) (rejecting defendant's double recovery claim, even though the damages were precisely the sum of the two amounts that could not be aggregated, because "the jury's award was well within the range of proof"). Against this background, Southwestern Bell's damages arguments fall short.

Both parties agree that, HN24[] in an antitrust case, future damages may be recovered for past misconduct but not for future misconduct. The Plaintiffs focus their defense of the **[**49]** judgment on the proposition that the jury could have awarded the damages it did solely by reference to past misconduct. Looking only to the pay phone locations that they allegedly had already lost at the time of trial as a result of Southwestern Bell's monopolistic behavior (1,863 pay phones), the Plaintiffs calculate that the total damages flowing from the deprivation of these 1,863 phones was $ 7,490,187 (roughly $ 35,000 greater than the jury awarded). Of this number, roughly $ 2.74 million is profits lost prior to trial, and the remainder is profits lost after trial as a result of Southwestern Bell's continuing enforcement of its contracts with respect to these 1,863 phones.

Southwestern Bell does not challenge the Plaintiffs' arithmetic, but does contest **[*1144]** the logical underpinnings of their argument. It contends that the future enforcement of past contracts is future misconduct, not past misconduct. The essence of Southwestern Bell's position is this: "Any damages from existing contracts are avoidable, either by SWBT ceasing to enforce unlawful contracts, or by an injunction barring their enforcement." We do not believe that either ground justifies overturning the damages award.

[50]** First, Southwestern Bell contends that damages arising from the future enforcement of the contracts are avoidable because SWBT would stop enforcing "unlawful contracts." Southwestern Bell acknowledges that, as the district court noted, it presented no evidence at trial that it would "cease to enforce" the contracts, but contends on appeal that "it is absurd to require a defendant, arguing that contracts are legal, to tender witnesses to promise that it would not enforce lawful agreements in the future." However, Southwestern Bell never offered in the record any assurance that it would cease to enforce its contracts with location owners. Southwestern Bell suggests that such evidence is unnecessary because the law presumes that the antitrust defendant will obey the law, which compels the conclusion that Southwestern Bell would not enforce unlawful contracts. Southwestern Bell offers no authority, binding or otherwise, suggesting that the presumption of lawful behavior extends to the forfeiture of existing contract rights. Indeed, as the Plaintiffs note, they never sought a ruling on the enforceability of individual contracts, nor would such a ruling be proper in the absence **[**51]** of the thousands of contracting third-party location owners in this litigation. Presumably not all of the location owners would want to terminate their contracts with Southwestern Bell. If Southwestern Bell were to decide unilaterally that it would treat the contracts as null and void, it may expose itself to breach of contract claims by the location owners. This suit was about holding Southwestern Bell accountable to the Plaintiffs for its past monopolistic behavior, and the future enforceability of its contracts vis-a-vis all the location owners was simply not before the court. Under such circumstances, the district court was not obligated to assume that Southwestern Bell would voluntarily terminate its contracts with location owners.

Second, Southwestern Bell argues that the district court erred by upholding damages based upon future enforcement of past contracts rather than entering an injunction forbidding Southwestern Bell to enforce its contracts. As an initial matter, Southwestern Bell does not indicate that it requested or consented to such an injunction either before or after the jury decided the damages issue. Even assuming that the possibility of injunctive relief was **[**52]** raised before the district court, Southwestern Bell offers no support for its position that the possibility of issuing a contract-voiding injunction renders damages based upon continuing enforcement of the contracts improper as a matter of law. Neither of the cases cited by Southwestern Bell supports such a proposition. National Society of Professional Engineers v. United States, 435 U.S. 679, 697-98, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978), addressed the quite different question of whether a court could injunctively limit an antitrust defendant's free speech rights. The interplay between the money damages for future action and the availability of injunctive relief was not even remotely implicated. The same may be said of the district court case cited by Southwestern Bell, Board of Regents v. NCAA, 601 F. Supp. 307 (W.D. Okla. 1984). The case is **[*1145]** relevant only in that it provides an example of a decision to enjoin the enforcement of contracts found to violate the antitrust laws. See id. at 308. Southwestern Bell offers no relevant authority in support of its argument that the possibility of a contract-avoiding injunction forecloses **[**53]** the availability of damages based on future enforcement of continuing contracts. We perceive no justification for creating such a rule, and therefore reject Southwestern Bell's argument.

As the Supreme Court recognized in National Society of Professional Engineers, *HN25*[] "the standard against which the [district court's] order must be judged is whether the relief represents a reasonable method of eliminating the consequences of the illegal conduct." *435 U.S. at 698*. There is no reason to doubt that the jury's damages award did just that.

CONCLUSION

The judgment below is **AFFIRMED**. [9]

Dissent by: KELLY

Dissent

KELLY, Circuit Judge, dissenting.

I would reverse on three grounds and respectfully dissent. In my view, the district court erred (1) by defining the relevant market on summary judgment, (2) in allowing the jury to base antitrust liability on contracts that were subject to OCC regulation and thereby immune from collateral attack under the state **[**54]** action and exclusive jurisdiction doctrines, and (3) in allowing damages for future enforcement of contracts that are necessarily void as against public policy under the jury's interpretation of the evidence.

1. Defining the Product Market on Summary Judgment.

Plaintiffs prevailed upon their state-law monopolization and restraint of trade claims, [1] which require proof of a relevant market. "A relevant market is determined by consideration of two elements: (1) A relevant *geographic*

---

[9] All outstanding motions are denied.

[1] *Okla. Stat. Ann. tit. 79, § 203* provides in pertinent part:

> A. Every act, agreement, contract, or combination in the form of a trust, or otherwise, or conspiracy in restraint of trade or commerce within this state is hereby declared to be against public policy and illegal.
>
> B. It is unlawful for any person to monopolize, attempt to monopolize, or conspire to monopolize any part of trade or commerce in a relevant market within this state.
>
> . . . .
>
> D. As used in this section:
>
> 1. "Monopolize" means:
>
> a. the possession of monopoly power in the relevant market, and
>
> b. the willful acquisition or maintenance of that power by exclusionary conduct as distinguished from growth or development as a consequence of a superior product and/or service, business acumen, or historic accident;
>
> 2. "Monopoly power" means the power to control market prices or exclude competition;
>
> . . . .

market; that is, the geographical territorial area involved; and (2) a relevant *product* market-the type or area of goods or services in which the product which is subject to the restraint effectively competes." *Teleco, Inc. v. Ford Indus., Inc., 1978 OK 159, 587 P.2d 1360, 1364 (Okla. 1978)* (italics in original). Despite genuine issues of material fact, the district court granted the Plaintiffs' motion for summary judgment on relevant product market. The court defined the relevant market "as the provision of public pay phones and related pay phone services for the territory in Oklahoma in which SWBT operates as a Local Exchange Carrier." Aplt. App. 2149. **[*1146]** It did so on the strength of **[**55]** its holding that SWBT's expert's conclusion concerning the interchangeability of pay phones and cell phones was "simply unreasonable given the facts in the record." Id.

[56]** The district court incorporated its summary judgment ruling in its jury instructions defining the relevant market for the restraint of trade and monopoly claims. Aplt. App. 3470, 3483, 3500. According to this court, "the parties allowed the jury to determine which set of customers should be used in evaluating monopoly power," the pay-phone location owners or the end-users (consumers) of pay-phone services. [2] Ct. Op. at 6.

We readily recognize that the district court could not have properly granted summary judgment on whether the relevant market includes cell phones as well as pay phones. See *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 468-69, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)* **[**57]** (non-movant in antitrust case need only prove its inferences are reasonable, as opposed to "economically senseless"). Equally problematic is the district court's exclusion of SWBT's expert testimony on the product market issue without benefit of a Daubert analysis. See *Daubert v. Merrell Dow Pharm., Inc., 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993)*; see also *United States v. Velarde, 214 F.3d 1204, 1209 (10th Cir. 2000)* (The [district] court must, on the record, make some kind of reliability determination.") (emphasis in original). Yet this court concludes that "regardless of the interchangeability of pay phones and cell phones at the end-user level, there is no doubt that pay phones and cell phones are not interchangeable at the location-owner level, and that is the level where the Plaintiffs argued that Southwestern Bell has monopolized competition." Ct. Op. at 12; see also *id. at 20*. Without question, the various "levels" of distribution for pay-phone services are implicated.

There is no dispute that defining the relevant market is a factual matter normally entrusted to the trier of fact, here the jury. See *Reazin v. Blue Cross & Blue Shield of Kan., Inc., 899 F.2d 951, 975 (10th Cir. 1990)*; **[**58]** *Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1220 (10th Cir. 1986)*; *Telex Corp. v. Int'l Bus. Machs. Corp., 510 F.2d 894, 915 (10th Cir. 1975)* (per curiam). The jury should have been allowed to determine the relevant market because there was a factual dispute on summary judgment as to whether Plaintiff's theory was correct. See III Aplt. 743-48; V Aplt. App. 1281-83. This court's holding that end-users of phone services do not matter is in considerable tension with the Supreme Court's holdings that the relevant product market is made up of "commodities reasonably interchangeable by consumers for the same purposes," meaning that the cross-elasticity of demand between products must be similar but need not be identical. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*; see also *United States v. Continental Can Co., 378 U.S. 441, 443, 12 L. Ed. 2d 953, 84 S. Ct. 1738 (1964)*; *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. While it is true that du Pont involved a consumer market for cellophane **[**59]** and flexible packaging and that Plaintiffs here allege that the market involves competing for pay phone locations of location owners, **[*1147]** neither reason compels the Plaintiffs' definition of the relevant product market.

In du Pont, the government accused du Pont of monopolizing the market for cellophane, and the issue before the Court was whether the relevant product market consisted of cellophane alone or all flexible wrappings. *351 U.S. at 380-81*. Notwithstanding the government's attempt to define the relevant market narrowly, the Court held "that

---

See also *Harolds Stores, Inc. v. Dillard Dep't Stores, Inc., 82 F.3d 1533, 1543-44 (10th Cir. 1996)* (discussing elements of restraint of trade in Oklahoma).

[2] In defining the relevant product market as a matter of law, the district court effectively rejected SWBT's contention that it should be evaluated at the level of the end users. This legal ruling is before us. See *Ruyle v. Continental Oil Co., 44 F.3d 837, 841 (10th Cir. 1994)*.

cellophane's interchangeability with the other materials mentioned suffices to make it part of this flexible packaging market." *Id. at 400*.

In this case, the Plaintiffs argue for a narrower market, one lacking any interchangeable commodities. See *Eastman Kodak, 504 U.S. at 481* (holding that a relevant market may consist of a single product or service and must be evaluated from the perspective of the choices available to Kodak equipment owners). It is undisputed that no public cellphones are available to location owners. The contractual support for Plaintiffs' theory-that the SWBT standard contract identifies **[**60]** the location owner as a "customer"-is illusory at best. See Aplt. App. 1115-16 (contract); see also *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1272 (9th Cir. 1975)* (relevant products were franchises available to concessionaire, not concession products marketed to consumers or concession services to major league baseball teams). The contracts actually provide that location owners are paid a commission by SWBT for "the right to install and maintain SWBT public pay telephone(s) and associated equipment (payphone equipment)" on their property. Aplt. App. 1115-16 (contract). This suggests that payphone service providers do not sell payphones or payphone services to location owners, but rather sell payphone services to traditional consumers (end users) and use the location owners as a method of distribution. In any event, as the district court acknowledged and the record confirms, the factual issues surrounding the relevant product market and the perspective from which it should be evaluated were hotly contested on summary judgment. Aplt. App. 2142.

This circuit has cautioned about overly restrictive definitions of the relevant product market, **[**61]** notwithstanding that a potential distributor alleged antitrust injury from a manufacturer's refusal to deal. In Westman, a distributor of kitchen equipment alleged that Hobart, a kitchen equipment manufacturer, refused to grant a distributorship in violation of § 1 of the Sherman Act. The district court viewed one type of distribution method ("one stop shopping") as comprising the relevant product market. This court reversed, holding that the relevant product market must be defined by interchangeability of products from the perspective of consumers, not distributors. After noting that "the purpose of the antitrust laws is the promotion of consumer welfare," *Westman, 796 F.2d at 1220*, the court stated:

> In defining the relevant market as "one-stop shopping," the trial court apparently focused on the system of product distribution rather than the market facing the consumer of restaurant equipment. The trial court's focus justified the conclusion that "one-stop distribution" is an effective way to compete in the market. But the fact that "one-stop distribution" is an effective or even superior way to compete does not mean that the relevant market is limited **[**62]** to those who use that method of competition. "Any definition of line of commerce which ignores the buyers and focuses on what the sellers do, or theoretically can do, is not meaningful."

[*1148] *Id. at 1220-21* (citation omitted). Finding that other restaurant equipment was reasonably interchangeable, the court held "that the relevant product market at a minimum consisted of the products generally sold by restaurant equipment dealers, whether or not those dealers carried a wide enough range of products and brands to be classed as 'one stop shopping' distributors." *Id. at 1221* (emphasis added). Although Westman involved a § 1 claim, its holding concerning the relevant market is also fully applicable to a § 2 monopolization claim. See Thurman Indus. Inc. v. Pay ' *N Pak Stores, Inc., 875 F.2d 1369, 1373, 1378 (9th Cir. 1989)* (market definition required for § 1 and § 2 claim). The district court's grant of summary judgment in this case foreclosed jury consideration of evidence that showed that cellphones competed for consumers' business, took customers from payphone providers and constrained pricing, all of which could have enabled **[**63]** the jury to conclude cellphones were in the relevant market. See *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224-25, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* (antitrust laws protect against injury to competition, not competitors); *Beville v. Curry, 2001 OK 1, 39 P.3d 754, 759-60, 764 (Okla. 2001)* ("The *sine qua non* of an antitrust claim is injury to competition.") (emphasis in original), reh'g granted, (Oct. 9, 2001). In other words, SWBT was entitled to be heard by a jury on the allegation that it lacked the power to control market prices or exclude competition vis-a-vis the relevant market it contended for. See Aplees. Sur-Reply Br. at 6 (arguing that monopoly claim verdict could be affirmed on either theory); see also *Beville, 39 P.3d at 760* ("Market power is the preliminary threshold inquiry and is often dispositive of antitrust cases."). One need not accept SWBT's monopsony argument to conclude that the relevant market should have been decided by the jury, not the district court. See *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)* **[**64]** (holding that proof of relevant market is essential under § 2).

The evidence plainly "presented a sufficient disagreement to require submission to a jury . . . ." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 251-252, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

2. Rejecting the State-Action and Exclusive Jurisdiction Doctrines.

Although this court declines to decide whether the state-action doctrine applies to state antitrust claims, it seems clear that it does apply, contrary to the district court's holding. Aplt. App. 3942-43. Oklahoma's ***antitrust law*** is to "be interpreted in a manner consistent with federal ***antitrust law*** . . . and the case law applicable thereto." *Okla. Stat. Ann. tit. 79, § 212*; see also *Teleco, Inc. 587 P.2d at 1362*; *Oakridge Investments, Inc. v. S. Energy Homes, Inc., 1986 OK CIV APP 8, 719 P.2d 848, 850 (Okla. Ct. App. 1986)*. Nothing suggests that Oklahoma would reject the state-action doctrine which we have applied to federal antitrust claims in similar circumstances. See *Trigen-Oklahoma City Energy Corp. v. Oklahoma Gas & Elec. Co., 244 F.3d 1220, 1225-1226 (10th Cir. 2001)* (recognizing Oklahoma's **[**65]** policy of allowing regulation instead of competition in electricity sales); *S. Disposal, Inc. v. Tex. Waste Mgmt., 161 F.3d 1259, 1263 (10th Cir. 1998)* (recognizing Oklahoma's policy of allowing regulation instead of competition in waste disposal services).

This court decides that the state action does not apply to the circumstances of this case because (1) "it is clear that no state policy expressly permitted Southwestern Bell to attempt to lock up customers contractually long beyond the November 1996 introduction of competition in an effort to **[*1149]** stymie the competition," and (2) "the state likely was not even aware of the full extent of Southwestern Bell's lock up conduct, let alone exercising ultimate control over it." Ct. Op. at 27-28.

Here, the state plainly made clear its intent to regulate telephone services, including payphone services, until the OCC permitted competition. See *Okla. Const. art. IX, §§ 18*, *34*; [3] *Okla. Stat. Ann. tit. 17, § 131* (OCC issues certificate of convenience and necessity); *Okla. Stat. Ann. tit. 17, § 139.1* (directing the OCC to "promulgate and enforce operating requirements for coin-activated telephones and credit card-activated **[**66]** telephones available for public use owned or operated by corporation or persons other than telephone corporations authorized by the Commission to operate within service areas."); *Southwestern Bell Tel. Co. v. Oklahoma, 1992 OK 5, 825 P.2d 262, 265* (recognizing that local exchange companies are a state-created exception to prohibition on monopolies); Aplt. App. 3711-3724 (1985) (OCC 1985 Tariff Order rejecting competitive payphones, and ordering that SWBT "be and hereby is the only authorized provider of coin phone service within its territory."). Rather than concentrating on the particular field of regulation, this court focuses upon the effects of alleged anti-competitive conduct beyond November 1996. But the proper inquiry is whether Oklahoma intended to displace competition in the payphone market with a regulatory program until November 1996. See *S. Motor Carriers Rate Conference v. United States, 471 U.S. 48, 64-65, 85 L. Ed. 2d 36, 105 S. Ct. 1721 (1985)*. The answer is clear-not until the OCC determined how and when competition could begin did Oklahoma change its policy.

[67]** The OCC had ultimate control over SWBT's alleged anti-competitive conduct, which goes to satisfy the two-part Midcal test for state action immunity. See *Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)* ("First, the challenged restraint must be 'one clearly articulated and affirmatively expressed as state policy'; second, the policy must be 'actively supervised' by the state itself.") (citation

---

[3] *Okla. Const. art. 9, § 18* provides in part:

> The Commission shall have the power and authority and be charged with the duty of supervising, regulating and controlling all transportation and transmission companies doing business in this State, in all matters relating to the performance of their public duties and their charges therefor, and of correcting abuses and preventing unjust discrimination and extortion by such companies; and to that end the Commission shall, from time to time, prescribe and enforce against such companies, in the manner hereinafter authorized, such rates, charges, classifications of traffic, and rules and regulations, and shall require them to establish and maintain all such public service, facilities, and conveniences as may be reasonable and just, which said rates, charges, classifications, rules, regulations, and requirements, the Commission may, from time to time, alter or amend.

omitted). Concerning the first part, the state need only permit the conduct to occur-approval is unnecessary. *Trigen, 244 F.3d at 1226*. As discussed above, Oklahoma plainly regulated the field. Concerning the second part, state officials must have and exercise power to review alleged anti-competitive acts. *Patrick v. Burget, 486 U.S. 94, 101, 100 L. Ed. 2d 83, 108 S. Ct. 1658 (1988)*.

We have twice concluded that Oklahoma's pervasive regulation of electric utilities satisfied the "active supervision" requirement. See id.; *Lease Lights, Inc. v. Pub. Serv. Co. of Okla., 849 F.2d 1330, 1334 (10th Cir. 1988)*. In Trigen, we based satisfaction of the active **[**68]** supervision requirement on the OCC's regulatory authority. *244 F.3d at 1226*. In Lease **[*1150]** Lights, we looked not only at the OCC's grant of authority but also considered actual proceedings of the OCC. 849 F.2d at 1334.

In this case, not only OCC's regulatory authority, but also its actual proceedings and rulemaking, support the active supervision requirement. Specifically in 1996, the OCC was concerned with competition and addressed it in a formal rulemaking proceeding which resulted in administrative regulations. Aplt. App. 3725 (Notice of Rulemaking) (OCC proposed to establish rules including "what safeguards are necessary to protect the interest of competitive payphone service providers"); Aplt. Add. tab 8 (Okla. Admin. Code. tit, 165, ch. 58 (Facilitation and Provisioning of Payphone Service); id. at tab 12 (OCC's Agency Rule Report Establishing Pay Telephone Service Rules).

Tellingly, an assistant attorney general in arguing for the "fresh look" proposal before the OCC stated:

> And it's hard for me to imagine that anyone would seriously argue that existing payphone service contracts are not a significant barrier to new entrants. The incumbent **[**69]** LECs have had decades of monopoly status in order to identify the most lucrative sites within their service territories, and they have had months to gain a competitive advantage through going out and renegotiating those contracts. The payphone rules, we believe, should allow a renegotiation window.

Aplt. Add. tab 11 at 22 (Rick Chamberlain testimony before the OCC); [4] see also Aplt. App. 3729-3741 (Oklahoma Attorney General's brief before OCC arguing that OCC had jurisdiction to consider payphone service and the location of payphones and existing LEC contracts were a barrier to competition). Various providers complained to the OCC about the renegotiation tactics of SWBT as hindering competition, even including SWBT's May 1, 1996 letter to location owners. Aplt. App. 3743-3748 (Textel Communications, Inc.'s); 3752-3765 (Cherokee Communications, Inc.). The record reveals that parties were divided over the fresh look proposal, whether the OCC had jurisdiction to entertain it, and whether it was constitutional. Ultimately, the OCC voted against adopting it, but indicated its willingness to reconsider the matter with discussion and investigation, at the invitation of the industry. **[**70]** Aplt. Add. tab 12 at 11. All of this suggests that the OCC could and did consider the alleged anti-competitive conduct of SWBC. The fact that the OCC might not have been aware of the full extent of SWBT's alleged anti-competitive conduct (which is pure speculation) or declined to intervene is of no moment-the heart of this case is SWBT's pre-competition contracts which the OCC reviewed and allowed to remain in effect. SWBT's alleged bad acts are insufficient to defeat state action immunity. See *Trigen, 244 F.3d at 1227* (even if OG&E had committed certain improper acts in the regulated sale of electricity, state action immunity was proper).

[71]** **[*1151]** The exclusivity of the OCC's jurisdiction over matters concerning payphones is apparent. No appeal was taken from the OCC's decision not to impose a fresh look. Although this court questions whether such an appeal could have been maintained, the constitutional provision allows an appeal "from any action" of the OCC "prescribing . . . practices, rules or regulations" and "by any party affected, or by any person deeming himself aggrieved by any such action . . . ." *Okla. Const. art. 9, § 20*. This is hardly a limited grant of standing. In the context

---

[4] The Plaintiffs argue that this transcript should be stricken as it was not before the district court. See *United States v. Kennedy, 225 F.3d 1187, 1190-91 (10th Cir. 2000)*. I would grant SWBT's motion to supplement the record pursuant to ***Fed. R. App. P. 10(e)(2)(C)***, because the substance of Mr. Chamberlain's comments is contained in his testimony before the district court, Aplt. App. 4622, and the payphone regulatory system in Oklahoma was always an issue in this case. Further, given that the district court held that the state-action doctrine did not apply, inclusion of this transcript in no way results in the appellate court deciding an issue with evidence that might have made a difference to the district court.

of the fresh look proposal, the OCC was exercising its constitutional and statutory authority to promulgate the payphone rules and regulations. Aplt. Add. tab 12 at 3. The court's suggestion that an appeal could not have been taken from agency inaction ignores the forest for the trees. Moreover, the Oklahoma Supreme Court has passed on OCC inaction before. *Turpen v. Okla. Corp. Comm'n, 1988 OK 126, 769 P.2d 1309, 1325 (Okla. 1988)* (OCC did not err in deciding to address imputed value issue later). Analogous to Trigen, the Plaintiffs' state antitrust claims based upon pre-November 1996 conduct are nothing more than a collateral attack **[**72]** on the OCC's right to supervise, regulate and control matters relating to the performance of transmission company public duties and of correcting abuses. See *Okla. Const. art. 9, § 18*. A major part of Plaintiffs' case concerns SWBT's pre-competition contracts, which the OCC reviewed and allowed to remain in effect and which plainly come within the OCC's constitutional and statutory jurisdiction.

3. Allowing Damages for Future Enforcement of Contracts

The court is undoubtedly correct that antitrust damages are not subject to a rigorous standard of proof; estimates and reasonable inferences of damages are sufficient. See *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 567, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*; *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*. At the same time, an antitrust plaintiff has the burden of proof and damages cannot be speculative. See Wells Real Estate, inc. v. *Greater Lowell Bd. of Realtors, 850 F.2d 803, 816 (1st Cir. 1988)*. Future damages are permissible, but only to the extent that they are based upon past wrongdoing. **[**73]** *Lawlor v. Loewe, 235 U.S. 522, 536, 59 L. Ed. 341, 35 S. Ct. 170 (1915)*.

In Oklahoma, a statutory antitrust action is in the nature of tort, and is not an action on contract. *McDonald v. Amtel, Inc., 1981 OK 78, 633 P.2d 743, 745 (Okla. 1981)*. Here, however, the contracts were integral to the proof of damages. Whether based upon SWBT continuing to enforce its contracts or on the rationale of free and open competition beginning in 1996, the damage award in this case presupposes that SWBT's anti-competitive acts will continue post-verdict and the contracts will continue to be enforced. This assumption is wrong as a matter of law. It must be remembered that the Plaintiffs prevailed upon their state-law restraint of trade claim and that such acts, and contracts which are the product of such acts, are "against public policy and illegal." *Okla. Stat. Ann. tit. 79, § 203(A)*; *First Nat'l Pictures v. Pappe, 1934 OK 644, 170 Okla. 279, 39 P.2d 526, 530 (Okla. 1934)* ("If [a] contract was made in violation of the anti-trust laws, it was an illegal and unenforceable contract"); see also *United States v. Addyston Pipe & Steel Co., 85 F. 271, 290 (6th Cir. 1898)* **[**74]** (holding that contracts where the primary purpose is to restrain trade are void). Plainly, the damage award based upon future damages is inappropriate and inconsistent with the objectives of ***antitrust law*** when an injunction against future anti-competitive conduct would solve the problem. See *United **[*1152]** States v. Or. State Med. Soc., 343 U.S. 326, 333, 96 L. Ed. 978, 72 S. Ct. 690 (1952)*.

4. Conclusion.

The district court erred in defining the relevant product market and not applying the state action or exclusive jurisdiction doctrines to bar the Plaintiffs' claims arising prior to payphone competition. The damages award represents impermissible future damages based upon future anti-competitive conduct that would be unlawful.

Because a new trial would be required on remand, the district court again would have to consider the admissibility of SWBT's interrogatory answer and its draft response under the Noerr-Pennington doctrine. Given that the pre-November 1996 conduct is not actionable and that the district court found that the interrogatory was poorly worded and resulted in an accurate but incomplete response, this line of inquiry would carry an even stronger **[**75]** danger of unfair prejudice than before, even with a limiting instruction. Though it may be admissible under footnote 3 of Pennington, such evidence still has to shed some light on "the purpose and character of the particular transactions under scrutiny," *United Mine Workers v. Pennington, 381 U.S. 657, 670 n.3, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*, which would include transactions subsequent to November 1996. Plainly, the jury in this case was exposed to the theory that SWBT's advocacy before the OCC demonstrated its intent to monopolize. Aplt. App. 4708; Aplt.

App. 8379-80 (closing argument). Though the district court instructed the jury to disregard an answer espousing this theory, it points to the need for caution with this evidence.

Opinion

ORDER GRANTING IN-PART AND DENYING IN-PART DEFENDANTS' MOTION TO DISMISS CERTAIN STATE COUNTS OF THE INDIRECT PURCHASER PLAINTIFFS' THIRD AMENDED COORDINATED COMPLAINT

THIS CAUSE is before the Court on Defendants' Motion to Dismiss Certain State Law Counts of the Indirect Purchaser Plaintiffs' Third Amended Coordinated Complaint [**D.E. No. 492**]. The Indirect Purchaser Plaintiffs ("Plaintiffs") filed their Coordinated Third Amended Class Action Complaints **[*8]** ("Third Amended Complaint") on behalf of all persons or entities that after October 15, 1995, purchased, other than for resale, prescription drugs containing terazosin hydrochloride ("terazosin"). Defendants Abbott Laboratories ("Abbott"), Geneva Pharmaceuticals, Inc. ("Geneva"), and IVAX Pharmaceuticals, Inc. ("IVAX"),[1] formerly known as Zenith Goldline Pharmaceuticals, Inc., have moved to dismiss, pursuant to *Fed. R. Civ. P. 12(b)(6)*, certain state law claims in the Third Amended Complaint. Having carefully considered the arguments raised by the parties, and for the reasons stated below, the Court will grant in-part and deny in-part Defendants' motion.

[1] IVAX recently settled with the Indirect Purchaser Plaintiffs.

I. BACKGROUND

In Spring 1998, Abbott entered into secret accords with generic drug makers Geneva and IVAX to forestall competition in its lucrative and exclusive domestic market for terazosin. Abbott's drug, "Hytrin," was the only terazosin drug available in the United States for the treatment of hypertension or enlarged prostate until Geneva introduced its generic version of Hytrin on August 12, 1999. See *In re Terazosin Hydrochloride Antitrust Litig., 164 F.Supp.2d 1340 (S.D. Fla. 2000)* (recounting terms of agreements, which sought to preclude Geneva and IVAX from marketing the first generic terazosin hydrochloride drugs in the nation for **[*9]** some time, removed the risk that they would buy or sell the right to introduce such drugs in the interim, and enlisted them as allies who would oppose or at least ignore other companies' applications to produce such drugs).

Both the indirect purchasers and the direct purchasers,[2] as well as several states, have filed class action complaints alleging that the Defendants' clandestine accords violated federal and state antitrust or consumer protection statutes. On December 13, 2000, this Court granted the direct purchasers' motion for a partial summary judgment that these agreements were patently anti-competitive, unreasonable, and illegal *per se* under section one of the Sherman Antitrust Act, *15 U.S.C. § 1*. See id.[3] Ten months later, upon a finding that "the class action mechanism offers the most efficient method for adjudicating the direct purchasers' suits," this Court granted the direct purchasers' consolidated motion for class certification. *In re Terazosin Hydrochloride Antitrust Litig., 203 F.R.D. 551, 552 (S.D. Fla. 2001)*.[4]

With respect to the indirect purchasers' claims, on July 2, 2001, the Court granted Defendants' motion to dismiss certain counts of the indirect purchasers' Second Amended Complaint ("July 2nd Order"). See *In re Terazosin Hydrochloride Antitrust Litig., 160 F. Supp. 2d 1365 (S.D. Fla. 2001)*. Relying primarily on the Supreme Court's decisions **[*10]** in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, and *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, and their state progeny, the Court dismissed with prejudice the Plaintiffs' federal Sherman Act and Arizona antitrust claims, and deferred judgment on the New Jersey antitrust claims. The Court also dismissed those claims brought under the Tennessee Trade Practices Act, *Tenn. Code Ann. §§ 47-25-101-112*, and dismissed without prejudice Plaintiffs' common law unjust enrichment claims. Finally, and perhaps most importantly, the Court dismissed without prejudice Plaintiffs' claims based on the laws of those states for which there was no named plaintiff with standing to pursue a claim.[5]

Plaintiffs thereafter filed a Third Amended Complaint which purports to cure many of the legal defects outlined in this Court's July 2" Order. In substance, Plaintiffs' Third Amended Complaint seeks relief under the antitrust laws, consumer protection laws, and/or unjust enrichment laws in eighteen states and the District of Columbia. Defendants move to dismiss in the following respects: (1) pursuant to this Court's prior ruling, Plaintiffs' claims under the laws of Illinois, Minnesota, Mississippi, Nevada, New Jersey, New Mexico, North Carolina, North Dakota, South Dakota, and West Virginia are subject to dismissal for lack of **[*11]** standing;[6] (2) Plaintiffs' New Jersey law

---

[2] Direct purchasers are those entities that purchased terazosin principally for resale.

[3] Pursuant to *28 U.S.C. § 1292(b)*, this Court certified its December 13, 2000 Order for review by the Eleventh Circuit, which subsequently accepted the appeal. As of this date, there has been no ruling from the Eleventh Circuit.

[4] Pursuant to *Fed. R. Civ. P. 23(f)*, this matter is also pending before the Eleventh Circuit.

[5] Specifically, the Court dismissed those claims brought under the laws of: Maine, Minnesota, Mississippi, New Mexico, New Jersey, North Carolina, North Dakota, South Dakota, and West Virginia.

[6] In a footnote, Defendants also challenge the standing of named Plaintiffs Clarence Reid, who purchased Hytrin in the District of Columbia during the relevant time period, and David Grund, who purchased Hytrin in Maine during the relevant time period. (Defs.' Memorandum at 7, n. 6). Essentially, Defendants argue that these two individuals do not adequately represent the entire end payers class in their respective states and thus Plaintiffs' claims in those states should be dismissed. Realizing, however,

claims are barred as a matter of law; (3) Plaintiffs' unjust enrichment claims under the laws of Alabama and Illinois must be dismissed as a matter of law; (4) Plaintiffs' Nevada antitrust claims must be dismissed as a matter of law; and (5) Plaintiffs' consumer protection claims under the laws of New Mexico and New York[7] must also be dismissed as a matter of law.

II. DISCUSSION

A. Standard of Review

To survive a *Rule 12(b)(6)* motion to dismiss, a complaint need only provide a short and plain statement of the claim and the grounds on which it rests. *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*. A *Rule 12(b)(6)* motion tests not whether the plaintiff will prevail on the merits, but instead, whether the plaintiff has properly stated a claim. See *Fed. R. Civ. P. 12(b)(6)*; *Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974)* (overturned on other grounds by *Harlow v. Fitzgerald, 457 U.S. 800, 102 S. Ct. 2727, 73 L. Ed. 2d 396 (1982))*. Thus, a court may dismiss a complaint for failure to state a claim only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations. See *Hishon v. King & Spalding, 467 U.S. 69, 73, 104 S. Ct. 2229, 81 L. Ed. 2d 59 (1984)*. In deciding such a motion, the court must accept all the complaint's well-pled factual allegations as true and draw all reasonable inferences in the nonmovant's favor. See *Scheuer, 416 U.S. at 236*. Regardless of what standard a court uses, the threshold of sufficiency **[*12]** that a complaint must meet to survive a motion to dismiss is exceedingly low. *Ancata v. Prison Health Svcs., Inc., 769 F.2d 700, 703 (11th Cir. 1985)* (citation omitted).

B. Standing

In order to establish standing, a plaintiff must allege: (1) an injury in fact; (2) causation; and (3) redressability. *Miccosukee Tribe of Indians of Fla. v. Southern Everglades Restoration AllianceS, 304 F.3d 1076, 2002 WL 2013529, *2 (11th Cir. 2002)* (citing *Steel Co. v. Citizens for a Better Environment, 523 U.S. 83, 103, 118 S. Ct. 1003, 140 L. Ed. 2d 210 (1998))*. With these well established requirements in mind, this Court, in the July 2nd Order, concluded that "no named plaintiff suffered an injury giving rise to an antitrust claim in Arizona,[8] Maine, Minnesota, Mississippi, New Jersey, New Mexico, North Carolina, North Dakota, South Dakota or West Virginia." *160 F.Supp.2d at 1371*. Thus, because "the named plaintiffs cannot rely on unidentified persons within those states to state a claim for relief," id., Plaintiffs were granted leave to amend to identify specific named plaintiffs who suffered an injury in each jurisdiction.

Defendants argue that there is still not any named plaintiff with standing to bring suit under the laws of ten states listed in the Third Amended Complaint: Minnesota, Mississippi, New Jersey, New Mexico, North Carolina, North Dakota, South Dakota, and West Virginia; and two newly added states, Illinois and Nevada. In response, Plaintiffs maintain that named Plaintiff United Wisconsin Services, Inc. ("UWSI"), **[*13]** [9] a managed healthcare provider, purchased Hytrin and generic terazosin in sixteen of the nineteen jurisdictions listed in the Complaint, including the ten for which Defendants argue lack of standing.

---

that such an argument is more appropriately addressed on a motion for class certification, Defendants abandon this argument in their reply memorandum. (Defs.' Reply Memorandum, Ex. B). Accordingly, the Maine and District of Columbia claims remain.

[7] Plaintiffs indicate in their Response that they are withdrawing their New York claim based on *N.Y. Gen. Bus. L. § 349*. (Plaintiffs' Memorandum in Opposition at 20, n. 12). Accordingly, that claim will be dismissed with prejudice.

[8] Those claims brought under Arizona law were dismissed with prejudice on other grounds.

[9] UWSI is now known as Cobalt Corporation.

Plaintiffs allegations with respect to UWSI are sufficient to establish standing in those ten states at issue. Despite Defendants' arguments to the contrary, UWSI is not limited to pursuing a claim under the laws of Wisconsin only. Rather, as made clear by the Eleventh Circuit in *Griffin v. Dugger, 823 F.2d 1476 (11th Cir. 1987)*, and as was reemphasized by this Court, the critical inquiry is whether "at least one named plaintiff has suffered the injury that gives rise to that claim" in each particular state. *823 F.2d at 1483*. In other words, Plaintiffs must allege that at least one named Plaintiff suffered a legally redressable injury for each state. By specifically alleging that UWSI purchased Hytrin and generic terazosin in sixteen states and was injured as a result of such purchases, (Third Amended Complaint, ¶ 8(s)), Plaintiffs meet their burden.[10] Therefore, Plaintiffs have standing and Defendants' motion on this issue is denied.

C. New Jersey

Similar to the Second Amended Complaint, Plaintiffs' Third Amended Complaint again alleges a violation of New **[*14]** Jersey's Consumer Fraud Act, *N.J. Stat. Ann. §§ 56:8-1, et seq.* Likewise, the Court is again faced with the New Jersey Supreme Court not having decided whether antitrust or unfair competition allegations state a claim for relief under the New Jersey Consumer Fraud Act. In the July 2nd Order, the Court, although inclined to dismiss the New Jersey claims, reserved ruling on this issue pending the outcome of the appeal in Kieffer v. Mylan Labs., Inc., 1999 WL 1567726, *3 (N.J. Super. Ct. Law. Div. 1999), where the trial judge held that allegations of anti-competitive behavior cannot state a claim under the Consumer Fraud Act. Kieffer, 1999 WL 1567726, at *6. However, as noted by the parties, the appeal was dismissed without decision following a settlement of that action.

The Court will follow the reasoning set out in Kieffer and dismiss Plaintiffs' New Jersey claims. To allow suits by indirect purchasers under the Consumer Fraud Act "would abrogate the bar to indirect purchaser suits for such acts, and allow the proverbial 'end run' to be made by plaintiffs." Kieffer, 1999 WL 1567726, at *4-5. Therefore, because the long shadow of *Illinois Brick* precludes Plaintiffs' New Jersey claims, they will be dismissed with prejudice.

D. Alabama and Illinois

Unable to bring antitrust claims in Alabama and Illinois,[11] Plaintiffs attempt to state a claim for unjust enrichment under **[*15]** the laws of those two states. Defendants argue that because Plaintiffs' cannot bring their antitrust claims in these two states, they should also not be able to bring unjust enrichment claims. In essence, Defendants try to use the same (successful) argument that defeated Plaintiffs' New Jersey claims to defeat these claims. Defendants argument is unavailing in this instance.

Unlike New Jersey, both Alabama and Illinois are Illinois Brick repealer states and thus permit indirect purchasers to bring antitrust claims. See *740 Ill. Comp. Stat. 10/7(2) (2002)* ("No provision of this Act shall deny any person who is an indirect purchaser the right to sue for damages..."); *Ala. Code § 6-5-60 (2002)* ("Any person, firm, or

---

[10] It is worth noting that with respect to standing requirements in general, the required showing depends on the stage of the litigation at which the standing issue is being decided. *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351(1992)*. "At the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice, for on a motion to dismiss we presume that general allegations embrace those specific facts that are necessary to support the claim." *Id. at 561*. Similarly, many of Defendants' substantive arguments with respect to UWSI' s adequacy as a named Plaintiff and whether its claims are typical of those of the class are more appropriately raised in response to Plaintiffs' already filed motions for class certification.

[11] Alabama's ***antitrust law*** applies only to conduct that is completely intrastate in nature. See *Abbott Labs. v. Durrett, 746 So. 2d 316, 329 (Ala. 1999)*. In Illinois, an antitrust class action on behalf of indirect purchasers may only be brought by the Attorney General. See *740 Ill. Comp. Stat. 10/7(2) (2002)*; see also *Gaebler v. New Mexico Potash Corp., 285 Ill. App. 3d 542, 676 N.E.2d 228, 230, 221 Ill. Dec. 707 (Ill. App. Ct. 1996)*.

corporation injured or damaged by an unlawful trust, combine or monopoly or its effect, *direct or indirect*, may, in each instance of such injury or damage, recover...") (emphasis added). As such, there is not the concern of Plaintiffs making an "end-run around" Illinois Brick. Other (non-Illinois Brick) limitations on bringing an antitrust action in these states are not relevant in evaluating whether Plaintiffs state a claim for unjust enrichment.

Thus, after reviewing the allegations in support ofPlaintiffs' **[*16]** claims for unjust enrichment, and noting that Defendants do not attack these claims on their merit, the Court must conclude that Plaintiffs Alabama and Illinois claims are sufficient to survive a motion to dismiss.

E. Nevada

Plaintiffs Third Amended Complaint adds new claims under Nevada's Unfair Trade Practices Act, which as of October 1, 1999, allows those injured "indirectly" to bring an action for damages. See *Nev. Rev. Stat. § 598A.210 (2002)*. Defendants, however, argue that because all of the conduct at issue in this lawsuit occurred prior to the effective date of the statute, Plaintiffs' claims must be dismissed. In response, Plaintiffs maintain that the 1999 Amendment to Nevada's ***antitrust law*** was a mere clarification of existing rights and thus may be applied retroactively to rescue Plaintiffs' claims.

Plaintiffs rely primarily upon Pooler v. R.J. Reynolds Tobacco Co., 2001 WL 403167 (Nev. Dist. Ct. 2001) (unpublished opinion), where the Nevada District Court held that indirect purchasers could bring suit for conduct occurring before the effective date of the amendment. In reaching its conclusion, the Court held that "the 1999 amendment...does no more than reaffirm[] the original legislative intent: any person injured by an alleged violation of the act may sue." Id. at *1. Defendants, **[*17]** to support their position, call upon Nevada's common law presumption that statutes are presumed to be prospective in application. See, e.g., *Madera v. State Industrial Insurance System, 114 Nev. 253, 956 P.2d 117, 120 (Nev. 1998)* ("statutes are presumptively prospective"); *McKellar v. McKellar, 110 Nev. 200, 871 P.2d 296, 298 (Nev. 1994)* ("there is a general presumption in favor of prospective application of statutes unless the legislature clearly manifests a contrary intent or unless the intent of the legislature cannot otherwise be satisfied."). In addition, Defendants cite to case law, see Krotz v. Microsoft Corp., No. A416361 (Nev. Dist. Ct. 2000) (holding that 1999 amendment created a *new* right for indirect purchasers) (emphasis added), and to relevant legislative history, see Minutes of the Assembly Committee on Commerce and Labor, 70th Sess. (Feb. 15, 1999) (stating that amendment was a "change" in the law).

After carefully considering both positions, the Court finds the better reasoned conclusion is to decline to apply the statute retroactively. Although the Pooler court presents a compelling argument in favor of retroactive application, this Court does not find there to be a clear indication that the Amendment was intended to apply retroactively. Absent such a clear statement, the Court must presume that the statute as written **[*18]** only applies to conduct occurring after October 1, 1999. Moreover, a plain reading of the statute and the case law reveals a cause of action that did not previously exist for indirect purchasers. Therefore, Plaintiffs' Nevada antitrust claims must be dismissed.[12]

F. New Mexico

The final target of Defendants' motion is Plaintiffs' claim under the consumer protection law of New Mexico, which states that "[u]nfair or deceptive trade practices and unconscionable trade practices in the conduct of any trade or commerce are unlawful." *N.M. Stat. Ann. § 57-12-3 (2002)*. Plaintiffs allege that by virtue of the gross disparity between the value received by Plaintiffs and the price paid to Defendants for terazosin, Defendants have committed an unconscionable trade practice. See *N.M. Stat. Ann. § 57-12-2(E)(2)* (2002). Defendants, in addition to claiming that this claim is outside the scope of leave granted by the Court, argue that Plaintiffs fail to state a claim for an unconscionable trade practice under New Mexico's consumer protection statute.

---

[12] For the reasons stated above in section III(D), Plaintiffs' Nevada unjust enrichment claim remains.

With respect to Defendants' first argument, that Plaintiffs improperly added this claim, the Court disagrees that it placed such stringent limitations on the manner in which Plaintiffs' may amend their Complaint. **[*19]** Indeed, while the Court will, on occasion, explicitly limit the scope of amendments, such was not done in this case. On the merits, Defendants' *12(b)(6)* argument is equally unavailing. After all but conceding that an unconscionable trade practice can form the basis of a claim under *N.M. Stat. Ann. § 57-12-2(E)*, Defendants attempt to argue that Plaintiffs do not allege the necessary "gross disparity." The Court finds, however, that the issue of gross disparity is a question of fact which is not properly dealt with on a motion to dismiss. See In re New Mexico Indirect Purchasers Microsoft Corp. Antitrust Litig., Case No. D-0101-CV-20001697 (Order Granting In Part and Denying In Part Motion to Dismiss Unfair Practices Act Claim Under *1-012(B)(6)*, NMRA) (N.M. 1st Jud. Dist. Aug. 15, 2001) (Transcript at 23) (stating that issue of what constitutes unconscionable is question of fact). Moreover, Plaintiffs allegations on this point are sufficient. Therefore, Defendants' motion to dismiss Plaintiffs' New Mexico consumer protection claim is denied.

III. CONCLUSION

By alleging that a named Plaintiff suffered an injury giving rise to the relevant claims in each state listed in the Third Amended Complaint, Plaintiffs have **[*20]** cured the fundamental defect in their previous Complaint. With respect, however, to the New Jersey claims, the Nevada antitrust claims, and the New York consumer protection claim, Plaintiffs have failed to state a claim under the applicable law. All other claims remain. Accordingly, it is

ORDERED that Defendants' Motion to Dismiss Certain State Law Counts of the Indirect Purchaser Plaintiffs' Third Amended Coordinated Complaint is GRANTED IN-PART and DENIED IN-PART. Plaintiffs' consumer protection claims and unjust enrichment claim on behalf of the New Jersey class are DISMISSED WITH PREJUDICE. Plaintiffs' antitrust claims on behalf of the Nevada class are DISMISSED WITH PREJUDICE. Plaintiffs' consumer protection claim on behalf of the New York class is DISMISSED WITH PREJUDICE. Defendants' motion is denied in all other respects,

DONE and ORDERED in Miami, Florida, this 11th day of September, 2002.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

In deciding a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court is required to accept as true all factual allegations in the complaint and must construe any well-pleaded factual allegations in the plaintiff's favor. A court may dismiss a complaint only where it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. The issue on a motion to dismiss is not whether the plaintiff will prevail, but whether he is entitled to offer evidence to support his claims. In deciding such a motion, consideration is limited to the facts stated in the complaint or in documents attached thereto as exhibits or incorporated therein by reference.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] Regulated Industries, Higher Education & Professional Associations

A plaintiff claiming a violation of §§ 1 and 2 of the Sherman Act, 15 U.S.C.S. §§ 1 and 2, must allege a relevant geographic and product market in which trade was unreasonably restrained or monopolized. The burden of defining the relevant market falls to the plaintiff. In order to make out its antitrust claims, a plaintiff must allege a relevant product market in which the anticompetitive effects of the challenged activity can be assessed.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN3[] Antitrust & Trade Law, Sherman Act

For purposes of the Sherman Act, the relevant product market includes all products reasonably interchangeable, determination of which requires consideration of cross-elasticity of demand. Interchangeability implies that one product is roughly equivalent to another for the use to which it is put: while there may be some degree of preference for one over the other, either would work effectively. To determine whether a complaint's proposed relevant market definition is legally sufficient, a court must analyze not the commodities reasonably interchangeable by a particular plaintiff, but commodities reasonably interchangeable by consumers for the same purposes. Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in the plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Antitrust & Trade Law, Sherman Act

Though price is a factor to be considered in assessing interchangeability, it is not the sole consideration.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN5[] Standing, Requirements

In order to have standing to bring a private antitrust action, a plaintiff must allege more than just a personal injury. An antitrust injury is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. In examining this requirement, a court must keep in mind the fundamental tenet that the antitrust laws were enacted for the protection of competition, not competitors.

HN6[] Intentional Interference, Elements

To state a claim for intentional interference with prospective economic advantage under Connecticut law, there must be evidence that the interference resulted from the defendants commission of a tort. A claim is made out when interference resulting in injury to another is wrongful by some measure beyond the fact of the interference itself.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN7[] Intentional Interference, Elements

To establish a claim of intentional interference with prospective economic advantage under Connecticut law, the plaintiffs bear the burden of establishing that the defendant engaged in intentional interference without justification, not malice alone.

HN8[] Air & Space Transportation, Antitrust

A party seeking to invoke a court's jurisdiction bears the burden of alleging sufficient facts to show that he has a right to bring the action. It is well established that neither employees nor shareholders of a corporation, much less prospective employees and shareholders, have standing to bring claims for antitrust violations affecting the corporation. The rationale underpinning the rule that shareholders do not have standing to bring an antitrust action in their individual capacity is that the antitrust laws are not designed to allow recovery for anyone incidentally injured by a violation of the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN9[] Private Actions, Standing

A narrow exception exists to allow employees to assert antitrust claims where the terminated employee is an essential participant in an antitrust scheme and the employee's termination is a necessary means to accomplish the scheme.

Opinion

[*14] *RULING ON MOTION TO DISMISS*

The plaintiffs, North American Energy Systems, LLC ("NAES"), Jeffrey Albano ("Albano") and Gregory Hudson ("Hudson"), bring this action against the defendants New England Energy Management, Inc. ("NEEM"), Scott Hinson ("Hinson"), Michelle Gallicchio ("Gallicchio"), Northeast Utilities Service Company, Inc. ("NUSCO"), the Connecticut Light & Power Company ("CL&P") and the Western Massachusetts Electric Company ("WMECO") (collectively, "NU") alleging **[**2]** violations of Sections 1 and 2 of the Sherman Act, *15 U.S.C. §§ 1-2*. Plaintiffs also bring state law claims for intentional interference with prospective economic advantage and for violations of the Connecticut Unfair Trade Practices Act, *Conn. Gen. Stat. § 42-110b et seq.* ("CUTPA").

Now pending before the court are defendants' Motions to Dismiss. For the following reasons, the motions [doc. # s 12 & 14] are GRANTED.

STANDARD OF REVIEW

HN1[] In deciding a motion to dismiss under *Rule 12(b)(6)*, the court is required to accept as true all factual allegations in the complaint and must construe any well-pleaded factual allegations in the plaintiff's favor. *See Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*; *Easton v. Sundram, 947 F.2d 1011, 1014-15 (2d Cir. 1991)*. A court may dismiss a complaint only where "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*; *see also Still v. DeBuono, 101 F.3d 888 (2d Cir. 1996)*. The **[**3]** issue on a motion to dismiss "is not whether the plaintiff will prevail, but whether he is entitled to offer evidence to support his claims." *United States v. Yale New Haven Hosp., 727 F. Supp. 784, 786 (D. Conn. 1990)* (citing *Scheuer, 416 U.S. at 236*). In deciding such a motion, consideration is limited to the facts stated in the complaint or in documents attached thereto as exhibits or incorporated therein by reference. *See Kramer v. Time Warner, Inc., 937 F.2d 767, 773 (2d Cir. 1991)*.

FACTS

According to plaintiffs' Amended Complaint, various companies of the Northeast Utilities System developed the Small Business Energy Advantage Program (the "Small Business Program") to help small businesses reduce their costs and improve performance by installing more energy efficient equipment and determining ways to reduce energy demands. NU elected to use a network of "Contractor/Arrangers" ("C/As") to locate eligible businesses, evaluate their needs and provide the cost reducing services. Prospective C/As have to be approved by NU prior to participating in NU's Small Business Program. [1]

[1] Nothing, however, prevents an individual or firm from offering these same services to these businesses independent of NU's Small Business Program.

[4]** **[*15]** Under the terms of the Small Business Program, the defendant utility companies bear some portion of the customers' costs and also offer interest free loans to the customers to cover the costs of the Small Business Program, including the C/A fees. The source of the loans come from a fund established from ratepayers' fees. Customers of the Small Business Program continue to pay their usual rates until the loans are paid in full. It is anticipated that the savings in energy costs will cover the cost of loan repayment.

NU stated in its description of the Small Business Program that it maintains the right to limit the number of C/As and that the goal is to keep the number to a minimum in order to facilitate close relationships with the utility companies, ensure customer satisfaction and promote communication with all parties involved in the transactions.

In March 2001, NAES responded to a request by NU for proposals to serve as C/As for one year beginning April 2001. The proposal described NAES's qualifications and listed plaintiffs Albano and Hudson among NAES's employees. At the time, Albano and Hudson were employed by NEEM, which performed a significant amount of C/A work under the **[**5]** Small Business Program. According to their complaint, Albano and Hudson planned to resign from NEEM once NU approved NAES's proposal. On March 23, 2001, Albano spoke with a representative of NU to determine the status of the NAES proposal. The representative told him that it "looked good." Later, Gallicchio, Senior Program Administrator of Marketing and Conservation Programs with NU, telephoned NAES to determine whether Albano and Hudson were in fact employed by NAES. Arnold Frumin, the President of NAES explained their status and plans to her. Gallicchio allegedly told Frumin that the NAES application would be denied because certain requested information had not been provided. When asked for an opportunity to supplement the proposal, Gallicchio referred him to Maureen Bazan, also an employee of NU, who agreed to allow the additional submission. In early April 2001, Ms. Bazan wrote to NAES informing it that the application had been denied for failure to comply with the Request for Quotations. NAES again resubmitted a proposal, which was denied in late April.

Upon learning of Albano and Hudson's plans to join NAES, Hinson, owner and president of NEEM, fired them both.

Plaintiffs allege **[**6]** that defendant NEEM has colluded with the defendants to prevent other potential C/As from being approved by NU and that such collusion has thwarted competition in the market for C/A services to otherwise qualified businesses and individuals. Plaintiffs contend that since the inception of the Small Business Program, NU has allocated the majority of the C/A assignments to NEEM. Defendants' actions have resulted in the exclusion of plaintiffs from the market and have damaged the public by "frustrating the laudable goals of the Program." (Pl.'s Compl. 64.)

DISCUSSION

I. *The Antitrust Claims*

NU asserts that plaintiffs antitrust claims should be dismissed because (1) the complaint fails to allege a relevant market and (2) the complaint does not allege anticompetitive effects or antitrust injury. The court agrees.

[*16] A. The Complaint Does Not Properly Allege a Relevant Market

HN2[] A plaintiff claiming a violation of *§§ 1& 2* of the Sherman Act must allege a relevant geographic and product market in which trade was unreasonably restrained or monopolized. *See* *Kramer v. Pollock-Krasner Found.. 890 F. Supp. 250, 254 (S.D.N.Y. 1995)*; *see also* *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966).* **[**7]** The burden of defining the relevant market falls to the plaintiff. *See* *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*; *Hack v. Yale President & Fellows of Yale College, 16 F. Supp. 2d 183, 196 (D.Conn. 1998)*. In order to make out their antitrust claims, plaintiffs "must allege a relevant product market in which the anticompetitive effects of the challenged activity can be assessed." *Re-Alco Indus., Inc. v. National Ctr. for Health Educ., Inc., 812 F. Supp. 387, 391 (S.D.N.Y. 1993)* (citation omitted).

HN3[] "The relevant product market includes all products reasonably interchangeable, determination of which requires consideration of cross-elasticity of demand." *Id*. "Interchangeability implies that one product is roughly equivalent to another for the use to which it is put: while there may be some degree of preference for one over the other, either would work effectively." *Allen-Myland, Inc. v. International Business Mach. Corp., 33 F.3d 194, 206 (3d Cir. 1994)* (internal quotations omitted). To determine whether the complaint's proposed relevant market definition is legally sufficient, **[**8]** a court must analyze "not [the] commodities reasonably interchangeable by a particular plaintiff, but commodities reasonably interchangeable by consumers for the same purposes." *Hack, 16 F. Supp. 2d at 196* (quoting *Queen City Pizza, Inc., 124 F.3d at 438*).

> Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted.

Queen City Pizza, 124 F.3d at 436; *see also* *Hack, 16 F. Supp. 2d at 196* (stating that a complaint may be dismissed where it does not define the relevant market by reference to the rule of reasonable interchangeability and cross-elasticity); *Tower Air, Inc. v. Federal Exp. Corp., 956 F. Supp. 270 (E.D.N.Y. 1996)* (same); *Re-Alco, 812 F. Supp. at 391* (same); *E. & G. Gabriel v. Gabriel Bros., Inc., 1994 U.S. Dist. LEXIS 9455, No. 93 civ. 0894(PKL), 1994 WL 369147, at *3 (S.D.N.Y. July 13, 1994)* **[**9]** (same).

In the Amended Complaint, plaintiffs briefly address these key issues of "reasonable interchangeability" and "cross-elasticity of demand;" however, it fails to sufficiently define the relevant market. Plaintiffs allege that NU's subsidies "permit the delivery to eligible customers of services under the Program at no cost or at greatly reduced cost" and that such services are not interchangeable with similar services provided outside the Small Business Program at significantly higher costs to the customer. (Pl.'s Compl. 622.)

HN4[] Though price is a factor to be considered in assessing interchangeability, it is not the sole consideration. *See* *Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715, 722 (3d Cir. 1991)*. Plaintiff's attempt to establish a market consisting only of services provided through NU's Small Business Program based on price differential is misplaced and defines the market too narrowly. The only difference identified by **[*17]** plaintiffs between C/A services through the Small Business Program and those that could be provided independent of the Small Business Program is in the cost **[**10]** to the customer. A relevant product market, however, may span a range of prices. *See* *Brown Shoe Co., Inc. v. United States, 370 U.S. 294, 326, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)* (rejecting argument that medium-priced shoes are in a different product marked than lower-priced shoes); *AD/SAT v. Associated Press, 181 F.3d 216, 228 (2d Cir. 1999)* ("We are not persuaded that the difference in prices for rush electronic and non-rush delivery services indicates that distinct markets for these services exist."). [2]

Plaintiffs also attempt to argue that NU has created a market by using outside firms to **[**11]** provide the conservation services. Even though NU is not required to use C/As to provide conservation services, plaintiffs imply that because NU has chosen to do so, it has created a market with the concomitant obligation to contract with all willing suppliers. Defendants argue that such a theory would result in the creation of a new market anytime NU, or any entity, hires an outside source to perform needed services, such as providing security or fixing office equipment. NU would risk creating a monopoly if it did not distribute the work evenly among the outside service providers.

Plaintiff likens this to a "government contracting situation" where there may exist a single buyer market. This is inapposite. In the context of government as a single buyer, the government is subject to competitive bidding requirements imposed by the Federal Acquisition Regulations. That is not the case with NU. It is under no obligation to hire any outside source to perform the conservation services and has no requirements in the event it chooses to do so.

---

[2] Defendants note that by distinguishing between NU C/A services and non-NU C/A services "Plaintiffs have argued themselves out of the realm of ***antitrust law*** altogether." If customers of the Small Business Program would not purchase conservation services unless the services were free, then there exists in reality no market for such services and no opportunity to create a monopoly.

The government contracting cases relied upon by the Plaintiffs are easily distinguishable from the case at hand. In the cases involving the government, **[**12]** the government was not the entity violating the antitrust laws; rather, the violators were the companies bidding on the government contract. For example, in *Tower Air, Inc. v. Federal Express Corp., 956 F. Supp. 270, 281 (E.D.N.Y. 1996)*, the charge was that the bidders for the government contract engaged in anticompetitive activity among themselves, not with the government (buyer). If NU is the buyer, it is in a position similar to the government and could not be the target of antitrust liability.

Plaintiffs have failed to establish that outsourcing the provision of conservation services has created a relevant market under the antitrust laws.

B. The Complaint Fails to Allege an Anticompetitive Effect or Antitrust Injury

Defendants next argue that because plaintiffs have failed to allege that the purported monopoly has had an actual adverse effect on competition in the provision of energy conservation services, they cannot establish anticompetitive effects in a relevant market. The court agrees.

HN5[] In order to have standing to bring a private antitrust action, a plaintiff must allege more than just a personal injury. *See Balaklaw v. Lovell, 14 F.3d 793, 797 **[*18]** (2d Cir. 1994)*; **[**13]** *George Haug Co. v. Rolls Royce Motor Cars, 148 F.3d 136, 139*. An antitrust injury is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. In examining this requirement, a court must keep in mind "the fundamental tenet that the antitrust laws . . . were enacted for the protection of *competition*, not *competitors."* *Balaklaw, 14 F.3d at 797* (citations and internal quotation marks omitted).

Plaintiffs fail to assert an antitrust injury. They make the conclusory allegation that defendants have colluded "to prevent other potential C/As from receiving approval, thereby thwarting competition in the market for the provision of C/A services. . . ." (Pl.'s Compl. 64.) They also assert that the public has been injured because "NEEM's stranglehold on this market has frustrated the laudable goals of the program." *See id*. The plaintiffs also allege a laundry **[**14]** list of bad acts, such as fraud and violations of environmental regulations, committed by the defendants.

These conclusory allegations are insufficient to establish an actual antitrust injury. *See Capital Imaging Assocs. v. Mohawk Valley Med. Assoc., 996 F.2d 537, 543 (2d Cir. 1993)* (Plaintiff must allege that "the challenged action has had an actual adverse effect on competition as a whole in the relevant market."); *John's Insulation, Inc. v. Siska Constr. Co., Inc., 774 F. Supp. 156, 163 (S.D.N.Y. 1991)* ("Conclusory allegations which merely recite the litany of antitrust [injuries] will not suffice."). The allegation that NEEM received the majority of C/A assignments does little to establish an injury to competition. Plaintiffs complaint alleges injury to Plaintiffs as a disappointed competitor. It does not sufficiently allege injury to competition. *See Balaklaw, 14 F.3d at 797*.

Plaintiffs allegations regarding fraud and violations of environmental and workplace regulations, though they may have merit in another context, do not implicate the antitrust laws and cannot serve as the basis for an antritust injury.

Plaintiffs have **[**15]** failed to define a relevant market and have not established that defendants actions led to anticompetitive effects or an antitrust injury; therefore, the Plaintiffs cannot maintain the antitrust claims, counts one through four of the Amended Complaint.

II. *State Law Claims*

In addition to the antitrust claims, Plaintiffs also bring claims against all defendants for violations of CUTPA and against NEEM and Hinson for intentional interference with prospective economic advantage. Because the court has determined that the plaintiffs failed to state a claim under the antitrust laws, the plaintiffs' state law claims may not go forward.

A. CUTPA Claim

Plaintiffs concede that because the allegations forming the basis of the CUTPA claim are the same as those underlying the antitrust claims, the CUTPA claim must fail if the antitrust claims fail. The court, having dismissed the antitrust claims, must also dismiss the CUTPA claim for failure to state a cause of action. *See CDC Techs. Inc. v. IDEXX Lab., Inc., 7 F. Supp. 2d 119 (D.Conn. 1998)*.

B. Intentional Interference with Prospective Economic Advantage

Plaintiffs charge defendants NEEM and Hinson with intentional **[**16]** interference **[*19]** with prospective economic advantage. ***HN6***[] To state such a claim under Connecticut law, "there must be evidence that the interference resulted from the defendants commission of a tort. [A] claim is made out when interference resulting in injury to another is wrongful by some measure beyond the fact of the interference itself." *Downes Patterson Corp. v. First Nat'l Supermarkets, Inc., 64 Conn. App. 417, 429, 780 A.2d 967 (2001)*.

Plaintiffs allege that NEEM and Hinson acted maliciously. This will not suffice to support this claim. ***HN7***[] Under Connecticut law, plaintiffs bear the burden of establishing that NEEM and Hinson engaged in intentional interference without justification, not malice alone. *See 4 Restatement (Second, Torts § 766*, comment (s)(1979); *Daley v. Aetna Life and Cas. Co., 249 Conn 766, 775 (1999)*. This, they have not done.

Even if this interference claim had merit, the court, having dismissed the antitrust claims and, thus, the basis for original federal jurisdiction, would decline to exercise supplemental jurisdiction over this state law claim. *See 28 U.S.C. § 1367*.

III. *Standing of the* **[**17]** *Individual Plaintiffs*

The individual plaintiffs, Albano and Hudson, former employees of NEEM and one-time prospective employees and shareholders of NAES, lack standing to assert antitrust and CUTPA claims.

HN8[] A party seeking to invoke the court's jurisdiction bears the burden of alleging sufficient facts to show that he has a right to bring the action. *See Warth v. Seldin, 422 U.S. 490, 518, 45 L. Ed. 2d 343, 95 S. Ct. 2197 (1975)*. It is well established that neither employees nor shareholders of a corporation, much less *prospective* employees and shareholders, have standing to bring claims for antitrust violations affecting the corporation. *See Air Courier Conference of Am. v. American Postal Workers Union, AFL-CIO, 498 U.S. 517, 528 n.5, 112 L. Ed. 2d 1125, 111 S. Ct. 913 (1991)* ("Employees have generally been denied standing to enforce competition laws because they lack competitive standing and direct injury."); *Adams v. Pan Am. World Airways, Inc., 264 U.S. App. D.C. 174, 828 F.2d 24 (D.C. Cir. 1981)* (affirming dismissal in antitrust case for lack of standing by former airline employees against airline that allegedly drove **[**18]** their former employer out of business); *Rand v. Anaconda-Ericsson, Inc., 794 F.2d 843, 849 (2d Cir. 1986)* (holding that shareholders lacked standing to assert antitrust claim); *Vincel v. White Motor Corp., 521 F.2d 1113, 1119 (2d Cir. 1975)*. "The rationale underpinning [the rule that shareholders do not have standing to bring an antitrust action in their individual capacity] is that the antitrust laws are not designed to allow recovery for anyone incidentally injured by a violation of the antitrust laws." *Schulz v. Pataki, 137 F. Supp. 2d 80, 82 (N.D.N.Y.)*.

Likewise, termination from NEEM cannot confer standing on the plaintiffs to assert antitrust claims. *See Vinci v. Waste Mgmt. Inc., 80 F.3d 1372, 1376 (9th Cir. 1996)*. The Ninth Circuit has carved out ***HN9***[] a narrow exception to allow employees to assert antitrust claims where the terminated employee is an "essential participant" in the antitrust scheme and the employee's termination is a "necessary means" to accomplish the scheme. *See Ostrofe v. H.S. Crocker Co., Inc., 740 F.2d 739 (9th Cir. 1984)*. In the scenario contemplated by *Ostrofe*, the **[**19]** employee has "the greatest incentive to challenge the antitrust violation." *Vinci, 80 F.3d at 1376*. The complaint makes no allegations that would bring it within the *Ostrofe* exception. Plaintiffs do not allege that they were an essential part of the antitrust **[*20]** scheme or that they were fired as a means to accomplish the antitrust scheme.

The individual plaintiffs also fail to establish standing to bring the CUTPA claims. Any possible injury suffered by plaintiffs is an indirect injury and therefore cannot confer standing pursuant to CUTPA. *See* *Collins v. Gulf Oil Co., 605 F. Supp. 1519, 1523 (D.Conn. 1985)*.

The individual plaintiffs failed to meet their burden of establishing standing to bring the antitrust and CUTPA claims.

CONCLUSION

For the foregoing reasons, the Defendants' motions to dismiss [doc. # s 12 & 14] are GRANTED.

SO ORDERED this 13th day of September, 2002, at Bridgeport, Connecticut.

Civil Procedure > ... > Discovery > Methods of Discovery > Perpetuation of Testimony

HN5[] Methods of Discovery, Perpetuation of Testimony

The bill of discovery is an independent action in equity for discovery, and is designed to obtain evidence for use in an action other than the one in which discovery is sought. As a power to enforce discovery, the bill is within the inherent power of a court of equity. It may be entertained notwithstanding the statutes and rules of court relative to discovery. Furthermore, because a pure bill of discovery is favored in equity, it should be granted unless there is some well-founded objection against the exercise of the court's discretion. To sustain the bill, the petitioner must demonstrate that what he seeks to discover is material and necessary for proof of, or is needed to aid in proof of or in defense of, another action already brought or about to be brought. Although the petitioner must also show that he has no other adequate means of enforcing discovery of the desired material, the availability of other remedies for obtaining information does not require denial of the equitable relief sought.

Civil Procedure > Discovery & Disclosure > Discovery > Relevance of Discoverable Information

HN6[] Discovery, Relevance of Discoverable Information

Discovery is confined to facts material to the plaintiff's cause of action and does not afford an open invitation to delve into the defendant's affairs. A plaintiff must be able to demonstrate good faith as well as probable cause that the information sought is both material and necessary to his action. A plaintiff should describe with such details as may be reasonably available the material he seeks and should not be allowed to indulge a hope that a thorough ransacking of any information and material which the defendant may possess will turn up evidence helpful to his case. What is reasonably necessary and what the terms of the judgment require call for the exercise of the trial court's discretion.

Civil Procedure > ... > Discovery > Methods of Discovery > Perpetuation of Testimony

Civil Procedure > Discovery & Disclosure > General Overview

HN7[] Methods of Discovery, Perpetuation of Testimony

The plaintiff who brings a bill of discovery must demonstrate by detailed facts that there is probable cause to bring a potential cause of action. Probable cause is the knowledge of facts sufficient to justify a reasonable man in the belief that he has reasonable grounds for presenting an action. Its existence or nonexistence is determined by the court on the facts found. Moreover, the plaintiff who seeks discovery in equity must demonstrate more than a mere suspicion; he must also show that there is some describable sense of wrong. Whether particular facts constitute probable cause is a question of law.

Civil Procedure > Appeals > Appellate Briefs

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN8[] **Appeals, Appellate Briefs**

When the parties have not briefed or argued law that could have affected the case, the Supreme Court of Connecticut decides the case on the basis on which it was tried and decided in the trial court, and as briefed and argued in the high court.

Civil Procedure > ... > Discovery > Methods of Discovery > Perpetuation of Testimony

HN9[] **Methods of Discovery, Perpetuation of Testimony**

In Connecticut, the standard for determining whether a trial court's unchallenged factual findings warrant the granting of a bill of discovery is whether the facts demonstrate that there is probable cause to bring a potential cause of action.

Civil Procedure > Pleading & Practice > Pleadings > General Overview

Civil Procedure > Judgments > Entry of Judgments > General Overview

HN10[] **Pleading & Practice, Pleadings**

The right of a plaintiff to recover is limited by the allegations of the complaint, and any judgment should conform to the pleadings, the issues, and the prayers for relief.

Civil Procedure > Appeals > Record on Appeal

Criminal Law & Procedure > ... > Reviewability > Preservation for Review > Records

HN11[] **Appeals, Record on Appeal**

One specific purpose of a motion for articulation of the factual basis of a trial court's decision is to clarify an ambiguity or incompleteness in the legal reasoning of the trial court in reaching its decision. Further articulation is unnecessary where the memorandum of decision adequately states its factual basis, and where the record is adequate for informed appellate review of the judgment.

Civil Procedure > Appeals > Standards of Review > General Overview

HN12[] **Appeals, Standards of Review**

Where a Connecticut trial court has clearly set forth its factual findings and the record is also clear that the trial court was made aware of the legal standards pertaining to the parties' claims, an appellate court assumes that the trial court applied the correct legal standards.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

HN13[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the common law of Connecticut, an anticompetitive covenant ancillary to a lawful contract is enforceable if the restraint upon trade is reasonable. To satisfy this requirement of reasonableness, the restraint must be limited in its operation with respect to time and place and afford no more than a fair and just protection to the interests of the party in whose favor it is to operate, without unduly interfering with the public interest. This principle is known as the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN14[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In rule of reason cases, the plaintiff bears the initial burden of showing that the alleged combination or agreement produced adverse, anticompetitive effects within the relevant product and geographic markets. The plaintiff may satisfy this burden by proving the existence of actual anticompetitive effects, such as reduction of output, increase in price, or deterioration in quality of goods and services. If a plaintiff meets his initial burden of adducing adequate evidence of market power or actual anticompetitive effects, the burden shifts to the defendant to show that the challenged conduct promotes a sufficiently pro-competitive objective.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN15[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Certain agreements or practices, because of their pernicious effect on competition and lack of any redeeming virtue, are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. Such agreements constitute per se antitrust violations. The rule of reason is intended to be the prevailing standard applied for the purpose of determining whether a particular act did or did not bring about the wrong against which the statute provides in a given case. Per se rules of illegality should be applied only to conduct that is shown to be manifestly anticompetitive.

HN19[] Regulated Practices, Trade Practices & Unfair Competition

In determining whether a practice violates the Connecticut Unfair Trade Practices Act, *Conn. Gen. Stat. § 42-110a et seq.* (CUTPA), Connecticut case law applies the following criteria for determining when a practice is unfair: (1) whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise--whether, in other words, it is within at least the penumbra of some common law, statutory, or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; and (3) whether it causes substantial injury to consumers, competitors, or other businessmen. All three criteria do not need to be satisfied to support a finding of unfairness. A practice may be unfair because of the degree to which it meets one of the criteria or because to a lesser extent it meets all three. Thus, a violation of CUTPA may be established by showing either an actual deceptive practice or a practice amounting to a violation of public policy. Furthermore, a party need not prove an intent to deceive to prevail under CUTPA.

Counsel: William M. Rubenstein, with whom were Michelle H. Seagull and, on the brief, Chad A. Landmon, for the appellant (defendant).

Richard P. Weinstein, with whom was Nathan A. Schatz, for the appellee (plaintiff).

Judges: Sullivan, C. J., and Borden, Katz, Vertefeuille and Zarella, Js. In this opinion KATZ and ZARELLA, Js., concurred.

Opinion by: SULLIVAN

Opinion

[*675] [828]** SULLIVAN, C. J. The plaintiff, Journal Publishing Company, Inc., filed this petition for a bill of discovery pursuant to *General Statutes § 52-156a (a)*, [1] seeking discovery **[*676]** of certain information **[***2]** from the defendant, The Hartford Courant Company. Following a court trial, the trial court determined that there was probable cause to believe that the plaintiff had a cause of action against the defendant for: (1) tortious interference with a contract; (2) antitrust violations; and (3) violations of the Connecticut Unfair Trade Practices Act (CUTPA), *General Statutes § 42-110a et seq.* Accordingly, the trial court granted the petition in part and ordered the defendant to provide certain **[**829]** information to the plaintiff. This appeal followed. We conclude that the plaintiff has not established probable cause to support any of the causes of action found by the trial court and, accordingly, reverse the judgment.

The record reveals the following relevant facts and procedural history. On September 5, 2000, the plaintiff filed a petition to perpetuate testimony, to conduct depositions and to order production of documents before action. The plaintiff claimed in its petition that there was probable cause to believe that the defendant wrongfully had excluded the plaintiff from the market for Sunday comic strips in violation of *General Statutes §§ 35-26* [2] and 35-28 (b) [3] and

---

[1] *General Statutes § 52-156a (a)* provides:

> ***HN1***[] "(1) A person who desires to perpetuate testimony regarding any matter that may be cognizable in the Superior Court may file a verified petition in the superior court for the judicial district of the residence of any expected adverse party. The petition shall be entitled in the name of the petitioner and shall show: (A) That the petitioner expects to be a party to an action cognizable in the superior court but is presently unable to bring it **[***3]** or cause it to be brought, (B) the subject matter of the expected action and the petitioner's interest therein, (C) the facts which the petitioner desires to establish by the proposed testimony and the reasons for desiring to perpetuate it, (D) the names or a description of the persons the petitioner expects will be adverse parties and their addresses so far as known, and (E) the names and addresses of the persons to be examined and the substance of the testimony which the petitioner expects to elicit from each, and shall ask for an order authorizing the petitioner to take the depositions of the persons to be examined named in the petition, for the purpose of perpetuating their testimony.
>
> "(2) The petitioner shall thereafter serve a notice upon each person named in the petition as an expected adverse party, together with a copy of the petition, stating that the petitioner will apply to the court, at a time and place named therein, for the order described in the petition. At least twenty days before the date of hearing the notice shall be served in the manner provided by section 52-57; but if such service cannot with due diligence be made upon any expected adverse party named in the **[***4]** petition, the court may make such order as is just for service by publication or otherwise, and shall appoint, for persons not served in the manner provided by section 52-57, an attorney who shall represent them, and, in case they are not otherwise represented, shall cross-examine the deponent.
>
> "(3) If the court is satisfied that the perpetuation of the testimony may prevent a failure or delay of justice, it shall make an order designating or describing the persons whose depositions may be taken and specifying the subject matter of the examination and whether the depositions shall be taken upon oral examination or written interrogatories. The depositions may then be taken in accordance with this section; and the court may make orders for the production of documents and things and the entry upon land for inspection and other purposes, and for the physical or mental examination of persons. For the purpose of applying this section to depositions for perpetuating testimony, each reference in this section to the court in which the action is pending shall be deemed to refer to the court in which the petition for such deposition was filed.
>
> "(4) If a deposition to perpetuate testimony is taken **[***5]** under this section, it may be used in any action involving the same subject matter subsequently brought in the Superior Court."

[2] General Statutes § 35-26 provides: "***HN2***[] Every contract, combination, or conspiracy in restraint of any part of trade **[***6]** or commerce is unlawful."

[3] General Statutes § 35-28 provides: ***HN3***[] "Without limiting section 35-26, every contract, combination, or conspiracy is unlawful when the same are for the purpose, or have the effect, of: (a) Fixing, controlling, or maintaining prices, rates,

(d) and had engaged in an unfair method of competition and an unfair act or **[*677]** practice in the conduct of the trade or commerce of selling or distributing newspapers in violation of General Statutes § 42-110b. [4] Accordingly, the plaintiff sought to examine all documents between the defendant and certain national syndicators of the comic strips regarding the distribution of the Sunday comics, and to conduct a deposition of a representative of the defendant's newspaper regarding the same issue.

On March 2, 2001, the trial court held a hearing on the plaintiff's petition. Elizabeth Ellis gave the following testimony on behalf of the plaintiff. The plaintiff publishes a newspaper, the Journal Inquirer, which is circulated in seventeen towns in Connecticut and Massachusetts. Ellis has **[***7]** been the newspaper's publisher for thirty years. The defendant publishes a newspaper, the Hartford Courant, which also is circulated in those seventeen towns. The Journal Inquirer is published on Monday through Friday in the afternoon and on Saturday in the morning and contains three pages of nationally syndicated comic strips. The Hartford Courant is published seven days a week and contains eleven syndicated comic strips that are published also by the Journal Inquirer. Ellis testified, on the basis of her knowledge of the newspaper business, that newspapers that publish comic strips have written agreements with the syndicators of the comic strips.

The Journal Inquirer receives its comic strips from the syndicators on a daily basis. Each comic strip is printed with a release, or expected publication, date. The Journal Inquirer considers itself contractually bound to honor those dates.

Over the course of a number of years prior to the year 2000, Ellis made several unsuccessful attempts on **[*678]** behalf of the plaintiff to acquire from certain syndicators the right to publish the Sunday edition of their comics. The plaintiff intended to publish the Sunday comics either in a Sunday newspaper **[***8]** or in a "weekend edition" that would be published on Saturday **[**830]** morning and would have certain features of a Sunday newspaper.

At some point in the year 2000, the Hartford Courant ran an advertisement indicating that the Sunday edition of that newspaper soon would be available on Saturdays. When Ellis became aware of that fact, she called the syndicators of certain comic strips in another attempt to obtain the right to publish the Sunday comics. When she was unable to do so, she wrote a letter to the defendant requesting that it release the exclusivity provisions of its contracts with the syndicators of nine Sunday comic editions and permit the syndicators to distribute the comics to the plaintiff. [5] The defendant's parent corporation acknowledged receipt of the letter and indicated that it would respond after it had had an opportunity to look into the matter. The plaintiff received no further response to Ellis' letter.

Ellis also telephoned Walter Mahoney, the vice president of one of the syndicators, Tribune Media, to inquire why the to Journal **[***9]** Inquirer was restricted from publishing the Sunday comics on Saturday when the Hartford Courant was permitted do so. Ellis was not successful in her attempt to persuade Mahoney to allow the plaintiff to publish the Sunday comics.

On the day before the hearing on the plaintiff's petition, Ellis telephoned the publisher of the Hartford Courant, Jack Davis, to ask why the defendant objected to the Journal Inquirer's publishing the same Sunday comics that the Hartford Courant published in its early Sunday edition. Davis responded that it was important **[*679]** for the Hartford Courant to have a unique product so that people would want to buy that newspaper rather than another.

---

quotations, or fees in any part of trade or commerce; (b) fixing, controlling, maintaining, limiting, or discontinuing the production, manufacture, mining, sale, or supply of any part of trade or commerce; (c) allocating or dividing customers or markets, either functional or geographical, in any part of trade or commerce; or (d) refusing to deal, or coercing, persuading, or inducing third parties to refuse to deal with another person."

[4] General Statutes § 42-110b provides in relevant part: ***HN4***[] "(a) No person shall engage in unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce. . . ."

[5] We note that the defendant claims that the existence of such exclusivity provisions was not established by the evidence presented at the hearing.

On cross-examination, Ellis testified that Editor & Publisher magazine contains a list of the Sunday comics that are available for publication from syndicators. That magazine lists more than 200 syndicated Sunday comics.

Following the hearing, the trial court found that the defendant had contracts with the syndicators that it had amended at some point to allow it to publish Sunday comic strips on Saturday, prior to their release date. It also found that, under the terms of the amended contracts, the syndicators had agreed not **[***10]** to permit the plaintiff to publish the Sunday comic strips on Saturday. Finally, it found that both the defendant and one of the syndicators had acknowledged to the plaintiff the existence of such a preclusive contractual provision.

The trial court also concluded that the plaintiff had established that there was probable cause to believe that the defendant had (1) modified its contract with the syndicators with the intention of limiting the plaintiff's contractual rights; (2) violated CUTPA by engaging in unscrupulous or oppressive acts; and (3) persuaded the syndicators to refuse to deal with the defendant in violation of the antitrust statutes. Accordingly, the trial court rendered judgment for the plaintiff and ordered the defendant to disclose the portion of its contracts with the syndicators who also contracted with the plaintiff governing the publication of Sunday comics. The defendant appealed from that judgment to the Appellate Court, and we transferred the appeal to this court pursuant to *Practice Book § 65-1* and *General Statutes § 51-199 (c)*.

The defendant claims on appeal: (1) that the trial court's findings of fact were not supported by the evidence **[*680]** presented at **[**831]** the hearing; **[***11]** and (2) that, in reaching its legal conclusions, the trial court misconstrued and misapplied the legal standard for granting a bill of discovery. The plaintiff contends, to the contrary, that the evidence supported the trial court's factual findings. It further contends that the record is inadequate for review of the trial court's legal conclusions. The plaintiff also argues, however, that, even if the court's conclusions are reviewable, the defendant's challenge to those conclusions is without merit. Finally, the plaintiff argues that, if this court reverses the judgment of the trial court, it should remand the case for a new hearing at which the plaintiff should be permitted to subpoena and examine a representative of the defendant to obtain additional factual support for its claims.

We conclude that the evidence presented at the March 2, 2001 hearing was sufficient to support the factual findings on which the trial court relied in reaching its legal conclusions. We also conclude, however, that those factual findings were insufficient to support a finding of probable cause that the plaintiff had a cause of action against the defendant on the grounds alleged in its petition. Accordingly, **[***12]** we reverse the judgment of the trial court. We also conclude that the plaintiff is not entitled to a new hearing.

Before examining the merits of the defendant's claims, "a brief discussion of the bill of discovery is appropriate. ***HN5***[] The bill of discovery is an independent action in equity for discovery, and is designed to obtain evidence for use in an action other than the one in which discovery is sought. . . . As a power to enforce discovery, the bill is within the inherent power of a court of equity that has been a procedural tool in use for centuries. . . . The bill is well recognized and may be entertained notwithstanding the statutes and rules of court relative to discovery. . . . Furthermore, because a pure bill of discovery is favored in equity, it **[*681]** should be granted unless there is some well founded objection against the exercise of the court's discretion. . . .

"To sustain the bill, the petitioner must demonstrate that what he seeks to discover is material and necessary for proof of, or is needed to aid in proof of or in defense of, another action already brought or about to be brought. . . . Although the petitioner must also show that he has no other adequate means of enforcing **[***13]** discovery of the desired material, the availability of other remedies . . . for obtaining information [does] not require the denial of the equitable relief . . . sought. . . . This is because a remedy is adequate only if it is one which is specific and adapted to securing the relief sought conveniently, effectively and completely. . . . The remedy is designed to give facility to proof. . . .

HN6[] "Discovery is confined to facts material to the plaintiff's cause of action and does not afford an open invitation to delve into the defendant's affairs. . . . A plaintiff must be able to demonstrate good faith as well as probable cause that the information sought is both material and necessary to his action. . . . A plaintiff should describe with such details as may be reasonably available the material he seeks . . . and should not be allowed to indulge a hope that a thorough ransacking of any information and material which the defendant may possess would turn up evidence helpful to [his] case. . . . What is reasonably necessary and what the terms of the judgment require call for the exercise of the trial court's discretion." (Citations omitted; internal quotation marks omitted.) *Berger v. Cuomo, 230 Conn. 1, 5-7, 644 A.2d 333 (1994)*. **[**832]** **[***14]**

HN7[] "The plaintiff who brings a bill of discovery must demonstrate by detailed facts that there is probable cause to bring a potential cause of action. Probable cause is the knowledge of facts sufficient to justify a **[*682]** reasonable man in the belief that he has reasonable grounds for presenting an action. . . . Its existence or nonexistence is determined by the court on the facts found. . . . Moreover, the plaintiff who seeks discovery in equity must demonstrate more than a mere suspicion; he must also show that there is some describable sense of wrong." [6] (Citation omitted; internal quotation marks omitted.) *Id. at 7*. "Whether particular facts constitute probable cause is a question of law." *McMahon v. Florio, 147 Conn. 704, 707, 166 A.2d 204 (1960)*.

I

We first address the defendant's claim that the evidence presented at the March 2, 2001 hearing did not support the trial court's factual findings. Specifically, the defendant challenges the court's findings that: (1) the defendant amended its contracts with the syndicators so that it could publish the Sunday comic strips on Saturday, prior to their release date; (2) both the defendant and one of the syndicators acknowledged to the plaintiff the existence of a preclusive contractual condition; and (3) under the amended contracts, the syndicators agreed that they would not allow the plaintiff to publish the Sunday comic strips on Saturday.

As a threshold matter, we note that the plaintiff does not claim that **[***16]** it was harmed in any way by the defendant's **[*683]** publication of the Sunday comics on Saturday. Rather, it claims only that it was injured by the syndicators' refusal to allow it to publish those comics. The court therefore could not have relied on its finding that the defendant and the syndicators amended their contracts to allow such publication as support for its legal conclusions. Furthermore, if there was other evidence to support the trial court's finding of an exclusive contract between the defendant and one of the syndicators, it is irrelevant whether they expressly acknowledged its existence. We conclude, therefore, that we need not consider whether the evidence presented at the hearing supported the trial court's findings that the defendant and the syndicators amended their contracts or acknowledged the existence of an exclusive contract. Accordingly, we need determine only whether the evidence presented at the hearing supported the trial court's finding that the defendant and the syndicators had exclusivity agreements with respect to the Sunday comics. We conclude that the evidence was sufficient to support this finding.

We note that the existence of contractual exclusivity provisions **[***17]** between the defendant and the syndicators with respect to the publication of the Sunday comics was not a fact relied on by the plaintiff in support of its bill of discovery but, rather, was one of the items of information sought **[**833]** by the plaintiff in its petition. It would defy common sense, therefore, to conclude that, in order for the trial court to grant the petition, the plaintiff was required to establish by a preponderance of the evidence that the defendant and the syndicators had exclusive contractual arrangements. [7] We conclude, **[*684]** instead, that the plaintiff was required to establish only that there was

---

[6] Both of the parties and the trial court treated the probable cause standard for evaluating an alleged cause of action set forth in *Berger v. Cuomo, supra, 230 Conn. at 1*, as the applicable standard in this case. Accordingly, we leave for another day the questions of whether (1) the standards governing equitable bills of discovery also govern petitions filed pursuant to *§ 52-156a*; see *Cadle Co. v. Drubner, 64 Conn. App. 69, 777 A.2d 1286 (2001)* **[***15]** (applying *Berger* standards to *§ 52-156a* petition); and (2) the probable cause language in *Berger* was an unduly constricted interpretation of our prior jurisprudence governing bills of discovery. See *Aetna Life & Casualty Co. v. Union Trust Co., 230 Conn. 779, 788 n.5, 646 A.2d 799 (1994)* (***HN8***[] when parties have not briefed or argued law that could affect case, "we decide [the] case on the basis on which it was tried and decided in the trial court, and briefed and argued in this court").

[7] Both parties agree that the evidentiary standard for determining whether unchallenged factual findings support the granting of a bill of discovery is whether the findings **[***18]** constitute probable cause to believe that the plaintiff has a cause of action against the defendant. See footnote 6 of this opinion. The parties do not address, however, the question of what is the proper evidentiary standard for evaluating disputed factual findings.

probable cause to believe both that the defendant and the syndicators had such arrangements and that those arrangements provided the basis for a cause of action. See Berger v. Cuomo, supra, 230 Conn. at 7 (HN9[] standard for determining whether trial court's unchallenged factual findings warrant granting of bill of discovery is whether facts demonstrate "that there is probable cause to bring a potential cause of action").

The following evidence supported the trial court's finding that there was probable cause to believe that the defendant and the syndicators had an agreement that prevented the syndicators from allowing the plaintiff to publish the Sunday comics. Ellis testified that, almost one year before the hearing, she had written to the defendant requesting that it release the exclusivity provisions for certain comic strips. Shortly thereafter, the defendant, through its parent corporation, responded only that it would look into the matter. The defendant provided no additional response. The trial court reasonably could have inferred from this testimony that, if the defendant did not have an exclusivity agreement with the syndicators, the natural response to the plaintiff's request would have been for it to deny the existence of such an arrangement or to assert that it had no control over the matter. Accordingly, the trial court could **[***19]** have inferred the existence of such an agreement from the defendant's failure to make a denial or to assert the absence of control.

Ellis also testified that she called Davis to inquire why the defendant objected to the plaintiff's having access to the Sunday comics. Davis responded that it was important for the newspaper to have a unique product. The trial court reasonably could have inferred from this response that the defendant believed that it had the ability to maintain the uniqueness of its Sunday **[*685]** newspaper by preventing the plaintiff from having access to the Sunday comics that it published.

Ellis also testified that, at some point in the year 2000, the Hartford Courant started publishing the Sunday comics in its early Sunday edition, which is actually published on Saturday. Prior to that time, Ellis had considered the plaintiff to be contractually bound to honor the release dates printed on the comics. The trial court reasonably could have inferred from this testimony that the syndicators' refusal to permit the plaintiff to publish the Sunday comics was not based on their reluctance to release the Sunday comics for publication before their release date, but, rather, on some **[***20]** other consideration that applied to the plaintiff, but not to the defendant.

We conclude that, on the basis of this evidence, the trial court reasonably could have determined that there was probable cause to believe that the defendant and the syndicators had a contractual arrangement that prevented the syndicators from allowing the plaintiff to publish the Sunday comics published by the defendant.

[834]** II

We next consider whether, if proven, the existence of such exclusive contracts, in and of itself, would constitute probable cause to believe that the plaintiff had a cause of action against the defendant. The trial court concluded that there was probable cause to believe that, by entering into exclusive contracts with the syndicators, the defendant had (1) tortiously interfered with the plaintiff's contractual rights; (2) violated CUTPA; and (3) violated Connecticut's antitrust laws. The defendant argues that the plaintiff never claimed, and the evidence did not establish, that the defendant had interfered with the plaintiff's contractual relations. It also argues that the plaintiff did not establish probable cause to believe that all of the elements of an antitrust claim **[*686]** exist. Finally, **[***21]** it argues that, in the absence of an antitrust violation, the plaintiff could not establish probable cause to believe that a violation of CUTPA existed. We assume, for purposes of our analysis, that the contracts between the defendant and the syndicators contained exclusivity provisions. We agree with the defendant, however, that the existence of such provisions would not constitute probable cause with respect to any of the causes of action found by the trial court.

A

We first consider whether the trial court properly determined that the existence of an exclusive contractual arrangement constituted probable cause to believe that the defendant tortiously had interfered with the plaintiff's contractual arrangements. The defendant argues that the plaintiff never made any such claim before the trial court and, even if it had, that the claim was not supported by the evidence. The plaintiff concedes that it had made no such claim.

We previously have recognized that ***HN10***[] "the right of a plaintiff to recover is limited by the allegations of the complaint . . . and any judgment should conform to the pleadings, the issues and the prayers for relief." (Citation omitted; internal quotation marks omitted.) **[***22]** *Kawasaki Kisen Kaisha, Ltd. v. Indomar, Ltd., 173 Conn. 269, 272, 377 A.2d 316 (1977)*. We conclude, therefore, that the trial court should not have raised this issue sua sponte. Accordingly, we need not consider whether the evidence established probable cause to believe that the plaintiff had a cause of action for tortious interference with its contractual relations.

B

We next consider the defendant's claim that the trial court improperly determined that there was probable cause to believe that the defendant had violated Connecticut's **[*687]** antitrust statutes. Specifically, the defendant claims that the plaintiff failed to demonstrate that: (1) competition is likely to be harmed by the existence of the exclusivity provisions; (2) the syndicators would have allowed the plaintiff to publish the Sunday comics in the absence of an exclusive agreement with the defendant and, therefore, that the plaintiff was harmed by the agreement; and (3) the existence of the exclusivity provisions, in and of itself, is violative of the antitrust laws. We conclude that the first and third claims are conceptually inseparable, and, accordingly, we treat them as a single claim. We also conclude that the existence **[***23]** of contractual exclusivity provisions between the defendant and the syndicators, if proved, would not, in and of itself, establish probable cause to believe that the antitrust laws have been violated. Because this determination is dispositive of the appeal, we need not consider the defendant's second claim.

[835]** As a preliminary matter, we address the plaintiff's claim that the record is inadequate to review the defendant's challenge to the trial court's legal conclusions. The following additional facts and procedural history are relevant to this claim. On September 7, 2001, the defendant, pursuant to *Practice Book § 66-5*, filed in the Appellate Court a motion for articulation of the factual and legal basis of the trial court's May 7, 2001 memorandum of decision. In accordance with the Practice Book, the motion was forwarded to the trial court for a ruling. The trial court denied the motion. The plaintiff claims that, because the trial court refused to provide the necessary articulation of its conclusion that there was probable cause to believe that the defendant had violated antitrust laws, the memorandum of decision does not set forth the necessary factual or legal basis for appellate **[***24]** review.

"The general purpose of [the relevant] rules of practice and their interplay is to ensure that there is a trial **[*688]** court record that is adequate for an informed appellate review of the various claims presented by the parties. . . . ***HN11***[] One specific purpose of a motion for articulation of the factual basis of a trial court's decision is to clarify an ambiguity or incompleteness in the legal reasoning of the trial court in reaching its decision. . . . Further articulation . . . is unnecessary where the [memorandum of decision] adequately states its factual basis, and where the record is adequate for informed appellate review of the [judgment]." (Citations omitted; internal quotation marks omitted.) *State v. Cobb, 251 Conn. 285, 383, 743 A.2d 1 (1999)*, cert. denied, *531 U.S. 841, 121 S. Ct. 106, 148 L. Ed. 2d 64 (2000)*.

In the present case, ***HN12***[] the trial court clearly set forth its factual findings and stated that those findings established probable cause to believe that the defendant had "persuaded the syndicators to refuse to deal with the [plaintiff] in violation of the Antitrust Act." The record is also clear that the court was made aware of the legal standards pertaining to ***antitrust*** **[***25]** ***law*** as set forth by the parties in their briefs to that court. In such cases, we assume that the trial court has applied the correct legal standards. See *State v. Crumpton, 202 Conn. 224, 232, 520 A.2d 226 (1987)*. Accordingly, we conclude that the record is adequate for review.

The plaintiff claims that the exclusivity provision in the contracts between the defendant and the syndicators of certain Sunday comics violated *General Statutes §§ 35-26* and *35-28 (b)* and *(d)*. [8] It claims that the effect of the provision was to prevent the plaintiff from offering those comics as part of an expanded weekend edition of its

[8] See footnotes 2 and 3 of this opinion for the text of those statutes.

newspaper that would compete with the defendant's Sunday newspaper. The defendant counters that such exclusivity provisions are presumptively legal and procompetitive and, accordingly, that in the **[*689]** absence of any evidence that the contracts impaired competition as a whole, the plaintiff failed to establish probable cause to believe that a violation had occurred. We agree with the defendant.

This court previously has recognized that ***HN13***[] "under the common law, the well-settled rule is that an anticompetitive covenant **[***26]** ancillary to a lawful contract is enforceable if the restraint upon trade is reasonable. . . . To satisfy this requirement of reasonableness, we have stated that the restraint must be limited in its operation with respect to time and place and afford no more than a fair and just protection to the interests of the party in whose favor it is to operate, without unduly interfering with the public interest." (Citations omitted; **[**836]** internal quotation marks omitted.) *Elida, Inc. v. Harmor Realty Corp., 177 Conn. 218, 225-26, 413 A.2d 1226 (1979)*. This principle has come to be known as the "rule of reason." *Id. at 225*.

HN14[] "In rule of reason cases, the plaintiff bears the initial burden of showing that the alleged combination or agreement produced adverse, anticompetitive effects within the relevant product and geographic markets. . . . The plaintiff may satisfy this burden by proving the existence of actual anticompetitive effects, such as reduction of output, increase in price, or deterioration in quality of goods and services." (Citation omitted.) *Orson, Inc. v. Miramax Film Corp., 79 F.3d 1358, 1367 (3d Cir. 1996)*. "If a plaintiff meets his initial burden of adducing adequate evidence of market **[***27]** power or actual anticompetitive effects, the burden shifts to the defendant to show that the challenged conduct promotes a sufficiently pro-competitive objective." *Id. at 1367-68*.

"There are [however] ***HN15***[] certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without **[*690]** elaborate inquiry as to the precise harm they have caused or the business excuse for their use." (Internal quotation marks omitted.) *Elida, Inc. v. Harmor Realty Corp., supra, 177 Conn. at 227*. Such agreements constitute "per se" antitrust violations. Id. "The 'rule of reason' was intended to be the prevailing standard to be applied for the purpose of determining whether a particular act had or had not brought about the wrong against which the statute provided in a given case. . . . 'Per se' rules of illegality should be applied only to conduct which is shown to be 'manifestly anticompetitive.'" (Citation omitted.) *Id. at 230-31*.

A number of courts have concluded that the exclusive licensing of syndicated features to newspaper publishers is presumptively procompetitive and, therefore, does not **[***28]** violate the federal antitrust statutes. [9] See *Paddock Publications, Inc. v. Chicago Tribune Co., 103 F.3d 42 (7th Cir. 1996)*, cert. denied, *520 U.S. 1265, 117 S. Ct. 2435, 138 L. Ed. 2d 196 (1997)*; *Woodbury Daily Times Co. v. Los Angeles Times-Washington Post News Service, 616 F. Supp. 502 (D.N.J. 1985)*. In *Paddock Publications, Inc.*, the plaintiff, a publisher of a daily newspaper in the Chicago area, claimed that two larger newspapers in the same geographical area had "locked up the 'most popular' or 'best' supplemental [syndicated] services and features, [thereby] injuring consumers by frustrating competition." *Paddock Publications, Inc. v. Chicago Tribune Co., supra, at 44*. The plaintiff conceded that "many quality comics and features [were] available to it . . . but insisted that the best ones [were] committed to its larger rivals." Id. The District Court dismissed the complaint for failure to state a claim on which relief might have been granted. Id. On **[*691]** appeal, the Court of Appeals, implicitly applying the rule of reason, concluded that "exclusive stories and features help the newspapers differentiate themselves, the better to compete with one another. A market in which every **[***29]** newspaper carried the same stories, columns, and cartoons would be a less vigorous market than the existing one." *Id. at 45*. It also concluded that there was no evidence that the plaintiff had ever attempted to outbid the rival **[**837]** newspapers for the syndicated features; *id. at 44*; or that those newspapers had colluded with each other, thereby harming consumers. *Id., at 45*.

Finally, the court in *Paddock Publications, Inc.*, rejected the plaintiff's implicit claim that the syndicated features were "essential facilities"; *id. at 44*; that "could not feasibly be duplicated [and therefore] must be shared among

---

[9] *General Statutes § 35-44b* provides: ***HN16***[] "It is the intent of the General Assembly that in construing sections 35-24 to 35-46, inclusive, the courts of this state shall be guided by interpretations given by the federal courts to federal antitrust statutes."

rivals . . . ." *Id. at 45*. It concluded, rather, that "this case does not involve a single facility that monopolizes one level of production and creates a potential to extend the monopoly to others. We have, instead, competition at each level of production; no one can 'take over' another level of production by withholding access from disfavored **[***30]** rivals." Id. Accordingly, the Court of Appeals affirmed the judgment of the District Court dismissing the claim. *Id. at 47*.

In *Woodbury Daily Times Co. v. Los Angeles Times-Washington Post News Service, supra, 616 F. Supp. at 502*, the court considered a similar claim. Applying the rule of reason rather than a per se standard; *id. at 506*; the court determined that "the ability to present a unique product in the newspaper or broadcast media contributes to the value of a paper or television station and enhances its competitive edge in the market place. Limited exclusivity grants are thus the custom of these industries. . . . One aspect of the [competing newspaper's] competitive draw would be lessened if another newspaper in the area published the same articles on **[*692]** the same day, or even worse, published the articles before the [competing newspaper] chose to use them." *Id. at 510*. "In the end, such exclusive subscriptions result in each interested area newspaper contracting with a different service, thus guaranteeing that the reading public has access to a wider variety of news reporting and opinions." *Id. at 511*. Accordingly, the court granted the defendants' motion for summary judgment. **[***31]** *Id. at 512*.

The plaintiff in this case in effect concedes that, under *Paddock Publications, Inc.,* and *Woodbury Daily Times Co.,* ***HN17***[] exclusivity provisions in contracts between newspapers and syndicators are, as a general rule, presumptively legal. It argues, however, that, because of the unusual factual circumstances of this case, those cases are not applicable here. Specifically, the plaintiff claims that, because the syndicators in this case have permitted the plaintiff to publish the same comics as the defendant on Monday through Saturday, the defendant cannot claim that the exclusivity provisions provide it with the marketplace advantage of being identified with those comics. Therefore, the plaintiff contends, the sole purpose and effect of the contractual restriction was to suppress competition in the market for expanded weekend newspapers, whether published on Saturday or Sunday, without any redeeming value for the marketplace. Accordingly, the plaintiff argues, the trial court properly concluded that the exclusivity provisions constituted per se violations of the antitrust laws. See *Elida, Inc. v. Harmor Realty Corp., supra, 177 Conn. at 227* (recognizing that per se rule is applicable **[***32]** to "agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable" [internal quotation marks omitted]).

Thus, the plaintiff implicitly concedes that, if the exclusivity provisions had prevented the plaintiff from publishing certain comics on a daily basis, they would **[*693]** be presumptively legal. It argues, however, that, because the provisions prevent the plaintiff from publishing the comics *only* on Sunday, they do not enhance the defendant's competitiveness while they do impair **[**838]** the plaintiff's ability to compete and, accordingly, are presumptively illegal. We are not persuaded.

First, the exclusivity provisions complained of by the plaintiff in this case are, on their face, *less* restrictive than the exclusivity provisions found, under a rule of reason analysis, to be procompetitive in *Paddock Publications, Inc.,* and *Woodbury Daily Times Co.* We cannot perceive any reason why the fact that the plaintiff is permitted to publish the comics at issue on Monday through Saturday should relieve it of the burden of establishing the existence of the actual anticompetitive effects of preventing it from **[***33]** publishing the comics in a weekend edition, or impose on the defendant the burden of establishing redeeming procompetitive virtues of the provisions.

More fundamentally, we simply cannot reconcile the plaintiff's claim that the exclusivity provisions constitute per se violations of the antitrust laws because their only purpose is to suppress competition in the market for expanded weekend newspapers, with its claim that the provisions have no redeeming procompetitive virtues. If the provisions suppress competition, they do so only by making the defendant's Sunday newspaper more desirable to consumers than competing weekend newspapers that are prevented from publishing the same Sunday comics. This is the same procompetitive effect that the exclusivity provisions challenged in *Paddock Publications, Inc.*, and *Woodbury Daily Times Co.* were found to have had on the markets in those cases. Accordingly, we conclude that the exclusivity provisions between the defendant and the syndicators do not constitute per se violations of the antitrust statutes.

[*694] We also conclude that, under the rule of reason, the plaintiff has not met its burden of establishing probable cause to believe that "the alleged **[***34]** . . . agreement produced adverse, anticompetitive effects within the relevant product and geographic markets." *Orson, Inc. v. Miramax Film Corp., supra, 79 F.3d at 1367*. The plaintiff produced no evidence supporting "the existence of [any] actual anticompetitive effects, such as reduction of output, increase in price, or deterioration in quality of goods and services." Id. Rather, the evidence showed only that the plaintiff's inability to publish those comic strips may have been a factor in its decision whether to publish an expanded weekend newspaper. It is not unreasonable to infer from this evidence that the plaintiff believed that its planned weekend edition would be more competitive if it contained the Sunday edition of all of the comics that its newspaper contains on a daily basis. ***HN18***[] "The antitrust laws, however, were enacted for the protection of *competition*, not *competitors* . . .." (Citation omitted; emphasis in original; internal quotation marks omitted.) *Brunswick Corp. v. Pueblo Bowl-o-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*.

We also reject the plaintiff's claim, essentially raised as an alternate ground for affirmance, that there is probable cause **[***35]** to believe that the eleven Sunday comic strips at issue in this case constitute an "essential facility" because the syndicators are the only source of those particular comics. The evidence showed that there are hundreds of syndicated comic strips available to the plaintiff. There simply is no evidence that the eleven comic strips that the plaintiff is prevented from publishing are essential for the publication of a viable newspaper. See *Paddock Publications, Inc. v. Chicago Tribune Co., supra, 103 F.3d at 45* (rejecting "essential facilities" claim where case did "not involve a single facility that **[*695]** monopolizes one level of production and creates a potential to extend the monopoly to others").

[839]** We conclude that, in the absence of any evidence establishing the existence of any actual anticompetitive effects of the exclusivity provisions, the plaintiff has not established probable cause to believe that the antitrust statutes were violated.

III

The defendant also claims that the trial court improperly concluded that there was probable cause to believe that the defendant had violated CUTPA. It argues that, because the CUTPA claim was predicated solely on the antitrust claim, and because the **[***36]** plaintiff did not establish probable cause to believe that the antitrust laws had been violated, there is no basis for the claim. The plaintiff contends, to the contrary, that, even if the antitrust laws were not violated, the trial court properly found probable cause to believe that the defendant had engaged in unscrupulous or oppressive acts. We agree with the defendant.

"It is well settled that ***HN19***[] in determining whether a practice violates CUTPA we have adopted the criteria set out in the cigarette rule by the federal trade commission for determining when a practice is unfair: (1) Whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise--whether, in other words, it is within at least the penumbra of some common law, statutory, or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; (3) whether it causes substantial injury to consumers [competitors or other businessmen]. . . .

"All three criteria do not need to be satisfied to support a finding of unfairness. A practice may be unfair **[*696]** because of the degree to which **[***37]** it meets one of the criteria or because to a lesser extent it meets all three. . . . Thus a violation of CUTPA may be established by showing either an actual deceptive practice . . . or a practice amounting to a violation of public policy. . . . Furthermore, a party need not prove an intent to deceive to prevail under CUTPA." (Citations omitted; internal quotation marks omitted.) *Cheshire Mortgage Service, Inc. v. Montes, 223 Conn. 80, 105-106, 612 A.2d 1130 (1992)*.

The trial court concluded that there was probable cause to believe that the defendant had engaged in "unscrupulous or oppressive acts, causing a substantial injury to the readers of the [plaintiff's] publication and to the [plaintiff]." In light of the evidence presented at the hearing, the "unscrupulous or oppressive acts" referred to by the trial court could only have been the exclusivity provisions in the contracts between the defendant and the syndicators. As noted by the court in *Woodbury Daily Times Co. v. Los Angeles Times-Washington Post News*

Service, supra, 616 F. Supp. at 510, however, "limited exclusivity grants are . . . the custom" in the newspaper industry. Moreover, such provisions are generally procompetitive **[***38]** and, as such, are in furtherance of public policy and presumptively legal. See Paddock Publications, Inc. v. Chicago Tribune Co., supra, 103 F.3d at 45. We conclude that, in the absence of any evidence of substantial injury to consumers or to the plaintiff, [10] these customary, procompetitive and presumptively legal contractual provisions do not constitute probable cause to believe that the criteria of the "cigarette rule" have been met. Accordingly, we conclude that the trial court improperly determined **[**840]** **[*697]** that there was probable cause to believe that the defendant had violated CUTPA.

IV

We next address the plaintiff's claim that it is entitled to a new hearing at which it should be allowed to subpoena a representative of the defendant to provide additional facts in support of its bill of discovery. We disagree.

The following additional facts and procedural history are relevant to this claim. Prior to the hearing on the bill of discovery, the plaintiff attempted to serve **[***39]** a subpoena directed to Marty Petty, a former publisher of the Hartford Courant, or, in the alternative, the defendant's designee with knowledge of its relationship with the syndicators. The subpoena directed the production of "any and all correspondence by and between [the syndicators] and the [defendant] in regard to restrictions on access to the agreements between the syndicators and the [defendant] related to the so-called Sunday comics, and the nature and extent of distribution of the so-called Sunday Hartford Courant which includes the Sunday comics." Service was attempted at the offices of the defendant's headquarters. At the time that the attempted service was made, however, Petty was no longer employed by the defendant.

The defendant moved to quash the subpoena on the grounds that: (1) service had not been made on Petty and the defendant was, therefore, not required to respond to the subpoena; and (2) the plaintiff was not entitled to any discovery until after a ruling on its petition for a bill of discovery. The trial court granted the motion to quash, concluding that the plaintiff was required to establish probable cause to believe that it had a cause of action against the **[***40]** defendant before the plaintiff would be entitled to discovery.

[*698] Thereafter, the plaintiff filed a second subpoena directed to Louis J. Golden, the deputy publisher of the Hartford Courant. The subpoena directed production of the same documents listed in the first subpoena. The defendant again filed a motion to quash and a motion for sanctions against the plaintiff for its failure to abide by the trial court's order quashing the first subpoena. The motion to quash was argued before the trial court at the commencement of the hearing on the bill of discovery. The trial court granted the motion.

The plaintiff now argues that, if this court determines that the record before the trial court did not establish probable cause to believe that the plaintiff had a cause of action against the defendant, this court should remand the case for a hearing at which the plaintiff should be allowed to subpoena a representative of the defendant to provide limited testimony as to the *existence* of the contractual exclusivity provisions, as distinct from their substance. The plaintiff concedes that it should not be able to compel production of the same information sought in the bill of discovery by use of a **[***41]** subpoena, but argues that the bill of discovery was aimed at the history, nature and substance of the contractual provisions, not their mere existence, of which the plaintiff already knew indirectly through hearsay.

We conclude that the plaintiff is not entitled to a new hearing. We have assumed for purposes of our analysis that the restrictive contractual provisions exist and have determined that their existence does not constitute probable cause to believe that the plaintiff has a cause of action against the defendant. Accordingly, nothing would be gained by allowing the plaintiff to establish the existence of the contractual provisions through direct testimony by a representative of the defendant.

---

[10] As we have noted, the only injury claimed by the plaintiff is that the inability to publish the eleven Sunday comic strips at issue may make its planned weekend edition less competitive than it otherwise would have been.

[*699] The judgment is reversed and the case is remanded with direction to render **[**841]** judgment denying the petition for a bill of discovery.

In this opinion KATZ and ZARELLA, Js., concurred.

Dissent by: BORDEN

Dissent

BORDEN, J., with whom VERTEFEUILLE, J., joins, dissenting. Until 1994, when we decided *Berger v. Cuomo, 230 Conn. 1, 644 A.2d 333 (1994)*, and included therein one brief passage of dictum; see *id. at 7-8*; which I discuss later in this opinion, our law on the bill of discovery was adequate to protect both **[***42]** those who sought such a bill and those who sought to resist it. By applying the *Berger* dictum dispositively to the facts of the present case, the majority has, in my view, unduly raised the bar to the issuance of a bill of discovery. I therefore dissent.

Our jurisprudence regarding bills of discovery prior to *Berger* may be summarized as follows. Two types of the bill of discovery exist at equity: the bill of discovery and relief, and the pure bill of discovery. The former is reserved for those circumstances in which a plaintiff not only seeks some information or document in the possession of the adverse party, but also requests that the court take some affirmative action on the asserted cause of action. The bill of discovery and relief is, therefore, the equitable equivalent of a plenary action at law. See generally G. Bispham, Principles of Equity (11th Ed. 1931) § 525, pp. 437-38 (bill of discovery and relief vehicle by which claim made for both discovery and equitable remedy; pure bill of discovery aids prosecution of legal claim); 3 J. Story, Equity Jurisprudence (14th Ed. 1918) § 1930, p. 519 (pure bill of discovery, as distinguished from bill of discovery and relief, seeks no **[***43]** remedy other than disclosure of certain information or documentation); 1 J. Pomeroy, Equity Jurisprudence (5th Ed. 1941) § 191, p. 277 (same). The second type of bill, the pure bill of discovery, is at issue in the **[*700]** present case and is the only bill addressed in this dissent.

A pure bill of discovery "is an action in equity ancillary to the original action. The only relief sought [therein] is a discovery of facts to be used as evidence in that action. . . . *A pure bill of discovery is favored in equity and will be granted unless there is some well-founded objection against the exercise of the court's jurisdiction*. *Peyton v. Werhane, 126 Conn. 382, 389, 11 A.2d 800* [1940]; *Skinner v. Judson, 8 Conn. 528, 533* [1831]; Swift, Evidence, p. 116; 2 Swift, Digest, p. 210; 1 [J. Pomeroy, supra] §§ 142, 144, 190a, 191, 195; 17 Am. Jur. 6, § 3; see *Middletown Bank v. Russ, 3 Conn. 135, 140* [1819]; *Hoyt v. Smith, 23 Conn. 177, 186* [1854]; *Norwich & W.R. Co*. v. *Storey, 17 Conn. 364, 371* [1845]; *Welles v. Rhodes, 59 Conn. 498, 506, 22 A. 286* [1890]. To sustain a pure bill of discovery, a party must show that the matter he seeks to discover is material and necessary to the proof of, or is needed **[***44]** to aid in the proof of, another action, already brought or about to be brought, and that he has no other adequate means of enforcing discovery of the matter. *3 [J. Story, supra*] §§ 1930, 1943; 1 [J. Pomeroy, supra, § 191, pp. 278-79 and] §§ 197a, 197b; Hare, Discovery, [1849] p. 110; 17 Am. Jur. 8. [In this regard, it] might be stated parenthetically that the cases in other jurisdictions, and the earlier cases in this state, make a distinction between pure bills of discovery and bills for discovery and relief. *In the latter, the petitioner must show that he has stated a valid cause of action for the equitable relief in support of which he seeks to invoke the equitable powers of the court for a discovery*. *Middletown Bank v. Russ, supra* [140]; *Norwich & W.R. Co*. v. *Storey, supra* [371]; *Welles v. Rhodes, supra* [506]; Story, Equity Pleadings (9th **[**842]** Ed.) § 324a; 1 [J. Pomeroy, supra] § 229, p. 404.

"The law of discovery has been invested at times with unnecessary mystery. There are few fields where **[*701]** considerations of practical convenience should play a larger role. The rationale of the remedy, when used as an auxiliary process in aid of trials at law, is simplicity itself. At times, cases **[***45]** will not be proved, or will be proved clumsily or wastefully, if the litigant is not permitted to gather his evidence in advance. When this necessity is made out with reasonable certainty, a bill in equity is maintainable to give him what he needs. . . . There were other reasons in times past, when parties were not permitted to be witnesses, and when there was no compulsory process for the production of books or documents. *Carpenter v. Winn, 221 U.S. 533 [31 S. Ct. 683, 55 L. Ed. 842 (1911)]*; *Pressed Steel Car Co*. v. *Union Pacific R. Co., 240 Fed. 135, 136* [1917]. Today the remedy survives, chiefly, if not wholly, to give facility to proof. . *Sinclair Refining Co*. v *Jenkins Petroleum Process Co., 289 U.S. 689, 693, 53 S. Ct. 736, 77 L. Ed. 1449* [1933]. The right to a discovery, however, does not extend to all material facts but only to those which pertain to a party's cause of action or defense. Discovery cannot be used to pry into the opposing party's case or to find out the evidence by which that case will be supported. *Peyton v. Werhane, supra [126 Conn. at 389*]; *Downie v. Nettleton, 61 Conn. 593, 596, 24 A. 977* [1892]; 1 [J. Pomeroy, supra] § 201. Discovery does not sanction **[***46]** impertinent intrusion, and there must be a showing of good faith and probable cause. *Sinclair Refining Co*. v. *Jenkins Petroleum Process Co., supra, at 697*. In passing upon the bill, the court exercises a discretionary power within recognized limits. [Id.]; see *Kiessling v. Kiessling, 134 Conn. 564, 568, 59 A.2d 532* [1948]; *May v. Young, 125 Conn. 1, 10, 2 A.2d 385* [1938]; *Katz v. Richman, 114 Conn. 165, 171, 158 A. 219* [1932]; 1 [J. Pomeroy, supra] §§ 202, 203; 3 Story, Equity Jurisprudence [supra] § 1936." (Emphasis added; internal quotation marks omitted.) *Pottetti v. Clifford, 146 Conn. 252, 257-59, 150 A.2d 207 (1959)*. "The granting of a bill and the **[*702]** terms of the judgment rendered call for the exercise by the trial court of a sound discretion as to what is reasonably necessary." *Id. at 263*.

Furthermore, this statement of the legal principles applicable to the pure bill of discovery is consistent with those articulated in the authoritative treatises on equity. According to those authorities, the party seeking a bill of discovery "must . . . state a case which will, if he is the plaintiff at law, constitute a good ground of action . . . . If it is clear that the action . . . is unmaintainable **[***47]** at law, Courts of Equity will not entertain a bill for any discovery in support of it, since the discovery could not be material, but must be useless. *This however is so delicate a function that Courts of Equity will not undertake to refuse a discovery upon such grounds unless the case is entirely free from doubt. If the point be fairly open to doubt or controversy, Courts of Equity will grant the discovery and leave it to Courts of Law to adjudicate upon the legal rights of the party seeking the discovery."* (Emphasis added.) *3 J. Story, Equity Jurisprudence, supra*, § 1941, pp. 525-26; see also 1 J. Pomeroy, supra, § 198, pp. 303-304 ("if the result of the controversy at law is doubtful, even when the defendant in the suit for a discovery has denied the plaintiff's title, or has set up matter which if true would operate as a complete defense, the court of equity will, in general, grant the discovery, and leave the issue to be tried and finally determined by the court of law").

[843]** Gauged by these standards, it is clear to me that the trial court did not abuse its discretion in issuing this limited bill of discovery. The court made specific findings that: (1) the material sought would **[***48]** be necessary or helpful to prove claims in a suit yet to be filed; (2) the plaintiff had no alternative means of obtaining the information other than by a court order; (3) there was a good faith basis to conclude that the material was **[*703]** necessary for the plaintiff to determine whether the defendant had violated the law; and (4) there was probable cause to believe that the plaintiff has a cause of action against the defendant on one or more of the bases stated in its petition. [1] As previously stated, such a bill is favored, and should be issued absent a well-founded objection to it. The fact that, ultimately, the plaintiff may not prevail on the lawsuit it intends to bring, should not constitute such an objection. Moreover, the discovery sought in the present case was limited to one contract document. Thus, this was not an instance in which the plaintiff sought to misuse the bill of discovery as a tool to pry needlessly into the defendant's affairs. Finally, even if the document sought ultimately did not support the plaintiff's cause of action, it hardly can be maintained that, at such an early stage of the proceedings, when the trial court exercised its discretion to issue the bill, **[***49]** the ultimate liability of the defendant on the claims that the plaintiff intends to bring was entirely free from doubt or controversy.

Indeed, as I read the majority opinion, it does not quarrel with the proposition that, measured solely by these standards, the trial court did not abuse its discretion in ordering the bill of discovery in the present case. Instead, the majority relies on, and applies in a very stringent way, the following passage from *Berger v. Cuomo, supra, 230 Conn. at 7-8*: "*The plaintiff who brings a bill of discovery must demonstrate by detailed facts that there is probable cause to bring a potential cause of action.* 'Probable cause is the knowledge of facts sufficient to justify a reasonable man in the belief that he has reasonable grounds for presenting an action. . . . Its existence or nonexistence is determined by the court on the facts found.' . . . *Cosgrove Development* **[*704]** *Co*. v. *Cafferty, 179 Conn. 670, 671, 427 A.2d 841 (1980)*. Moreover, the plaintiff who seeks discovery in equity **[***50]** must

[1] I discuss later in this opinion my disagreement with the majority regarding the quantum of proof necessary to meet the probable cause standard for the issuance of a bill of discovery.

demonstrate more than a mere suspicion; he must also show that there is some describable sense of wrong. *The plaintiff need not, however, state each claim with technical precision; he need only set forth facts that fairly indicate that he has some potential cause of action.* Pottetti v. Clifford, supra, 146 Conn. at 259." (Emphasis added.)

I perceive several flaws in endorsing the probable cause standard articulated in *Berger*. For instance, the first, emphasized sentence of the previously quoted passage, which the majority singularly relies on in reversing the judgment of the Appellate Court in the present case, has no citation for the proposition stated therein, because none is available. Prior to *Berger*, we had never imposed a showing of detailed facts on a bill of discovery. Moreover, the last sentence of the passage in *Berger*, quoted from *Pottetti*, is inconsistent with the first sentence. Indeed, it is that last sentence that defines the contours of the notion of probable cause in the context of a bill of discovery: without stating or proving each claim with technical precision, the plaintiff need only set forth **[**844]** facts *fairly indicating that it has some potential cause of action*. **[***51]** Unless it is clear that it has none, whether that potential cause of action ultimately will survive a motion to strike or a motion for summary judgment, or whether the plaintiff will prevail on the merits after a trial, is to be left to a later determination, when and if that action is brought.

Thus, the majority has taken the requirement that the plaintiff establish "a valid cause of action," which is applicable only to the bill of discovery and relief; *Pottetti v. Clifford, supra, 146 Conn. at 258*; and applied it to the present case, which involves the pure bill of **[*705]** discovery. [2] In other words, the majority has imposed on both types of the bill of discovery the requirement that the plaintiff show the existence of probable cause with respect to each and every element of the cause of action that he intends to file. That this is the effect of the majority opinion is demonstrated by the detailed legal analyses that it presents in order to refute the plaintiff's potential causes of action. Neither our law, nor the law of equity generally, supports such a rigorous standard for the issuance of a bill.

As a practical matter, the majority's analysis requires a party who seeks to gain access to a single document, as in the present **[***53]** case, in order to facilitate its proof of the cause of action that it intends to bring--or, as is more likely, in order simply to determine whether it can, in good faith, bring such an action--to be able to establish a prima facie case on the merits of that potential cause of action. In effect, the party must demonstrate, and the trial court must determine, in advance of the issuance of the bill, that the plaintiff's underlying claim, in aid of which it seeks the bill of discovery, has merit. The issuance of a bill of discovery has never had to surmount such a high threshold.

[*706] Moreover, as a matter of policy, it should not have to do so. First, erecting such a high threshold is likely to inhibit, unduly, the bringing of bills of discovery, even where their laudable goal is to help the potential plaintiff who has a good faith--but mistaken--belief that he has a cause of action against the defendant to determine whether there is such a valid claim. For example, if the document in the present case is as legally benign as the majority says it is, and if the majority is as correct on the applicable law as it purports to be, then the issuance of the bill would, in all likelihood, demonstrate **[***54]** to the plaintiff the futility of its intended, potential causes of action. In that event, then, the result of the issuance of the bill would be that a claim that otherwise might have been brought will not be brought. We should not, as a matter of policy, rule out that possible result.

The majority's approach, moreover, effectively penalizes the cautious and prudent **[**845]** lawyer who, rather than simply alleging her cause of action and thereby engaging the full panoply of judicial machinery--discovery requests, depositions, interrogatories, and the like--instead seeks only to gain access to limited information or documents in

---

[2] Although we did not expound upon our suggestion in *Pottetti* that a party seeking to sustain **[***52]** a bill of discovery and relief bears a greater burden than one who utilizes a pure bill of discovery, the reasoning behind such a distinction is obvious. As previously indicated, a bill of discovery and relief goes beyond an informational request and requires the court to resolve a party's substantive claims. Because, in that circumstance, the function of the court does not end upon disposition of the pure discovery request, but rather continues through a consideration of the merits of the case, it makes sense to require the court to determine, at the outset, whether there exists probable cause to support the various elements of the causes of action alleged. When dealing with a pure bill of discovery, however, the court's only function is to pass upon the necessity of a party's informational request. Imposition of the more stringent probable cause standard articulated in *Berger* is thus improper in such a case because the underlying claims are not before the court for disposition on the merits, as are the claims in a proceeding on a bill of discovery and relief.

order to determine that she will be able to prove that action. This record amply demonstrates such a cautious and prudent course of conduct.

Second, if the plaintiff nonetheless brings a bill of discovery despite the high threshold set by the majority in the present case, believing in good faith that it can surmount it, it will then have to put on its best version of a prima facie case, and the trial court will have to delve as deeply into the merits, not of the matter before it, but of the potential claim asserted in the bill, as the majority has done in the present case. **[***55]** Thus, every bill of discovery will be, in effect, a minitrial of the potential claim, without, however, the critical document or documents sought by the bill.

[*707] The unnecessary burdens of such a regime on the administration of justice are obvious. First, requiring a court to evaluate the probable success of a claim before suit is even initiated and without critical information sought in the bill itself is unfairly prejudicial and may, ultimately, thwart the administration of justice by needlessly defeating a potentially good cause of action. Second, as discussed previously, the majority's application of *Berger* creates a disincentive to utilize pure bills of discovery and an incentive to file suit and avail oneself of the vast array of discovery tools commonly employed in the initial stages of litigation. There is no justification, however, for the attendant waste of judicial resources that otherwise may be saved by first exploring the availability of information or evidence to support a claim in a bill of discovery. Third, forcing the trial court to evaluate the merits of a potential cause of action up front may result in the wasteful repetition of its duties, as there may be instances **[***56]** in which the trial court, after a detailed analysis of the claim such as the majority employs in this appeal, finds probable cause to bring a claim in a proceeding on the bill of discovery, but subsequently determines, in ruling on a motion to strike, motion to dismiss, or motion for summary judgment, that the claim is, ultimately, unsupportable.

I recognize what may lie behind the majority's high threshold, namely, a fear of opening the proverbial floodgates to numerous, bad faith fishing expeditions under the guise of bills of discovery. This fear, however, is unfounded. First, before *Berger*, and under *Pottetti*, no such flood of bills has ever occurred. This is undoubtedly because, in most cases, plaintiffs have the necessary information to state their claims, and then can use the normal rules of discovery to gain what they need in order to prove those claims. Furthermore, it is undoubtedly expensive to file and litigate a separate bill of discovery; there is, therefore, an economic disincentive **[*708]** to frivolous filings. Finally, the trial court always has the discretion to weed out bad faith claims, and to sanction parties and counsel for engaging in such conduct. I have full confidence **[***57]** in the abilities of our trial judges to recognize when the bill is being abused.

I would, therefore, affirm the judgment of the trial court issuing the bill of discovery.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

HN8[] State Regulation, Claims

Liability under the Connecticut Unfair Trade Practices Act, *Conn. Gen. Stat. § 42-110a et seq.*, is established using three criteria to determine if a business practice is unfair or deceptive: (1) Whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise -- whether, in other words, it is within at least the penumbra of some common law, statutory, or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; (3) whether it causes substantial injury to consumers competitors or other businessmen. All three criteria do not need to be satisfied to support a finding of unfairness. A practice may be unfair because of the degree to which it meets one of the criteria or because to a lesser extent it meets all three.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN9[] Regulated Practices, Trade Practices & Unfair Competition

The practice of granting clearances may violate public policy if the theater over which a clearance is granted is not in substantial competition with the licensed theater. If the theaters are in substantial competition, the clearances at issue would not violate public policy; if the theaters are not in substantial competition, the clearances might well violate public policy.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN10[] Regulated Practices, Trade Practices & Unfair Competition

The United States Supreme Court has held that there should be no clearance between theaters not in substantial competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Opinion by: Stefan R. Underhill

Opinion

RULING ON DEFENDANTS' MOTION FOR SUMMARY JUDGMENT

Plaintiff Broadway Theater Corporation ("Broadway") owns and operates the York Square Cinema ("York Square"), a medium-size, three-screen movie theater in downtown New Haven, Connecticut. Broadway sued a number of major motion picture distributors [1] ("the Distributors"), claiming that their practice of licencing certain "first-run" films exclusively to the suburban **[*2]** New Haven movie theaters Showcase Cinema Orange and/or Showcase Cinema North Haven (the "Showcases"), violates the Connecticut Unfair Trade Practices Act ("CUTPA"), *Conn. Gen. Stat. §§ 42-110a et seq*. The Distributors have moved for summary judgment, arguing that the challenged distribution

[1] Defendants in this action are Buena Vista Pictures Distribution, Columbia Pictures Industries Inc., Dreamworks Distribution L.L.C., Lions Gate Films Inc., Metro-Goldwyn-Mayer Distribution Co., Miramax Film Corp., New Line Cinema Corp., Paramount Pictures Corp., Sony Pictures Releasing Corp., Universal Firm Exchanges Inc., Warner Bros. Distributing, and USA Films L.L.C.

practice, known in the motion picture industry as giving "clearance" over particular theaters, is a "reasonable, customary, pro-competitive business practice" and therefore does not violate CUTPA. Distributors further contend that Broadway's complaint is based on defective antitrust allegations, that any CUTPA challenge to the Distributors' policy is preempted by the federal *Copyright Act and* that CUTPA's three-year statute of limitations bars Broadway's claims. For the following reasons, the Distributors' motion is denied.

[*3] STANDARD OF REVIEW

HN1[] Summary judgment is appropriate when the evidence demonstrates that "there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*; see also *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 256, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

HN2[] When ruling on a summary judgment motion, the court must construe the facts in the light most favorable to the non-moving party and must resolve all ambiguities and draw all reasonable inferences against the moving party. *Anderson, 477 U.S. at 255*; *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*; *Adickes v. S.H. Kress & Co., 398 U.S. 144, 158-59, 26 L. Ed. 2d 142, 90 S. Ct. 1598 (1970)*; see also *Aldrich v. Randolph Cent. Sch. Dist., 963 F.2d 520, 523 (2d Cir.)*, *cert*. *denied*, *506 U.S. 965, 121 L. Ed. 2d 359, 113 S. Ct. 440 (1992)*. ***HN3***[] When a motion for summary judgment is properly supported by documentary and testimonial evidence, however, the nonmoving party may not rest upon the conclusory allegations **[*4]** or denials of the pleadings, but rather must present sufficient probative evidence to establish a genuine issue of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 327, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*; *Colon v. Coughlin, 58 F.3d 865, 872 (2d Cir. 1995)*. ***HN4***[] To present a genuine issue of material fact, there must be contradictory evidence "such that a reasonable jury could return a verdict for the non-moving party." *Anderson, 477 U.S. at 248*.

HN5[] If the nonmoving party has failed to make a sufficient showing on an essential element of his case with respect to which he bears the burden of proof at trial, then summary judgment is appropriate. *Celotex, 477 U.S. at 322*. In such a situation, "there can be 'no genuine issue as to any material fact,' since a complete failure of proof concerning an essential element of the nonmoving party's case necessarily renders all other facts immaterial." *Id. at 322-23*; *accord*, *Goenaga v. March of Dimes Birth Defects Foundation, 51 F.3d 14, 18 (2d Cir. 1995)* (movant's burden satisfied if it can point to an absence of evidence to support an essential element **[*5]** of nonmoving party's claim). In short, ***HN6***[] if there is no genuine issue of material fact, summary judgment may enter. *Celotex, 477 U.S. at 323*.

DISCUSSION

Clearances as Unfair Practices

Broadway brought a one-count complaint alleging violation of CUTPA and requesting monetary and injunctive relief. CUTPA ***HN7***[] prohibits "unfair methods of competition and unfair or deceptive acts or practices in the conduct of trade or commerce." *Conn. Gen. Stat. § 42-110b*. It is a broad statute enacted in response to "legislative concern that the existing pattern of common-law, legislative and administrative standards is insufficient to avoid unfairness in commercial relations." 1 Robert M. Langer, John T. Morgan & David L. Belt, The Connecticut Unfair Trade Practices Act 27 (1994) ("CUTPA Treatise"). ***HN8***[] Liability under CUTPA is established using three criteria to determine if a business practice is unfair or deceptive:

> (1) Whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise -- whether, in other words, it is **[*6]** within at least the penumbra of some common law, statutory, or other established concept of unfairness; (2) whether

it is immoral, unethical, oppressive, or unscrupulous; (3) whether it causes substantial injury to consumers [competitors or other businessmen].

Sporty's Farm L.L.C. v. Sportsman's Mkt., Inc., 202 F.3d 489, 501 (2d Cir. 2000). "All three criteria do not need to be satisfied to support a finding of unfairness. A practice may be unfair because of the degree to which it meets one of the criteria or because to a lesser extent it meets all three." Id.

The Distributors' motion for summary judgment challenges Broadway's CUTPA claims on several grounds. The Distributors claim that their granting of clearances over the York Square cannot offend public policy because the granting of such clearances is a rational business decision -distributors prefer to license films to the higher-grossing Showcases than to smaller venues like the York Square. The Distributors, however, have not shown they would be harmed by offering first-run films to both the York Square and the Showcases, or even that they gain an economic advantage from the use of **[*7]** clearances. Indeed, some evidence in the record suggests that licensing the same movie to both the York Square and the Showcases might actually benefit the Distributors by increasing their total revenues for the film. In any event, the Distributors' purported preference [2] for exhibiting films in the larger Showcases over the York Square does not shield the practice of granting clearances against a CUTPA claim.

The Distributors also claim that the practice of granting clearances generally does not offend public policy and therefore **[*8]** cannot violate CUTPA. The use of clearances, the Distributors argue, does not offend public policy because other cases challenging clearances have upheld the practice. The Distributors cite several cases in which antitrust challenges to clearances have failed. See Theee Movies of Tarzana v. Pacific Theatres, 828 F.2d 1395 (9th Cir. 1987); Soffer v. National Amusements, 1996 U.S. Dist. LEXIS 19751, 1996 WL 194947 (D. Conn. 1996). The Distributors contend that, because these antitrust decisions have found clearances to be pro-competitive, the use of clearances cannot be an unfair practice under CUTPA. This argument fails for at least two reasons: the existence of genuine issues of material fact concerning the level of competition among the relevant theaters and the differing standards governing antitrust and CUTPA cases.

Notwithstanding the Distributors' arguments, ***HN9***[] the practice of granting clearances may violate public policy if the theater over which a clearance is granted is not in substantial competition with the licensed theater. If the theaters are in substantial competition, the clearances at issue would not violate public policy; if the theaters are not in substantial competition, **[*9]** the clearances might well violate public policy. In the landmark antitrust decision United States v. Paramount, 334 U.S. 131, 92 L. Ed. 1260, 68 S. Ct. 915 (1948), ***HN10***[] the Supreme Court held that "there should be no clearance between theaters not in substantial competition." Id. at 146. In Theee Movies of Tarzana v. Pacific Theatres, 828 F.2d 1395 (9th Cir. 1987), the Ninth Circuit elaborated on the reasoning behind Paramount. The court explained that clearances between theaters in substantial competition are pro-competitive. This is because theaters that are denied a licence to a certain movie will show alternative movies, thus providing consumers more movies to choose among and encouraging competition among movies for box office dollars. Id. at 1399-1401. Nothing in Paramount or Theee Movies, however, suggests that a clearance between theaters not in substantial competition would be consistent with the antitrust laws or with public policy in general.

There are genuine issues of material fact whether the York Square and the Showcases serve substantially the same geographic market and whether they are in substantial competition. Broadway **[*10]** presents evidence that the York Square services, at least in part, a discrete urban population. Spodick deposition, Defs.' Ex. 2 at 76.17-77.11, Pl.'s Ex. 12. Much of that population does not drive. Koch Declaration, Pl.'s Ex. 25. Because public transportation to suburban theaters is sparse and inconvenient, Broadway argues that a significant portion of New Haven's population has no access to first-run films that play only in suburban New Haven theaters. Id. Additionally, because New Haven's urban center contains a high proportion of racial minorities, senior citizens, students and individuals with disabilities, Broadway alleges that the Distributors' practice disadvantages these populations. Id.,

[2] The record does not suggest that the Distributors prefer clearances over the York Square, but rather that clearances are a required condition of the Showcases' bids to license certain movies available through the Distributors; the Distributors apparently acquiesce to the Showcases' demands for clearances. These circumstances certainly affect the degree of unfairness of Distributors' actions, but do not eliminate the possibility of CUTPA liability against the present defendants.

Pl.s Ex. 17. In contrast, the Distributors' offer evidence that the theaters service the same population. Hoover Declaration (the York Square and Showcase North Haven are 6.8 miles apart). [3] Based on the evidence presented in connection with the motion for summary judgment, a genuine issue of material of fact exists regarding whether or not Broadway and the Showcases are in substantial competition, whether they service substantially the same geographic market and, consequently, **[*11]** whether the practice of granting clearances over the York Square offends public policy. [4] Resolution of these issues may require expert testimony and certainly will require a more fully developed factual record than the one now before the court.

[*12] In addition, ***HN11***[] antitrust laws and CUTPA outlaw different types of conduct. A practice may be violative of an "established concept of unfairness" even if it is not violative of any statute or the common law. Thus, the fact that a practice is not outlawed by the antitrust laws does not necessarily preclude that practice from CUTPA's reach as otherwise "unfair." See *Sorisio v. Lenox, Inc., 701 F. Supp. 950, 963 (D. Conn.)*, *aff'd*, *863 F.2d 195 (2d Cir. 1988)* (plaintiff's claim of a violation of public policy failed because ***antitrust law*** had not been violated and defendant's conduct was not otherwise unfair); 1 CUTPA Treatise 23 ("There may be some instances in which CUPTA could be a significant addition to ***antitrust law***."). The fundamental purpose of antitrust laws is to protect competition, *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)* ("The antitrust laws, however, were enacted for the protection of *competition*, not *competitors*.") (internal quotation omitted), while the purpose of CUTPA is to protect consumers, competitors and businesses. See *Salmon Bros. Realty Corp. v. Yost, 2001 Conn. Super. LEXIS 2777, 2001 WL 1232054* ***[*13]*** *at *2 (Conn. Super. Sept. 26, 2001)* ("purpose of CUTPA is to protect… competitors and other business people from unfair competition") (citing *Larsen Chelsey Realty Co. v. Larsen, 232 Conn. 480, 496-98, 656 A.2d 1009 (1995))*. Thus, ***HN12***[] an antitrust claim will fail if the plaintiff can show only harm to a competitor, while that harm would be sufficient to sustain a CUTPA claim if the other elements of CUTPA have been met.

The Distributors also contend that Broadway's CUTPA claim must fail because there is no substantial injury to consumers, competitors or other businesses. See *Sporty's Farm, 202 F.3d at 501*. The record before the court contains evidence from which a jury could conclude that the Distributors' use of clearances causes substantial injury within the scope of CUTPA. If the York Square and the Showcases have different primary markets, then the challenged use of clearances may injure consumers by denying a specific population access to many first-run movies. Furthermore, the practice may unfairly disadvantage the York Square, vis-a-vis its competitors, as well as other businesses. Broadway offers evidence that, when viewed in Broadway's **[*14]** favor, indicates that the Distributors use clearances to harm independent or small theaters. For example, while the Distributors provide the Showcases clearances over the York Square and the only other independently owned movie theater in New Haven County, they do not grant clearances over competing, chain-owned movie theaters in Connecticut. In Westbrook and Old Saybrook, the Distributors license the same, first-run movies simultaneously to two, nationally owned multiplexes within six miles of one another. Pl.'s Ex. 8. In Branford, the Distributors had traditionally granted the Showcases clearances over a local, independently owned theater. When the locally owned Branford theater closed and was replaced with a nationally owned Hoyts theater, the Distributors ended their practice of granting the Showcases clearance over Branford. Spodick deposition, Defs.' Ex. 2 at 286.12-24. A jury could find that, although the Distributors are willing to license films at the same time to the New Haven suburban Showcases and Hoyt theaters, they persist in granting clearances over the York Square. A jury could also find that the Distributors' use of

[3] Plaintiff's exhibits are numbered according to the tab number they appear after in Plaintiff's Exhibits and Declarations in Opposition to Defendants' Motion for Summary Judgment. At times these numbers differ from the number listed for the same exhibit in Plaintiff's Memorandum in Opposition to Defendants' Motion for Summary Judgment.

[4] The Distributors cite evidence that both the York Square and the Showcases advertise in the New Haven Register newspaper as support for the proposition that the cinemas draw from the same, greater New Haven market. The Register also includes listings for movie theaters throughout Connecticut and carries ads for movie theaters in Fairfield County. Additionally, both the Showcases and the York Square list show times in the Connecticut Post, a newspaper with a readership drawn primarily from Fairfield County. Evidence of ad placement in the same Connecticut papers provides little, if any, support for the Distributors' contentions that the York Square and Showcases serve the same geographic market and that they are in substantial competition.

clearances is an unfair practice aimed at promoting **[*15]** large, nationalchain movie theaters over smaller or independently owned theaters, regardless of whether the independent theater is in substantial competition with the national theater and regardless of whether the independent theater can provide the Distributors revenues equivalent to the national multiplexes. Thus, a genuine issue of material fact remains whether the challenged business practice causes injury to consumers, competitors and/or other businesses.

Additionally the Distributors argue that the challenged clearances cannot violate CUTPA because the practice is not immoral, unethical, oppressive, unscrupulous or deceptive. As discussed above, a business practice can be an unfair or deceptive practice under CUTPA based on the degree it meets any or all of the following criteria: (1) it offends public policy; (2) is immoral, unethical, oppressive or unscrupulous; (3) it causes substantial injury to consumers, competitors or other businesses. Id. Consequently, even if the Distributors' practices are not immoral, unethical, oppressive, unscrupulous or deceptive, summary judgment must be denied because a genuine issue of material fact exists regarding whether, under the **[*16]** circumstances of this case, the challenged practices are unfair, offend public policy, and/or cause substantial injury to consumers, competitors and/or other businesses.

Copyright Preemption

The Distributors argue that, even if Broadway can sufficiently satisfy all of the elements of CUTPA, the claim should be dismissed because it is preempted by federal copyright law. Most of the precedent cited by the Distributors involves the dismissal of redundant state law claims in cases where the plaintiff brought federal copyright claims and state law claims based on the same facts. [5] Those cases have no relevance to the case at hand, in which plaintiff has not, and could not, allege a copyright violation.

[*17] The Distributors do cite one related, though distinguishable, case, *Orson Inc. v. Miramax Film Corp., 189 F.3d 377 (3d Cir. 1999)*. In Orson the Third Circuit, sitting en banc, reviewed the Pennsylvania Feature Motion Picture Fair Business Practices Law. That Pennsylvania statute contained a number of restrictions on motion picture licensing, including a prohibition on blind bidding and a ban on the use of minimum guarantees. [6] The court upheld the vast majority of the Pennsylvania law. The panel, however, ruled that the Copyright Act preempted a provision prohibiting a licensing agreement, "which grants an exclusive first-run for more than 42 days without providing for expansion in the same geographical area." *Id. at 381*. The court reasoned that the provision interfered with a copyright owner's right to refuse to license to a given party, because in order to license at anyone after the initial 42 days, the distributor had to license to a second, competing party. *Id. 385-86*.

[*18] Broadway's CUTPA claim does not interfere with the Distributors' copyright rights to distribute to whom they choose. Broadway challenges the Distributors' use of clearances in the New Haven vicinity as unfair. If Broadway were to succeed on its claim and the Distributors were enjoined from including clearances over the York Square in license agreements with the Showcases, the Distributors would still have the right to distribute and license only to parties of their choosing. Even without clearances, were Broadway and a distributor unable to reach a mutually satisfactory licensing arrangement on a given film, neither party would be required to enter into such an arrangement. As the court noted in Orson,

> ***HN13***[] The right to transfer or license copyrighted material for use by others under … the Copyright Act has never encompassed a right to transfer the work at all times and at all places free and clear of all regulations; it has meant that the copyright owner has the *exclusive right* to transfer the material for a consideration to others.

---

[5] The Distributors cite, *inter allia*, *Computer Assocs. Int'l v. Altai, Inc., 982 F.2d 693, 716 (2d Cir. 1992)*; *Harper & Row, Publishers v. Nation Enters., 723 F.2d 195, 200 (2d Cir. 1983)*; ***Titan Sports v. Turner Broadcasting Systems, 981 F. Supp. 65, 69 (D. Conn. 1997)***.

[6] In blind bidding a distributor licenses a film "prior to its completion and without offering exhibitors a chance to trade screen the final product." *Orson, at 384*. Minimum guarantees are the minimum return an exhibitor agrees to pay a distributor, regardless of what the film grosses.

Id. at 386 (emphasis in original) (quoting *Warner Bros. v. Wilkinson, 533 F. Supp. 105 (D. Utah 1981)).* **[*19]**

HN14[] The Copyright Act does not prohibit regulation of unfair competition, even if the competition touches upon copyrighted material. See 1 CUTPA Treatise 81. Indeed, the federal Copyright Act preempts any state law creating "rights that are equivalent to any of the exclusive rights within the general scope of copyright." *17 U.S.C. § 301(a)*. CUTPA does not create rights equivalent to those established by the Copyright Act. Nor would restraining the granting of clearances requested by a competing theater necessarily interfere with the right to license a copyrighted work. Accordingly, the Distributors' preemption argument fails.

Statute of Limitations

Connecticut General Statutes section 42-110g(f) ***HN15***[] provides that a CUTPA action "may not be brought more than three years after the occurrence of a violation." The Distributors contend that Broadway's claim is barred by the statute of limitations because the Distributors have granted clearances over the York Square for decades and Broadway has had notice of this practice since the beginning. Broadway counters that each license is a separate contract that starts the statute anew. **[*20]** Consequently, Broadway bases its claim only on those licenses entered into during the statutory period. Pl.'s Opposition to Summary Judgment at 14.

Broadway's reasoning comports with this District's holding in *Duprey v. Connecticut DMV, 191 F.R.D. 329, 342 (D. Conn. 2000)*. In Duprey, a group of handicapped citizens brought an action under the *Americans with Disabilities Act* against the Connecticut Department of Motor Vehicles for charging a fee on handicap parking permits, a practice that had been going on for much longer than the three-year statutory period. The court concluded that each time the Department of Motor Vehicles charged plaintiffs for a handicapped parking permit "there was a separate violation of the ADA, which started the running of the statute of limitations."*Id*. A similar result is appropriate in this case. Because each license constituted a discrete alleged CUTPA violation, Broadway's claims based on license agreements entered into within the three years prior to the filing of the complaint are not time barred. To conclude otherwise would insulate standardized or repeated unfair trade practices from challenge once they had been instituted **[*21]** for three years. Such a result would run counter to CUTPA's broad mandate to eliminate "unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." *Conn. Gen. Stat. § 42-110b*. Because of the statute of limitations, however, Broadway's potential damages are limited to harm suffered as a result of actions taken by the Distributors within the three-year statutory period.

CONCLUSION

For the forgoing reasons, Defendants' Motion For Summary Judgment [Doc. # 33] is DENIED. It is so ordered.

Dated at Bridgeport this 19th day of September 2002.

HN1[] **Summary Judgment, Burdens of Proof**

Fed. R. Civ. P. 12(b) requires that if the district court wishes to consider material outside the pleadings in ruling on a motion to dismiss, it must treat the motion as one for summary judgment and provide each party notice and an opportunity to submit affidavits or other additional forms of proof. This requirement of a reasonable opportunity to respond is mandatory, not discretionary.

Constitutional Law > The Judiciary > Case or Controversy > General Overview

HN5[] **Justiciability, Case & Controversy Requirements**

While the Clayton Act permits civil suits by any person who shall be injured in his business or property, *15 U.S.C.S. § 4*, courts have long acknowledged that not every person, however tangentially injured by an antitrust violator, may recover treble damages. Numerous doctrines have arisen to clarify the circumstances under which a particular person may recover from an antitrust violator. At times these doctrines are rather incautiously lumped together under the umbrella term of "antitrust standing." However, the United States Supreme Court has generally been careful to limit the actual question of standing to the simple inquiry of whether a plaintiff has suffered a redressable injury in fact, entitling the federal courts to hear such a "case or controversy" under U.S. Const. art. III.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN6[] **Standing, Sherman Act**

The Sherman Act has additional rules beyond U.S. Const. art. III requirements for determining whether the plaintiff is the proper party to bring a private antitrust action. For example, the injury must be an "antitrust injury" caused by anti-competitive behavior as opposed to mere economic loss. Two other limitations on which parties may bring suit for antitrust violations are the proximate cause requirements of AGC, and the direct purchaser rule of Illinois Brick.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN7[] **Purchasers, Direct Purchasers**

Illinois Brick holds that the direct purchaser from the alleged antitrust violator(s) is the one with the right of action; those further removed from the illegal arrangement may not (under the federal antitrust laws, at least) bring their own actions.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Futures

HN8[] **Private Actions, Standing**

Different injuries in distinct markets may be inflicted by a single antitrust conspiracy, and thus differently situated plaintiffs might be able to raise claims. The United States Supreme Court has been willing to entertain suits between plaintiffs and defendants not in privity with each other.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN9[] **Private Actions, Standing**

In the context of a market manipulation scheme, damages inflicted on the physical commodity market are not derivative of injuries in the futures market. The harms incurred in the physical market during a market manipulation are not secondary consequences arising from an injury to a third party. Instead, they form a separate and compensable injury.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN10[] **Private Actions, Standing**

The antitrust laws create a system that, to the extent possible, permits recovery in rough proportion to the actual harm a defendant's unlawful conduct causes in the market without complex damage apportionment. This scheme at times favors plaintiffs and at times defendants, but it never operates entirely to preclude market recovery for an injury.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN11[] **Private Actions, Remedies**

In an antitrust context, a court is required to examine through a case-by-case analysis the link between a plaintiff's harm and a defendant's wrongdoing. The court is to consider a number of factors in this analysis, notably (1) the causal connection between the violation and the harm; (2) the presence of improper motive; (3) the type of injury and whether it was one Congress sought to redress; (4) the directness of the injury; (5) the speculative nature of the damages; and (6) the risk of duplicate recovery or complex damage apportionment.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN12[] **Private Actions, Remedies**

In meeting the AGC direct injury factors on a claim of market manipulation, whether or not the plaintiffs were in some sense original purchasers alone is not enough to establish that their injury flowed directly from the defendants' market manipulations. An injury is still indirect if a plaintiff fails to establish a chain of causation between the harm it has suffered and the defendant's wrongful acts. The directness inquiry further focuses on the presence of more immediate victims of an antitrust violation in a better position to maintain a treble damages action. The existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a more remote party to perform the office of a private attorney general.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN13[] **Private Actions, Remedies**

The court must prevent the duplicate recovery of antitrust injuries wherever possible.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN14[] **Private Actions, Remedies**

While it might be possible for economists to factor out each considerations in a complex damage apportionment for all prior sales involving a subject product in an antitrust analysis, the United States Supreme Court has decreed a simpler solution: simply restrict the right to recover to those who are more directly affected by the defendants' actions.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN15[] **Private Actions, Remedies**

In the context of an antitrust suit, directness of injury relates to the question whether there exists a chain of causation between a defendant's action and a plaintiff's injury or (in contrast) if the connection is based instead only on somewhat vaguely defined links.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

HN16[] **Summary Judgment, Entitlement as Matter of Law**

On review of a summary judgment it is the appellate court's duty to evaluate the evidence in the record.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Futures

HN17[] **Private Actions, Remedies**

Case law has never required that the cash and futures prices be identical to support recovery in a market manipulation antitrust case.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN18[] **Private Actions, Remedies**

In the context of a market manipulation antitrust case, an injury is where it depends upon a complicated series of market interactions, including the actions and pricing decisions of refiners, fabricators, dealers, speculators, and consumers of copper. Conjectural theories of injury and attenuated economic causality are enough to render an injury indirect.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN19[] **Private Actions, Remedies**

In a market manipulation antitrust suit, a party cannot recover when others more directly injured are better able to state a claim.

Torts > ... > Types of Damages > Compensatory Damages > Measurements

Torts > Remedies > Damages > General Overview

Torts > ... > Types of Damages > Compensatory Damages > General Overview

HN20[] **Compensatory Damages, Measurements**

Where the tort itself is of such a nature as to preclude the ascertainment of the amount of damages with certainty it would be a perversion of fundamental principles of justice to deny all relief to the injured person.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN21[] **Private Actions, Remedies**

The mere fact that each individual transaction relevant to an antitrust scheme must be examined on a case-by-case basis to assess damages does not thereby render those damages speculative.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN22[] **Private Actions, Standing**

A cash market participant injured by a party's illegal actions in the futures market may, in some instances, sue that party under the federal antitrust laws. The controlling factors in this inquiry are those set out in AGC.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN23[] **Private Actions, Remedies**

Recovery in an antitrust action should not be denied simply because a plaintiff may not receive damages as high as it would like.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

HN24[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The civil Racketeering and Corrupt Organizations Act was modeled after the Clayton Act. To satisfy its requirement of proximate causation, plaintiffs under these provisions must allege a relation between their injury and the defendants' violation that is neither indirect nor remote.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Pretrial Judgments > Nonsuits > Voluntary Nonsuits

HN25[] **Class Actions, Certification of Classes**

See *Fed. R. Civ. P. 23(c)(4)(A)*.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN26[] **Estoppel, Collateral Estoppel**

To prove that issue preclusion applies, the defendant must establish that (1) the plaintiff was fully represented in the prior litigation, (2) the issues to be precluded are identical to those in the prior litigation, (3) the issues were actually litigated and decided on the merits, and (4) resolution of the issue was necessary to the judgment.

Judges: Before CUDAHY, ROVNER, and DIANE P. WOOD, Circuit Judges.

Opinion by: DIANE P. WOOD

Opinion

[*474] DIANE P. WOOD, *Circuit Judge*. These cases, which we have consolidated for purposes of this opinion, all arise out of an alleged conspiracy in the 1990s to fix the price of copper futures at artificially high levels on the international exchange markets. This market manipulation necessarily and directly inflated the price of the products purchased by the plaintiffs, buyers of copper cathode, copper rod, and scrap copper, who have sued for violations of the Sherman Act, RICO, and various **[*475]** state laws. The district court dismissed the claims of each of the plaintiffs either on the ground that their claims were barred by the indirect purchaser rule of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, or on the ground that their injuries were too remote and speculative under *Associated General Contractors of Cal. Inc. v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* **[**2]** (*AGC)*. We find that *Illinois Brick* presents no obstacle to any of the plaintiffs' claims but that the claims of the scrap copper dealers are precluded under *AGC*. On the other hand, we conclude that the purchasers of copper cathode and rod have suffered a direct and independent injury and are the best situated participants in the physical copper market to bring a lawsuit. We therefore affirm in part, reverse in part, and remand in part for further proceedings.

I

A. The Parties

The production of copper entails a complicated four-step process. First, copper producers extract ore from a copper mine and crush or mill it into a gravel-like substance known as concentrate. Second, smelters separate out the nonferrous metals in the concentrate, producing one meter square plates of anode, which are approximately 90% copper. Next, the anode is refined electrolytically to create sheets of cathode. Finally, the cathode is fed into a furnace at a mill and melted into rod or wire. In the course of manufacturing cathode and rod, scrap copper is also produced, and it too can be sold into the market.

The plaintiffs in these actions are large companies occupying various positions **[**3]** along the copper production chain. The plaintiffs in No. 01-3485, Viacom, Incorporated (a successor to Westinghouse Electric Corporation) and Emerson Electric Company, turn copper cathode into wire for resale to merchants. Each purchased hundreds of millions of pounds of cathode during the relevant time period from integrated producers, who smelt and refine copper from their own mines into cathode.

Ocean View Capital is the plaintiff in Nos. 01-3229 and 01-3230. Until it went out of business in 1996, it was a large Rhode Island-based manufacturer of copper wire and cable. Unlike Viacom and Emerson, Ocean View normally did not purchase cathode; instead, it bought copper that had already been transformed into rod. Some of this rod was manufactured by integrated producers. Ocean View also contracted frequently with semi-fabricators, which own and operate rod mills but do not own mines, concentrators, smelters, or refineries. Instead, semi-fabricators typically purchase cathode from producers or copper traders and fabricate the cathode into rod. On some occasions, Ocean View varied this process by entering into tolling agreements with its semi-fabricators under which it purchased its **[**4]** own cathode from producers or traders and then paid the semi-fabricator to convert it into usable rod.

The plaintiffs in *Loeb Industries v. Sumitomo*, Nos. 00-3979 and 01-1148, are three scrap metal dealers (to whom we refer as the "Scrap Dealers"). Each purchases only scrap copper; none buys either cathode or rod. The scrap is purchased from a variety of sources, including integrated producers and wire manufacturers, and then repackaged and resold.

B. The Copper Market

Despite the fact that copper is sold in a variety of physical forms, the summary judgment record (viewed in the light most **[*476]** favorable to the plaintiffs) indicates that the pricing of copper is consistent throughout the industry. Like many other commodities, copper is traded on commodities exchanges through warrants and futures contracts. Most copper futures are traded on either the London Metals Exchange (LME) or the Commodities Exchange Division of the New York Mercantile Exchange (known familiarly as the "Comex"). When futures contracts mature, they must either be closed out by an offsetting trade or satisfied by deliveries of the underlying physical goods. If a futures trader is short, she must satisfy **[**5]** her obligation under the futures contract by immediately delivering physical copper cathode to an LME or Comex warehouse; if a trader is long, she may similarly call in physical copper cathode from a warehouse. Because of this, the price of physical copper, including cathode, rod, and scrap copper, is directly linked to the LME and Comex price for copper futures, and dealers in all forms of physical copper quote prices based on rigid formulas related to copper cathode futures.

While sales between six plaintiffs and numerous other copper industry participants are involved, we will illustrate this linkage by discussing only the relationship between one of the plaintiffs, Viacom, and the largest integrated producer, Asarco. Viacom entered into yearly supply contracts with Asarco, copies of which are included in the record. In these contracts, the price Viacom paid Asarco for cathode was made up of two components. First, the base price was set by "the arithmetic average of the COMEX first position settlements for high-grade copper during the calendar month of scheduled shipment." From 1990 to 1996, this price fluctuated from about 75 [cent] /lb to over $ 1.40/lb. Added to the base price **[**6]** was a "cathode premium" that was set on a monthly or quarterly basis. Asarco's premium fluctuated over the relevant time period from 2.75 [cent] /lb to 3.5 [cent] /lb. The record also indicates that when the base price of copper increased, the premium tended to increase as well.

Viacom bought over half a billion pounds of cathode from Asarco. Asarco manufactured most of this cathode, but some had been purchased for resale from other merchants to make up for production shortfalls. Because records of these purchases were not kept, it is impossible to tell whether any particular pound of cathode sold to Viacom was manufactured by Asarco or merely purchased for resale. The defendants concede, however, that some of the cathode in question was being sold into the market for the first time. While there is some dispute as to the exact numbers, taking the evidence in the light most favorable to Viacom, Asarco sold it 510 million pounds of cathode over the relevant period. During this same time frame, Asarco refined 6.4 billion pounds of cathode and purchased 153 million pounds from third parties. Therefore, even if one assumed that every scrap of Asarco's previously sold cathode was shipped **[**7]** to Viacom (instead of to one of its many other customers), Viacom still purchased 357 million pounds of never-before-purchased cathode. Viacom seeks damages in this suit only for cathode that was sold to it for the first time by its integrated producers.

Asarco also purchased raw materials, such as concentrate and anode, to supplement its own production and keep its smelters and refineries running at full capacity. At least 27 million pounds of the cathode Asarco shipped to Viacom consisted entirely of Asarco raw materials, but the rest may well contain some percentage of previously purchased materials. While raw materials are often priced in reference to Comex prices, only cathode is actually traded on the exchange. Raw material prices also incorporate significant and **[*477]** widely varying discounts based on both the cost of converting the materials into cathode and current refining and smelting capacity. Furthermore, the defendants' experts testified that while the prices of raw materials "may be indirectly affected by the manipulations," a squeeze or corner on cathode could not directly harm the purchasers of pre-cathode raw materials.

The pricing of rod and scrap are similar except **[**8]** that each contains further premiums and discounts off the cathode futures price to reflect a variety of additional costs. Rod pricing contains an additional rod or shaping premium. Scrap copper prices are affected by not only the price of cathode but also freight costs, sizing, sorting, packaging, and purity requirements.

Some of Viacom's suppliers and customers engaged in strategic hedging by purchasing "put" options on the futures markets. A put option holder has the right, but not the obligation, to sell a futures contract at an established "strike" price. If the market price is higher than the strike price (because, for example, the price has been artificially raised), the holder's option will expire and its only cost will be the price of the option. Asarco purchased put options to hedge its output, but it did not hedge against specific transactions, by, for example, purchasing a futures contract for each sale made to Viacom. Its hedging activities were also limited to a fraction of its supply. One of Viacom's suppliers, Kennecott, did not hedge at all, and Viacom itself never hedged its copper purchases.

C. The Conspiracy

Defendant Sumitomo Corporation is a Japanese trading **[**9]** corporation that attempted to fix and maintain the price of copper at artificially high levels from September 1993 to June 1996, all with an eye to enriching itself in its capacity as a seller of physical copper. Through a series of transactions with defendant Global Minerals and Metals Corporation, a copper merchant, it hoarded vast supplies of physical copper for the purpose of restricting supply, and it entered into paper transactions in order to show a false increased demand for the metal. In particular, Sumitomo established sham long-term contracts that purportedly required it to purchase vast quantities of copper from Global on a monthly basis over a period of three years. These sham contracts enabled Sumitomo publicly to justify its accumulation of excessive copper forward positions as a hedge. By June 1995, Sumitomo held approximately ten percent of the entire long position in Comex copper futures.

At that time, Sumitomo began to call in shorts to raise copper demand to inflated levels and to reap the profits from its sales. When these contracts came due, short futures traders were forced to cover their positions by acquiring physical copper at inflated prices, because no **[**10]** new copper was entering the warehouses thanks to Sumitomo's actions. These manipulations caused the price of primary copper to rise more than 50% over a two-year period. In June 1996, the scheme was uncovered, and the trading price for copper dropped by a third almost over-night. The prices of physical copper cathode, rod, and scrap crashed comparably.

In 1998, the United States Commodities and Futures Trading Commission (CFTC) determined that Sumitomo had violated the Commodity Exchange Act by raising and fixing the price of copper futures and reached a settlement with the company that required it to pay a $ 150 million fine. That finding has spawned a number of antitrust suits against the defendants, including class action lawsuits on behalf of those who traded copper futures and on behalf of certain purchasers of primary **[*478]** copper. Sumitomo settled its suit with the futures traders for approximately $ 134 million. The defendants have also settled a California state court class action brought under various state antitrust laws. Many of the plaintiffs' sellers, including Asarco, participated in the lawsuit and received 0.15 cents per dollar of copper purchased.

II. Proceedings in [11] the District Court**

These lawsuits were all consolidated in the Western District of Wisconsin by the Judicial Panel on Multidistrict Litigation. The defendants include not only Sumitomo and Global, but also alleged co-conspirators Credit Lyonnais Rouse, Ltd. (CLR), and J.P. Morgan and Morgan Guaranty Trust (which have since merged to form JPMorgan Chase & Co. and to whom we refer collectively as JPMorgan Chase). The plaintiffs in each case sought damages for the allegedly inflated overcharge in the price of the copper products they had purchased, which was caused by Sumitomo's actions. The Scrap Dealers also sought certification of a class under *FED. R. CIV. P. 23* consisting of all metals dealers who purchased any form of physical copper in commercial quantities between 1994 and 1996. The defendants moved to dismiss each of the actions.

The district court first denied the motion to dismiss Ocean View's complaint on May 9, 2000. *In re Copper Antitrust Litig., 98 F. Supp. 2d 1039 (W.D. Wis. 2000)*. The district court found that if the facts alleged in the complaint were true, Ocean View was a proper party to sue under the principles espoused by this court in *Sanner v. Board of Trade, 62 F.3d 918 (7th Cir. 1995)*. **[**12]** The court also denied a motion to dismiss Viacom's complaint on similar grounds. It allowed both cases to proceed, but limited discovery to the issue of standing.

The court next examined the claim of the Scrap Dealers. It denied their motion for class certification, fundamentally because it concluded that the proposed named plaintiffs could not sue, either for their own injuries or for those of others similarly situated, because they fell within the ban on indirect purchaser suits established by *Illinois Brick, 431 U.S. at 720*. The court decided in addition that the proposed class would be unmanageable, because it would be impossible to ascertain class membership. It then turned to the defendants' 12(b)(6) motion to dismiss. The court found that the Scrap Dealers' bare-bones allegations were sufficient to state a claim, but that in light of deposition testimony and other facts adduced during litigation of the *class certification* question, it would nonetheless grant the motion based once again on the perceived *Illinois Brick* flaw. The court did not, in so ruling, follow the command of *Rule 12(b)(6)* to convert the motion to dismiss into a motion for summary **[**13]** judgment under Rule 56, despite its reliance on matters outside the complaint. The court also dismissed the Scrap Dealers' RICO allegations on the same grounds.

Soon thereafter the district court granted JPMorgan Chase's motion to dismiss all claims that the Scrap Dealers had brought against it on the ground that the plaintiffs were subject to offensive issue preclusion on the pivotal question of their status as indirect purchasers.

After discovery closed in the remaining cases, the defendants filed for summary judgment. On July 23, 2001, the district court granted summary judgment to all of the defendants on Ocean View's claims, finding that Ocean View had no right to sue under the antitrust laws both because it was an indirect purchaser (*Illinois Brick*) and because its injuries were too remote (*AGC)*.

[*479] A month later, the district court granted summary judgment to Global and CLR on Viacom's claim. In contrast to its conclusions in *Loeb* and *Ocean View*, the court here rejected the argument that the claim was barred by *Illinois Brick*. Instead, it applied the factors set forth in *AGC* and determined that a manipulation of the futures market would have effects too **[**14]** "subtle and complex" to warrant recovery for these cathode purchasers. The district court primarily relied on the following factors: (1) the huge number of exchange-based pricing formulas available on Comex; (2) the various premiums and discounts available in the industry; (3) potential duplication of recovery due to purchases of cathode and raw materials by the integrated producers who sold to Viacom; (4) potential duplication of recovery due to hedging; and (5) the complexity of the damages calculation. For similar reasons, the district court also granted summary judgment to the defendants on Viacom's RICO claims. With the federal claims gone, it finally dismissed Viacom's state law claims without prejudice.

III. Use of *Rule 12(b)(6)*

Before turning to the important antitrust issues underlying all of these appeals, we must deal with an issue of federal civil procedure unique to the appeal of the Scrap Dealers. They argue that the district court committed reversible error by relying on outside materials in evaluating the motion to dismiss without giving them notice and an opportunity to submit additional materials. As they correctly point out, ***HN1***[] *Rule 12(b)* requires that if the **[**15]** district court wishes to consider material outside the pleadings in ruling on a motion to dismiss, it must treat the motion as one for summary judgment and provide each party notice and an opportunity to submit affidavits or other additional forms of proof. *Fleischfresser v. Directors of School Dist. 200, 15 F.3d 680, 684 (7th Cir. 1994)*. This requirement of a reasonable opportunity to respond is mandatory, not discretionary. *Edward Gray Corp. v. National Union Fire Ins. Co., 94 F.3d 363, 366 (7th Cir. 1996)*.

In this case, the district court stated that, considering only the bare pleadings, it would find that the Scrap Dealers had stated a claim. Notwithstanding this conclusion, relying on the materials and affidavits produced for the earlier class certification hearing, it instead granted the defendants' motion dismissing the case. We agree with the Scrap Dealers that this was error, and that the district court should have given them notice of its intentions and an opportunity to respond and produce additional facts going beyond whatever might have been appropriate for class certification purposes.

The question, however, is what the consequence **[**16]** of this error should be. The Scrap Dealers assume that reversal should be automatic, but this position overlooks the command of ***HN2***[] *28 U.S.C. § 2111*, which directs appellate courts to apply the harmless error rule to anything that does not affect the "substantial rights of the parties." We are not aware of any case that holds that the command of *Rule 12(b)(6)* to convert a motion to dismiss into a summary judgment motion is somehow exempt from *§ 2111*. The question for us is therefore whether the district court's error affected the Scrap Dealers' substantial rights.

To answer that question, we must consider whether the Scrap Dealers have shown us any evidence raising a question of material fact that they would have submitted to the district court had they been given proper notice of the *de facto* conversion. *Burick v. Edward Rose & Sons, 18 F.3d 514, 516 (7th Cir. 1994)*. If **[*480]** there are no potential disputed material issues of fact, then the court's reliance on materials outside the pleadings is not by itself ground for reversal despite the failure to follow appropriate procedures. *Ribando v. United Airlines, Inc., 200 F.3d 507, 510 (7th Cir. 1999)*. **[**17]** Here, the dispute over whether the Scrap Dealers were proper plaintiffs to sue under the antitrust laws was a hard-fought issue in the class certification hearings, and the Scrap Dealers devoted substantial portions of both their reply brief and supplemental brief to the issue. Furthermore, the district court provided an after-the-fact opportunity to the Scrap Dealers to bring additional materials to its attention in the subsequent litigation against JPMorgan Chase. See *Edward Gray Corp., 94 F.3d at 366* (reversing where plaintiff had no opportunity to submit materials that did create a factual dispute). In light of these facts, we are confident that the Scrap Dealers had a full opportunity to bring all material factual disputes to the court's attention. Therefore, we will review dismissal of all of these actions, as ***HN3***[] we would any other ruling on summary judgment, drawing all disputed or potentially disputed factual inferences in favor of the plaintiffs and deciding *de novo* whether the defendants were entitled to judgment on the law. *Simmons v. Chicago Bd. of Educ., 289 F.3d 488, 491 (7th Cir. 2002)*.

The Scrap Dealers also contend as a threshold **[**18]** matter that the district court's reliance on materials submitted for the class certification hearing to rule against them on summary judgment violates the dictates of *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 40 L. Ed. 2d 732, 94 S. Ct. 2140 (1974)*. This over-reads *Eisen*, in our opinion. *Eisen* merely indicates that ***HN4***[] a court may not refuse to certify a class on the ground that it thinks the class will eventually lose on the merits. *Id. at 177-78*; see also *Szabo v. Bridgeport Mach., Inc., 249 F.3d 672, 677 (7th Cir. 2001)*. It says nothing about whether courts may use evidence produced at a prior class certification hearing for other purposes, including for a decision on summary judgment. We see no reason why these affidavits should be treated any differently from other parts of the record which may be considered in later rulings. See *Kochlacs v. Local Bd. No. 92, 476 F.2d 557, 558 n. 1 (7th Cir. 1973)*. We may therefore rely on the materials and affidavits submitted at the class certification hearing in determining whether the district court's decision to grant the defendants' motion in the Scrap Dealers' **[**19]** action was correct.

IV. *Illinois Brick*

HN5[] While the Clayton Act permits civil suits by "any person who shall be injured in his business or property," *15 U.S.C. § 4*, courts have long acknowledged that not every person, however tangentially injured by an antitrust violator, may recover treble damages. *Blue Shield of Va. v. McCready, 457 U.S. 465, 477, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*. Numerous doctrines have arisen to clarify the circumstances under which a particular person may recover from an antitrust violator. At times these doctrines are rather incautiously lumped together under the umbrella term of "antitrust standing." However, the Supreme Court has generally been careful to limit the actual question of standing to the simple inquiry of whether a plaintiff has suffered a redressable injury in fact, entitling the federal courts to hear such a "case or controversy" under Article III. See *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 119 L. Ed. 2d 351, 112 S. Ct. 2130 (1992)*. There is no dispute that the plaintiffs in these cases have been injured by paying an inflated price for copper; their Article III **[**20]** standing is **[*481]** therefore secure. The difficult question is statutory, because ***HN6***[] the Sherman Act has additional rules for determining "whether the plaintiff is the proper party to bring a private antitrust action." *AGC, 459 U.S. at 535 n. 31*. For example, the injury must be an "antitrust injury" caused by anti-competitive behavior as opposed to mere economic loss. *Brunswick v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 487-89, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. Two other limitations on which parties may bring suit for antitrust violations are central here: the proximate cause requirements of *AGC, 459 U.S. at 544-45*, and the direct purchaser rule of *Illinois Brick, 431 U.S. at 729-30*.

HN7[] *Illinois Brick* holds that the direct purchaser from the alleged antitrust violator(s) is the one with the right of action; those further removed from the illegal arrangement may not (under the federal antitrust laws, at least) bring their own actions. *431 U.S. at 729*. In *Illinois Brick* itself, the defendants were companies who sold bricks to masonry contractors at allegedly inflated prices. The contractors in turn **[**21]** allegedly "passed on" those overcharges to the plaintiffs who purchased their constructed buildings. *Id. at 726*. In an earlier decision, *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, the Supreme Court had decided that defendants could not escape liability on the ground that the plaintiff had passed on the anticompetitive overcharge. By parity of reasoning, the Court decided in *Illinois Brick* that the persons authorized to sue under the antitrust laws in this type of case were the direct purchasers. Hence, the contractors were permitted to sue and recover in full for the price inflation, including any "pass-on."

Illinois Brick does not stand for the proposition, as the defendants would seem to have it, that a defendant cannot be sued under the antitrust laws by any plaintiff to whom it does not sell (or from whom it does not purchase). Such a rule would eliminate in one fell swoop all competitor suits based on exclusionary practices - a step that some antitrust theorists have urged, but a step that the Supreme Court has never taken. To the contrary, the Court has made it clear that **[**22]** it does not read *Illinois Brick* so broadly. For instance, the plaintiff in *McCready*, who purchased the defendant's health services from her employer, alleged that a conspiracy between the defendant and psychiatrists increased her costs for visiting a psychologist. *457 U.S. at 468-70*. The defendant contended that after *Illinois Brick* only the employer who purchased the health plan should be permitted to sue, but the Court disagreed. It held that the chain-of-distribution inquiry in *Illinois Brick* was meant only to preclude duplicate recovery. While the employer might have suffered some economic injury (through, for example, paying higher wages to attract skilled workers in order to compensate for the illegally inferior benefits), its harm was distinct from the plaintiff's injury, her own out-of-pocket payments for psychological services. *Id. at 475*.

While it is not identical to this case, *McCready* is helpful insofar as it recognizes that ***HN8***[] different injuries in distinct markets may be inflicted by a single antitrust conspiracy, and thus that differently situated plaintiffs might be able to raise claims. The injuries suffered by the copper **[**23]** traders who purchased inflated futures contracts from the defendants are distinct from any harm inflicted on Viacom when it paid inflated cash prices for cathode, or on Ocean View, to the extent it purchased **[*482]** copper rod from integrated producers. Other cases also demonstrate that the Supreme Court has been willing to entertain suits between plaintiffs and defendants not in privity with each other. *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)* (plastic conduit manufacturer suing competitor steel conduit manufacturer); *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)* (university suing association that prohibited it from entering a television contract); *Klor's Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959)* (store suing competitor over refusal to deal).

The reason the plaintiffs' suit in *Illinois Brick* failed was not because the defendants did *not* sell to them. Rather, it was because the defendants *did* sell to a third party who (after *Hanover Shoe*) could **[**24]** recover for any injury they claimed. The same paradigm applies in all of the cases cited by the defendants: Party A, the antitrust violator, sells to Party B, and then Party C, a down-stream purchaser from B, seeks to recover the implicit overcharges that B passed on to C. See, *e.g., Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 207, 111 L. Ed. 2d 169, 110 S. Ct. 2807 (1990)* (public utilities but not residential customers to whom they sell may sue natural gas companies); *In re Brand Name Prescription Drugs Antitrust Litig., 123 F.3d 599, 606 (7th Cir. 1997)* (drug wholesalers but not retail pharmacies to whom they sell may recover from manufacturers); *McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 852-54 (3d Cir. 1996)* (attorneys may recover overcharges for copies, but the clients to whom they offer services may not); *In re Beef Indus. Antitrust Litig., 710 F.2d 216, 218 (5th Cir. 1983)* (packers who sell to grocers may recover for their unlawful conduct but feeders who sell to packers may not).

Here, in contrast, the plaintiffs are not indirect purchasers along a supply chain. As far as the plaintiffs' claims **[**25]** are concerned, Global, CLR, and Sumitomo did not sell cathode to integrated producers who in turn sold to any of the plaintiffs. Instead, the alleged conspiracy operated in the separate but related futures market, through which it sought directly to manipulate the price of copper the plaintiffs were buying. (It is true that Sumitomo Corporation made some sales of cathode, primarily overseas, to reap the benefit of its illegal futures market scheme. None of the plaintiffs, however, is seeking recovery on the basis of any of these cash market sales; all rest solely on the manipulation of sales of futures contracts. *Sanner v. Board of Trade, 62 F.3d 918, 929 (7th Cir. 1995)*, discussed below, recognizes such a theory, and we see no reason why the mere existence of separate independent physical transactions should in any way change the analysis.)

The defendants repeatedly urge that the availability of recovery for copper futures traders who bought and sold from the defendants in that market should bar recovery for any plaintiff in the cash market. But this kind of an absolutist approach is ruled out by *Sanner*, which recognized at least one situation in which the futures **[**26]** market and physical market must be evaluated separately. The serious question here is whether these plaintiffs have presented another such instance.

In *Sanner*, a group of soybean farmers sued the Chicago Board of Trade alleging that the Board conspired with several individuals artificially to lower the price of soybean futures. The farmers suffered damages when they were forced to sell their soybeans into the cash market at correspondingly low prices. *Id. at 921*. The district court granted a motion to **[*483]** dismiss, finding as a matter of law that the farmers' injuries were indirect because the farmers did not participate in the futures market, that the causal chain between the cash and futures prices was too attenuated, and that damages were too speculative. *Id. at 926*.

This court reversed the dismissal. On the assumption (given the procedural posture of the case) that the farmers' allegations about the relation between the cash and futures markets were true, and that those market prices "tended to move in lockstep," we determined that the farmers had suffered sufficiently direct injuries from the conspiracy to proceed with their case. *Id. at 929-30*. **[**27]** We rejected the proposition that "participants in the futures market were more directly injured," so as to preclude recovery by farmers in the cash market and denied the defendants' claim that we should assume at the motion to dismiss stage that damages would be too speculative. *Id. at 930*. From the perspective of *Illinois Brick*, the *Sanner* court expressly found that ***HN9***[] in the context of a market manipulation scheme, damages inflicted on the physical commodity market were not derivative of injuries in the futures market. Unlike *Illinois Brick*, the harms incurred in the physical market during a market manipulation are not "secondary consequences arising from an injury to a third party." *Id. at 929*. Instead, they form a separate and compensable injury.

The defendants' reading of *Illinois Brick* is inconsistent with *Sanner*. Their claims to the contrary, there is no indication in *Sanner* that the plaintiff soybean farmers were in privity with the Board of Trade, and as a factual matter the assertion is surely wrong. The Board and its members did not sell soybeans to the farmers; like the defendants here they dealt solely with futures **[**28]** contracts. If *Illinois Brick* bars all recovery here, it should have barred recovery in *Sanner* and should also bar recovery in group boycott and other restraint of trade settings.

To put it another way, *Hanover Shoe, Illinois Brick*, and *McCready* make plain that ***HN10***[] the antitrust laws create a system that, to the extent possible, permits recovery in rough proportion to the actual harm a defendant's unlawful conduct causes in the market without complex damage apportionment. This scheme at times favors plaintiffs (*Hanover Shoe*) and at times defendants (*Illinois Brick)*, but it never operates entirely to preclude market recovery for an injury. Applying those principles and the decision in *Sanner* to this case, we conclude that the evidence viewed favorably to the plaintiffs shows that damage from the defendants' conduct was felt in two separate markets: the futures market and the physical copper market. [***] **[*484]** We have identified those who may recover in the futures market and must now turn to the more difficult question of establishing the proper plaintiff in the physical market. The defendants' answer (nobody) is not supported by *Illinois Brick* - or economics or **[**29]** fairness for that matter. Instead, we must be guided in our inquiry by the analytical framework and factors set out in *AGC*.

[**30] V. *Associated General Contractors*

HN11[] *AGC* requires a court to examine through a case-by-case analysis the link between a plaintiff's harm and a defendant's wrongdoing. *459 U.S. at 535-36*. We are to consider a number of factors in this analysis, notably (1) the causal connection between the violation and the harm; (2) the presence of improper motive; (3) the type of

[***] The fact that the defendants were hoping to profit in the physical market, ultimately, through their manipulation of the separate futures market, also has implications for their arguments related to the so-called "umbrella standing" theory. The defendants object to the possibility that they might be held responsible for higher copper prices throughout the physical market, rather than just for the sales they made. If this were an ordinary cartel case, in which cartel members A and B sell to customers X and Y, and then non-cartel member firm C makes sales at or near the enhanced cartel price to customer Z, the question arises whether A and B are liable to Z for the overcharges it paid. See generally, ABA Section of ***Antitrust Law***, 1 Antitrust Developments (Fourth) at 778-79 & n. 128 (1997) (collecting cases on umbrella standing). Here, however, we have a conspiracy to rig prices for the entire physical market, accomplished through manipulation of the Comex futures market. Another possible analogy might be to rigging product standards, which affects everyone who tries to participate in a particular product market. In the latter case, the defendants who manipulated the standards cannot be heard to complain that they should be immune from damages for a product they did not sell. We leave this issue open for further exploration at the district court level, now that we have clarified how the direct purchaser rule and the remoteness doctrine of *AGC* apply here.

injury and whether it was one Congress sought to redress; (4) the directness of the injury; (5) the speculative nature of the damages; and (6) the risk of duplicate recovery or complex damage apportionment. *Id. at 537-45*; *Sanner, 62 F.3d at 927*. The defendants concede only the second factor: they admit that each of the plaintiffs has adduced evidence sufficient to survive summary judgment that they intended artificially to inflate the price of both copper futures and physical copper in order to reap millions of dollars in profits. They contest each of the other points.

The first and third factors are discussed only cursorily by the defendants and can be dealt with adequately in the course of our analysis of the remaining three. For example, the defendants claim **[**31]** that there is no causal connection between their actions and any of the plaintiffs' harms because the plaintiffs' injuries are indirect (the fourth factor), and they argue that Congress had no intention of redressing this sort of injury because it is indirect and speculative (the fifth factor). We therefore devote our attention to the other three factors, considering in the case of each plaintiff whether its injury was indirect and unpredictable, risked duplicate recovery, and would lead to speculative and complex damage apportionment. We begin with the claims of the Scrap Dealers.

A. Scrap Dealers (*Loeb*, Nos. 00-3979, 01-1148)

The Scrap Dealers face problems with all three of the contested *AGC* factors. ***HN12***[] First, whether or not they were in some sense original purchasers of physical copper, that fact alone is not enough to establish that their injury flowed directly from the defendants' market manipulations. An injury is still indirect if a plaintiff fails to establish a chain of causation between the harm it has suffered and the defendant's wrongful acts. *AGC, 459 U.S. at 541*. The directness inquiry further focuses on the presence of more immediate victims **[**32]** of an antitrust violation in a better position to maintain a treble damages action. "The existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a more remote party …to perform the office of a private attorney general." *Id. at 542*.

There are numerous other parties who have suffered more direct injuries at the hands of the defendants than the Scrap Dealers suing here. Among them (though as we explain below not limited to them) are the Comex copper futures traders who **[*485]** have already filed and settled their claims with the defendants. But even in the physical copper market itself, the Scrap Dealers are quintessential examples of indirect victims of antitrust injury. Although the copper distribution chain is exceedingly complex, even in the simplest possible version, an integrated producer such as Asarco will refine copper into cathode and sell it to a manufacturer, such as Viacom, Emerson, or Ocean View. The manufacturer will in turn transform the cathode into some product using copper and sell it down to the retail level. In the **[**33]** process, it may generate unused scrap copper, at which point the Scrap Dealers finally appear on the scene to buy the scrap. It is for these last purchases that the plaintiffs seek to recover damages. But distributors and manufacturers have already entered into monetary transactions involving this same copper, and indeed we are faced in this very case with suits filed by some of those manufacturers. It is apparent that these companies at the least have suffered more direct injuries than the Scrap Dealer plaintiffs. This stands in marked contrast to *Sanner*, where the soybean farmers were clearly the most directly injured participants in the cash market because they were the only cash sellers of soybeans. *Sanner, 62 F.3d at 927*.

The speculative nature of the damages the Scrap Dealers have suffered also supports our conclusion that they cannot maintain this action. See *459 U.S. at 542-43* (denying a claim that rested on an "abstract conception or speculative measure of harm"). The Scrap Dealers' economic experts have stated that they can tie a rise in the price of copper futures directly to price increases for physical copper through econometric analysis. Defendants **[**34]** argue to the contrary that a host of other factors are also at play, destroying the closeness of any link. Even accepting the Scrap Dealers' position on this point, as we must at this stage of the litigation, it is difficult to know whether they have suffered any economic loss at all as a result of the defendants' actions. After all, the Scrap Dealers, middlemen who resell their scrap copper soon after they purchase it, are alleging that the defendants' market manipulations caused the price of copper to increase steadily from 1994 to 1996. Therefore, on most or all the sales the Scrap Dealers made in that time frame, which they contend are inflexibly linked to prevailing Comex prices, they should have made a slight profit because of Sumitomo's actions. Only when the price of copper plummeted in June 1996 would the Scrap Dealers have taken a bath in the resale market. And depending on how much copper the Scrap Dealers had on hand as compared to the number of transactions they made as the price of copper was increasing, it is possible that some of them may have suffered no true economic loss at all. In short, the exact nature of the damages they have suffered is speculative.

The Scrap **[**35]** Dealers attempt to counter this problem by arguing that damages can be set simply by computing the difference between the price of copper that should have prevailed on a given day absent Sumitomo's manipulations and the actual price for every copper transaction. This assertion, however, plunges the Scrap Dealers headlong into conflict with the sixth *AGC* factor, the problems of duplicate damage recovery and complex damage apportionment. The Scrap Dealers argue that they - and all other commercial purchasers of physical copper - should be permitted to recover damages equal to three times the overcharge caused by Sumitomo's scheme for every single sale of copper in the mid-1990s. But this proposition ignores the fact that the same piece of physical copper may be resold many times in a given year as it is refined, distributed, turned into **[*486]** scrap, sold between scrap dealers, re-refined, and sold for scrap again. As mentioned above, every time a scrap dealer resold scrap copper during the two years at issue, it recouped the vast majority of its losses. Since defendants are not permitted to mount any sort of cost recovery defense along these lines, see *Hanover Shoe, 392 U.S. at 491-94*, **[**36]** this would cause the Scrap Dealers to receive a damages award far in excess of any economic loss the defendants caused them. While *Sanner* permitted farmers to recover their soybean losses, it did not let millers, wholesalers, or retailers of soybeans also assert claims. It would be a significant extension of *Sanner* to allow these plaintiffs to sue, and it is one we decline to make.

The Scrap Dealers repeatedly argue that there are no duplicate damages in this case because their pricing decisions are based exclusively on Comex prices rather than a pass-on of historical costs. We fail to see why this fact should lead us to ignore the Supreme Court's ***HN13***[] command to prevent the duplicate recovery of antitrust injuries wherever possible. *AGC, 459 U.S. at 544*; *Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 396 (7th Cir. 1993)*. The Scrap Dealers' contention that absent a pass-on of historical costs their injuries are "separate and distinct" defies economic reality. If a scrap dealer purchased a ton of copper when the Comex price was artificially inflated by $ 400, and the price subsequently rose another $ 200 prior to resale, **[**37]** it has reaped a $ 200 gain, not a $ 400 loss. The Scrap Dealers' own witnesses admitted that there is no pass-on only "if the current Comex price has moved in an adverse direction." Yet the evidence shows that Sumitomo's actions caused the Comex price to rise throughout the period at issue in this case, making us skeptical that the Scrap Dealers have suffered any real loss at all.

The fact that the Scrap Dealers here are further down the chain of copper users than others also will increase the economic complexity of apportioning damages. Even the marketing manager of Loeb admitted that such factors as "freight costs, the sizing, sorting, packaging, purity requirements, length of time it took to get paid, [and] the risk of getting paid" all factored into Loeb's pricing decisions. ***HN14***[] While it might be possible for economists to factor out each of these considerations for all prior sales involving copper, the Supreme Court has decreed a simpler solution: simply restrict the right to recover to those who are more directly affected by the defendants' actions. *UtiliCorp, 497 U.S. at 208-11* (noting policy rationales for denying recovery even to those plaintiffs whose damages **[**38]** could be easily calculated). This description applies fully to the plaintiffs here. Because the Scrap Dealers have suffered an indirect injury causing them at best speculative damages that would lead to a strong possibility of duplicative recovery, we agree with the district court that they may not pursue their claims.

B. *Viacom* and *Emerson* (No. 01-3485)

1.

Many of the successful arguments from *Loeb* are echoed by the defendants in the *Viacom* action, but after a careful review of the record we find that the facts of the latter case compel a different result. The defendants' first argument for denying recovery to Viacom and Emerson (to whom we will refer as "Viacom" except when distinctions between the two companies are important) is that Viacom has shown no evidence of direct and predictable harm stemming from the defendants' conduct. As we stated earlier, ***HN15***[] directness **[*487]** relates to the question whether there exists a chain of causation between a defendant's action and a plaintiff's injury or (in contrast) if the connection is based instead only on "somewhat vaguely defined links." *AGC, 459 U.S. at 540*. Global and CLR, the only defendants remaining **[**39]** in the *Viacom* action after Sumitomo's settlement, begin their attack by pointing out that the prices of copper cathode on the LME and Comex often diverged. We fail to see why this matters. Sumitomo purchased futures on Comex to drive up the price on that particular exchange artificially, and the prices Viacom paid for copper were directly based on Comex prices. The fact that Sumitomo also bought and sold futures on the LME and may have caused additional harms to physical copper purchasers who based their decisions on LME prices has no impact on Viacom's ability to recover under the *AGC* factors.

Next, the defendants rely on the fact that Viacom's purchases included not only a price linked to Comex but "a variety of discounts or premiums that, in response to changes in supply and demand, varied over time and among suppliers." The defendants' experts have opined that, through adjustments of premiums in response to supply and demand factors, the actual impact on the physical copper market of their illegal futures market activities is likely to be indirect and unpredictable.

While all of this might be so as a theoretical matter, ***HN16***[] on summary judgment it is our duty to evaluate the **[**40]** evidence in the record that Viacom presented. And that evidence paints a starkly different picture. Viacom has introduced into the record both its contracts and its suppliers' published premiums. After a careful review of these materials, we are convinced that Viacom has established direct injury. In its contracts, Viacom purchased all but a *de minimis* amount of copper through the two-part formula we described earlier, consisting of (1) a base price equal to the Comex first position copper settlement price, and (2) a cathode premium, negotiated on a monthly or quarterly basis. Over the six years at issue here, the settlement price fluctuated from about 75 [cent] to $ 1.40 per pound. During the same years, the premium ranged from 2.75 to 3.50 [cent] /lb. (Viacom does not seek recovery based on changes in premium prices; the complaint is based only on those caused by variations in the base price.)

The district court ruled that the base price and cathode premium were "inseparable." After a careful review of the record in the light most favorable to the plaintiffs, we are unable to agree with this characterization. All of the contracts specify that the payment price is determined **[**41]** by adding these two separately described components, and the values of both numbers throughout the relevant time period should be available through discovery. The district court also seems to have thought that the premium could in some cases be a discount off the Comex price. There is no evidence to support this; to the contrary, all of the evidence, including defendants' counsels' concession at oral argument, indicates that the premium was always a positive number. While Viacom appears to have been awarded volume and cash payment discounts in some instances, there is no indication that these discounts were tied to market conditions, and the defendants do not focus on such discounts in their briefs. Furthermore, the cathode premium was a small fraction of the Comex price. In fact, the evidence shows that as the Comex price increased, the premium also increased. Thus, there is no possibility that the two components "offset" or that the premium somehow compensated for the defendants' manipulated **[*488]** price inflation. (Even if, counterfactually, the Comex price had for example risen by 65 [cent] and, to compensate, the base price dropped a penny, this could at best represent a mitigation **[**42]** of damages. But this would not make the injury any less direct.) The district court's conclusion on this point, which relied mainly on the testimony of an expert who had not even looked at Viacom's contracts, is both factually mistaken and fails to take the evidence in the light most favorable to Viacom. The presence of a small cathode premium does not negate the fact that the prices of cathode and cathode futures "tend to move in lockstep." Instead, the price reference in Viacom's contracts supports just such lockstep linkage. Our ***HN17***[] case law has never required that the cash and futures prices be identical to support recovery. It is only necessary that the relationship be direct, as it is here. See *Sanner, 62 F.3d at 929*.

Furthermore, the experts note that Comex quotes 24 different exchange prices at any given time and that the defendants' actions could have affected each of those prices differently. Accepting the truth of this statement, we do not see why it compels a finding that Viacom's injury is indirect. According to the record evidence, out of this menu of prices, Viacom used just one (the monthly settlement price) as the basis for all but a minuscule number **[**43]** of its contract purchases, and Emerson used only two. While acknowledging this, the defendants contend that other cathode purchasers could have used different or widely varying systems. Perhaps they did, and if so perhaps they should be found to be improper plaintiffs under the antitrust laws, though that is an issue for another day. But this fact does not weaken the direct causal chain between the defendants' actions and these particular plaintiffs' harm and is no more reason to deny Viacom and Emerson recovery than the fact that some purchasers might have bought cathode at prices not tied to those on either Comex or the LME.

Similarly, we reject the defendants' argument that because a number of Viacom's contracts contained clauses permitting the parties to renegotiate the base price if they believed that Comex prices did not accurately reflect market conditions, Viacom's injuries are somehow remote and indirect. It is undisputed that, because of the success of the defendants' conspiracy, Viacom and its integrated suppliers were never aware of the artificial Comex inflation and so never took advantage of this clause. Instead, Viacom based all of the purchases for which it seeks recovery **[**44]** directly on Comex.

We also believe that, contrary to the defendants' contentions, our holding on this point is entirely consistent with the Second Circuit's decision in *Reading Indus., Inc. v. Kennecott Copper Corp., 631 F.2d 10, 13-14 (2d Cir. 1980)*. There, the plaintiff, a refiner of scrap copper, alleged that the defendant-integrated producers had conspired to keep the price of refined copper low and that this conspiracy injured it by artificially raising the price of scrap. *Id. at 12*. The court found ***HN18***[] the injury indirect because it "depended upon a complicated series of market interactions," including the actions and pricing decisions of refiners, fabricators, dealers, speculators, and consumers of copper. *Id. at 13*. Such "conjectural theories of injury and attenuated economic causality" were enough to render Reading's injury indirect. *Id. at 14*.

Other than the fact that both *Reading* and the present case involve price-fixing conspiracies in the physical copper market, we find little similarity between them. The injury here does not depend on the speculative actions of innumerable market decision makers. **[**45]** It flows instead directly **[*489]** from the contracts between Viacom and its suppliers. It is this contractual linkage, absent in *Reading*, that prevents other market variables from miring a trier of fact here in "intricate efforts to recreate the possible permutations in the causes and effects of a price change." *Id*.

In sum, Viacom's contracts and the other record evidence establish a direct relation between the defendants' illegal scheme and Viacom's harm. The contract price it paid its suppliers for copper was directly and explicitly based on the Comex monthly settlement price, and therefore the defendants' manipulations directly and predictably had an impact on that price. *Amarel v. Connell, 102 F.3d 1494, 1512 (9th Cir. 1997)* (injury direct where price of milled rice directly affected price of paddy rice); *Sanner, 62 F.3d at 929*. Any variations in the cathode premium moved in the same direction as the manipulation and could not have limited or mitigated this harm. For these reasons, Viacom has established the directness element of *AGC*.

2.

We turn next to the district court's other major reason for granting the defendants summary judgment: **[**46]** its belief that opening the door to Viacom's suit would inevitably lead to either duplicate recovery or complex damage apportionment. See *AGC, 459 U.S. at 544*. The court cited at least three manifestations of this problem, all involving Viacom's integrated suppliers, such as Asarco. First, it believed that Viacom's claim would duplicate Asarco's because Asarco could assert claims for its raw material purchases from third parties, and those raw material prices are tied to Comex. Second, because Asarco purchased some cathode from third parties, both it and Viacom would be permitted to recover and duplicate each other's damages. Third, Viacom's claim would duplicate Asarco's because Asarco hedged by purchasing put options on Comex. In addition to those three points, the court noted that Asarco has recovered damages in a California state court class action, and it thought that this too should preclude Viacom from recovering.

We begin with the defendants' claim that Asarco's purchase of raw materials, such as ore, concentrate, blister, and anode, all of which it transformed into cathode, should bar recovery. This does not follow. Practically every product is created through **[**47]** the use of some kind of raw materials, but that fact does not prevent the direct purchaser of the finished product from suing its manufacturer under the antitrust laws, as long as the direct purchaser is not trying to attack a price-fixing arrangement at the raw materials level. The defendants' own experts testified that while raw material prices "may be indirectly affected" by price manipulations, a squeeze or corner on cathode - the only copper product traded on Comex and the LME - would not directly harm purchasers of these raw materials.

Instead, raw material prices vary widely and contain various discounts off the Comex price to account for such factors as the expected cost of conversion into cathode, which in turn varies based on supply, demand, and current refining and smelting capacity. We agree with the broad proposition that ***HN19***[] a party cannot recover when others more directly injured are better able to state a claim. *AGC, 459 U.S. at 544-45*. Indeed, we have just applied this very principle to deny recovery to the Scrap Dealers, who are farther down the chain of resale, even though scrap prices too are tied to Comex. For parallel reasons, raw materials purchasers **[**48]** are also ill-suited to bring an antitrust claim. Permitting both raw materials purchasers **[*490]** and cathode purchasers in the same line of distribution to recover would lead to duplicate damages in violation of the *Illinois Brick* rule. The solution to this problem, however, is not to deny a right to recover to everyone. Such a draconian rule would give a green light to antitrust scofflaws to conspire to fix prices in a particular market and would create incentives to engage in antitrust conspiracies in markets with complicated distribution structures. Instead, the proper course is to recognize only the best of the several potential plaintiffs who otherwise satisfy the requirements for bringing suit under the antitrust laws. Because raw materials prices will vary in comparison to Comex prices much more than will the price of physical cathode, physical cathode purchasers such as Viacom are better situated than raw materials purchasers to pursue a claim in the physical market. This logically implies that raw materials purchasers up the chain from cathode sales could not satisfy *AGC*, just as we found to be the case for the downstream Scrap Dealers. In between, however, lies the physical **[**49]** market transaction at the heart of the defendants' scheme - the purchase of cathode. There are no better parties than these purchasers to pursue a claim, and it is therefore they who are proper plaintiffs.

More bite lies in the argument that recovery should be denied because some of the cathode Asarco sold Viacom was purchased before, although this claim is not as strong as it might at first appear. As the district court noted, some if not most of the cathode Viacom purchased had never before been purchased in cathode form. Asarco sold Viacom 510 million pounds of cathode between 1990 and 1996. During that time frame, Asarco refined 6.4 billion pounds of cathode and purchased 153 million pounds from third parties, about 2.3% of its output. Because copper is fungible, one cannot tell whether any given Viacom purchase of cathode consisted of cathode refined by Asarco or previously purchased product.

We do not believe the mere existence of third-party cathode presents such a risk of duplicate recovery as to justify the extreme step of denying recovery altogether. Had the Board of Trade in *Sanner* produced evidence that farmers on some rare occasions bought soybeans from neighboring **[**50]** farms and then resold them along with the soybeans they grew themselves, that would not have provided a reason to deny recovery entirely. Similarly, if Viacom can prove at trial that 97.7% of all copper Asarco sold it was cathode it had refined itself, then Viacom should be permitted to recover 97.7% of its proved damages from cathode purchases. *Cf. Paper Sys., Inc. v. Nippon Paper Indus. Co., 281 F.3d 629, 633 (7th Cir. 2002)* (carving out indirect purchases while still leaving open possibility of recovery for direct purchases). The physical copper market is complicated, but not so complicated that one cannot estimate to a reasonable degree of accuracy the amount of damage a party has sustained. It is certainly acceptable through expert economic testimony to make a reasonable estimation of actual damages through probability and inferences. See *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 124, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*. ***HN20***[] "Where the tort itself is of such a nature as to preclude the ascertainment of the amount of damages with certainty it would be a perversion of fundamental principles of justice to deny all relief to the **[**51]** injured person." *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 563, 75 L. Ed. 544, 51 S. Ct. 248 (1931)*. While we are not permitted to make *complex* damage apportionments in antitrust cases, *AGC, 459 U.S. at 544*, **[*491]** nothing about these calculations is inordinately complex. One need only know two pieces of information: the amount of cathode purchased by Viacom and the amount of cathode purchased and sold by those who sold cathode to Viacom. From there, reasonable estimates of damages are the order of the day. Because this estimation is not overly complex and will not lead to duplicate damages, it provides a sufficient basis at this stage for the case to proceed to the merits.

The defendants' next major attack rests on hedging. Commodities exchanges function in part to protect participants in a physical market by shifting some of the risk (and damage) caused by fluctuations in price to participants in the futures market. Extending this principle, Global and CLR claim that through an extremely complicated set of economic interactions between the cash and futures markets, the damages experienced in the physical cathode market **[**52]** will be duplicated in their entirety by damages suffered in the futures market. Therefore, only futures traders, and not cash market participants, should be permitted to recover.

The hedging theories advocated by the defendants are based on economic theory, with no specific application of that theory here that would correlate sales in the cash market and sales in the futures market. Notably, Viacom's individual purchases from its suppliers were not hedged. Neither Viacom nor Asarco purchased a futures contract as a hedge every time they exchanged copper. Had they done so, then perhaps one might be able to "match" each physical market transaction to a futures contract sale and argue that the opportunity for a trader to recover the overcharge in a federal lawsuit should preclude recovery for the overcharged physical market participant. Emerson's supplier, Phelps Dodge, did hedge some of its sales to Emerson. On remand, the district court should explore further whether these hedging transactions would lead to some degree of duplicate recovery and a corresponding need to reduce damages. Nevertheless, since our review of the record indicates that not all of Phelps Dodge's sales were hedged, **[**53]** we conclude that Emerson is an appropriate plaintiff for the same reasons as Viacom.

In any event, the kind of futures matching the defendants' postulate does not reflect the way that most hedging works in the copper futures market. Asarco did not buy futures. Instead, it purchased put options. Put options are strategic hedges designed to protect against a general risk of declining cathode prices. With a put option, Asarco had the right, but not the obligation, to sell a futures contract if the price fell below a certain "strike" price. See *United States v. Catalfo, 64 F.3d 1070, 1072 (7th Cir. 1995)*. But as the defendants were artificially inflating the price of cathode throughout the period at issue here, the price never would have fallen below the strike price. Therefore, no sale ever would have gone forward and the only damages Asarco would have suffered from the conspiracy would have been the cost of the put option, or, more properly, the amount by which the price of the put option changed because the price of copper was artificially high.

The defendants and their experts have made no attempt to correlate the damages Asarco could theoretically recover on the **[**54]** futures market for its put options to the specific damages sought here by Viacom, and the relationship is far from intuitively obvious. Instead, the experts trace the potential for hedging by numerous parties upstream and downstream from Viacom and contend that because so many participants in the copper industry use so many different forms of hedging there will be **[*492]** "inevitable" duplication between the cash and futures markets.

This sort of potential duplication bears no resemblance to the duplication rejected in *Illinois Brick* and *AGC, 459 U.S. at 544*, nor do we think that it independently provides a reason to deny recovery to Viacom. In *Illinois Brick*, any "pass-on" of damages would (because of *Hanover Shoe*) already be taken into account in its entirety in the recovery to another potential party, the direct purchaser. *431 U.S. at 737-38*. This simply is not the case here. Asarco strategically hedged only about half its output. The defendants claim that potential hedging by those parties to whom Viacom sold and from whom Asarco purchased raw materials is also relevant, but this cannot be so under *Sanner*. There we held that injuries incurred **[**55]** in futures market purchases not linked to any particular cash market purchases did not "duplicate" and were not more "direct" than the cash market injuries. *62 F.3d at 929-30*. Because there are two separate markets, each with compensable injuries, the opportunity for recovery in one market does nothing to alleviate the harm in the other. For similar reasons, the fact that Comex futures traders have received money in a now-settled lawsuit says nothing about the ability of Viacom or other similarly situated plaintiffs in the cash market to recover.

Finally, the defendants note that Asarco and three of the manufacturers' other suppliers have recovered in a lawsuit brought in California state court. This lawsuit was brought pursuant to California law, which permits suit by indirect purchasers. *Union Carbide Corp. v. Superior Ct., 36 Cal. 3d 15, 679 P.2d 14, 16, 201 Cal. Rptr. 580 (Cal. 1984)*. However, the supposed "duplication" here comes from different bodies in our federal system seeking to remedy separate harms. It presents no risk of duplicate recovery for the same injury under the same law and is thus no bar to the plaintiffs' recovery. See *Browning-Ferris Indus. v. Kelco Disposal, Inc., 492 U.S. 257, 106 L. Ed. 2d 219, 109 S. Ct. 2909 (1989)* **[**56]** (upholding award of both federal antitrust and state tort damages); *California v. ARC Am. Corp., 490 U.S. 93, 104 L. Ed. 2d 86, 109 S. Ct. 1661 (1989)* (permitting states to require offenders to pay both state damages to indirect purchasers and federal treble damages to direct purchasers). If the resolution of the state court action poses a problem at all to these plaintiffs, it would be in the nature of claim or issue preclusion. See *Matsushita Electric Indus. Co. v. Epstein, 516 U.S. 367, 134 L. Ed. 2d 6, 116 S. Ct. 873 (1996)*; *Marrese v. American Acad. of Orthopaedic Surgeons, 470 U.S. 373, 84 L. Ed. 2d 274, 105 S. Ct. 1327 (1985)*. It is possible that the defendants have waived their right to assert any such defense; it is not mentioned in their briefs before this court. Accordingly, we express no opinion at this time on the merits of any preclusion argument.

In sum, of all participants in the physical market, Viacom and other first purchasers of cathode are the only plaintiffs possibly situated to recover damages against the defendants for the anti-competitive harms they have inflicted on the physical market for copper cathode. **[**57]** Faced with the option of permitting a clear, non-speculative harm to the cash market to go unremedied or of allowing the plaintiffs' suit to go forward, we elect the latter. As narrowed to first purchases, there is no danger of duplication of recovery, and so, under *AGC* and *Sanner*, the claim should proceed to trial.

3.

The final broad claim of the defendants is that recovery of damages in this case simply would be too speculative **[*493]** and complex to warrant allowing this suit to proceed. *Cf. AGC, 459 U.S. at 542.* Based on the evidence adduced by Viacom, however, we disagree. The main complication will come from attempting to discern how much of the Comex price of copper at a given time represented an overcharge due to the defendants' manipulation and how much stemmed from normal economic forces. This difficulty, however, occurs in every price-fixing case. It is no different from the task of gauging the damages recoverable by Comex futures traders, whom defendants have conceded to be proper plaintiffs. Through discovery, economic experts can evaluate the impact of the defendants' illegal actions on the futures market and come to reasoned conclusions. *Cf.* **[**58]** *Sanner, 62 F.3d at 930* (rejecting claim that damages analysis in a market manipulation is "beyond the ken of the federal courts"). At that point, recovery could be calculated by reviewing all of Viacom's contracts (assuming they are similar to the ones already in the record) and assessing damages based on the already computed overcharge. Since the only other factors involved in setting the price of Viacom's cathode are items which have no relation to the Comex price, such as freight charges and cash payment discounts, and the cathode premium, for which Viacom does not seek to recover, there should be no problems as a theoretical matter with making these calculations. ***HN21***[] The mere fact that each individual transaction relevant to an antitrust scheme must be examined on a case-by-case basis to assess damages does not thereby render those damages speculative. *American Ad Mgmt., Inc. v. General Tel. Co. of Cal., 190 F.3d 1051, 1059 (9th Cir. 1999)*.

We fully recognize that perfecting such economic analysis, tracking every pound of cathode refined or purchased by Viacom's suppliers, and locating every cathode contract Viacom entered into over a six-year span **[**59]** will not be easy. But complex litigation is hardly new for the federal courts, whether it is in the field of antitrust, environmental clean-ups, pension law, or accounting frauds. The key here is that the damages are not inherently speculative in the sense that *AGC* used that term. See *459 U.S. at 542*. Nor, as in *Illinois Brick* or *Hanover Shoe*, is a party asking a jury or the district court to perform some form of econometric analysis to deduce whether all, some, or none of an overcharge was passed on down a chain of distribution. *Illinois Brick, 431 U.S. at 727*. Instead, one need only determine through available records what percentage of cathode bought by Viacom represents first purchases. This is not speculative or complex, only time-consuming, and we are confident that the parties and their counsel are up to the task.

The defendants' entire case theory, apparent not only here but also through their discussion of duplication and hedging, seems to be the troubling one because their scheme was *so* evil, went undetected for *so* long, and caused *so* much economic loss throughout the cash market, that we should simply give them a pass **[**60]** from the antitrust laws. This is not now and never has been the law. Since the days of *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 379, 71 L. Ed. 684, 47 S. Ct. 400 (1927)*, it has been established that in complicated antitrust cases plaintiffs are permitted to use estimates and analysis to calculate a reasonable approximation of their damages. While we fully agree that we should not use the massiveness of defendants' conspiracy as an excuse to punish them unduly (by, for example, permitting the Scrap Dealers in *Loeb* to recover for harms that would duplicate those of Viacom), the sensible solution is to let one - but only one - level of purchasers **[*494]** in the physical copper market recover. Based on all the evidence available on summary judgment, the best plaintiff in this market is the first purchaser of copper cathode, and Viacom and Emerson are prototypical examples of such plaintiffs. The district court erred in dismissing the case at this stage, and we must therefore reverse its judgment.

C. *Ocean View* (Nos. 01-3229, 01-3230)

We turn to the final plaintiff, Ocean View. We have already rejected the defendants' principal argument for **[**61]** affirming summary judgment in this case, that the action is barred by the *Illinois Brick* direct purchaser rule. For the same reasons discussed in connection with Viacom's action, there is no party along a chain of distribution between Ocean View and any of the defendants who can recover for an alleged overcharge. Therefore, *Illinois Brick* is inapplicable. Instead, this case is controlled by the basic premise of *Sanner, 62 F.3d at 929-30*, which holds that ***HN22***[] a cash market participant injured by a party's illegal actions in the futures market may, in some instances, sue that party under the federal antitrust laws. The controlling factors in this inquiry are those set out in *AGC, 459 U.S. at 537-45*. The defendants allege that under an analysis of these factors, Ocean View's claim should still be precluded, while Ocean View contends that it should be entitled to recover for every copper rod it has ever purchased, or, in the alternative, that it may recover at least for those instances where it was the first purchaser of copper in cathode form.

As with the Scrap Dealers, we must reject Ocean View's proposition that it can recover for rod manufactured **[**62]** from cathode purchased by others, such as its semi-fabricators. Such an injury would be indirect because the semifabricator would serve as a more immediate victim of the antitrust violation intended to affect the cash and futures markets for cathode. *AGC, 459 U.S. at 541-42*; *supra at 22-23*. Semi-fabricators who purchased cathode would stand in shoes similar to those of Viacom, purchasing large quantities of cathode to reshape and sell as rod or wire. Because they are well-situated to bring any claim for inflation in the physical market, there is no need for Ocean View, as a more remote party, to step in "to vindicate the public interest in antitrust enforcement." *AGC, 459 U.S. at 542*.

Additionally, granting recovery to both a semi-fabricator for its cathode purchase and Ocean View for its purchase of that same cathode reshaped as rod would lead to either duplicate recovery or complex damage apportionment in violation of the principles underlying *AGC. 459 U.S. at 544*. We have already rejected the claim that the copper market should not be subject to a ban on duplicate recovery because copper pricing decisions are based on Comex **[**63]** and not a "pass on" of historical costs, *supra at 24-25*. To avoid such duplicate recovery one must either attempt to apportion damages along a chain of distribution, forbidden by *AGC*, or deny the right to sue to all but one plaintiff along the chain of distribution.

The best-situated plaintiff to recover is the first purchaser of copper cathode, the specific commodity the defendants targeted in their futures market conspiracy. For such a plaintiff, it is possible both to avoid duplicate recovery problems and at the same time to ensure that antitrust harm perpetrated in the cash market will not go unremedied. Based upon on our review of the record, we are satisfied that in at least some cases Ocean View did purchase cathode refined by integrated producers. The existence of such purchases **[*495]** is enough to get Ocean View in the door; ***HN23***[] recovery should not be denied simply because a plaintiff may not receive damages as high as it would like. The quantity of such sales, and thus the eventual damages Ocean View might get if it manages to prove the rest of its case, can await further discovery. Like Viacom, Ocean View will have the burden of ascertaining what percentage of the cathode **[**64]** sold by these producers was refined by them and not purchased from third parties. If, as defendants fear, many of these records are lost, that fact will come out in discovery, and they may move for a missing evidence instruction or perhaps even summary judgment on the merits.

We have already rejected most of the other claims the defendants make for denying Ocean View recovery, including the proposition that the integrated producers' purchase of copper raw materials should somehow render them improper plaintiffs, *supra at 31*, and the claim that hedging on the copper futures markets by some physical market participants renders the injury indirect or duplicative, *supra at 34-36*. Finally, we have found that the damages claimed are not too speculative or complex, *supra at 37-38*.

At this point we can think of only one possible distinction between Ocean View and Viacom that deserves further comment. That is the fact that while Viacom purchased cathode, Ocean View bought cathode that had been tolled into rod. The parties do not focus on this distinction much in their briefs, and the defendants concede that there is no physical difference between cathode and rod other than the **[**65]** product's shape. Based upon our review of the contracts in the record, the price Ocean View paid its integrated producers for rod appears to be identical to that paid by Viacom for cathode except for the existence of an additional rod premium. We assume, since the defendants do not contend otherwise, that like the cathode premium, the rod premium is a small fraction of the total price paid and tends to increase as the Comex price increases, so that it does not in some way offset the Comex inflation or render the injury indirect. In that case, the similarities between cathode and rod are close enough that, in instances where the same integrated producer refines raw materials into cathode and then shapes it into rod, Ocean View, as the first purchaser after the materials are formed into cathode, can state a claim, regardless of whether that copper is then in the form of cathode or rod. *Cf. In re Sugar Indus. Antitrust Litig., 579 F.2d 13, 17-18 (3d Cir. 1978)* (finding no distinction for *AGC* purposes between price-fixed sugar and candy incorporating that price-fixed sugar sold into the market for the first time).

VI.

In addition to their points under *Illinois* **[**66]** *Brick* and *AGC*, the various plaintiffs make arguments specific to their own cases. Most of these involve procedural issues. We consider these points in turn, on an issue-by-issue basis.

A. RICO and State Law Claims

We begin once again with the *Loeb* action. Our determination that the *AGC* factors prevent the Scrap Dealers from pursuing their antitrust claims disposes of their remaining claims against Sumitomo and Global for violations of RICO and state law. It is also dispositive of all claims against JPMorgan Chase.

The district court dismissed the Scrap Dealers' RICO claims on the ground that the *AGC* factors apply equally to RICO. The Scrap Dealers, however, argue that even if their antitrust claim fails, their RICO case should proceed. This claim **[*496]** lacks merit. ***HN24***[] Civil RICO was modeled after the Clayton Act. *Holmes v. Security Investor Protection Corp., 503 U.S. 258, 267-69, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992)*. To satisfy its requirement of proximate causation, the Scrap Dealers must allege a relation between their injury and the defendants' violation that is neither indirect nor remote. *International Bhd. of Teamsters, Local 734 Health & Welfare Trust Fund v. Philip Morris, Inc., 196 F.3d 818, 825 (7th Cir. 1999)* **[**67]** (applying *AGC* factors to a proximate causation analysis). Since we have already determined that the Scrap Dealers' injury is too indirect and remote under *AGC* for antitrust purposes, we conclude that the relation is similarly too remote for RICO purposes.

The Scrap Dealers also assert that the district court erred in finding that they had abandoned their state law claims. On this point, they appear to be correct. There is certainly no evidence in the record that the Scrap Dealers voluntarily dismissed or failed to pursue their various state law claims. The defendants argue that these claims were abandoned when the Scrap Dealers attempted to certify a class for the federal antitrust claims but not for the state claims. But no inference of abandonment should flow from a limited request for a class action; to the contrary, ***HN25***[] *FED. R. CIV. P. 23(c)(4)(A)* specifically recognizes that "an action may be brought or maintained as a class action with respect to particular issues." It would be entirely consistent with the rule to seek certification on issues governed by federal law, while declining to do so for more particularized state law issues. Nevertheless, the fact remains that we **[**68]** have dismissed all of the Scrap Dealers' federal claims against Sumitomo and Global. Since the Scrap Dealers have asserted no independent basis for federal subject matter jurisdiction, it is entirely appropriate to dismiss the state law claims, though without prejudice. See *28 U.S.C. § 1367(c)(3)*; *Oates v. Discovery Zone, 116 F.3d 1161, 1173 n. 12 (7th Cir. 1997)*.

B. Issue Preclusion: JPMorgan Chase

The district court dismissed the Scrap Dealers' claims against JPMorgan Chase on issue preclusion grounds. ***HN26***[] To prove that issue preclusion applies, the defendant must establish that (1) the plaintiff was fully represented in the prior litigation, (2) the issues to be precluded are identical to those in the prior litigation, (3) the issues were actually litigated and decided on the merits, and (4) resolution of the issue was necessary to the judgment. *People Who Care v. Rockford Bd. of Educ., 68 F.3d 172, 178 (7th Cir. 1995)*. The Scrap Dealers' claims against JPMorgan Chase arise from an alleged conspiracy between JPMorgan Chase and Sumitomo in which JPMorgan Chase's metals desk somehow furthered the conspiracy through its **[**69]** own copper purchases on the LME. The issue the defendants sought to preclude, that of the Scrap Dealers' ability to recover as a proper plaintiff under the antitrust laws, was actually litigated and decided on the merits in their suit against Sumitomo. That is enough to bind the Scrap Dealers, who have now had their day in court, with respect to JPMorgan Chase as well.

The Scrap Dealers argue, however, that their day in court was flawed, because they did not have an opportunity to litigate these issues fully before the district court. Their only support for this contention is the fact that the district court turned Sumitomo's motion to dismiss into a summary judgment motion without notice to them. As we have already noted, this action by the district court, while in error, did not prejudice the Scrap Dealers. The antitrust issues were fully litigated by counsel, albeit at the class certification stage. Besides **[*497]** this, the district court gave the Scrap Dealers an opportunity for a hearing prior to dismissing the JPMorgan Chase claims at which they were invited to bring forth any additional arguments that would call into question the district court's prior grant of judgment to the defendants. **[**70]** The Scrap Dealers produced no new evidence at that time that would call into question the factual basis for that determination. Therefore, we affirm the district court's decision to dismiss all claims brought by the Scrap Dealers against JPMorgan Chase on issue preclusion grounds.

C. Statement of Claim Against CLR

CLR advances one final argument in support of the judgment in both *Viacom* and *Ocean View*, which applies only to itself and not to its co-defendants. The district court stated in the *Viacom* action that, while it would not "address the issue in any detail," it believed that Viacom had made an inadequate showing that CLR's activities in any way affected the prices Viacom paid for copper. CLR urges this as an alternate ground for affirmance.

The procedural history of this argument is complex and seems to have engendered a great deal of enmity between the parties. The parties filed cross-motions for summary judgment on the standing question in the *Viacom* action. In its lengthy joint motion with Global, CLR never argued that its role in the conspiracy was too attenuated to have directly affected the Comex price. The issue was first raised in CLR's response **[**71]** to Viacom's cross-motion. Viacom, in reply, pointed to evidence in the record that addressed this new argument. The district court struck these submissions as untimely. This, however, was in error. Viacom had no obligation to produce specific evidence of CLR's role to survive CLR's motion for summary judgment since the issue was never raised by CLR at that stage. *Aviles v. Cornell Forge Co., 183 F.3d 598, 604-05 (7th Cir. 1999)*. Because CLR raised this argument in an untimely manner, the district court should not have considered it as a ground for summary judgment without giving Viacom "notice and a fair opportunity to present arguments and evidence in response." *Id*. By striking the materials Viacom submitted, the district court denied just that opportunity. Of course, since we are remanding this case on other grounds, the issue may resurface again after further discovery. At that point, considering all evidence in the record, the district court may properly evaluate - after considering all record evidence - whether either Viacom or Ocean View has presented enough to connect CLR to any violation of the antitrust laws. For the foregoing reasons, we also deny CLR's **[**72]** motion to strike.

D. Aiding and Abetting: JPMorgan Chase

Another minor issue crops up only in *Ocean View*, but it too can be disposed of easily. JPMorgan Chase asserts that the district court incorrectly denied its motion to dismiss on the ground that the complaint failed to state a claim against it because it only aided and abetted the conspiracy between Sumitomo and Global. But Ocean View is not attempting to state an "aiding and abetting" case. Its allegation is that JPMorgan Chase was a participant in the conspiracy to manipulate the copper market. To state such a claim, Ocean View need only prove that JPMorgan Chase knew Sumitomo intended to restrain trade, intended that trade be restrained, and materially contributed to that restraint. 7 Phillip E. Areeda, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application*, P 1474a (1986); *Poller v. Columbia Broad. Sys., Inc., 368 U.S. 464, 470, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*. A broad reading of **[*498]** the complaint alleges this and more. It states that JPMorgan Chase, aware that Sumitomo was manipulating futures prices, provided services and loans at well above-market prices to finance and **[**73]** hide Sumitomo's activities. JPMorgan Chase also allegedly stonewalled and lied to regulators and otherwise helped Sumitomo in an attempt to avoid investigations, all the while profiting handsomely on its deal. Of course, after merits discovery, it may come to pass that Ocean View lacks the evidence to establish any of these claims. But accepting the allegations as true, it is entitled to proceed.

E. Reinstatement of Claims

Only a few brief housekeeping matters remain. In both *Viacom* and *Ocean View*, the district court also granted the defendants summary judgment on their RICO and fraud claims because RICO contains rules similar to the Clayton Act for identifying proper plaintiffs. *International Bhd. of Teamsters, 196 F.3d at 825*. Having found that the plaintiffs here may pursue their antitrust claims, the RICO claims must be reinstated as well. The same goes for the state law claims. They were dismissed without prejudice in *Viacom* only because all federal claims had dropped out of the case. Finally, in *Ocean View*, the district court dismissed Ocean View's claim under Rhode Island state law on the ground that Rhode Island law imposed standing **[**74]** requirements similar to those of federal law. Expressing no opinion on the merits of that determination, we note that since we have found that Ocean View may proceed on at least some of its claims under federal law, the dismissal of the Rhode Island claim on similar grounds must be reconsidered.

VII.

To summarize, we MODIFY the dismissal of the state law claims in No. 00-3979 to reflect that this dismissal was without prejudice. In all other respects we AFFIRM the judgment of the district court. We also AFFIRM the judgment in No. 01-1148. On the other hand, we find that Viacom, Emerson, and Ocean View are not indirect purchasers under *Illinois Brick*, and their injury is direct, predictable, and unlikely to produce duplicate recovery or speculative damages. Therefore, in Nos. 01-3229, 01-3230, and 01-3485, we REVERSE the judgment of the district court and REMAND for further proceedings.

Concur by: CUDAHY

Concur

CUDAHY, *Circuit Judge*, concurring in Nos. 00-3979 and 01-1148 and concurring in the judgments in Nos. 01-3485, 01-3229 and 01-3230. I join in the outcomes reached by the majority in the several cases, but I write separately to question the appropriateness of finding a **[**75]** "lockstep" relationship between the copper futures and cash markets in the analysis of the claims of Viacom, Emerson and Ocean View.

The analysis and outcome in *Sanner* (which relied on the allegations of a complaint, not a summary judgment record) were based on the thesis that the futures market and the cash market tended to move in "lockstep." Thus, the relationship of futures prices of soybeans on the Chicago Board of Trade and the cash price of soybeans to be realized by farmers could be assumed to be simple, direct and absolutely predictable. "The futures market and the cash market for soybeans are …'so closely related' that the distinction between them is of no consequence to antitrust standing analysis." *62 F.3d at 929*. Based on the complaint, there could be no question that a given manipulation of the futures market produced a precisely proportionate consequence in the cash market.

[*499] This is hardly the case with the Comex and the market for physical copper. Even though the majority attempts to minimize the departures from a fully direct relationship between the futures and the physicals market (and takes issue with the more critical analysis of these relationships **[**76]** by the district court), under either view "lockstep" becomes more a slogan than a fact. And, of course, it was the existence of a "lockstep" relation that apparently excused *Sanner* from the strictures of *Illinois Brick v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)* and squared it with *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*. The existence, in the case before us, of a negotiable premium (or discount) as part of the price is enough in itself to remove this relationship from the "lockstep" category. And, if the language of *Kansas v. Utilicorp United, Inc., 497 U.S. 199, 216, 111 L. Ed. 2d 169, 110 S. Ct. 2807 (1990)* about the undesirability of exceptions to *Illinois Brick* were to be applied here, the outcome might be in doubt.

With respect to the possibility of duplicative recovery, *Sanner* is also quite distinguishable. There the plaintiff-farmers produced the commodity, bought none of it and there was no trade in any precursor raw material. Here the plaintiff-manufacturers bought from integrated **[**77]** producers, which purchased from others substantial quantities of copper cathode and pre-cathode copper raw material (the price of which also tended to follow the copper futures market).

I believe, therefore, that the case before us, although it seeks to apply *Sanner's* principle, may be a major step beyond *Sanner*. The outcome, however, may be justified insofar as there is sufficient evidence that the defendants engaged in massive physical cathode transactions and intended to manipulate physical prices as well as futures prices and thus to injure purchasers such as the plaintiffs. *See Sanner, 62 F.3d at 929* ("even if we were to assume …that there is a distinction between markets that is relevant to antitrust standing, the farmers here have alleged that one of the CBOT's objectives in adopting the Resolution was to prompt a price decline in the cash market for soybeans.").

Opinion

ENTRY ON DEFENDANTS' MOTIONS TO DISMISS THIRD AMENDED COMPLAINT

Plaintiff Charles H. Sanderson sells and promotes the use of magnetic systems to remove lime scale from water without using the chemicals that are used in competing systems. Sanderson contends that he has been the victim of a decades-long conspiracy of persons interested **[*2]** in the chemical systems to spread false information disparaging his magnetic systems.

The court previously dismissed plaintiff's Second Amended Complaint, including his federal Sherman Act antitrust claims, but granted leave to replead his Lanham Act claims so as to specify the allegedly false statements in advertising. *Sanderson v. Brugman, 2001 U.S. Dist. LEXIS 8309, 2001 WL 699876* (S.D. Ind. May 29, 2001). Plaintiff sought reconsideration, which was denied, and he eventually filed a Third Amended Complaint. Defendants then filed a new motion to dismiss that complaint, as well, for failure to state a claim upon which relief can be granted. As explained below, the Culligan defendants' motion is granted in part and denied in part, and the motion of defendants Brugman and Surtech is granted in its entirety. At this stage of the case, plaintiff is not entitled to any further opportunity to replead the dismissed claims, so the dismissed claims are dismissed with prejudice.

I. *The Culligan Defendants' Motion*

In relevant part, ***HN1***[] Section 43(a) of the Lanham Act provides a civil remedy against a person "who, on or in connection with any goods or services, … uses in commerce … any false **[*3]** designation of origin, false or misleading description of fact, or false or misleading representation of fact, which--(B) in commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities …." *15 U.S.C. § 1125(a)(1)(B)*. This provision has often been used by companies to challenge competitors' factual assertions in their advertising. See generally *Mead Johnson & Co. v. Abbott Labs., 201 F.3d 883 (7th Cir. 2000)*, *modified, 209 F.3d 1032 (7th Cir. 2000)* (reversing preliminary injunction). In this case, plaintiff Sanderson has attempted to assert such false advertising claims against competitors who manufacture and distribute chemical-based systems for removing lime scale from water.

Defendants Indiana Soft Water Services, Inc. and Culligan International Company (together, "Culligan") are the subjects of more specific allegations in Paragraph 27 of the Third Amended Complaint, in which Sanderson alleges:

> 1. Improper use of various studies and reports derogatory to magnetic water treatment and devices, **[*4]** including studies commissioned by the Water Quality Association and conducted at Purdue University, and the South Dakota School of Mines, such use including interstate and international publication and sale of these studies, while knowing that the conclusions contained therein was false, or acting with reckless disregard of the truth or accuracy of the conclusions reached in these studies. In particular the following studies and documents have been published by these Defendants and their Co-conspirators:
>
> > 1. Distribution by Culligan, International, by and through its agent or licensee, Culligan Water Company of San Diego, Cal. on November 1, 1999 of an article from Water Conditioning and Purification dated July, 1998, with the heading "Do Magnetic and Electromagnetic Water Conditioners Work" and containing the following false or misleading statements:
> >
> > 1. The article generally discounts the validity of both magnetic water treatment and its proponents, and in particular attributes to magnetic water conditioning corrosive effects. This is false and misleading, particularly in light of the knowledge of Culligan International of installations and research demonstrating the positive **[*5]** effects of magnetic water treatment.
>
> 2. Publication by Matthew M. Brennan, of Culligan International, of a letter to the editor of *Water Conditioning and Purification,* January, 1996, containing the following false statements:
>
> > 1. stating that "NSF" has concluded a study of magnetic water treatment, when no such study has been conducted by NSF (The National Sanitation Foundation).
> > 2. stating that "… (magnetic) technology is absolutely worthless." This statement is false.
> > 3. stating that magnetic water treatment equipment is "… a piece of junk."
> > 4. stating that "For the past 30 years, independent scientific data has failed to validate this technological application or product validity of magnetic water conditioning." This statement is false.
>
> 3. Distribution by Culligan, International, by and through its agent or licensee, Jack Boetcher, in Austin Texas on January 7-9, 2000 of a publication with the heading "IS THIS THE TYPE OF STUFF YOU WANT FOR YOUR HOME?" and containing the following false or misleading statements:
>
> > 1. "Magnets, catalytics prohibited from Future Annual WQA trade show." This statement is false and misleading.
> >
> > 2. "WQA knows **[*6]** of no generally recognized scientific or technical evidence which proves that magnetic, electromagnetic, or catalytic devices [solely] to treat water have any measurable physical or chemical effect of water quality. In fact, such evidence as WQA is aware of supports the position that these devices have no measurable physical or chemical effect on water quality." This statement is false and misleading." This statement is false and misleading. [sic]
>
> 3. In addition to the written statements, the aforesaid Culligan dealer made the following false statements verbally:
>
> > 1. "You'll be very sorry if you buy those magnets, because they never work."

2. "Right now, magnetic water treatments systems are under investigation and will soon be taken off the market."
3. "Those magnet companies are "fly-by-night" operations that don't honor their guarantees or warranties."

The January 1996 allegations in Paragraph 27(1)(2) must be dismissed based on the statute of limitations. ***HN2***[] The Lanham Act does not have its own statute of limitations but borrows the most analogous state law limitation. Culligan argues that in Indiana the closest analog is the two-year limit for **[*7]** injury to persons or character or property, or for statutory penalties in *Ind. Code § 34-11-2-4*. *Sanderson v. Spectrum Labs, Inc., 227 F. Supp. 2d 1001*, No. 1:99CV371, slip op. at 15 (N.D. Ind. Jan. 12, 2000), *aff'd mem., 248 F.3d 1159 (7th Cir. 2000)*; see also *Ashland Oil, Inc. v. Arnett, 656 F. Supp. 950 (N.D. Ind. 1987)* (stating principle and applying two-year limit for statutory penalties to federal civil RICO claims). Sanderson has not disputed the point. The court agrees that the Lanham Act claim based on the 1996 allegations is barred. Sanderson's Lanham Act claim is most similar to a claim for defamation (commercial slander), which would be subject to the two-year Indiana statute of limitations. *E.g., Burks v. Rushmore, 534 N.E.2d 1101, 1102-04 (Ind. 1989)* (two-year statute of limitations on defamation claims generally begins to run when harm could have reasonably been ascertained with due diligence).

The allegations in Paragraphs 27(1)(1) and 27(1)(3) concerning allegedly false statements in November 1999 and January 2000 deal with matters within the two-year statute of limitations. In addition, Sanderson has responded to the court's earlier **[*8]** ruling by complying with *Rule 9(b)*: he has stated who said what, when, and where that was allegedly false. See *Hemenway v. Peabody Coal Co., 159 F.3d 255, 261 (7th Cir. 1998)*.

Culligan argues that claims based on these allegations should be dismissed because Sanderson has failed to allege that the statements amounted to "commercial advertising or promotion" within the meaning of Section 43(a) of the Lanham Act, *15 U.S.C. § 1125(a)(1)(B)*. See, *e.g., Garland Co. v. Ecology Roof Systems Corp., 895 F. Supp. 274, 276 (D. Kan. 1995)* ("advertising and promotion" is limited to "broad, public dissemination of information," beyond isolated communication "to a single potential customer"). The court believes that dismissal on that basis would slice too finely the more general and liberal pleading requirements of Rule 8. ***HN3***[] In modern civil pleading, it is not necessary to plead every element of a cause of action to avoid dismissal. See *Hemenway v. Peabody Coal Co., 159 F.3d at 261* (district erred by dismissing fraud claim for failure to plead reliance; complaints "need not spell out every element of a legal theory"). In addition, **[*9]** the broad allegations of Paragraphs 64 and 65 of the Third Amended Complaint about false statements in advertising and promotion apply to these specific allegations and thus fill in the gap argued by Culligan. [1]

Culligan also questions whether it can be held responsible for statements attributed to its agents or licensees. The short answer is yes, at least at the pleading stage. Sanderson ultimately will need to come forward with evidence that would allow a reasonable jury to find that Culligan was legally responsible for the statements, **[*10]** if they are otherwise actionable. The pleading is adequate on this point.

Accordingly, Culligan's motion to dismiss is denied with respect to the Lanham Act claims based on the alleged statements in November 1999 and January 2000 set forth in Paragraphs 27(1)(1) and 27(1)(3) of the Third Amended Complaint. Sanderson's other federal claims against Culligan, however, are dismissed with prejudice for reasons the court has set forth above and in its previous decision.

II. *Defendants Brugman and Surtech's Motion to Dismiss*

In response to the court's insistence on specifics, Sanderson has identified one statement by defendant Brugman in a report entitled "Non-Chemical Water Treatment Devices: State of the Non-Art," published in October 24, 1998. The allegedly false statement was that "independent investigations of these devices have found them to produce no

---

[1] The court expresses no views on whether the oral statements alleged in Paragraph 27(1)(3) are actionable in themselves. See *Medical Graphics Corp. v. SensorMedics Corp., 872 F. Supp. 643, 650 (D. Minn. 1994)* (plaintiff unlikely to prevail on claims based on alleged oral statements to one customer); *American Needle & Novelty, Inc. v. Drew Pearson Mktg., Inc., 820 F. Supp. 1072, 1077-78 (N.D. Ill. 1993)* (dismissing claim based on single letter).

significant effect in preventing or correcting corrosion and scale formation." Third Am. Cplt. P 38. Brugman cited an "ASHRAE" policy statement. Sanderson alleges the statement is false in two respects: "First, there are independent investigations which have demonstrated that magnetics can produce positive effects, known to **[*11]** this Defendant. Second, Defendant cites the 1995 ASHRAE Handbook in a 1998 publication. ASHRAE amended this language in subsequent versions." *Id.*

Sanderson is not saying that Brugman's statement is literally false. He does not contend that *no* "independent investigations" have reached the conclusion described by Brugman. Instead, Sanderson is saying that independent investigations have produced mixed results. Some have found that magnetic devices have no significant effects and others have found that magnetic devices can produce positive effects. Brugman chose to report the conclusions of those investigations favorable to his business, and to ignore the others, according to the allegations. Similarly, the court sees no significance in the fact that Brugman made a statement that was in fact supported by the ASHRAE Handbook in 1995, though a later edition had modified the report in unspecified ways. The relevant point is that, even according to the complaint, Brugman's supposedly false assertion was in fact supported by the ASHRAE Handbook in 1995. Under those circumstances, Brugman's statement cannot support a Lanham Act claim on the theory that it is false or misleading. See **[*12]** *Mead Johnson & Co. v. Abbott Labs., 201 F.3d at 886-87*; *modified, 209 F.3d at 1034*. [2]

III. *State Law Claims*

Sanderson has attempted to assert claims **[*13]** under numerous tort theories under state law. As explained below, his claims against Brugman and Surtech do not survive dismissal, but a few claims survive against Culligan.

Conspiracy: Sanderson's complaint is laced with the label "conspiracy," but his conclusory labels add nothing to his overall case. See, *e.g.*, *Ryan v. Immaculate Queen Center, 188 F.3d 857, 859-60 (7th Cir. 1999)* (affirming dismissal of conclusory allegation of conspiracy); *House v. Belford, 956 F.2d 711, 721 (7th Cir. 1992)* ***HN4***[] ("mere allegations of a conspiracy are insufficient to withstand a motion to dismiss."). Also, ***HN5***[] under Indiana law there is no independent tort of civil conspiracy. *Sims v. Beamer, 757 N.E.2d 1021, 1026 (Ind. App. 2001)*; *Huntington Mortgage Co. v. DeBrota, 703 N.E.2d 160, 168 (Ind. App. 1998)*. To the extent that Sanderson might be deemed to be asserting claims for conspiracy, such claims are dismissed.

Fraud: Sanderson contends he has alleged fraud, but he has not identified any allegedly false statements of fact that any defendant made to him, and upon which he reasonably relied. He has failed to state a claim for fraud. **[*14]** See *Hardee's of Maumelle, Arkansas, Inc. v. Hardee's Food Systems, Inc., 31 F.3d 573, 579-80 (7th Cir. 1994)* ***HN6***[] (claim of fraud in Indiana requires showing that plaintiff relied on misrepresentation to her detriment); *Lawyers Title Ins. Corp. v. Pokraka, 595 N.E.2d 244, 249 (Ind. 1992)* (elements of fraud include a misrepresentation of fact that was "rightfully relied upon by the complaining party"). [3]

State ***Antitrust Law****:* Sanderson contends he has alleged violations of Indiana ***antitrust law***. The court **[*15]** has already dismissed his federal antitrust claims. Indiana courts have not identified any difference between federal and state ***antitrust law*** that would support different treatment of the state claims. See *Bi-Rite Oil v. Indiana Farm*

[2] Compare practices in legal brief-writing, in which an advocate may cite favorable authority and ignore unfavorable authority, at least if the unfavorable authority is not from the applicable controlling jurisdiction. See Indiana Rules of Prof'l Conduct R. 3.3(a)(3) (requiring disclosure of directly adverse and controlling legal authority if known to lawyer and not disclosed by opposing counsel). (Whether it is advisable to cite non-controlling but adverse authority is a matter of professional judgment rather than rule.) And regarding the change from the 1995 ASHRAE Handbook, one might consider the parallel problem with a brief that cites overruled or out-of-date authority. For example, plaintiff's brief cites repealed versions of statutes regarding civil remedies for victims of crimes, though the error was harmless.

[3] As noted above, the Seventh Circuit wrote in *Hemenway v. Peabody Coal Co., 159 F.3d 255, 261 (7th Cir. 1998)*, that the district court had erred by dismissing a fraud claim based on the plaintiff's failure to plead reliance. In Sanderson's case, however, it is clear that he is not claiming that his commercial foes' allegedly false statements fooled him; he is claiming they deceived prospective customers. Indiana's common law of fraud does not reach such claims.

Bureau Co-op. Ass'n, 720 F. Supp. 1363, 1378 (S.D. Ind. 1989), *aff'd,* 908 F.2d 200 (7th Cir. 1990) (granting defendant summary judgment on federal and state antitrust claims on the same grounds); Agmax, Inc. v. Countrymark Co-op., Inc., 795 F. Supp. 888, 892 (S.D. Ind. 1992) (denying preliminary injunction); Perry v. Hartz Mountain Corp., 537 F. Supp. 1387, 1390 (S.D. Ind. 1982) (because Indiana antitrust statute was modeled after Sherman Act, plaintiff who lacked standing under federal law also lacked standing under state law); City of Auburn v. Mavis, 468 N.E.2d 584, 585 (Ind. App. 1984) ***HN7***[] (Indiana courts use federal decisions to interpret state antitrust statutes; federal "antitrust injury" requirement applied to state law claim). Sanderson has failed to state a claim for an Indiana antitrust violation.

Tortious Interference with Contract Sanderson contends he has **[*16]** alleged tortious interference with contract, but he has not identified any actual contract allegedly interfered with by the defendants. ***HN8***[] A valid and enforceable contract is an essential element of such a claim. *E.g.,* Levee v. Beeching, 729 N.E.2d 215, 221 (Ind. App. 2000). Although the details of the contract need not be pled, see Cook v. Winfrey, 141 F.3d 322, 327-28 (7th Cir. 1998) (citing Federal Civil Form 5), a contract must at least be identified. Sanderson has failed to state a claim for tortious interference with contract.

Tortious Interference with Prospective Business Relationships: Sanderson also contends he has alleged tortious interference with prospective business relationships. Defendants contend that there is no viable allegation that they took unlawful action, which is an essential element of the tort under Indiana law. See, *e.g.,* Levee v. Beeching, 729 N.E.2d at 222; Economation, Inc. v. Automated Conveyor Systems, Inc., 694 F. Supp. 553, 556-57 (S.D. Ind. 1988). This claim survives dismissal against Culligan. Sanderson has alleged unlawful conduct by Culligan, though the claim is limited to the **[*17]** same allegations of false statements in November 1999 and January 2000 that survived dismissal on the Lanham Act claims. The claim does not survive against Brugman and Surtech because there is no viable allegation that they took any unlawful action.

Defamation: Sanderson also claims that he has stated claims for libel, slander, and product defamation. It is simpler and no less accurate to refer to all three as defamation. Sanderson's defamation claim survives dismissal against Culligan, again limited to the allegations of false statements in November 1999 and January 2000 that survived dismissal on the Lanham Act claims. The claim does not survive dismissal against Brugman and Surtech because Sanderson has not identified any false defamatory statement by them.

Criminal Fraud: Sanderson also claims he has alleged criminal mischief and deception in violation of Ind. Code § 35-43-5-3, which prohibits various types of fraud and deception in commercial transactions. Sanderson seeks treble damage under ***HN9***[] Ind. Code § 34-24-3-1 (replacing Ind. Code § 34-4-30-1), which provides a civil remedy for a person who "suffers a pecuniary loss as a result of a violation" of numerous criminal **[*18]** statutes, including Ind. Code § 35-43-5-3.

Sanderson was not the target of any alleged fraud, however. He has not identified any instance in which the Indiana courts have allowed a company to sue a commercial competitor sue for treble damages under this statute on the theory that the competitor used deception to secure a sale from a customer. Recognizing such a claim would seem to stretch the civil remedy statute well beyond its purpose and to open the door to a broad vista of new commercial litigation between competitors. Without much clearer signals that the Indiana legislature intended such results, the court finds that Sanderson has failed to state a claim for relief under Ind. Code § 34-24-3-1.

Conclusion

Accordingly, all claims against defendants Brugman and Surtech Corporation are hereby dismissed with prejudice. Sanderson's claims against defendants Indiana Soft Water Services, Inc. and Culligan International Company are dismissed with prejudice, except for his claims for violations of the Lanham Act based on the allegations in Paragraphs 27(1)(1) and 27(1)(3) of the Third Amended Complaint, and claims of defamation and tortious interference with prospective business **[*19]** relationships arising from the same instances. The stay of discovery previously entered is hereby vacated, and discovery may proceed with respect to the surviving claims. No separate judgment on the dismissed claims shall be entered at this time.

So ordered.

Date: September 20, 2002

DAVID F. HAMILTON, JUDGE

United States District Court

Southern District of Indiana

Dresses for Less, Inc. v. CIT Group/Commercial Servs.

United States District Court for the Southern District of New York

September 30, 2002, Decided ; September 30, 2002, Filed

No. 01 Civ. 2669 (WHP)

Reporter

2002 U.S. Dist. LEXIS 18338 *; 2002-2 Trade Cas. (CCH) P73,828

DRESSES FOR LESS, INC., DFL MANAGEMENT INC., THE DFL APPAREL GROUP, an unincorporated association, ALLISON CHE' FASHIONS, INC., BICCI STUDIO LTD., GARDEN CITY DRESSES FOR LESS, INC., DONALD WEINER and BARBARA WEINER, individually and derivatively as a shareholder of STELLA N. BISHOP FASHION CORP., and I.S.B. FASHIONS CORP., Plaintiffs, - against - CIT GROUP/COMMERCIAL SERVICES, INC. and THE UPTOWN CREDIT GROUP, INC., Defendants.

Disposition: **[*1]** Defendant CIT's motion to dismiss granted in part and denied in part. Defendant UCG's motion to dismiss denied.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN1[] **Motions to Dismiss, Failure to State Claim**

On a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*, a court typically must accept the material facts alleged in the complaint as true and construe all reasonable inferences in a plaintiff's favor. A court should not dismiss a complaint for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Antitrust & Trade Law, Sherman Act**

There are no heightened pleading requirements for antitrust cases. Dismissal of an antitrust case prior to giving a plaintiff ample opportunity for discovery is granted very sparingly. However, it is improper to assume that a plaintiff can prove facts that it has not alleged or that defendants have violated the antitrust laws in ways that have not been alleged.

Antitrust & Trade Law > Sherman Act > Claims

Mergers & Acquisitions Law > Antitrust > Regulated Industry Mergers

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Sherman Act, Claims**

Section 1 of the Sherman Antitrust Act, *15 U.S.C.S. § 1 et seq.*, prohibits all combinations and conspiracies that unreasonably restrain trade among the states. To establish a *§ 1* violation, a plaintiff must produce evidence sufficient to show: (1) a combination or some form of concerted action between at least two legally distinct economic entities; and (2) such combination or conduct constituted an unreasonable restraint of trade either per se or under the rule of reason.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN4[] **Practices Governed by Per Se Rule, Boycotts**

Per se illegal conduct is that which is so egregious as to constitute a violation of law without the necessity of showing an effect on competition. Among conduct falling within the per se rule are price fixing, territorial market division and certain group boycotts involving concerted refusals to deal. Only conduct that is manifestly anticompetitive is designated as per se illegal.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5[] **Remedies, Damages**

Conduct that does not fall within the per se rule is subject to the rule of reason analysis. Application of this doctrine requires a plaintiff to prove not mere injury to plaintiff as a competitor but antitrust injury, that is actual damage to competition within the relevant market. The injury to a relevant market requirement assures that the Sherman Act, *15 U.S.C.S. § 1 et seq.*, protects competition as a whole in the relevant market, and not the individual competitors within that market, so that a plaintiff may succeed only when the loss he asserts derives from activities that have a competition-reducing effect.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN6[] Price Fixing & Restraints of Trade, Horizontal Market Allocation

A plaintiff that fails to plead an actual injury to competition may nonetheless show antitrust injury by showing that the defendant possesses market power sufficient to inhibit competition on a market-wide basis. Such power is defined as the power to raise prices significantly above the competitive level without losing all of one's business.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Conduct considered illegal per se is invoked only in a limited class of cases, where a defendant's actions are so plainly harmful to competition and so obviously lacking in any redeeming pro-competitive values that they are conclusively presumed illegal without further examination.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN8[] Antitrust & Trade Law, Sherman Act

An anti-trust plaintiff must do more than allege the existence of a conspiracy; it must allege some facts in support of the claim. A bare bones statement of conspiracy or of injury under the antitrust laws without any supporting facts permits dismissal.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Evidence > Types of Evidence > Circumstantial Evidence

Evidence > Inferences & Presumptions > Inferences

HN9[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

An inference of a horizontal price-fixing agreement could be drawn in the absence of direct "smoking gun" evidence when such interdependent conduct is accompanied by circumstantial evidence and plus factors such as defendants' use of facilitating practices. Information exchange is an example of a facilitating practice that can help support an inference of a price fixing agreement.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] Antitrust & Trade Law, Sherman Act

Even if an alleged scheme is economically implausible, an anti-trust conspiracy may nevertheless be proven by strong direct or strong circumstantial evidence, although the implausibility of a scheme will reduce the range of inferences that may permissibly be drawn from ambiguous evidence.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

HN11[] Clayton Act, Claims

See *15 U.S.C.S. § 15(a)*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN12[] Regulated Practices, Price Fixing & Restraints of Trade

An antitrust plaintiff must not only allege cognizable harm to itself, but an adverse effect on competition market wide. An "antitrust injury" is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violations or of anticompetitive acts made possible by the violation. It should, in short, be the type of loss that the claimed violations would likely cause.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN13[] Regulated Practices, Price Fixing & Restraints of Trade

To state an antitrust injury, a plaintiff must demonstrate that defendants' conduct has had an actual adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice. Even when a per se violation of the antitrust laws occurs, a plaintiff is still required to demonstrate antitrust injury as an element of a successful claim.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN14[] Regulated Practices, Price Fixing & Restraints of Trade

The antitrust injury requirement ensures that the harm claimed by a plaintiff corresponds to the rationale for finding a violation of the antitrust laws and it prevents losses that stem from competition from supporting suits by private plaintiffs. The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior.

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **International Aspects, Commerce With Foreign Nations**

A horizontal price fixing conspiracy is a per se unreasonable restraint of trade. Under the Sherman Act, *15 U.S.C.S. § 1 et seq.*, a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal per se.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN16[] **Regulated Practices, Price Fixing & Restraints of Trade**

Extending interest free credit for a period of time is equivalent to giving a discount equal to the value of the use of the purchase price for that period of time. Thus, credit terms must be characterized as an inseparable part of price. An agreement to terminate the practice of giving credit is thus tantamount to an agreement to eliminate discounts, and thus falls squarely within the traditional per se rule against price fixing.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN17[] **Monopolies & Monopolization, Attempts to Monopolize**

Section 2 of the Sherman Act, *15 U.S.C.S. § 1, et seq.*, prohibits persons from combining or conspiring to monopolize trade or commerce among the several States. *15 U.S.C.S. § 2*. To state a claim under *§ 2*, a plaintiff must plead two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. Monopoly power is defined as the power to control prices in the relevant market or to exclude competitors.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN18[] **Relevant Market, Product Market Definition**

A complaint must allege a relevant product market in which the anticompetitive effects of the challenged activity can be assessed. Because market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN19[] **Relevant Market, Product Market Definition**

To survive a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, an alleged antitrust product market must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes; a plaintiff must demonstrate analysis of the interchangeability of use or the cross-elasticity of demand, and the analysis must be plausible. Cases in which dismissal on the pleadings is appropriate generally involve either (1) failed attempts to limit a product market to a single brand, franchise, institution, or comparable entity that competes with potential substitutes or (2) failure to attempt a plausible explanation as to why a market should be limited in a particular way.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN20[] **Antitrust & Trade Law, Sherman Act**

Possession of monopoly power does not violate *§ 2* of the Sherman Act, *15 U.S.C.S. § 1 et seq.* Plaintiffs must demonstrate that defendants abused their market power in either its acquisition or maintenance. A *§ 2* monopolization claim requires an allegation that defendants willfully acquired or maintained monopoly power, as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN21[] **Monopolies & Monopolization, Attempts to Monopolize**

To demonstrate attempted monopolization, plaintiffs must prove that defendant engaged in predatory or anticompetitive conduct with a specific intent to monopolize and a dangerous possibility of achieving monopoly power. Anticompetitive conduct is the use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor. Both monopolization and attempted monopolization claims require anticompetitive behavior by the defendant.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > General Overview

HN22[] **Regulated Practices, Market Definition**

The mere fact that a merger eliminates competition between the firms concerned is not a sufficient basis for illegality.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Derivative Actions > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN23[] **Private Actions, Remedies**

Mere derivative injuries sustained by employees, officers, stockholders, and creditors of an injured company do not constitute an antitrust injury sufficient to confer antitrust standing. It follows naturally that a party in a business relationship with an entity that failed as a result of an antitrust violation has not suffered the antitrust injury necessary for antitrust standing. That prerequisite necessitates that the injured party be a participant in the same market as the alleged malefactors.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN24[] **Private Actions, Standing**

An association may assert the rights of its members under the doctrine of associational standing. To bring suit on behalf of its membership, the organization must demonstrate that (1) its members would otherwise have standing to sue in their own right; (2) the interests it seeks to protect are germane to the organization's purpose; and (3) neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > Remedies > Damages > Monetary Damages

HN25[] **Private Actions, Standing**

An organization lacks standing to sue in antitrust for money damages on behalf of its members if the damages are not common to the entire membership, nor shared by all in equal degree, so that the fact and extent of injury requires individualized proof.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN26[] Monopolies & Monopolization, Attempts to Monopolize

The Donnelly Act, *N.Y. Gen. Bus. Law § 340*, prescribes that every contract, agreement, arrangement or combination whereby a monopoly is or may be established or maintained, or whereby competition may be restrained is illegal. The Donnelly Act was closely patterned after the Sherman Act, *15 U.S.C.S. § 1 et seq.*, and has been narrowly construed to encompass only those causes of action falling within the Sherman Act.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

HN27[] Public Enforcement, State Civil Actions

Under New York law, every contract contains an implied covenant of good faith and fair dealing. Good faith performance or enforcement of a contract emphasizes faithfulness to an agreed common purpose and consistency with the justified expectations of the other party.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Fiduciaries

Torts > Intentional Torts > Breach of Fiduciary Duty > Elements

Business & Corporate Law > ... > Causes of Action & Remedies > Breach of Fiduciary Duty > General Overview

Torts > Intentional Torts > Breach of Fiduciary Duty > General Overview

HN28[] Public Enforcement, State Civil Actions

To state a claim for aiding and abetting a breach of fiduciary duty under New York law, plaintiffs must allege (1) a breach by a fiduciary of obligations to another, and (2) that the defendant knowingly induced or participated in the breach. Under New York Law, a fiduciary relationship exists from the assumption of control and responsibility, and is founded upon trust reposed by one party in integrity and fidelity of another. A fiduciary relationship exists when one party is under a duty to act for or to give advice for the benefit of another upon matters within the scope of the relation. Fiduciary relationships can arise when a party trusts or relies on another or where confidence is based on prior business dealings. Claims alleging the existence of a fiduciary duty are usually not subject to dismissal in a *Fed. R. Civ. P. 12(b)(6)* motion.

Opinion

MEMORANDUM AND ORDER

WILLIAM H. PAULEY III, District Judge:

Plaintiffs are garment manufacturers and related entities or their principals. Defendant CIT Group/Commercial Services, Inc. ("CIT") is the largest domestic factor for the garment industry.

Plaintiffs assert that CIT and its predecessors conspired with other factoring companies **[*2]** to deny credit to certain garment manufacturers. Plaintiffs claim that the factors illegally boycotted their businesses and unlawfully fixed prices in violation of the Sherman Antitrust Act, *15 U.S.C. § 1* ("*Section 1*"). Plaintiffs further allege that CIT, by merging with or acquiring its competitors, obtained monopoly power in the garment factoring industry, in violation of the Sherman Antitrust Act, *15 U.S.C. § 2* ("*Section 2*"). Plaintiffs also assert common law claims for breach of contractual good faith and fair dealing and breach of fiduciary duty.

Defendants move to dismiss the amended complaint pursuant to *Rule 12(b) of the Federal Rules of Civil Procedure*. For the following reasons, defendants' motion is granted in part and denied in part.

Background

Factoring is a business relationship in which companies known as "factors" purchase at a discount other businesses' rights to collect accounts receivable. The discount usually ranges from approximately 0.5 to 0.9 percent of the accounts. The factor then collects the accounts receivable. (Am. Compl. PP 38-39.)

Without the ability to quickly convert accounts receivable into cash through **[*3]** factoring, a factor's clients could be exposed to a liquidity crunch that would threaten their businesses. When a factor purchases an account receivable, it assumes the risk of collecting the receivable. (Am. Compl. P 39.) However, a factor assumes that credit risk only after it has checked whether its customer is selling to a creditworthy purchaser. (Am. Compl. PP 39, 42.) Moreover, factors like CIT may refuse to credit check a client's purchaser for any reason, even if that customer is creditworthy. (Am. Compl. P 41.) Because a manufacturer usually cannot afford to risk sales that are not acceptable to the factor, the factor's credit check decision often determines whether a sale is made. (Am. Compl P 39.)

In the garment industry, a factor's clients may include the "piece goods" vendors that manufacture raw materials such as fabric, buttons, trim and other accessories, or garment manufacturers who purchase materials from piece good vendors. (Am. Compl. P 41; Transcript from Oral Argument dated Nov. 16, 2001 ("Tr."), at 3.) Thus, when a factor's clients include both a piece goods vendor and a garment manufacturer who purchases from the piece goods vendor, the factor faces credit **[*4]** checking a purchaser who is also its own client. (Am. Compl. P 41.)

Accepting the allegations in the amended complaint as true, the facts are as follows. Plaintiffs Allison Che' Fashions, Inc., Bicci Studio Ltd. ("Bicci"), and I.S.B. Fashions Corp. ("ISB"), Stella N. Bishop Fashion Corp. ("Stella Bishop") are defunct clothing manufacturers. (Am. Compl. PP 12-15.) They grossed sales of $ 30,206,570, 48,492,233, and 53,800,273 for the fiscal years ending June 1998, 1999, and 2000 respectively. (Am. Compl. P 16.) Each manufacturer used CIT, or its predecessor Congress Talcott Corporation ("Congress"), as their factor for some period between 1996 and 2000. (Am. Compl. PP 12-15, 24.) Dresses For Less, Inc. ("Dresses For Less") is a garment manufacturer that was denied credit by CIT. (Am. Compl. P 18, 245) (collectively, Bicci Studio, ISB, Stella Bishop, and Dresses for Less are referred to as the "DFL Apparel companies"). Dresses For Less guaranteed some of the DFL Apparel companies' debts to CIT. (Am. Compl. P 18.)

Plaintiff DFL Management Inc. operated the DFL Apparel companies. (Am. Compl. P 10.) Plaintiff DFL Apparel Group is an unincorporated business association comprised of the **[*5]** DFL Apparel companies, and previously included other manufacturers who are not parties to this litigation. (Am. Compl. P 11.) Plaintiffs Donald and Barbara Weiner are principals of the DFL Apparel companies and their related entities and also personally guaranteed several of the DFL Apparel companies' debts to CIT. The Weiners have lost approximately $ 2,600,000 in personal assets as a result of defaults. (Am. Compl. 17.) Barbara Weiner owns fifty percent of ISB and forty-five percent of Stella Bishop. (Am. Compl. PP 14-15.)

Plaintiff Garden City Dresses For Less ("GC Dresses For Less") leased property to DFL Apparel companies and lost more than $ 750,000 in annual rental income as a consequence of their defaults. (Am. Compl. P 19.)

CIT emerged as a dominant domestic factor after merging with its former competitors Congress and Heller Financial, Inc. in 1999 and 2000 respectively. (Am. Compl. P 28.) Those acquisitions caused CIT's market share in the factored retail garment industry to grow from nineteen to forty-one percent and its share of piece goods factoring to rise from fifty to ninety percent. (Am. Compl. PP 27, 60.) CIT factored approximately $ 26 billion of the entire domestic **[*6]** garment manufacturing industry. (Am. Compl. P 26.) CIT's largest competitor factors twenty-two percent of the market. (Am. Compl. P 26.)

Plaintiffs allege that CIT and several other factors formed an illegal cartel in 1924 and to this day operate as the single entity, currently known as defendant Uptown Credit Group, Inc. ("UCG"). (Am. Compl. PP 25, 44.) Factors comprising the UCG include GMAC Commercial Credit LLC ("GMAC"), HSBC Business Credit (USA) Inc. ("HSBC"), the Receivable Capital Management Division of Sun Trust Banks, Inc. ("SunTrust"), Rosenthal & Rosenthal, Inc. ("Rosenthal"), Capital Factors, Inc. ("Capital"), Finova Capital Corp. ("Finova") and Sterling Factors Corp. ("Sterling") (Am. Compl. PP 30-37.)

The UCG members account for approximately 80 to 85 percent of domestic garment manufacturer factoring. (Am. Compl. P 37.) Through acquisitions made between 1999 and 2001, including Finova, GMAC became the second largest factor in the industry with $ 14 billion in receivables purchased annually or twenty-two percent of the garment manufacturer factoring industry. (Am. Compl. P 30.) Finova previously factored $ 800 million, or 1.2 percent of the domestic garment manufacturing **[*7]** market. (Am. Compl. P 35.)

HSBC factors approximately $ 7 billion in annual receivables, or eleven percent of the industry. (Am. Compl. P 31.) Rosenthal controls 2.4 percent of the domestic garment manufacturing market with $ 1.5 billion in annual receivables. (Am. Compl. P 33.) Capital factors $ 800 million, or 1.2 percent, of the domestic garment manufacturing industry. (Am. Compl. P 34.) In recent years, Sterling also captured $ 800 million, or 1.2 percent, of the domestic garment manufacturer factoring industry. (Am. Compl. P 36.)

Plaintiffs allege that the other factors have agreed with CIT that they will not credit check customers that CIT has refused to credit check even though they contracted to assume those customers' credit risks in factoring agreements. (Am. Compl. PP 42, 54.) Plaintiffs also contend that CIT has refused to credit check customers due to its dislike of management or other reasons that are not related to their customers' creditworthiness. (Am. Compl. P 41.)

Once CIT refuses to credit check a sale from a piece goods vendor to a garment manufacturer, it stops checking every proposed sale to that manufacturer by any piece goods vendor. (Am. Comp. PP 43, 49.) **[*8]** A manufacturer's inability to make credit purchases from a piece goods vendor will increase its costs, inhibit cash flow, and can within weeks disable the manufacturer's ability to fill existing orders from retailers. (Am. Compl. PP 44, 53, 61.) Moreover, because CIT controls ninety percent of domestically factored piece goods vendors, other factors quickly realize that a manufacturer who is not being credit checked by CIT cannot obtain enough credit to purchase the materials it requires. (Am. Compl. PP 43, 61, 62.) Realizing that economic urgency, the other factors will quickly follow CIT's lead and refuse to check credit. (Am. Compl. PP 61, 62, 63.) In addition, through its dominance in the garment manufacturing market via control over the piece goods vendors, CIT can also discourage garment manufacturers from purchasing from specific piece goods vendors. (Am. Compl. P 63.)

Plaintiffs allege that over the past two decades, CIT and its fellow factors conducted two highly secretive meetings every week. (Am. Compl. P 44.) The first meeting, known as the "Uptown meeting" is conducted every Wednesday by conspiring factors' account officers; the second, known as the "credit manager's **[*9]** meeting," is conducted every Thursday by the factors' credit managers. (Am. Comp. P 46.) At those meetings, the factors share not only publicly available information about their clients' creditworthiness, but also highly confidential information about their clients, including whether and why they have stopped credit checking a particular client. (Am. Compl. P 48, 51.) Thus, the factors' collective decision not to credit check a certain manufacturer assures that none of them will incur a credit risk for a customer who might be creditworthy but potentially faces insolvency due to one factor's decision to deny further credit for any reason. (Am. Compl. P 50.)

Beginning in February 1997, Kenwin Shops Incorporated ("Kenwin"), a company controlled by Donald Weiner, was defending a civil action by the Bank of Louisiana ("BOL") in the Eastern District of Louisiana. See *In re:* *Bank of Louisiana/Kenwin Shops, Inc., 1998 U.S. Dist. LEXIS 11680*, at *2, No. 97 Civ. 1193 (MDL) (E.D. La. July 27, 1998). That action resulted from Kenwin's failure to make payments to BOL in accord with their regular course of dealing. *Bank of Louisiana, 1998 U.S. Dist. LEXIS 11680*, at *3. "Kenwin was collecting and holding money **[*10]** paid by customers of Kenwin that was due to BOL under the Contract Agreement between them." *Bank of Louisiana, 1998 U.S. Dist. LEXIS 11680*, at *3. In the course of that litigation, D & A Funding Corporation, another company controlled by Donald Weiner, asserted that it had priority to the monies owed to BOL.

Both parties filed motions for injunctive relief. In support of an application for a continuance on the motions, counsel for Kenwin represented that the claimed funds were sequestered precluding any harm to BOL. *Bank of Louisiana, 1998 U.S. Dist. LEXIS 11680*, at *3. After several months, the parties entered settlement discussions with the aid of the court to resolve their motions for injunctive relief. The parties stipulated that each would post a bond and thereafter voluntarily dismiss the motions. *Bank of Louisiana, 1998 U.S. Dist. LEXIS 11680*, at *6. In October 1997, Kenwin filed for Chapter 11 bankruptcy without informing BOL. *Bank of Louisiana, 1998 U.S. Dist. LEXIS 11680*, at *6. On November 3, 1997, Kenwin offered a draft bond to BOL, but eleven days later, Kenwin's counsel informed BOL that it would not file it. *Bank of Louisiana, 1998 U.S. Dist. LEXIS 11680*, at *7. At that time, the court first learned **[*11]** of Kenwin's bankruptcy petition. *Bank of Louisiana, 1998 U.S. Dist. LEXIS 11680*, at *8.

The court conducted a hearing regarding Weiner's apparent "material misrepresentations and omissions" regarding the sequestered funds and the timing of Kenwin's bankruptcy. *Bank of Louisiana, 1998 U.S. Dist. LEXIS 11680*, at *9. On July 27, 1998, the court sanctioned Donald Weiner after finding his testimony to be "disingenuous, obviously evasive and obfuscatory" and his memory to be "transparently convenient." *Bank of Louisiana, 1998 U.S. Dist. LEXIS 11680*, at *9.

The *Bank of Louisiana* decision, however, had no adverse impact on the creditworthiness of the DFL Apparel companies. (Am. Compl. P 57.) By late 1998, the DFL Apparel companies were generating net sales of approximately $ 10 million per month. (Am. Compl. P 56.) As of September 1998, DFL Apparel companies had never been denied credit. (Am. Compl. P 56.) Nevertheless, CIT ceased approving credit to each DFL Apparel company shortly after the issuance of the *Bank of Louisiana* opinion and advised its co-conspirator factors of its decision. (Am. Compl. P 57.) Each of the co-conspirator factors stopped credit checking DFL Apparel companies the next day. **[*12]** (Am. Compl. P 57.) Although CIT eventually continued to extend credit, the DFL Apparel companies suffered millions of dollars in lost sales in the interim. (Am. Compl. P 57.)

In addition to colluding with the other factors, plaintiffs further allege that CIT engaged in bad faith conduct throughout their relationship that damaged the manufacturing plaintiffs. Plaintiffs contend that starting in 1996, Donald Weiner advised CIT and numerous piece goods vendors orally and in writing that, as a condition to the guaranties of Donald Weiner, Barbara Weiner and Dresses for Less, no DFL Apparel company purchase order should be honored unless it bore his signature. (Am. Compl. P 69.) Despite expressly acknowledging that requirement in writing, CIT approved millions of dollars of sales to the DFL Apparel companies by CIT's factored piece goods vendors that were not supported by signed purchase orders. (Am. Compl. P 69.) As a result, the DFL Apparel companies suffered millions of dollars in losses and incurred millions in debt to CIT. (Am. Compl. P 69.)

Moreover, although CIT had separate factoring agreements with each DFL Apparel company, CIT treated them as if they were one company by penalizing **[*13]** every member when one company was delinquent on its payments. Thus, a DFL Apparel company with no credit or payment problems might nevertheless have its credit reduced or refused. (Am. Compl. P 70.) By treating the DFL Apparel Group as a single entity instead of several companies, CIT applied one "collective credit limit" to the entire group. Thus, if the group limit had been exceeded, CIT directed all DFL Apparel members to reduce their sales volumes and denied credit for piece goods purchases by DFL Apparel companies with remaining credit under their individual factoring agreements. (Am. Compl. P 71.)

At some time in 2000, CIT orchestrated a boycott where the factors ceased authorizing piece goods vendors to sell goods to Dresses For Less and DFL Apparel companies. (Am. Compl. P 73.) Between September 30, 2000 and January 31, 2001, the DFL Apparel companies went out of business. (Am. Compl. P 73.)

Plaintiffs also assert that before those failures, CIT compelled certain DFL Apparel companies to accept substantial "overadvances of credit" that bore higher interest charges than normal advances. (Am Compl. P 72.) Normally, a DFL Apparel company could obtain credit advances of up to **[*14]** 80 to 90 percent of the sales that it assigned to CIT. However, CIT had the discretion to extend overadvances for as much as 95 to 100 percent of assigned sales. (Am. Compl. P 72.) CIT regularly refused to approve credit for piece goods purchases by solvent DFL Apparel companies unless a fiscally unstable DFL company accepted an overadvance with a higher than normal interest rate and then applied the extra funds to debts it owed to piece goods vendors factored by CIT. (Am. Compl. P 72.) As a result, the weaker DFL company could not purchase the piece goods and would face losing millions in sales or borrowing more at increased interest charges. (Am. Compl. P 72.)

Lastly, plaintiffs allege that CIT prolonged the failure of the DFL Apparel companies for several months in order to extract additional interest. (Am. Compl. P 75.) In June 2000, Donald Weiner discovered that CIT had approved several piece goods vendors' sales to DFL Apparel companies without first obtaining purchase orders signed by him. Concerned about his and other guarantors' exposure arising from the DFL Apparel companies' debts to CIT, Donald Weiner advised CIT that he was closing the DFL Apparel companies. (Am. Compl. **[*15]** P 75.) At that time, the DFL Apparel companies' inventories and accounts receivable exceeded their debts by 50 percent. (Am. Compl. P 75.) After receiving CIT's assurances that it would continue to finance and support the DFL Apparel companies, Weiner continued the businesses. (Am. Compl. P 75.) As a result, CIT received interest payments throughout 2000. Nevertheless, CIT stopped checking the DFL Apparel companies' credit causing them to fail. (Am. Compl. P 76.)

Discussion

I. *Motion to Dismiss Standards*

HN1[] On a motion to dismiss pursuant to *Rule 12(b)(6)*, a court typically must accept the material facts alleged in the complaint as true and construe all reasonable inferences in a plaintiff's favor. *Grandon v. Merrill Lynch & Co., 147 F.3d 184, 188 (2d Cir. 1998)*. A court should not dismiss a complaint for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. *Gant v. Wallingford Bd. of Educ., 69 F.3d 669, 673 (2d Cir. 1995)*.

HN2[] There are no heightened pleading requirements for antitrust cases. *Todd v. Exxon Corp., 275 F.3d 191, 198 (2d Cir. 2001)*. **[*16]** Further, dismissals of antitrust cases "prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly." *Todd, 275 F.3d at 198* (quoting *Hosp. Bldg. Co. v. Trs. of Rex Hosp., 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976))*. However, it is improper "'to assume that the [plaintiff] can prove facts that it has not alleged or that the defendants have violated the antitrust laws in ways that have not been alleged.'" *Todd, 275 F.3d at 198* (citing *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 526, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983))*.

II. *Section One Violations*

Plaintiffs allege that CIT conspired with other factors to boycott credit checks of plaintiff companies in violation of Section One, and that their boycott resulted in the price fixing of piece goods also in violation of Section One. (Am. Compl. PP 80, 86, 87.)

HN3[] Section One prohibits all combinations and conspiracies that unreasonably restrain trade among the states. *15 U.S.C. § 1*. To establish a Section One violation, a plaintiff **[*17]** must produce evidence sufficient to show: "(1) a combination or some form of concerted action between at least two legally distinct economic entities; and (2) such combination or conduct constituted an unreasonable restraint of trade either *per se* or under the rule of reason." *Virgin Atlantic Airways Ltd. v. British Airways PLC, 257 F.3d 256, 273 (2d Cir. 2001)*; *see also* *Tops Mkts., Inc, v. Quality Mkts., Inc., 142 F.3d 90, 96 (2d Cir. 1998)*.

HN4[] *Per se* illegal conduct is that which is so egregious as to constitute a violation of law without the necessity of showing an effect on competition. *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 133-34, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1998)*; *Bogan v. Hodgkins, 166 F.3d 509, 513*. Among conduct falling within the *per se* rule are price fixing, territorial market division and certain group boycotts involving concerted refusals to deal. *NYNEX Corp., 525 U.S. at 133*; *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., 996 F.2d 537, 542-43 (2d Cir. 1993)*. Only conduct that is "manifestly anticompetitive" is designated as per se illegal. Most cases **[*18]** do not fall within the *per se* category. *Bogan, 166 F.3d at 514*; *see also* *CDC Techs., Inc. v. IDEXX Laboratories, Inc., 186 F.3d 74, 79 (2d Cir. 1999)* (only a "handful" of practices are per se illegal); *National Camp Assoc., Inc. v. Am. Camping Assoc., Inc., 2000 U.S. Dist. LEXIS 18194*, No. 99 Civ. 11853 (DLC), 2000 WL 1844764, at *5 (S.D.N.Y. Dec. 15, 2000) (noting Supreme Court's refusal to extend the class of agreements to which a per se analysis applies).

HN5[] Conduct that does not fall within the *per se* rule is subject to the rule of reason analysis. Application of this doctrine requires a plaintiff to prove not mere injury to plaintiff as a competitor but antitrust injury, i.e., actual damage to competition within the relevant market. *Capital Imaging, 996 F.2d at 542-43*. The injury to a relevant market requirement assures that the Sherman Act protects competition as a whole in the relevant market, and "not the individual competitors within that market, so that a plaintiff may succeed only when the loss he asserts derives from activities that have a 'competition-reducing'" effect. *Tops Mkts., Inc., 142 F.3d at 96* (citing **[*19]** *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342-44, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990))*.

HN6[] A plaintiff that fails to plead an actual injury to competition may nonetheless show antitrust injury by showing that the defendant possesses "market power" sufficient to inhibit competition on a market-wide basis. Such power is defined as the power to "raise prices significantly above the competitive level without losing all of one's business." *CDC Technologies*, 186 F.3d at 81 (quoting *Capital Imaging, 996 F.2d at 546*); *see also* *Primetime 24 Joint Venture v. Nat. Broad. Co., Inc., 219 F.3d 92, 103-04 (2d Cir. 2000)*.

III. *Group Boycott*

Plaintiffs allege group boycott conduct as *per se* and rule of reason violations. (Am. Comp. PP 80, 86); *see* *AD/SAT v. Associated Press, 181 F.3d 216, 232 (2d Cir. 1999)* (*Section 1* group boycotting claim may be alleged as either a *per se* or rule of reason violation); *accord* *Bogan v. Hodgkins, 166 F.3d 509, 514 (2d Cir. 1999)*. [1] CIT contends that plaintiffs have not adequately pleaded a boycotting claim because the amended complaint **[*20]** fails to allege facts to support an inference of an agreement among the factors or that plaintiffs suffered an antitrust injury.

[*21] 1. *Existence of an Agreement*

CIT asserts that plaintiffs' conclusory allegations regarding a boycotting agreement among the several factors to cut off plaintiffs' credit are inadequate as a matter of law. (CIT's Mem. in Supp. at 6-7.) CIT further contends that inferring such an agreement would be nonsensical because it contradicts CIT's economic interests. (CIT's Mem. in Supp. at 9.)

HN8[] "The plaintiff must do more than allege the existence of a conspiracy -- it must allege some facts in support of the claim." *Floors-N-More, Inc. v. Freight Liquidators, 142 F. Supp. 2d 496, 501 (S.D.N.Y. 2001)*; *see also* *Heart Disease Research Found. v. General Motors Corp., 463 F.2d 98, 100 (2d Cir. 1972)* ("[A] bare bones statement of conspiracy or of injury under the antitrust laws without any supporting facts permits dismissal."); *Telectronics Proprietary, Ltd. v. Medtronic, Inc., 687 F. Supp. 832, 837 (S.D.N.Y. 1988)* (dismissing complaint which alleged that the defendants "conspired and contracted with [each other] . . . to restrain trade").

Here, plaintiffs allege that CIT and the other factors collectively decided whether to deny credit **[*22]** to a particular manufacturer. Plaintiffs contend that the factors' agreement regarding credit checks is evidenced by the factors' biweekly meetings and by the factors' unanimity in refusing to check the DFL Apparel companies' credit between September 2000 and January 2001. (Pls.' Mem. in Opp. at 5.)

Viewing the amended complaint liberally, plaintiffs have alleged sufficient facts to assert that the conspiring factors' conduct was not simply parallel but was the product of collusion. *See* *Todd, 275 F.3d at 198* (citations omitted) (finding that ***HN9***[] an inference of a horizontal price-fixing agreement could be drawn in the absence of direct "smoking gun" evidence "when such interdependent conduct is accompanied by circumstantial evidence and plus factors such as defendants' use of facilitating practices. Information exchange is an example of a facilitating practice that can help support an inference of a price fixing agreement").

CIT further argues that the existence of an agreement among the factors cannot be inferred because plaintiffs' theory lacks any economic rationality. (CIT's Mem. in Supp. at 8.) Without great detail, plaintiffs allege that defendants' conspiracy **[*23]** sought to minimize their costs, stabilize prices, preserve market shares, and maintain monopoly power. (Am. Compl. P 47.) While, CIT acknowledges that refusing to check a purchaser can limit its own exposure, it argues that encouraging other factors also to deny credit to the DFL Apparel companies would only hasten their insolvencies preventing their continued payments to CIT. (CIT's Mem. in Supp. at 8.) Thus, CIT

---

[1] Although defendants have not argued that the alleged conspiracy cannot be considered illegal *per se*, plaintiffs contended at oral argument that any boycott of credit is *per se* illegal. (Tr. at 13.) However, this Court notes that not all horizontal group boycotts are *per se* illegal. *See* *Northwest Wholesale Stationers, Inc. v. Pacific Stationery and Printing Co., 472 U.S. 284, 294, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)*; *Bogan, 166 F.3d at 514*. "The scope of the *per se* rule against group boycotts is a recognized source of confusion in ***antitrust law***." *Bogan, 166 F.3d at 514* (citation omitted). Moreover, the agreement alleged here does not reflect "the classic model of a group boycott -- that is, a 'concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level.'" *Bogan, 166 F.3d at 514* (citing *Smith v. Pro Football, Inc., 193 U.S. App. D.C. 19, 593 F.2d 1173, 1178 (D.C. Cir. 1978))*; *see also* *Capital Imaging, 996 F.2d 537, 542 (2d Cir. 1993)* ***HN7***[] ("Conduct considered illegal *per se* is invoked only in a limited class of cases, where a defendant's actions are so plainly harmful to competition and so obviously lacking in any redeeming pro-competitive values that they are conclusively presumed illegal without further examination.").

maintains that it lacks any incentive to collude with the other factors because the alleged conspiracy hurts its economic interests. (CIT's Mem. in Supp. at 8.)

HN10[] Even if the scheme alleged was economically implausible, a conspiracy may nevertheless be proven "by strong direct or strong circumstantial evidence, [although] the implausibility of a scheme will reduce the range of inferences that may permissibly be drawn from ambiguous evidence." *Apex Oil Co. v. DiMauro, 822 F.2d 246, 253 (2d Cir. 1987)* (citing *Matsushita Elec. Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986))*.

Moreover, plaintiffs have proposed a reasonable economic motive for the conspiracy. Plaintiffs contend that by "weeding out" **[*24]** creditworthy albeit financially weaker companies, at the "slightest inkling" of their insolvency, CIT assured that it would recover fully by collecting from the guarantors. (Pls.' Mem. in Opp. at 7.) Plaintiffs further allege that the agreement to reduce credit risk stabilizes prices and the competing factors' market shares. (Am. Compl. P 64.) Whether any of these motives can be established and are served by the alleged conspiracy are factual questions.

2. *Antitrust Injury*

Section 4 of the Clayton Act provides that **HN11**[] "any person who shall be injured . . . by reason of anything forbidden in the antitrust laws may sue." *15 U.S.C. § 15(a)*. Despite this broad language, plaintiffs must nevertheless demonstrate that they have suffered an "antitrust injury," and that they are otherwise proper plaintiffs to bring the action at issue. *Todd, 275 F.3d at 213* **HN12**[] ("An antitrust plaintiff must not only allege cognizable harm to itself, but an adverse effect on competition market wide.") (citing *Elecs. Communications Corp. v. Toshiba Am. Consumer Prods., Inc., 129 F.3d 240, 242 (2d Cir. 1997))*; *see also* *Volvo No. Am. Corp. v. Men's Int'l Prof'l Tennis Council, 857 F.2d 55, 66 (2d Cir. 1988)*. **[*25]**

An "antitrust injury" is an

> injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violations or of anticompetitive acts made possible by the violation. It should, in short, be the type of loss that the claimed violations . . . would likely cause.

Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977); *see also* *Intellective v. Massachusetts Mut. Life Ins. Co., 190 F. Supp. 2d 600, 609 (S.D.N.Y. 2002)*.

HN13[] To state an antitrust injury, a plaintiff must demonstrate that defendants' conduct "has had an actual adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice." *Capital Imaging, 996 F.2d at 543*; *see also* *Brunswick Corp., 429 U.S. at 488* ("The antitrust laws . . . were enacted for 'the protection of competition, not competitors.'") (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*. **[*26]** Even when a *per se* violation of the antitrust laws occurs, a plaintiff is still required to demonstrate antitrust injury as an element of a successful claim. *See* *Atlantic Richfield Co., 495 U.S. at 341-45 (1990)* ("Insofar as the *per se* rule permits the prohibition of efficient practices in the name of simplicity, the need for the antitrust injury requirement is underscored."). As the Supreme Court explained, **HN14**[] the antitrust injury requirement:

> ensures that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place, and it prevents losses that stem from competition from supporting suits by private plaintiffs . . . . The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior.

Atl. Richfield Co., 495 U.S. at 345.

CIT argues that the amended complaint lacks any factual allegations of anticompetitive behavior to support its "vague and conclusory" claims of "horizontal and vertical anticompetitive impacts." (CIT's Mem. in Supp. at 12.) However, the gravamen of **[*27]** plaintiffs' amended complaint is that CIT and the other factors agreed that once

CIT refused to credit check a manufacturer, the other factors would refuse to check that manufacturer's credit as well. By participating in the alleged conspiracy, CIT's co-conspirators protected their own market shares. (Am. Compl. P 47.) Moreover, if a co-conspirator abandoned the conspiracy and financed a garment manufacturer that CIT refused to credit check, CIT could nevertheless cripple that garment manufacturer through its alleged control of the piece goods vendors' purchases. (Am. Compl. P 63.) Thus, plaintiffs contend that CIT forged an agreement with its competitors that restricted the supply of factoring to garment manufacturers. That allegation sufficiently pleads injury to the garment manufacturing market. *Primetime 24 Joint Venture*, 219 F.3d at 102 (plaintiff "clearly alleged injury" to competition where it pleading that competitors had eliminated "potential price competition," restricted output, and diminished the quality of service to customers).

IV. *Price Fixing*

CIT argues that plaintiffs' claim of price fixing is inadequate because it lacks any allegation that **[*28]** the factors ever discussed, much less agreed on, any prices or terms for their factoring services. (CIT's Mem. in Supp. at 11.) Plaintiffs respond that the conduct alleged in their boycotting claim resulted in illegal price-fixing *per se*. (Pls.' Mem. in Opp. at 11.)

HN15[] A horizontal price fixing conspiracy is a *per se* unreasonable restraint of trade. *See United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 218, 84 L. Ed. 1129, 60 S. Ct. 811* ("Under the Sherman Act, a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal *per se*.").

While the alleged conspiracy in this case was the product of a horizontal agreement, it was not a price fixing agreement. Plaintiffs argue that the factors' denial of credit is analogous to the facts of *Catalano v. Target Sales, Inc., 446 U.S. 643, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)*. In *Catalano*, beer wholesalers agreed not to extend credit to any retailers and to sell their product only when they received payment in advance or on delivery. *Catalano, 446 U.S. at 644*. **[*29]** The Court held that

> it is virtually self-evident that ***HN16***[] extending interest-free credit for a period of time is equivalent to giving a discount equal to the value of the use of the purchase price for that period of time. Thus, credit terms must be characterized as an inseparable part of price. An agreement to terminate the practice of giving credit is thus tantamount to an agreement to eliminate discounts, and thus falls squarely within the traditional *per se* rule against price fixing.

Catalano, 446 U.S. at 648. However, unlike *Catalano*, plaintiffs do not allege that CIT and its co-conspirators terminated the practice of providing credits to their customers. Instead, plaintiffs claim that defendants singled out the DFL Apparel companies in denying their credit.

Moreover, the amended complaint states that the factors entered the agreement to assure that "none of conspiring factors [would] incur a credit risk for a customer that appears to be worthy of credit but whose ability to remain in business is [threatened] by a competing factor's decision to deny credit." (Am Compl. P 54.) From that allegation, plaintiffs add in conclusory fashion that **[*30]** the denial of credit also served to stabilize the factors' prices due to the uniform reduction of credit risk. However, at no time do they state how the market-wide denial of credit to specific companies affected market prices. In addition, as noted by CIT, there is no allegation that the factors ever discussed "any prices or terms for their factoring services - *e.g.*, interest rates, payment terms, credit limits or any aspects of the 'price' of the services." (CIT's Mem. in Supp. at 11.)

Plaintiffs' amended complaint fails to allege facts to state a claim for price fixing. Accordingly, plaintiffs' price fixing claim is dismissed.

V. *Monopolization*

HN17[] *Section 2* of the Sherman Act prohibits persons from combining or conspiring to monopolize trade or commerce among the several States . . . ." *15 U.S.C. § 2*; *see also AD/SAT, 181 F.3d at 232*. To state a claim under *Section 2*, a plaintiff must plead two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic **[*31]** accident." United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966). Monopoly power is defined "as the power to control prices in the relevant market or to exclude competitors." Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 596, n. 20, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985). CIT argues that plaintiffs have failed to allege a relevant product market or that CIT abused its monopoly power. [2]

1. *Relevant Market*

HN18[] "A complaint must allege a relevant product market in which the anticompetitive effects of the challenged activity can be assessed." Yellow Page Solutions, Inc. v. Bell Atlantic Yellow Pages Co., 2001 U.S. Dist. LEXIS 18831, No. 00 Civ. 5663 (MBM), 2001 WL 1468168 (S.D.N.Y. Nov. 19, 2001) (citing Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 29, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)). **[*32]** Because market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market. Todd, 275 F.3d at 199; *see also* Hayden Publ'g Co. v. Cox Broad. Corp., 730 F.2d 64, 70 n.8 (2d Cir. 1984) ("The conclusion that genuine issues of material fact preclude a finding as to [the] relevant market as a matter of law is not unexpected. It frequently has been observed that 'a pronouncement as to market definition is not one of law, but of fact . . . .'").

"**HN19**[] To survive a Rule 12(b)(6) motion to dismiss, an alleged product market must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes -- analysis of the interchangeability of use or the cross-elasticity of demand, and it must be plausible." Todd, 275 F.3d at 199 (internal citations omitted); *accord* Hack v. President & Fellows of Yale Coll., 237 F.3d 81, 86 (2d Cir. 2000); *see also* Yellow Page Solutions, 2001 U.S. Dist. LEXIS 18831, 2001 WL 1468168, at *12. "Cases in which dismissal on the pleadings is appropriate frequently involve either (1) failed attempts to limit **[*33]** a product market to a single brand, franchise, institution, or comparable entity that competes with potential substitutes or (2) failure even to attempt a plausible explanation as to why a market should be limited in a particular way." Todd, 275 F.3d at 199.

Here, the relevant markets alleged are factoring in the domestic garment manufacturing industry and factoring in the domestic piece goods industry. (Am. Compl. P 65.) Moreover, plaintiffs distinguish factoring from other forms of credit financing on the ground that factors "bear any and all losses stemming from [their] customers' insolvency or other financial inability to pay for goods that are sold and shipped by the client." (Am. Compl. P 39.) Whether that market definition is appropriate for plaintiffs' antitrust claim is a fact-intensive inquiry that cannot be resolved at this juncture.

2. *Abuse of Monopoly Power*

HN20[] Possession of monopoly power does not violate Section 2 of the Sherman Act. Plaintiffs must demonstrate that defendants abused their market power in either its acquisition or maintenance. Berkey Photo Inc. v. Eastman Kodak Co., 603 F.2d 263, 275 (2d Cir. 1979) ("defendant **[*34]** must refrain from conduct directed at smothering competition."); *see also* Olympia Equip. Leasing Co. v. Western Union Telegraph Co., 797 F.2d 370, 376-77 (7th Cit. 1986) (Posner, J.). A Section 2 monopolization claim requires an allegation that defendants willfully acquired or maintained monopoly power, "as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992); *see also* Am. Academic Suppliers, Inc. v. Beckley-Cardy, Inc., 922 F.2d 1317, 1322 (7th Cir. 1999) (citing United States v. Aluminum Co. of Am., 148 F.2d 416 (2d Cir. 1945)) (monopolization by improper methods usually involves repelling or intimidating new entrants into a market through predatory pricing). **HN21**[] To demonstrate attempted monopolization, plaintiffs must prove that defendant engaged in predatory or anticompetitive conduct with a specific intent to monopolize and a dangerous possibility of achieving monopoly power. Spectrum Sports v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884

[2] CIT also alleged that plaintiffs Section 2 claims should be dismissed because they failed to allege an antitrust injury. As discussed above, plaintiffs have sufficiently pleaded an antitrust injury at this stage.

(1993). **[*35]** Anticompetitive conduct is "the use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor." Covad Comms. Co. v. BellSouth Corp., 299 F.3d 1272, 2002 WL 1777009 (11th Cir. 2002). Both monopolization and attempted monopolization claims require anticompetitive behavior by the defendant. Invamed Inc. v. Barr Labs., Inc., 22 F. Supp. 2d 210, 218 (S.D.N.Y. 1998).

CIT contends that plaintiffs allege no abuse of market power because their one allegation, "that [CIT] decided to stop credit checking the manufacturing plaintiffs," was not anticompetitive conduct. (CIT's Mem. in Supp. at 17.) However, CIT construes plaintiffs' claim too narrowly.

Plaintiffs assert that CIT increased its market share of domestic piece goods manufacturing to 90 percent through the acquisition of several competitors, giving it a "near stranglehold on garment manufacturers" because its unilateral decisions equate to "blacklisting a manufacturer among factors." (Pls.' Mem. in Supp. at 15-16.) Thus, plaintiffs adequately plead CIT's market power in the piece goods factoring market. Moore U.S.A., Inc. v. Standard Register Co., 139 F. Supp. 2d 348, 364 (W.D.N.Y. 2001) **[*36]** (alleging market share that SRC alleges in this action: 65 percent) (citing Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 924 (9th Cir. 1980)).

Plaintiffs further contend that CIT engaged in anticompetitive behavior through its aggressive mergers. However, ***HN22***[] "the mere fact that a merger eliminates competition between the firms concerned has never been a sufficient basis for illegality." IV Phillip E. Areeda et al., ***Antitrust Law*** P 901a (1998) (hereinafter "Areeda"); *see also* Irving Scher, *Antitrust Adviser* § 3.61 at 3-167 (4th ed. 2001) (horizontal mergers are much more likely to be procompetitive than anticompetitive.). "Competing firms typically merge for reasons entirely unrelated to effects on marketwide output or price - for example, to achieve economies of scale or integration, to put inefficiently run assets into the hands of superior management, to resolve management succession for an individually owned enterprise, or for tax or other reasons." Areeda P 901a. Plaintiffs also assert that CIT's alleged illegal boycotts constitute anticompetitive behavior to plead a monopolization claim.

As stated above, plaintiffs allege that through **[*37]** its control of the piece goods market, CIT influenced other factors to deny credit checks, and therefore financing, to garment manufacturers that could have been financed under normal market conditions. Thus, CIT, through its control of piece goods factoring, discouraged other factors from their participation in factoring for the garment industry. *See, e.g.,* United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224 n.59, 84 L. Ed. 1129, 60 S. Ct. 811 (1940) (Sections 1 and 2 "overlap" in the sense that a monopoly under section 2 is a "species of restraint" under section 1.). That contention sufficiently alleges anticompetitive conduct to support plaintiffs' Section 2 claim. Accordingly, CIT's motion to dismiss plaintiffs' Section 2 monopolization claim is denied.

VI. *Standing*

1. *Antitrust Claims*

CIT moves to dismiss plaintiffs Donald and Barbara Weiner, Dresses for Less, Inc., Garden City Dresses for Less, Inc., and DFL Management for lack of standing because their injuries are "merely derivative" and do not constitute an antitrust injury. (CIT's Mem. in Supp. at 19.) As stated above, an antitrust plaintiff's injury must be the kind of injury at which **[*38]** the antitrust laws were directed. Brunswick Corp., 429 U.S. at 489. Thus, ***HN23***[] "merely derivative injuries sustained by employees, officers, stockholders, and creditors of an injured company do not constitute 'antitrust injury' sufficient to confer antitrust standing." G.K.A. Beverage Corp. v. Honickman, 55 F.3d 762, 766 (2d Cir. 1994) (citing Southwest Suburban Bd. of Realtors, Inc. v. Beverly Area Planning Ass'n, 830 F.2d 1374, 1378 (7th Cir. 1987)). "It follows naturally that a party in a business relationship with an entity that failed as a result of an antitrust violation has not suffered the antitrust injury necessary for antitrust standing." G.K.A. Beverage Corp., 55 F.3d at 766-67 (8th Cir. 1992) (denying antitrust standing where sole shareholder's injury stemmed from failure of corporation)); *accord* Lovett v. Gen. Motors Corp., 975 F.2d 518, 520 (8th Cir. 1992) (dismissing car dealership owner's antitrust claims because he was not the target of anticompetitive conduct but rather suffered a consequential injury). This prerequisite necessitates that the injured party be a participant in the same **[*39]** market as the alleged malefactors. Automated Salvage Transport, Inc. v. Wheelabrator Env't Sys., Inc., 155 F.3d 59, 78 (2d

Cir. 1998) (quoting Bhan v. NME Hosps., Inc., 772 F.2d 1467, 1470 (9th Cir.1985); *see also* Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 989 (9th Cir 2000) ("Antitrust injury requires that the 'injured party be a participant in the same market as the alleged malefactors.'"); Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 539, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983) (denying antitrust standing to party that was "neither a consumer nor a competitor in the market in which trade was restrained").

The DFL Apparel companies participate in the factoring market as consumers and therefore, their injury is a direct consequence of the alleged antitrust violations. However, the injuries suffered by Donald and Barbara Weiner, Garden City Dresses for Less, Inc., and DFL Management as a result of the alleged antitrust violations are entirely derivative of the direct antitrust injury suffered by the DFL Apparel companies. Accordingly, CIT's **[*40]** motion to dismiss the antitrust claims asserted by Donald and Barbara Weiner, Dresses for Less, Inc., Garden City Dresses for Less, Inc., and DFL Management for lack of standing is granted.

2. *Shareholder Derivative Claims*

CIT contends that Barbara Weiner's derivative shareholder claims asserted on behalf of ISB and Stella Bishop should be dismissed because she has failed to allege the reason that she did not secure initiation of those claims with the boards of those companies. (CIT's Mem. in Supp. at 19.)

The amended complaint states that Barbara Weiner owns a 50 percent stake in ISB and a 45 percent of Stella Bishop. (Am. Compl. PP 20, 22.) Plaintiffs allege that ISB's other 50 percent shareholder refused to consent to this lawsuit, and that Stella Bishop's other 45 percent [3] shareholder "would plainly never consent [to this action]" because he and the Weiners are involved in several bitter lawsuits. (Am. Compl. P 23.) In addition, Stella Bishop's other 45 percent shareholder owns companies that are currently being factored by CIT. (Am. Compl. P 24.)

[*41] When a shareholder brings a derivative lawsuit, her complaint must set forth either the efforts of the plaintiff to secure the initiation of such action by the board or the reasons for not making such effort. *See* Fed. R. Civ. Proc. 23.1; Business Corporation Law § 626(c). "Where the directors and controlling shareholders are antagonistic, adversely interested, or involved in the transaction attracted, a demand on them is presumptively futile and need not be made. Cathedral Estates v. Taft Realty Corp., 228 F.2d 85, 88 (2d Cir. 1955); *see also* Galef v. Alexander, 615 F.2d 51 (2d Cir. 1980); General Elec. Co. v. Bucyrus-Erie Co., 563 F. Supp. 970, 974 (S.D.N.Y. 1983).

The amended complaint's allegations regarding ISB's other shareholder's refusal to consent and the animosity between Stella Bishop's major shareholders sufficiently plead that demand would be futile. Accordingly, CIT's motion to dismiss the shareholder derivative claims is denied.

3. *DFL Apparel Group*

CIT asserts that the DFL Apparel Group has no standing to sue on behalf of the companies it represents. ***HN24***[] An association may assert the rights of its members **[*42]** under the doctrine of associational standing. Hunt v. Washington State Apple Adver. Comm'n, 432 U.S. 333, 343-45, 53 L. Ed. 2d 383, 97 S. Ct. 2434 (1977); *accord* Irish Lesbian and Gay Org. v. Giuliani, 143 F.3d 638, 649 (2d Cir. 1998). To bring suit on behalf of its membership, the organization must demonstrate that "(a) its members would otherwise have standing to sue in their own right; (b) the interests it seeks to protect are germane to the organization's purpose; and (c) neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit." Hunt, 432 U.S. at 343; *see* Rent Stabilization Ass'n v. Dinkins, 5 F.3d 591, 596 (2d Cir. 1993) (applying *Hunt* test).

HN25[] An organization lacks standing to sue for money damages on behalf of its members if the damages "are not common to the entire membership, nor shared by all in equal degree," so that "the fact and extent of injury require[s] individualized proof." Warth v. Seldin, 422 U.S. 490, 515-16, 45 L. Ed. 2d 343, 95 S. Ct. 2197 (1975); *accord* Sun City Taxpayers' Ass'n v. Citizens Utils. Co., 45 F.3d 58, 61 (2d Cir. 1995). **[*43]**

---

[3] The remaining 10 percent of Stella Bishop is owned by a third shareholder. Any dissenting shareholder of Stella Bishop could block a corporate action because its by-laws require unanimous shareholder consent for corporate actions. (Am. Compl. P 22.)

DFL Apparel fails the third prong of the *Hunt* test. Recovery in this case would require individualized proof by each of the companies affected by CIT's alleged anticompetitive behavior. Accordingly, CIT's motion to dismiss DFL Apparel as a plaintiff is granted.

VII. *State Law Claims*

1. *Donnelly Act Claims*

CIT moves to dismiss plaintiffs' Donnelly Act claims on the same grounds that it moved to dismiss the Sherman Act claims. ***HN26***[] The Donnelly Act, *N.Y. Gen. Bus. Law § 340*, prescribes that "every contract, agreement, arrangement or combination whereby a monopoly . . . is or may be established or maintained, or whereby competition . . . may be restrained" is illegal. *N.Y. Gen. Bus. Law § 340(1)*. "The Act was closely patterned after the Sherman Act and has been narrowly construed to encompass only those causes of action falling within the Sherman Act." *Yankees Entm't & Sports Network, LLC v. Cablevision Sys. Corp., 224 F. Supp. 2d 657, 2002 WL 31010490*, at *14 (S.D.N.Y. 2002) (citing *State v. Mobil Oil Corp., 38 N.Y.2d 460, 381 N.Y.S.2d 426, 427, 344 N.E.2d 357 (1976)*); *accord* *Great Atlantic & Pacific Tea Co., Inc. v. Town of East Hampton, 997 F. Supp. 340 (E.D.N.Y. 1998)* **[*44]** (finding Donnelly Act is modeled after the Sherman Antitrust Act and is generally interpreted in accordance with federal precedent); *Anheuser-Busch, Inc. v. Abrams, 71 N.Y.2d 327, 335, 525 N.Y.S.2d 816, 820, 520 N.E.2d 535 (1988)* (Donnelly Act was modeled on the Sherman Act and is to be construed in accord with it). Thus, CIT's motion to dismiss the Donnelly Act claims is granted in part and denied in part in accord with this Court's rulings set forth above.

2. *Contractual Good Faith and Fair Dealing*

Plaintiffs contend that CIT breached its duty of good faith when it deliberately inflated the DFL Apparel companies' debts by authorizing piece goods vendors to ship unordered merchandise to those companies. (Am. Compl. P 69.) Plaintiffs further contend that CIT breached its duty of good faith when it refused to credit check one DFL Apparel company because a separate DFL Apparel company was in arrears (Am. Compl. P 70); enforced a combined credit limit for the DFL Apparel companies instead of a separate limit for each company (Am. Compl. P 71); coerced the DFL Apparel companies to accept excessive advances on its credit bearing higher interest charges and fees (Am. **[*45]** Compl. P 72); orchestrated the group boycotts that cut off the DFL Apparel companies' credit (Am. Compl. P 73); and induced the DFL Apparel companies to stay in business after June 2000 by falsely promising that it would continue to finance the companies (Am. Compl. PP 74-75).

HN27[] Under New York law, every contract contains an implied covenant of good faith and fair dealing. *Gelder Med. Group v. Webber, 41 N.Y.2d 680, 684, 394 N.Y.S.2d 867, 363 N.E.2d 573 (1977)*; *see also* Restatement (Second) of Contracts P 205 comment a (1981) ("Good faith performance or enforcement of a contract emphasizes faithfulness to an agreed common purpose and consistency with the justified expectations of the other party . . . .").

With respect to plaintiffs' claim regarding the precondition of Donald Weiner's signature on purchase orders, factual issues exist including whether Weiner and CIT had a guarantee agreement giving rise to an obligation of good faith dealing and whether his signature was a condition of that agreement. At this stage, however, plaintiffs have sufficiently alleged breach of good faith dealing with respect to the unauthorized shipments approved by CIT. Accordingly, **[*46]** CIT's motion to dismiss the good faith and fair dealing claims of the amended complaint is denied.

With respect to the remainder of the good faith claims, however, those allegations concern CIT's extension or refusal of credit to DFL Apparel companies. The factoring agreements ran between CIT and a piece goods vendor. Thus, the lack of contractual privity between CIT and the DFL Apparel companies precludes any good faith claim. In addition, plaintiffs further concede that CIT's agreements with the piece goods vendors permitted them to refuse credit checks for any reason or no reason at all. Thus, plaintiffs cannot claim that CIT failed to perform those contracts in good faith.

3. *Breach of Fiduciary Duty*

Plaintiffs argue that CIT breached a fiduciary duty when it advised Donald Weiner that it would continue to extend him credit and failed to do so. (Pls. Mem. in Opp. at 23.) ***HN28***[] To state a claim for aiding and abetting a breach of fiduciary duty under New York law, plaintiffs must allege (1) a breach by a fiduciary of obligations to another, and (2) that the defendant knowingly induced or participated in the breach. *Wight v. Bankamerica Corp., 219 F.3d 79, 91 (2d Cir. 2000)*. **[*47]** The existence of a fiduciary duty is often "a fact-specific inquiry reserved for a jury." *Official Comm. of Unsecured Creditors v. Donaldson, Lufkin & Jenrette Securities Corp., 2002 U.S. Dist. LEXIS 3747*, *No. 00 Civ. 8688 (WHP), 2002 WL 362794*, *9 (S.D.N.Y. Mar. 6, 2002). Under New York Law, "'a fiduciary relationship exists from the assumption of control and responsibility, and is founded upon trust reposed by one party in integrity and fidelity of another.'" *Deleu v. Scaife, 775 F. Supp. 712, 715 (S.D.N.Y. 1991)* (quoting *Beneficial Commercial Corp. v. Murray Glick Datsun, Inc., 601 F. Supp. 770, 772 (S.D.N.Y.1985))*; *see also* *Restatement (Second) of Torts § 874 cmt. a* (1977) (fiduciary relationship exists "when one [party] is under a duty to act for or to give advice for the benefit of another upon matters within the scope of the relation"). Moreover, fiduciary relationships can arise when a party "trusts or relies on another or where confidence is based on prior business dealings." *Olshansky v. Sutton, 2001 U.S. Dist. LEXIS 945*, *No. 00 Civ. 3539 (LAP), 2001 WL 99857*, at *5 (S.D.N.Y. Feb. 6, 2001). Claims alleging the existence of a fiduciary duty are usually **[*48]** not subject to dismissal in a 12(b)(6) motion. *Olshansky, 2001 U.S. Dist. LEXIS 945, 2001 WL 99857*, at *5.

Given the factually intensive nature of a fiduciary duty inquiry, CIT's opposition to plaintiffs' fiduciary claim is better addressed on summary judgment. Accordingly, CIT's motion to dismiss the breach of fiduciary duty claim is denied.

VIII. *Uptown Credit Group's Motion To Dismiss*

In the amended complaint's first, second and fourth causes of action, plaintiffs allege that UCG violated *Section 1* of the Sherman act and the Donnelly Act by participating in the agreement to deny credit to the DFL Apparel companies.

In addition to joining CIT's 12(b) motions, UCG moves to dismiss those causes of action on the ground that plaintiffs have not sufficiently alleged facts that tie UCG to the factoring conspiracy. (UCG's Mem. in Supp. at 5-6.) Plaintiffs allege that CIT combined with its co-conspirators to act as a cartel under the auspices of the UCG. (Am. Compl. PP 4-5.) Through the UCG, the conspirators assured that the DFL Apparel companies would not be extended credit on purchases from piece goods vendors. (Am. Compl. P 48.) Those allegations adequately allege that UCG participated **[*49]** in the antitrust violations. *See* *15 U.S.C. § 1* (liable persons may include associations); *Hydrolevel Corp. v. Am. Soc. of Mech. Eng'rs, Inc., 635 F.2d 118, 126 (2d Cir. 1980)* ("It is difficult to see how a trade association should be treated any differently than a business competitor, especially when it is the association's standing and influence that makes the conspiracy effective and possible. In a variety of contexts, [associations] are obligated to take suitable precautions to avoid antitrust violations."); *Vandervelde v. Put & Call Brokers & Dealers Ass'n, 344 F. Supp. 118*, *155 (S.D.N.Y. 1972) (an association found liable "as an independent legal entity"). Accordingly, UCG's motion to dismiss the amended complaint is denied.

Conclusion

For the reasons set forth above, CIT's motion to dismiss the first cause of action is granted with respect to plaintiffs' price fixing claim and denied with respect to the boycotting claim. CIT's motions to dismiss the second, third, fourth, fifth, and sixth causes of action are denied. UCG's motion to dismiss is also denied.

HN1[] **Motions to Dismiss, Failure to State Claim**

In deciding a *Fed. R. Civ. P. 12(b)(6)* motion, a court must accept the allegations contained in the complaint as true, and draw all reasonable inferences in favor of the plaintiff; it should not dismiss the complaint unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. The issue is not whether the plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims.

HN2[] **Motions to Dismiss, Failure to State Claim**

In antitrust cases, as in all federal cases, only a short plain statement of a claim for relief which gives notice to the opposing party is required of the complaint. Furthermore, in antitrust cases dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly. However, allegations must be stated in terms that are neither vague nor conclusory. Conclusory allegations which merely recite the litany of antitrust will not suffice; a court may insist on some specificity in pleading before allowing a potentially massive factual controversy to proceed.

See 15 U.S.C.S. § 15.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN6[] **Private Actions, Standing**

Courts have outlined three standing requirements for would-be antitrust plaintiffs. First, the plaintiff must allege conduct in violation of the antitrust laws. Second, the plaintiff must allege a relevant market product. Finally, the plaintiff must allege an "antitrust injury," that is, an injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful.

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Remedies > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Bad Faith

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Patent Law > Infringement Actions > General Overview

Patent Law > Infringement Actions > Burdens of Proof

HN7[] **Regulated Practices, Intellectual Property**

A plaintiff seeking damages for bad faith patent infringement must show that the injury for which it seeks to recover is the type the antitrust laws were intended to prevent and flows from that which makes defendant's acts unlawful. In a suit alleging antitrust injury based upon a bad faith prosecution theory it is obvious that the costs incurred in defense of the prior patent infringement suit are an injury which "flows" from the antitrust wrong.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Bad Faith

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN8[] **Bad Faith, Fraud & Nonuse, Bad Faith**

The United States District Court for the Eastern District of New York agrees with other courts that a claim for relief under antitrust laws may be based on the bad faith assertion of a patent against products known by the patent holder not to infringe the patent.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN9[] **Relevant Market, Product Market Definition**

Without a definition of the relevant product market, there is no way to measure a company's ability to act as a monopolist.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN10[] **Relevant Market, Product Market Definition**

A relevant market is comprised of a product market, those commodities or services that are reasonably interchangeable by consumers for the same purposes, and a geographic market, the area in which sellers of the relevant market product effectively compete. The product market is defined in relation to interchangeable goods. Commodities reasonably interchangeable by consumers for the same purposes make up that part of the trade or commerce, monopolization of which may be illegal. Reasonable interchangeability is determined by reference to cross-elasticity of demand and similarity of purpose and clientele of each product. In general, then, the question is whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN11[] **Regulated Practices, Market Definition**

Cross elasticity of demand refers to the change in the demand by consumers for one product as a result of a change in the price of another product.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN12[] **Amendment of Pleadings, Leave of Court**

Where the possibility exists that a defect can be cured and there is no prejudice to the defendant, leave to amend at least once should normally be granted as a matter of course.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN13[] Pleadings, Amendment of Pleadings

Fed. R. Civ. P. Rule 15(a) provides that a court should grant leave to amend freely when justice so requires.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN14[] Pleadings, Amendment of Pleadings

Although the decision whether to grant leave to amend is within the discretion of a district court, refusal to grant leave must be based on a solid ground.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN15[] Amendment of Pleadings, Leave of Court

"Futility" provides a solid ground on which to deny leave to amend. Similarly, leave to amend can properly be denied where the motion is made after an inordinate delay, no satisfactory explanation is made for the delay, and the amendment would prejudice the defendant.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN16[] Pleadings, Amendment of Pleadings

In addressing the proposed futility of an amendment, the proper inquiry is comparable to that required on a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*. With respect to claims alleged to be without merit, a court must construe the facts alleged by the party opposed to the amendment as true and view them in the light most favorable to that party.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Torts > Public Entity Liability > Immunities > Judicial Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN17[] Exemptions & Immunities, Noerr-Pennington Doctrine

The Noerr-Pennington Doctrine allows a party to petition the government for redress of a grievance, such as a patent infringement claim, without the petitioning party being subject to antitrust claims as a result of its efforts. Borne out of *First Amendment* principles guaranteeing the right to petition the government, the doctrine thus immunizes legislative, executive, and judicial activity from antitrust liability even if the activity is designed to eliminate competition.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN18[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Courts recognize a limited exception to Noerr-Pennington immunity known as the "sham" exception. There is a two-part definition of "sham" litigation: First, a lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under the Noerr-Pennington doctrine, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of the definition of sham, the court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor through the use of the government process--as opposed to the outcome of that process--as an anticompetitive weapon. Thus, for a suit to violate the antitrust laws it must be a sham both objectively and subjectively. Furthermore, even when the law or the facts appear questionable or unfavorable at the outset, a party may have an entirely reasonable ground for bringing suit. This two-step inquiry applies to determining whether a single action constitutes sham petitioning.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Governments > Legislation > Effect & Operation > Prospective Operation

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN19[] **Noerr-Pennington Doctrine, Sham Exception**

In cases in which the defendant is accused of bringing a whole series of legal proceedings, the test to determine whether the "sham" exception to Noerr-Pennington immunity applies is not "retrospective" but "prospective": Were the legal filings made, not out of a genuine interest in redressing grievances, but as part of a pattern or practice of successive filings undertaken essentially for the purposes of harassment? It is immaterial that some of the claims might, as a matter of chance, have merit. Rather, the relevant issue is whether the legal challenges are brought pursuant to a policy of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN20[] **Misuse of Rights, Patent Misuse Defense**

Patent misuse is generally a defense to patent infringement, which if proven, renders the patent unenforceable until purged.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Bad Faith

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

HN21[] **Bad Faith, Fraud & Nonuse, Bad Faith**

The elements of a claim of patent misuse include a patentee's impermissible use of its patent to broaden the physical or temporal scope of its patent with an anti-competitive effect. Furthermore, patent misuse requires bad faith and some improper purpose.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

HN22[] **Misuse of Rights, Patent Misuse Defense**

A party that did not raise the issue of patent misuse in one action may raise that issue in another action based on a separate assertion of infringement, whether as a defense against the claim of infringement or in a request for declaratory relief.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN23[] **Intentional Interference, Elements**

To state a valid claim under New York law, a plaintiff must allege that the defendant interfered with business or economic relations between the plaintiff and a third party, either (1) with the sole purpose of harming the plaintiff; or (2) by dishonest, unfair, or improper means. The defendant must interfere with the business relationship directly; that is, the defendant must direct some activities towards the third party and convince the third party not to enter into a business relationship with the plaintiff.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN24[] **Preclusion of Judgments, Res Judicata**

It is well settled that the doctrine of res judicata, or claim preclusion, serves to bar litigation of any claim for relief that was available in a prior suit between the same parties or their privies, whether or not the claim was actually litigated. To prove that a claim is precluded under this doctrine, a party must show that (1) the previous action involved an adjudication on the merits; (2) the previous action involved the parties or those in privity with them; and (3) the claims asserted in the subsequent action were, or could have been raised in the prior action.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN25[] **Preclusion of Judgments, Res Judicata**

For purposes of a res judicata analysis, whether a claim that was raised in a previous action or could have been raised therein depends in part on whether the same transaction or connected series of transactions is at issue, and whether the same evidence is needed to support both claims. To ascertain whether two actions spring from the same "transaction" or "claim," a court looks to whether the underlying facts are related in time, space, origin, or motivation; whether they form a convenient trial unit; and whether their treatment as a unit conforms to the parties' expectations or business understanding or usage. As this "same transaction" test indicates, the "could have been" language of the third requirement is somewhat misleading. The question is not whether the applicable procedural rules permitted assertion of the first proceeding; rather, the question is whether the claim was sufficiently related to the claims that were asserted in the first proceeding that it should have been asserted in that proceeding. This analysis entails, in part, consideration as to whether new facts necessary to the second suit were available to the plaintiff at the time the first suit was filed.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN26[] **Preclusion of Judgments, Res Judicata**

With respect to the determination of whether a second suit is barred by res judicata, the fact that both suits involved essentially the same course of wrongful conduct is not decisive; nor is it dispositive that the two proceedings involved the same parties, similar or overlapping facts, and similar legal issues. A first judgment will generally have preclusive effect only where the transaction or connected series of transactions at issue in both suits is the same, that is where the same evidence is needed to support both claims, and where the facts essential to the second were present in the first. If the second litigation involved different transactions, and especially subsequent transactions, there generally is no claim preclusion.

Opinion

MEMORANDUM & ORDER

JOHNSON, District Judge:

Plaintiffs, Marchon Eyewear, Inc. ("Marchon") and Rothanberg, Inc. ("Rothanberg") (collectively, "Plaintiffs"), **[*2]** bring this action against Defendants, Tura LP ("Tura") and Brodart Company ("Brodart") (collectively, "Defendants"), alleging infringement of U.S. Patent No. 4,896,955, entitled "Eyeglass Frame Including Shape-Memory Elements" (the " '955 patent"). Defendants have filed three counterclaims: (1) sham litigation in violation of Section Two of the Sherman Antitrust Act ("Section Two"); (2) tortious interference of prospective economic advantage; and (3) a request for a declaratory judgment of patent misuse. Presently before the Court is Plaintiffs' Motion to Dismiss Defendants' Counterclaims pursuant to *Fed. R. Civ. P. 12(b)(6)*.

BACKGROUND

On January 30, 1990, the '955 patent duly and legally issued and was assigned to CVI/ Beta Ventures Inc. ("Beta"). On September 6, 1995, Beta assigned the '955 patent to Marchon. Marchon then granted an exclusive license under the '955 patent to Rothanberg, which purchases, imports, distributes and sells eyeglass frames containing nickel-titanium shape memory alloy components under the supervision, management and control of Marchon. Under this agreement, Rothanberg has eyeglass frames containing nickel-titanium shape memory alloy components in **[*3]** the state of New York and throughout the United States.

In order to fully understand Defendants' counterclaims, it is necessary to explain the history of litigation between the parties concerning the '955 patent. The '955 patent (as well as a second patent) was the subject of a prior jury trial involving, among others, the same parties that are involved in the instant action. CVI/Beta Ventures, Inc. v. Tura LP ("Tura I"),*905 F. Supp. 1171 (E.D.N.Y. 1995)*, *rev'd in part, vacated in part, 112 F.3d 1146 (Fed. Cir. 1997)*, *cert. denied, 522 U.S. 1109, 140 L. Ed. 2d 105, 118 S. Ct. 1039 (1998)*. In Plaintiffs' previous action against Tura and Brodart for patent infringement, Defendants asserted affirmative defenses and counterclaims challenging the validity of the '955 patent on a number of grounds, and alleging patent misuse and violations of ***antitrust law***. [1] The jury rejected all of Defendants' challenges to validity and found that the patent had not been proven invalid or unenforceable, that Tura had infringed the patent but did not do so willingly, and that Brodart had induced Tura's infringement. *Tura I, 905 F. Supp. at 1203-05*. Defendants subsequently **[*4]** moved for judgment as a matter of law or, in the alternative, for a new trial. This Court denied those motions, entered a judgment consistent with the jury verdict, and ordered an injunction against Defendants. Tura and Brodart appealed, contending that the trial court had erred in its patent claim construction and erroneously instructed the jury. They did not, however, raise any issues of patent validity on appeal. *CVI/Beta Ventures v. Tura LP, 112 F.3d at 1149 n.2*.

The Court of Appeals for the Federal Circuit narrowed the '955 patent's claim construction, and found that under the altered claim construction there was no proof of infringement. *112 F.3d at 1158-60*. It reversed the judgment of infringement, and remanded the matter to this Court for further proceedings in connection with the patent misuse

[1] See Plaintiffs' Memorandum, Ex. 3 (jury verdict in Tura I).

and antitrust counterclaims. *Id. at 1162*. Following this decision, the Federal Circuit issued **[*5]** an order suspending the injunction against Defendants that this Court had imposed in November 1995.

In the present lawsuit, Plaintiffs allege that Defendants have distributed and sold new eyeglass frame models that infringe the '955 patent. Defendants counterclaim that Plaintiffs are engaged in sham litigation and that they are tortiously interfering with Defendants' prospective economic advantage, and request that the Court grant a declaratory judgment of patent misuse against Plaintiffs.

Defendants allege that despite the ultimate outcome of Tura I, in which the Federal Circuit found that Marchon failed to prove that the memory metal frames sold by Tura infringed '955 patent, Plaintiffs have continued to threaten all potential manufacturers or suppliers of memory metal eyeglass frames with patent infringement litigation and "otherwise intimidate such manufacturers and suppliers." (Answer and Counterclaims to Amend. Compl. at P 77). Defendants allege that, given the interpretation placed on the '955 patent in Tura I, there is no reasonable basis for Plaintiffs to assert a second time that Tura's memory metal eyeglass frames infringe the '955 patent.

Plaintiffs claim that **[*6]** before instituting the current action of patent infringement, they tested Defendants' new Turaflex models to determine whether they infringed 'the '955 patent and found that they did. Defendants counter that Plaintiffs have not produced any evidence substantiating their belief that the models infringe the patent. Thus, Defendants conclude, Plaintiffs have "engaged in a pattern of baseless suits against Tura designed to burden Tura with expensive litigation, with the intended anti-competitive purpose of hindering Tura in its ability to compete against Marchon in the memory metal eyeglass frame market." (Answer to Amend. Compl. at P 79).

Defendants also claim that Plaintiffs intentionally interfered with their business relations with a number of Japanese and other foreign manufacturers and exporters of memory metal eyeglass frames, such as Nakanishi Optical ("Nakanishi"), by intimidating, coercing, and/ or otherwise chilling their willingness to supply Defendants with memory metal eyeglass frames. Defendants claim, on information and belief, that one of the means through which Plaintiffs have interfered with their foreign business relationships has been through threats of patent infringement **[*7]** litigation against such manufacturers and exporters. Defendants allege that as a result of these threats, their ability to obtain memory metal eyeglass frames for resale in the United States has been damaged.

Such threats to foreign manufacturers are particularly harmful in this instance, Defendants reason, because the '955 patent relates to memory metal eyeglass frames, a highly technological product that is very difficult to manufacture. Only a limited number of Japanese companies have ever had the ability to manufacture them in any substantial quantity. According to Defendants, they have never been able to find any United States manufacturer to supply memory metal eyeglass frames.

PROCEDURAL HISTORY

Plaintiffs filed their original Complaint in this matter in early 1998. Defendants filed their original Answer and Counterclaim on April 7, 1998. Defendants' response contained none of the counterclaims presently before the Court. On April 28, 1998, pursuant to *Fed. R. Civ. P. 15(a)*, Defendants amended their counterclaims, without leave of this Court, but prior to Plaintiffs filing of responsive pleadings to Defendants' original counterclaim. This Amended Answer and Counterclaims **[*8]** added six new counterclaims.

Subsequently, Plaintiffs moved to strike Defendants' affirmative defense relating to the validity of the patent at issue, and moved to dismiss Defendants' request for declaratory judgment of patent invalidity. On March 28, 1999, this Court struck from Defendants' Amended Answer and Counterclaims the affirmative defense that the '955 patent is invalid and dismissed with prejudice Defendants' counterclaim seeking declaratory judgment that the '955 patent is invalid. *Marchon Eyewear, Inc. v. Tura LP, 1999 U.S. Dist. LEXIS 22993 (E.D.N.Y. March 28, 1999)*. Furthermore, the Court directed Defendants to serve and file a second Amended Answer and Counterclaims conforming with its order.

On April 19, 1998, Defendants filed a Second Amended Answer and Counterclaims. Thereafter, Plaintiffs filed a motion for judgment on the pleadings to dismiss certain of Defendants' counterclaims, including the three presently before the Court. While this motion was pending before this Court, Plaintiffs requested leave to amend their Complaint to add new claims of patent infringement. In June 2000, this Court approved a Stipulation and Order granting Plaintiffs **[*9]** leave to file an amended complaint. Pursuant to that Order, Plaintiffs filed their first Amended Complaint on June 21, 2000, and on July 13, 2000, Defendants filed their Answer and Counterclaims to the Amended Complaint. Thus, presently before the Court are three counterclaims: (1) sham litigation in violation of Section Two of the Sherman Antitrust Act; (2) tortious interference of prospective economic advantage; and (3) a request for a declaratory judgment of patent misuse.

DISCUSSION

I Standard of Review

HN1[] In deciding a *Rule 12(b)(6)* motion, "a court must accept the allegations contained in the complaint as true, and draw all reasonable inferences in favor of the [plaintiff]; it should not dismiss the complaint 'unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.'" *Sheppard v. Beerman, 18 F.3d 147, 150 (2d Cir. 1994)* (citations omitted). "The issue is not whether plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683, 71 Ohio Op. 2d 474 (1974).* **[*10]**

HN2[] In antitrust cases, as in all federal cases, only a "short plain statement of a claim for relief which gives notice to the opposing party" is required of the complaint. See *Intellective, Inc. v. Massachusetts Mutual Life Insurances Co., 190 F. Supp. 2d 600, 607 (S.D.N.Y. 2002)*. Furthermore, the Supreme Court has warned that in antitrust cases "dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly." Id. (quoting *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974))*. However, allegations must be stated in terms that are neither vague nor conclusory. *Mover's & Warehousemen's Ass'n. of Greater New York v. Long Island Moving et. al., 1999 U.S. Dist. LEXIS 20667 at *10 (E.D.N.Y. Dec. 27, 1999)*. Conclusory allegations which "merely recite the litany of antitrust will not suffice"; the Court may insist on some specificity in pleading before allowing a potentially massive factual controversy to proceed. Id. (quotations omitted).

II Sham Litigation Antitrust Claim

HN3[] Section Two makes it unlawful to "monopolize, or attempt to monopolize, or combine **[*11]** or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations ..." *15 U.S.C. § 2*. There are two elements to a Section Two claim: "1) the possession of monopoly power in the relevant market, and 2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of superior product, business acumen, or historic accident." *Clorox Co. v. Sterling Winthrop, Inc., 117 F.3d 50, 61 (2d Cir. 1997)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*.

Defendants base their antitrust claim on the theory of sham litigation, claiming that Plaintiffs are using the judicial system, and this Court in particular, as an indirect means of curbing Defendants' ability to compete against them. Specifically, Defendants allege that, in light of the outcome in Tura I, the instant infringement action by Plaintiffs against Defendants is "sham litigation," borne of anti-competitive and unlawful purposes, and asserted in violation of the antitrust laws. Plaintiffs **[*12]** respond that Defedants (1) do not have standing to bring such a claim; (2) have failed to state an antitrust violation under the Sherman Antitrust Act; and (3) that, in any event, their conduct is immune from such antitrust challenges under the Noerr-Pennington doctrine.

A Antitrust Standing

Before assessing whether Defendants have properly alleged the necessary elements of a Section Two sham litigation claim, this Court must first determine whether Defendants have standing to bring a counterclaim under Section Two. ***HN4***[] The Clayton Act, *15 U.S.C. §§ 12 et seq.*, permits private parties to institute actions under the federal antitrust laws. See *15 U.S.C. § 15* ***HN5***[] ("Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States …, and shall recover threefold the damages by him sustained.").

"Although these laws specify that 'any person' may sue, the ***HN6***[] courts have outlined three standing requirements for would-be antitrust plaintiffs." *Intellective, Inc. 190 F. Supp. 2d at 607*. First, the plaintiff must allege **[*13]** conduct in violation of the antitrust laws. Id.; see also *Int'l Audiotext Network, Inc. v. American Tel & Tel. Co., 893 F. Supp. 1207, 1211 (S.D.N.Y. 1994)*, *aff'd*, *62 F.3d 69 (2d Cir. 1995)*. Second, the plaintiff must allege a relevant market product. Id. Finally, the plaintiff must allege an "antitrust injury," that is, an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Intellective Inc., 190 F. Supp. 2d at 607* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977))*. Plaintiffs contend that Defendants do not have antitrust standing because they have failed to allege either an antitrust injury or a relevant product market.

B. Antitrust Injury

Plaintiffs first argue that Defendants have not alleged an antitrust injury. Specifically, Plaintiffs claim that although Defendants have alleged injury to themselves, they have not alleged an injury to competition generally, as is required to assert an antitrust claim.

In the patent field, the recoverability of damages by victims **[*14]** of bad faith patent infringement suits was first established in the Handgards I and Handgards II cases, *Handgards Inc., v. Ethicon, Inc., 601 F.2d 986 (9th Cir.)*, *cert. denied, 444 U.S. 1025, 62 L. Ed. 2d 659, 100 S. Ct. 688, 100 S. Ct. 689 (1980)*, *on remand*, *552 F. Supp. 820 (N.D. Cal.)*, *aff'd*, *743 F.2d 1282 (9th Cir.)*, *cert denied, 469 U.S. 1190, 83 L. Ed. 2d 968, 105 S. Ct. 963 (1985)*. There, the Ninth Circuit explicitly held that pleading the costs of defending such suits alleges a cognizable antitrust injury:

> ***HN7***[] Plaintiff must show that the injury for which it seeks to recover is "the type the antitrust laws were intended to prevent" and "flows from that which makes defendant's acts unlawful." In a suit alleging antitrust injury based upon a bad faith prosecution theory it is obvious that the costs incurred in defense of the prior patent infringement suit are an injury which "flows" from the antitrust wrong. *Handgards I, 601 F.2d at 997*.

This reasoning has been followed by various courts. See *Bio-Technology Gen. Corp. v. Genentech Inc., 886 F. Supp. 377, 380 (S.D.N.Y. 1995)* ("In **[*15]** a suit alleging antitrust injury based upon a bad faith prosecution theory it is obvious that the costs incurred in defense of the prior patent infringement suit are an injury which flows from the antitrust wrong."); *CVD Inc. v. Raytheon Co., 769 F.2d 842, 857 (1st Cir. 1985)*; *Kearney & Trecker Corp. v. Cincinnati Milacron, Inc. 562 F.2d 365, 368 (6th Cir. 1977)*. ***HN8***[] This Court agrees that a claim for relief under antitrust laws may be based on the bad faith assertion of a patent against products known by the patent holder not to infringe the patent. Here, Defendants allege that Plaintiffs have filed the present patent infringement action against them for anti-competitive reasons. Although Defendants do not specifically allege that their injury arises from the costs of defending against the present suit, as the Court in Handgards I noted, "it is obvious that the costs incurred in defense of the prior patent infringement suit are an injury which 'flows' from the antitrust wrong." *601 F.2d at 997*. Accepting the allegations contained in the counterclaim as true, this Court finds that the costs incurred by Defendants in defending against this **[*16]** action constitute a cognizable injury to establish standing under the Sherman Antitrust Act.

C. Relevant Market Product

In order to have antitrust standing, Defendants must also identify the relevant product market which Plaintiffs' antitrust activities are alleged to have affected. ***HN9***[] "Without a definition of the relevant product market, there is no way to measure a company's ability to act as a monopolist." *United States v. Eastman Kodak Co., 63 F.3d 95, 104 (2d Cir. 1995)*.

HN10[] "A relevant market is comprised of a product market, those commodities or services that are reasonably interchangeable by consumers for the same purposes, and a geographic market, the area in which sellers of the relevant market product effectively compete." *Smith & Johnson, Inc. v. Hedaya Home Fashions Inc., 1996 U.S. Dist. LEXIS 19023 at *17 (S.D.N.Y. December 24, 1996)* (quoting *Sunshine Cellular v. Vanguard Cellular Sys., Inc., 810 F. Supp. 486, 493 (S.D.N.Y. 1992))*. The product market is defined in relation to interchangeable goods. Id. "Commodities reasonably interchangeable by consumers for the same purposes make up that 'part of the trade or commerce, **[*17]** ' monopolization of which may be illegal." Id. (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956))*. Reasonable interchangeability is determined by reference to cross-elasticity of demand and similarity of purpose and clientele of each product. [2] Id. "In general, then, the question is whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other." *Bon-Ton Stores, Inc. v. May Dep't Stores Co., 881 F. Supp. 860, 868 (W.D.N.Y. 1994)*.

Plaintiffs argue that Defendants have failed to adequately allege either the relevant product market or the relevant geographical market, claiming that Defendants make only **[*18]** passing and conclusory reference to the memory metal eyeglass frame market, and nowhere identify the geographic market. Defendants admit that in their Answer to Plaintiffs' Amended Complaint they omitted the Second Count of their previously filed Second Amended Answer and Counterclaim, which alleged a conspiracy to monopolize and/ or restrain trade under Section One and Two of the Sherman Act. In paragraph 62 of that submission to the Court, Defendants pled the following:

> Marchon has willfully acquired (or attempted to acquire with a dangerous probability of success) monopoly power in that it controls over 90% of the substantial interstate commerce in memory metal eyeglass frames in the United States.

In this previous pleading, Defendants incorporated by reference paragraph 62 (originally pled within its Section One claim) into its Section Two sham litigation claim. In the current pleading however, Defendants intentionally drop their Section One conspiracy claim and through oversight inadvertently fail to restate paragraph 62 in the sham litigation claim.

Thus, this Court must determine whether Defendants' failure to allege paragraph 62 in their Answer to the Amended Complaint **[*19]** is fatal to their Section Two sham litigation claim. Defendants request leave to amend their counterclaim to cure the deficiency. The Second Circuit has held that, ***HN12***[] "Where the possibility exists that the defect can be cured and there is no prejudice to the defendant, leave to amend at least once should normally be granted as a matter of course." *Oliver Schools, Inc. v. Foley, 930 F.2d 248, 253 (2d Cir. 1991)*. ***HN13***[] *Rule 15(a) of the Federal Rules of Civil Procedure* provides that the court should grant leave to amend freely when justice so requires. ***HN14***[] "Although the decision whether to grant leave to amend is within the discretion of the district court, refusal to grant leave must be based on a solid ground." Id.

The Second Circuit has held that ***HN15***[] "futility" provides a solid ground on which to deny leave to amend. *Marchi v. Board of Coop. Educ. Servs. of Albany, 173 F.3d 469, 478 (2d Cir.)*, *cert. denied, 528 U.S. 869, 145 L. Ed. 2d 143, 120 S. Ct. 169 (1999)*. Similarly, leave to amend can properly be denied "where the motion is made after an inordinate delay, no satisfactory explanation is made for the delay, and the amendment would prejudice **[*20]** the defendant." *MacDraw, Inc. v. CIT Group Equip. Fin., Inc., 157 F.3d 956, 962 (2d Cir. 1998)* (quotation omitted)).

Here, although there has been some delay between Defendants' Second Amended Answer and their current request to amend, Defendants offer a reasonable explanation for their request and a credible, though unimpressive, excuse for the delay. Furthermore, there is no prejudice to Plaintiffs as they have notice of Defendants' allegations of relevant product market and relevant geographic market through prior pleadings. Thus, this Court is inclined to grant Defendants leave to amend their Answer for the limited purpose of curing the omission. Before doing so however, this Court must address whether the amendment would be futile.

D. Merit of the Sham Litigation Counterclaim

---

[2] ***HN11***[] "Cross elasticity of demand refers to the change in the demand by consumers for one product as a result of a change in the price of another product." *Smith & Johnson, Inc., 1996 U.S. Dist. LEXIS 19023 at *18*.

HN16[] In addressing the proposed futility of an amendment, the proper inquiry is comparable to that required on a motion to dismiss pursuant to Fed. R. Civ. P. 12(b)(6), which this Court has discussed more fully above. Rotblut v. 333 E. 66th Street Corp., 1996 U.S. Dist. LEXIS 15082, at *3, 4 (S.D.N.Y. October 11, 1996). With respect to claims alleged to be without merit, **[*21]** the court must construe the facts alleged by the party opposed to the amendment as true and view them in the light most favorable to that party. Id.; see Middle Atlantic Utils. Co. v. S.M.W. Dev. Corp., 392 F.2d 380, 386-87 (2d Cir. 1968).

Plaintiffs argue that even if Defendants sufficiently plead a violation of Section Two, they are immune from liability under the Noerr-Pennington Doctrine. If this is so, then leave to amend would be futile, thus precluding this Court from granting Defendants' request. HN17[] The Noerr-Pennington Doctrine allows a party to petition the government for redress of a grievance, such as a patent infringement claim, without the petitioning party being subject to antitrust claims as a result of its efforts. See Moore U.S.A. Inc. v. Standard Register Co., 139 F. Supp. 2d 348, 358 (W.D.N.Y. 2001). Borne out of First Amendment principles guaranteeing the right to petition the government, the doctrine thus immunizes legislative, executive and judicial activity from antitrust liability even if the activity is designed to eliminate competition. Mover's & Warehousemen's Ass'n of Greater New York, Inc. v. Long Island Moving & Storage Ass'n, 1999 U.S. Dist. LEXIS 20667, **[*22]** at *18 (E.D.N.Y. December 16, 1999).

HN18[] Court have, however, recognized a limited exception to Noerr-Pennington immunity known as the "sham" exception. Id.; see Professional Real Estate Investors v. Columbia Pictures Indus., 508 U.S. 49, 123 L. Ed. 2d 611, 113 S. Ct. 1920 (1993). In Professional Real Estate Investors Inc., the Supreme Court explained how the exception applies to court proceedings. In doing so, the Court outlined a two-part definition of "sham" litigation:

> First, the lawsuit much be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals "an attempt to interfere directly with the business relationships of a competitor through the use [of] the government **[*23]** process--as opposed to the outcome of that process--as an anticompetitive weapon." 508 U.S. at 60 (citations omitted).

Thus, for a suit to violate the antitrust laws it must be a sham *both* objectively and subjectively. Furthermore, the Supreme Court has instructed lower courts to remember, "even when the law or the facts appear questionable or unfavorable at the outset, a party may have an entirely reasonable ground for bringing suit." Id. at 59-60. This two-step inquiry applies to determining "whether a single action constitutes sham petitioning." Primetime 24 Joint Venture v. National Broad. Co., Inc., 219 F.3d 92, 101 (2d Cir. 2000) (quotation omitted). Here, however, Plaintiffs are accused of bringing a series of legal proceedings for anti-competitive purposes. HN19[] In cases in which the "defendant is accused of bringing a whole series of legal proceedings," the test is not "retrospective" but "prospective": "Were the legal filings made, not out of a genuine interest in redressing grievances, but as part of a pattern or practice of successive filings undertaken essentially for the purposes of harassment?" Id. The Second Circuit **[*24]** has noted that "it is immaterial that some of the claims might, 'as a matter of chance,' have merit." Id. (quotation omitted). Rather, "the relevant issue is whether the legal challenges 'are brought pursuant to a policy of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival.'" Id. (quotation omitted).

Try as Defendants may, their attempt to classify Plaintiffs' acts, whatever the motivation behind them, as "a whole series of legal proceedings" or a "pattern of baseless, repetitive claims," Professional Real Estate Investors, 508 U.S. at 58 (citation omitted), does not stand up to scrutiny. In the sham litigation counterclaim, Defendants cite only two lawsuits, Tura I and the current action, not a "series" or "pattern" of them. See Amarel v. Connell, 102 F.3d 1494, 1519 (9th Cir. 1996). Although this Court does not attempt to define here the number of legal proceedings needed to allege a "series" or "pattern" of litigation, it distinguishes this case from PrimeTime 24 Joint Venture, 219 F.3d at 101, the seminal Second Circuit case in this arena, in which the Court refused **[*25]** to dismiss an antitrust claim in which the defendants had submitted "simultaneous and voluminous challenges ... without regard to whether the challenges had merit," and where "appellees coordinated their efforts to submit huge volumes of challenges simultaneously." The conduct in the present case simply does not rise to the level deemed by the Second Circuit to be "automatic petitioning … without regard to and regardless of the merits of said petitions … that if proven, would be sufficient to overcome the [Counterclaim Defendant's] Noerr-Pennington defense." Id. (quoting *USS-POSCO Indus. v. Contra Costa County Bldg. & Constr. Trades Council, 31 F.3d 800, 811 (9th Cir. 1994))*.

Because Defendants cannot assert a claim of sham litigation, this Court will not grant Defendants leave to amend the sham litigation counterclaim, as it would be futile. For the forgoing reasons, Defendants' counterclaim of sham litigation is dismissed.

II. Patent Misuse

Defendants also seek a declaratory judgment pursuant to *28 U.S.C. § 2201* that Marchon's patent is unenforceable on the grounds of "patent misuse." Specifically, Defendants claim that **[*26]** (1) "Marchon has misused the '112 and '955 patents by threatening to sue and suing Tura for patent infringement, while knowing that the memory metal eyeglass frames sold by Tura did not infringe those patents," and that (2) Marchon "misused the '112 and '955 patents by requiring Nakanishi to refrain from selling memory metal eyeglass frames that do not infringe the '112 and '955 patents to others as a condition to Marchon continuing to do business with Nakanishi." (Answer and Counterclaims to Amend. Compl. at P 85, 86). Plaintiffs argue that Defendants' counterclaim should be dismissed on the ground that "patent misuse" can only be asserted as an affirmative defense and may not be asserted by way of an independent claim seeking declaratory judgment.

HN20[] Patent misuse is generally a defense to patent infringement, which if proven, renders the patent unenforceable until purged. See *Aktiebolag v. Kremers Urban Dev. Co., 2001 U.S. Dist. LEXIS 23879, at *2 (S.D.N.Y. October 31, 2001)*. ***HN21***[] The elements of a claim of patent misuse include a patentee's impermissible use of its patent to broaden the physical or temporal scope of its patent with an anti-competitive effect. Id. **[*27]** Furthermore, patent misuse requires bad faith and some improper purpose. Id.; *Glaverbel Societe Anonyme v. Northlake Mktg. & Supply, Inc., 45 F.3d 1550, 1558 (Fed. Cir. 1995)* ("The bringing of a lawsuit to enforce legal rights does not of itself constitute … patent misuse; there must be bad faith and improper purpose in bringing the suit, in implementation of an illegal restraint of trade.").

The Federal Circuit has yet to squarely address whether a defense of "patent misuse" may be asserted by way of a declaratory judgment action rather than asserted as an affirmative defense. In *Glitsch Inc. v. Koch Eng'g Co. Inc., 216 F.3d 1382, 1386 (Fed. Cir. 2000)*, however, the Federal Circuit noted that the Supreme Court's decision, *Mercoid Corp. v. Mid-Continent Investment Co., 320 U.S. 661, 88 L. Ed. 376, 64 S. Ct. 268, 1944 Dec. Comm'r Pat. 641 (1944)*, "makes clear that ***HN22***[] a party that did not raise the issue of patent misuse in one action may raise that issue in another action based on a separate assertion of infringement, whether as a defense against the claim of infringement or in a request for declaratory relief." Though dicta, the Federal Circuit's statement resonates **[*28]** with this Court. The Second Circuit has also spoken, albeit indirectly, on the issue. In *Critical-Vac Filtration Corp. v. Minuteman Int'l, Inc., 233 F.3d 697 (2d Cir. 2000)*, the Court of Appeals barred a plaintiff's complaint on the ground that its antitrust claims were compulsory counterclaims that had to be raised in a previous patent infringement suit. In rendering its decision, the court distinguished counterclaims based on patent invalidity from those based on patent misuse, thus implicitly recognizing that a counterclaim for patent misuse is a valid action. *Id. at 703-04* ("On the other hand, counterclaims related to *misuse* and other more economically oriented antitrust claims would seem generally to be distinct in nature and substance from patent validity and infringement issues."). Other Courts have similarly refused to dismiss claims of patent misuse, or acknowledged that patent misuse may be brought as an action for declaratory judgment. See *Affymetrix, Inc. v. PE Corp. (NY) Competitive Techs., Inc., 219 F. Supp. 2d 390, 397 (S.D.N.Y. 2002)* (denying defendants' motion to dismiss plaintiff's patent **[*29]** misuse claim); *Kremers Urban Dev. Co., 2001 U.S. Dist. LEXIS 23879, at *3, *4* (allegations sufficient to state a claim of patent misuse); *Bayer AG v. Housey Pharms. Inc., 169 F. Supp. 2d 328, 331 (D. Del. 2001)* (plaintiffs sufficiently stated a claim of patent misuse); *Components, Inc. v. Western Elec. Co., 318 F. Supp. 959, 966 (D. Me. 1970)* ("The most cursory research discloses numerous cases in which a declaration of unenforceability because of misuse has been sought and determined without comment or objection."); cf. *Moore, U.S.A. Inc., 139 F. Supp. 2d at 348* ("[Counterclaimant] can state a patent misuse claim to the extent that it alleges that [counterdefendants] have engaged in sham litigation."). Thus, Plaintiffs' motion to dismiss Defendants' patent misuse counterclaim is denied.

III. Tortious Interference of Prospective Economic Advantage

Defendants also bring a counterclaim alleging that Plaintiffs have tortiously interfered with their prospective economic advantage. ***HN23***[] To state a valid claim under New York law, a plaintiff must allege that the defendant "interfered with business or economic relations **[*30]** between the plaintiff and a third party, either (1) with the sole purpose of harming the plaintiff; or (2) by dishonest, unfair or improper means." *IntelliSec v. Firecom, Inc., 2001 U.S. Dist. LEXIS 2619, at *21 (E.D.N.Y. February 1, 2001)* (citation omitted). "The defendant must interfere with the business relationship directly; that is, the defendant must direct some activities towards the third party and convince the third party not to enter into a business relationship with the plaintiff." Id. (citation omitted).

In the instant case, Plaintiffs do not claim that Defendants have failed to allege the elements required to assert a claim of tortious interference of prospective economic advantage, but rather, that the claim is barred under the doctrine of res judicata by this Court's decision in Tura I. Specifically, Plaintiffs claim that although Defendants did not set forth a separate counterclaim alleging tortious interference in Tura I, their current claim is based upon the same underlying facts asserted in Tura I. For example, Defendants now allege that Plaintiffs have tortiously interfered with their prospective economic advantage by "intimidating **[*31]** [and] coercing" Nakanishi not to "supply Tura with memory metal eyeglass frames." (Answer and Counterclaims to Amend. Compl. at P 85). Plaintiffs argue that this assertion is virtually identical to Defendants' Second counterclaim in Tura I, in which they asserted that Plaintiffs and others "coerced Nakanishi into selling memory metal frames to Marchon, exclusively and not to Tura … whether or not such frames infringe the suit patents and whether or not the suit patents are invalid." (Tura *I, Amend.* Counterclaims and Third Party Compl. at P 25). Plaintiffs also argue that Tura's current allegation that it has been "damaged in its ability to obtain memory metal eyeglass frames for resale into the United States" by Plaintiffs' actions merely builds upon Defendants' Second Counterclaim in Tura I. (Answer and Counterclaims to Amend. Compl. at P 88).

HN24[] It is well settled that the doctrine of res judicata, or claim preclusion, serves to bar "litigation of any claim for relief that was available in a prior suit between the same parties or their privies, whether or not the claim was actually litigated." *Irish Lesbian and Gay Org. v. Giuliani, 143 F.3d 638 (2d Cir. 1998).* **[*32]** To prove that a claim is precluded under this doctrine, "a party must show that (1) the previous action involved an adjudication on the merits; (2) the previous action involved the [parties] or those in privity with them; [and] (3) the claims asserted in the subsequent action were, or could have been raised in the prior action." *Pike v. Freeman, 266 F.3d 78, 91 (2d Cir. 2001)* (quotation omitted). In the instant case, it is undisputed that Tura I resulted in a final judgment on the merits between the same parties involved here. Therefore, the only issue is whether Defendants raised or could have raised their claim in Tura I.

HN25[] Whether a claim that was raised in the previous action or could have been raised therein "depends in part on whether the same transaction or connected series of transactions is at issue, and whether the same evidence is needed to support both claims." Id. (quoting *Interoceanica Corp. v. Sound Pilots, Inc., 107 F.3d 86, 90 (2d Cir. 1997)* (internal alterations and quotation marks omitted). "To ascertain whether two actions spring from the same 'transaction' or 'claim,' [the Court looks] to whether the underlying **[*33]** facts are 'related in time, space, origin, or motivation, whether they form a convenient trial unit, and whether their treatment as a unit conforms to the parties' expectations or business understanding or usage.'" Id. (quoting *Interoceanica Corp. v. Sound Pilots, Inc., 107 F.3d 86, 90 (2d Cir. 1997)*. As this "same transaction" test indicates, the "could have been" language of the third requirement is somewhat misleading. Id. The question is not whether the applicable procedural rules *permitted* assertion of the first proceeding; rather, the question is whether the claim was sufficiently related to the claims that were asserted in the first proceeding that it *should have been* asserted in that proceeding. Id.; see *Kane v. Magna Mixer Co., 71 F.3d 555, 560 (6th Cir. 1995)* (stating that one of the elements of res judicata is "an issue in the subsequent action which was litigated or which should have been litigated in the prior action."). This analysis entails, in part, consideration as to whether new facts necessary to the second suit were available to the plaintiff at the time the first suit was filed. The Second Circuit has noted: **[*34]**

HN26[]

> With respect to the determination of whether a second suit is barred by *res judicata,* the fact that both suits involved essentially the same course of wrongful conduct is not decisive; nor is it dispositive that the two proceedings involved the same parties, similar or overlapping facts, and similar legal issues. A first judgment will generally have preclusive effect only where the transaction or connected series of transactions at issue in both suits is the same, that is where the same evidence is needed to support both claims, and where the facts essential to the second were present in the first.
>
> If the second litigation involved different transactions, and especially subsequent transactions, there generally is no claim preclusion. *Interoceanica Corp., 107 F.3d at 91* (quotation omitted); see *Computer Assoc. Int'l, Inc. v. Altai, Inc., 126 F.3d 365, 369 (2d Cir. 1997)* ("Without a demonstration that the conduct complained of in the [second] action occurred prior to the initiation of the [first] action, res judicata is simply inapplicable."); see also *SEC v. First Jersey Sec., 101 F.3d 1450, 1464 (2d Cir. 1996)* **[*35]** (finding no res judicata bar to suit based on fraudulent acts that occurred after filing of prior suit, even though acts were part of the same pattern that formed basis of the first suit)).

Here, any claim of tortious interference of prospective economic advantage that is based upon Plaintiffs' conduct before Tura I is barred by res judicata, as Defendants had the opportunity to litigate such claims in Tura I. However, a claim based on Plaintiffs' alleged actions subsequent to this Court's decision in Tura I, though bearing tangentially on issues referenced in Tura I, is not based on the same underlying facts adjudicated in Tura I. The question before the court, then, is whether Defendants' current claim is based upon facts that could have been raised in Tura I or is based on newer facts, not in existence at the time of Tura I. Defendants assert in their opposition papers that their counterclaim is based upon Plaintiffs' alleged recent tortious interference with their prospective suppliers. However, it is not clear from the pleadings that this is the case. In their counterclaim, Defendants allege, in pertinent part, that, "Marchon has intentionally interfered **[*36]** with Tura's business relations ... through threats of patent infringement litigation against manufacturers and exporters." (Answer and Counterclaims to Amend. Compl. at PP 85, 86). It is impossible to discern from Defendants' allegations what temporal limitations, if any, they place on the claim. To the extent that the counterclaim is based on activity occurring subsequent to Tura I, this Court finds that the claim is not barred by res judicata. However, this Court hesitates to construe Defendants' pleading in such a fashion that the Counterclaim will survive the doctrine of res judicata. Thus, per Defendants' request, this Court grants leave to amend the counterclaim in a fashion that will both guide the Court and the opposing party as to the time frame of the alleged conduct at issue.

CONCLUSION

For the reasons set forth herein, this Court GRANTS Plaintiffs' motion to dismiss Defendants' counterclaim of sham litigation, DENIES Plaintiffs' motion to dismiss Defendants' counterclaim requesting a declaration of patent misuse, and GRANTS Defendants leave to amend their Answer to the Amended Complaint for the limited purpose of clarifying the temporal reach of the tortious **[*37]** interference of prospective economic advantage counterclaim.

IT IS HEREBY ORDERED that Defendants' Amended Answer to Plaintiffs' Amended Complaint is due on or before October 18, 2002. This decision to allow leave to amend is without prejudice to the Plaintiffs' right to move to dismiss this portion of the amended complaint following service of the new pleading.

SO ORDERED.

Opinion

[*831] *MEMORANDUM AND ORDER*

I. Introduction

This is a bankruptcy appeal in an adversary proceeding with a long procedural history. The case began when the debtor, Robert C. Spradlin (Spradlin) sued defendants Lakestates Workplace Solutions, Inc, (Lakestates), Steelcase, Inc., (Steelcase), Steelcase Financial Services, Inc. (SFSI), [1] and the Holland Group, L.L.C., d/ b/ a Workplace Integrators' (Holland) in Oakland County Circuit Court seeking to invalidate a non-competition agreement (NCA) between Spradlin and the Steelcase Parties.

When Spradlin later filed for bankruptcy, the Steelcase Parties **[**2]** removed Spradlin's state court case to federal court, where it was later transferred to the bankruptcy court. The Steelcase Parties then filed a counterclaim seeking a declaration that (1) Spradlin's obligations under the NCA are not dischargeable in bankruptcy (Count I), and (2) that Spradlin unlawfully converted several items of property belonging to or serving as collateral for a debt owed to SFSI (Count II). The Steelcase Parties' counterclaim became an adversary proceeding in Spradlin's bankruptcy case.

Presently before the Court is the Steelcase Parties' appeal [2] from the bankruptcy **[*832]** court's March 18, 2002 Opinion Regarding Validity of Noncompetition Agreement, following cross motions for summary judgment filed by Spradlin and the Steelcase Parties. The bankruptcy court held that (1) Lakestates, Steelcase, and SFSI lack standing to seek damages based on Spradlin's breach of the NCA, (2) Holland (the only party with standing) has failed to show that it was harmed by Spradlin's admitted violations of the non-competition agreement, and (3) the NCA itself is unenforceable as a matter of law because the NCA did not expressly include the sale or transfer of goodwill.

[3]** For the reasons which follow, the decision of the bankruptcy court is AFFIRMED IN PART AND REVERSED IN PART. The procedural steps, which includes the withdrawal of the order of reference to the bankruptcy court, is the subject of a separate order.

II. Background

The bankruptcy court's opinion of March 18, 2002 set forth the relevant facts, which the Court adopts as its own, repeated as follows:

> Robert C. Spradlin was the sole or controlling shareholder in two companies, Contract Interiors, Inc. and Contract Interiors of Ohio, Inc. [the CI companies]
> These companies operated in Michigan and Ohio as dealerships of office furniture manufactured by Steelcase, Inc.
> The dealerships defaulted on various obligations held by SFSI.
> Under the terms of the foregoing agreement, Spradlin and the [CI companies] surrendered to SFSI assets securing the unpaid obligations and SFSI accepted the collateral in satisfaction of those obligations.
> By way of separate agreement, SFSI was to convey to Lakestates the assets acquired from Spradlin and the dealerships.

---

[1] Lakestates, Steelcase, Inc. and SFSI will be collectively referred to as the Steelcase Parties. Holland will be referred to separately.

[2] There have been several appeals from the bankruptcy court in this case. In one appeal, the Steelcase Parties appealed from the denial of a motion for a preliminary injunction to enjoin Spradlin from violating the NCA. The Court affirmed the bankruptcy court. *See* Order dated January 5, 2000. The second appeal was Spradlin's appeal from the bankruptcy court's determination that Michigan law exempts only one of Spradlin's Individual Retirement Accounts, which the parties settled prior to a decision by the Court. The third appeal followed the bankruptcy court's findings and fact and conclusions of law on counts I and II of the Steelcase Parties' counter claim. As to Count I, the bankruptcy court found that the NCA was a dischargeable debt. As to Count II, the bankruptcy court found that Spradlin unlawfully converted a 1993 Ford Dump Truck, a laptop computer, and a set of four first-row Red Wings season tickets, and therefore these debts were not dischargeable. The Bankruptcy Court also found that a 1994 Jet Ski trailer, a 1994 Chrysler Wagon, a 1995 Pontiac Bonneville, a 1994 Dodge Viper, an expensive red amber vase, and certain checks were not unlawfully converted and therefore dischargeable debts. The Court affirmed the bankruptcy court on both counts. *See* Memorandum and Order dated January 5, 2001.

> On October 28, 1996, the parties signed a "Non-Competition Agreement"
>
> Pursuant to the NCA, Spradlin and the dealerships agreed **[**4]** that they would "not compete, directly or indirectly, in any manner with Lakestates in any part of [Michigan or Ohio] in the office and commerical furniture businesses.
> The agreement not to compete was to run for a period of five years, commencing from the date the NCA was executed.
>
> The following consideration was to be paid by the Steelcase Parties in exchange for the covenants set forth in the NCA (i) $ 900,000 and $ 100,000 to the dealerships and Spradlin, respectively, upon execution of the NCA; and (ii) **[*833]** $ 500,000 to the dealerships on October 28, 2001 [the date the NCA expired].
> In June of 1997, Lakestates' interest in the NCA, along with other Lakestates assets, was purchased by [Holland]
> On March 13, 1998, Spradlin filed a petition for relief under title 11 of the United States Code. The case is currently pending under chapter 7 of the Bankruptcy Code.
>
> The Steelcase Parties and Holland (collectively, the "Creditors") filed a proof of claim based in part upon breach of the NCA. Spradlin, against whom the Creditors have a pending action seeking denial of discharge pursuant to various provisions under *11 U.S.C. § 727(a)*, objected to allowance of **[**5]** the claim .... Each side has filed a motion for partial summary judgment based solely on the breach-of-contract issue ....

III. Standard of Review

This Court has jurisdiction to hear the appeal pursuant to *28 U.S.C. § 158*. ***HN1***[] The Bankruptcy Court's findings of fact are reviewed for clear error and its conclusions of law are reviewed *de novo.* *In re Baker & Getty Financial Serv., Inc., 106 F.3d 1255, 1259 (6th Cir. 1997)*; *In re Arnold, 908 F.2d 52 (6th Cir. 1990)*; *In re Gibson Group, 66 F.3d 1436 (6th Cir. 1995)*.

IV. Analysis

A. Standing

The bankruptcy court held that only Holland has standing to enforce the NCA because Lakestates assigned its interests in the NCA to Holland and thus lacks standing. The bankruptcy court also found that SFSI and Steelcase lacked standing because even though they were parties to the SSA and paid Spradlin $ 100,000.00, they lacked standing because the non-competition agreement precludes competition only with Lakestates.

On appeal, the Steelcase Parties admit that "the issue of standing is largely academic because it is undisputed that [Holland] has standing to enforce the **[**6]** NCA." Steelcase Parties' brief on appeal at p. 36 n.38. Spradlin argues that the bankruptcy court did not err because the plain language of the NCA states that the right to recover damages for breach of the NCA vests only with Holland.

Spradlin's argument is well-taken. Paragraph 1A of the NCA state that "the CI Parties [Spradlin and the CI companies] shall not compete, directly or indirectly, in any manner with the Company ...." The Company is defined in the NCA as Lakestates, which later sold its assets to Holland. Moreover, paragraph 6, entitled "Binding Effect and Benefits" states that "This Agreement shall be binding upon, inure to the benefit of, and be enforceable by and against ... the successor and assigns of the Company [Lakestates]. Nothing in this Agreement, express or implied, is intended to confer upon any other person any rights or remedies under or by reason of this Agreement except as expressly stated in this Agreement." Paragraph 7, entitled "Amendments and Waivers," states "This Agreement may be amended, modified, superseded, or canceled, and any terms of this Agreement may be waived, only by a written instrument signed by the CI Parties and the Company [Lakestates] **[**7]** and approved by the Company's Board of Directors. The failure of the Company at any time to require performance of any provision of this Agreement shall not affect the right of the Company at a later time to enforce that or any other provision ...." The bankruptcy court correctly interpreted these provisions as "indicating quite clearly that this right [to **[*834]** recover damages should Spradlin violate the NCA] vested solely in Lakestates." bankruptcy opinion at p. 5. Because it is undisputed that Lakestates assigned all of its rights under the NCA to Holland, the bankruptcy court did not err in holding that Holland is the only party with standing to enforce the NCA.

B. Enforceability of the NCA

1. Michigan Law

As to whether the NCA is enforceable, the bankruptcy court correctly began with an examination of Michigan's Antitrust Reform Act (MARA), *M.C.L. § 445.771, et seq.* *Section 445.772* states that ***HN2***[] "[a] contract ... between 2 or more person in restraint of, or to monopolize, trade or commerce in a relevant market is unlawful." [3] The bankruptcy court also correctly found that non-competition agreements, such as the NCA at issue here, are within the scope of MARA. The bankruptcy **[**8]** court was also correct in finding that MARA prohibits only *unreasonable* trade restraints. *See* bankruptcy opinion at p. 9.

The bankruptcy court, however, agreed with Spradlin's argument [4] that the NCA was not enforceable because goodwill was not among the assets acquired by the SSA. [5] **[**11]** This is where the Court's agreement with the bankruptcy court ends. The starting point in this analysis is Michigan ***antitrust law*** [6] and non-competition agreements as viewed as an unlawful restraint on trade. An excellent overview of the subject is found in the Michigan Court of Appeals' recent decision in *Bristol Window and Door, Inc. v. Hoogenstyn, 250 Mich. App. 478, 650 N.W.2d 670 (2002)* where the court of appeals detailed the history of Michigan law in this area and concluded that the rule of law in Michigan with respect to non-competition agreements is as follows:

> **Our review of the history** **[**9]** of restraint of trade law in Michigan makes clear, the common law in Michigan contemplated the enforceability of noncompetition agreements that qualified as reasonable. ***Hubbard, supra* at 19; *Cardiology Associates of Southwestern Michigan, PC v. Zencka, 155 Mich. App. 632, 636, 400 N.W.2d 606 (1985)*.** The Legislature's enactment of former *M.C.L. § 445.761* altered the common-law rule from 1905 until 1985, when the MARA replaced it. ***Cardiology Associates, supra at 636-637, 400 N.W.2d 606*.** The Legislature's repeal of and decision not to reenact former *M.C.L. § 445.761*, which was in derogation of the common law, clearly demonstrates **[*835]** the Legislature's intent to revive the common-law rule set forth in ***Hubbard, supra* at 19, that *HN3*[] the enforceability of noncompetition agreements depends on their reasonableness.** *People v. Reeves, 448 Mich. 1, 8, 528 N.W.2d 160 (1995)*, superseded by statute on other grounds as recognized in *People v. Nowack, 462 Mich. 392, 400-401, 614 N.W.2d 78 (2000)* (explaining that "the repeal of a statute revives the common-law rule as it was before the statute was enacted"). **[**10]**
>
> ....

Bristol, 250 Mich. App. at 494-95 (emphasis added). The Court accepts the Michigan Court of Appeals' decision as the controlling rule of law in Michigan in the absence of any Michigan Supreme Court decision to the contrary.

---

[3] This section, known as section 2 of MARA was derived from section 2 of the Uniform State Antitrust Act.

[4] Spradlin also argued that the NCA was not enforceable under a so-called "Negative-Inference Theory," under which Spradlin argued that under MARA, all non-competition agreements other than those between an employer and an employee are invalid. The bankruptcy court rejected this argument, and Spradlin does not raise it on appeal.

[5] The bankruptcy court based its determination that no good will from Spradlin and the CI companies was given as part of the transfer of assets to the Steelcase Parties on the deposition testimony of William Geiger, who managed the CI companies for Steelcase and was a negotiator for SFSI in the SSA, and who stated that in his opinion, the Steelcase Parties did not purchase any good will as part of the SSA and NCA. Even assuming that the bankruptcy court was correct in holding that the failure to include good will dooms the NCA, this is scanty evidence. Also noteworthy is Spradlin's statement that there was no good will left in the CI companies at the time the SSA was executed because Steelcase had "looted" the CI companies.

[6] The parties agree that Michigan law applies. The NCA states as much. *See* P 11.

Thus, the test for whether or not a non-competition agreement is enforceable is reasonableness. *Hubbard v. Miller, 27 Mich. 15 (1873)*, a case cited by the bankruptcy court, set forth this very rule, as noted by the Michigan Court of Appeals in *Bristol.* A fair reading of *Hubbard,* however, does not support the bankruptcy court's view that a non-competition agreement made in connection with a sale or transfer of a business must also include the sale or transfer of goodwill in order to meet a threshold standard of reasonableness. *Hubbard* does not mention good will specifically as a requirement for enforceability of a non-competition agreement. In fact, *Hubbard* frames ***HN4***[] the test for reasonableness as follows:

> But if, considered with reference to the situation, business and objects of the parties, and in the light of all the surrounding circumstances with reference to which the contract was made, the restraint contracted for appears to have been for a just and honest purpose, **[**12]** for the protection of the legitimate interests of the party in whose favor it is imposed, reasonable as between them and not specifically injurious to the public, the restraint will be held valid.

Hubbard, 27 Mich. at 19. The bankruptcy court did not apply this test in determining whether the NCA is enforceable.

To be sure ***HN5***[] good will may be an important component of a transfer or sale of a business and is, as the bankruptcy court noted, "relevant to the issue of reasonableness." The Steelcase Parties do not dispute this. However, the bankruptcy court went too far in holding that it is an absolute prerequisite to enforcement of a non-competition agreement. The bankruptcy court apparently became so caught up with the presence of good will that it failed to apply "the rule of reason" to test the enforceability of the NCA.

The bankruptcy court's discussion of good will really relates more to the issue of whether there was adequate consideration given for the NCA, which could be a factor in determining whether the NCA itself is reasonable. Indeed, that it was the bankruptcy court appears to be saying at pages 20-22 of its opinion.

Overall, the Court finds the **[**13]** bankruptcy court erred in its decision regarding of the enforceability of the NCA by not applying the common law rule of reasonableness as set forth in *Hubbard.* Having made this determination, the Court will then address whether the NCA is enforceable under Michigan law, [7] *i.e.* whether the NCA is reasonable.

[*836] 2. Application

Applying the rule of reasonableness, the Court finds the NCA is enforceable as a matter of law despite Spradlin's arguments to the contrary. First, it is limited in geographic scope, namely to Michigan and Ohio. It is reasonable as to subject **[**14]** matter-it only limits Spradlin from engaging in the office furniture business; it does not deny him the ability to engage in other businesses. It is reasonable as to duration-five years. It is also reasonable given the circumstances of the parties relationship-it was executed in connection with the transfer of Spradlin's businesses, the CI companies, to the Steelcase Parties and as such was entered into to protect the assets that the Steelcase Parties acquired from Spradlin by prohibiting him from competing with them.

3. Good Will

Although the bankruptcy court found that no good will was transferred relying on the testimony of Geiger, the Court is hard-pressed to conclude that good will was at least implicit in the transfer. ***HN6***[] Good will has been defined as "the privilege, granted by the seller of a business to the purchaser, of trading as his recognized successor; the possession of a ready-formed 'connexion' of customers, considered as an element in the saleable value of a business, additional to the value of the plant, stock-in-trade, book-debts, etc." Oxford English Dictionary, on-line

---

[7] The Court's decision to analyze whether the NCA is reasonable under Michigan law logically follows from the contemporaneous order withdrawing the order of reference to the bankruptcy court. As indicated at the hearing on August 28, 2002, the Court desires to proceed expediently with this case. Moreover, the parties' papers addressed the issue of whether the NCA is reasonable and the Court is satisfied with the parties' presentation of the issue.

edition, available at www.oed.com. Here, Spradlin transferred the assets of the CI companies to **[**15]** the Steelcase Parties under the Surrender and Settlement Agreement, and although the parties did not explicitly state that the good will of the CI companies was also being transferred, it is difficult to see how good will was also not transferred. The Steelcase Parties essentially obtaining Spradlin's office furniture business and then, though Holland, began to engage in the office furniture business with those same assets. Although Spradlin says that his businesses were no longer operating at the time of the Surrender and Settlement Agreement, that does not mean that there was no good will to give. Even if no longer operating, the CI companies still retained the intangible elements of good will such as its network of customers. Good will had to have been part of the transfer because otherwise, as noted at the hearing, the $ 100,000 given to Spradlin personally for his promise not to compete in the office furniture business would have been a mere gratuity.

C. Damages

The bankruptcy court also held that the Steelcase Parties were not entitled to the return of the $ 100,000.00 paid to Spradlin upon execution of the NCA because Holland did not offer any evidence of its damages. The **[**16]** issues of what damages Holland incurred as a result of Spradlin's alleged breach and whether Spradlin must return only the $ 100,000.00 are premature.

SO ORDERED.

Antitrust & Trade Law > Sherman Act > Claims

HN6[] **Market Definition, Relevant Market**

To establish § 2 of the Sherman Act, 15 U.S.C.S. § 2, violations premised on attempt and conspiracy to monopolize, a plaintiff must define the relevant market. Critically, evidence must be offered demonstrating not just where consumers currently purchase the product, but where consumers could turn for alternative products or sources of the product if a competitor raises prices. The possibilities for substitution must be considered.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN7[] **Monopolies & Monopolization, Actual Monopolization**

In the context of a geographic market in monopolization claims, the United States Court of Appeals for the Eighth Circuit has emphasized that a hospital's trade area is not necessarily the relevant geographic market for purposes of antitrust analysis because geographic market evidence must take into account where consumers could practicably go, not on where they actually go.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN9[] **Sherman Act, Claims**

To show that a hospital's tying of inpatient care to outpatient surgical care violates *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, a competitor must prove that (1) the hospital has appreciable economic power in the market for inpatient care (the tying market), and (2) the tying arrangement affects a substantial volume of commerce in the market for outpatient surgical care (the tied market). Consequently, any inquiry into the validity of a tying arrangement must focus on the market or markets in which the two products are sold, for that is where the anticompetitive forcing has its impact.

Opinion by: EDITH H. JONES

Opinion

[*838] EDITH H. JONES, Circuit Judge:

Surgical Care Center contends that North Oaks Medical Center, a public hospital, has violated the Sherman Antitrust Act and Louisiana statutes governing monopolies and unfair trade practices. The district court conducted a bench trial and entered judgment for North Oaks. We find neither clear error in the fact findings nor any errors of law on the issues tried by the court. Accordingly, the judgment of the district court is AFFIRMED.

I. BACKGROUND

Surgical Care Center of Hammond is a limited liability company doing business as St. Luke's Surgicenter, an outpatient surgery clinic that opened in 1996 in Hammond, Louisiana. The Hospital Service District No. 1 of Tangipahoa Parish is a political subdivision of the State of Louisiana that operates North Oaks Medical Center, the largest hospital in the Hammond area. North Oaks offers a full range of inpatient and outpatient services, including outpatient surgery. Quorum Health Resources, Inc. manages the North Oaks facilities.

[2]** St. Luke's brought this action against North Oaks and Quorum, alleging that their trade practices violated the Sherman Act, *15 U.S.C. §§ 1-2*; the Louisiana Monopolies Act, *LA. REV. STAT. ANN. § 51:123*; and the Louisiana Unfair Trade Practice and Consumer Protection Act, *LA. REV. STAT. ANN. § 51:1405*.

St. Luke's contends that North Oaks is attempting to monopolize the outpatient surgery market by exploiting its market power over inpatient care and, more specifically, by pressuring managed care companies to use North Oaks exclusively for both inpatient and outpatient care. [1] According to St. Luke's, these exclusive agreements and the

---

[1] The "exclusive" contracts entitled HMO's or Preferred Provider organizations (PPO's) to up to a 25% discount of billed charges if the provider designated North Oaks as the sole provider of certain medical services, including outpatient surgery, within a designated geographic area.

"tying" of inpatient and outpatient care are violations of both federal and state antitrust laws. St. Luke's also alleges that North Oaks refused to sign a patient transfer agreement with St. Luke's, refused to sign a blood type and cross match agreement, refused to lend medical equipment to St. Luke's, and engaged in various unfair employment practices.

[3]** After the issue of "state action immunity" was resolved, [2] the district court tried the case and entered judgment for the defendants on all claims. The district court concluded, first, that St. Luke's did not prove attempted monopolization of outpatient surgery under *§ 2* of the Sherman Act. [3] According to the district court, St. **[*839]** Luke's evidence established neither predatory conduct by North Oaks nor a dangerous probability that North Oaks would achieve monopoly power in the outpatient surgery market. Second, the district court ruled that St. Luke's could not prevail on its conspiracy claim under *§ 2* of the Sherman Act because North Oaks and Quorum (*qua* principal and agent) are incapable of conspiring with one another to violate antitrust laws. Finally, the district court ruled that North Oaks was entitled to "discretionary act immunity" shielding it from liability under both the Louisiana Monopolies Act and the Louisiana Unfair Trade Practices Act. The district court did not address St. Luke's claims under *§ 1* of the Sherman Act [4] because, prior to trial, the court ruled that St. Luke's complaint had not included *§ 1* claims and then denied St. Luke's request to amend its **[**4]** complaint. St. Luke's now appeals.

II. DISCUSSION

A. Attempted Monopolization

HN3[] To prevail on its attempted monopolization claim under *§ 2*, St. Luke's had to prove (1) that North Oaks **[**5]** engaged in predatory or exclusionary conduct with (2) a specific intent to monopolize the relevant outpatient surgery market and (3) a dangerous probability of achieving monopoly power. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884, 890- 91, 506 U.S. 447, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*. The district court found, first, that the business practices of which St. Luke's complained all had a legitimate business justification and thus could not be deemed predatory or exclusionary under *Taylor Publishing Co. v. Jostens, Inc., 216 F.3d 465, 474-76 (5th Cir. 2000)*. Alternatively, the district court ruled that St. Luke's had not shown a dangerous probability that North Oaks would achieve monopoly power in the outpatient surgery market. ***HN4***[] We review legal questions *de novo* but will set aside the district court's findings of fact only if clearly erroneous. *FED. R. CIV. P. 52(a)*.

We need address only the third element: the probability of achieving monopoly power. St. Luke's bases its attempted monopolization claim on North Oaks's contracts with managed care providers. Essentially, if a managed care provider agreed to use North Oaks for outpatient surgical **[**6]** services, then North Oaks would offer substantial discounts on prices for inpatient care. St. Luke's alleged that North Oaks, by entering into these exclusive agreements, "used or leveraged its dominant market power in the inpatient hospital services market in an attempt to gain similar market power . . . in the outpatient surgical services market." This court has not ruled on monopolistic leveraging as a distinct *§ 2* offense, and we do not do so here. See *Eleven Line, Inc. v. North Texas State Soccer Assoc., Inc., 213 F.3d 198, 206 n.16 (5th Cir. 2000)*; 3 P. Areeda & H. Hovenkamp, ***Antitrust Law*** P

---

[2] See Surgical Care Ctr. of Hammond, L.C. v. Hospital Serv. *Dist. No. 1 of Tangipahoa Parish, 171 F.3d 231, 232 (5th Cir. 1999)*(en banc) (holding that the Louisiana legislature "did not make sufficiently clear an intent . . . to insulate its creature of state government from the constraints of the Sherman Antitrust Act. . . .").

[3] ***HN1***[] *Section 2* of the Sherman Act makes it unlawful for any person or firm to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2*.

[4] ***HN2***[] *Section 1* of the Sherman Act provides that "Every contract . . . or conspiracy, in restraint of trade or commerce among the several states" is illegal. *15 U.S.C. § 1*.

652 (2d ed. & 2002 Supp.). But like the district court, we find that St. Luke's claim of monopolistic leveraging fails on its own terms.

The district court noted that ***HN5***[] any theory of monopolistic leveraging first depends on proof that the defendant possesses market power in a relevant market, power that it then extends into the plaintiff's market. This inquiry, in turn, requires a clear definition of the relevant geographic market. See, e.g., *Dimmitt Agri Indus., Inc. v. CPC Int'l, Inc., 679 F.2d 516 (5th Cir. 1982)*. As we have held,

> ***HN6***[] To establish **[**7]** *Section 2* violations premised on attempt and conspiracy to monopolize, a plaintiff must define the relevant **[*840]** market. . . . Critically, evidence must be offered demonstrating not just where consumers currently purchase the product, but where consumers could turn for alternative products or sources of the product if a competitor raises prices. The possibilities for substitution must be considered.

Doctor's Hosp. of Jefferson, Inc. v. Southeast Med. Alliance, 123 F.3d 301, 311 (5th Cir. 1997)(citations omitted). In a similar case, the ***HN7***[] Eighth Circuit emphasized that a hospital's "trade area is not necessarily the relevant geographic market for purposes of antitrust analysis" because geographic market evidence must take into account "where consumers could practicably go, not on where they actually go." *Minnesota Ass'n of Nurse Anesthetists v. Unity Hosp., 208 F.3d 655, 662 (8th Cir. 2000)*(internal quotation marks omitted).

Nevertheless, St. Luke's expert did not attempt to identify the hospitals or clinics that may be deemed competitors of North Oaks. He relied solely on what he defined as North Oaks's service area to compose the geographic market. **[**8]** Absent a showing of where people could practicably go for inpatient services, St. Luke's failed to meet its burden of presenting sufficient evidence to define the relevant geographic market. Without a proper market definition, St. Luke's could not establish the predicate of a monopolistic leveraging claim, i.e., market power in the market for inpatient hospital services, and thus could not show a dangerous probability that North Oaks would gain monopoly power in the outpatient surgery market. The district court, after carefully analyzing the reports presented by experts for both St. Luke's and North Oaks, found that St. Luke's had not adduced sufficient evidence to delineate the relevant geographic market.

St. Luke's counters that a detailed analysis of the relevant geographic market is not necessary under *Federal Trade Comm'n v. Indiana Fed'n of Dentists, 476 U.S. 447, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*. To prevail on this argument, St. Luke's would have to persuade this court that, even with Indiana Federation is applicable to cases involving vertical restraints, the district court clearly erred when it did not find "actual, sustained adverse effects **[**9]** on competition." *Id., 476 U.S. at 461, 106 S. Ct. at 2019*. St. Luke's has failed to do this.

We hold that the district court did not err in dismissing St. Luke's claims of attempted monopolization because St. Luke's failed to meet its burden of presenting sufficient evidence to define the geographic market. [5]

[10]** B. Conspiracy to Monopolize

St. Luke's contends that North Oaks and Quorum (the company that manages North Oaks) conspired to monopolize the outpatient surgical market. See *Stewart Glass & Mirror, Inc. v. U.S. Auto Glass Discount Centers, Inc. 200 F.3d 307, 316 (5th Cir. 2000)*(listing the elements of a conspiracy claim under *§ 2*).

---

[5] The district court alternatively ruled that even if one were to accept St. Luke's definition of the outpatient surgery market as limited to North Oaks's service area, St. Luke's still had failed to show a dangerous probability of North Oaks' achieving monopoly power. The district court emphasized that (1) North Oaks' 42-44% share of the outpatient surgery market (as narrowly defined by St. Luke's) was not dominant; (2) St. Luke's expert opined that there are "few if any classic barriers to entry into the ambulatory surgical services market"; (3) St. Luke's obtained 24.7% of the outpatient surgery market in its first full year of operations, even though North Oaks already had entered into exclusive agreements with several managed care companies; and (4) St. Luke's expert admitted that North Oaks would have only a "very limited ability" to raise prices above the competitive level if St. Luke's went out of business.

[*841] The district court dismissed the conspiracy claim because "as a matter of law, a corporation and its agent [i.e., North Oaks and Quorum] are incapable of conspiring with one another to violate the antitrust laws." This general rule is correct, and none of the recognized exceptions applies to this case. See, e.g., *Siegel Transfer, Inc. v. Carrier Express, Inc., 54 F.3d 1125, 1135-37 (3d Cir. 1995)*. [6] The district court did not err in dismissing St. Luke's conspiracy claim under *§ 2* of the Sherman Act.

[11]** C. Tying and Exclusive Contracts

St. Luke's alleged in its complaint that North Oaks had illegally "tied" its outpatient services to inpatient services by entering into exclusive dealing contracts with managed care providers, in violation of both *§ 1* and *§ 2* of the Sherman Act.

Nevertheless, not long before the trial began, the district court indicated that the only issues properly presented in the complaint were St. Luke's Sherman Act *§ 2* and state law claims. St. Luke's disagreed with the court's characterization of the complaint and sought to amend the complaint. The district court denied St. Luke's motion and wrote that the proposed amendment "was more than a mere attempt to *clarify* the original and First Amended Complaints. Rather, it was clearly *adding* a *Section 1* Sherman Act claim, and thus expanding the nature of the case." ***HN8***[] Although the question whether to grant leave to amend a complaint is reviewed for an abuse of discretion, a district court "must have a 'substantial reason' to deny a request for leave to amend." *Lyn-Lea Travel Corp. v. American Airlines, 283 F.3d 282, 286 (5th Cir. 2002)*. Because the factual allegations supporting the *§ 1* **[**12]** claims were described in the complaint and, furthermore, the complaint specifically referred to *§ 1* of the Sherman Act, the district court abused its discretion in not allowing St. Luke's to amend its complaint.

The question that next arises is whether to remand the case for a trial on the *§ 1* claims. [7] We conclude that remand is unwarranted. Even if St. Luke's had been allowed to amend its complaint, St. Luke's could not have prevailed because its *§ 1* claims share certain elements with the *§ 2* claims, and St. Luke's failed to present evidence as to those common elements.

[13]** ***HN9***[] To show that North Oaks's tying of inpatient care to outpatient surgical care violates *§ 1* of the Sherman Act, St. Luke's must prove that (1) North Oaks has "appreciable economic power" in the market for inpatient care (the tying market), and (2) the tying arrangement "affects a substantial volume of commerce" in the market for outpatient surgical care (the tied market). *Eastman Kodak Co. v. Image Technical Serv., Inc., 504 U.S. 451, 461-62, 112 S. Ct. 2072, 2079, 119 L. Ed. 2d 265 (1992)*. Consequently, "any inquiry into the validity of a tying arrangement must focus on the market or markets in which **[*842]** the two products are sold, for that is where the anticompetitive forcing has its impact." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 18, 104 S. Ct. 1551, 1561, 80 L. Ed. 2d 2 (1984)*. We need not remand the case for consideration of the tying claims because St. Luke's failure sufficiently to define the relevant geographic market for the tying product -- inpatient services -- also proves fatal to its tying claim under *§ 1*.

The exclusive dealing allegations fail for the same reason. To show that North Oaks's contracts with managed care companies **[**14]** constitute an unreasonable restraint on trade in violation of *§ 1*, St. Luke's had to prove that North Oaks engaged in concerted action that produced anticompetitive effects *in the relevant markets*, yet the

---

[6] St. Luke's appears to concede this point in its brief, noting that the rule articulated by the district court "generally applies to St. Luke's Sherman Act claims . . . [but] has no application to St. Luke's allegations based on Louisiana's monopoly laws." The state law claims will be discussed below.

[7] St. Luke's argued in its brief to this court that remand was unnecessary because the record contained ample evidence of a *§ 1* violation. St. Luke's suggested that remand would be appropriate only if evidence as to any element of a *§ 1* violation was not allowed or was otherwise not presented at trial. At oral argument, though, St. Luke's counsel requested remand and stated that relevant *§ 1* evidence was either not presented or not admitted at trial. We will not permit an off-the-cuff statement to contradict the considered admission in St. Luke's brief.

market power of North Oaks in the tying market for inpatient health care simply was not established. See *Stewart Glass, 200 F.3d at 312*.

In sum, the district court's error in not allowing St. Luke's *§ 1* claims to be tried was harmless in light of St. Luke's failure properly to define the relevant market, and thereby prove North Oaks's market power.

D. Louisiana Law

The district court dismissed St. Luke's claims under both the Louisiana Monopolies Act and the Louisiana Unfair Trade Practices Act on the grounds that North Oaks, as part of a state-created hospital district, is entitled to "discretionary act immunity": ***HN10***[] "Liability shall not be imposed on public entities or their officers or employees based upon the exercise or performance of . . . their policymaking or discretionary acts when such acts are within the course and scope of their lawful powers and duties." *LA. REV. STAT. ANN. § 9:2798.1(B)*. Because Louisiana hospital districts have the legal authority **[**15]** to enter into contracts to sell hospital health services, and because St. Luke's state-law claims were based on those acts, the district court ruled that North Oaks and its agent Quorum are entitled to immunity under state law.

St. Luke's points out, however, that ***HN11***[] public entities are not entitled to discretionary act immunity when the challenged acts "are not reasonably related to a governmental objective for which the policy-making or discretionary power exists." *LA. REV. STAT. ANN. § 9:2798.1(C)(1)*. The legislature's objectives in conferring authority on the hospital districts were, in the district court's words, to allow hospital districts "to compete effectively and equally in the market for health care services" and to cooperate with other firms to provide health care services to residents of the district. North Oak's business practices, according to St. Luke's, are not reasonably related to either of these objectives.

We need not reach the question of discretionary act immunity because St. Luke's state law claims necessarily fail for other reasons.

HN12[] The Louisiana Monopolies Act provides that "No person shall monopolize, or attempt to monopolize, or combine with any other person **[**16]** to monopolize any part of the trade or commerce within this state." *LA. REV. STAT. ANN. § 51:123*. Assuming *arguendo* that the Louisiana Monopolies Act applies to cases involving interstate commerce, [8] St. Luke's claims **[*843]** under the Louisiana Monopolies Act fail for the same reasons as its claims under *§ 2* of the Sherman Act. Specifically, St. Luke's could not show attempted monopolization because it failed to define the relevant geographic market and, moreover, the district court did not err in finding no evidence of predatory conduct or of entry barriers. St. Luke's could not prevail on its state law conspiracy claim because the failure to define the market precludes any finding of a substantial, anticompetitive effect in the relevant market.

[17]** We turn now to St. Luke's claims under the ***HN13***[] Louisiana Unfair Trade Practices Act (LUTPA), which prohibits "unfair or deceptive acts or practices in the conduct of any trade or commerce." *LA. REV. STAT. ANN. § 51:1405*. A business practice is considered "unfair" if it offends established public policy and is unethical, oppressive, unscrupulous, or substantially injurious. *Jefferson v. Chevron U.S.A. Inc., 713 So. 2d 785, 792-93 (La. 1998)*. A business practice is "deceptive" for purposes of LUTPA when it amounts to fraud, deceit or misrepresentation. Id.

As this court has pointed out, ***HN14***[] LUTPA does not prohibit "the exercise of permissible business judgment." *Turner v. Purina Mills, Inc., 989 F.2d 1419, 1422 (5th Cir. 1993)*("The statute does not forbid a business to do what everyone knows a business must do: make money. Businesses in Louisiana are still free to pursue profit, even at the expense of competitors, so long as the means used are not egregious."). In this case, the district court found (when analyzing the "predatory conduct" element of the conspiracy claim) that each of the complained-of acts had a

[8] The parties agree that this case involves interstate commerce, and there is a plausible argument that the Louisiana Monopolies Act applies only to wholly intrastate restraints on trade. *Terrebonne Homecare, Inc. v. SMA Health Plan, Inc., 271 F.3d 186, 189 (5th Cir. 2001)*(noting that the question is unresolved); *Free v. Abbott Labs., Inc., 164 F.3d 270, 276 (5th Cir. 1999)*(certifying question to Louisiana Supreme Court), *certified question denied by*, ***739 So. 2d 216 (La. 1999)***.

permissible business justification. St. **[**18]** Luke's has not articulated why the district court's findings were clearly erroneous.

III. CONCLUSION

For the foregoing reasons, we conclude that the district court did not err in dismissing the plaintiff's antitrust claims. The judgment is

AFFIRMED.

Livingston Downs Racing Ass'n v. Jefferson Downs Corp.

United States District Court for the Middle District of Louisiana

October 24, 2002, Decided ; October 25, 2002, Filed, Docket Entered

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN1[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The Racketeering Influenced and Corrupt Organization Act (RICO), *18 U.S.C.S. § 1964(c)* allows parties injured by violations of RICO to recover damages.

Civil Procedure > ... > Discovery > Methods of Discovery > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Discovery, Methods of Discovery**

Summary judgment is appropriate when the pleadings, depositions, answers to interrogatories, admissions, and affidavits on file indicate that there is no genuine issue of material fact and that the moving party is entitled to judgment as a matter of law.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN3[] **Burdens of Proof, Movant Persuasion & Proof**

In the summary judgment context, when the burden at trial rests on the non-moving party, the moving party need only demonstrate that the record lacks sufficient evidentiary support for the non-moving party's case. The moving party may do this by showing that the evidence is insufficient to prove the existence of one or more elements essential to the non-moving party's case.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN4[] **Summary Judgment, Burdens of Proof**

Although the court considers the evidence in the light most favorable to the non-moving party, the non-moving party may not merely rest on allegations set forth in the pleadings. Instead, the non-moving party must show that there is a genuine issue for trial. Conclusory allegations and unsubstantiated assertions will not satisfy the non-moving party's burden. If, once the non-moving party has been given the opportunity to raise a genuine factual issue, no reasonable juror could find for the non-moving party, summary judgment will be granted for the moving party.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN8[] Monopolies & Monopolization, Actual Monopolization

An antitrust conspiracy under § 1 (15 U.S.C.S. § 1) of the Sherman Act requires that two persons act in concert. Regarding the importance of plurality for a § 1 claim, the Sherman Act contains a basic distinction between concerted and independent action. The conduct of a single firm is governed by § 2 (15 U.S.C.S. § 2) of the Sherman Act alone and is unlawful only when it threatens actual monopolization. It is not enough that a single firm appears to "restrain trade" unreasonably, for even a vigorous competitor may leave that impression. Section 1 of the Sherman Act, in contrast, reaches unreasonable restraints of trade effected by a "contract, combination or conspiracy" between separate entities. It does not reach conduct that is "wholly unilateral."

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

The case law that has grown up around *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act establishes certain rules for individuating antitrust conspirators so that formal distinctions do not disguise actual unity. Individuation of conspirators turns on an inquiry into who controls the action and whether there is a unity of interests. A wholly owned subsidiary of a corporation cannot conspire with its parent corporation. Two subsidiaries wholly owned by the same parent corporation cannot conspire with their parent or with each other. The officers, directors, employees, representatives, and agents of a corporation cannot conspire with their corporate employer. Two corporations that are wholly owned by the same group of individuals cannot conspire with each other. It is also established as a matter of law that petitioned government actors cannot be antitrust co-conspirators.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

HN10[] **Antitrust & Trade Law, Sherman Act**

A conspiracy between the owners and their corporations is precluded unless the owners were acting in their own, rather than in the corporation's, interest. Two corporations with the same set of owners cannot conspire under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

There can be no *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act conspiracy between one corporation and another corporation that it legally controls.

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

Where two people together are controlling the affairs of separate corporations those corporations cannot conspire under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act.

Antitrust & Trade Law > Sherman Act > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

In the context of the control test under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, it does not seem relevant to ask, in the individual setting, whether the individual owner can force a merger between the two (or three) corporations.

Instead, what is important is whether the individual can control the policies of both (or all) corporations. If so, then there can be no conspiracy between (or among) the corporations.

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] Antitrust & Trade Law, Sherman Act

Whether an antitrust conspiracy is possible does not require a factual determination. It is not necessary to conduct a factual inquiry to determine whether a parent and a subsidiary over which the parent has legal control can conspire in violation of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act. A parent and a wholly-owned subsidiary are considered the "same entity" for antitrust purposes because the parent has the power to exercise full control over its subsidiary. For the same reasons, a parent and a subsidiary over which the parent has legal control cannot conspire to restrain trade.

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] Antitrust & Trade Law, Sherman Act

In order properly to allege that an employee or agent of a corporation has entered a conspiracy with other employees or the corporation, a plaintiff must allege that the employee or agent was acting outside of her normal employment capacity.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Agency Relationships > General Overview

HN16[] Antitrust & Trade Law, Sherman Act

For the concept of a conspiracy between a principal and an agent to apply in the antitrust context, the exception to the general rule should arise only where an agent acts to further his own economic interest in a marketplace actor which benefits from the alleged restraint, and causes his principal to take the anticompetitive actions about which the plaintiff complains.

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] Antitrust & Trade Law, Sherman Act

To be an antitrust co-conspirator, a defendant must have consciously adopted the antitrust scheme.

HN18[] **Regulated Practices, Price Fixing & Restraints of Trade**

Both the Noerr-Pennington doctrine and the Parker doctrine exempt from antitrust liability any conspiracy between a private actor and a government actor unreasonably to restrain trade on the ground that the Sherman Act should not be interpreted--and was not intended--to extend to acts of petitioning the government. The Noerr-Pennington doctrine and the Parker doctrine are complementary expressions of the principle that the antitrust laws regulate business, not politics; the former decision protects the State's acts of governing, and the latter the citizens' participation in government. It does not matter that the government and the private business interest entered an agreement that would result in a restraint of trade, even if that agreement, between private actors, would constitute an antitrust conspiracy. Moreover, it does not matter that the agreement is corrupt.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN21[] **Antitrust & Trade Law, Sherman Act**

To establish an attempt to monopolize claim, the plaintiff must prove that the defendant or defendants (1) had the specific intent to monopolize, (2) took overt acts in furtherance of a scheme to monopolize, and (3) had a dangerous probability of success. A conspiracy to monopolize claim requires that the plaintiff show (1) the existence of specific intent to monopolize; (2) the existence of a combination or conspiracy to achieve that end; (3) overt acts in furtherance of the combination or conspiracy; and (4) an effect upon a substantial amount of interstate commerce. Hence, the burden under either theory of liability under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act is much greater than the burden under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Opinion

[*820] **RULING & ORDER**

This matter is before the Court on motions for summary judgment filed **[**3]** by Jefferson Downs Corporation (doc. 635), The Committee to Control Gambling (doc. 629), Marie Krantz (doc. 618), Larry Bankston (doc. 650), Peter Henry (doc. 632), and George Boudreaux (doc. 626). Each request for summary judgment asserts several bases, many of them now irrelevant. Pending also is a motion for partial summary judgment on the issue of damages (doc. 665) and several motions *in limine* (docs. 622, 624, 658, and 660) filed by Fair Grounds, Finish Line, Bryan Krantz, Marie Krantz, the committee to Control Gambling, Peter Henry, and George Boudreaux. The Court considers whether the plaintiff, Livingston Downs Racing Association, Inc. has sufficiently supported its claims under (1) *§ 1964(c)* of the Racketeer Influenced and Corrupt Organizations Act ("RICO") and (2) *§ 1* of the Sherman Act. Finding that the supporting evidence is insufficient for the action to survive summary judgment, the Court grants the **[*821]** motions of all these defendants with respect to all claims under RICO and *§ 1* of the Sherman Act. Since the Court determines that Livingston Downs may have stated a claim under *§ 2* of the Sherman Act, this ruling does not terminate the case entirely. Consequently, **[**4]** the other motions remain. The Court denies the motion for partial summary judgment and the motions *in limine,* though the remaining defendants may urge these motions again once the *§ 2* claims, if any, have been developed.

FACTUAL BACKGROUND

This case involves an alleged sweeping plan, implicating all the original defendants, to keep Livingston Downs out of the market for live horse racing and off-track betting ("OTB") in a portion of southeastern Louisiana. Livingston Downs alleges that Defendants proposed to effectuate their plan by tying it up in layers of government process. The Court presented the full details of the alleged scheme in its ruling of August 13, 2001 (doc. 557). [1] The Court adopts that version for the purpose of addressing these motions. Some additional facts are, however, needed for a complete disposition.

A. The Claims

[1] Published as ***Livingston Downs Racing Ass'n v. Jefferson Downs, Corp.,*** *192 F. Supp. 2d 519 (M.D. La. 2001)*.

A brief overview **[**5]** of the plan will provide some context. Live horse racing and OTB are heavily regulated markets in Louisiana, with very few government-approved participants. Marie and Bryan Krantz ("the Krantzes") are two of these participants. Until October of 1992, the Krantzes operated Jefferson Downs racetrack in Jefferson Parish, Louisiana. Sometime in 1990, they purchased a controlling interest in the Fair Grounds racetrack, which operates within one hundred miles of Jefferson Downs. These two racetracks were, at all relevant times, the only two in the area. The Krantzes also own Finish Line Management which itself operated OTB parlors associated with Jefferson Downs. Later, these parlors transferred to Fair Grounds when the Krantzes closed Jefferson Downs.

When Jefferson Downs stopped holding races, Al Ransome, owner of Livingston Downs saw a business opportunity. Because these gambling enterprises are highly regulated, to make a go of his proposed new racetrack in Livingston Parish, Ransome had to obtain the approval of the Louisiana State Racing Commission as well as the voters of Livingston Parish.

Allegedly, the Krantzes saw in the regulatory process their own business opportunity, namely **[**6]** to delay and perhaps frustrate a possible competitor by playing fast and loose with the procedures and institutions of the regulatory process. Livingston Downs claims that the Krantzes engaged in the following anticompetitive behavior: (1) they aggressively lobbied the state legislature and racing commission for favorable actions; (2) they attempted to delay the licensing process with the racing commission; (3) they filed frivolous lawsuits through corporations within their control and other straw-plaintiffs, without regard to the merits of their claims; and (4) they ran, via a freshly-minted alter-ego, an aggressive ad campaign aimed at convincing voters to reject new live horse racing operation. These endeavors, Livingston Downs claims, imposed costs in the form of legal fees and also ultimately succeeded in frustrating Livingston Downs' entry into the market, which caused it to lose expected profits.

[*822] B. The Parties

Any full understanding of this case requires a cast of characters. When Livingston Downs originally filed suit in this Court, it named seventeen defendants. [2] **[**8]** They are:

(1) Jefferson Downs Corporation;
(2) Fair Grounds Corporation;

(3) Finish Line **[**7]** Management Corporation;
(4) The Committee to Control Gambling, Inc.;
(5) Bryan Krantz;
(6) Marie Krantz;
(7) Karen Thomas;
(8) Terence Lee Odom;
(9) Peter Henry;
(10) George Boudreaux;
(11) Larry Bankston;
(12) Oscar Tolmas;
(13) Albert Stall;
(14) Payton Covington;

---

[2] The vast number of named defendants and their very different relationships to each other and the complained of actions presents the Court with the possibility of unintended ambiguity. To minimize that possibility the Court adopts the following conventions for referring to the members of the defendant group and subgroups of it. Where it is possible to distinguish among the original defendants by referring to them individually or in easily denominated groups, the opinion will do so. When it is preferable to refer to groups of the defendants collectively, the following conventions will apply. When the word "defendant" is capitalized, it refers to all the persons and corporations who remained parties to the case before this ruling. Hence, "Defendants" refers to Jefferson Downs, Fair Grounds, Finish Line, Bryan Krantz, Marie Krantz, the Committee to Control Gambling, Peter Henry, George Boudreaux, and Larry Bankston. Where "defendants" is not capitalized, the word will refer to some other subgroup of the original defendants. The surrounding text will always provide the necessary context to tell precisely what subset of the original defendant group is intended.

(15) Melinda Tucker;
(16) Ben Thomas; and
(17) W.C. Littleton.

Livingston Downs retains claims against nine of these original defendants. Livingston Downs agreed to dismiss Oscar Tolmas, Albert Stall, Payton Covington, Melinda Tucker, Ben Thomas, and W.C. Littleton pursuant to a settlement. [3] The Court dismissed them on November 21, 1996 (doc. 50). Livingston Downs submitted a motion to dismiss Karen Thomas and Terrence Lee Odom on August 18, 1998 (doc. 249). The Court dismissed these defendants on October 22, 1998 (doc. 277). Remaining in the action are Bryan and Marie Krantz, four incorporated entities that they control in some degree, two people--Peter Henry and George Boudreaux--whom the Krantzes employed at the relevant times through three of these corporations, and Larry Bankston, attorney for the Krantzes and their corporations. Further introductions are in order.

[*823] **[**9]** *1. The Plaintiff: Livingston Downs* Racing Association

Livingston Downs Racing Association ("Livingston Downs") is a Louisiana corporation domiciled in the Parish of Livingston, Louisiana. In October of 1992, it began the process required to open a racetrack featuring live horse racing and to provide OTB parlors, which according to Louisiana statute may only be owned and operated by interests that also operate a horse racing establishment. [4] The horse racing business is tightly regulated by the State of Louisiana. Livingston Downs had the opportunity to open the track only because defendant corporation Jefferson Downs had decided to close its racetrack. Livingston Downs had to obtain a permit to operate a racetrack, gain a transfer of the license once held by Jefferson Downs to operate OTB parlors from the Racing Commission, and obtain the approval of the voters in Livingston Parish. Upon commencing to navigate these regulatory obstacles, Livingston Downs faced immediate resistance that it now attributes to the machinations of the Krantzes and their agents.

[10]** 2. *Jefferson Downs Corporation*

Jefferson Downs Corporation ("Jefferson Downs") is a Louisiana Corporation domiciled in Jefferson Parish, Louisiana. Until October, 1992, Jefferson Downs operated a racetrack that featured live horse racing. The racetrack was also called Jefferson Downs. In addition, Jefferson Downs housed several OTB parlors associated with its racetrack operations. In October, 1992, Jefferson Downs decided to close its racetrack. Because Louisiana state law limits the number of tracks that may operate within a region, this closure gave Livingston Downs the opportunity to open its own racetrack. Livingston Downs claims that Jefferson Downs, through its ownership, has been involved in the plan to keep Livingston Downs out of the market for live horse racing and OTB parlors throughout the relevant period. Jefferson Downs, among other parties, filed suit against the Louisiana State Racing Commission to

---

[3] These dismissed defendants were all state actors. All but Melinda Tucker were members of the Louisiana State Racing Commission. Melinda Tucker worked as an Assistant Attorney General for the Louisiana Attorney General's Office. The settlement required the Louisiana State Racing Commission to grant Livingston Downs a license to operate its planned racetrack so long as Livingston Downs managed to obtain appropriate financial backing. Ultimately, the Commission refused the license because of a flaw with the financing. Livingston Downs sued to force the Commission to grant the license, but lost on appeal. ***Jefferson Downs Corp., Inc. v. Louisiana State Racing Commission,*** *751 So. 2d 465 (La.App. 4th Cir. 2000)*, *cert. denied,* ***531 U.S. 1011, 121 S. Ct. 565, 148 L. Ed. 2d 485 (2000)***, *rehearing denied* ***531 U.S. 1133, 121 S. Ct. 898, 148 L. Ed. 2d 804 (2001)***. This Court refused Livingston Downs' motion to bring these defendants back into this suit based on the alleged violation of their settlement. Doc. 428.

[4] *LA. REV. STAT. § 4:211, et seq.* The statute actually limits ownership and operation of OTB parlors in Louisiana to racetracks licensed before June 30, 1987. *LA. REV. STAT. § 4:211(5)*. Under that law, Livingston Downs could not obtain the OTB license once held by Jefferson Downs. Livingston Downs challenged that law on equal protection grounds in an independent lawsuit and ultimately lost on appeal. ***Livingston Downs Racing Ass'n v. State,*** *705 So. 2d 149 (La. 1997)*.

annul the license granted to Livingston Downs on December 10, 1992. [5] The reason for Jefferson Downs' continued interest is that its owners also control the only racetrack that was operating in the area at the time.

[11]** 3. *Finish Line Management Corporation*

Finish Line Management Corporation ("Finish Line") is a Louisiana Corporation conducting business in Orleans, Jefferson, St. Charles, St. Tammany, and Terrebonne Parishes. Finish Line Management at one time operated the OTB parlors associated with Jefferson Downs. After Jefferson Downs closed, Finish Line entered an agreement to continue operating those parlors for Fair Grounds Corporation. According to Livingston Downs, Finish Line, through its ownership, was involved in the plan to keep Livingston Downs out of the market for live horse racing and OTB parlors throughout the relevant period.

[*824] 4. *Fair Grounds Corporation*

Fair Grounds Corporation ("Fair Grounds") is a Louisiana corporation doing business in New Orleans. At the time of these events, Fair Grounds operated a racetrack that featured live horse racing. It also operated OTB parlors associated with its racetrack. Because Fair Grounds and Jefferson Downs operated within one hundred miles of each other, they were subject to a regulation that restricted them from holding racing on the same days. Because of this restriction, Fair Grounds held live horse racing only in the Fall and **[**12]** Winter while Jefferson Downs did so only in the Spring and Summer. After Jefferson Downs closed, Fair Grounds sought to acquire the license formerly held by Jefferson Downs to operate its OTB parlors. Livingston Downs claims that Fair Grounds, through its controlling owners, at all times participated in the plan to keep Livingston Downs out of the market for live horse racing and OTB parlors. Specifically, Fair Grounds acted, with Jefferson Downs, as a plaintiff in the action filed to declare the racing license a nullity. [6] It also filed a motion to quash subpoenas with the Racing Commission. Fair Grounds also intervened in Livingston Downs' lawsuit which sought to declare unconstitutional the statute which limited people who could operate OTB parlors. [7]

[13]** 5. *The Committee to Control Gambling*

The Committee to Control Gambling ("CCG") is a Louisiana corporation doing business in Baton Rouge, Louisiana. It was incorporated in early January of 1993, just a matter of days before the January 16 election which posed the question whether to approve the presence of live horse racing in their parish to the voters of Livingston Parish. Peter Henry appears as the President on the documents of incorporation and George Boudreaux appears as the Secretary-Treasurer. Immediately after incorporating, CCG began an aggressive--and some would say disingenuous--media campaign which sought to convince voters to reject the horse racing referendum. Livingston Downs complains that the campaign involved misrepresentations and that it was part of the scheme to frustrate or delay Livingston Downs' entry into the live horse racing and OTB parlor markets. By an earlier ruling, this Court held that whatever the provenance of Livingston Downs' claims, the activities of CCG were protected by the *Noerr-Pennington* doctrine and that CCG's campaigning could not be the basis for antitrust liability. ***Livingston Downs Racing Ass'n,*** *192 F. Supp. 2d 519, 531-32 (M.D. La. 2001)*. **[**14]**

6. *Peter Henry*

---

[5] ***Jefferson Downs Corp., et al. v. Louisiana State Racing Comm'n,*** Suit No. 92-20961, Div. G, Civil District Court for the Parish of Orleans. Ultimately, the Louisiana Court of Appeals for the 4th Circuit upheld the licensing.

[6] ***Jefferson Downs Corp., et al. v. Louisiana State Racing Comm'n,*** Suit No. 92-20961, Div. G, Civil District Court for the Parish of Orleans.

[7] Suit # 399,563, 19th Judicial District Court. Livingston Downs ultimately lost this suit on appeal, as mentioned previously. ***Livingston Downs Racing Ass'n v. State,*** *705 So. 2d 149 (La. 1997)*.

Peter Henry is the President of CCG. He was also a long-time employee of Jefferson Downs and, after Jefferson Downs closed, Finish Line. **Depo. of Peter Henry** at 13-14. For both companies, Henry served in a maintenance position. ***Id.*** Of his job, he said, "I'm in a position that anyone that's in the office can give me orders. I don't question it. I just follow through." ***Id.*** at 18. When Henry heard talk about CCG he volunteered to Bryan Krantz to help. ***Id.*** at 24. Later two company people asked him to be the President. ***Id.*** at 25. He signed two documents, but otherwise had no CCG duties. ***Id.*** at 39. These claims by Henry are uncontested.

[*825] 7. *George Boudreaux*

George Boudreaux is the Secretary-Treasurer of CCG. He was also, at the relevant times, an employee of Fair Grounds. When he was in high school he worked weekends for Jefferson Downs. **Depo. of George Boudreaux** at 8. When he graduated in 1991 at age 19, he got a job at Fair Grounds, where he worked at an entry level job in marketing earning $ 200-250 a week. ***Id.*** at 8-10. Later he transferred to a job working for the Assistant Director of Operations **[**15]** at Fair Grounds. ***Id.*** at 10. Asked about his qualifications to act as secretary-treasurer for a corporation, he said he was young, "looking at this place being my future, holding on to a dream--that's what it was about." ***Id.*** at 29. He signed the incorporation documents to protect his employer. ***Id.*** He performed no other related duties. ***Id.*** at 44. These claims by Boudreaux are uncontested.

8. *Karen Thomas*

Karen Thomas was, at the relevant times, an employee in Larry Bankston's law office and a resident of Livingston Parish. After the Louisiana State Racing Commission granted Livingston Downs a racing permit, Jefferson Downs and Fair Grounds, among others, sued in Orleans Parish to annul it. After the Livingston Parish Police Jury added a proposition which would allow horse racing in Livingston Parish, the same defendants (as plaintiffs) amended their petition to force a stay of the referendum. In response, Al Ransome, President and Chairman of the Board of Livingston Downs, filed suit in Livingston Parish seeking a writ of mandamus directing the Secretary of State to hold the election. [8] **[**17]** Karen Thomas agreed to file an intervention in that **[**16]** suit. On January 11, 1993, after the trial court issued its writ of mandamus in favor of Livingston Downs, Thomas filed a notice of suspensive appeal and sought an emergency writ. The court of appeals denied the writ. The next day, Thomas took an emergency writ to the Louisiana Supreme Court, which that court also denied. That mandamus suit continued, despite the fact that the racetrack proposition passed on January 16, 1993, until it was dismissed as moot by the Louisiana First Circuit Court of Appeals on October 13, 1995. On January 4, 1993, Karen Thomas filed another suit as plaintiff seeking to enjoin the Secretary of State from conducting the same election. [9] Livingston Downs claims that Karen Thomas was a straw-plaintiff, enlisted by her employer on behalf of the Krantzes. Her participation was necessary in order to give the Krantzes standing to object to the referendum in Livingston Parish. It is admitted that the Krantzes not only paid for this litigation through Fair Grounds but that their lawyer, Larry Bankston, performed the legal work. Thomas claims to have had nothing to do with the litigation short of signing on as the plaintiff.

9. *Terrence Lee Odom*

Terrence Lee Odom was, at the relevant times, the spouse of Tina Simoneaux Odom, another employee of Larry Bankston's law firm. On February 25, 1993, Odom--who had standing as a resident of Livingston Parish--filed a petition to nullify the January 16, 1996 election. [10] **[**18]** Meanwhile, **[*826]** Livingston Downs, seeking to obtain a hearing with the Louisiana State Racing Commission for the purpose of obtaining a license to conduct specific race dates, filed a petition for a writ of mandamus in the district court for the Parish of Orleans. [11] On April 22, 1993, Odom filed a petition to intervene. Odom, unlike the Krantzes, had standing in the matter. The trial court granted the

---

[8] ***Ransome v. Secretary of State for the State of Louisiana,*** Suit No. 67,710, 21st Judicial District Court, Parish of Livingston.

[9] ***Thomas v. Secretary of State of Louisiana,*** Suit No. 67,728, Division B, 21st Judicial District Court, Parish of Livingston.

[10] ***Odom v. Livingston Parish Police Jury,*** Suit No. 68,130, Division C, 21 st Judicial District Court, Parish of Livingston.

[11] Suit No. 93-6366, Division F, Civil District Court for the Parish of Orleans.

mandamus. It is admitted that the Krantzes paid the legal bills in this litigation and that Larry Bankston and his law firm performed the legal work. No one contests that Odom was a straw-plaintiff.

10. Larry Bankston

Larry Bankston was, at the relevant times, a member of the Louisiana State Senate. He was also the attorney for Bryan Krantz, Marie Krantz, Jefferson Downs, Finish Line, Fair Grounds, the Committee to Control Gambling, Karen Thomas, and Terrence Odom. Livingston Downs alleges misconduct by Bankston that extends to his activities as a senator and as an attorney in all the lawsuits of which Livingston Downs complains. Livingston Downs also alleges that Bankston, at the behest of the Krantzes, formed and operated the Committee to Control Gambling. This Court granted summary judgment on all claims arising out of Bankston's activities as a legislator. **Ruling of June 18, 2001** (doc. 611). Livingston Downs maintains that Bankston's activities as the Krantzes' attorney were instrumental to the scheme to delay or frustrate its business enterprise.

11. *Bryan & Marie Krantz*

Bryan and Marie Krantz have at least a controlling interest in each of the above corporations. They admit that they owned **[**19]** 100% of both Jefferson Downs and Finish Line. **Def. Ans. to Complaint PP** 23, 27 (doc. 70). It is uncontested that they exercise voting control over Fair Grounds. The Fair Grounds Annual Report of 1993 reveals that Marie and Bryan Krantz obtained 72.27% of Fair Grounds' common stock in 1990. It also reveals that they sold that stock on October 1, 1993 to the John G. Masoni Trust. The sale created a voting trust that gave Marie Krantz voting control over those shares until 2008. Marie Krantz was Chairman of the Board and Treasurer of Fair Grounds in 1993. Bryan Krantz was its President. According to Marie Krantz's deposition testimony, Bryan Krantz controlled Fair Grounds' business and operations. It is also apparent that the Krantzes controlled the Committee to Control Gambling. Though CCG incorporated in January of 1993, it had no assets until it received contributions. Among other donations, CCG received money from Continental Advertising, Village Row Partnership, and Fair Grounds. Marie Krantz admitted that she lent $ 10,000 to Continental Advertising, which is wholly owned by the Krantzes, and another $ 10,000 to Village Row. **Depo. of Marie Krantz,** transcript of tape **[**20]** 1, at 146. Both these sums were paid to CCG. ***Id.*** at 147. Fair Grounds itself donated $ 10,572 to CCG. According to Marie Krantz, Bryan Krantz decided that Fair Grounds and Continental should make their contributions, **Depo. of Marie Krantz,** transcript of tape 2 at 35, and Marie Krantz personally authorized the Fair Grounds contribution, **Depo. of Marie Krantz,** transcript of tape 1 at 147. Livingston Downs alleges that much, if not all, of the money CCG used to run its advertising campaign originated with the Krantzes. The defendants do not contest it.

[*827] Nor was their control over CCG limited to its financing. The incorporation documents list Peter Henry as CCG's President and George Boudreaux as its Secretary-Treasurer. Henry and Boudreaux were, in 1993, low-level employees of Finish Line and Fair Grounds, respectively. Though both these men understood the object of CCG's election campaign, neither knew anything about its operation. George Boudreaux testified that "CCG, to me, is a committee to--looks out for what was going on. We were trying to hold on to what racing was all about, that maybe there might not be no more other--trying to keep the racing stabilized. **[**21]** " **Depo. of George Boudreaux** at 24. Beyond that limited understanding, Boudreaux had nearly no knowledge of the workings of CCG. He did not know how CCG meant to achieve its goal. ***Id.*** He had no duties related to CCG; he signed the incorporation documents and then had no contact with its operations. ***Id.*** at 32, 44. Boudreaux once asked Bryan Krantz what was happening with the organization and Krantz replied that "it's being handled by the attorneys." ***Id.*** at 33. In fact, Boudreaux thinks wrongly that the CCG campaign was successful and that the voters rejected the Livingston Downs racetrack. ***Id.*** at 44. None of these claims is contested by any party. There is no evidence that George Boudreaux knew anything about any of the other events of which Livingston Downs complains.

Peter Henry was similarly in the dark. He knew that CCG would campaign to stop Livingston Downs from taking over the OTB parlors once operated by Jefferson Downs. **Depo. of Peter Henry** at 28. When he heard rumors about CCG, he volunteered to help Bryan Krantz in any way he could. In his deposition, Henry evinced some knowledge of CCG's purpose:

> Q: And why would **[**22]** that help Bryan Krantz? For you to participate in CCG?

A: Well, it was part of my job. The rumors I heard was that the OTBs were in--trying to be taken over.
Q: That Livingston Downs was trying to take over--
A: Right.
Q: --the OTBs?

Id. at 24. Later, two men working for the company approached Henry and asked him to be its president. ***Id.*** at 25. Despite his title, however, Henry did nothing except sign two documents. ***Id.*** at 39. He does not know whether CCG remains active. ***Id.*** at 27. He never saw CCG's publications. ***Id.*** at 28. He does not know whether they prevailed in the referendum. ***Id.*** at 37. When presented at his deposition with one of CCG's brochures, he said it favored horse racing in Livingston Parish. ***Id.*** All of these propositions are uncontroverted. There is no evidence that Henry knew anything about any of the other activities of which Livingston Downs complains.

Marie Krantz, in fact, admits that CCG was under the Krantzes' control. In her deposition, she states that "[CCG] was a vehicle in which we could attempt to have some influence on the results of that election, and that's why I did **[**23]** it." **Depo. of Marie Krantz,** transcript of tape 2 at 33. Livingston Downs does not contest the claim that the Krantzes controlled CCG. It is, in fact, one of their primary contentions.

12. *The Louisiana State Racing Commission Members*

On December 10, 1992, the Louisiana State Racing Commission granted a racing permit to Livingston Downs. Livingston Downs complains of all other interactions with the Commission. The Racing Commission later withdrew the permit. It alleges **[*828]** that the Commission, through former defendants Oscar Tolmas, Albert Stall, Payton Covington, Ben Thomas, and W.C. Littleton, conspired with the Krantzes to delay the opening of Livingston Downs. All of these defendants have been dismissed pursuant to the settlement discussed above. The order dismissing these defendants did not dismiss any of Livingston Downs' claims. Consequently, Livingston Downs' allegations of conspiracy among the Krantzes, these Commission members, and Melinda Tucker continue to be relevant at this stage of the action. The Commission members themselves, however, cannot be liable for the alleged conspiracy.

13. *Melinda Tucker*

Melinda Tucker was, at the relevant time, an Assistant **[**24]** Attorney General for Louisiana who acted as legal advisor to the Louisiana State Racing Commission. Livingston Downs complains of her complicity in the delay tactics of the Commission. Livingston Downs also claims that she handled legal matters for the Racing Commission and sought to delay their resolution. She also has been dismissed from the action pursuant to the same settlement that released the Commission members.

PROCEDURAL BACKGROUND

Originally, Livingston Downs sought redress under *42 U.S.C. §§ 1983*, *1985*, and *1986*, and under *15 U.S.C. § 15* for violations of *15 U.S.C. § 1*. The original complaint (doc. 1) also claims that the defendants attempted to monopolize the relevant markets in horse racing and OTB parlors. After dismissal of the government defendants, the Court dismissed the civil rights actions for lack of a government actor. Subsequently, Livingston Downs added claims under ***HN1***[] the Racketeering Influenced and Corrupt Organization Act ("RICO"), *18 U.S.C. § 1964(c)*, which allows parties injured by violations of RICO to recover damages.

In addition to the party dismissals described **[**25]** above, the Court has also rejected certain other claims. Livingston Downs cannot proceed against Larry Bankston in his capacity as a Louisiana State Senator. **Ruling of June 18, 2001** (doc. 611). Moreover, Livingston Downs cannot base its antitrust claims on any of the following: (1) the campaign activities of CCG; (2) attempts to influence the executive activities of the Louisiana State Racing Commission; (3) lobbying by any defendant of the state legislature or the racing commission; (4) or any lawsuit in which the Defendants prevailed. ***Livingston Downs Racing Ass'n v. Jefferson Downs Corporation,*** *192 F. Supp. 2d 519 (M.D. La. 2001)*. Finally, Livingston Downs cannot recover lost profits as damages under RICO. ***Id.***

The Court is now faced with the question whether Livingston Downs has properly stated its claims under the theories of recovery it has put forward and if so, whether it has presented sufficient evidence to survive summary judgment. Of most importance to this set of motions are the following three questions: (1) Has Livingston Downs alleged a scheme to defraud under the mail and wire fraud statutes?; [12] (2) Has Livingston Downs supported **[**26]** the claim that there is a plurality of parties to the Krantz conspiracies, as required under *§ 1* of the Sherman Act?; and (3) Has Livingston Downs alleged a violation of *§ 2* of the Sherman Act?

SUMMARY JUDGMENT STANDARD

HN2[] Summary judgment is appropriate when the pleadings, depositions, answers to interrogatories, **[*829]** admissions, and affidavits on file indicate that there is no genuine issue of material fact and that the moving party is entitled to judgment as a matter of law. ***Celotex Corp. v. Catrett,*** *477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. ***HN3***[] When the burden at trial rests on the non-moving party, as it does here, the moving party need only demonstrate that the record lacks sufficient evidentiary support for the non-moving party's case. **[**27]** ***Id.*** The moving party may do this by showing that the evidence is insufficient to prove the existence of one or more elements essential to the non-moving party's case. ***Id.***

HN4[] Although this Court considers the evidence in the light most favorable to the non-moving party, the non-moving party may not merely rest on allegations set forth in the pleadings. Instead, the non-moving party must show that there is a genuine issue for trial. ***Anderson v. Liberty Lobby, Inc.,*** *477 U.S. 242, 248-49, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. Conclusory allegations and unsubstantiated assertions will not satisfy the non-moving party's burden. ***Grimes v. Tex. Dep't of Mental Health,*** *102 F.3d 137, 139-40 (5th Cir. 1996)*. If, once the non-moving party has been given the opportunity to raise a genuine factual issue, no reasonable juror could find for the non-moving party, summary judgment will be granted for the moving party. ***Celotex,*** *477 U.S. at 322*; ***see also, FED. RULE CIV. P.*** *56(c)*.

ANALYSIS

I. RICO Claims

The Livingston Downs civil RICO claims focus on numerous alleged violations of the mail and wire **[**28]** fraud statutes. As this Court wrote in its ruling of September 23, 2002 (doc. 711), the basis for Livingston Downs' claim for damages under the civil RICO statute pieces together as follows:

> First, Plaintiff claims that Fair Grounds conceived a "scheme or artifice to defraud." That scheme or artifice, apparently, was the larger plan to tie up Plaintiff and its business plans by initiating a string of baseless lawsuits and other petitioning activities whose goal was delay, not success on the merits. Fair Grounds violated *§ 1341*, Plaintiff claims, by using the wires and mails to carry out that larger plan. So, for example, Plaintiff claims that Fair Grounds sent an initial pleading in a suit brought by Terrence Lee Odom (as a straw-plaintiff) on September 13, 1993 to Joseph R. Martin, Paul H. Benoist, Angie R. LaPlace, Rodney N. Erdey, and the 21st Judicial District Court Clerk. **Pltff's Rico Case Stmnt,** Exhibit 1. Plaintiff alleges forty separate uses of the wires and mails that are related to the execution of the Odom and Thomas lawsuits alone. Each of these could constitute an independent count of mail or wire fraud if there was an overarching scheme to defraud and if **[**29]** court filings are not protected from being the basis of a mail fraud charge. Presumably, the assertion is that they used the postal service to effect each of these mailings. So, Plaintiff argues, Fair Grounds repeatedly violated *§ 1341* and *§ 1343* by using interstate communications systems to advance their scheme. These violations are included under § 1961(1) as racketeering activities. The multiple instances qualify them as a pattern of racketeering activities under § 1961(5), since forty is greater than two. Fair Grounds, Plaintiff claims, conducted their business in part through this pattern of racketeering activities, since the entire plan sought to

[12] The mail and wire fraud statutes are two of many criminal statutes that may serve as predicate violations under the RICO statute. Without at least two predicate violations--two acts of racketeering--there can be no RICO violation.

> advance the Fair Grounds business interests. Consequently, they violated § 1962(c), at least. Finally, Plaintiff alleges a cause of action under *§ 1964(c)* as a party injured by reason of Fair Grounds' § 1962(c) violation. Plaintiff also alleges that Fair **[*830]** Grounds conspired to violate the substantive subsections of § 1962 and consequently violated § 1962(d) as well.

Ruling & Order at 9-10 (doc. 711). [13] Consequently, the nub of Livingston Downs' RICO complaint is that these Defendants entered a scheme to defraud **[**30]** which they facilitated by using interstate means of communication. If this particular complaint is to survive summary judgment, Plaintiff must, in the first instance, be capable of sustaining the claim that Defendants' scheme was a scheme to defraud.

This Court follows the Eleventh Circuit decision *United States v. Pendergraft,* [14] in concluding that Livingston Downs has not made allegations necessary to establish a mail fraud violation. In *Pendergraft,* the Eleventh Circuit reversed the mail fraud convictions **[**31]** of two men who filed false affidavits in court as part of a scheme to obtain a settlement in their lawsuit against a county government. The defendants meant to indicate to the government their willingness to lie to the court and thereby to impose pressure to avoid a court battle. The county government knew that the affidavits were false, but the court did not. The Eleventh Circuit reversed the convictions for mail fraud, holding that there was no scheme to defraud because the defendants did not have an intent to deceive. The court noted that ***HN5***[] the word "defraud" in the mail and wire fraud statutes "still signifies 'the deprivation of something of value by trick, deceit, chicane, or overreaching.'" ***United States v. Pendergraft,*** *297 F.3d 1198, 1208* (quoting ***Hammerschmidt v. United States,*** *265 U.S. 182, 188, 44 S. Ct. 511, 68 L. Ed. 2d 968 (1924))*. The Eleventh Circuit found that the defendants did not have the requisite intent to deceive the county because they knew that the county would not be fooled by their affidavits:

> In support of their suit against Marion County, Pendergraft and Spielvogel authored affidavits that falsely accused Cretul of making **[**32]** threats. Such falsity might have deceived some, but it could not deceive Marion County. Cretul, after all, was the Chairman of the Marion County Board of Commissioners, and Pendergraft and Spielvogel were aware of Cretul's position. They knew that Cretul would deny making these threats, and they knew that their affidavits would not trick Cretul into admitting otherwise. If they knew that they could not deceive Marion County, then they could not have had an intent to deceive. [...] Since there was no intent to deceive, there was no scheme to defraud.

297 F.3d at 1209. Though defendants clearly sought to use deceit of the court to advance their chances of depriving the county of its property, their deceit did not amount to fraud because it was not directed at the County.

The situation is similar in this case. None of the Defendants sought to deceive Livingston Downs. As in *Pendergraft,* if the Defendants sought to deceive anyone, it was the courts **[**33]** and other government actors. Defendants allegedly presented the courts, the voters, and the Racing Commission with misleading information and baseless claims in the hope that they would be fooled into depriving Livingston Downs of the necessary legal backing to **[*831]** open their business or, at the very least, be fooled into delaying its entry into the market. Livingston Downs does not allege and presents no evidence that Defendants at any point sought to deceive it. Without that intent to deceive, there can be no mail fraud violation.

The import of the Eleventh Circuit's ruling is that ***HN6***[] one cannot commit fraud by fooling one person to receive something of value from another. There are independent torts that form the basis for such causes of action. Livingston Downs could have brought suit against the defendants for malicious prosecution, for example. There is no reason to expand the scope of mail and wire fraud statutes to include attempts to obtain a third party's property

---

[13] In the September 23 ruling, the Court referred to all the Defendants collectively as "Fair Grounds," following defendants' lead, because it was not important for the purpose of that ruling--as it is for this one--to distinguish among them. It bears noting, as well, that Livingston Downs also claims that the Defendants violated § 1962(a) and (b) and conspired to violate these substantive subsections. The discussion above mentions only the subsection (c) violation solely to simplify the narrative.

[14] *297 F.3d 1198 (11th Cir. 2002)*.

by deceiving the courts (or other government actors), especially when independent causes of action exist to serve the same end. [15]

[34]** It is unavailing to argue that *§ 1964(c)* of the RICO statute allows recovery for people who are incidentally injured by RICO violations because the Court finds that there was no mail fraud in the first place. It is true that some courts, including the Fifth Circuit, have allowed individuals who were not the target of the underlying RICO violations to survive motions to dismiss on their claims to recover for damages caused by the fraud. ***See*** ***Procter & Gamble Co. v. Amway Corp.,*** *242 F.3d 539, 564-65 (5th Cir. 2001)*; ***Summit Properties, Inc. v. Hoechst Celanese Corp.,*** *214 F.3d 556 (5th Cir. 2000)*, *cert. denied, 531 U.S. 1132, 121 S. Ct. 896, 148 L. Ed. 2d 802 (2001)*; ***Shaw v. Rolex Watch, U.S.A.,*** *726 F. Supp. 969, 973 (S.D.N.Y. 1989)*. The procedural posture of these cases is of the utmost importance. In all the named cases, the courts were faced with or reviewing motions to dismiss for failure to state a claim under Rule 12(b)(6). In each case, the plaintiff claimed that the defendant had committed fraud against a third party and that the plaintiff had been hurt by that fraud. Normally, in such a situation, **[**35]** the courts require for recovery under *§ 1964(c)* that the plaintiff allege that she herself relied on the misrepresentation that forms the basis of the fraud. ***See*** ***Summit Properties,*** *214 F.3d at 561*. *Summit Properties* held that in some instances it is possible to make out the proximate cause element of a *§ 1964(c)* claim without showing reliance, so long as all "the other elements of proximate cause are present." ***Id.*** So, *Summit Properties* recognized some reason to hold "open the possibility that a plaintiff company may not need to show reliance when a competitor lured the plaintiff's customers away by a fraud directed at the plaintiff's customers." ***Id.*** (discussing *Procter & Gamble*). Though the proposed facts are suggestively similar, there is an important difference: In the *Summit Properties* setting, the court assumed that there was an underlying RICO violation to begin with. The **[*832]** Fifth Circuit wrote, "thus, if P&G's customers relied on *the fraudulent rumor* in making decisions to boycott P&G products, this reliance suffices to show proximate causation." ***Id.*** (emphasis supplied). Similarly, in *Shaw v. Rolex Watch,* **[**36]** the Southern District of New York held that "[a] plaintiff who is injured *as a proximate result of fraud* should be able to recover regardless of whether he or a third party is the one deceived." ***Shaw,*** *726 F. Supp. at 973* (emphasis supplied). Both these statements assume that the plaintiffs' allegations of fraud are true and conclude that it does not matter for stating a civil RICO claim for damages proximately caused by the fraud that the plaintiff did not rely on the misrepresentation.

This Court's holding in the instant case is different. The question here is not whether Livingston Downs has properly alleged that its damages were proximately caused by the defendants' acts. This Court held in its August 13, 2001 ruling that there was a triable question of fact whether defendants' actions proximately caused Livingston Downs to incur legal fees. The question now presented is whether Livingston Downs has successfully alleged the specifics of the underlying mail fraud violation. The cited cases do not touch this issue. It is not clear why the courts in those cases did not require the plaintiffs to allege fraud with particularity as is required under **[**37]** *Federal Rule of Civil Procedure 9(b)*, but it is clear and this Court holds that Livingston Downs has not sufficiently supported the claim that any of the defendants committed mail fraud.

Livingston Downs could rely on the above discussed theory of liability if it could prove that the defendants committed mail fraud against the courts. Then it would be able to claim that it was injured by the courts' reliance on the defendants' misrepresentations to the courts and other government agencies. Unfortunately for Livingston Downs, this option is not available either. ***HN7***[] To sustain a mail fraud claim, a plaintiff must allege and prove (1) a scheme or artifice to defraud and (2) execution of that scheme by use of interstate mails. To be a scheme to

[15] An independent problem with Livingston Downs' mail fraud theory of liability is that Livingston Downs would have to establish that it was deprived of a property interest to substantiate its claim. To be guilty of mail fraud, the defrauder must have an intent to use deceit for the purpose of divesting another person of a property interest. Seemingly, Livingston Downs' complaint is that the Krantzes connived to deprive it of state licenses and of the voter approval required to use those licenses. Interestingly, in another case which involved Larry Bankston and Louisiana gambling licenses, the Supreme Court held that a license in the hands of the state is not property for the purpose of the mail fraud statute. ***See*** ***Cleveland v. United States,*** *531 U.S. 12, 20, 121 S. Ct. 365, 148 L. Ed. 2d 221 (2000)* (holding that the mail fraud statute "does not reach fraud in obtaining a state or municipal license of the kind here involved, for such a license is not 'property' in the government regulator's hands."). This Court does not rule on this alternate ground because the parties have never focused on the issue.

defraud, the object must be deprivation of a property interest. Livingston Downs alleges that the Defendants set out to deprive it of its property. It nowhere alleges that the Defendants sought to deprive the government of a property interest--even an intangible property interest. In essence, Livingston Down's claim is that the Defendants sought to fool the government into depriving Livingston Downs of its property. While such an action may be some independent **[**38]** tort under state law, it is not mail fraud, even if it did cause Livingston Downs some concrete damage.

The Court notes that many other courts have rejected the notion that filing litigation documents can serve as the basis of a RICO violation. Several courts have rejected the theory that legal filings may constitute mail fraud. ***See*** ***Daddona v. Gaudio,*** *156 F. Supp. 2d 153, 162-64 (D.Conn. 2000)*; ***Auburn Med. Ctr, Inc. v. Andrus,*** *9 F. Supp. 2d 1291, 1300 (M.D. Ala. 1998)*; ***Von Bulow v. Von Bulow,*** *657 F. Supp. 1134, 1142-46 (S.D.N.Y. 1987)*. Other courts have refused to treat filing or the threat of filing legal documents as extortion under the Hobbs Act (another RICO predicate). ***See*** ***I.S. Joseph Co. v. J. Lauritzen A/S,*** *751 F.2d 265, 266-67 (8th Cir 1984)*(stating that threats to sue are not extortion under the Hobbs Act); ***G.I. Holdings, Inc. v. Baron & Budd,*** *179 F. Supp. 2d 233, 255* (same). The first set of cases refuses to apply the mail fraud statute, not because its application is inapt, but because doing so would frustrate other policies. So, for example, in *Auburn* **[**39]** *Medical,* the court thought that the mail fraud claim was merely an "artfully **[*833]** pled" malicious prosecution claim. It refused to apply the mail fraud statute while also refusing to hold that the statute's language did not apply. The second set of cases refuses to interpret extortion to include threats to sue. All these cases note the possible conflict between allowing such suits and the principle that citizens should be able freely to petition their government. While the former cases base their rulings on policy considerations, the latter find statutory grounds for avoiding the policy question.

This Court follows the latter approach. Insofar as these cases interpret the Hobbs Act, they are irrelevant. Their approach, however, is instructive. The Court shares the worries regarding the *First Amendment* right to petition that all these courts mention, but does not reach that issue because the central holding is that the actions of the Defendants, however culpable, do not constitute fraud against Livingston Downs. Defendants did not have the intent to deceive Livingston Downs. Consequently, there was never a scheme to defraud and the mailings did not constitute mail fraud violations. There **[**40]** is, as a result, no RICO violation. The motions for summary judgment on the RICO claims filed by all Defendants are, therefore, granted.

II. Sherman Act Claims

A. *Section 1*

The essential core of Livingston Downs' claims is stated very nicely in one of its submissions to this Court. It wrote that "the defendants have again tried to hide behind the corporate identities they created and control." **Memo Supporting Motion to Compel Discovery** at 18. Here is the gravamen of Plaintiff's *§ 1* antitrust claims: The Krantzes engaged in an anticompetitive conspiracy by acting through the corporations they owned and controlled, their employees, and their agents. While the Court agrees that this conduct may have been a conspiracy in the colloquial sense, it cannot be a conspiracy in the sense meant by *§ 1* of the Sherman Act. ***HN8***[] A *§ 1* antitrust conspiracy requires that two persons act in concert. ***See*** ***Copperweld Corp. v. Independence Tube Corporation,*** *467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. In *Copperweld,* the Supreme Court noted the importance of plurality for a *§ 1* claim as follows:

> The Sherman Act contains a "basic distinction **[**41]** between concerted and independent action. The conduct of a single firm is governed by *§ 2* alone and is unlawful only when it threatens actual monopolization. It is not enough that a single firm appears to "restrain trade" unreasonably, for even a vigorous competitor may leave that impression. […*] Section 1* of the Sherman Act, in contrast, reaches unreasonable restraints of trade effected by a "contract, combination … or conspiracy" between separate entities. It does not reach conduct that is "wholly unilateral." […] The reason Congress treated concerted behavior more strictly than unilateral behavior is readily appreciated. Concerted activity inherently is fraught with anticompetitive risk. It deprives the marketplace of the independent centers of decisionmaking that competition assumes and demands.

467 U.S. at 767-68. ***HN9***[] The case law that has grown up around *§ 1* establishes certain rules for individuating antitrust conspirators so that formal distinctions do not disguise actual unity. Those rules work against Livingston Downs.

Individuation of conspirators turns on an inquiry into who controls the action and whether there is a unity of interests. A wholly **[**42]** owned subsidiary of a corporation cannot conspire with its parent corporation. ***Copperweld,*** *467 U.S. 752, 771-772,* ***[*834]*** *104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. Two subsidiaries wholly owned by the same parent corporation cannot conspire with their parent or with each other. ***See, e.g.,*** ***Hood v. Tenneco Texas Life Ins. Co.,*** *739 F.2d 1012, 1015 (5th Cir. 1984)*; ***Directory Sales Mgmt. Corp. v. Ohio Bell Tel. Co.,*** *833 F.2d 606, 611 (6th Cir. 1987)*. The officers, directors, employees, representatives, and agents of a corporation cannot conspire with their corporate employer. ***Nelson Radio & Supply Co. v. Motorola,*** *200 F.2d 911, 914 (5th Cir. 1952)*; ***see also,*** ***Schwimmer v. Sony Corp. of America,*** *677 F.2d 946, 953 (2d Cir. 1982)*, *cert. denied,* *459 U.S. 1007, 103 S. Ct. 362, 74 L. Ed. 2d 398*. Two corporations that are wholly owned by the same group of individuals cannot conspire with each other. ***Century Oil Tool, Inc. v. Production Specialties, Inc.,*** *737 F.2d 1316 (5th Cir. 1984)*; ***see also,*** ***Guzowski v. Hartman,*** *969 F.2d 211, 214 (6th Cir. 1992)*. **[**43]** The only remaining potential co-conspirators are the government actors. It is also established as a matter of law that petitioned government actors cannot be antitrust co-conspirators, ***Columbia v. Omni Outdoor Advertising,*** *499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*, and this Court earlier foreclosed the possibility that the Defendants could be liable for an antitrust conspiracy with the government actors even if they were capable entering such a conspiracy. ***Livingston Downs,*** *192 F. Supp. 2d at 536*.

1. Jefferson Downs & Finish Line

If there is an antitrust conspiracy presented by this case, it cannot have been among Bryan Krantz, Marie Krantz, Jefferson Downs, and Finish Line; they can only have participated in a conspiracy with some other actor. That result is demanded by both *Century Oil Tool* and *Nelson Radio.* ***HN10***[] *Nelson Radio* precludes a conspiracy between the Krantzes and their corporations unless the Krantzes were acting in their own, rather than in the corporation's, interest. ***Nelson Radio,*** *200 F.2d at 914*. *Century Oil Tool* establishes that two corporations with the same set of owners **[**44]** cannot conspire under *§ 1* of the Sherman Act. ***Century Oil Tool,*** *737 F.2d at 1317*. In this case, among these three alleged actors there is unity of interests. Bryan and Marie Krantz are directors and officers of both Jefferson Downs and Finish Line, as well as 100% owners of both. The Krantzes cannot conspire with their corporations and because those corporations have identical ownership, the corporations cannot conspire with each other. For the purposes of a *§ 1* conspiracy, these three defendants are one and the same; they cannot merge through a conspiracy formerly disparate economic interests.

2. Fair Grounds

Though it is a closer case, the same result obtains for Fair Grounds. When the Supreme Court announced in *Copperweld* that a wholly-owned subsidiary cannot conspire with its parent corporation, it adverted to the following reasons:

> A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one. They are not unlike a multiple team of horses drawing a vehicle under the **[**45]** control of a single driver.

Copperweld, *467 U.S. at 771*. Though the Supreme Court specifically limited its holding to the parent-subsidiary context, later courts have relied on these reasons to extend the rule to similar situations. So, for example, the Fifth Circuit relied on this reasoning to conclude, in *Century Oil Tool,* that two companies both jointly owned by the same three men could not conspire with each other. ***Century Oil Tool,*** *737 F.2d at 1317*.

[*835] Other courts have used the same reasons to conclude that ***HN11***[] there can be no *§ 1* conspiracy between one corporation and another corporation that it legally controls. ***Direct Media Corp. v. Camden Tel. & Tel.,*** *989 F. Supp. 1211, 1217 (S.D. Ga. 1997)*; ***Rohlfing v. Manor Care, Inc.,*** *172 F.R.D. 330, 344 (N.D. Ill. 1997)*; ***Bell Atl. Bus. Sys. Servs. v. Hitachi Data Sys. Corp.,*** *849 F. Supp. 702, 706-07 (N.D. Cal. 1994)*; ***Total Ben. Services, Inc. v. Group Ins. Admin., Inc.,*** *1993 U.S. Dist. LEXIS 49, 1993 WL 15671*, *1-2 (E.D. La. 1993); ***Leaco Enters., Inc. v. General Elec. Co.,*** *737 F. Supp. 605, 608-09 (D. Or. 1990)*; **[**46]** ***Novatel Communications, Inc.,*** *1986 U.S. Dist. LEXIS 16017, 1986-2 Trade Cas. (CCH) P 67, 412, at 62, 172-73 (N.D. Ga. 1986)*. These courts have established different tests for control. The court in *Novatel,* for example, held that a bare majority of ownership was sufficient. In that case, the parent owned 51% of its subsidiary. ***Novatel,*** 1986 U.S. Dist. LEXIS 16017, 1986-2 Trade Cas. (CCH) at P 62, 172-73. The court in *Direct Media* agreed. ***Direct Media,*** *989 F. Supp. at 1217*. The District Court in Oregon has taken a different approach. It held that if a parent can force a merger with the subsidiary, then they should be treated as having a unity of interests as a matter of law. So, in *Aspen Title & Escrow, Inc. v. Jeld-Wen, Inc.,* [16] the court refused to find unity of interest and control when an individual alleged conspirator owned only 60% of a defendant company's stock as well as when a second company owned 75% of a third company's stock. According to that court "only corporations which are owned 100% in common, or a *de minimis* amount less than 100% are covered by the *Copperweld* rule." ***Aspen Title & Escrow, Inc. v. Jeld-Wen, Inc.,*** *677 F. Supp. 1477, 1486*. A later decision by the **[**47]** same court clarified its rule, however. In *Leaco,* the court held that the proper test for control is whether the parent company can force a merger. ***Leaco,*** *737 F. Supp. at 608-9*. In a jurisdiction where 67% ownership suffices to force a merger, the court held that 91.9% ownership by a parent of a subsidiary precludes their participation in a *§ 1* conspiracy. ***Id.*** *at 609*.

Applying the reasoning of the Fifth Circuit in *Century Oil Tool,* it is apparent that the control test should extend to circumstances in which, as here, the same individuals control two corporations. In *Century Oil Tool,* the Fifth Circuit wrote:

> Given *Copperweld,* we see no relevant difference between a corporation wholly owned by another corporation, two corporations wholly owned by a third corporation or two corporations wholly owned by three persons who together manage all affairs of the two corporations. A contract between them **[**48]** does not join formerly distinct economic units. In reality, they have always had "a unity of purpose or a common design."

Century Oil Tool, *737 F.2d at 1317*. If the *Copperweld* rule for inter-corporate ownership extends to individual ownership, the Court sees no reason that the question of corporate control should be treated any differently. ***HN12***[] Where two people together are controlling the affairs of separate corporations those corporations cannot conspire under *§ 1* of the Sherman Act.

Though the fact that the control test should apply to individual ownership just as it does to corporate ownership is clear, it is not clear that the same test is relevant. ***HN13***[] It does not seem relevant to ask, in the individual setting, whether the individual owner can force a merger between the two (or three) corporations. Instead, what is important is whether the individual can control the policies of both (or all) corporations. If so, then there can be no conspiracy between (or among) the corporations. **[*836]** Thus, the Court need not decide between the rules proposed for inter-corporate ownership. It is uncontested that Marie Krantz has control of 72.27% the voting stock at Fair **[**49]** Grounds. Her testimony that Bryan Krantz, as President, controls the company policy is also uncontested. Moreover, Livingston Downs has not even alleged that these corporate and individual interests are in any respect disparate. Consequently, Fair Grounds cannot be the second party to an antitrust conspiracy in this case as a matter of law. [17]

---

[16] *677 F. Supp. 1477 (D. Or. 1987)*.

[17] ***HN14***[] Whether an antitrust conspiracy is possible does not require a factual determination. In *Bell Atlantic,* the court reasoned as follows:

> Under the reasoning of *Copperweld* and its progeny, it is not necessary to conduct a factual inquiry to determine whether a parent and a subsidiary over which the parent has legal control can conspire in violation of *§ 1* of the Sherman Act.

[50] 3. Peter Henry, George Boudreaux & Larry Bankston**

Similarly, Peter Henry, George Boudreaux, and Larry Bankston are incapable of conspiring with the Krantzes and the corporate entities. ***HN15***[] In order properly to allege that an employee or agent of a corporation has entered a conspiracy with other employees or the corporation, a plaintiff must allege that the employee or agent was acting outside of her normal employment capacity. ***Nelson Radio,*** *200 F.2d at 914*. Peter Henry was an employee of Jefferson Downs and later of Finish Line. George Boudreaux was an employee of Fair Grounds. Larry Bankston was engaged in the service of the Krantzes and their corporations as an attorney. These facts are uncontested. Moreover, Livingston Downs does not allege that these actors were acting in their own interests. On the contrary, Livingston Downs goes to great lengths to assert that these defendants were acting as the agents of the Krantzes and were exclusively pursuing the Krantzes' interests. [18] **[*837]** As a matter of law, then, Livingston Downs has failed properly to allege that these defendants were involved in a *§ 1* conspiracy and their claims under that section against these **[**51]** defendants must be dismissed. In addition, the evidence so far accumulated makes it clear that no reasonable juror could find that these defendants acted independently. The only evidence available suggests that these men acted to advance the interests of the Krantzes. No evidence has been presented to suggest otherwise. Consequently, even had Livingston Downs properly alleged independence, these claims should be dismissed.

[52]** Even if Peter Henry and George Boudreaux could have entered an antitrust conspiracy with the Krantzes, the *§ 1* claims against them would have to be dismissed. This Court has held that the activities of CCG cannot by themselves constitute an antitrust violation. ***Livingston Downs,*** *192 F. Supp. 2d at 531*. Consequently, the only possible argument for the liability of these two men is that they agreed to enter the larger conspiracy against Livingston Downs, and while they cannot be liable for their own acts, they can be liable for the larger conspiracy through the acts of their co-conspirators. That argument is unavailing.

HN17[] To be an antitrust co-conspirator, a defendant must have consciously adopted the antitrust scheme. ***Monsanto Co. v. Spray-Rite Serv. Corp.,*** *465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*; ***Spectators' Communication Network, Inc. v. Colonial Country Club,*** *253 F.3d 215, 220 (5th Cir. 2001)*. Livingston Downs cannot substantiate this claim. There is no evidence that Boudreaux or Henry knew anything

---

> *Copperweld* found that a parent and a wholly-owned subsidiary are considered the "same entity" for antitrust purposes because the parent has the power to exercise full control over its subsidiary. For the same reasons, a parent and a subsidiary over which the parent has legal control cannot conspire to restrain trade.

Bell Atlantic, *849 F. Supp. at 706*.

[18] It is irrelevant that these agents may have, in addition to the duties they owe their employers, distinct individual motivations for pursuing the same acts. What is important is that they are, in fact, pursuing the interests of their employers. So, for example, Larry Bankston may have been driven solely by a desire to run up legal fees or out of personal animus for the ownership of Livingston Downs. These facts would not matter. The only important fact is that the Krantzes or their corporations hired Bankston to perform certain duties for pay. That relationship removes Bankston from the universe of potential co-conspirators for the Krantzes. The only exception to this general rule applies when an agent seeks to advance her own interests as a marketplace actor. ***Siegel Transfer, Inc. v. Carrier Exp., Inc.,*** *54 F.3d 1125, 1136-37 (3d Cir. 1995)*("For ***HN16***[] the concept of a conspiracy between a principal and an agent to apply in the antitrust context, the exception to the general rule should arise only where an agent acts to further his own economic interest in a marketplace actor which benefits from the alleged restraint, and causes his principal to take the anticompetitive actions about which the plaintiff complains. In this way, the exception captures agreements that bring together the economic power of actors which were previously pursuing divergent interests and goals, the type of activity that *section 1* was intended to oversee."); ***Oksanen v. Page Memorial Hosp.,*** *945 F.2d 696, 705-06 (4th Cir. 1991)*(examining whether members of the staff directly benefitted from the plaintiff's elimination as a competitor, and whether the staff caused the hospital to engage in the alleged restraint); ***Pink Supply Corp. v. Hiebert, Inc.,*** *788 F.2d 1313, 1318 (8th Cir. 1986)*("We construe 'for the agent's own benefit' to mean at least an economic stake in the gain to be realized from the anticompetitive object of the conspiracy.") Henry, Boudreaux, and Bankston have no such stake. Henry and Boudreaux sought personal advantage only in job security. Larry Bankston, insofar as the evidence shows, sought only to provide the legal services requested by the Krantzes.

about the scope of the Krantzes' plan. The evidence barely supports the claim that they knew **[**53]** what the CCG portion of that plan entailed. Both signed documents and agreed to do so either out of loyalty to their employers or a sense that their jobs would be made more secure. All that this establishes is that they agreed to facilitate protected political speech. Boudreaux thought that the campaign succeeded, while Henry did not know the outcome. There is absolutely no evidence that these two knew anything about any lawsuit, lobbying, or petitioning. Therefore, even if Boudreaux and Henry could have--despite their agent status--entered the larger conspiracy, they did not.

This holding establishes an alternative ground for concluding that Peter Henry and George Boudreaux do not provide Livingston Downs the elusive second actor. Not only must the *§ 1* claim against them be dismissed, but Livingston Downs must continue its search to maintain its *§ 1* claims against any of the defendants.

4. The Committee to Control Gambling

The question who controls the Committee to Control Gambling is very different. Livingston Downs must establish that there is a plurality of actors involved in the alleged conspiracy for *§ 1* of the Sherman Act to be the appropriate vehicle for its claims. **[**54]** In the corporate ownership or agency relationship settings, unity of interest is established by degree of ownership and control or by the nature of the parties' relationship as a matter of law. Here, however, these factors are inapplicable. CCG had no assets at its incorporation. It accepted and expended contributions in order to campaign against a referendum proposition. Its corporate officers have no ownership interest in the corporation. And though those officers are employees of Krantz-controlled corporations, CCG is **[*838]** not itself an agent of the Krantzes. Consequently, in deciding whether CCG is under the control of the Krantzes and therefore incapable of entering a *§ 1* conspiracy with them, the Court faces a factual determination. It is only appropriate for the Court to resolve this factual matter if Livingston Downs has failed to show that there is a genuine question of fact whether CCG and the Krantzes (et al.) represent a plurality of interests. If no reasonable juror could conclude from the pleadings, depositions, answers to interrogatories, admissions, and affidavits on file that CCG represents interests separate and apart from the Krantzes', then the Court may conclude that **[**55]** CCG is one with the other Krantz-controlled entities for purposes of the Sherman Act.

Despite this burden, Livingston Downs has, throughout this case, tried to establish that CCG is an alter-ego of the Krantzes. All of the evidence presented on the question indicates that Livingston Downs is correct on this point. The Defendants have not presented any contrary evidence. The Court's situation is delicate because it is Plaintiff's duty to allege and come forward with evidence that multiple parties participated in this purported conspiracy, yet Livingston Downs has dedicated itself to opposing that proposition. Consequently, Livingston Downs has failed properly to allege that CCG is a separate entity. In fact, Livingston Downs has presented enough evidence to prevail on a motion for summary judgment on the claim that CCG *is not* a separate entity for the purposes of a *§ 1* conspiracy. Deposition testimony by the CCG corporate officers--also the Krantzes' employees--and Marie Krantz indicates that these officers knew next to nothing about CCG or its operation; that Bryan Krantz had directed his attorneys to run the outfit; that Marie Krantz, Bryan Krantz, and their corporate alter-egos **[**56]** financed CCG; and that Marie Krantz regarded the operation as a way to delay Livingston Downs from entering the relevant market. There is not even a metaphysical doubt whether CCG was a tool of the Krantzes formed to convince the Livingston Parish voters to oppose the operation of a racetrack in their parish. CCG was not only controlled by the Krantzes, but operated to their specifications. Consequently, CCG could not have been the requisite second party to the alleged *§ 1* conspiracy.

5. Karen Thomas & Terrence Lee Odom

The same analysis applies to Karen Thomas and Terrence Lee Odom. The Krantzes managed to get themselves into court by soliciting straw-plaintiffs with standing to represent their interests. Once again, this version of the events is the one preferred by Livingston Downs, much to its legal detriment. Presented with the burden of raising some evidence that Karen Thomas and Terrence Lee Odom were acting independently of the Krantzes and their business interests, Livingston Downs instead argues that they were mere puppets on the hands of Larry Bankston.

Consequently, there is no evidence that these two plaintiffs brought good faith suits in their own interests against **[**57]** the provenance of the Livingston Parish referendum election. On the contrary, it is admitted that the Krantzes, through Fair Grounds, paid for that litigation. Their attorney handled it. Both straw-plaintiffs have given deposition testimony that they had no real participation in the lawsuits. No reasonable juror could find that Thomas and Odom acted independently in bringing these suits. Aside from being in fact used by the Krantzes, they may have been manipulated by Bankston into acting as plaintiffs because of their relationship to his law firm. In any event, no one even claims that they acted independently. Consequently, they too cannot have acted as the elusive second **[*839]** party to the alleged *§ 1* antitrust conspiracy with the Krantzes and their other alter-egos.

6. The Racing Commission Members

Though the members of the Louisiana State Racing Commission and the Assistant Attorney General charged with providing it legal advice were dismissed from this lawsuit, the order of dismissal limited itself to the defendants. The order of dismissal concerned only the claims against the government actors. Livingston Downs reserved its rights to prove all of its claims against the remaining **[**58]** defendants. Consequently, Livingston Downs properly may maintain that these government actors or the Racing Commission itself provide the plurality of conspirators required for a conspiracy under *§ 1* of the Sherman Act. The full importance of this fact is that it allows Livingston Downs to allege -- as it has -- that a larger conspiracy existed and that the other defendants could be held liable insofar as Livingston Downs could prove that they participated in it. Unfortunately for Livingston Downs, this Court has already ruled that the government actors and the Krantzes (et al.), whatever the nature of their relationship, did not enter an antitrust conspiracy.

The August 13, 2001 opinion ruled out the possibility that the Krantzes and the Racing Commission, including its members in their individual capacities, can be liable for together entering a *§ 1* antitrust conspiracy. This ruling is consistent with the Supreme Court's *Noerr-Pennington* doctrine, upon which the ruling was based, and with its *Parker* doctrine, upon which the Court did not rule because the government actors had previously been dismissed. ***HN18***[] Both these doctrines exempt from antitrust liability any conspiracy **[**59]** between a private actor and a government actor unreasonably to restrain trade on the ground that the Sherman Act should not be interpreted--and was not intended--to extend to acts of petitioning the government. "*Parker* and *Noerr* are complementary expressions of the principle that the antitrust laws regulate business, not politics; the former decision protects the State's acts of governing, and the latter the citizens' participation in government." ***Columbia v. Omni Outdoor Advertising, Inc.,*** *499 U.S. 365, 374, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*. It does not matter that the government and the private business interest entered an agreement that would result in a restraint of trade, even if that agreement, between private actors, would constitute an antitrust conspiracy. ***Id.*** *at 376-77*. Moreover, it does not matter that the agreement is corrupt. "To use unlawful political influence as the test of legality of state regulation undoubtedly vindicates (in a rather blunt way) principles of good government. But the statute we are construing is not directed to that end. Congress has passed other laws aimed at combating corruption in **[**60]** state and local governments." ***Id.*** *at 378-79* (quoting ***Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.,*** *365 U.S. 127, 140, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961))*. In fact, under current federal law, local public officials may be--and are--prosecuted for corruption under numerous, scattered provisions of the federal code. Principally, local corruption is prosecuted under the Hobbs Act, [19] **[**61]** the Travel Act, [20] the mail and wire **[*840]** fraud statutes

[19] *18 U.S.C. § 1951*. "Whoever in any way or degree obstructs, delays, or affects commerce or the movement of any article or commodity in commerce, by robbery or extortion or attempts or conspires to do so, or commits or threatens physical violence to any person or property in furtherance of a plan or purpose to do anything in violation of this section shall be fined under this title or imprisoned not more than twenty years or both." *§ 1951(a)*.

[20] *18 U.S.C. § 1952*. "Whoever travels in interstate or foreign commerce or uses the mail or any facility in interstate or foreign commerce, with intent to--(1) distribute the proceeds of any unlawful activity; or (2) commit any crime of violence to further any unlawful activity; or (3) otherwise promote, manage, establish, carry on, or facilitate the promotion, management, establishment, or carrying on of any unlawful activity, and thereafter performs or attempts to perform--(A) an act described in paragraph (1) or (3) shall be fined under this title, imprisoned not more than 5 years, or both; or (B) an act described in paragraph (2) shall be

as supplemented by the "intangible right" to "honest services" under *§ 1346*, [21] **[**62]** and the federal bribery [22] **[**63]** and federal program bribery statutes. [23] Prosecutors **[*841]** have worked hard to expand the scope of various of these provisions to target local political corruption, despite strong, but halting, resistance. The Sherman Act does not provide a backdoor to enforcement. It follows, therefore, from the antitrust jurisprudence of the Supreme Court, as well as from this Court's earlier ruling, that there was no antitrust conspiracy between the Krantzes and the Racing Commission or its officials.

[64]** While this Court did hold in its former ruling that various of the Defendants' petitioning activities were not exempt from the purview of the Sherman Act by virtue of the *Noerr-Pennington* doctrine, those activities were limited to Defendants' purported interference with the Racing Commission acting in its adjudicatory capacity. The ruling held that there is a question of fact whether "the machinery of [the Commission] was effectively closed to [Livingston Downs] and whether the Defendants usurped the Commission's decision-making authority." ***Livingston Downs,*** *192 F. Supp. 2d at 536*. None of the other conduct involving the Racing Commission can constitute part of a conspiracy under the antitrust laws. The question remains whether the remaining charge leaves room for claiming complicity between the Krantzes and the Commission under *§ 1* of the Sherman Act. If so, then it might be claimed

---

fined under this title, imprisoned for not more than 20 years, or, and if death results shall be imprisoned for any term of years or for life." *§ 1952(a)*.

[21] *18 U.S.C. § 1346*. "For the purposes of this chapter, the term 'scheme or artifice to defraud' includes a scheme or artifice to deprive another of the intangible right of honest services." This section answers a conflict over the scope of the mail and wire fraud statutes. The honest services doctrine developed by judicial construction specifically to address breaches of fiduciary duty including local political corruption. The Supreme Court subsequently disapproved the doctrine. ***United States v. McNally,*** *483 U.S. 350, 107 S. Ct. 2875, 97 L. Ed. 2d. 292 (1987)*. Then Congress passed *§ 1346* to abrogate the Supreme Court decision and reinstate the honest services doctrine.

[22] *18 U.S.C. § 201*. "Whoever--(1) directly or indirectly, corruptly gives, offers or promises anything of value to any public official or person who has been selected to be a public official, or offers or promises any public official or any person who has been selected to be a public official to give anything of value to any other person or entity with intent--(A) to influence any official act; or (B) to influence such public official or person who has been selected to be a public official to commit or aid in committing, or collude in, or allow, any fraud, or make opportunity for the commission of any fraud, on the United States; or (C) to induce such public official or such person who has been selected to be a public official to do or omit to do any act in violation of the lawful duty of such official or person; (2) being a public official or person selected to be a public official, directly or indirectly, corruptly demands, seeks, receives, accepts, or agrees to receive or accept anything of value personally or for any other person or entity, in return for: (A) being influenced in the performance of any official act; (B) being influenced to commit or aid in committing, or to collude in, or allow, any fraud, or make opportunity for the commission of any fraud, on the United States; or (C) being induced to do or omit to do any act in violation of the official duty of such official or person. […] Shall be fined under this title […] or imprisoned for not more than fifteen years, or both." *§ 201(b)*. Though *§ 201* targets federal officers, it may be used to target local officials who accept federal grant money.

[23] *18 U.S.C. § 666*. "(a) Whoever, if the circumstance described in subsection (b) of this section exists--(1) being an agent of an organization, or of a State, local, or Indian tribal government, or any agency thereof--(A) embezzles, steals, obtains by fraud, or otherwise without authority knowingly converts to the use of any person other than the rightful owner or intentionally misapplies, property that--(i) is valued at $ 5,000 or more, and (ii) is owned by, or is under the care, custody, or control of such organization, government, or agency; or (B) corruptly solicits or demands for the benefit of any person, or accepts or agrees to accept, anything of value from any person, intending to be influenced or rewarded in connection with any business, transaction, or series of transactions of such organization, government, or agency involving anything of value of $ 5,000 or more; or (2) corruptly gives, offers, or agrees to give anything of value to any person, with intent to influence or reward an agent of an organization or of a State, local or Indian tribal government, or any agency thereof, in connection with any business, transaction, or series of transactions of such organization, government, or agency involving anything of value of $ 5,000 or more; shall be fined under this title, imprisoned not more than 10 years, or both. (b) The circumstance referred to in subsection (a) of this section is that the organization, government, or agency receives, in any one year period, benefits in excess of $ 10,000 under a Federal program involving a grant, contract, subsidy, loan, guarantee, insurance, or other form of Federal assistance." In ***Salinas v. United States,*** *522 U.S. 52, 118 S. Ct. 469, 139 L. Ed. 2d 352 (1997)*, the Supreme Court held that the prosecution need not prove that the charged briber affected the federal money.

that these two actors are the two actors required by that section for an antitrust "contract, combination, […] or conspiracy." In that case, the other defendants might be implicated to the extent that it can be proved that they took part in that conspiracy.

The Court **[**65]** finds, consistent with its earlier ruling, that the only alleged acts that might be the basis for a conspiracy charge under *§ 1* cannot support a charge of conspiracy at all, insofar as the government actors are concerned. Even if the *Parker* doctrine allows anticompetitive government acts of any sort to be considered part of a conspiracy under *§ 1*, which this Court doubts, the only charge left after the August 13, 2001 ruling is that the Krantzes used their influence over the Racing Commission members to manipulate its procedures and deny Livingston Downs normal access to its normal process. ***See Livingston Downs,** 192 F. Supp. 2d at 536*. The only question left open is "whether 'the machinery of [the Commission] was effectively closed' to LDRA and whether the Defendants usurped the Commission's decision-making authority." ***Id.*** These allegations do not implicate the Racing Commission in any form of conspiracy. It is possible that evidence of a (non-antitrust) conspiracy or even evidence of outright bribery would support the contention that the decisions of the Racing Commission were for practical purposes the decisions of the Krantzes. But the heart **[**66]** of the remaining claims is that the Krantzes and their alter egos and agents conspired among themselves to use their control over the Commission to delay and frustrate Livingston Downs' business aspirations. This claim does not assert a conspiracy *with* government actors, but a conspiracy [24] to *use* government actors.

This Court's earlier ruling did not deny summary judgment on these claims because the Court was convinced that Livingston Downs might prove a conspiracy **[*842]** between the Krantzes and the Racing Commission, but because it might prove a conspiracy among the Krantzes and other parties to use the Racing Commission to anticompetitive effect. In that ruling, the Court assumed there was a plurality of conspirators exclusive of the government actors and considered only whether the *Noerr-Pennington* doctrine exempted the various actions complained of from being the basis of antitrust liability. Having determined that the claim that the Krantzes and others **[**67]** manipulated and controlled the Racing Commission in such a way as to usurp its decision-making process could go forward, the Court rejected the motion for summary judgment but left unaddressed the question who conspired to control the Commission. Now the Court is in a position to judge that there is no plurality and that there was no antitrust conspiracy to control the Racing Commission. Instead, if anything, there was a corporate plan to control it implemented by the Krantzes and their agents.

The government actors were the final hope Livingston Downs possessed of proving that there was another party to the alleged conspiracy. In point of fact, the only people whose interests matter for antitrust purposes are the Krantzes. The Krantzes cannot conspire with the government, companies they own wholly, companies in which they have ownership control, corporations they in fact wholly control, or their agents and employees, under *§ 1* of the Sherman Act. Nor can these agents conspire with each other. Consequently, there were no other actors involved in this scheme, in the eyes of ***antitrust law***, and none of the Defendants can be held liable for engaging in a *§ 1* conspiracy, regardless how **[**68]** questionable their activities.

B. *Section 2*

Livingston Downs has only explicitly adverted to *§§ 1* and *15* of the antitrust laws as the basis for its claims. **Original Complaint** PP 221, 223. As discussed above, ***HN19***[] *§ 1* criminalizes "every contract, combination … or conspiracy, in restraint of trade or commerce." *Section 15* allows parties injured by antitrust criminal violations to recover damages. So far this litigation has been conducted as if Livingston Downs' antitrust claims fall exclusively under that rubric. ***See Livingston Downs,** 192 F. Supp. 2d at 528*. The Court now notes however, after finding that Livingston Downs has not alleged or cannot prove that there was a plurality of actors behind the alleged antitrust conspiracy, that Livingston Downs' original complaint appears to state a claim under *§ 2* of the Sherman Act.

---

[24] Though not an *antitrust* conspiracy.

The original complaint in this action alleges that "The above described facts demonstrate an attempt thus far successful by the defendants to create a monoply [*sic*] in the horse racing industry within the relevant market, all in violation of federal ***antitrust law***." **Original Complaint** P 222. *Section 2* provides, **[**69]** ***HN20***[] "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce [...] shall be deemed guilty of a felony." *15 U.S.C. § 2*. Thus it appears that Livingston Downs intends to prove, in the alternative, a monopolization violation. If it can make out this claim and that it suffered damages therefrom, then *§ 15* would allow recovery. Given that ours is a system of notice pleading, the Court notes the apparent monopolization claim and expressly reserves judgment on the substance of that issue.

Some *§ 2* issues, however, should be disposed of at this stage. It is not clear whether by including P 222 of the complaint Livingston Downs intended only to state a claim for attempted monopolization or also a claim for conspiracy to monopolize. ***HN21***[] To establish an attempt to monopolize **[*843]** claim, Livingston Downs must prove that the defendant or defendants "(1) had the specific intent to monopolize, (2) took overt acts in furtherance of a scheme to monopolize, and (3) had a dangerous probability of success." ***North Mississippi Communications, Inc. v. Jones,*** *792 F.2d 1330, 1335 (5th Cir. 1986)*. **[**70]** A conspiracy to monopolize claim requires that Livingston Downs show "(1) the existence of specific intent to monopolize; (2) the existence of a combination or conspiracy to achieve that end; (3) overt acts in furtherance of the combination or conspiracy; and (4) an effect upon a substantial amount of interstate commerce." ***Id.*** Hence, the burden under either *§ 2* theory of liability is much greater than the burden under *§ 1*.

Despite the differences, however, two things of import to this case do not change. First, ***HN22***[] the *Noerr-Pennington* and *Parker* immunity doctrines apply to both sections. ***See*** ***Omni Outdoor,*** *499 U.S. at 383* (rejecting claims under *§§ 1* and *2* and stating that "*any* action that qualifies as state action is '*ipso facto* ... exempt from the operation of the antitrust laws'" and "*Parker* and *Noerr* are complementary expressions of the principle that the antitrust laws regulate business, not politics.")(emphasis in original). There is no distinction among the sections of the Sherman Act when these doctrines are implicated. Consequently, the ruling of August 13, 2001 with respect to which activities may provide the basis of **[**71]** an antitrust claim remains effective as to any possible claims under *§ 2*. Under a *§ 2* conspiracy theory of liability, then, the government actors can no more be co-conspirators than they could under *§ 1*. Similarly, the activities of CCG and its nominal officers cannot be the basis of any *§ 2* liability.

Second, ***HN23***[] as under *§ 1*, a *§ 2* conspiracy claim requires a plurality of actors. *Surgical Care Cntr of Hammond, L.C. v. Hospital Serv. Dist. No. 1, 309 F.3d 836, 2002 WL 31255875* at *3 (5th Cir. 2002). In fact, the Fifth Circuit held in *Surgical Care Center* that the same unity of interest analysis that applies to a *§ 1* conspiracy applies to a *§ 2* conspiracy claim as well. It wrote:

> St. Luke's contends that North Oaks and Quorum (the company that manages North Oaks) conspired to monopolize the outpatient surgical market. The district court dismissed the conspiracy claim because "as a matter of law, a corporation and its agent [i.e. North Oaks and Quorum] are incapable of conspiracy with one another to violate the antitrust laws." This general rule is correct, and none of the recognized exceptions applies to this case. The district **[**72]** court did not err in dismissing St. Luke's conspiracy claim under *§ 2* of the Sherman Act.

Id. (citing ***Siegel Transfer, Inc. v. Carrier Exp., Inc.*** *54 F.3d 1125* (rejecting a *§ 1* conspiracy claim because a corporation and its agents normally have a unity of interests)). Consequently, though Livingston Downs may have stated a claim under *§ 2*, it cannot maintain a *§ 2* conspiracy claim for the reasons discussed in this ruling, and the ruling of August 13, 2001. It follows that George Boudreaux, Peter Henry, and the Committee to Control Gambling are not liable under *§ 2*. Their acts are protected under the *Noerr-Pennington* doctrine from liability under all the antitrust laws. They cannot be co-conspirators of the Krantzes and so cannot be liable for the culpable acts of those parties as co-conspirators. All claims against these defendants are dismissed.

Only Marie Krantz, Bryan Krantz, Jefferson Downs, Finish Line Management, Fair Grounds, and Larry Bankston (in his individual capacity) remain as possible defendants. Only claims for attempted monopolization **[*844]** remain against them. The Court will not now consider the substance of the *§ 2* claims **[**73]** against these defendants because the parties have not addressed them in any form.

III. Motion for Partial Summary Judgment & Motions *in Limine*

The Defendants, with the exception of Larry Bankston, request that the Court dismiss various damages claims. Livingston Downs seeks damages in the form of compensation for legal fees it incurred defending against various claims brought against it as well as for fees incurred in suits and interventions it brought in response to other actions of the Defendants. Defendants claim that they cannot be held to have caused some of these fees and that, in any event, Livingston Downs has not supplied enough evidence of their damages because their legal invoices are not itemized. The same defendants seek to exclude various kinds of evidence from the much-anticipated trial on the merits.

The Court denies all of these motions without prejudice. It is premature at this stage to reject claims of damages entirely on the basis that the Plaintiffs have not yet provided itemized billing. ***HN24***[] The standard of proof of the quantum of damages is less taxing than that for the fact of damages. ***Story Parchment Co. v. Paterson Parchment Paper Co.,*** *282 U.S. 555, 563, 51 S. Ct. 248, 75 L. Ed. 544 (1931)*. **[**74]** A jury may determine the amount of damages using "a just and reasonable estimate ... based on relevant data." ***Zenith Radio Corp. v. Hazeltine Research, Inc.,*** *395 U.S. 100, 125, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. Evidence may include "probable and inferential as well as direct and positive proof." ***Id.,*** and need only avoid "speculation or guesswork." ***Bigelow v. RKO Pictures,*** *327 U.S. 251, 264, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*. Consequently, if Livingston Downs can prove that some defendants proximately caused it to incur some portion of the legal fees in each case--either by filing the suit in the first place or by intervening and multiplying the pending motions--as well as that these acts suffice for liability under *§ 2* of the Sherman Act, then they may be able to maintain their claim for damages despite imperfect proof of amount. Should the remaining defendants continue to think their arguments have merit after the parties have developed the *§ 2* claims and defenses, they may urge the motion again.

The portions of this ruling that concern the RICO and Sherman Act claims substantially reframe this case. It would be inappropriate **[**75]** to exclude evidence when the parties have not yet discussed the elements of the claims that remain in the lawsuit. Consequently, those motions too are denied. In the event that there is reason to make the same motions at a later time, the remaining defendants may do so.

CONCLUSION

For the reasons discussed above, the motions for summary judgment submitted by Jefferson Downs Corporation (doc. 635), The Committee to Control Gambling (doc. 629), Marie Krantz (doc. 618), Larry Bankston (doc. 650), Peter Henry (doc. 632), and George Boudreaux (doc. 626) are **GRANTED** with respect to all claims asserted against them under RICO. Similarly the motions for summary judgment submitted by the Committee to Control Gambling (doc. 629), Peter Henry (doc. 632), and George Boudreaux (doc. 626) are **GRANTED** with respect to all claims asserted against them under *§ 1* and *§ 2* of the Sherman Act. The motions for summary judgment submitted by Jefferson Downs (doc. 635) and Marie Krantz (doc. 618) are **GRANTED** with respect to all claims under *§ 1* of the Sherman Act, but **DENIED** with respect to any claims under **[*845]** *§ 2*. The Court notes that some defendants have not brought motions **[**76]** for summary judgment on the RICO or Sherman Act claims, or not on all these claims and that the reasons for granting the motions would apply equally to them. In the interest of economy, then, **IT IS FURTHER ORDERED** that any claims asserted against Bryan Krantz, Fair Grounds, Finish Line Management, and Larry Bankston under *§ 1* of the Sherman Act are **DISMISSED.** For the same reason, all claims against Bryan Krantz, Fair Grounds, and Finish Line Management under the civil RICO statute are **DISMISSED.** The case may proceed under the *§ 2* attempted monopolization claims against Marie Krantz, Bryan Krantz, Jefferson Downs, Finish Line Management, Fair Grounds, and Larry Bankston.

IT IS FURTHER ORDERED that the motion for partial summary judgment filed by various defendants (doc. 665) on the issue of damages is denied without prejudice. That motion may be raised at a later time if the Plaintiff fails timely to provide itemized attorney bills. It is also ordered that the motions *in limine* filed by the same defendants (docs. 622, 624, 658, and 660) are **DENIED,** though the remaining defendants may reurge those motions once the *§ 2* claims, if any, are more fully developed.

Antitrust & Trade Law > Clayton Act > General Overview

HN1[] **Antitrust & Trade Law, Clayton Act**

The United States Supreme Court defines monopoly power as the power to control prices or exclude competition. More precisely, a firm is a monopolist if it can profitably raise prices substantially above the competitive level. As the United States Court of Appeals for the D.C. Circuit noted, merely possessing monopoly power is not itself an antitrust violation, but it is a necessary element of a *§ 2* monopolization charge.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Monopolies & Monopolization, Actual Monopolization**

When reviewing the district court's grant of a motion to dismiss a Sherman Act complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*, the appellate court must determine whether allegations covering all the elements that comprise the theory for relief have been stated as required. Moreover, the allegations must be stated in terms that are neither vague nor conclusory. Although the court will assume that the plaintiffs can prove the facts that they allege in their complaint, it is not proper to assume that the defendants have violated the antitrust laws in ways that have not been alleged.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN3[] **Actual Monopolization, Anticompetitive & Predatory Practices**

A *§ 1* of the Sherman Act, specifically *15 U.S.C.S. § 1*, violation is legally distinct from that under *§ 2* of the Sherman Act, specifically *15 U.S.C.S. § 2*, though the two sections overlap in the sense that a monopoly under *§ 2* of the Sherman Act is a species of trade restraint under *§ 1* of the Sherman Act. The same kind of practices, therefore, may evidence violations of both.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN4[] **Sherman Act, Claims**

To establish a violation of *§ 1* of the Sherman Act, specifically *15 U.S.C.S. § 1*, a plaintiff must prove the following elements: (1) a contract, combination, or conspiracy; (2) that imposed an unreasonable restraint of trade. If the plaintiff is able to prove a violation of *§ 1*, it then must prove the existence of antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. These requirements apply with equal force to the plaintiff's claims for damages and injunctive relief; the only relevant distinction being that for injunctive relief, the injury itself need only be threatened.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN6[] **Monopolies & Monopolization, Conspiracy to Monopolize**

A rimless wheel antitrust conspiracy is one in which various defendants enter into separate agreements with a common defendant, but where the defendants have no connection with one another, other than the common defendant's involvement in each transaction. According to the United States Supreme Court, a rimless wheel conspiracy is not a single, general conspiracy but instead amounts to multiple conspiracies between the common defendant and each of the other defendants.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN7[] **Monopolies & Monopolization, Conspiracy to Monopolize**

A single criminal conspiracy generally is demonstrated by an overlap of key actors, methods, and goals.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN8[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Allegations that alleged conspirators received financial and other benefits in exchange for entering into the licensing agreements are sufficient for purposes of *Fed. R. Civ. P. 12(b)(6)* to demonstrate that a *§ 1* of the Sherman Act, specifically *15 U.S.C.S. § 1*, conspiracy was economically plausible.

Criminal Law & Procedure > Criminal Offenses > Racketeering > General Overview

HN9[] **Sherman Act, Claims**

The "combination or conspiracy" element of a *15 U.S.C.S. § 1* violation is not negated by the fact that one or more of the coconspirators acted unwillingly, reluctantly, or only in response to coercion. The co-conspirators need not share the same motive or goal; it is sufficient to allege that the co-conspirators acquiesced in an illegal scheme.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] **Antitrust & Trade Law, Sherman Act**

In assessing liability under *§ 1* of the Sherman Act, specifically *15 U.S.C.S. § 1*, courts generally evaluate agreements pursuant to one of three approaches: (1) per se analysis, for obviously anticompetitive restraints, (2) quick-look analysis, for those with some procompetitive justification, and (3) the full "rule of reason," for restraints whose net impact on competition is particularly difficult to determine. Where the possibility of anticompetitive effects is not obvious, the court analyzes the two licensing agreements at issue -- individually -- pursuant to the "full" rule of reason analysis.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN11[] **Monopolies & Monopolization, Conspiracy to Monopolize**

The rule of reason analysis of restraints of trade is explained as follows: The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN12[] **Monopolies & Monopolization, Conspiracy to Monopolize**

In the rule of reason analysis, the reasonableness of a restraint is evaluated based on its impact on competition as a whole within the relevant market. This evaluation requires a showing of "anticompetitive effect" resulting from the agreement in restraint of trade. To have an "anticompetitive effect," conduct must harm the competitive process and thereby harm consumers. Harm to one or many competitors will not suffice. The Sherman Act directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself. Thus, an inquiry into the lawfulness of the restraint begins by identifying the ways in which a challenged restraint might possibly impair competition. After identifying the type of possible harm to competition alleged, the court must proceed to determine whether that harm is not only possible but likely and significant, which requires examination of market circumstances, including market power and share.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN13[] **Monopolies & Monopolization, Conspiracy to Monopolize**

In rule of reason analysis, the plaintiff must prove that the defendant has sufficient market power to restrain competition substantially. If not, the inquiry is at an end; the practice is lawful. Virtually all courts applying the rule of reason require the plaintiff to show, at a minimum, that the defendants play a significant role in the allegedly restrained market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN14[] **Regulated Practices, Market Definition**

For antitrust purposes, market power is the power to force a purchaser to do something that he would not do in a competitive market. It has been defined as the ability of a single seller to raise price and restrict output. Market share is defined as the percentage of a market that is controlled by a firm. Market power generally is identified, in part, by examining market share.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN15[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Any inquiry into the validity of a tying arrangement must focus on the market or markets in which the two products are sold, for that is where the anticompetitive forcing has its impact.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN16[] **Price Fixing & Restraints of Trade, Tying Arrangements**

An antitrust claim fails as a matter of law when the plaintiff would have suffered the identical loss without regard to the claimed anticompetitive conduct.

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN20[] **Motions to Dismiss, Failure to State Claim**

Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, and an antitrust complaint should not be dismissed at the *Fed. R. Civ. P. 12(b)(6)* stage merely because the court doubts the plaintiff will ultimately prevail. Nevertheless, to avoid dismissal for failure to state a claim, the plaintiff must colorably state facts which, if proven, would entitle him to relief. The United States Court of Appeals for the Fourth Circuit consistently has held this to require an allegation of facts supportive of each element of the plaintiff's antitrust claim.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN21[] **Antitrust & Trade Law, Sherman Act**

The pleader may not evade *Fed. R. Civ. P. 12(b)(6)* requirements by merely alleging a bare legal conclusion; if the facts do not at least outline or adumbrate a violation of the Sherman Act, the plaintiffs will get nowhere merely by dressing them up in the language of antitrust.

Antitrust & Trade Law > Sherman Act > General Overview

HN22[] Antitrust & Trade Law, Sherman Act

To establish liability under the Sherman Act, a showing of either an anticompetitive effect or an anticompetitive purpose is necessary.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN23[] Private Actions, Purchasers

Illinois Brick's indirect purchaser rule, when applicable, bars only compensatory damages relief and does not apply to injunctive relief.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Business & Corporate Compliance > ... > Remedies > Buyer's Damages & Remedies > General Overview

HN24[] Purchasers, Direct Purchasers

Only direct purchasers from an antitrust violator can sue for damages, providing two rationales for the rule: it avoids the danger of multiple, overlapping recoveries against the original seller by direct and indirect purchasers, and it avoids the evidentiary complexities and uncertainties in determining the amount of any overcharge passed through the intermediary to the indirect purchaser. The United States Supreme Court expressly contemplated two exceptions to the indirect purchaser rule: (1) where the indirect purchaser acquired goods through a preexisting cost-plus contract and (2) where the direct purchaser is owned or controlled by its customer. Illinois Brick left unclear whether there might be exceptions for cases in which the amount of the overcharge that was passed on to a lower tier of purchasers could be determined simply and with mechanical precision, but thereafter, the Supreme Court held that even where the amount of overcharge passed on is clear, allowing indirect purchasers to pursue damages claims is inconsistent with Illinois Brick, and the Court refused to create any new exception.

Opinion by: WILLIAMS

Opinion

[*198] WILLIAMS, Circuit Judge:

Mark H. Dickson and Carey D. Ebert, trustee in bankruptcy for Gravity, Inc., (collectively, Gravity) appeal the district court's dismissal under *Federal Rule of Civil Procedure 12(b)(6)* of Gravity's consumer class action claims against Microsoft Corporation and three original equipment manufacturers (OEMs) -- Compaq Computer Corporation (Compaq), Dell Computer Corporation (Dell), **[**3]** and PB Electronics, Inc. (PB) (collectively, the OEM Defendants) -- in the United States District Court for the District of Maryland. For the reasons set forth below, we affirm.

I.

In February 1999, Gravity filed this action in the United States District Court for the District of Columbia, alleging a "hub-and-spoke" conspiracy between Microsoft and the OEM Defendants to restrain **[*199]** trade, in violation of *§ 1* of the Sherman Act, and a conspiracy to maintain Microsoft's alleged monopolies [1] in the sale of operating systems, [2] word processing, and spreadsheet software, in violation of *§ 2* of the Sherman Act. [3] The proposed class action consists of two separate classes. The first class is composed of "United States purchasers, between October 20, 1993 and the present, of Microsoft Windows or MS-DOS operating software . . . installed and sold with personal computers compatible with Intel x86/Pentium architecture purchased directly from Compaq, Dell, or [PB]." (J.A. at 103.) The second class is composed of "United States purchasers, between October 20, 1993 and the present, of Microsoft word processing software and/or Microsoft spreadsheet software installed and sold with personal **[**4]** computers compatible with Intel x86/Pentium architecture purchased directly from Compaq, Dell, or [PB]." (J.A. at 103.)

[5]** Gravity alleges that the OEM Defendants and Microsoft violated the Sherman Act by entering into licensing agreements with the following anticompetitive provisions: (1) a prohibition against removing icons, folders, or Start

---

[1] ***HN1***[] The Supreme Court defines monopoly power as "the power to control prices or exclude competition." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. "More precisely, a firm is a monopolist if it can profitably raise prices substantially above the competitive level." *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34, 51 (D.C. Cir. 2001)* (citing 2A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 501, at 85 (1995)). As the D.C. Circuit noted, "merely possessing monopoly power is not itself an antitrust violation," but "it is a necessary element of a *[Section 2]* monopolization charge." *Id.*

[2] Operating systems function as platforms for software applications, such as word processing and spreadsheet programs.

[3] Gravity also asserted a class action claim against Microsoft individually for monopolization of case management and litigation support software, but Gravity has voluntarily dismissed this claim with prejudice.

menu entries from the Windows desktop; (2) a prohibition against modifying the initial Windows boot sequence; (3) the integration of Internet Explorer (IE), Microsoft's Internet browser software, and other application software with Microsoft's operating software; and (4) the inclusion of long-term distribution contracts, exclusive dealing distribution arrangements, and per-processor license fees. [4]

In exchange for agreeing to these provisions, the OEM Defendants allegedly **[**6]** received various benefits, including discounts on software and "greater cooperation from Microsoft in product development." *Gravity, Inc. v. Microsoft Corp., 127 F. Supp. 2d 728, 732 n.5 (D. Md. 2001)*; *see also* *United States v. Microsoft Corp., 84 F. Supp. 2d 9, 42 (D.D.C. 1999)* (stating that Compaq and several other OEMs enjoyed "early access to Windows source code"). Gravity also alleges that the agreements benefitted the OEM Defendants by allowing them to sell more computer hardware than they would have sold if the relevant software markets were competitive and by ensuring that the OEM Defendants would not be undercut by rivals offering either comparable hardware with lower-priced software or comparable hardware without software.

Gravity claims that the restrictive licensing agreements were predicated, at least in part, on the perceived threat from emerging "middleware" platforms. Gravity's theory is that middleware platforms **[*200]** feasibly could replace most operating software functions by allowing developers to write programs interfacing with middleware rather than the operating system. [5] *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34, 74 (D.C. Cir. 2001)*. **[**7]** The D.C. Circuit has explained the threat of middleware platforms to Microsoft's monopoly in the operating systems market as follows:

> If a consumer could have access to the applications he desired -- regardless of the operating system he uses -- simply by installing a particular browser on his computer, then he would no longer feel compelled to select Windows in order to have access to those applications; he could select an operating system other than Windows based solely upon its quality and price. In other words, the market for operating systems would be competitive.

Id. 253 F.3d at 60. Gravity also alleges that Microsoft has faced challenges from competing operating software, such as DR-DOS.

The restraints on trade in the licensing agreements allegedly have denied the class members the choice of competitive software products and have resulted in supracompetitive prices **[**8]** for Microsoft's operating system and application software. Gravity does not allege any conspiracy between Microsoft and the OEM Defendants to set the resale price of the software. Instead, it claims that overcharges were passed on to the consumers by the OEM Defendants when the consumers purchased personal computers (PCs) from the OEM Defendants.

Microsoft and the OEM Defendants moved to dismiss the First Amended Complaint (FAC). While those motions were under submission, the Judicial Panel on Multidistrict Litigation transferred the action to the United States District Court for the District of Maryland, where it was coordinated with approximately sixty-four other antitrust actions against Microsoft. The other antitrust actions were consolidated into a single class action. Gravity's complaint was not consolidated with these actions because it was the only complaint alleging claims against OEMs as defendants. *In re Microsoft Corp. Antitrust Litig., 127 F. Supp. 2d 702, 704 & n.2 (D. Md. 2001)*.

In January 2001, the district court dismissed Gravity's FAC for failure to state a claim. Following this dismissal, Gravity moved for leave to file a Second Amended Complaint **[**9]** (SAC). In the SAC, Gravity alleged two separate vertical conspiracies between Dell and Microsoft and Compaq and Microsoft. [6] Gravity did not name PB

---

[4] Per-processor license fees are royalties that Microsoft requires the OEM Defendants to pay for personal computers that are sold pursuant to the licensing agreement containing a "particular microprocessor type." *United States v. Microsoft Corp., 1995 U.S. Dist. LEXIS 20533*, CIV. A. 94-1564, 1995 WL 505998, at *2 (D.D.C. Aug. 21, 1995).

[5] Netscape Navigator and the Java programming language are examples of middleware products written for multiple operating systems.

[6] For a discussion of the distinction between a "hub-and-spoke" conspiracy and separate vertical conspiracies, see *infra* at 9-10.

as a defendant. [7] Gravity repeated its allegations of anticompetitive conduct and included a claim that Microsoft's licensing agreements "bundled or tied the distribution of Microsoft's middleware, the Internet Explorer browser, with Microsoft's Windows operating software." (J.A. at 465.) The district court denied leave to file the SAC on the ground of futility, concluding that the SAC also failed to state a claim upon which relief could be granted.

On appeal, Gravity contends that both complaints allege proper claims under *§ 1* **[*201]** and *§ 2* of the Sherman **[**10]** Act. Gravity also argues that the district court erred in applying the indirect purchaser rule of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, to foreclose compensatory damages. We address each argument in turn.

II.

Before turning to our consideration of Gravity's claims of error, a brief overview of the public enforcement action for injunctive relief brought by the federal government and nineteen states against Microsoft in the United States District Court for the District of Columbia is warranted. [8] *See* *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34 (D.C. Cir. 2001)*. In analyzing the *§ 2* claim against Microsoft, the D.C. Circuit upheld the district court's finding that Microsoft has monopoly power in the market for operating system software for Intelcompatible PCs with its Windows software, which has gained more than 95% market share. *See id.* *253 F.3d at 51-58*. It further affirmed the district court's finding that Microsoft had "engaged in exclusionary [or anticompetitive] conduct 'as distinguished from growth or development as a consequence of a superior product, business acumen, **[**11]** or historic accident'" for the purpose of maintaining its monopoly power in the operating systems market. *Id. 253 F.3d at 58*. In detailing Microsoft's anticompetitive conduct, the D.C. Circuit relied primarily on the same licensing agreements underlying Gravity's complaint, although it focused on Microsoft's dealings with all of the OEMs who entered into such agreements in the aggregate rather than two or three agreements in isolation. Specifically, the D.C. Circuit highlighted the prohibitions against: "(1) removing any desktop icons, folders, or 'Start' menu entries; (2) altering the initial boot sequence; and (3) otherwise altering the appearance of the Windows desktop." [9] *Id. at 61*. It affirmed the district court's conclusion that Microsoft used the restrictions in the licensing agreements to ensure the predominance of IE in the browser market, thereby gaining market share in the browser market for the purpose of maintaining Microsoft's monopoly in the operating systems market. [10] Only the third restriction was held to have been justified by Microsoft's need to protect its copyrighted work. *Id. at 63*. The D.C. Circuit held that the first two restrictions "represent uses of **[**12]** Microsoft's market power to protect its monopoly, unredeemed by any legitimate justification" and, therefore, that Microsoft's imposition of these restrictions violated *§ 2* of the Sherman Act. *Id.* at 64.

III.

With this background in mind, we evaluate the district **[**13]** court's dismissal of Gravity's complaint. ***HN2***[] When reviewing the district court's grant of a motion to dismiss a Sherman Act complaint pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, "we must determine whether allegations covering all the elements that comprise the theory for relief have been stated as required." **[*202]** *Estate Constr. Co. v. Miller & Smith Holding Co., 14 F.3d 213, 220 (4th Cir. 1994)* (internal quotation marks omitted) (citing *United States v. Employing Plasterers Ass'n, 347 U.S. 186, 189, 98 L. Ed. 618, 74 S. Ct. 452 (1954))*; *Mun. Utils. Bd. of Albertville v. Ala. Power Co., 934 F.2d 1493, 1501 (11th Cir. 1991)* ("A plaintiff must plead sufficient facts so that each element of the alleged antitrust violation can be

---

[7] Gravity did not allege a separate conspiracy between Microsoft and PB in the SAC because none of the named plaintiffs purchased a PC from PB. (Appellant's Br. at 20 n.5.)

[8] Although Gravity's complaint was filed prior to resolution of the public enforcement action, the factual predicate is similar, and on appeal, relies upon many of the D.C. Circuit's findings for general support for its propositions.

[9] For example, the licensing agreements prohibited OEMs from causing any user interface other than the Windows desktop to launch automatically and from adding icons or folders different in size or shape from those supplied by Microsoft.

[10] For a detailed discussion of the relationship between the browser and the operating systems markets and the anticompetitive effect of the license restrictions on the OEMs' ability to promote rival browsers, see *Microsoft, 253 F.3d at 59-64*.

identified."). "Moreover, the allegations must be stated in terms that are neither vague nor conclusory." *Estate Constr. Co., 14 F.3d at 220-21*. "Although we will assume that the plaintiffs can prove the facts that they allege in their complaint, 'it is not . . . proper to assume that . . . the defendants have violated the antitrust laws in ways that have not been alleged.'" *Id. at 221* **[**14]** (quoting *Associated Gen. Contractors v. Cal. State Council of Carpenters, 459 U.S. 519, 526, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983))*.

At the outset, we note that although Gravity alleges violations of both *§ 1* and *§ 2*, the district court did not separately examine the sufficiency of Gravity's claims when it dismissed the FAC. The district court determined that the alleged *§ 1* and *§ 2* conspiracies were "coterminous" because they purportedly shared a common goal: maintaining Microsoft's monopolies. *Gravity*, 127 F. Supp. 2d at 730. Because the conspiracies "coalesce," reasoned the district court, the sufficiency of both allegations "must be gauged by the elements of a *section 2* claim." *Id.* "Otherwise, plaintiffs could circumvent the requirements of a conspiracy to monopolize claim, including the requirement that a defendant be shown to have acted with the specific intent to monopolize, simply by characterizing their claim as one arising under *section 1*, whose elements of proof are not as stringent." *Id.* We disagree with the district court's reasoning in this regard. ***HN3***[] A *§ 1* violation "is legally distinct from that under *§ 2* . . . though **[**15]** the two sections overlap in the sense that a monopoly under *§ 2* is a species of trade restraint under *§ 1*." *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224 n.59, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*. The same kind of practices, therefore, may evidence violations of both. *See* *Md. & Va. Milk Pro. Ass'n v. United States, 362 U.S. 458, 463, 4 L. Ed. 2d 880, 80 S. Ct. 847 (1960)* ("*Sections [1* and *2*] closely overlap, and the same kind of predatory practices may show violations of [both]."); E. Thomas Sullivan & Jeffrey L. Harrison, *Understanding Antitrust and its Economic Implications* § 6.08, at 258 (2d ed. 1994) ("[The prohibition in *§ 2* against combinations or conspiracies] proscribes a great deal of the same behavior prohibited by *§ 1*). Thus, even if Gravity failed to allege a *§ 2* claim, it is possible that it sufficiently alleged a *§ 1* claim. *See, e.g.*, *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)* (describing the *§ 2* standard as "the more stringent monopoly standard").

HN4[] To establish a violation of *§ 1* of the Sherman Act, [11] Gravity must **[**16]** prove the following elements: (1) a contract, combination, or conspiracy; (2) that imposed an unreasonable restraint of trade. *Oksanen v. Page Mem'l Hosp., 945 F.2d 696, 702 (4th Cir. 1991)* (en banc). If Gravity is able to prove a violation of *§ 1*, it then must prove the existence of "*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' **[*203]** acts unlawful." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*; *Continental Airlines, Inc. v. United Airlines, Inc., 277 F.3d 499, 508 (4th Cir. 2002)*; *Oksanen, 945 F.2d at 708*; *see generally* 2 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** PP 360-63, at 191-227 (1995). These requirements apply with equal force to Gravity's claims for damages and injunctive relief; the only relevant distinction being that for injunctive relief, "the injury itself need only be threatened." 2 Areeda & Hovenkamp P 360b, at 193.

[17]** A.

With respect to the first element, in the FAC, Gravity alleged a single "hub-and-spoke," or "rimless wheel" conspiracy among the OEM Defendants and Microsoft. ***HN6***[] A rimless wheel conspiracy is one in which various defendants enter into separate agreements with a common defendant, but where the defendants have no connection with one another, other than the common defendant's involvement in each transaction. *Kotteakos v. United States, 328 U.S. 750, 755, 90 L. Ed. 1557, 66 S. Ct. 1239 (1946)* ("The pattern was that of separate spokes meeting at a common center, though we may add without the rim of the wheel to enclose the spokes." (internal quotation marks omitted)). In *Kotteakos*, the Supreme Court made clear that a rimless wheel conspiracy is not a single, general conspiracy but instead amounts to multiple conspiracies between the common defendant and each of the other defendants. *Id. at 768-69, 772*; Joseph F. McSorley, *A Portable Guide to Federal Conspiracy Law* 145

---

[11] ***HN5***[] *Section 1* states: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal." *15 U.S.C.A. § 1 (West 1997)*.

(1996) ("While the hub may view its dealings with the spokes as part of a single agreement, a spoke may be concerned simply with his or her own actions.").

Gravity does not argue **[**18]** that it is able to meet the test for establishing a "rim" between the OEM Defendants and Microsoft. [12] **[**20]** (Appellant's Br. at 53.) Instead, it urges us to follow the Sixth Circuit, which Gravity asserts has adopted the proposition that a rimless wheel conspiracy constitutes a single, general conspiracy in the context of the Sherman Act. *See* Elder-Beerman Stores Corp. v. Federated Dep't Stores, Inc., 459 F.2d 138, 146 (6th Cir. 1972) (setting forth requirements for proving "rimless wheel" conspiracy); *see also* Impro Products, Inc. v. Herrick, 715 F.2d 1267, 1279 n.14 (8th Cir. 1983) (noting that "there is some question whether the conspiracy provisions of Sections 1 and 2 of the Sherman Act apply to a hub-and-spoke conspiracy," but declining to resolve the issue after suggesting that such a theory was appropriate). Nothing in the Supreme Court's holding in *Kotteakos*, however, suggests that such a proposition is correct or permissible. Rather, the Supreme Court was clear: a wheel without a **[*204]** rim is not a single conspiracy. [13] Kotteakos, 328 U.S. at 755. Thus, we agree with the district court that Gravity's attempt in its FAC to plead **[**19]** a single, rimless wheel conspiracy between the OEM Defendants and Microsoft must be rejected.

[21]** In an effort to cure its failure to allege a legally viable conspiracy, Gravity alleged in the SAC separate vertical conspiracies between Microsoft and Compaq and between Microsoft and Dell. Compaq and Dell argue that these allegations also are insufficient to demonstrate concerted action under § 1 because Gravity is unable, as a matter of law, to demonstrate that either shared with Microsoft "a unity of purpose or a common design and understanding." Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984) (internal quotation marks and citation omitted). As this court recently emphasized in Virginia Vermiculite, Ltd. v. HGSI, 307 F.3d 277, 01-1850 (4th Cir. 2002), "concerted activity susceptible to sanction by section 1 is activity in which multiple parties join their resources, rights, or economic power together in order to achieve an outcome that, but for concert, would naturally be frustrated by their competing interests (by way of profit-maximizing choices)." Id. at *9. Gravity has sufficiently alleged that Microsoft and the OEM Defendants pooled their resources, rights, or economic power. Furthermore, **[**22]** to the extent Compaq and Dell argue that it was against their economic

---

[12] ***HN7***[] A single criminal conspiracy generally is demonstrated by an "overlap of key actors, methods, and goals." United States v. Strickland, 245 F.3d 368, 385 (4th Cir. 2001) (internal quotation marks and citations omitted); *see also* United States v. Bowens, 224 F.3d 302, 308 (4th Cir. 2000) (holding that it was not error for the district court to refuse to instruct the jury on multiple conspiracies where there was evidence of common methods of operation and common participants linked by a mutual interest); United States v. Squillacote, 221 F.3d 542, 574 (4th Cir. 2000) ("A single conspiracy exists where there is one overall agreement, or one general business venture." (internal quotation marks omitted)). Because Gravity does not argue that its allegations are sufficient to demonstrate this type of overlap but instead only advocates our adopting the concept of a rimless wheel conspiracy, we need not decide whether the same test that applies to demonstrate a single criminal conspiracy would apply in the context of the Sherman Act.

[13] The dissent's confusion in applying *Kotteakos* is understandable by reference to its reliance on the Sixth and Eighth Circuits, both of which appear to have misinterpreted *Kotteakos*. *Post* at 30-31 (citing Elder-Beerman Stores Corp. v. Federated Dep't Stores, Inc., 459 F.2d 138 (6th Cir. 1972); Impro Prods., Inc. v. Herrick, 715 F.2d 1267, 1279 (8th Cir. 1983)). In *Elder-Beerman*, the Sixth Circuit stated that "there is much discussion in the *Kotteakos* decision indicating the possibility that such a 'rimless wheel' theory might be used in a civil case though not appropriate in a criminal case." Elder-Beerman, 459 F.2d at 147. In *Impro Products*, the Eighth Circuit compounded the Sixth Circuit's error by describing the test set forth in *Elder-Beerman* for a rimless wheel conspiracy (which is adopted by the dissent, post at 29-30) and then concluding that a rimless wheel conspiracy constitutes a single conspiracy in civil actions. Impro Prods., 715 F.2d at 1279 & n.14. Nothing in *Kotteakos* suggests, however, that the definition of a rimless wheel conspiracy turns on whether the conspiracy is civil or criminal in nature; the Sixth and the Eighth Circuits' contrary belief apparently stems from the distinction between criminal and civil actions that was drawn in *Kotteakos* for purposes of analyzing harmless error.

In any event, even if we were to further distort the clear holding set forth in *Kotteakos* by following the Sixth and Eighth Circuits in the manner suggested by the dissent, our resolution of Gravity's claims would be unaffected. Regardless of whether Gravity has alleged a single conspiracy among the OEM Defendants and Microsoft or two separate agreements, its § 1 and § 2 claims would be subject to dismissal for failure to allege facts demonstrating a significant likelihood of anticompetitive effects.

interests to enter into § 1 conspiracies with Microsoft, we note that Gravity has **HN8**[] alleged that Compaq and Dell received financial and other benefits in exchange for entering into the licensing agreements. These allegations are sufficient for purposes of Rule 12(b)(6) to demonstrate that a § 1 conspiracy was economically plausible. [14] *Cf., e.g.*, Spectators' Communication Network, Inc. v. Colonial Country **[*205]** Club, 253 F.3d 215, 220-22 (5th Cir. 2001) (analyzing relevant caselaw and concluding that a vertical conspiracy could be shown under § 1 even though it likely would be against Anheuser-Busch's economic interest to conspire to restrain competition in a market in which it was a purchaser).

[23]** Moreover, **HN9**[] "the 'combination or conspiracy' element of a section 1 violation is not negated by the fact that one or more of the coconspirators acted unwillingly, reluctantly, or only in response to coercion." MCM Partners, Inc. v. Andrews-Bartlett & Assocs., 62 F.3d 967, 973 (7th Cir. 1995); In re Brand Name Prescription Drugs Antitrust Litig., 123 F.3d 599, 615 (7th Cir. 1997) (noting that the wholesaler's participation would be actionable even if the jury found that they "were tools of the manufacturers -- reluctant accomplices, yet not the less liable for that."); *see also* United States v. United States Gypsum Co., 438 U.S. 422, 436 n.13, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978) ("The general rule [is] that a civil violation can be established by proof of either an unlawful purpose or an anticompetitive effect."). The co-conspirators need not share the same motive or goal; it is sufficient to allege that the co-conspirators "acquiesced in an illegal scheme." United States v. Paramount Pictures, Inc., 334 U.S. 131, 161, 92 L. Ed. 1260, 68 S. Ct. 915 (1948); *see also* Va. Vermiculite, Ltd. v. W.R. Grace & Co., 156 F.3d 535, 541 (4th Cir. 1998) **[**24]** ("It is not necessary that [Historic Green Springs, Inc.] have shared Grace's alleged anticompetitive motive in entering into a proscribed restraint; it is sufficient that HGSI, regardless of its own motive, merely acquiesced in the restraint with the knowledge that it would have anticompetitive effects."); Duplan Corp. v. Deering Milliken Inc., 594 F.2d 979, 982 (4th Cir. 1979) ("Where, as here, the [defendants] were knowing participants in a scheme whose effect was to restrain trade, the fact that their motives were different from or even in conflict with those of the other conspirators is immaterial."). Accordingly, Gravity's allegations regarding the commercial license agreements are sufficient for purposes of 12(b)(6) to set forth two separate vertical conspiracies between Microsoft and Compaq and between Microsoft and Dell.

B.

We next address whether Gravity alleged facts which, if proven true, would establish that the two conspiracies separately imposed unreasonable restraints of trade in interstate commerce. Continental Airlines, 277 F.3d at 508. **HN10**[] In assessing liability under § 1, courts generally evaluate agreements pursuant to one **[**25]** of three approaches. Id. at 508-09 ("The Supreme Court has authorized three methods of analysis: (1) per se analysis, for obviously anticompetitive restraints, (2) quick-look analysis, for those with some procompetitive justification, and (3) the full 'rule of reason,' for restraints whose net impact on competition is particularly difficult to determine."). Because the possibility of anticompetitive effects resulting from either licensing agreement is not obvious, we analyze the two licensing agreements at issue -- individually -- pursuant to the "full" rule of reason analysis. [15] *Id.*; *cf., e.g.,* **[*206]** Microsoft, 253 F.3d at 59-60 (applying full rule of reason analysis to claimed § 2 violations).

---

[14] Arguably, however, these allegations are insufficient as a matter of law to demonstrate that either Compaq or Dell possessed specific intent to maintain Microsoft's alleged monopolies under § 2. *See* TV Communications Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1026-27 (10th Cir. 1992) ("Because the cable operators would have no rational motive to create [a monopolistic environment], TVCN's allegations do not provide an inference of specific intent to conspire to achieve the stated goal of the conspiracy.").

[15] Justice Brandeis in Chicago Bd. of Trade v. United States, 246 U.S. 231, 62 L. Ed. 683, 38 S. Ct. 242 (1918), explained **HN11**[] the rule of reason as follows:

> The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant

[26]** ***HN12***[] In the rule of reason analysis, "the reasonableness of a restraint is evaluated based on its impact on competition as a whole within the relevant market." *Oksanen, 945 F.2d at 708*. This evaluation requires a showing of "anticompetitive effect" resulting from the agreement in restraint of trade. To have an "anticompetitive effect," conduct "must harm the competitive *process* and thereby harm consumers." *Microsoft, 253 F.3d at 58*. "Harm to one or many competitors will not suffice." *Id.* "The [Sherman Act] directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself." *Id.* (internal quotation marks omitted). Thus, an inquiry into the lawfulness of the restraint begins "by identifying the ways in which a challenged restraint might possibly impair competition." 7 Areeda & Hovenkamp P 1503a, at 372. After identifying the type of possible harm to competition alleged, we must proceed "to determine whether that harm is not only possible but likely and significant," which requires "examination of market circumstances," including market power and share. 7 *id.* **[**27]** PP 1503a-1503b, at 374-77.

1.

Gravity alleges that Compaq's and Dell's agreements with Microsoft aided the maintenance of Microsoft's monopolies in PC operating system, word processing, and spreadsheet markets. Aiding the maintenance of a monopoly theoretically could harm competition by affecting price and/or output in various ways. For instance, the agreements could allow Microsoft to leverage its market power in the relevant software markets to obtain advantage in some secondary market (such as the browser market), not based upon consumer choice or efficient performance but from the mere fact of Microsoft's market power in the primary market. *See* *Microsoft, 253 F.3d at 62-66* (finding anticompetitive effects resulting from Microsoft's licensing agreements with OEMs based upon Microsoft's leveraging of monopoly power in operating system market to suppress competition in the browser market); *see generally* Robin Cooper Feldman, *Defensive Leveraging in Antitrust*, *87 Geo. L.J. 2079, 2080, 2098 (1999)* (discussing "traditional leveraging theory" and the "Chicago school" leveraging theory and concluding that "defensive leveraging" can create the potential **[**28]** for harm to consumers by aiding in the maintenance of the primary monopoly). Similarly, with respect to the exclusive dealing components of the licensing agreements, the potential harm to consumers is that rival software firms or browsers will be foreclosed from access to consumers, denying consumers competitive choice and allowing supracompetitive pricing with respect to the software markets for which Microsoft has monopoly power. Per-processor fees also arguably could "discourage OEMs from licensing competing operating systems and/or cause OEMs to raise the price for PCs with a competing operating system to recoup the fee paid to Microsoft," theoretically resulting in increased prices for Microsoft's software **[*207]** and decreased opportunities for rival software firms to gain access to consumers. *United States v. Microsoft Corp., 159 F.R.D. 318, 323 (D.D.C. 1995)*, *rev'd on other grounds*, *312 U.S. App. D.C. 378, 56 F.3d 1448 (D.C. Cir. 1995)*; *see generally* Kenneth C. Baseman et al., *Microsoft Plays Hardball: The Use of Exclusionary Pricing and Technical Incompatibility to Maintain Power in Markets for Operating System Software*, 40 Antitrust Bull. 265, 267-68 (1995) **[**29]** (criticizing per-processor licenses).

"Theorizing about conceivable impairments of competition does not, of course, prove that any such impairment has occurred or is likely," or much less is "substantial in magnitude." [16] 7 Areeda & Hovenkamp P 1503a, at 373. Thus, we next must examine whether Gravity sufficiently has alleged the likelihood of a substantial anticompetitive harm caused by the two licensing agreements at issue (considered individually), an inquiry that requires Gravity to allege facts demonstrating "that the defendants played a significant role in the relevant market." *Oksanen, 945 F.2d at 709*; *see also* *General Leaseways, Inc. v. Nat'l Truck Leasing Ass'n, 744 F.2d 588, 596 (7th Cir. 1984)* (stating that ***HN13***[] in rule of reason analysis, the plaintiff must "prove that the defendant has sufficient market power to

facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

Id. at 238.

[16] Nor do we suggest whether any such anticompetitive effect, if shown to be likely and substantial in magnitude, would be outweighed by a procompetitive justification. *See, e.g.*, *Microsoft, 253 F.3d at 59* (noting, under traditional rule of reason analysis, if the plaintiff successfully demonstrates anticompetitive effect, then the burden shifts to the defendant to proffer a procompetitive justification for its conduct).

restrain competition substantially. . . . If not, the inquiry is at an end; the practice is lawful"); 7 Areeda & Hovenkamp P 1503b, at 376 ("Virtually all courts applying the rule of reason require the plaintiff . . . to show, at a minimum, that the defendants play a significant role in the [allegedly restrained] market.").

[30]** 2.

Gravity has provided allegations of Microsoft's market power in the relevant software markets, in the form of Microsoft's shares in these markets. [17] **[**35]** Gravity failed, however, to allege facts regarding Compaq's or Dell's market share and concedes that the PC market is "fiercely competitive" and, therefore, that neither Compaq nor Dell has power in the PC market. [18] *Gravity, Inc. v. Microsoft Corp. (In re Microsoft Corp. Antitrust Litig.), 168 F. Supp. 2d 541, 544*; **[*208]** *see also* Digital Equip. Corp. v. Uniq Digital Techs., Inc., 73 F.3d 756, 761 (7th Cir. 1996) (Easterbrook, J.) ("Computer manufacturers are vigorous rivals; prices drop daily; this is one of our economy's most competitive sectors."). Gravity further concedes that "the only thing that . . . distinguishes [Compaq and Dell] from other OEMs is the alacrity with which they acquiesced in accepting [the licensing] agreements to obtain relatively favorable prices from Microsoft for its products." *Gravity*, 168 F. Supp. 2d at 544. Given Gravity's concession that the PC market is "fiercely competitive," and in light of Microsoft's agreements with other OEMs, Gravity is unable, as a matter of law, to demonstrate that Microsoft's agreements **[**31]** with Compaq and Dell, when considered individually, are capable of causing any substantial harm to competition. For instance, without having alleged Compaq's or Dell's power or share in the PC market, Gravity is unable to demonstrate that rival software firms' access *to Compaq or Dell* was an important component of those firms' potential ability to compete in the software markets, or that Microsoft's agreements with Compaq and Dell substantially hindered the entrance or operation of these rivals in the software markets or denied them access to a significant number of consumers of software. Similarly, given the failure to allege the market power of Compaq or Dell, Gravity is unable to show that Compaq or Dell has forced, or is likely to be able to force, supracompetitive prices on consumers for undesirable software features. Consequently, assuming that Compaq and Dell each possessed an insignificant portion of the PC market and no ability to control pricing or output in the PC market (as is proper in light of Gravity's failure to allege market share or any other facts demonstrating market power), the two licensing agreements -- considered individually -- would be incapable of succeeding **[**32]** in maintaining or leveraging Microsoft's alleged monopolies, in that neither agreement could substantially reduce the usage share of, or prevent the promotion of, rival browsers, rival operating system software manufacturers, or rival applications software manufacturers. [19] *Cf., e.g.*, Continental

---

[17] Gravity alleged that Microsoft "maintained a monopoly share (in the range of 90%) in the personal computer operating software market" throughout the "class periods," (J.A. at 473), and maintained a market share in the range of 80-90% in the word processing and spreadsheet software markets throughout the class period. ***HN14***[] For antitrust purposes, market power "is the power to force a purchaser to do something that he would not do in a competitive market." Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 464, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992) (internal quotation marks omitted). "It has been defined as the ability of a single seller to raise price and restrict output." *Id.* (internal quotation marks omitted). Market share is defined as "the percentage of a market that is controlled by a firm." Black's Law Dictionary 971 (6th ed. 1991). Market power generally is identified, in part, by examining market share. *See, e.g.*, Andrew Chin, Note, *Antitrust by Chance: A Unified Theory of Horizontal Merger Doctrine*, 106 Yale L.J. 1165, 1169-72 (1997) (discussing movement away from strict reliance on calculation of market share in antitrust analysis). For purposes of Rule 12(b)(6), we consider Gravity's allegations regarding Microsoft's market share sufficient to allege Microsoft's power in the relevant software markets.

[18] Gravity contends that because the relevant markets are in software, there is no need to evaluate Compaq's or Dell's power in the PC market. Compaq's and Dell's power in the PC market is critical in the analysis, however, because both OEMs pre-install Microsoft's software on their PCs; neither operates independently in the software market. Thus, Compaq's and Dell's ability to influence competition in the relevant software markets through their separate agreements with Microsoft is dependent on their ability to influence competition in the PC market. *Cf.* Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 18, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984) ***HN15***[] ("Any inquiry into the validity of a tying arrangement must focus on the market or markets in which the two products are sold, for that is where the anticompetitive forcing has its impact.").

[19] Gravity asserts that it need not show that Microsoft's agreements with Compaq and Dell were each a sole cause of any anticompetitive effects but need show only that the agreements were each a "material cause" of anticompetitive effects. *See* Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969) ("It is enough

T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 52 n.19, 54, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977) (concluding that, although a contractual requirement **[*209]** that distributors sell Sylvania television sets from authorized locations limited competition among the distributors in the resale of Sylvania televisions ("intrabrand competition"), it ultimately *promoted competition* with other brands of television sets ("interbrand competition") and stating that the competitiveness of the interbrand market "provides a significant check on the exploitation of intrabrand market power"); Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 13-14, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984) ("we have condemned tying arrangements when the seller has some special ability -- usually called 'market power' -- to force a purchaser to do something that he would not do in a competitive **[**33]** market"); id. at 16 ("If only a single purchaser were 'forced' with respect to the purchase of a tied item, the resultant impact on competition would not be sufficient to warrant the concern of ***antitrust law*** . . . . We have refused to condemn tying arrangements unless a substantial volume of commerce is foreclosed thereby."); id. at 37-38 (O'Connor, J., concurring) (evaluating tie-ins and noting that to show an adverse impact on consumers, the plaintiff generally must demonstrate two things: market power in the tying-product market and a threat that the seller will acquire market power in the tied-product market); Digital Equip. Corp., 73 F.3d at 761 (Easterbrook, J.) ("Let us ask, then, whether the inclusion of an [operating system] with one's [PC] -- 'tie-in' or not -- is a means to reduce output and create monopoly profits. Unless the seller has market power, the answer is no . . . ."); id. at 762 ("In a competitive market a pig-headed refusal to satisfy customers' preferences, or an attempt to charge for unwanted items, does not lead to monopoly prices; instead it leads to ruin as rivals step in to take the **[**34]** business."). Moreover, with respect to the exclusive dealing component of Gravity's claim, absent an allegation regarding Compaq's or Dell's power or share in the PC market, there is no basis in Gravity's complaint for concluding that either of the two licensing agreements at issue, when considered individually, are likely to foreclose a significant share of the relevant software markets. *See* Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961) (holding that an exclusive contract does not violate the Clayton Act unless its probable effect is to "foreclose competition in a substantial share of the line of commerce affected"); Microsoft, 253 F.3d at 68-70 (discussing the exclusive dealing aspects of Microsoft's agreements and concluding that, even when the cumulative effect of Microsoft's agreements were considered, the agreements did not foreclose enough of the relevant browser market to constitute a § 1 violation).

[36]** The district court afforded Gravity ample opportunity to allege facts demonstrating Compaq's or Dell's power in the PC market, but Gravity refused, contending for various reasons that Compaq's and Dell's power and share in the PC market is immaterial to Compaq's and Dell's (separate) ability to influence competition in the relevant software markets. [20] On appeal, **[*210]** it continues to assert that, as a matter of law, Compaq's and Dell's power in the PC market is irrelevant to its § 1 claim because Microsoft's monopoly power, in a variety of ways, is adequate to demonstrate the likelihood of substantial anticompetitive effects. We address each argument below.

---

that the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury under § 4."). Without an allegation of market share or market power of either Compaq or Dell, however, Gravity cannot make the latter showing. *Cf.* Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 487-88, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977) (holding that ***HN16***[] an antitrust claim fails as a matter of law when the plaintiff would have suffered the identical loss without regard to the claimed anticompetitive conduct); 2 Areeda & Hovenkamp P 363a-b, at 219-23 (noting that no material cause can be demonstrated where an independent cause fully accounts for the claimed antitrust injury).

[20] Gravity did allege that Compaq and Dell were the "largest PC makers" and were "among the largest distributors of Microsoft's products." (Appellant's Br. at 11.) The dissent relies on this as a sufficient allegation of Compaq and Dell's respective influences in the PC market. *Post* at 34. Being the "largest" in a relevant market, however, says nothing of a firm's ability to affect competition in that market. For example, Compaq and Dell each may possess only five percent of the market share, whereas many other OEMs each possess four percent of the market share, in which case, despite being the largest PC makers and software distributors, neither Compaq nor Dell would have the ability, through their separate conspiracies with Microsoft, to affect competition in the relevant software markets. *Cf., e.g.*, Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 26, 80 L. Ed. 2d 2, 104 S. Ct. 1551 & n.43, 466 U.S. 2, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984) (holding, as a matter of law, that thirty percent share of the relevant market is insufficient to confer market power). Accordingly, Gravity's allegations that Compaq and Dell were the largest PC makers and software distributors provide no basis whatsoever to conclude that either had sufficient share of the PC market to affect competition in the relevant software markets.

[37]** Gravity first argues that Microsoft's significant market power in the software markets is sufficient to demonstrate anticompetitive effects in those markets without regard to Compaq's or Dell's power or share in the PC market. The relevant focus of the *§ 1* inquiry, however, is the anticompetitive effects of the conspiracy qua conspiracy; therefore, the plaintiff must demonstrate that the conspiratorial agreement itself affected competition in ways that would not have obtained absent the agreement. *Spectators' Communication Network, 253 F.3d at 225* (noting that the issue is "whether the combination or conspiracy, not each individual conspirator, has the [market] power to hurt competition in the relevant market."); *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 460, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)* ("The purpose of the inquiries into market definition and market power is to determine whether *an arrangement* has the potential for genuine adverse effects on competition." (emphasis added)). To be sure, one can imagine circumstances in which the allegation of one conspirators' market power is sufficient to demonstrate a likelihood of anticompetitive **[**38]** effects. For instance, assuming as true Gravity's allegations regarding Microsoft's market share in the relevant software markets, had Microsoft agreed to sell its software *only* to Compaq and Dell, such an agreement would have had the potential to harm competition in software markets, and ultimately in the PC market, irrespective of Compaq's or Dell's power or share in the PC market. No such arrangement, however, is alleged here.

Gravity next argues that the district court should have evaluated Microsoft's "exclusionary conduct both inside and outside the combinations alleged," and the potential for anticompetitive effects resulting from this conduct in the aggregate. (Appellant's Br. at 49-50.) The SAC, however, did not allege a conspiracy among Microsoft and all OEMs; it alleged discrete conspiracies between Microsoft and Compaq and Microsoft and Dell. Consequently, the district court correctly determined that it could not consider the cumulative harm of Microsoft's agreements with all OEMs but instead was required to consider -- individually -- Microsoft's agreements with Compaq and Dell to evaluate each agreement's potential for anticompetitive effects. [21]

[39]** **[*211]** Likewise, it is untrue that Compaq and Dell, as alleged coconspirators of Microsoft, are responsible for all of Microsoft's unilateral acts with other OEMs who were not members of the alleged conspiracies. As noted above, each licensing agreement must be treated as a separate conspiracy, and only acts taken in furtherance of that alleged conspiracy are appropriately considered in determining the adverse effects of the claimed restraints on trade, not acts of one conspirator taken in furtherance of other possible, distinct conspiracies. *Cf.* *United States v. Bonetti, 277 F.3d 441, 447 (4th Cir. 2002)* (noting, ***HN17***[] in a criminal conspiracy, that a co-conspirator is liable for "all substantive offenses of his co-conspirator that are both reasonably foreseeable and in furtherance of the conspiracy"); *cf. also* *United States v. Santiago, 906 F.2d 867, 872-73 (2d Cir. 1990)* (concluding that the single conspiracy test applies to determine whether coconspirator conduct is reasonably foreseeable and in furtherance of the conspiracy); *United States v. Gooden, 892 F.2d 725 (8th Cir. 1989)* (same). Indeed, to hold otherwise would be to suggest that the **[**40]** distinction between a single conspiracy and multiple conspiracies involving a common defendant is one without a difference.

Thus, we agree with the district court that for Gravity to state a viable *§ 1* claim, it was required to allege facts which, if proven true, would demonstrate that Compaq's or Dell's individual agreements with Microsoft were likely to result in an anticompetitive effect. Without alleging facts demonstrating Compaq's or Dell's power or share in the PC market, Gravity was unable to make such a showing.

Similarly, without allegations regarding the market power or share of Compaq or Dell in the PC market, Gravity is unable to show a conspiracy to monopolize under *§ 2*. [22] *See* 3A Areeda & Hovenkamp P 809, at 370 ***HN18***[] ("In

---

[21] The cumulative harm of Microsoft's actions "outside" the two licensing agreements at issue has been subject to review in the public enforcement action and will be further subject to review in the consumer class actions brought against Microsoft individually and in any suits brought by OEMs against Microsoft. As noted above, *supra at 19-20*, the focus of this *§ 1* inquiry is not Microsoft's actions standing alone, but the extent to which its concerted actions with each of the two individual OEMs promoted Microsoft's monopoly power or otherwise restrained trade.

[22] ***HN19***[] *Section 2* states:

those instances where power is a prerequisite to holding an agreement to be an unreasonable restraint of trade [under *§ 1*] . . . it would make no sense to hold the same agreement offensive to *§ 2* without proof of power."). The offense of monopolization requires a showing of "anticompetitive effect." *Microsoft, 253 F.3d at 58*. Thus, a viable *§ 2* conspiracy to monopolize claim must include allegations which, if proven true, would **[**41]** establish that the agreements Compaq and Dell made with Microsoft could have had an anticompetitive effect (when considered separately). *See, e.g.*, *id.* *253 F.3d at 50* (discussing the meaning of "monopolization" within *§ 2*); *U.S. Anchor Mfg., Inc. v. Rule Industries, Inc., 7 F.3d 986, 1001 (11th Cir. 1993)* (listing the likelihood of an anticompetitive effect as one of the elements of a conspiracy to monopolize under *§ 2*); *Seagood Trading Corp. v. Jerrico, Inc., 924 F.2d 1555, 1576 (11th Cir. 1991)* ("[A*] section 1* claim and a *section 2* conspiracy to monopolize claim require the same threshold showing -- the existence of an agreement to restrain trade."). Accordingly, for the reasons set forth above regarding the inadequacies in Gravity's *§ 1* allegations, Gravity's *§ 2* claim also fails as a matter of law.

[42]** Gravity suggests that these conclusions are irreconcilably at odds with the D.C. Circuit's conclusions in the public enforcement action, contending that the D.C. Circuit implicitly recognized that Microsoft's **[*212]** licensing agreements with Compaq and Dell violated *§ 1*. This contention, however, misapprehends the nature of the D.C. Circuit's holding. Notably, the district court in the public enforcement action held that the exclusive dealing arrangements in Microsoft's licensing agreements, including its agreement with Compaq, did not violate *§ 1* under the rule of reason, concluding "that Microsoft's arrangements with various firms did not foreclose enough of the relevant market to constitute a *§ 1* violation." *United States v. Microsoft, 87 F. Supp. 2d 30, 53 (D.D.C. 2000)*. The only *§ 1* violation found by the district court was based upon Microsoft's alleged tying of Windows and IE, and the D.C. Circuit vacated that ruling. *Microsoft, 253 F.3d at 84-95*. Moreover, in conducting its *§ 2* analysis, the D.C. Circuit evaluated the anticompetitive effects of Microsoft's licensing agreements with *all* OEMs. Of course, as is set forth above, the analysis **[**43]** of anticompetitive effects depends on the identification of the defendants' "significant role" within the relevant market -- an inquiry that is much different when examining the cumulative harm of Microsoft's conduct than it is when examining the effects of Microsoft's individual agreements with two OEMs for which Gravity declines to provide information regarding market share or power. Thus, nothing in the public enforcement action suggests that Gravity's *§ 1* and *§ 2* claims are viable.

We recognize that ***HN20***[] "summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles," *Poller v. Columbia Broadcasting Sys., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*, and that an antitrust complaint should not be dismissed at the *Rule 12(b)(6)* stage "merely because the court doubts the plaintiff will ultimately prevail," *Advanced Health-Care Servs., Inc. v. Radford Cmty. Hosp., 910 F.2d 139, 145 n.8 (4th Cir. 1990)* (internal quotation marks omitted). Nevertheless, to avoid dismissal for failure to state a claim, the plaintiff must "colorably state[] facts which, if proven, would entitle him to **[**44]** relief." *Id.* (internal quotation marks omitted). We consistently have held this to require an allegation of facts supportive of each element of the plaintiff's antitrust claim. *Estate Constr. Co., 14 F.3d at 220* (holding that "notice pleading" requires "allegations covering all the elements that comprise the theory for relief" (internal quotation marks omitted); *Mun. Utils. Bd. of Albertville, 934 F.2d at 1501* ("A plaintiff must plead sufficient facts so that each element of the alleged antitrust violation can be identified.")). "A contrary view would be tantamount to providing antitrust litigation with an exemption from *Rule 12(b)(6)*." *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1106-07 (7th Cir. 1984)*.

> Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nationals, shall be deemed guilty of a felony . . . .

15 U.S.C.A. § 2 (West 1997).

Although Gravity alleges that Microsoft's agreements with Compaq and Dell individually produced anticompetitive effects, it does not provide any factual basis to support this allegation. [23] Moreover, Gravity has made clear that it has no intention of providing evidence regarding the market power or share of Compaq or Dell; thus, it does not seek additional discovery or factual development with respect to the issue of **[**45]** market share or power. Instead, it asks us to accept its conclusory assertion that Microsoft's agreements with Compaq and Dell, when considered individually, created a likelihood of significant anticompetitive effects in the relevant software **[*213]** markets without regard to Compaq's or Dell's market power or share in the PC market. This we cannot do. ***HN21***[] "The pleader may not evade [*Rule 12(b)(6)*] requirements by merely alleging a bare legal conclusion; if the facts do not at least outline or adumbrate a violation of the Sherman Act, the plaintiffs will get nowhere merely by dressing them up in the language of antitrust." *Car Carriers, Inc., 745 F.2d at 1106* (internal quotation marks omitted). Because Gravity has failed to allege facts which, if true, would establish that the two licensing agreements at issue are unreasonable restraints on trade that caused antitrust injury to consumers, its *§ 1* and *§ 2* claims fail as a matter of law. *Cf.* *Dunn & Mavis, Inc. v. Nu-Car Driveaway, Inc., 691 F.2d 241, 245 (6th Cir. 1982)* ("Since the complaint does not allege facts suggesting that [the manufacturer's] refusal to deal had any significant anti-competitive effect **[**46]** on the market, there is no rule of reason case alleged.").

This court recently concluded that the Supreme Court's holding in *Swierkiewicz v. Sorema, N.A., 534 U.S. 506, 122 S. Ct. 992, 152 L. Ed. 2d 1 (2002)*, did not alter the basic pleading requirement that a plaintiff set forth facts sufficient to allege each element of his claim. *See* *Iodice v. United States, 289 F.3d 270, 281 (4th Cir. 2002)* ("Even in these days of notice pleadings a complaint asserting a negligence claim must disclose that each of the elements is present in order to be sufficient." (internal citations and quotation marks omitted)); *see also* *Swierkiewicz, 122 S. Ct. at 997* (relying upon a distinction between "evidentiary **[**47]** standards" and "pleading requirements"). As the dissent recognizes, a sufficient allegation of anticompetitive effects is dependent upon Compaq's and Dell's respective abilities to affect competition in the PC market. *Post* at 35 ("If the conspiracy included only minor OEMs, then the conspiracy would presumably have no power to cause significant anticompetitive effects."). Consequently, by failing to allege Compaq's and Dell's market share or power, Gravity has failed to set forth factual allegations necessary to support the basic elements of its *§ 1* and *§ 2* claims. *See* *McLain v. Real Estate Bd. of New Orleans, 444 U.S. 232, 243, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980)* (noting that ***HN22***[] to establish liability under the Sherman Act, a showing of either an anticompetitive effect or an anticompetitive purpose is necessary).

IV. *Illinois Brick*

Even if we agreed with Gravity that it has alleged sufficient claims under *§ 1* and *§ 2* for purposes of *Rule 12(b)(6)*, we would affirm the district court's conclusion that Gravity is barred from seeking compensatory damages relief under the indirect purchaser rule of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*. **[**48]** [24] A brief review of the evolution of the indirect purchaser rule is helpful to understand its application to Gravity's claims. In *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, the defendant in a Sherman Act suit, a manufacturer of machinery for making shoes, defended on the ground that the plaintiff, a shoe manufacturer that had bought the defendant's machinery, had passed on any monopoly overcharge to its own customers, the wholesale purchasers **[*214]** of its shoes, and hence had not been injured. The Supreme Court held that an antitrust defendant would not be permitted to defend against a damages suit on the ground that the plaintiff had shifted the cost of the defendant's wrongdoing to the plaintiff's customers. The Court explained the rationale for its decision as follows:

---

[23] While the dissent notes as "unexceptional" the proposition that a plaintiff may not rely on a bare legal conclusion to avoid dismissal under *Rule 12(b)(6)*, it proceeds to rely solely on Gravity's bare legal conclusions to find its complaint sufficient. *Post* at 37 n.1.

[24] ***HN23***[] *Illinois Brick*'s indirect purchaser rule, when applicable, bars only compensatory damages relief and does not apply to injunctive relief. *See* *Cargill, Inc. v. Monfort of Colorado, 479 U.S. 104, 111 n.6, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*; *Campos v. Ticketmaster, 140 F.3d 1166, 1172 (8th Cir. 1998)*; *McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 856-57 (3d Cir. 1996)*.

> Even if it could be shown that the buyer raised his price in response to, and in the amount of, the overcharge and that his margin of profit and total sales had not thereafter declined, there would remain the nearly insuperable difficulty of demonstrating that the particular plaintiff could not or would not have raised his prices absent **[**49]** the overcharge or maintained the higher price had the overcharge been discontinued. Since establishing the applicability of the passing-on defense would require a convincing showing of each of these virtually unascertainable figures, the task would normally prove insurmountable.

Id. at 493. The *Hanover Shoe* Court further explained that the plaintiff's customers "would have only a tiny stake" in enforcing the ***antitrust law***. *Id. at 494*.

In *Illinois Brick*, plaintiffs, who were indirect purchasers of concrete blocks, sought to recover damages **[**50]** on the theory that masonry contractors, who incorporated concrete blocks purchased from defendants into walls and other masonry structures, passed on the alleged overcharge for the blocks to general contractors, who incorporated the masonry structures into entire buildings, and that the general contractors in turn passed on the overcharge to plaintiffs in the bids submitted for those buildings. *Illinois Brick, 431 U.S. at 726-27*. The Court extended the *Hanover Shoe* rule and held that ***HN24***[] only direct purchasers from an antitrust violator can sue for damages, providing two rationales for the rule: it avoids the danger of multiple, "overlapping recoveries" against the original seller by direct and indirect purchasers, and it avoids the "evidentiary complexities and uncertainties" in determining the amount of any overcharge passed through the intermediary to the indirect purchaser. *Id. at 730-33*. The Supreme Court expressly contemplated two exceptions to the indirect purchaser rule: (1) where the indirect purchaser acquired goods through a preexisting cost-plus contract and (2) "where the direct purchaser is owned or controlled by its customer." *Id. at 736* & n. 16. **[**51]** *Illinois Brick* left unclear whether there might be exceptions for cases in which the amount of the overcharge that was passed on to a lower tier of purchasers could be determined simply and with mechanical precision, but thereafter, the Supreme Court held that even where the amount of overcharge passed on is clear, allowing indirect purchasers to pursue damages claims would be inconsistent with *Illinois Brick*, and the Court refused to create any new exception. *Kansas v. Utilicorp United, Inc., 497 U.S. 199, 208, 111 L. Ed. 2d 169, 110 S. Ct. 2807 (1990)*. Moreover, in *Utilicorp United*, the Supreme Court cautioned lower federal courts against creating new exceptions to the *Illinois Brick* rule. *Id. at 216* ("The rationales underlying *Hanover Shoe* and *Illinois Brick* will not apply with equal force in all cases. We nonetheless believe ample justification exists for our stated decision not to carve out exceptions to the direct purchaser rule." (internal quotation marks omitted)).

Despite this admonition, several courts have recognized a "coconspirator exception" to *Illinois Brick*. *See, e.g.*, *Paper Sys. Inc. v. Nippon Paper Indus., 281 F.3d 629, 631-32 (7th Cir. 2002)*; **[**52]** *Lowell v. American Cyanamid Co., 177 F.3d 1228, 1231* ***[*215]*** *(11th Cir. 1999)*; *Campos v. Ticketmaster Corp., 140 F.3d 1166, 1171 (8th Cir. 1998)*; *In re Brand Name Prescription Drugs, 123 F.3d at 604-05*; *Arizona v. Shamrock Foods Co., 729 F.2d 1208, 1211 (9th Cir. 1984)*. Gravity asserts that these cases stand for the proposition that *Illinois Brick* is inapplicable when any conspiracy has been alleged, but we interpret these cases as standing for the more narrow proposition that *Illinois Brick* is inapplicable to a particular type of conspiracy -- price-fixing conspiracies. *Cf.* *McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 854-55 (3d Cir. 1996)* (refusing to adopt a co-conspirator exception where plaintiffs have not alleged that the intermediaries immediately upstream colluded to overcharge). Were we to adopt Gravity's broader interpretation, the *Illinois Brick* rule would be inverted solely based upon artful pleading. Such a result is contrary to *Illinois Brick* itself as well as the Supreme Court's clear directive in *Utilicorp United* against crafting new exceptions to the *Illinois Brick* **[**53]** rule. Far more reasonable is the proposition that, to the extent a court were to recognize a co-conspirator exception to *Illinois Brick*, such an exception would be grounded on the damages theory underlying the alleged conspiracy. For example, the rationale for concluding that *Illinois Brick* does not apply to a price-fixing conspiracy is that no overcharge has been passed on to the consumer: When a dealer has illegally conspired with a manufacturer with respect to the price paid by a consumer, then "the consumer is the only party who has paid any overcharge." 2 Areeda & Hovenkamp P 371h, at 264. We need not resolve whether we would recognize a co-conspirator exception to *Illinois Brick*'s indirect purchaser rule for a price-fixing conspiracy because no such conspiracy has been alleged here. Instead, Gravity's compensatory damages claim is premised on an attempt to recover for Microsoft's illegal overcharge that allegedly was passed on to Gravity. Accordingly, Gravity's claim is materially indistinguishable from the claim under consideration in *Illinois Brick*, and its inclusion of a conspiracy allegation is insufficient to circumvent the *Illinois Brick* rule.

Nevertheless, **[**54]** Gravity argues that *Illinois Brick* ought not to control because the policy concerns underlying *Illinois Brick* are not implicated here. First, Gravity contends that there is no danger of duplicative recovery because the OEMs "apparently have elected not to sue Microsoft." (Appellant's Br. at 69.) The Supreme Court in *Illinois Brick*, however, "recognized that direct purchasers sometimes may refrain from bringing a treble-damages suit for fear of disrupting relations with their suppliers." *Illinois Brick, 431 U.S. at 746*. Yet, the majority concluded that "on balance . . . the legislative purpose in creating a group of private attorneys general to enforce anti-trust laws . . . is better served by holding direct purchasers to be injured to the full extent of the overcharge paid by them than by attempting to apportion the overcharge among all that may have absorbed part of it." *Id.* (internal quotation marks omitted).

Gravity also argues that its claims do not require the complex task of price-tracing because the consumers' damages are the difference between the "but-for" price that they would have paid for the Windows software absent the illegal conspiracy **[**55]** and the amount they actually paid for it. This argument misses the point, in that to calculate the "but-for" price, the court would be required to determine the overcharge, if any, for Microsoft's software that was passed on to consumers -- the exact analysis that *Illinois Brick* forbids.

[*216] Finally, Gravity suggests that, to the extent there is any difficulty in apportioning damages, the court could avoid this difficulty by awarding 100% of the overcharge to the consumer. Gravity does not explain, however, why consumers should be awarded a windfall. At bottom, Gravity's policy arguments are virtually identical to those raised by Justice Brennan in his *Illinois Brick* dissent. *Id. at 748-65* (Brennan, J., dissenting). Of course, they were considered and rejected by the majority in formulating the indirect purchaser rule, and we are not at liberty to reevaluate those policy choices here. Accordingly, we conclude that *Illinois Brick* bars Gravity's claims for compensatory damages for the alleged *§ 1* and *§ 2* violations.

V.

We conclude that Gravity's *§ 1* and *§ 2* claims fail as a matter of law and that, in any event, *Illinois Brick* bars Gravity's ability **[**56]** to recover compensatory damages. Thus, we affirm the judgment of the district court.

AFFIRMED

Dissent by: Gregory

Dissent

GREGORY, Circuit Judge, dissenting:

I agree with the majority, *ante* at 8, that Gravity's *§ 1* claims need not meet the more rigorous standards of *§ 2* of the Sherman Act. However, I respectfully dissent. Whether or not Gravity would succeed on the merits, it has clearly stated claims under both *§ 1* and *§ 2* of the Sherman Act.

I.

The majority makes its first error when it rejects Gravity's allegations of a single conspiracy, relying on *Kotteakos v. United States, 328 U.S. 750, 755, 90 L. Ed. 1557, 66 S. Ct. 1239 (1946)*. In *Kotteakos*, the Supreme Court rejected one articulation of a "rimless wheel" conspiracy. The conspiracy envisioned--and rejected--by *Kotteakos* states: "A rimless wheel conspiracy is one in which various defendants enter into separate agreements with a common defendant, but where the defendants have no connection with one another, other than the common defendant's involvement in each transaction." *Ante*, at 9. The majority says that because the *Kotteakos* Court rejected a variant of a "rimless wheel" conspiracy, **[**57]** we must too. The problem with that reasoning is that Gravity is *not* arguing that we should adopt the specific definition of conspiracy that was rejected in *Kotteakos*.

In *Kotteakos*, the underlying crime was conspiracy to obtain loans under the National Housing Act by false and fraudulent statements. The center of the conspiracy was a man named Brown, who was in the business of brokering fraudulently obtained loans for his coconspirator clients. *328 U.S. at 753*. All of the clients used Brown to obtain the loans, but each client's use of Brown's services was independent of every other client's use. *Id. Kotteakos* involved not one, but multiple conspiracies. Not only did Brown's co-conspirators have no express agreements among themselves, their participation was also in no way *dependent* on the participation of other users of Brown's services. The Court drew upon an analogy offered by the court of appeals to explain the point: "Thieves who dispose of their loot to a single receiver--a single 'fence'--do not by that fact alone become confederates: they may, but it takes more than knowledge that he is a 'fence' to make them such." *Id. at 755*. **[**58]**

In contrast to *Kotteakos*, Gravity outlined the elements of a "rimless wheel" conspiracy as follows:

[*217]

(1) that there is an overall-unlawful plan or common design in existence;

(2) that knowledge that others *must be involved* is inferable to each member because of his knowledge of the unlawful nature of the subject of the conspiracy [,] but knowledge on the part of each member of the exact scope of the operation or the number of people involved is not required; and

(3) there must be a showing of each alleged member's participation.

Elder-Beerman Stores Corp. v. Federated Dep't Stores, Inc., 459 F.2d 138, 146-47 (6th Cir. 1972) (emphasis deleted and added); *Impro Prods., Inc. v. Herrick, 715 F.2d 1267, 1279 (8th Cir. 1983)* (quoting *Elder-Beerman*). Whether we should adopt this test *in toto* I would not decide today, but I believe that this definition of a "rimless wheel" conspiracy is useful for purposes of this case, and is consistent with well-established interpretations of the Sherman Act.

The critical difference between the test Gravity urges, and the test *Kotteakos* rejected lies in the requirement "that **[**59]** knowledge that others must be involved is inferable to each member because of his knowledge *of the unlawful nature of the subject of the conspiracy*" (emphasis added). *Id*. Gravity has alleged that the nature of the conspiracy, by design and by necessity, was broader than any one agreement between Microsoft and an OEM, and that knowledge of that interdependent design was inferable to each member of the conspiracy. Regardless of whether any OEM desired the participation of other OEMs (and they conceivably might have), Gravity alleges that each OEM joined a conspiracy which it knew was, by its nature, broader than just itself and Microsoft.

These allegations are plainly sufficient to state a claim under the Sherman Act. The law has been clear that there need not be an express agreement between every conspirator in order for a single conspiracy to be formed. *Interstate Circuit, Inc. v. United States, 306 U.S. 208, 227, 83 L. Ed. 610, 59 S. Ct. 467 (1939)* ("It is elementary that an unlawful conspiracy may be and often is formed without simultaneous action or agreement on the part of the conspirators"); *see also* *United States v. Masonite Corp., 316 U.S. 265, 275, 86 L. Ed. 1461, 62 S. Ct. 1070, 1942 Dec. Comm'r Pat. 777 (1942)* **[**60]** ("Here, as in *Interstate Circuit*, . . . it was enough that, knowing that concerted action was contemplated and invited, the distributors gave their adherence to the scheme and participated in it."); *United States v. Tillett, 763 F.2d 628, 632 (4th Cir. 1985)* (stating that plaintiff must show that each alleged conspirator "participated in the conspiracy with knowledge of the essential nature of the plan.").

In *Interstate Circuit, Inc. v. United States*, film exhibitors suggested that film distributors insert clauses into their distribution contracts requiring minimum ticket prices for certain films. The distributors accepted the suggestion nearly unanimously. The Court held that an agreement among the distributors could be inferred:

> Each [distributor] was aware that all were in active competition and that without substantially unanimous action with respect to the restrictions . . . there was risk of a substantial loss of the business and good will of the . . . exhibitors, but that with it there was the prospect of increased profits.

306 U.S. at 222. Such is the case with the OEMs. It takes no stretch of logic to infer that the **[**61]** OEMs knew that Microsoft's plans contemplated the cooperation of other OEMs. It is the agreement to participate in this common plan that formed a single conspiracy. "Acceptance by competitors, without previous agreement, **[*218]** of an invitation to participate in a plan, the necessary consequence of which, if carried out, is restraint of interstate commerce, is sufficient to establish an unlawful conspiracy under the Sherman Act." *Interstate Circuit, 306 U.S. at 227*. Thus, I would find that the allegations are sufficient to state a claim.

II.

The majority next finds that Gravity has failed to allege "facts which, if proven true, would establish that the two conspiracies separately imposed unreasonable restraints of trade in interstate commerce." *Ante*, at 13. Even if I agreed that there were two conspiracies and not one alleged in this case, there is no question that Gravity's pleadings are more than adequate.

The majority requires far more from Gravity than is appropriate under notice pleading standards. Aside from a statement of jurisdiction and a demand for relief, *Federal Rule of Civil Procedure 8(a)* requires nothing more than "a short and plain statement of the **[**62]** claim showing that the pleader is entitled to relief [.]" *534 U.S. 506, 152 L. Ed. 2d 1, 122 S. Ct. 992, 997*. The elements for a claim of conspiracy to restrain trade in violation of *§ 1* of the Sherman Act are (1) concerted action that (2) unreasonably restrains trade. *Estate Constr. Co. v. Miller & Smith Holding Co., 14 F.3d 213, 220 (4th Cir. 1994)*; *Oksanen v. Page Memorial Hosp., 945 F.2d 696, 702 (4th Cir. 1991)*. According to the majority, Gravity has not adequately pled the second element, an unreasonable restraint of trade, because Gravity failed to plead the market shares of the OEMs. This is necessary, the majority says, because Gravity must prove the OEMs' individual market power in order to prove the conspiracy's market power. The conspiracy's market power, in turn, is required to prove the potential for anticompetitive effects, which is part of Gravity's burden to satisfy the "rule of reason."

The majority's pleading standard conflicts with the Supreme Court's recent pronouncement on federal pleading requirements. "Under a notice pleading system, it is not appropriate to require a plaintiff to plead facts establishing a prima facie case." *Swierkiewicz v. Sorema, N.A., 534 U.S. 506, 122 S. Ct. 992, 997, 152 L. Ed. 2d 1 (2002)*. **[**63]** "This simplified notice pleading standard relies on liberal discovery rules and summary judgment motions to define disputed facts and issues and to dispose of unmeritorious claims." *Id. 122 S. Ct. at 998*. "*Rule 8(a)*'s simplified pleading standard applies to all civil actions, with certain exceptions." *Id.* Thus, the Supreme Court has made crystal clear, just this past term, that an evidentiary standard does not determine the adequacy of a complaint. *Swierkiewicz v. Sorema, N.A., 534 U.S. 506, 152 L. Ed. 2d 1, 122 S. Ct. 992 (2002)*. It is inappropriate, therefore, to require plaintiffs to plead facts going to that evidentiary standard in a complaint.

While I agree that liability in this case, in all likelihood, would be determined under the "rule of reason" standard, *see, e.g., Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*, it seems to me that the "rule of reason" is an evidentiary standard, not a pleading requirement. Courts ordinarily have to undertake a factual inquiry before it is determined whether the "rule of reason" or *per se* rules apply. If *per se* rules apply, then **[**64]** anticompetitive effects do not matter. *See United States v. W.F. Brinkley & Son Constr. Co., Inc., 783 F.2d 1157, 1162, n.10 (4th Cir. 1986)* (noting this circuit recognizes *per se* antitrust violations and, in doing so, there is no requirement of proof of anticompetitive results). The conduct is illegal regardless of proof of effects. *Id.*

[*219] Additional specificity regarding the OEMs' market power is not necessary. While anticompetitive effect is often proven through analysis of the relevant market definition and market power, it can also be proven through *actual* anticompetitive effects. *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)*; VII P. Areeda, ***Antitrust Law*** § 1511, p.429 (1986). The Supreme Court made clear that it is inappropriate to require a plaintiff to plead facts which he may not need to succeed on the merits of the claim.

Swierkiewicz, 122 S. Ct. at 997 (holding that plaintiff need not plead facts establishing a prima facie case of employment discrimination, in part because it would be "incongruous to require a plaintiff, in order to survive a motion to dismiss, **[**65]** to plead more facts than he may ultimately need to prove to succeed on the merits if direct evidence of discrimination is discovered"). Gravity has pled actual anticompetitive effects. *See* Compl. PP 4, 59, 62-63, 68-69, 91-92, 95, 107, 115-117, 123-124, 150, 152, 154-156. Accordingly, the complaint should withstand a motion to dismiss.

To the extent that Gravity intends to rely on market power to demonstrate the likelihood of significant anticompetitive effects, the relevant issue is whether the *conspiracy* had market power in the software markets, not whether the defendant OEMs had market power in the PC hardware market. Gravity has adequately pled the conspiracy's market power. *See, e.g.,* Compl. P 150 ("Microsoft and these named co-conspirators have the power to control prices or exclude competition in these relevant markets and have committed overt acts in furtherance of their conspiracy to monopolize."); *id. P 152* ("[The OEMS] are Microsoft's three largest distributors in the relevant market for Microsoft operating software, and among Microsoft's very largest distributors in the relevant markets for the sale of personal computer word processing and spreadsheet **[**66]** software. As participants in these markets they have joined Microsoft in extensive licensing and other agreements with the purpose and effect of monopolizing and restraining trade in these relevant markets, and they have benefitted substantially from this common anticompetitive scheme.").

The Court finds Gravity's allegations of market power deficient, but only because it misunderstands Gravity's argument regarding market power. According to the majority, Gravity argued on appeal that Microsoft's monopoly is the only relevant factor in determining whether the conspiracy had the power to harm competition. This is not correct. Gravity has asserted that the district court was wrong to require it to plead that each OEM defendant had sufficient market power in the hardware market to cause the injury alleged, pointing out that the relevant market is software, and the relevant entity is the conspiracy (either a bilateral or single conspiracy). Appellant's Br. at 46, 48, 49; *id. at 50* ("The district court erred in assessing only Compaq's or Dell's market power rather than the market power of the combinations between each of them and Microsoft."). It is clear that Gravity understands the **[**67]** importance of the OEMs, and the pleadings, read in the light most favorable to Gravity, do not suggest otherwise. *See also* *Fed. R. Civ. P. 8(f)* ("All pleadings shall be so construed as to do substantial justice.").

Setting aside any confusion regarding Gravity's argument, the majority has identified an important issue concerning market power. While Microsoft has a monopoly in the relevant software markets, if the conspiracy included only minor OEMs, then the conspiracy would presumably have no power to cause significant anticompetitive **[*220]** effects. *See ante*, at 19 n.20. The parties dispute whether this should be treated as a liability issue or a causation issue, Appellants' Br. at 7; Appellees Compaq, Dell, and PB Electronics' Br. at 28, and the majority does not resolve the dispute, *ante* at 18 n.19. The heading under which the issue should go is ultimately irrelevant because the majority identifies only a single deficiency in Gravity's pleadings: failure to plead the defendant OEMs' market shares in the PC market. *Ante* at 22. Yet this is not enough to entitle the defendants to a dismissal.

The complaint identifies the OEMs involved, states that they are Microsoft's largest **[**68]** OEM distributors, identifies the asserted anticompetitive conduct, states that the conspiracy's anticompetitive conduct had significant anticompetitive effects, and identifies the effects. Moreover, Microsoft is an adjudicated monopolist, with clear market power in the relevant software markets, and the defendant OEMs are among the largest players in the PC hardware market. There is simply no conceivable argument from which one could conclude, based solely on a failure to plead market share, that the defendants are not on notice of the claims against them and the grounds on which they rest. *See* *Conley v. Gibson, 355 U.S. 41, 48, 2 L. Ed. 2d 80, 78 S. Ct. 99* ("The Federal Rules reject the approach that pleading is a game of skill in which one misstep by counsel may be decisive to the outcome and accept the principle that the purpose of pleading is to facilitate a proper decision on the merits."). The OEMs' specific market power in the PC market is, at best, a subsidiary fact.

The majority cites a number of cases involving pleading standards. *See ante* at 23-24. None of those cases, however, support the holding in this case. For example, it is true that in *Advanced Health-Care Services, Inc. v. Radford Community Hospital, 910 F.2d 139 (4th Cir. 1990)*, **[**69]** we stated that a plaintiff must "colorably state[]

facts which, if proven, would entitle him to relief." *Id. at 145 n.8*. But, in that case, we *reversed* the district court's dismissal of the complaint, acknowledging that "the Supreme Court has stated that 'dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.' *Hospital Bldg. Co. v. Trustees of Rex Hosp., 425 U.S. 738, 747, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)*." *Id. at 144*. Lack of specificity in the complaint was not the concern of that case. This Court never suggested that a plaintiff must plead detailed facts supporting every subsidiary factual conclusion. To the contrary, we employed a decidedly permissive standard for judging the adequacy of the complaint. In *Estate Constr. Co. v. Miller & Smith Holding Co., 14 F.3d 213 (4th Cir. 1994)*, we confirmed that a complaint must provide "sufficient facts so that each element of the alleged antitrust violation can be identified," *id. at 222* (internal quotation and citation omitted); but we never suggested that detailed, underlying facts are required in the **[**70]** complaint. Rather, our concern was with overly vague factual allegations and mere legal conclusions unsupported by any facts.

The full Sherman Act allegations in that case read as follows:

> Providence combined and/or conspired with the Miller & Smith defendants, Gordon V. Smith, Calloway, Connor, Jack B. Conner Associates, Inc. and others to restrain trade unreasonably in the Washington, D.C. metropolitan area by combining and/or conspiring to deprive the Pattersons of The Property, cause The Property to be sold in foreclosure at a price that would leave the Pattersons with no assets, and otherwise to drive them and Estate Construction out of the **[*221]** real estate development business in the Washington, D.C. metropolitan area. The combination and/or conspiracy produced adverse, anticompetitive effects within the relevant product and geographic market. The objects and conduct of the combination and/or conspiracy were illegal.

14 F.3d at 221 n.15. We held that a plaintiff must "provide, whenever possible, some details of the time, place and alleged effect of the conspiracy; it is not enough merely to state that a conspiracy has taken place." *Id. at 221*. **[**71]** Gravity's claims, in contrast, are replete with all manner of detail--fifty-eight pages of detail. [1] The defendants in this case know *exactly* what conduct is alleged to have violated the antitrust laws, which is all that *Rule 8* requires. It is not for us to change the rules of civil procedure mid-stream. "A requirement of greater specificity for particular claims is a result that must be obtained by the process of amending the Federal Rules, and not by judicial interpretation." *Swierkiewicz, 122 S. Ct. at 999*.

[72]** III.

Finally, the majority holds that the direct purchaser rule of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, and *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, precludes recovery. I disagree, and would join the Seventh, Ninth, and Eleventh Circuits, each of which has held that it does not. *Paper Systems, Inc. v. Nippon Paper Indus. Co., Ltd., 281 F.3d 629 (7th Cir. 2002)*; *Lowell v. American Cyanamid Co., 177 F.3d 1228, 1233 (11th Cir. 1999)* ("*Illinois Brick* simply does not apply where the complaint alleges a vertical conspiracy with no pass-on."); *In re Brand Name Prescription Drugs Antitrust Litig., 123 F.3d 599, 604 (7th Cir. 1997)* (Posner, C.J.) ("Any indirect-purchaser defense would go by the board since the [plaintiffs] would then be direct purchasers from the conspirators."); *Arizona v. Shamrock Foods Co., 729 F.2d 1208, 1212-14 (9th Cir. 1984)*; *Fontana Aviation, Inc. v. Cessna Aircraft Co., 617 F.2d 478, 481 (7th Cir. 1980)*; *see also* II Phillip **[**73]** E. Areeda et al., ***Antitrust Law*** P 346h, at 369 (2d ed. 2000) ("Whether one adopts a coconspirator exception or regards this situation as outside *Illinois Brick*'s domain, there is no tracing or apportionment to be done."); *cf.* *McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 855 (3d Cir. 1996)*

---

[1] The majority also parenthetically quotes *Mun. Utils. Bd. of Albertville v. Alabama Power Co., 934 F.2d 1493, 1501 (11th Cir. 1991)*: "A plaintiff must plead sufficient facts so that each element of the alleged antitrust violation can be identified." *Ante* at 24. But the majority omits the important qualifier contained in the same paragraph: "However, the alleged facts need not be spelled out with exactitude, nor must recovery appear imminent." *Mun Utils. Bd, 934 F.2d at 1501*. Finally, *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1106 (8th Cir. 1984)*, stands for the unexceptional and well-worn proposition that a plaintiff must at least "outline or adumbrate" a violation of the Sherman Act, instead of relying on a bare legal conclusion. *Id.*

(noting exception but declining to apply it because the upstream suppliers were not joined as defendants); *In re Beef Antitrust Litig., 600 F.2d 1148, 1163 (5th Cir. 1979)* (same); *Jewish Hosp. Ass'n v. Stewart Mech. Enters., 628 F.2d 971, 977 (6th Cir. 1980)* (noting exception but declining to apply it because vertical conspiracy allegations failed).

The decision in *Hanover Shoe* was motivated by the Court's desire to maximize deterrence by allocating the right to sue to the most efficient enforcer of ***antitrust law***. The rationale was that indirect purchasers have a comparatively small injury, and consequently less incentive to sue. *Hanover* **[*222]** *Shoe, 392 U.S. at 494*; *Illinois Brick, 431 U.S. at 745*. A passing-on defense would make litigation less effective for direct purchasers as well, given the reduction **[**74]** in recovery as well as the complexities of apportioning damages between direct and indirect purchasers. *Hanover Shoe, 392 U.S. at 493*. *Illinois Brick* is the logical corollary to *Hanover Shoe*. In *Illinois Brick*, the Court denied "passed-on" damages to indirect purchasers of a manufacturer's goods. Because of *Hanover Shoe*, failure to deny recovery for such damages would lead to duplicative recovery. *Illinois Brick, 431 U.S. at 730-31*. The two cases therefore ensure full recovery while maximizing deterrence and avoiding duplicative recovery.

Permitting plaintiffs such as Gravity to sue intermediaries that were part of a conspiracy to raise *retail* prices above a competitive level is consistent with *Hanover Shoe* and *Illinois Brick*. As Judge Easterbrook recently wrote for the Seventh Circuit: "The right to sue middlemen that joined the conspiracy is sometimes referred to as a coconspirator 'exception' to *Illinois Brick*, but it would be better to recognize that *Hanover Shoe* and *Illinois Brick* allocate to the first nonconspirator in the distribution chain the right to collect 100% of the damages." *Paper Sys., 281 F.3d at 631-32*. **[**75]** This is the correct reading of *Hanover Shoe* and *Illinois Brick*. It maximizes deterrence by giving the right to sue to the plaintiff with the most incentive to sue. As for any lingering doubt over whether the conspiring intermediary is the best plaintiff, or concern regarding multiple recovery, the case law has rightly recognized the importance of joining the intermediary in the suit--a requirement which has been met in this case. *See, e.g., McCarthy, 80 F.3d at 855*; *In re Beef Antitrust Litig., 600 F.2d at 1163*; *In re Midwest Milk Monopolization Litig., 730 F.2d 528, 531 (8th Cir. 1984)*.

The majority rejects the cases that have unanimously recognized a direct purchaser's right to sue, saying that those cases dealt with price-fixing conspiracies. I think that this case presents a substantially identical situation. Gravity is not complaining about any overcharge paid by the OEMs to Microsoft. Rather, Gravity is complaining about the conspiracy's ultimate overcharge of the consumer. Gravity actually argues that the defendant OEMs received discounts on software purchased from Microsoft. In other words, Microsoft shared some of **[**76]** the monopoly profits with the OEMs. If one were to assume that Microsoft gave *all* its monopoly profits to the OEMs then there would be no pass-on. The OEMs would simply be overcharging consumers, like in a resale price maintenance scheme. How much of its monopoly profits Microsoft retained is merely a matter of how the conspirators allocated the fruits of their alleged illegality, and is not directly relevant to Gravity. The damages that Gravity is seeking to prove are the difference between the price consumers actually paid for the Windows software and the "but for" price.

Much of the difficulty in calculating the "but for" price will come from disaggregating the price of PC hardware from the Microsoft software. This difficulty, however, is not the concern of *Illinois Brick*. It can occur when there is no middleman. It would occur, for example, if Microsoft built and sold its own brand of Windows-operated PC. Mere difficulty in measuring damages is not a reason to preclude recovery. *See* *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 265, 90 L. Ed. 652, 66 S. Ct. 574 (1946)* ("In cases where a wrongdoer has incorporated the subject of a plaintiff's patent or trade-mark **[**77]** in a single product to which the defendant had contributed other **[*223]** elements of value or utility . . . this Court has sustained recovery of the full amount of defendant's profits where his own wrongful action has made it impossible for the plaintiff to show in what proportions he and the defendant have contributed to the profits") (citations omitted); *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 566-67, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)* ("It does not come with very good grace for the wrongdoer to insist upon specific and certain proof of the injury which has itself inflicted.") (quotation omitted).

Aside from the problem of disaggregation, calculating the "but for" price may involve determining elasticities of supply and demand--the complexity identified by *Illinois Brick*--but no more so than in any of the other cases in which middlemen conspired with manufacturers. And there will be no duplicative liability. Moreover, determining elasticities of supply and demand can complicate any attempt to measure damages--"it is not occasioned solely by the presence of intermediaries." Paper Sys., 281 F.3d at 633. The real concern of **[**78]** *Hanover Shoe* and *Illinois Brick* is the complexity of measuring the pass-on of an *actual* overcharge, and its potential negative effect on deterrence and compensation, not the mere difficulties of determining what the price would have been in a competitive market. [2] The majority's rule is essentially a free pass to any conspiracy that can make the damage it inflicts difficult to pin down. Until now, that has never been the law.

The majority reasons that adopting Gravity's argument would lead plaintiffs to plead a conspiracy that did not exist in order to evade *Illinois Brick*. Yet, there are mechanisms, primarily Rule 11, to deal with the abusive and unethical conduct of litigants and lawyers. I find troubling the **[**79]** majority's unhesitating willingness to cut off compensation to *all* injured consumers based on hypothetical abuses of liberal pleading rules. The interests of consumers are far more weighty than the majority is willing to recognize. Moreover, the concern about "artful pleading" has nothing whatsoever to do with *Illinois Brick* and *Hanover Shoe*. The direct purchaser rule is designed to *encourage* and *incentivize* private enforcement of the antitrust laws, not immunize corporate wrongdoers from having to litigate antitrust claims.

IV.

The most unfortunate aspect of this case is that, to the extent Gravity's claims have merit, consumers will be left uncompensated. Even more, raising the procedural bar for consumers' claims may further stifle technological innovation. By giving comfort to those entrenched interests that seek to protect the status quo, today's decision increases the likelihood of future anticompetitive conduct. To those who would introduce disruptive technologies, this ruling creates a strong disincentive to innovate. Without innovation, we all lose. I respectfully dissent.

End of Document

[2] To the extent that the litigation subsequently revealed true *Illinois Brick* issues, such as if the defendant OEMs switched sides and sued Microsoft, *see* Paper Sys., 281 F.3d at 632, I agree that *Illinois Brick* might then require dismissal of Gravity's claims.

Admiralty & Maritime Law > Maritime Contracts > General Overview

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Admiralty & Maritime Law, Maritime Contracts**

To succeed on a claim for a violation of the Sherman Antitrust Act, 15 U.S.C.S. § 1et seq., a plaintiff must establish that there were two persons acting in concert and that the restraint complained of constitutes an unreasonable restraint on interstate trade or commerce.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN2[] Exemptions & Immunities, Noerr-Pennington Doctrine

The Noerr Pennington doctrine states that horizontal competitors may join together to lobby government because antitrust violations cannot be predicated on attempts to influence the passage or enforcement of laws. The *First Amendment* shields such joint lobbying effort from antitrust liability even when the competitors are seeking governmental action that would eliminate competition or exclude competitors.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN3[] Entitlement as Matter of Law, Appropriateness

In the consideration of a motion for summary judgment, evidence should be viewed in the light most favorable to the nonmoving party. The court must find that there is no genuine issue as to any material fact. *Fed. R. Civ. P. 56*. If no material factual disputes remain, summary judgment should be granted against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case and on which the party bears the burden of proof at trial. When the record taken as whole could not lead a rational trier of fact to find for the non-moving party, disposition by summary judgment is appropriate.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN4[] Exemptions & Immunities, Noerr-Pennington Doctrine

The scope of Noerr-Pennington immunity depends on the source, context, and nature of the anticompetitive restraint at issue. Unethical and deceptive practices can constitute abuses of administrative or judicial process that may result in antitrust violations.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN5[] Noerr-Pennington Doctrine, Sham Exception

Noerr Pennington immunity does not apply to petitions or lawsuits that are a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor. Under the Noerr doctrine, filing a lawsuit or seeking other government action can violate antitrust laws when it is a sham.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN6[] Noerr-Pennington Doctrine, Sham Exception

The essential element of the sham exception to Noerr Pennington immunity is an intent to injure a competitor coupled with the absence of a genuine effort to influence the government. Evidence of anticompetitive intent or purpose alone cannot transform otherwise legitimate activity into a sham. The existence of probable cause to institute legal or administrative action precludes a finding that an antitrust defendant has engaged in sham litigation. The necessary probable cause requires no more than a reasonable belief that there is a chance that a claim may be held valid upon adjudication.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN7[] Noerr-Pennington Doctrine, Sham Exception

A successful effort to influence governmental action cannot be characterized as a sham. A litigant who successfully persuades a neutral judge or jury that it is entitled to legal relief from the conduct of another based upon the law and facts cannot be sued under the sham exception to Noerr-Pennington immunity.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN8[] Noerr-Pennington Doctrine, Sham Exception

Under the two-step test for sham exceptions to Noerr Pennington immunity, first, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail. Only if the challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under the second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor, through the use of the governmental process as opposed to the outcome of that process as an anticompetitive weapon. The two-tiered process requires the plaintiff to disprove the challenged lawsuit's legal viability before the court will entertain evidence of the suit's economic viability.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN9[] Intentional Interference, Elements

The elements of an intentional interference with prospective contractual relations are: (1) intentional interference with a plaintiff's potential contractual relations, (2) for an improper purpose or by improper methods, and (3) causing injury to the plaintiff. If a defendant acts for more than one purpose his improper purpose must predominate in order to create liability. As an alternative to establishing an improper purpose the plaintiff may prove the defendant's method of interference was improper under the circumstances.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN10[] **Conspiracy, Elements**

A civil conspiracy is the combination of two or more parties joined for the purpose of injuring the plaintiff, thereby causing him special damages. To establish a concert of action a plaintiff must produce direct or circumstantial evidence from which a party may reasonably infer the joint assent of the minds of two or more parties to the prosecution of the unlawful exercise. A conspiracy is actionable only if overt acts pursuant to the common design proximately cause damage to the plaintiff. Nevertheless, lawful acts may become actionable if the object is to ruin or damage the business of another.

Torts > Intentional Torts > Defamation

Torts > ... > Defamation > Defenses > Truth

HN11[] **Intentional Torts, Defamation**

A communication is defamatory only if it is false and tends to impeach the plaintiffs reputation. Truth of the matter or substantial truth is a complete defense to a claim for defamation.

Opinion

[*187] GODBOLD, Senior Circuit Judge:

This is a companion case to *City of Charleston, South Carolina, a municipal corporation v. A Fisherman's Best, Incorporated; AFB of Charleston, Incorporated; Ivan Miller; and the fishing vessel Tri Liner, 310 F.3d 155, 2002 U.S. App. LEXIS 22657*, No. 99-1991, pending in this court. The two cases are decided concurrently.

This case arose from sharp differences in the City of Charleston, South Carolina concerning commercial longline fishing and access to the City's new Maritime **[**2]** Center by vessels engaged in that method of fishing. [1] The City leased the Center to the Charleston County Park and Recreational Commission (PRC) for it to manage. In April 1997 PRC circulated a request for proposals from entities that might wish to operate the new Maritime Center, which had been built by the City to serve commercial fishing vessels. PRC selected the AFB group consisting of A Fisherman's Best, Incorporated; AFB of Charleston, Incorporated; and Low Country Lobsters, Limited. PRC issued a letter of intent to award a contract to AFB. AFB proposed to serve vessels engaged in longline fishing, along with other vessels. Longlining is bitterly opposed by recreational and sports fishermen and some environmental groups. A public outcry arose against selection of AFB.

[3]** Recreational Fishing Alliance (RFA) is a national non-profit organization whose stated purpose is rebuilding and preserving fisheries in the United States. It seeks to politically organize saltwater anglers and to safeguard their rights, protect jobs in the marine boat and tackle industry, and ensure the long-term sustainability of our nation's saltwater fisheries. It is aligned in principle to sports and recreational fishing and generally opposed to commercial fishing, and it seeks to end longline fishing as an acceptable method of commercial fishing.

The CHP group is composed of persons who wanted their group selected as operator of the Maritime Center, but their response to the request for proposals was rejected as untimely. There is evidence that they requested RFA to ask the mayor to accept their proposal. A mass meeting of sportsfishermen opposing use of the center by longliners took place in Charleston. RFA sent representatives to Charleston and became involved in the public controversy for two or more months. It wrote letters, contacted local officials and raised public consciousness. At a public forum held by PRC the president of RFA denounced longline fishing. PRC issued **[**4]** a letter of intent announcing **[*188]** that AFB had been selected as operator for the Maritime Center. Apparently there were discussions between the City and PRC, and arrangements between PRC and AFB were cancelled. AFB asserts that a contract had been made, but no document had been signed and the City says no agreement had been reached.

PRC circulated a second request for proposals. AFB and CHP responded and again AFB was selected. The public outcry resumed, and RFA and others, including CHP, planned a rally against longline fishing vessels and their potential use of the Center. Announcements were made by mail, newspapers, and over radio, and persons were urged to protest to the mayor against alleged use of City tax funds to bring out-of-state fishing vessels to South Carolina waters. In late July the mayor held a meeting in his office, and one or more representatives of RFA were included. The following day the mayor announced that he had come to better understand the issues, that he was changing his position, and that he would support recreational fishermen in the controversy.

The AFB group, joined by longline fishermen and their vessels, filed this suit in the United States District Court **[**5]** against RFA and CHP. Plaintiffs alleged conspiracy between RFA and CHP, restraint of trade, and interference with competition in violation of the Sherman Act, *15 U.S.C. § 1*, and § 39-3-10 of the South Carolina Code of Laws. They also alleged related state law claims of interference with a contract or a prospective contract and for defamation. [2]

PRC's second selection of AFB was terminated, and the City took over operation of the Center. An operator was selected by the City, and the Center was opened. Several months later the City adopted a resolution barring from the Center longline vessels, longline tackle, and swordfish. It then brought in South Carolina state court a suit against the AFB group, seeking a judgment **[**6]** declaring that its resolution and the operation of the Center pursuant to the resolution were constitutional and violated no federal or state law. The case was removed to the District Court for the District of South Carolina, and the court granted summary judgment to the City. That decision has been appealed to this court, and contemporaneously with the decision of the present case it is reversed for lack

---

[1] A longliner uses a floating main line that may be several miles long, suspended in the water by floats, to which short lines and baited hooks are attached at intervals. It is highly regulated and federally permitted and is the dominant form of commercial fishing used by United States fishermen in the Atlantic Ocean to harvest highly migratory species such as swordfish and shark.

[2] Plaintiffs brought another suit in state court against the CHP group and the City alleging breach of contract and tort claims. When the present case was decided in the United States District Court the state suit was still pending, and we are not informed of its present status.

of federal jurisdiction. *City of Charleston, South Carolina, Mun. Corp., v. A Fisherman's Best, Inc.; AFB of Charleston, Inc., Ivan Miller and the fishing vessel Tri-Liner, 310 F.3d 155, 2002 U.S. App. LEXIS 22657*, No. 99-1991.

In the instant case claims against all defendants other than RFA were dismissed by plaintiffs. The district court granted summary judgment to RFA on all claims. It held that RFA was exempt from anti-trust liability under the *Noerr-Pennington* doctrine. *See* *Eastern R.R. President's Conference v. Noerr Motor Freight, 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*. With regard to intentional interference with prospective contractual relations the court, construing **[**7]** the facts favorably to plaintiffs, found that, RFA's purpose was to exercise *First Amendment* rights to petition the City government not to allow longliners at the Center, and that, if there was any interference with a contract, it was a by-product of the exercise of the *First Amendment*, and, even if there was intentional **[*189]** interference it was not done for an improper purpose. The conspiracy claim was rejected because there was no evidence that RFA had an improper purpose.

The defamation claim was based upon a statement made in ads and mail outs that the City was "bringing a big longline fishing fleet from Florida," and alleged implications that new boats would be docking at the Center, that the City was somehow subsidizing plaintiffs, and that the plaintiffs were destroying resources. The court found that the statements and implications were not defamatory. Moreover, it found that, regardless of who had the burden of proving falsity or truthfulness, the indisputable facts showed the statements and implications to be true.

I. *ANTITRUST CLAIMS*

AFB alleged a Sherman Antitrust Act violation for anticompetitive acts violating § *15 U.S.C. § 1*. ***HN1***[] To succeed AFB must **[**8]** establish that there were two persons acting in concert and that the restraint complained of constitutes an unreasonable restraint on interstate trade or commerce. *Estate Constr. Co. v. Miller & Smith Holding Co., Inc., 14 F.3d 213, 220 (4th Cir. 1994)*. AFB alleged that RFA conspired with the CHP defendants to engage in antitrust activity by opposing AFB's efforts to contract to operate the Maritime Center. As examples of RFA's unreasonable anti-competitive actions AFB alleged distribution of flyers, placing ads in newspapers, and organizing and sponsoring rallies. Plaintiffs do not contend that the City was a coconspirator.

The district court found that no party had addressed the question of whether plaintiffs had established a violation of ***antitrust law***. Rather, for purposes of summary judgment, plaintiffs had assumed that this issue was not disputed and that the question for decision was whether RFA was exempt from antitrust liability. The court proceeded accordingly [3] and held that RFA was exempt under the *NoerrPennington* doctrine. ***HN2***[] That doctrine states that horizontal competitors may join together to lobby government because antitrust violations cannot be **[**9]** predicated on attempts to influence the passage or enforcement of laws. The *First Amendment* shields such joint lobbying effort from antitrust liability even when the competitors are seeking governmental action that would eliminate competition or exclude competitors. *See* *Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 56, 123 L. Ed. 2d 611, 113 S. Ct. 1920 (1993)*. The underpinning of *Noerr* and its progeny is that Congress did not intend to subject to antitrust liability actions that had the immediate purpose of influencing legitimate governmental decision-making processes. The doctrine provides immunity to those who petition the government for redress. *Id*. The court found that RFA was not a competitor of AFB in the fishing industry and it found that RFA's actions were simply attempts to solicit governmental action to keep longline fishing vessels from using the Maritime Center and to avoid additional fishing (by out of state vessels) off the coast of Charleston. RFA's actions, therefore, were protected by *Noerr*.

[10]** The record reveals that initially the mayor of Charleston knew nothing about longline fishing or about the controversy between sportsfishermen and longliners, and he favored AFB to be the operator of the Maritime Center. In a statement on July 18, 1997 he acknowledged that he had changed his mind. He explained that he had learned of the effects of longlining on **[*190]** stocks of fish, of the interests of sportsfishermen, and of the perception of

---

[3] No party has objected to this approach.

citizens that governmental efforts at managing fisheries were not successful. He spoke of his fears of possible harm to the City aquarium, which was close to the docks, and to the City's interests in tourism. He described community opinion as opposed to longliners docking at the Center and told of adverse community responses and of pressures upon him reflecting that view. Thereafter the City cancelled its lease to PRC, took over operation of the Center, and later adopted a resolution banning pelagic longline vessels of any kind from docking, landing, unloading, or processing their catch at the Maritime Center.

The court found that RFA was opposed to longline fishing in general and hoped to eliminate it, and was concerned with the possibility of **[**11]** additional fishing by out-of-state vessels in the waters off Charleston, which are a "nursery" for spawning swordfish. The court found that no evidence supported plaintiffs argument that RFA sought to have only AFB, not longliners in general, banned from the Maritime Center and no evidence that RFA was engaged in a smear campaign against AFB.

A director of RFA had written to the mayor suggesting that he support CHP's proposal and thanking him for challenging the initial selection of AFB. The court found this was not shown to be anything other than part of RFA's lobbying against longline fishing, and that from a later letter it was clear that RFA supported CHP's proposal only because it did not include longline fishing vessels.

In this court the plaintiffs contend that *Noerr* does not apply at all to this case because "the case has nothing to do with fishing, but everything to do with acquiring real estate, the maritime center." This is a mischaracterization that the record does not support. They make a related argument that *Noerr* does not apply because the City did not act as a government in leasing the Center but as a commercial enterprise. The City responded to a public **[**12]** need related to a struggling industry, and, using public funds, built a municipal facility. It found itself involved in a public controversy in the community it served concerning who would operate the facility. It addressed the problem. This is not a commercial activity that had a political impact, but a public-political firestorm in which competitive bidding was only incident. See *Allied Tube & Conduit, Corp. v. Indian Head, Inc., 486 U.S. 492, 506, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1998)*.

The district court applied proper summary judgment standards. ***HN3***[] Evidence should be viewed in the light most favorable to the nonmoving party, *Perini Corp. v. Perini Constr., Inc., 915 F.2d 121, 123-24 (4th Cir. 1990)*. The court must find that there is no genuine issue as to any material fact. *Fed.R.Civ.P. 56*. If no material factual disputes remain, summary judgment should be granted against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case and on which the party bears the burden of proof at trial. *Celotex Corp. v. Catrett, 477 U.S. 317, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. **[**13]** When the record taken as whole could not lead a rational trier of fact to find for the non-moving party, disposition by summary judgment is appropriate. *Teamsters Joint Council No. 83 v. Centra, Inc., 947 F.2d 115, 119 (4th Cir. 1991)*. Applying these principles, the court held that the *Noerr-Pennington* doctrine clearly applied because the actions of RFA were simply attempts to solicit government action to keep longline vessels from using a facility built with taxpayer dollars and to avoid additional fishing efforts off the coast (by out-of-state vessels), and that RFA was **[*191]** petitioning the government for redress and therefore was immune from antitrust liability.

II. *ALLEGED EXCEPTIONS TO* NOERR-PENNINGTON

Not every concerted effort to influence government action is immune under *Noerr-Pennington*. ***HN4***[] The scope of this immunity depends on the source, context, and nature of the anticompetitive restraint at issue. *See Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 499, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)*. Unethical and deceptive practices can constitute abuses of administrative or judicial process that may result in antitrust **[**14]** violations. *Id. at 500*.

AFB contends that, even if *Noerr* is generally applicable, RFA's lobbying campaign is not protected from antitrust liability because it falls under one of the exceptions to *Noerr*: (1) the sham exception; (2) that RFA acted in bad faith, misrepresented information, made improper threats, and used other coercive means intended to corrupt the political or administrative processes; and (3) that this case involved a commercial bid proposal.

A. *The Sham Exception*

HN5[] *Noerr* immunity does not apply to petitions or lawsuits that are a "mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor." *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 144, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)* (defining the sham exception). Under the *Noerr* doctrine filing a lawsuit or seeking other government action can violate antitrust laws when it is a "sham." "A classic example [of a sham] is the filing of frivolous objections to the license application of a competitor, with no expectation of achieving denial of the license but simply **[**15]** in order to impose expense and delay." *See City of Columbia v. Omni Outdoor Adver., Inc., 499 U.S. 365, 380, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)*.

HN6[] The essential element of the sham exception is intent to injure a competitor coupled with the absence of a genuine effort to influence the government. "Evidence of anticompetitive intent or purpose alone cannot transform otherwise legitimate activity into a sham." *Professional Real Estate Investors v. Columbia Pictures Indus., Inc, 508 U.S. 49, 59, 123 L. Ed. 2d 611, 113 S. Ct. 1920 (1993)*. The existence of probable cause to institute legal or administrative action precludes a finding that an antitrust defendant has engaged in sham litigation. *Id. at 62*. The necessary probable cause requires no more than a reasonable belief that there is a chance that a claim may be held valid upon adjudication. *Id*.

RFA's lobbying effort was successful. ***HN7***[] A successful effort to influence governmental action "certainly cannot be characterized as a sham." *Professional Real Estate, 508 U.S. at 58* (citing *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 502, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988))*. **[**16]** *See also Eden Hannon & Co. v. Sumitomo Trust & Banking Co., 914 F.2d 556, 565 (4th Cir. 1990)* (holding that a litigant who successfully persuades "a neutral judge or jury that it is entitled to legal relief from the conduct of another based upon the law and facts" cannot be sued under the sham exception to *Noerr-Pennington*).

HN8[] A two-step test for sham exceptions was announced in *Professional Real Estate*. The Supreme Court explained:

> First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success **[*192]** on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under *Noerr*, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under the second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals "an attempt to inter fere directly with the business relationships of a competitor," *Noerr, supra, 365 U.S. at 144*, through the "use [of] the **[**17]** governmental *process* -- as opposed to the *outcome* of that process -- as an anticompetitive weapon." *Omni, 499 U.S. at 380*. This two-tiered process requires the plaintiff to disprove the challenged lawsuit's *legal* viability before the court will entertain evidence of the suit's *economic* viability.

508 U.S. at 60-61 (brackets in original).

AFB's analysis does not satisfy the first step of the *Professional Real Estate* test. AFB did not present sufficient evidence to show that RFA's attempt to change the City's longlining policy for the Maritime Center was objectively baseless. RFA engaged in lobbying, using media and political channels to sway public opinion against longlining because of the effect that it perceived longliners would have on Atlantic fisheries. RFA could reasonably expect to succeed, and it did so. Its lobbying campaign was a success. It successfully educated local government officials concerning its views and helped to obtain a favorable governmental policy barring longline fishing vessels from mooring at a public facility.

Because AFB cannot overcome the first hurdle in the *Professional Real Estate* test **[**18]** we need not address RFA's subjective reasons for participating in the campaign and we do not need to discuss the second step -- whether baseless action by the defendants concealed an attempt to interfere directly with the business relationship of a competitor through the use of governmental process as an anti-competition weapon. Moreover, apart from our conclusion concerning RFA's subjective reasoning, the district court found that RFA was not a competitor of the plaintiffs. That finding is not clearly erroneous.

B. *Misrepresentation, bad faith, threats, and corruption*

AFB contends that *Noerr-Pennington* immunity should not apply because RFA organized and conducted a "smear" campaign against it, misrepresented information, made threats, and engaged in corrupt practices. There is no officially recognized *Noerr* immunity exception for any of these activities, but we will nevertheless address them as elements of the contention that RFA conducted an improper lobbying effort.

Misrepresentation

AFB presented no evidence that RFA deliberately made false and material representations in the course of its lobbying effort. *See* Hospital Bldg. Co. v. Trustees of Rex Hosp., 691 F.2d 678, 687 (4th Cir. 1982) **[**19]** (stating that misrepresentations, to fall within the sham exception to *Noerr* immunity must be made with the requisite intent). *See also* Whelan v. Abell, 310 U.S. App. D.C. 396, 48 F.3d 1247 (D.C. Cir. 1995) (finding that even if litigation is not baseless the defendant is not entitled to *Noerr* immunity if it deliberately made false and material representations).

AFB's president testified generally that RFA presented false, half-true, and disparaging statements concerning longline **[*193]** fishing. The district court addressed four matters allegedly misrepresented by RFA: (1) that the City was bringing a big longline fishing fleet from Florida, (2) that there would be new boats operating out of the Maritime Center, (3) that the City was subsidizing longline fishing, and (4) that AFB was destroying natural resources by allowing longliners to dock at the Maritime Center. The same allegations were made in AFB's defamation claim.

There is no merit to AFB's allegation regarding the effect of longliners on natural resources. Ample evidence indicates that longlining may be destructive to marine resources. Thousands of pages of federal statutes, regulations, and proposed regulations **[**20]** have been created in an attempt to balance the nation's interest in protecting its fisheries against harms caused by longlining and other commercial fishing methods. Whether the harm is as great as RFA asserts, and whether it is balanced by the interests of the longline industry and the public's interest in longline fishing as a food source, do not obviate the fact that destruction of resources occurs. RFA cannot lose its *Noerr* protection for taking a position on this hotly debated topic.

RFA made no representation of fact that was not substantially true or reported by news agencies independent of RFA prior to RFA's arrival in Charleston. Many of the facts alleged by AFB as false were contained in a March 22, 1997 newspaper article written two months before RFA's arrival. This article stated that AFB hoped "to attract as many as 30 swordfish boats, shrimp trawlers and other fishing vessels" to the Maritime Center. The president of AFB testified that he hoped to attract to Charleston vessels that historically had done business with him at other locations.

Other statements allegedly misrepresented by RFA were made by AFB or its representatives. In his deposition AFB owner Vince **[**21]** Pyle stated that at least one longline vessel fishing in South Carolina waters hailed out of Florida. At a mass meeting on May 5 Pyle acknowledged the nomadic nature of longline vessels that work the Atlantic from Florida to North Carolina. AFB's own operational proposals stated that it planned to dock a fleet of longliners at the Maritime Center. There were no misrepresentations.

Threats and Corruption

James Donofrio, the president of RFA, contacted Pyle, the president of AFB, and told him that he would "call off the dogs" and cease lobbying against longliners docking at the Maritime Center if Pyle would agree not to bring longliners to the dock. According to Pyle, Donofrio claimed to have the power and connections to keep AFB out of the Maritime Center or to persuade those opposing it to withdraw their opposition if it would dock longliner vessels at another site. Pyle informed Donofrio that the AFB proposal was not financially feasible if longliners were not included, and rejected Donofrio's offer. CHP's name did not come up in this conversation. AFB sees this as a threat and a corrupt attempt to make a deal on behalf of CHP. The district court did not err in finding that **[**22]** this was only a conversation about settlement negotiations.

RFA wrote a letter to the mayor, thanking him for challenging the "done deal" with AFB [referring to the first selection of AFB] and recommending the acceptance of CHP as operator. This was insufficient to establish a conspiratorial relationship. A lobbying group may make recommendations through its lobbying campaign. We have previously described the mayor's change of mind about longlining. He publicly **[*194]** acknowledged that he had changed his mind and explained why.

AFB presented no evidence of bribes or blackmail or of any other corruption or impropriety engaged in by RFA to taint the governmental process in Charleston. In deposition testimony PRC commissioners Virgil Passailaigue and Tim Eubanks testified that nothing inappropriate or corrupt occurred during RFA's lobbying campaign. There is no substantial evidence of corruption in the City's own processes or of corrupt actions by RFA.

Bad Faith

RFA is a lobbying entity. Rightly or wrongly, it perceives longline fishing as depletion and mismanagement of resources by an industry that it considers antagonistic to its goals, and it considers governmental management of **[**23]** fisheries as ineffective. It joined in the efforts of others having a common purpose. It had a protected right to petition the government, and plaintiffs have not shown a sufficient basis to strip it of *Noerr-Pennington* immunity.

AFB charged that RFA acted in bad faith because it was directly opposed to AFB rather than to longlining in general, therefore *Noerr* protection is inapplicable. As we have held, inquiring into the subjective rationale of RFA's lobbying campaign would be appropriate only if the campaign was objectively baseless. RFA could reasonably expect, and did achieve, a successful lobbying effort. *See* *Professional Real Estate, 508 U.S. 49, 123 L. Ed. 2d 611, 113 S. Ct. 1920*.

C. *Competitive Bidding Process Exception*

Noerr immunity is not lost because competitive bids were involved. Corrupt bidding can fall under the sham exception to *Noerr* but only if corrupt.

AFB relies on three bidding cases. *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 509, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)* (finding efforts to influence the setting of private standards that were routinely adopted by state and local **[**24]** governments did not qualify for *Noerr* immunity when the defendant's activities were a sham intending only to control the standards promulgated by a private trade association); *F. Buddie Contracting, Inc. v. Seawright, 595 F. Supp. 422 (N.D. Ohio 1984)* (holding that *Noerr* immunity did not apply because of the defendant's improper relationship with a city consultant who disqualified the plaintiff's bid); *George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 424 F.2d 25, 33 (1st Cir. 1988)* (stating that statutes requiring competitive bidding required the defendant to refrain from dealing with officials who administer the bid statutes).

These cases do not create a discrete competitive bid exception to *Noerr*. Competitive bidders are free to lobby the relevant government, but they cannot do so by corrupting the bid process. The above cases reaffirm that lobbying efforts involving competitive proposals can be a sham if other evidence indicates that corrupt or questionable practices are initiated by a competitor directly involved with the bidding process. RFA was not a competitor. Allegations that it received financial benefits from recreational **[**25]** fishing tournaments and receives funding through a boat company that caters to sport fishermen do not overcome *Noerr* immunity.

III. *STATE LAW CLAIMS*

AFB's state law claims allege interference with a contract and/or a prospective contract, conspiracy and defamation. All arose out of the same facts that give rise to the alleged antitrust violations. In *Cheminor **[*195]** Drugs, Ltd. v. Ethyl Corp., 168 F.3d 119 (3d Cir. 1999)*, the Third Circuit held that the same *First Amendment* principles on which

Noerr-Pennington was based applied to New Jersey state tort claims for malicious prosecution, unfair competition, and tortious interference with prospective economic advantage, based on the same activity of petitioning the government that barred the federal antitrust claim. We need not adopt such a broad general rule in this case because the district court did not err in dismissing each state law claim for failure to satisfy summary judgment standards or some element of the underlying state claim.

A. *Interference with Contractual and Prospective Contractual Relations and Conspiracy*

AFB alleged that in violation of state law RFA conspired with the CHP defendants **[**26]** and interfered with its contractual and prospective contractual relations with PRC. The district court held that RFA's purpose was to petition the local government not to allow longliners at the Maritime Center, that interference with AFB's prospective contract was only a by-product of RFA's campaign against longline fishing and that even if the interference was intentional, it was not for an improper purpose. [4]

HN9[] The elements of an intentional interference with prospective contractual relations are: (1) intentional interference with a plaintiff's potential contractual relations, (2) for an improper purpose or by improper methods, and (3) causing injury to the plaintiff. *See* *Crandall Corp. v. Navistar Transp. Corp., 302 S.C. 265, 395 S.E.2d 179 (S.C. 1990)*. If a defendant acts **[**27]** for more than one purpose his improper purpose must predominate in order to create liability. As an alternative to establishing an improper purpose the plaintiff may prove the defendant's method of interference was improper under the circumstances. *Id. at 180*. The improper purpose upon which AFB relies is its allegation that RFA conspired with co-defendant CHP to deprive AFB of a contract to operate the Center and to obtain for CHP the contract to operate.

HN10[] A civil conspiracy is the combination of two or more parties joined for the purpose of injuring the plaintiff, thereby causing him special damages. *See* *LaMotte v. Punch Line of Columbia, Inc., 296 S.C. 66, 370 S.E.2d 711, 713 (S.C. 1988)*. To establish a concert of action a plaintiff must produce direct or circumstantial evidence from which a party may reasonably infer the joint assent of the minds of two or more parties to the prosecution of the unlawful exercise. A conspiracy is actionable only if overt acts pursuant to the common design proximately cause damage to the plaintiff. *See* *First Union Nat. Bank of S.C. v. Soden, 333 S.C. 554, 511 S.E.2d 372, 383 (S.C. Ct. App. 1998)*. Nevertheless, **[**28]** lawful acts may become actionable if the object is to ruin or damage the business of another. *See* *Lamotte, 370 S.E.2d at 713*.

As we have pointed out, CHP contacted RFA and requested assistance in opposing longliners' access to the Maritime Center. RFA responded, came to Charleston and began a successful lobbying effort. CHP assisted RFA in organizing and mobilizing citizens against longlining. When it appeared that the opposition to longlining was successful RFA sent a letter to the mayor thanking him for his support and recommending CHP as operator.

[*196] RFA is a lobbying group organized for and engaged in lobbying against commercial fishing methods that it opposes. A grassroots effort opposing the mooring of longline vessels at the Maritime Center was under way before RFA arrived in Charleston. The thrust of the campaign was against longline fishing and not at any other elements of AFB's proposed operations at the Center. In his conversation with Vince Pyle of AFB, President Donofrio of RFA proposed to "call the dogs off" if AFB would move longline vessels to a separate facility. He did not suggest that AFB give up its status as actual or proposed sub-lessee or make **[**29]** any concession other than removal of longline vessels.

The district court found that RFA's purpose was to exercise its *First Amendment* rights to petition the local government not to allow longliners at the Maritime Center and if it were found that RFA intentionally interfered with AFB's corporate opportunity, plaintiffs did not establish that it was for an improper purpose. We cannot say that either of these findings was error. Moreover, if the defendant acts for more than one purpose its improper purpose must predominate to create liability. *Crandall Corp. v. Navistar Int'l. Transp. Corp., 302 S.C. 265, 395 S.E.2d 179*.

[4] The district court did not address the question of whether AFB and PRC had entered into a contract but considered only interference with AFB's prospective contractual relations. No party suggests that this was error.

B. *Defamation*

The allegations that AFB says were false and defamatory are the same allegations made in AFB's antitrust claim, and they fail.

HN11[] A communication is defamatory only if it is false and tends to impeach the plaintiffs reputation. *See* *Elder v. Gaffney Ledger, Inc., 333 S.C. 651, 511 S.E.2d 383 (S.C. 1999)*, *rev'd on other grounds*, *341 S.C. 108, 533 S.E.2d 899 (S.C. 2000)*. As we concluded in our antitrust analysis, the alleged defamatory statements are substantially true. Truth of the matter or substantial **[**30]** truth is a complete defense to a claim for defamation. *See* *WeSav Fin. Corp. v. Lingefelt, 316 S.C. 442, 450 S.E.2d 580, 582 (S.C. 1994)*. Moreover, none of the allegedly false statements is inherently harmful to AFB's reputation.

The district court did not err in holding that RFA was not a competitor of AFB, that the *Noerr-Pennington* doctrine applies, that RFA is entitled to immunity, pursuant to it, and that none of the exceptions to *Noerr* apply. The decision of the district court is

AFFIRMED.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Civil Procedure > Appeals > Standards of Review > General Overview

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss for failure to state a claim should not be granted unless there exist no facts or circumstances that would entitle a plaintiff to relief. On review of a trial court's disposition of a motion to dismiss, the Supreme Court of Vermont will assume the truth of all factual allegations pleaded in a complaint as well as all reasonable inferences that may be derived from the pleadings. To the extent that the supreme court's review of a trial court's decision involves questions of statutory construction, and thus questions of law, it is nondeferential and plenary.

Governments > Legislation > Interpretation

HN2[] **Legislation, Interpretation**

With any attempt at statutory construction, the Supreme Court of Vermont begins with the plain meaning of the statutory language, because the court presumes that it reflects the legislature's intent.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN3[] **Regulated Practices, Trade Practices & Unfair Competition**

See *Vt. Stat. Ann. tit. 9, § 2453(a)*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN4[] **Private Actions, Standing**

The Vermont Consumer Fraud Act, *Vt. Stat. Ann. tit. 9, §§ 2451-2480g*, provides a private remedy for violations.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN5[] **Regulated Practices, Trade Practices & Unfair Competition**

See *Vt. Stat. Ann. tit. 9, § 2461(b)*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN6[] **Regulated Practices, Trade Practices & Unfair Competition**

See *Vt. Stat. Ann. tit. 9, § 2451a(a)*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN7[] **Regulated Practices, Trade Practices & Unfair Competition**

The Vermont Consumer Fraud Act (VCFA), *Vt. Stat. Ann. tit. 9, §§ 2451-2480g*, contains no privity requirement, that is, no provision that a consumer can sue only a retailer and no one further up the supply chain. The VCFA expressly states that any consumer, reinforced by the definition of consumer as any person, who suffers injury may bring an action under the statute against a seller, solicitor, or other violator.

Governments > Legislation > Interpretation

HN8[] **Legislation, Interpretation**

In general, the Supreme Court of Vermont will not read provisions into a statute that are not present unless it is necessary in order to make the statute effective.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN9[] **Regulated Practices, Trade Practices & Unfair Competition**

The plain meaning of the language in the Vermont Consumer Fraud Act (VCFA), *Vt. Stat. Ann. tit. 9, §§ 2451-2480g*, is supported by the express legislative intent behind the statute to protect the public against unfair or deceptive acts or practices and to encourage fair and honest competition. *Vt. Stat. Ann. tit. 9, § 2451*. In light of this purpose, the Supreme Court of Vermont has repeatedly held that the VCFA is remedial in nature and therefore must be construed liberally so as to furnish all the remedy and all the purposes intended. Of course, liberal construction does not allow the supreme court to stretch the language beyond legislative intent.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN10[] **Regulated Practices, Trade Practices & Unfair Competition**

The legislature clearly intended the Vermont Consumer Fraud Act, *Vt. Stat. Ann. tit. 9, §§ 2451-2480g*, to have as broad a reach as possible in order to best protect consumers against unfair trade practices. This intent underlies a private remedy section that allows suits by any consumer with no suggestion of a distinction between direct and indirect purchasers. It also underlies a description of proper defendants including not only a seller or solicitor, but also any other violator. In this context, any restriction to impose a privity requirement, that is to allow only direct purchasers to sue, must be stated in clear terms.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN11[] **Purchasers, Direct Purchasers**

The United States Supreme Court's Illinois Brick decision announced what has become to be known as the "indirect-purchaser" rule: a party who does not purchase a product directly from an antitrust violator is barred from bringing a cause of action for overcharge against that violator under federal law.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN12[] **Purchasers, Direct Purchasers**

It is one thing to consider the congressional policies identified in the United States Supreme Court's Illinois Brick and Hanover Shoe decisions in defining what sort of recovery federal ***antitrust law*** authorizes; it is something altogether different and inappropriate to consider them as defining what federal law allows states to do under their own ***antitrust law***. As construed in Illinois Brick, § 4 of the Clayton Act authorizes only direct purchasers to recover monopoly overcharges under federal law. But nothing in Illinois Brick suggests that it would be contrary to congressional purposes for states to allow indirect purchasers to recover under their own antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN13[] **Private Actions, Purchasers**

When viewed properly, the United States Supreme Court's Illinois Brick decision was a decision construing the federal antitrust laws, not a decision defining the interrelationship between the federal and state antitrust laws. Thus, states are free to determine how best to protect consumers against antitrust violations; in crafting or amending state ***antitrust law***, states can decide whether to adopt the indirect purchaser rule of Illinois Brick.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN14[] **Regulated Practices, Trade Practices & Unfair Competition**

See *Vt. Stat. Ann. tit. 9, § 2453(b)*.

Governments > Legislation > Interpretation

HN15[] **Legislation, Interpretation**

There is a presumption that the legislature does not intend to enact meaningless legislation and, thus, when The Supreme Court of Vermont construes a statute, it must do so in a manner that will not render it ineffective or meaningless.

Administrative Law > Sovereign Immunity

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > General Overview

HN16[] **Administrative Law, Sovereign Immunity**

Vt. Stat. Ann. tit. 9, § 2453(c) specifically references the Federal Trade Commission Act (FTCA) in instructing the Vermont Attorney General to ensure that rules and regulations enacted for the purposes of the Vermont Consumer Fraud Act (VCFA), *Vt. Stat. Ann. tit. 9, §§ 2451-2480g*, shall not be inconsistent with the rules, regulations, and decisions of the Federal Trade Commission and the federal courts interpreting the FTCA. That subsection makes sense only if *Vt. Stat. Ann. tit. 9, § 2453(b)* also means that the Supreme Court of Vermont is guided by federal court decisions construing the FTCA and not other federal antitrust laws. The Supreme Court of Vermont has expressly interpreted *§ 2453(b)* to mean that in construing the VCFA, the court looks to the interpretations accorded similar terms and provisions of the FTCA.

Administrative Law > Sovereign Immunity

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN17[] **Administrative Law, Sovereign Immunity**

The harmonization provision in *Vt. Stat. Ann. tit. 9, § 2453(b)* does not apply to the Vermont Consumer Fraud Act (VCFA), *Vt. Stat. Ann. tit. 9, §§ 2451-2480g*, as a whole but only to *Vt. Stat. Ann. tit. 9, § 2453(a)*, which sets out the practices prohibited under the VCFA. Thus, *§ 2453(b)* is not aimed at defining who can sue under the VCFA, but rather what conduct constitutes a violation of the VCFA. Nowhere in the VCFA is there any requirement that the definition of who may sue under the VCFA must be consistent with the definition of who may sue under federal ***antitrust law***, including under the Federal Trade Commission Act (FTCA). This is logical because the FTCA does not provide for a private cause of action and thus has no bearing on a determination on who can sue under the VCFA.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN18[] **Private Actions, Standing**

The purpose behind both state and federal ***antitrust law*** is to apply a uniform standard of conduct so that businesses will know what is acceptable conduct and what is not acceptable conduct. To achieve this uniformity or predictability, the Supreme Court of Vermont is not required to define who may sue in Vermont state courts in the same way federal courts have defined who may maintain an action in federal court.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN19[] **Private Actions, Standing**

By 2000 Vt. Acts & Resolves 65, the legislature enacted a specific antitrust remedy provision, *Vt. Stat. Ann. tit. 9, § 2465*, which allows any person to sue for a violation of an antitrust act including the Vermont Consumer Fraud Act (VCFA), *Vt. Stat. Ann. tit. 9, §§ 2451-2480g*, limits the damages available in a private action under the VCFA or other state antitrust act, and explicitly authorizes indirect purchaser antitrust actions based on a violation of *Vt. Stat. Ann. tit. 9, § 2453*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN20[] **Private Actions, Standing**

See *Vt. Stat. Ann. tit. 9, § 2465(b)*.

Governments > Legislation > Interpretation

HN21[] **Legislation, Interpretation**

Where the legislature has amended a prior law and the circumstances clearly indicate clarification to be intended, the Supreme Court of Vermont's construction of a statute must be governed by the disclosed intent of the legislature.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN22[] **Private Actions, Purchasers**

2000 Vt. Acts & Resolves 65 did not effectuate a change in Vermont law that an indirect purchaser was entitled to bring a cause of action under the Vermont Consumer Fraud Act, *Vt. Stat. Ann. tit. 9, §§ 2451-2480g*.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN23[] **Private Actions, Purchasers**

There is no reason to treat antitrust cases differently from other Vermont Consumer Fraud Act (VCFA), *Vt. Stat. Ann. tit. 9, §§ 2451-2480g*, cases and prohibit indirect purchasers from bringing suit under *Vt. Stat. Ann. tit. 9, § 2461(b)*. Since consumers can generally sue under *§ 2461(b)* even though they are indirect purchasers of a good or service from a defendant, they can bring an antitrust case under *§ 2461(b)*. The recent addition to the VCFA of *Vt. Stat. Ann. tit. 9, § 2465(b)*, explicitly authorizing indirect purchaser antitrust suits, is not a change in the preexisting law.

Counsel: Kirsten A. Beske, David N. Dunn, and Potter Stewart, Jr. of Potter Stewart, Jr. Law Offices, P.C., Brattleboro, for Plaintiff-Appellant.

Robert Luce of Downs Rachlin Martin, PLLC, Burlington, and David Tulchin of Sullivan & Cromwell (Of Counsel), New York, New York, for Defendant-Appellee.

William H. Sorrell, Attorney General, and Julie Brill and David B. Borsykowsky, Assistant Attorneys General, Montpelier, for Amicus Curiae State of Vermont.

Judges: PRESENT: Amestoy, C.J., Dooley, Morse, Johnson and Skoglund, JJ.

Opinion by: DOOLEY

Opinion

[11] [*329]** DOOLEY, J. This is an appeal from the trial court's dismissal of a class action suit brought under the Vermont Consumer Fraud Act (VCFA or the Act), 9 V.S.A. §§ 2451-2480g. Plaintiff, Richard Elkins, alleged that defendant Microsoft Corporation (Microsoft) used its monopoly power to overprice the Windows 98 operating system which plaintiff purchased pre-installed in a personal computer from a computer **[***2]** manufacturer (called original equipment manufacturer or OEM). Based on the United States Supreme Court decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, the superior court dismissed the case because plaintiff was only an indirect purchaser of Windows 98, that is, he purchased it from the OEM rather than Microsoft. Plaintiff appeals arguing that he does not have to be a direct purchaser to sue under the VCFA. We agree and reverse and remand.

The facts of this case are not in dispute. Microsoft is the leading supplier of operating system software for personal computers. Microsoft distributed its Windows 98 operating system through OEM's, who pre-installed the software on personal computers they sold to consumers, and through retailers of CD-ROMs containing the software. In February 1999, plaintiff purchased a computer with a pre-installed Microsoft Windows 98 operating system. He subsequently brought suit under the VCFA, alleging that he and other similarly situated Vermont licensees of Windows 98 were injured by Microsoft's abuse of its monopoly power in charging consumers a price in excess of the price it would have been **[***3]** able to charge in a competitive market.

Microsoft moved to dismiss the complaint on the grounds that an "indirect purchaser" such as plaintiff does not suffer cognizable damages in an unfair **[**12]** competition case and thus is barred from bringing a claim under the VCFA. The trial court agreed and granted the motion.

The issue on appeal is the same as before the trial court: whether, given the Illinois Brick decision and the statutory language of the VCFA, an indirect purchaser is barred from bringing an action for antitrust violations under the VCFA. Plaintiff and amicus curiae State of Vermont argue that a suit by an indirect purchaser under the VCFA is not barred because (1) the VCFA provides a cause of action for indirect purchasers, and (2) the Illinois Brick indirect purchaser rule is not applicable because it construes the Clayton Antitrust Act, and not the VCFA, and our construction of the VCFA is not guided by federal Clayton Act decisions.

In response, Microsoft argues that (1) an indirect purchaser cause of action did not exist under the VCFA until the 2000 amendment, which became effective after plaintiff **[*330]** acquired his copy of Windows 98, and (2) the indirect purchaser rule **[***4]** of Illinois Brick controls here because there is no express statutory provision in the VCFA providing indirect purchasers a cause of action and because the VCFA directs that construction of its terms be guided by federal law.

HN1[] A motion to dismiss for failure to state a claim should not be granted unless there exists no facts or circumstances that would entitle plaintiff to relief. *Richards v. Town of Norwich, 169 Vt. 44, 48, 726 A.2d 81, 85 (1999)*. On review of the trial court's disposition of the motion to dismiss, this Court will assume the truth of all factual allegations pleaded in the complaint as well as all reasonable inferences that may be derived from the pleadings. *Id. at 48-49, 726 A.2d at 85*. To the extent that our review of the trial court's decision involves questions of statutory construction, and thus questions of law, it is nondeferential and plenary. *State v. Koch, 169 Vt. 109, 112, 730 A.2d 577, 580 (1999)*.

We begin with the applicable provisions of the VCFA and then consider the impact of Illinois Brick. As ***HN2***[] with any attempt at statutory construction, we begin with the plain meaning of the statutory language, because we presume **[***5]** that it reflects the Legislature's intent. *Dover Town Sch. Dist. v. Simon, 162 Vt. 630, 631, 650 A.2d 514, 516 (1994)* (mem.).

The central provision of the VCFA is *9 V.S.A. § 2453(a)*, which provides:

HN3[] (a) Unfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce, are hereby declared unlawful.

HN4[] The Act goes on to provide a private remedy for violations: ***HN5***[] Any consumer who . . . sustains damages or injury as a result of any false or fraudulent representations or practices prohibited by *section 2453* of this title . . . may sue for appropriate equitable relief and may sue and recover from the seller, solicitor or other violator the amount of his damages . . . .

Id. § 2461(b) (emphasis added). "Consumer" is defined by the act as:

HN6[] Any person who purchases, leases, contracts for, or otherwise agrees to pay consideration for goods or services not for resale in the ordinary course of his or her trade or business but for his or her use or benefit or the use or benefit [*331] of a member of his or her household, or in connection with the operation of his or her household . . . .

Id. § 2451a(a) (emphasis added).

HN7[] The statutory language contains no privity [***6] requirement, that is, no provision that the consumer can sue only the retailer and no one further up the supply [**13] chain. HN8[] In general, we will not read provisions into the statute that are not present unless it is necessary in order to make the statute effective. State v. O'Neill, 165 Vt. 270, 275, 682 A.2d 943, 946 (1996). The Act expressly states that any consumer, reinforced by the definition of consumer as "any person," who suffers injury may bring an action under the statute against a "seller, solicitor or other violator." The language does not support the imposition of a privity requirement.

HN9[] The plain meaning of the language is supported by the express legislative intent behind the statute to "protect the public" against "unfair or deceptive acts or practices" and to "encourage fair and honest competition." 9 V.S.A. § 2451; see State v. Int'l Collection Serv., Inc., 156 Vt. 540, 543, 594 A.2d 426, 429 (1991); Gramatan Home Investors Corp. v. Starling, 143 Vt. 527, 536, 470 A.2d 1157, 1162 (1983) (purpose of VCFA includes "to encourage a commercial environment highlighted by integrity and fairness"). In light of this [***7] purpose, this Court has repeatedly held that the VCFA is "remedial in nature" and therefore must be construed "liberally so as to furnish all the remedy and all the purposes intended." State v. Custom Pools, 150 Vt. 533, 536, 556 A.2d 72, 74 (1988); see also Carter v. Gugliuzzi, 168 Vt. 48, 52, 716 A.2d 17, 21 (1998) (VCFA should be applied "liberally to accomplish its purposes"); State v. Therrien, 161 Vt. 26, 31, 633 A.2d 272, 275 (1993). Of course, liberal construction does not allow us to stretch the language beyond legislative intent. See Wilder v. Aetna Life & Casualty Ins. Co., 140 Vt. 16, 19, 433 A.2d 309, 310 (1981).

HN10[] The Legislature clearly intended the VCFA to have as broad a reach as possible in order to best protect consumers against unfair trade practices. This intent underlies a private remedy section that allows suits by "any consumer" with no suggestion of a distinction between direct and indirect purchasers. It also underlies a description of proper defendants including not only a seller or solicitor, but also an "other violator," a broad term that covers defendant in this case. We think in this context that any [***8] restriction to impose a privity requirement, that is to allow only direct purchasers to sue, must be stated in clear terms. See Int'l Collection Serv., Inc., 156 Vt. at 549-50, 594 A.2d at 429 (in the [*332] absence of express language limiting Attorney General's enforcement power to personal consumer victims, plain meaning supports actions against defendants who engage in unfair and deceptive practices with respect to business consumers); Custom Pools, 150 Vt. at 536, 556 A.2d at 74 (if Legislature intended that Attorney General cannot sue a finance company that benefitted from the consumer fraud of a seller, "it could have done so with clear language to that effect").

Although we have never addressed the precise question before us, two of our decisions are instructive. In Carter v. Gugliuzzi, we held that a home purchaser could sue a real estate broker under § 2461(b) as a "seller" even though the broker did not own the home when it was sold to the plaintiff. Relying on the broad remedial purpose of the VCFA, the plain meaning of the term "seller," and the lack of any explicit limitation on that term, we held that the broker could be sued under § 2461(b) for [***9] deceptive representations that induced the sale. 168 Vt. at 53, 716 A.2d at 22. Also relevant is Poulin v. Ford Motor Co., 147 Vt. 120, 513 A.2d 1168 (1986), where a purchaser of an automobile sued both the dealer and the manufacturer because a representative of the manufacturer misrepresented that the specific model purchased was produced in very limited numbers so that its value would [**14] increase. We affirmed a jury verdict against both the dealer and manufacturer in response to various claims that plaintiff had failed to present the proof required by the statute, id. at 125-27, 513 A.2d at 1172-73, although we did not confront the precise claim made here. Poulin is exactly the kind of case that demonstrates that a privity requirement would seriously undermine the utility of the Act. Virtually all of the representations about the quality and features of a modern automobile are made by manufacturers, most through national and regional media advertisements. If we enforced a privity requirement, the consumer could not reach the perpetrator of consumer fraud.

Microsoft suggests that another decision, Wilder v. Aetna Life & Casualty Insurance Co., supports **[***10]** a privity requirement. In Wilder, plaintiff had been in an automobile accident with defendant's insured and sued the insurer under VCFA claiming it had failed to pay plaintiff pursuant to a settlement agreement. The main holding of Wilder is that the sale of an insurance policy is not a contract of "goods or services" under *§§ 2461(b)* and *2451a(a)* (definition of "consumer"). *140 Vt. at 18, 433 A.2d at 310*. This Court added, however, that we were "not dealing with a contractual situation between buyer and seller" but instead being asked "to read into the Act a transaction one step removed." *Id. at 19, 433 A.2d at 310*. Microsoft argues that this **[*333]** language precludes a suit by an indirect purchaser, who is "one step removed."

Microsoft misreads the Wilder alternative holding. The problem in Wilder was that the plaintiff was not a purchaser of the alleged good or service at all and, in that sense, was removed from the transaction that was needed to bring the transaction under *§ 2461(b)*. Here, plaintiff indisputably contracted for goods that included the Windows 98 operating system.

Microsoft also argues that the Legislature clearly intended that *§ 2461(b)* **[***11]** did not provide a remedy to indirect purchasers in antitrust actions as shown by Act 65, a 2000 amendment to the VCFA. We consider this argument in the next section because it arises from Microsoft's central position that we should treat VCFA antitrust actions differently from VCFA consumer protection actions and require privity for the former even if we do not require it for the latter. We turn now to the effect of federal law.

Microsoft's argument is based on the United States Supreme Court decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*. In Illinois Brick, the State of Illinois, on its own behalf and on behalf of a number of local government entities, brought an action under § 4 of the Clayton Act alleging that defendants, manufacturers and distributors of concrete block, had conspired to fix the price of concrete block in violation of § 1 of the Sherman Act. The State and the local governments were all indirect purchasers of concrete block because the block was sold by the manufacturers directly to contractors to construct buildings, which were later sold to state and governmental entities. The United States Supreme **[***12]** Court, relying on the earlier case of *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, held that "the overcharged direct purchaser, and not others in the chain of manufacture or distribution, is the party 'injured in his business or property' within the meaning of [§ 4 of the Clayton Act]." *Illinois Brick, 431 U.S. at 729*. Plaintiffs, therefore, were not entitled to recover the illegal overcharges that were passed on to them via the contractors. *Id. at 735*. **[**15]** ***HN11***[] Illinois Brick announced what has become to be known as the "indirect-purchaser" rule: a party who does not purchase a product directly from an antitrust violator is barred from bringing a cause of action for overcharge against that violator under federal law. See *California v. ARC America Corp., 490 U.S. 93, 96-97, 104 L. Ed. 2d 86, 109 S. Ct. 1661 (1989)*; *In re Microsoft Corp. Antitrust Litig., 127 F. Supp. 2d 702, 708 (D. Md. 2001)*.

[*334] The critical decision in understanding the effect of Illinois Brick on this action is California v. ARC America Corp., in which defendants in state antitrust actions argued that **[***13]** allowing indirect purchasers to sue under state antitrust acts frustrated federal law so that such claims were preempted by federal law. The Court rejected this claim:

HN12[] It is one thing to consider the congressional policies identified in Illinois Brick and Hanover Shoe in defining what sort of recovery federal ***antitrust law*** authorizes; it is something altogether different, and in our view inappropriate, to consider them as defining what federal law allows States to do under their own ***antitrust law***. As construed in Illinois Brick, § 4 of the Clayton Act authorizes only direct purchasers to recover monopoly overcharges under federal law. We construed § 4 as not authorizing indirect purchasers to recover under federal law because that would be contrary to the purposes of Congress. But nothing in Illinois Brick suggests that it would be contrary to congressional purposes for States to allow indirect purchasers to recover under their own antitrust laws.

490 U.S. at 103. The Court later reiterated this theme: ***HN13***[] "When viewed properly, Illinois Brick was a decision construing the federal antitrust laws, not a decision defining the interrelationship between the federal and state **[***14]** antitrust laws." *Id. at 105*. Thus, under ARC America, states are free to determine how best to protect consumers against antitrust violations; in crafting or amending state ***antitrust law***, states can decide whether to adopt the indirect purchaser rule of Illinois Brick.

Microsoft contends that ARC America stands for the rule that express statutory language is required in order to permit indirect purchasers to recover under state ***antitrust law***. Microsoft bases its contention on the Court's statement of the issue before it: "whether this rule limiting recoveries under the Sherman Act also prevents indirect purchasers from recovering damages flowing from violations of state law, despite express state statutory provisions giving such purchasers a damages cause of action." *Id. at 100*. We read this language, which comes early in the opinion, as a description of the issue rather than a limitation on the holding. That reading is reinforced by the fact that one of the state plaintiffs, Arizona, did not have an express provision in its statute allowing indirect purchaser suits, see *Bunker's Glass Co. v. Pilkington PLC, 47 P.3d 1119, 1125-26 n.7, 202 Ariz. 481 (Ariz. Ct. App. 2002)*,, *202 Ariz. 481, 47 P.3d 1119* **[***15]** but the Court acknowledged that the statute **[*335]** "might be interpreted as a matter of state law as authorizing indirect purchasers to recover." *ARC America Corp., 490 U.S. at 98 n.3*. More importantly, there is nothing in the rationale of ARC America to suggest that a state is not free to express its own policy in any way it desires. We reject Microsoft's narrow reading of ARC America. The issue before us is not whether the Vermont Legislature can allow indirect purchasers to sue; it is instead whether it has.

We now reach Microsoft's central argument that the holding of Illinois Brick **[**16]** should be followed in Vermont because *§ 2453(b)* directs that construction of the VCFA should be guided by federal law. *Section 2453(b)* provides:

HN14[] It is the intent of the legislature that in construing subsection (a) of this section, the courts of this state will be guided by the construction of similar terms contained in section 5(a)(1) of the Federal Trade Commission Act as from time to time amended by the Federal Trade Commission and the courts of the United States.

The text of subsection (a) is set out earlier in this opinion and is taken from § 5(a)(1) of the Federal Trade Commission **[***16]** Act, *15 U.S.C. § 45(a)(1)*. Microsoft construes the phrase "and the courts of the United States" in *§ 2453(b)* as encompassing federal court decisions interpreting all federal antitrust statutes, including the Clayton Act and the Sherman Act. See also *9 V.S.A. § 2451* (the purpose of the VCFA is "to complement the enforcement of federal statutes and decisions governing unfair methods of competition."). It argues, therefore, that *§ 2453(b)* requires this Court to follow the indirect purchaser rule of Illinois Brick and affirm the dismissal of Elkins's claim. For a number of reasons, we cannot agree with this construction of the "harmonization" provision.

First, Microsoft plainly misreads the language of *§ 2453(b)*. The phrase "and the courts of the United States" is part of the larger phrase "by the construction of similar terms contained in section 5(a)(1) of the Federal Trade Commission Act as from time to time amended by the Federal Trade Commission and the courts of the United States," and must be so limited as to include only those federal decisions construing the Federal Trade Commission Act. Microsoft's reading would have us **[***17]** divorce the phrase "in the courts of the United States" from its context and thus construe *§ 2453(b)* as stating in effect "the courts of this state will be guided by . . . the courts of the United States." Not only is this reading implausible, it also produces a **[*336]** direction so broad as to be practically meaningless. See *State v. Yorkey, 163 Vt. 355, 358, 657 A.2d 1079, 1080 (1995)* ***HN15***[] ("There is a presumption that the Legislature does not intend to enact meaningless legislation . . . [and], thus, when we construe a statute, we must do so in a manner that will not render it ineffective or meaningless.").

Second, our interpretation of *§ 2453(b)* is supported by other sections of the VCFA as well as by our previous decisions construing the Act. ***HN16***[] *Section 2453(c)* specifically references the Federal Trade Commission Act in instructing the Attorney General to ensure that rules and regulations enacted for the purposes of the Act "shall not be inconsistent with the rules, regulations and decisions of the Federal Trade Commission and the federal courts interpreting the Federal Trade Commission Act." *9 V.S.A. § 2453(c)*. That subsection makes sense only if subsection **[***18]** (b) also means that we are guided by federal court decisions construing the Federal Trade Commission Act and not other federal antitrust laws.

This Court has expressly interpreted *§ 2453(b)* to mean that "in construing the Act, we look to the interpretations accorded similar terms and provisions of the Federal Trade Commission Act . . . ." *Carter, 168 Vt. at 52, 716 A.2d at 21* (citing *9 V.S.A. § 2453(b)*); see also *Russell v. Atkins, 165 Vt. 176, 182, 679 A.2d 333, 336 (1996)*; *Int'l Collection Serv., Inc., 156 Vt. at 544-45, 594 A.2d at 429*; *Poulin, 147 Vt. at 124-25, 513 A.2d at 1171-72*; *Christie v. Dalmig, Inc., 136 Vt. 597, 600-01, 396 A.2d 1385, 1387-88 (1979)*. Russell is particularly significant because it is an antitrust case.

[17]** Third, ***HN17***[] the harmonization provision in *§ 2453(b)* does not apply to the VCFA as a whole but only to *§ 2453(a)*, which sets out the practices prohibited under the Act. Thus, *§ 2453(b)* is not aimed at defining who can sue under the VCFA, but rather what conduct constitutes a violation of the Act. Nowhere in the Act is there any requirement that the definition of who **[***19]** may sue under the Act must be consistent with the definition of who may sue under federal ***antitrust law***, including under the FTCA. This is logical because the Federal Trade Commission Act does not provide for a private cause of action, see *Holloway v. Bristol-Myers Corp., 158 U.S. App. D.C. 207, 485 F.2d 986, 991 (D.C. Cir. 1973)*, and thus has no bearing on our determination on who can sue under the VCFA. As the Supreme Court of Iowa recently stated:

HN18[] The purpose behind both state and federal ***antitrust law*** is to apply a uniform standard of conduct so that businesses will know what is acceptable conduct and what is not acceptable conduct. To achieve this uniformity or predictability, we are **[*337]** not required to define who may sue in our state courts in the same way federal courts have defined who may maintain an action in federal court.

Comes v. Microsoft Corp., 646 N.W.2d 440, 446 (Iowa 2002).

We are not persuaded by Microsoft's additional argument that the Legislature's 2000 creation of a specific remedy for indirect purchasers supports its position. ***HN19***[] By Act 65 of 2000, the Legislature enacted a specific antitrust remedy provision, *9 V.S.A. § 2465* **[***20]** , which allowed "any person" to sue for a violation of an antitrust act including VCFA, limited the damages available in a private action under the VCFA or other state antitrust act and explicitly authorized indirect purchaser antitrust actions based on a violation of *§ 2453*. According to Microsoft, prior to the passage of Act 65, an indirect purchaser such as Elkins must have been barred from bringing suit under the VCFA; otherwise the legislative authorization of such a suit was unnecessary. It argues that allowing plaintiff's suit here would be an impermissible retroactive application of the amendment.

The express legislative purpose behind the amendment instructs otherwise. The amendment language states in relevant part:

HN20[] In any action for damages or injury sustained as a result of any violation of state antitrust laws, pursuant to *section 2453* of this title, the fact that the state, any public agency, political subdivision or any other person has not dealt directly with a defendant shall not bar or otherwise limit recovery. . . .

9 V.S.A. § 2465(b). In its Statement of Intent, the Legislature expressed the purpose behind this amendment: "This act clarifies **[***21]** the right of a direct or indirect purchaser to obtain recovery for a violation of the state ***antitrust law*** as set forth in chapter 63 of Title 9." 1999, No. 65 (Adj. Sess.), § 1 (emphasis added). ***HN21***[] Where the Legislature has amended a prior law and the circumstances clearly indicate clarification to be intended, this Court's construction of a statute must be governed by the disclosed intent of the Legislature. See *Town of Cambridge v. Town of Underhill, 124 Vt. 237, 241, 204 A.2d 155, 158 (1964)*; see also In re Shantee Point, Inc., ___ Vt. ___, ___, *811 A.2d 1243 (2002)* (where authorization issue is in litigation, amendment to provide the authorization "can be interpreted as clarifications adopted in light of . . . litigation, rather than substantive changes"). There is nothing to indicate that the Legislature's intended purpose behind the enactment of *§ 2465(b)* was contrary to the statement that **[*338]** it was a clarification and not necessarily **[**18]** a substantive change in the preexisting law. Therefore, based on the plain meaning of the statute, the expressly stated legislative intent, the remedial purposes of the Act, our previous decisions construing the VCFA, and the express **[***22]** legislative purpose behind the 2000 amendment, we find that ***HN22***[] Act 65 did not effectuate a change in Vermont law and that an indirect purchaser was entitled to bring a cause of action under the VCFA prior to the 2000 amendment.

We have saved until last the consideration of the myriad of decisions from federal and state courts considering the question before us under the law of the state involved. By way of context, approximately 33 states and the District of Columbia have allowed indirect purchasers to sue for at least some damages, many by statutes equivalent to *9 V.S.A. § 2465* and others by decision. See Note, Good "Brick" Walls Make Good Neighbors: Should a State Court Certify a Multistate or Nationwide Class of Indirect Purchasers?, *70 Fordham L. Rev. 2019, 2025-26 (2002)*; see generally Davis, Indirect Purchaser Litigation: ARC America's Chickens Come Home to Roost on the Illinois Brick Wall, 65 Antitrust L.J. 375 (1997). In virtually every state in which there is no explicit statute there has been litigation to resolve the issue. Further, state antitrust claims are often raised in federal antitrust suits so there are some federal **[***23]** decisions.

In support of its construction of *§ 2453(b)* and its effect on the construction of the VCFA as a whole, Microsoft relies on two federal district court cases that involve Vermont law. See *State v. Densmore Brick Co., 1980 U.S. Dist. LEXIS 11581, 1980 WL 1846*, at * 1 (D.Vt. Apr. 10, 1980), and *FTC v. Mylan Labs., Inc., 99 F. Supp. 2d 1 (D.D.C. 1999)*. In Densmore, the State of Vermont sued a woodburning stove distributor for violations of the Sherman Act and the VCFA. In ruling on defendant's summary judgment motion, the court stated the general rule of Illinois Brick: that an antitrust plaintiff who was not a direct purchaser could not recover. *Densmore, 1980 U.S. Dist. LEXIS 11581, 1980 WL 1846*, at * 4. However, in denying the motion, the court ultimately found no reason to apply the indirect purchaser rule, as plaintiff had alleged a direct relationship. Id. Nowhere did the court address whether Illinois Brick was controlling law with respect to both federal and state law claims.

The subsequent holding in Mylan Laboratories relied upon Densmore for the proposition that Vermont case law prohibited indirect purchaser suits under the *VCFA. Mylan Labs., 99 F. Supp. 2d at 10*. **[***24]** Not only did the Mylan court misinterpret Densmore, it failed to do its own independent analysis. We find more accurate the later District of **[*339]** Maryland decision in *In re Microsoft, 127 F. Supp. 2d at 723, 725*. In this decision, the court found that it could not determine how this court would resolve the issue of whether an indirect purchaser could sue, labeling Microsoft's argument to the contrary as painting "with too broad a brush." *In re Microsoft, 127 F. Supp. 2d 702 at 723*. We agree with the court that the issue before us was entirely unresolved until this opinion. We decline to follow Mylan Laboratories or hold that Densmore is persuasive authority for Microsoft's position.

As the experience of other states in the construction of their antitrust and consumer fraud statutes may offer guidance, see *Int'l Collection Serv., Inc., 156 Vt. at 547-49, 594 A.2d at 430-32* (Court looks to other state's jurisprudence for guidance in construing the VCFA), we turn to a brief examination of the cases from other states. Because the statutory schemes vary markedly from state to state, it is helpful to place the decisions in three categories, as follows: **[***25]**

[19]** 1. Those Based on State Antitrust Acts - Unlike Vermont, most states have specific state antitrust acts. These statutes typically have federal harmonization provisions that require the court to look to federal court decisions interpreting any of the federal antitrust laws. Unless there is a specific provision in the state antitrust act allowing indirect purchasers to sue - that is, explicit rejection of the Illinois Brick rule - most of the court decisions in these states hold that they are bound to follow Illinois Brick. See *Pomerantz v. Microsoft Corp., 50 P.3d 929, 932 (Colo. Ct. App. 2002)*; *Berghausen v. Microsoft Corp., 765 N.E.2d 592, 596 (Ind. Ct. App. 2002)*; *Duvall v. Silvers, Asher, Sher & Mchapen, 998 S.W.2d 821, 825 (Mo. Ct. App. 1999)*; *Minuteman, LLC v. Microsoft Corp., 147 N.H. 634, 795 A.2d 833, 838 (N.H. 2002)*; *Siena v. Microsoft Corp., 796 A.2d 461, 464-65 (R.I. 2002)*. Those that refuse to follow Illinois Brick note that the harmonization provision is not absolute. See *Bunker's Glass Co., v. Pilkington, 47 P.3d at 1126-27*; *Comes, 646 N.W.2d at 446*; *Hyde v. Abbott Labs., Inc., 123 N.C. App. 572, 473 S.E.2d 680, 686 (N.C. Ct. App. 1996)* **[***26]** (federal law is considered "only as persuasive authority").

2. Those Based on Consumer Protection Acts, or Similar Legislation, in States that also Have Antitrust Acts - In most of the litigated cases, the plaintiff is precluded from suing under the state antitrust act because of the adoption of the Illinois Brick rule and sues instead under a consumer protection act, an unfair trade practices act or the like. The decisions in this category go in both directions depending upon the court's view of the need for consistency in

the result under the applicable acts. See *Vacco v. Microsoft Corp., 260 Conn. 59, 793 A.2d 1048, 1058, 1066 **[*340]** (Conn. 2002)* (because of broad harmonization provision, consumer cannot sue under state antitrust act; consumer also cannot sue under Connecticut Unfair Trade Practices Act); *Mack v. Bristol-Myers Squibb Co., 673 So. 2d 100, 109 (Fla. Dist. Ct. App. 1996)* (although indirect purchaser cannot sue under state antitrust act, she can sue under the Florida Deceptive and Unfair Trade Practices Act); *Davidson v. Microsoft Corp., 143 Md. App. 43, 792 A.2d 336, 344-45 (Md. Ct. Spec. App. 2002)* (indirect purchaser who cannot sue under state antitrust **[***27]** act also cannot sue under Maryland Consumer Protection Act); *Ciardi v. F. Hoffmann-LaRoche, Ltd., 436 Mass. 53, 762 N.E.2d 303, 314 (Mass. 2002)* (indirect purchaser who cannot sue under state antitrust act can sue under Massachusetts consumer protection statutes); *Abbott Labs., Inc. v. Segura, 907 S.W.2d 503, 507, 38 Tex. Sup. Ct. J. 961 (Tex. 1995)* (indirect purchaser who cannot sue under state antitrust act also cannot sue under Texas Deceptive Trade Practices-Consumer Protection Act); see also *Arnold v. Microsoft Corp., 2001 Ky. App. LEXIS 1311, 2001 WL 1835377*, at *4, * 7 (Ky. Ct. App. 2001) (indirect purchaser who cannot sue under "Kentucky's version of the Sherman Act" also cannot sue under unfair trade practices provision of the Kentucky Consumer Protection Act); *Blake v. Abbott Labs., Inc., 1996 Tenn. App. LEXIS 184, 1996 WL 134947*, at * 5, * 7 (Tenn. Ct. App. 1996) (indirect purchaser can sue under both Tennessee Unfair Trade Practices Act, the state antitrust act, and under the Tennessee Consumer Protection Act). In most of these cases, the court does not find Illinois Brick to be a direct barrier to suit, or, put another way, it does not find that only direct purchasers can sue under the consumer **[***28]** protection act or similar legislation. Illinois Brick is relevant to the outcome only because it may prevent a suit under the state antitrust act.

3. Those Based on a Consumer Protection Act in a State that Does Not Have an Antitrust Act - This category includes this case and one decision from another state. In Blewett v. Abbott Laboratories, the **[**20]** Washington Court of Appeals ruled that an indirect purchaser could not bring an antitrust action under the Washington Consumer Protection Act because of the broad federal harmonization provision - "the courts [shall] be guided by final decisions of the federal courts . . . interpreting the various federal statutes dealing with the same or similar matters." *86 Wn. App. 782, 938 P.2d 842, 845-46 (Wash. Ct. App. 1997)*.

While there is language in many of the decisions that we might otherwise find helpful, in general the decisions give us little guidance because of the critical differences in their statutory schemes. They involve either broad harmonization provisions that require the courts **[*341]** to be guided by federal court decisions interpreting any of the federal antitrust acts, including the Clayton Act that is interpreted in Illinois Brick, or they **[***29]** involve the interrelationship of a specific antitrust act, with a broad harmonization provision, and a more general consumer protection law. None is persuasive authority for the outcome of this case.

In summary, ***HN23***[] we find no reason to treat antitrust cases differently from other VCFA cases and prohibit indirect purchasers from bringing suit under *§ 2461(b)*. Since we have concluded that consumers can generally sue under *§ 2461(b)* even though they are indirect purchasers of a good or service from the defendant, we also hold that they can bring an antitrust case under *§ 2461(b)*. The recent addition to the VCFA of *§ 2465(b)*, explicitly authorizing indirect purchaser antitrust suits, was not a change in the preexisting law.

Reversed and remanded.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN1[] **Settlements, Consent Judgments**

In considering proposed settlements, the court is generally required to assess whether the settlement fairly and reasonably resolves the controversy in a manner consistent with the public interest. Naturally, the agreement reached normally embodies a compromise; in exchange for the saving of cost and elimination of risk, the parties each give up something they might have won had they proceeded with the litigation. The reviewing court is not to substitute its judgment for that of the parties to the decree but to assure itself that the terms of the decree are fair and adequate and are not unlawful, unreasonable, or against public policy. In addition, because approval of a settlement is a judicial act that is committed to the informed discretion of the trial court, the court must satisfy itself that the decree is equitable in any effect it may have upon third parties.

HN2[] Settlements, Antitrust Procedures & Penalties Act

The Antitrust Procedures and Penalties Act (Tunney Act) requires the court to subject any consent decree proposed in any civil proceeding brought by the United States under the antitrust laws to a determination of whether entry of such decree is in the "public interest." *15 U.S.C.S. § 16(b)*, *(e)*.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN3[] Settlements, Antitrust Procedures & Penalties Act

15 U.S.C.S. § 16(e) mandates that, prior to the entry of a proposed consent judgment, the district court must determine that entry of such judgment is in the public interest. *15 U.S.C.S. § 16(e)*. *15 U.S.C.S. § 16(e)* specifically requires the court to make an independent determination as to whether or not entry of a proposed consent decree is in the public interest.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN4[] Settlements, Consent Judgments

The court's role in protecting the public interest is one of ensuring that the government has not breached its duty to the public in consenting to the decree. In making this determination, the court may consider the following: (1) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment; (2) the impact of entry of such judgment upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial. *15 U.S.C.S. § 16(e)*. These considerations are characterized more simply as an inquiry into the purpose, meaning, and efficacy of the decree.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN5[] Settlements, Consent Judgments

The district court should pay particularly close attention to a number of issues in its examination of the decree and corresponding assessment of the public interest. A district judge pondering a proposed consent decree should pay special attention to the decree's clarity, as it is the district judge who must preside over the implementation of the decree. Based on a similar rationale, district courts are expected to pay close attention to the enforcement provisions in a proposed consent decree. Where there exist third-party claims that entry of the proposed decree will cause affirmative harm, the district court should at least pause or "hesitate" in order to consider these claims before reaching a conclusion that the proposed decree is appropriate.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN6[] **Settlements, Consent Judgments**

The court's authority to review the proposed decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place. Accordingly, the court must accord deference to the government's predictions as to the effect of the proposed remedies. In this vein, a proposed decree must be approved even if it falls short of the remedy the court would impose on its own, as long as it falls within the range of acceptability or is within the reaches of public interest.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN7[] **Settlements, Antitrust Procedures & Penalties Act**

A remedies decree in an antitrust case must seek to unfetter a market from anticompetitive conduct, to terminate the illegal monopoly, deny to the defendant the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future. Although this inquiry is usually reserved for cases which are litigated through remedy, consideration of these "objectives," to the extent they are applicable to the facts of the case, remains appropriate where liability has been established in the case. Still, the court's assessment of the remedy's ability to satisfy these objectives is tempered by the deference owed to the government in the Antitrust Procedures and Penalties Act (Tunney Act) context.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN8[] **Settlements, Consent Judgments**

The mere existence of an exclusionary act does not itself justify full feasible relief against the monopolist to create maximum competition. Similarly, because structural relief is designed to eliminate the monopoly altogether, wisdom counsels against adopting radical structural relief in the absence of some measure of confidence that there has been an actual loss to competition that needs to be restored. Instead, the court crafting a remedy must assess the strength of the causation evidence that established liability and "tailor" the relief accordingly.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN9[] Settlements, Consent Judgments

A consent decree need not reflect the court's own choice of a remedy, but instead, giving due respect to the government's view of the effect of the remedial proposal, need only reflect a certain consonance with the liability allegations, or the liability findings.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > Clayton Act > Penalties

HN10[] Settlements, Consent Judgments

The Antitrust Procedures and Penalties Act (Tunney Act), and the case law which follows, dictate that it is for the United States to weigh the benefits of a trade in the first instance, and that, barring a breach of duty in consenting to the decree, the court should respect the government's predictions as to the effect of the proposed remedy.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > Clayton Act > Penalties

HN11[] Settlements, Consent Judgments

It is not contrary to the public interest, as contemplated by the Antitrust Procedures and Penalties Act (Tunney Act), to enter a decree that is not necessary, or that grants relief to which the government might not be strictly entitled. The public does not suffer because the defendant consented to limitations on its activities that could not otherwise be imposed.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > Clayton Act > Penalties

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN12[] Settlements, Antitrust Procedures & Penalties Act

In the context of the Antitrust Procedures and Penalties Act (Tunney Act), just as the court may not second guess the government's choices about what claims to bring in the first place, it should not treat differently those concessions proposed in a consent decree that might have been achieved at trial from those that might not have been achievable.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > Clayton Act > Penalties

HN13[] Settlements, Consent Judgments

In the context of the Antitrust Procedures and Penalties Act (Tunney Act), the risks inherent in litigation are likely to be reflected in some portion of the proposed decree, and these risks are appropriately weighed by the government, rather than the court, in the first instance.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN14[] Settlements, Consent Judgments

Courts considering antitrust remedies are advised to pay special attention to the potential of any remedy to inflict harm upon third parties.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > Clayton Act > Penalties

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN15[] Settlements, Antitrust Procedures & Penalties Act

A court presiding over an Antitrust Procedures and Penalties Act (Tunney Act) proceeding need not conclude that the terms of the consent decree will best serve society, but only that the proposed decree is within the reaches of the public interest.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN16[] Settlements, Consent Judgments

On the subject of licenses and antitrust remedies, courts are best excluded from the administration of intricate and detailed rules relating to business affairs.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Governments > Courts > Judicial Precedent

HN17[] Settlements, Consent Judgments

Precedent instructs the court to pay close attention to provisions that address enforcement of a consent decree.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Ancillary Jurisdiction

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN18[] **Supplemental Jurisdiction, Ancillary Jurisdiction**

District courts enjoy no free-ranging "ancillary" jurisdiction to enforce consent decrees, but are instead constrained by the terms of the decree and related order. The district court's power over a consent decree, reflecting the hybrid between judicial order and contract, is limited to two sources. A district court may interpret and enforce a decree to the extent authorized by the decree itself or by the related order. Additionally, a district court may modify a decree pursuant to *Fed. R. Civ. P. 60(b)(5)*. This latter power is circumscribed by the Rule's requirements that such modification is appropriate if it is no longer equitable that the judgment should have prospective application. *Fed. R. Civ. P. 60(b)(5)*. A significant change in circumstances may warrant revision of a decree, though any such revision must be suitably tailored to the changed circumstances.

Judges: [1]** COLLEEN KOLLAR-KOTELLY, United States District Judge.

Opinion by: COLLEEN KOLLAR-KOTELLY

Opinion

[*204] MEMORANDUM OPINION

Presently pending before the Court is a joint stipulation entered by Defendant Microsoft Corporation and the Plaintiff States of New York, Ohio, Illinois, Kentucky, Louisiana, Maryland, Michigan, North Carolina, and Wisconsin ("Plaintiff Settling States"). The stipulation indicates that these States have joined the settlement between the United States and Microsoft in *United States v. Microsoft Corp., 215 F. Supp. 2d 1* (D.D.C.). In *United* **[*205]** *States v. Microsoft Corp.*, the United States and Microsoft have proposed entry of a consent decree-the Second Revised Proposed Final Judgment ("SRPFJ")--as the final judgment in that case. Pursuant to *Federal Rule of Civil Procedure 54(b)*, the Plaintiff Settling States [1] ask the Court to enter the SRPFJ as a final judgment as to their claims. For the reasons set forth in the Memorandum Opinion issued in *United States v. Microsoft, 231 F. Supp. 2d 144, 2002 U.S. Dist. LEXIS 21097*, No. 98-1232 (D.D.C. Nov. 1, 2002), appended hereto as Appendix A, the Court conditionally approves the SRPFJ as a final judgment as to the claims of the Plaintiff Settling States.

[2]** ***HN1***[] In considering proposed settlements, the Court is generally required to assess whether the settlement fairly and reasonably resolves the controversy in a manner consistent with the public interest. *See Citizens for a Better Env't v. Gorsuch, 231 U.S. App. D.C. 79, 718 F.2d 1117, 1126 (D.C. Cir.1983)*. "Naturally, the

[1] Remaining as Plaintiffs in this case, but not addressed in this Memorandum Opinion, are the States of California, Connecticut, Florida, Iowa, Kansas, Minnesota, Utah, and West Virginia, the Commonwealth of Massachusetts, and the District of Columbia.

agreement reached normally embodies a compromise; in exchange for the saving of cost and elimination of risk, the parties each give up something they might have won had they proceeded with the litigation." *Id. at 1124* (quoting *United States v. Armour & Co., 402 U.S. 673, 681, 29 L. Ed. 2d 256, 91 S. Ct. 1752 (1971))*; *see also* *United States v. Microsoft Corp., 312 U.S. App. D.C. 378, 56 F.3d 1448, 1461 (D.C. Cir. 1995)*. "The reviewing court is not to substitute its judgment for that of the parties to the decree but to assure itself that the terms of the decree are fair and adequate and are not unlawful, unreasonable, or against public policy." *United States v. Hooker Chemicals and Plastics Corp., 540 F. Supp. 1067, 1072 (W.D.N.Y. 1982)*. In addition, because approval of a settlement is a judicial act that is committed to the informed discretion of the trial court, the **[**3]** Court must satisfy itself that the decree is equitable in any effect it may have upon third parties. *Donovan v. Robbins, 752 F.2d 1170, 1176-77 (7th Cir.1985)*; *see also* *Hooker Chemicals and Plastics Corp., 540 F. Supp. at 1072* ("The court must eschew any rubber stamp approval in favor of an independent evaluation, yet, at the same time, it must stop short of the detailed and thorough investigation that it would undertake if it were actually trying the case.") (quoting *City of Detroit v. Grinnell Corp. 495 F.2d 448, 462 (2d Cir. 1974))*.

The standard described above cannot be said to exceed that imposed by the Tunney Act, *15 U.S.C. § 16(b)-(h)*. ***HN2***[] The Tunney Act requires the Court to subject any consent decree proposed in any civil proceeding brought by the United States under the antitrust laws to a determination of whether entry of such decree is in the "public interest." *15 U.S.C. § 16(b)*,*(e)*; *See generally* *Microsoft, 312 U.S. App. D.C. 378, 56 F.3d 1448*. The Court recited the legal history of this case and its former companion case--*United States v. Microsoft Corp.*--in Memorandum Opinions issued **[**4]** in *United States v. Microsoft Corp.* on July 1, 2002, and November 1, 2002. In its November 1, 2002, Opinion in *United States v. Microsoft Corp.*, the Court determined that, save for the provision specifying the Court's reservation of jurisdiction, entry of the SRPFJ as the final judgment in that case is in the public interest. *See* Appendix A; *Microsoft, 231 F. Supp. 2d 144, 2002 U.S. Dist. LEXIS 21097*, *3, No. 98-1232 (D.D.C. Nov. 1, 2002). As the claims of the Plaintiff Settling States are indistinguishable from the claims of the United States, except that the Plaintiff Settling States advanced claims under state law as well as federal law, based upon the detailed analysis set forth in the record of *United States v. Microsoft Corp.*, **[*206]** No. 98-1232, the Court finds that, with the exception of the reservation of jurisdiction, the SRPFJ is fair, reasonable, and in the public interest.

Because the Court has concerns that the reservation of jurisdiction in the proposed decree is insufficient to ensure clear enforcement of its terms by the Court, the Court shall condition its entry of the SRPFJ as the final judgment for the claims of the Plaintiff Settling States pending receipt by the Court of an amendment to that **[**5]** provision. *See* Appendix A; *Microsoft, 231 F. Supp. 2d 144, 2002 U.S. Dist. LEXIS 21097*, *168, 98-1232 (D.D.C. Nov. 1, 2002). The Court suggests that the public interest would be served if Microsoft and the parties to the settlement would agree to amend the proposed final judgment to reserve for the Court, in addition to the powers presently specified in the proposed final judgment, the power *sua sponte* to issue orders or directions for the construction or carrying out of the final judgment, for the enforcement of compliance therewith, and for the punishment of any violation thereof. Such an amendment would not appear to work a fundamental change to the parties' agreement and would ensure that the Court retains the power intended by Plaintiffs and which the Court considers necessary to ensure effective implementation of the final judgment in this case.

Based on the foregoing, the Court conditionally approves the SRPFJ as the final judgment as to the claims of the Plaintiff Settling States in the above-captioned case. The Court will enter final judgment upon receipt of a proposed decree which reflects the amendment described above. Such amendment shall be filed in writing with the Court not later than November 8, 2002. An **[**6]** appropriate Order accompanies this Memorandum Opinion.

November 1, 2002

COLLEEN KOLLAR-KOTELLY

United States District Judge

APPENDIX A

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

UNITED STATES OF AMERICA, Plaintiff, v. MICROSOFT CORPORATION, Defendant.

Civil Action No. 98-1232 (CKK)

MEMORANDUM OPINION

Remaining in this case for the Court's determination is the resolution of a single issue: whether entry of the final judgment proposed by the parties is in the public interest. The Court makes this determination pursuant to the Antitrust Procedures and Penalties Act ("Tunney Act"), *15 U.S.C. § 16(b)-(h)*. In a previous Memorandum Opinion, the Court reviewed the pertinent procedural history and determined that the parties had satisfied the other requirements of the Tunney Act. *See generally* *United States v. Microsoft Corp., 215 F. Supp. 2d 1*, *9 (D.D.C. 2002). Having reviewed the voluminous record in this case and considered the factors enumerated in *15 U.S.C. § 16(e)*, the Court finds that, with the exception of the provisions relating to the retention of the Court's jurisdiction, the **[**7]** proposed consent decree is in the public interest. Accordingly, the Court conditionally approves the proposed consent decree as the final judgment in this case, pending the prompt agreement by the parties to a modification of the Court's retention of its jurisdiction.

I. PROCEDURAL HISTORY

On May 18, 1998, the United States filed a civil complaint alleging that Microsoft had engaged in anticompetitive conduct in violation of *§§ 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*. On that same date, a group of state plaintiffs filed a separate civil complaint alleging similar violations of federal law, as well as violations of the corresponding provisions of their various state laws. Not long after filing, the two cases were consolidated and thereafter, proceeded jointly through discovery and a trial on the merits. On November 5, 1999, Judge Thomas Penfield Jackson entered 412 findings of fact, *United States v. Microsoft Corp., 84 F. Supp. 2d 9 (D.D.C. 1999)* **[*207]** (hereinafter cited as "*Findings of Fact*"), and on April 3, 2000, Judge Jackson entered conclusions of law, finding Microsoft liable for violations of *§§ 1* and *2* of the Sherman Act and the **[**8]** corresponding state law provisions, *United States v. Microsoft Corp., 87 F. Supp. 2d 30 (D.D.C. 2000)*. On June 7, 2000, Judge Jackson entered final judgment in the consolidated cases and imposed a structural remedy of divestiture for Microsoft's violations of the Sherman Act. *United States v. Microsoft Corp., 97 F. Supp. 2d 59 (D.D.C. 2000)*.

Microsoft appealed, and the United States Court of Appeals for the District of Columbia Circuit determined to consider the appeals in the consolidated cases *en banc.* Following extensive briefing and two days of oral argument, the appellate court issued a unanimous *per curiam* opinion affirming in part, reversing in part, vacating the remedy decree in full, and remanding in part for remedy proceedings before a different district court judge. *See* *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34 (D.C. Cir. 2001)* (*en banc*). Following reassignment, on September 28, 2001, this Court ordered that the parties enter into intensive settlement negotiations. *United States v. Microsoft Corp., 2001 U.S. Dist. LEXIS 24272*, Nos. 98-1232 and 98-1233 (D.D.C. Sept. 28,2001) (setting a schedule for settlement discussions). On that **[**9]** same date, the Court entered a schedule for discovery and commencement of evidentiary proceedings, in the event that the cases were not resolved through settlement. *United States v. Microsoft Corp., 2001 U.S. Dist. LEXIS 24272*, Nos. 98-1232 and 981233 (D.D.C. Sept. 28, 2001) (setting discovery guidelines and schedule).

The United States and Microsoft were able to reach a resolution in *United States v. Microsoft Corp.*, No. 98-1232 (D.D.C.), in the form of a proposed consent decree, filed with the Court as the "Revised Proposed Final Judgment" on November 6, 2001. As a result, the Court vacated the discovery schedule with regard to *United States v. Microsoft Corp.* and deconsolidated that case from its companion case, *State of New York, et. al. v. Microsoft Corp.*, No. 98-1233 (D.D.C.). *United States v. Microsoft Corp.*, Nos. 98-1232 and 98-1233 (D.D.C. Nov. 2, 2001) (vacating the Sept. 28, 2001, Scheduling Order with regard to Civil Action No. 98-1232); *United States v. Microsoft Corp., 2002 U.S. Dist. LEXIS 13050*, Nos. 98-1232 and 98-1233 (Feb. 1, 2002) (deconsolidating cases). Rather than proceed to an evidentiary hearing on the issue of remedy along with some of the plaintiffs in *State of New York, et. al. v. Microsoft* **[**10]** *Corp.*, [2] the United States and Microsoft commenced the process of obtaining judicial approval of the proposed consent decree pursuant to the Tunney Act, *15 U.S.C. § 16(b)-(h)*.

The November 6, 2001, filing of the Revised Proposed **[**11]** Final Judgment ("RPFJ") was accompanied by a "Stipulation" entered into by the United States, Microsoft, and the Settling States. The Stipulation provided that the Court could enter the proposed final judgment "at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act, *15 U.S.C. § 16*, **[*208]** and without further notice to any party or other proceedings." Stipulation and Revised Proposed Final Judgment at 1. The United States filed its "competitive impact statement" ("CIS") with the Court on November 15, 2001. Pursuant to *15 U.S.C. § 16(b)*, the United States published the proposed final judgment, along with the CIS, in the Federal Register on November 28, 2001. Revised Proposed Final Judgment and Competitive Impact Statement, *66 Fed. Reg. 59,452* (Nov. 28, 2001). On December 10, 2001, Defendant Microsoft filed with the Court its "description of . . . written or oral communications by or on behalf of [Microsoft] . . . with any officer or employee of the United States concerning or relevant to" the proposed consent decree. Thereafter, Microsoft supplemented this description on March 20, 2002.

The **[**12]** United States received 32,392 comments on the proposed final judgment and provided the full text of these comments to the Court on February 28, 2002. On March 1, 2002, the United States submitted the full text of the public's comments for publication in the Federal Register, and on May 3, 2002, the public comments appeared in the Federal Register pursuant to that submission. United States' Certificate of Compliance at 4; Public Comments, *67 Fed. Reg. 23,654* (Books 2-12)(May 3, 2002) . On May 9, 2002, the United States published in the Federal Register an "addendum containing the correct text of thirteen (13) comments for which either an incomplete or incorrect electronic version had been included in the original submission to the Federal Register." Addendum to Public Comments, *67 Fed. Reg. 31,373* (May 9, 2002); United States Certificate of Compliance at 4. The United States certified compliance with *15 U.S.C. § 16(b)-(d)* on May 9, 2002. On July 1, 2002, this Court confirmed the applicability of the Tunney Act to these proceedings and found that the parties had complied with the Act's requirements such that the matter was ripe for the **[**13]** Court's determination of the public interest. *See United States v. Microsoft Corp., 215 F. Supp. 2d 1 (D.D.C. 2002)*. [3]

II. TUNNEY ACT

A. Tunney Act

Concerned with the appearance of impropriety engendered by the secrecy of consent decree negotiations in antitrust cases, in addition to exposing to "sunlight" the process by which such consent decrees are negotiated, **[**14]** 119 Cong. Rec. at 24599, Congress determined that the judiciary should do more than merely "rubber stamp" proposed consent decrees in antitrust cases, H. Rep. No. 93-1463, at 8 (1974), *reprinted in* 1974 U.S.C.C.A.N. 6535, 6536; S. Rep. No. 93298, at 5 (1973). *See also United States v. Microsoft Corp., 312 U.S.*

---

[2] In the former companion case, *State of New York, et al. v. Microsoft Corp.*, the States of New York, Ohio, Illinois, Kentucky, Louisiana, Maryland, Michigan, North Carolina, and Wisconsin have entered into a conditional settlement with Microsoft as to the issue of remedy. Those Plaintiff States--"Settling States"--are awaiting approval by this Court of the settlement in this case before entry of the settlement in *State of New York, et al v. Microsoft Corp.* pursuant to *Rule 54(b) of the Federal Rules of Civil Procedure*. Because the proposed final judgment addresses the Settling States as well as the United States in its terms, the Court, where appropriate, refers to both the United States and the Settling States as "Plaintiffs" in this Memorandum Opinion.

[3] Pursuant to the stipulation filed with the Court on November 6, 2001, Microsoft began complying with portions of the proposed final judgment on December 16, 2001, as if "it were in full force and effect." Stipulation at 2. On August 28, 2002, the United States submitted a "Notice" to the Court advising "the Court of Microsoft's compliance with various milestones established by the Second Revised Proposed Final Judgment ('SRPFJ')." Notice at 1 (Aug. 28, 2002). In general terms, the Notice indicates that Microsoft is in compliance with its requirements and "takes seriously its obligations under the SRPFJ." *Id. at 7*.

App. D.C. 378, 56 F.3d 1448, 1458 (D.C. Cir. 1995) (quoting legislative history). Accordingly, ***HN3***[] *§ 16(e)* of Title 15 mandates that, prior to the entry of a consent judgment proposed by the United States in an antitrust action, the district court must determine that "entry of such judgment is in the public interest." *15 U.S.C. § 16(e)*. Subsection (e) **[*209]** specifically requires the Court to "make an independent determination as to whether or not entry of a proposed consent decree is in the public interest." S. Rep. 93-298, at 5; *Microsoft, 56 F.3d at 1458* (quoting legislative history).

HN4[] The court's role in protecting the public interest is one of ensuring that the government has not breached its duty to the public in consenting to the decree." *United States v. Bechtel, 648 F.2d 660, 666 (9th Cir. 1981)*. In making this determination, **[**15]** the Court "may consider" the following:

> (1) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment;
>
> (2) the impact of entry of such judgment upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

15 U.S.C. § 16(e). The D.C. Circuit characterized these considerations more simply as an inquiry into the "purpose, meaning, and efficacy of the decree." *Microsoft, 56 F.3d at 1462*.

The D.C. Circuit identified ***HN5***[] a number of issues to which the district court should pay particularly close attention in its examination of the decree and corresponding assessment of the public interest. "A district judge pondering a proposed consent decree . . . should pay special attention to the decree's clarity," as it is the district judge who **[**16]** must "preside over the implementation of the decree." *Id. at 1461-62*. Based on a similar rationale, district courts are expected to "pay close attention" to the enforcement provisions in a proposed consent decree. *Id. at 1462*. Where there exist third-party claims that entry of the proposed decree will cause affirmative harm, the district court should at least pause or "hesitate" in order to consider these claims before reaching a conclusion that the proposed decree is appropriate. *Id.*

Notwithstanding the district court's focused consideration of these and other issues, the Court must recall that ***HN6***[] its "authority to review the [proposed] decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place." *Id. at 1459-60*. Accordingly, the Court must accord deference to the "government's predictions as to the effect of the proposed remedies." *United States v. Thomson Corp., 949 F. Supp. 907, 914 (D.D.C. 1996)* (quoting *Microsoft, 56 F.3d at 1461*); *see also* *United States v. Western Elec. Co., 283 U.S. App. D.C. 299, 900 F.2d 283, 297 (D.C. Cir. 1990)* **[**17]** ("Although we see no doctrinal basis for the district court to defer to the DOJ's interpretation of the decree or its views about ***antitrust law***, it is to be expected that the district court would seriously consider the Department's economic analysis and predictions of market behavior."). In this vein, "a proposed decree must be approved even if it falls short of the remedy the court would impose on its own, as long as it falls within the range of acceptability or is within the reaches of public interest." *United States v. AT&T, 552 F. Supp. 131, 151 (D.D.C. 1982)* (quotation marks omitted), *aff'd without opinion sub nom.* *Maryland v. United States, 460 U.S. 1001, 75 L. Ed. 2d 472, 103 S. Ct. 1240 (1983)*; *accord* *Microsoft, 56 F.3d at 1460*; *Bechtel, 648 F.2d at 666*.

Having so identified the general standard in Tunney Act cases, this Court must inquire as to whether that standard applies equally and without modification in this **[*210]** case. The instant case is more complicated than the usual case in that it contradicts the rule that "because it is a settlement [and] there are no findings that the defendant has actually engaged in illegal practices . . . it is **[**18]** therefore inappropriate for the [district court] judge to measure the remedies in the decree as if they were fashioned after trial." *Microsoft, 56 F.3d at 1460-61* (emphasis omitted). In this case there has been a trial, and there have been findings of liability on numerous grounds. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. Therefore, it seems entirely appropriate to "measure the remedies" based upon the post-trial liability findings in this case. *Microsoft, 56 F.3d at 1461*. Accordingly, the findings of liability provide an essential foundation to this Court's analysis, as a "discrepancy between the remedy and undisputed facts of antitrust violations could be such as to render the decree 'a mockery of judicial power.'" Mass. School of Law at Andover, Inc. v. United States, 326 U.S. App. D.C. 175, 118 F.3d 776, 782 (D.C. Cir. 1997) (quoting Microsoft, 56 F.3d at 1462); *accord* Thomson, 949 F. Supp. at 913 ("The court is to compare the complaint filed by the government with the proposed consent decree and determine whether the remedies negotiated between the parties and proposed by the Justice Department clearly and effectively **[**19]** address the anticompetitive harms initially identified.").

While this is not to say that the circumstances of this case call for a review of the proposed decree in the absence of deference, the Court cannot simply proceed as if this were a case based upon untested allegations. In the usual case "remedies which appear less than vigorous may well reflect an underlying weakness in the government's case." Microsoft, 56 F.3d at 1460-61. Yet in this case, many, though certainly not all, of the strengths and weaknesses of the government's case have already been exposed. In this regard, the Court cannot overlook the fact that the appellate court sustained liability against Microsoft for violation of § 2 of the Sherman Act. Microsoft, 253 F.3d 59-78. Therefore, without applying a wholly distinct standard, this Court must remain ever-mindful of the posture of this case when assessing the proposed consent decree for determination of the public interest.

Given the liability findings, part of the public interest analysis will require consideration of the extent to which the proposed consent decree "meets the requirements for an antitrust remedy." AT&T, 552 F. Supp. at 153. **[**20]** ***HN7***[] "[A] remedies decree in an antitrust case must seek to 'unfetter a market from anticompetitive conduct,' *Ford Motor Co.* [*v.* United States], 405 U.S. 562, 577 31 L. Ed. 2d 492, 92 S. Ct. 1142 [1972], . . . to 'terminate the illegal monopoly, [4] deny to the defendant **[*211]** the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future,' [United States v. United Shoe Machinery Corp., 391 U.S. 244, 250, 20 L. Ed. 2d 562, 88 S. Ct. 1496]." Microsoft, 253 F.3d at 103. Although this inquiry is usually reserved for cases which are litigated through remedy, such as State of New York, et al. v. Microsoft Corp., 2001 U.S. Dist. LEXIS 24272, No. 98-1233 (D.D.C.), consideration of these "objectives," to the extent they are applicable to the facts of this case, remains appropriate because liability has been established in this case. Still, the Court's assessment of the remedy's ability to satisfy these objectives is tempered by the deference owed to the government in the Tunney Act context. *See generally* Microsoft, 312 U.S. App. D.C. 378, 56 F.3d 1448.

[21]** Applying these principles to the instant case, because the district court has rendered findings of fact and liability which have been reviewed on appeal, the Court examines, in general terms, the correspondence between the liability findings and the conduct restrictions in the proposed consent decree. In conjunction with this inquiry, the Court is particularly attentive to the clarity of the proposed decree's provisions, the enforcement mechanisms, and to claims that harm will result from the implementation of the proposed decree. Microsoft, 56 F.3d at 1461-62.

III. DISCUSSION

A. Court of Appeals Opinion

---

[4] The Court notes that the objective of "terminating the illegal monopoly," United States v. United Shoe Mach. Corp., 391 U.S. 244, 250, 20 L. Ed. 2d 562, 88 S. Ct. 1496 (1968), is incompatible with the facts of this case. Neither the district court, nor the appellate court concluded that Microsoft had unlawfully obtained its monopoly. *See* Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34; Microsoft, 87 F. Supp. 2d 30; *see also* Microsoft, 56 F.3d at 1452 (observing in the precursor to this case that "the government did not allege and does not contend--and this is of crucial significance to this case--that Microsoft *obtained* its alleged monopoly position in violation of the antitrust laws") (emphasis in original). Moreover, as noted by the appellate court, "the District Court expressly did not adopt the position that Microsoft would have lost its position in the OS market but for its anticompetitive behavior." Microsoft, 253 F.3d at 107 (citing *Findings of Fact* P 411). In this context, outright termination of the monopoly is a questionable remedial goal, as such action would exceed the limits of the controversy presented to the Court. Accordingly, the Court's inquiry into the extent to which the proposed consent decree "terminates the illegal monopoly," United Shoe, 391 U.S. at 250, will be limited, and the Court will instead focus upon terminating the illegal *maintenance* of the monopoly.

In most cases, judicial analysis of the public interest in a Tunney Act proceeding commences, quite logically, with an examination of the allegations laid out in the complaint. *See, e.g.,* *Thomson, 949 F. Supp. at 909-11* (describing complaint). Indeed, the district court is without authority to "reach beyond the complaint to evaluate claims that the government did *not* make and to inquire as to why they were not made." *Microsoft, 56 F.3d at 1459*. In light of the procedural posture of this case, however, the **[**22]** complaint in this case is of little moment, as proceedings have far surpassed the allegations stage. Instead, the opinion of the appellate court provides the underpinning for this Court's analysis of the proposed decree. As a result, the Court pauses to summarize and recount the pertinent portions of the appellate opinion in this case. Where appropriate, a more detailed examination of the appellate court's opinion appears in the context of the Court's discussion of the specific provisions of the proposed final judgment.

1. Market Definition

The appellate court began its opinion by examining Plaintiffs' [5] *§ 2* Sherman Act claims and specifically, whether the district judge had identified the proper market for purposes of assessing Microsoft's monopoly power. The appellate court concluded that the district court had properly defined the relevant market as "the licensing of all Intel-compatible PC [6] operating systems [7] **[*212]** worldwide." *Microsoft, 253 F.3d at 52* (quoting *Microsoft, 87 F. Supp. 2d at 36*). Having agreed with the district court's definition of the relevant market, the appellate court adopted the district court's determination that **[**23]** "circumstantial evidence proves that Microsoft possesses monopoly power." *Id. at 56*. The appellate court further noted that "if we were to require direct proof [of monopoly power], . . . Microsoft's behavior may well be sufficient to show the existence of monopoly power." *Id. at 57*.

[24]** ***2. Theory of Liability***

Integral to the appellate court's adoption of the market definition was its simultaneous acceptance of Plaintiffs' theory of Microsoft's market dominance. Both the district and appellate courts noted that Microsoft's lawfully acquired monopoly is naturally protected by a "structural barrier," known as the "applications barrier to entry." *Id. at 55*. "That barrier . . . stems from two characteristics of the software market: (1) most consumers prefer operating systems for which a large number of applications have already been written; and (2) most developers prefer to write for operating systems that already have a substantial consumer base." *Id.* (citing *Findings of Fact* PP 30, 36). This barrier creates a "chicken-and-egg" or network effects situation, which perpetuates Microsoft's operating system dominance because "applications will continue to be written for the already dominant Windows, [8] which in turn

[5] In referring to "Plaintiffs" throughout this Memorandum Opinion, the Court refers to the United States, as well as the Plaintiff States in Civ. No. 98-1233, who entered into a settlement agreement with Microsoft. *See supra* note 1. The Court notes, however, that the appellate court's opinion applies not only to the claims brought by the United States and the Settling States, but also to those states who have C in *State of New York, et al. v. Microsoft*, No. 98-1233 (D.D.C.).

[6] "PC" is short for "personal computer." *Findings of Fact* P 1.

[7] The appellate court, relying upon the factual testimony presented to the district court, explained the functions of a PC operating system:

> Operating systems perform many functions, including allocating computer memory and controlling peripherals such as printers and keyboards. Operating systems also function as platforms for software applications. They do this by "exposing"--i.e., making available to software developers--routines or protocols that perform certain widely-used functions. These are known as Application Programming Interfaces, or "APIs." For example, Windows contains an API that enables users to draw a box on the screen. Software developers wishing to include that function in an application need not duplicate it in their own code. Instead, they can "call"--*i.e.*, use--the Windows API. Windows contains thousands of APIs, controlling everything from data storage to font display.

Microsoft, 253 F.3d at 53 (citations omitted).

[8] "In 1985, Microsoft began shipping a software package [for the PC] called Windows. The product included a graphical user interface, which enabled users to perform tasks by selecting icons and words on the screen using a mouse." *Findings of Fact* P

ensures that consumers will continue to prefer it over other operating systems." *Id.* Because "every operating system has different APIs," [9] applications written for one operating system will not function on another operating **[**25]** system unless the developer undertakes the "time consuming and expensive" process of transferring and adapting, known in the industry as "porting," the application to the alternative operating system. *Id. at 53*.

[26]** Plaintiffs proceeded under the theory that certain kinds of software products, termed "middleware," [10] could reduce the **[*213]** "self-reinforcing cycle," *Findings of Fact* P 39, by serving as a platform for applications, taking over some of the platform functions provided by Windows and thereby "weakening the applications barrier to entry," *id. P 68*. One of middleware's defining characteristics as a software product is its ability to "expose its own APIs." *Findings of Fact* P 28. Eventually, reasoned Plaintiffs, if applications were written to rely on the middleware API set, rather than the Windows API set, the applications could be made to run on alternative operating systems simply by porting the middleware. Ultimately, by writing to the middleware API set, applications developers could write applications which would run on any operating system on which the middleware was preset. Plaintiffs focused their attention primarily upon two such middleware threats to Microsoft's operating system dominance--Netscape Navigator [11] and the Java technologies. *Microsoft, 253 F.3d at 53*. The district and appellate courts accepted Plaintiffs' theory of competition despite the **[**27]** fact that "neither Navigator, Java, nor any other middleware product could [at that time], or would soon, expose enough APIs to serve as a platform for popular applications." *Id.*; *Findings of Fact* PP 28-29.

3. Four-Part Test for Liability

Having concluded that the district court properly identified the relevant market as the market for Intel-compatible PC operating systems and properly excluded middleware products from that market, the **[**28]** appellate court turned its attention to the issue of whether Microsoft responded to the threat posed by middleware in violation of *§ 2* of the Sherman Act. Specifically, the appellate court set out to determine whether Microsoft "maintained, or attempted to . . . maintain, a monopoly by engaging in exclusionary conduct." *Microsoft, 253 F.3d at 58*. The appellate court recounted that the district court answered that inquiry in the affirmative, finding Microsoft liable for violating *§ 2* of the Sherman Act:

> by engaging in a variety of exclusionary acts . . . specifically . . .: (1) the way in which it integrated [Internet Explorer] into Windows; (2) its various dealings with Original Equipment Manufacturers ("OEMs"), Internet Access Providers ("IAPs"), Internet Content Providers ("ICPs"), Independent Software Vendors (ISVs), and Apple Computer; (3) its efforts to contain and to subvert Java technologies; and (4) its course of conduct as a whole.

Id. In order to review the district court's findings on this point, the appellate court outlined a four-part test for determining whether particular conduct can be said to violate ***antitrust law***. "First, to **[**29]** be condemned as

---

7. In 1995, Microsoft introduced an updated version of its Windows software known as "Windows 95." *Id. P 8*. Similarly, in 1998, Microsoft released "Windows 98." *Id.* Since that time, Microsoft has continued to update, revise, and re-create its "Windows" PC operating system.

[9] "APIs" are applications programming interfaces. As Judge Jackson explained: [An] operating system supports the functions of applications by exposing interfaces, called "application programming interfaces," or "APIs." These are synapses at which the developer of an application can connect to invoke pre-fabricated blocks of code in the operating system. These blocks of code in turn perform crucial tasks, such as displaying text on the computer screen.

Findings of Fact P 2.

[10] Such software takes the name "middleware" because "it relies on the interfaces provided by the underlying operating system while simultaneously exposing its own APIs to developers" and, therefore, is said to reside in the middle. *Findings of Fact*P 28.

[11] "Although certain Web browsers provided graphical user interfaces as far back as 1993, the first widely-popular graphical browser distributed for profit, called Navigator, was brought to market by the Netscape Communications Corporation ('Netscape') in December 1994." *Findings of Fact* P 17.

exclusionary, a monopolist's act must have an 'anticompetitive effect.' That is, it must harm the competitive *process* and thereby harm consumers." *Id. at 58* (emphasis in original). Second, the plaintiff must "demonstrate that the monopolist's conduct harmed competition, not just a competitor." *Id. at 59*. Third, "the monopolist may proffer a 'procompetitive justification' for its conduct." *Id.* (quoting *Eastman Kodak Co. v. Image Technical Servs. Inc., 504 U.S. 451, 483, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*). If this justification stands unrebutted by the plaintiff, the monopolist may escape liability. **[*214]** Therefore, the fourth prong of the inquiry requires that the plaintiff "demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit." *Id.* The appellate court stressed that, although evidence of intent is relevant "to understand the likely effect of the monopolist's conduct," when assessing the balance between the anticompetitive harm and the procompetitive effect, the trial court should focus on the "effect of [the exclusionary] conduct, not the intent behind it." *Id.*

Using this framework, the appellate **[**30]** court addressed Microsoft's challenge to each of the findings by the district court. The appellate court examined the district court's four basic areas of findings with regard to § 2 liability in an order different from that of the district court. The Court presents these holdings, in the order addressed by the appellate court.

4. Original Equipment Manufacturer "OEM") Licenses

Commencing its analysis with the "licenses issued to original equipment manufacturers," [12] *id.* 253 F.3d at 59, the appellate court focused upon three license provisions "prohibiting the OEMs from: removing any desktop icons, folders, or 'Start' menu entries; (2) altering the initial boot sequence; and (3) otherwise altering the appearance of the Windows desktop," *id.* 253 F.3d at 61 (citing *Findings of Fact* P 213). Into the category of "otherwise altering the appearance of the Windows desktop," the appellate court subsumed the automatic launch of an alternative user interface, the prohibition against the addition of icons and folders different in size and shape from those used by Microsoft, and the prohibition on the use of the "Active Desktop" feature [13] to display third-party brands. *Id. 253 F.3d at 62*; **[**31]** *see also Findings of Fact* P 213. Of these license provisions, the appellate court concluded that, "with the exception of the one restriction prohibiting automatically launched alternative interfaces, all of the OEM license restrictions at issue represent uses of Microsoft's market power to protect its monopoly, unredeemed by any legitimate justification." *Id. 253 F.3d at 64*. In commencing its next area of analysis, the appellate court noted with regard to the license restrictions imposed upon OEMs that they "have a significant effect in closing rival browsers out of one of the two primary channels of distribution." *Id.*

5. Integration of Internet Explorer ("IE") and* [**32] *Windows

The appellate court next turned its attention toward the "integration of [Internet Explorer ("IE")] [14] and Windows." *Id.* At the outset of its analysis, the appellate court took a narrow view of the district court's determination, noting that the district court's "broad[]" condemnation of "Microsoft's decision to bind 'Internet Explorer to Windows with . . . technological shackles'" is supported by only three specific actions taken by Microsoft. *Id.* (quoting *Microsoft, 87 F. Supp. 2d at 39*). The appellate court identified these three as (1) "excluding IE from the 'Add/Remove Programs' utility"; (2) "designing Windows so as in certain circumstances to override the user's choice of a default browser other than IE"; and (3) "commingling **[*215]** code related to browsing and other code in the same files, so that any attempt to delete the files containing IE would, at the same time, cripple the operating system." *Id. 253 F.3d at 64-65*. Pursuant to its four part test for liability, the appellate court concluded that Microsoft could be held liable for the first and the third of these actions. *Id. 253 F.3d at 65-67*. As to the second of these **[**33]** actions, the override of the user's choice of default in certain circumstances, the court determined that Microsoft had proffered a procompetitive justification that went unrebutted by Plaintiffs, namely that the override was the result of "valid

---

[12] Manufacturers of PCs are known as "original equipment manufacturers" or "OEMs." *Findings of Fact* P 10.

[13] "The Active Desktop was a Microsoft feature that, if enabled, allowed the Windows user to position Web pages as open windows that appear on the background, or 'wallpaper' of the Windows desktop." *Findings of Fact* P 314.

[14] Internet Explorer is Microsoft's Web browser. *Findings of Fact* P 17.

technical reasons" which justified the override in a "few out of the nearly 30 means of accessing the Internet." *Id. 253 F.3d at 67* (quotation marks omitted). Finding that Plaintiffs had neither rebutted Microsoft's procompetitive justification, nor demonstrated that the anticompetitive effect of the challenged act outweighed such justification, the appellate court held that "Microsoft may not be held liable for this aspect of its product design." *Id.*

6. Agreements with Internet Access Providers ("IAPs")

Directing its attention to Microsoft's "agreements with various IAPs," [15] which the district court "condemned" as exclusionary, the appellate court identified five Microsoft **[**34]** actions specifically relied upon by the district court for this condemnation:

> (1) offering IE free of charge to IAPs[;] . . . (2) offering IAPs a bounty for each customer the IAP signs up for service using the IE browser[;] . . . (3) developing the IE Access Kit ("IEAK"), a software package that allows an IAP to "create a distinctive identity for its service in as little as a few hours by customizing the [IE] title bar, icon, start and search pages," *Findings of Fact* P 249[;] . . . (4) offering the IEAK to IAPs free of charge, on the ground that those acts, too, helped Microsoft preserve its monopoly[,] [*Microsoft, 87 F. Supp. 2d] 30, 41-42*[;] . . . (5) agreeing to provide easy access to IAPs' services from the Windows desktop in return for the IAPs' agreement to promote IE exclusively and to keep shipments of internet access software using Navigator under a specific percentage, typically 25%. *See* [*Microsoft, 87 F. Supp. 2d] 30, 42* (citing *Findings of Fact* PP 258, 262, 289).

Id. 253 F.3d at 67-68. Grouping the first four of these actions together as "Microsoft's inducements," the appellate court held that these four actions **[**35]** merely "offered a consumer an attractive deal" and, therefore, could not be treated as anticompetitive. *Id. 253 F.3d at 68*. In contrast, the appellate court agreed with the district court that Microsoft's exclusive contracts with IAP's "are exclusionary devices, in violation of *§ 2* of the Sherman Act." *Id. 253 F.3d at 71*.

7. Agreements with Internet Content Providers ("ICPs"), Independent Software Vendors ("ISVs"), and Apple

The appellate court next considered Microsoft's "dealings with ICPs, which develop websites; ISVs, which develop software; and Apple, which is both an OEM and a software developer." *Id. 253 F.3d at 71*. The "deals" at issue in this portion of the case are grants of "free licenses to bundle IE with [the ICPs' and ISVs'] offerings" and the exchange **[**36]** of "other valuable inducements for [ICPs' and ISVs'] agreement to distribute, promote, and rely on IE rather than Navigator." *Id.* (quoting *Microsoft,* ***[*216]*** *87 F. Supp. 2d at 42-43*) (brackets and quotation marks omitted). The district court held these agreements to be anticompetitive in violation of *§ 2* of the Sherman Act because they had the effect of "directly inducing developers to focus on [Microsoft's] own APIs rather than ones exposed by Navigator." *Id.* (quoting *Microsoft, 87 F. Supp. 2d at 42-43*) (quotation marks omitted).

At the outset of its analysis in this context, the appellate court concluded bluntly that "with respect to [Microsoft's] deals with ICPs, the District Court's findings do not support liability." *Id.* In contrast, the appellate court sustained the district court's finding of liability with regard to Microsoft's agreements with ISVs because Plaintiffs made "a *prima facie* showing that the deals have an anticompetitive effect," and Defendant did not successfully rebut this showing. *Id. 253 F.3d at 72*. In particular, the appellate court found that the exclusive provisions in these so-called "First Wave Agreements" **[**37]** with ISVs foreclosed a substantial share of the market for Navigator. *Id.*

Turning its attention in this context finally to Microsoft's relationship with Apple, the appellate court concluded that Microsoft's agreement with Apple was exclusionary in violation of *§ 2* of the Sherman Act. *Id. 253 F.3d at 72-74*. The appellate court recounted that in mid-1997, Microsoft and Apple entered into an agreement which obligated Microsoft to continue to release "up-to-date " versions of its office productivity software for Apple's systems, Mac Office. *Id. 253 F.3d at 73* (quoting *Findings of Fact* PP 350-52). The agreement further obligated Apple to make IE

[15] "PCs typically connect to the Internet through the services of Internet access providers ('IAPs'), which generally charge subscription fees to their customers in the United States." *Findings of Fact* P 15.

the default browser. *Id*. (quoting *Findings of Fact* PP 350-52). Pursuant to this same agreement, Apple promised not to install Navigator during the "default installation," and not to "position icons for non[-]Microsoft browsing software on the desktop of new Macintosh PC systems or Mac OS upgrades." *Id.* (quoting *Findings of Fact* PP 350-52). Similarly, the agreement prohibited Apple "from encouraging users to substitute another browser for IE, and stated that Apple [would] 'encourage its employees to use **[**38]** IE.'" *Id.* (quoting *Findings of Fact* P 352) (brackets omitted). The appellate court concluded that "this exclusive deal between Microsoft and Apple had a substantial effect upon the distribution of rival browsers." *Id.* Given the absence of a "procompetitive justification for the exclusive dealing arrangement," the appellate court affirmed the district court's finding of *§ 2* liability based upon Microsoft's exclusive deal with Apple. *Id. 253 F.3d at 74*.

8. Java

The appellate court grouped the next category of Microsoft conduct under the heading "Java" in reference to "a set of technologies developed by Sun Microsystems" ("Sun"). *Id.* The Java technologies are described as "another type of middleware posing a potential threat to Windows' position as the ubiquitous platform for software development." *Id.* (citing *Findings of Fact* P 28). The appellate opinion recounts that the district court identified four steps taken by Microsoft to "exclude Java from developing as a viable cross-platform threat: (a) designing a [Java Virtual Machine ("JVM") [16]] incompatible **[*217]** with the one developed by Sun; (b) entering into contracts, the so called 'First **[**39]** Wave Agreements,' requiring major ISVs to promote Microsoft's JVM exclusively; (c) deceiving Java developers about the Windows-specific nature of the tools it distributed to them; and (d) coercing Intel to stop aiding Sun in improving the Java technologies." *Id.* Of these actions, the appellate court concluded that all but the first action were anticompetitive in violation of *§ 2*. *Id. 253 F.3d at 74-78*. With regard to the first enumerated action, the incompatible JVM, the appellate court held that because the incompatible JVM did not have an anticompetitive effect which outweighed the procompetitive justification for the design, it could not provide a basis for antitrust liability. *Id. 253 F.3d at 75*.

[40]** Specifically, with regard to the First Wave Agreements, the appellate court observed that the district court had found the agreements, "although not literally exclusive . . . were exclusive in practice." *Id. at 75*. Although the district court did not enter precise findings as to the effect of the First Wave Agreements upon rival Java distribution, the appellate court determined that "the record indicates that Microsoft's deals with the major ISVs had a significant effect upon JVM promotion." *Id.* In the absence of procompetitive justification, the appellate court imposed liability for this aspect of the First Wave Agreements. *Id. at 76*.

As to the Java developer tools, the appellate court's imposition of liability focused not upon the fact that the tools created programs which were not cross platform, but upon the fact that Microsoft deceived software developers about the Windows-specific nature of the tools. *Id. at 76-77*. The appellate court found that Microsoft's deception was intentional and without procompetitive explanation. *Id. at 77*. As a result, the appellate court imposed liability for Microsoft's deception. **[**41]** *Id.*

9. Intel

As noted above, the appellate court's final imposition of liability arose out of a "threat" by Microsoft directed at Intel. *Id. at 77*. "Intel is [a firm] engaged principally in the design and manufacture of microprocessors." *Findings of Fact* P 95. A segment of Intel's business develops software, with the primary focus upon "finding useful ways to consume more microprocessor cycles, thereby stimulating demand for advanced Intel microprocessors." *Id.* The appellate court recounted that in 1995, Intel was in the process of "developing a high performance, Windows-compatible

[16] "The Java technologies include: (1) a programming language; (2) a set of programs written in that language, called the 'Java class libraries,' which expose APIs; (3) a compiler, which translates code written by a developer into 'bytecode'; and (4) a Java Virtual Machine ('JVM'), which translates bytecode into instructions to the operating system. [*Findings of Fact*] P 73. Programs calling upon the Java APIs will run on any machine with a 'Java runtime environment,' ['JRE'] that is, Java class libraries and a JVM. ***Id. PP 73, 74***." *Microsoft, 253 F.3d at 74*. The terms "JRE" and "JVM" are sometimes used interchangeably to refer to the Java platform. The court uses the term JVM throughout this Memorandum Opinion for that purpose.

JVM." *Microsoft, 253 F.3d at 77*. Furthering its efforts to combat the cross-platform threat of Java to the Windows platform, Microsoft repeatedly "urged Intel not to help Sun by distributing Intel's fast, Sun compliant JVM." *Id.* Eventually, Microsoft "threatened Intel that if it did not stop aiding Sun . . . then Microsoft would refuse to distribute Intel technologies bundled with Windows." *Id.* Intel capitulated after Microsoft threatened to support an Intel competitor, AMD, if Intel's efforts with Java continued. *Id.*

The appellate **[**42]** court acknowledged Microsoft's anticompetitive intent, as well as the anticompetitive effect of Microsoft's actions toward Intel. *Id.* Microsoft did not offer a procompetitive justification for its treatment of Intel, but "lamely characterized its threat to Intel as 'advice.'" *Id.* Rejecting the characterization of Microsoft's threat as mere "advice," the appellate court found the district court's imposition of liability to be supported by both **[*218]** fact and law. *Id. at 77-78*. On this basis, the appellate court imposed *§ 2* liability for Microsoft's threat to Intel.

Corresponding to the above-described imposition of liability pursuant to *§ 2* of the Sherman Act, the appellate court imposed liability upon Microsoft for violations of the relevant state law counterparts of the Sherman Act. *Id.* at 46. Beyond these findings, the appellate court did not find Microsoft liable for any additional antitrust violations. Specifically, the appellate court reversed the district court's conclusion that Microsoft's "course of conduct" as a whole constitutes a separate violation of *§ 2*. *Id. at 78*. In addition, the appellate court rejected the **[**43]** district court's finding of attempted monopolization and remanded the *§ 1* tying claim for further proceedings at the district court level. [17] Plaintiffs opted not to pursue the tying claim on remand. [18] Joint Status Report (Sept. 20, 2001) at 2.

10. Vacating the District Court's Order of Remedy

Following its **[**44]** review of the district court's conclusions with regard to liability, the appellate court considered the district court's choice of remedy. Over the objection of Defendant Microsoft, the district court decided to consider the merits of Plaintiffs' remedy proposal in the absence of an evidentiary hearing. *Microsoft, 253 F.3d at 98-99*; *see also Microsoft, 97 F. Supp. 2d at 61*. The district court did so based on the rationale that Microsoft's evidentiary proffers largely concerned "testimonial predictions about future events" which would be of little use to the court in identifying an "optimum remedy." *Microsoft, 253 F.3d at 99* (quoting *Microsoft, 97 F. Supp. 2d at 62*). Based upon its finding of liability for illegal monopoly maintenance, attempted monopolization, and illegal tying, the district court entered a remedy "nearly identical to plaintiffs' proposal" mandating the divestiture of Microsoft Corporation into an "Operating Systems Business" and an "Applications Business." *Id. 253 F.3d at 99-100* (quoting *Microsoft, 97 F. Supp. 2d at 64*). The original decree entered by the district court, often **[**45]** referred to as the Initial Final Judgment ("IFJ"), also included a number of "interim restrictions on Microsoft's conduct." *Id. 253 F.3d at 100*. The interim restrictions included, *inter alia*, mandatory disclosure "to third-party developers the APIs and other technical information necessary to ensure that software effectively interoperates with Windows," *id.* (describing IFJ § 3.b), a prohibition on Microsoft's ability to enter into contracts which oblige third parties to limit their "'development, production, distribution, promotion, or use of, or payment for' non-Microsoft platform level software," *id.* (quoting IFJ § 3.e), and a "'Restriction on Binding Middleware Products to Operating System Products' unless Microsoft also offers consumers 'an otherwise identical version' of the operating system without the middleware," *id.* (quoting IFJ § 3.g).

[*219] The appellate court found three fundamental flaws in the district court's order of remedy, each of which alone justified vacating the remedial decree. The appellate court first concluded that the failure to hold an evidentiary hearing in the face of disputed facts concerning the remedy violated the "cardinal principle **[**46]** of our

---

[17] Plaintiffs' complaint also included a separate claim of "monopoly leveraging" under *§ 2* of the Sherman Act. Judge Jackson granted summary judgment in favor of Microsoft as to this claim on the grounds that the theory runs "contrary to both economic theory and the Sherman Act's plain language." *United States v. Microsoft, 1998 U.S. Dist. LEXIS 14231, 1998 WL 614485*, at * 27 (D.D.C. Sept. 14, 1998).

[18] Plaintiffs' tying claim alleged that "Microsoft's contractual and technological bundling of the IE Web browser (the 'tied' product) with its Windows operating system ('OS') (the 'tying' product) resulted in a tying arrangement that was per se unlawful." *Microsoft, 253 F.3d at 84*.

system of justice that factual disputes must be heard in an open court and resolved through trial-like evidentiary proceedings." *Id. 253 F.3d at 101*. The appellate court rejected the district court's conclusion that evidentiary proceedings would not be useful, noting that "a prediction about future events is not, as a prediction, any less a factual issue." *Id. 253 F.3d at 102*. Moreover, noted the appellate court, "drafting an antitrust decree by necessity 'involves predictions and assumption concerning future economic and business events.'" *Id.* (quoting *Ford Motor Co.*, 405 U.S. at 578).

In addition to the failure to hold an evidentiary hearing, the appellate court faulted the district court for its "failure to provide an adequate explanation for the relief it ordered." *Id. 253 F.3d at 103*. Finding the trial court's devotion of "a mere four paragraphs of its order to explaining its reasons for the remedy" insufficient, the appellate court observed that the initial remedy was not accompanied by an explanation of the manner in which the remedy would accomplish the objectives of a remedial decree in an antitrust case. *Id.* In this regard, the **[**47]** appellate court recited that "a remedies decree in an antitrust case must seek to 'unfetter a market from anticompetitive conduct,' *Ford Motor Co.*, 405 U.S. at 577, to 'terminate the illegal monopoly, deny to the defendant the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future,' [*United Shoe, 391 U.S. at 250*]." *Id.* (internal citations in original).

Lastly, the appellate court concluded that the substantial modifications to the liability imposed by the district court merited a new determination of the remedy for the surviving antitrust violations. In particular, the appellate court noted that of the three original findings of liability, only liability for illegal monopoly maintenance in violation of *§ 2* of the Sherman Act had survived, and even this aspect of liability had been modified. *Id. 253 F.3d at 103-04*. The appellate court determined that where "sweeping equitable relief is employed to remedy multiple violations, and some--indeed most--of the findings of remediable violations do not withstand scrutiny" the remedy decree must be vacated because there no longer exists **[**48]** a rational connection between the liability imposed and the remedy ascribed thereto. *Id. 253 F.3d at 105*. Accordingly, the appellate court remanded the case for this Court to resolve any factual disputes surrounding a remedy and for this Court to exercise its "broad discretion" in imposing the "relief it calculates will best remedy the conduct . . . found to be unlawful." *Id.*

11. Causation and Remedy

In its appeal, Microsoft "urged" the circuit court to "reverse on the monopoly maintenance claim, because Plaintiffs never established a causal link between Microsoft's anticompetitive conduct, in particular its foreclosure of Netscape's and Java's distribution channels, and the maintenance of Microsoft's operating system monopoly." *Id. 253 F.3d at 78*. Relying heavily on the treatise on ***antitrust law*** authored by Phillip E. Areeda and Herbert Hovenkamp, the appellate court determined that liability in this case could be established through an "inference" of causation. *Id. 253 F.3d at 79* (citing 3 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** P 651c, at 78 **[*220]** (1996)). Applying this "rather edentulous test for causation" the appellate court identified two relevant inquiries, the satisfaction **[**49]** of which would result in liability:

> (1) whether as a general matter the exclusion of nascent threats is the type of conduct that is reasonably capable of contributing significantly to a defendant's continued monopoly power and (2) whether Java and Navigator reasonably constituted nascent threats at the time Microsoft engaged in the anticompetitive conduct at issue.

Id. On the record from the district court, the appellate court readily concluded that both inquiries had been satisfied and that liability must be imposed. *Id.*

The appellate court noted, however, that "Microsoft's concerns over causation have more purchase in connection with the appropriate remedy issue, *i.e.*, whether the court should impose a structural remedy or merely enjoin the offensive conduct at issue." *Id. 253 F.3d at 80*. Again relying upon Areeda and Hovenkamp, the appellate court focused upon the structural remedy that had been imposed by Judge Jackson and identified a relationship between the evidence of causation and the imposition of "radical structural relief":

> As we point out later in this opinion, divestiture is a remedy that is imposed only with great caution, in part because **[**50]** its long-term efficacy is rarely certain. Absent some measure of confidence that there has been

> an actual loss to competition that needs to be restored, wisdom counsels against adopting radical structural relief. *See* 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 653b, at 91-92 ("More extensive equitable relief, particularly remedies such as divestiture designed to eliminate the monopoly altogether, raise more serious questions and require a clearer indication of a significant causal connection between the conduct and creation or maintenance of the market power.").

Id. (internal citation omitted). Later in the opinion, the appellate court again quoted from Areeda and Hovenkamp, highlighting the need for "a clearer indication of a *significant causal connection* between the conduct and creation or maintenance of the market power" where the remedy is structural relief. *Id. 253 F.3d at 106* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 653b, at 9192) (emphasis added by appellate court). The appellate court instructed that in the absence of "a sufficient causal connection between Microsoft's anticompetitive conduct and its dominant position in the OS market . . . the antitrust defendant's **[**51]** unlawful behavior should be remedied by 'an injunction against the continuation of that conduct.'" *Id.* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 650a, at 67).

In effect, the appellate court appears to have identified a proportionality between the severity of the remedy and the strength of the evidence of the causal connection. Accordingly, ***HN8***[] the "mere existence of an exclusionary act does not itself justify full feasible relief against the monopolist to create maximum competition." *Id.* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 650a, at 67). Similarly, because structural relief is "designed to eliminate the monopoly altogether," 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 650a, at 67, "wisdom counsels against adopting radical structural relief" in the "absence of some measure of confidence that there has been an actual loss to competition that needs to be restored," *id.* Instead, the court crafting a remedy must assess the strength of the causation evidence that established liability and "tailor" the relief accordingly. *Microsoft, 253 F.3d at 107*.

[*221] As the Court recounted above, the United States, along with nine State Plaintiffs, reached an agreement **[**52]** on the issue of remedy. As a result, these Plaintiffs opted not to litigate further the issue of remedy. The United States proceeded to seek approval of the settlement agreement and the entry of the agreement as the final judgment in this case pursuant to the Tunney Act, *15 U.S.C. § 16(b)-(h)*. Having determined that the issue is ripe for the Court's consideration, the Court addresses the proposed final judgment and the public interest in the paragraphs below.

B. Second Revised Proposed Final Judgment

The Second Revised Proposed Final Judgment (SRPFJ) which the parties seek to have entered as a final judgment in this case sets forth a number of restrictions upon Microsoft's conduct which are intended to remedy the effects of Microsoft's anticompetitive behavior. Section III of the SRPFJ, entitled "Prohibited Conduct," contains the substance of these restrictions, organized into subsections by letters. SRPFJ § III.A-J. Sections III.A, B, and F can be grouped together according to the similarity of their terms and the manner in which the terms compliment each other. Each of these sections restricts Microsoft's ability to utilize its market power **[**53]** as a means, via retaliation and coercion, to protect its monopoly.

1. Anti-Retaliation and Uniform Licenses

Section III.A bars Microsoft from "retaliation" against OEMs by altering its commercial relationship with that OEM or "withholding newly introduced forms of non-monetary Consideration . . . from that OEM" in certain circumstances. *Id.* § III.A. In particular, the provision bars retaliation where Microsoft knows the OEM "is or is contemplating":

> 1. developing, distributing, promoting, using, selling, or licensing any software that competes with Microsoft Platform Software or any product or service that distributes or promotes any Non-Microsoft Middleware;
> 2. shipping a Personal Computer that (a) includes both a Windows Operating System Product and a non-Microsoft Operating System, or (b) will boot with more than one Operating System; or
> 3. exercising any of the options or alternatives provided for under this Final Judgment.

SRPFJ § III.A. The provision further requires Microsoft to provide written notice to a "Covered OEM" [19] and at least "thirty days' opportunity to cure" prior to termination of that OEM's Windows Operating System **[**54]** Product license. *Id.* However, where Microsoft has already provided "two or more such notices during the term of [the Covered OEM's] Window's Operating System Product License," Microsoft is not obligated to provide "such a termination notice and opportunity to cure." *Id.*

There are two exceptions to subsection A. First, and without controversy, the provision shall not be construed to "prohibit Microsoft from enforcing any provision of any license with any OEM or intellectual property right that is not inconsistent with the Final Judgment." *Id.* Second, and more significantly, the provision does not prohibit Microsoft from "providing Consideration **[*222]** to any OEM with respect to any Microsoft product or service where **[**55]** that Consideration is commensurate with the absolute level or amount of that OEM's development, distribution, promotion or licensing of that Microsoft product or service." *Id.*

The United States identifies § III.A as a provision broadly drawn so as to "ensure[] that OEMs have contractual and economic freedom to make decisions about distributing and supporting non-Microsoft middleware products without fear of coercion or retaliation by Microsoft." United States Mem. in Support of the RPFJ (hereinafter cited as "United States Mem.") at 57. Section III.A focuses on OEMs because of the significance of the OEM channel as a means of distributing rival middleware and operating systems. *Id.* The exception in § III.A for consideration commensurate with the promotion of or other similar support for Microsoft's products is intended to preserve "permissible collaborations between an OEM and Microsoft to promote Microsoft products and services." United States Response to Public Comments (hereinafter cited as "United States Resp.") at 78. For example, explains the government, "an OEM that collaborates with Microsoft on developing a particular product through extensive testing, or offers **[**56]** advertising or other promotion, may be compensated for its greater role through a higher level of Consideration for that product than one that is not developing or supporting that product." *Id.* Given this reasoned explanation, the Court concludes that the exception in § III.A for compensation commensurate with an OEM's promotion or similar support for a Microsoft product is appropriately tailored to permit procompetitive agreements between Microsoft and OEMs.

a. "Microsoft Platform Software"

The Court pauses its discussion of § III.A at this point to examine the term "Microsoft Platform Software," which is the first of a number of carefully defined terms used throughout the SRPFJ. The proposed final judgment defines Microsoft Platform Software as the combination or alternative of two other defined terms. *See* SRPFJ § VI.L. "'Microsoft Platform Software' means (i) a Windows Operating System Product and/or (ii) a Microsoft Middleware Product." *Id.* Each of the two terms used in the definition of "Microsoft Platform Software" raises its own definitional issues, with the more complex issues arising in conjunction with latter of the two. Accordingly, the Court will **[**57]** examine each definition in turn.

i. Windows Operating System Product

The SRPFJ defines a "Windows Operating System Product" as

> the software code (as opposed to source code) distributed commercially by Microsoft for use with Personal Computers as Windows 2000 Professional, Windows XP Home, Windows XP Professional, and successors to the foregoing, including the Personal Computer versions of the products currently code named "Longhorn" and "Blackcomb" and their successors, including upgrades, bug fixes, service packs, etc. The software code that comprises a Windows Operating System Product shall be determined by Microsoft in its sole discretion.

SRPFJ § VI.U. Controversy swirls around the SRPFJ's definition of "Windows Operating System Product" largely because of the final sentence in the definition, which leaves to Microsoft's discretion the determination of which code shall comprise a Windows Operating System Product. This controversy, to quote the Immortal Bard, **[*223]** is

---

[19] "Covered OEMs" is a defined term. Pursuant to § VI.D, "'Covered OEMs' means the 20 OEMs with the highest worldwide volume of licenses of Windows Operating System Products reported to Microsoft in Microsoft's fiscal year preceding the effective date of the Final Judgment." SRPFJ § VI.D.

really "much ado about nothing." The criticism of this aspect of the definition arises from an interpretation which views the final sentence as a form of absolution for Microsoft from any liability **[**58]** for the illegal tying of two distinct products based upon the design of its Windows operating system product. Such criticism is misplaced.

The definitions in the final judgment in this case do not possess the power to alter the application of the antitrust laws to Microsoft's conduct or its products. The power to determine which software code constitutes a "Windows Operating System Product" for purposes of the SRPFJ cannot logically be viewed as a grant of special rights or immunity from prosecution under the antitrust laws for illegal tying. Quite simply, the code that Microsoft identifies as a "Windows Operating System Product" has no impact upon the ability of the Department of Justice, or any future plaintiff, to allege that the product identified as a "Windows Operating System Product" for purposes of the SRPFJ is an illegal amalgamation of two separate products under *§ 1* of the Sherman Act. Likewise, the definition of "Windows Operating System Product" in the SRPFJ cannot curtail the ability of a court to determine that Microsoft has illegally tied two products which are separate under the antitrust laws. Instead, the definition merely recognizes that, as a practical matter, **[**59]** Microsoft retains the power to determine which software code it will include in the products marketed as "Windows."

The definition of "Windows Operating System Product" is similarly misunderstood as enabling Microsoft to somehow manipulate which code is included in the definition in order to avoid classification as a "Microsoft Middleware Product." According to this misreading of the definition, Microsoft could avoid inclusion of a particular piece of code within the definition of "Microsoft Middleware Product," SRPFJ § VI.K, by simply declaring that the code is part of a "Windows Operating System Product." The fatal flaw in this reading of the definition is the presumption that "Microsoft Middleware Product" and "Windows Operating System Product" are mutually exclusive terms; that is not the case. Software code can simultaneously fall within both the "Windows Operating System Product" and "Microsoft Middleware Product" definitions. *Id.* § VI.K, U. Once again, therefore, the definition of "Windows Operating System Product" merely recognizes that Microsoft, as the distributor of a product called "Windows," has the discretion to determine which code to include in its distribution **[**60]** of that product.

ii. "Microsoft Middleware Product"

As recounted above, the latter portion of the definition of "Microsoft Platform Software" rests upon the definition of "Microsoft Middleware Product." In the SRPFJ, "Microsoft Middleware Product" means:

> 1. the functionality provided by Internet Explorer, Microsoft's Java Virtual Machine, Windows Media Player, Windows Messenger, Outlook Express and their successors in a Windows Operating System Product, and
> 2. for any functionality that is first licensed, distributed or sold by Microsoft after the entry of this Final Judgment and that is part of any Windows Operating System Product
> a. Internet browsers, email client software, networked audio/video client software, instant messaging software or
> b. functionality provided by Microsoft software that --
>
> i. is, or in the year preceding the commercial release of any new Windows Operating System Product was, distributed separately by Microsoft **[*224]** (or by an entity acquired by Microsoft) from a Windows Operating System Product;
> ii. is similar to the functionality provided by a Non-Microsoft Middleware Product; and
>
> iii. is Trademarked. **[**61]** [20]

---

[20] Trademarked is defined in the SRPFJ to have the following meaning:

> distributed in commerce and identified as distributed by a name other than Microsoft (R) or Windows (R) that Microsoft has claimed as a trademark or service mark by (i) marking the name with trademark notices, such as (R) or TM, in connection with a product distributed in the United States; (ii) filing an application for trademark protection for the name in the United States Patent and Trademark Office; or (iii) asserting the name as a trademark in the United States in a demand letter or lawsuit. Any product distributed under descriptive or generic terms or a name comprised of the Microsoft (R) or Windows (R) trademarks together with descriptive or generic terms shall not be Trademarked as that term is used in this Final

> Functionality that Microsoft describes or markets as being part of a Microsoft Middleware Product (such as a service pack, upgrade, or bug fix for Internet Explorer), or that is a version of a Microsoft Middleware Product (such as Internet Explorer 5.5), shall be considered to be part of that Microsoft Middleware Product.

SRPFJ § VI.K. The first portion of this definition captures various types of functionality provided by one of a set of existing, named products and their successors. The functionalities in this list go beyond the functionality provided by the Java technologies and Netscape's Navigator, the middleware technologies which were the focus of the liability findings in this case, and include a broad range of existing middleware technologies.

[62]** The latter portion of the definition enables inclusion in the decree of future technologies, provided the new technologies meet certain requirements. To fall within the prescient portion of the definition, the software code must first be distributed as part of any "Windows Operating System Product," the definition of which the Court discussed above. *Id.* The rationale for this requirement is quite clear, as Windows is Microsoft's product in the monopoly market. If the Microsoft software has not been included in Windows, it lacks a fundamental relationship to the theory and imposition of liability in this case. The second element of such future functionality is that it must also be distributed separately from a Windows Operating System Product. The government's rationale for this requirement derives from its view that the "competitive significance of middleware products such as browsers and media players will be relatively small if they are not distributed in any form separate from a Windows Operating System Product." United States Resp. at 44. This view results from the fact that, absent separate distribution, Microsoft will remain unable to reach the "large installed base of Windows **[**63]** machines" and can only impact users willing to upgrade to new versions of the operating system. *Id.* Even then, Microsoft releases new operating systems at fairly long intervals and, in the absence of separate distribution, will be unable to update and release new versions of products provided originally with the operating system. *Id. at 44-45*. Therefore, according to the government, the competitively significant middleware portions of Windows, of necessity, will be distributed separately.

[*225] The third element of the definition is based upon yet another defined term requiring that the "Microsoft Middleware Product" provide similar functionality to that provided by a "NonMicrosoft Middleware Product." SRPFJ § VI.K. In this instance, the definition of "NonMicrosoft Middleware Product" [21] is indisputably broad, incorporating anything which can be reasonably identified as "middleware" and which has achieved a certain level of popularity. *Id.* § VI.N.

[64]** Finally, the requirement that Microsoft trademark the future functionality derives from the government's recognition of the "business reality that Microsoft often names and markets the technologies that it wishes developers and consumers to adopt." United States Resp. at 53. The government further explains that, in its view, "Microsoft has little incentive to bury its new products inside other applications in order to avoid having it meet the Trademark standard." *Id.* These explanations address and rebut to the Court's satisfaction criticisms of the "trademarked" requirement in the definition of "Microsoft Middleware Product."

b. Anti-Retaliation: Original Equipment Manufacturers ("OEMs")

Having examined the various components of the definition of "Microsoft Platform Software," the Court returns to its original inquiry into the effect of § III.A. The government asserts, and the Court sees little basis to disagree, that §

> Judgment. Microsoft hereby disclaims any trademark rights in such descriptive or generic terms apart from the Microsoft (R) or Windows (R) trademarks, and hereby abandons any such rights that it may acquire in the future.

SRPFJ § VI.T.

[21] The SRPFJ defines "Non-Microsoft Middleware" as

> a non-Microsoft software product running on a Windows Operating System Product (i) that exposes a range of functionality to ISVs through published APIs, and that could, if ported to or made interoperable with, a non-Microsoft Operating System, thereby make it easier for applications that rely in whole or in part on the functionality supplied by that software product to be ported to or run on that non-Microsoft Operating System, and (ii) of which at least one million copies were distributed in the United States within the previous year.

SRPFJ § VI.N.

III.A will prevent Microsoft from hindering an OEM's ability to choose to support products which have the capacity to threaten Microsoft's operating system monopoly. Contrary to some criticism, the Court regards the limited scope of this provision, **[**65]** in that it addresses only competition relative to Microsoft's dominant role as a platform for applications, as entirely appropriate given the middleware theory of liability pursued in this case. *See generally* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. The Court further regards § III.A as presenting clear and enforceable terms.

The only lingering concern held by the Court is that § III.A does nothing to prevent Microsoft from making threats of retaliation. The factual findings and liability in this case evidence that Microsoft has used not only actual retaliation, but threats of retaliation in coercing certain kinds of behavior. *See, e.g.*, *id. at 77-78* (discussing Microsoft's "threat to Intel"). Given the power Microsoft wields as a monopolist, it would be appropriate to prohibit Microsoft from stifling competition with threats of bad treatment. The United States explains the absence of any ban on threats rather logically, noting that where the retaliation itself is prohibited, any threat of retaliation is empty and, therefore, without power. United States Resp. at 75. While a rational explanation, the Court regards a ban on threats of retaliation, at a minimum, **[**66]** as more comforting to business entities dealing with Microsoft when making decisions about supporting Microsoft competitors. Nevertheless, it is a far cry from making a "mockery of judicial **[*226]** power" that the remedy in this case does not include a ban on threats of retaliation. *Microsoft, 56 F.3d at 1462*. Accordingly, this criticism matters little in the Court's assessment of the public interest, as ***HN9***[] a consent decree need not reflect the Court's own choice of a remedy, but instead, giving due respect to the government's view of the effect of the remedial proposal, need only reflect a certain consonance with the liability allegations, or more appropriately in this case, the liability findings. *See* *id. at 1461*.

c. Anti-Retaliation: Independent Software Vendors ("ISVs") and Independent Hardware Vendors ("IHVs")

Section III.F mirrors § III.A to some extent, in that it too prohibits retaliation, but § III.F applies to Microsoft's conduct towards ISVs and IHVs. SRPFJ § III.F. Pursuant to § III.F.1:

Microsoft shall not retaliate against any ISV or IHV because of that ISV's or IHV's:

> a. developing, using, distributing, promoting **[**67]** or supporting any software that competes with Microsoft Platform Software or any software that runs on any software that competes with Microsoft Platform Software, or
> b. exercising any of the options or alternatives provided for under this Final Judgment.

Id. § III.F.1. Inasmuch as § III.F.1 mirrors § III.A, criticism with regard to the absence of a ban on threats of retaliation is equally applicable. For the reasons discussed with regard to § III.A, however, the Court need not tarry long on the absence of such a prohibition. In all other respects, the protections in § III.F reflect the liability findings against Microsoft for retaliating against ISVs and IHVs. *See* *Microsoft, 253 F.3d at 72-73* (discussing Microsoft's dealings with Apple), 77-78 (describing Microsoft's "threat to Intel" [22]). Furthermore, because § III.F.1 prohibits retaliation responsive to IHVs' or ISVs' support for software which "competes" with not only "Microsoft Platform Software," but "any software that runs on software that competes with Microsoft Platform Software," its protections are broadly drawn. SRPFJ § III.F.1. Simultaneously, however, § III.F.1 remains appropriately **[**68]** grounded in its reflection of the monopoly market in this case and does not stray inappropriately into markets unrelated to the market in which liability was imposed. *Id.* The Court observes, in this regard, that there is little justification for protection against retaliation for software which does not "compete" with the monopoly product or run on software which "competes" with the monopoly product. The Court, therefore, finds that the protections afforded by § III.F.1 are appropriately drawn so as to advance the public interest.

d. Uniform Licenses

---

[22] In the *Findings of Fact*, Judge Jackson noted that Intel is both an IHV and an ISV. *Findings of Fact* P 95 ("Although Intel is engaged principally in the design and manufacture of microprocessors, it also develops some software.").

Section III.B is said to strengthen § III.A by mandating that Microsoft provide uniform license terms to Covered OEMs. SRPFJ § III.B. The uniform royalties are to be established in a schedule, which is accessible **[**69]** to Plaintiffs and the covered OEMs. *Id.* Notwithstanding the general uniformity of the licenses, Microsoft may provide volume discounts based upon the volume of the OEM's licenses of a Windows Operating System Product or group of such products. *Id.* § III.B.2. The licenses may also include discounts so long as the discounts are uniform among the Covered OEMs. [23] *Id.* § III.B.3. The discounts **[*227]** must also be based on objective, verifiable criteria and may not be inconsistent with other portions of the SRPFJ. *Id.* This section simplifies the complex royalty licenses so as to prevent Microsoft from using the license terms as a means by which to coerce and control the OEMs into favoring Microsoft products. United States Mem. at 57. Still, the provision is limited such that larger OEMs may, quite reasonably, receive different treatment than some of the smaller OEMs. *Id.*

[70]** The strongest criticism of § III.B argues that it should forbid Microsoft's practice of using market development allowances ("MDAs") and other discounts. Vociferous though this criticism may be, it ignores the fact that there is no liability in this case which regards the use of MDAs themselves, or in conjunction with other anticompetitive behavior, to be an antitrust violation. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. Quite to the contrary, the United States takes the view that MDAs and similar discounts, when not misused, constitute "efficient behavior that has little or no potential to be used by Microsoft for anticompetitive purposes." United States Resp. at 81. Other provisions of the SRPFJ protect against the potential for misuse of MDAs, via retaliation or selective rewarding, such that there is little justification, and certainly no necessity, for a ban on Microsoft's use of MDAs and other discounts. Moreover, MDAs and similar discounts are prohibited any time they are inconsistent with any other term of the SRPFJ. SRPFJ § III.B.3.

By mandating uniformity, the SRPFJ sacrifices the ability of OEMs to negotiate the most favorable terms. The Court recognizes that despite **[**71]** the obvious benefit to be gained by uniformity in licenses, undoubtedly, there are some which would be happier with the freedom to negotiate. Yet, ***HN10***[] the Tunney Act, and the case law which follows, dictate that it is for the United States to weigh the benefits of such a trade in the first instance, and that, barring a breach of duty in consenting to the decree, *Bechtel, 648 F.2d at 666*, the Court should respect the government's "predictions as to the effect of the proposed remedy." *Microsoft, 56 F.3d at 1461*. Adhering to this guidance, the Court cannot say that the imposition of uniform licenses and the preservation of Microsoft's ability to utilize MDAs and similar discounts approach a breach of duty by the government.

In sum, the Court finds the above-described provisions in the SRPFJ to be an effective means of protecting against Microsoft's utilization of its monopoly position to retaliate against companies that choose to support products that have the capacity to threaten Microsoft's monopoly. In particular, the Court finds that the definitions discussed in this section, though they appear throughout the SRPFJ, namely "Windows Operating System Product, **[**72]** " "Microsoft Middleware Product," and "Microsoft Platform Software," comport with the theory of liability in this case and, in many instances, exceed the actual scope of the liability in some ways, such that a number of products not directly involved in Microsoft's anticompetitive conduct are addressed in the proposed final judgment. The Court finds that, to the extent that these definitions encompass products beyond the scope of the liability findings, such breadth is appropriate, and likely necessary, to ensure that the anticompetitive conduct ceases and to prevent its reoccurrence. **[*228]** *See* *Bechtel, 648 F.2d at 666* ***HN11***[] ("It is not contrary to the public interest, as contemplated by the [Tunney Act], to enter a decree that is not necessary, or that grants relief to which the government might not be strictly entitled. The public does not suffer because [the defendant] consented to limitations on its activities that could not otherwise be imposed.").

2. Flexibility in OEM Licenses

a. Icons, Shortcuts, and Menu Entries

[23] However, Microsoft may establish a two tiered discount schedule, one for the ten largest Covered OEMs, and another for the eleventh through the twentieth Covered OEMs. SRPFJ § III.B.3.a.

Unlike Sections III.A and III.B, which bear a more general relation to the liability findings, the conduct enjoined in § III.C correlates **[**73]** closely to Microsoft practices which were found to violate *§ 2* of the Sherman Act. Rather than a blanket prohibition on the license restrictions which were found to be anticompetitive, § III.C provides substantial, though not absolute, flexibility to OEMs in configuring personal computers. Subsection C.1 prohibits restriction on an OEM's installation and display of icons, shortcut, and menu entries for any "Non-Microsoft Middleware or any product or service . . . that distributes, uses, promotes, or supports any Non-Microsoft Middleware, . . . anywhere . . . in a Windows Operating System Product where a list of icons, shortcuts, or menu entries for applications are generally displayed." SRPFJ § III.C.1. Section VI.M. defines "Non-Microsoft Middleware" broadly as:

> a non-Microsoft software product running on a Windows Operating System Product that exposes a range of functionality to ISVs through published APIs, and that could, if ported to or made interoperable with, a non-Microsoft Operating System, thereby make it easier for applications that rely in whole or in part on the functionality supplied by that software product to be ported to or run on that non-Microsoft Operating **[**74]** System.

Id. § VI.M. Excluded from the mandated flexibility in § III.C.1 is Microsoft's ability to limit the icons, shortcuts, or menu entries placed in a particular area according to the functionality provided by the product, so long as the limitation is non-discriminatory with respect to Microsoft and non-Microsoft products. *Id.* § III.C.1. In practical terms, this limitation means, for example, that if Microsoft has created a menu list for software providing email capability, the OEM is not free to configure Windows to place icons for programs which do not provide email capability in that area. This limitation is intended to balance Microsoft's concerns with protecting consumer clarity and the provision of OEM flexibility. United States Resp. at 89-90. The government notes that the prohibition on discrimination in the application of this exception prevents Microsoft from "prescribing the functionality so narrowly that it becomes, in effect, discriminatory." *Id. at 91*. Likewise, the non-discrimination language precludes Microsoft from "completely forbidding the promotion or display of a particular Non-Microsoft Middleware Product on the ground that Microsoft **[**75]** does not have a competing product itself." *Id.* "To do so," explains the government, "would be discriminatory." *Id.*

The Court has reviewed the common complaint of some individuals and entities filing comments that the term "functionality" used in SRPFJ § III.C.1 is too vague to be enforced. In short, the Court disagrees. Admittedly the term is broad and somewhat flexible, but in this area of technology, overly restrictive terminology will prove useless as the technology continues to evolve. Therefore, the Court takes the view that the phrase "particular types of functionality" carries sufficient meaning to **[*229]** be applied effectively and without confusion. SRPFJ § III.C.1. Section III.C.1 provides flexibility in product configuration while preserving for Microsoft control over the appearance of its product at the outermost edges. The core freedom of configuration provided in § III.C.1 far outweighs the limited exception to this freedom where such configuration works a bizarre and unjustified result. Accordingly, the Court takes the view that § III.C.1 will redress the illegal conduct, promote competition, and further the public interest.

b. Size and Shape of Icons

[76]** Section III.C.2. enables installation and display of shortcut icons of any size or shape, provided the shortcut "does not impair the functionality of the user interface." *Id.* § III.C.2. This provision, like the one described above, provides OEM flexibility, while eliminating the most extreme manifestations of that flexibility. Once again the central complaint about subsection C.2 involves an allegation of vagueness. Some individuals and entities argue that there is insufficient clarity in what it means to "impair the functionality of the user interface." *Id.*

The appellate court displayed a certain limited respect for Microsoft's configuration of the user interface when it held that the prevention of "drastic alteration of Microsoft's copyrighted work" was a valid basis for one of Microsoft's license restrictions. *Microsoft, 253 F.3d at 63*. At the same time, the appellate court rejected Microsoft's general claim that its license restrictions "merely prevent OEMs from taking actions that would reduce substantially the value of Microsoft's copyrighted work." *Id.* The exception in § III.C.2 for alterations which "impair the functionality" of the user interface **[**77]** attempts to strike a balance between these polar examples. In the Court's view, there is no ambiguity in the language of § III.C.2, and the Court cannot say that its effect is inconsonant with the liability in this case. Quite to the contrary, this provision appears to strike the appropriate balance between OEM freedom, Microsoft's interests in protecting the functionality of its product against drastic alteration, and the appellate court's imposition of liability.

c. Automatically Launched Software

Section III.C.3 concerns licensing restrictions which are oddly reminiscent of restrictions for which the appellate court did not impose antitrust liability, namely the automatic launch of an alternative user interface at the conclusion of the boot sequence. *Id.* The appellate court observed that the automatic launch of software which replaces the Microsoft user interface worked a "drastic alteration" of Microsoft's copyrighted product, while Microsoft's restriction had only a "marginal anticompetitive effect." *Id.* As a result, the appellate court rejected the imposition of liability for Microsoft's prohibition in its OEM licenses of this practice. *Id.* Notwithstanding **[**78]** this similarity, § III.C.3. applies to more than the automatic launch of an alternative user interface, regulating the automatic launching of any non-Microsoft Middleware Product "at the conclusion of the initial boot sequence or subsequent boot sequences, or upon connection to or disconnections from the Internet" without regard to whether such automatically launched product disturbs the Microsoft user interface. SRPFJ § III.C.3. This provision protects automatic launching of Non-Microsoft Middleware Products only where "a Microsoft Middleware Product that provides similar functionality would otherwise be launched automatically at that time" and imposes stringent limitations upon such automatic launching. *Id.* Where such Non-Microsoft Middleware is permitted to automatically launch, § III.C.3. requires **[*230]** that the middleware either provide no user interface or a user interface that resembles the corresponding Microsoft Middleware Product interface. *Id.*

In response to complaints regarding the restrictive nature of § III.C.3, the United States invokes the D.C. Circuit's rejection of liability for the automatic launching of an alternative user interface as a justification for **[**79]** the limitations in that provision. *Microsoft, 253 F.3d at 63*. As explained by the United States, this provision attempts to strike a balance between Microsoft's interest in "preventing unjustified drastic alterations to its copyrighted work" and allowing new innovations and product features. United States Resp. at 94. The most obvious flaw in this rationale, however, is that § III.C.3 is not directed exclusively at the launching of alternative user interfaces, but includes the launching of software products which launch automatically, but do so within the general parameters of the Microsoft user interface. SRPFJ § III.C.3. Despite some acknowledgment of this flaw, the United States argues that the restrictions in § III.C.3 are tolerable because they "govern[] only the original OEM configuration," such that the end user can click on an icon to enable the automatic launching of Non-Microsoft Middleware notwithstanding the restrictions in § III.C.3. United States Resp. at 94. Given this ability, argues the United States, § III.C.3 reflects a "reasonable compromise" between Microsoft's concerns for ease of use and the liability findings in this case. *Id.*

In **[**80]** the Court's view, the restrictions in § III.C.3 give too much credence to Microsoft's purportedly "valid interest" in providing consistent product characteristics valued by users. *Id.* The appellate court rejected a remarkably similar concern proffered by Microsoft in an attempt to justify the other license restrictions imposed by Microsoft upon OEMs. *Microsoft, 253 F.3d at 63-64*. The appellate court's rejection in this regard can be read to include any restriction on the automatic launching of software which does *not* replace the Microsoft user interface. *Compare* *id. at 64* ("In sum, we hold that with the exception of the one restriction prohibiting automatically launched alternative interfaces, all the OEM license restrictions at issue . . . violate *§ 2* of the Sherman Act."), *with Findings of Fact* P 213 ("Third, Microsoft prohibited OEMs from installing programs, including [but not limited to] alternatives to the Windows desktop user interface, which would launch automatically upon completion of the initial Windows boot sequence."). Moreover, this Court cannot help but recognize that this provision has the potential to empower Microsoft **[**81]** to control, or at least regulate, the pace of innovation with regard to middleware products designed to launch automatically, but which do not replace the user interface and, thereby, run afoul of the appellate court's opinion.

Importantly, however, the Court does not assess the proposed final judgment in a vacuum. In this regard, although the Court might have crafted a different remedy, the Court cannot conclude that the government has violated the public trust in agreeing to the terms set forth in § III.C.3. *See* *Bechtel, 648 F.2d at 666*. When considered as part of the greater whole of the proposed decree which offers OEM freedoms not clearly implicated in the appellate court's ruling, the Court can only conclude that the United States conceded this aspect of OEM flexibility in exchange for other freedoms which, in the government's view, will more effectively benefit competition. *See* *Microsoft, 56 F.3d at 1461*. **HN12**[] "Just as the Court may not second guess the government's choices about what claims to bring in the first **[*231]** place, it should not treat differently those concessions proposed in a consent decree that might have been achieved at trial from those **[**82]** that might not have been achievable." *Thomson, 949 F. Supp. at 927*. Although liability was established in this case, there remained litigation surrounding the issue of remedy, during which there would have been no guarantee that the United States would obtain all of the provisions it desired. **HN13**[] The risks inherent in litigation are likely to be reflected in some portion of the proposed decree, and these risks are appropriately weighed by the government, rather than the Court, in the first instance. *See* *AT&T, 552 F. Supp. at 151*. Giving limited deference to the assessment of the United States which takes the view that Microsoft has a valid interest in "having a computer boot up quickly the first time it is turned on," United States Resp. at 94, the Court does not deem this particular provision, though it is likely one of the proposed decree's more obvious weaknesses, to so conflict with important public policy or ***antitrust law*** that it removes the proposed decree from "the reaches of the public interest," *Microsoft, 56 F.3d at 1458* (quoting statement originally in *United States v. Gillette Co., 406 F. Supp. 713, 716 (D. Mass. 1975))*. **[**83]**

d. Internet Access Provider ("IAP") Offers in the Initial Boot Sequence

In general, subsection C.5 is aimed at remedying the restrictions on OEM modification of the initial boot sequence--"the process that occurs the first time a consumer turns on the computer," *Microsoft, 253 F.3d at 61*, which were found by the appellate court to violate *§ 2*. *Id. at 61-64*. The appellate court noted that this restriction "prevents OEMs from using [the initial boot sequence] to promote the services of IAPs." *Id. at 62*. This restriction hinders the distribution and/or promotion of non-Microsoft middleware which was often used by the IAPs in their internet access software. *Id.* Removal of this restriction will once again allow OEMs to promote various IAPs by inserting an option for choosing an IAP during the initial boot sequence.

As with subsection C.3, subsection C.5 of § III lifts a restriction directly implicated in the appellate court's liability findings, but does not do so completely. Section III.C.5 enables OEMs to offer an IAP service of their choosing during the initial boot sequence, but only where the offer complies with **[**84]** Microsoft's "reasonable technical specifications." SRPFJ § III.C.5. The appellate court concluded that Microsoft's prohibition on the inclusion of IAP registration offers in the initial boot sequence were without procompetitive justification. *Microsoft, 253 F.3d at 63-64*. In particular, the appellate court rejected Microsoft's arguments that OEM alterations created "quality issues," *id. at 64* (quoting Defendant's Trial Exhibit 2395), and caused consumer confusion because the district court found that OEMs, not Microsoft, bear the additional support costs associated with such a result. *Id*. (citing *Findings of Fact* P 159). Given this holding, there is little basis in the liability findings for the retention of Microsoft's power to impose "reasonable technical specifications" on an OEMs' insertion of an IAP offer in the initial boot sequence.

Despite this observation, however, the same analysis which applied to subsection C.3 applies to subsection C.5 of § III. That is, the Court cannot say that the limited retention of discretion permitted by Microsoft with regard to the insertion of IAP registration offers is so flawed that it renders the **[**85]** entire decree, or even this particular section of the decree, outside of the public interest. *See* *AT&T, 552 F. Supp. at 150-51*. Rather, the Court observes once again, that this limited retreat **[*232]** from the full feasible relief which the United States might have obtained through litigation reflects the give and take of a negotiated settlement. *Id. at 151*. Moreover, the preservation of Microsoft's ability to impose "reasonable technical specifications" upon registration sequences inserted into the boot sequence is less objectionable than the reservation of Microsoft authority in § III.C.3 because the exception from § III.C.5 subjects Microsoft to an objective standard of reasonableness. If the technical specifications are objectively "unreasonable," Microsoft is without power to impose them. As a result, the Court is convinced that the freedom provided to OEMs by the opportunity to insert IAP registrations during the initial boot sequences, even as limited by § III.C.5, will have the procompetitive effect of enabling promotion and distribution of non-Microsoft middleware. *See* *Microsoft, 253 F.3d at 62*. The Court regards it unlikely that **[**86]** Microsoft's imposition of "reasonable technical specifications" upon this freedom will undercut substantially its value to competition.

e. Alternative Operating Systems and Other Alternatives under the Final Judgment

Subsection C.4 of § III, prohibits Microsoft from restricting an OEM's ability to "offer[] users the option of launching other Operating Systems from the Basic Input/Output System or a non-Microsoft boot-loader or similar program that launches prior to the start of the Windows Operating System Product." SRPFJ § III.C.4. In effect, § III.C.4. provides OEMs with the option of launching competing operating systems and prevents Microsoft from interfering with OEM decisions to do so. Lastly, § III.C.6. provides protection for OEMs which exercise any of the options provided to them pursuant to § III.H. of the SRPFJ, which the Court discusses in greater detail below. *Id.* § III.C.6. The Court sees little worthy of criticism in these final provisions of subsection C, each of which should serve to provide OEM flexibility, which in turn, should encourage competition.

f. End-User Access

Like subsection C, subsection H of § III is aimed at providing **[**87]** flexibility in the OEM channel of distribution for non-Microsoft middleware, as well as for consumers in configuring their own Windows installation. Scheduled to take effect not later than twelve months from the submission of the SRPFJ to the Court, subsection H concerns the addition, removal, and placement of shortcuts, icons, and menu entries. *Id.* § III.H. As recounted above, the appellate court found that Microsoft's restrictions on icon appearance and placement, folders and menu entries, and other alterations of the appearance of the desktop had the effect of "imposing significant costs upon the OEMs." *Microsoft, 253 F.3d at 62*. As a result of these additional costs, Microsoft "reduced rival browsers' usage share not by improving its own product but, rather, by preventing OEMs from taking actions that could increase rivals' share of usage." *Id.* The appellate court rejected Microsoft's proffered procompetitive justifications for these restrictions and, therefore, found them to be exclusionary in violation of *§ 2* of the Sherman Act. *Id. at 63-64*.

Section III.H.1(a) requires that Microsoft permit end users and OEMs "to enable or remove **[**88]** access to each Microsoft Middleware Product or Non-Microsoft Middleware Product by . . . displaying or removing icons, shortcuts, or menu entries on the desktop or Start menu, or anywhere else in a Windows Operating System Product where a list of icons, shortcuts, or menu entries for applications are generally **[*233]** displayed." SRPFJ § III.H.1(a). In derogation of this provision, Microsoft reserves the right to restrict the display of icons, shortcuts, and menu entries in any list of the same "specified in the Windows documentation as being limited to products that provide particular types of functionality, provided that the restrictions are non-discriminatory with respect to non-Microsoft and Microsoft products." *Id.* The government explains that this exception is intended to "capture broad categories of products" so as to avoid consumer confusion by ensuring orderly placement of product icons, shortcuts, and menu entries. United States Resp. at 99. As is plain from the language of the exception, Microsoft may not use these product categories to discriminate between its own products and its competitors' products. SRPFJ § III.H.1(a).

Section III.H.1(a) is responsive to the appellate **[**89]** court's finding of anticompetitive behavior in Microsoft's exclusion of IE from the Add/Remove Programs utility. *Microsoft, 253 F.3d at 67*. The government posits that the provision will "alter Microsoft's current practice of creating an artificial distinction between . . . Non-Microsoft Middleware Products and Microsoft Middleware Products." United States Resp. at 98. On this rationale, the government predicts that users will be able, with the assistance of the SRPFJ, "to make choices on the merits about Microsoft and Non-Microsoft Middleware Products." *Id.* As with § III.C.1, § III.H.1(a) reserves for Microsoft the right limit the insertion of particular icons, shortcuts, and menu entries in lists or other areas of Windows which are reserved for particular functionality. SRPFJ § III.H.1(a). Once again, the Court does not regard such a limitation as inappropriately restrictive of OEM and end-user ability to configure Windows. The limitations imposed by Microsoft must be nondiscriminatory and may not be used to benefit Microsoft software over third-party software. *Id.* As a result, the Court rejects any contention that such a limitation will hinder the appropriately **[**90]** procompetitive effect of the remedial provision. On this basis, the Court finds that § III.H.1(a) advances the public interest.

Section III.H.1(b) also requires Microsoft to allow end users and OEMs to enable or remove access to middleware products by "enabling or disabling automatic invocations pursuant to § III.C.3 of the SRPFJ that are used to launch Non-Microsoft Middleware Products or Microsoft Middleware Products." *Id.* § III.H.1(b). Again, § III.C.3. concerns the automatic launch of Non-Microsoft Middleware. *Id.* § III.C.3. The "mechanism" for such enabling or disabling must offer an unbiased choice between each Microsoft Middleware Product and NonMicrosoft Middleware Product and may offer such an unbiased choice as between all Microsoft Middleware Products as a group and Non-

Microsoft Middleware Products as a group. *Id.* § III.H.1.(b). The Court finds this provision unobjectionable and appropriately procompetitive.

i. Designation of a Non-Microsoft Middleware Product in Place of a Microsoft Middleware Product

The second subpart of § III.H. requires Microsoft to allow end users and OEMs to designate a NonMicrosoft Middleware Product **[**91]** to be invoked in place of [a] Microsoft Middleware Product (or vice versa)" in certain circumstances. *Id.* § III.H.2. This provision requires that the option be presented to end users "via an unbiased mechanism" and to OEMs "via a standard OEM preinstallation kits" in any situation "where the Windows Operating System Product would otherwise launch the Microsoft Middleware Product in a **[*234]** separate Top-Level Window and display either (i) all of the user interface elements or (ii) the Trademark of the Microsoft Middleware Product." *Id.* As exceptions to the foregoing, Microsoft may invoke a Microsoft Middleware Product where the product would be "invoked solely for use in interoperating with a server maintained by Microsoft" or "that designated Non-Microsoft Middleware Product fails to implement a reasonable technical requirement." *Id.* § III.H.2(a)-(b). The government explains that the central goal and the anticipated effect of § III.H.2 are that Microsoft will be required to "implement and respect default settings in a number of circumstances." United States Resp. at 101.

Critics of § III.H.2 complain that Microsoft could engineer its software to avoid falling within the **[**92]** requirements of a "separate Top-Level Window" displaying either "all of the user interface elements" or the "Trademark of the Microsoft Middleware Product." SRPFJ § III.H.2. Microsoft's ability to circumvent this provision through its product design, argue some, will undercut the usefulness of the affirmative portion of § III.H.2. The government explains that these qualifications exist to "ensure that access to defaults exists whenever the alternative Microsoft product would be launched as the full 'product' . . . rather than when just a portion of the product's underlying functionality is launched to perform functions in Windows itself . . . or otherwise where the end user might not necessarily be aware that he or she is using a specific Microsoft Middleware Product." United States Resp. at 102.

The most obvious flaw in this criticism of § III.H.2 is that such criticism fails to recognize that the provision offers relief beyond that which might be regarded as necessary to redress the liability in this case. Microsoft prevailed on its assertion that the override of a user's choice of a default browser was justified, and as a result, the appellate court did not ascribe liability **[**93]** for Microsoft's failure to provide true defaults, *Findings of Fact* P 171 ("While Windows 98 does provide the user with the ability to choose a different default browser, it does not treat this choice as the 'default browser' within the ordinary meaning of the term."). *See* *Microsoft, 253 F.3d at 67*. Despite this holding, § III.H.2 addresses the acknowledged anticompetitive effect of the override of non-Microsoft defaults, *id. at 65*, by requiring Microsoft to make non-Microsoft products the "default" in certain circumstances. SRPFJ § III.H.2. This requirement in § III.H.2 exceeds even the scope of the facts addressed during the liability phase because the mandatory setting of defaults applies to multiple types of software functionality, not merely Web-browsing functionality. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. Moreover, the government views the limited nature of § III.H.2 as one of the strengths of the provision, rather than its weakness. In this regard, the government notes that paramount in § III.H.2 is the ability to "provide certainty and a bright line regarding when Microsoft is obligated to provide and respect a default setting. **[**94]** " United States Resp. at 102. Based on the foregoing, and deferring to the government's view that § III.H.2 will have a procompetitive effect because of the clarity in its terms, however circumscribed, the Court cannot say that the United States has erred or strayed from the realm of acceptable remedies in sacrificing some flexibility in order to achieve the "bright line" drawn by the provision.

With regard to the latter portion of § III.H.2, the Court notes that subsections H.2(a) and (b) appear to reflect the two findings by the appellate court as to liability **[*235]** or, more specifically, the lack thereof. The relationship between subsection H.2(a) and the appellate opinion in this case is somewhat subtle, but the United States explains that automatic invocation of a "Microsoft Middleware Product . . . solely for use in interoperating with a server maintained by Microsoft (outside of the general context of Web browsing)" derives from the appellate court's holding that Microsoft did not violate *§ 2* in designing its product to override a user's browser preference in conjunction with invocation of the Windows "Help" system, *Microsoft, 253 F.3d at 67*. *See* United States **[**95]** Resp. at 104-05. The government avers that "the current Windows Help system, as well as other parts of the Windows interface, rely on interoperating with servers maintained by Microsoft." *Id. at 104*. While the Court might not have interpreted the appellate court's holding to require the precise exception in § III.H.2(a), the Court cannot say that the provision is inappropriate, and certainly, the provision does not conflict with the appellate court's holding. Rather, the provision is remarkable in that it tracks an exception to liability, which was carefully carved out by the appellate court, without sacrificing the effectiveness of the provision itself.

The link between § III.H.2(b)'s "reasonable technical requirement" language and the appellate court's finding with regard to Microsoft's "override the user's preferences" is somewhat less subtle. *Microsoft, 253 F.3d at 67*. Addressing whether Microsoft's product design to "override the user's choice of a default browser in certain circumstances" was anticompetitive, the appellate court concluded that Microsoft's proffered "valid technical reasons" were sufficient to outweigh any anticompetitive effect **[**96]** of the override. *Id.* As a result, the appellate court did not ascribe liability for this aspect of Microsoft's product design. *Id.* Section III.H.2(b) tracks the appellate court's liability holding on this point, while simultaneously countering any anticompetitive effects of the product design by requiring that Microsoft provide the unfulfilled technical requirements to any ISV requesting them. SRPFJ § III.H.2(b). Given the close relationship between § III.H.2(b) and the appellate opinion in this case, the Court finds little merit in the criticism of the provision in the public's comments. Like the exception in § III.H.2(a), the exception in subpart H.2(b) acknowledges the nuances of the appellate court's holding and yet maintains the potency of the restrictive portion of the provision. In doing so, § III.H comports with the public interest.

ii. Automatic Alteration of OEM Configuration

The final provision in § III.H., subsection 3, prohibits a Windows Operating System Product from automatically altering an OEM's icon, shortcut, or menu-entry configuration without first seeking confirmation from the user. *Id.* § III.H.3(a). Furthermore, pursuant to § III. **[**97]** H.3(b), the Windows Operating System Product may not seek confirmation from the end user for such a non-user initiated change in configuration until "14 days after the initial boot up of a new Personal Computer." *Id.* § III.H.3(b). Any request for confirmation pursuant to this section must be unbiased with regard to Microsoft Middleware Products and Non-Microsoft Middleware. *Id.* § III.H.3.

Section III.H.3 is written carefully to enable a feature in Microsoft's latest version of Windows, the "Clean Desktop Wizard," to remove unused icons from the desktop. CIS at 48; United States Resp. at 107. The 14-day grace period received wide criticism in the public's comments for its brevity, which, argue critics, devalues **[*236]** space on the desktop. The government explains that this time-frame was chosen as a "reasonable compromise between the need to use desktop icons to promote Non-Microsoft Middleware, and the needs of users who would prefer to be presented with the choice of moving unused icons to a folder." United States Resp. at 108. The government further asserts that there are other valuable areas in Windows within which nonMicrosoft middleware products can be promoted. *Id.* While **[**98]** the former explanation offered by the government is valid, the Court finds the latter rationale weak given the role that placement on the desktop played in the liability proceedings. *See, e.g.*, *Microsoft, 253 F.3d at 61* (finding that the inability to remove desktop icons for IE protected Microsoft's monopoly), 68-71 (holding that Microsoft's exclusive agreements with IAPs concerning desktop placement foreclosed a substantial share of the market). The more salient point made by the government is that the trigger and the confirmation for change must be unbiased with respect to Microsoft products and non-Microsoft products, such that the "Clean Desktop Wizard" should not be viewed as a tool for the suppression of non-Microsoft middleware products. United States Resp. at 107-08. Moreover, the government explains that the utility does not delete the icons, but merely moves the icons from the desktop into a folder from which they may be retrieved if the user changes his or her mind. *Id. at 108-09*. The Court notes in addition that there is no ascription of liability for Microsoft's alteration of user preferences and that the closest conduct to any such **[**99]** alteration--the override of defaults--is conduct for which Microsoft was absolved of liability. *Microsoft, 253 F.3d at 67*. In sum, the Court is not compelled to conclude that the preservation of a consumer option for a desktop "clean-up" tool is discordant with the public interest, so long as there exist adequate protections to ensure that the tool is not used as a sword with which Microsoft can attack its competitors.

g. Sections III.C and III.H: Remedy for Commingling Liability

Taking a more broad view of Sections III.C and III.H, the United States posits that these sections "remedy Microsoft's anticompetitive commingling of browser and Windows operating system code by requiring Microsoft to redesign its Windows Operating System Products to permit OEMs and end users effectively to remove access to

Microsoft Middleware Products (Section III.H) and to allow competing middleware to be featured in its place (Section III.C)." United States Resp. at 114. The invocation of anticompetitive conduct in this context refers to the appellate court's affirmance of the following district court finding:

> The District Court condemned Microsoft's decision to bind **[**100]** IE to Windows 98 "by placing code specific to Web browsing in the same files as code that provided operating system functions." [*Findings of Fact*] P 161; *see also id. PP 174, 192*. Putting code supplying browsing functionality into a file with code supplying operating system functionality "ensures that the deletion of any file containing browsing-specific routines would also delete vital operating system routines and thus cripple Windows . . . ." *Id. P 164*. As noted above, preventing an OEM from removing IE deters it from installing a second browser because doing so increases the OEM's product testing and support costs; by contrast, had OEMs been able to remove IE, they might have chosen to pre-install Navigator alone. *See id. P 159*.

[*237] *Microsoft, 253 F.3d at 65-66* (ellipsis in original). Rejecting Microsoft's factual assertion that it does not commingle browsing and non-browsing code, the appellate court reiterated that "commingling has an anticompetitive effect; . . . the commingling deters OEMs from pre-installing rival browsers, thereby reducing the rivals' usage share and, hence, developers' interest in rivals' APIs as an alternative to the **[**101]** API set exposed by Microsoft's operating system." *Id. at 66*.

The government correctly notes that the basis for the appellate court' condemnation of commingling is its anticompetitive effect and that, in the absence of such effect, it is not at all clear that the practice of commingling would be of antitrust concern. United States Resp. at 115. This observation is significant because, in this instance, the government proposes a remedy which does not simply proscribe the conduct found to be anticompetitive in violation of *§ 2*. Instead, the remedy for Microsoft's commingling liability is more closely aligned with alleviating the anticompetitive effect of the conduct, rather than simply banning the conduct itself.

This approach receives much criticism in the public's comments on the proposed consent decree. In general terms, these comments insist that Microsoft should be required to "uncommingle ," or make removable, much of the software code in its Windows operating system. Not surprisingly, the United States rejects this criticism and insists that it has never pursued a position that would have required the removal or removability of code. *Id. at 115-16*; **[**102]** *see also Microsoft, 97 F. Supp. 2d at 68* (IFJ requiring the removal of end-user access, *not* code removal). Indeed, even the *Findings of Fact* support the view that code removal is unnecessary: Judge Jackson noted in P 165 that "from the user's perspective, uninstalling Internet Explorer [via the 'Add/Remove' function] was equivalent to removing the Internet Explorer program from Windows 95." *Findings of Fact* P 165. The United States takes this view one step further, asserting that, contrary to theories advanced by some individuals and entities filing comments, "the basis for commingling liability, and remedy, in this case is the presence, from the user's perspective, of the product, and consequent confusion and other deterrents to installation of additional, rival middleware products; the mere presence of APIs is not enough." United States Resp. at 119.

Non-party cries for removal of software code as a remedy appear to reflect a substantive misunderstanding of the commingling liability in this case, which did not condemn Microsoft for including middleware functionality along with a product offering operating system functionality. [24] The remedy then, **[**103]** need not separate the functionalities, rather, it need only protect against any anticompetitive effect of the manner in which the functionalities have been bundled. In this case, the anticompetitive effect was found to be a disincentive to OEMs to install nonMicrosoft middleware products. If that disincentive can be removed, then the remedy is within the realm of appropriate relief. *See* 2 PHILLIP E. AREEDA ET AL., ***ANTITRUST LAW*** P 325a, at 246 (2d ed. 2000) ("The decree . . . will not embody harsh measures when less severe ones will do.").

---

[24] Any such condemnation would likely be reflected in the imposition of liability for illegal tying, rather than liability for illegal for monopoly maintenance. *Cf. generally* *United States v. Microsoft Corp., 331 U.S. App. D.C. 121, 147 F.3d 935 (D.C. Cir. 1998)*. Such a tying claim was offered by Plaintiffs pursuant to a *per se* analysis and was ultimately rejected by the appellate court. *Microsoft, 253 F.3d at 89*.

[*238] The United States predicts that §§ III.C and **[**104]** III.H will enhance competition between Microsoft middleware and non-Microsoft middleware, *see, e.g.*, CIS at 29, 45, and the Court is obliged to give some amount of deference to this prediction. *Mass. School of Law, 118 F.3d at 782*; *Microsoft, 56 F.3d at 1461*. In fact, the Court sees substantial merit in the government's explanation of the relationship between the theory of liability advanced by Plaintiffs, Judge Jackson's *Findings of Fact*, the district and appellate courts' findings of liability on this point, and the proposed consent decree's focus on end-user access, rather than code removal or redesign. Accordingly, the Court rejects the view that a remedial decree which does not mandate the "uncommingling " of code necessarily renders the remedy inappropriate, inadequate, or discordant with the public interest.

Adding emphasis to the foregoing conclusion is one final and important consideration--the effect of the remedy upon consumers and other participants in this segment of the industry. In addition to its prediction that §§ III.C and III.H will effectively remedy commingling, the United States predicts that a "blanket prohibition" of **[**105]** the practice "would impose a wholly unnecessary and artificial constraint on software design and could have adverse implications for consumers." United States Resp. at 119-20. The government goes on to predict that:

> Changes to the operating system that would be required to implement such a blanket prohibition likely would have adverse effects not only upon Microsoft and its customers but also upon third parties that already have designed software to rely on the present operating system code. A flat prohibition on commingling in this particular case, without due regard to the competitive impact of that commingling, therefore likely would be harmful, not helpful.

Id. at 120. The Court is hard pressed to reject a remedy on the grounds that it lacks a provision which has the potential to give rise to such dire consequences. Indeed, ***HN14***[] courts considering antitrust remedies are advised to pay special attention to the potential of any remedy to inflict harm upon third parties. *See* *Microsoft, 56 F.3d at 1462*. Moreover, the Court acknowledges that a remedy requiring code removal would disregard the repeated admonition offered by the appellate court in an earlier **[**106]** *Microsoft* opinion that its is undesirable for the Court to inject itself into matters of product design. *Microsoft, 147 F.3d at 949-50* and n.13 (identifying a "limited competence of courts to evaluate high-tech product designs and the very high cost of error" associated therewith); *but see* *Microsoft, 253 F.3d at 65* ("Judicial deference to product innovation, however, does not mean that a monopolist's product design decisions are *per se* lawful."). Based on the foregoing, the Court will not reject the SRPFJ on the ground that it does not include a blanket prohibition against commingling Web-browsing code with operating system code. To the contrary, the Court finds that the end-user focus of the remedy comports with the public interest as it minimizes potential for harm to third parties and, nevertheless, carries a great potential for the advancement of competition.

3. Agreements with Internet Access Providers ("IAPs"), Internet Content Providers ("ICPs"), Independent Software Vendors ("ISVs"), and Others

a. Exclusive Agreements

Section III.G of the SRPFJ governs Microsoft's ability to enter into agreements with **[**107]** IAPs, ICPs, ISVs, IHVs, [25] and OEMs **[*239]** which require any such entity to distribute, promote, use or support, "exclusively or in a fixed percentage," any Microsoft Platform Software. SRPFJ § III.G.1. Subsection G.1 prohibits Microsoft from entering into any exclusive or fixed percentage agreement except where "Microsoft in good faith obtains a representation that it is commercially practicable for the entity to provide equal or greater distribution, promotion, use, or support for software that competes with Microsoft Platform Software." *Id.* This portion of the consent decree is aimed at remedying the liability findings against Microsoft for entering into exclusive contracts with IAPs and ISVs. Citing to the "First Wave Agreements," the appellate court first deemed anticompetitive Microsoft's promise to ISVs to give "preferential support . . ., other technical information, and the right to use certain Microsoft seals of approval," *Microsoft, 253 F.3d at 71*, in exchange for the ISVs' exclusive use of IE as the default browser and the ISVs' exclusive "use of Microsoft's 'HTML Help,' which is accessible only with [IE]," *id. at 71-72*. [26] **[**109]** The

[25] An "IHV" is an "independent hardware vendor that develops hardware to be included in or used with a Personal Computer running a Windows Operating System Product." SRPFJ § VI.H.

appellate **[**108]** court further determined that Microsoft's agreement with Apple, "which is both an OEM and a software developer," [27] *id. at 71*, for Apple's exclusive use of IE as the default browser was anticompetitive in violation of *§ 2*. *Id. at 72-74*. Lastly, once again citing to the "First Wave Agreements," the appellate court concluded that "to the extent Microsoft's First Wave Agreements with ISVs conditioned receipt of Windows technical information upon the ISVs' agreement to promote Microsoft's JVM exclusively," *id. at 75*, the agreements were "exclusionary, in violation of the Sherman Act." *Id. at 76*. [28]

Some individuals and entities filing comments contend that the "commercially practicable" representation in § III.G.1 is too **[**110]** easily evaded and, therefore, will be ineffective. The United States responds by explaining the manner in which the provision will function. The government first explains that the provision will prevent Microsoft "from guaranteeing that rival technology will not become broadly available," United States Resp. at 133, by "making it logically impossible for Microsoft to seek--much less get--any form of exclusive distribution, promotion, use, or support on all of a third party's products, no matter how much Microsoft is willing to pay." *Id. at 134*. In this regard, § III.G.1 is shown to appropriately permit contracts with other participants in the industry which cannot be said to be anticompetitive. **[*240]** The government goes on to debunk the contention that Microsoft can extract the "commercially practicable" representation by pressuring the party with which it is contracting, as such tactics would not satisfy the "good faith" requirement in § III.G.1. *Id. at 133-34*. The "good faith" requirement prevents Microsoft from pressuring or coercing any such entity into making the necessary representation. *Id.* Similarly, Microsoft cannot simply include such representations as boilerplate **[**111]** language in its contracts as, once again, the "good faith" requirement will not have been met. *Id.*

The appellate court expressly observed in conjunction with its discussion of Microsoft's illegal exclusive contracts that "exclusivity provisions in contracts may serve many useful purposes," such that they are "a presumptively legitimate business practice." *Microsoft, 253 F.3d at 69*. "Exclusive contracts are commonplace--particularly in the field of distribution--in our competitive, market economy, and imposing upon a firm with market power the risk of an antitrust suit every time it enters into such a contract, no matter how small the effect, would create an unacceptable, and unjustified burden on any such firm." *Id. at 70*. Because ***antitrust law*** does not condemn all exclusive contracts, even if entered into by a monopolist, the Court regards it as entirely appropriate for the remedy in this case to prohibit only those contracts that have a significant degree of foreclosure of the market. In this light, § III.G.1 is shown to be a provision which carefully balances the prohibition of anticompetitive conduct and the preservation of opportunities **[**112]** for symbiotic relationships between Microsoft and third parties which are not likely to be anticompetitive in their effect.

b. Placement on the Desktop

To further remedy Microsoft's anticompetitive exclusive deals with IAPs, subsection G.2 of Section III prohibits agreements with IAPs and ICPs that condition placement on the desktop (or elsewhere in Windows) on a promise to refrain from distribution, promotion, or use of any software that competes with certain functionality offered by Microsoft as part of its operating system--Microsoft Middleware. SRPFJ § III.G.2. Accordingly, subsection G.2

---

[26] In contrast, the appellate court declined to find Microsoft liable for entering into similar deals with ICPs on the grounds that Plaintiffs "failed to demonstrate that Microsoft's deals with the ICPs have a substantial effect upon competition." *Microsoft, 253 F.3d at 71*.

[27] Although identified as an OEM in the appellate court's opinion, the Court observes that Apple does not fit into the definition of OEM provided in the SRPFJ because it does not license Microsoft's operating system product. SRPFJ § VI.O. The Court remains unconcerned by this fact because the protections afforded to OEMs concern their licensing of Windows, and therefore, it would make little sense to include Apple within the purview of these protections. *See, e.g.*, SRPFJ § III.A-C, H. Moreover, Apple appropriately receives protections afforded to ISVs. *Id.* §§ III.D, F-G, I and VI.I.

[28] The proposed consent decree's prohibition on exclusive or fixed-percentage agreements extends beyond the specific findings of liability to apply to ICPs and IHVs. This extension is appropriate, as "the public does not suffer because [the defendant] consented to limitations on its activities that could not otherwise be imposed." *Bechtel, 648 F.2d at 666*.

provides broad protection for present and future middleware which competes with Microsoft Middleware. Section III.G.2 directly addresses the liability finding against Microsoft for entering into contracts with IAPs for prominent desktop placement in exchange for the IAPs' exclusive promotion of Microsoft's browser. *Microsoft, 253 F.3d at 68-71*. Subsection G.2 broadens the remedial decree beyond the liability finding with regard to IAPs to protect ICPs as well, despite the fact that liability with regard to Microsoft's agreements with ICPs was ultimately rejected by **[**113]** the appellate court. *Microsoft, 253 F.3d at 71*. This expansion beyond the liability is not over-broad and reflects a means of prohibiting Microsoft from engaging in conduct which is closely related to the conduct for which Microsoft was found liable. *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 697 (1978)* (holding that an injunction that "goes beyond a simple proscription against the precise conduct previously pursued . . . is entirely appropriate").

c. Joint Ventures, Joint Development Agreements, and Joint Services Agreements

The latter portion of § III.G makes clear that neither subsection G.1 nor G.2 prohibits Microsoft from entering into **[*241]** agreements which limit competition within the context of a "bona fide joint venture . . . joint development or joint services arrangement with any ISV, IHV, IAP, ICP, or OEM for a new product, technology or service, or any material value add-on to an existing product, technology or service, in which both Microsoft and the [other entity] contribute significant developer or other resources." *Id.* § III.G. Also excepted from the purview of § III.G are any agreements in which Microsoft **[**114]** licenses intellectual property from a third party. *Id.* This exception provides an incentive for Microsoft to license nascent technology from third-party vendors for distribution with Microsoft products. United States Resp. at 136-37. Such an exception protects the potential for third parties to benefit from Microsoft's broad distribution capability. *Id.*

The above-described limitations placed on subsections G.1 and G.2 receive some criticism to the effect that Microsoft will simply be able to label its agreements "joint ventures" so as to escape the limitations otherwise imposed by § III.G. As is often the case, these critics fail to carefully consider the precise wording of the provision. The words "bona fide" modify the joint ventures to which the exception applies. SRPFJ § III.G. Were Microsoft to simply label ordinary transactions as "joint ventures" because they involve some amount of collaboration, the "bona fide" requirement would not be met. Similarly, criticism of the use of the term "bona fide" fails to recognize that the term is a legal term which carries with it a particular legal significance. Therefore, there is nothing vague or ambiguous about its use. In a **[**115]** similar vein, comments which assert that the terms "joint development or joint services arrangement" are without meaning fail to take account of the language modifying these terms which makes clear that the joint activity must be aimed at new products, technologies, or services, or a material value add-on to existing technology, and that the parties to the arrangement must each contribute significant resources. *Id.* The exception is tailored to permit joint activities that are genuinely procompetitive and, indeed, recognizes that non-compete clauses may be appropriate where two firms legitimately share resources to create new or improved opportunities for consumers. United States Resp. at 136. Given these considerations, the permissive exceptions to the restrictive portion of § III.G. are shown to be far more narrow in their application than most recognize. Accordingly, the Court sees little merit in the general criticism that the exceptions in § III.G for joint ventures, joint development agreements, and joint services agreements are overly broad.

The more salient criticism of § III.G arises from the fairly broad exception of "any agreements in which Microsoft licenses intellectual **[**116]** property in [sic] from a third party" from the purview of the prohibitive portions of the provision. SRPFJ § III.G. Critics of this portion of the SRPFJ contend that Microsoft can simply add an intellectual property license to an exclusive agreement in order to circumvent the prohibitive portion of § III.G. The United States explains that the exception "permits Microsoft, in licensing new technology from an ISV for incorporation into a Microsoft product, to ensure that the ISV will not also license the same technology to a competitor who hopes to 'free ride' on Microsoft popularization of the technology." United States Resp. at 137. In this regard, the government argues that the exception preserves Microsoft's "incentives to invest in such popularization." *Id.*

Although the government's explanation is reasonable, the government does not **[*242]** explain why the exception for agreements in which Microsoft licenses intellectual property is not more carefully tailored to address the circumstance referenced by the government. Given the breadth of the exclusion, it is possible that agreements which the government did not intend to exclude from the prohibitory portion of § III.G, nonetheless, **[**117]** will be excluded. The government appears far less concerned about this potential over-breadth, than with the potential for the exception to provide an unintended loophole. In this regard, the government observes that a license of intellectual property as a pretext for otherwise exclusionary terms would be subject to review by the United States, and could result in a request for modification if the provision is abused. *Id.*

The exception from § III.G of agreements in which Microsoft licenses third-party intellectual property provides an additional example of a provision which the Court, if called upon to craft a remedy, would likely not craft so broadly. However, it scarcely bears repeating that ***HN15***[] a court presiding over a Tunney Act proceeding need not conclude that the terms of the consent decree "will *best* serve society," but only that the proposed decree is "within the reaches of the public interest." *Microsoft, 56 F.3d at 1460* (quoting *Western Elec. Co., 900 F.2d at 309*) (emphasis in original). Had the government been unable to offer a reasoned justification and predictive effect of the exception in § III.G for agreements in which Microsoft **[**118]** licenses intellectual property, the Court might well have concluded that the exception does not accord with the public interest. The Court is not faced with such a circumstance. The government has offered a legitimate justification for the balance struck between the prohibitive and permissive portions of § III.G, and the Court declines to second guess the wisdom of this balance. Recalling that "above all, [a] consent decree . . . [is] the product[] of a negotiated settlement from which, presumably, no party obtained everything it wanted," *Thomson, 949 F. Supp. at 914*, the Court takes the view that this particular exception in § III.G of the SRPFJ may reflect one of those instances in which the government exchanged some degree of breadth for some other valuable benefit. *See* *AT&T, 552 F. Supp. at 151* ("Naturally, the agreement reached normally embodies a compromise; in exchange for the saving of cost and the elimination of risk, the parties each give up something they might have won had they proceeded with the litigation.") (quoting *United States v. Armour & Co., 402 U.S. 673, 681, 29 L. Ed. 2d 256, 91 S. Ct. 1752 (1971))*. Given the totality of the facts, the **[**119]** Court cannot conclude that the breadth of the exception in the latter portion of § III.G so far detracts from the remainder of the provision, and the other portions of the decree, that it falls beyond the reaches of the public interest.

d. Limitations on Support for Competing Products

Section III.F.2 [29] is aimed directly at Microsoft's dealings with ISVs. Pursuant to § III.F.2 Microsoft may not condition any benefit or "grant of Consideration" on an ISV's "refraining from developing, using, distributing, or promoting" software that competes with Microsoft Platform Software. *Id.* § III.F.2. Excepted from the protections of § III.F.2, however, are agreements which limit an ISV's "development, use, distribution, or promotion" of such competing software, where such agreement is reasonable in its terms and "reasonably necessary to . . . a bona fide contractual obligation of the ISV to use, **[*243]** distribute or promote any Microsoft software or to develop software for, or in conjunction with, Microsoft." *Id.* § III.F.2.

[120]** The government explains the exception in § III.F.2 as a means by which to "protect ISVs' opportunity to engage in legitimate, procompetitive arrangements with Microsoft," such as a very basic agreement whereby Microsoft "provides an ISV with funds for the promotion of Microsoft software and prohibits the ISV from spending those funds to promote rival software." United States Resp. at 127-28. In the face of criticism, the United States maintains that this exception will not permit Microsoft to "enter into an agreement that provides an ISV with assistance in promoting a Microsoft product on [the] condition that the ISV not also distribute, use, or promote, a rival product, because such a limitation would not be reasonably related to the ISV's obligation to promote the Microsoft product." *Id. at 128*. The government readily admits that the language of this exception is somewhat "general[]" but contends that this generality is a "necessary tradeoff ." *Id.* In this regard, the government argues that more precise provisions provide greater opportunity for circumvention, while a provision like § III.F.2, which relies on "general but established legal terms," will provide the **[**121]** government and the Court with greater flexibility to consider the substance rather than the "mere form of Microsoft's future agreements with ISVs." *Id.* The government further notes that were there no such exception, § III.F.2 would prohibit lawful, procompetitive agreements with ISVs. *Id.* This explanation satisfies the Court that the terms of § III.F are not drawn contrary to the public interest.

---

[29] Section III.F.1 is discussed *supra* Part III.B.1.c.

Viewed in their entirety, §§ III.F and III.G not only prohibit the anticompetitive conduct identified by the appellate court with regard to ISVs, IAPs, and IHVs, but these provisions extend further, to address Microsoft's conduct with other participants in the industry even though Microsoft's dealings with these entities did not give rise to liability in this case. More importantly, these provisions strike a delicate balance between the prohibition of conduct found to be anticompetitive, or conduct closely related to conduct found to be anticompetitive, and the preservation of conduct that benefits other participants in the industry, as well as consumers. The Court regards it particularly necessary when addressing Microsoft's contracting power to ensure that procompetitive, mutually **[**122]** beneficial arrangements are not prohibited by the terms of an overbroad decree. Acknowledging that the United States has weighed these considerations in the first instance, the Court regards the balance struck as one which falls within the realm of an acceptable remedy.

4. API Disclosure, Interoperability, and Related Provisions

Sections III.D and III.E generally concern the disclosure of APIs, communications protocols, and other technical information for purposes of ensuring successful interoperation with Microsoft's Windows operating system. Subsection D requires Microsoft to disclose the "APIs and related Documentation" used by "Microsoft Middleware" to interoperate with Windows. SRPFJ § III.D. The provision defines "APIs" as "the interfaces, including any associated callback interfaces, that Microsoft Middleware running on a Windows Operating System Product uses to call upon that Windows Operating System Product to obtain any services from that Windows Operating System Product." *Id.* While the rationale for this type of disclosure rests, in part, upon the finding of liability for conditioning the provision of technical information on illegal, exclusive **[*244]** agreements, **[**123]** *Microsoft, 253 F.3d at 71-72*, it can be viewed more broadly to relate to the United States' theory of the case as a whole. As recounted above, the United States proceeded to trial on the theory that Microsoft had acted anticompetitively in an effort to boost its own middleware and stifle rival middleware because those products posed a potential "platform threat." The disclosure of interfaces and related technical information pursuant to § III.D ensures the ability of competitive products to interoperate effectively with the Windows operating system and in a manner which is not disadvantaged by comparison to Microsoft's middleware technology. Accordingly, such disclosure has the potential to increase the ability of competing middleware to threaten Microsoft's operating system monopoly.

a. API Disclosures

One of the more prevalent criticisms of the SRPFJ arises in conjunction with § III.D, relating specifically to the use of the term "Microsoft Middleware." As indicated above, § III.D mandates the disclosure of the APIs relied upon by "Microsoft Middleware to interoperate with a Windows Operating System Product." SRPFJ § III.D. The definition of "Microsoft **[**124]** Middleware" is very similar to the definition of "Microsoft Middleware Product," discussed *supra* Part III.B.1.a.ii. The term "Microsoft Middleware" is used in this context, rather than "Microsoft Middleware Product," because § III.D requires the identification of particular pieces of software code.

In order to identify specifically the appropriate pieces of code, the definition of "Microsoft Middleware" identifies the code that Microsoft distributes separately from Windows and trademarks or identifies as a major version of any Microsoft Middleware Product. SRPFJ § VI.J. The oft-criticized separate distribution requirement provides not only a ready means by which to identify code, but acknowledges that the most competitively significant products will be distributed and updated at more frequent intervals than Microsoft's entire operating system product. *See* United States Resp. at 44-45. Similarly, the requirement of trademarking serves also to identify the competitively significant software, while simultaneously excluding security patches, fixes, or other small downloads. *Id. at 47-48*. Lastly, "Microsoft Middleware" must provide functionality which is the **[**125]** same or substantially similar to the functionality provided by a "Microsoft Middleware Product." SRPFJ § VI.J. Because a "Microsoft Middleware Product," by definition, is part of Windows, *id.* § VI.K, this last major requirement serves to ensure a close link to the monopoly market and Microsoft's product in that market. *See* United States Resp. at 4849. On this point, the government explains, in particular, that its case was never intended to address products that Microsoft never distributed with its Windows operating system, and therefore, the relationship to Microsoft's monopoly product is entirely consonant with the theory of liability. *Id. at 48*. The government further explains that the parameters of "Microsoft Middleware" exceed mere application to the Microsoft counterparts to Navigator and Java, extending to a number of present and future middleware technologies. Such expansion is appropriately forward-looking and accords with the general law of remedies in ***antitrust law***. *See* *United Shoe, 391 U.S. at 250*.

Criticisms of this definition in the government's remedial decree are wide-ranging, with most sharing the view that the definition **[**126]** should apply to more Microsoft software. The United States has offered a **[*245]** reasoned justification for each limitation in the definition. These explanations are directly responsive to the criticism and serve to rebut all of the various accusations regarding the parameters of "Microsoft Middleware." In short, the Court is not convinced that the parameters of "Microsoft Middleware" and the ensuing impact upon Microsoft's obligations under the proposed final judgment are inappropriately drawn or are in conflict with the public interest.

Additionally, the definition of "API" receives criticism by those filing comments. API is defined in § III.D as "the interfaces, including any associated callback interfaces, that Microsoft Middleware running on a Windows Operating System Product uses to call upon that Windows Operating System Product in order to obtain any services from that Windows Operating System Product." SRPFJ § III.D. Some entities filing comments complain that the definition of API is too narrow. In his *Findings of Fact*, Judge Jackson described APIs as the "synapses at which the developer of an application can connect to invoke pre-fabricated blocks of code in the operating **[**127]** system." *Findings of Fact* P 2. The definition in the SRPFJ is consistent with the description in the *Findings of Fact* and, given the liability which was affirmed by the appellate court, is appropriately limited in scope. In this regard, the Court notes that because liability in this case concerns middleware, it would far exceed that liability to require Microsoft to disclose interfaces between its operating system products and all applications and devices. Moreover, as the government explains, the definition of API is fairly broad such that "whatever Microsoft Middleware uses to request services from a Windows Operating System Product, whether it includes something that could arguably be called a 'file format' or not, is the subject of disclosure." United States Resp. at 144. Accordingly, the Court concludes that the definition of API is sufficiently broad, yet appropriately tailored to reflect the extent of liability in this case.

Similarly, some entities filing comments complain that the definition of "Documentation" is too limited. The Court finds little merit in this complaint. "Documentation" is defined in the SRPFJ as "all information regarding the identification and **[**128]** means of using APIs that a person of ordinary skill in the art requires to make effective use of those APIs." SRPFJ § VI.E. The goal of this provision is clear; the "Documentation" should enable a software developer to utilize the APIs which are disclosed pursuant to § III.D. The Court is satisfied that the definition of "Documentation" is appropriately drawn to accomplish that legitimate goal.

One additional complaint relevant to this discussion concerns the timing of the disclosures mandated by § III.D. Section III.D provides for two alternatives relevant to timing, one for new major versions of Microsoft Middleware, and another for the release of a new version of a Windows Operating System Product. *Id.* § III.D. "In the case of a new major version of Microsoft Middleware, the disclosures . . . shall occur no later than the last major beta test release of that Microsoft Middleware." *Id.* The United States explains that the "last major beta test release for various Microsoft Middleware Products" will likely occur "anywhere from two to seven months prior to the commercial release of the product." United States Resp. at 153. The government further explains that earlier release **[**129]** of the information is not feasible, despite the fact that developers within Microsoft may have earlier access to the APIs. *Id.* at 154. This is so because the API is often not finalized, tested, and fully documented at that stage, and may, in fact, continue to change. *Id.* **[*246]** Any alteration to the API threatens not only to destroy the usefulness of the disclosure for software developers, but has the capacity to hinder developers in the creation of software. *Id.* Given these bases, it does not seem unreasonable to fix a time for disclosure which will ensure that the disclosed information is stable and unlikely to be subjected to future alteration.

"In the case of a new version of a Windows Operating System Product, the obligations imposed by this Section shall occur in a Timely Manner." SRPFJ § III.D. "Timely Manner" appears in the definition section and "means at the time Microsoft first releases a beta test version of a Windows Operating System Product that is made available via an MSDN subscription offering or of which 150,000 or more beta copies are distributed." *Id.* § VI.R. The government explains that the timing of disclosures relevant to the release of new Windows **[**130]** Operating System Products reflects the "approximate current MSDN subscription base" such that disclosure is triggered by the distribution of 150,000 beta copies of the software. United States Resp. at 155. Once again, given the explanations in the government's response to public comments, the timing of disclosures pursuant to § III.D does not seem to be unreasonable or unjustified.

Disclosure beyond these parameters, while potentially useful to other industry participants in combating Microsoft's dominance in the operating system market, is not absolutely required by the liability in this case. Indeed, the disclosures in § III.D are not clearly directed at the redress of a specific finding of liability, but instead advance the more general antitrust remedial goal of "eliminating the effects of the illegal conduct." *Nat'l Soc'y Prof'l Eng'rs, 435 U.S. at 698*. Both the United States and Microsoft acknowledge that, at present, Microsoft discloses, supports, and evangelizes many Windows APIs. *See* Microsoft Mem. in Support of the SRPFJ at 29; United States Resp. at 140. Of course, Microsoft has a clear business incentive to do so, as it is this disclosure, in part, **[**131]** which makes the Windows platform attractive to applications developers. United States Resp. at 140-41. As the United States explains, the mandated disclosures in § III.D will be useful "in those cases where Microsoft may have a strategic interest in withholding APIs that outweighs Microsoft's natural incentive to disclose them--namely, where Microsoft's own middleware is competing with rival middleware that threatens the applications barrier to entry." *Id.* In this regard, § III.D appropriately requires disclosure of "the most competitively significant APIs . . . used by competing [middleware] products, not those used by completely different types of software." *Id. at 140*.

b. Communications Protocols

In a similar vein § III.E requires that Microsoft license, for purposes of interoperating or communicating with a Windows Operating System Product, any communications protocol installed on a Windows client which is used to interoperate or communicate with a Microsoft server operating system product without the addition of software code to the client. SRPFJ § III.E. This aspect of the proposed consent decree, like § III.D, is forward-looking and seeks to address **[**132]** the "rapidly growing server segment of the market." United States Mem. at 59. A "growing number of applications . . . run on servers, rather than on the desktop." Sibley Decl. P 56. These technologies "represent[] a strong source of competition to Microsoft in the business computing segment and may yet make a serious attack on the applications barrier to entry in the desktop PC market." *Id.* Hence, the goal of this **[*247]** disclosure is to ensure that rival middleware can interoperate with servers running Microsoft's server operating system software and thereby compete vigorously with Microsoft middleware. *Id.* In addition, enabling non-Microsoft middleware to interoperate with Microsoft's operating systems in the server segment ensures that Microsoft does not "incorporate into Windows features or functionality with which only its own servers can interoperate, and then refuse to make available information about those features non-Microsoft servers need in order to have the same opportunities to interoperate with the Windows operating system." United States Mem. at 58-59.

Although this aspect of the remedy plainly exceeds the scope of liability it is appropriately forward-looking. **[**133]** *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 132, 23 L. Ed. 2d 129, 89 S. Ct. 1562-63 (1969)*; *Int'l Salt Co. v. United States, 332 U.S. 392, 400, 92 L. Ed. 20, 68 S. Ct. 12 (1947)*. Certainly it cannot be said that the disclosures specified in Sections III.D and E are a blanket prohibition on all future violations of the antitrust laws. *See* *Zenith Radio, 395 U.S. at 133*. To the contrary, these provisions are closely connected with the theory of liability in this case and further efforts to "ensure that there remain no practices likely to result in monopolization in the future." *United Shoe, 391 U.S. at 250*. As a result, the provisions plainly fall within the public interest.

c. Interoperation

Somewhat controversial in § III.D and E is the fact that the SRPFJ does not include a definition of "interoperate." Entities raising this concern assert that the CIS offers some explanation of the term, but in the absence of a definition in the SRPFJ, there is no guarantee that the term will be given the meaning ascribed in the CIS. In the CIS, the government explains that "the effect of Section III.D. is to assure Non-Microsoft Middleware meaningful access **[**134]** to the same services provided by the operating system as those available to Microsoft Middleware." CIS at 35. Similarly, with regard to § III.E, the CIS explains that subsection E "ensures that ISVs will have full access to, and be able to use, the protocols that are necessary for software located on a server computer to interoperate with, and fully take advantage of, the functionality provided by any Windows Operating System Product." *Id.* From this language, it appears that the United States defines the ability to "interoperate" as the ability to "fully take advantage of functionality" or as the ability to have "meaningful access" to services. *Id. at 35-36*. Adding further confusion, the government, in its responses to the public comments offers that § III.E is intended to "allow for the possibility of seamless two-way interoperability." United States Resp. at 165.

Critics note, and the government acknowledges, that Microsoft has espoused a different understanding of "interoperate" in its submissions to the European Union. United States Resp. at 164. Nevertheless, the government insists that it has reached a "meeting of the minds" with Microsoft as to the intended meaning **[**135]** of "interoperate" and its effect in the SRPFJ. *Id.* The government further notes that, in an effort to clarify the meaning of "interoperate," it agreed with Microsoft to add language to § III.E., supplementing the term such that "interoperate" became "interoperate, or communicate." *Id. at 164-65*; *compare* RPFJ § III.E, *with* SRPFJ § III.E. This addition provides a very simple definition of "interoperate" in the text of the decree, clarifying the parties' intent.

[*248] Courts reviewing proposed consent decrees pursuant to the Tunney Act are obliged to pay close attention to any potential ambiguity, particularly since it is the district court which must enforce the decree. *Microsoft, 56 F.3d at 1462-63*. Aware of the criticism of the lack of definition of "interoperate," the Court inquired of Microsoft as to whether there was some ambiguity in the decree or a lack of agreement with the government. Hearing Transcript ("Tr.") at 81-82 (March 6, 2002). Microsoft, responded carefully, stating that, "the competitive impact statement and the extraordinarily lengthy response to comments . . . were prepared without any input from or consultation with Microsoft." **[**136]** *Id. at 82*. Further noting that "it is impossible that two different people or parties would write any document in exactly the same way," Microsoft nevertheless expressed its agreement with the government that the parties "have a meeting of the minds" and "certainly agree with the scope and operation of the judgment." *Id. at 82-83*; *see also* United States Resp. at 164.

Taking the parties as their word, the Court is not compelled to conclude that the parties lack agreement or that the SRPFJ is ambiguous simply because Microsoft has advanced a different understanding of a particular term in an unrelated forum. So long as Microsoft and the United States have a common understanding in this case, the fact that Microsoft advanced a different position in some other context is not relevant. Moreover, a clear definition of the term appears in § III.E, as a result of the addition of the words "or communicate" in order to clarify the meaning of the term "interoperate," SRPFJ § III.E ("Microsoft shall make available . . . any Communications Protocol that is . . . (i) implemented in a Windows Operating System Product installed on a client computer, and (ii) used to *interoperate, or* **[**137]** *communicate*, natively . . . with a Microsoft server operating system product.") (emphasis added). *See* United States Mem. Regarding Modifications at 5-6; United States Resp. at 164-65. Accordingly, the use of the term in § III.E, at present, does not appear to carry ambiguity. Moreover, as the parties' intent will control the interpretation of this decree, *see* *Microsoft, 147 F.3d at 945 n. 7*, and given the clarification and ensuing revision, there seems little risk of dispute as to the parties' intent should the use of the term prove troublesome in the future.

The use of the term "interoperate" in § III.D presents a slightly harder problem, as the parties did not augment the use of the term "interoperate" in § III.D with the word communicate." The government's submission is unhelpful on this point, as it refers only to the use of the term "interoperate" in § III.E and does not mention the term's use in § III.D. Nevertheless, the Court cannot conclude that the lack of definition for the term renders the provision ambiguous. Microsoft's obligations are fixed in § III.D primarily by the definition of API, rather than the use of the term "interoperate;" the **[**138]** term "interoperate" serves only to circumscribe the purpose for which the API must be disclosed. SRPFJ § III.D. The definition of API which appears in § III.D strongly indicates the meaning to be given to "interoperate" by its reference to "obtaining services from." *Id.* Therefore, rather than require a separate definition, the use of the term "interoperate" in § III.D is apparent from its context. Based on this fact and the parties' agreement that they have a "meeting of the minds," the Court is satisfied that Microsoft's **[*249]** obligations under § III.D are sufficiently clear.

It is worthy of note, at this juncture, that § III.E is directed at a segment of the industry which was addressed in a very limited manner during the liability trial and was not related to the imposition of liability. The government explains the inclusion of this provision based upon the rationale that "the United States believed that the RPFJ's effectiveness would be undercut unless it addressed the rapidly growing server segment of the market." United

States Mem. at 59. Given the forward-looking nature of § III.E, and the limited relation of servers to the liability imposed in the case, the Court recognizes **[**139]** that the protections in § III.E evidence the successful efforts of the United States to obtain a decree which not only redressed the specific conduct found to violate the antitrust laws, but to obtain protection which is prospective in its focus. Such a prospective remedy is particularly warranted in this case given the rapid pace of change in the software industry. *See* *Microsoft, 253 F.3d at 49*. In the absence of this type of provision and the other prospective provisions in the SRPFJ, it is quite possible that the core of the decree would prove prematurely obsolete. Instead, Plaintiffs and Microsoft appear to have proposed a decree that acknowledges the continuing change in the industry and expands appropriately from the imposition of liability. Although the government may not have been "strictly entitled" to such expansion, this fact cannot itself render the decree in conflict with the public interest, as contemplated by the Tunney Act. *Bechtel, 648 F.2d at 666*.

d. Reasonable, Non-Discriminatory Licenses

Closely related to the disclosures mandated by § III.D and E is § III.I, which concerns the terms pursuant to which Microsoft must **[**140]** license its intellectual property rights in conjunction with it obligations under the SRPFJ. Subsection I provides that Microsoft shall offer licenses to the relevant entities (ISVs, IHVs, IAPs, ICPs, and OEM) of "any intellectual property rights owned or licensable by Microsoft that are required to exercise any of the options or alternatives expressly provided to them under this Final Judgment." SRPFJ § III.I. Such licenses shall be "reasonable and non-discriminatory" in all regards, including the amount of royalties and monetary consideration, and shall be limited in scope such that they are no broader than necessary. *Id.* § III.I.1-2. In addition, pursuant to § III.I, Microsoft may reserve the right to prohibit the transfer, assignment, or sublicense of the intellectual property right conferred by the license. *Id.* § III.I.3. As is apparent from the terms of subsection I and the government's explanation, this provision "ensures that Microsoft cannot use its intellectual property rights to undermine the competitive value of its obligations in Sections III.D and E, while at the same time [it] permits Microsoft to take legitimate steps to prevent unauthorized use of its **[**141]** intellectual property." United States Resp. at 171. [30]

One significant complaint about this provision is that Microsoft should not be entitled to *any* royalty in exchange for its disclosures. The Court finds little merit in this position. To prohibit Microsoft from charging a reasonable royalty would require **[*250]** Microsoft to give away significant amounts of valuable intellectual property rights. The Court does not agree that the liability in this case supports, much less requires, such a drastic and draconian remedy. *See* *Microsoft, 253 F.3d at 106* ("Mere existence of an exclusionary act does not itself justify full feasible relief against the monopolist to create maximum **[**142]** competition") (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW***, P 650a, at 67). The appellate court established "a causal connection between Microsoft's exclusionary conduct and its continuing position in the operating systems market only through inference." *Id. at 106-07*. While this "edentulous" test was sufficient for the imposition of liability, *id. at 79*, the relative potency of the causal connection established during the liability phase cannot be overlooked in a discussion of remedy, *id. at 80* ("Microsoft's concerns over causation have more purchase in connection with the appropriate remedy issue . . . .").

Based on the specific circumstances in this case, the Court finds that the requirement that Microsoft license its intellectual property at reasonable and non-discriminatory rates is entirely appropriate. Because "reasonableness" is generally recognized as an objective standard, *see* *Stringer v. Black, 503 U.S. 222, 237, 117 L. Ed. 2d 367, 112 S. Ct. 1130 (1992)*, its incorporation into the SRPRJ serves to limit substantially the terms that Microsoft may impose in licenses of information disclosed pursuant to the final judgment. Greater specificity **[**143]** as to the terms of the licenses would likely be inappropriate, as case law ***HN16***[] on the subject of licenses and antitrust remedies advises that courts are best excluded from "the administration of intricate and detailed rules" relating to business affairs. *United States v. Paramount Pictures, 334 U.S. 131, 163, 92 L. Ed. 1260, 68 S. Ct. 915 (1948)* ("The judiciary is unsuited to affairs of business management . . . ."). Moreover, the disclosure and licensing of intellectual property serves primarily to "unfetter" the market from the effects of Microsoft's illegal conduct, rather than redress very particular exclusionary conduct. *Ford Motor Co.*, 405 U.S. at 577. Therefore, the disclosure and

---

[30] During the public comment period, some entities lodged complaints about RPFJ § III.I.5, which required a cross-license of certain intellectual property rights. In response, the United States and Microsoft agreed to amend § III.I to remove subsection I.5 in its entirety. *Compare* SRPFJ § III.I, *with* RPFJ § III.I.

license of such information in the absence of a reasonable royalty would impose an unduly confiscatory remedy upon Microsoft.

e. Source Code Access

Related to these disclosure provisions are the complaints of individuals and entities that those receiving such disclosures are not afforded access to the Windows operating system source code. This complaint reflects the fact that the IFJ originally entered by Judge Jackson, thereafter vacated by the appellate court, included a provision mandating **[**144]** access by representatives of OEMs, ISVs, and IHVs to "relevant and necessary portion of the source code" in order "to facilitate compliance, and monitoring of compliance" in conjunction with efforts to enable interoperation. *Microsoft, 97 F. Supp. 2d at 67*. In this regard, the IFJ required Microsoft to make the relevant portions of the source code accessible at a "secure facility" where appropriate persons could "study, interrogate and interact" with the code. *Id.* The SRPFJ, like the IFJ, utilizes access to the source code as a means of enforcement, but limits such access to a special committee which serves Plaintiffs, rather than permitting access by representatives of the OEMs, ISVs, and IHVs. SRPFJ § IV.A.2. Hence, the same goal--ensuring compliance--is accomplished, albeit through a slightly different means. This shift in focus is abundantly appropriate given that it is Plaintiffs who are responsible for enforcement of the decree, not third parties in the marketplace who will likely benefit from **[*251]** the decree's provisions. To the extent entities or individuals desire access to the Microsoft source code for purposes other than ensuring compliance with the consent, **[**145]** such a use is discordant with the intent underlying the provision, and its predecessor in Judge Jackson's IFJ. As a result, the Court finds the absence of source code access for OEMs, ISVs, and other third parties to be of little concern.

f. Security-Based Limitations

Subsection J limits Microsoft's disclosures under the SRPFJ to ensure that the mandated disclosures do not result in the release of information which "would compromise the security of a particular installation . . . of anti-piracy, anti-virus, software licensing, digital rights management, encryption or authentication systems, including without limitation, keys, authorization tokens or enforcement criteria." *Id.* § III.J.1(a). In addition, subsection J excludes from disclosure any API, interface, or other information which Microsoft is "lawfully directed" by a "governmental agency of competent jurisdiction" not to do so. *Id.* § III.J.1(b). The chief complaint about these so-called "security carve-out" provisions is that they are more broad than is necessary to accomplish the goal of ensuring security. Such complaints ignore the limitations in the provision that require the release of information to **[**146]** work an *actual* compromise of security, rather than a potential, hypothetical, or likely compromise of security. Similarly, as the government explains, the provision applies to "particular installations," meaning "end-user installations or a specific, narrowly-prescribed subset of installations" and not all installations using a particular product or functionality. United States Resp. at 179. Accordingly, the Court finds complaints about § III.J.1 unpersuasive.

Subsection J further limits Microsoft's disclosure obligations with regard to a specific subset of the APIs and communications protocols that Microsoft will have to disclose. The provision specifies that Microsoft may condition licenses relating to "anti-piracy systems, antivirus technologies, license enforcement mechanisms, authentication/authorization security, or third party intellectual property protection mechanisms of any Microsoft product" on the requirement that the licensee:

> (a) has no history of software counterfeiting or piracy or willful violation of intellectual property rights, (b) has a reasonable business need for the API, Documentation or Communications Protocol for a planned or shipping product, **[**147]** (c) meets reasonable, objective standards established by Microsoft for certifying the authenticity and viability of its business, (d) agrees to submit, at its own expense, any computer program using such APIs, Documentation or Communication Protocols to third-party verification, approved by Microsoft, to test for and ensure verification and compliance with Microsoft specifications for use of the API or interface, which specifications shall be related to proper operation and integrity of the systems and mechanisms identified in this paragraph.

SRPFJ § III.J.2. Plainly, the thrust of this provision is to provide some protection for Microsoft from companies or individuals which may seek to make improper use of the API documentation and communications protocol disclosures made pursuant to the SRPFJ. Contrary to some comments, nothing in this provision authorizes Microsoft to discriminate against certain individuals or companies based on their development philosophy or not-for-profit status. Instead, subsection J.2 strikes a balance between protecting Microsoft's intellectual property rights and effecting the **[*252]** mandates of the decree. Indeed, the fears of some that they will face **[**148]** exclusion based upon having been sued for patent infringement and lost are unfounded, as such a suit is not itself evidence of "*willful* violation of intellectual property rights." *Id.* (emphasis added). Subpart (c) of § III.J merely offers Microsoft some flexibility in establishing reasonable and nondiscriminatory standards for determining that an individual or entity has not requested a license of intellectual property for some improper or illegitimate purpose that threatens Microsoft security. Nothing in the phrasing "reasonable, objective standards" authorizes Microsoft to use this term of the proposed decree to discriminate or oppress industry participants at its whim. *Id.* Concomitantly, subpart (d) does not entitle Microsoft to the licensee's intellectual property, but instead provides for independent third-party testing and verification relevant to Microsoft specifications and only where the specifications are "related to the proper operation and integrity of the systems and mechanisms identified in [§ III.J.2]." *Id.* The government explains that the cost of such independent testing is to be borne by the licensee because "with other third-party testing programs **[**149]** in the software industry, the cost is usually borne by the organization submitting the program." United States Resp. at 183. As all of these provisions constitute reasonable means of balancing competing interests, the Court fails to see any substantial merit in the complaints and comments of the provision's detractors.

5. Term of Decree

Section V of the SRPFJ provides that the decree "will expire on the fifth anniversary of the date it is entered by the Court." SRPFJ § V.A. Section V further empowers Plaintiffs to apply to the Court "for a one-time extension" of the five-year term of the decree "in any enforcement proceeding in which the Court has found that Microsoft has engaged in a pattern of willful and systematic violations." *Id.* § V.B.

Though simple in language and effect, the proposed term of the decree, five years from the date of entry by the Court, has also met with significant criticism. Critics argue that the five-year term is too short. These individuals and entities contend that there is no basis to deviate from the general policy of the Antitrust Division to avoid negotiation of decrees of less than ten years in duration. *Antitrust Division Manual* **[**150]** at IV-54 (3d ed. Feb. 1998) ("With regard both to the preparation of proposed draft decrees by staff as well as to decree proposals that may be made by defendants, note that the Division's standard decree language requires that the consent decree expire on the tenth anniversary of its entry by the court. The staff should not negotiate any decree of less than 10 years' duration, although decrees of longer than 10 years may be appropriate in certain circumstances."). The government responds that each decree must be tailored to fit the circumstances of the case, United States Resp. at 203 (citing *Antitrust Division Manual* at IV-51 ("While the scope of relief obtained in prior antitrust cases may be viewed as precedent, the theory behind equitable relief is that it should be fashioned to fit the particular facts of the case at issue."), and notes that the Antitrust Division has imposed five-year terms in numerous other decrees, *id.* (citing cases).

The government justifies departure from the standard ten-year term in this case because of the pace of technological change in the computer industry. United States Resp. at 202. At this point in the case, there can be no dispute that **[**151]** the industry has shown a great capacity for rapid change. As the D.C. Circuit noted in June of 2001:

> **[*253]** Just over six years have passed since Microsoft engaged in the first conduct plaintiffs allege to be anticompetitive. As the record in this case indicates, six years seems like an eternity in the computer industry. By the time a court can assess liability, firms, products, and the marketplace are likely to have changed dramatically. This, in turn, threatens enormous practical difficulties for courts considering the appropriate measure of relief in equitable enforcement actions, both in crafting injunctive remedies in the first instance and reviewing those remedies in the second.

Microsoft, 253 F.3d at 49. The government observes that absent a departure from the ten-year term, there exists a substantial risk that the decree will become highly regulatory in nature. United States Resp. at 203. Given these considerations, it is difficult to fault the government for departing from the usual ten-year term in this instance.

6. Compliance and Enforcement

The final portions of the SRPFJ detail the procedures for enforcement of the decree. As noted **[**152]** above, ***HN17***[] precedent instructs the Court to "pay close attention" to provisions that address enforcement of a consent decree. *Microsoft, 56 F.3d at 1462*. Although divided into numerous parts and subparts, virtually every aspect of the enforcement and compliance mechanisms interrelates with some other aspect, such that the provisions can be best understood when viewed as a whole, rather than piecemeal. Accordingly, the Court will commence its careful analysis of the compliance and enforcement provisions in the proposed consent decree with detailed descriptions of the provisions. Once this background is established, the Court will examine the most common and salient complaints about the compliance and enforcement provisions and assess whether these complaints render this aspect of the decree to be in discord with the public interest.

a. Technical Committee and Compliance Officer

The initial focus of this portion of the consent decree concerns the "Technical Committee" which serves to "assist in enforcement of and compliance with" the terms of the consent decree. SRPFJ § IV.B.1. The three committee members are to be "experts in software design and programming. **[**153]** " *Id.* § IV.B.2. The independence of the committee members is ensured by the exclusion from candidacy of any individual employed by Microsoft or a Microsoft competitor in the past year, or retained as a consulting or testifying expert by any person in this action or other action adverse to Microsoft. *Id.* In addition, committee members shall not perform any work for Microsoft or a Microsoft competitor for two years after serving on the committee. *Id.*

Section IV.B establishes a detailed procedure for the selection of the three committee members, with each side selecting one member, and those two members selecting the third member. *Id.* § IV.B.3. All members of the committee must be appointed by the Court to serve. *Id.* Committee members shall serve for a 30-month term, which is renewable at the option of the party that initially selected that member of the committee. *Id.* § IV.B.4. The third member may be reappointed or replaced pursuant to the same procedure by which that member was selected. *Id.*

Although the Technical Committee serves Plaintiffs, Microsoft is responsible for the cost and expense of the service of the committee, including the payment of reasonable **[**154]** fees and expenses. *Id.* § IV.B.6. In addition, Microsoft is obligated **[*254]** to provide each committee member with a permanent office and related facilities on its corporate campus in Redmond, Washington. *Id.* § IV.B.7. At the further cost and expense of Microsoft, the committee may, with approval of the government, hire impartial staff and consultants to assist the committee in performing its duties. *Id.* § IV.B.8.h.

The committee is empowered broadly to "monitor Microsoft's compliance with its obligations under [the] Final Judgment." *Id.* § IV.B.8.a. In concert with this broad grant of authority, the proposed final judgment specifies that the committee may, on reasonable notice to Microsoft, interview Microsoft personnel; inspect and copy Microsoft documents; access Microsoft systems, equipment, premises, and facilities; and require Microsoft personnel to compile data, reports, or other information. *Id.* § IV.B.8.b. The proposed final judgment further specifies that the Technical Committee shall have access to Microsoft source code and that the committee may study, interrogate, and interact with the source code in conjunction with its duties. *Id.* § IV.B.8.c.

[155]** As evidenced by the reporting requirements attendant to the Technical Committee's duties, the committee is answerable to the government. The proposed final judgment mandates that the committee provide bi-annual reports to Plaintiffs regarding the actions undertaken by the committee in furtherance of its duties. *Id.* § IV.B.8.e. Such reports shall include an identification of the business practices reviewed and the ensuing recommendations of the committee to Microsoft. *Id.* Notwithstanding this reporting obligation, the committee must also provide a written report to the government immediately upon "reason to believe that there may have been a failure by Microsoft to comply with any term" of the judgment. *Id.* § IV.B.8.f.

The Technical Committee is empowered to receive complaints from Microsoft's "Compliance Officer" as well as from third parties or the government. *Id.* § IV.B.8.d. When the committee receives complaints from third parties, it may communicate with these parties regarding their complaints, but the committee is ultimately obliged to maintain confidentiality with regard to information obtained from Microsoft. *Id.* § IV.B.8.g. In fact, the proposed final **[**156]** judgment mandates that the committee and its consultants and staff enter into confidentiality agreements with Microsoft such that all information gathered by the committee from Microsoft is not disclosed beyond Microsoft, Plaintiffs, or the Court. *Id.* § IV.B.9. In this regard, the committee is expressly banned from making public statements relating to its activities. *Id.* § IV.B.10.

As the Technical Committee is the enforcement arm of the government, the substantial counterpart to the committee is the Microsoft Internal Compliance Officer. In contrast to the impartiality of the Technical Committee, however, the Compliance Officer is far more closely aligned with Microsoft. The Compliance Officer will be an employee of Microsoft responsible for administering Microsoft's antitrust compliance program and "helping to ensure compliance" with the decree. *Id.* § IV.C. In accordance with the general duty to supervise Microsoft's compliance, the Compliance Officer is specifically obligated under the proposed consent decree with distributing a copy of the final judgment to all present officers and directors of Microsoft and their successors. SRPFJ § IV.C.3. The Compliance Officer **[**157]** must ensure that such officers and directors are "annually briefed on the meaning and requirements of [the] Final Judgment and the U.S. antitrust laws and advising them that Microsoft's legal advisors are available to confer **[*255]** with them regarding any question concerning compliance with [the] Final Judgment or under the U.S. antitrust laws." *Id.* § IV.C.3.c. Likewise, the Compliance Officer must obtain from each such officer and director "an annual written certification that he or she: (i) has read and agrees to abide by the terms of [the] Final Judgment; and (ii) has been advised and understands that his or her failure to comply with [the] Final Judgment may result in a finding of contempt of court." *Id.* § IV.C.3.d. In concert with these duties, the Compliance Officer must maintain records of the above-described distribution and certification. *Id.* § IV.C.3.e. Lastly, the Compliance Officer is specifically obliged to receive complaints from third parties and the government concerning Microsoft's compliance and to maintain a record of all such complaints and the action taken by Microsoft with respect to each such complaint. *Id.* § IV.C.3.g-h

In addition to these **[**158]** core duties, both the Technical Committee and the Compliance Officer are obliged to take certain action in conjunction with efforts toward the voluntary resolution of disputes. Along with the government, the Technical Committee and the Compliance Officer may receive complaints from third parties regarding Microsoft's compliance with the terms of the decree. *Id.* § IV.D. The Compliance Officer and the Technical Committee may also receive complaints from each other and from the government. *Id.* In order to facilitate the communication of such complaints and inquiries by third parties, the Compliance Officer is responsible for providing information on Microsoft's web site regarding the submission of complaints and for enabling the submission of complaints and inquiries to the Compliance Officer via the website. *Id.* §§ IV.C.3.f. and IV.D.3.b. Within thirty days of the receipt of such complaint, Microsoft may "attempt to resolve it or reject it" and must then "promptly advise the [Technical Committee] of the nature of the complaint and its disposition." *Id.* § IV.D.3.c.

Correspondingly, when the Technical Committee receives complaints, it shall investigate such complaints **[**159]** and consult with the government regarding such investigation. *Id.* § IV.D.4. During the investigation, the Technical Committee shall meet with the Compliance Officer in an effort to allow Microsoft to respond to the substance of the complaint and, thereby, reach an informal resolution of the complaint where possible and appropriate. *Id.* Where the committee finds merit in a complaint, it shall so advise Microsoft and Plaintiffs and propose a cure. *Id.* § IV.D.4.c. Notably, the work product, findings, and recommendations of the committee are not to be admitted in "any law enforcement proceedings before the Court for any purpose," and members of the committee are prohibited from testifying in any capacity before a court or other tribunal. *Id.* § IV.D.4.d. Similarly, any information gathered by or any report from the Technical Committee is to be treated as highly confidential pursuant to the Protective Order entered in this case. *Id.* § IV.B.9.

Notwithstanding all of the procedures in place with regard to the Technical Committee, ultimately the power to enforce the terms of the decree rests with the government. SRPFJ § IV.A. Accordingly, representatives of the government **[**160]** may, [31] in complete disregard of the Technical Committee, **[*256]** subject to lawful privilege, investigate and inspect Microsoft source code, books, accounts, correspondence, memoranda, and the like in conjunction with enforcement. *Id.* § IV.A.2. The government may interview Microsoft employees and agents and require submission of written reports. *Id.* Although Plaintiffs possess "the authority to seek such orders as are necessary from the Court to enforce [the] Final Judgment," on the occasion that the United States alleges a violation of §§ III.C, III.D., III.E, or III.H, it must first provide Microsoft with the opportunity to cure prior to seeking an order from the Court. *Id.* § IV.A.4. Any such cure will not constitute a defense to enforcement with respect to "knowing, willful or systematic violations." *Id.*

[161]** Having thoroughly reviewed the provisions specific to compliance and enforcement proposed by the parties, the Court turns its attention to the merits of these provisions. The most common complaints about the compliance and enforcement scheme concern the Technical Committee, with the overall rallying cry that the committee will be an ineffective tool for delay. In sum, in the Court's view, much of the criticism in this regard misunderstands the role of the Technical Committee. Although Microsoft plays a role in the selection of the committee's members and the committee is portrayed as "independent" in many regards, the proposed decree itself, as well as the parties' filings make clear that the committee exists to assist the government in enforcing the decree. *See, e.g.*, United States Resp. at 191-93; Microsoft Mem. in Support of the SRPFJ at 61; CIS at 56-58. The impartial or independent nature of the committee's members exists primarily to enable investigation of third-party complaints for purposes of enforcement. Impartiality of the committee will likely foster an environment of cooperative resolution, rather than one of persistent conflict and litigation. Otherwise, attempts **[**162]** at enforcement have a greater potential to take on the tenor of adversary proceedings, resolved in most instances with great difficulty and delay.

Importantly, the Technical Committee is not intended as a substitute for the enforcement authority of the United States. As explained at the Tunney Act hearing, the proposed consent decree "does not . . . cede the enforcement powers of the Department of Justice to some other entity." Tr. at 39. Instead, the proposed decree appropriately devises a mechanism for the provision of impartial and expert compliance assessment to the parties charged with enforcement. Such assistance, which comes at a cost to Defendant only, can only assist Plaintiffs' enforcement efforts and should not be viewed as a hindrance or a cause of delay. Dovetailing with the misunderstanding of the role of the Technical Committee are complaints regarding the qualifications for the committee's members. Because the SRPFJ sets forth only minimum qualifications with regard to technical expertise, some entities and individuals complain that the committee will be unskilled at interpretation of the decree--which requires legal expertise. As the legal interpretation of the decree **[**163]** is properly left to the parties, with ultimate authority resting with the Court, the focus on the technical expertise of the Technical Committee is far from troubling. Although the committee will investigate technical issues and advise the government, the responsibility remains with the government to examine the terms of the decree and assess in the first instance whether, as a legal matter, the decree has been violated. Should the government take the view there has been a violation, it is the government, not the Technical Committee, which must present that view to the Court.

[*257] Similarly misunderstanding the role of the Technical Committee, some entities filing comments complain that the Technical Committee is not required to inform third parties of the status or ultimate resolution of their complaints. Once again, the committee serves Plaintiffs--the entities properly responsible for enforcing the decree, not third parties. Certainly third-party input will be significant in assessing compliance and ensuring the decree's overall effectiveness. The decree, therefore, provides wide avenues for third-party input. Still, third-party concerns cannot supplant the ultimate enforcement role **[**164]** of the government, nor should third-party complaints burden mechanisms established for the government's and ultimately the Court's benefit.

Another significant criticism regarding the Technical Committee finds its roots in the bar on the use of Technical Committee "work product, findings or recommendations" in judicial proceedings. Those who find fault in this aspect

---

[31] The SRPFJ provides this power equally to the United States and the Settling States but requires that the States shall consult first with the "States' enforcement committee to minimize the duplication and burden of the exercise of [such] powers, where practicable." SRPFJ § IV.A.

of the decree tend to interpret the bar broadly, speculating that there exists a "fruit of the poisonous tree" rule, such that any information in the hands of the committee cannot be utilized by Plaintiffs in formal enforcement proceedings before the Court. Such an interpretation ignores the plain language of the provision and the unequivocal intent of the parties. The government was clear on this point on numerous occasions. The limitation on the use of Technical Committee work product does not preclude the government from "utilizing, relying on, or making derivative use of the [Technical Committee's] work product" in conjunction with its own enforcement activities, CIS at 58, nor does the provision preclude Plaintiffs from obtaining Microsoft documents from the committee for use in an enforcement proceedings. Tr. **[**165]** at 46. In short, the prohibition on the use of committee work product is most accurately described as "a narrow recognition that the opinions or conclusions reached by the committee as a whole or by members of the committee would not be admissible, but the information that they gather certainly would be used by [the government] and introduced into evidence by [the government]." *Id. at 46-47*.

b. Retention of Jurisdiction

One of the more salient concerns raised in the comments is the fact that neither Microsoft, nor the government, are obliged under the proposed decree to report to the Court regarding Microsoft's compliance with the decree. Compounding this omission from the decree is the limited nature of the clause specifying the degree to which the Court retains jurisdiction. Section VII provides in full:

> Jurisdiction is retained by this Court over this action and the parties thereto for the purpose of enabling either of the parties thereto to apply to this Court at any time for further orders and directions as may be necessary or appropriate to carry out or construe this Final Judgment, to modify or terminate any of its provisions, to enforce compliance, **[**166]** and to punish violations of its provisions.

SRPFJ § VII. The D.C. Circuit recently made clear that ***HN18***[] "district courts enjoy no free-ranging 'ancillary' jurisdiction to enforce consent decrees, but are instead constrained by the terms of the decree and related order." *Pigford v. Veneman, 292 F.3d 918, 924 (D.C. Cir. 2002)*. The *Pigford* court further explained that the district court's power over a consent decree, reflecting the hybrid between judicial order and contract, is limited to two sources. A district court may interpret and enforce a decree to the extent authorized by the decree itself or by the related order. *Id. at 923*. Additionally, a district court may **[*258]** modify a decree pursuant to *Rule 60(b)(5) of the Federal Rules of Civil Procedure*. *Id.* This latter power is circumscribed by the Rule's requirements that such modification is appropriate if "it is no longer equitable that the judgment should have prospective application." *Fed. R. Civ. P. 60(b)(5)*; *Pigford, 292 F.3d at 925*. As the D.C. Circuit recounted the present state of the law, "a significant change in circumstances [may] warrant[] revision of [a] decree, **[**167]** " *id.* (quoting *Rufo v. Inmates of Suffolk Co. Jail, 502 U.S. 367, 383, 116 L. Ed. 2d 867, 112 S. Ct. 748 (1992))*, though any such revision must be "suitably tailored to the changed circumstances," *id.* (quoting *Rufo, 502 U.S. at 370*).

A strict reading of § VII would appear to limit this Court's jurisdiction to "enabling either of the parties thereto to apply to this Court . . . for further orders and directions as may be necessary or appropriate to carry out or construe this Final Judgment, to modify or terminate any of its provisions, to enforce compliance, and to punish violations of its provisions." SRPFJ § VII. This language does not clearly vest the Court with the authority to act *sua sponte* to order certifications of compliance and other actions by the parties.

Such a circumstance is not acceptable to the Court. The Court considers it imperative, in this unusually complex case, for the Court's retention of jurisdiction to be clearly articulated and broadly drawn. Such clarity and broad reservation of power are necessary to ensure that the Court may require action of the parties when it deems appropriate and need not wait for the parties to file a motion before action **[**168]** is taken. The government, in its colloquy with the Court, indicated its view that the Court would be free to require the government to file reports with the Court on issues relating to the "progress of enforcement of the decree," Tr. at 47-48, but the retention of jurisdiction in § VII does not reflect this view. Indeed, counsel indicated that the parties expressly opted *not* to identify the specific mechanism for reporting to the Court based upon the view that they "didn't think it was [their] place to tell the Court how often [it] might want reports from [the parties]." *Id. at 48*. Counsel went on to explain that they "didn't think that Microsoft and [the government] should be negotiating that, but rather wait to hear from [the

Court] on that," anticipating that if the Court "has any concerns at all [it] will let [the parties] know and [they] will fix it." *Id.*

As the proposed final judgment is presently drafted, the Court is not convinced that it has retained the authority, on its own volition, to inform the parties of a particular concern and to require additional action by the parties. Given the parties apparent intent to the contrary, the Court cannot **[**169]** conclude that this aspect of the proposed final judgment is in the public interest. As this Court "must preside over the implementation of the decree," the Court "is certainly entitled to insist" upon precision in the decree's reflection of the intent of the parties. *Microsoft, 56 F.3d at 1461-62*. As a result, this Court takes the view that the proposed final judgment should be amended to reflect the intent expressed to the Court at the March 6, 2002, hearing. In the absence of a clear reflection of the parties' intent with regard to the Court's involvement, the Court is unable to find that the decree is in the public interest.

As the Court "can foresee difficulties in [the] implementation" of a decree wherein the retention of jurisdiction does not make clear the Court's power to act *sua sponte* as may be appropriate or necessary, the Court must "insist that [this] matter be attended to." *Id. at 1462*. The Court suggests that the public interest would be **[*259]** served if Microsoft and the United States (and the Settling States) would agree to amend the proposed final judgment to reserve for the Court, in addition to the powers presently specified in **[**170]** the proposed final judgment, the power to *sua sponte* issue orders or directions regarding to the final judgment, including, but not limited to orders regarding the construction or carrying out of the final judgment, the enforcement of compliance therewith, and the punishment of any violation thereof. Such an amendment would not appear to work a fundamental change to the parties' agreement and would ensure that the Court retains the power intended by the parties and which the Court deems necessary to ensure effective implementation of the final judgment in this case.

Because the Court has found all other aspects of the proposed final judgment to be in the public interest, the Court is loathe to reject the proposed consent decree on this defect alone. Rather, the more prudent course appears to be a conditional approval of the consent decree, dependent upon the parties' prompt agreement to the modification proposed by the Court, or some similar modification. Accordingly, out of an abundance of caution, the Court will condition its approval of the consent decree pending an alteration to § VII which makes clear that the Court may take appropriate action regarding enforcement of the **[**171]** decree on its own volition and without prompting by the parties. In the presence of such a provision, there will be no doubt that the Court may require certifications of compliance, the regular status reporting, and other action by the parties as the Court deems necessary or appropriate.

IV. CONCLUSION

In conclusion, the Court is compelled to comment more generally on the terms of the proposed remedy. First, the Court commends the parties for their intense efforts at reaching a settlement and their willingness to try to do so in the face of previous failures. Second, and more importantly, praise is due based solely on the quality of the fruits of their collaborative labors. While the proposed final judgment, in general, is appropriately crafted to address the anticompetitive conduct, as well as conduct related thereto, the Court regards the document as laudable not for these traits alone, but for the clear, consistent, and coherent manner in which it accomplishes its task. Far from an amalgam of scattered rules and regulations pieced and patched together to restrict Microsoft's anticompetitive business conduct, the proposed final judgment adopts a clear and consistent philosophy **[**172]** such that the provisions form a tightly woven fabric. The proposed final judgment takes account of the theory of liability advanced by Plaintiffs, the actual liability imposed by the appellate court, the concerns of the Plaintiffs with regard to future technologies, and the relevant policy considerations. The product, although not precisely the judgment the Court would have crafted, with the exception of the reservation of jurisdiction, does not stray from the realm of the public interest.

Based on the foregoing, the Court finds that, with the exception of § VII of the SRPFJ, the Court is satisfied that the parties have reached a settlement which comports with the public interest. With regard to § VII, the Court's only reservation concerns the retention of jurisdiction. Accordingly, the Court will conditionally approve the proposed consent decree as the final judgment in this case. Such conditional approval will become final following the submission by the parties of an amendment to § VII which reflects the parties' intention that the Court retain **[*260]** jurisdiction to take action *sua sponte* in conjunction with the enforcement of the decree. Upon receipt of such an amendment, if **[**173]** satisfied with the proposal, the Court will enter the proposed final judgment, as amended, as the final judgment in this case. The Court provides in a separate Order that the parties shall indicate their intent on this issue in a written submission filed with the Court not later than November 8, 2002.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN1[] **Preclusion of Judgments, Law of the Case**

When issues have been resolved at a prior stage in the litigation, based upon principles of judicial economy, courts generally decline to revisit resolved issues. More than a mere rule-of-thumb, the "law of the case doctrine" refers to a family of rules embodying the general concept that a court involved in later phases of a lawsuit should not re-open questions decided (i.e., established as the law of the case) by that court or a higher one in earlier phases. Similar to the law of the case doctrine is the "mandate rule," a more powerful version of the law-of-the-case doctrine, which prevents courts from reconsidering issues that have already been decided in the same case. Under the mandate rule, an inferior court has no power or authority to deviate from the mandate issued by an appellate court.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN2[] Public Enforcement, State Civil Actions

It is the job of the district court to frame the remedy decree in an antitrust case, and the district court has broad discretion in doing so. The relief in an antitrust case must be effective to redress the violations and to restore competition. Not only should the relief ordered cure the ill effects of the illegal conduct, and assure the public freedom from its continuance, it necessarily must fit the exigencies of the particular case. Ultimately, the goal of a remedy in an equitable suit is not the punishment of past transgression, nor is it merely to end specific illegal practices. Rather, the remedy should effectively pry open to competition a market that has been closed by a defendant's illegal restraints. Equitable relief in an antitrust case should not embody harsh measures when less severe ones will do, nor should it adopt overly regulatory requirements which involve the judiciary in the intricacies of business management.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN3[] Public Enforcement, State Civil Actions

In crafting a remedy specific to the violations, the court is empowered to enjoin not only the acts for which the defendant was found liable, but other related unlawful acts, lest all of the untraveled roads to restraint of trade be left open and only the worn one be closed. In this regard, the court's remedy is not limited to prohibition of the proven means by which the evil was accomplished, but may range broadly through practices connected with acts actually found to be illegal. Notwithstanding this flexibility, the court may not simply enjoin all future violations of the antitrust laws. Rather, a remedy should be tailored to fit the wrong creating the occasion for the remedy. Moreover, the remedial decree should be as specific as possible, not only in the core of its relief, but in its outward limits, so that parties may know their duties and unintended contempts may not occur.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN4[] Public Enforcement, State Civil Actions

The mere existence of an exclusionary act does not itself justify full feasible relief against the monopolist to create maximum competition. Similarly, because structural relief is designed to eliminate the monopoly altogether, wisdom counsels against adopting radical structural relief in the absence of some measure of confidence that there has been an actual loss to competition that needs to be restored. Instead, the court crafting a remedy must assess the strength of the causation evidence that established liability and "tailor" the relief accordingly.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN5[] Relevant Market, Product Market Definition

The definition of the relevant product market is a necessary element of a monopolization charge.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN6[] **Public Enforcement, State Civil Actions**

In the antitrust context, the determination of the scope of the decree to accomplish its purpose is peculiarly the responsibility of the trial court.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN7[] **Public Enforcement, State Civil Actions**

In order to cure the ill effects of the illegal conduct, and assure the public freedom from its continuance, the remedial decree imposed by the court should range broadly through practices connected with acts actually found to be illegal.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN8[] **Public Enforcement, State Civil Actions**

Once liable for an antitrust violation, a defendant may be restricted in its business so as to force a relinquishment of the fruits of the anticompetitive conduct. It is this surrender which is to assist the courts in prying open to competition a market that has been closed by defendants' illegal restraints.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN9[] **Public Enforcement, State Civil Actions**

The equitable powers of the courts to remedy antitrust violations may justify uprooting all parts of an illegal scheme-the valid as well as the invalid-in order to rid the trade or commerce of all taint of the anticompetitive actions.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN10[] **Public Enforcement, State Civil Actions**

A remedy in an antitrust case seeks not only to eliminate illegal conduct, but to address the effects of that conduct upon the marketplace. Pursuant to this view, therefore, it may be appropriate in some instances that a remedy address some legal conduct which, by its relation to the illegal and anticompetitive conduct, perpetuates the antitrust violator's restraint on trade. At the same time, however, an antitrust violator should not be subject to an outright denial of the ability to continue to do business and to compete with other participants in the market and in other markets.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN11[] Public Enforcement, State Civil Actions

In exercising its equitable jurisdiction, a federal court has broad power to restrain acts which are of the same type or class as unlawful acts which the court has found to have been committed or whose commission in the future unless enjoined, may fairly be anticipated from the defendant's conduct in the past.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN12[] Public Enforcement, State Civil Actions

The suggestion that antitrust violators may not be required to do more than return the market to the status quo ante is not a correct statement of the law.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN13[] Public Enforcement, State Civil Actions

A full exploration of facts is usually necessary in order for the district court properly to draw an antitrust decree so as to prevent future violations and eradicate existing evils.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN14[] Public Enforcement, State Civil Actions

Drafting an antitrust decree by necessity involves predictions and assumptions concerning future economic and business events. Whether or not the court accepts a particular factual prediction often rests upon whether the witness has identified a sound basis in fact or logic to justify the prediction. Where no such basis has been identified, unless self-evident to the court, the court may accord little weight to the prediction. Similarly, because of the predictive nature of the testimony, much of the factual testimony is meaningless unless such testimony is considered together with the accompanying argument regarding the intended use of the testimony.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Courts > Judicial Precedent

HN15[] Public Enforcement, State Civil Actions

Although precedents uphold equity's authority to use quite drastic measures to achieve freedom from the influence of the unlawful restraint of trade, such measures are justified only where the required action reasonably tends to dissipate the restraints.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Labor & Employment Law > Wrongful Termination > Remedies > General Overview

HN16[] Public Enforcement, State Civil Actions

While the court's ability to impose a remedy in an antitrust case is not merely to end the specific illegal practices, there is no authorization for the court to interfere with ordinary commercial practices.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN17[] **Public Enforcement, State Civil Actions**

A district court may not enjoin all future illegal conduct of the defendant, or even all future violations of the antitrust laws, however unrelated to the violation found by the court. The court may only restrain commission of the unlawful acts and other related unlawful acts.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN18[] **Public Enforcement, State Civil Actions**

Antitrust law does not authorize the court to regulate the conduct of an antitrust violator in areas bearing little relation to the violation. The test is whether or not the required action reasonably tends to dissipate restraints and prevent evasions.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > US Department of Justice Actions > Civil Actions > Injunctions

HN19[] **Antitrust & Trade Law, Sherman Act**

Even where the government has proved antitrust violations at trial, the remedies must be of the same type or class as the violations, and the court is not at liberty to enjoin all future violations of the antitrust laws, however unrelated to violations found by the court. The court must be careful to avoid constructions of *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act which might chill competition, rather than foster it.

Torts > Business Torts > Unfair Business Practices > Elements

Trademark Law > ... > Unfair Competition > Federal Unfair Competition Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

Torts > Business Torts > Unfair Business Practices > Remedies

HN20[] **Unfair Business Practices, Elements**

Conduct cannot be condemned as exclusionary, even where the intent behind it is anticompetitive, unless there has been a showing that the monopolist's conduct on balance harms competition. Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws. The federal antitrust laws do not create a federal law of unfair competition or purport to afford remedies for all torts committed by or against persons engaged in interstate commerce. Harm to one or more competitors, however severe, is not condemned by the Sherman Act in the absence of harm to the competitive process and thereby harm to consumers.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN21[] Public Enforcement, State Civil Actions

A monopolist does not violate the antitrust laws simply by developing a product that is incompatible with those of its rivals. The court undoubtedly has the discretion to uproot all parts of an illegal scheme-the valid as well as the invalid-in order to rid the trade or commerce of all taint of the illegal conduct. Still, in resolving doubts as to the desirability of including provisions designed to restore future freedom of trade, the court is instructed to weigh the circumstances under which the illegal acts occur.

Antitrust & Trade Law > Sherman Act > General Overview

HN22[] Antitrust & Trade Law, Sherman Act

Action which is harmful to competitors does not, by itself, violate the antitrust laws.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN23[] Public Enforcement, State Civil Actions

In cases where a monopolist has consummated an exclusionary act, equitable relief beyond a mere injunction against repetition of the act is generally appropriate. Recognizing the possibility that the specific act under challenge may be unique to the circumstances and unlikely to be precisely repeated, and the need to undo the various effects of the act, the relief must be "tailored" to fit the wrong. The tailoring must have sufficient breadth to ensure that a certain "class" of acts, or acts of a certain type or having a certain effect, not be repeated.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN24[] Public Enforcement, State Civil Actions

Merely for purposes of enjoining the conduct itself, exclusionary conduct is best defined rather broadly in the sense of resolving against the monopolist any doubts concerning the significance of the conduct's contribution to the monopoly.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN25[] Public Enforcement, State Civil Actions

In the context of an antitrust remedy, it is not a proper task for the court to undertake to redesign products.

MEMORANDUM OPINION

"*There is a remedy for all things but death . . . .*" [1]

[*86] ***INTRODUCTION***

Presently pending before the Court are two dueling remedy proposals seeking to redress the wrongs inflicted upon competition by Defendant Microsoft Corporation. These proposals were presented to this Court following the district court's determination of liability for violation of the Sherman Act, a partial affirmance by the United States Court of Appeals for the District of Columbia Circuit, and an order of remand by the appellate court accompanied by instructions to impose a remedy. Upon review of the entire factual record in this case, the determinations of liability affirmed by the D.C. Circuit, the parties' legal memoranda, and the relevant legal authority, the Court enters the following legal and discretionary **[**2]** conclusions and order of remedy. The Court bases such conclusions and remedy upon its findings of fact, entered below and in Appendix A.

I. PROCEDURAL HISTORY

On May 18, 1998, simultaneous with the filing of a complaint by the United States in a related case, a group of state plaintiffs filed a civil complaint alleging antitrust violations by Microsoft and seeking preliminary and permanent injunctions barring the company's allegedly unlawful conduct. [2] *See* *United States v. Microsoft Corp., 253 F.3d 35, 47*. In *United States v. Microsoft Corp.*, No. 98-1232 (D.D.C.), the federal government brought claims pursuant to federal law, while in *State of New York, et al. v. Microsoft Corp.*, No. 98-1233 (D.D.C.), the Plaintiff States [3] **[**4]**

---

[1] MIGUEL DE CERVANTES, DON QUIXOTE, Part 2, Book 5, Chapter 10 (1615).

[2] Despite the 1998 filing of the instant suit, the antitrust issues raised in this litigation commenced in the mid-1990s. *See* *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34, 49 (D.C. Cir. 2001)* (*en banc*).

brought claims pursuant to both federal and state law. These two cases were consolidated, and following a bench trial in the consolidated cases, Judge Thomas Penfield Jackson concluded that Microsoft had violated §§ 1 and 2 of the Sherman Act, 15 U.S.C. §§ 1, 2, imposing liability for illegal monopoly maintenance, attempted monopolization, and unlawful tying. *United States v. Microsoft Corp., 87 F. Supp. 2d 30, 35 (D.D.C. 2000).* **[**3]** Correspondingly, Judge Jackson held that Microsoft had violated the state antitrust laws analogous to §§ 1 and 2 of the Sherman Act in each of the nineteen plaintiff states and the District of Columbia. [4] *Id. at 54*. To remedy these findings of liability, Judge Jackson ordered the division of Microsoft into two separate corporations. *United States v. Microsoft Corp., 97 F. Supp. 2d 59, 64 (D.D.C. 2000)*. Microsoft filed an appeal in both cases. On appeal, the D.C. Circuit deferred to Judge Jackson's factual findings, *Microsoft, 253 F.3d at 118*, altered his findings of liability-affirming in part and reversing in part, and vacated the remedy decree, *Microsoft 253 F.3d at 46*.

[*87] The appellate court remanded the cases to this Court with instructions to hold a "remedies-specific evidentiary hearing," *id. at 103*, and to "fashion an appropriate remedy" in light of the revised liability findings, *id. at 105*. Following remand, pursuant to Court Order, the parties in the two consolidated cases entered into intensive settlement negotiations. *See United States v. Microsoft Corp., 2001 U.S. Dist. LEXIS 24272*, Nos. 98-1232 and 98-1233 (D.D.C. Sept. 28, 2001) (order requiring the parties to enter into settlement negotiations). The settlement negotiations did not resolve both cases in their entirety. However, the United States **[**5]** and Microsoft were able to reach a resolution in *United States v. Microsoft Corp.* in the form of a proposed consent decree. The settlement negotiations were partially successful with regard to the states' case, *State of New York, et al. v. Microsoft Corp.*; a portion of the plaintiffs in that case joined the settlement between the United States and Microsoft. [5] Consequently, those states have elected not to proceed to a remedies-specific hearing in *State of New York, et al. v. Microsoft Corp.* The states which opted not to join the settlement between the United States and Microsoft have proposed a remedy distinct from that presented in the proposed consent decree.

Following expedited discovery, on March 18, 2002, an evidentiary hearing on the issue of the remedy commenced. The parties submitted the direct testimony in written format, while cross-examination **[**6]** and re-direct testimony were offered in open court. Over thirty-two trial days, the Court reviewed the written direct testimony and heard the live testimony of fifteen witnesses proffered by Plaintiffs [6] and nineteen [7] **[**8]** witnesses proffered by Microsoft. [8]

---

[3] The "Plaintiff States" for purposes of this opinion are the States of California, Connecticut, Florida, Iowa, Kansas, Minnesota, Utah, and West Virginia, the Commonwealth of Massachusetts, and the District of Columbia. Also plaintiffs in the suit, though their claims are not addressed in this Memorandum Opinion, are the States of New York, Ohio, Illinois, Kentucky, Louisiana, Maryland, Michigan, North Carolina, and Wisconsin.

[4] This suit was originally brought by twenty states and the District of Columbia. One state withdrew from the action prior to the issuance of liability findings by the District Court. Another state settled its claims in July of 2001. The claims of the States of New York, Ohio, Illinois, Kentucky, Louisiana, Maryland, Michigan, North Carolina, and Wisconsin were litigated through liability and have been conditionally settled as to the issue of remedy.

[5] The so-called "Settling States" are the States of New York, Ohio, Illinois, Kentucky, Louisiana, Maryland, Michigan, North Carolina, and Wisconsin.

[6] Plaintiffs presented the testimony of thirteen fact witnesses: (1) Peter Ashkin, (2) James Barksdale, (3) John Borthwick, (4) Anthony Fama, (5) Richard Green, (6) Mitchell Kertzman, (7) Dr. Carl Ledbetter, (8) Michael Mace, (9) Steven McGeady, (10) Larry Pearson, (11) David Richards, (12) Jonathan Schwartz, and (13) Michael Tiemann; and two expert witnesses: (1) Dr. Carl Shapiro; and (2) Dr. Andrew Appel.

[7] One of these nineteen witnesses was James Thomas ("Tom") Greene, Senior Assistant Attorney General for the State of California, an adverse witness whose testimony Defendant presented in the form of videotaped deposition excerpts and the transcript thereof. Def. Ex. 1530 (Greene). When referring to Mr. Greene's testimony, the Court cites to the page number which appears on the deposition transcript.

[8] Defendant presented the testimony of fifteen fact witnesses: (1) Dr. James Allchin, (2) Linda Wolfe Averett, (3) Scott Borduin, (4) David Cole, (5) Heather Davisson, (6) Brent Frei, (7) William H. Gates, III, (8) James Thomas ("Tom") Greene, (9) Chris Hofstader, (10) Christopher Jones, (11) Will Poole, (12) W. J. Sanders, III, (13) Robert Short, (14) Gregg Sutherland, and (15) Richard L. Ulmer; and four experts: (1) Dr. John K. Bennett, (2) Dr. Kenneth G. Elzinga, (3) Dr. Stuart E. Madnick, (4) Dr. Kevin M. Murphy.

Of these witnesses, Plaintiffs offered expert testimony from Dr. Andrew Appel, Professor of Computer Science at Princeton University, whom the Court qualified as an expert in the field of computer science and software engineering. Plaintiffs' only other expert was Dr. Carl Shapiro, Professor of Business Strategy at the University of California at Berkeley. The Court qualified Dr. Shapiro as an expert in the field of economics. Microsoft presented expert testimony from Dr. John Bennett, a professor in the Department of Computer Science and Electrical Computer Engineering at the University of Colorado at Boulder, and Dr. Stuart Madnick, **[*88]** Professor of Information Technology at the Sloan School of Management and Professor of Engineering Systems in the Engineering Division of the Massachusetts Institute of Technology's School of Engineering. Both Drs. Madnick and Bennett were qualified by the Court as experts in the field of computer **[**7]** science. Microsoft also offered the expert testimony of Dr. Kenneth Elzinga, Professor of Economics at the University of Virginia, and of Dr. Kevin Murphy, Professor of Business Economics in the Graduate School of Business at the University of Chicago. The Court qualified Drs. Elzinga and Murphy as experts in the field of economics.

At the outset of this phase of the proceeding, both parties proposed to offer expert testimony on the subject of decree enforcement from "legal experts." In response to a request by Microsoft to exclude such testimony, *see generally* "Defendant Microsoft Corporation's Motion in Limine to Exclude the Expert Report of John H. Shenefield Which Improperly Proffers a Legal Conclusion," the Court raised a concern that the expert legal testimony, at least as framed by the parties, was improper. The Court also expressed the opinion that the "expert legal testimony" would be presented **[**9]** more appropriately by the attorneys in the form of oral argument. In response to the Court's concern, the parties voluntarily withdrew their presentation of these expert witnesses and opted instead to present the information to the Court in the form of legal briefs and argument. *See* Trial Transcript ("Tr."). at 1633-40, 1835-40.

II. LAW OF THE CASE

HN1[] When issues have been resolved at a prior stage in the litigation, based upon principles of judicial economy, courts generally decline to revisit resolved issues. More than a mere rule-ofthumb, the "'law of the case doctrine' refers to a family of rules embodying the general concept that a court involved in later phases of a lawsuit should not re-open questions decided (i.e., established as the law of the case) by that court or a higher one in earlier phases." *Crocker v. Piedmont Aviation, Inc., 311 U.S. App. D.C. 1, 49 F.3d 735, 739 (D.C. Cir. 1995)*. Similar to the law of the case doctrine is the "mandate rule," a "'more powerful version' of the law-of-the-case doctrine, which prevents courts from reconsidering issues that have already been decided in the same case." *Independent Petroleum Ass'n of Am. v. Babbitt, 344 U.S. App. D.C. 216, 235 F.3d 588, 597 (D.C. Cir. 2001)* **[**10]** (quoting *LaShawn A. v. Barry, 318 U.S. App. D.C. 380, 87 F.3d 1389, 1393 n.3 (D.C. Cir. 1996)* ("An even more powerful version of the [law-of-the-case] doctrine--sometimes called the 'mandate rule'--requires a lower court to honor the decisions of a superior court in the same judicial system.")). "Under the mandate rule, 'an inferior court has no power or authority to deviate from the mandate issued by an appellate court.'" *Id.* (quoting *Briggs v. Pennsylvania R.R. Co., 334 U.S. 304, 306, 92 L. Ed. 1403, 68 S. Ct. 1039 (1948))*.

In this case, the mandate of the appellate court requires this Court to fashion a remedy appropriately tailored to the revised liability findings. *Microsoft, 253 F.3d at 105*. Not surprisingly then, the starting place for this Court's determination of an appropriate remedy is the appellate opinion in this case. As the sole issue remaining in the case concerns a remedy for Microsoft's violation of *§ 2* of the Sherman Act, rather than a reassessment of liability, the relevant portions of the appellate opinion consist of that court's discussion of *§ 2* liability. For background purposes, the Court shall summarize the pertinent portions of the appellate decision, **[**11]** placing the primary focus **[*89]** upon the appellate court's determination of *§ 2* liability.

A. Court of Appeals Opinion

1. Market Definition

The appellate court began its opinion by examining Plaintiffs' [9] **[**12]** *§ 2* Sherman Act claims and, specifically, whether the district judge had identified the proper market for purposes of assessing Microsoft's monopoly power. The appellate court concluded that the district court had properly defined the relevant market as "the licensing of all Intel-compatible PC [10] operating systems [11] worldwide." *Microsoft, 253 F.3d at 52* (quoting *Microsoft, 87 F. Supp. 2d at 36*). Having agreed with the district court's definition of the relevant market, the appellate court adopted the district court's determination that "circumstantial evidence proves that Microsoft possesses monopoly power." *Id. at 56*. The appellate court further noted that "if we were to require direct proof [of monopoly power], . . . Microsoft's behavior may well be sufficient to show the existence of monopoly power." *Id. at 57*.

[13]** ***2. Theory of Liability***

Integral to the appellate court's adoption of the market definition was its simultaneous acceptance of Plaintiffs' theory of Microsoft's market dominance. Both the district and appellate courts noted that Microsoft's lawfully-acquired monopoly is naturally protected by a "structural barrier," known as the "applications barrier to entry." *Microsoft 253 F.3d at 55*. "That barrier . . . stems from two characteristics of the software market: (1) most consumers prefer operating systems for which a large number of applications have already been written; and (2) most developers prefer to write for operating systems that already have a substantial consumer base." *Id.* (citing *Findings of Fact 84 F. Supp. 2d at 18, 19 PP30, 36)*. This barrier creates a "chicken-and-egg" or network effects situation, which perpetuates Microsoft's operating system dominance because "applications will continue to be written for the already dominant Windows, [12] which in turn ensures that consumers **[*90]** will continue to prefer it over other operating systems." *Id.* Because "every operating system has different APIs," [13] applications written for

---

[9] In referring to "Plaintiffs" in this context, the Court refers to those Plaintiff States which the Court identified in footnote 3. The Court notes, however, that the appellate court's opinion applies not only to the claims brought by the "Litigating States" in this case, but to the claims brought by the so-called "Settling States" in this action and by the United States in *United States v. Microsoft*, No. 98-1232 (D.D.C.).

[10] "PC" is short for "personal computer." *United States v. Microsoft, 84 F. Supp. 2d 9, P 1 (D.D.C. 1999)* (hereinafter cited as "*Findings of Fact*").

[11] The appellate court, relying upon the factual testimony presented to the district court, explained the functions of a PC operating system:

> Operating systems perform many functions, including allocating computer memory and controlling peripherals such as printers and keyboards. Operating systems also function as platforms for software applications. They do this by "exposing"-i.e., making available to software developers-routines or protocols that perform certain widely-used functions. These are known as Application Programming Interfaces, or "APIs." For example, Windows contains an API that enables users to draw a box on the screen. Software developers wishing to include that function in an application need not duplicate it in their own code. Instead, they can "call"-*i.e.*, use-the Windows API. Windows contains thousands of APIs, controlling everything from data storage to font display.

Microsoft, 253 F.3d at 53 (citations omitted).

[12] "In 1985, Microsoft began shipping a software package [for the PC] called Windows. The product included a graphical user interface, which enabled users to perform tasks by selecting icons and words on the screen using a mouse." *Findings of Fact,* 84 F. Supp.2d at *13 P 7*. In 1995, Microsoft introduced an updated version of its Windows software known as "Windows 95." *Findings of Fact,* 84 F. Supp. 2d at *3 Wyo. 167, 3 Wyo. 168, 13 P 8*. Similarly, in 1998, Microsoft released "Windows 98." *Id.* Since that time, Microsoft has continued to update, revise, and re-create its "Windows" PC operating system. Microsoft's most current version of Windows is "Windows XP," which is available in both a "Home" edition and a "Professional" edition.

[13] "APIs" are applications programming interfaces. As Judge Jackson explained: [An] operating system supports the functions of applications by exposing interfaces, called "application programming interfaces," or "APIs." These are synapses at which the developer of an application can connect to invoke pre-fabricated blocks of code in the operating system. These blocks of code in turn perform crucial tasks, such as displaying text on the computer screen.

Findings of Fact, 84 F. Supp. 2d at *12 P 2*. For a supplemental definition of "API," *see infra* note 35.

one operating system will not function on another **[**14]** operating system unless the developer undertakes the "time consuming and expensive" process of transferring and adapting, known in the industry as "porting," the application to the alternative operating system. *Microsoft, 253 F.3d at 53*.

[15]** Plaintiffs proceeded under the theory that certain kinds of software products, termed "middleware," [14] could reduce the "self-reinforcing cycle," *Findings of Fact, 84 F. Supp. 2d at 20, P 39*, by serving as a platform for applications, taking over some of the platform functions provided by Windows and thereby "weakening the applications barrier to entry," *Findings of Fact, 84 F. Supp. 2d at 28, P 68*. One of middleware's defining characteristics as a software product is its ability to "expose its own APIs." *Findings of Fact,84 F. Supp. 2d at 17, P 28*. Eventually, reasoned Plaintiffs, if applications were written to rely on the middleware API set, rather than the Windows API set, the applications could be made to run on alternative operating systems simply by porting the middleware. Ultimately, by writing to the middleware API set, applications developers could write applications which would run on any operating system on which the middleware was preset. Plaintiffs focused their attention primarily upon two such middleware threats to Microsoft's operating system dominance-Netscape Navigator [15] and the Java technologies. *See Microsoft, 253 F.3d at 53*. The district and appellate courts accepted Plaintiffs' theory of competition despite **[**16]** the fact that "neither Navigator, Java, nor any other middleware product could [at that time], or would soon, expose enough APIs to serve as a platform for popular applications." *Id.*; *Findings of Fact, 84 F. Supp. 2d at 17, 18, PP 28-29*.

3. Four-Part Test for Liability

Having concluded that the district court properly identified the relevant market as the market for Intel-compatible PC operating systems and properly excluded middleware products from that market, **[**17]** the appellate court turned its attention to the issue of whether Microsoft responded to the threat posed by middleware in violation of *§ 2* of the Sherman Act. Specifically, the appellate court set out to determine whether Microsoft "maintained, or attempted to . . . maintain, a monopoly by **[*91]** engaging in exclusionary conduct." *Microsoft, 253 F.3d at 58*. The appellate court recounted that the district court answered that inquiry in the affirmative, finding Microsoft liable for violating *§ 2* of the Sherman Act:

> by engaging in a variety of exclusionary acts . . . specifically . . .: (1) the way in which it integrated [Internet Explorer] into Windows; (2) its various dealings with Original Equipment Manufacturers ("OEMs"), Internet Access Providers ("IAPs"), Internet Content Providers ("ICPs"), Independent Software Vendors (ISVs), and Apple Computer; (3) its efforts to contain and to subvert Java technologies; and (4) its course of conduct as a whole.

Id. In order to review the district court's findings on this point, the appellate court outlined a four-part test for determining whether particular conduct can be said to violate ***antitrust law***. "First, **[**18]** to be condemned as exclusionary, a monopolist's act must have an 'anticompetitive effect.' That is, it must harm the competitive *process* and thereby harm consumers." *Microsoft, 253 F.3d at 58* (emphasis in original). Second, the plaintiff must "demonstrate that the monopolist's conduct harmed competition, not just a competitor." *Microsoft, 253 F.3d at 59*. Third, "the monopolist may proffer a 'procompetitive justification' for its conduct." *Id.* (quoting *Eastman Kodak Co. v. Image Technical Servs. Inc., 504 U.S. 451, 483, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992))*. If this justification stands unrebutted by the plaintiff, the monopolist may escape liability. Therefore, the fourth prong of the inquiry requires that the plaintiff "demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit." *Id.* The appellate court stressed that, although evidence of intent is relevant "to understand the likely effect

---

[14] Such software takes the name "middleware" because "it relies on the interfaces provided by the underlying operating system while simultaneously exposing its own APIs to developers" and, therefore, is said to reside in the middle. *Findings of Fact, 84 F. Supp. 2d at 17, P 28*.

[15] "Although certain Web browsers provided graphical user interfaces as far back as 1993, the first widely-popular graphical browser distributed for profit, called Navigator, was brought to market by the Netscape Communications Corporation ('Netscape') in December 1994." *Findings of Fact, 84 F. Supp. 2d at 14, P 17*.

of the monopolist's conduct," when assessing the balance between the anticompetitive harm and the procompetitive effect, the trial court should focus on the "effect of [the exclusionary] conduct, not the intent behind it." *Id.*

Using this framework, the appellate **[**19]** court addressed Microsoft's challenge to each of the findings by the district court. The appellate court examined the district court's four basic areas of findings with regard to *§ 2* liability in an order different from that of the district court. The Court presents these holdings, in the order addressed by the appellate court.

4. Original Equipment Manufacturer ("OEM") Licenses

Commencing its analysis with the "licenses issued to original equipment manufacturers," [16] *Microsoft, 253 F.3d at 59*, the appellate court focused upon three license provisions "prohibiting the OEMs from: removing any desktop icons, folders, or 'Start' menu entries; (2) altering the initial boot sequence; and (3) otherwise altering the appearance of the Windows desktop," *Microsoft, 253 F.3d at 61* (citing *Findings of Fact, 84 F. Supp. 2d at 61, P 213)*. Into the category of "otherwise altering the appearance of the Windows desktop," the appellate court subsumed the automatic launch of an alternative user interface, the prohibition against the addition of icons and folders different in size and shape from those used by Microsoft, and the prohibition against the use of the "Active Desktop" feature [17] to display third-party **[*92]** brands. *Microsoft, 84 F. Supp. 2d at 62*. **[**20]** ; *see also Findings of Fact, 84 F. Supp. 2d at 61, P 213*. Of these license provisions, the appellate court concluded that, "with the exception of the one restriction prohibiting automatically launched alternative interfaces, all of the OEM license restrictions at issue represent uses of Microsoft's market power to protect its monopoly, unredeemed by any legitimate justification." *Microsoft, 84 F. Supp. 2d at 64*. In commencing its next area of analysis, the appellate court noted with regard to the license restrictions imposed upon OEMs that they "have a significant effect in closing rival browsers out of one of the two primary channels of distribution." *Id.*

5. Integration of Internet Explorer ("IE")* [**21] *and Windows

The appellate court next turned its attention toward the "integration of [Internet Explorer ("IE")] [18] and Windows." *Id.* At the outset of its analysis, the appellate court took a narrow view of the district court's determination, noting that the district court's "broad[]" condemnation of "Microsoft's decision to bind 'Internet Explorer to Windows with . . . technological shackles'" is supported by only three specific actions taken by Microsoft. *Id.* (quoting *Microsoft, 87 F. Supp. 2d at 39*). The appellate court identified these three as (1) "excluding IE from the 'Add/Remove Programs' utility"; (2) "designing Windows so as in certain circumstances to override the user's choice of a default browser other than IE"; and (3) "commingling code related to browsing and other code in the same files, so that any attempt to delete the files containing IE would, at the same time, cripple the operating system." *Microsoft, 84 F. Supp. 2d at 64, 65* . Pursuant to its four part test for liability, the appellate court concluded that Microsoft could be held liable for the first and the third of these actions. *Microsoft, 84 F. Supp. 2d at 65-67*. As to the second of these actions, the override **[**22]** of the user's choice of default in certain circumstances, the court determined that Microsoft had proffered a procompetitive justification that went unrebutted by Plaintiffs, namely that the override was the result of "valid technical reasons" which justified the override in a "few out of the nearly 30 means of accessing the Internet." *Microsoft, 84 F. Supp. 2d at 67* (quotation marks omitted). Finding that Plaintiffs had neither rebutted Microsoft's procompetitive justification, nor demonstrated that the anticompetitive effect of the challenged act outweighed such justification, the appellate court held that "Microsoft may not be held liable for this aspect of its product design." *Id.*

6. Agreements with Internet Access Providers ("IAPs")

---

[16] Manufacturers of PCs are known as "original equipment manufacturers" or "OEMs." *Findings of Fact, 84 F. Supp. 2d at 13, P 10*.

[17] "The Active Desktop was a Microsoft feature that, if enabled, allowed the Windows user to position Web pages as open windows that appear on the background, or 'wallpaper' of the Windows desktop." *Findings of Fact, 84 F. Supp. 2d at 88, P 314*.

[18] Internet Explorer is Microsoft's Web browser. *Findings of Fact, 84 F. Supp. 2d at 14, P 17*.

Directing its attention to Microsoft's "agreements with various IAPs," [19] which the district court "condemned" as exclusionary, the appellate court identified five Microsoft actions specifically relied **[**23]** upon by the district court for this condemnation:

> (1) offering IE free of charge to IAPs[;] . . . (2) offering IAPs a bounty for each customer the IAP signs up for service using the IE browser[;] . . . (3) developing the IE Access Kit ("IEAK"), a software package that allows an IAP to "create a distinctive identity for its service in as little as a few hours by customizing the [IE] title bar, icon, start and search pages," *Findings of Fact, 84 F. Supp. 2d at 71, P 249*[;] . . . (4) offering the IEAK to **[*93]** IAPs free of charge, on the ground that those acts, too, helped Microsoft preserve its monopoly[,] [*Microsoft, 87 F. Supp. 2d at 41-42*[;] . . . (5) agreeing to provide easy access to IAPs' services from the Windows desktop in return for the IAPs' agreement to promote IE exclusively and to keep shipments of internet access software using Navigator under a specific percentage, typically 25%. *See* [*Microsoft, 87 F. Supp. 2d at 42* (citing *Findings of Fact, 84 F. Supp. 2d at 73, 74, 81, PP 258, 262, 289)*.

Microsoft, 84 F. Supp. 2d at 67-68. Grouping the first four of these actions together as "Microsoft's inducements," the appellate court held that these four actions merely "offered a consumer an attractive **[**24]** deal" and, therefore, could not be treated as anticompetitive. *Microsoft, 84 F. Supp. 2d at 68*. In contrast, the appellate court agreed with the district court that Microsoft's exclusive contracts with IAPs "are exclusionary devices, in violation of *§ 2* of the Sherman Act." *Microsoft, 84 F. Supp. 2d at 71*.

7. Agreements with Internet Content Providers ("ICPs"), Independent Software Vendors ("ISVs"), and Apple

The appellate court next considered Microsoft's "dealings with ICPs, which develop websites; ISVs, which develop software; and Apple, which is both an OEM and a software developer." *Microsoft, 84 F. Supp. 2d at 71*. The "deals" at issue in this portion of the case are grants of "free licenses to bundle IE with [the ICPs' and ISVs'] offerings" and the exchange of "other valuable inducements for [ICPs' and ISVs'] agreement to distribute, **[**25]** promote, and rely on IE rather than Navigator." *Id.* (quoting *Microsoft, 87 F. Supp. 2d at 42-43*) (brackets and quotation marks omitted). The district court held these agreements to be anticompetitive in violation of *§ 2* of the Sherman Act because they had the effect of "directly inducing developers to focus on [Microsoft's] own APIs rather than ones exposed by Navigator." *Id.* (quoting *Microsoft, 87 F. Supp. 2d at 42-43*) (quotation marks omitted).

At the outset of its analysis in this context, the appellate court concluded bluntly that "with respect to [Microsoft's] deals with ICPs, the District Court's findings do not support liability." *Id.* In contrast, the appellate court sustained the district court's finding of liability with regard to Microsoft's agreements with ISVs because Plaintiffs made "a *prima facie* showing that the deals have an anticompetitive effect," and Defendant did not successfully rebut this showing. *Microsoft, 84 F. Supp. 2d at 72*. In particular, the appellate court found that the exclusive provisions in these so-called "First Wave Agreements" with ISVs foreclosed a substantial share of the market for Navigator. **[**26]** *Id.*

Turning its attention in this context finally to Microsoft's relationship with Apple, the appellate court concluded that Microsoft's agreement with Apple was exclusionary in violation of *§ 2* of the Sherman Act. *Microsoft, 84 F. Supp. 2d at 72-74*. The appellate court recounted that in mid-1997, Microsoft and Apple entered into an agreement which obligated Microsoft to continue to release "up-to-date" versions of its office productivity software for Apple's systems, Mac Office. *Microsoft, 84 F. Supp. 2d at 73* (citing *Findings of Fact, 84 F. Supp. 2d at 95, 96, PP 350-52)*. The agreement further obligated Apple to make IE the default browser. *Id*. (citing *Findings of Fact, 84 F. Supp. 2d at 96, 96, PP 350-52)*. Pursuant to this same agreement, Apple promised not to install Navigator during the "default installation," and not to "position icons for non[-]Microsoft browsing software on the desktop of new Macintosh PC systems or Mac OS upgrades." *Id.* (quoting *Findings of Fact, 84 F. Supp. 2d at 95, 96, PP 350-52)*. Similarly, the agreement prohibited Apple "from encouraging users to substitute another browser for IE, and stated that Apple

[19] "PCs typically connect to the Internet through the services of Internet access providers ('IAPs'), which generally charge subscription fees to their customers in the United States." *Findings of Fact, 84 F. Supp. 2d at 14, P 15*.

[would] 'encourage its **[*94]** employees to use IE.'" *Id.* (quoting *Findings of Fact, 84 F. Supp. 2d at 96, P 352)* (brackets omitted). **[**27]** The appellate court concluded that "this exclusive deal between Microsoft and Apple had a substantial effect upon the distribution of rival browsers." *Id.* Given the absence of a "procompetitive justification for the exclusive dealing arrangement," the appellate court affirmed the district court's finding of *§ 2* liability based upon Microsoft's exclusive deal with Apple. *Microsoft, 84 F. Supp. 2d at 74*.

8. Java

The appellate court grouped the next category of Microsoft conduct under the heading "Java" in reference to "a set of technologies developed by Sun Microsystems" ("Sun"). *Id.* The Java technologies are described as "another type of middleware posing a potential threat to Windows' position as the ubiquitous platform for software development." *Id.* (citing *Findings of Fact, 84 F. Supp. 2d at 17, P 28)*. The appellate opinion recounts that the district court identified four steps taken by Microsoft to "exclude Java from developing as a viable cross-platform threat: (a) designing a [Java Virtual Machine ("JVM") [20]] incompatible with the one developed by Sun; (b) entering into contracts, the so-called 'First Wave Agreements,' requiring major ISVs to promote Microsoft's JVM exclusively; **[**28]** (c) deceiving Java developers about the Windows-specific nature of the tools it distributed to them; and (d) coercing Intel to stop aiding Sun in improving the Java technologies." *Id.* Of these actions, the appellate court concluded that all but the first action were anticompetitive in violation of *§ 2*. *Microsoft, 84 F. Supp. 2d at 74-78*. With regard to the first enumerated action, the incompatible JVM, the appellate court held that because the incompatible JVM did not have an anticompetitive effect which outweighed the procompetitive justification for the design, it could not provide a basis for antitrust liability. *Microsoft, 84 F. Supp. 2d at 75*.

[29]** Specifically, with regard to the First Wave Agreements, the appellate court observed that the district court had found the agreements, "although not literally exclusive . . . were exclusive in practice." *Microsoft, 253 F.3d at 75*. Although the district court did not enter precise findings as to the effect of the First Wave Agreements upon rival Java distribution, the appellate court determined that "the record indicates that Microsoft's deals with the major ISVs had a significant effect upon JVM promotion." *Id.* In the absence of procompetitive justification, the appellate court imposed liability for this aspect of the First Wave Agreements. *Microsoft, 253 F.3d at 76*.

As to the Java developer tools, the appellate court's imposition of liability focused not upon the fact that the tools created programs which were not cross-platform, but upon the fact that Microsoft deceived software developers about the Windows-specific nature of the tools. *Microsoft, 253 F.3d at 76-77*. The appellate court found that Microsoft's deception was intentional and without procompetitive explanation. *Microsoft, 253 F.3d at 77*. As a result, the appellate court imposed **[*95]** liability for Microsoft's deception. **[**30]** *Id.*

9. Intel

As noted above, the appellate court's final imposition of liability arose out of a "threat" by Microsoft directed at Intel. *Microsoft, 253 F.3d at 77*. "Intel is [a firm] engaged principally in the design and manufacture of microprocessors." *Findings of Fact, 84 F. Supp. 2d at 34, P 95*. A segment of Intel's business develops software, with the primary focus upon "finding useful ways to consume more microprocessor cycles, thereby stimulating demand for advanced Intel microprocessors." *Id.* The appellate court recounted that in 1995, Intel was in the process of "developing a high performance, Windows-compatible JVM." *Microsoft, 253 F.3d at 77*. Furthering its efforts to combat the cross-platform threat of Java to the Windows platform, Microsoft repeatedly "urged Intel not to help Sun by distributing Intel's fast, Sun compliant JVM." *Id.* Eventually, Microsoft "threatened Intel that if it did not stop aiding Sun . . . then

[20] "The Java technologies include: (1) a programming language; (2) a set of programs written in that language, called the 'Java class libraries,' which expose APIs; (3) a compiler, which translates code written by a developer into 'bytecode'; and (4) a Java Virtual Machine ('JVM'), which translates bytecode into instructions to the operating system. [*Findings of Fact,84 F. Supp. 2d at 29, P 73*. Programs calling upon the Java APIs will run on any machine with a 'Java runtime environment,' ['JRE'] that is, Java class libraries and a JVM. *Findings of Fact, 84 F. Supp. 2d at 29, PP 73, 74*." *Microsoft, 253 F.3d at 74*. The terms "JRE" and "JVM" are sometimes used interchangeably to refer to the Java platform. The court uses the term JVM throughout this Memorandum Opinion for that purpose.

Microsoft would refuse to distribute Intel technologies bundled with Windows." *Id.* Intel capitulated after Microsoft threatened to support an Intel competitor, AMD, if Intel's efforts with Java continued. *Id.*

The appellate **[**31]** court acknowledged Microsoft's anticompetitive intent, as well as the anticompetitive effect of Microsoft's actions toward Intel. *Id.* Microsoft did not offer a procompetitive justification for its treatment of Intel, but "lamely characterized its threat to Intel as 'advice.'" *Id.* Rejecting the characterization of Microsoft's threat as mere "advice," the appellate court found the district court's imposition of liability to be supported by both fact and law. *Microsoft, 253 F.3d at 77-78*. On this basis, the appellate court imposed *§ 2* liability for Microsoft's threat to Intel.

Corresponding to the above-described imposition of liability pursuant to *§ 2* of the Sherman Act, the appellate court imposed liability upon Microsoft for violations of the relevant "state law counterparts of" the *Sherman Act. Microsoft, 253 F.3d at 46*. Beyond these findings, the appellate court did not find Microsoft liable for any additional antitrust violations. Specifically, the appellate court reversed the district court's conclusion that Microsoft's "course of conduct" as a whole constitutes a separate violation of *§ 2*. *Microsoft, 253 F.3d at 78*. In addition, the appellate court rejected the district court's finding of **[**32]** attempted monopolization and remanded the *§ 1* tying claim for further proceedings at the district court level. [21] Plaintiffs opted not to pursue the tying claim on remand. [22] Joint Status Report (Sept. 20, 2001) at 2.

10. Vacating the District Court's Order of Remedy

Following its review of the district court's **[**33]** conclusions with regard to liability, the appellate court considered the district court's choice of remedy. Over the objection of Defendant Microsoft, the district court decided to consider the merits of Plaintiffs' remedy proposal in the absence of an evidentiary hearing. *Microsoft, 253* ***[*96]*** *F.3d at 98-99*; *see also Microsoft, 97 F. Supp. 2d at 59, 61*. The district court did so based on the rationale that Microsoft's evidentiary proffers largely concerned "testimonial predictions about future events" which would be of little use to the court in identifying an "optimum remedy." *Microsoft, 253 F.3d at 99* (quoting *Microsoft, 97 F. Supp. 2d at 62*). Based upon its finding of liability for illegal monopoly maintenance, attempted monopolization, and illegal tying, the district court entered a remedy "nearly identical to plaintiffs' proposal" mandating the divestiture of Microsoft Corporation into an "Operating Systems Business" and an "Applications Business." *Microsoft,253 F.3d at 99-100* (quoting *Microsoft, 97 F. Supp. 2d at 64*). The original decree entered by the district court, often referred to as the Initial **[**34]** Final Judgment ("IFJ"), also included a number of "interim restrictions on Microsoft's conduct." *Microsoft, 253 F.3d at 100*. The interim restrictions included, *inter alia*, mandatory disclosure "to third-party developers the APIs and other technical information necessary to ensure that software effectively interoperates with Windows," *id.* (describing IFJ § 3.b), a prohibition on Microsoft's ability to enter into contracts which oblige third parties to limit their "'development, production, distribution, promotion, or use of, or payment for' non-Microsoft platform-level software," *id.* (quoting IFJ § 3.e), and a "'Restriction on Binding Middleware Products to Operating System Products' unless Microsoft also offers consumers 'an otherwise identical version' of the operating system without the middleware," *id.* (quoting IFJ § 3.g).

The appellate court found three fundamental flaws in the district court's order of remedy, each of which alone justified vacating the remedial decree. The appellate court first concluded that the failure to hold an evidentiary hearing in the face of disputed facts concerning the remedy violated the "cardinal principle of our system of justice **[**35]** that factual disputes must be heard in an open court and resolved through trial-like evidentiary proceedings." *Microsoft, 253 F.3d at 101*. The appellate court rejected the district court's conclusion that evidentiary

[21] Plaintiffs' complaint also included a separate claim of "monopoly leveraging" under *§ 2* of the Sherman Act. Judge Jackson granted summary judgment in favor of Microsoft as to this claim on the grounds that the theory runs "contrary to both economic theory and the Sherman Act's plain language." *United States v. Microsoft, 1998 U.S. Dist. LEXIS 14231, 1998 WL 614485, at *27 (D.D.C. Sept. 14, 1998)*.

[22] Plaintiffs' tying claim alleged that "Microsoft's contractual and technological bundling of the IE Web browser (the 'tied' product) with its Windows operating system ('OS') (the 'tying' product) resulted in a tying arrangement that was per se unlawful." *Microsoft, 253 F.3d at 84*.

proceedings would not be useful, noting that "a prediction about future events is not, as a prediction, any less a factual issue." *Microsoft, 253 F.3d at 102*. Moreover, noted the appellate court, "drafting an antitrust decree by necessity 'involves predictions and assumption concerning future economic and business events.'" *Id.* (quoting *Ford Motor Co. v. United States, 405 U.S. 562, 578, 31 L. Ed. 2d 492, 92 S. Ct. 1142 (1972))*.

In addition to the failure to hold an evidentiary hearing, the appellate court faulted the district court for its "failure to provide an adequate explanation for the relief it ordered." *Microsoft, 253 F.3d at 103*. Finding the trial court's devotion of "a mere four paragraphs of its order to explaining its reasons for the remedy" insufficient, the appellate court observed that the initial remedy was not accompanied by an explanation of the manner in which the remedy would accomplish the objectives of a remedial decree in an antitrust case. *Id.* In this regard, the **[**36]** appellate court recited that "a remedies decree in an antitrust case must seek to 'unfetter a market from anticompetitive conduct,' *Ford Motor Co., 405 U.S. at 577*, to 'terminate the illegal monopoly, deny to the defendant the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future,' *United States v. United Shoe Mach. Corp., 391 U.S. 244, 250, 20 L. Ed. 2d 562, 88 S. Ct. 1496 (1968)*." *Id.* (internal citations in original).

Lastly, the appellate court concluded that the substantial modifications to the liability imposed by the district court merited **[*97]** a new determination of the remedy for the surviving antitrust violations. In particular, the appellate court noted that of the three original findings of liability, only liability for illegal monopoly maintenance in violation of *§ 2* of the Sherman Act had survived, and even this aspect of liability had been modified. *Microsoft, 253 F.3d at 103-04*. The appellate court determined that where "sweeping equitable relief is employed to remedy multiple violations, and some-indeed most-of the findings of remediable violations do not withstand scrutiny" the remedy decree must be vacated **[**37]** because there no longer exists a rational connection between the liability imposed and the remedy ascribed thereto. *Microsoft, 253 F.3d at 105*. Accordingly, the appellate court remanded the case for this Court to resolve any factual disputes surrounding a remedy and for this Court to exercise its "broad discretion" in imposing the "relief it calculates will best remedy the conduct . . . found to be unlawful." *Id.*

11. Remand

The appellate court offered specific guidance to this Court regarding the inquiry to be undertaken following remand. In this regard, the appellate court focused most of its attention on the merits of a structural remedy, noting in particular that if, in fact, Microsoft is a "unitary company," rather than the product of mergers and acquisitions, it is not scissile. *Id.* In addition, the appellate court reiterated its concern over the quantum of proof provided to support a causal connection between the exclusionary conduct and Microsoft's persistence in the dominant market position. *Microsoft, 253 F.3d at 107*. Notably, however, the appellate court did not remark that this Court should consider whether or not to impose any remedy. Instead, the appellate court advised this **[**38]** Court to "consider which of the [original] decree's conduct restrictions remain viable in light of [its] modification of the original liability decision," *Microsoft, 253 F.3d at 105*, and admonished that the remedy imposed should be carefully "tailored to fit the wrong creating the occasion for the remedy," *Microsoft, 253 F.3d at 107* ("We have drastically altered the scope of Microsoft's liability, and it is for the District Court in the first instance to determine the propriety of a specific remedy for the limited ground of liability we have upheld.").

B. District Court's Findings of Fact and Surviving Conclusions of Law

As this Court noted above, the inquiry on remand is fundamentally constrained and guided by the conclusions of the appellate court. The appellate court's conclusions, in turn, rely heavily upon the findings of fact entered by the district court following the liability trial. After a 76-day bench trial, *Microsoft, 253 F.3d at 47*, Judge Jackson entered 412 numbered paragraphs as his "Findings of Fact," *see* *Findings of Fact, 84 F. Supp. 2d 9*. These findings provided the factual basis for the district court's ensuing conclusions of law, issued **[**39]** some four months later. *See* *Microsoft, 253 F.3d at 48*. In considering Microsoft's challenge to the district court's factual findings, the appellate court applied the usual deference to the district court's factual conclusions and found no "clear error," *see* *Microsoft, 253 F.3d at 118*. Additionally, the appellate court held that the district court's factual findings permitted meaningful appellate review. *Id.* In particular, the appellate court refused to reverse the district court's factual findings relevant to the "commingling of browsing and non-browsing code." *Microsoft, 253 F.3d at 66*. Faced with

Microsoft's continuing protestations that the district court's commingling finding was clearly erroneous, the appellate court specifically denied Microsoft's plea that it vacate Finding of Fact, 84 F. Supp. 2d at 49, P 159 "as it relates to the commingling of code." *Id.*

[*98] Because all of the district court's factual findings survived challenge on appeal, they comprise the law of this case and may be relied upon during the remedy phase of this proceeding. Crocker, 49 F.3d at 739. Indeed, it would make little sense to proceed to craft a remedy in the absence of substantial **[**40]** reliance upon the factual foundation which underlies the liability entered in this case. Hence, the factual findings of the district court, like the conclusions of the appellate court, comprise the foundation upon which this court must construct a remedy. Still, the Court remains mindful of the vital distinction between factual findings, however adverse, and legal conclusions.

A somewhat more complex problem is presented by the legal conclusions of the district court. Although exceedingly thorough in its analysis, the opinion of the appellate court did not specifically address at least one of the legal conclusions reached by Judge Jackson during the liability phase. In Part I.A.2.a.i of its opinion, the district court addressed the manner in which Microsoft battled the browser threat in the OEM channel of distribution. Microsoft, 87 F. Supp. 2d at 39. The district court concluded that "Microsoft's campaign proceeded on three fronts":

> First, Microsoft bound Internet Explorer to Windows with contractual and, later, technological shackles . . . . Second, Microsoft imposed stringent limits on the freedom of OEMs to reconfigure or modify Windows 95 and Windows **[**41]** 98 . . . . Finally, Microsoft used incentives and threats to induce especially important OEMs to design their distributional, promotional and technical efforts to favor Internet Explorer to the exclusion of Navigator.

Id. In its review of the district court's liability findings, in Part II.B.1 and 2 of its opinion, the appellate court addressed these findings in a different sequence, considering first the license restrictions Microsoft imposed upon the OEMs, Microsoft, 253 F.3d at 59-64, and second the binding or "integration" of IE and Windows, Microsoft, 253 F.3d at 64-67. The appellate court concluded its analysis of the OEM channel with its discussion of integration, never squarely discussing the district court's finding with regard to the use of "incentives and threats." *See* Microsoft, 253 F.3d at 59-67.

Microsoft acknowledges that the appellate court declined to address individually all of Judge Jackson's specific findings of liability. Microsoft Proposed Conclusions of Law (hereinafter cited as "Microsoft Prop. Concl. of Law") P 79. Microsoft contends that the "acts condemned by Judge Jackson," but not specifically addressed by the appellate court, **[**42]** "apparently were the basis for his conclusion that 'Microsoft's conduct as a whole . . . reinforces the conviction that [Microsoft] was predacious.'" *Id.* (quoting Microsoft, 87 F. Supp. 2d at 44) (emphasis omitted) (alteration by Microsoft). Drawing further upon this rationale, Microsoft argues that the appellate court's reversal of the "course of conduct" liability determination implicitly reverses any of the district court's liability findings not specifically addressed by the appellate court. *See id.*

While an attractive and simple resolution to a complex quandary, Microsoft's reasoning is flawed. In conflating all of Judge Jackson's remaining liability findings, Microsoft ignores the express holding of the appellate court. The appellate court determined to reverse the "course of conduct" liability on the grounds that the district court had *failed to identify* the acts sufficient to support its finding of liability: "The District Court did not point to *any* series of acts, each of which harms competition only slightly but the cumulative effect of which is significant enough to form **[*99]** an independent basis for liability." Microsoft, 253 F.3d at 78 **[**43]** (emphasis added). Tellingly, the appellate court enumerated "the *only specific acts*" relied upon by the district court in assessing liability on a "course of conduct" theory. *Id.* (emphasis added). In this vein, the appellate court recounted that "the only specific acts" identified by the district court, namely "Microsoft's expenditures in promoting its browser," were "not in themselves unlawful." *Id.* "Because the District Court identified no other specific acts as a basis for 'course of conduct liability,'" the appellate court reversed that liability determination. *Id.*

In light of the basis for the appellate court's reversal on this point, it is antithetical to conclude that specific anticompetitive acts clearly described by the district court elsewhere in its conclusions of law are somehow reversed by the appellate court's rejection of the "course of conduct" finding of liability. Indeed, if these findings of anticompetitive conduct could have been treated as the basis for the district court's "course of conduct" liability finding, the appellate court would have considered such findings in reviewing the basis for the district court's "course of conduct" liability **[**44]** determination. Because the appellate court declined to look beyond the particular acts enumerated by the district court in conjunction with its "course of conduct" analysis, there is no basis upon which this Court can conclude that, by reversing liability based upon a "course of conduct," the appellate court implicitly reversed findings of anticompetitive conduct entered by Judge Jackson elsewhere in his opinion.

Although the Court rejects Microsoft's argument in this regard as without rational support, the Court need not dwell long on the appropriate treatment of acts identified by the district court as anticompetitive but not addressed by the appellate court, as Plaintiffs do not rely on any of these acts. Although Plaintiffs contend that Microsoft simply did not appeal Judge Jackson's finding of liability based upon the "incentives and threats" described in *Findings of Fact, 84 F. Supp. 2d at 66, 68, PP 230-38*, Plaintiffs assert that the clearly affirmed bases of liability are sufficient to guide this Court's consideration of "the appropriate remedial provisions as to Microsoft's relations with OEMs." Plaintiffs' Proposed Conclusions of Law (hereinafter cited as "Pl. Prop. Concl. of Law") at 5. Plaintiffs **[**45]** argue that the Court may make its determination of an appropriate remedy in the absence of any reliance upon the "incentives and threats" liability finding entered by Judge Jackson. [23] Because Plaintiffs denounce any reliance upon Judge Jackson's apportioning of liability for coercing OEMs with incentives and threats, neither will the Court rely upon such a finding of liability in its consideration of the appropriate remedy.

C. General *Antitrust Law* of Remedies

It has long been established that ***HN2***[] it is the job of the district court to frame the remedy decree in an antitrust case, and the district court has broad discretion in doing so. *Int'l Salt Co. v. United States, 332 U.S. 392, 400, 92 L. Ed. 20, 68 S. Ct. 12-01 (1947)*. "The relief in an antitrust **[**46]** case must be 'effective to redress the violations' and 'to restore competition.'" *Ford Motor Co., 405 U.S. at 573* (quoting *United States v. E. I. Du Pont De Nemours & Co., 366 U.S. 316, 326, 6 L. Ed. 2d 318, 81 S. Ct. 1243 (1961))*. Not only should the relief ordered **[*100]** "cure the ill effects of the illegal conduct, and assure the public freedom from its continuance," *Ford, 405 U.S. at 575* (quoting *United States v. United States Gypsum Co., 340 U.S. 76, 88, 95 L. Ed. 89, 71 S. Ct. 160, 1951 Dec. Comm'r Pat. 580 (1950))*, "it necessarily must 'fit the exigencies of the particular case,'" *id.* (quoting *Int'l Salt, 332 U.S. at 401*). Ultimately, the goal of a remedy in an equitable suit is not the "punishment of past transgression, nor is it merely to end specific illegal practices." *Int'l Salt, 332 U.S. at 401*. Rather, the remedy should "effectively pry open to competition a market that has been closed by [a] defendant['s] illegal restraints." *Id.* Equitable relief in an antitrust case should not "embody harsh measures when less severe ones will do," 2 PHILLIP E. AREEDA ET AL., ***ANTITRUST LAW*** P 325a, at 246 (2d ed. 2000), nor should it adopt overly regulatory requirements which involve **[**47]** the judiciary in the intricacies of business management, *United States v. Paramount Pictures, 334 U.S. 131, 163, 92 L. Ed. 1260, 68 S. Ct. 915 (1948)*.

HN3[] In crafting a remedy specific to the violations, this Court is empowered to enjoin not only the acts for which the defendant was found liable, but "other related unlawful acts," lest "all of the untraveled roads to [restraint of trade] be left open and [] only the worn one be closed." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 133, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)* (internal quotation marks and citations omitted). In this regard, the Court's remedy "is not limited to prohibition of the proven means by which the evil was accomplished, but may range broadly through practices connected with acts actually found to be illegal." *Gypsum Co., 340 U.S. at 88-89*; *see also United States v. Bausch & Lomb Optical Co., 321 U.S. 707, 724, 88 L. Ed. 1024, 64 S. Ct. 805 (1944)* ("Equity has power to eradicate the evils of a condemned scheme by prohibition of the use of admittedly valid parts of an invalid whole."). Notwithstanding this flexibility, the Court may not simply enjoin "all future violations of the antitrust laws." *Zenith Radio, 395 U.S. at 133.* **[**48]** Rather, a remedy "should be tailored to fit the wrong creating the occasion for the remedy." *Microsoft, 253 F.3d at 107*. Moreover, the case law counsels that the remedial decree

[23] Beyond this single liability finding, which the Court raised with the parties, Plaintiffs have not directed the Court to other instances where the district court ascribed liability, and the appellate court's treatment of that finding is unclear or absent.

should be "as specific as possible, not only in the core of its relief, but in its outward limits, so that parties may know[] their duties and unintended contempts may not occur." *Int'l* Salt, 332 U.S. at 400.

In reversing the district court's original order of remedy in this case, the appellate court criticized the district court for failing to explain how the remedy would "'unfetter a market from anticompetitive conduct,' Ford Motor Co., 405 U.S. at 577 . . . 'terminate the illegal monopoly, deny to the defendant the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future,' [United Shoe, 391 U.S. at 250]." Microsoft, 253 F.3d at 103. In attempting to provide the explanation sought by the appellate court, this Court notes at the outset that the facts and circumstances of this case necessarily affect the extent to which this Court's order of remedy **[**49]** will "accomplish those objectives." *Id.* It bears repeating that the monopoly in this case was not found to have been illegally acquired, *see* United States v. Microsoft, 312 U.S. App. D.C. 378, 56 F.3d 1448, 1452 (D.C. Cir. 1995), [24] but only to have been illegally **[*101]** maintained. *See* Microsoft, 253 F.3d at 46. Moreover, the appellate court observed that "the District Court expressly did not adopt the position that Microsoft would have lost its position in the OS market but for its anticompetitive behavior." 84 F. Supp. 2d at 107 (citing Findings of Fact, 84 F. Supp. 2d at 111, P 411). In this regard, the "causal connection between Microsoft's exclusionary conduct and its continuing position in the operating systems market" was established "only through inference." 84 F. Supp 2d at 106-07. Given these circumstances, as the parties concede, it does not seem to be a valid objective for the remedy in this case to actually "terminate" Microsoft's monopoly. Rather, the proper objective of the remedy in this case is termination of the exclusionary acts and practices related thereto which served to illegally maintain the monopoly.

[50]** The fact that the "causal connection between Microsoft's exclusionary conduct and its continuing position in the operating systems market" was established "only through inference," *id.*, has given rise to significant disagreement between the parties as to Plaintiffs' burden on remand. In its appeal, Microsoft "urged" the circuit court to "reverse on the monopoly maintenance claim, because plaintiffs never established a causal link between Microsoft's anticompetitive conduct, in particular its foreclosure of Netscape's and Java's distribution channels." Microsoft, 253 F.3d at 78. Relying heavily on the treatise on ***antitrust law*** authored by Phillip E. Areeda and Herbert Hovenkamp, the appellate court determined that liability in this case could be established through an inference of causation. Microsoft, 253 F.3d at 79 (citing 3 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** P 651c, at 78 (rev. ed. 1996)). Applying this "rather edentulous test for causation" the appellate court identified two relevant inquiries, the satisfaction of which would result in liability:

> (1) whether as a general matter the exclusion of nascent threats is the type of conduct that is reasonably capable of contributing **[**51]** significantly to a defendant's continued monopoly power and (2) whether Java and Navigator reasonably constituted nascent threats at the time Microsoft engaged in the anticompetitive conduct at issue.

Microsoft, 253 F.3d at 79-80. On the record from the district court, the appellate court readily concluded that both inquiries had been satisfied and that liability must be imposed. *Id.*

The appellate court noted, however, that Microsoft's "concerns over causation have more purchase in connection with the appropriate remedy." 253 F.3d at 80. In particular, the appellate court noted that the strength of the causal connection is to be considered "in connection with the appropriate remedy issue, *i.e.*, whether the court should impose a structural remedy or merely enjoin the offensive conduct at issue." *Id.* Again relying upon Areeda and Hovenkamp, the appellate court focused on the structural remedy that had been imposed by Judge Jackson and identified a relationship between the evidence of causation and the imposition of such a "radical" remedy:

> As we point out later in this opinion, divestiture is a remedy that is imposed only with great caution, in part because its long-term **[**52]** efficacy is rarely certain. Absent some measure of confidence that there has been an actual loss to competition that needs to be restored, wisdom counsels against adopting radical structural

[24] In that case, which is often recognized as the precursor to this case, the appellate court noted that "the government did not allege and does not contend-and this is of crucial significance to this case-that Microsoft *obtained* its alleged monopoly position in violation of the antitrust laws." Microsoft, 56 F.3d at 1452 (emphasis in original).

> **[*102]** relief. *See* 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 653b, at 91-92 ("More extensive equitable relief, particularly remedies such as divestiture designed to eliminate the monopoly altogether, raise more serious questions and require a clearer indication of a significant causal connection between the conduct and creation or maintenance of the market power.").

Id. (internal citation omitted). Later in the opinion, the appellate court again quoted from Areeda and Hovenkamp, highlighting the need for "a clearer indication of a *significant causal connection* between the conduct and the creation or maintenance of the market power" where the remedy is structural relief. *Microsoft, 253 F.3d at 106* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 653b, at 91-92) (emphasis added by appellate court). The appellate court instructed that in the absence of "a sufficient causal connection between Microsoft's anticompetitive conduct and its dominant position in the OS market . . . the antitrust defendant's unlawful **[**53]** behavior should be remedied by 'an injunction against the continuation of that conduct.'" *Id.* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 650a, at 67).

In effect, the appellate court appears to have identified a proportionality between the strength of the evidence of the causal connection and the severity of the remedy. Accordingly, ***HN4***[] the "mere existence of an exclusionary act does not itself justify full feasible relief against the monopolist to create maximum competition." *Id.* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 650a, at 67). Similarly, because structural relief is "designed to eliminate the monopoly altogether," 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 653b, at 91, "wisdom counsels against adopting radical structural relief" in the "absen[ce of] some measure of confidence that there has been an actual loss to competition that needs to be restored," *Microsoft, 253 F.3d at 80*. Instead, the court crafting a remedy must assess the strength of the causation evidence that established liability and tailor the relief accordingly. *Microsoft, 253 F.3d at 107*. [25]

[54]** While the appellate court's discussion of causal connection in Parts II.C and V.F of its opinion remains instructive on the issue of remedy, it bears emphasizing that the appellate court was largely concerned in those portions of its opinion with the propriety of a structural remedy of dissolution. Because Plaintiffs have not persisted in their request for a structural remedy of dissolution, for the most part, this Court examines the existing causal connection through a different lens than that anticipated and addressed by the appellate court. [26] Nevertheless, the Court's determination **[*103]** of the appropriate remedy in this case reflects, among other considerations, the strength of the evidence linking Defendant's anticompetitive behavior to its present position in the market.

[55]** The appellate court also noted a "practical" difficulty facing this Court relevant to the issue of remedy. *Microsoft, 253 F.3d at 48*. The appellate court appropriately observed at the outset of its review the "problematic" fact that over six years, now seven, "have passed since Microsoft engaged in the first conduct plaintiffs allege to be anticompetitive." *Microsoft, 253 F.3d at 49*. This span of time is an "eternity in the computer industry," which is characterized by rapid change. *Id.* The appellate court further acknowledged that the "dramatic" changes that can occur in the computer industry in such a short period of time "threaten[] enormous practical difficulties for courts considering the appropriate measure of relief in equitable enforcement actions." *Id.* The appellate court recognized that in such cases "conduct remedies may be unavailing . . . because innovation to a large degree has already rendered the anticompetitive conduct obsolete (although by no means harmless)." *Id.* At a minimum, opined the

---

[25] Relying upon the appellate court's discussion of causation, Microsoft has argued that Plaintiffs have not satisfied the requirements of antitrust standing ("causation") and "antitrust injury" and must do so in this remanded proceeding in order to obtain any remedy. As explained in great detail in the Court's Memorandum Opinion dated June 12, 2002, these issues were, of necessity, addressed in conjunction with the finding and affirmance of liability by the district court and appellate court. *See State of New York, et al. v. Microsoft Corp., 209 F. Supp. 2d 132*, slip op. *passim* (D.D.C.2002). In setting up this straw-man argument, Microsoft ignores the distinction between the establishment of some type of causation, which is fundamental to a finding of liability and an assessment of the strength of the causal connection between the anticompetitive behavior and the maintenance of the monopoly for purposes of crafting a remedy. Only the latter of these inquiries is presently before the Court.

[26] As the parties' arguments reflect, it is unclear whether the appellate court intended only for this court to re-examine the existing evidence relevant to the "causal connection" in conjunction with crafting a remedy, or whether Plaintiffs were to be given an opportunity to supplement the evidence relating to causation.

appellate court, such complexities demand an "evidentiary hearing on remedies-to update and flesh out the available information." *Id.*

The **[**56]** parties and the Court undertook the lengthy process of precisely such an evidentiary hearing and endeavored to update and flesh out the relevant factual information. Notwithstanding these substantial efforts and the benefits derived therefrom, as the appellate court certainly anticipated, there remain difficulties inherent in crafting conduct remedies an "eternity" after commencement of the relevant conduct. Aware, though undeterred, by these difficulties, the Court, in the exercise of its discretion, has arrived at an appropriate remedy for Microsoft's illegal behavior. Ever-mindful of the complexities identified by the appellate court and guided by the words of the Immortal Bard that "it is excellent to have a giant's strength, but it is tyrannous to use it like a giant," [27] the Court sets forth its findings of fact, order of remedy, and justification therefor.

III. SCOPE OF THE REMEDY

On December 7, 2001, Plaintiffs and Defendant simultaneously **[**57]** filed their competing proposals for a remedy in this case. In response to Plaintiffs' proposal and the discovery which ensued, Microsoft filed a motion in limine seeking "to exclude all evidence concerning server operating systems, hand-held devices, television set-top boxes and Web services." Def. Mot. in Limine to Exclude Testimony on Products Unrelated to the Limited Ground of Liability Upheld by the Ct. of Appeals at 1. Microsoft argues, *inter alia*, that these devices and products fall outside of the monopoly market and are unrelated to the conduct found to be anticompetitive and, therefore, are inappropriate for consideration and coverage by the remedy in this case. *Id.* All of the Microsoft conduct which was found to be exclusionary in violation of *§ 2* of the Sherman Act was directed at "preventing the effective distribution and use of products that might threaten that monopoly." *Microsoft, 253 F.3d at 58*. The type of products at which Microsoft directed this conduct were identified by the district court as "middleware," with a specific focus on the Navigator and the Java technologies. Having reserved ruling on Microsoft's motion and permitted the parties **[**58]** to further develop the relevant facts, the Court now addresses **[*104]** as a threshold matter the manner in which Plaintiffs propose to treat "middleware" in the remedial phase of this case.

Ordinarily, the Court might conclude rather swiftly that products which fall outside of the relevant market are inappropriate for discussion and consideration by the Court in conjunction with the crafting of a remedy for illegal monopoly maintenance. The Court does not do so in this case because the theory of liability pursuant to which Plaintiffs' prevailed involved Microsoft's response to a type of product which did not fall within the monopoly market, but nevertheless posed a potential threat to Microsoft's monopoly. Accordingly, the Court pauses to examine the monopoly market, the products which were excluded from that market, and the relationship of middleware to this market.

HN5[] The definition of the relevant product market is a necessary element of a monopolization charge. *See* *United States v. Grinnell Corp., 384 U.S. 563, 570, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *Microsoft, 253 F.3d 51*. As noted above, the monopoly market in this case is the market for Intel-compatible PC operating systems. **[**59]** *See* *Microsoft, 253 F.3d at 51*. Microsoft objected to this market definition, arguing that the district court had defined the market too narrowly, improperly excluding "three types of products: non-Intel compatible operating systems (primarily Apple's Macintosh operating system, Mac OS), operating systems for non-PC devices (such as handheld computers and portal Websites), and 'middleware' products, which are not operating systems at all." *Microsoft, 253 F.3d at 52*. The appellate court summarily rejected Microsoft's challenge with regard to the exclusion of the first two types of products, observing that Microsoft had not challenged the key district court findings of fact which determined that the products were not likely to perform the functions of a PC anytime in the near future. *Id.* The appellate court considered more carefully Microsoft's argument with regard to the exclusion of middleware from the market, but ultimately concluded, *Microsoft, 253 F.3d at 54*, that middleware did not meet the test of "reasonable interchangeability," *Microsoft, 253 F.3d at 53*.

[27] WILLIAM SHAKESPEARE, MEASURE FOR MEASURE, act 2, sc. 2.

Microsoft subsequently challenged as inconsonant the exclusion of middleware from the market and Plaintiffs' **[**60]** theory of liability that Microsoft's suppression of the middleware threat could amount to illegal monopoly maintenance in violation of *§ 2*. *Microsoft, 253 F.3d at 54*. The appellate court rejected this contention based upon the distinction between the level of competitive threat relevant to establishing a market definition and the level of competitive threat relevant to the imposition of *§ 2* liability. *Id.* "Nothing in *§ 2* of the Sherman Act limits its prohibition to actions taken against threats that are already well-developed enough to serve as present substitutes." *Id.* The appellate court observed, in this regard, that because middleware was merely a *nascent* threat, *id*., it may simultaneously *threaten* to "become a viable substitute for Windows" and yet, remain outside of the relevant monopoly market because it is "not *presently* a viable substitute for Windows." *Id.* (emphasis added). Based upon this analysis, the appellate court affirmed the district court's identification of the relevant market and determined that Microsoft possessed monopoly power in that market. *Microsoft, 253 F.3d at 54-58*.

Notably, the district court in the liability phase provided **[**61]** only a general definition of what exactly constitutes "middleware," defining the term largely through example and the identification of key attributes, rather than absolute characteristics. As the district court pointed out in its *Findings of Fact*, Navigator had "three key middleware attributes that endowed it with the potential to diminish the applications **[*105]** barrier to entry." *Findings of Fact, 84 F. Supp. 2d at 28, P 69*. The Navigator browser was a complement to Windows, rather than a substitute operating system and, therefore, had the potential to gain widespread use. *Id.* Additionally, Navigator exposed "a set (albeit a limited one) of APIs" which provided platform capabilities, and "it had been ported to more than fifteen different operating systems." *Id.* Similarly, the Java technology exposed its own APIs and, thus, enabled applications written in Java to be ported with relative ease. *Findings of Fact, 84 F. Supp. 2d at 29, P 74*. Java had the potential to achieve the necessary ubiquity because it could be, and ultimately was, distributed along with Navigator. *Findings of Fact, 84 F. Supp. 2d at 30, P 76*. It is noteworthy that the district court regarded the potential of Navigator and Java to "hasten the demise of the applications **[**62]** barrier to entry" as a "combined effort" resulting from the "symbiosis" between the two technologies, which exceeded the potential independently held by either of the technologies. *Findings of Fact, 84 F. Supp. 2d at 30, P 77*. Although they played, at best, an extremely limited role in the liability findings, mention was made of the potential threats to Microsoft's monopoly by (1) Lotus Notes, which presented "a graphical interface that was common across multiple operating systems; . . . exposed a set of APIs to developers; and, like Navigator, . . . served as a distribution vehicle for Sun's Java runtime environment," *Findings of Fact, 84 F. Supp. 2d at 30, P 78; (2)* Intel's Native Signal Processing software, "which interacted with the microprocessor independently of the operating system and exposed APIs directly to developers of media content," *id.*; and (3) Apple's and RealNetworks' multimedia playback technologies, "which ran on several platforms (including the Mac OS and Windows) and similarly exposed APIs to content developers," *id.*

Drawing from this rather amorphous definition, as noted above, Plaintiffs identify a broad new set of technologies which they believe merits treatment by the remedy in this case. **[**63]** Plaintiffs appear to recognize that it is insufficient to simply identify other technologies that the district court excluded from the monopoly market and argue that these technologies are relevant to the remedy in this case on those grounds alone. [28] Instead, Plaintiffs attempt to establish a nexus between the newly identified technologies and the acts for which Microsoft was found liable. To establish this nexus, Plaintiffs propose that the newly identified technologies are "middleware," *see* States' Proposed Remedy ("SPR") § 22.w, or are software that poses a platform threat similar to that posed by middleware. Such a nexus, argue Plaintiffs, justifies imposition of a remedy for Microsoft's antitrust violations that broadly addresses these newly identified technologies, despite their virtual absence from the liability phase. Not surprisingly, Microsoft vehemently disagrees with the proposition that the technologies identified by Plaintiffs are sufficiently like Navigator and Java such that these technologies should be addressed by the Court's remedy in this case. As a result, the Court's consideration of the relevance of these newly identified technologies to the remedy in **[**64]** this case turns predominantly upon whether the particular technology can be viewed as a kind of

---

[28] The technologies identified by Plaintiffs in this phase of the proceeding include products which, like middleware, were excluded from the monopoly market, but which, unlike middleware, did not play a role in the attribution of liability to Microsoft for exclusionary conduct. *Microsoft, 253 F.3d at 52*.

middleware, or at least as a "nascent" threat which is similar to the middleware threats addressed during the liability phase.

[*106] In the following section, the Court examines factually the various middleware and middleware-related definitions proposed in the parties' two remedies. To provide the necessary background to this discussion, the Court commences the discussion with a brief examination of the case law relied upon by Plaintiffs that is specifically relevant to the scope of the remedy. The Court next addresses and renders factual findings regarding the treatment of middleware under the two competing **[**65]** remedy proposals, as these definitions play a significant role in defining the scope of the remedy. The Court then examines the new technologies identified by Plaintiffs, as well as the theories advanced by Plaintiffs to relate these technologies to the theory of liability in this case. Following the entry of factual findings on these topics, the Court applies the relevant case law and, in the exercise of its discretion, reaches appropriate conclusions regarding the inclusion or exclusion of these technologies from the scope of the remedy. The Court's determination with regard to these technologies then informs the Court's assessment of the appropriate treatment of middleware in the remedy. Lastly, the Court addresses, both factually and legally, other attempts by Plaintiffs to broaden the scope of the remedy in this case, as well as Microsoft's opposing view, which advocates a severe narrowing of the scope of the remedy in this case.

From this analysis the Court ultimately concludes that Plaintiffs' proposed definition of "middleware" is inconsonant with the treatment of the term during the liability phase of this case. Plaintiffs include in their definition of "middleware" almost **[**66]** any software product, without regard to the potential of the product to evolve into a true platform for other applications. In addition, the Court observes that Plaintiffs' middleware definition, because of its use throughout their proposed remedy, renders various provisions of Plaintiffs' remedy ambiguous and, therefore, unenforceable. A further flaw in Plaintiffs' treatment of middleware is the inclusion of technologies which fall outside of the relevant market and which do not pose a threat to Microsoft's monopoly similar to the threat posed by nascent middleware. While the Court does not fault Plaintiffs' general approach in looking beyond the relevant market to search for the new nascent threats, the Court is unable to conclude that Plaintiffs have established that all of these technologies have the capacity to increase competition within the relevant market. Notwithstanding the Court's rejection of Plaintiffs' "middleware" definition, the Court concludes that one of the technologies identified by Plaintiffs, server/network computing, has the capacity to function in a role akin to middleware, and thereby increase competition in the relevant market. Accordingly, the Court determines **[**67]** to address this technology in a portion of the remedy where the Court need not corrupt the definition of "middleware" in order to do so.

A. Legal Authority Related to Scope of the Remedy

HN6[] "The determination of the scope of the decree to accomplish its purpose is peculiarly the responsibility of the trial court." *Gypsum, 340 U.S. at 89*. Plaintiffs premise their theory with regard to the appropriate scope of the remedy for Microsoft's antitrust violations on Supreme Court precedent that instructs that an appropriate remedy in antitrust cases typically exceeds "a simple proscription against the precise [unlawful] conduct previously pursued," *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 698, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*, because "a mere prohibition of the precise scheme would be ineffectual to prevent **[*107]** restraints," *Bausch & Lomb, 321 U.S. at 727*. *See* Pl. Supp. Mem. in Opp'n to Def. Mot. in Limine to Exclude Testimony on Products Unrelated to the Limited Ground of Liability Upheld by the Ct. at 37. Indeed, the Supreme Court has long held that ***HN7***[] in order to "cure the ill effects of the illegal conduct, and assure **[**68]** the public freedom from its continuance," the remedial decree imposed by the Court in this case should "range broadly through practices connected with acts actually found to be illegal." *Gypsum, 340 U.S. at 88-89*. Yet despite unquestionable legal authority which indicates that the Court may address conduct beyond the precise parameters of that found to violate the antitrust laws, Plaintiffs advocate an extraordinarily expansive view of the conduct that can be encompassed by a remedy in this case.

Plaintiffs rely chiefly upon four cases in which the Supreme Court sanctioned behavioral remedies that governed conduct beyond the parameters of the antitrust violation. The earliest of the cases heavily relied upon by Plaintiffs is *International Salt Co. v. United States, 332 U.S. 392, 92 L. Ed. 20, 68 S. Ct. 12 (1947)*. In that case, the defendant, engaged in the commerce of salt and related products, owned patents "on two machines for utilization of salt products." *Id. at 394*. The defendant distributed the machines principally through leases. *Id.* The terms of the equipment leases required the lessees to purchase from the defendant "all unpatented salt and salt **[**69]** tablets consumed in the leased machine." *Id.* Discussing whether this aspect of the leases impermissibly restrained trade, the Supreme Court concluded that although the patents conferred upon the defendant a "right to restrain others from making, vending or using the patented machine . . . the patents confer no right to restrain use of, or trade in, unpatented salt." *Id. at 395-96*. As a result, the defendant was held liable for the violation of ***antitrust law***. *Id. at 396*. To redress the liability finding, the defendant proposed a decree that enjoined it from refusing to license, lease, or sell any machine on the grounds that a licensee, lessee, or purchaser had used or planned to use salt not manufactured by defendant. *Id. at 399 n.8*. The government, however, sought and obtained a decree that, *inter alia*, directed the defendant to lease or sell the salt utilization machines generally to any applicant on non-discriminatory terms and conditions, *id. at 398 n.7*, notwithstanding the fact that the record did not reflect any "threat [by the defendant] to discriminate after the judgment of the Court is pronounced, **[**70]** " *id. at 399*.

In response to the defendant's challenge to the decree on the grounds that "the injunction should go no farther than the violation or threat of violation," the Supreme Court explained:

> We cannot agree that the consequences of proved violations are so limited. The fact is established that the appellant already has wedged itself into this salt market by methods forbidden by law. The District Court is not obliged to assume, contrary to common experience, that a violator of the antitrust laws will relinquish the fruits of his violation more completely than the court requires him to do. And advantages already in hand may be held by methods more subtle and informed, and more difficult to prove, than those which, in the first place, win a market. When the purpose to restrain trade appears from a clear violation of law, it is not necessary that all of the untraveled roads to that end be left open and that only the worn one be closed. The usual ways to the prohibited goal may be blocked against the **[*108]** proven transgressor and the burden put upon him to bring any proper claims for relief to the court's attention.

Id. at 400. With this **[**71]** statement, the Supreme Court made clear that ***HN8***[] once liable for an antitrust violation, a defendant may be restricted in its business so as to force a relinquishment of the fruits of the anticompetitive conduct. It is this surrender which is to assist the courts in "prying open to competition a market that has been closed by defendants' illegal restraints." *Id. at 401*. Notably, however, despite the language regarding "relinquishment" of illegally obtained "fruits," the remedy affirmed by the Court in *International Salt* did not mandate a divestiture of the defendant's assets or a structural division of the defendant, but merely regulated the terms pursuant to which the defendant could engage in its business of leasing or selling the salt machines. *Id. at 398 n.7*.

The following year, in *United States v. Paramount Pictures, 334 U.S. 131, 92 L. Ed. 1260, 68 S. Ct. 915 (1948)*, the Supreme Court reiterated its view that ***HN9***[] the equitable powers of the courts to remedy antitrust violations may justify "uprooting all parts of an illegal scheme-the valid as well as the invalid-in order to rid the trade or commerce of all taint" of the anticompetitive actions. *Id. at 148.* **[**72]** The underlying facts of that case concerned, among a number of other restraints, agreements between movie distributors and exhibitors, known as "clearances," which were "designed to protect a particular run of a film against a subsequent run." [29] *Id. at 144-45*. The district court in that case concluded that these agreements while not *per se* unlawful, could constitute unreasonable restraints of trade in some instances. *Id. at 146-47*. On the facts before it, the district court imposed liability upon the defendants for "a conspiracy to restrain trade by imposing unreasonable clearances." *Id. at 147*. Having affirmed the finding of liability on this point, the Supreme Court examined the remedial decree provision that placed the burden on the defendant distributor to prove the legality of any clearance that was subsequently challenged. The Supreme Court concluded that the remedy imposed by the district court was appropriate because the district court "could . . . have eliminated clearances completely for a substantial period of time, even though . . . they were not illegal per se." *Id. at 148*. The Supreme Court observed **[**73]** in this regard that "those who have shown such a marked proclivity for

---

[29] "A clearance is the period of time, usually stipulated in license contracts, which must elapse between runs of the same feature within a particular area or in specified theatres." *Id. at 144 n.6*.

unlawful conduct are in no position to complain that they carry the burden of showing that their future clearances come within the law." *Id.*

With these two rulings, the Supreme Court confirmed that ***HN10***[] a remedy in an antitrust case seeks not only to eliminate illegal conduct, but to address the effects of that conduct upon the marketplace. Pursuant to this view, therefore, it may be appropriate in some instances that a remedy address some legal conduct which, by its relation to the illegal and anticompetitive conduct, perpetuates the antitrust violator's restraint on trade. At the same time, however, nothing in these two cases indicates that an antitrust violator should be subject to an outright denial of the ability to continue **[**74]** to do business and to compete with other participants in the market and in other markets.

[*109] Plaintiffs next direct the Court to the Supreme Court's holding in *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*. In that case, the Supreme Court considered antitrust claims relating to various unlawful "patent pools," including those in *Canada, England, and Australia. 395 U.S. at 105*. The trial court found liability relating to all of the "patent pools" and entered "injunctive relief against further participation in any arrangement to prevent Zenith from exporting electronic equipment into *any foreign market*." *Id. at 107* (emphasis added). The Supreme Court agreed with the court of appeals that there was insufficient evidence to support a claim for money damages relating to the Australian and English markets, *id. at 126-28 (England), 129 (Australia)*, but agreed with the district court that defendant and another entity "were conspiring to exclude Zenith and others from the Canadian market," *id. at 131*. Accordingly, the Supreme Court concluded that, "judged by the proper standard, the record **[**75]** before [it] warranted the injunction with respect to Canada." *Id.* Notwithstanding this conclusion, the Court went on to "reinstate the injunction entered by the District Court insofar as it more broadly barred [the defendant] from conspiring with others to restrict or prevent Zenith from entering any other foreign market." *Id. at 132*. The Court explained:

> ***HN11***[] In exercising its equitable jurisdiction, "(a) federal court has broad power to restrain acts which are of the same type or class as unlawful acts which the court has found to have been committed or whose commission in the future unless enjoined, may fairly be anticipated from the defendant's conduct in the past." . . . We see no reason that the federal courts, in exercising the traditional equitable powers extended to them by § 16, should not respond to the "salutary principle that when one has been found to have committed acts in violation of a law he may be restrained from committing other related unlawful acts."

Id. at 132-33 (quoting *NLRB v. Express Publishing Co., 312 U.S. 426, 435, 85 L. Ed. 930, 61 S. Ct. 693, 436 (1941))*. It is from this passage that Plaintiffs appear to derive **[**76]** their familiar refrain that the remedy imposed by this Court should reach the conduct found to violate the antitrust laws, as well as conduct which is "the same or similar" to such illegal conduct. Importantly, however, as the *Zenith Radio* Court expressed the rule, the related acts must also be "unlawful" or of the "same type or class" in order to warrant injunction. *Id.* In this regard, the *Zenith Radio* case does not support so broad a reading as to say that clearly lawful practices may be enjoined simply because they will weaken the antitrust violator's competitive position.

Finally, Plaintiffs call to this Court's attention the Supreme Court's holding in *National Society of Professional Engineers v. United States* that an injunction that "goes beyond a simple proscription against the precise conduct previously pursued . . . is entirely appropriate." *435 U.S. at 698*. In that case, upon finding that an association's cannon of ethics prohibiting competitive bidding by its members was unlawful *per se*, the district court enjoined the association "from adopting any official opinion, policy statement, or guideline stating or implying that competitive bidding **[**77]** is unethical." *Id. at 697*. The Supreme Court affirmed liability and rejected the defendant's contention that the provision should be struck down because of its potential, if broadly read, to "block legitimate paths of expression on all ethical matters relating **[*110]** to bidding." *Id. at 698*. Quoting from *International Salt*, the Supreme Court noted that the "transgressor" could "bring any proper claims for relief [from the remedy] to the court's attention," *id.* (quoting *332 U.S. at 400*) (quotation marks omitted), should the defendant "wish[] to adopt some other ethical guideline more closely confined to the legitimate objective of preventing deceptively low bids," *United States, 435 U.S. at 699* (quoting the court of appeals opinion in that case) (quotation marks omitted).

These four cases, argue Plaintiffs, comprise a "rich body of case law" which supports their expansive view of the remedy. Pl. Supp. Mem. in Opp'n to Def. Mot. in Limine to Exclude Testimony on Products Unrelated to the Limited

Ground of Liability Upheld by the Ct. of Appeals at 40. The Court does not agree that this body of law, though it may be "rich," can withstand the heavy burden **[**78]** heaped upon it by Plaintiffs. Undoubtedly Plaintiffs are correct that there is ample precedent to support the imposition of conduct remedies which go beyond the specific acts found to be anticompetitive, as the Supreme Court stated in a more recent summary of its own body of law on the subject:

> ***HN12***[] The suggestion that antitrust violators may not be required to do more than return the market to the status quo ante is not a correct statement of the law. In *United States v. Paramount Pictures, Inc., 334 U.S. 131, 92 L. Ed. 1260, 68 S. Ct. 915*, we sustained broad injunctions regulating motion picture licenses and clearances which were not related to the status quo ante.

Ford Motor Co., 405 U.S. at 573 n.8 (citations and quotation marks omitted). Plaintiffs' remedy, however, extends this precedent well beyond its clear and logical application. In each of the cases relied upon by Plaintiffs, to the extent that the remedy imposed exceeded the specific anticompetitive conduct, the restrictions were closely related to the anticompetitive conduct. As the Court explains in detail below, in this case, the scope of Plaintiffs' proposal exceeds most rational extensions of injunctive **[**79]** relief for the anticompetitive conduct. While some of the areas of expansion proposed by Plaintiffs are closely related to the circumstances which gave rise to liability in this case, the majority of practices that Plaintiffs seek to enjoin in relation to alleged "bad" acts by Microsoft do not fall squarely within the category of "acts which are of the same type or class" as those found to violate the antitrust laws. *Zenith Radio, 395 U.S. at 132*.

B. Findings of Fact Related to Scope of the Remedy

1. Introduction

HN13[] "[A] 'full exploration of facts is usually necessary in order (for the District Court) properly to draw (an antitrust) decree' so as 'to prevent future violations and eradicate existing evils.'" *United States v. Ward Baking Co., 376 U.S. 327, 330, 11 L. Ed. 2d 743, 84 S. Ct. 763-31 (1964)* (quoting *Associated Press v. United States, 326 U.S. 1, 22, 89 L. Ed. 2013, 65 S. Ct. 1416 (1945))*. The Court observes at the outset of its examination of the evidence in this case that, in the present context, the ability of the Court to render findings of fact, in the ordinary sense, is rather limited. As the appellate court itself observed, ***HN14***[] "drafting an antitrust decree **[**80]** by necessity 'involves predictions and assumptions concerning future economic and business events.'" *Microsoft, 253 F.3d at 102* (quoting *Ford Motor Co., 405 U.S. at 578*). Whether or not this Court accepts a particular factual prediction often rests upon whether the witness has identified a sound basis in fact or logic to **[*111]** justify the prediction. Where no such basis has been identified, unless self-evident to the Court, the Court may accord little weight to the prediction. Similarly, because of the predictive nature of the testimony, much of the factual testimony is meaningless unless such testimony is considered together with the accompanying argument regarding the intended use of the testimony. The Court observes in this regard that, quite often, Plaintiffs' arguments are presented primarily through the testimony of their witnesses. Recognizing the importance of addressing these intertwined factual and legal assertions, the Court sets forth this testimony as a part of its factual discussion. In many instances, however, the Court neither credits nor rejects these intertwined assertions in its factual discussion because the Court ultimately finds **[**81]** the argument based thereon to be unpersuasive or irrelevant.

The Court further observes that, in this proceeding, factual testimony often resembles that which would otherwise appear to be a legal or discretionary conclusion. This convergence is understandable given that issues of fact and law tend to lose their already faint distinctions in the context of any discussion regarding what constitutes an appropriate or sufficient remedy. Nevertheless, in rendering its separate factual findings pursuant to *Rule 52 of the Federal Rules of Civil Procedure*, the Court has endeavored to draw the necessary distinction between predictive factual assertion and legal conclusion.

Prior to entering factual findings, the Court pauses to address the role played by Microsoft's competitors in this proceeding. It is both understandable and expected that Plaintiffs would turn to industry participants to develop the factual record regarding the impact of Microsoft's illegal conduct upon competition, to identify any new technologies which may be relevant to the issue of remedy, and to explain the relation of such technologies to the monopoly market. Undoubtedly, testimony from industry participants played **[**82]** a role during the liability phase, as such participants are most likely to have the relevant factual knowledge. *See* Microsoft, 87 F. Supp. 2d 34; Findings of Fact, 84 F. Supp. 2d 9. Thus, to the extent that Microsoft's competitors have offered testimony explaining various technologies and the impact of potential remedial provisions, their testimony is often useful to the Court. Nevertheless, where such testimony reveals a self-interest in a particular remedial provision which is not balanced by a particular benefit to competition as a whole or to other participants in the industry, the Court, of necessity, considers with caution the views of these industry participants. The Court takes careful note of those remedial proposals which advance the interests of particular competitors and takes pains to ensure that the remedy in this case is not a vehicle by which such competitors can advance their own interests. *See* Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458, 122 L. Ed. 2d 247, 113 S. Ct. 884-59 (1993); Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 110, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986); *see also* Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977). **[**83]** Any other result would run contrary to ***antitrust law*** and principles of equity.

The Court has considered the evidence submitted by the parties, made determinations as to its relevancy and materiality, assessed the credibility of the testimony of the witnesses, both written and oral, and ascertained the probative significance of the documentary and visual evidence presented. Based upon the Court's consideration of the entire record in this case and all of the reasonable inferences to be **[*112]** drawn therefrom, the Court sets forth the following factual findings. The Court sets forth additional factual findings in Appendix A.

2. Treatment of Middleware

Plaintiffs and Defendant have proposed detailed injunctive relief as the remedy in this case. *See* Pl. Ex. 1509 (hereinafter "States' Proposed Remedy" or "SPR"); Def. Ex. 1020 (hereinafter "Second Revised Proposed Final Judgment" or "SRPFJ"). Integral to understanding the two remedies proposed in this case is a preliminary understanding of the manner in which the two remedies treat middleware. In simple terms, the treatment of middleware in the two remedies plays a significant role in defining the scope of products which will receive **[**84]** various protections under the terms of the respective remedies. For example, both proposed remedies impose restrictions upon Microsoft's ability to retaliate against companies which sell or support third-party middleware. *See, e.g.*, SPR § 8; SRPFJ § III.A. In addition, both proposed remedies address the middleware portions of Microsoft's operating system, imposing certain requirements upon Microsoft with regard to its product design related to these portions of its operating system. *See, e.g.*, SPR § 2.c; SRPFJ § III.H. By way of further example, both proposed remedies require Microsoft to provide certain kinds of technical information with regard to the interaction between its operating system and its software products which are treated as Microsoft middleware. *See, e.g.*, SPR § 4; SRPFJ § III.D. By addressing middleware of various types, both remedies intend to increase the ability of third-party middleware to provide platform capabilities which rival the platform function of the Windows operating system.

a. "Middleware" and Related Definitions in Microsoft's Proposal

Despite these similarities in addressing the treatment of middleware, the two remedy **[**85]** proposals adopt rather distinct and divergent approaches to defining the term. Microsoft's proposed remedy does not actually use the term "middleware" standing alone, but instead addresses primarily two types of software: "Microsoft Middleware Products" and "NonMicrosoft Middleware Products." As is quite apparent from the terminology, Microsoft's remedy proposal draws a distinction between middleware technology incorporated into Microsoft's own products and the middleware capabilities of third-party software products. Somewhat counter-intuitively, "Microsoft Middleware Products" and "Non-Microsoft Middleware Products," as defined in the SRPFJ, do not mirror each other, meaning that "Microsoft Middleware Products" are *not* defined as the Microsoft versions of "Non-Microsoft Middleware Products." *See* SRPFJ § VI.K, N. This unexpected relationship between the two definitions results from the different uses of the definitions in specific portions of Microsoft's remedy proposal.

The term "middleware," as used in the liability phase of this case, was not limited to precise types of functionality, but instead encompassed products displaying certain "key" attributes that "endow" the **[**86]** technology with the "potential to diminish the applications barrier to entry." *Findings of Fact, 84 F. Supp. 2d at 28, P 69*. In other words, the middleware in need of protection was characterized as the software products which "Microsoft feared . . . because they facilitated the development of user-oriented software that would be indifferent to the identity of the underlying operating system." *Findings of Fact, 84 F. Supp. 2d at 30, P 78*. The liability findings of this case primarily concern Microsoft's efforts to compete with two specific **[*113]** middleware products: (1) the Navigator Web browsing software from Netscape and (2) Sun's Java technologies. *See* *Microsoft, 253 F.3d at 53*. Plaintiffs established that Navigator and Java, because they were cross-platform-meaning they ran on multiple PC operating systems-had the potential to develop into software development platforms that would attract the attention of applications developers. *See id*. The district and appellate courts accepted Plaintiffs' theory that, if a sufficient number of ISVs wrote applications that drew on capabilities provided by these middleware platforms, consumers would have less interest in running applications on Windows and might use **[**87]** non-Microsoft operating systems under their Web-browsing and/or Java software layer, such that the Windows base could be replaced with some other operating system that would support the middleware. *Microsoft, 253 F.3d at 55*; *Findings of Fact,84 F. Supp. 2d at 17,18, PP 28-29*. In this regard, the surviving liability determinations turn largely on Microsoft's efforts to thwart Netscape's ability to distribute Navigator and Sun's ability to distribute Java in the primary channels of distribution. *See* *Microsoft, 253 F.3d 59-78*.

The potential competitive significance of Navigator and Java turned on the key attributes of those programs which, together, held the potential to provide an easily portable software development platform. [30] *Findings of Fact, 84 F. Supp. 2d at 28-30, PP 69-77*. First, the software provided a complement to Windows, rather than a replacement. *Findings of Fact, 84 F. Supp. 2d at 28, PP 69-70, 73-74*. In addition, Navigator and Java exposed a set of APIs which provided a platform so that developers, relying on the platform capabilities of the programs, could write multiple types of applications to run on Navigator and Java. *Findings of Fact, 84 F. Supp. 2d at 28, 29, P 69, 74*. Finally, Navigator and Java both ran on Windows, as well **[**88]** as other PC operating systems, such that reliance on Navigator and Java's API set would render applications instantly portable to multiple operating systems. *Id.* Adding to this potential was the newly emerging popularity of the Internet and Internet browsing software, which provided a significant purchasing incentive to first-time PC buyers. *Findings of Fact, 84 F. Supp. 2d at 28, P 70*.

i. "Non-Microsoft Middleware" in the SRPFJ

Given the defining trait of running on multiple operating systems, "middleware," as the term was utilized during the liability phase, most frequently refers to third-party, non-Microsoft software. Microsoft's own software products are unlikely to behave as true middleware because Microsoft, as the monopolist, has little interest in creating an alternative platform which is portable from Microsoft's operating system to a non-Microsoft operating **[**89]** system. Still, because Microsoft software products often provide a functionality similar to that provided by a thirdparty middleware product, such software is often treated as Microsoft middleware. Microsoft's remedy proposal therefore uses the term "Non-Microsoft Middleware" to make clear the reference to third-party software. "Non-Microsoft Middleware" is defined in the SRPFJ as:

> a non-Microsoft software product running on a Windows Operating System Product that exposes a range of functionality to ISVs through published APIs, and that could, if ported to or made interoperable with, a non-Microsoft Operating System, thereby make it easier for applications that rely in whole or in part on the functionality supplied by that software product to be ported to **[*114]** or run on that non-Microsoft Operating System.

SRPFJ § VI.M. "Non-Microsoft Middleware," as that term is defined in the SRPFJ, captures the essence of the middleware threats which were discussed during the liability phase. *See id.* In fact, the definition of "Non-Microsoft Middleware" expands beyond the middleware discussed at the liability phase in that it does not require that the software products already run **[**90]** on multiple PC operating systems, only that they have the potential, *if ported* to such operating systems, to serve as platforms for applications. *See id.*

The term "Non-Microsoft Middleware" is noteworthy for the breadth of its coverage of software products without limitation as to specific types of functionality. Consistent with the liability phase, these software products are

---

[30] A "platform" is software that provides functionality upon which ISVs can call during the creation of their own software programs. *See* Gates P 52.

principally limited by the requirement that they run on Microsoft's monopoly product-Windows, while exposing a range of functionality through published APIs. *Id.* "Non-Microsoft Middleware" is utilized in significant portions of Microsoft's remedy proposal and is the term which most often identifies the products which will receive some form of protection under Microsoft's remedy proposal. For example, § III.A of the SRPFJ prohibits Microsoft, *inter alia*, from retaliating against OEMs for supporting in any way "Non-Microsoft Middleware." *Id.* § III.A. Likewise, § III.C of Microsoft's remedy proposal restricts Microsoft's ability to impose license restrictions upon OEMs with regard to the installation and display of icons, shortcuts, and menu entries for "Non-Microsoft Middleware." *Id.* **[**91]** § III.C. Therefore, under the umbrella of "Non-Microsoft Middleware," Microsoft's remedy proposal affords coverage or protection to a wide variety of third-party software products. [31]

ii. "Non-Microsoft Middleware Product" in the SRPFJ

Microsoft's proposed remedy also uses the term "Non-Microsoft Middleware Product," which is defined similarly to "Non-Microsoft Middleware," but adds a requirement that "at least one million copies" of the product "were distributed in the United States within the previous year." SRPFJ § VI.N. Some of Plaintiffs' witnesses contended that the definition of "NonMicrosoft Middleware Product" is in discord with the use of the term "middleware" **[**92]** during the liability phase because it requires some degree of popularity for the product before it is covered by the definition as a middleware product. Specifically, Plaintiffs' witnesses pointed to the "one-million-copies" threshold mark in the "Non-Microsoft Middleware Product" definition and argued that it excludes the kinds of nascent threats which are most similar to the products toward which Microsoft was found to have directed its illegal conduct. *See, e.g.*, Ashkin P 169; Richards P 139. To the contrary, the one-million-copies threshold is consistent with the treatment of middleware in the liability phase of this proceeding. The one-million-copies distribution requirement in the definition of "Non-Microsoft Middleware Products" is reflective of the treatment of middleware threats in this case because the district and appellate courts did not merely focus on *any* software with the potential to serve as a multi-purpose platform, but specifically focused upon middleware which could "gain widespread use based on its value as a complement to **[*115]** Windows." *Findings of Fact,84 F. Supp. 2d at 28, P 69*; *see also* *Findings of Fact, 84 F. Supp. 2d at 29, PP 72* (describing Navigator's widespread adoption after its release), **[**93]** *Findings of Fact, 84 F. Supp. 2d at 30, P 76* (describing Java's inclusion in Navigator). The products upon which Judge Jackson focused in imposing liability were not merely middleware, but were middleware *threats*, because of their popular use, platform capabilities, and their ensuing ability to reduce the applications barrier to entry. *Findings of Fact, 84 F. Supp. 2d at 28-30, PP 69-78*.

Additionally, it is noteworthy that the term "Non-Microsoft Middleware Product" is utilized in only one section of Microsoft's proposed remedy, § III.H. This portion of Microsoft's remedy proposal requires Microsoft to configure its operating system products so as to permit the removal of end-user access to, and certain "automatic invocations" [32] of "Microsoft Middleware Products," as well as "Non-Microsoft Middleware Products." SRPFJ § III.H.1. This portion of the SRPFJ also provides for the replacement of "Microsoft Middleware Products" with "Non-Microsoft Middleware Products" in very specific instances. *Id.* § III.H.2. Because this portion of Microsoft's proposed remedy requires Microsoft to undertake the redesign of its own product, Jones P 119, the one-million-copies threshold relieves Microsoft of the obligation to redesign its product to accommodate **[**94]** a particular piece of software with extremely limited use. Elsewhere in Microsoft's remedy proposal, where there is no burden upon Microsoft to redesign its product, the one-million-copies distribution threshold does not apply. *See, e.g.*, SRPFJ § III.A, C.

To emphasize the limited relevance of the one-million-copies threshold, the Court reiterates that Microsoft's remedy proposal primarily utilizes the term "Non-Microsoft Middleware," which does not incorporate any minimum threshold for distribution, in its extension of protection to products well beyond the types of products that were addressed during the liability phase. This lack of a threshold leads to the inclusion in the remedy of virtually any nascent

---

[31] For example, pursuant to the definition of "Non-Microsoft Middleware," products competitive with Microsoft Office would receive protection from various types of adverse action by Microsoft, notwithstanding the fact that Microsoft Office is a product which has always been separate and distinct from Microsoft's operating system.

[32] The term "automatic invocations" refers generally to the launching of a particular piece of software functionality without the direct invocation of such software by the user.

"middleware" technology, regardless of its popularity or promise of success. Therefore, the key distinction between the two **[**95]** definitions is rooted in the liability determination, as well as practical considerations attendant to the imposition of design obligations upon Microsoft.

iii. "Microsoft Middleware Product" in the SRPFJ

In contrast to the broad definitions of "Non-Microsoft Middleware" and "Non-Microsoft Middleware Products," the term "Microsoft Middleware Product" is defined according to a specific set of existing Microsoft functionalities, as well as future Microsoft functionality. The existing set of functionalities which are included in "Microsoft Middleware Product" are those provided by Internet Explorer, Microsoft's Java Virtual Machine, Windows Media Player, Windows Messenger, Outlook Express, and their successors in Windows. SRPFJ § VI.K.1. The future technologies captured by the definition of "Microsoft Middleware Product" encompass software included in Windows that provides the functionality of Internet browsers, email client software, networked audio/video client software, and instant messaging software. *Id.* § VI.K.2. Other future technologies captured in the definition of "Microsoft Middleware Product" are those functionalities which are both distributed as part of **[**96]** Windows and distributed separately from Windows by Microsoft, trademarked **[*116]** by Microsoft, and which compete with third-party middleware products. *Id.*

"Microsoft Middleware Product" extends well beyond the Microsoft counterparts to the two non-Microsoft technologies which were primarily at issue in the liability phase of this case (Java and Navigator) to include media playback technology, which was addressed briefly during the liability phase, *Findings of Fact, 84 F. Supp. 2d at 30, P 78*, and to govern the Microsoft counterparts to other wellrecognized potential middleware threats to Windows' dominance, such as email client software and instant messaging software. *See* SRPFJ § VI.K. The term "Microsoft Middleware Product," as defined in the SRPFJ, focuses upon software technologies which have been incorporated or "integrated" into the Windows operating system, in reflection of the fact that the two technologies principally at issue during the liability phase were mirrored by Microsoft technologies that had been incorporated into Windows. *See Findings of Fact, 84 F. Supp. 2d at 43, 49, 107, 108, PP 133, 155, 397, 398* . The focus on technologies incorporated into Windows further reflects the fact that Microsoft software technologies **[**97]** that have never been part of Windows fall outside of Microsoft's monopoly product, which, of course, is the focus of this proceeding.

iv. "Microsoft Middleware" in the SRPFJ

In portions of Microsoft's proposed remedy, there is a need to identify the specific code in Windows. Hence, Microsoft's remedy proposal uses the term "Microsoft Middleware," which is largely reflective of the definition of "Microsoft Middleware Product," but which is further limited to the *code* separately distributed and trademarked or marketed as a major version of the Microsoft Middleware Product. SRPFJ § VI.J. The term "Microsoft Middleware" is used sparingly in Microsoft's remedy proposal, with its most significant and prominent use arising in conjunction with a provision that requires Microsoft to disclose very specific APIs and related technical information. Section III.D of Microsoft's proposed remedy requires Microsoft to disclose all of the interfaces relied upon by "Microsoft Middleware" to obtain services from Windows. *Id.* § III.D. Because "Microsoft Middleware" is defined as functionality included in or "integrated" into Windows, § III.D requires that Microsoft draw distinctions **[**98]** between portions of Windows in order to identify the APIs relied upon by one portion-the middleware portion-to obtain services from the remaining portion of Windows. *See id.* §§ III.D, VI.J. In order to distinguish between these two portions of Windows that coexist within the same piece of software, the definition of "Microsoft Middleware" identifies the relevant software by its code. The separate distribution requirement, along with the requirement that the distributed software is a "major version of [the] Microsoft Middleware Product," ensures that the code is easily distinguishable from the remainder of Windows. *Id.* § VI.J; Tr. at 5166 (Jones) ("We look at those components and we basically . . . we draw a lasso around them and look at everything going out and everything coming in.").

Plaintiffs' witnesses disagreed with these limitations, arguing that because the determinations to distribute separately and to market as a major version or trademark rest in Microsoft's discretion, Microsoft has the ability to manipulate and control which code falls within the definition. *See, e.g.*, Ledbetter P 153; Tr. at 1160-61 (Tiemann). These arguments fail to recognize the need **[**99]** for precision in identifying a distinction between "Microsoft Middleware" and the remainder of Windows. Plaintiffs do not offer an alternative method for identifying the specific code that **[*117]** constitutes "Microsoft Middleware," or some similar portion of Windows, nor do Plaintiffs establish that such precision is unnecessary. Rather, Microsoft presents ample evidence that, without a method by which to identify the specific code to be treated as the middleware portion of Windows, it cannot undertake the disclosure obligations which would be required by § III.D of Microsoft's remedy proposal (nor by § 4 of Plaintiffs' remedy proposal). *See* Appendix A, Part VI. By providing a mechanism by which to identify the specific pieces of Windows code which constitute the relevant middleware portion of Windows, Microsoft's definition identifies the otherwise imperceptible boundary between "middleware" and "operating system." Although the definition of "Microsoft Middleware" proposed in the SRPFJ is noticeably more circumscribed than the equivalent definition in Plaintiffs' proposed remedy, discussed *infra*, these limitations serve to provide bright lines by which Microsoft can determine what **[**100]** portions of Windows code are affected by the remedy. [33]

Plaintiffs' witnesses further criticized Microsoft's method for identifying these portions of code on the ground that Microsoft retains too much power to control which code falls within the definition of "Microsoft Middleware." *See, e.g.*, Kertzman P 68; Ledbetter P 153; Richards P 87; Shapiro P 195. These criticisms ignore the economic forces which countervail the likelihood that Microsoft will manipulate its products to exclude specific code from the definition. For example, Plaintiffs' witnesses specifically noted that Microsoft may simply opt not to distribute code separately. *See, e.g.*, Kertzman P 68; Ledbetter P 153. Microsoft often distributes separately certain technologies which are included **[**101]** in new releases of Windows because such distribution enables users of previous Windows versions to take advantage of the latest improvements to these technologies. *See* Jones P 61; Poole P 76. Such distribution benefits Microsoft, as it permits Microsoft to continually improve the quality of its products, even after they are sold, and to expand the user base of new technology without waiting for consumers to purchase an entirely new operating system. Therefore, if Microsoft determines not to distribute separately certain portions of code, it will deny itself the benefits of such distribution. Likewise, if Microsoft should choose to distribute a product which is not a major version of Internet Explorer, Microsoft's Java Virtual Machine, Windows Media Player, Windows Messenger, or Outlook Express, and Microsoft chooses not to trademark the separate distribution in an effort to avoid inclusion in the definition of "Microsoft Middleware," *see* SRPFJ § VI.J and K, Microsoft will sacrifice the advantage gained by having a trademarked product in the marketplace. Plaintiffs have not offered credible evidence indicating that Microsoft is likely to sacrifice the advantages of trademarking **[**102]** and separate distribution in order to circumvent the terms of the remedy in this case. [34] Accordingly, the Court accords Plaintiffs' complaint little weight.

b. "Middleware" and Related Definitions in Plaintiffs' Proposal

Plaintiffs' remedy proposal takes an entirely different approach to middleware. **[*118]** Unlike the Microsoft remedy proposal, which draws a sharp distinction between third-party software products which are middleware and Microsoft products which compete with that middleware, Plaintiffs' remedy proposal utilizes the term "middleware," standing alone, to identify both Microsoft and non-Microsoft software. Plaintiffs also incorporate the term "middleware" into the definition of another term in their remedy proposal-"Microsoft Middleware Product." Because of this incorporation, the terms "middleware" and "Microsoft **[**103]** Middleware Product" in Plaintiffs' remedy proposal overlap substantially.

i. "Middleware" in the SPR

Reflective of their complaint that Microsoft's treatment of middleware is too narrow, Plaintiffs' remedy proposal incorporates into "middleware" a far broader set of products and functions. Plaintiffs define "middleware" as

> software . . . that operates directly or through other software within an Operating System or between an Operating System (whether or not on the same computer) and other software (whether or not on the same

---

[33] Indeed, Judge Jackson relied upon the separate distribution of browser functionality in the Windows 95 Service Pack to identify the separation between Microsoft's browsing functionality and its operating system functionality. *Findings of Fact,84 F. Supp. 2d at 56, P 190*.

[34] Were Microsoft to make a practice of doing so in a manner which thwarted the objective of the remedy in this case, Plaintiffs could petition the Court for relief on this point.

> computer) by offering services via APIs or Communications Interfaces to such other software, and could, if ported to or made Interoperable with multiple Operating Systems, enable software products written for that Middleware to be run on multiple Operating System Products.

SPR § 22w. As a result, middleware, according to Plaintiffs' definition, is virtually any block of software code which exposes even a single API. [35] Bennett PP 30, 35-36; Madnick P 136; Tr. at 4592-93, 4889 (Gates); Def. Ex. 1530 at 61 (Greene).

[104]** Very small blocks of software code can be considered to be separate pieces of middleware pursuant to Plaintiffs' proposed remedy. As a result, individual files or even parts of files within Windows may be said to be middleware. *See* Gates P 165; Tr. at 6042-43 (Madnick). For each action mandated or restricted by Plaintiffs' proposed remedy where the term "middleware" appears, *see, e.g.*, SPR §§ 2.c, 5, 10, 11, [36] or is incorporated into the definition of another term, *see, e.g.*, SPR § 22.x, such obligations apply to very small blocks of software code, rather than to software code that is generally regarded as a software product. In this regard, Plaintiffs' definition of "middleware" is described as highly "granular," Gates P 165; Madnick P 152, as it separates middleware into extraordinarily fine "grain." *See* Bennett PP 30, 35-36.

[105]** Rather than focus on the platform potential of software, Plaintiffs focus exclusively upon the ability of a piece of software to expose even a single API. Nearly any software can expose a few APIs, yet not all software that exposes a few APIs carries the potential to serve as a platform **[*119]** for applications, let alone the potential to evolve into a platform that can dissipate the applications barrier to entry protecting Microsoft's PC operating system monopoly. *See* Bennett PP 30, 35-36; Madnick PP 136-39; Tr. at 841-42 (Ashkin); Tr. at 619-20 (Richards). Plaintiffs fail to adduce evidence sufficient to establish that these various pieces of software, which often lack robust platform capabilities but expose at least one API, have the capacity to lower the applications barrier to entry, and thereby promote competition in the monopolized market. As a result, to label such software as "middleware" is not consistent with the manner in which middleware was discussed during the liability phase of this case. Rather, the relevant middleware is the software that runs on desktop versions of Windows and other PC operating systems and carries the potential to serve as a general-purpose development **[**106]** platform. It is this platform trait which makes the software a middleware threat because the platform capability of the middleware competes with the platform capability of Windows. More importantly, because Plaintiffs' definition of "middleware" is over-inclusive and does not reflect the presence of a genuine platform threat, the Court cannot find that remedial provisions which address virtually any software which exposes one or more APIs will benefit competition in the relevant market.

ii. "Microsoft Middleware Product" in the SPR

As noted above, Plaintiffs' remedy proposal utilizes the term "Microsoft Middleware Product" to refer to a class of Microsoft software. Plaintiffs' remedy proposal provides two different ways in which a particular piece of software may fall within the parameters of a "Microsoft Middleware Product." [37] The first part of the definition of "Microsoft

---

[35] One particularly helpful definition of "API" explains:

> An API, in effect, is a doorway between programs that can be used for specified purposes. For example, a PC operating system will generally control how images are displayed on the PC's computer screen. By exposing an API, the operating system may enable other programs also to display images on the computer screen without the need to replicate all of the code of the operating system that performs this function.

Ledbetter P 32.

[36] These portions of Plaintiffs' remedy proposal refer to "non-Microsoft middleware," which is not itself a defined term in Plaintiffs' remedy proposal. As a result, non-Microsoft takes its plain meaning and merely serves to modify the defined term "middleware." *See* SPR §§ 2.c, 5, 10.

[37] Section 22.x of Plaintiffs' remedy proposal provides:

> "Microsoft Middleware Product" means
>
> i. Internet browsers, e-mail client software, media creation, delivery and playback software, instant messaging software, voice recognition software, digital imaging software, directories, Exchange, calendaring systems, systems and enterprise

Middleware Product" enumerates an expansive list of functionalities, each of which alone constitutes a separate "Microsoft Middleware Product." SPR § 22.x.i. The latter portion of the definition requires that, in order to be a "Microsoft Middleware Product," the product must be middleware (according **[**107]** to Plaintiffs' definition) that is or has been distributed by Microsoft separately from Windows within the past three years and provides a functionality similar to that provided **[*120]** by the middleware of a Microsoft competitor. *Id.* § 22.x.ii.

[108]** Addressing first the list of functionalities proffered in the definition of "Microsoft Middleware Product," the Court finds that the functionalities which are included in the definition of "Microsoft Middleware Product" expand far beyond those provided by the middleware principally addressed by the district court during the liability phase. Plaintiffs have not presented evidence regarding the platform capabilities of many of the functionalities listed in their definitions of "middleware" and "Microsoft Middleware Product." With regard to those few functionalities that Plaintiffs did address during the evidentiary hearing, the Court is not satisfied that Plaintiffs have presented evidence to establish that even these functionalities possess platform potential akin to that possessed by Navigator and Java. *See* Elzinga P 135; Gates PP 147-49; Madnick PP 136-39, 212; Tr. at 841-42 (Ashkin); Tr. at 3307 (Shapiro).

With regard to the latter portion of the definition of "Microsoft Middleware Product," the Court finds that the incorporation of Plaintiffs' definition of "middleware" into this portion of the definition renders "Microsoft Middleware Products," like "middleware," to be virtually **[**109]** any portion of a Microsoft software product that exposes even a single API and is presently distributed separately or has been distributed separately from Windows by Microsoft within the past three years. *See* Bennett PP 30, 35-36; Madnick P 145. Once again, the fact that a software product or a piece of a software product exposes APIs does not itself equate with a conclusion that the software product holds the potential to serve as a platform for applications, let alone the potential to evolve into a platform with the capacity to reduce the applications barrier to entry. *See* Bennett PP 30, 35-36; Madnick PP 136-39; Tr. at 841-42 (Ashkin); Tr. at 619-20 (Richards). As a result, there is no basis for a finding that inclusion in the remedy of any separately distributed Microsoft software product which exposes just a single API will enhance competition in the monopolized market.

Aside from Plaintiffs' inclusion in the most fundamental definitions of the proposed remedy software products and portions thereof which have not been shown to possess the potential to erode the applications barrier to entry, Plaintiffs' definitions of "middleware" and "Microsoft Middleware Product" suffer **[**110]** from even greater infirmities when the use of the definitions in the remedy proposal is examined. Plaintiffs' remedy proposal, like Microsoft's proposal, mandates the disclosure of APIs and related technical information relied upon by some form of Microsoft middleware technology to interoperate with the Windows operating system. *Compare* SPR § 4, *with* SRPFJ § III.D. However, Plaintiffs' remedy proposal, in defining "Microsoft Middleware Product" through the identification of a particular functionality, is insufficiently precise to provide Microsoft with notice as to what portions of its Windows product are implicated in the provision.

---

management software, Office, Handheld Computing Device synchronization software, directory services and management software, the Common Language Runtime component of the .Net framework, and Compact Framework, whether provided in the form of files installed on a computer or in the form of Web-Based Software, or

ii. Middleware distributed by Microsoft that -

(1) is, or in the three years preceding this Judgment has been, distributed separately from an Operating System Product, any successors thereto, or

(2) provides functionality similar to that provided by Middleware offered by a Microsoft competitor.

SPR § 22.x. Oddly, this definition does not specify that the software products listed in subpart "i" must be *Microsoft* software products. The Court presumes, however, that Plaintiffs intended that such products would be Microsoft products given that the term is "Microsoft Middleware Product." Subpart "ii" does not suffer from a similar infirmity, as it specifies that the products must be "Middleware *distributed by Microsoft*." *Id.* § 22.x.ii (emphasis added).

For example, "media creation, delivery and playback software" is identified as a kind of "Microsoft Middleware Product." [38] **[**112]** SPR §§ 4, 22.x.i. Will Poole, a Microsoft **[*121]** Vice President responsible for the Windows New Media Platforms Division, pointed out that it is very difficult to try to "draw a box around the components of Microsoft's . . . multimedia software" because "many different areas of the operating system handle multimedia content." Poole P 83. As Mr. Poole attested, it is unclear whether "the basic APIs that enable an application or **[**111]** the operating system to play an 'alert' sound . . . are part of Microsoft's 'media creation, delivery and playback software.'" *Id.*[39] Plaintiffs have not established that there is any clear definition or consensus in the industry, or even within Microsoft, as to what portions of Windows would constitute "media creation, delivery, and playback software" and what would be considered to be simply part of the "operating system" functionality, *i.e.*, "Microsoft Platform Software." [40] As a result, the definition of "Microsoft Middleware Product" provided in Plaintiffs' remedy is ambiguous, leaving Microsoft without clear guidance, and the Court with compliance issues, as to what is expected for compliance with the API disclosure portion and other portions of Plaintiffs' proposed remedy. [41]

3. New Technologies

Plaintiffs have also identified certain technologies which, prior to this remedy proceeding, had not been addressed by the district and appellate courts in detail in conjunction with this case. Plaintiffs identify these technologies as the new frontier in "middleware platform threats" and, therefore, seek to include these technologies in the definition of "middleware" and related definitions. **[**113]** In the paragraphs below, the Court examines four categories of technologies in order to determine if Plaintiffs' proposal to encompass these technologies within the remedy is appropriate: (1) network and server-based applications; (2) interactive television middleware and set-top boxes; (3) handheld devices; and (4) Web services.

a. Server/Network Computing In large computing networks, PCs are often known as "clients," and the large computers used to store data and run centralized applications are known as "servers." Madnick PP 42-43. Traditionally, the majority of software applications have been located on the PC, but in the network context, applications may reside on the server. Ledbetter PP 16-17, 21. Applications residing on the server call upon server operating systems to provide functionality, which is ultimately executed "for" a client PC. *Id. P 50*. Most client computers are PCs that run some version of the Windows operating system. Madnick P 44. The operating systems used on servers, however, are more diverse, such that it is common to have a heterogeneous network, meaning a network "containing a combination of clients and server operating systems from different **[**114]** vendors." Short P 22; *see also* Ledbetter P 64; Madnick P 44. Heterogeneous networks are the norm, **[*122]** rather than the exception. Madnick P 53; *see also* Ledbetter P 64.

Heterogeneous networks have the ability to function because server operating systems are capable of "interoperation" with clients running a variety of operating systems. Ledbetter P 49. In general terms, when two devices or systems have the ability to "interoperate" they can exchange information and use the information that has been exchanged. Ledbetter P 65; Madnick P 46. The concept of interoperability encompasses a continuum; it is not an absolute standard. Madnick P 46, Tr. at 7108-09 (Bennett); Tr. at 5782-83 (Madnick); Tr. at 5477 (Short);

[38] In contrast, Microsoft's proposed remedy, in the context of discussing API disclosures, identifies the particular Microsoft middleware technology as specific software *code*. SRPFJ §§ III.D; VI.J. From these identifications of the code for middleware technology present in Windows, Microsoft is able to identify the APIs relied upon by the middleware to obtain functionality from the remainder of the Windows operating system.

[39] One of Microsoft's computer science experts, Dr. Stuart E. Madnick, described a similar problem with regard to the inability to identify the precise code implicated in other portions of Plaintiffs' remedy proposal. *See id. P 164* (discussing § 12 of Plaintiffs' remedy proposal).

[40] "Microsoft Platform Software" is defined in Plaintiffs' remedy proposal as "a Windows Operating System Product or Microsoft Middleware Product or any combination of a Windows Operating System Product and a Microsoft Middleware Product." SPR § 22.y.

[41] Another example of the failure of Plaintiffs' definition of "Microsoft Middleware Product" is addressed in Appendix A, Part X.B.

see also Ledbetter PP 65-66; Tiemann P 179. For this reason, interactions among computer systems may be classified in terms of how "tightly" or "fully" they interoperate. Madnick PP 55, 61; *see also* Ledbetter P 66; Madnick P 119; Short P 16.

Clients and servers in a homogeneous network interoperate differently than clients and servers in a heterogeneous network. Madnick PP 61-68. For two computers to interoperate, they must have compatible software installed. Therefore, **[**115]** interoperation is most easily accomplished by computers in the same "hardware-software platform family." Madnick P 61. For example, "a Sun workstation and a Sun server, both running Solaris on SPARC processors" can be said to be in the same "hardware-software platform family" and, therefore, share many "common points of reference" such as file systems and interfaces, making interoperation relatively straightforward and easy to accomplish. *Id.* When the client and server versions of the operating systems are built on a common base of code, with a very high degree of overlap, applications that run on the client version generally will run on the server version of the same operating system. *Id. P 64*. In these homogeneous contexts, the client version of the operating system generally includes "builtin " or "native" software that enables the client computer to connect to a server running the same operating system. *Id. P 64*.

In the more common model, a heterogeneous network, interoperation is more complex because of basic differences between types of hardware and operating systems. *Id. P 65*. For example, "the Mac OS, NetWare, variants of Unix, and Windows all store files in **[**116]** different ways and track different file characteristics." *Id.* There are a variety of methods used to overcome differences between client and server capabilities. One such method is the identification of a common "language" or a communications "protocol" [42] which both pieces of the network understand or support "natively," meaning without the addition of software code. *See* Madnick PP 68-71; *see also* Short PP 36-38. Another method involves adding software to the server to make the client computer "think" it is communicating in a homogeneous network. Madnick PP 68-75; *see also* Short PP 44-49. The software added to the server, if interoperating with a Windows client for example, will enable the server to provide services to the Windows client in the same manner as would a Windows server. Madnick PP 73-74. Yet another method of interoperation in a heterogeneous network involves the addition of software code to the client which enables the client to communicate more effectively with the server. *Id. PP 68, 76-82*; *see also* Short PP 39-43. When software is added to the client computer to enable interoperation, **[*123]** the client software relies on the client operating system's **[**117]** APIs in the same manner as an ordinary application. Madnick P 80.

In each of these configurations, successful interoperation can be achieved. Nevertheless, because of the complexity of modern software, perfect interoperation between different types of hardware and software products (a heterogeneous network) is largely aspirational. *Id. PP 88-89, 97*; *see also* *id. PP 46, 82*; Gates P 305. Said otherwise, even with these methods of facilitating interoperation, it is rare that the result will be identical to what would have been achieved in a homogeneous network, because the features of the various pieces of the network will handle functionality in different ways. *See* Madnick P 82.

Server operating systems expose APIs for use by applications and, on behalf of those applications, **[**118]** call on PC (client) operating systems to provide basic functions of the PCs connected to the network. Ledbetter P 47. Software developers are increasingly writing programs that rely, or "call," on APIs exposed by server operating systems such that the server operating system provides the "platform" for applications. *Id. PP 47-48*; Green P 76; Tr. at 1508-09 (Ledbetter). Ultimately, the application running on the server operating system will run "*for*" the client PC in a manner similar to that which would exist if the application were running directly *on* the client. Tr. at 1507 (Ledbetter); *see also* Ledbetter PP 47-48; Tiemann P 127.

Dr. Carl S. Ledbetter, Senior Vice President, Engineering/Research and Development, and Chief Technology Officer for Novell, Inc., [43] Ledbetter P 1, testified on behalf of Plaintiffs that because most server operating systems are capable of interoperating "effectively with a variety of client PC operating systems and other different server

[42] A protocol is a method of communicating information across a network. Morse Code, a series of dots and dashes that represent letters of the alphabet, is an example of a very simple protocol, albeit in a different context. Gates P 101.

[43] Novell, Inc. is a "provider of network computing software." Ledbetter P 1.

operating systems . . . applications written to invoke the APIs of a network operating system (instead of the APIs of a particular PC operating system) can be shared among client PCs that do not themselves **[**119]** employ the same operating system." *Id. P 49*. Dr. Ledbetter theorized that the brand of PC operating system will decrease in importance as software developers begin to write programs for APIs exposed by server operating systems, rather than for the APIs exposed by PC operating systems. *Id. P 50*. Based upon this view, Dr. Ledbetter predicted that "server operating systems, if they are a platform for enough applications and if they function efficiently with non-Microsoft client PCs, could enable consumers to receive the applications they want using desktop PCs that run non-Microsoft operating systems." *Id.* With this prediction, Dr. Ledbetter invoked the potential of server/network computing to challenge the applications barrier to entry in a manner similar to that of Navigator and Java, as discussed throughout the liability phase. Ledbetter P 50; *see also* Tiemann P 131; Shapiro P 172.

Central to the success of server/network **[**120]** computing is the ability of heterogeneous networks to interoperate successfully. Within these heterogeneous networks, Windows operating systems account for the vast majority of PC clients, while a wide mix of server operating systems are utilized, with most servers employing two or more different server operating systems. Madnick P 53; *see also* Gates PP 92-94; Short P 28. Client-to-server interoperation is enabled by disclosure of the interfaces exposed by Windows clients that are required by a non-Windows server to make its functionality available to those clients. Short P 34. In this regard, the **[*124]** "tools" of client-to-server interoperation are APIs, communications protocols, and related technical information. Tr. at 5486 (Short).

b. Set-Top Boxes and Interactive Television Software

A set-top box is a limited-function computer attached to a television for purposes of enabling interactive television technologies. Kertzman P 4. In terms of functionality, interactive television technology generally involves the provision of a range of more traditionally television-oriented services, such as the ability to order "video-on-demand," an on-screen television guide, and the **[**121]** ability to interact with particular television programs, as well as a range of functionality typically associated with personal computer use, such as email, Internet access, instant messaging, and the provision of streaming audio and media through a personal computer media player. Kertzman P 3. The set-top box is linked, at present, to a server usually located at the cable or satellite television provider. *Id. P 4*. The server software residing at the cable company powers the majority of the interactive television content, sending commands to the set-top "clients." *Id. P 23*. These servers also download a small piece of software to each client as it connects to the server. *Id.*[44] At present, interactive television software has not been deployed to the personal computer. Tr. at 2091-92 (Kertzman). Rather, the software is currently distributed to companies like cable, satellite, and telephone companies that provide multichannel television programming to consumers for use on set-top boxes and is not distributed to traditional OEMs as that term has been used in this litigation. *See id.*

[122]** Mitchell Kertzman, the Chief Executive Officer of Liberate Technologies, a company which supplies interactive television software, Kertzman P 1, testified that interactive television software exposes APIs, enabling it to serve as a platform for a number of applications typically associated with the personal computer, such as email, instant messaging, and streaming audio and video. *Id. P 29*. Mr. Kertzman testified that his company's interactive television software is cross-platform and, hence, can run on multiple operating systems. *Id. P 28*. Mr. Kertzman asserts that because of its platform capabilities interactive television software has the potential to pose a "platform threat" to Windows. [45] Kertzman P 33. This platform threat, theorizes Mr. Kertzman, will result from the ability of the interactive television software to attract developers to write applications for the platform it provides, which can be ported to any operating system. In this regard, Mr. Kertzman does not distinguish precisely between whether the

---

[44] For ease of reference, the Court will refer to the software which powers interactive television, including the server-resident software and the "small piece" of software residing on the set-top box, as "interactive television software."

[45] Mr. Kertzman theorizes that there is presently a "convergence," Kertzman P 37, underway between the PC and set-top box such that "the lines between set-tops and PCs are blurring as set-tops acquire more computing functionality and the PC acquires more television functionality" and the two will ultimately be a "unified device," *id. P 81*. *See generally* *id. PP 37-40*.

"platform" is provided by the portion of the software which runs on a server or the portion of the software which is downloaded to the client set-top box. *See* **[**123]** Tr. at 2111-13 (Kertzman).

Interactive television has yet to achieve significant popularity, despite the fact that its "take off" has been predicted for many **[*125]** years. Tr. at 2115 (Kertzman). Given that interactive television software, to date, has not been deployed on the PC, Mr. Kertzman's predictions regarding the potential of interactive television software to "threaten" Windows are almost entirely speculative.

c. Handheld Devices

The term "handheld devices" is a largely descriptive term which refers to a category of computing devices that perform many of the functions of an ordinary personal computer but are much smaller, **[**124]** such that they are "hand held." *See* Mace P 13. This category can also include socalled "smart phones," which are devices that combine the PC-like capabilities of handheld devices and mobile telephone technology. *Id. P 21*. Handheld devices have been "commercially successful" since approximately 1996, when the original "Palm Pilot" handheld device was introduced by Palm, Inc. ("Palm"). *Id. P 8*. As six years have passed since handheld devices achieved "commercial success[]," *id.*, the technology is not nascent. A handheld device's core use is to manage a user's personal information, such as calendar and address book functions, electronic mail, and Internet browsing. *Id. PP 12, 24*. Because the capabilities of handheld devices generally overlap with those of a personal computer, the vast majority of handheld device users "synchronize" information contained in their handheld device with information contained in their personal computer or on a server. *Id. PP 25-26*. Through synchronization, the handheld device automatically merges its information with information stored on a PC or server. *Id. P 25*. Handheld devices have already gained widespread popularity. Palm **[**125]** manufactures the most popular operating systems for handheld devices, with a United States market share of approximately eighty percent. Tr. at 1900 (Mace).

Testifying on behalf of Plaintiffs, Michael Mace, Chief Competitive Officer of PalmSource, Inc., a wholly owned subsidiary of Palm, [46] Mace P 1, attested that he anticipates that the continued advancement of the handheld device will result in the replacement of the personal computer by the handheld device. *Id. P 15*. Mr. Mace explained that he has seen "interest among PC software developers in converting their software" to run on the Palm operating system for handheld devices, *id. P 17*, and that there are more than 13,000 software programs available to run on the Palm operating system alone. *Id. P 12*. In this regard, Mr. Mace emphasized that although, in his view, the PC is not "obsolete," he believes that "handheld sales are already starting to reduce the growth of PC sales, and . . . they will eventually replace many personal computers." *Id. P 18*. Mr. Mace did not offer any testimony regarding plans to port handheld device operating systems to personal computers, nor did he testify that handheld device synchronization **[**126]** software has any platform capabilities.

Microsoft recently entered into the handheld market with the "Pocket PC." *Id. P 19*. Mr. Mace expressed concern over Microsoft's entry into the market. *See id. P 35*. Mr. Mace testified at length regarding Palm's inability to reach an agreement with Microsoft regarding "cooperative access to Microsoft's .NET technologies." *Id. P 70*; *see generally id. PP 55-72*. In this regard, Mr. Mace accused Microsoft of "manipulating" .NET and raised an additional concern "about what other things Microsoft could do to interfere with our business." *Id. P 74*. In particular, Mr. Mace asserted that "Microsoft software **[*126]** standards could be manipulated to degrade the performance of our products or disable them." *Id. P 76*. To support this contention, Mr. Mace described a series of unsuccessful negotiations between Microsoft and Palm surrounding the availability of the .Net platform for the Palm operating **[**127]** system. *Id. PP 55-72*. The negotiations failed because Palm perceived that the terms Microsoft sought to impose would threaten to turn Palm customers into Microsoft customers if ISVs began to write to Microsoft technology supported by Palm, rather than the Palm operating system. *Id.*

Palm was intimately involved in the inclusion of handheld device-related software in Plaintiffs' proposed remedy and stands to benefit competitively from such inclusion. Tr. at 1866-90 (Mace). For example, in his direct testimony, Mr. Mace recounted Palm's desire that IE be converted to run on the Palm operating system, and Microsoft's refusal to

---

[46] Palm sells both hardware and software for handheld devices. Mace P 9.

do so. Mace PP 8789 . Palm views this litigation as a means by which to gain access to the source code for IE and thereby create a version of IE for the Palm operating system. Tr. at 2480-84, 2491 (Mace).

d. Web Services

Web services are almost universally viewed as the new frontier in computing, providing a new computing paradigm. Allchin P 14. Because "Web services" are new and emerging, and in many ways are still largely conceptual, there are multiple understandings within the industry as to what constitutes "Web services." The intangible **[**128]** nature of Web services, combined with the substantial disagreement about the precise parameters of the same make it extremely difficult to define the term. Based upon the evidence provided by the parties in this proceeding, the Court can only characterize Web services in somewhat general terms.

The concept of Web services concerns the exchange of information and functionality from one computing device to another through a defined set of industry standard interfaces. *See* Allchin P 41; Gates P 40; Tr. at 2792 (Schwartz). By using Web services built on one of a number of standard protocols, applications connected to each other via the Internet or other networks can share data, as well as invoke functionality supplied by one another-interoperate- without regard as to how they were built or on which operating system they are running. Allchin P 42; *see also* Def. Ex. 1398 (Anne Thomas Manes, Enabling Open, Interoperable, and Smart Web Services[:] *The Need for Shared Content*, (Sun Microsystems, Inc.) March 2001). Web services are server-based applications that can be accessed directly by other software programs, as well as by the consumer through a variety of devices, including **[**129]** the PC, cellular phone, and handheld device. Allchin PP 43-44, 65; Borthwick P 73. Interoperability from server to server, and between servers and non-PC devices, is considered by many to be fundamental to the functioning of Web services. Allchin PP 53, 64; Schwartz P 164; *see also* Richards P 98.

The term "Web services" does not refer merely to "services delivered across the Web" or otherwise related to the Internet. [47] **[**130]** Allchin PP 41, 43-44. As a result, Web-browsing software is not integral to **[*127]** the functioning of Web services because many Web services will involve direct communications between devices or programs and will not be accessed by an end user at all. *Id. PP 43-45*. In this sense, Web-browsing software of the type addressed during the liability phase will play no role in the creation, delivery, or use of many Web services. *Id.* However, Web browsers can play a limited role in that they often provide the user interface to Web services. *Id. PP 44-45*. [48]

Microsoft has given the name ".NET" to its "emerging platform for Web services." *Id. P 43*. Microsoft's.NET vision encompasses software for building, deploying, operating, integrating, and consuming Web services. *Id. P 49*. William H. Gates, III, Microsoft's Chairman of the Board and Chief Software Architect, Gates P 1, characterized Microsoft's efforts in the Web services area as a "bet the company" initiative. Tr. at 4562 (Gates). On behalf of Microsoft, Dr. Allchin described the "core" of .NET as "XML," a format for describing data. *Id. P 55*. Additional industry standards such as SOAP, WSDL and UDDI "collectively round out the underpinnings for .NET." *Id. P 57*. These standards, in Microsoft's view, will enable the ready interoperation of **[**131]** a wide variety of computing devices. *Id. PP 51, 54, 61-62*.

Not surprisingly, Microsoft is not alone in having a vision for Web services. Microsoft's .NET initiative and Sun's Java platform represent competing and "fundamentally different" visions of the ideal way to develop and deliver distributed business applications. *Id. P 64*; *see also* Schwartz P 57. Microsoft's .NET Framework is one element of

---

[47] Dr. James Allchin, Group Vice President for Platforms at Microsoft, Allchin PP 1, 13, provided an example of Web services: "The Web services model permits an automobile manufacturer's computer system to communicate via the Internet with a piston supplier's computer to place new orders without any human intervention. There is no Web-browsing software involved at all." Allchin P 43.

[48] Because of the limited relationship between Web-browsing software and Web services, the Court's discussion and conclusions regarding Web services are unrelated to the manner in which the Court's remedy will address Web-browsing software. The Court's remedy treats Web-browsing software as middleware. *See infra* Parts III.C.5, III.B.2.a.

Microsoft's .NET initiative. Allchin P 67. Visual Studio.NET is a set of tools that software developers can use to write software programs that will run within Microsoft's.NET Framework. *Id. P 68*.

The Chief Strategy Officer for Sun Microsystems, Inc., Jonathan Schwartz, testifying on behalf of Plaintiffs, Schwartz P 1, theorized that "if the most popular applications are delivered as Web services, instead of [as] stand-alone PC applications, the applications barrier protecting Windows could be substantially eroded." *Id. P 36*. Mr. Schwartz further testified that Web services, in his view, have the capacity to challenge the popularity and the necessity of the PC. In this regard, Mr. Schwartz theorized that the increasing residence of Web service components "on servers **[**132]** that can be accessed with a variety of client devices" renders Microsoft's desktop operating system less necessary to the ability to run the desired applications. *Id. P 37*; *see also id. P 38*; Borthwick P 74.

John Borthwick, a Vice President at America Online Inc. ("AOL") Advanced Services, Borthwick P 1, articulated a fear that Microsoft will use its present monopoly position in the market for Intel-compatible PC operating systems to "tilt end-users towards Microsoft's services" and thereby induce software developers "to develop their Web services to conform exclusively to the .NET platform." *Id. P 77*; *see also id. PP 76-85*; Schwartz PP 111-12; 126. Mr. Borthwick's fear in this regard engenders a prediction that "as users become dependent on Microsoft's Web services, Microsoft can ensure that they remain dependent on Windows XP and its subsequent updates" by "interfering with interoperation between its own platform software and rival servers, operating systems **[*128]** and hand-held devices" so as to ultimately "force users to purchase new iterations of Windows XP if they wish to access Web services through their PCs." Borthwick P 85; *see also id. PP 98, 101, 103*. Mr. **[**133]** Borthwick's concerns were echoed almost verbatim by Mr. Schwartz of Sun Microsystems. *See* Schwartz P 126 ("By widely distributing its .NET platform with its ubiquitous operating system and other products . . . Microsoft has the power potentially to tip the market for Web services platform in favor of .NET"). In essence, both Messrs. Schwartz and Borthwick expressed concern that Microsoft has the power "to use its Windows operating system to thwart platform competition in the market for Web services." Borthwick P 103; *see also id. PP 108*; 114; Schwartz P 134. Mr. Schwartz built upon Mr. Borthwick's fear by asserting that, in addition to Microsoft's dominance in the market for PC operating systems, Microsoft's "presence in the server software market allows it to exert control over servers hosting or running Web services in ways that will protect the position of Windows." Schwartz P 129.

C. Conclusions Regarding Scope of the Remedy

Plaintiffs' best theory to justify inclusion of the above-described products or devices in an appropriate remedy is to identify them as types of "middleware," which have the capacity to serve as alternative platforms, running on top **[**134]** of the operating system, in the same way as Java or Navigator. With limited exceptions, Plaintiffs are unsuccessful at pounding these square pegs into the round holes of liability in this case. Plaintiffs' search for middleware threats of the same type or class as Navigator and Java takes them outside of the realm of software applications written for PCs, to include software which is running predominantly on non-PC devices. This fundamental aspect of the theory is not itself flawed, so long as the technologies have the potential to interact with the PC operating system in such as way as to function as "middleware," consistent with the use of that term in the liability phase. Microsoft has steadfastly maintained that none of these technologies is a proper subject of the remedy in this case because they are not truly "middleware" as that term was used in the liability phase. Therefore, argues Microsoft, these technologies are unrelated to the findings of liability affirmed by the appellate court and have no place in this proceeding. [49]

[135]** ***HN15***[] Although "precedents . . . uphold equity's authority to use quite drastic measures to achieve freedom from the influence of the unlawful restraint of trade," such measures are justified only where "the required action reasonably tends to dissipate the restraints." *Bausch & Lomb, 321 U.S. at 726*. The Court finds that, of the

---

[49] Despite this position, Microsoft has addressed at least one area of technology, servers and network computing, in one provision of its proposed remedy. *See* SRPFJ § III.E (mandating the disclosure of communications protocols).

new "middleware" or "platform threat" technologies identified by Plaintiffs, only one of the four-server/network computing-has been shown to presently have a reasonable possibility of "dissipating the restraints" on trade imposed by Microsoft. *Id.* Although this technology does not function precisely as "middleware" has throughout this proceeding, the platform threat it poses to Microsoft's dominance in the monopoly market is both real and similar to the threats posed by Navigator and the Java technologies. *Zenith Radio, 395 U.S. at 132*. In contrast, the theories of dissipation of the restraints on trade which **[*129]** Plaintiffs utilize to justify inclusion in the remedy of the remaining three of these four technologies, in their present state, [50] are fundamentally flawed.

[136]** ***1. Server/Network Computing***

Plaintiffs offer a strong, though still imperfect, argument for the inclusion of protection for technologies relating to network and server-based applications. Plaintiffs neither allege nor present evidence that these technologies will function as middleware in the traditional manner-meaning that the software physically resides on the PC and functions as a platform for other applications. *See supra* Part III.B.2.a. Therefore, these technologies lack one of the defining characteristics of middleware as it has been discussed in this case thus far. Notwithstanding this fact, networks and server-based technologies do have the capacity to function in a manner similar to that of traditional middleware by providing a layer between the operating system and the top-level applications. *See id.*; *see also supra* Part III.B.3.a.

In this model, personal computers, known in this context as "clients," are linked electronically to a central computer known as a "server" such that they form a "network." The server runs a "server operating system" which exposes its own APIs and, therefore, is capable of supporting software applications such that a user **[**137]** can access the application through the client PC. *See supra* Part III.B.3.a. Plaintiffs argue that in this configuration the server operating system plays the role of traditional middleware because it provides a platform for applications other than the PC operating system. Because server operating systems have the ability to interact or "interoperate" with multiple PC operating systems, an application written to a single server operating system can then be present for use by a client PC without regard to the type of PC operating system on the client. *Id.* In this scheme, the server operating system parallels and, indeed, resembles the more traditional middleware that was the focus of liability because it provides a platform for applications, as discussed *supra* Part III.B.2.a.

Given the Court's conclusion that servers should be included, the remedy in this case will provide substantial protection for server/network computing by requiring Microsoft to disclose technical information relating to communications protocols which are "natively" supported by Windows. *See infra* Part IV.E.2. The disclosure of this information will significantly advance the ability of non-Microsoft **[**138]** server operating systems to interact with client PCs running Windows. Such assistance is appropriate as it looks toward the new model of the "platform threat" and seeks to ensure that the ill effects of Microsoft's conduct are not felt in this related area of the industry. *See Nat'l Soc'y of Prof'l Eng'rs*, *435 U.S. at 698; Paramount Pictures, 334 U.S. at 148*.

In addition, because server operating systems provide a platform which "competes" with Microsoft's PC operating system to host applications for the PC, much in the way traditional middleware provides a platform and, thereby, competes with Microsoft's PC operating system, the Court's remedy affords vendors of server operating systems some protection from retaliatory action by Microsoft. *See infra* Part IV.D. Likewise, the Court's remedy provides similar protection against Microsoft **[*130]** retaliation for software vendors who write software which runs "on" server operating systems "for" use on a PC. *Id.* This curtailing of Microsoft's conduct with respect to server/network computing addresses conduct closely related to the retaliatory conduct for which Microsoft has been held liable, **[**139]** so as to ensure that the "untraveled roads" toward illegal maintenance of a monopoly are not "left open." *Int'l* *Salt, 332 U.S. at 400*.

2. Set-Top Boxes and Interactive Television Software

---

[50] Notwithstanding this conclusion, as the Court discusses, *infra* Part III.C.2, if interactive television software evolves as Plaintiffs predict, it will be protected by portions of the Court's remedy.

In some respects, interactive television software can be likened to the middleware platform threats discussed earlier in this case, such as Navigator, because the technology offers a somewhat "new" capability, interactive television functionality and simultaneously serves as a platform for other functionalities such as email and Web browsing. *See supra* Part III.B.3.b. At present, however, unlike the middleware threat posed by Navigator, interactive television software does not reside on the PC, but instead is present predominantly on the server, with a small portion on the television set-top box. *Id.* Therefore, Plaintiffs' view of interactive television software as a "middleware platform threat" is based upon the presumption that the functionality presently residing on the set-top box will someday be ported from the set-top box [51] to run on desktop personal computers. This presumption is the fundamental flaw in Plaintiffs' argument.

[140]** The potential "threat" posed by interactive television software is almost entirely hypothetical. *Id.* There is insufficient evidence for the Court to conclude that interactive television software will be ported in the near future. *Id.* Similarly, there is insufficient evidence to support a conclusion that, if ported, such software will gain significant popularity. *Id.* As a result of this dearth of evidence, the Court concludes that the remedy in this case may be effective and appropriate without extending its protections to interactive television software as it exists today.

The Court observes, however, that should interactive television software develop in the manner predicted by Plaintiffs, it will likely be protected by portions of the remedy imposed by the Court which protect "Non-Microsoft Middleware." In other words, if interactive television software someday runs on Windows, which it does not presently do, and exposes a range of functionality through APIs, it will receive all of the protections afforded "Non-Microsoft Middleware" in the remedial decree imposed by the Court. Similarly, such technology will be eligible for treatment as a "Non-Microsoft Middleware Product, **[**141]** " provided that it obtains a measurable level of popularity as software running on Intel-compatible personal computers to warrant treatment as a middleware platform threat. *See supra* Part III.B.2.a.ii; *infra* Part III.C.5. The Court further observes that if Microsoft were to respond to interactive television technology in a manner similar to its response to the previous middleware platform threats, namely by incorporating such technology into Windows and trademarking the same, interactive television software could receive the protection afforded by the limitations on Microsoft's conduct relative to "Microsoft Middleware" imposed by the Court's remedy described below. [52]

[142] [*131]** ***3. Handheld Devices***

In contrast to server/network computing, or even Plaintiffs' predictions regarding interactive television software, the technology associated with handheld devices has not been shown to have the potential to function in a manner similar to middleware consistent with the liability phase. *See supra* Part III.B.3.c. Plaintiffs advance four theories pursuant to which handheld devices pose a "platform threat to the Windows operating system." *Pl. Prop. Findings of Fact, 84 F. Supp. 2d at 47, P 147*. The Court rejects each of these theories as either logically flawed or unsupported by the evidence.

Relying predominantly upon Mr. Mace's prediction that handheld devices will eventually replace the personal computer, Plaintiffs first argue that this potential substitution of handheld devices in place of personal computers can be characterized as a "platform threat." *Id.* Even if the Court accepts Mr. Mace's prediction regarding the future

---

[51] The Court focuses, in this section, upon the platform potential of that portion of the software which resides on the set-top box. The platform potential of the portion of set-top software which runs on a server can be subsumed into the more general analysis of the capabilities of network computing. *See supra* Parts III.B.3.a, III.C.1.

[52] Treatment as "Non-Microsoft Middleware" affords protections against retaliation and with regard to OEM installation of an icon, shortcut, or menu entry. Treatment as a "NonMicrosoft Middleware Product" would, in specifically defined instances, enable interactive television software to be invoked in place of the Microsoft technology which would otherwise launch automatically.

If the Microsoft counterpart to interactive television software falls within the definition of "Microsoft Middleware," at some point in the future, Microsoft will be required to disclose the APIs and related technical information for interfaces that are relied upon by the Microsoft version of the interactive television software to receive services from the remainder of Windows. *See infra* Part IV.E.

success of the handheld device, Plaintiffs' theory that this replacement represents a "platform threat," as that phrase has been used throughout this proceeding, is flawed. The theory of the "platform threat" posed by middleware posits that **[**143]** the middleware has the potential to erode the applications barrier to entry such that the brand of the underlying operating system is of less importance. In contrast, Plaintiffs' first theory regarding the competitive significance of the handheld device does not envision a world in which the brand of the PC operating system lacks significance, but instead envisions a world in which the PC itself and, therefore, the operating system on which it runs lacks significance. [53]

[144]** Direct competition between the handheld device and the personal computer does not establish that competition will increase in the market for Intel-compatible personal computer operating systems. Such competition instead provides only the possibility that sales of personal computers, and therefore, the number of personal computers running the Windows operating system, will decline. Plaintiffs have not offered evidence which shows that Microsoft's share of the market for Intel-compatible personal computer operating systems will simultaneously decline, or that a decline in PC sales generally will encourage other entrants into the market for Intel-compatible PC operating systems. *See supra* Part III.B.3.c. As a result, the Court finds that Plaintiffs' first explanation of the handheld device's relation to the remedy in this case is not only far removed from the theory of the "middleware platform threat" which gave rise to **[*132]** the liability in this case, but logically unsound.

Plaintiffs argue second that as handheld devices increase in popularity, attracting more software developers and potentially beginning to replace the personal computer, there is an "increased likelihood" that "a **[**145]** handheld device operating system developer would port it to run on Intel-compatible PCs." *Pl. Prop. Findings of Fact, 84 F. Supp. 2d at 47, P 148*. Plaintiffs offer no direct support for this theory. Plaintiffs do not offer testimony from or about any such "handheld device operating system developer" with an interest in porting the operating system to serve as an operating system for a personal computer. *See supra* Part III.B.3.c. Indeed, handheld devices have been commercially successful" since at least 1996, and yet Plaintiffs do not offer any evidence which indicates that the operating systems on which the devices run will be ported to run on the PC. *Id.* Accordingly, the Court must reject Plaintiffs' second theory of relevance as entirely speculative and unsupported by fact.

Plaintiffs next assert that because handheld devices compete with PCs for the attention of software developers there will be a reduction in the number of applications written for the personal computer. Pl. Prop. Findings of Fact PP 149-50. This reduction, contend Plaintiffs, will directly reduce the applications barrier to entry. *Id.* While there is evidence that a great number of applications are written for the handheld **[**146]** device, *see supra* Part III.B.3.c, Plaintiffs have not presented evidence that there has been any decrease in the number of PC applications since the rise in popularity of the handheld device. In short, there is no evidence linking the number of applications written for handheld devices to a decrease in the number of applications written for the PC. Even assuming that the increase in popularity of the handheld device would result in a decreased number of PC applications, from this point Plaintiffs merely reassert a version of their first theory of relevance, arguing that this decrease in PC applications will "impact competition between handhelds and PCs." *Pl Prop. Finding of Fact, 84 F. Supp. 2d at 48, P 150*. As the Court concluded above, competition between handheld devices and PCs has not been shown to have any impact upon the market for PC operating systems. Plaintiffs also assert that a reduction in the number of PC applications will impact "competition among [operating system] manufacturers by reducing the Windows applications barrier to entry." *Id.* Plaintiffs fail to identify any *evidence* which supports this theory. *See generally supra* Part III.B.3.c. Mere reduction in the number of **[**147]** applications written for all PC operating systems has not been shown by Plaintiffs to reduce the applications barrier to entry. In sum, the Court rejects Plaintiffs' third theory of relevance regarding handheld devices as lacking entirely in factual support and logically flawed.

---

[53] Inasmuch as Plaintiffs' view the handheld device as a substitute for the PC, Plaintiffs' argument for the inclusion of handheld devices in the scope of the remedy represents an ironic about-face from Plaintiffs' earlier position-taken in conjunction with the identification of the relevant market in the liability phase-that handheld devices are *not* interchangeable with the PC. *Microsoft, 253 F.3d at 52*; *Findings of Fact, 84 F. Supp. 2d at 15, P 23*. In this regard, the Court observes that, unlike middleware, handheld devices were not treated as "nascent threats" during the liability phase.

Lastly, Plaintiffs contend that the increasing popularity in handheld devices carries the potential to threaten Microsoft's monopoly in the market for Intel-compatible PC operating systems by creating a larger market and greater consumer demand for cross-platform middleware. *See* Pl. Prop. Finding of Fact, 84 F. Supp. 2d at 48, P 151. Plaintiffs do not offer any evidence, let alone economic analysis, that identifies a relationship between the market for handheld devices and the available and potential distribution channels of cross-platform middleware. *See supra* Part III.B.3.c. Because the Court cannot accept Plaintiffs' speculation that there exists such a relationship, the Court rejects Plaintiffs fourth theory of the relevance of handheld devices **[*133]** to the issue of remedy in this case. [54]

[148]** Based on the foregoing, the Court rejects Plaintiffs' insistence that handheld devices need some form of protection by the remedial decree imposed in this case. Handheld devices did not play a role during the liability phase of this case, beyond exclusion from the relevant market, and they have not been shown to be relevant to the Court's task of terminating the illegal conduct, United Shoe, 391 U.S. at 250, and restoring competition to the relevant market, Ford Motor Co., 405 U.S. at 573. **HN16**[] While the Court's ability to impose a remedy in an antitrust case is not "merely to end the specific illegal practices," *Int'l* Salt, 332 U.S. at 401, there is no authorization for the Court to "interfere with ordinary commercial practices." Bausch & Lomb, 321 U.S. at 728. Intervention into a market outside of and unrelated to the monopoly market is not justified merely because Microsoft has begun to compete in the new market and such competition is feared.

4. Web Services

The analysis of Plaintiffs' arguments relative to Web services is similar to the analysis applied to handheld devices. Plaintiffs attempt to relate **[**149]** the emerging area of Web services to this proceeding primarily by emphasizing the seemingly collective recognition in the industry that Web services comprise the new computing platform. *See supra* Part III.B.3.d. Yet the mere importance of Web services to Microsoft and the industry as a whole is not sufficient to justify extending the remedy in this case to regulate Microsoft's conduct in relation to Web services. Although Plaintiffs *assume* that Microsoft will engage in anticompetitive conduct in the future in conjunction with its participation in this emerging area of technology, this case cannot be used as a vehicle by which to fight every potential future violation of the antitrust laws by Microsoft envisioned by Microsoft's competitors. **HN17**[] "[A] district court may not enjoin all future illegal conduct of the defendant, or even all future violations of the antitrust laws, however unrelated to the violation found by the court." Zenith Radio, 395 U.S. at 133. The Court may only restrain commission of the unlawful acts and other *related* unlawful acts. *Id.*

Plaintiffs argue that Web services carry the potential to decrease reliance upon personal computers **[**150]** while increasing reliance upon other computing devices, emphasizing that a number of non-PC devices will have the capacity to access Web services. In this regard, much of Plaintiffs' focus relative to Web services identifies the potential of Web services to enable **[*134]** other devices, such as handheld devices and cellular phones, to erode the market for personal computers. Therefore, argue Plaintiffs, use of these devices may grow so popular that dependence on and the popularity of the personal computer will decrease. Whether Plaintiffs' theory on this point is correct or not, Plaintiffs have not explained how the increase in the use of non-PC devices in conjunction with Web services will reduce Microsoft's monopoly in the market for PC operating systems. As the Court noted above, mere

---

[54] More clearly established than the relationship between handheld devices and this proceeding is the fact that Microsoft's primary competitor in the handheld market would benefit from the inclusion of handheld devices within the definitions of "middleware" and "Microsoft Middleware Product." In fact, the evidence establishes that Palm was intimately involved in the inclusion of such software in Plaintiffs' proposed remedy and stands to benefit competitively from such inclusion because inclusion of handheld devices in the remedy would, for example, afford Palm access to significant information regarding Microsoft's proprietary technologies and would hinder Microsoft's ability to compete in a market already dominated by Palm. *See supra* Part III.B.3.c; *see, e.g.*, SPR §§ 4, 5, 6, 7, 8, 11, 15. This fact, although hardly dispositive of the issue, gives the Court concern as to the legitimacy of the inclusion of handheld-related software in the scope of the remedy. Plaintiffs' inclusion of handheld devices in the scope of their proposed remedy appears to be more closely related to Palm's fears that Microsoft will pose a competitive threat to its dominance in the market for hand held device operating systems, than to any legitimate concern that Microsoft will engage in unlawful conduct.

reduction in the popularity of the PC and the ensuing reduction in the absolute demand for Microsoft's Windows operating system does not necessarily "pry open to competition" the market for PC operating systems. *Int'l* *Salt, 332 U.S. at 401*.

The testimony offered by Plaintiffs regarding handheld devices and Web services-technologies which are largely unrelated to the findings of liability **[**151]** in this case-reflects a fear that Microsoft will parlay its stronghold on the market for Intel-compatible PC operating systems into a position of power in other markets, such as the market for handheld computer operating systems or Web services. *See supra* Part III.B.3.d. In many respects, the concerns raised by Plaintiffs resemble allegations or predictions that Microsoft will attempt to monopolize these new markets or allegations that Microsoft is attempting to leverage its power in the market for Intel-compatible PC operating systems to obtain a competitive advantage in a secondary market. [55] Without addressing the validity of any such assertion, the Court observes that the concerns raised by Plaintiffs and their witnesses relevant to other markets are largely unconnected to the specific facts for which Microsoft has been found liable and, therefore, are more appropriately addressed as separate claims, in a separate suit, should Microsoft engage in such conduct and should Plaintiffs deem it appropriate to file one. Though it is plainly tempting to view this case as a means by which to curtail Microsoft's competitive conduct in a wide array of new markets, ***HN18***[] ***antitrust law*** does **[**152]** not authorize this Court to regulate the conduct of an antitrust violator in areas bearing little relation to the violation. *See* *Zenith Radio, 395 U.S. at 133*. In order to include remedy provisions addressing Web services and handheld devices, Plaintiffs must satisfy a minimum threshold: "The test is whether or not the required action reasonably tends to dissipate restraints and prevent evasions." *Bausch & Lomb, 321 U.S. at 726*. In short, the Court determines that, remedy provisions crafted to address Web services and handheld devices do not satisfy this test.

The Court's determination that Web services are not appropriately addressed by the remedy **[**153]** renders irrelevant a wide array of testimony regarding server-to-server interoperation and server-to-non-PC device interoperation. Similarly, the Court's determination that handheld devices are not appropriately addressed by the remedy renders irrelevant significant portions of testimony relating to interoperation between such devices and PCs or servers. Accordingly, to the extent that Plaintiffs presented testimony on these subjects, the Court concludes that the testimony is not relevant to the issue of a remedy in this case and, therefore, declines to address this testimony.

[*135] ***5. Middleware***

The Court returns at last to the discussion of "middleware" which prompted the Court's examination of the new technologies identified by Plaintiffs. In summary form, Plaintiffs argue that the vast expansion of "middleware" to include the technologies discussed above is demanded by the fact that the PC ecosystem, meaning generally the combination of PC hardware and software products, has changed significantly since the events of the mid-1990s that gave rise to liability in this case and continues to change. *See generally* Pl. Opp'n to Def. Mot. in Limine to Exclude Testimony on Products **[**154]** Unrelated to the Limited Ground of Liability Upheld by the Ct. of Appeals; Pl. Supp. Mem. in Opp'n to Def. Mot. in Limine to Exclude Testimony on Products Unrelated to the Limited Ground of Liability Upheld by the Ct. of Appeals. Because of this constant, fast-paced evolution, Plaintiffs contend that the remedy the Court imposes must reach beyond the "middleware threats" to the Windows monopoly of the liability era and search for new "platform threats." Conversely, Microsoft objects to the expansion of protection to these technologies, in part, on the grounds that Plaintiffs have failed to articulate any theory which forms a nexus between these technologies and the restoration of competition *in the relevant market*. *See generally* Def. Mot. in Limine to Exclude Testimony on Products Unrelated to the Limited Ground of Liability Upheld by the Ct. of Appeals; Def. Mot. in Limine to Exclude Testimony About Events That Allegedly Occurred Before June 24, 1999. Having considered these arguments, the Court concludes that Plaintiffs' treatment of middleware is flawed and, therefore, must be rejected. Concordantly, the Court determines to adopt Microsoft's treatment of middleware for use **[**155]** in the Court's order of remedy.

---

[55] The Court notes as an aside that the viability of the latter theory, known as a "monopoly leveraging" theory, "is in serious doubt." *Microsoft, 1998 U.S. Dist. LEXIS 14231, 1998 WL 614485 at *26*. The district court in this case rejected an earlier attempt to advance a monopoly leveraging theory in this case on this basis. *Microsoft, 1998 U.S. Dist. LEXIS 14231 at [WL] *26-27*.

Undoubtedly, an effective remedy must be sufficiently forward-looking to extend beyond the specific middleware threats addressed during the liability phase, such that Microsoft cannot simply repeat the same conduct with respect to other existing and similar categories of middleware functionality and even to categories of middleware functionality which have not yet been conceived. *Zenith Radio, 395 U.S. at 132-33*. Notwithstanding the need and appropriateness of a forward-looking remedy, the Court treats every expansion of protection with great caution and makes every attempt to craft a remedy which is no more expansive than necessary. *See Bausch & Lomb, 321 U.S. at 728*. As elaborated in detail *supra*, it is clear that Plaintiffs seek to treat as "middleware" a wide variety of technologies to which the relationship of liability in this case is either remote or nonexistent. Although Plaintiffs have argued that such technologies are merely the most nascent "middleware platform threats," the Court finds that most of these technologies are fundamentally different from the "middleware threats" that have been discussed previously **[**156]** in this case.

Plaintiffs' definition of "middleware" and their ensuing definition of "Microsoft Middleware Product" are irreparably flawed in their attempt to capture within their parameters all software that exposes even a single API. [56] *See supra* Parts III.B.2.a-b, III.B.3, III.C.1-4. The commonality between all software products that expose **[*136]** APIs and the middleware addressed at the liability phase is insufficient, on its own, to justify expansion of the terms of the Court's remedy to address nearly every software product. *See Microsoft, 56 F.3d at 1460* ***HN19***[] ("Even where the government has proved antitrust violations at trial, the remedies must be of the 'same type or class' as the violations, and the court is not at liberty to enjoin 'all future violations of the antitrust laws, however unrelated to violations found by the court.'") (quoting *Zenith Radio, 395 U.S. at 132-33*). Such broad and unjustified expansion ignores the Supreme Court's caution that the Court must be "careful to avoid constructions of *§ 2* which might chill competition, rather than foster it." *Spectrum Sports, 506 U.S. at 458*.

[157]** Even where Plaintiffs' definitions of "middleware" and "Microsoft Middleware Product" are more specific in identifying software according to its functionality or brand name, rather than by the fact that it exposes APIs, Plaintiffs have included functionality in the definition which is sufficiently distinguishable from the middleware threats addressed during the liability phase such that these software products are not properly treated as "the same or similar" to the products addressed during the liability phase. *See supra* Parts III.B.2.a-b, III.B.3, III.C.1-4. For the vast majority of the software technologies identified in Plaintiffs' definitions of "middleware" and "Microsoft Middleware Product," Plaintiffs fail to offer evidence which the Court deems sufficient to support a conclusion that these technologies have the potential to evolve into platforms for other applications in a manner akin or equivalent to that possessed by Navigator and Java. *Id.* Indeed, many of these technologies are patently non-nascent and have yet to show any promise of evolving into substantial platforms for other applications. *Id.*

In addition, Plaintiffs include as "Microsoft Middleware Products" **[**158]** software which has never been included or "integrated" into Microsoft's PC operating system products. *Id.* Inclusion of a particular functionality in Windows is integral to the theory of liability, because it was this inclusion of middleware functionality in its Windows products in a manner that worked to the absolute exclusion of competing non-Microsoft middleware [57] **[**159]** that gave rise to significant portions of liability in this case. [58] For both Navigator and Sun's Java, Microsoft developed its own implementation or version of the technology, namely IE and the Microsoft JVM. Microsoft's "campaign" against

---

[56] Reflecting Plaintiffs' view that middleware is any software which exposes APIs, many of Plaintiffs' witnesses testified throughout this proceeding that particular pieces of software are "middleware." The Court rejects this use of the term as fundamentally in conflict with the use of the term throughout the liability phase of this proceeding.

[57] The Court notes for the sake of clarity that the significance of Microsoft's incorporation of particular functionality into its operating system programs in conjunction with the liability findings pursuant to *§ 2* of the Sherman Act, though based upon a common set of facts, is unrelated to Plaintiffs' now-defunct claim that such incorporation constitutes illegal tying in violation *§ 1* of the Sherman Act. *See Microsoft, 253 F.3d at 84* ("The facts underlying the tying allegation substantially overlap with those set forth . . . in connection with the *§ 2* monopoly maintenance claim.").

[58] Admittedly, one might argue that some of the functionalities identified in Microsoft's definition of "Microsoft Middleware Product" have not been shown to be true middleware, but there exists no objection by either party to the inclusion of these functionalities in the scope of protections afforded by the remedy and, thus, no issue for the Court to resolve in this regard.

Navigator and Java included the bolstering of its own versions of these technologies to the exclusion of Navigator and Sun's Java. *See* Microsoft, 253 F.3d at 59-78. Far from a mere technicality, Microsoft software which has never been incorporated or "integrated" into Microsoft's operating system **[*137]** products warrants exclusion from treatment as the Microsoft counterpart to third-party middleware threats in the context of this remedy.

Beyond inaccurately reflecting the definition of "middleware" utilized in the liability phase, Plaintiffs' definition is vague and ambiguous, rendering compliance with the terms of Plaintiffs' remedy which are reliant upon this definition to be largely unenforceable. *See supra* Part III.B.2.b. Therefore, this aspect of Plaintiffs' "middleware" definition is at odds with precedent on the subject of antitrust remedies, *see Int'l* Salt, 332 U.S. at 400, and the law of remedies in general*.* Fed. R. Civ. P. 65(d); Atiyeh v. Capps, 449 U.S. 1312, 1317, 66 L. Ed. 2d 785, 101 S. Ct. 829 (1981).

In sum, the Court finds that Plaintiffs' "middleware" definition, though a remarkable feat of semantic gymnastics, does not reflect **[**160]** accurately the use of that term throughout the earlier portion of this proceeding and includes products and technologies which are readily distinguishable from the middleware addressed earlier in this case. *See supra* Parts III.B.2.a-b, III.B.3, III.C.1-4. In essence, Plaintiffs have expanded the parameters of the defining characteristics of the middleware threat so as to include virtually any piece of software. *Id.* To do so in conjunction with a remedial decree impermissibly threatens to interfere with ordinary and legitimate commercial practices inherent in Microsoft's participation in the software industry. *See* Spectrum Sports, 506 U.S. at 458; Bausch & Lomb, 321 U.S. at 728. In addition, as Plaintiffs have included a great amount of software in their definition which has not been shown to possess the capability of serving as a "platform," there is no basis upon which the Court can conclude that remedial assistance for this wide array of software will lower the applications barrier to entry into the PC operating system market. Absent evidence that a remedy which addresses non-platform software will facilitate competition in the monopolized **[**161]** market, the Court sees little justification for inclusion of such software within the scope of the remedy. Ford Motor Co., 405 U.S. at 573. The Court, therefore, declines to use Plaintiffs' definition of "middleware" and the definitions related thereto in the remedial decree.

Conversely, the Court finds that the treatment of middleware and the related definitions in Microsoft's proposed remedy more closely reflect the meaning given to the term from the inception of this proceeding. Microsoft's treatment of middleware appropriately expands beyond the specific middleware addressed during the liability phase to address new potential platform threats which possess many of the defining characteristics of the middleware identified by Judge Jackson. *See supra* Part III.B.2.a. Accordingly, Microsoft's treatment of middleware, as addressed in its definitions of "Non-Microsoft Middleware" and "Non-Microsoft Middleware Product," as well as in its definitions of "Microsoft Middleware" and "Microsoft Middleware Product," accords with the notion that the remedial decree "is not limited to prohibition of the proven means by which the evil was accomplished, but may range broadly **[**162]** through practices connected with acts actually found to be illegal." Gypsum, 340 U.S. at 88-89. The Court's remedial decree reflects this determination, adopting the treatment of middleware advanced by Microsoft in its remedy proposal. *See supra* Part III.B.2.a.

Notwithstanding this general conclusion, and over Microsoft's objection, the Court has determined that at least one of the technologies identified by Plaintiffs, server/network **[*138]** computing, is appropriately addressed in some respect by the remedy in this case, to the extent that the server operating systems host applications which will ultimately run "for" the desktop. Respecting the fact that the server/network computing model described above does not fit precisely within the middleware definition used in this proceeding up to this point, the Court determines not to manipulate the use of the term in order to address this area of computing. Rather, as discussed in greater detail *infra* Part IV.E, the Court's remedy will address the potential of server/network computing to aid in eliminating the consequences of Microsoft's illegal conduct without giving middleware a definition different than that employed **[**163]** during the earlier stages of this case. *Nat'l Soc'y of Prof'l Eng'rs*, 435 U.S. at 698.

The Court also notes that, to the extent that interactive television software can be proven, in the future, to have been ported from TV set-top boxes to run on a Microsoft PC operating system and expose a range of functionality to ISVs through published APIs, such technology would be included automatically in a number of the Court's remedy provisions.

D. Alleged "Bad" Acts by Microsoft

Throughout this phase of the proceeding, Plaintiffs have recited for the Court's benefit countless findings of fact entered by Judge Jackson during the liability phase regarding actions taken by Microsoft. These findings recount various actions taken by Microsoft which can be characterized as improper or unsavory in one respect or another and, at the very least, harmful to its competitors. Significantly however, many of these findings were ultimately not relied upon by the district court in conjunction with the imposition of liability for violation of *§ 2* of the Sherman Act. Concordantly, in its review of the district court's liability findings, the appellate court **[**164]** did not have occasion to rely upon the vast majority of factual findings entered by the district court, but not cited by the district court as a basis for *§ 2* liability. These factual findings, abundant and damning as they appear, have not, in fact, been weighed for competitive and anticompetitive effect. It has never been the contention of the parties that, during this remedy phase of the proceeding, the Court should undertake such a balancing of anticompetitive effect and procompetitive justification with regard to these factual findings. As a result, these factual findings, standing alone and unconnected to specific liability findings, cannot be utilized to justify specific remedial provisions.

It is tempting, as Plaintiffs' Proposed Findings of Fact illustrate, to rely upon the multiple accounts in Judge Jackson's *Findings of Fact* of Microsoft conduct that is harmful to its competitors, malicious, and severe, in order to justify the imposition of an equally severe remedy in this case. Such reliance, however, ignores the careful admonition of the appellate court that this ***HN20***[] conduct cannot be condemned as exclusionary, even where the intent behind it is anticompetitive, unless **[**165]** there has been a showing that the "monopolist's conduct on balance harms competition." *Microsoft, 253 F.3d at 59*. As the appellate court observed, "even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws . . . ." *Microsoft, 253 F.3d at 58* (quoting *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993))* (quotation marks omitted). The federal antitrust laws "do not create a federal law of unfair competition or 'purport to afford remedies for all torts committed by or against persons engaged in **[*139]** interstate commerce.'" *Brooke Group Ltd., 509 U.S. at 225* (quoting *Hunt v. Crumboch, 325 U.S. 821, 826, 89 L. Ed. 1954, 65 S. Ct. 1545 (1945))*. Harm to "one or more competitors," *however severe*, is not condemned by the Sherman Act in the absence of harm to the competitive process and thereby harm to consumers. *Microsoft, 253 F.3d at 58* (emphasis omitted).

The fact that Judge Jackson entered factual findings in the context of an antitrust suit is itself not sufficient to justify addressing with a remedy the conduct described **[**166]** in these findings. "Whether any particular act of a monopolist is exclusionary, rather than merely a form of vigorous competition, can be difficult to discern . . . ." *Id.* Therefore, because no court has yet found that the acts identified in the *Findings of Fact*, but not relied upon for the imposition of liability, visited *any* harm upon competition, let alone a harm which was not outweighed by the simultaneous procompetitive effect, this Court cannot presume that each of the acts identified in the *Findings of Fact* merits consideration equal with those acts which were found to be anticompetitive in violation of *§ 2*, nor that these acts merit any special weight.

In addition to Plaintiffs' reliance upon the portions of Judge Jackson's *Findings of Fact* in justifying the imposition of certain conduct restrictions upon Microsoft, Plaintiffs identify a number of new and, for lack of a better term, allegedly "bad" acts taken by Microsoft both prior and subsequent to the imposition of liability. Plaintiffs insist that they do not intend these "bad" acts to be viewed by the Court as new allegations of anticompetitive conduct. Rather, Plaintiffs offer these new examples **[**167]** as evidence of conduct which is similar to or a continuation of conduct identified during the liability phase of this proceeding. In some instances, Plaintiffs attempt to relate the new conduct to that which gave rise to the findings of liability in this case. However, in most instances, Plaintiffs relate this more recent conduct to conduct discussed by Judge Jackson in his *Findings of Fact*, but unaddressed in terms of liability. The Court, throughout this opinion, examines various examples of Microsoft conduct identified by Plaintiffs in order to determine whether it is sufficiently related to the liability imposed by the appellate court to justify consideration by this Court in conjunction with the crafting of a remedy. Notwithstanding this approach, because Plaintiffs identify an elaborate series of new "bad" acts by Microsoft relating to Microsoft's alteration and extension of industry standards, use of proprietary technology, disclosure of technical information, or lack thereof, and the ensuing effect of all of this conduct upon interoperability in the context of server/network computing, the Court will address these acts *en masse*. After reviewing the evidence in this **[**168]** regard, the Court concludes that the alleged "bad" acts are tenuously related to the liability findings and, therefore, are of little use in crafting a remedy.

1. Findings of Fact-Allegedly New "Bad" Acts Relating to Interoperation

a. Kerberos

Kerberos is a security protocol that provides a mechanism for "authenticating" a user to a computing network. Short P 67; Tr. at 5515 (Short); Tr. at 5831-32 (Madnick). Authentication is the process by which a server determines whether a client computer should be permitted to access the network (i.e., whether the user is who he/she says he/she is). Short P 67; Tiemann P 159; Tr. at 5515 (Short). Authentication is usually accomplished by the user **[*140]** entering a User ID and a password. Ledbetter P 52; Short P 67.

Authorization is a separate process by which a server determines whether a client computer is entitled to use a particular network resource (i.e., which files on the network the user can access). Ledbetter P 52; Shapiro P 179; Short P 68; Tiemann P 159. Authorization usually takes place after the user has successfully completed authentication. Ledbetter P 52; Shapiro P 179. The Kerberos specification does not address how **[**169]** users are authorized to access network resources. Short P 68.

When Microsoft implemented the Kerberos protocol, it added Windows-specific authorization data (in the form of a Privilege Access Certificate or "PAC") in the "Authorization Data" field of Kerberos "tickets." Short P 72. This addition permits the same Kerberos ticket to contain both authentication and authorization information. Short P 72. The addition constitutes a proprietary extension of the otherwise open standard, and thus, the extension cannot be utilized by third parties unless Microsoft discloses the extension. As a result, a non-Windows client interoperating with a Microsoft server cannot make use of all of the same authorization services as a Microsoft Windows client interoperating with a Microsoft server. Tr. at 5833-36 (Madnick).

It is undisputed that Microsoft's proprietary extension of the Kerberos open standard is not technically inconsistent with the open standard, because a portion of the open standard was left "undefined," with the expectation that software developers could use the field to extend the open standard to support their particular implementations. Tiemann PP 161-62; *accord* Madnick P 105. **[**170]** Microsoft's extension fulfills this expectation, but because Microsoft did not disclose its extension, Plaintiffs' witnesses complained that the extension violated the "spirit" of the open standard. *See, e.g.*, Tiemann P 162.

Microsoft presents testimony that Plaintiffs' complaints with regard to the undisclosed portions of Microsoft's Kerberos extension should have been resolved by Microsoft's February 2002 submission regarding the Kerberos extension to the Internet Engineering Task Force ("IETF"), a major standards-setting body. Madnick P 102; Short P 74; Tr. at 5519-20 (Short). Despite this testimony, on behalf of Plaintiffs, Michael Tiemann, Chief Technology Officer of Red Hat, Inc., Tiemann P 1, questioned the adequacy of the submission and argued that the issue is unresolved. Mr. Tiemann did not offer any evidence of the inadequacy of Microsoft's recent submission to the IETF and concedes that his doubts are speculative and hastily formed. *See id. PP 165-66*.

b. CIFS

In the early part of the last decade, Microsoft developed for use with Windows a protocol called SMB used for file and print sharing. SMB was a proprietary protocol which, as long as it remained **[**171]** undisclosed, could only be used by Microsoft. Tiemann P 136. Microsoft then developed as a subset of SMB the "Common Internet File System" ("CIFS") protocol, which is a file access protocol for use over the Internet that enables groups of users to share documents securely across the Internet or within corporate intranets. Short P 80. Eventually, third-party developers reverse engineered portions of the SMB and CIFS protocols, creating SAMBA, an open-source implementation [59] of the protocols **[*141]** that enables non-Microsoft servers to perform file and print sharing functions with Microsoft server and client operating systems. Tiemann P 137; Short P 83. Mr. Tiemann alleged that the proprietary nature of the SMB and CIFS protocols hinder interoperability between a Windows client and a Linux server. Tiemann P 136. Though he conceded that the SAMBA project has enabled some interoperability, Mr. Tiemann noted that such reverse-engineered solutions are effective only until Microsoft chooses to alter the technology. *Id. P 141*. Mr. Tiemann contended that "Microsoft's implementation of SMB and then CIFS was designed to defeat interoperability and protect its desktop operating system monopoly. **[**172]** " *Id. P 142*. Microsoft did not offer any evidence which explains its conduct with regard to CIFS and SMB. Robert Short, Vice President for Windows Core Technology at Microsoft, Short P 1, testified, however, that Microsoft has, or will license the CIFS and SMB protocols pursuant to Microsoft's settlement agreement with the United States. [60] *Id. P 84*.

[173]** ***c. Directory Services, LDAP, ADSI***

Server operating systems must have some type of directory to keep track of information about the network. Madnick P 113; Short P 88. A full-featured directory stores information about users, organizations, sites, systems, applications, files, printers and almost any other object that can exist in a computing network. Short P 88; *see also* Ledbetter P 51. "Active Directory" is the name given to the directory included in the Windows 2000 Server operating system. Bennett P 198; Madnick P 114; Short P 88. Server operating systems produced by other software companies have similar directories, including eDirectory in Novell NetWare, iPlanet Directory Server in Sun Solaris, and SecureWay Directory in IBM AIX. Madnick P 114; Short P 88; Tr. at 1497-98 (Ledbetter).

The Lightweight Directory Access Protocol ("LDAP") is an industry standard protocol for directory services. Tiemann P 151; Bennett P 198; Short P 89. The Active Directory Service Interfaces ("ADSI") are a set of interfaces that any software program running on different versions of Windows 2000 or on Windows XP Professional can use to access multiple directory services in addition **[**174]** to Active Directory. Short P 90. Mr. Tiemann alleges that Microsoft's ADSI constitutes a proprietary extension of LDAP that remains undisclosed and undocumented. Tiemann P 152. Mr. Tiemann therefore asserts that "Microsoft's extension of LDAP in Active Directory puts his firm, Red Hat, at a competitive disadvantage vis-a-vis Microsoft's offerings, not because Red Hat engineers are not capable of providing competing functionality, but because of a lack of **[*142]** disclosure that renders them unable to communicate that functionality to Microsoft clients and servers under the ADSI protocol." Tiemann P 153. On behalf of Microsoft, Mr. Short disputes Mr. Tiemann's assertion that LDAP is undisclosed and contends instead that the protocol is fully disclosed and documented on the Microsoft Developer Network ("MSDN"). Short P 91.

d. TDS

The SQL server is Microsoft's database server. Tiemann P 143. The Tabular Data Stream protocol ("TDS") is a proprietary, undocumented protocol that Microsoft uses to communicate between Microsoft desktop PCs and SQL servers. *Id.* TDS enables various Microsoft applications such as Office to view and access the data stored in a SQL server. *Id.* Like **[**175]** CIFS, TDS has largely been reverse engineered, but there remain portions which have not yet been reverse engineered. *Id. P 144*. Mr. Tiemann alleges that without a full implementation of TDS, Red Hat is

---

[59] "Open source" refers to a "movement" or business model within the software community in which the source code for the software is made publicly available, often pursuant to terms which grant a license free of charge, with the proviso that any redistribution of the source code, whether modified or unmodified, must also be made publicly available for license free of charge. Tiemann P 33.

[60] The Court discusses the extent to which Microsoft will be required to disclose communications protocols pursuant to the remedy in this case *infra* Part IV.E. To the extent that the CIFS and SMB protocols are natively supported by Windows and are used to interoperate, or communicate, with a Microsoft server, they will be disclosed pursuant to the Court's remedial decree. *Id.* Such mandatory disclosure, however, is not based upon a determination that Plaintiffs' allegations of "bad" acts warrant a remedy, but upon the Court's determination that network/server computing is sufficiently akin to middleware that communications protocols used by Windows to interoperate natively with Microsoft servers should be disclosed in order to facilitate interoperation between Windows clients and non-Microsoft servers. *See supra* Part III.C; *infra* Part IV.E.

unable to provide applications that would allow Linux [61] clients to access information stored on Microsoft's SQL servers or to allow Linux servers to interoperate in a certain manner in a SQL server network. Tiemann PP 143-44. One of Microsoft's computer science experts, Dr. John Bennett, a professor in the Departments of Computer Science and Electrical and Computer Engineering at the University of Colorado at Boulder, Bennett P 1, does not directly dispute the allegation that Microsoft has not disclosed TDS for third party use. *Id. P 194*; Tr. at 7150-54 (Bennett). Dr. Bennett avoids the point with the assertion that there exists a reverse-engineered product, referenced by Mr. Tiemann, Tiemann P 144, which makes some of the TDS functionality available for use by non-Microsoft PC clients when interoperating with Microsoft's SQL server. Bennett P 194; Tr. at 7150-54 (Bennett). Dr. Bennett further observes that the product at issue is a "server application, not even an operating **[**176]** system." Bennett P 194.

e. MAPI

MAPI is a protocol designed by Microsoft and used for communication between the Microsoft Outlook client and the Microsoft Exchange server. Bennett P 157. Plaintiffs' witnesses identified MAPI as the industry standard for "server-based messaging system software." Ledbetter P 83. Since widespread use of MAPI was adopted, Microsoft has extended the standard and maintains proprietary, undisclosed portions of the MAPI protocol. Bennett P 159; Ledbetter P 84; Tiemann P 147. As a result, there are some functions that non-Microsoft servers cannot provide because of an inability to communicate through the MAPI protocol with a Microsoft Outlook client. Tiemann PP 148-49. Mr. **[**177]** Tiemann maintains that this inability to interoperate is the goal of Microsoft's proprietary extension. Tiemann P 149. Although Microsoft, through Dr. Bennett's testimony, concedes its reluctance to disclose certain information, Microsoft maintains that its implementation of MAPI is an innovation like any other, which enables the company to "distinguish its products from those of its competitors." Bennett P 159.

f. MUP

A portion of the Windows operating system is known as the Multiple UNC (Universal **[*143]** Naming Convention) Provider or MUP. Ledbetter P 122. The MUP is Microsoft's proprietary code that facilitates communications between clients and servers in a network. *Id. P 123*. The MUP facilitates communications between Windows clients and multiple servers in a network by directing calls from a client PC to the server that the customer has selected to provide the services requested by the call. *Id. P 123*; Short P 99. Microsoft revised the MUP code for its release of Windows NT 4.0 on August 9, 1996, and as a result of the revision, requests for services by Novell servers in those networks slowed significantly, creating the illusion that Microsoft servers could handle **[**178]** requests for remotely-stored files much faster than Novell servers. Ledbetter PP 127, 140; Bennett PP 163-64. Novell complained to Microsoft and was dissatisfied with the speed and manner in which Microsoft corrected the problem. Ledbetter PP 134-36.

Dr. Ledbetter suggested that Microsoft intentionally designed the MUP modifications to create a result detrimental to Novell. Tr. at 1795-97 (Ledbetter). On behalf of Microsoft, Mr. Short responded that such an implication is without basis. Short PP 99-101. Dr. Bennett further noted that the problem described by Dr. Ledbetter was not limited to non-Microsoft software and that similar delays could be experienced by Microsoft network service providers. Bennett PP 164-65. Microsoft appears to have fully resolved the MUP problem with the release of Windows NT 4.0 Service Pack 4.0 in September of 1998. Bennett P 165; *see also* Tr. at 1799 (Ledbetter).

In general, Microsoft denies that it ever seeks to frustrate interoperability by using proprietary technologies and standards, rather than industry standards, to disadvantage competitors. Instead, Microsoft insists that because it, like any firm, has some limitation on its resources, its **[**179]** decisions regarding interoperability merely reflect its decisions regarding resource allocation. In this regard, Microsoft contends that it does not intend to make

---

[61] "Linux is an 'open source' operating system that was created, and is continuously updated, by a global network of software developers who contribute their labor for free." *Findings of Fact, 84 F. Supp. 2d at 23, P 50*. Mr. Tiemann's firm, Red Hat, claims to be "the leading distributor of the Linux operating system." Tiemann P 1.

technology incompatible, but that such outcomes may result from Microsoft's allocation of its own resources in response to the demands of the market. Tr. at 4559 (Gates).

2. Old "Bad" Acts Relating to Interoperation

In a similar vein, Plaintiffs point to specific factual findings entered by Judge Jackson regarding other "bad" acts in relation to Microsoft's disclosure of technical information. For example, Plaintiffs direct the Court to *Findings of Fact, 84 F. Supp. 2d at 33, PP 90-91*, wherein Judge Jackson found that Microsoft knowingly withheld "critical technical information" from Netscape, hindering Navigator's ability to interoperate with Windows 95. *Findings of Fact, 84 F. Supp. 2d at 33, P 90*. Judge Jackson also found that Microsoft withheld "a scripting tool that Netscape needed to make its browser compatible with certain dial-up ISPs." *Findings of Fact, 84 F. Supp. 2d at 33, P 92*. Lastly, Plaintiffs direct the Court to *Findings of Fact, 84 F. Supp. 2d at 42, P 129* in which Judge Jackson recounted that Microsoft offered IBM early access to its source code, a blandishment enjoyed by a handful **[**180]** of other OEMs, on the condition that IBM pre-install Microsoft's applications in place of competing applications. *Findings of Fact, 84 F. Supp. 2d at 42, P 129*. From these acts, Plaintiffs assert that "Microsoft has used the timing of disclosure of technical information needed to interoperate with the Windows platform for the purpose of directly disadvantaging its platform rival Netscape." Pl. Prop. Findings of Fact P 588. Judge Jackson did not ascribe any liability for the above-described acts. *See* *Microsoft, 87 F. Supp. 2d 34*.

[*144] ***3. Conclusions Regarding "Bad" Acts Evidence***

Pointing to both new and old "bad" acts, Plaintiffs argue that Microsoft's ability to hinder interoperability must be curtailed by mandating the disclosure of vast amounts of technical information and by requiring Microsoft to continue to support "industry standards" in any instance where Microsoft has made an alteration to such a standard. Plaintiffs attempt to justify such remedial provisions by relating all of the above "bad" acts, new and old, concerning the release of technical information to the appellate court's imposition of liability. *See, e.g.*, Pl. Prop. Findings of Fact PP 581-585, 1279. Upon review **[**181]** of Plaintiffs' allegations of "bad" conduct by Microsoft relating to interoperability and the liability findings in this case, the Court concludes that Plaintiffs' allegations in this area bear only a remote relationship to the liability findings. As a result, Plaintiffs' reliance upon this series of allegedly "bad" acts by Microsoft carries little weight, if any, in the Court's determination of the appropriate remedy in this case.

a. Insufficient Nexus to Java Developer Tools Deception

Seeking to link this "bad" act evidence to the liability findings in this case, Plaintiffs direct the Court to the appellate court's finding with regard to Microsoft's "software development tools . . . created to assist ISVs in designing Java applications" that Microsoft included in its "Java implementation." *Microsoft, 253 F.3d at 76*. These tools, like Microsoft's JVM, were incompatible with Sun's cross-platform aspirations for Java. *Id.* The appellate court expressly noted that such incompatibility was "no violation, to be sure," but deemed illegal Microsoft's deception of software developers regarding the Windows-specific nature of the tools. *Microsoft, 253 F.3d at 76-77.* **[**182]** As a result of the deception, developers who relied upon Microsoft's "public commitment to cooperate with Sun" and utilized the Microsoft Java tools unknowingly created applications that would only run on the Windows operating system. *Microsoft, 253 F.3d at 76*. Finding that the deception was no error on Microsoft's part, but instead was part of Microsoft's anticompetitive strategy to undermine cross-platform Java, and in the absence of any procompetitive justification for the action, the appellate court found Microsoft to be in violation of *§ 2* of the Sherman Act. *Microsoft, 253 F.3d at 76-77*.

While this was undoubtedly reprehensible behavior, of paramount significance in the Court's examination of this liability finding is the fact that the imposition of liability for Microsoft's Java tools concerned not the tools' incompatibility with cross-platform Java, but Microsoft's deceptive conduct. *Id.* The Court, therefore, rejects Plaintiffs' suggestion that the imposition of liability for Microsoft's deception regarding its Java developer tools in any way condemns Microsoft's decisions to depart from industry standards or to utilize a proprietary standard in the absence of deception **[**183]** regarding the departure. *See supra* Part III.D.1. The Court further observes that Plaintiffs' allegations regarding Microsoft's alteration of industry standards and use of proprietary technology more closely resemble conduct for which the appellate court expressly rejected liability, than conduct condemned by the appellate court. *Id.* In particular, the actions about which Plaintiffs complain are not unlike Microsoft's implementation of its own JVM incompatible with Sun's JVM. *Compare id.*, *with* *Microsoft, 253 F.3d at 74-75*. Microsoft proffered a procompetitive justification for its development of an incompatible JVM, which was found to outweigh the anticompetitive effect of the implementation. *Microsoft, 253 F.3d at 74, 75* . Similarly, Microsoft's inclusion of its **[*145]** own Java runtime in every copy of Windows so as to ensure ubiquity also was found not to violate the antitrust laws. *Microsoft, 253 F.3d at 75*.

Just as ***HN21***[] "a monopolist does not violate the antitrust laws simply by developing a product that is incompatible with those of its rivals," *id.*, little, if anything, in the liability findings of this case could be construed to indicate that, as a general **[**184]** rule, a monopolist's decision to alter industry standards or implement a proprietary version of such standards in its own product or technology, without more, violates the antitrust laws. This Court undoubtedly has the discretion to "uproot all parts of an illegal scheme-the valid as well as the invalid-in order to rid the trade or commerce of all taint of the [illegal conduct]." *Paramount Pictures, 334 U.S. at 148*. Still, "in resolving doubts as to the desirability of including provisions designed to restore future freedom of trade," this Court is instructed to weigh the "circumstances under which the illegal acts occur." *Gypsum, 340 U.S. at 89*.

In this instance, the appellate court was very clear as to which portions of Microsoft's conduct were anticompetitive in their effect so as to violate the antitrust laws and which portions of Microsoft's conduct were rendered legitimate by a procompetitive justification. This Court cannot ignore the careful and nuanced distinctions drawn by the appellate court in order to justify the prohibition of conduct which bears only a limited resemblance to a narrow part of an anticompetitive scheme. As a result, **[**185]** the Court finds Plaintiffs' focus on Microsoft's alteration of industry standards and reliance upon undisclosed proprietary technologies to be largely misplaced. Plaintiffs' focus ignores the totality of the circumstances, and it ventures into areas of conduct which, at best, are only tangentially related to the conduct for which Microsoft has been found liable.

b. Insufficient Nexus to First Wave Agreements

Plaintiffs also focus, in this context, upon Microsoft's treatment of technical information in conjunction with the First Wave Agreements it entered into with various ISVs. In this context, Microsoft was found to have provided preferential technical support and conditioned receipt of technical information in exchange for ISV promises to promote exclusively the Microsoft JVM and IE. *Microsoft, 253 F.3d at 71-72* (discussing Microsoft's First Wave Agreements with ISVs regarding the use of IE); *Microsoft, 253 F.3d at 75-76* (discussing Microsoft's First Wave Agreements with ISVs regarding Microsoft's JVM). In relation to both the Microsoft JVM and IE, the First Wave Agreements were deemed to violate the Sherman Act inasmuch as they effectively excluded **[**186]** the Sun-compliant JVM and Navigator from significant channels of distribution. *Microsoft, 253 F.3d at 72, 75-76*. Importantly, however, the appellate court expressly noted that the mere fact that Microsoft exchanged "costly technical support and other blandishments" in conjunction with the agreements was not a basis for the imposition of liability. *Microsoft, 253 F.3d at 75* (quoting *Findings of Fact, 84 F. Supp. 2d at 108, P 401)*; *see also* *Microsoft, 253 F.3d at 71-72* (describing Microsoft's use of "preferential support" and "technical information" as consideration). Rather, it was the exclusive effect of the agreements which led to the imposition of liability for Microsoft's First Wave Agreements with ISVs. *Microsoft, 253 F.3d at 71-72, 75-76*.

There are no liability findings in this case which condemn Microsoft solely for the use of valuable technical information as consideration in contracting with third parties; only where such agreements required the use of Microsoft technology to **[*146]** the exclusion of third-party technology did the appellate court find antitrust violations. The circumstances described above regarding Microsoft's alteration of industry standards, use of proprietary standards, and refusal **[**187]** to release technical information are readily distinguishable from Microsoft's conduct in relation to the First Wave Agreements. *Compare supra* Part III.D.1, *with* *Microsoft, 253 F.3d at 71-72, 75-76*. Notably, none of the new allegations of "bad" acts described above arise in the context of Microsoft entering into contracts or other negotiations predicated upon the provision of technological information. *See supra* Part III.D.1. Instead, Plaintiffs have merely identified a series of circumstances where Microsoft allegedly withheld proprietary technical information to the detriment of Microsoft's competitors. *Id.* As the Court previously observed,

HN22[] action which is harmful to competitors does not, by itself, violate the antitrust laws. *Microsoft, 253 F.3d at 58*.

Although "equity has power to eradicate the evils of a condemned scheme by prohibition of the use of admittedly valid parts of an invalid whole," *Bausch & Lomb, 321 U.S. at 724*; *see also* *Paramount Pictures, 334 U.S. at 148*, Plaintiffs' focus on an entirely separate series of alleged withholdings of proprietary technical information unrelated to any exclusive **[**188]** deals with ISVs, far exceeds mere eradication of Microsoft's practice of promising technical information and other blandishments in conjunction with the First Wave Agreements. *Compare supra* Part III.D.1-2, *with* *Microsoft, 253 F.3d at 58*. The Court, therefore, does not regard the alleged withholding of technical information described in Plaintiffs' most recent allegations as synonymous with the anticompetitive conduct, or any part thereof, addressed by the appellate court in conjunction with its review of the First Wave Agreements. On the same grounds, the Court rejects the view that such alleged withholding of information be viewed as a mere continuation of conduct found in whole or in part to violate the antitrust laws.

c. Nexus to Old "Bad" Acts

At best, some of the allegedly new "bad" acts described above bear a limited similarity to the series of old "bad" acts from the liability phase because they concern the withholding of technical information. *See supra* Part III.D.1. Despite this limited similarity, Plaintiffs' allegations are not relevant to this phase of the litigation. Plaintiffs do not argue, nor does it appear, that these "old" bad **[**189]** acts gave rise to any findings of liability against Microsoft for violations of ***antitrust law***. While the factual findings of old "bad" acts identified by Plaintiffs are not benign acts by Microsoft, they were not found to violate the Sherman Act. There is no need to "remedy" conduct for which no liability was ascribed, nor is there a need to "remedy" new conduct which bears a mere tangential similarity to such previously identified conduct.

Despite Plaintiffs' protestations to the contrary, the Court finds that Plaintiffs' allegations with regard to Microsoft's conduct in the area of interoperability are, at their core, new allegations of anticompetitive conduct. *See id.* Notwithstanding the Court's authority to exceed the parameters of the precise conduct found to violate the antitrust laws in order to ensure an effective remedy, there is no dispute that the Court is not at liberty to remedy new "bad" conduct for which no liability has been ascribed. *See* *Microsoft, 56 F.3d at 1460*; *see also* *Yamaha Motor Co. v. FTC, 657 F.2d 971, 984 (8th Cir. 1981)* (rejecting injunction on the ground that its provisions extended "beyond any reasonable relationship **[**190]** to the violations found"). **[*147]** The parties have agreed throughout this proceeding that it would be inappropriate now, during the remedy phase of this proceeding, for the Court to consider and evaluate for anticompetitive effect new allegations against Microsoft. Accordingly, the Court finds that Plaintiffs' new allegations of bad" conduct relating generally to interoperation and more specifically, to Microsoft's alteration of industry standards, use of proprietary technology, and non-disclosure of technical information, are inapposite to the narrow task at hand.

E. Causation Analysis

1. Microsoft's Simple Injunction Argument

Inasmuch as Plaintiffs seek to expand the scope of the conduct to be addressed by the remedy in this case, Microsoft has sought to narrow the scope. In this regard, Microsoft contends that, if Plaintiffs are entitled to any remedy, [62] they are entitled to no more than a simple proscription against the offensive conduct. To justify its argument in this regard, Microsoft relies upon the appellate court's determination that "in devising an appropriate remedy, the District Court also should consider whether plaintiffs have established a sufficient **[**191]** causal connection between Microsoft's anticompetitive conduct and its dominant position in the OS market." *Microsoft, 253*

---

[62] Microsoft has maintained that Plaintiffs are not entitled to any remedy in this case. The Court rejected these arguments, which were primarily advanced in Microsoft's "motion to dismiss" in an earlier Memorandum Opinion. *State of New York, et al. v. Microsoft, 209 F. Supp. 2d 132*, slip op. (D.D.C.2002).

F.3d at 106. The appellate court further observed that "absent such causation, the antitrust defendant's unlawful behavior should be remedied by 'an injunction against the continuation of that conduct.'" *Id.* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 650a, at 67). Drawing from this language, Microsoft insists that:

> Establishing a causal connection sufficient to justify more than an injunction against the 12 acts the Court of Appeals found anticompetitive would require each of the following:
>
> 1. Proof that Navigator and Java would have been successful software products that would have achieved near ubiquitous distribution absent the 12 Microsoft acts found to be anticompetitive.
>
> 2. Proof that Navigator and Java then would have evolved into alternative software development platforms for general purpose applications.
>
> 3. Proof that so many applications would have been written to run on Navigator and Java (as opposed to running directly on Windows) that the applications barrier to entry into the market for Intel-compatible **[**192]** PC operating systems would have been significantly reduced.
>
> 4. Proof that once the applications barrier to entry had been significantly reduced, other vendors would have entered the market for Intel-compatible PC operating systems and thereby eliminated Microsoft's monopoly.

Microsoft Prop. Concl. of Law P 109. In so arguing, Microsoft demands of Plaintiffs precisely what the appellate court deemed to be largely unattainable. The appellate court stated without equivocation that "neither plaintiffs nor the court can confidently reconstruct a product's hypothetical technological development in a world absent the defendant's exclusionary conduct." Microsoft, 253 F.3d at 79. Moreover, the **[*148]** district court had already determined as a factual matter that there was "insufficient evidence to find that, absent Microsoft's actions, Navigator and Java already would have ignited genuine competition in the market for Intel-compatible PC operating systems." Findings of Fact,84 F. Supp. 2d at 111, P 411. The appellate court was well aware of this finding, Microsoft, 253 F.3d at 107 (quoting Findings of Fact,84 F. Supp. 2d at 111, P 411), and did not indicate that Plaintiffs must overcome it **[**193]** in order to obtain a remedy exceeding a mere proscription of the illegal conduct.

In addition, Microsoft's arguments relating to causation overlook the context of the appellate court's analysis. Throughout its discussion of causation, the appellate court addressed the level of causation that must be established in order to justify a remedy of divestiture. Microsoft, 253 F.3d at 106-07. The treatise upon which the appellate court so heavily relied, Areeda and Hovenkamp's ***Antitrust Law***, clearly distinguishes the evidence of causation which is required for a divestiture order and the evidence of causation which is sufficient for injunctive relief. Areeda and Hovenkamp advise that **HN23**[] in cases like this **[**194]** one, where "a monopolist has consummated an exclusionary act . . . equitable relief beyond a mere injunction against repetition of the act is generally appropriate." 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 653c, at 94-95. Recognizing the possibility that "the specific act under challenge may be unique to the circumstances and unlikely to be precisely 'repeated,'" and the need to "undo the various effects of the act," Areeda and Hovenkamp offer the precise advice advanced by the appellate court: the relief must be "tailored" to fit the wrong. *Id.*; Microsoft, 253 F.3d at 107. The treatise advises specifically that the tailoring must have "sufficient breadth to ensure that a certain 'class' of acts, or acts of a certain type or having a certain effect, not be repeated." 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 653c, at 94-95.

Even if Microsoft were correct that a proper remedy in this case should only enjoin the specific conduct found to be anticompetitive, Microsoft overlooks the fact that any doubts as to the extent of even this narrow remedy are to be resolved against the defendant. Areeda and Hovenkamp advise that **HN24**[] "merely for purposes of enjoining the conduct itself, **[**195]** exclusionary conduct is best defined rather broadly in the sense of resolving against the monopolist any doubts concerning the significance of the conduct's contribution to the monopoly." *Id.* P 653c, at 91.

Inasmuch as Microsoft has proposed a remedy which plainly exceeds the bounds of the exclusionary conduct, Microsoft concedes that the Court may order such a remedy in this case. To the extent that the Court has rejected or altered portions of Microsoft's proposed remedy, it does so, in its discretion, to ensure that the conduct found to be exclusionary in violation of § 2 of the Sherman Act is, in fact, "broadly" defined, as Areeda and Hovenkamp instruct, and thereby fully enjoined. Accordingly, the Court finds unpersuasive Microsoft's argument that Plaintiffs are entitled to no more that a simple proscription against the conduct found to violate the antitrust laws.

2. Economic Testimony

In reviewing Judge Jackson's failure to hold an evidentiary hearing prior to imposition of the IFJ, the appellate court recounted the presence of substantial factual disputes, highlighting in particular the conflicting predictions proffered by Plaintiffs' expert economists and **[**196]** investment banking experts and Microsoft's experts in the same areas. *Microsoft, 253 F.3d at 101-02*. Based upon this account and the nature of the remedy proposals, this Court anticipated that substantial portions of the **[*149]** testimony in this phase of the proceeding would come from witnesses qualified by the Court as experts in one field or another. Along these lines, throughout the presentation of evidence in this phase of the proceeding, the Court has been particularly attentive to the testimony of the parties' economic experts with regard to the anticipated effect of particular remedial provisions on competition in the relevant market and for consumers.

Neither of the parties has taken the position that it would be improper for the Court to impose a particular remedial provision in the absence of an endorsement of such provision from one of the economists testifying in this proceeding. Notwithstanding this fact, the Court observes that where the changes that would result from the imposition of a particular remedial provision are dramatic, there is at least an expectation that the party proposing such changes will present an economic analysis of the effect of the changes **[**197]** upon competition in the monopolized market, as well as upon Microsoft, other industry participants, and the consumer. Such expert testimony is of particular use to the Court because the economist is capable of examining the anticipated effect of the provision upon all segments of the industry, rather than from a single perspective, such as that which is frequently offered by individual industry participants. Although the absence of economic analysis of any given remedy provision does not, by any means, require the rejection of the proposed provision, the Court is careful to note those occasions where expert economic testimony would have been particularly useful to the Court and where its absence is significant.

a. Dr. Shapiro's Causation Analysis

i. Factual Findings

Plaintiffs' sole presentation of expert economic analysis comes from Dr. Carl Shapiro, Professor of Business Strategy at the University of California at Berkeley. Dr. Shapiro offered an analysis of the appropriate remedy in this case and, not surprisingly, endorsed many, though not all, of the provisions in Plaintiffs' proposed remedy. Shapiro PP 1-207. Dr. Shapiro testified that his economic analysis **[**198]** rests upon the premise and belief that "restoring competition requires remedial provisions that will affirmatively lower the barriers to entry into the market for PC operating systems." Shapiro P 16 (emphasis omitted). Dr. Shapiro went on to explain that because he viewed the remedy in this case as seeking to "restore competition," the appropriate starting point is an "assessment of how Microsoft's illegal conduct harmed competition." *Id. P 17* (emphasis omitted).

Dr. Shapiro's "assessment" in this regard appears to have been based entirely upon his examination of the district and appellate courts opinions in this case. *Id. PP 18-20, 22-23*. In fact, Dr. Shapiro was unable to identify any source other than the district and appellate court opinions in this case upon which he relied to examine the effects of Microsoft's anticompetitive conduct upon the applications barrier to entry. Tr. at 3360-64 (Shapiro). In this regard, Dr. Shapiro admitted that his citation to Judge Jackson's *Findings of Fact* in order to illustrate the impact of Microsoft's anticompetitive conduct upon Navigator and Java included conduct which was found *not* to violate the antitrust laws. *Id.* at **[**199]** 3381-93 (Shapiro). Dr. Shapiro also conceded that he did not make any attempt to separate the effect of the illegal conduct from the effect of the conduct found *not* to be illegal. *Id.* at 3392, 3401. From his assessment of the record, Dr. Shapiro reached the conclusion that Microsoft's anticompetitive conduct "raised" the **[*150]** existing applications barrier to entry, and therefore, the remedy imposed by the Court, in Dr. Shapiro's opinion, "should lower entry barriers." *Id. P 25* (emphasis omitted).

Quite logically, Dr. Shapiro opined that "entry barriers should be lowered to compensate consumers for the elevation of entry barriers that has resulted from Microsoft's illegal conduct." *Id. P 46*; *see also id. P 58*. Dr. Shapiro readily conceded, however, a lack of any "precise measure" of the extent to which Microsoft's illegal conduct actually "raised" entry barriers. Shapiro P 46. Dr. Shapiro acknowledged his inability to define or even estimate the amount, or the "quantum," to which Microsoft's conduct augmented or fortified the existing applications barrier to entry to defend against the threat posed jointly by Navigator and Java. Tr. at 3359-60 (Shapiro). Dr. Shapiro **[**200]** opined that this uncertainty leaves the Court with the task of making "some judgment calls . . . in terms of how far the remedy should go." *Id.* at 3359. Nevertheless, Dr. Shapiro offered his "best estimate of the elevation of entry barriers caused by Microsoft's illegal conduct." Shapiro P 46. This "estimate" however, is little more than a rejection of the analysis of Microsoft's economic expert, Dr. Murphy, which the Court addresses below. *Id. PP 61-70*. Ultimately, Dr. Shapiro offered the conclusion that "the impact of the illegal acts was significant at the time, while their ongoing effects are very difficult to assess." *Id. P 62*. This "conclusion," of course, is little more than a reiteration of Dr. Shapiro's earlier determination that it is impossible to measure the extent to which Microsoft's anticompetitive conduct raised the existing barrier to entry. The Court observes, in this regard, that Dr. Shapiro does not appear have based this portion of his analysis on any additional empirical evidence or to have relied upon his own experience and expertise to assess the impact of Microsoft's illegal conduct. The remainder of Dr. Shapiro's testimony consisted largely of **[**201]** his assessment of the effectiveness of the two competing remedy proposals in lowering the applications barrier to entry.

ii. Conclusions

To the extent that Dr. Shapiro offered an analysis of whether Microsoft's illegal conduct raised the existing barrier to entry, that analysis is essentially a legal analysis, rather than an economic analysis. The Court reaches this conclusion because Dr. Shapiro's analysis relies entirely upon the judicial findings and conclusions entered in this case and the logical conclusions which can be drawn therefrom. *See supra* Part III.E.2.a.i. In conjunction with his analysis on this point, Dr. Shapiro does not appear to have gathered or synthesized empirical information or to have applied particular economic principles. *Id.* Likewise, Dr. Shapiro's ensuing analysis of the extent to which the remedy in this case should seek to affirmatively lower the existing barrier to entry does not appear to be based upon anything more than a logical reading of the judicial opinions in this case, as he offered no quantification to guide the Court beyond the view that the lowering of the barrier to entry should correspond roughly to the amount the barrier **[**202]** was raised by the illegal conduct. *Id.*

The Court can itself review the same judicial opinions reviewed by Dr. Shapiro and reach determinations regarding whether the remedy should seek to affirmatively lower the applications barrier to entry and the extent to which it should do so. Indeed, Dr. Shapiro himself expected as much, anticipating that the Court would exercise its judgment in deciding "how far the remedy should go." *Id.* Thus, the Court observes, as a preliminary matter, that Dr. Shapiro's ensuing analysis regarding **[*151]** the sufficiency of the two competing remedy proposals to lower the barrier to entry will be useful *only* to the extent that the Court agrees with Dr. Shapiro's interpretation of the appellate and district court opinions in this case.

b. Dr. Murphy's Causation Analysis

i. Factual Findings

One of Microsoft's economic experts, Dr. Kevin Murphy, Professor of Business Economics in the Graduate School of Business at the University of Chicago, provided a causation analysis from a very different perspective. Dr. Murphy concluded that Microsoft's anticompetitive conduct did not have a significant effect on Navigator, Java, or Microsoft's position **[**203]** in the market for Intel-compatible PC operating systems. Murphy PP 92, 104, 157. The Court finds that Dr. Murphy's conclusions as to the effect of Microsoft's conduct upon Navigator and Java are factually in conflict with the conclusions of the appellate court that gave rise to the findings of liability in this case. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. Dr. Murphy's conclusion with regard to the effect of Microsoft's anticompetitive conduct upon its monopoly is less directly in conflict with the appellate court's opinion because, as that court acknowledged, a mere inference of causation, *id. at 79*, rather than a "clear[] indication of a *significant causal connection* between the conduct and creation or maintenance of the market power," would support a finding of liability, *id. at 106* (emphasis in original). Still, Dr. Murphy's conclusion that the anticompetitive conduct identified in this case had *no* effect upon Microsoft's monopoly can be seen to undercut, if not directly contradict, the inference of causation necessary to the appellate court's imposition of liability. Although Dr. Murphy has protested any assertion that his analysis **[**204]** ignores, contradicts, or second-guesses the findings of the appellate court, the Court disagrees. *See, e.g.*, Tr. at 4068 (Murphy).

ii. Conclusions

The Court harbors serious concerns as to the usefulness of Dr. Murphy's causation analysis. Most troubling to the Court in examining Dr. Murphy's analysis is the fact that many of the conclusions reached by Dr. Murphy cannot be reconciled logically with significant portions of the appellate court's opinion. *See supra* Part III.E.2.b.i. Based upon the Court's concerns as to the basis for Dr. Murphy's causation analysis, the Court ascribes little, if any, weight to this portion of Dr. Murphy's testimony.

Notwithstanding the foregoing conclusions regarding the expert testimony offered by both Drs. Shapiro and Murphy, the Court notes that substantial portions of testimony from both of these expert witnesses, distinct from the portions described above, prove useful to the Court in its assessment of the parties' respective remedy proposals.

IV. REMEDY-SPECIFIC CONCLUSIONS

Having rendered the foregoing preliminary determinations regarding the appropriate scope of the remedy in this case, the Court, in the exercise of **[**205]** its broad discretion on the subject of remedy, enters the following determination on the issue of remedy. The Court's determination is based upon the entire factual and legal record in this case and is guided, in particular, by the factual findings on the subject of remedy entered by the Court and appended hereto as Appendix A. The Court's determination as to the remedy to be imposed in this case reflects the Court's assessment of the facts and application of the **[*152]** relevant law, as well as the exercise of the Court's broad discretion.

A. Original Equipment Manufacturer ("OEM") Configuration Flexibility

1. Windows Licenses

The remedy imposed by the Court will provide substantial freedom to OEMs in their configuration of Microsoft's Windows operating system by lifting Microsoft's illegal license restrictions. A significant portion of the liability findings concerns Microsoft's treatment of OEMs, specifically with regard to Microsoft's imposition of exclusionary restrictions in conjunction with the Windows operating system licenses provided to OEMs. *Microsoft, 253 F.3d at 60-62*. The licenses sharply limited OEMs' flexibility and choices in configuring **[**206]** the PC desktop. The limitations were exclusionary in that they bound OEMs' configuration of the desktop in a manner which tended to favor Microsoft software and services at the expense of software and services offered by other entities. Drawing upon these liability findings, there is little dispute as to the general proposition that the remedy imposed by the Court should terminate Microsoft's illegal and anticompetitive license restrictions and prevent Microsoft from imposing similar restrictions in the future.

Despite this limited agreement that the remedy should lift Microsoft's anticompetitive OEM license restrictions, the parties differ significantly as to the specific manner in which such restrictions should be lifted, as well as the extent to which greater flexibility, beyond that addressed at the liability phase, should be secured for OEMs. The first such disagreement concerns whether the remedy in this case will provide protection from restrictions for "ThirdParty Licensees." Plaintiffs argue that the lifting of the license restrictions should require Microsoft to license its Windows operating system to third parties, such as media companies or software developers, who will **[**207]** then distribute or otherwise use the licenses for commercial purposes. The third-party licensing portion of Plaintiffs' proposal would permit such third parties to "customize" the appearance of Windows to reflect the third party's input. *See* Appendix A, Part I.A.

Plaintiffs do not link this aspect of their request for a remedy to a finding of liability which concerns Microsoft's treatment of such "Third-Party Licensees." Plaintiffs argue instead that the protection of the ability of such licensees to customize Windows will increase the development and distribution opportunities for non-Microsoft middleware, aiding in unfettering the market from Microsoft's anticompetitive conduct. Plaintiffs, however, have failed to establish that such licensing will actually benefit or promote competition. *See id.* Additionally, Plaintiffs' proposal for third-party licensing does not reflect the appellate court's recognition that, to the extent that Microsoft's license restrictions prevented drastic alteration of the user interface, they did not violate the Sherman Act. *Microsoft, 253 F.3d at 63*. Rather, Plaintiffs' examples of third-party configuration unapologetically reflect **[**208]** precisely this type of a drastic alteration. *See* Appendix A, Part I.A. Plaintiffs' proposal in this regard will plainly limit Microsoft from engaging in conduct which has not been found to be in violation of the antitrust laws. *Id.*; *Microsoft, 253 F.3d at 63*.

While the case law permits the Court to address legitimate conduct as well as illegal conduct in order to ensure that the market is free from the effects of the anticompetitive scheme, *Nat'l Soc'y of Prof'l Eng'rs*, *435 U.S. at 698*, Plaintiffs have failed to make a showing that regulation of Microsoft's third-party licenses in order to enable "customization" **[*153]** will advance competition, *see* Appendix A, Part I.A. Indeed, the appellate court did not address any aspect of "third-party licensing" in its opinion. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. In addition, the testimony offered in support of Plaintiffs' proposal raises a concern that it has been included for the benefit of particular competitors, rather than for the benefit of competition itself. *See* Appendix A, Part I.A. Absent a clearer connection to the imposition of liability or a clearer showing that **[**209]** a remedy which regulates third-party licensing will benefit competition, the Court declines to impose a remedy which extends needlessly beyond the parameters of the liability findings in order to address license restrictions which Microsoft may impose in third-party licenses. *See* *Brunswick, 429 U.S. at 488* ("The antitrust laws, however, were enacted for 'the protection of competition not competitors.'") (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502*).

2. Installation and Display of Icons, Shortcuts, and Menu Entries

Rather than extend the terms of the decree haphazardly beyond the limits of the anticompetitive conduct as Plaintiffs suggest, the Court will tailor the remedy to fit the exigencies of this case, *Int'l* *Salt, 332 U.S. at 400-01*; *see also* *Bausch & Lomb, 321 U.S. at 727*, focusing initially upon terminating any existing practices deemed to be anticompetitive and ensuring that "there remain no practices likely to result in [illegal monopoly maintenance] in the future," *United Shoe, 391 U.S. at 250*. The remedy imposed by the Court therefore seeks primarily to address the specific conduct **[**210]** found to be anticompetitive with regard to OEM licenses. In order to address Microsoft's illegal prohibitions in OEM licenses, the remedy in this case will afford OEMs the freedom that they have been denied and will protect against any "back door" attempt by Microsoft to deny flexibility. The remedy imposed by the Court will secure for OEMs the general ability to install and display icons, shortcuts and menu entries for middleware-the type of software disfavored by Microsoft's anticompetitive restrictions-on the Windows desktop or in the Start menu. Importantly, however, rather than a blanket prohibition on licensing restrictions, the Court's remedy recognizes the care with which the appellate court separated anticompetitive restrictions from legitimate license restrictions and attempts to reflect that separation in its terms. *See generally* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*.

For example, the appellate court concluded that license restrictions preventing drastic alteration of Microsoft's copyrighted work were only marginally anticompetitive and on this basis, rejected a finding of liability for licenses that prohibit OEMs from launching an alternative user interface automatically **[**211]** at the end of the initial boot sequence. *Microsoft, 253 F.3d at 63*. Given this very specific recognition that Microsoft can legitimately protect its products from drastic alteration, the remedy imposed by the Court will prohibit anticompetitive practices but still enable Microsoft to protect its copyrighted products from drastic alteration. *Id.* Therefore, the provisions of the injunctive decree will balance preservation of the core elements of Microsoft's product design against the need to secure significant flexibility and protection for OEM configuration of the product.

The Court first strikes this balance in the context of the installation and display of icons, menu entries, and shortcuts. Microsoft will be enjoined from restricting by agreement any OEM licensee from installing an icon, menu entry, shortcut, product, or service related to "NonMicrosoft Middleware." **[*154]** *See supra* Part III.B-C.

(discussing definition of "Non-Microsoft Middleware"). Likewise, the Court will enjoin Microsoft from limiting the display of any such icon. However, the Court will not prevent Microsoft from imposing non-discriminatory limitations on the specific areas in which icons **[**212]** may be displayed, provided that such limitations cannot be used to favor Microsoft and, instead, exist as part of the Windows product design. There is no evidence that the minor limitations on OEM flexibility in this manner will permit illegal monopolistic practices to persist or harm competition. *See* Appendix A, Part I.A. The Court's remedy will also permit Microsoft to protect the design of its product from drastic alteration in a manner which is the substantial equivalent of a launching of a new user interface, such as OEM designation of an icon in such an extreme size or shape that it obscures the crucial elements of the Windows user interface. There has been no showing that the preservation of Microsoft's ability to impose license restrictions with regard to these kinds of extreme alterations of Windows will work to the detriment of competition, *see id.*, and in the Court's view, such license restrictions are more akin to the restrictions for which Microsoft was absolved of liability than those for which Microsoft was found to have acted unlawfully.

3. Insertion of Internet Access Provider ("IAP") Registration Offers

The insertion by OEMs of offers of service **[**213]** from IAPs during the initial boot sequence was found to provide an opportunity for the promotion of alternative middleware. *Findings of Fact, 84 F. Supp. 2d at 60, P 210*. Microsoft's limitation on the ability of OEMs to insert such offers was found to have an anticompetitive effect in violation of ***antitrust law***. *Microsoft, 253 F.3d at 61-64*. To remedy this finding, the remedial decree imposed by the Court will enjoin Microsoft from imposing license restrictions on the ability of OEMs to insert such offers.

Microsoft has argued that the insertion of IAP registration sequences should be subject to the imposition of Microsoft's "reasonable technical requirements" on the rationale that such requirements preserve a consistent user experience. In offering this concern as a justification, Microsoft ignores the fact that the same rationale was rejected by the appellate court when it imposed liability for Microsoft's license restrictions regarding the initial boot sequence. *Microsoft, 253 F.3d at 63-64*. Specifically, the appellate court concluded that Microsoft's concern for consumer confusion and the allegedly reduced value of its product did not outweigh the anticompetitive effect of the **[**214]** license restrictions. *Id.* Microsoft's argument was found to have merit only to the extent that the license restrictions were necessary to prevent "drastic alteration of Microsoft's copyrighted work." *Microsoft, 253 F.3d at 63*. Microsoft has not offered any additional justification for preserving its ability to impose "reasonable technical requirements" on the introduction of IAP registration offers during the initial boot sequence. *See* Appendix A, Part I.A. Accordingly, there is no basis upon which the Court can rationally conclude that the remedy should permit Microsoft to impose such specifications beyond the requirement that the registration sequence must return the user to the Windows user interface at its conclusion. *Id.*; *see also* *Microsoft, 253 F.3d at 63* ("We agree that a shell that automatically prevents the Windows desktop from ever being seen by the user is a drastic alteration of Microsoft's copyrighted work . . . ."). Even Microsoft concedes that, at a minimum, the final judgment in this case must address the specific acts found by the appellate court **[*155]** to constitute exclusionary practices in violation of *§ 2* of the Sherman Act. Hence, the remedy **[**215]** imposed by the Court will enable OEMs to offer IAP registration during the initial boot sequence.

4. Automatic Launching of Applications

In a related context, the Court's remedial order will secure the ability of OEMs to install applications which launch automatically, meaning without end-user invocation, in particular instances. Microsoft argues that the remedy imposed by the Court should not give OEMs complete autonomy with regard to the automatic launching of applications at start-up or upon accessing or departing the Internet. The Court recalls once again that the only Microsoft license restriction found to have competitive value outweighing its anticompetitive effect was the prohibition on the automatic launch of a program which *replaced* the Windows user interface with a substitute user interface. *Microsoft, 253 F.3d at 63*. The rationale for this holding rests upon the appellate court's conclusion that the "drastic alteration of Microsoft's copyrighted work" outweighed the "marginal anticompetitive effect" of the restriction. *Id.* By implication, therefore, the appellate court did not relieve Microsoft of liability for the imposition of license **[**216]** restrictions relating to the automatic launching of software where the automatically launched programs respected and functioned within the Windows user interface and thereby did not drastically alter

Microsoft's copyrighted work. *Compare* *Microsoft, 253 F.3d at 64* ("We hold that with the exception of the *one restriction* prohibiting automatically launched alternative interfaces, *all* of the OEM license restrictions at issue represent uses of Microsoft's market power to protect its monopoly . . . .") (emphasis added), with *Findings of Fact, 84 F. Supp. 2d at 61, P 213* ("Third, Microsoft prohibited OEMs from installing programs, including [but not limited to] alternatives to the Windows desktop user interface, which would launch automatically upon completion of the initial Windows boot sequence.").

Paying careful attention to the very specific reason for the appellate court's rejection of liability with regard to alternative user interfaces, the Court regards it as appropriate for the remedy in this case to permit the automatic launch of non-Microsoft programs upon the completion of the initial boot sequence where the automatically-launched program does not substitute the Windows user interface **[**217]** for a different interface or otherwise drastically alter Microsoft's copyrighted work. *See* Appendix A, Part I.A (describing programs that are automatically launched but do not replace Microsoft's user interface). The Court has tailored its remedy to permit the automatic launch of such programs because the ability to launch programs automatically will assist in the promotion of non-Microsoft software and middleware, resulting in an increased likelihood that a particular piece of middleware will reach its potential to serve as a multi-purpose platform for applications. *See id.*

The Court, therefore, specifically rejects the contention by Microsoft that automatic launching of software products should be limited to circumstances where Microsoft has chosen to launch automatically a competing middleware program. The benefit of the automatically launching program arises from the fact that the user need not do anything to invoke the program's capabilities. *Id.* The limitation proposed by Microsoft will cabin innovation to that which is led by Microsoft. *Id.* Whether or not Microsoft happens to have a product which provides similar functionality which would be launched automatically **[**218]** has little bearing upon the competitive advantages to be gained by enabling the automatic **[*156]** launching of new and innovative products. *Id.* Accordingly, the Court will enjoin Microsoft from limiting the automatic launch of software provided that such software does not replace the Windows user interface or otherwise drastically alter Microsoft's copyrighted work.

B. End-User Access

In addition to the lifting of Microsoft's illegal license restrictions, the Court's remedial order will require Microsoft to alter its Windows technology to ensure that OEMs and end users may disable end-user access to various types of Windows functionality. Much of the litigation in the remedy phase has focused upon the proper remedy for the imposition of liability upon Microsoft for its "commingling" of browsing-specific code with code that provides operating system functionality. *Microsoft, 253 F.3d at 65* (quoting *Findings of Fact, 84 F. Supp. 2d at 50, P 161)*. The appellate court, appearing to adopt the district court's rationale that a distinction could be drawn between browsing-specific code and operating system code, explained that such commingling "has an anticompetitive effect" because **[**219]** it "deters OEMs from pre-installing rival browsers [because doing so increases the OEM's product testing and support costs], [63] thereby reducing the rivals' usage share and, hence, developers' interest in rivals' APIs as an alternative to the API set exposed by Microsoft's operating system." *Microsoft, 253 F.3d at 66*. This anticompetitive effect outweighed Microsoft's procompetitive justification and accordingly, resulted in the imposition of liability by the appellate court. *Id.*

In the case of commingling, the most appropriate remedy, in this Court's view, must place paramount significance upon addressing the exclusionary effect of the commingling, rather than the mere **[**220]** conduct which gives rise to the effect. By addressing the adverse effect of such commingling, the Court can more readily expand the remedy beyond the specific finding of liability for commingling browsing-related code with operating system-related code. Such expansion is inherently difficult, as there, indeed, exists great disagreement and confusion as to what aspects

---

[63] "Preventing an OEM from removing IE deters it from installing a second browser because doing so increases the OEM's product testing and support costs; by contrast, had OEMs been able to remove IE, they might have chosen to pre-Install Navigator alone." *Microsoft, 253 F.3d at 66* (citing *Findings of Fact, 84 F. Supp. 2d at 49, P 159)*.

of Microsoft's product design, if any, would constitute commingling beyond the treatment of browser code and operating system code. *See* Appendix A, Part X.B.

Plaintiffs seek to broaden the view of commingling to encompass any circumstance in which operating system code is included in the same files as code that Plaintiffs have characterized as non-operating system or middleware code. *Id.* Such broadening, however, invokes a dilemma that has existed since the inception of this suit, namely whether certain functionalities can be identified as exclusive to the "operating system," while other functionalities are entirely unrelated to the operating system. Fundamental to the "commingling" finding by the district court and subsequent affirmance by the appellate court was the factual determination that there existed **[**221]** "a *consensus* in the software industry that [Webbrowsing] functionalities are distinct from the set of functionalities provided by an operating system." *Findings of Fact,84 F. Supp. 2d at 48, P 150* (emphasis added). Plaintiffs have failed to offer evidence which establishes that a similar consensus exists with regard to the other Microsoft middleware functionalities that Plaintiffs have proposed to make removable **[*157]** from Windows. *See supra* Part III.B-C; *see also* Appendix A, Part X.B. Nevertheless, even where such distinctions can be drawn between operating system and non-operating system, it is equally difficult to then separate various purported non-operating system functionalities into their own categories of functionality. [64] *See* Appendix A, Part X.B. Moreover, even if operating system and non-operating system functionalities are separable in concept, separation of the code, in practice, is far more difficult.*Id.*

[222]** Plaintiffs have advanced a remedy that requires the removal of Windows software code providing the "middleware" functionality of "Internet browsers," and a number of other types of "middleware" functionality, so as to leave only "operating system" code. Yet, Plaintiffs have been unsuccessful at distinguishing the code which comprises an "operating system" from the code which comprises a non-operating system "Microsoft Middleware Product," such as a browser. *Id.* Because of this failure, Plaintiffs have not offered a reasonable way for Microsoft to separate the code in order to comply with the code removal requirements in Plaintiffs' unbinding proposal. *Id.* This is not to say that, in the abstract, it is a technologically impossible task to separate the code. However, in the absence of clear definitions between the items to be separated, there is no way to know whether the required unbinding has been achieved. *Id.* Likewise, Plaintiffs have not shown that, even if they were able to define sufficiently the items which must be made separate, that such separation is attainable in the near future. *Id.* Microsoft presented significant evidence, which the Court credits, that **[**223]** such separation would not only degrade whatever remains, but would be a significant undertaking. *Id.*

Of even greater significance is the fact that the evidence does not indicate that the removal of software code is beneficial from an economic perspective. *Id.* Plaintiffs' sole economic expert declined to endorse a remedy requiring the removal of software code. *Id.* Both of Microsoft's economic experts testified that there was no economic rationale for removing software code as opposed to the removal of end-user access to any commingled functionality. *Id.* Therefore, Plaintiffs have offered no economic analysis of what may occur in the marketplace following a drastic remodeling of a product with over 95 percent of the market share. *Microsoft, 253 F.3d at 51, 54*; *Findings of Fact,84 F. Supp. 2d at 19, P 35*. This omission merely emphasizes for the Court the grievously inadequate nature of the evidence offered in support of a requirement that Microsoft remove software code from its Windows products.

---

[64] This problem of technically separating the "operating system" from other functionality, such as browsing functionality, also arose in conjunction with Plaintiffs' claim, pursuant to *§ 1* of the Sherman Act, of illegal tying and, in fact, has its roots in the predecessor litigation: *United States v. Microsoft Corp., 331 U.S. App. D.C. 121, 147 F.3d 935 (D.C. Cir. 1998)*. In that case, the D.C. Circuit observed that "as was the case with Windows 95, the products--the full functionality of the operating system when upgraded by IE 4 and the 'browser functionality' of IE 4--do not exist separately." *Id. at 951-52*. In the instant case, Plaintiffs alleged that Microsoft illegally tied its browser, IE, to its operating system. Ultimately, the appellate court was unable to conclude that the two identified "products" were, in fact, separate. *Microsoft, 253 F.3d at 85-95*. In this regard, the appellate court noted that Plaintiffs had failed to provide precise definitions of "browser" and the browser market. *Microsoft, 253 F.3d at 95*. The appellate court made the same observation in the context of its discussion of Plaintiffs' attempted monopoly claim, noting Plaintiffs' "failure to articulate and identify evidence before the District Court as to . . . what constitutes a browser (*i.e.*, what are the technological components of or functionalities provided by a browser)." *Microsoft, 253 F.3d at 81-82*.

[*158] The Court also heard and credits extensive testimony that recounts the manner in which the forced removal of software code from the Windows operating system will disrupt the industry, **[**224]** harming both ISVs and consumers. *See* Appendix A, Part X.B. In this regard, the Court credits the testimony of various ISVs that the quality of their products would decline if Microsoft were required to remove code from Windows. *Id.* The Court also credits similar testimony which explained that the software products produced by ISVs would become larger, more complex, and slower to develop. *Id.* Plaintiffs have failed, in response to this testimony, to establish that their proposed system of replacing the removed Microsoft code with software code produced by other vendors, if the OEMs so chose, would prove to be either workable in practice or beneficial to competition and the market as a whole. *Id.* In short, the record is overwhelmed with significant unrebutted evidence that Plaintiffs' proposal of code removal would harm ISVs and consumers. *See id.*

The case law is unwavering in the admonition that ***HN25***[] it is not a proper task for the Court to undertake to redesign products. "Antitrust scholars have long recognized the undesirability of having courts oversee product design . . . ." *Microsoft, 147 F.3d at 948*. Accordingly, even if Plaintiffs had presented **[**225]** evidence sufficient to support their request that the Court require Microsoft to remove code from its products, the Court would be appropriately reluctant to enter a remedy that requires Microsoft to completely redesign its Windows products and places the Court in the role of scrutinizing whether Microsoft has done so without degradation of the ultimate product. Moreover, the D.C. Circuit has stated emphatically that "any dampening of technological innovation would be at cross-purposes with ***antitrust law***." *Id.* The evidence in this portion of the proceeding establishes not only that Microsoft's innovation would be stifled by the requirement that it redesign its products, but that the ability of ISVs to innovate would be slowed because of the detrimental effects of the presence in the marketplace of multiple versions of Microsoft's Windows operating system, each with different code and different APIs. *See* Appendix A, Part X.B. As explained in detail in Appendix A, the multiplicity of versions results from the fact that, once the purported "middleware" portions of Microsoft's operating system are removed, whether or not replaced by third-party software, the resulting product will **[**226]** vary significantly depending upon the particular piece of "middleware" that was removed and/or replaced by third-party software. *Id.*

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > General Overview

HN26[] **Antitrust & Trade Law, Sherman Act**

The antitrust laws do not condemn even a monopolist for offering its product at an attractive price, even where the monopolist offers valuable consideration in the form of technical information and "bounties."

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN27[] Public Enforcement, State Civil Actions

The court is not at liberty to enjoin all future violations of the antitrust laws, however unrelated to violations found by the court, nor is the court at liberty to interfere with ordinary commercial practices, even where those practices are malicious and injurious to particular competitors.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN28[] Public Enforcement, State Civil Actions

The "forward-looking" nature of the remedy cannot be so expansive as to be unduly regulatory or provide a blanket prohibition on all future anticompetitive conduct.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN29[] Public Enforcement, State Civil Actions

The court has the power to prohibit admittedly valid parts of an invalid whole, where such prohibition will further eradicate the harmful effects of the anticompetitive conduct.

Civil Procedure > Judicial Officers > Masters > Appointment of Masters

Civil Procedure > Judicial Officers > Masters > General Overview

Civil Procedure > Judicial Officers > References

HN30[] Masters, Appointment of Masters

Fed. R. Civ. P. 53 generally empowers the court to appoint a special master, with the following proviso: A reference to a master shall be the exception and not the rule. In actions to be tried by a jury, a reference shall be made only when the issues are complicated; in actions to be tried without a jury, save in matters of account and of difficult computation of damages, a reference shall be made only upon a showing that some exceptional condition requires it. *Fed. R. Civ. P. 53(b)*.

Civil Procedure > Judicial Officers > Masters > Appointment of Masters

Civil Procedure > Judicial Officers > Masters > General Overview

Civil Procedure > Judicial Officers > References

HN31[] Masters, Appointment of Masters

The presence of "some deep technological issue" related to interpreting a decree alone is not sufficient to render the issue "complicated" pursuant to *Fed. R. Civ. P. 53*. Moreover, the United States Court of Appeals for the District of Columbia Circuit has expressed disfavor for appointment of a special master in antitrust cases, though they are undoubtedly complex, because such complexity itself is an impelling reason for an experienced trial judge rather than a temporary substitute appointed on an ad hoc basis to preside over the issue presented therein. Additionally, references to special masters are improper where the master is called upon to determine the rights of the parties, rather than to enforce such rights.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Transportation Law > Interstate Commerce > Market Participant Doctrine

HN32[] **Public Enforcement, State Civil Actions**

While an appropriate remedy should open the doors to competition, favoritism of one market participant over another in a remedy provision places the court in the improper position of exerting too much control over the market. The court's role is to end the illegal conduct and to make every effort to protect against conduct of the same type or class, not to engineer a particular market outcome.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN33[] **Public Enforcement, State Civil Actions**

The court may not simply enjoin all future violations of the antitrust laws. Rather a remedy should be tailored to fit the wrong.

Antitrust & Trade Law > Sherman Act > General Overview

HN34[] **Antitrust & Trade Law, Sherman Act**

A monopolist does not violate the antitrust laws simply by developing a product that is incompatible with those of its rivals. In order to violate the antitrust laws, the incompatible product must have an anticompetitive effect that outweighs any procompetitive justification for the design.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN35[] **Public Enforcement, State Civil Actions**

A remedial decree should be as specific as possible, not only in the core of its relief, but in its outward limits, so that parties may know their duties and unintended contempts may not occur.

Civil Procedure > Sanctions > Baseless Filings > General Overview

Legal Ethics > Professional Conduct > Frivolous Claims & Conduct

Civil Procedure > Sanctions > General Overview

HN36[] **Sanctions, Baseless Filings**

Truly frivolous claims are prohibited by *Fed. R. Civ. P. 11*. *Fed. R. Civ. P. 11*. The Federal Rules further prohibit the presentation of claims and court filings in general for any improper purpose, such as to harass. *Fed. R. Civ. P.*

11(b)(1). Violations of Rule 11 are punishable by the imposition of sanctions not only upon counsel, but upon the parties themselves. Fed. R. Civ. P. 11(c).

Judges: COLLEEN KOLLAR-KOTELLY, United States District Judge.

Opinion

[226] [*158]** Nothing in the rationale underlying the commingling liability finding requires removal of software code to remedy the violation. To the contrary, the evidence presented to the Court indicates that the ability to remove end-user access to any commingled functionality would sufficiently address the anticompetitive aspect of the conduct and would prove far less disruptive to consumers and industry participants. *See* Appendix A, Parts I.B, X.B. The concern of the district court, as well as the appellate court, was that commingling deterred preinstallation of rival browsers by OEMs. United States v. Microsoft Corp., 253 F.3d 34, 66, 346 U.S. App. D.C. 330; United States v. Microsoft Corp., 87 F. Supp. 2d 30, 39. The rationale for this deterrence rested upon the increased consumer support costs inherent in installation of more than one product in any given category. *See* United States v. Microsoft Corp., 84 F. Supp. 2d 9, 49, P 159. The evidence presented to the Court during the remedies phase continues to support the view initially espoused by Judge Jackson that although the "Add/Remove function did not delete all of **[**227]** the files that contain browsing specific code . . . . from the user's perspective, **[*159]** uninstalling Internet Explorer in this way was equivalent to removing the Internet Explorer program from Windows 95." *Findings of Fact,* 84 F. Supp. 2d at 50, P 165. Based on all of the foregoing conclusions, and in the exercise of the Court's discretion, the Court determines that the remedy in this case will not require removal of code from Microsoft's Windows operating system. *See* 2 AREEDA ET AL., ***ANTITRUST LAW*** P 325a, at 246 ("The decree . . . will not embody harsh measures when less severe ones will do.").

The more appropriate remedy, which the Court will impose, is a mandate that Microsoft permit OEMs to remove end-user access to aspects of the Windows operating system which perform middleware functionality. The requirement that Microsoft provide OEMs with the ability to add or remove the icons, menu entries, and shortcuts corresponding to a readily identifiable group of Microsoft technologies will address two distinct findings of liability. First, the provision of OEM flexibility to add and remove end-user access to certain Microsoft technologies will address directly the anticompetitive effect of Microsoft's commingling **[**228]** of code providing browsing functionality with operating system functionality. Specifically, the removal of end-user access to certain Microsoft technologies will eliminate, or at least substantially reduce, the deterrent effect of the presence of the Microsoft technology upon the OEM's inclination to install an alternative technology. *See* Appendix A, Part I.B; *see also Findings of Fact,* 84 F. Supp. 2d at 50, P 165. The Court notes in this regard that any argument that the removal of end-user access as a remedy to Microsoft's commingling is inadequate as a remedy is quickly stifled by the clear and certain harm to the entire personal computer ecosystem which would result from the alternative proposal of mandated code removal. *See* Appendix A, Part X.B. Second, allowing OEMs to remove end-user access to certain Microsoft technologies directly addresses the finding of liability against Microsoft for excluding IE from the "Add/Remove Programs" utility in Windows 98. Microsoft, 253 F.3d at 65. By extending the requirement that Microsoft preserve the removal of end-user access to Microsoft technologies beyond IE, namely to those technologies incorporated in Microsoft's definition of **[**229]** "Microsoft Middleware Product," *see supra* Parts III.B-C, the Court expands beyond the specific liability in this case to address conduct which is the substantial equivalent. This expansion helps to ensure that many of the "untraveled roads" to restraint of trade are not left open. *Int 'l* Salt v. United States, 332 U.S. 392, 400.

In remedying Microsoft's anticompetitive exclusion of IE from the "Add/Remove" utility by mandating that Microsoft provide OEMs and consumers with the ability to enable or disable end-user access to various Microsoft and non-Microsoft technologies, the Court expressly rejects Plaintiffs' definition of "end-user access." *See* Appendix A, Part I.B. Plaintiffs' proposal to regulate indirect invocation of IE and other middleware addresses conduct considered and ultimately rejected by the appellate court as a basis for antitrust liability. *See supra* Part II.A.5. Criticizing and appearing to reject Judge Jackson's "broad condemnation"of the "binding" of IE to Windows with "technological shackles," [65] **[**232]** the appellate court parsed the **[*160]** "three specific actions Microsoft took to weld IE to Windows" and ultimately imposed liability for only two such actions. **[**230]** *Microsoft, 253 F.3d at 64-67*. The appellate court rejected the imposition of liability for Microsoft's practice of overriding the user's choice of a "default browser." *Microsoft, 253 F.3d at 67*. Judge Jackson explained this Microsoft practice in paragraph 171 of his *Findings of Fact,* 84 F. Supp. 2d at 52:

> As shipped to users, Windows 98 has Internet Explorer configured as the default browser. [66] While Windows 98 does provide the user with the ability to choose a different default browser, it does not treat this choice as the "default browser" within the ordinary meaning of the term. Specifically, when a user chooses a browser other than Internet Explorer as the default, Windows 98 nevertheless requires the user to employ Internet Explorer in numerous situations that, from the user's perspective, are entirely unexpected. As a consequence, users who choose a browser other than Internet Explorer as their default face considerable uncertainty and confusion in the ordinary course of using Windows 98.

Findings of Fact, 84 F. Supp. 2d at 52, P 171. In response, Microsoft proffered the following "technical reasons" for the override:

> The Windows 98 Help system and Windows Update feature **[**231]** depend on ActiveX controls not supported by Navigator, and the now-discontinued Channel Bar utilized Microsoft's Channel Definition Format, which Navigator also did not support. Lastly, Windows 98 does not invoke Navigator if a user accesses the Internet through "My Computer" or "Windows Explorer" because doing so would defeat one of the purposes of those features--enabling users to move seamlessly from local storage devices to the Web *in the same browsing window*.

Microsoft, 253 F.3d at 67. (quoting Microsoft's "Opening Br." at 82 (internal citations omitted)) (emphasis in original). Based upon this proffer of "valid technical reasons" for the override described by Judge Jackson, and in the absence of evidence from Plaintiffs demonstrating that the "anticompetitive effect of the challenged action" outweighed the proffered justification *Microsoft, 253 F.3d at 64-67*. therefor, the appellate court determined that Microsoft's conduct with regard to the "default browser" would not support *§ 2* liability. *Id.*

Plaintiffs' proposal ignores the rejection of liability for Microsoft's practice of overriding the user's choice of a "default browser" where there exist "valid technical reasons" for doing so. *Id.* In particular, Plaintiffs' proposal to regulate the provision of "end-user access" includes "indirect invocation"of a particular Microsoft technology, meaning invocation by the operating system itself rather than directly by the end user. *See* Appendix A, Part I.B. The regulation of such "indirect invocation" would have the effect of prohibiting at least some of the conduct, such as Windows' indirect invocation of IE over **[*161]** Navigator to enable "users to move seamlessly from local storage devices to the Web *in the same browsing window*," which the appellate court refused to condemn, *Microsoft, 253 F.3d at 67* **[**233]** (quoting Microsoft's "Opening Brief" at 82) (emphasis in original). *See* Appendix A, Part I.B. Plaintiffs' exceptionally broad definition of "end-user access" threatens to regulate and prohibit significant amounts of ordinary operating system functionality. *Id.* Plaintiffs do not justify this regulation of Microsoft's legitimate conduct with evidence of a particular competitive benefit to be gained therefrom. *Id.* Accordingly, the Court regards a definition of "end-user

---

[65] Microsoft, dubbing this technological binding more attractively as "integration," presented testimony extolling the virtues of integration for both consumers and other industry participants. *See, e.g.*, Sanders PP 11-40. The Court declines to enter any findings with regard to whether integration of new technology into Microsoft's PC operating system products is, as a general proposition, suitable or beneficial. Such determinations would have been more appropriate during the liability phase, in conjunction with the balancing of the pro- and anticompetitive benefits of technological binding or "integration," whereas a determination regarding the propriety of "integration" is not called for at this late stage in the proceeding. Instead, it is sufficient to note that the appellate court rejected Judge Jackson's broad condemnation of Microsoft's technological binding or "integration" as a violation of *§ 2*.

[66] "Default" in this context indicates that in some of the circumstances where the Windows operating system would invoke some aspect of browsing functionality, it would automatically rely upon the browsing functionality provided by IE, without first seeking input from the user.

access" which includes indirect invocation of a particular functionality as inadequately tailored to meet the circumstances of this case. *See* *Microsoft, 253 F.3d at 107*.

More appropriately tailored is a remedy which provides OEMs and ISVs with a substantial degree of confidence that a particular Microsoft functionality can be replaced with a non-Microsoft functionality. The remedy acknowledges that Microsoft may, in some instances, override the OEM's or end user's designation of a non-Microsoft Middleware Product when there exist "valid technical reasons," while simultaneously seeking to minimize the occasions when such an override occurs. *See* Appendix A, Part I.B. In his discussion of **[**234]** end-user access, Judge Jackson observed that "if OEMs removed the most visible means of invoking Internet Explorer, and pre-installed Navigator with facile methods of access, Microsoft's purpose in forcing OEMs to take Internet Explorer--capturing browser usage share from Netscape--would be subverted." *Findings of Fact,* 84 F. Supp. 2d at 59, P 203. In order to ensure that the free choice of third-party middleware is protected against subversion, the Court's remedial decree imposes a requirement that, in any instance where a Microsoft operating system launches a "Microsoft Middleware Product," [67] in its full form, rather than within another portion of the operating system, end users and OEMs must be afforded the opportunity, via an unbiased mechanism, to designate a nonMicrosoft middleware product that will launch in place of the "Microsoft Middleware Product." Such a provision enables the ready substitution of third-party products for functionality which would otherwise have been provided by the "middleware" functionality incorporated into Microsoft's operating system and encourages the installation and ultimately, the consumer use of third-party "middleware." *See* Appendix A, Part I.B.

[235]** A remedy which provides the ability to replace "middleware" functionality, which has been included in Microsoft's operating system products, offers protection beyond the mere cessation of the conduct which gave rise to the liability in this case. The appellate court did not enter any findings of liability with regard to whether Windows provided a means by which Microsoft functionality incorporated into the operating system could be readily replaced by third-party software. *See generally* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. In fact, the appellate court rejected liability for the aspect of Windows' design which provided for only the partial replacement of Microsoft browsing technology with third-party browsing technology. *Id. at 67*. Regardless, the Court considers the extension of the remedy beyond the specific liability findings in this instance to be appropriate, as such extension will help to "pry open to **[*162]** competition a market that has been closed by defendant's illegal restraints." *Int'l* *Salt, 332 U.S. at 401*.

Conversely, the Court regards a remedy which imposes more severe requirements with regard to the provision of "defaults," such as **[**236]** that proposed by Plaintiffs, as an unjustified regulation of Microsoft's product design. In particular, the Court has found that a remedy which adopts Plaintiffs' treatment of defaults would likely require the complete redesign of Microsoft's Windows product or, at the very least, vast amounts of design work by Microsoft. *See* Appendix A, Part I.B. Plaintiffs have failed to present evidence that such redesign would bring great returns, or any returns for that matter, in the form of increased competition within the monopolized market. *Id.* In fact, Plaintiffs have failed to present any economic analysis to support this provision in their remedy proposal, which would result in the complete modularization of Microsoft's operating system products. *Id.* On the present record, therefore, the Court declines to impose more sweeping regulation of Microsoft's product design with regard to the availability of replaceable defaults.

Notwithstanding the imposition of an affirmative measure to further competition, in order to respect the carefully drawn boundaries of liability, the Court, of necessity, will preserve Microsoft's ability to override the designation of third-party software **[**237]** (in place of Microsoft middleware functionality present in the operating system) where the third-party software fails to implement a reasonable technical requirement. *See* *Microsoft, 253 F.3d at 67*. Further unfettering the market, the Court will curtail any abuse of this freedom by requiring Microsoft to provide the relevant technical reasons, *in writing*, promptly upon the request of any ISV. The provision of this information will assist ISVs in designing their products so as to avoid any such overrides and thereby reduce the anticompetitive

[67] As noted earlier in this Opinion, the Court's remedial decree adopts the definition of "Microsoft Middleware Product" provided in Microsoft's remedy proposal. *See supra* Part III.B.

effect caused by the override. *See* *Microsoft, 253 F.3d at 65* ("Because the override reduces rivals' usage share and protects Microsoft's monopoly, it too is anticompetitive."), *Microsoft, 253 F.3d at 67* ("As for . . . causing Windows to override the user's choice of a default browser in certain circumstances[,] . . . . Microsoft may not be held liable for this aspect of its product design.").

In conjunction with the decision to impose a remedy that secures the removability of enduser access to certain Microsoft technologies, permits replacement of Microsoft technology with third-party technology, and provides more general flexibility to OEMs to **[**238]** configure Microsoft's operating system products, the Court must ensure that OEM (and consumer) choices in this regard are not devalued by other aspects of Microsoft's product design and configuration. For example, OEM configuration and removal of end-user access will be of little use in the promotion of non-Microsoft middleware if Microsoft is free to design its product to override the configuration before the end-user has an opportunity to utilize the settings. *See* Appendix A, Part I.B. Accordingly, the Court shall prohibit Microsoft from designing its operating system product so as to induce reconfiguration of an OEM's or consumer's formatting of icons, shortcuts, and menu entries in an attempt to favor Microsoft's own software. Pursuant to the Court's remedial decree, any Microsoft-invited alteration of preferences must be presented via an unbiased mechanism and only after the end-user has had sufficient time to utilize the PC as configured by the OEM. Moreover, any Microsoft-invited alteration of OEM configuration may not be imposed in such a manner so as to harass or coax the end user into accepting the alteration. Given the neutrality of the invitation to **[*163]** alter settings and **[**239]** the ability to retrieve the settings, the Court does not regard the amount of time during which Microsoft may not invite the consumer to alter his or her settings to be particularly significant. *Id.* In the absence of substantial evidence to the contrary or in support of a more viable alternative, the Court determines that two weeks following the initial boot-up shall be a sufficient amount of time during which to prohibit a neutral invitation to alter the configuration of the desktop. *Id.*

C. Additional Protection for OEM Flexibility

Because the OEM channel is such a significant channel of distribution for middleware, *Microsoft, 253 F.3d at 61*, the remedy in this case can further unfetter the market from the effects of Microsoft's unlawful anticompetitive behavior by protecting OEMs from retaliation by Microsoft based upon an OEM's support for alternative middleware or operating systems. [68] Given the power wielded by a monopolist like Microsoft, in the absence of protection against retaliation and threats of retaliation, industry participants whose survival hinges on their relationship with such a monopolist will be reluctant to exercise the **[**240]** new-found freedoms offered by the remedy in this case. *See* Appendix A, Part III. In addition, the OEM flexibility guaranteed by other portions of the remedial decree has the potential to lose its effectiveness if Microsoft is not restricted from using its power as a monopolist to coerce OEMs to act for Microsoft's exclusive benefit. *Id.*

The Court finds that protection of industry participants against **[**241]** threats of retaliation will have an effect similar to a ban on actual retaliation and, thus, will further the ultimate goal of promoting competition. *Id.* Microsoft has argued that where the retaliation itself is banned, there is little practical need to protect against threats of retaliation because to carry out the threat would violate the decree. While technically true, this analysis ignores the power wielded by a monopolist such as Microsoft and the resulting damage which can flow from a mere threat. *Id.* Moreover, the burden rests in the wrong place if Microsoft's competitors are required, when faced with such a threat, to gamble that Microsoft will not carry out the threat because doing so would violate the decree in this case. *Id.* The more prudent course is to enjoin both the threat and the retaliation itself and leave to Microsoft the task of acting carefully so as to ensure that it does not improperly threaten retaliation against other industry participants. *See* *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 265, 90 L. Ed. 652, 66 S. Ct. 574 (1946)* ("The most elementary

---

[68] The liability in this case is clear with regard to Microsoft's history of retaliation and threats of retaliation against other industry participants, such as ISVs and IHVs. *See, e.g.*, *Microsoft, 253 F.3d at 72-74* (discussing Microsoft's dealings with Apple); *Microsoft, 253 F.3d at 77-78* (describing Microsoft's "threat to Intel"). Although Microsoft has a history of retaliation against OEMs, *see, e.g.*, *Findings of Fact,* 84 F. Supp. 2d at 38-43, PP 115-32, such retaliation did not provide a clear basis for liability. *See generally* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*; *see also supra* Part II.B.

conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which **[**242]** his own wrong has created.").

Restrictions on Microsoft's freedom to retaliate or threaten retaliation must be carefully drawn so as not to unduly restrict legitimate business practices. *Id.* Such restrictions can dampen competition, *see* Appendix A, Part III, and thereby violate the principles which guide the imposition of a remedy in antitrust cases. *See* *Ford Motor Co. v. United States, 405 U.S. 562, 573* ("The relief in an antitrust case must **[*164]** be 'effective to redress the violations' and 'to restore competition.'") (quoting *United States v. E.I. Du Pont De Nemours & Co., 366 U.S. 316, 326)*. In particular, the remedy imposed by the Court is fashioned so as to prevent true "retaliation" rather than restrict all forms of action taken by Microsoft which might be characterized as "adverse" to competitors. Indeed, conduct that is in some respect adverse to competitors is almost implicit in the concept of competition. *See* Appendix A, Part III. There is neither justification in the record of this case, nor in the field of ***antitrust law***, for a far-ranging prohibition on conduct adverse to competitors, *id.*, and the Court rejects imposition of such a ban as part of the remedy in this **[**243]** case. However, because retaliation against OEMs for their support of competing products is conduct of the same "type or class," *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 132-33*; *see also* *United States v. Microsoft Corp., 56 F.3d 1448, 1460*, as conduct which was found to be anticompetitive in this case, [69] *see* *Microsoft, 253 F.3d at 77*, and because a ban on retaliation will enable OEMs to take advantage of other freedoms provided by the remedy in this case, *see* *United States v. Bausch & Lomb Optical Co., 321 U.S. 707, 726* ("The test is whether or not the required action reasonably tends to dissipate restraints and prevent evasions."), the Court may properly limit Microsoft's ability to threaten and engage in retaliation against OEMs in certain circumstances.

[244]** Notwithstanding this conclusion, the remedial decree imposed by the Court will permit Microsoft to compensate OEMs based upon the absolute level or amount of the OEM's distribution, promotion, development, and other types of support for a particular Microsoft product. *See* Appendix A, Part III. In other words, Microsoft will be permitted to provide compensation for OEM action which promotes or supports Microsoft products, but Microsoft cannot withhold such consideration or other consideration based upon OEM action which tends to favor non-Microsoft products. While these two goals may appear to be somewhat at odds, the liability in this case all but demands this level of hair-splitting. The appellate court was very clear throughout its opinion that ***HN26***[] "the antitrust laws do not condemn even a monopolist for offering its product at an attractive price," even where the monopolist offers valuable consideration in the form of technical information and "bounties." *Microsoft, 253 F.3d at 67, 68* . [70] In addition, evidence presented during this phase of the proceeding emphasizes that there are often instances where compensation commensurate with the amount of support given **[**245]** to a particular product is not only a routine business practice, but it is "obviously beneficial." *See* Appendix A, Part III. The Court recognizes that, in the absence of some condition of fixed percentages **[*165]** or exclusivity, an attractive pricing scheme will not be condemned as anticompetitive and, indeed, may have procompetitive advantages. Based upon this recognition, the Court regards it as inappropriate for the remedy in this case to entirely prohibit Microsoft's ability to compensate OEMs commensurate with the actual level of OEM support of the Microsoft product.

[246]** Further protection for OEMs as a middleware channel of distribution is available through the implementation of uniformity in the licenses Microsoft provides in the monopoly market. *See* Appendix A, Part II. As evidenced by their respective remedies, the parties on both sides of this case acknowledge that uniformity in the Windows operating system licenses will bolster the protections for middleware in the OEM channel of distribution.

---

[69] Retaliation or other forms of adverse action against industry participants for their support of products which compete with other product lines offered by Microsoft that are substantially unrelated to the monopoly market in this case, such as handheld devices and the like, *see supra* Part III.B-C, are too far removed from the liability in this case to be treated as "of the same type or class" as the illegal conduct in this case. *Zenith Radio, 395 U.S. at 132-33*.

[70] As illustrated in other portions of the appellate court's opinion, it is the conditioning of the receipt of consideration upon some degree of exclusivity which raises antitrust concerns. *See, e.g.*, *Microsoft, 253 F.3d at 75* ("Again, we reject the District Court's condemnation of low but non-predatory pricing by Microsoft. To the extent that Microsoft's First Wave Agreements with the ISVs conditioned receipt of Windows technical information upon the ISVs' agreement to promote Microsoft's JVM exclusively, they raise a different competitive concern.").

[71] **[**248]** *Id.* The parties' respective proposals for uniform licenses for Windows operating system products are remarkably similar, with each requiring uniformity in the terms and conditions of the licenses for the twenty OEMs with the highest volume of Windows operating system licenses. *Id.* Both proposed remedies further provide, in broad terms, [72] that a royalty schedule must be established, pursuant to which Microsoft may opt to charge a different royalty for different language versions of the Windows operating system and may provide reasonable volume discounts based upon the actual volume of licenses. SPR § 2.a; SRPFJ § III.B. There is little dispute that the imposition of uniformity in licensing will enhance the freedom of OEMs to support **[**247]** non-Microsoft products and thereby further the goal of "achieving freedom from the influence of the unlawful restraint of trade." *Bausch & Lomb, 321 U.S. at 726*.

Given this seeming lack of dispute over the appropriateness of a substantial degree of uniformity in Microsoft's Windows operating system licenses, the Court's remedy will require Microsoft to provide OEMs with such uniformity. However, in recognition of the potential negative side effects of complete uniformity in licensing as attested to by Drs. Murphy and Elzinga, *see* Appendix A, Part II, the uniform licenses mandated by the Court's remedy will allow some divergence in terms depending upon the volume of licenses provided. Specifically, the Court's remedial order will permit reasonable volume discounts based upon the actual volume of licenses for any Windows operating system product.

To further tailor the uniform licensing provision so as to provide OEMs with the greatest security, while minimizing the less desirable collateral effects of uniformity, **[*166]** the Court's order of remedy will not prohibit Microsoft's practice of awarding "market development **[**249]** allowances, programs, or other discounts" ("MDPs"), provided that the award of such benefits is based upon reasonable, objective criteria, which are enforced uniformly and without discrimination. The Court's determination that the remedy should not eliminate Microsoft's ability to offer MDPs reflects the fact that the affirmance of liability in this case by the appellate court did not condemn Microsoft's use of MDPs and, in fact, steadfastly refused to condemn practices which, at their core, "offered a customer an attractive deal." *Microsoft, 253 F.3d at 68*; *see also* *Microsoft, 253 F.3d at 78* ("The only specific acts to which the court refers are Microsoft's expenditures in promoting its browser, which we have explained are not in themselves unlawful.") (internal citation omitted). The Court's determination is further based upon the finding that MDPs are procompetitive in many instances. *See* Appendix A, Part II. Indeed, Plaintiffs' witnesses testified that so long as MDPs cannot be used to improperly influence OEM choices-for example, through discriminatory or retaliatory terms or enforcement-there remains little basis for objection to their use. *Id.* Accordingly, **[**250]** the Court declines to prohibit this legitimate aspect of Microsoft's licensing agreements, but instead shall limit Microsoft's ability to use MDPs to impede competition.

Additional protection for OEMs and their ability to exercise their rights under the remedy imposed in this case can be derived from limited regulation of Microsoft's ability to terminate an OEM's Windows license. The Windows license is fundamental to an OEM's ability to conduct business, and hence, the threat of termination is a powerful tool which Microsoft can utilize to exert undue influence over a particular OEM. *See* Appendix A, Part IV. To leave such a tool available for Microsoft's abuse would detract from the ability of the other provisions of the remedy in this

---

[71] Though not clearly implicated in actions that gave rise to liability addressed by the appellate court, Judge Jackson's *Findings of Fact* reflect that Microsoft manipulated the terms of its license agreements in conjunction with its attempt to quash the middleware threat posed by Navigator. *See, e.g.*, *Findings of Fact,* 84 F. Supp. 2d at 67, P 234 ("In return for Compaq's capitulation and revival of its commitment to support Microsoft's Internet strategy, Microsoft has guaranteed Compaq that the prices it pays for Windows will continue to be significantly lower than the prices paid by other OEMs. . . . Compaq's license fee for Windows is so low that other OEMs would still pay substantially more than Compaq even if they qualified for all of the royalty reductions listed in Microsoft's Market Development Agreements ('MDAs'). What is more, while Microsoft requires other OEMs to verify actual compliance with particular milestones in order to receive Windows 98 royalty reductions, Microsoft has secretly agreed to provide the full amount of those discounts to Compaq regardless of whether it actually satisfies the specified conditions.").

[72] Admittedly, there are minor differences in the two remedies even on these common points. *Compare* SPR § 2.a, *with* SRPFJ § III.B.

case to unfetter the market from Microsoft's illegal monopoly maintenance. *Id.* However, the limitation on Microsoft's ability to terminate an OEM's Windows license must not be so broad as to curb Microsoft's ability to enforce its intellectual property rights such that the terms of the license are rendered meaningless. *Id.* As a result, Microsoft shall not be permitted to terminate an OEM's license without having first provided the OEM with **[**251]** notice and opportunity to cure. When Microsoft has provided two such notices, Microsoft may terminate the license without any further notice or opportunity to cure. This limitation on Microsoft's ability to terminate an OEM's Windows license appropriately provides additional protection to OEMs, further securing the likelihood that they will engage in vigorous competition. *Id.* Importantly, however, this limitation does not interfere significantly with Microsoft's legitimate business practices. *Id.* The Court further concludes that the addition of a requirement that Microsoft may terminate only for "good cause" is unnecessary as termination of a license for an improper purpose, such as retaliation, is prohibited by other portions of the Court's remedy. *Id.* In this regard, the Court observes that, in the event that Microsoft terminates a license in the absence of "good cause," such termination will likely be subject to careful scrutiny to ensure that Microsoft has not terminated an OEM license for a purpose inconsistent with the terms of the final judgment.

D. Other Participants in the Ecosystem

1. Ban on Retaliation

The factual and liability findings **[**252]** in this case evidence a practice by Microsoft **[*167]** of threatened and actual retaliation against Apple and Intel, each of which is both a hardware vendor and software developer, *Microsoft, 253 F.3d at 71* (Apple), *Findings of Fact,* 84 F. Supp. 2d at 34, P 95 (Intel), for engaging in action which promoted or supported non-Microsoft middleware. *See, e.g.*, *Microsoft, 253 F.3d at 72-73* (discussing Microsoft's dealings with Apple); *Microsoft, 253 F.3d at 77* (describing Microsoft's "threat to Intel"). [73] The immediate and most apparent remedy for this anticompetitive conduct is a prohibition on Microsoft's ability to retaliate not only against these particular firms, but generally against software developers and hardware vendors. *See* Appendix A, Part III. As with the prohibition on retaliation against OEMs described above, the Court must tailor any prohibition on retaliation against ISVs and IHVs to address actions which are of the same type or class as that which was found to be in violation of the antitrust laws, while still preserving Microsoft's ability to engage in legitimate competitive conduct that is only remotely related to the relevant anticompetitive conduct. **[**253]** In this regard, the Court again determines that a prohibition on all action "adverse" to industry participants "based upon" their support for competing products is not sufficiently tailored to address the conduct found to be anticompetitive. *Id.* Such a broad prohibition threatens to eliminate conduct which may have significant procompetitive value. *Id.*

[254]** Similarly too, the prohibition on retaliation for the support of competing products must be tied to the monopoly market in this case and cannot appropriately prohibit Microsoft from engaging in conduct in markets unrelated to the monopoly market. As previously noted, ***HN27***[] this Court is "not at liberty to enjoin 'all future

---

[73] The appellate court devoted a section of its analysis to Microsoft's treatment of Intel in response to Intel's development of a "high performance, Windows JVM," *Microsoft, 253 F.3d at 75* (quoting *Findings of Fact,* 84 F. Supp. 2d at 107, P 396), recounting the numerous ways in which Microsoft "pressured Intel not to support cross-platform Java," *Microsoft, 253 F.3d at 77*. Microsoft's pressure in this regard was based upon the threat to the Windows monopoly posed by cross-platform Java. *Id.* The appellate court found Microsoft's pressure tactics to be clear in their anticompetitive effect and wholly without procompetitive justification. *Microsoft, 253 F.3d at 77-78*. Because of the exclusionary effect of Microsoft's threats to Intel, which Microsoft "lamely characterized . . . as 'advice,'" the appellate court deemed Microsoft's conduct in this context to violate *§ 2* of the Sherman Act. *Id.*

In a similar section, the appellate court examined Microsoft's dealings with Apple, which included an agreement by Apple not to "position icons for nonMicrosoft browsing software on the desktop of new Macintosh PC systems or Mac OS upgrades," as well as an agreement prohibiting Apple from "encouraging users to substitute another browser for IE." *Microsoft, 253 F.3d at 73* (quoting *Findings of Fact,* 84 F. Supp. 2d at 95-96, PP 350-52). These promises not to support competing products had the effect of exclusivity, the anticompetitive effect of which was unmitigated by procompetitive justification. *Microsoft, 253 F.3d at 73-74*. In the absence of procompetitive justification, the appellate court deemed this conduct to violate *§ 2* of the Sherman Act. *Id.*

violations of the antitrust laws, however unrelated to violations found by the court,'" *Microsoft, 56 F.3d at 1460* (quoting *Zenith Radio, 395 U.S. at 132-33*), nor is the Court at liberty to "interfere with ordinary commercial practices," *Bausch & Lomb, 321 U.S. at 728*, even where those practices are malicious and injurious to particular competitors, *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225*. While retaliation is an unsavory method of competition which the Court does not condone, the liability ascribed to Microsoft for its threats of retaliation directed at Intel and Apple will not support broad regulation of *any* Microsoft **[*168]** conduct, though it might be characterized as retaliatory, in markets wholly unrelated to the monopoly market, particularly where Microsoft's dominance in such markets, or lack thereof, **[**255]** has not been assessed. The mere fact that particular conduct can be characterized as retaliation does not necessarily render such conduct sufficiently related to the liability in this case so as to justify inclusion of such conduct in the remedy. *See* Appendix A, Part III. To be sufficiently related to the liability in this case, a ban on retaliation must have some nexus to the monopoly market identified for purposes of this proceeding. *See* *Microsoft, 56 F.3d at 1460*.

By utilizing the term "competes" in the remedial decree, the Court's prohibition on retaliation for the support of non-Microsoft software is broad, but still reflective of the necessary nexus. For example, inasmuch as a server operating system serves as a platform for applications running "for" the PC, in a manner similar to true middleware, the server operating system can be said to "compete" with Microsoft's PC operating system software. *See supra* Parts III.B.3.a, III.C.1. In this regard, then, the Court's remedy extends well beyond the specific targets of Microsoft's previous retaliation, to provide forward-looking protection for any firm that produces software or hardware posing any competitive **[**256]** threat to Microsoft's monopoly in the market for Intel-compatible PC operating systems.

Further, like the ban on retaliation against OEMs, the prohibition on Microsoft retaliation against ISVs and IHVs for their support of platform software that competes with Microsoft's PC operating system software will prohibit threats of retaliation, which have the capacity to chill ISV and IHV support for competing products even where the retaliation itself is prohibited. *Id.* Such protection is particularly appropriate given that both examples of Microsoft's retaliatory conduct against IHVs and ISVs during the liability phase concerned threats of retaliation. *Microsoft, 253 F.3d at 73* (describing a call from Mr. Gates to Apple's CEO "to ask 'how we should announce the cancellation of Mac Office'") (quoting *Findings of Fact,* 84 F. Supp. 2d at 95, P 349); 77 (describing Microsoft's "threat to Intel").

2. Agreements Limiting Support for Competing Products

In a related vein, but specific to ISVs, the appellate court affirmed the district court's finding of liability with respect to the effectively exclusive nature of the "First Wave Agreements." The First Wave Agreements "required developers **[**257]** to make Microsoft's JVM the default in the software they developed" to the exclusion of the Sun-compliant JVM. *Microsoft, 253 F.3d at 75*. The appellate court found that the agreements had the effect of "foreclosing a substantial portion of the field for JVM distribution" and were without procompetitive justification. *Microsoft, 253 F.3d at 76*. In response to this finding of liability, the Court's remedy will preclude Microsoft from entering into agreements predicated upon an ISV's promise to refrain from developing, promoting, or distributing any software which competes with the platform capabilities of Microsoft software. Such a provision will ensure that Microsoft is unable to chill the development of competing software products which may provide a platform for PC applications. *See* Appendix A, Part V.A.

Inherent in such a remedy provision, however, exists a danger that a blanket ban on agreements predicated on a promise not to support a competing product will interfere with collaborative ventures between Microsoft and ISVs. *Id.* It is often the case that, in conjunction with a joint venture or work-for-hire agreement, the **[*169]** parties of the venture agree not **[**258]** to compete with the scope of the venture. *Id.* This type of agreement provides the participants to the venture some assurance that their respective efforts will be used collaboratively, as the agreement intends, rather than competitively. *Id.* Such collaborative ventures foster the advancement of technology, promoting innovation and ultimately competition. *Id.* Because a remedy which "dampens . . . technological innovation would be at cross-purposes with ***antitrust law***," *United States v. Microsoft Corp., 147 F.3d 935, 948*, and because Plaintiffs have not offered any valid justification for prohibiting such agreements, the remedy in this case is carefully tailored so as not to hinder Microsoft's ability to enter into legitimate joint ventures and work-for-hire agreements. In particular, the remedy imposed by the Court will reserve for Microsoft the ability to limit an ISV's support for a competing platform product where such limitation is reasonably necessary and of a reasonable scope and duration in relation to the contractual obligation of the ISV to support Microsoft's software or to jointly develop software for Microsoft.

3. Exclusive Agreements

In two different portions **[**259]** of its opinion, the appellate court considered the exclusive effect of the First Wave Agreements Microsoft entered into with ISVs, and in each portion, the appellate court determined that the exclusive effect of the agreements violated *§ 2* of the Sherman Act. *Microsoft, 253 F.3d at 71-74* (discussing the effect of the agreements upon Navigator), *Microsoft, 253 F.3d at 75-76* (discussing the effect of the First Wave Agreements upon Java). Elsewhere in its opinion, the appellate court examined Microsoft's exclusive agreement with Apple and determined that the agreement violated *§ 2* of the Sherman Act. *Microsoft, 253 F.3d at 72-74*. In yet another portion of its opinion, the appellate court considered Microsoft's exclusive agreements with internet access providers and determined that these too violated *§ 2* of the Sherman Act. *Microsoft, 253 F.3d at 67-71*. Considering as a whole Microsoft's treatment of these segments of the industry, it is appropriate to curtail sharply Microsoft's capacity to extract promises of exclusivity or support of a Microsoft product in a fixed percentage. Nevertheless, even where a broad prohibition on exclusive deals with multiple industry participants is justified **[**260]** by the findings of liability, the Court must take care not to ban those fixed-percentage and exclusive agreements that serve a procompetitive purpose. *See* *Microsoft, 253 F.3d at 69*. Some types of fixed-percentage and exclusive agreements may be beneficial to other participants in the ecosystem and often fall outside of the parameters of anticompetitive conduct. *See* Appendix A, Part V.B. Indeed, even in its condemnation of Microsoft's exclusive agreements, the appellate court noted that exclusive contracts themselves are not without their usefulness, *Microsoft, 253 F.3d at 69*, and are "commonplace--particularly in the field of distribution--in our competitive, market economy," *Microsoft, 253 F.3d at 70*.

Accordingly, the Court's remedial decree will limit Microsoft's ability to enter into agreements in which the other party agrees to support Microsoft's operating system products exclusively or in a fixed percentage. This provision will address those industry participants with whom Microsoft entered into unlawful and anticompetitive exclusive agreements, namely ISVs, IAPs, and OEMs, as well as those industry participants, such as ICPs and IHVs, **[**261]** who are ready targets for the imposition of similarly unlawful exclusive agreements. The extension of this prohibition beyond ISVs, IAPs, and OEMs, and beyond agreements concerning Web browsers and Java, to any software which competes **[*170]** with the platform capabilities of Windows, will serve to "uproot all parts of [the] illegal scheme--the valid as well as the invalid--in order to rid the trade or commerce of all taint." *United States v. Paramount Pictures, Inc., 334 U.S. 131, 148*.

While furthering the effort to "uproot" all of Microsoft's illegal conduct and conduct similar thereto, the Court will again tailor its prohibition on Microsoft's use of exclusive and fixed percentage agreements so as to permit those agreements which are beneficial to competition, but might otherwise have been prohibited by a blanket ban. In particular, in recognition of the benefit to technology and to competition derived from cooperative agreements between industry participants, *see* Appendix A, Part V.B., the Court's remedy takes pains not to discourage Microsoft from entering into legitimate joint ventures and joint development agreements. In this regard, Microsoft will have some limited ability to prohibit **[**262]** competition with the object of the joint venture or joint agreement, where both parties have contributed significant resources to the venture. In addition, because the goal of this remedy provision is to curtail the exclusive effect of fixed percentage agreements, the remedy imposed by the Court will not prohibit fixed percentage agreements where there is evidence, in the form of a good faith representation from the other party to the agreement, that the fixed percentage will *not* have an exclusive effect. *See id.*

In addition, the Court's remedy balances the need not to discourage Microsoft from entering into procompetitive licenses for the use of third-party technology against the competitive advantages to be gained by limiting Microsoft's imposition of exclusivity terms in its other agreements with industry participants. The Court's remedy, therefore, permits Microsoft to include a term of exclusivity in conjunction with an intellectual property license. However, the Court observes that a broad authorization to include a provision of exclusivity in all agreements in which Microsoft licenses intellectual property from a third party would invite circumvention of the prohibitory **[**263]** portion of the remedy. To do so, Microsoft need only add to its agreements with industry participants an unnecessary license of intellectual property and thereby garner exclusion of the agreement from the purview of the prohibitory portion of the decree. *See id.* Rather than foster such an outcome, the Court will permit inclusion of an exclusivity provision in such agreements only in limited circumstances. In particular, Microsoft's ability to impose an exclusive term in an agreement in which Microsoft licenses intellectual property shall be limited to agreements wherein the license of the third-party technology constitutes the principal purpose of the agreement.

4. Agreements Regarding Placement on the Desktop

In the case of IAPs, the appellate court condemned Microsoft's contracts which extracted from IAPs a promise of exclusivity-meaning a promise to refrain from and/or sharply limit promotion or distribution of a non-Microsoft Web browser in exchange for prominent placement of the IAP's product in the configuration of the Windows operating system. *Microsoft, 253 F.3d at 68-71*. The Court's order of remedy will address this holding in two ways. First, **[**264]** the provision described above, which provides a general prohibition on Microsoft's ability to enter into agreements with a wide variety of industry participants, including IAPs, predicated upon a promise of exclusive support for a Microsoft product, will be restricted. *See supra* Part IV.D.3. In addition, the Court's remedy will include a provision which addresses the particular means of leverage **[*171]** Microsoft used to induce IAPs to enter into these agreements; namely, special placement on the desktop or elsewhere in Microsoft's PC operating system products of a visible means of end-user access to the third-party product. Therefore, the remedy imposed by the Court will prohibit Microsoft from granting special placement within the Windows operating system on the condition that the IAP refrain from supporting software that competes not only with Microsoft's Web-browsing technology, but also with a number of technologies incorporated into Windows that have middleware characteristics such that they are properly treated as "Microsoft Middleware." *See supra* Part III.B-C. This extension beyond a promise not to compete with Microsoft's Web-browsing functionality reflects an extension of **[**265]** the remedy beyond the specific liability findings to address conduct which is of the "same type or class" as the conduct which was found to be anticompetitive. *Zenith Radio, 395 U.S. at 132-33*.

In a further extension beyond the specific parameters of liability in this case, notwithstanding the fact that the appellate court declined to impose liability for Microsoft's similarly exclusive agreements with ICPs, the Court will extend to ICPs the protections afforded to IAPs in this portion of the remedy. This extension is justified, in particular, because ICPs are similarly susceptible to the influence of prominent placement in the Microsoft PC operating system products, *Findings of Fact,* 84 F. Supp. 2d at 45, 87-88, PP 139, 313-17.

E. Explicitly Forward-Looking Remedies

The parties' remedy proposals in this case reflect an agreement that effective interoperation between the software running on two or more devices will play an integral role in the successful emergence of new software products and platforms and that fostering such interoperation is an appropriate remedial objective in this case. *See* SPR § 4; SRPFJ § III.D-E. This view is consistent with the case law, *Zenith Radio, 395 U.S. at 133*; **[**266]** *United States v. United States Gypsum Co., 340 U.S. 76, 89*, so long as ***HN28***[] the "forward-looking" nature of the remedy is not so expansive as to be unduly regulatory or provide a blanket prohibition on all future anticompetitive conduct. *See Zenith Radio, 395 U.S. at 133*. The Court agrees that the goal of facilitating interoperation between Microsoft's PC operating system products and third-party middleware, as well as between Microsoft's PC operating system products and third-party server operating systems, is consistent with the goal of "ensuring that there remain no practices likely to result in monopolization in the future." *United States v. United Shoe Machinery Corp., 391 U.S. 244, 250*.

The remedy proposals implicitly recognize that the key to interoperation between software products and the devices upon which they run rests with the ability to utilize effectively the APIs exposed by a particular software product. *See* SPR § 4; SRPFJ § III.D. Likewise the proposals acknowledge that the disclosure of the specific method of communication between PCs and servers will foster interoperation between the two. Such interoperation, in turn, will advance the ability of the server operating system to serve **[**267]** as a middleware-like platform upon which applications can run "for" the PC. Accordingly, both proposed remedies recommend the mandatory disclosure of certain Microsoft APIs, technical information, and communications protocols for the purposes of fostering interoperation.

1. API Disclosures (Interoperation between Windows and Microsoft Middleware)

The remedy imposed by the Court with regard to the disclosure of APIs will require **[*172]** Microsoft to disclose those APIs, along with related technical information, which "Microsoft Middleware" utilizes to interoperate with the Windows platform. [74] To repeat what is, by now elemental, Plaintiffs proceeded to trial on the theory that Microsoft had acted anticompetitively in an effort to boost its own middleware and stifle rival middleware because those products posed a potential "platform threat." Because the hallmark of the platform threat is the ability to operate on multiple platforms, the disclosure of the interfaces and related technical information relied upon by Microsoft's own middleware fosters the ability of rival middleware platforms to work well with the ubiquitous Windows. The ready ability to interoperate with the already **[**268]** dominant operating system will bolster the ability of such middleware to support a wide range of applications so as to serve as a platform. *See* Appendix A, Part VI. In this regard, the API disclosures mandated by the Court's remedy will further the remedial goal of restoring competition to the market. *Ford Motor Co., 405 U.S. at 573*; *see also Int'l* *Salt, 332 U.S. at 401*. Furthermore, the disclosures can help to ensure that developers of rival middleware platforms are not disadvantaged, with respect to Microsoft's own middleware developers, in their ability to create products that interoperate with the Windows operating system. *See* Appendix A, Part VI. Such disclosures have the potential to increase the ability of competing middleware to threaten Microsoft's PC operating system monopoly. Disclosures of APIs relied upon by Microsoft software beyond these parameters will not be required because, as discussed in greater detail below (and *supra* Part III.B-C), such disclosures are unrelated to the basis for liability and have not been shown to advance the objectives of a remedy in this case.

2. Communications Protocols (Interoperation **[**269]** ***Between PC Operating Systems and Server Operating Systems)***

The remedy imposed by the Court will mandate disclosure and licensing of protocols used by clients running on Microsoft's Windows operating system to interoperate with Microsoft servers. As the Court concluded *supra*, Parts III.B.3.a, III.C.1, server operating systems can perform a function akin to that performed by traditional middleware because they provide **[**270]** a platform for applications running "for" use on a PC. The mandatory disclosure of the communications protocols relied upon by Microsoft's PC operating system to interoperate with its server operating systems will advance the ability of non-Microsoft server operating systems to interoperate, or communicate, [75] with the ubiquitous Windows **[*173]** PC client. Advancement of the communication between non-Microsoft server operating systems and Windows clients will further the ability of these non-Microsoft server operating systems to provide a platform which competes with Windows itself. *See* Appendix A, Part VI. Through the disclosure of select communications protocols, the Court's remedy extends to the most apparent frontier in "platform" threats to Microsoft's PC operating system monopoly. *Id.* Far from seeking to "return the market to the status quo ante," *Ford Motor Co., 405 U.S. at 573 n.8*, this aspect of the Court's remedy contributes to the elimination of the consequences of Microsoft's illegal conduct, *Nat'l Soc'y Prof'l Eng'rs v. United States, 435 U.S. 679, 698*.

---

[74] The Court determined *supra*, Part III.B.3.a, that the term "interoperate" encompasses a continuum, rather than an absolute standard of information exchange. *See also* Appendix A, Part VI.A. Because Microsoft's disclosure obligations in this portion of the Court's remedial decree are fixed by the definition of "API" and are merely circumscribed by the requirement that the disclosures be provided for the "sole purpose of interoperating," the Court does not limit the definition of "interoperate" to any particular degree of interoperation within the reasonable scope of the continuum.

[75] Recalling again that the term "interoperate" captures a continuum, rather than an absolute standard, *see supra* Part III.B.3.a., in the mandating the disclosure of communications protocols relied upon by Windows clients to interoperate natively with Microsoft servers, the Court's remedial decree utilizes a very simple definition of the term which is intended to capture the reasonable spectrum of the continuum. Hence, the Court's remedial decree requires that Microsoft disclose communications protocols necessary for a Windows client to "interoperate, *or communicate*, natively" with a Microsoft server. *See* Appendix B.

[271]** In all likelihood, the requirement that Microsoft disclose and license the communications protocols utilized by its PC operating systems to communicate with Microsoft's servers is the *most* forward-looking provision in the Court's remedy. *See supra* Parts III.B.3.a, III.C.1. Importantly, however, pursuant to the Court's remedial decree, Microsoft need only disclose and license those protocols which are supported "natively" by Microsoft clients and, hence, do not require the addition of software code to the client in order to interoperate. This limitation is appropriate given the market in this case-Intel-compatible personal computer operating systems. Interoperation made possible by software added onto Microsoft's PC operating system products is less clearly related to the facts of this case because it expands beyond the relevant market of Intel-compatible PC operating systems to address the ability of an *application* to interoperate with a server. Having concluded that such interoperation bears an insufficient nexus to the market in which liability was imposed, the Court need not address non-native interoperation in its remedy. *See supra* Part III.B-C.

3. Plaintiffs' [**272] Flawed Arguments for Overly Broad Disclosures

a. Insufficient Connection to the Liability Findings

Extending their arguments in favor of broader disclosures, Plaintiffs contend that Microsoft will hinder interoperability between clients and servers, as well as between non-PC devices, by the use of its own proprietary technology. The Court addressed the two underlying premises of Plaintiffs' arguments in this regard, *supra* Part III.B-D, in conjunction with the Court's determination of the proper scope of the remedy in this case. The Court first determined that interoperation between devices outside of the PC-to-server/network computing context is too far removed from the theory of liability in this case and that addressing such segments of computing via the remedy would be inappropriate and unjustified given the liability imposed in this case. *See supra* Part III.B-C. The Court next determined that Plaintiffs' attempt to link interoperability as a general concept to the findings of liability in this case is similarly flawed. *See supra* Part III.D. As the Court's conclusion with regard to the latter of these points addresses a significant portion of Plaintiffs' **[**273]** evidence, it bears repeating at this juncture.

Plaintiffs urge the Court to order vast disclosures and royalty-free licensing of technical information based upon their assertion that Microsoft intends in the future, and has previously taken action, to impede developers attempting to achieve cross-platform interoperability by the adoption of proprietary protocols instead **[*174]** of industry standard protocols, through the proprietary extension of industry standards, and through the non-disclosure of certain technical information. [76] *See, e.g.*, Pl. Prop. Findings of Fact PP 169-78. As the Court recounted above, Plaintiffs support their request for such disclosures with testimony describing numerous instances in which Microsoft has implemented proprietary technology much to the consternation of its competitors. *See supra* Part III.D. At their core, Plaintiffs' allegations with regard to Microsoft's conduct in the area of interoperability are new allegations of anticompetitive conduct. *Id.* As such, these allegations must be subjected to the rigorous four-part test outlined by the appellate court in this case before the Court can find that Microsoft's conduct violates ***antitrust law*** **[**274]** and demands a remedy. *See supra* Part II.A.3 (describing four-part test); *see also supra* Part III.D; *Microsoft, 253 F.3d at 58-59*.

Plaintiffs insist that the Court can remedy Microsoft's conduct relating to industry standards, interoperation, and information disclosure in the absence of any such balancing of anticompetitive effect against procompetitive justification because **[**275]** Microsoft's conduct with regard to this technical information is closely related or "the same or similar" to the conduct which gave rise to liability in this case. While the Court does not quibble with the notion that a remedy can address conduct beyond the specific acts found to be anticompetitive, Plaintiffs are unable to establish a satisfactory link between the interoperability disclosures they seek and the liability in this case. *See supra* Part III.D; *see also* Appendix A, Part VI. The Court fails to see the necessary relationship between any

---

[76] Plaintiffs further argue that broad interoperability disclosures are necessary to "lessen the potential that Microsoft will be able to lock in developers, consumers, and businesses through undisclosed proprietary interfaces and protocols." Pl. Prop. Finding of Fact P 629. This justification for broad interoperability disclosures is flawed, as it is essentially a new, and vastly unsupported, allegation of attempted monopolization, or a resurrection of the previously Courtrejected "monopoly leveraging" argument. *See supra* Part III.C; *Microsoft, 1998 U.S. Dist. LEXIS 14231, 1998 WL 614485* (D.D.C. Sept. 14, 1998), at *26-28.

conduct which gave rise to liability in this case and Plaintiffs' allegations of Microsoft's new "bad" acts relevant to communications protocols and other industry standards. Plaintiffs' reliance upon old "bad" acts is similarly unavailing. Plaintiffs cite to factual findings entered during the liability phase of the case which conclude that Microsoft selectively disclosed technical information to third parties, but cannot identify any liability sustained by the appellate court which flows directly from these findings. *See, e.g.*, Pl. Prop. Findings of Fact PP 171-72.

Plaintiffs make a better argument regarding the relationship **[**276]** between new examples of "selective disclosure of technical information" and liability finding related to the "First Wave Agreements," as these agreements included the promise of technical information in exchange for exclusivity in browser distribution. *Microsoft, 253 F.3d at 71-72*. This argument, however, also falls short. Tellingly, the appellate court sustained liability for this action only upon a finding that the exclusivity provision in the First Wave Agreements foreclosed a substantial share of the market and thereby had a substantial effect upon the market. *Microsoft, 253 F.3d at 72*. Therefore, it is not the preferential provision of technical information that the appellate court condemned, but the exclusive effect of the agreements. *Id.*; *see also supra* Part III.D.

Similarly, the extension of industry standard protocols and the use of proprietary technology could be said to bear a limited **[*175]** connection to the imposition of liability for Microsoft's deception of software developers regarding the Windows-specific nature of its Java development tools. *Microsoft, 253 F.3d at 76-77*. Still, the appellate court's focus in this context concerned deception, rather **[**277]** than the "incompatibility with Sun's cross-platform aspirations for Java [which was] no violation to be sure." *Microsoft, 253 F.3d at 76*. Bearing a far clearer relationship to Microsoft's alteration of industry standards and use of proprietary technology is the appellate court's rejection of liability for Microsoft's development of its own, incompatible, non-crossplatform, JVM. *Microsoft, 253 F.3d at 74-75*.

Plaintiffs' theory of a close relationship between this new "bad" conduct and liability is significantly flawed by the appellate court's explicit rejection of liability for conduct similar to this allegedly "bad" conduct now identified in the context of communications protocols and industry standards. *Id.* The appellate court carefully weighed each action taken by Microsoft for anticompetitive effect and procompetitive justification and in doing so, the appellate court refused to paint liability with broad strokes. The appellate court instead considered the precise effect of each Microsoft action. In short, Plaintiffs fail entirely to recognize the appellate court's refusal to condemn Microsoft's proprietary extensions and alterations, even where such extensions and alterations **[**278]** hindered interoperability and the development of cross-platform products.

Once again, the Court acknowledges that ***HN29***[] it has the power to prohibit "admittedly valid parts of an invalid whole," *Bausch & Lomb, 321 U.S. at 724*; *see also* *Paramount Pictures, 334 U.S. at 148*, where such prohibition will further eradicate the harmful effects of the anticompetitive conduct. The Court disagrees, however, that Microsoft's practice of utilizing undisclosed proprietary extensions of communications protocols and its similar use of proprietary technology can be accurately characterized as a part of the conduct which gave rise to the imposition of liability in this case. Plaintiffs' concern with Microsoft's use of proprietary technology is substantially more far reaching and is, at best, tangentially related to the provision of technical blandishments in exchange for a promise of exclusivity or a limited instance of Microsoft deception regarding a particular Microsoft technical implementation. *See supra* Part III.D. As a result, the Court declines to address this new conduct on the grounds that it more closely resembles the basis for a new allegation of anticompetitive **[**279]** conduct than a mere extension or "part" of conduct previously deemed to violate ***antitrust law***.

Stripped of the support drawn from Plaintiffs' flawed view of the technologies which properly may be characterized as middleware concordant with the liability phase and Plaintiffs' allegations of new anticompetitive conduct in the area of interoperation, Plaintiffs' plea that the Court impose a remedy broadly facilitating interoperation in markets unrelated to the monopoly market is without basis. Even confined to the parameters identified by the Court; namely, interoperation between Windows and "Microsoft Middleware" and interoperation between Windows and Microsoft server operating systems, Plaintiffs' expansive interoperability disclosures are largely unjustified and present a host of problems which warrant their rejection by the Court. *See* Appendix A; Part VI.

b. Harmful Effects of Cloning

Over-broad disclosure, such as that proposed by Plaintiffs, must also be avoided because it will likely enable wholesale copying or cloning of Windows without **[*176]** violating Microsoft's intellectual property rights. *See id.* By cloning, the Court means the creation of a piece of software **[**280]** which replicates the functions of another piece of software, even if the replication is accomplished by some means other than the literal repetition of the same source code. *Id.* In most instances, where a clone is created without a copyright violation, the clone emerges from a process of reverse engineering-which consists of the study of functionality in the original product and the attempt to produce a product which accomplishes the same end. *Id.* The process of cloning the functionality of a competitor's product is usually an expensive and timeconsuming undertaking which, if successful, will enable the cloned product to function as a replacement for the original product. *Id.* To impose a remedy which facilitates the cloning of Microsoft's products-a far simpler task than the creation of a new product-would provide a windfall to Microsoft's competitors. *Id.*

Plaintiffs have been very clear that they seek to terminate the "vicious cycle" of Microsoft dominance in the operating system market by "enabling would-be competitors to support some of the thousands of applications created for Windows." Pl. Prop. Findings of Fact P 608. Plaintiffs explain that this goal can be **[**281]** achieved by providing competing software platform developers with sufficient disclosures to provide a substitute, or clone, platform that exposes the same APIs as those which are exposed by Windows. *Id.* Although innocently characterized by Plaintiffs as mere "interoperation" between devices, the evidence establishes that, rather than achieving the goal of "interoperation" as it is understood by most in the industry, and discussed by the Court *supra* in Part III.B.3.a, Plaintiffs seek to achieve a result of perfect interchangeability. *See* Appendix A, Part VI.A. In other words, Plaintiffs seek the disclosure of vast amounts of technical information for purposes of enabling the creation of functional substitutes for various pieces of Microsoft's products. *Id.* The result Plaintiffs envision is nothing other than cloning, which itself is not necessarily "bad" or illegal-but in this Court's view-is not a legitimate goal for the remedy in this case.

Plaintiffs fail entirely to offer economic evidence to support the enabling of the wholesale cloning of Microsoft's PC operating system or virtually any other Microsoft software product. None of the economists who testified, including **[**282]** Plaintiffs' own economist, Dr. Shapiro, could find any economic benefit to or justification for enabling the cloning of the Windows platform. *Id.* In fact, Dr. Shapiro testified that, even in the context of this proceeding, Microsoft has a legitimate interest in protecting itself against the cloning of its products by competitors. *Id.* To broadly enable the cloning of Microsoft's operating system and portions thereof, as well as Microsoft products unrelated to Microsoft's monopoly, runs contrary to the theory of protection of intellectual property rights. In general, the protection of intellectual property rights encourages innovation by rewarding the innovator's investment in creating something new, while making the innovation available to the public. *See* *Kewanee Oil Co. v. Bicron Corp., 416 U.S. 470, 480, 40 L. Ed. 2d 315, 94 S. Ct. 1879 (1974)*. To enable the cloning of Microsoft's products sets this scheme askew by denying Microsoft the returns from its investment in innovation and effectively divesting Microsoft's intellectual property of its value. *See* Appendix A, Part VI. Such a scheme inherently decreases both Microsoft's incentive to innovate as well as the incentive for other software **[**283]** developers to innovate, since they can simply create clones of Microsoft's technology. *Id.* In addition, the homogeneous **[*177]** set of features that would result from the broad availability of Microsoft product clones would defeat some aspects of competition. *See id.*

Plaintiffs' demand for extensive technical information for the purpose of fostering Plaintiffs' skewed view of "interoperation" would provide an unearned windfall to Microsoft's competitors and an unjustified divestiture of Microsoft's intellectual property. *Id.* These undesirable results are not countervailed by evidence that such a remedy would foster competition in the monopolized market. *Id.* To the contrary, the cloning of Microsoft's technology carries the potential to hinder some aspects of competition and discourage innovation. As ***antitrust law*** does not exist for the protection of competitors, but for the protection of competition, the Court does not regard this end as a legitimate one. *See* *Brown Shoe Co. v. United States, 370 U.S. 294, 320*.

c. Harmful Effects of Disclosing Internal Interfaces Beyond the Court's concern with cloning, the Court rejects any definition of the parameters of API disclosure **[**284]** which would risk disclosure of an inordinate number of internal interfaces. Microsoft's PC operating systems, like most software, have numerous "internal" interfaces, meaning interfaces that are not documented and disclosed for use by applications. *See* Appendix A, Part VI. There exist a number of technical justifications for operating system vendors to decline to make such internal interfaces public. *Id.* For example, internal interfaces remain internal so that the software developer has the freedom to modify the interface over time. *Id.* Once the interface is disclosed, the developer effectively has a contract with other software developers, who might rely on the interface, that the interface will not be changed. *Id.* Hence, the disclosure of interfaces which the developer intended to maintain internally threatens to stifle innovation and product flexibility. *Id.* In addition, internal interfaces are often unstable, meaning that they will not perform effectively when relied upon by third-party applications. *Id.* The Court finds that there is sufficient harm which flows from the mandated disclosure of a vast quantity of internal interfaces which is not countermanded **[**285]** by competitive benefit such that it is best not to require Microsoft to disclose a multitude of internal interfaces. Accordingly, the Court declines to adopt a remedy provision requiring the extensive disclosure of internal interfaces.

4. Reasonable, Non-Discriminatory Licenses

Although the Court has rejected Plaintiffs' request for the broad disclosure of technical information relating to Microsoft's products, the Court's remedial decree will require Microsoft to make more limited disclosures of APIs, communications protocols, and related technical information in order to facilitate interoperation. Such information constitutes valuable Microsoft intellectual property-one of Microsoft's primary assets. *See* Appendix A, Part VII. Plaintiffs take the view that Microsoft should not be permitted to charge a reasonable royalty in exchange for the license of its intellectual property. [77] To require Microsoft to license intellectual property in the absence of a reasonable royalty, as Plaintiffs suggest, constitutes a **[*178]** divestiture of one of Microsoft most valuable assets. *Id.* Such a divestiture is only appropriate where Plaintiffs have adduced evidence of "a clearer indication **[**286]** of a *significant causal connection* between the conduct and . . . maintenance of the market power." *Microsoft, 253 F.3d at 106* (emphasis in original). Plaintiffs have failed to provide the Court with any such evidence. *See* Appendix A, Part VII. As a result, the Court remains unconvinced that the causal connection between the anticompetitive conduct and Microsoft's continued dominance in the Intel-compatible PC operating system market supports a divestiture remedy. *See* *Microsoft, 253 F.3d at 107*. Moreover, given the indirect connection between the interoperability portions of the remedy and the liability findings in this case, there is very little justification for transforming the most forward-looking portion of the remedy into a drastic structural remedy.

[287]** Nevertheless, the Court recognizes that the effectiveness of the disclosure provisions in the Court's remedy is dependent upon the provision of the relevant technical information on terms which are consistent with the goal of fostering competition. In this regard, the Court must restrict the terms of the mandatory license so as to ensure that the goal of the remedial provision is not thwarted by discriminatory or oppressive license terms. Accordingly, the Court shall prohibit Microsoft from imposing unreasonable or discriminatory license terms, but shall permit Microsoft to require a reasonable royalty for the licenses necessary to exercise the rights guaranteed by the final judgment. The reasonableness standard is appropriate and likely necessary in this context because it avoids "involving the judiciary in the administration of intricate and detailed rules" relating to specific licenses. *Paramount Pictures, 334 U.S. at 163* ("The judiciary is unsuited to affairs of business management . . . ."). At the same time, however, the requirement of reasonableness imposes upon Microsoft an objective standard which curtails Microsoft's ability to manipulate the terms of the **[**288]** intellectual property licenses in an attempt to circumvent the licensing and disclosure mandates of the remedial decree.

5. Protection Against Hackers, Viruses, and Piracy

Despite mandatory disclosure of technical information, it is appropriate to protect Microsoft and, more importantly, consumers, against disclosures which would assist hackers enable the creation of harmful viruses, and promote piracy. *See* Appendix A, Part VIII. Hackers and viruses pose threats both to consumers, as well as to Microsoft's

---

[77] The combination of Plaintiffs' unjustifiably broad disclosure provision and the royaltyfree license would effect a drastic expropriation of substantial amounts of Microsoft's intellectual property in the absence of *any* compensation to Microsoft and despite the absence of additional evidence of a causal connection.

business, while piracy protection recognizes Microsoft's copyrights and its subsequent entitlement to protect itself from copyright violation. *Id.* Protection against these threats is appropriate in the context of a remedy and must be factored into any decree. However, these protections must be sufficiently limited so as not to eliminate the value in the above-described disclosure provisions by allowing Microsoft to withhold information selectively and for its own benefit. Balancing the potential benefit of the disclosure provisions in the Court's remedy against the likely harm which could be caused by allowing this information to fall into the wrong hands, the **[**289]** Court's remedy will exempt certain material from disclosure in order to preserve the security of Microsoft products against hackers and viruses. Similarly, Microsoft will not be forced to disclose valuable information to firms with a history of piracy, so long as Microsoft does not use claims of piracy as a means by which to discriminate.

In providing a security exemption for some of the disclosures required by the **[*179]** Court's remedial decree, the Court rejects Plaintiffs' witnesses' criticisms of Microsoft's model for ensuring security for users of its software. *See* Appendix A, Part VIII. These criticisms of Microsoft's security model misunderstand the purpose of this proceeding. The task presently before the Court is not the redesign of Microsoft's products to conform to Plaintiffs' views regarding what product design would be best for consumers and competitors alike. Rather, this Court's sole concern is to craft an effective remedy to redress Microsoft's antitrust violations identified by the appellate court and restore competition to the monopolized market. *Int'l* *Salt, 332 U.S. at 400-01*. Even in an antitrust suit, there is little justification, and even less **[**290]** desire, to extend this Court's judgment to issues of product design. *Microsoft, 147 F.3d at 948*; *see also* *Bausch & Lomb, 321 U.S. at 728*. Having credited the testimony of Microsoft's witnesses regarding the need for a security exemption, *see* Appendix A, Part VIII, the Court will permit Microsoft to forego its obligations to disclose and license certain technical information where the disclosure of such information would compromise the security of particular installations of Microsoft's software products. Additionally, as there is no benefit to be derived by advancing the improper interests of industry participants who fail to respect the intellectual property laws, the Court will not require Microsoft to disclose technical information to entities who are, or are likely to be, seeking such information for an improper purpose.

F. Compliance and Enforcement Provisions

The parties have differing visions of the most effective manner of enforcement of the injunctive decree entered as the remedy in this case. The scheme envisioned by Plaintiffs is marked by its reliance upon a special master, appointed pursuant to *Rule 53 of the Federal* ***[**291]*** *Rules of Civil Procedure*. SPR § 18. ***HN30***[] *Rule 53* generally empowers the Court to appoint a special master, with the following proviso:

> A reference to a master shall be the exception and not the rule. In actions to be tried by a jury, a reference shall be made only when the issues are complicated; in actions to be tried without a jury, save in matters of account and of difficult computation of damages, a reference shall be made only upon a showing that some exceptional condition requires it.

Fed. R. Civ. P. 53(b). The D.C. Circuit has interpreted this portion of *Rule 53* strictly, holding that ***HN31***[] the presence of "some deep technological issue" related to interpreting a decree alone is not sufficient to render the issue "complicated" pursuant to *Rule 53*. *Microsoft, 147 F.3d at 954-55*. Moreover, the D.C. Circuit has expressed disfavor for appointment of a special master in antitrust cases, though they are undoubtedly complex, because such complexity itself "is an impelling reason" for an experienced trial judge rather than a "temporary substitute appointed on an *ad hoc* basis" to preside over the issue presented therein. *Id. at 955* (quoting **[**292]** *La Buy v. Howes Leather Co., 352 U.S. 249, 259, 1 L. Ed. 2d 290, 77 S. Ct. 309 (1957))* (quotation marks omitted). Additionally, the D.C. Circuit clearly stated that references to special masters are improper where the master is called upon to determine the rights of the parties, rather than to enforce such rights. *Microsoft, 147 F.3d at 954*. In this regard, the appellate court has likened assessment of rights under a remedial decree to contract interpretation, a matter reserved for the trial judge. *Id.*

Plaintiffs envision the special master in a role which assumes a number of significant **[*180]** functions. Plaintiffs' proposal provides broadly that the special master is empowered to "monitor Microsoft's compliance with [the remedial decree] including taking all acts and measures he or she deems necessary or proper for the efficient performance of the special [m]aster's duties." SPR § 18.b. The special master in Plaintiffs' proposed remedy is specifically charged with receiving third-party complaints regarding Microsoft's compliance with the remedial decree. *Id.* § 18.f. Thereafter, pursuant to a strict time schedule, the special master is obliged to "determine if an investigation is warranted." *Id.* **[**293]** Should the special master decide to investigate, again pursuant to a stringent time schedule, the complainant and Microsoft are each required to file any documentation and argument on the issue with the special master, who will then schedule and conduct a hearing. *Id.* Within fifteen days of such hearing, the special master must file with the Court its report of factual findings and a proposed order. *Id.*

In light of the applicable law, the Court harbors serious concerns as to the propriety of Plaintiffs' proposed use of a special master. Plaintiffs fail to explain how, in assessing Plaintiffs' or a third party's complaint for merit, the special master will not determine the rights and obligations of the parties under the final judgment in this case-a role reserved exclusively for the district court. To empower the special master to engage in a determination of rights and obligations contravenes the parameters of appropriate use of a special master, as set forth by the D.C. Circuit. *Microsoft, 147 F.3d at 954*. Accordingly, the Court concludes that Plaintiffs' proposed use of a special master to enforce the final judgment entered in this case is legally improper.

[294]** Even if the Court were confident that Plaintiffs' proposed use of a special master was legally sound, such a conclusion would not allay the Court's remaining concerns with regard to the logistical difficulties in Plaintiffs' special master proposal. Most troubling to the Court is the manner in which Plaintiffs propose to abdicate responsibility for enforcement of the remedial decree. [78] The first significant aspect of this abdication is the effective provision of enforcement authority to third-parties. Plaintiffs have gone to great lengths to ensure that third-parties have access to the enforcement mechanisms so that such third parties can bring issues to the attention of Microsoft and the Court. As originally proposed, Plaintiffs do not involve themselves in the process of assessing and addressing the complaints of third-parties. Instead, Plaintiffs leave that role to the special master, who is responsible for filtering third-party complaints and assessing their merit. In their Proposed Findings of Fact, Plaintiffs offer an amendment **[*181]** which would inject Plaintiffs into the process by requiring them to determine whether they support further investigation of a third-party complaint. **[**295]** Pl. Prop. Findings of Fact P 1391. This determination, however, does not bind or even influence the special master's assessment of the need for investigation. Accordingly, even if amended as Plaintiffs belatedly suggest, Plaintiffs' remedy proposal remains structured such that Plaintiffs will play a limited and non-integral role in enforcement of the remedial decree.

[296]** In the Court's view, Plaintiffs, having initiated and litigated this suit, are the proper parties to evaluate complaints by non-parties regarding alleged violations of the Court's decree. While there is no inherent flaw in giving third parties a voice in this process, as very often such third parties will be most immediately aware of Microsoft's conduct, non-parties should not be allowed direct access to the enforcement mechanisms. Rather, if Plaintiffs want to rely upon the assistance of third parties in monitoring Microsoft's compliance with the Court's decree, it is appropriately Plaintiffs' duty to assess the assertions of such third parties for merit.

In a related vein, the Court perceives discord between the notion that the same individual is to be responsible for the initial screening of complaints of non-compliance, the investigation of such complaints, and the initial

---

[78] Of additional concern to the Court is the schedule pursuant to which the special master would be required to proceed through his or her many duties. The Court finds this schedule to be rigid and inflexible, as it does not take into account the volume of complaints which the special master must assess, or the degree of complexity of the issues raised in these complaints. The Court is cognizant of the need for expediency in resolving complaints of non-compliance and lauds Plaintiffs' attempt to ensure their prompt resolution. Still, the Court remains unconvinced that Plaintiffs' desire for structure and certainty has materialized into a workable scheme. Accordingly, the Court declines to adopt the stringent deadlines proposed by Plaintiffs for the resolution of complaints of non-compliance. Mindful of the rapid pace of change in the industry and the harm which will be caused by violations of the Court's remedial decree, the Court assures the parties that complaints of non-compliance will be handled by the Court with the understanding that time is of the essence.

adjudication of the merits of such complaints. Plaintiffs have, in effect, charged the special master with the duties of detective, prosecutor, and judge. The Court has little faith that such a scheme would prove to be workable in practice. In addition, in response to the Court's concern regarding the absence **[**297]** of any provision permitting alternative dispute resolution, Plaintiffs have proposed to empower the same special master as mediator. Pl. Prop. Findings of Fact P 1393. This proposal, in the Court's view, serves only to compound the problem of the special master proposal, not resolve it, by adding "mediator" to the already present special master duties of detective, prosecutor, and judge. Plaintiffs propose a special master as a panacea that will relieve them of the burden of enforcing the decree for which they so tirelessly fought and will relieve the Court of the burden of assessing complaints of noncompliance . In short, the Court views such wholesale reliance upon a special master as not only improper, but unworkable.

Plaintiffs' proposal for a special master also presumes that Microsoft will constantly fail to be in compliance with the decree, requiring the persistent involvement of a special master to receive complaints and adjudicate compliance issues. [79] The Court neither agrees, nor sees the basis for this presumption. Generally, courts presume that parties will adhere to orders of the Court. In this case, the Court has taken great care to provide the parties with a decree **[**298]** which is unambiguous in its terms so as to ensure that Microsoft's compliance is readily achieved. Microsoft requested as much, Tr. at 4984 (Gates), and the law demands such an outcome. *Int'l* Salt, 332 U.S. at 400; *see also* Fed. R. Civ. P. 65(d). The decree adopted by the Court, to borrow Mr. Gates' words, provides "clarity of [Microsoft's] obligations that allows [the company] to direct [its] **[*182]** employees . . . to steer absolutely clear of ever violating one of these things." Tr. at 4984 (Gates). Of course, if Microsoft finds itself repeatedly unable "to steer absolutely clear" of violating the decree, the occasion may arise when a special master's assistance would be appropriate. *Id.* If such an occasion should arise, the Court will revisit the issue. Nevertheless, the Court declines, at this juncture, to appoint a special master.

[299]** The remedy in this case will charge Plaintiffs with the obligation of monitoring Microsoft's compliance. While Plaintiffs may rely upon the views of third parties to guide them in this task, the duty of enforcement belongs to Plaintiffs. To ease the burden on the Court and on Microsoft in addressing Plaintiffs' concerns, the Court will require Plaintiffs to form a committee to coordinate enforcement of the remedial decree. Such a committee will serve to minimize duplication of enforcement activities and requests of the Court and Microsoft.

Beyond the special master provision of Plaintiffs' proposed remedy, the parties' proposed remedial decrees differ in that Microsoft's proposal provides for a largely independent "technical committee" responsible for monitoring enforcement, reporting to Plaintiffs, and facilitating to a 1995 consent decree with the Department of Justice in which Microsoft was alleged to have violated the decree. Although a contempt proceeding commenced, Microsoft was ultimately absolved of the contempt charge because the relevant portion of the decree was found to be ambiguous. *See* Microsoft, 331 U.S. App. D.C. 121, 147 F.3d 935. dispute resolution. SRPFJ § IV.B, D. Plaintiffs **[**300]** have been unwaveringly critical of Microsoft's proposal for a technical committee. *E.g.*, Pl. Prop. Findings of Fact PP 1380-87. As the technical committee provision exists largely to assist Plaintiffs in enforcing the provisions of the final judgment in this case, if Plaintiffs do not want to rely upon a technical committee, the Court sees little reason to require them to do so. Accordingly, the Court declines to appoint a technical committee in the form proposed by Microsoft.

The remaining enforcement provisions in the parties' respective remedy proposals, as Plaintiffs readily acknowledge, are not widely divergent. For example, both suggest a requirement that Microsoft employ an officer with duties to ensure Microsoft's compliance with the decree. Despite this general similarity, however, the parties envision a conceptually different role for the compliance officer. Plaintiffs envision the compliance officer as a high-level Microsoft employee who retains a significant amount of autonomy and independence from the corporation. As a result, the compliance officer position proposed by Plaintiffs is appointed by a committee comprised of at least three members of the Microsoft board **[**301]** of directors who are neither present, nor former, Microsoft employees. SPR § 17.a-b. The compliance officer in Plaintiffs' proposal is protected against abrupt termination by a

---

[79] Plaintiffs have not directed this Court to any evidence that Microsoft has a history of non-compliance with judicial decrees. In this regard, the Court notes that Microsoft was a party

provision which permits removal only by the Chief Executive Officer of Microsoft with the concurrence of the committee that appointed the officer. *Id.* § 17.d. The compliance officer reports to the Chief Executive Officer and to the committee which appointed him or her. *Id.* § 17.b. In addition, Plaintiffs' proposed compliance officer is responsible for reporting to Plaintiffs regarding Microsoft's compliance with the Court's remedial decree. *Id.* § 17.c.

In contrast, while the compliance officer position proposed by Microsoft has similar duties to those identified in Plaintiffs' proposed remedy, the role of the compliance officer is more clearly that of a Microsoft employee, rather than a semi-independent monitor. As a result, Microsoft's proposed enforcement provision does not specify the details of the compliance officer's hiring or termination. SRPFJ § IV.C. Likewise, the Microsoft version of the compliance officer is not required to report on compliance matters to Plaintiffs. *Id.*

[*183] While **[**302]** either provision would likely prove to be workable in practice, the Court sees merit in the safeguards of impartiality imposed by Plaintiffs' version of a compliance officer. Of course, Microsoft is always free, and even encouraged, to dedicate additional employees, whose role more closely resembles that suggested by Microsoft's proposed remedy, to perform additional compliance functions. Such dedication, however, will not alter the compliance officer's responsibilities.

The Court remains concerned, however, with the particular aspect of Plaintiffs' remedy proposal requiring the compliance officer to deliver a copy of the order of remedy in this case to, and obtain a certification of understanding and compliance from, "each officer, director, and Manager, and each platform software developer and employee involved in relations with OEMs, ISVs, IHVs, or Third-Party Licensees." SPR § 17.c.i. In contrast, Microsoft's remedy proposal requires the compliance officer to distribute the decree to and obtain a similar certification of understanding and compliance only from Microsoft's officers and directors. SRPFJ § IV.C.3. The Court finds this aspect of Plaintiffs' proposal to be largely **[**303]** unnecessary and somewhat at odds with Plaintiffs own emphasis on the extent to which Microsoft's "senior executives . . . were actively involved in and/or directed conduct found to be anticompetitive." Pl. Prop. Findings of Fact P 1326. Plaintiffs have not identified any evidence which indicates that lower-level employees were responsible for Microsoft's illegal acts and strategies. In light of this absence of evidence, there seems little justification for requiring each such employee to certify compliance with the remedial decree in this case and risk contempt for violation of the decree. Far more appropriate is to charge Microsoft's directors and officers with ensuring that their business strategy, as implemented by their subordinates in the corporate structure, does not violate the Court's remedial decree. Moreover, to the extent that such lower-level employees engage in conduct which violates the Court's remedial decree, Microsoft, as a corporation, will remain liable for such violation. Accordingly, the remedy imposed in this case will not require the over-broad certification of compliance by subordinate employees proposed by Plaintiffs.

Reflecting the similarities in the remaining **[**304]** portions of the two proposed remedial decrees, the remedy adopted by the Court will provide Plaintiffs, acting only after consultation with their enforcement committee, reasonable access to Microsoft's source code, books, ledgers, accounts, correspondence, memoranda, and other correspondence, access to Microsoft employees for interview, and the right to request and receive written reports from Microsoft on any matter contained in the Court's remedial decree. Plaintiffs will, of course, be bound to limit any use of information obtained through these means for the purpose of ensuring Microsoft's compliance with the remedial decree, or as otherwise required by law. Similarly, should information and documents provided to Plaintiffs be subject to disclosure to a third party, Microsoft will not be deprived of the opportunity to claim protection pursuant to *Federal Rule of Civil Procedure 26(c)(7)*.

G. Term of the Decree

Evidence on the subject of the proper term for the Court's behavioral remedy in this case is sparse and largely unenlightening. *See* Appendix A, Part IX. One fact, however, is abundantly clear from the record: there exists substantial uncertainty as to the **[**305]** future demands of the software industry. Due to rapid pace of change in this arena, it is particularly difficult in this case to predict what effect **[*184]** the present remedy will have a decade from now. The appellate court voiced precisely this concern in its opinion last August:

> By the time a court can assess liability, firms, products, and the marketplace are likely to have changed dramatically. This, in turn, threatens enormous practical difficulties for courts considering the appropriate measure of relief in equitable enforcement actions, both in crafting injunctive remedies in the first instance and reviewing those remedies in the second. Conduct remedies may be unavailing in such cases, because innovation to a large degree has already rendered the anticompetitive conduct obsolete (although by no means harmless).

Microsoft, 253 F.3d at 49.

There is little dispute that many of the acts which gave rise to the imposition of liability in this case have long since ceased. Similarly, there is no dispute that the industry at issue in this case is remarkable for its constant and rapid change. Nevertheless, Plaintiffs argue that the "there is no reason for an **[**306]** effective forward-looking remedy to depart from the standard 10-year term of antitrust decrees." Pl. Prop. Concl. of Law at 79. In making this assertion, Plaintiffs place substantial importance upon the contention that ten years is the "standard" in antitrust decrees. Plaintiffs derive this "standard" argument from the fact that ten years is the "standard term for antitrust consent decrees" entered into by the Antitrust Division of the United States Department of Justice. Pl. Prop. Findings of Fact P 1441 (emphasis added). While the Court has not doubt that the official policy of the Antitrust Division is both logically and legally sound, the Court is neither bound, nor persuaded by Plaintiffs' reliance upon Antitrust Division policy to justify the ten-year term of their proposed decree.

Imposing a remedy in this case is not unlike trying to shoe a galloping horse. Were the Court to impose a ten-year term, it is likely that, by the latter half of the term, the market will have long since sent the horse to pasture in favor of more advanced technology. Thus, although the remedy crafted by the Court is undoubtedly forward-looking, it is beyond the capacity of this Court, counsel, or **[**307]** any witness, to craft a remedy in 2002, for antitrust violations which commenced in the mid-1990s, which will be appropriately tailored to the needs of a rapidly changing industry in 2012. An antitrust decree should endure only so long as necessary to ensure competition. The Court is unconvinced that the imposition of a decree for greater than five years will further that goal. Accordingly, the Court's remedial decree will persist for five years from its effective date. As an incentive for Microsoft to comply with the terms of the decree, however, the Court specifically reserves the right to extend the term of the decree for up to two years upon a finding that Microsoft has engaged in a pattern of willful and systemic violation of the Court's decree.

H. Other Provisions in Plaintiffs' Proposed Remedy

Plaintiffs' remedy proposal includes a number of provisions that the Court has considered but rejected variously as unsupported by the evidence, unconnected to the appellate court's findings of liability, or potentially harmful to the industry and to consumers. In the following paragraphs, the Court sets forth more specifically the fatal flaws in these portions of Plaintiffs' **[**308]** proposed remedy. In particular, the Court emphasizes, where applicable, the absence or inadequacy of an economic analysis of the effect of a particular remedy **[*185]** proposal. Where a remedy inflicts drastic change upon Microsoft or its products that is likely to broadly affect the industry, as well as consumers, the complete absence, or gross inadequacy, of an economic analysis of the impact of the provision upon competition is conspicuous and troubling.

1. Open-Source IE and Mandatory Auction of Office

Two sections in Plaintiffs' proposed remedy suggest a divestiture of two of Microsoft's most valuable assets, IE and Microsoft Office. Plaintiffs fail entirely to justify the inclusion of these purportedly "innovative" provisions. *See* Appendix A, Part X.A. First and most striking, the theory pursuant to which Plaintiffs propose these provisions ignores the theory of liability in this case. The divestiture provisions serve to directly benefit non-Microsoft operating systems, in particular Linux and Apple. It is well recognized that the theory of liability in this case concerns Microsoft's response to cross-platform applications, not operating systems, that displayed the potential **[**309]** to offer platform services such that their popularity would greatly simplify the porting of applications *en masse* from operating system to operating system. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. To offer a remedy which directly benefits other operating systems ignores the direction and impact of Microsoft's anticompetitive behavior and advances a theory of competition discounted during the liability phase of this case. Indeed, Judge Jackson concluded, and Plaintiffs do not dispute, that the naturally existing applications barrier to entry hindered the ability of Apple and Linux to compete with Windows. *Findings of Fact,* 84 F. Supp. 2d at 22, PP 47, 50,51 . The district court did not conclude that Microsoft engaged in any anticompetitive action which directly hindered these operating systems' ability to compete with Windows; instead, that difficulty existed as a function of the *applications* barrier to entry. [80] The harm-if any-to competing operating systems is indirect, arising from the unfulfilled potential of middleware to reduce the applications barrier to entry. Given these facts, it is difficult to understand what role the bolstering of particular operating systems will play in redressing **[**310]** anticompetitive conduct directed at middleware.

Similarly antithetical to the goal of the remedy in this case is the fact that the divestiture remedies relevant to IE and Microsoft Office proposed by Plaintiffs will provide significant benefit to competitors, but have not been shown to benefit competition. *See* Appendix A, Part X.A. It is fundamental that "the antitrust laws . . . were enacted for 'the protection of *competition*, not *competitors*.'" *Cargill Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 110* (quoting *Brown Shoe, 370 U.S. at 320*) **[**311]** (emphasis in original); *see also* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488*. Rather than rectify injury to consumers caused by diminished competition, Plaintiffs' proposed divestitures of IE and Office merely serve to shield Microsoft's competitors from the rigors of the marketplace. [81] *See* Appendix A, Part X.A.

[*186] Finally, the Court concludes **[**312]** that these proposals, as divestitures of Microsoft's primary asset-intellectual property-are "structural remedies" as discussed by the appellate court. *See id.*; *Microsoft, 253 F.3d at 105-06*. The appellate court advised that where the Court was unconvinced of the causal connection between the conduct found to be anticompetitive and the company's position in the relevant market, "it may well conclude that divestiture is not an appropriate remedy." *Microsoft, 253 F.3d at 107*. In this instance, not only is the Court unconvinced that there exists a sufficient relationship between the liability findings and this aspect of the proposed remedy, but the Court is unable to conclude that Plaintiffs have sufficiently bolstered the "causal connection" referenced by the appellate court to justify divestiture, in any form, as an appropriate remedy in this case. *Microsoft, 253 F.3d at 107*. Accordingly, the Court declines to adopt the open-sourcing of IE or the mandatory auction of Office licenses as remedies in this case. *See also* *Yamaha Motor Co. v. Federal Trade Com., 657 F.2d 971, 984* (rejecting injunction on the ground that its provisions extended "beyond any reasonable **[**313]** relationship to the violations found").

2. Ban on Knowing Interference

Citing to the series of new "bad" acts the Court described *supra*, Part III.D, Plaintiffs suggest that the remedy imposed by the Court should prohibit Microsoft from engaging in any action that interferes with the compatibility of a non-Microsoft product and Microsoft Windows or other Microsoft software products. SPR § 5. Plaintiffs would exempt from this prohibition action which is justified by "good cause." *Id.* Because the Court has already determined that most of the new "bad" acts identified by Plaintiffs are not appropriately treated as being of the same type or class as those acts which gave rise to the liability in this case, *see supra* Part III.D, imposition of this proposed provision is not justified by the Supreme Court's now familiar holding in *Zenith Radio, 395 U.S. at 133*. Furthermore,

[80] Although Microsoft's dealings with Apple did play a role in the imposition of liability, the act for which Microsoft was found to have violated *§ 2* concerned Microsoft's targeting of Navigator, rather than Microsoft's direct competition with Apple. *Microsoft, 253 F.3d at 72-74*. Microsoft's conduct relating to Apple was found to be anticompetitive because it excluded Navigator from a significant portion of the market. *Microsoft, 253 F.3d at 73-74*.

[81] In particular, Plaintiffs' counsel offered the argument that the divestiture of IE was an appropriate remedy based upon the theory that it is the "fruit" of Microsoft's illegal conduct. *See* Pl. Prop. Findings of Fact P 1116 (citing *Microsoft, 253 F.3d at 103*). Neither the evidentiary record from the liability phase, nor the record in this portion of the proceeding, establishes that the present success of IE is attributable entirely, or even in predominant part, to Microsoft's illegal conduct. *See* Appendix A, Part X.A. Accordingly, the Court rejects Plaintiffs' argument that IE should be divested as the "fruit" of Microsoft's illegal conduct.

Plaintiffs have not established that a ban on "knowing interference" will foster competition in the monopolized market or among software with the capacity to threaten Microsoft's monopoly. *See* Appendix A, Part X.C.

Of greatest concern to the Court, however, is the interference **[**314]** with Microsoft's product design that is invited by the proposed provision. *Id.* Enforcement of the provision would engage the Court in an analysis of whether "good cause," as a technical matter, existed for Microsoft's product design decisions. The evidence indicates that such a provision, because of its breadth and potential ambiguity, has the potential to hinder technological innovation. *Id.* Heeding the admonition that courts should not involve themselves in product design and that hindrance of technological innovation contravenes the purposes of ***antitrust law***, *Microsoft, 147 F.3d at 948*, the Court rejects Plaintiffs' proposed ban on "knowing interference" with compatibility.

3. Support for Predecessor Versions

Plaintiffs also propose a remedy provision requiring Microsoft to maintain full support and licensing for immediate predecessors to the most recent version of **[*187]** its Windows operating system. Plaintiffs argue that such a provision will encourage the customization of versions of Windows by ensuring that Microsoft will not undermine such customization with new releases of its operating system. Not only did the Court find Plaintiffs' concern **[**315]** in this regard to be without basis in fact, *see* Appendix A, Part X.D, but the Court has already concluded that customization will not be mandated by the remedy in this case, *see supra* Part IV.A. As the Court discussed *supra* Part IV.A, a remedy in this case that forces Microsoft to permit "drastic alteration" of its copyrighted work runs afoul of the appellate court's opinion that Microsoft did not act anticompetitively in restricting such alteration. *Microsoft, 253 F.3d at 63*. Furthermore, support for predecessor versions was shown to have a great likelihood of imposing significant costs upon Microsoft, slowing the pace of development, reducing beneficial network effects, and increasing consumer confusion. *See* Appendix A, Part X.D. The slowing of innovation cannot be squared with the objectives of ***antitrust law***. *Microsoft, 147 F.3d at 948*. Because there is no evidence that the benefit to competition would outweigh any of the substantial costs of such a provision and given the absence of a connection between this aspect of Plaintiffs' proposed remedy and the liability findings in this case, *see* Appendix A, Part X.D, the Court rejects **[**316]** mandatory support of predecessor versions of Windows as a remedy. *Ford Motor Co., 405 U.S. at 573* (holding that antitrust relief should "restore competition"); *see also* *Yamaha Motor, 657 F.2d at 984*.

4. Ban on Contractual Tying

Plaintiffs suggest that the remedy in this case should include a provision which bans Microsoft from conditioning the grant, to any species of licensee, of a Windows license upon an agreement to license, promote, distribute, or otherwise support, a Microsoft middleware product. The broad ban proposed by Plaintiffs is not directly connected to any finding of liability. Rather, the ban appears more appropriate as a remedy for a finding of § 1 liability for the illegal tying of products. The appellate court rejected a *per se* analysis for tying in this case and accordingly, reversed the district court's imposition of § 1 liability for the integration of Windows and IE. *Microsoft, 253 F.3d at 84-95*. In doing so, the appellate court noted that there are often efficiencies and other benefits to be gained from a tie. *Microsoft, 253 F.3d at 87-88*. The complete ban on contractual tying proposed by **[**317]** Plaintiffs not only ignores this significant observation, but it proceeds as if *per se* liability had been imposed for Microsoft's integration of IE and Windows. In this regard, the proposed ban on contractual tying is wholly unrelated to any finding of liability affirmed by the appellate court in this case.

Plaintiffs do not offer sufficient evidence to explain the benefit to competition to be gained by this regulation of predominantly, if not entirely, lawful conduct. *See* Appendix A, Part X.E. The evidence presented to the Court establishes that tying in the software market often produces a benefit to consumers. *Id.* Consequently, a ban on *all* such tying will not benefit consumers. *Id.* Because Plaintiffs have not shown that a blanket ban on all contractual tying of products to Windows will benefit competition, and because it appears that such a ban has the likelihood of harming consumers, the Court determines to exclude any such provision from the remedy in this case.

5. Ban on Retaliation for Participation in This Case

Plaintiffs propose that the remedy imposed by the Court should regulate Microsoft's conduct with regard to participants **[*188]** in this lawsuit **[**318]** and the suit simultaneously filed by the United States against Microsoft. Although touted as a ban on retaliation, Plaintiffs' proposal is written far more broadly, applying to "any action adversely affecting [participants]. . . based directly or indirectly, in whole or in part, on . . . participation" in this litigation. SPR § 9; *see* Appendix A, Part X.F. As a practical matter, the Court observes that almost any action contrary to the interests of the multitude of Microsoft competitors that participated in this litigation could be subject to a claim that such action was "based on" participation in this litigation. *See id.* Undoubtedly, competitors regularly engage in action adverse to one another without violating the law, or even widely accepted norms of business ethics. Given the breadth of conduct implicated in Plaintiffs' proposed provision, the Court has little doubt that such a ban would curtail significant amounts of legitimate conduct and subject Microsoft to countless accusations of improper "adverse[]" action arising out of such legitimate conduct. *Id.*

While the Court by no means condones retaliatory conduct by Microsoft, the Court fails to see the necessity **[**319]** for a provision of the type proposed by Plaintiffs. Plaintiffs have failed to justify this provision with any showing that Microsoft has or would retaliate against the participants in this suit. *Id*. Although the liability in this case demonstrates a consistent practice of retaliation against other industry participants, this retaliation has been confined to Microsoft's response to the business decisions of its competitors. *See* *Microsoft, 253 F.3d at 72-74* (describing Microsoft's threat of retaliation against Appel), *Microsoft, 253 F.3d at 77-78* (describing Microsoft's threat of retaliation against Intel). Indeed, Microsoft has been engaged in litigation in this District for seven years, and Plaintiffs were unable to proffer the testimony of a single witness that his or her firm had actually suffered any adverse action by Microsoft attributable to its participation. Moreover, for the great majority of witnesses who participated in this proceeding, their firms will receive protection from retaliation by Microsoft pursuant to the anti-retaliation provisions described *supra*. [82]

[320]** Having weighed the very limited evidence provided in relation to this portion of Plaintiffs' proposed remedy, the Court finds that the balance of the evidence is grossly insufficient to justify an unmitigated ban on Microsoft taking any action which might be adverse to the multiple participants in this litigation. Based upon these findings, the Court determines that there is no reason to impose such a restriction upon legitimate business conduct. As a ban on adverse action like the one suggested by Plaintiffs would likely inflict greater harm than benefit upon competition, and the ban itself is not connected to any specific conduct by Microsoft which was found to violate ***antitrust law***, the Court finds that this relief is not properly tailored to the liability imposed. *Microsoft, 253 F.3d at 107*.

6. Mandatory Java Distribution

Plaintiffs next propose that Microsoft should be required to distribute a Sun-compliant **[*189]** JVM with each copy of its Windows operating system. This proposed remedial provision is broadly related to the fact that Microsoft's illegal conduct in this case was aimed, in large part, at the Sun-compliant Java platform. *See* *Microsoft, 253 F.3d at 74-78*. **[**321]** Notwithstanding this general connection to the liability phase, the evidence presented by Plaintiffs fails to show that the proposal for mandatory support for Sun-compliant Java would provide a substantial benefit to competition. *See* Appendix A, Part X.G. The evidence does, however, indicate that one of Microsoft's primary competitors, Sun Microsystems, has a vested interest in such a remedy provision and would benefit greatly from the same. *Id.*

---

[82] The only testimony that touched on this topic was the testimony of Anthony Fama, of Gateway. Mr. Fama alleged that Microsoft had "threatened" retaliation against his firm in response to Mr. Fama's participation in this litigation. *See* Appendix A, Part X.F. Although the Court cannot agree with Mr. Fama that Microsoft's conduct was, in fact, a threat, *see id.*, the Court observes that, pursuant to the Court's remedial decree, Gateway will receive protection from any true retaliation or threat thereof which is based upon its support for products competitive with Microsoft's monopoly product, as well as the many other protections afforded to OEMs which the Court described above. The Court regards such protections as entirely sufficient to address the concerns raised by Mr. Fama.

Plaintiffs regard the Sun-compliant Java platform as a significant competitive threat to Microsoft's operating system dominance and view the mandatory distribution of the Suncompliant Java platform as a means by which to bolster the platform's ability to break through the applications barrier to entry and challenge Microsoft's monopoly. In this regard, Plaintiffs contend that the Court's mandate of distribution is necessary, as there is no other means by which Java can achieve sufficient distribution to provide a viable platform. The Court rejects this assertion as unsupported by the record. *See id.* Once Microsoft's anticompetitive restraints on channels of Java distribution are lifted by other portions of the Court's remedy, any **[**322]** continuing lack of industry interest in Sun-compliant Java is not a problem appropriately resolved by this Court in this litigation. It is the problem of a particular competitor and not competition itself and, therefore, not appropriate for redress under ***antitrust law***. *See* *Spectrum Sports v. McQuillan, 506 U.S. 447, 458, 122 L. Ed. 2d 247, 113 S. Ct. 884* ("The purpose of the [Sherman] Act is not to protect businesses from the working of the market; it is to protect the public from the failure of the market. The law directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself. It does so not out of solicitude for private concerns but out of concern for the public interest.").

Even if the Court regarded Plaintiffs' view of the potential of the Java platform as accurate, the Court would nevertheless reject the mandatory distribution of a Sun-compliant JVM as a remedy in this case. The Court does not regard an appropriate remedy in this case as one which singles out particular competitors and anoints them with special treatment not accorded to other competitors in the industry, thereby providing an advantage to those particular firms **[**323]** in their efforts to compete with Microsoft. *See* Appendix A, Part X.G. The economic testimony presented in this proceeding uniformly rejected restoration of competition for particular competitors. *See id.* Rather, such restoration should be "technology neutral." *Id.* Plaintiffs' proposal in this regard is devoid of such neutrality. ***HN32***[] While an appropriate remedy should open the doors to competition, favoritism of one market participant over another in a remedy provision places the Court in the improper position of exerting too much control over the market. *See* *Spectrum Sports, 506 U.S. at 458-59*; *Cargill, 479 U.S. at 110* (quoting *Brown Shoe, 370 U.S. at 320*); *see also* *Brunswick, 429 U.S. at 488*. The Court's role is to end the illegal conduct and to make every effort to protect against conduct of the same type or class, not to engineer a particular market outcome. *Zenith Radio, 395 U.S. at 132*; *Ford Motor Co., 405 U.S. at 573*; *Gypsum, 340 U.S. at 88-89*. For all of these reasons, the **[*190]** Court will not impose a mandatory Java distribution requirement upon Microsoft.

[324]** ***7. Adherence to Industry Standards***

Based almost entirely on complaints and fears regarding Microsoft's history and ability to alter standards which affect interoperation, *see supra* Part III.D, Plaintiffs propose a provision which requires that whenever Microsoft claims to support a particular industry standard, it shall be bound to support the standard until it publicly disclaims such support or the standard itself expires or is rescinded by the standard-setting body. In addition, Plaintiffs propose that this same portion of the remedy mandate that Microsoft continue to support an industry standard any time it makes a proprietary alteration to the standard.

To justify these proposals, Plaintiffs rely heavily upon the appellate court's imposition of liability for Microsoft's deception of software developers regarding the Microsoft-specific nature of its Java development tools. *Microsoft, 253 F.3d at 76* This deception led software developers to believe that Microsoft's development tools would produce cross-platform Java-based software, rather than software that ran only on Windows. *Id.*

The former portion of this provision is little more than an **[**325]** attempt to order Microsoft to obey the antitrust laws, as Plaintiffs propose a provision which says quite simply to Microsoft: "Don't deceive anyone." Plaintiffs have appropriately referred to this provision as a "truth-instandards " provision. Such a provision, however, is an inappropriate way to remedy anticompetitive conduct. The Supreme Court, in *Zenith Radio*, held that ***HN33***[] the Court may not simply enjoin "all future violations of the antitrust laws." *395 U.S. at 133*. Rather a remedy "should be tailored to fit the wrong." *Microsoft, 253 F.3d at 107*. If the deception were ongoing, of course, the obvious remedy would be an order requiring Microsoft to cease that conduct. However, there is no evidence that this deception, or any similar deception, has persisted. *See* Appendix A, Part X.H. Accordingly, the Court finds that there is no showing that the broad order to obey the antitrust laws by not engaging in any deception similar to that of the Java developers is either appropriate or necessary.

Turning to the other significant aspect of this provision, the requirement that Microsoft maintain support for industry standards where it has made proprietary **[**326]** modifications to the standards, the Court observes that this aspect of the proposal is unrelated to any finding of liability. Instead, Plaintiffs seek to prevent Microsoft from engaging in conduct which was found, at least in the specific instance addressed in this proceeding, to have competitive benefits which outweigh the anticompetitive effect of the conduct. *Microsoft, 253 F.3d at 74-75* ***HN34***[] ("[A] monopolist does not violate the antitrust laws simply by developing a product that is incompatible with those of its rivals. In order to violate the antitrust laws, the incompatible product must have an anticompetitive effect that outweighs any procompetitive justification for the design.") (citation omitted). In complete disregard of this holding, Plaintiffs seek to restrict Microsoft's ability to engage in such conduct by requiring that Microsoft continue to support standards which it has chosen to modify. Although the Court has the power to address with its remedy conduct beyond that which was found specifically to violate the antitrust laws, such expansion beyond the liability findings must be justified by a showing that the regulation of lawful conduct will advance **[**327]** the interests of competition. Plaintiffs' "truth-in-standards" proposal **[*191]** does not meet this threshold, as even when viewed generously, it is likely to have only a modest effect on competition, if it has any effect at all. *See* Appendix A, Part X.H.

Plaintiffs' proposal regarding adherence to industry standards suffers from an additional, and potentially more serious, flaw in that it imposes unworkable conditions. ***HN35***[] A remedial decree should be "as specific as possible, not only in the core of its relief, but in its outward limits, so that parties may know[] their duties and unintended contempts may not occur." *Int'l Salt, 332 U.S. at 400*. The evidence shows that compliance with "industry standards" is difficult to determine and that such a determination is largely a subjective undertaking. *See* Appendix A, Part X.H. Given this fact, a requirement that Microsoft adhere to industry standards will likely prove unenforceable. *Id.* Such a provision has the potential of subjecting Microsoft to countless claims of non-compliance which may never be resolved with any certainty. *Id.* As a result, the Court regards such a provision, which will produce minimal benefit **[**328]** to competition, as undesirable.

8. Monitoring of Microsoft's Intellectual Property Claims

Plaintiffs propose that, in conjunction with the Court's enforcement of the remedial decree, the Court should review evidence raised by Plaintiffs or other third parties that Microsoft has brought or threatened to bring a "groundless" claim of intellectual property infringement. Plaintiffs fail entirely to establish any rational connection between this proposed provision and the imposition of liability for violations of *§ 2* of the Sherman Act. *See* Appendix A, Part X.I. Likewise, Plaintiffs have not established that Microsoft has, or is likely to, engage in such conduct, or that review of Microsoft's intellectual property claims for "groundlessness" will benefit consumers or competition. [83] *Id.* Of additional concern is the fact that, on its face, this provision in Plaintiffs' remedy proposal threatens to chill Microsoft's legitimate enforcement of its intellectual property rights. *Id.* Because Microsoft is an intellectual property company, *see* Appendix A, Part VII, such a chill could, in contravention of the goals of ***antitrust law***, stifle Microsoft's innovation and **[**329]** investment. *Microsoft, 147 F.3d at 948*; *see also* *Spectrum Sports, 506 U.S. at 458*. In short, Plaintiffs have not established that the proposed monitoring of Microsoft's intellectual property claims is anything other than improper "interference with [Microsoft's] ordinary commercial practices." *Bausch & Lomb, 321 U.S. at 728*. Given the overwhelming lack of evidentiary support and legal justification for the imposition of such a provision, the Court declines to incorporate this aspect of Plaintiffs' remedy proposal into the remedy in this case.

9. Investment Reporting

Plaintiffs have also suggested that the remedy in this case should require Microsoft to report its investments, regardless of size or significance, in a wide array of technologies and businesses. Plaintiffs argue that such

---

[83] ***HN36***[] Truly frivolous claims are prohibited by *Rule 11 of the Federal Rules of Civil Procedure*. *Fed. R. Civ. P. 11*. The Federal Rules further prohibit the presentation of claims and court filings in general for "any improper purpose, such as to harass." *Fed. R. Civ. P. 11(b)(1)*. Violations of *Rule 11* are punishable by the imposition of sanctions not only upon counsel, but upon the parties themselves. *Fed. R. Civ. P. 11(c)*. Plaintiffs have not established that additional protections against groundless claims of intellectual property infringement are either appropriate

reporting will **[*192]** assist law enforcement authorities in monitoring Microsoft's investment activities for violations of the antitrust laws. Plaintiffs, however, have not presented evidence that any law enforcement authorities would be interested in receiving such information. *See* Appendix A, Part X.J.

[330]** This suggested provision is so far removed from any liability in this case, it is difficult to understand the manner in which Plaintiffs believe such a provision will satisfy the objectives of an antitrust remedy. Plaintiffs acknowledge that their proposed provision will not actually prohibit any conduct, but will only provide information to law enforcement authorities. *Id.* or necessary. *See* Appendix A, Part X.I. Plaintiffs do not offer any testimony which indicates that this proposed provision will have any effect on competition in the relevant market. *Id.* Therefore, there is neither evidence nor argument that competition will benefit, nor is there any showing that conduct related to anticompetitive activity will cease as a result of the proposed provision. *Id.* Based upon this evidence, or more accurately, the lack thereof, and in light of the lack of any relationship to the liability imposed in this case, the Court declines to adopt Plaintiffs' view that such a provision is either appropriate or useful as part of a remedy in this case.

V. CONCLUSION

Recognizing, as they must, the confluence of the rapid pace of change in the software industry and the delays **[**331]** inherent in antitrust litigation, Plaintiffs sought to gather all existing complaints regarding Microsoft's business practices and bring them before the Court at this late stage in the case. In doing so, Plaintiffs attempted to circumvent the arduous process which necessarily precedes the imposition of antitrust liability and, instead, proceeded directly to seek a remedy for the readily identifiable aspects of Microsoft's business conduct that other industry participants find objectionable. Though an appropriate remedy may be forward-looking and address conduct beyond the specific acts found to be anticompetitive, Plaintiffs are mistaken in thinking that the imposition of *§ 2* liability under the Sherman Act for unlawful monopoly maintenance in the market for Intel-compatible PC operating systems permits the Court to impose a remedy in areas unrelated to the monopoly market. This suit, however remarkable, is not the vehicle through which Plaintiffs can resolve all existing allegations of anticompetitive conduct which have not been proven or for which liability has not been ascribed.

The appellate court could not have been clearer in its admonition that this Court's decree should be **[**332]** "tailored to fit the wrong creating the occasion for the remedy." *Microsoft, 253 F.3d at 107*. Yet despite this admonition, in their request for relief, Plaintiffs have shown little respect for the parameters of liability that were so precisely delineated by the appellate court. In many instances, therefore, this Court has had little choice but to reject Plaintiffs' remedial suggestions on the grounds that they are unjustifiably in conflict with the imposition as well as the rejection of liability in this case.

Additionally, the Court observes that a number of the remedial provisions proposed by Plaintiffs would require drastic alterations to Microsoft's products, as well as to aspects of its business model which do not involve illegal conduct. Plaintiffs present little, if any, legitimate justification for these remedies, and in most instances, these proposals are not supported by any economic analysis. Instead, it appears that these types of remedial provisions seek to convert certain legitimate aspects of Microsoft's business model and/or product design into a model which **[*193]** resembles that of other industry participants simply for the sake of changing the status quo. **[**333]** Certain of Microsoft's competitors appear to be those who most desire these provisions and, concomitantly, are the likely beneficiaries of these provisions, while other competitors in the relevant market would not necessarily benefit. In bringing these types of proposals before the Court, Plaintiffs again misunderstand the task presently before the Court-to *remedy* Microsoft's antitrust violations. General changes to the lawful aspects of Microsoft's business model or product design of the type proposed by Plaintiffs do not themselves provide a remedy, nor have Plaintiffs established that such changes are required, or even appropriate, in conjunction with a remedy. Accordingly, the Court has rejected those aspects of Plaintiffs' remedy proposal which would impose such changes.

Instead, the appropriate remedy, which the Court has devised and explained at length in this Memorandum Opinion, is carefully tailored to fit the wrong creating the occasion for the remedy. The Court's remedy exceeds a mere proscription of the precise conduct found to be anticompetitive and is forward-looking in the parameters of the relief provided. Moreover, the remedy imposed by the Court is crafted to **[**334]** foster competition in the monopolized market in a manner consistent with the theory of liability in this case.

In particular, the Court's remedy addresses, to the extent appropriate, Plaintiffs' desire that Microsoft disclose technical information to foster interoperation between Microsoft's PC operating system software and third-party products, as well as between Microsoft's PC operating system products and server operating systems. The mandatory disclosures between Microsoft's monopoly product and server operating systems acknowledge the competitive significance of server/network computing as the newest type of "platform threat" to Microsoft's dominance in the relevant market. The disclosures mandated by the Court will likely prove beneficial to the development of middleware platforms and the functional equivalent of the middleware platform provided by server operating systems.

Likewise, the Court's remedy satisfies Plaintiffs' demand for remedial provisions which address OEM flexibility in the configuration of Microsoft's operating system products, but is tempered by the necessary respect for Microsoft's intellectual property rights. In this regard, the Court has largely rejected **[**335]** Microsoft's paternalistic view that it can determine what is best for consumers with regard to the configuration of the Windows operating system. In rejecting this view, the Court's remedy affords OEMs the freedom to configure Microsoft's operating system products in a manner which promotes third-party middleware through the prominent display of icons, shortcuts, and menu entries, and such configuration will be protected against automatic alteration resulting from Microsoft's product design. In addition, OEMs will have the freedom to remove all prominent means of end-user access to portions of middleware functionality integrated into Microsoft's operating system so as to encourage the installation of third-party middleware. The Court's remedial decree also ensures that OEMs may introduce subscription services during the boot sequence without restriction by unjustified Microsoft technical requirements. Further secured by the terms of the Court's decree is the automatic launching of innovative software programs limited only by the requirement that the programs not drastically alter the Windows user interface.

[*194] In its order of remedy, the Court has heeded Plaintiffs' call for broad protection **[**336]** for OEMs, ISVs, and IHVs against retaliation and threats of retaliation by Microsoft for the support of products that compete with Microsoft's monopoly product. The Court's remedy further curtails Microsoft's ability to enter into agreements that have the effect of excluding competitors from the marketplace. The Court's prohibition on exclusionary contracts is carefully drawn, however, so as to foster, rather than prohibit, procompetitive joint ventures, work-for-hire agreements, and intellectual property licenses. Notwithstanding these affirmative measures, the Court's remedy, of necessity, stops short of any measure which will substantially discourage procompetitive joint ventures, require the substantial redesign of Microsoft's products, or otherwise interfere in Microsoft's lawful use of proprietary technology.

Throughout all of its provisions, the Court's remedial order is generous in its treatment of middleware platform threats. The defined terms in the Court's order are appropriately grounded in the theory of liability and the treatment of middleware platform threats during the liability phase, while simultaneously prescient in that they are not confined to technology which **[**337]** exists today. Most notable is the scope of the term "Non-Microsoft Middleware," which captures a wide array of existing platform technology, as well as technology not yet developed. In this regard, even the technologies which Plaintiffs have identified as future potential platform threats, such as interactive television middleware-whose success is but a prediction, will be addressed by the Court's remedial order, provided the aspirations of these technologies become reality.

Plaintiffs are correct that Microsoft has a tendency to minimize the effects of its illegal conduct. Yet this minimization, however frustrating, does not require a remedy which prodigiously exceeds even an expansive view of the illegal conduct. The remedy in this case addresses the conduct found by the district and appellate courts to violate the antitrust laws and is imposed without regard to Microsoft's minimalist view of its own illegal conduct. More importantly, the behavioral remedy imposed by this Court neither bends nor softens simply because Microsoft refuses to acknowledge the extent of its own wrongdoing.

During this litigation, promises have been made on behalf of Microsoft that the company will change **[**338]** its predatory practices which have been part of its competitive strategy in order to comply with the remedial decree. The Court will hold Microsoft's directors, particularly those who testified before this Court, responsible for implementing each provision of this remedial decree. Let it not be said of Microsoft that "a prince never lacks legitimate reasons to break his promise," [84] for this Court will exercise its full panoply of powers to ensure that the letter and spirit of this remedial decree are carried out.

November 1, 2002

COLLEEN KOLLAR-KOTELLY

United States District Judge

APPENDIX A

REMEDY-SPECIFIC FINDINGS OF FACT

The Court has considered the evidence submitted by the parties, made determinations as to its relevancy and materiality, assessed the credibility of the testimony of the witnesses, both written and oral, and ascertained the probative significance of the documentary and visual evidence presented. Based upon the Court's **[**339]** consideration of the entire record in this case and all of the reasonable inferences to be **[*195]** drawn therefrom, the Court enters the following factual findings.

I. ORIGINAL EQUIPMENT MANUFACTURER ("OEM") FLEXIBILITY

The district court concluded, and the appellate court agreed, that a number of Microsoft's restrictions on an OEM's flexibility in configuring Windows products, from both a licensing and a technological standpoint, were anticompetitive in violation of *§ 2* of the Sherman Act. *See* *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34, 59-67 (D.C. Cir. 2001)* (*en banc*). In general terms, both proposed remedies include similar mechanisms for the lifting of Microsoft's exclusionary licensing restrictions and attempt, through other restrictions on Microsoft's conduct vis-a-vis OEMs, to secure for the OEMs a substantial degree of flexibility in the configuration of PCs with Windows installed as the operating system. *See, e.g.*, Plaintiff States' Proposed Remedy ("SPR") §§ 2.c, 10; Microsoft's Second Revised Proposed Final Judgment ("SRPFJ") § III.C, H. The remedy proposals include significant provisions to ensure OEM flexibility based upon the undisputed **[**340]** recognition that OEM flexibility will facilitate the distribution of software which, like the middleware threats posed by Navigator and Java addressed in the liability phase, has the potential to develop into a "middleware platform threat." In the paragraphs below, the Court examines the evidence presented with regard to the operation of the OEM flexibility provisions in Plaintiffs' and Defendant's respective remedy proposals.

A. License Provisions

1. Plaintiffs' Third-Party Licensing Proposal

The two remedy proposals take a similar approach, enumerating various ways in which Microsoft may not limit original equipment manufacturer ("OEM") flexibility in the configuration of Windows operating system products through license restrictions. *Compare* SPR § 2.c, *with* SRPFJ § III.C. Despite this similarity, the proposals differ substantially in one respect; namely, Plaintiffs' proposal secures protection not only for OEMs, but also for "thirdparty licensees." Plaintiffs offer testimony explaining that third-party licensing would require Microsoft to

---

[84] NICCOLO MACHIAVELLI, THE PRINCE, ch. 18 (1514).

license its Windows operating system not only to OEMs, but also to third parties, such as media companies, **[**341]** software developers, and others interested in developing customized versions of the Windows operating system to resell to OEMs and consumers. Borthwick P 12. The primary focus of Plaintiffs' third-party licensing provision appears to be the replacement of the Windows user interface with a more "customized" third-party interface. *See, e.g.*, Ashkin P 84; Borthwick PP 2-3, 12-13, 19-35. This customization, predicted Plaintiffs' witnesses, will promote distribution of non-Microsoft software products, including middleware. *See, e.g.*, Ashkin P 102; Borthwick P 2.

John Borthwick, Vice President of AOL Advanced Services, a division of AOL Time Warner, maintained that the remedy in this case should secure for OEMs and third parties "control over the interface and over the applications that can be included in the PC experience (in particular the post-purchase setup or what is referred to in the industry as the Out-Of-Box-Experience')." Borthwick P 15. Touting Plaintiffs' proposal as more beneficial to OEMs and consumers because it allows for this kind of third-party "customization," Mr. Borthwick offered examples of such customization in the "Harry Potter PC," the "Lego Station," and **[**342]** the "AOL Station." Borthwick PP 19, 31-32; Pl. Ex. **[*196]** 1709. These examples illustrate that third-party customization, as envisioned by Plaintiffs, consists of the replacement of the Windows user interface by a user interface designed to promote the products of the third-party participant, such as Lego or AOL. Pl. Ex. 1709. To facilitate such customization, Plaintiffs' proposed remedy expressly prevents Microsoft from limiting the replacement or alteration of its user interface and from limiting the automatic launching of alternative middleware and operating systems. SPR § 2.c.iii-iv.

In its opinion, the appellate court expressly rejected a finding of liability predicated upon Microsoft's restrictions on the substitution of the Windows user interface so as to "prevent[] the Windows desktop from ever being seen by the user." *Microsoft, 253 F.3d at 63*; *see also* *United States v. Microsoft Corp., 84 F. Supp. 2d at 61, P 211 (D.D.C. 1999)* (hereinafter cited as "*Findings of Fact*"). The appellate court declined to find restrictions of this type to be exclusionary because the substitution of the Windows user interface constitutes a "drastic alteration of Microsoft's **[**343]** copyrighted work." *Microsoft, 253 F.3d at 63*. Mr. Borthwick did not distinguish the alteration or replacement of the Windows user interface, which is integral to his vision of customized PCs, from the alteration of the user interface described in *Findings of Fact,* 84 F. Supp. 2d at 61, P 211 and addressed by the appellate court at page 63 of its reported opinion. Trial Transcript ("Tr.") at 2296-99 (Borthwick). In this regard, Plaintiffs' vision for third-party licensing, as presented through the testimony of their witnesses, is inconsistent with the appellate court's opinion because it would limit Microsoft's ability to impose license restrictions which have been found not to be exclusionary. *Compare* *Microsoft, 253 F.3d at 63*, *with* SPR § 2.c. As a direct result, the lone economic endorsement of third-party customization, that of Plaintiffs' economic expert, Dr. Carl Shapiro, appears to be predicated on a clear misreading of the provision-as Dr. Shapiro understood § 2.c. to permit Microsoft to impose license restrictions *consistent* with the appellate court's ruling regarding alternative user interfaces. Tr. at 3650-52 (Shapiro).

Because § 2.c of Plaintiffs' **[**344]** remedy proposal would curtail conduct which has been found by the appellate court *not* to violate the Sherman Act, the Court is particularly attentive to whether a particular benefit will accrue to competition from the imposition of such a provision. Regrettably, the testimony presented by Plaintiffs does not explain to the Court's satisfaction the manner in which third-party licensing of the type described above will enhance and encourage competition in the monopolized market. Mr. Borthwick did not offer any such explanation in his direct testimony and, when asked during cross-examination to provide an explanation, conceded that the only substantial effect of third-party licensing would be increased competition between Microsoft's version of Windows and the various customized versions of Windows created by OEMs or third-party licensees. Tr. at 2294-96 (Borthwick). Similarly, Mr. Peter Ashkin, President of AOL Brand Products, a division of AOL, in claiming a "need" for third-party licensing, did not explain to the Court's satisfaction the connection between such licensing and the anticompetitive conduct in this case, nor did Mr. Ashkin explain coherently the manner in which third-party **[**345]** licensing would not create an unjustified expropriation of Microsoft's intellectual property. Absent any such explanation, the evidence is insufficient to support a conclusion that third-party licensing, as presented in **[*197]** Plaintiffs' proposed remedy, will benefit competition. [85]

[346]** ***2. Icon Design and Placement*** The appellate court held that the provision in Microsoft's license agreements preventing OEMs "from adding icons or folders [to Windows] different in size or shape from those supplied by Microsoft" was anticompetitive in violation of *§ 2* of the Sherman Act. *Microsoft, 253 F.3d at 62*. The parties' respective remedy proposals are quite similar in remedying this finding by limiting Microsoft's ability to impose such restrictions. In particular, both remedy proposals include provisions which secure an OEM's ability to install and display icons, menu entries, and shortcuts for non-Microsoft products. *See* SPR § 2.c.ii; SRPFJ § III.C.1.

The significant difference between the two remedy proposals with regard to the provision of flexibility in such installation and display rests upon a reservation of rights by Microsoft in § III.C.1 of Microsoft's proposed remedy. This provision reserves for Microsoft the ability to "restrict an OEM from displaying icons, shortcuts and menu entries for any product in any list of such icons, shortcuts, or menu entries specified in the Windows documentation as being limited to products that provide **[**347]** particular types of functionality, provided that the restrictions are non-discriminatory with respect to non-Microsoft and Microsoft products." SRPFJ § III.C.1. A number of Plaintiffs' witnesses criticized this exception, *see, e.g.*, Ashkin PP 67-68; Barksdale P 77; Schwartz P 179, arguing that Microsoft can "limit the addition of icons, shortcuts and menu entries for non-Microsoft products to only those places where Microsoft has decided to promote a Microsoft product with similar functionality," Schwartz P 179; *see also* Ashkin PP 67-68; Barksdale P 77.

The criticisms of Plaintiffs' witnesses on this point do not withstand scrutiny. The limitation in § III.C.1 of Microsoft's remedy proposal serves only to permit Microsoft to designate certain areas of Windows as limited to the provision of particular types of functionality. For example, where there is an entry for "Printers and Faxes" on the right-hand side of the start menu, § III.C.1 would allow Microsoft to prevent an OEM from placing an icon for unrelated functionality, such as AOL's Instant Messenger software, which does not provide printing or faxing functionality, in the list of "Printers and Faxes." Jones PP 43-45. This **[**348]** limitation on OEM flexibility applies not to the general ability of an OEM to insert a particular icon into the Windows system, but only to the ability of an OEM to *locate* a particular icon within "any list . . . specified in the Windows documentation." SRPFJ § III.C.1. Limitations imposed by Microsoft pursuant to this provision must be unbiased with regard to Microsoft and third-party products. *Id.* As a result, Microsoft cannot limit the parameters of functionality so as **[*198]** to exclude competing products entirely. *Id.* Therefore, contrary to the view of Plaintiffs' witnesses, the exception to OEM flexibility with regard to the placement of icons, shortcuts, or menu entries in certain areas of Windows does not provide an advantage for Microsoft products over third-party products. Plaintiffs do not present sufficient evidence to establish that the minor limitation in § III.C.1 of Microsoft's remedy proposal would hinder an OEM's ability to configure Windows to promote third-party middleware.

Further differentiating the proposals is another exception or limitation in Microsoft's proposed remedy which permits Microsoft to limit an OEM's freedom to install and display desktop **[**349]** shortcuts which "impair the functionality of the user interface." *Id.* § III.C.2. Pursuant to this provision, Microsoft's remedy proposal permits OEMs to add icons of virtually any shape or size, but restricts the ability to add an icon which is so oversized that it covers the entire user interface, or so ill placed that it covers integral portions of the interface, such as the "start" menu. Jones P 46. Microsoft Vice President in charge of the Windows Client Team of the Platforms Group, Christopher Jones, explained the language in § III.C.2, recounting that the preservation of Microsoft's ability to prohibit impairment of the functionality of the user interface attempts to balance Microsoft's product design concerns with OEM freedom.

---

[85] The clear discord between this aspect of Plaintiffs' proposed remedy and the appellate court's opinion, as well as the absence of a coherent explanation of the anticipated benefit to competition in the monopolized market, calls attention to the substantial involvement of Microsoft's competitors in drafting this portion of Plaintiffs' remedy proposal. This involvement raises a concern that the provision will accrue to the benefit of specific competitors, rather than to the benefit of competition. Indeed, Mr. Borthwick readily conceded that AOL had proposed the inclusion of the alternative user interface and "third-party licensing" aspects of *§ 2* of Plaintiffs' proposed remedy and that the provision was plainly beneficial to AOL's business. Tr. at 2263-65, 2273-74 (Borthwick); *see also* Def. Ex. 692.

Id. Plaintiffs do not offer any evidence that the ability of OEMs to install icons or shortcuts which "impair the functionality of the user interface," SRPFJ § III.C.2, will have any positive effect upon competition. [86]

[350]** ***3. Automatically Launching Software***

In his *Findings of Fact*, Judge Jackson described the manner in which some OEMs "developed programs that ran automatically at the conclusion of a new PC system's first boot sequence" such that the "programs replaced the Windows desktop either with a user interface designed by the OEM or with Navigator's user interface." *Findings of Fact,* 84 F. Supp. 2d at 61, P 211. Although Judge Jackson originally condemned Microsoft's prohibition of the addition of such automatically launching programs, the appellate court reversed this holding on the grounds that replacement of the Windows user interface works a "drastic alteration of Microsoft's copyrighted work[, which] outweighs the "marginal anticompetitive effect" of the prohibition. *Microsoft, 253 F.3d at 63*.

Notwithstanding this holding, Plaintiffs presented evidence of other types of software programs which could launch automatically, but did not replace the Windows user interface. [87] Two examples of such automatically launched programs are Gateway's **[*199]** "Go-Back" technology, *see* Ashkin PP 55-56, and RealNetworks' "Tinkerbell," *see* Richards P 119. The "Go Back" software, developed **[**351]** by Gateway in 1999 and 2000, enabled a consumer to restore his or her computer to a previous state if the computer "crashed" or if the consumer made an error that he or she wanted to reverse. Ashkin P 55. To get the full benefit of "Go Back," it was Gateway's intention to have the application always running in the background on the computer, as its "automatic" ability to reverse errors or restore the system would be ineffective if it wasn't activated. *Findings of Fact,* 84 F. Supp. 2d at 25, P 56. In a similar vein, RealNetworks devoted significant engineering resources and time to the design of a new media player that included a utility, referred to internally at RealNetworks as "Tinkerbell," that automatically launches when the computer is started after the initial boot sequence. Richards P 119. Mr. Richards, Vice President, Consumer Systems, of RealNetworks, Inc., *id.* P 1, explained that "Tinkerbell" remains "dormant" on the computer during most use, but "wakes up" at certain intervals to trigger certain functions. *Id. P 119*. For example, "Tinkerbell" triggers the messaging technology in RealOne Player to receive notifications that content or software updates are available. *Id.*

[352]** Products such as RealNetworks' "Tinkerbell" utility and Gateway's "Go Back" feature are most effectively utilized when they are automatically launched. *See* Ashkin P 56; Richards P 119; Tr. at 897-98 (Ashkin). A remedy provision which secures for OEMs the ability to install programs which launch automatically will provide a strong means by which to promote new and innovative software which may evolve into a middleware platform threat. Accordingly, Plaintiffs' witnesses criticized Microsoft's proposed remedy because it does not secure for OEMs the ability to freely install such automatically launching programs.

The remedy provision about which Plaintiffs complain, § III.C.3 of Microsoft's remedy proposal, secures for OEMs the ability to install automatically launching software only where a "Microsoft Middleware Product that provides similar functionality would otherwise be launched automatically." SRPFJ § III.C.3. The provision further permits Microsoft to require that the automatically launched third-party middleware appear either without a user interface or with a user interface of a "similar size and shape" to the Windows user interface which would have otherwise appeared. **[**353]** *Id.* Plaintiffs' witnesses observed that § III.C.3 of Microsoft's remedy proposal will do little to assist the most innovative new middleware products for which Microsoft has not yet developed a competing functionality.

---

[86] Indeed, in their criticism of § III.C.2, the only *evidence* upon which Plaintiffs focus in their Proposed Findings of Fact is the inability of one of Microsoft's economic experts to identify a "real world" example of a shortcut that would impair the functionality of the user interface. Pl. Prop. Findings of Fact P 496. In the Court's view, the inability of an economist to envision examples of extreme conduct in the context of software design is of little consequence. Moreover, Mr. Jones offered a rather clear example of product design which would be covered by the language in § III.C.2 of Microsoft's proposed remedy. Jones P 46.

[87] Mr. Jones of Microsoft explained that when a program launches automatically, at the end of the initial boot sequence, for example, the result is that once the computer has turned on and is presented for use by the end user, the automatically launched program is already started for the user, and the user need not take any action in order to invoke that program's capabilities. Tr. at 5129 (Jones).

Microsoft bristles at even the automatic launching of software which runs within the Windows user interface and offers testimony, as it did during the liability phase, that such automatic launching is harmful to consumers. Jones P 51. Through the testimony of Mr. Jones, Microsoft insists that it should be permitted to limit the software running at the conclusion of the initial boot sequence in order to preserve a consistent and pleasant "out-of-box" experience." *Id.* Mr. Jones claimed that consumer satisfaction will decrease and consumer frustration will increase if OEMs possess greater flexibility with regard to software launched automatically. *Id.* The appellate court effectively rejected these same arguments by Microsoft as a justification for other restrictions on OEM flexibility in configuring Windows which did not substantially alter Microsoft's copyrighted product. *Microsoft, 253 F.3d at 63-64*. Mr. Jones' arguments in this regard **[*200]** are **[**354]** indistinguishable from those rejected by the appellate court.

Plaintiffs' remedy proposal adopts a position nearly as extreme as Microsoft's with regard to the automatic launching of software. Section 2.c.iv of Plaintiffs' remedy proposal does not permit Microsoft to impose any limitation upon the automatic launch of software or even the automatic launching of an alternative operating system. SPR § 2.c.iv. The flexibility provided to OEMs in this portion of Plaintiffs' remedy proposal would permit conduct previously prohibited by a Microsoft license term which was expressly reviewed by the district and appellate courts and found by the appellate court *not* to be exclusionary. *Microsoft, 253 F.3d at 63*. As a result, the Court finds that Plaintiffs' remedy proposal would permit OEMs to alter substantially Microsoft's copyrighted product. Plaintiffs do not offer any evidence that such drastic alteration will promote competition, and the appellate court has already concluded that the competitive benefit derived from such alteration is "marginal," *id.* Moreover, Plaintiffs do not offer evidence which supports a conclusion that the limitation of Microsoft's legitimate **[**355]** restriction on the drastic alteration of its software products is necessary to the effective functioning of other remedial provisions which will clearly benefit competition.

The Court finds that innovative concepts in software design will benefit from a remedy provision which requires Microsoft to permit OEMs to install products which launch automatically, but do not replace the Windows user interface. The pro-competitive value of such a remedy would be significantly hampered if Microsoft were permitted to limit such automatic launching to circumstances in which Windows would launch a competing Microsoft software product. To permit Microsoft to impose such a restriction denies the new software product the advantage it rightfully deserves by being first to market. However, the Court finds that there is no factual basis upon which to conclude that Microsoft should be prohibited from protecting its copyrighted products from drastic alteration.

4. Registration Sequences

Both remedy proposals include a provision which enables OEMs to insert registration programs in the initial boot sequence. *See* SPR § 2.c.iv; SRPFJ § III.C.5. This provision serves to address the appellate **[**356]** court's holding that "Microsoft's prohibition on any alteration of the boot sequence" was anticompetitive because it "prevented OEMs from using that process to promote the services of IAPs, many of which-at least at the time Microsoft imposed the restriction-used Navigator rather than IE in their Internet access software." *Microsoft, 253 F.3d at 61-62, 64*. Evidence from the liability phase of the case establishes that the inclusion of IAP registration offers in the initial boot sequence provides a means by which OEMs can promote middleware with the potential to challenge the Windows platform. *Findings of Fact,* 84 F. Supp. 2d at 60, P 210. Microsoft's remedy proposal in this regard is once again limited in that it reserves for Microsoft significant control over OEM ability to insert such registration sequences. SRPFJ § III.C.5. Specifically, § III.C.5 of the SRPFJ permits Microsoft to impose "reasonable technical specifications" upon the presentation of IAP registration in the initial boot sequence. SRPFJ § III.C.5. Not surprisingly, Plaintiffs offer testimony critical of this limitation which asserts that Microsoft may effectively take back precisely what the remedy purports to give. **[**357]** That is, Plaintiffs' witnesses complained that when Microsoft is permitted to impose "reasonable technical specifications," Microsoft will do **[*201]** so in a manner which effectively prevents OEMs from utilizing the purported freedom to include IAP registration programs from the initial boot sequence. *See, e.g.*, Ashkin PP 52, 58-59.

Over Plaintiffs' complaints, Microsoft, again through the testimony of Chris Jones, insists that it must be permitted to impose "reasonable technical specifications" upon IAP presentations in the boot sequence in order to protect the user experience and avoid consumer confusion. *See* Jones P 50. Microsoft's user experience argument in favor of the "reasonable technical specifications" limitation essentially repeats the argument offered by Microsoft during the liability phase to justify this very limitation. The appellate court rejected this same "consumer confusion argument" during the liability phase, based upon the observation that "to the extent the OEMs' modifications [during the boot sequence] cause consumer confusion, of course, the OEMs bear the additional support costs." Microsoft, 253 F.3d at 64 (citing *Findings of Fact,* 84 F. Supp. 2d at 49, P 159 **[**358]** ("OEMs bear essentially all of the consumer support costs for the Windows PC systems they sell.")). The appellate court further observed that because OEM "promot[ion of] programs in the boot sequence does not affect the code already in the product, the practice does not self-evidently affect either the 'stability' or the 'consistency' of the platform." Microsoft, 253 F.3d at 63-64. [88] Microsoft, through the testimony of its witnesses, fails to offer any new justification for the imposition of restrictions upon the ability of OEMs to offer IAP registrations during the initial boot sequence. Based upon the evidence presented to the Court, the Court is unable to conclude that there exists a legitimate justification for the continued restriction on the ability of OEMs to introduce IAP registration offers during the initial boot sequence of PCs running Windows.

[**359] B. Remedies Related to the "Binding" of IE and Windows

1. "Add/Remove" Utility

The parties' respective remedy proposals once again offer somewhat similar remedies to redress Microsoft's anticompetitive exclusion of IE from the "Add/Remove Programs" utility-an act which discouraged OEMs from distributing rival products. *See* SPR § 2.c.iv; SRPFJ § III.H.1. Both remedy proposals secure the ability of OEMs to remove end-user access to various types of Microsoft software. The provision of a mechanism by which an OEM can control the availability of end-user access to certain portions of functionality included in the Windows operating system will redress, from both a technical and an economic perspective, the finding of liability against Microsoft for its failure to provide such a mechanism with regard to its integrated Web-browsing functionality. Madnick P 177; Murphy P 200. In particular, the provision of a mechanism by which OEMs can hide end-user access to Microsoft functionality encourages OEMs to install middleware which competes with the concealable portions of Windows. *Findings of Fact,* 84 F. Supp. 2d at 49, 50, PP 159, 165.

The significant difference between the two remedy **[**360]** proposals on this point results **[*202]** from the differing definitions in Plaintiffs' and Defendant's respective remedy proposals. Plaintiffs' proposed remedial decree incorporates a problematic definition of the term "end-user access." Plaintiffs' remedy proposal defines "end-user access" as "the invocation of Middleware directly or *indirectly* by an end user of a computer, or the end user's ability to invoke Middleware . . . . including invocation of Middleware that the Operating System Product's design requires the end user to accept." SPR § 22.j (emphasis added). By including indirect invocation of middleware in the definition of "End-User Access," Plaintiffs' proposed remedy permits the disabling of potentially vital software code from Windows about whose invocations the user is unaware. *See* Bennett P 87. In the course of normal operation, operating systems routinely invoke software code that falls within Plaintiffs' overly broad definition of "middleware." *See* Bennett P 87; *see* Memorandum Opinion, Parts III.B.2.b; III.C (discussing Plaintiffs' treatment of middleware). As Plaintiffs have defined "middleware" and "Microsoft Middleware Products," very small blocks of software **[**361]** code, rather than portions of software code which are generally regarded as "products," fall within these definitions. *See* Memorandum Opinion, Part III.B.2.b; Bennett PP 30, 35-36; Gates P 165; Madnick P 136. As a result, the very basic invocation of these blocks of software code falls within the purview of Plaintiffs' definition of "end-user access." *See* Bennett P 87. Attempting in some way to limit the "indirect invocation" of these blocks of code, is a substantial interference with the ordinary and expected design and functioning of *any* operating system. *See id.*

---

[88] The appellate court noted that Microsoft's claims regarding the need to preserve Windows' "principal value . . . as a "stable and consistent platform . . . that is familiar to users," were unsubstantiated. Microsoft, 253 F.3d at 63-64 (quoting Microsoft's "Opening Br." at 102). This observation continues to be true. Microsoft has not offered any evidence beyond the largely self-serving testimony of its own software designers that instability and consumer confusion would result from the inclusion of IAP registration offers during the initial boot sequence. *See* Jones P 50.

Furthermore, the inclusion of "indirect invocation" in Plaintiffs' definition of "end-user access" would result in the regulation of conduct, by § 2.c.iv of Plaintiffs' proposed remedy, for which the appellate court declined to ascribe liability. The appellate court rejected Judge Jackson's finding of liability against Microsoft for designing its Windows product to launch IE in certain circumstances, thereby overriding the "user's choice of a default browser." *Microsoft, 253 F.3d at 67*. In this rejection, the appellate court recognized that Microsoft had offered a justification for the **[**362]** override, namely that the "seamless[]" operation of the Windows product in some instances relies upon the invocation of Windows software code, rather than third-party code, and that this justification was unrebutted by Plaintiffs. *Id.* The appellate court further noted that Plaintiffs had not provided evidence demonstrating that this aspect of the Windows design had an anticompetitive effect. *Id.* Plaintiffs do not offer testimony which sufficiently explains the competitive benefit to be derived from regulating this otherwise legitimate Microsoft conduct.

The comparable portion of Microsoft's remedy proposal adopts a more straightforward view of the provision and removal of end-user access to various software products. Section III.H.1 of Microsoft's remedy proposal secures for OEMs and end users the ability to display or remove icons, shortcuts, and menu entries throughout Windows. SRPFJ § III.H.1. Plaintiffs, through the testimony of their witnesses, object to this portion of Microsoft's proposal primarily [89] because it includes **[*203]** a reservation of rights similar to that which appears in § III.C.1 of Microsoft's remedy proposal. *See* Barksdale P 77; Schwartz P 179. As **[**363]** with § III.C.1, discussed *supra* Part I.A, § III.H.1 permits Microsoft to limit the ability of OEMs and end-users to insert icons, shortcuts, and menu entries into areas of Windows which are reserved for particular types of functionality. SRPFJ § III.H.1. Pursuant to this provision, therefore, Microsoft would be able to prohibit installation of an icon, shortcut, or menu entry where the product accessed by such icon, shortcut, or menu entry does not provide the functionality for which that area of Windows has been reserved. *See supra* Part I.A. Section III.H.1 would only permit Microsoft to impose limitations in a way that is non-discriminatory with respect to Microsoft and non-Microsoft products. As with § III.C.1, Plaintiffs have not proffered evidence that this aspect of Microsoft's proposal can be used to benefit Microsoft products over non-Microsoft products, nor have Plaintiffs established that there is any benefit to competition to be gained by denying Microsoft the ability to control this limited aspect of its product configuration.

[364]** ***2. Default Settings***

The appellate court did not ascribe liability for Microsoft's use of default settings, nor for Microsoft's design of its product to override a user's preference of a non-Microsoft product as a default where Microsoft had a "valid technical reason" for doing so. *Microsoft, 253 F.3d at 67*. Notwithstanding this fact, both proposed remedies address the use of default settings in Windows, albeit to substantially differing extents. Section III.H.2 of Microsoft's remedy proposal addresses Microsoft's use of default settings to invoke functionality provided by "Microsoft Middleware Products." SRPFJ § III.H.2. This provision provides that, in any instance where Windows invokes the full functionality of a Microsoft Middleware Product in a "Top-Level Window," Microsoft shall allow end users and OEMs to designate a "Non-Microsoft Middleware Product" to be used in place of the "Microsoft Middleware Product." SRPFJ § III.H.2. Pursuant to § III.H.2, Microsoft reserves the right to restrict such replacement where the "Microsoft Middleware Product" has been invoked solely for interoperation with a Microsoft server or where the non-Microsoft product **[**365]** fails to implement a "reasonable technical requirement." *Id.* The substantial equivalent in Plaintiffs' remedy, § 10, provides far more broadly that Microsoft may not designate "Microsoft Middleware" as the default unless OEMs and third-party licensees can override that designation and the "OEM, Third-Party Licensee, or non-Microsoft Middleware" has the ability to provide the end user with a neutral opportunity to designate other middleware as a default. SPR § 10.

---

[89] To the extent that Plaintiffs' witnesses offered testimony critical of § III.H.1 because it incorporates Microsoft's more narrow definition of "Microsoft Middleware Product," *see, e.g.*, Barksdale PP 78-79; Kertzman P 85, these concerns are resolved by the Court's preliminary discussion of appropriate treatment of "middleware" in the remedy for Microsoft's anticompetitive conduct. *See* Memorandum Opinion, Part III.B-C.

As a direct result of the broad definition of "middleware" contained in Plaintiffs' remedy proposal, [90] many of the ordinary functions of Windows, far removed from specifically identified functionality such as Web-browsing, require treatment as a "default" pursuant to Plaintiffs' remedy proposal. Bennett P 122. Microsoft's witnesses **[*204]** testified consistently that Windows is not designed in accordance with Plaintiffs' concept of "defaults." *Id. PP 122-23*; Gates P 372; Jones P 124. This testimony is essentially a re-framing of the testimony which explains why Plaintiffs' concept of middleware is flawed. *See* Memorandum Opinion, Part III.B-C; Gates P 372. Just as Plaintiffs sought to parlay the limited **[**366]** distinction between Web-browsing functionality and operating system functionality into a more general distinction between middleware functionality and operating system functionality, *see* Memorandum Opinion, Part III.B-C, Plaintiffs propose to extend the notion that there can exist a "default browser" to mean that there exists a similar "default" for all "middleware." SPR § 10. The notion of a "default browser" is grounded in Judge Jackson's *Findings of Fact*, which explain that Windows 98 provided the ability to select browsers other than IE as the "default" for a number of tasks. *Findings of Fact,* 84 F. Supp. 2d at 52, P 171. Judge Jackson observed, however, that even this ability to set a browser "default" was imperfect, as some portions of Windows were not designed to accept a browser other than IE. [91] *Id.*

[367]** Plaintiffs do not present evidence which establishes that Windows is similarly designed, with regard to the ability to set a default, for all of the pieces of software identified as "middleware" in Plaintiffs' remedy proposal. Quite to the contrary, Microsoft offers repeated testimony that most of the blocks of software code which Plaintiffs have defined as "middleware" are not designed to be removed or replaced with alternate third-party software code. [92] *See* Bennett P 122; Gates P 372; Jones P 124. As Mr. Jones of Microsoft testified, the Windows operating system is not designed like an " la carte restaurant menu" from which blocks of software may be included or excluded at the whim of the OEM. Jones P 124. Rather, in predominant part, Windows is designed with the assumption that all blocks of software code that provide functionality to other parts of the operating system (as well as to software products running on top of the operating system) will be present in the product. *Id. P 123*; *see also* Gates PP 369-73. This assumption cannot simply be removed or ignored so as to render the "middleware" replaceable. Jones P 124. To do so in an attempt to accomplish **[**368]** the goal of § 10 of Plaintiffs' proposed remedy, even assuming Plaintiffs had provided a well-defined list of components which comprise "middleware," *see* Memorandum Opinion, Part III.B.2.b, "would require an enormous engineering effort--by no means assured of success given the varying designs of third-party products." Jones P 122; *see* *id. PP 123-26*; Bennett PP 122-23; Gates PP 372-79; Tr. at 4917-21 (Gates). "Assuming that it could be accomplished . . . such a complete 'modularization' of existing Windows operating systems would require all of the Windows development resources **[*205]** for years, halting work on new products and services." Jones P 126.

[369]** Plaintiffs present scant justification for a remedy provision which would require at least vast amounts of work by Microsoft to implement and more likely a complete redesign of Microsoft's Windows product. Plaintiffs do not present any economic analysis regarding the benefit or harm to competition which will result from a redesign of Windows so as to permit the replacement of the various pieces of software code Plaintiffs identify as "middleware." Indeed, Plaintiffs' own economic expert, Dr. Shapiro, testified that a determination as to the procompetitive benefit of the broad provision of such defaults could not be ascertained without a balancing of the pro- and anticompetitive effects and a judgment akin to the liability judgment of the appellate court. Tr. at 3654-55 (Shapiro). Plaintiffs present only the testimony of Microsoft's competitors, who observed as the appellate court did, though it declined to

---

[90] As the Court concluded in Part III.B.2.b of the attached Memorandum Opinion, Plaintiffs' definition of "middleware" renders essentially any block of software code that exposes an API to be "middleware."

[91] It is noteworthy, once again, that the appellate court rejected any imposition of liability based upon the aspect of Microsoft's product design which overrode the user's "default browser" based upon the "valid technical reasons" advanced by Microsoft to justify such an override. *Microsoft, 253 F.3d at 67*.

[92] There are, however, limited portions of Windows unrelated to Web-browsing functionality, for which there already exists the mechanism, like that described by Judge Jackson in P 171 of the *Findings of Fact,* 84 F. Supp. 2d at 52, to designate non-Microsoft software for invocation. Tr. at 5242-45 (Jones). This ability exists because Windows was designed to permit the designation of a non-Microsoft software to perform a particular function. *Id.*

impose liability on this point, *Microsoft, 253 F.3d at 65*, that the override of the user's default choices by a Microsoft product reduces the usage share of the non-Microsoft software and thereby reduces likelihood that such software will develop into a middleware **[**370]** platform threat. *See* Schwartz P 160; *see also* Richards P 158; Ashkin P 145-47.

Although the anticompetitive effect of Microsoft's override of the user's default choices was not enough to result in a finding of liability because of Microsoft's procompetitive justification, *Microsoft, 253 F.3d at 67*, Microsoft includes in its proposed remedy a provision which roughly corresponds to § 10 of Plaintiffs' proposed remedy and seeks to curtail the anticompetitive effect of the override. Microsoft's proposed remedy identifies the precise circumstances in which Microsoft must enable the substitution of a non-Microsoft software product to perform a function which would ordinarily be performed by a portion of Windows. SRPFJ § III.H.2. These instances are identified by the appearance of a "Microsoft Middleware Product in a separate Top-Level Window and [the] display [of] either (i) all of the user interface elements or (ii) the Trademark of the Microsoft Middleware Product." *Id.* This provision offers greater certainty to OEMs, as well as ISVs, regarding the functionalities in Windows for which non-Microsoft software may be invoked. This certainty should render **[**371]** the use of a nonMicrosoft middleware product in place of Windows functionality a less "jolting experience," *Findings of Fact,* 84 F. Supp. 2d at 52, P 172; *see also* *Microsoft, 253 F.3d at 65*, as the occasions wherein the nonMicrosoft middleware may be invoked will be far more predictable. This increased certainty and predictability, in turn, will enable middleware developers to draw attention away from the "middleware" functionalities included in Microsoft's operating system products. *See* *Microsoft, 253 F.3d at 65*.

A number of Plaintiffs' witnesses offered somewhat general criticism of § III.H.2 of Microsoft's proposed remedy because it does not require what § 10 of Plaintiffs' remedy proposal would require. *See, e.g.*, Ashkin PP 145-47; Barksdale P 81; Richards P 159; Schwartz PP 182-83. These criticisms are addressed largely, if not entirely, by the above determination that § 10 of Plaintiffs' remedy proposal has been shown to be neither workable nor beneficial to competition. Advancing a not dissimilar criticism, Mr. Richards of RealNetworks testified that § III.H.2 denies protection to the newest and most innovative software. Richards P 141. Mr. Richards' **[**372]** testimony in this regard, however, fatally ignores the structure of Microsoft's proposed remedy provision. The provision **[*206]** provides "protection" only when a Microsoft product would have otherwise been invoked because that is the only time "protection" would logically be needed. Where there exists no Microsoft product to invoke, there is no chance that anything other than the "innovative" product referenced by Mr. Richards will appear as the "default" in conjunction with the invocation of its innovative functionality. In other words, where the new product is truly innovative and unique, Microsoft will be unable to offer its own software as a "default." In this light, Mr. Richards' initial criticism is unfounded.

Mr. Richards' second criticism is somewhat more salient, but still unpersuasive. Mr. Richards complained that § III.H.2 of Microsoft's remedy proposal permits Microsoft to continue to control whether substitution of a particular Windows functionality will be permitted. Richards P 142. In particular, Mr. Richards observed that "even if Microsoft does have competing middleware . . . Microsoft can simply choose not to launch its middleware in a separate top level window, or, even **[**373]** if it does, can choose to display only some of the user interface elements and no trademark (as Microsoft defines that term)." *Id. P 143*. With this capability, argued Mr. Richards, Microsoft could avoid the obligation to substitute a nonMicrosoft product for the Microsoft functionality which would have otherwise been invoked. *Id.* While Mr. Richards' observations about the functioning of § III.H.3 are correct, neither Mr. Richards, nor any other witness for that matter, explained with any clarity why Microsoft should not be permitted to have such control in the first instance. The Court notes in this context that although the appellate court examined Microsoft's design of its products to override the selection of the default browser in certain instances for anticompetitive effect, the appellate court did not examine Microsoft's decisions with regard to the availability of defaults in general. *See* *Microsoft, 253 F.3d at 59-78*. Therefore, there has been no conclusion by any court, thus far, that the failure to render replaceable particular portions of Windows unrelated to Web browsing is either anticompetitive or a violation of ***antitrust law***.

Plaintiffs' **[**374]** computer science expert, Dr. Andrew Appel, joined Mr. Richards in offering an additional criticism of § III.H.2, observing that it permits Microsoft to override a user's choice of a "Non-Microsoft Middleware Product," *i.e.*, to replace it with a "Microsoft Middleware Product," when the designated "Non-Microsoft Middleware Product fails to implement a reasonable technical requirement," SRPFJ § III.H.2. Appel P 139; Richards P 145. Both witnesses contended that Microsoft may utilize this language to impose a requirement that the replacement software support a piece of Microsoft's proprietary technology, such as an Active X control. Appel P 140; Richards P 145. Dr. Appel argued, in this regard, that the "reasonable technical requirement" imposed by Microsoft may be unnecessary. Appel PP 13941 .

This testimony Plaintiffs proffer regarding the "reasonable technical requirement" exception to § III.H.2 of Microsoft's remedy proposal ignores the manner in which the exception tracks the appellate court's opinion. Once again, the appellate court held that, in the face of unrebutted technical justifications proffered by Microsoft, it could not find that Microsoft acted anticompetitively **[**375]** by enabling Windows 98 to override the choice of Navigator as the default browser upon the invocation of "the Windows 98 Help system and Windows Update feature" because both features depended on ActiveX controls that **[*207]** Navigator did not support. *Microsoft, 253 F.3d at 67* (quoting Microsoft's "Opening Br. at 82). The appellate court deemed the absence of Active X controls to be a "valid technical reason[]" for overriding Navigator as the default browser. *Id.* Dr. Appel's and Mr. Richards' testimony cannot be squared with the appellate court's finding that the absence of "Active X controls" constitutes a "valid technical reason[]" sufficient to justify the override of default settings, *id.*

In sum, the Court finds that § III.H.2 of Microsoft's proposed remedy, in stark contrast to § 10 of Plaintiffs' remedy proposal, provides clear and workable rules for determining the instances in which Microsoft must provide the opportunity to substitute non-Microsoft software to perform a task ordinarily performed by a portion of Windows, despite the absence of a finding of liability with regard to Microsoft's use of "defaults" in Windows. Section III.H.2 further tracks **[**376]** the careful imposition of liability by the appellate court by permitting Microsoft to impose "reasonable technical requirements" in conjunction with providing the ability to replace the Microsoft functionality with third-party software in certain, well-defined circumstances. Conversely, the Court finds that § 10 of Plaintiffs' proposed remedy is largely unworkable. Even presuming that § 10's definitional flaws could be resolved, compliance with § 10 would still require the substantial redesign of Microsoft's Windows operating system products, the economic effect of which is uncertain at best and likely to be of minimal benefit to competition itself.

3. Respect for OEM Settings

In conjunction with other provisions designed to ensure OEM flexibility in the configuration of Windows, both remedy proposals contain provisions which prevent Microsoft from designing its product in a manner which will automatically reset an OEM's choices to favor Microsoft's software. *See* SPR § 10; SRPFJ § III.H.3. Section III.H.3 of Microsoft's remedy proposal permits Microsoft to offer the end user an automatic, rather than user-initiated, alteration of an OEM's configuration, but requires **[**377]** Microsoft to ensure such alteration is not executed without first obtaining authorization from the end user for the change. SRPFJ § III.H.3. This automatic request for alteration must be unbiased with respect to Microsoft and non-Microsoft products and may not activate in Windows until 14 days after the initial boot-up of a new PC. *Id.* In contrast, the second paragraph in § 10 of Plaintiffs' proposed remedy prohibits Microsoft from virtually all "prompting" of the user to change his or her configuration of defaults. SPR § 10. The lone exception for such "prompting" arises when the end user has installed a "Microsoft Middleware Product." *Id.* In such a circumstance, the new product may neutrally ask the end user to designate that product as the default middleware. *Id.*

Plaintiffs' witnesses explained that, in the absence of protection from automatic changes by Microsoft, ISVs will be hindered in their ability to strike deals with OEMs for desktop placement. Barksdale P 85; Richards P 161. In this regard, Plaintiffs, through their witnesses, criticize Microsoft's proposed remedy because it permits Microsoft to neutrally offer a change in settings after 14 days. Barksdale **[**378]** P 82; Richards P 161. The current version of Windows includes a utility provided by Microsoft which offers to place the least used desktop icons into a folder, so as to, in effect, sweep the desktop clear of unused icons. Jones PP 34-38. The relevant Microsoft technology is activated **[*208]** 14 days after the end user turns on his or her computer. *Id. P 35*. Plaintiffs' witnesses complained that the 14-day time period is too short for the user to have an opportunity to use and familiarize him/herself with a new product for which a corresponding icon was placed by an OEM on the desktop. *See, e.g.*, Barksdale P 82. However, beyond a prohibition of this kind of service entirely, Plaintiffs do not offer any suggestions as to what would be a more appropriate time period. Microsoft presents testimony which offers a contrary conclusion, primarily that the 14-day time period is sufficient and that even novice end users will understand that they are not obligated to allow the program to "clean-up" the desktop by moving icons into a folder, from which the icons can be retrieved later. Tr. at 5115 (Jones).

Plaintiffs' witnesses similarly raised a concern that there is no limitation upon the number **[**379]** of times Windows may prompt the end user to alter his or her configurations in a manner which will coerce the user to switch. *See, e.g.*, Ashkin P 152; Barksdale P 85; Borthwick P 39; Richards P 160. The Court finds that Plaintiffs' concern in this regard is unsupported by fact and, instead, is based upon an inaccurate reading of Microsoft's proposed decree. The relevant portion of Microsoft's proposed remedy requires that any prompt presented to a user be "unbiased" with respect to Microsoft and non-Microsoft products. SRPFJ § III.H.3. Therefore, even if a consumer is "likely to respond" to such prompts, as Plaintiffs' witnesses have testified, there is no evidence that such a "response" would favor Microsoft given that the prompt must be unbiased. For example, it would not be "unbiased" for the prompt to be presented only when the user has chosen a non-Microsoft product as the default. SRPFJ § III.H.3. Rather, the request for alteration must function equally with regard to Microsoft and non-Microsoft products. Moreover, even if the icon for a product is swept from the desktop, the product does not disappear from the system entirely, but instead, the icon is simply moved to a **[**380]** different location. Jones P 38. As a result, an end user may always reverse the alteration to which he or she agreed by retrieving the icon.

The Court finds that the evidence presented by Plaintiffs fails to establish a justification for a blanket prohibition on the inclusion of such a desktop clearing functionality in Windows. Rather, the Court concludes that so long as there are protections against Microsoft using the utility to undermine OEM flexibility in configuration by favoring Microsoft products, disfavoring OEM configuration, and pressuring end-users into changing OEM settings, there is insufficient evidence to justify a prohibition against inclusion of the utility. The Court further concludes that, although there is conflicting evidence regarding the propriety of the 14-day time period, there is no evidence with regard to the appropriateness of any other time period. With the evidence in equipoise and given the other safeguards provided in § III.H.3, the Court declines to find that the 14-day time period will devalue OEM ability to freely configure the Windows desktop.

II. UNIFORM OEM LICENSES

To provide security to OEMs in contracting with Microsoft, both proposed **[**381]** remedies include a provision which imposes a substantial degree of uniformity in Microsoft's Windows operating system licenses. SPR § 2.a; SRPFJ § III.B. Of all of the competing sections in the two proposed remedies, it is arguable that these two provisions bear the greatest likeness to each other. Plaintiffs' and Defendant's **[*209]** proposals for uniform licenses for Windows operating system products are remarkably similar, with each requiring uniformity in the terms and conditions of the licenses for the twenty OEMs with the highest volume of Windows operating system licenses. Both proposed remedies provide, in broad terms, [93] that a royalty schedule must be established, pursuant to which Microsoft may opt to charge a different royalty for different language versions of the Windows operating system, and Microsoft may provide reasonable volume discounts based upon the actual volume of licenses. SPR § 2.a; SRPFJ § III.B.

[382]** Despite these notable similarities, Plaintiffs have presented testimony which criticizes the first iteration of uniform licenses [94] as less favorable to at least one OEM, Gateway, than the previous licenses which were individually negotiated. *See generally* Fama PP 46-114; Tr. at 1178-1273 (Fama). Nothing in this testimony, however, evidences any impropriety by Microsoft. *Id.* Anthony Fama, Group Counsel, Partner Management at Gateway, Inc., Fama P 1, complained that the new uniform terms were imposed without input from Gateway, *id. P*

[93] Admittedly, there are minor differences in the two remedies even on these common points. *Compare* SPR § 2.a, *with* SRPFJ § III.B.

[94] Pursuant to its settlement agreement with the United States, on December 16, 2001, Microsoft commenced the use of uniform licenses. The terms of the settlement agreement match the terms of Microsoft's proposed remedy.

30, but acknowledged that Gateway did not provide Microsoft with the input it requested for over a month and even then, a few days after Microsoft had requested return of the *signed* agreement, Tr. at 1207-12 (Fama); Def. Ex. 1145; Pl. Ex. 59. Microsoft informed Gateway that it could not change the terms in response to Gateway's complaints because the terms had to be uniform, but Microsoft indicated that it would seek Gateway's input before issuing the next set of uniform licenses. Tr. at 1212-13 (Fama); *see also id. at 1215-22, 1235-38*.

[383]** Mr. Fama also complained about the timing of the imposition of the new licenses. Prior to the imposition of uniform licenses, Microsoft developed and implemented a system of interlocking licenses to govern OEM licenses for the Windows operating system, the use of certain Microsoft logos and certifications, as well as for the provision of discounts through marketing development programs. Fama PP 7-13; *see also* Ashkin P 47. Mr. Fama described the interrelationship of the licenses as a "a hub and spokes arrangement, with the hub being the Business Terms Document ('BTD')." Fama P 8. "The BTD contains the base legal terms that apply to all license agreements that incorporate the BTD by reference." *Id.* Rather than devise an entirely new system of licenses, Microsoft incorporated its new uniform licenses into its interlocking license system. Mr. Fama complained that Microsoft did not impose the new uniform terms on all OEMs simultaneously, but instead imposed the new terms for each particular OEM as soon as one of that OEM's interlocking licenses was due for renewal. Fama P 44; Tr. at 1219-22 (Fama). Despite his complaint, Mr. Fama acknowledged that Microsoft could not simultaneously **[**384]** comply with the proposed consent decree it had entered into with the United States and continue to offer Gateway the same terms it had been working under once one of its licenses expired. Tr. at 1219-22 (Fama).

[*210] Lastly Mr. Fama complained about the levels for volume discounts established by Microsoft, charging that Microsoft unreasonably set the parameters for the discount tiers, such that only three OEMs would fall into the highest volume tier. *Id. at 1267-72*; Fama PP 105-08. Mr. Fama, however, could not articulate what was unreasonable about the tier, given that the first licensing tier, in fact, applied to the three highest volume OEMs. Tr. at 1267-72 (Fama). In sum, Mr. Fama's testimony, though framed as an accusation, merely acknowledges that Microsoft has complied with the uniform licensing provision in the settlement agreement it entered into with the United States. Plaintiffs neither assert nor explain, through Mr. Fama or any other witness for that matter, the manner in which their proposal for uniform terms would lead to a more satisfactory outcome. [95]

[385]** The most notable point of divergence between the two proposed uniform license provisions arises in relation to Microsoft's practice of using "Market Development Agreements" ("MDAs"), which are more recently referred to as "Market Development Programs" ("MDPs"), in conjunction with the royalty rates charged in OEM licenses. [96] Plaintiffs' proposed remedy does not permit the use of such discounts, while Microsoft's proposed remedy permits the use of MDPs where they are non-discriminatory, non-retaliatory, and are objectively verifiable. *Compare* SPR § 2.a, *with* SRPFJ § III.B. Microsoft implemented MDPs to provide substantial economic incentives for OEMs to meet Microsoft-imposed conditions in their configuration of Microsoft's Windows products. *See* Ashkin P 46. Participation in MDPs is voluntary, but some OEMs regard participation as imperative given the financial benefits which are available through participation. *See id. PP 46, 109*; Fama P 123. MDPs provide financial rebates to OEMs for reaching "milestones" established by Microsoft. The milestones vary from year to year, but generally include non-marketing, substantive restrictions on OEMs regarding, for example, **[**386]** "boot-times, computer memory allocation, and product configuration." Ashkin P 109; *see generally* Fama PP 115-32. The appellate court did not ascribe liability for Microsoft's use of MDPs. *See Microsoft, 253 F.3d at 59-78*.

Plaintiffs contend that Microsoft's remedy is flawed because it permits Microsoft to utilize MDPs. Specifically, Plaintiffs argue that Microsoft's use of MDPs allows Microsoft to favor certain OEMs. Mr. Fama testified that OEMs, like Gateway, could be coerced by the use of MDPs because they fear retaliation in the implementation of the

[95] Mr. Fama reluctantly acknowledged that the gross royalty rates Gateway would pay under the new uniform licenses were lower than those previously paid by Gateway. Tr. at 124445 (Fama). Mr. Fama also acknowledged that the new uniform licenses included provisions which Gateway considered to be more favorable than under the negotiated licenses, but Mr. Fama insisted that such benefits were negligible. *Id. at 1245-46*.

[96] For ease of reference, the Court refers to MDAs, MDPs, and similar discount programs collectively as "MDPs."

discounts. Fama PP 109-12. This disapproval of MDPs is based entirely upon the view that Microsoft can use the terms and enforcement of the MDPs to retaliate against OEMs and exert other forms of control over OEMs in response to OEM action which favors non-Microsoft products. *See* *id. PP 125, 130-31*; Tiemann P 82.

[387]** The MDPs which would be permissible under Microsoft's remedy proposal and the **[*211]** discounts provided thereunder must be made available uniformly, [97] based on "objective, verifiable criteria," and may not be awarded or imposed in a manner inconsistent with other terms of the remedy proposal. SRPFJ § III.B.3. By implication then, pursuant to these terms, Microsoft would not be able to use MDPs to discriminate or retaliate against OEMs, as such action would be inconsistent with other portions of the SRPFJ. *Id.* § III.A, B. Accordingly, Plaintiffs' complaints regarding the availability of MDPs in Microsoft's remedy proposal do not withstand scrutiny.

The economic testimony offered on the subject of uniform licenses and MDPs, from both Plaintiffs' and Defendant's **[**388]** witnesses, was tepid, at best. Plaintiffs' economic expert, Dr. Shapiro, testified that uniform licenses would prevent Microsoft from rewarding or punishing OEMs based on whether they use, support, or distribute rival middleware, noting that reasonable, uniform volume discounts, in such a scheme are appropriate, as they are "pro-competitive." Shapiro P 157. Dr. Shapiro did not indicate that there was any benefit to be derived from an elimination of uniform, non-discriminatory MDPs in conjunction with the imposition of uniform licenses. *Id.* One of Microsoft's economic experts, Dr. Kevin Murphy, acknowledged that the provisions requiring uniform licenses in both proposed remedies could be viewed as "a kind of 'fencing in,' designed to reduce the potential for [Microsoft's] evasion" of other portions of the remedial decree. Murphy P 174. Dr. Murphy noted that such "fencing in" comes at the price of economic inefficiency resulting from the denial of the ability of Microsoft and OEMs to negotiate alternative terms that would benefit both parties. *Id. P 175*. Another economic expert presented by Microsoft, Dr. Kenneth Elzinga, testified that, while he understood the rationale for **[**389]** uniform licenses, they were not particularly beneficial. Tr. at 6711-12 (Elzinga). Dr. Elzinga noted that if uniform licenses were to be imposed, they would be more economically favorable, in his view, if they permitted uniform, non-discriminatory MDPs. *Id.* at 6712. In sum, the economic testimony in favor and against the imposition of uniformity in Microsoft's Windows licenses rests in equipoise, as there is substantial uncertainty as to whether "the gains from constraining Microsoft's opportunities for subtle pressure or coercion" are outweighed by the loss of "the ability to customize deals and the inability to negotiate discounts." Tr. at 4021 (Murphy). However, one conclusion is clear; the weight of the economic testimony favors preservation of Microsoft's ability to offer MDPs, provided that Microsoft cannot impose the MDPs in a discriminatory or retaliatory manner.

Given the slim profit margins under which OEMs function, Barksdale P 98, a limitation, through mandatory uniformity, on Microsoft's ability to manipulate licensing prices will provide significant protection for OEMs, freeing them to exercise the other options provided in the remedy ultimately imposed by the Court. **[**390]** While certainly some OEMs would be happier with negotiated agreements, *see generally* Fama PP 46-87, there is insufficient evidence to conclude that Microsoft has used or will use the uniform license terms contained in its proposed remedy to

"increase **[*212]** its leverage," *id. P 46*, over OEMs. In more general terms, there is similarly

insufficient evidence to support a finding that MDPs themselves, when applied in the absence of coercion, retaliation, or non-uniform enforcement, have any anticompetitive effect. Rather, MDPs, when applied uniformly and in the absence of coercion, retaliation, and the like, can benefit consumer welfare. The evidence supports a further finding, however, that if completely unregulated, the use of MDPs can effectively override provisions which strive to ensure uniform and non-discriminatory licensing terms.

III. PROTECTION FROM RETALIATION

---

[97] The uniformity specified for MDPs is subject to two volume discounts: one uniform discount for the ten largest OEMs and the second for the eleventh through twentieth largest OEMs, with the size of the OEM measured by volume of licenses. SRPFJ § III.B.3.

A. Independent Software Vendors ("ISVs") and Independent Hardware Vendors ("IHVs")

The factual and liability findings in this case portray a practice by Microsoft of threatened and actual retaliation against software and hardware vendors for engaging in action which promotes or supports non-Microsoft **[**391]** middleware. *See, e.g.*, Microsoft, 253 F.3d at 72-73 (discussing Microsoft's dealings with Apple), Microsoft, 253 F.3d at 77 (describing Microsoft's "threat to Intel" [98]). To remedy this action, Microsoft offers § III.F.1 of its remedy proposal which prohibits retaliation against ISVs and independent hardware vendors ("IHVs") for "developing, using, distributing, promoting or supporting any software that competes with Microsoft Platform Software or any software that runs on any software that competes with Microsoft Platform Software" or for "exercising any of the options or alternatives" secured by the injunctive decree entered in this case. SRPFJ § III.F.1. Plaintiffs propose a similar prohibition, but because Plaintiffs' proposal bans action which "adversely affects" industry participants "based . . . on" their support for competing products, it addresses substantially more Microsoft conduct. SPR § 8. Plaintiffs' proposed ban applies to action adverse to IAPs, ICPs, IHVs, ISVs, OEMs, and third-party licensees. *Id.*

[392]** Microsoft raises the concern that, although touted as an "anti-retaliation provision," § 8 of Plaintiffs' proposed remedy covers far more than "retaliation" and "could be read to ban Microsoft from competing in any product category." Gates P 355; *see also* Elzinga P 118 (incorporating PP 33-34 by reference). In this regard, William H. Gates, III, Microsoft's Chairman of the Board and Chief Software Architect, Gates P 1, testified that:

> Under [SPR § 8], nearly any act of competition could be seen as an adverse act. Competing means attempting to maximize sales, which often entails taking sales from a rival (adversely affecting them). At the very least, Microsoft would have no comfort that routine business acts would not violate Section 8.
>
> Under Section 8, Microsoft would be subject to legal risk anytime it entered into any contract relating to the development or promotion of any Microsoft product--even if that contract was silent as to non-Microsoft products. If Microsoft entered into such a relationship, it could be charged with taking "adverse actions" against any competitors in the relevant category that it did not enter into the same relationship with, and thus did **[**393]** not receive the same "consideration" from, Microsoft. Section 8 explicitly states that Microsoft may not withhold **[*213]** "consideration" from a third party that uses, develops, etc. any non-Microsoft product or service.

Id. P 356-57 (emphasis omitted); *see also* *id. PP 358-66*. Although extreme, the concerns raised by Mr. Gates are not unfounded. Plaintiffs' witnesses' description and characterization of § 8 of Plaintiffs' proposed remedy as a bar on retaliation, *see, e.g.*, Ashkin P 138; Barksdale P 106; Borthwick P 61; Kertzman PP 61-62; McGeady PP 86-87, cannot change the fact that the provision is written far more broadly as a bar on "adverse[]" action. SPR § 8. [99] The distinction is a fine one, but significant because retaliation implies an illegitimate basis for the adverse action, unlike "based directly or indirectly . . . on" which connotes only a cause and effect relationship. *Id.*

[394]** Notably too, § 8 of Plaintiffs' remedy proposal is not limited in any way to actions by Microsoft that relate to its PC operating system products, the only segment of the software industry in which Microsoft has been found to have a monopoly. *Id.*; *see also* Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34. As a result, § 8 will regulate Microsoft's business dealings in *all* aspects of its business, however unrelated to its monopoly product. *See* Elzinga P 118 (incorporating PP 33-34 by reference). Plaintiffs' witnesses have not offered any particular explanation or reasonable justification for § 8's breadth in this regard. *See, e.g.*, Ashkin P 138; Barksdale PP 105-06; Kertzman PP 61-62; McGeady PP 86-90; Tiemann P 76. The Court observes, however, that if properly limited to *retaliation* in

---

[98] In his *Findings of Fact,* Judge Jackson noted that Intel is both an IHV and an ISV. *Findings of Fact,* 84 F. Supp. 2d at 34, P 95 ("Although Intel is engaged principally in the design and manufacture of microprocessors, it also develops some software.").

[99] Plaintiffs' arguments that § 8 is not intended to address the conduct cited as an example by Mr. Gates, along with Plaintiffs' insistence that § 8 would not apply in such a circumstance, indicate that the provision is, if not overly broad, at least ambiguous on this point.

relation to the promotion of products which compete with Microsoft's monopoly product, inasmuch as Plaintiffs' remedy § 8 applies to ISVs and IHVs, [100] § 8 begins to resemble § III.F.1 of Microsoft's proposed remedy.

[395]** Plaintiffs' economic expert, Dr. Shapiro, criticized § III.F.1 of Microsoft's remedy proposal by arguing that it does not address a wide enough range of products. To reiterate,

§ III.F.1 of Microsoft's remedy proposal prohibits retaliation by Microsoft against ISVs and IHVs for their support of products which "compete[] with Microsoft Platform Software." [101] SRPFJ § III.F.1. Dr. Shapiro criticized § III.F.1 based upon the assertion that "truly innovative middleware that Microsoft simply does not yet offer is not afforded protection from such retaliation by Microsoft." Shapiro P 199. Dr. Shapiro testified further, in this regard that, "under Microsoft's Proposed Remedy[,] Microsoft can threaten to withdraw support from an ISV that develops new, cool software that Microsoft **[*214]** has not yet developed on its own." *Id.*

[396]** The Court cannot discern the basis for Dr. Shapiro's complaint. Dr. Shapiro did not assert that the term "Microsoft Platform Software" is too narrowly drawn, nor did he offer any logical explanation for why protection would be needed for new software which does not "compete" with Microsoft Platform Software. If the "new, cool software" *competed* with Microsoft's operating system, it would be protected. [102] The liability record in this case is limited to Microsoft's actions in response to competing software platforms. If the software does not "compete" in some sense with Microsoft Platform Software, it bears little relation to the facts of this case. Moreover, the terms of § III.F.1 are broadly drawn to protect not only software which itself competes with Windows, but software which runs on top of software competing with Windows. Accordingly, the Court rejects Dr. Shapiro's criticism of § III.F.1 as unsubstantiated.

[397]** A number of Plaintiffs' witnesses criticized Microsoft's proposed anti-retaliation provision relating to ISVs and IHVs because it does not prohibit *threats* of adverse action. *See, e.g.*, Barksdale P 101; McGeady P 87. In response, Microsoft's economic expert, Dr. Elzinga, asserted that there is no need to protect against such threats. *See* Elzinga P 140. In this regard, Dr. Elzinga reasoned that "if Microsoft is enjoined from retaliating, and potential targets are aware of this, any threats would be empty." *Id.* In the Court's view, Dr. Elzinga expects too much of third-parties that must do business with Microsoft. As Mr. Tiemann, explained, if an industry participant feels intimidated by threats or veiled threats, it will never take the action necessary to test whether Microsoft would actually retaliate. *See* Tiemann P 80. Accordingly, the Court finds merit in Plaintiffs' criticism of the failure of § III.F.1 of the SRPFJ to prohibit Microsoft from threatening the same retaliation which is prohibited by that section.

B. Original Equipment Manufacturers ("OEMs")

A ban on Microsoft's ability to retaliate against other industry participants, namely **[**398]** OEMs, for their support of competing products will assist in securing the ability of industry participants to support products which compete with Microsoft's monopoly product. Borthwick P 61. A prohibition on retaliation against OEMs will also bolster the

---

[100] The Court considers the effect of SPR § 8 on OEMs *infra*.

[101] "Microsoft Platform Software," as a defined term in Microsoft's remedy proposal, means "(i) a Windows Operating System Product and/or (ii) a Microsoft Middleware Product." SRPFJ § VI.L. In the attached Memorandum Opinion, the Court has addressed the definition of "Microsoft Middleware Product" in detail and determined that it is not inappropriately narrow. *See* Memorandum Opinion, Part III.B. The term "Windows Operating System Product," is defined in the SRPFJ as the software code which constitutes the Windows operating system family of products including Windows 2000 Professional, Windows XP Home, Windows XP Professional, and "their successors, including upgrades, bug fixes, service packs, etc." SRPFJ § VI.U.

[102] For example, as the Court concluded in the attached Memorandum Opinion, Parts III.B.3.a, III.C.1, server operating systems-in the context of server/network computing-can be said to "compete" with Microsoft's operating system because they serve as a platform for applications running for the PC. As a result, Microsoft's proposed anti-retaliation provision would protect server operating systems from retaliation for supporting server capabilities which facilitate use of the server as a platform for applications running "for" the PC. *See* Memorandum Opinion, Parts III.B.3.a, III.C.1.

effect of the freedom provided to OEMs in configuring Windows. Accordingly, both proposed remedies include provisions which bar retaliation by Microsoft against OEMs for exercising the other options provided in the final judgment, as well as, in general terms, for supporting software that competes with Windows or any aspect thereof. SPR § 8; SRPFJ § III.A. In the absence of such a ban, industry participants may be reluctant to engage in the very conduct which Microsoft was found to have prohibited with anticompetitive practices. [103]

[399]** **[*215]** In particular, § III.A of Microsoft's remedy proposal prohibits Microsoft from retaliating against an OEM because that OEM is or is contemplating (i) supporting a product that competes with Microsoft Platform Software, (ii) shipping a PC that includes both Windows and a non-Microsoft operating system, or (iii) exercising any option or alternative under Microsoft's remedy proposal. SRPFJ § III.A. The same section further limits Microsoft's ability to terminate a Windows operating system license unless the OEM has received two notices of termination and an opportunity to cure. *Id.* The provision is limited in that it authorizes Microsoft to compensate an OEM commensurate with the absolute level of the OEM's support of the Microsoft product or service. *Id.* By comparison, Plaintiffs offer § 8 of their proposed remedy which, as discussed above, prohibits Microsoft from withholding any form of consideration "based directly or indirectly, in whole or in part, on any actual or contemplated action" by OEMs (and numerous other entities) to support a non-Microsoft offering or to exercise any of the options provided under the remedy in this case. SPR § 8.

Microsoft's criticisms of **[**400]** § 8 of Plaintiffs' proposed remedy apply equally with regard to the manner in which § 8 regulates Microsoft's conduct toward OEMs. *See supra* Part III.A. Most apparent from the language of § 8 is the fact that it covers "adverse" action taken by Microsoft which bears no relation to Microsoft's Windows operating system products and thus, is largely unrelated to the monopoly market. *See* Elzinga P 118 (incorporating PP 33-34 by reference); Gates PP 176, 355. Moreover, § 8's ban on "adverse[]" actions will affect conduct beyond the parameters of "retaliation" as that word is commonly used. In short, a ban on adverse action is not the equivalent of a ban on retaliation. *See* Gates PP 356-66; *see also* Tr. at 2525-28 (Mace). As a result, § 8 of Plaintiffs' proposed remedy threatens to prohibit vast amounts of legitimate business conduct because it is crafted too broadly. Dr. Elzinga cautioned that over-broad restrictions on Microsoft's business dealings would hinder pro-competitive conduct. Tr. at 6749-52 (Elzinga) Plaintiffs have not established that the breadth of § 8 is either necessary or appropriate to achieve the goal of preventing Microsoft from retaliating against **[**401]** third-parties for their support of competing products.

James Barksdale, former President and Chief Executive Officer of Netscape Communications Corporation, Barksdale P 1, complains that the latter portion of § III.A of Microsoft's remedy proposal, which reserves Microsoft's right to "provide Consideration to any OEM with respect to any Microsoft product or service where that Consideration is commensurate with the absolute level or amount of that OEM's development, distribution, promotion, or licensing of that Microsoft product or service," is an exception which swallows the rule. Barksdale P 98. Citing to the slim profit margins under which OEMs function, a fact acknowledged by Judge Jackson, *Microsoft, 87 F. Supp. 2d at 39*, Mr. **[*216]** Barksdale argues that because OEMs generally cannot afford to pass up even a slight reduction in the price for a Windows license, to permit Microsoft to provide consideration or price reductions to OEMs for carrying, supporting, or promoting the "middleware" portions of Microsoft's operating system products is tantamount to coercing the OEMs to carry, support, and promote these same Microsoft products. Barksdale PP 98-99. Mr. Barksdale translates **[**402]** this allegedly effective coercion into the capacity "to prevent rival middleware from being distributed through the OEM channel." *Id. P 100*.

---

[103] Although liability was not clearly ascribed by the appellate court for this conduct, *see* Memorandum Opinion, Part II.B, it is noteworthy that Microsoft has a history of using threats and retaliation as a means to coerce OEMs to prefer Microsoft products over non-Microsoft products. *See Findings of Fact,* 84 F. Supp. 2d at 68, P 236 (finding that Gateway's refusal to switch internal use to IE and stop shipping Navigator has resulted in the payment of higher prices for Windows by Gateway than its competitors), Findings of Fact, 84 F. Supp. 2d at 59, P 203 ("Microsoft threatened to terminate the Windows license of any OEM that removed Microsoft's chosen icons and program entries from the Windows desktop or the 'Start' menu. It threatened similar punishment for OEMs that added programs that promoted third-party software to the Windows 'boot' sequence.").

Mr. Barksdale's criticism in this regard fails to account for the fact that the appellate court persistently declined to impose liability upon Microsoft for "offering a customer an attractive deal," *Microsoft, 253 F.3d at 68*, even where this "attractive deal" included the payment of "bounties," *Microsoft, 253 F.3d at 67*, "costly technical support[,] and other blandishments," *Microsoft, 253 F.3d at 75* (quoting *Findings of Fact,* 84 F. Supp. 2d at 108, P 401), to industry participants for conduct which favors Microsoft products. *Microsoft, 253 F.3d at 67-68, 75*. Additionally, Microsoft's economic expert Dr. Elzinga explained without contradiction that the proviso in the latter part of § III.A of Microsoft's remedy proposal is necessary to preserve "an obviously beneficial and routine type of business practice." Elzinga P 141. Dr. Elzinga testified, by way of example, that were the Court to reject the abovedescribed proviso, "an OEM who shipped 10 percent as much Microsoft software as another and consequently received only 10 **[**403]** percent as much marketing support could nonetheless claim 'retaliation' on a theory that the reason it received that level of marketing support was that it shipped more non-Microsoft software in the relevant category." *Id.* Hence, absent the exception for "consideration commensurate with the absolute level of [an] OEM's development, distribution, promotion, or licensing," practices like the one described above, which are not true "retaliation," might nevertheless be prohibited. *Id.*; *see also* Tr. at 6766 (Elzinga) ("I think it is within my competence to evaluate the merits of having the 'nothing in this provision' clause as part of III.A, because as an economist, I can see the importance of making explicit that Microsoft and the OEMs can still engage in contracts where there are differences between OEMs that are commensurate with that OEM's . . . input into the process. That to me seems procompetitive and important to preserve.").

To require Microsoft to provide equal compensation to all OEMs in complete disregard of the amount of support for Microsoft software products provided by the OEM would create an absurd result. The alternative-a complete ban on the provision of **[**404]** compensation for support of Microsoft products-is similarly absurd, as it prohibits routine, procompetitive business practices. A better result is produced by a provision which permits such compensation, but limits the permissible compensation to the absolute level of support for Microsoft products provided by the OEM. On these grounds, the Court rejects Mr. Barksdale's complaint.

One of Plaintiffs' witnesses' central criticisms of § III.F.1 of Microsoft's remedy proposal is repeated with regard to § III.A, namely that threats of retaliation are not prohibited. *See, e.g.*, McGeady PP 88-89; Tiemann P 80. The Court's analysis with regard to § III.F.1 of Microsoft's remedy proposal is equally applicable to § III.A. Once again, the Court finds that Plaintiffs make a salient point, and the Court therefore rejects the Microsoft assertion that protection from threats of retaliation is superfluous where the retaliation **[*217]** itself is prohibited. *See supra* Part III.A.

Michael Mace, Chief Competitive Officer of PalmSource, Inc., a wholly owned subsidiary of Palm, Mace P 1, levied criticism at both of the non-retaliation provisions in Microsoft's remedy proposal, SRPFJ §§ III.A.1 and **[**405]** III.F.1.a., arguing that the types of industry participants that are protected against retaliation by Microsoft are too narrowly drawn. Mace PP 85-86. In particular, Mr. Mace expressed a concern that the parent company of his employer, Palm, is not protected against retaliation. *Id. P 85*. Mr. Mace's basis for this complaint is his assertion that Palm's operating system, which is an operating system for handheld computing devices, competes with Windows. *Id. P 86*. The Court addressed the general underpinning for Mr. Mace's assertion in the attached Memorandum Opinion, Parts III.B.3.c; III.C.3, and rejected such assertion based upon the conclusion that Plaintiffs have *not* established that the Palm operating system competes with Microsoft's PC operating system, Windows. [104] **[**406]** Moreover, Mr. Mace's argument in this regard contradicts his own view that handheld computing devices are, in

---

[104] Mr. Mace acknowledged that Palm does not manufacture or distribute an Intel-compatible PC desktop operating system, nor any PC desktop operating system for that matter. Tr. at 1858-59 (Mace). Mr. Mace did not testify that Palm manufactured middleware with the potential to perform as a multi-purpose platform across multiple operating systems, nor that there exists middleware which enables applications written for a handheld device to run on a personal computer. *See* Memorandum Opinion, Part III.B.3.c. Instead, Mr. Mace argued that the handheld device has the capacity to supplant the personal computer as more applications become available on handheld devices. *See generally* Mace PP 12-18. As such replacement of products in the marketplace has not been shown to have an impact upon Microsoft's monopoly in the market for Intel-compatible PC desktop operating systems, what Mr. Mace describes is not true competition with the Windows operating system. *See* Memorandum Opinion, Parts III.B.3.c, III.C.3.

fact, distinct from personal computers and provide an "alternative platform" to that of personal computers. [105] Mace P 12 (text and heading). Accordingly, the Court finds Mr. Mace's repeated criticism unavailing.

In summary, the Court finds that § 8 of Plaintiffs' remedy proposal, despite Plaintiffs' apparent intent to prohibit retaliation by Microsoft, as presently drafted, is likely to curtail a significant amount of conduct which is not truly retaliation. That conduct which exceeds the parameters of retaliation is likely to be legitimate business conduct, the prohibition of which is without justification. The Court further finds that § 8 of Plaintiffs' remedy proposal, unlike Microsoft's proposed anti-retaliation provisions, §§ III.A and III.F.1, is not tailored to reflect the monopoly market and, instead, addresses all segments of Microsoft's business. Likewise, Plaintiffs' proposed bar on "adverse" action would unjustifiably prohibit compensation for OEMs which is commensurate with the **[**407]** OEM's absolute level of support for a Microsoft product. Compensation of this sort has been shown to be a procompetitive practice which the appellate court itself condoned. Lastly, the Court finds that industry participants will feel more secure in supporting products which compete with Microsoft's monopoly product if, along with a ban on retaliation, the remedy **[*218]** prohibits threats of retaliation by Microsoft.

IV. TERMINATION OF AN OEM'S WINDOWS LICENSE

In conjunction with its proposal to prohibit Microsoft's ability to retaliate against OEMs for their support of products that compete with Microsoft's monopoly product, Microsoft's proposed remedy suggests a restriction on Microsoft's ability to terminate an OEM's Windows license. SRPFJ § III.A. Plaintiffs' proposed remedy contains a similar provision which would also regulate Microsoft's ability to terminate an OEM's Windows license. SPR § 2.a. As there are few alternative PC operating systems presently available, to remain in business, an OEM must license and distribute the Windows desktop operating system. Fama P 21. A Windows operating system license is necessary to the ability of an OEM to legitimately distribute computers **[**408]** containing copies of Windows. Tr. at 1218 (Fama). Therefore, without the necessary Windows license, an OEM would, in effect, be unable to continue selling PCs.

The necessity of the Windows license to OEM viability gives Microsoft great leverage over OEMs. Fama P 22. Mr. Fama described a fear, arising from the inescapable dependence upon a license from Microsoft, that Microsoft will terminate the necessary license and effectively put the OEM out of business. [106] *See* Fama P 52; *see also* Ashkin P 142. The provision of some degree of protection for OEMs against sudden termination of their Windows license will free the OEMs from this fear and enable them to engage in competition in which they might otherwise have been to fearful to consider.

[409]** Specifically, Microsoft's proposed remedy prohibits Microsoft from terminating an OEM's Windows license without first having given the OEM reasonable notice of the reasons for the proposed termination and opportunity to cure. SRPFJ § III.A. Where Microsoft has provided two or more such notices, even if the breach has been cured, Microsoft may immediately terminate the license. *Id.* While similar, the comparable provision in Plaintiffs' proposed remedy provides that Microsoft may only terminate a Windows license for "good cause" and specifies that Microsoft may not do so without giving notice of the breach and an opportunity to cure. SPR § 2.a. The rather absurd effect of

---

[105] The Court observes that, notwithstanding Mr. Mace's assertions as to what should be deemed a "personal computer," the definition of "personal computer" § VI.Q of Microsoft's proposed remedy is consistent with Judge Jackson's treatment of personal computers in this proceeding. *See Findings of Fact,* 84 F. Supp. 2d at 12, PP 1, 3.

[106] Mr. Fama attempted to illustrate this fear by reference to Gateway's receipt, in a single day, of four notices of termination of a license agreement with Microsoft. Fama P 53; Pl. Exs. 1243-46 (all filed under seal). Mr. Fama's example is of limited relevance, as the notices of termination did not concern Windows or any part thereof, but instead concerned a separate Microsoft product. Tr. at 1260-62 (Fama). Moreover, the notices merely notified Gateway of its violation and demanded that Gateway cure the violation or face termination of the license. *See* Pl. Exs. 1243-46 (all filed under seal). Notably, Mr. Fama did not deny that Gateway, was in fact, in breach of the license, nor did Mr. Fama offer any evidence of bad faith on Microsoft's part in issuing the notices. Tr. at 1261-62 (Fama). Ultimately, no license was terminated as a result of the notices referenced by Mr. Fama. *Id.* at 1262.

this provision in Plaintiffs' proposed remedy is that it would prohibit Microsoft from terminating a Windows license, even where the licensee is persistently in material breach, so long as the licensee cures the breach within the specified period. *Id.*; *see also* Tr. at 1258-60 (Fama). Such a circumstance would, of course, be detrimental to Microsoft's ability to enforce valid provisions in its licenses and, thereby, the ability to protect its intellectual **[*219]** property from misuse. *See* Tr. at 1258-60 (Fama).

[410]** Mr. Fama of Gateway, whose complaints are echoed by various other of Plaintiffs' witnesses, complained that the limitation in Microsoft's remedy proposal on Microsoft's ability to terminate an OEM's Windows operating system license is insufficient to protect OEMs from Microsoft's use of a termination threat as a tool for coercion. *See* Fama PP 49-50; *see*

also Ashkin P 142; Barksdale P 101. Mr. Fama argued that Microsoft's proposed provision, unlike the comparable portion of Plaintiffs' proposed remedy, does not require a "material breach" before Microsoft may terminate an OEM's Windows license, and hence, Microsoft may terminate for a mere "ministerial" breach. Fama P 50-51. As the Windows operating system licenses are essential to the viability of an OEM, a persistent fear that Microsoft may cancel the licenses for a non-material breach [107] may have a chilling effect on an OEM's willingness to engage in any action which displeases Microsoft, such as the promotion of software which competes with Windows or a Windows component. Fama P 56. Mr. Fama's complaint in this regard ignores the fact that both remedy proposals would prohibit Microsoft from cancelling a Windows license **[**411]** in response to an OEM's support for a competing product, or for any other reason inconsistent with the other terms of the final judgment. *See* SPR § 8; SRPFJ § III.A. Accordingly, the Court finds that the "good cause" requirement proposed by Plaintiffs is largely redundant of other proposed protections.

[412]** V. OTHER PARTICIPANTS IN THE ECOSYSTEM

A. Agreements Limiting Support for Competing Products

The appellate court imposed liability upon Microsoft for its First Wave Agreements inasmuch as they extracted a promise from ISVs to "refrain from distributing to Windows users JVMs that complied with Sun's standards" and the corresponding promise that the ISVs would create their Java applications to be reliant upon the Windows-specific JVM. *Microsoft, 253 F.3d at 75* (quoting *Findings of Fact,* 84 F. Supp. 2d at 108, P 401). Although the district court "did not enter precise findings as to the effect of the First Wave Agreements upon the overall distribution of rival JVMs," the appellate court agreed with the district court that the exclusionary effect of the agreements was significant. *Id.* Microsoft offered no procompetitive justification for this portion of the First Wave Agreement. *Microsoft, 253 F.3d at 76*.

To remedy this finding, both parties propose injunctive provisions which prohibit Microsoft from entering into agreements predicated upon a promise by an ISV to refrain from taking action to advance the development of software which will compete with Microsoft platform **[**413]** software. In general, a prohibition on Microsoft's ability to extract promises from ISVs not to support software platforms which compete **[*220]** with Microsoft's PC operating system products will promote the ability of non-Microsoft software platforms to develop and compete with Microsoft's PC operating system products.

Section 11 of Plaintiffs' proposed remedy proffers a complete ban on *all* agreements that exchange consideration for a promise to refrain from "developing, licensing, promoting or distributing any Operating System Product or

---

[107] The Court observes that Mr. Fama's testimony refers only to a "material breach," despite the fact that the comparable provision in Plaintiffs' remedy proposal, § 2.a, does not include any requirement of materiality, but instead requires "good cause" for termination. In this regard, Mr. Fama appears to have conflated the concept of "good cause" with the separate and distinct concept of a "material breach." This conflation is again reflected in Plaintiffs Proposed Findings of Fact. *See, e.g.*, Pl. Prop. Findings of Fact P 410. The concept of "good cause" is broader than that of "material breach." For example, a company which discontinues a particular product line has "good cause" to terminate its supply contract, despite the absence of a "material breach."

Middleware product competitive with any Windows Operating System Product or Microsoft Middleware Product." SPR *§ 11*. [108] The substantial counterpart to this provision is § III.F.2 in Microsoft's proposed remedy. Like *§ 11* in Plaintiffs' proposed remedy, § III.F.2 of Microsoft's proposed remedy prohibits Microsoft from entering into agreements predicated on a promise not to support competing software. Microsoft's proposed remedy, however, is substantially more circumscribed, as it only limits agreements between Microsoft and ISVs relating to a "Windows Operating System Product," as that term is defined in Microsoft's proposed remedy. SRPFJ § III. **[**414]** F.2. In addition, this portion of Microsoft's proposed remedy permits agreements wherein Microsoft limits an ISV's support for competing software "if those limitations are reasonably necessary to and of reasonable scope and duration in relation to a bona fide contractual obligation of the ISV to use, distribute or promote any Microsoft software or to develop software for, or in conjunction with, Microsoft." *Id.*

Microsoft, through the testimony of its witnesses, complains vigorously **[**415]** that *§ 11* of Plaintiffs' proposed remedy is overly broad and will prohibit legitimate competitive behavior, and Plaintiffs correspondingly complain that § III.F.2 of Microsoft's proposed remedy is too narrowly drawn and contains significant exceptions. In particular, Microsoft, through the testimony of its witnesses, complains that *§ 11* of Plaintiffs' remedy impinges upon Microsoft's ability to enter into routine "work-for-hire" agreements with ISVs. *See, e.g.*, Gates P 384. Under a typical "work-for-hire" arrangement, Microsoft hires an ISV to create software for Microsoft according to particular Microsoft specifications, and when the software is complete, Microsoft retains full ownership of the resulting "work-for-hire" code. *Id.* In many instances, Microsoft will include the resulting code in its own products. *Id.* In conjunction with such an agreement, it is not uncommon for Microsoft to provide the ISV with access to Microsoft's source code and other intellectual property in order to facilitate the creation of the new software. *Id.* This mode of "outsourcing" software design is facilitated by an agreement that the ISV's employees who worked on the project would **[**416]** be prohibited, for a reasonable period of time, from developing for the benefit of Microsoft's platform competitors software similar to the work-for-hire project. *Id; see also* Elzinga P 142.

Plaintiffs do not dispute that such "work-for-hire" arrangements would be prohibited by *§ 11* and notably, Plaintiffs' economic expert, Dr. Shapiro, conceded that by doing so, *§ 11* of Plaintiffs' proposed **[*221]** remedy would likely deter procompetitive business agreements. *See* Tr. at 3290-91 (Shapiro). For this reason, Plaintiffs' economist refused to endorse *§ 11* as an economically beneficial remedy in this case. *Id.* The testimony offered by Plaintiffs' fact witnesses in support of *§ 11* is cursory and, therefore, unpersuasive. *See, e.g.*, Barksdale P 141; Richards PP 2, 209; Tiemann P 125. None of this testimony specifically explains the justification for prohibiting clearly procompetitive conduct. In short, Plaintiffs have failed to provide evidence which indicates that the benefit to be gained by *§ 11* of their proposed remedy outweighs the potential harm which will likely result from the elimination of a significant amount of legitimate business conduct.

Conversely, Plaintiffs **[**417]** criticize § III.F.2 of Microsoft's proposed remedy on the grounds that it does not go far enough in remedying the clearly established anticompetitive conduct. Plaintiffs first complain, through testimony such as that of Mr. Barksdale, that the exception in § III.F.2 which permits the kind of "work-for-hire" agreements discussed above has the capacity to nullify the restrictive portion of the provision. Barksdale P 114 ("This exception means that Microsoft is permitted to do precisely what the first part of [§] III.F.2 says Microsoft cannot do-to enter into a contract with an ISV that requires the ISV to use, distribute, or promote Microsoft software and to limit its use, distribution, or promotion of non-Microsoft software."). Mr. Barksdale's reading of this provision overstates the parameters of the exception and fails to take note of the significant fact that an acceptable limitation on an ISV's support for competing products is permissible *only* where such limitation is "reasonably necessary . . . and of reasonable scope and duration in relation" to the work-for-hire agreement with Microsoft. SRPFJ § III.F.2. Beyond his misguided reading of § III.F.2, Mr. Barksdale did **[**418]** not offer any explanation for why Microsoft should be

---

[108] Strikingly similar to *§ 11* of Plaintiffs' proposed remedy is § 6.a, which prohibits Microsoft from entering into agreements "in which another party agrees, or is offered or granted consideration to . . . restrict its development, production, distribution, promotion or use of (including its freedom to set as a default), or payment for, any non-Microsoft product, service, feature or technology." SPR § 6.a. Plaintiffs do not offer testimony which distinguishes the specific effect of § 6.a from *§ 11* in their proposed remedy.

limited in its ability to enter into "work-for-hire" agreements, which would be permitted pursuant to § III.F.2 of Microsoft's proposed remedy. Mr. Richards, on behalf of Plaintiffs, offered the same unsupported criticism as Mr. Barksdale and, likewise, failed to explain the benefit to be derived by competition from a severe limitation on Microsoft's ability to enter into "work-for-hire" and similar agreements. Richards P 209.

In the absence of the exception in § III.F.2 of Microsoft's remedy proposal, observed Dr. Elzinga, "it would be difficult or impossible for Microsoft to enter into lawful joint ventures relating to platform software." Elzinga P 142. Joint development agreements in the software industry typically provide that the parties to the agreement will not develop, promote or distribute products that compete with the products being jointly developed and/or marketed. *See* Elzinga P 142; Jones P 128. Such limitations are often necessary to enable beneficial commercial transactions to occur, Elzinga P 142, as they provide the participants to the agreement some assurance that their contributions to the joint venture **[**419]** will not be turned against them. Jones P 128. As even one of Plaintiffs' witnesses admitted, legitimate joint development programs advance innovation and benefit competition. *See* Ashkin P 132; *see also* Elzinga P 142; Jones P 128.

Mr. Barksdale also complained about the scope of § III.F.2 of Microsoft's proposal, noting that Microsoft's ability to enter into agreements is limited only with regard to agreements related to a "Windows Operating System Product" as that term is used in Microsoft's proposed remedy. Barksdale P 115. Mr. Barksdale interpreted **[*222]** the provision to mean that what "Microsoft could not accomplish using inducements related to Windows, it could still accomplish using inducements related, for example, to Internet Explorer." *Id.* Mr. Barksdale's complaint in this regard is based upon a misunderstanding of the use of the term "Windows Operating System Product" in the SRPFJ. "Windows Operating System Product" as defined in Microsoft's proposal *includes* IE and any other so-called "middleware" functionality which is distributed as part of the products known as Windows 2000 Professional, Windows XP Home, Windows XP Professional, and all of their successors. **[**420]** SRPFJ § VI.U; *see also* Tr. at 5212 (Jones). Accordingly, the Court rejects Mr. Barksdale's above-described complaint.

In sum, there is little disagreement that a remedy which curtails Microsoft's ability to enter into agreements wherein another industry participant agrees not to support any products competitive with Microsoft's monopoly product will foster competition. The Court finds, however, that a prohibition drawn too severely will hamper Microsoft's incentive to enter into joint venture, joint services, and work-for-hire agreements. These agreements have been shown, without dispute, to be valuable tools for the industry and beneficial to competition and, therefore, should not be discouraged.

B. Exclusive Agreements

1. Independent Software Vendors ("ISVs") and Original Equipment Manufacturers ("OEMs")

As the findings of liability with regard to Microsoft's agreements with ISVs and Apple, which is both an ISV and an OEM, *Microsoft, 253 F.3d at 71*, in conjunction with the First Wave Agreements, are predicated upon the First Wave Agreements' effect of exclusivity, *Microsoft, 253 F.3d at 75-76*, both remedy proposals **[**421]** offer provisions which curtail substantially Microsoft's ability to enter into agreements that include an exclusivity provision. Microsoft's remedy proposes a general limitation on Microsoft's ability to enter into exclusive agreements relating to "Microsoft Platform Software" not only with ISVs and OEMs, but also with IAPs, ICPs, and IHVs. SRPFJ § III.G.1. Similarly, Plaintiffs' remedy proposal includes a provision which would ban Microsoft from entering into contracts in which another party agrees to "distribute, promote or use any Microsoft product, service, feature or technology exclusively or in a minimum percentage." SPR § 6.c. In contrast to the corresponding provision in Microsoft's remedy proposal, however, the provision in Plaintiffs' proposed remedy is meant to eradicate Microsoft's use of exclusivity in any aspect of the corporation's contracting, whether or not related to its operating system products. *Id.*

Plaintiffs have not offered testimony specific to § 6.c of their proposed remedy. In fact, Plaintiffs presented only very limited testimony from three witnesses regarding § 6 in general. Mr. Richards of RealNetworks testified broadly that "Section 6 . . . contains **[**422]** an unconditional ban on exclusive dealing that is widely drawn to extend to the setting of defaults and restrictions on the use of redistributable code." [109] Richards P 195. Similarly, Mitchell Kertzman, the Chief Executive Officer of Liberate Technologies, a company **[*223]** which supplies interactive television software, Kertzman P 1, testified that § 6 "broadly prohibits any Microsoft exclusive contracts, including those to 'distribute, promote or use any Microsoft product or service, feature or technology exclusively or in a minimum percentage.'" *Id. P 58* (quoting SPR § 6.c). The only justification for this admittedly broad provision was offered by Plaintiffs' economist, Dr. Shapiro, who testified that "the broad language of Provision # 6 should help make it more easily, and effectively, enforceable." Shapiro P 167. Dr. Shapiro could not, however, endorse § 6 as written without noting that the provision "could be narrowed so that it does not cover agreements wholly unrelated to Microsoft Platform Software." *Id.* n.147. Upon further inquiry Dr. Shapiro acknowledged that the unnecessary breadth of § 6 rendered the provision inconsistent with his view, **[**423]** as an economist, of the principles which should guide the crafting of a remedy in this case. Tr. at 3655-59 (Shapiro). The sum of this testimony is wholly inadequate to explain the need for, and usefulness of, a remedy provision which would ban many legitimate and likely procompetitive contracts in markets unrelated to Microsoft's monopoly in the market for Intelcompatible PC operating systems. *See id.*; *see also* Gates PP 338-52; Murphy P 237.

The closest counterpart to § 6 of Plaintiffs' remedy proposal is § III.G.1 of Microsoft's proposed remedy, which prohibits Microsoft from entering into agreements that require fixedpercentage or exclusive distribution, promotion, use, or support **[**424]** of "Microsoft Platform Software." SRPFJ § III.G.1. The general prohibition extends beyond ISVs and OEMs and thereby extends beyond the specific liability findings entered in this case. Murphy P 173. The provision excepts from this prohibition "agreements in which [the third party] agrees to distribute, promote, use or support Microsoft Platform Software in a fixed percentage whenever Microsoft in good faith obtains a representation that it is commercially practicable for the entity to provide equal or greater distribution, promotion, use or support for software that competes with Microsoft Platform Software." SRPFJ § III.G.1. For example, SRPFJ § III.G.1 would permit an agreement with a particular Web site to offer 100 percent of its music content in Microsoft's media formats because such an agreement would not limit the site's ability to offer the content in other formats as well. Elzinga P 132. Such contracts, testified Dr. Elzinga, are unlikely to have an exclusive effect. *Id.*

Both Mr. Barksdale and Mr. Richards raised concerns that, if imposed, the exception in § III.G.1 would undercut the effectiveness of the provision and would enable Microsoft to foreclose channels **[**425]** of distribution through the use of fixed percentage agreements. *See* Barksdale P 117; Richards P 196. In particular, Mr. Richards intimated that the "commercially practicable" representation provision in § III.G.1 is problematic, because Microsoft, as a powerful monopolist, can forcefully obtain such a representation. Richards P 196. This complaint, of course, ignores the requirement that Microsoft obtain the representation in "good faith." SRPFJ § III.G.1. Were Microsoft to take any action, whether subtle or overt, to improperly induce the "commercially practicable" representation required by § III.G.1, it would violate the "good faith" provision in the remedy proposal and render the representation ineffective for compliance with the proposed decree. *Id.*

Taking a different tack, Mr. Barksdale contended that the "commercially practicable portion" of § III.G.1 of Microsoft's **[*224]** remedy proposal is "rather meaningless" because it requires only a "representation" and does not affect whether the entity will, in fact, "provide equal or greater distribution, promotion, use or support for software that competes with Microsoft Platform Software," SRPFJ § III.G.1. Barksdale P 117. **[**426]** In response, Dr. Elzinga observed that an ISV's provision of such a representation indicates that a fixed percentage agreement will not have any exclusive effect. *See* Elzinga P 132. As Mr. Barksdale's complaint fails to explain the benefit to competition to be derived from a ban on fixed percentage agreements which do not have an exclusive effect, the Court rejects Mr. Barksdale's criticism on this point.

Mr. Barksdale further complained about the latter portion of § III.G of Microsoft's remedy proposal, which permits Microsoft to enter into bona fide joint ventures or joint development agreements with third-party industry participants wherein such third parties agree not to compete with the object of the joint venture. Barksdale P 116. As with Mr.

---

[109] Plaintiffs' remedy proposal uses the term "redistributable code," but does not define the term. SPR § 6.b. "Redistributable code" is understood to be the code that Microsoft distributes separately from its Windows operating system in order to update portions of the operating system. *See* Tr. at 5166-67 (Jones).

Barksdale's criticism of § III.F.2, the Court observes that Mr. Barksdale failed to explain the benefit to be derived by limiting Microsoft's ability to enter into legitimate joint venture agreements. As the Court observed previously, limitations on a third party's distribution or use of competing software are often necessary to enable beneficial commercial transactions to occur and are not unusual in the context of a bona fide joint **[**427]** development or joint services agreement. Elzinga P 142; Gates P 383; Jones P 128. There is insufficient evidence to support a finding that a complete ban of all such joint ventures would benefit competition.

Mr. Richards raises a concern that a proviso at the end of § III.G of Microsoft's proposal threatens to nullify the prohibition in § III.G.1 on exclusive deals. *See* Richards P 198. The relevant portion of Microsoft's proposed remedy provides that "this section does not apply to any agreements in which Microsoft licenses intellectual property in [sic] from a third party." SRPFJ § III.G. Although he did not criticize the general principle that Microsoft should be permitted to include an exclusivity provision in conjunction with the license of intellectual property, Mr. Richards, observing that "many software deals involve the licensing of intellectual property as a matter of course," testified that Microsoft could utilize this exception to "legitimize any deal in which intellectual property is licensed by Microsoft from a third party, even if it is a very small or incidental part of the overall transaction." Richards P 198.

The proviso in the latter part of § III.G ensures **[**428]** that Microsoft is not discouraged from licensing third-party software, which is conduct that is beneficial to competition. However, Mr. Richards makes a salient point that, as written, § III.G may be readily circumvented by the gratuitous inclusion of a license of third-party intellectual property in an agreement so as to avoid the restrictions that § III.G would otherwise impose. Microsoft does not proffer any testimony which explains the necessity of such a broadly drawn exception in § III.G. As Mr. Richards testified, the exception can be narrowed so as to prevent Microsoft from evading the restrictions imposed by the earlier portion of the provision.

As the Court concluded with regard to agreements that limit competition, discussed above, a prohibition on agreements containing a term of exclusivity will benefit competition, provided that such a prohibition addresses only those agreements with an actual effect of exclusivity. Moreover, there are undoubtedly instances where a **[*225]** joint development agreement or license of intellectual property is appropriately accompanied by a term of exclusivity. Such exclusive terms are often the norm in the industry and have not been shown to have **[**429]** a detrimental effect upon competition. Accordingly, the Court finds that such agreements should be preserved, and even encouraged.

2. Internet Access Providers ("IAPs")

In the case of IAPs, the appellate court condemned Microsoft's contracts which extracted from IAPs a promise of exclusivity-meaning a promise to refrain from and/or sharply limit promotion or distribution of a non-Microsoft browser, in exchange for prominent placement of the IAP's product in the configuration of Microsoft's Windows operating system. *Microsoft, 253 F.3d at 68-71*. To remedy this finding, in general terms, the parties propose similar injunctive provisions specifically aimed at Microsoft's use of valuable placement on the desktop in conjunction with exclusionary contracts. Plaintiffs offer § 6.e of their remedy proposal, which provides that Microsoft may not enter into agreements "in which another party . . . [is] granted consideration to[,] . . . in the case of an agreement with an IAP or ICP, distribute, promote, or use a Microsoft product, service, feature or technology in exchange for placement with respect to any aspect of a Microsoft Platform Product." SPR § 6.e. **[**430]** Microsoft's remedy proposal suggests language which prohibits Microsoft from entering into any agreement with "any IAP or ICP that grants placement on the desktop or elsewhere in any Windows Operating System Product to that IAP or ICP on the condition that the IAP or ICP refrain from distributing, promoting or using any software that competes with Microsoft Middleware." SRPFJ § III.G.2.

Because of the broad definitions used in Plaintiffs' proposed remedy, § 6.e is not limited to the placement of icons and the like within the Windows operating system products, but concerns placement in virtually any Microsoft software product. *See* SPR § 6.e; Gates P 352. As a result, contends Microsoft, "Section 6.e would make it much harder for IAPs and ICPs to obtain promotional opportunities in a wide range of Microsoft software products." Gates P 352. Again, Plaintiffs' economist, Dr. Shapiro acknowledged the unnecessary breadth of § 6 and its inclusion of products and markets unrelated to the liability in this case. Tr. at 3655-59 (Shapiro). Based on this fact, Dr. Shapiro conceded that § 6 did not comport with his expert view of the principles which should guide the crafting of a remedy **[**431]** in this case. *Id.* Notably too, § 6.e of Plaintiffs' remedy proposal does not contain any reference to exclusivity or other forms of limiting competition. SPR § 6.e. Instead, the provision simply identifies a particular form of consideration-placement on the desktop-with which Microsoft may not trade. Plaintiffs have not offered sufficient evidence to justify the breadth of this particular provision in their remedy proposal.

As noted above, § III.G.2 of the Microsoft's remedy proposal addresses Microsoft's use of placement on the desktop in conjunction with exclusionary agreements. Like the pertinent portion of Plaintiffs' proposal, Microsoft's proposed remedy extends beyond agreements with IAPs and includes agreements with ICPs as well. Unlike Plaintiffs' proposal, however, § III.G.2 of Microsoft's remedy proposal prohibits the use of placement on the desktop as consideration only in agreements in which the IAP or ICP promises not to promote, distribute, or use software which **[*226]** competes with "Microsoft Middleware." SRPFJ § III.G.2. In this regard, the provision does not completely prohibit Microsoft from offering placement in a Windows product as consideration, but focuses **[**432]** instead upon those agreements which were found to have a substantial anticompetitive effect. [110] In short, § III.G.2 appropriately addresses the finding of liability against Microsoft for entering into exclusive agreements with IAPs regarding the placement of icons on the desktop, but the provision does not unnecessarily curtail legitimate competitive behavior.

[433] VI. DISCLOSURE OF APIs AND COMMUNICATIONS PROTOCOLS**

Both proposed remedies include provisions mandating that Microsoft disclose certain technical information for purposes of enabling interoperation. The term or concept of "interoperation" can apply both to the exchange of information and/or services between two different devices, as well as to the exchange of information and/or services between two different software programs running on the same device. Neither side maintains that the interoperability disclosures which appear in the two competing proposals are directly related to the imposition of liability. Rather, the disclosure provisions are aimed at the broader goals of unfettering the market and restoring competition.

A. Plaintiffs' Disclosure Proposal

Plaintiffs' interoperability-related provision is substantially more broad in scope than the comparable portions of Microsoft's proposed remedy. *Compare* SPR § 4, *with* SRPFJ § III.D-E. Plaintiffs' proposed remedy mandates the disclosure of "all APIs, Technical Information and Communication Interfaces" used by Microsoft to enable interoperation between any Microsoft application and Microsoft **[**434]** Platform Software on the same personal computer; each Microsoft Middleware Product and Microsoft Platform Software on the same personal computer; and each Microsoft software program installed on any type of computing device, including personal computers, servers, handheld devices, and set-top boxes, and the Microsoft Platform Software installed on any of these devices. SPR § 4. Most notable from even a cursory review of § 4 of Plaintiffs' proposed remedy is the fact that it mandates disclosures relating to interoperation between software which is not part of the Windows operating system and a number of non-PC devices. *See* Gates P 296; Madnick PP 148-49, 151. This Court addressed, as a preliminary matter, the relevance of these non-PC devices to the instant proceeding and concluded that, with one significant exception, these non-PC devices bear little relevance to the instant proceeding and, therefore, will not be addressed in the remedy. *See* Memorandum Opinion, Parts III.B.3, III.C. Nevertheless, the Court examines the

---

[110] Mr. Richards, of RealNetworks, asserts that § III.G.2 of Microsoft's proposed remedy is flawed because it does not extend its terms to software developers. Richards P 210. Mr. Richards argues that the provision would not stop Microsoft from offering an ISV placement on Windows for the ISV's software on the condition that it refrain from promoting middleware that competes with a Microsoft offering. *Id.* Mr. Richard's criticism, though technically accurate, ignores the fact that such agreements, because they condition consideration on refraining from supporting a competing product, would be prohibited pursuant to § III.F.2 of Microsoft's proposed remedy. *See infra* Part V.A; Tr. at 6753-54 (Elzinga).

impact of any portions of § 4 of Plaintiffs' proposed remedy **[*227]** which survive the Court's preliminary determination as to the scope of the remedy.

As the Court **[**435]** observed earlier, the definition in Plaintiffs' proposed remedy of "Microsoft Middleware Product" appears to include almost every Microsoft software product, without regard to the relationship of such software to Microsoft's PC operating system. *See* SPR §§ 4; 22.x; *see also* Memorandum Opinion, Part III.B.2.b. Plaintiffs incorporate the definition of "Microsoft Middleware Product" into the definition of "Microsoft Platform Software." SPR § 22.y. As a result, the requirement in § 4 of Plaintiffs' remedy proposal that Microsoft document and disclose the technical information that enables interoperation between a "Microsoft Middleware Product" and "Microsoft Platform Software" effectively requires Microsoft to document and disclose information relating to the exchange of services between virtually *any* two pieces of Microsoft software which run on a PC. Gates P 296; Madnick PP 148-49, 151. Addressing only this aspect of § 4 of Plaintiffs' proposed remedy, the breadth of the definition in Plaintiffs' proposal would require Microsoft to disclose vast amounts of its intellectual property across product lines unrelated to the relevant market in this case. *See* Gates PP 281, **[**436]** 294-302; Madnick P 152.

The breadth of these disclosures is reinforced, and expanded, if possible, by Plaintiffs' definition of "interoperate." Section 22.q of Plaintiffs' proposed remedy defines "interoperate" to mean "the ability of two products to effectively access, utilize, and/or support the full features and functionality of one another." SPR § 22.q. As this Court found in the attached Memorandum Opinion, Part III.B.3.a, the term "interoperate" is understood generally as the ability to exchange information and to use the information that has been exchanged. *See* Ledbetter P 65; Madnick P 46. Implicit in the term, as it is commonly used in the industry, is the concept that interoperability encompasses a continuum, rather than an absolute standard. *See* Madnick P 46, Tr. at 7108-09 (Bennett); Tr. at 5782-83 (Madnick); Tr. at 5477 (Short); *see also* Ledbetter PP 65-66; Tiemann P 179. Plaintiffs' definition of "interoperate" describes an aspiration of perfect interoperation, *see* Tr. at 5480-83 (Short), which does not exist in most contexts, particularly in a heterogeneous context. *See* Madnick PP 86-89.

The concept evoked by Plaintiffs' definition of "interoperate" **[**437]** equates interoperability with "interchangeability." Madnick P 86; *see also* Gates P 305; Tr. at 3229 (Appel) ("The disclosure [in § 4] would be helpful in making things that are . . . functional substitutes for the Microsoft platform software."); Tr. at 7111-12 (Bennett) ("Well, if you read, it says: Effectively, access, utilize and/or support the full features and functionality of one another. That, to me, taken in its entirety, which is the only way I can consider this definition, means the ability to clone."); Tr. at 2930-31 (Schwartz) ("I believe that [the definition of 'interoperate' and its use in Plaintiffs' remedy proposal] is designed to enable the creation of substitutes."). The definition of "interoperate" in Plaintiffs' remedy proposal serves to further Plaintiffs' apparent goal of enabling "drop-in" or "plug-in" replacements for Microsoft's products, or portions thereof. Madnick P 86; *see also* Tr. at 3229-31, 3168-75 (Appel); Tr. at 2930-31 (Schwartz). Pursuant to Plaintiffs' definition of "interoperate," a Windows client would not be "interoperable" with a non-Microsoft server unless Microsoft's competitors have the information necessary to ensure that their **[**438]** server operating systems can provide Windows **[*228]** clients with every service that a Microsoft server operating system provides. Madnick P 86; *see also* Gates P 305. If the definition of "interoperate" includes the ability to use all of the features that are in a Microsoft system on a third party's system that has not yet implemented those features, the expectation would be that Microsoft has to provide sufficient information to enable the third party to develop in its own product an implementation of the features in the Microsoft system. Tr. at 5483 (Short); *see also* Tr. at 3229-31 (Appel); Tr. at 2930-31 (Schwartz).

This kind of "interchangeability" exceeds the normal industry usage of the term "interoperate." *See* Madnick PP 86-90. The presently existing lack of interchangeability of products reflects "a host of technical and business factors on both the vendor-and customer-side of the equation." *Id. P 91*. From a technical perspective, the fact that there are many different ways to accomplish any given task means quite basically that different vendors will often accomplish the same task, however complex, in a different manner, such that the differing solutions **[**439]** are not typically interchangeable. *Id. P 92*. From a business perspective, there is an incentive to develop a product with features that are distinct from other products, such that the new features appeal to consumers and generate sales. *Id. P 93*. In addition, differences in consumer demand often lead to the creation and success of a product with strengths and weaknesses different from those of another product. *Id. PP 93-94*. Uniformity in features among the products of various firms and complete interchangeability defeat these aspects of competition. *Id.*

If implemented, the consequences of § 4 would be substantial and far reaching, such that the disclosures required under § 4 would enable the cloning of Windows. Gates PP 285, 289; Tr. at 6027-28 (Madnick). A "clone" is a piece of software that replicates the functions of another piece of software, even if that replication is accomplished by something other than the literal repetition of the same source or binary code. Madnick P 160. "Clone" is not necessarily a technical term, but it can be described as action which makes one piece of software function identically to, or fully **[**440]** replicate, another piece of software without copying the precise code to enable that function. Madnick PP 33, 160. Cloning is typically accomplished through reverse engineering, meaning studying the functionality of the other products and attempting to produce products that have similar functionality. Tr. at 6027 (Madnick).

The most obvious negative consequence of a provision which facilitates the cloning of Microsoft's technology is that it reduces Microsoft's incentive to innovate. Plaintiffs' own economic expert, Dr. Shapiro, acknowledged that the mandated release of technology can have the undesirable side effect of reducing the monopolist's return on innovation. Shapiro P 92. Dr. Shapiro went on to say that he did not think that the remedy imposed in this case should enable the cloning of Microsoft's technology. Tr. at 3321 (Shapiro). However, Microsoft presents ample testimony illustrating that the mandatory disclosures in § 4 of Plaintiffs' proposed remedy will have precisely that undesirable effect.

Microsoft's intellectual property is one of its primary assets. *See* Elzinga P 104; Gates PP 124-25; Murphy P 221; *see also* Tr. at 3329 (Shapiro). Microsoft does not appear **[**441]** to have substantial assets in the form of factories or natural resources, traditional revenue drivers of "old economy" firms, *Microsoft, 253 F.3d at 49*. In fact, Mr. Gates testified that Microsoft does not have *any* physical assets which he considers **[*229]** to be "important" to the success of the company. Gates P 124. Instead, Microsoft's products consist almost entirely of information Microsoft creates-"primarily instructions to microprocessors on how to perform various functions." *Id.* Absent protection for intellectual property, there exists little reason to invest in developing software. Gates P 126; *see also* Frei P 24; Ulmer P 21.

Enabling cloning is a windfall for competitors. *See* Elzinga P 85-86; Tr. at 3478 (Shapiro). Even absent literal copying of software code, software innovations developed by one firm can be implemented by competitors writing their own code. [111] Gates P 127. The more information one firm has about a competitor's product, the easier it is to replicate the key features and other innovations of the product. *Id.*; *see also* Bennett P 117. The broad API disclosures required by § 4 would likely provide other software companies **[**442]** with the equivalent of the blueprints not only to the Windows operating system for PCs, but also to the server version of Windows. Gates P 289; *see also* Tr. at 3168-75 (Appel). Once provided with the equivalent of the blueprints for Windows, competitors would have little trouble, and comparatively less cost, writing their own implementation of everything valuable in Windows, including the capabilities it provides to developers via APIs. Gates PP 289-90; Tr. at 3168-75 (Appel).

In the software industry, some information about competitors' products is available and other information is protected by intellectual property laws. The mandated disclosures in § 4 of Plaintiffs' proposed remedy (and the **[**443]** related enabling provisions) would enable Microsoft's competitors to clone many features without violating intellectual property laws. *See* Elzinga P 86. Competitors could thus develop products that implement Microsoft's Windows technology at a far lower cost since they would have access to all of Microsoft's research and development investment. Gates PP 124-27, 289-90. Moreover, technological advancement would be largely simplified for Microsoft's competitors because it is comparatively easier to mimic all the functionality rather than to create something new. Gates PP 289-90. In this light, § 4 of Plaintiffs' proposed remedy is exposed as an intellectual property "grab" by Microsoft's competitors. Elzinga P 85. Such a "grab" has been shown to assist

[111] Plaintiffs' computer science expert, Dr. Appel, coyly avoids the cloning issue by utilizing the term "copy" in his testimony. Appel PP 99-100. As a "clone," meaning a replicate functionality, can be created in the absence of literal copying, Dr. Appel's selective word choice serves only to obscure the issue.

competitors by relieving them of the costly burden of reverse engineering and new innovation, far more than has been shown to advance competition.

Plaintiffs' economic expert, Dr. Shapiro, acknowledged that Microsoft has a legitimate interest in protecting against a technology grab and that such an interest should be protected. Tr. at 3315 (Shapiro). Although Dr. Shapiro, in his direct testimony, endorsed the notion of API and communications **[**444]** protocol disclosures because such disclosures would assist the performance of networks with non-Windows servers and Windows clients and would facilitate the platform capabilities of cross-platform middleware and server operating systems, *see* Shapiro PP 145-51, 184, he did so without any real understanding of what § 4 of Plaintiffs' remedy proposal would entail in practice, Tr. at 3314-15 (Shapiro). Dr. Shapiro acknowledged Microsoft's "interest" in protecting **[*230]** against the "misappropriation" of its technical information and conceded a complete inability to understand the effect of § 4 of Plaintiffs' remedy upon that "interest." *Id.* at 3315. Indeed, seeming somewhat aware of the significant ambiguities in Plaintiffs' remedy proposal, Dr. Shapiro envisioned a kind of ongoing negotiation between the parties regarding the implementation of § 4 of Plaintiffs' proposed remedy in practice. *Id.* at 3317-18. Further, Dr. Shapiro viewed § 4 as a mere extension of the type of disclosures already made by Microsoft as part of its usual course of business, Shapiro PP 147-48, and could not envision or understand the depth of change which would be required by the extremely broad disclosures **[**445]** required by § 4 of Plaintiffs' remedy proposal, Tr. at 3314-15 (Shapiro). This lack of understanding rendered Dr. Shapiro wholly unable to value the quantum of intellectual property which Microsoft would be required to relinquish as a result of § 4 of Plaintiffs' remedy proposal. Tr. at 3320-22 (Shapiro). Dr. Shapiro's lack of economic analysis of § 4 renders uncontroverted the analyses of Drs. Elzinga and Murphy, who concluded that § 4 of Plaintiffs' remedy proposal works an expropriation of substantial amounts of Microsoft's intellectual property which is harmful to both consumers and competition. Elzinga P 113; Murphy PP 219-21; Tr. at 4028, 4059-60 (Murphy).

Beyond the clearly negative economic consequences of § 4, the disclosures mandated by § 4 of Plaintiffs' proposed remedy will have significant negative effects on Microsoft's technology. There is no dispute that it is presently Microsoft's practice to publish APIs after they have been tested and where they have broad applicability. *See* Shapiro P 148; *see also* Borduin PP 35-37; Frei P 19; Gates P 99; Hofstader P 58; Short P 27. Likewise there is little dispute that Microsoft chooses not to publish APIs where the **[**446]** interfaces are unstable. *See* Shapiro P 148. Reliance upon such interfaces has the potential to cause third-party software not to work or Windows to crash. Frei P 25; Gates P 323; Hofstader P 59; Madnick P 153. It is a well-understood rule in the industry that once an API is published, the software developer publishing the interface guarantees a certain result when it is called with certain parameters such that it cannot be substantially altered without effectively "breaking" applications which rely on the API. *See* Short P 8; *see also* Bennett PP 92-93; Madnick P 153; Tr. at 4214-15 (Borduin); Tr. at 174-76 (Green).

Because of this rule, not every interface in a particular software product is "published." Instead, it is common to implement two versions of an interface, a private interface for "trusted" software components, meaning the components that are known to behave in a particular manner, and a public interface for "untrusted" components that are not presumed to be so well behaved. Bennett P 91. In this model, trusted components are typically other parts of the operating system, while untrusted components are more likely third-party programs, such as applications, written **[**447]** to call upon operating system services. *Id. PP 91-92*. One of Microsoft's computer science experts, Dr. John Bennett, explained in this framework:

> System calls that directly access critical operating system components would typically be part of the private interface; system calls that indirectly access critical operating system components in a restricted manner would typically be part of the public interface. One of the advantages of this approach to software development is that the internal details **[*231]** of data representation are hidden from the user of that data representation. The operating system developer is free to make changes to this internal data representation as long as the external interfaces relied upon by third parties are preserved. There is also an advantage to having information about the private interface be closely held. If the number of modules using the private interface is small, it is easier to make changes in the private interface in order to improve system performance or reliability, or to add new functionality.

Once published, it is difficult to change the public interface used to access operating system services. This is because programmers who have **[**448]** written code that relies on that public interface expect it not to change. Significant changes to the public interface may even necessitate a complete rewriting of the original application program, a costly and time-consuming undertaking.

Opinion

[448] [*231]**

Bennett PP 92-93; *see also* Jones P 108. The computer science experts that testified in this case universally agree that the broad disclosure of purely unpublished, or "internal," interfaces is a dangerous undertaking because of the potential to destabilize applications and the operating system. *See* Bennett PP 93-94; Madnick P 153; Tr. at 3179-80 (Appel). Furthermore, the broad disclosure of internal interfaces eliminates the operating system designer's ability to alter the interface, which in turn will impede product flexibility and innovation. *See* Madnick P 153. Lastly, a number of witnesses agreed that the broad disclosure of internal interfaces, as enforced by examination of Microsoft's source code, SPR § 4.c, could pose a substantial threat to the security and stability of Microsoft's software. Allchin P 39; Bennett PP 100, 139-40; Gates P 326; Tr. at 4639-43 (Gates); *see also* Tr. at 1555-56 (Ledbetter).

Microsoft **[**449]** is not unusual in that it maintains internal interfaces, Tr. at 1555-56 (Ledbetter), nor is the number of such undisclosed interfaces unusual. Madnick P 153. Section 4 of Plaintiffs' proposed remedy would mandate that the documentation and disclosure of a vast number of Windows' internal interfaces. [112] Bennett P 96; Gates P 323; Madnick P 152. The Court heard extensive technical testimony detailing why such a result is highly undesirable. Moreover, the lone economist to endorse § 4 of Plaintiffs' proposal did so pursuant to the misconception that the provision would "not require Microsoft to publish unstable, internal APIs." Shapiro P 148. Given this evidence, the Court finds that the broad disclosures, including the disclosure of internal interfaces, advanced by Plaintiffs pose a risk of substantial harm not only to Microsoft, but to other participants in the industry, as well as to consumers.

[450]** Having concluded that there are substantial, negative consequences which are likely to result from the broad disclosures required pursuant to § 4 of Plaintiffs' remedy proposal, the Court turns its attention to whether the justification proffered for requiring such disclosures as part of a remedy in this case outweighs this harm. Plaintiffs' economic expert advances the "parity principle" as the economic rationale underlying the disclosures. Shapiro P 122. The parity principle posits that information should be shared to ensure that **[*232]** a non-Microsoft product interoperates with Windows as effectively as does a Microsoft product. *See id.* PP 122, 139. "Applying the parity principle," argues Dr. Shapiro, "will clearly improve the performance of non-Microsoft middleware, to the benefit of consumers and, thus, make it easier for innovative middleware to lower the applications barrier to entry." *Id.* P 146.

The "parity principle" advocated by Dr. Shapiro is borrowed from the telecommunications context. Tr. at 3680 (Shapiro). In that context, for example where "there has historically been a monopolist controlling local telephone service," pursuant to the "parity principle," long distance **[**451]** carriers are ensured equal access to "whatever services" the local carrier provides to its own "long distance arm." *Id.* Dr. Shapiro noted that the "parity principle" in the telecommunications context applied as part of a regulatory scheme, rather than a context of "pure antitrust." *Id.* at 3681. Although Dr. Shapiro borrowed his guiding economic principle from another field, he offered little testimony to explain why such borrowing was appropriate. Dr. Shapiro's explanation provided, in full, that "here in a remedy phase we are putting in some rules that are not completely dissimilar to regulatory rules." *Id.* at 3681.

Despite his certainty that application of the "parity principle" is appropriate in this case, Dr. Shapiro was unable to assess the "competitive effects and consumer welfare effects, to understand exactly what the operation of [the 'parity principle'] in practice is going to mean, not just for Microsoft, but for Microsoft's customers, for Microsoft's competitors, and for the marketplace as a whole." Tr. at 3315 (Shapiro). This uncertainty exists despite Dr. Shapiro's own acknowledgment that the "remedy ultimately should be judged based on its impact on consumers. **[**452]** " Shapiro P 49.

Defendant's economic expert, Dr. Elzinga, disputed that the "parity principle" is an appropriate guide to the parameters of a remedy in this case. Elzinga PP 50-52; Tr. at 6868 (Elzinga). Dr. Elzinga took the view that the principles applicable in the field of public utility regulation were unlikely to be particularly appropriate for application to the software industry, which presents its own unique dynamics. Tr. at 6868 (Elzinga). Dr. Elzinga expressed concern that adherence to the "parity principle" would result in a massive regulatory regime. *Id.* Such a regime threatens to place the judiciary in a role for which it is not well-suited. *United States v. Paramount Pictures, 334 U.S. 131, 163, 92 L. Ed. 1260, 68 S. Ct. 915 (1948)* (noting that a remedy which "involves the judiciary in the administration of intricate and detailed rules" is undesirable because "the judiciary is unsuited to affairs of business management . . . .").

Given the testimony of all of the economic experts, the Court cannot conclude that the parity principle is appropriately applicable to this case. Most troubling is the lack of explanation for why a principle which has been applied in the field of telecommunications **[**453]** is appropriate for consideration in the software market, which is more often noted for its unusual features than for its similarity to other markets. Compounding this concern is Dr.

---

[112] The disclosure provisions in Microsoft's remedy proposal, § III.D, would result in the documentation disclosure of some interfaces which are presently "internal" or undisclosed but plainly this disclosure would not be of a quantum comparable to that associated with Plaintiffs' remedy proposal. *See* Jones P 107.

Shapiro's inability to foresee the precise manner in which the principle would operate. In at least one regard, the disclosure of APIs, for example, Dr. Shapiro's assumption that disclosures made pursuant to the "parity principle" would not require Microsoft to disclose internal interfaces has been shown to be erroneous. Given these concerns, the Court cannot subscribe to the "parity **[*233]** principle" as the appropriate guide for a remedy in this case.

Aside from the now-rejected "parity principle," Plaintiffs have not offered any other justification for the creation of a market wherein Microsoft's technologies, or portions thereof, can be cloned by competitors so as to enable the ready substitution of these cloned technologies for the Microsoft technologies. Jonathan Schwartz, Chief Strategy Officer for Sun Microsystems, Inc. ("Sun"), Schwartz P 1, testified that Sun adheres to a business model wherein competing companies produce multiple implementations of a standard set of Sun APIs. Tr. at 2931 (Schwartz). **[**454]** Mr. Schwartz testified that the disclosures required by § 4 of Plaintiffs remedy proposal were intended to implement just such a model for Microsoft's APIs. *Id.* Similarly, Dr. Appel testified that the purpose of enabling the creation of functional substitutes is to permit the sale of "platform software to a user who might have otherwise bought the Microsoft platform software," because the functional substitute "could run the set of applications that the end-user wants to run." Tr. at 3229 (Appel). Neither witness, however, nor any witness with economic expertise, testified that there exists any economic justification for enabling the creation of functional substitutes (clones) of Microsoft's technology. Indeed, Plaintiffs' own economic expert, Dr. Shapiro, expressly rejected the creation of functional substitutes as an appropriate goal for the remedy in this case:

> I would not favor remedies in this case permitting rival operating systems to clone Windows or to copy the Windows source code. . . . My refusal to support such remedies . . . flows from my view that permitting the cloning of Windows would go beyond "restoring competition" in the monopolized market.

Shapiro **[**455]** P 87 (footnote omitted). In sum, Plaintiffs have not established that the creation of functional substitutes of Microsoft technology in a variety of product markets, as implemented through § 4 of Plaintiffs remedy proposal will enhance competition in the monopolized market in any way.

B. Microsoft's Disclosure Proposals

Microsoft's proposed interoperability disclosures are two-fold. Section III.D of Microsoft's remedy proposal requires Microsoft to make disclosures of "APIs and related Documentation that are used by Microsoft Middleware" which are to be used "for the sole purpose of interoperating with a Windows Operating System Product." SRPFJ § III.D. Section III.E of Microsoft's remedy proposal mandates that Microsoft disclose "for the sole purpose of interoperating or communicating with a Windows Operating System Product . . . any Communications Protocol that is . . . (i) implemented in a Windows Operating System Product installed on a client computer, and (ii) used to interoperate, or communicate, natively (*i.e.,* without the addition of software code to the client operating system product) with a Microsoft server operating system product." SRPFJ § III.E.

[456]** "Communications protocols," as that term is used in the computing industry, refers to the rules for the transmission of information between different systems or devices. *See* Appel P 54; *see also id.* P 55; Gates P 101; Ledbetter P 31; Tr. at 170 (Green); Tr. at 5498 (Short). A protocol can be comprised of several layers, with the lower layers providing simple, low-level, basic services, and the upper layers repackaging the lower-layer services into higher-level, more complex and detailed services. Appel P 54. By using communications protocols supported in Windows, or other communications protocols that developers **[*234]** can add to Windows, via the installation of software, information can be exchanged between Windows-based PCs and computers running other operating systems. Gates P 102.

"Native" communication is one of at least five basic approaches to achieving interoperability between Windows client operating systems and non-Microsoft server operating systems. Short P 35. Native means without the addition of software code to the client. Tr. at 975, 1146 (Tiemann); *see also* Short PP 36-38. Hence, where communication between a Windows client and a particular server is native, **[**457]** there is no additional software code running on Windows which is necessary to the communication. Likewise, where a particular communications protocol is "supported natively," the implication is that the device can communicate or interoperate with another device using that protocol without the addition of software to assist in the communication.

Despite Microsoft's inclusion of §§ III.D and III.E in its remedy proposal, Microsoft presented the testimony of Dr. Elzinga that the inclusion of the provisions merely reflects the "give-and-take" of Microsoft's settlement with the United States in *United States v. Microsoft*, No. 98-1232 (D.D.C.). Elzinga P 138. In contrast to this "party line," however, Dr. Elzinga acknowledged that the provisions in Microsoft's remedy which concern interoperation are "designed to look forward to restore a middleware threat" to Microsoft's PC operating system dominance and "to ensure a level of interoperability between clients and servers that would . . . restore, promote, enable that threat to be effectuated in the marketplace, but . . . without requiring Microsoft to give up all of its intellectual property." Tr. at 6873 (Elzinga).

Beyond their general **[**458]** complaints that Microsoft's proposed remedy does not accomplish the cloning enabled by Plaintiffs' remedy proposal, Plaintiffs' witnesses criticized § III.E of Microsoft's proposed remedy more specifically based upon the view that the disclosures which are required by Microsoft's proposed remedy are unjustifiably limited to *native* communication with a Microsoft server operating system product. *See, e.g.*, Schwartz P 165; Tiemann P 184. As the Court recounted above, "native" communication, means communication that is accomplished without the addition of software code to the client. In other words, where Windows provides "native" support for a particular communications protocol, no additional software must be added to the operating system in order to enable interoperation between the Windows client and the server. *See* Tr. at 1146 (Tiemann). Mr. Tiemann testified that he is aware of only limited instances where Windows communicates natively with a server. Tiemann P 184*.* Of course, where the communication is not "native" it does not exclusively involve a Windows client and a Microsoft server, but incorporates another software product that is added to run on "top" of Windows. **[**459]** *See, e.g.*, Tr. at 1155-56 (Tiemann) (discussing communication between Microsoft's "Outlook" software product installed on a Windows client and a "Microsoft Exchange Server").

Underlying the disclosure of technology which enables interoperation in a network context is the theory that the alternative platform provided by a non-Microsoft server operating system will not develop into a platform threat if it is unable to interoperate well with Windows clients. *See* Shapiro P 144 (treating server operating systems as "middleware"). Because Microsoft can ensure successful interoperation between Windows clients and its own server operating systems, the disclosure of the protocols used for such interoperation **[*235]** will enable similarly successful interoperation between Windows clients and non-Microsoft server operating systems. *Id. P 145*. However, where software code is added to Windows to achieve interoperation with Windows servers, the means of interoperation no longer involves the capabilities of the monopoly product-the PC operating system, but instead involves some other software product which runs on Windows, but is not part of Windows itself. In this light, the limitation to "native" **[**460]** interoperation in § III.E appears to flow directly from a recognition of the fact that Microsoft's anticompetitive behavior in this case is tied to its monopoly in a carefully defined market, rather than to some more general dominance in the broader software industry.

Finally, Plaintiffs' witnesses were critical of Microsoft's proposed disclosure provisions because the Microsoft remedy proposal does not define "interoperate." *See, e.g.*, Barksdale P 133; Pearson P 67; Richards P 91; Tiemann P 179. The concerns raised in this context derive from the fact that interoperation generally encompasses a continuum. *See* Memorandum Opinion, Part III.B.3.a. As Mr. Barksdale testified, for example, there is a concern that Microsoft will not recognize all portions of the continuum in determining what information to disclose pursuant to § III.D and E. *See* Barksdale P 133. With regard to § III.D of Microsoft's proposal, the term "interoperate" is used to circumscribe the appropriate use for which the technical information must be disclosed, and therefore, the term is not central to Microsoft's understanding of its obligations under that provision. SRPFJ § III.D; Tr. at 6128 (Poole). **[**461]** The obligations imposed by § III.D are determined by the definition of "API," which is provided in Microsoft's remedy proposal. SRPFJ § III.D; Tr. at 6128 (Poole). With regard to § III.E, Microsoft's proposal includes a concise definition of "interoperate" in its text, stating that Microsoft shall make available communications protocols used to "interoperate, or communicate," with a Microsoft server operating system product. SRPFJ § III.E. This use of a basic definition incorporates the continuum of what is reasonably understood in the industry to constitute "interoperation." *See* Tr. at 7110 (Bennett). This continuum, of course, stops short of requiring the type of perfect interchangeability connoted by Plaintiffs' definition of "interoperate." See Madnick PP 86, 88. Based on the foregoing, the Court finds the criticism of the absence of a definition of the term "interoperate" in Microsoft's remedy proposal to be without merit. [113]

[462] [*236] VII. ENABLING LICENSES**

Both remedy proposals contain provisions which address the issue of licenses and appropriate royalties for the use of intellectual property released pursuant to the dictates of the remedy in this case. Not surprisingly, however, the two proposals are polar opposites in the way they resolve the issue. Pursuant to § 15 of Plaintiffs' remedy proposal, "all intellectual property rights owned or licensable by Microsoft that are required to exercise any of the options or alternatives provided" under the Final Judgment are to be licensed on a royalty-free basis. SPR § 15. In contrast, § III.I of Microsoft's remedy proposal requires that the intellectual property rights "required to exercise any of the options or alternatives expressly provided to them" under the Final Judgment must be licensed pursuant to "reasonable and non-discriminatory" terms. SRPFJ § III.I. Therefore, § III.I leaves open the possibility that Microsoft may charge a "reasonable and non-discriminatory" royalty for such licenses. *Id.* Both proposed provisions can be viewed as "enabling provisions" in that they serve to ensure that the other provisions in the remedy function as expected. **[**463]** *See* Tr. at 3292-93 (Shapiro).

It is undisputed that one of Microsoft's primary assets, probably its primary asset, is its intellectual property. Elzinga P 104; Tr. at 3329 (Shapiro). Indeed, as noted earlier, Mr. Gates testified that Microsoft does not have *any* physical assets which he considers "important" to the success of the company. Gates P 124. Royalty-free licensing would divest Microsoft of intellectual property assets without the provision of compensation to Microsoft. Elzinga P 104. Plaintiffs' economic expert, Dr. Shapiro concedes that any forced divestiture of assets is a structural remedy. Tr. at 3328-29 (Shapiro); *see also Elzinga* P 104. Section 15 is an unusual structural remedy in that it does not provide Microsoft with *any* compensation for its forced relinquishment of assets. *See* Elzinga P 104.

In his direct testimony, Dr. Shapiro did not offer an opinion with regard to § 15 of Plaintiffs' remedy. Tr. at 3292-93 (Shapiro). When asked, Dr. Shapiro indicated that he viewed § 15 of Plaintiffs' proposed remedy as an "important enabling provision" which "did not have a life of its own." *Id.* at 3293. Dr. Shapiro explained that the provision

---

[113] The vast majority of Plaintiffs' criticisms of § 4 are rendered irrelevant by the Court's ruling regarding the scope of the remedy, *see* Memorandum Opinion, Part III.B-C. Plaintiffs offer one additional, very narrow criticism of § III.D of Microsoft's proposed remedy, however, which is not addressed by the Court's rulings on the issue of the scope of the remedy. This criticism rests upon the assertion that, at present, Microsoft will not be required to make disclosures of APIs relied upon by the most recent version of the Windows Media Player, which was included with Windows XP. Richards P 87. This criticism arises from the fact that, despite its inclusion in Microsoft's most recent version of the Windows operating system, Windows Media Player XP (also known as Windows Media Player 8.0) has not been distributed separately from Windows. As a result of the definition of "Microsoft Middleware," *see* Memorandum Opinion, Part III.B.2.a.iv, complain Plaintiffs, the APIs which permit "Windows Media Player" to interact with other portions of Windows do not fall within the API disclosure requirements in Microsoft's proposed remedy.

In the Court's view, this criticism overstates the issue. The fact that Microsoft has not yet distributed Windows Media Player XP separately from Windows XP will not excuse Microsoft from providing API disclosures with regard to the APIs used by the separately distributed code from Windows Media Player 7.0 to interact with Windows 2000 Professional. As a factual matter, Windows Media Player XP uses essentially the same interfaces to interoperate with Windows XP that Windows Media Player 7.0 uses to interoperate with Windows 2000 Professional. Poole P 75. Microsoft is already in the process of identifying those interfaces for disclosure. *Id.* Microsoft's Vice President of Media Platforms, Will Poole, *id.* P 1, testified that Microsoft will "distribute the next major version of [Windows Media Player], code-named the 'Corona player,' separately from the rest of the Windows operating system." *Id.* P 76. The "Corona player," which will be called Windows Media Player 9.0, is the successor to both Windows Media Player 7.0 and Windows Media Player XP. *Id.* Mr. Poole testified that the commercial release of Windows Media Player 9.0 will occur during the second half of this year. *Id.* By virtue of its separate distribution, the APIs relied upon by Windows Media Player 9.0 to interact with Windows would have to be disclosed pursuant to § III.D. *Id.* P 77. Based upon this testimony, there appears to be little, if any, impact flowing from the fact that Windows Media Player XP has not been distributed separately from Windows XP.

existed **[**464]** so as to prevent Microsoft from having "the ability to inhibit [the] proper operation [of other remedial provisions] through certain terms and conditions **[*237]** of intellectual property licenses." *Id.* In addition to Dr. Shapiro's testimony regarding § 15, Plaintiffs present the testimony of three industry participants. Mr. Richards of RealNetworks offered the rationale that the royalty-free nature of the license would "ensure that Microsoft cannot use royalty schemes to thwart the development of middleware capable of lowering the applications barrier to entry." Richards P 110. Mr. Schwartz from Sun, though he did not offer any independent justification for the denial of royalty payments to Microsoft, attempted to bolster Mr. Richards' view by noting that "Microsoft does not typically charge anything for licenses of APIs and protocols, as opposed to software products." Schwartz P 141. Finally, Larry Pearson, Associate Director of Product Design and Strategic Marketing for SBC Operations, Inc., [114] Pearson P 1, observed quite basically that the royalty-free nature of § 15 would be useful to competitors because it makes competition with Microsoft less costly. *Id.* P 89.

[465]** Neither Dr. Shapiro, nor any of the other witnesses who offered testimony regarding § 15, explained why the mandate of non-discriminatory and reasonable license terms provided in § III.I of Microsoft's remedy proposal was insufficient to accomplish Dr. Shapiro's goal of preventing Microsoft from imposing terms and conditions upon its intellectual property licenses which would inhibit the effectiveness of the other remedy provisions. In fact, none of Plaintiffs' witnesses explained the manner in which *competition* would be enhanced by royalty-free licenses of Microsoft's intellectual property. In contrast, the testimony makes very clear that Microsoft's competitors stand to benefit greatly from royalty-free licenses.

VIII. SECURITY EXEMPTION

Just as § III.I of Microsoft's remedy proposal and § 15 of Plaintiffs' proposed remedy can be viewed as enabling provisions, § III.J of Microsoft's remedy proposal serves a similar enabling purpose. [115] Pursuant to § III.J.1 of Microsoft's remedy proposal, Microsoft is relieved of its obligations to "document, disclose or license [portions of APIs or Documentation or portions or layers of Communications Protocols] to third **[**466]** parties" where such documentation, disclosures, or licenses would "compromise the security of a particular installation . . . of antipiracy, anti-virus, software licensing, digital rights management, encryption or authentication systems." SRPFJ § III.J. Concomitantly, § III.J.2 entitles Microsoft to place certain conditions on its licenses of "any API, Documentation, or Communications Protocol related to anti-piracy systems, anti-virus technologies, license enforcement mechanisms, authentication/authorization security, or third-party intellectual property protection mechanisms of any Microsoft product." *Id.* § III.J.2. Pursuant to § III.J.2 Microsoft may condition a license on the requirement that the licensee:

> (a) has no history of software counterfeiting or piracy or willful violation of intellectual property rights, (b) has a reasonable business need for the API, Documentation or Communications Protocol for a planned or shipping product, (c) meets reasonable, objective standards established by Microsoft for certifying the authenticity and viability of its business, (d) agrees to submit, at its own **[*238]** expense, any computer program using such APIs, Documentation or Communication **[**467]** [sic] Protocols to third-party verification, approved by Microsoft, to test for and ensure verification and compliance with Microsoft specifications for use of the API or interface, which specifications shall be related to proper operation and integrity of the systems and mechanisms identified in this paragraph.

Id. This provision, observed Dr. James Allchin, Group Vice President for Platforms at Microsoft, Allchin P 1, enables Microsoft to protect the security of computer installations by addressing "three major security concerns, all of which pose serious problems for both Microsoft and its customers: (i) hackers; (ii) viruses; and (iii) piracy." *Id.* P 17; *see generally* Allchin PP 18-38. That hackers, viruses, and piracy pose substantial security concerns to Microsoft and consumers is not disputed.

---

[114] SBC Operations, Inc. is a wholly-owned subsidiary of SBC Communications Inc. Pearson P 1

[115] Plaintiffs' remedy contains no substantial counterpart to § III.J of the SRPFJ.

Dr. Allchin explained Microsoft's view that "security mechanisms must walk a careful balance between being **[**468]** open for review and being secret to protect specific information." Allchin P 20. In this regard, Dr. Allchin acknowledged, as Plaintiffs' witnesses have asserted, Appel P 122; McGeady PP 71-72, 74-77, that "many 'eyes' examining the specification of a security protocol or a reference implementation of that protocol will eventually lead to a better protocol." Allchin P 20. Dr. Allchin, however, insisted that there is another "side of the balance" which dictates that non-disclosure of the "specifics of the implementation of a security mechanism" is also a good practice. Allchin P 21. As an example, Dr. Allchin pointed to Microsoft's Digital Rights Management (DRM) systems, wherein a "standard or proprietary algorithm is implemented in an 'obfuscated' way to protect digital content." Allchin P 27. In this model, the encoding format may be widely known, while the algorithms and keys used to decode that data remain secret. *Id.*

Plaintiffs' witnesses criticized § III.J of Microsoft's remedy proposal largely because they disagree with Dr. Allchin's and Microsoft's philosophical approach to security. Steven McGeady, a former software developer and Vice President of Intel Corporation, **[**469]** McGeady P 1, who testified on behalf of Plaintiffs and in opposition to § III.J of the SRPFJ, stated:

> It is well understood in the software industry that Microsoft's security system relies on the secrecy of the underlying APIs and protocols. If this secret is discovered, either by a software hacker or through other means, the security of tens or hundreds of millions of computer systems is compromised. In my experience in developing security and authentication protocols, it is rarely advantageous to employ this type of "security through obscurity" mechanism.

Id. P 76. Mr. McGeady instead advocated a model of security which Microsoft acknowledges, but to which Microsoft does not adhere exclusively. *Id.*; Allchin P 21. "The most secure information systems," testified Mr. McGeady, "do not rely on the secrecy of the APIs or protocols, but rather rely on the underlying mathematical algorithms-algorithms that are available in the public domain." McGeady P 74. Plaintiffs' computer science expert echoed this preference, asserting that "the best and most prevalent method for achieving secure communication is public disclosure of the APIs and communications protocols underlying **[**470]** a security algorithm in conjunction with the issuance of private authentication keys." Appel P 122. In this regard, Dr. Appel testified that exceptions from disclosures, even the broad disclosures mandated by Plaintiffs' proposed remedy, **[*239]** would not be necessary to protect "the security of a *properly designed* computer software or system." Appel P 128 (emphasis added). Notwithstanding this testimony, Mr. McGeady acknowledged that "Microsoft is correct" that there are instances in which disclosure of certain algorithms will defeat security. McGeady P 77.

Dr. Appel testified that § III.J.1 of Microsoft's proposed remedy is broader than necessary, Appel P 126, and that if broadly interpreted, the provision could "exempt Microsoft from disclosing interfaces that are needed for interoperation based on technically unjustified 'security' issues," *id.* P 128. Dr. Appel's fear that Microsoft will rely upon "unjustified 'security' issues" ignores the language of the provision. As Dr. Allchin noted repeatedly, § III.J.1 protects from disclosure only that information which "*would compromise* the security of a particular installation . . . of anti-piracy, anti-virus, software licensing, **[**471]** digital rights management, encryption or authentication systems." SRPFJ § III.J.1 (emphasis added); Tr. at 6451, 6459, 6466 (Allchin). The provision will not excuse disclosures based upon hypothetical concerns of a security compromise. SRPFJ § III.J.1. If the "security issue" is truly unjustified, Microsoft will not be able to claim, much less establish, that release of the particular information "would compromise" security. SRPFJ § III.J.1. Having heard the testimony with regard to § III.J.1, the Court finds that Microsoft presents a legitimate concern with regard to protecting security and that there is insufficient evidence to establish that § III.J.1 is more broadly drawn than appropriate.

Plaintiffs' witnesses also criticized § III.J.2 of Microsoft's proposed remedy, asserting that it would enable Microsoft to discourage or delay disclosures required in other portions of Microsoft's remedy proposal. *See generally* Shapiro P 195; Barksdale P 136. The Court finds these criticisms to be vague and speculative. Plaintiffs' own economic expert acknowledged that the inclusion of the "some checks," such as those in § III.J.2, is "reasonable." Shapiro P 195. Absent more, the **[**472]** criticisms advanced by Plaintiffs' witnesses are insufficient to engender a conclusion that § III.J.2 undermines the affirmative obligations imposed in the remainder of Microsoft's remedy proposal.

IX. TERM OF THE DECREE

The parties offer limited evidence on the subject of the proper term for the remedial decree in this case. Plaintiffs' economic expert, Dr. Shapiro, testified that the "current strength and likely durability of Microsoft's monopoly" counsels in favor of "a relatively long" term for the remedy. Shapiro P 203. This lengthy term, argued Dr. Shapiro, is appropriate because, in the presence of network effects, entry into the market for Intel-compatible PC operating systems "may well occur through a multi-stage process." *Id. P 204*; Tr. at 3415 (Shapiro). Dr. Shapiro asserted that a decree which curtails Microsoft's ability to stifle competition in the monopolized market for a substantial amount of time will provide the necessary assurances to industry participants that attempts at entry into the market are worthwhile and will not be hampered by Microsoft. *See* Shapiro P 204; Tr. at 3415 (Shapiro). Based upon these assertions, Dr. Shapiro opined that five **[**473]** years is an insufficient amount of time in which to encourage competition in the monopolized market. *See* Shapiro P 204; Tr. at 3415 (Shapiro). Despite his conviction that more than five years is appropriate to permit new "technologies . . . to evolve," Dr. Shapiro did not offer any basis for a determination as to what number of years, if not five, would be more appropriate. Tr. at 3415-16 (Shapiro) ("I don't **[*240]** know how to say it really, whether five is the right number or eight or ten. . . . Ten is a round number. I can't say that its obviously better than eight.").

Notably, in his assessment of the appropriate term of the conduct restrictions imposed by this Court, Dr. Shapiro did not allude to the undisputed fact that the pace of development in the relevant industry is exceedingly rapid. In stark contrast, Dr. Murphy, one of Microsoft's economic experts, based his assessment of the appropriate term for a remedial decree almost entirely upon the rapid pace of development and change in the industry. Murphy P 242. Dr. Murphy observed that it is exceedingly difficult to anticipate the nature of the "important issues" in the industry five years from now, let alone ten. *Id.* Mr. **[**474]** Gates echoed this view, observing the dramatic change in the PC industry in the past ten years and predicted that the industry will experience still greater change in the ten years to come. Gates P 463.

Based upon this testimony, the Court finds that Dr. Shapiro's ultimate conclusion that five years is insufficient is flawed in that it does not take into account the unusually rapid pace of change in this industry. *See* Shapiro P 203. Dr. Shapiro correctly articulates a primary goal of the remedial decree-to foster competition-and appropriately raises the concern that the network effects [116] at play in the relevant market will make that goal difficult. *See id.* However, the network effects upon the relevant market do not necessarily outweigh consideration of the rapid pace of change in the industry. Indeed, Dr. Shapiro does not appear to have balanced the two in reaching his determination as to the appropriate term of the remedial decree. *See id.* Conversely, Dr. Murphy does not appear to have considered entirely the interaction between network effects and the rapid pace of technological development, and so, his testimony also is flawed in this limited respect. *See* Murphy **[**475]** P 242. In this regard, the evidence regarding the propriety of a five-year term rests in equipoise, and there is a dearth of evidence regarding the imposition of some term other than a five-year term.

[476] X. OTHER PROVISIONS IN PLAINTIFFS' REMEDY PROPOSAL**

---

[116] Judge Jackson explained network effects as follows:

> Consumer demand for Windows enjoys positive network effects. A positive network effect is a phenomenon by which the attractiveness of a product increases with the number of people using it. The fact that there is a multitude of people using Windows makes the product more attractive to consumers. The large installed base attracts corporate customers who want to use an operating system that new employees are already likely to know how to use, and it attracts academic consumers who want to use software that will allow them to share files easily with colleagues at other institutions.

Findings of Fact,84 F. Supp. 2d at 20, P 39. The appellate court referred to this phenomenon as the "chicken-andegg " situation: "This 'chicken-and-egg' situation ensures that applications will continue to be written for the already dominant Windows, which in turn ensures that consumers will continue to prefer it over other operating systems." *Microsoft, 253 F.3d at 55*.

Plaintiffs' proposed remedy includes a number of provisions for which there is no substantial counterpart in Microsoft's proposed remedy. In this portion of the opinion, the Court examines the factual testimony offered for and against the imposition of each such provision.

A. Plaintiffs' Proposed Remedy §§ 12, 14

In addition to § 15 of Plaintiffs' proposed remedy, Plaintiffs have proposed **[*241]** two other injunctive provisions that have the direct and indirect effect of divesting Microsoft of its valuable intellectual property assets. *See* SPR §§ 12, 14. Section 12 of Plaintiffs' proposed remedy requires Microsoft to "disclose and license all source code for all Browser software." *Id.* § 12. Plaintiffs' witnesses referred to this provision as a mandatory "open-source" of IE. When software is "open-sourced," the source-code for the software is made publicly available, often pursuant to terms which grant a license free of charge, with the proviso that any redistribution of the source code, whether modified or unmodified, must also be made publicly available for license free of charge. Tiemann PP 12-14, 33. **[**477]** For example, the Linux operating system, discussed *infra*, is open-sourced. *Id.* P 33.

Section 14 of Plaintiffs' proposed remedy also imposes a forced divestiture of assets upon Microsoft, but this provision is slightly different from § 12 in that it holds the possibility that Microsoft will receive some compensation for its intellectual property. This portion of Plaintiffs' proposed remedy obligates Microsoft to "continue to port or otherwise make available Office [117] to the Macintosh Operating System" and to "offer for sale, at an auction . . . [at least three] licenses to sell Office for use on Operating Systems other than Windows and Macintosh, without further royalty beyond the auction price." SPR § 14. Pursuant to § 14 of Plaintiffs' remedy proposal, the "winning bidders" at such an auction shall receive "all information and tools required to port Office to other Operating Systems." *Id.* Although the licenses to port Office will be auctioned, there is no guarantee that Microsoft will obtain substantial revenue from such an auction. Elzinga PP 79, 81; *see also* Tr. at 1044, 1051-52 (Tiemann).

[478]** Plaintiffs do not offer testimony which establishes a clear link between the liability in this case and the open source of IE or the required porting of Office. Instead, Plaintiffs' witnesses have testified somewhat generally that both provisions will affirmatively "lower" the applications barrier to entry, Tiemann P 85, and restore competition to the market. Shapiro P 86; *see also* Shapiro PP 101-04, 110-18; Tiemann PP 85, 87-95, 112. [118] In this regard, both Mr. Tiemann and Dr. Shapiro focus upon two existing non-Microsoft operating systems available for personal computers, namely the Linux operating system and Apple Mac OS, and the potential benefits which would accrue to these systems if Microsoft were divested of IE and forced **[*242]** to port Office. *See* Shapiro PP 98-101, 105-118; Tiemann PP 85-114. Dr. Shapiro identifies Apple and Linux as "the two most promising direct competitors" to Windows, Shapiro P 5, but Plaintiffs acknowledge that of the two, only Linux actually falls within the monopoly market of Intelcompatible personal computer operating systems. Pl. Prop. Findings of Fact P 32. In the relevant market, Linux has a market share of less than 2 percent. Tiemann P 31. **[**479]** In the *Findings of Fact*, Judge Jackson acknowledged the presence of Linux and observed that "Linux's open-source development model shows no signs of liberating that operating system from the cycle of consumer preferences and developer incentives that, when fueled by Windows' enormous reservoir of applications, prevents non-Microsoft operating systems from

---

[117] "Microsoft Office" is software which provides an "'office productivity suite,' which typically includes a word processor, a spreadsheet application, a database, and presentation software." Tiemann P 86; *see also* *Microsoft, 253 F.3d at 73*.

[118] Other witnesses testifying on behalf of Plaintiffs contend that the release of IE into the public domain will ensure that Microsoft does not use its control over the browser market to control other technology markets, such as the market for Web services. Schwartz P 159; Pearson PP 10, 48, 96 (asserting that § 12 of Plaintiffs' proposed remedy "ensures" that Microsoft will not "modify IE by adding proprietary or other non-disclosed protocols or extensions in such a way that they would prevent or degrade interoperability with non-Microsoft server operating systems."). These assertions reflect an attempt to argue either a new attempted monopolization claim or the previously court-rejected "monopoly-leveraging" theory of liability by extending that "leveraging" argument to emerging areas of technology. *United States v. Microsoft Corp., 1998 U.S. Dist. LEXIS 14231, 1998 WL 614485 (D.D.C. Sept. 14, 1998), at *26-28*. The Court therefore declines to enter factual findings relating to this testimony on the grounds that it is irrelevant. *See* Memorandum Opinion, Parts III.B.3.d, III.C.4; III.D.

competing." *Findings of Fact, 84 F. Supp. 2d at 23, P 50*. Judge Jackson observed more generally that "the open-source model of applications development may increase the base of applications that run on non-Microsoft PC operating systems, but it cannot dissolve the barrier that prevents such operating systems from challenging Windows." *Findings of Fact, 84 F. Supp. 2d at 23, P 51*. Michael Tiemann, Chief Technology Officer and Senior Executive of Red Hat, Inc., Tiemann P 1, the largest distributor of the Linux operating system, *id.* P 36, confirmed the continued accuracy of Judge Jackson's findings with regard to Linux and the open-source movement. Tr. at 1102 (Tiemann).

[480]** Despite the acknowledgment that Linux, on its own merits, has not shown the ability to compete with Windows for developer attention, Mr. Tiemann testified that the open-sourcing of IE and the auction to port Microsoft Office will enable Linux to mount a more promising challenge to Microsoft's monopoly. Tiemann P 85. Mr. Tiemann expounded upon the benefits which would accrue to Linux if it is able to support Microsoft Office, but did not contend that the portion of the applications barrier to entry which exists because of the success of Microsoft Office is attributable in any way to Microsoft's anticompetitive conduct. *See id.* PP 99-105. Similarly, Mr. Tiemann noted the success of IE and contended that its porting to Linux will "lower" the applications barrier to entry. [119] *Id.* PP 6, 106-107, 112. Yet, Mr. Tiemann does not explain how the direct porting of Microsoft applications, like Microsoft Office and IE, comports with the "middleware" theory of competition which gives rise to the liability in this case. Once again, the "middleware" theory, pursuant to which Plaintiffs prevailed, posits that third-party middleware which runs on multiple operating systems can overcome the **[**481]** existing applications barrier to entry by serving as a platform for other applications, such that the applications will run on any operating system where the middleware is present. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*.

[482] [*243]** It appears that §§ 12 and 14 of Plaintiffs' remedy have been proposed for the benefit of Linux, specifically Red Hat Linux, and to a similar-though lesser-extent, for the benefit of Apple. For example, if Red Hat purchases one of the auctioned Office licenses, as it plans, *see* Tiemann P 100, Red Hat will benefit from Microsoft's twenty years of heavy investment in Microsoft Office. Gates P 418. Such a benefit relieves Red Hat of the burden of developing its own office productivity suite. Red Hat would receive this benefit despite the fact that it has not devoted any effort or money to the development of an office productivity suite to compete with Microsoft Office and run on Linux. Tr. at 1034-35 (Tiemann). [120] Similarly, to make Microsoft's IE and Office technologies available on a Linux platform relieves Red Hat of the need to devote significant resources "evangelizing" or promoting the benefits of Linux to applications developers in an effort to induce developers to write applications for the Linux platform. *Id.* at 1021 (Tiemann). "Evangelizing" is an activity in which Red Hat scarcely engages, *id.*, despite the fact that it is recognized in the industry as one of the **[**483]** primary means by which to advance a platform, Tr. at 3555-56 (Shapiro). This evidence raises a concern that Red Hat looks to this proceeding as a means by which to alleviate some of the burdens inherent in vigorous competition.

The economic testimony presented in support of §§ 12 and 14 of Plaintiffs' remedy proposal focuses almost exclusively upon the benefit to particular competitors from the imposition of these proposed remedy provisions, specifically Red Hat Linux. *See* Shapiro PP 110-17. Dr. Shapiro conceded in his direct testimony that § 14a, which specifically requires that Microsoft continue to port Office to the Apple Mac OS "will not do a great deal to affirmatively enhance competition." Shapiro P 98. Rather, testified Dr. Shapiro, the provision would "assure actual

---

[119] Mr. Tiemann testified further that the divestiture of IE was an appropriate kind "justice" because, "Microsoft never had the right to the intellectual property of the dominant browser; they secured the rights to the dominant browser through illegal tactics." Tiemann P 113. Mr. Tiemann argued that "Microsoft should not be heard to complain when restoring the right to the dominant browser to the community." *Id.* Mr. Tiemann's position in this regard is unsupported. Mr. Tiemann does not offer or identify any empirical evidence which quantifies the success of IE and attributes that success to Microsoft's violations of *§ 2* of the Sherman Act. Contrary to Mr. Tiemann's unsupported implication, the precise factors which led to IE's present success are unclear on the existing record. *See* *Findings of Fact, 84 F. Supp. 2d at 98, P 358*. At a minimum, the present record belies this attempt to attribute IE's success *entirely* or predominantly to Microsoft's illegal conduct. *Id.*

[120] In this regard, the Court observes that if Microsoft Office is truly the "albatross around Red Hat's neck," Tiemann P 87, it appears it is so largely because of Red Hat's own business decisions. Tr. at 1034-35 (Tiemann).

and potential **[**484]** users of Apple computers that a very popular and important application, Microsoft Office, will continue to be available on Apple computers" and, thereby, "help prevent Microsoft from weakening a direct rival." *Id.* This testimony, similar to that offered by Mr. Tiemann, illustrates that Plaintiffs' remedy singles out particular participants in the industry and offers provisions which will ease the difficulty of competing against Microsoft for these participants.
